The Questions

What is the meaning of life?

What is the meaning of death?

Insights into the Mind of Madness

What is equal equal to?

*All men are created equal.

No

1 (Distinct individual)

= ?

1 or 0 or -9

Regardless, value of murderer = to the dead. Equal ≠ 1

∞ (priceless/unlimited value)

000000 000000

∞ or 0 or -∞

Murderer value may be = to dead. Equal may = process

∞ or 0 or -∞

Murderer value presently = to dead.
Equal = 0  No value
Equal may = ∞  Ultimate good
Equal may = -∞  Ultimate evil

Can a person have both no value
AND be ultimately good AND/OR
ultimately evil?  * Unknown.

Why does the value of a
person even matter?

* Justice

If people are ultimately good
or evil in value, then one may
suffer from injustice.

If life has no value:
- All is just
- Life and death are not determined.
- Any and all actions have no
  impact on anything.

Moral imbecils are those who side
with 0 or -∞. The ideals of society
are founded on +∞.
Why do persons commit to \( e^x = \infty \)?

All men are created equal, and all men are uncreated equal but in between there is inequality.

My mind: \( \infty \)

Life's fallback solution to all problems - Death.

Multiplying both sides of an equation by 0. When mankind can't find truth, untruth is converted to truth via violence \( X0 \).

\[ \text{problem} = 3 \quad 0 \times \text{problem} = (3) \times 0 \]

*based on an incorrect reason

\[ O = O \quad \text{problem solved} \]

\[ O = 0 \]

0. Violence is a false response to truth while giving the illusion of truth. This is widely understood with murder being unjust. However, mankind hasn't found a better alternative & there is still mass violence, war, and unfortunately these forms of violence are mistakenly still justified.

I have spent my entire life seeking this alternative so that the questions of how to live and what to live for may be addressed.
Alternatives to death:

1. Ignore the problem.
   If the problem or question doesn't exist, then the solution is irrelevant.
   Didn't work. Forms of escapism tried included rating, television, and alcohol.

2. Delay the problem.
   Live in the moment without concern for answering the problem at present.
   Didn't work. Pursued knowledge to increase the capacity for answering the questions with improved cognitive function.

3. Pawn the problem.
   If one can't answer the question, get someone else to answer it.
   Didn't work. Everyone else didn't know the solution either.

4. Love.
   Hate.

Despite knowing death is final and irrevocable, I couldn't find a working alternative to all of this.
Life is deadly than the questions...
Why should life exist?
What is the purpose of living?
Are they, irrelevant?

Self Diagnosis of Broken Mind

- Dysphonic mania
- Generalized anxiety disorder/Social anxiety disorder/ODD/PTSD (chronic)
- Asperger syndrome/Autism
- ADHD
- Schizophrenia
- Body dysmorphic disorder
- Borderline, narcissistic, antisocial, avoidant and obsessive compulsive personality disorder
- Chronic insomnia
- Psychosis
- Trichotillomania
- Adjustment disorder
- Pain disorder
- Restless leg syndrome
Symptoms attributed to
Self Diagnosis

- Cataract: Developed recently, often
  last for 3-5 hours in the middle of the
  day. If present in morning and I know
  it isn't particularly bad, can good myself
  to move by thinking "Bambi get up, you need
to get up."

- Excessive fatigue: Present since beginning
  undergraduate studies, can move but typically
  "need" to lie down for 2 hours.

- Isolationism: Removing myself from social
  settings, being around others is tiring with
  no apparent reason today; just an extreme
  form of introversion.

- Avoid social interactions. 99% of the time
  will not initiate a conversation. If
  discourse is unavoidable, avoid action;
  socially unacceptable responses will be short
  or in question form to have other person do
  the one talking.

- Brief periods of inactivity, actions are in
  hyperloop. Developed in last 3 months, occurs
  typically 3-4 times a week lasting all day, with
possible interlude of catatonia.

- Tiredness most of the time for about an hour, onset unknown.

- Quick fleeting movements in peripheral vision. Kind of like a light flicker, other times dark scratchy movement in peripheral vision like a crow or beetle. Occurrence rate usually 1 to 3 times per day/night. Onset unknown but >1 year ago when gaze is shifted to identify movement in source, or potential source for its reappearance.

- Proclivity to scan environment with no target or object in mind. Typically occurs alongside softly in a boring situation when someone is giving a presentation or otherwise rambling about frivolous information. Rate—often. Onset—child.

- Recurring return to mirror to look at appearance. Particularly attention focused on hair styling. 10+ times a day. Onset >1 year ago.

- Concern with teeth, only chewed with right side of jaw to preserve right side of teeth. Occurred as child and persisted after getting braces.
• Concern with nose, often duggy, a lot of mucus, runny nose, frequent sinus infections.
  When more interference with quality of living, anosmia is an issue. Include an anosmia as a diagnosis.
• Concern with ears. Can not hear very well.
• Concern with eyes. Imperfect biology led to nearsightedness, especially in dominant eye.
• Concern with neck. Suffered accidents as a child. Allergic reaction to tree sicker.
  Excessive stimulation in response to "most beautiful woman in world" I had read in a book. Other event - a stab of skin from away, did not heal. Results of accidents not prevalent to closed in appearance when erect.
• Inability to communicate what I want to say although I can understand it. Typically have an image in my mind but can't say images or draw them, would be nice if there was some form of technology to transfer the image.
• Difficulty in concentration or focusing on anything longer than 15 minutes. Used a
learning strategy of studying longer than watching TV and report very effective but only in addition.
Odd sense of self. Want myself to exist.
There is a biological me, which is driven
by biological needs, e.g., hunger, desire
To go eat, sleep, to drink, etc. The real
me is fighting the biological me, the reality,
namely thinking me does things not because
I'm programmed to, but bc I choose to. The
later battle I lost was when I finally succumbed
to falling in love. Eradicating the biological
program's code is very difficult to fight.

Can't fall asleep when I want to fall asleep.
Sometimes my legs and arms will twitch involuntarily
2-4 per month. Much more common is having
to adjust sleeping position ≥10+ times a
night. Lots of physical discomfort.

Random, no apparent cause. Stubborn back pain.
More typical is throbbing ache lower back pain.

Hair pulling. First was back of head at 9th/10th
-10th grade, when someone mentioned it was okay to
pick at your hair. Suffering - the high school period:
peak, early college, under then and later. Still suffer.
Recently eyebrows and eyelashes.

The observer, the self, the me who is in trouble.
The entire world with nuclear bombs. Then shifted to biological agents that destroys the mind. Most recently serial murder via cell phone stun gun & folding knife in national forests.

And finally, the last escape, mass murder at the movies. Obsession onset > 10 years ago. So anyway, that's my mind it is faster, I tried to fix it. I made it my sole conviction but using something that's broken to fix itself proves. Neuroscience point like the way to go but it didn't pan out. I'm in order to rehabilitate the broken mind my soul must be exorcised. I could not sacrifice my soul to have a "normal" mind. Despite my biological shortcomings I have fought and fought, always defending against predetermined and the fallibility of man. There is one more battle to fight with life. To face death, embrace the long standing habits of mankind and overcome all fear in certain death.
Crazy concepts

Futility
The mind is a prison of uncertainty.
Millions of cells guard it for eternity.
O, where art thou, master key?
Destroy the mind and be free.

Homo Sapiens
Garden of Eden → consume fruit of knowledge
→ cast out of utopia

Mythical Greek
Prometheus steals fire from gods → gives knowledge of fire to man → Eternal torture, eagle eating liver

Mythical German
Faust, trades soul to devil for knowledge & power

Nothing

Encyclopedic

As soon as man has known certain technical features of something, he must also know the encyclopedic of another.

Many words, but that is the beauty of it.
The Blind

Close your eyes, leave them closed, open them. The sightful knows when their eyes are open. The insightful know not whether they see with their eyes open or closed.

The Number Line

Weak       Average       Strong

The weak are most likely to perish in trying times. Likewise, the strong most likely to overcome.

Why do the AVG & str support the weak?

This is easily answered. In trying times the weak will fall. They act as a buffer. Furthermore, when the weak die the AVG & str become weaker.

Survival fitness is fixed when compared to MEN & WOMAN. But MAN VS MAN is relative.
Everything

Everything suffers the same paradoxical nature as nothing.

The Ripple/Butterfly Effect & Unity

Reference to the butterfly flapping its wings and causing a tornado half way around the world.

Space and time are intrinsically linked. Go ahead and attempt to visualize or understand time without some sort of matter description attached. Similarly space is nonexistent w/o time. Imagine space. You’ve probably imagined a snapshot a single Time point of physical objects.

Every being is a unique particle set of spacetime. Between or filler amongst beings establish continuity of the universe. Any action or lack of action ripples throughout the entire universe at a given spacetime. In one’s own selfish nature, we choose to view ourselves as distinct or separate from the universe. A single universe ourselves per se. This isn’t correct. We are all one unity. As such, there is no difference between life & death or spacetime. All
things, actions and phenomena are not multiple niggles. Instead the universe is a single unity preponderance of which we are each a part of. This may be unfortunate to some and result in the seeking of escape and attempt at reduction of unity into fractured entities. To me, this unity is infinitely complex. Much more preferable is a simple system. Unity through nil.

Why? Why?

Why? Why?

Why? Why?

Why? Why?

Why? Why?
Why?
Case the Place

Targets random, the cruel twists of fate are unkind to the misfortunate.

Method: Bomber X (too regulated & suspicious)
- Biological Warfare X (too involved, requires extensive knowledge, devices, and equipment)
- Serial Murder X (too personal, too much evidence, easily caught few kills)
- Mass Murder/Space V (maximum casualties, easily performed w/ fire arms, although primitive in nature. No fear of consequences, being caught 99% Certain)

Venue - Airport or Movie theater
- Airport X, substantial security. Too much of a terrorist history. Terrorism isn't the message. The message is there is no message. Just fools will misinterpret correlation for causation, namely, relationship and work failure as cause, with others exploiting cathode to act as a reason. The reason being my ticket of mind for the past 2 years.
The movie theater - Liruconide 116
- Isolated
- Proximal
- Large

What better place to case than that of an unconscious entertainment facility?

Southside of theater optimal
15 screens

Avoid
- Too many exits
- Wrong spatial location
- Very large

Clock-wise numerical organization

Primary target
- Only 3 exits
- Excellent spatial approach
- Not more remote
- No initial attack

Slightly smaller area
3 exits
Good yield location

Details
- Door entrance

10
12

*9

10 & 12 best targets in complex

- Only 2 exits
- Smells are huge
- Single door entrance
- Visibility marginal
- Only 2 range

- 4 exits
- Too visible
- Avoid
3 options of attack
- Start at 12:00
- Start at 10:45
- Start at smokers escape

Pros:
- Start at smaller area
- Can lock all doors at 10 increasing area

Cons:
- Starting point more conspicuous than others

Pros:
- Very inconspicuous
- Starting point
- Can burn smoke
- Many initial persons pocket in busy area

Cons:
- Can block double doors, many escapes

Pros:
- Least conspicuous, can feign need for smoke
- Can lock all doors, inflicting mass casualties in 10
- May re-enter and kill more on boil

Cons:
- Most prone for do not
- Lack of quick removal
- Real mummies (early warning)
- Time boor hallway is vitally
PM

The Shrinks

#1 Mel, last name unknown
#2 Lynne Fenton
#3 Robert Feustein

No family therapy w/ Mel. Revealed nothing, as to not appear weak amongst family.

Was a kid at time, para-suicide, mother wished, asked what happened replied after said. No further investigation. Very ill at death. Decided to what life to others since so that I could live.
1.5) Requested appointment for anxiety-obsessive disorder with anxiety in depression (diagnosis uncertain, possibly to avoid stigmatization referred to psychiatrist.

2) Immediately prescribed antidepressants (fast acting benzodiazepines, long lasting SSRIs-selective).

3) Seraflax (primarily antidepressant not anxiolytic.

Prevent building false sense of support. Speak truthfully and reflect incriminating questions. Oddly, they don't pursue or delve further into harmful omissions, attempt to see if can pass exams as myself and not by fear. Fail. I was fear incarnate. Love gone, motivation directed to hate and obsessions, which didn't disappear for no reason with drugs. No consequence, no fear, alone, isolated, no work for distractions, no reason to seek self actualization. Embraced the hatred, a dark knight rises.
Faith

What kind of GOD commands his people not to murder yet towers behind free will?

Reason

The reason why life should exist is as arbitrary as the reason why life shouldn't exist.
