Well I think we did the best we could and hopefully it will all work out and for the record Bruce I would like to let you know how much I appreciate what you are doing for michelle which will also help me out a great deal. Hopefully we can have a long term relationship. P.s. Thank you very much for the outfit from guess but you really didn't have to do that I love that little dog I am just really happy that Michelle is smiling and happy again I haven't seen her like this in a long time therefore thank you

hi guys--i know you are in your Chiefs Assembly in Winnipeg and you will get through it
Shawn -this is the clean water proposal i spoke to about on the phone last week-i think it has real merit -especially as a pilot project as suggested here
i am in ottawa next monday July 26--and if it was possible it would be great to meet with Roger--or both of you to discuss this project and the proposed energy dialogue --
and any pieces that need to be picked up after the Chiefs Assembly--bc

Dear Mr Carson,

Attempt number 2 sorry about that therefore as promised here is the quick proposal package that I have personaly put together for yourself in order to have the right knowledge in regards to our vision and philosophy. Thank you once again for taking the time out of your busy schedule to hear what we have to say in regards to helping the aboriginal communities accross Canada. Please do not hesitate to contact me directly by any of the means listed below.

Regards,

Nicolas Kaszap

Richard/Roger--I understand dinner is being set up for tomorrow evening with Minister and National Chief
I will be coming back to Ottawa from the World Energy Congress in Mtl tomorrow afternoon-so I can take part
On the water initiative-we had a very good meeting with Gail Mitchell and staff on tuesday-the govt has decided to fund the systems that the guys you met are involved with--govt actually has developed a funding protocol
So can we meet or chat tomorrow afterNoon about possible sites and access if that is possible--bc

The Ontario First Nations Technical Services Corp staff are in travel mode on Monday. They have a Tribal Council meeting in London next week. I also haven't heard from INAC Toronto if they got any direction from Gail or Gary Best's office regarding participating in this meeting.

We have to hold off until these folks are ready to teleconference. I'll keep you posted.

Subject:	RE: {Spam?} Re: {Spam?} Fw: First Nations - China strategy meeting in Vancouver - October 8, 9:30-noon

Your help in this is a necessity ,I believe--any idea when they will have identified the 3 ideal communities--
Patrick Hill from H2O has gone directly to the manufacturer to ensure what they are proposing as a solution is as fool-proof as possible
It would be great to have the reserves identified and approaches start this month -so they could do installations before the cold weather--bc

lked to Irving to get him to work with the INAC bureacrat to get the short list done and that H2O Pros can do some work to approach potential communities to generate the required proposal from the First Nation to the government. We can probably help with the connection between H20 and the communities involved.

Subject: First Nations - China strategy meeting in Vancouver - October 8, 9:30-noon

Hello Regina:

I am following up on your inquiry to Joanna Prince at our office on the First Nations China strategy meeting next week in Vancouver. The meeting came about as a result of the missions that the BC Chiefs have made to China over the last several years and the increase in the number of Chinese delegations that are coming to Canada for investment, trade, tourism, etc. We want to take advantage of this opportunity and we have requested the support of Mr. Woo Pau Yuen of the Asia Pacific Foundation. Their organization will host the strategy session next week. The confirmed attendees are Grand Chief Ed John, Dave Porter, David Emerson, Jack Austin, Woo Pau Yuen, Joseph Caron, Jiang Wenran, Wei Shao, Claire Marshall and me. It would be great if the National Chief could attend to provide his valuable insight. This concept could easily be shared at the national level and in fact this is one of the goals. We are happy to work with your office. Below is the objective and goals for this meeting.

Objective: Creation of a First Nations China desk in British Columbia:

Goals:

1. To take advantage of the increasing role of the Chinese government and industry as a leading investor in natural resource projects.

2. To develop First Nations policies for consideration by the Chiefs as to the rules of engagement for Chinese companies seeking to partner with First Nations.

3. To create a database of potential mining and energy (including bioenergy) projects that First Nations may be interested to create partnerships

4. Create a partnership with the National AFN on a National China Desk.

[redacted]ole of the First Nations China desk:

1. To act as a receiving desk for potential inquiries from China for natural resource partnerships.

2. To assist the leadership on economic and trade missions to China.

3. To liaise with the BC and federal governments on technical matters related to partnerships. For example several years ago Ottawa refused a takeover bid by a Chinese company that sought to purchase Noranda Mines. A First Nations partnership with the potential purchaser may have dealt with the matter of Canadian content.

The meeting will be held at the following location. If you have any further questions I can be reached at 778 887 0855.

Best regards,

Paul

The Asia Pacific Foundation of Canada, in conjunction with the First Nations Summit of BC, would like to invite you to a brainstorming session on:

[redacted]A First Nations-China Strategy for Building Relationships and Partnerships

on Friday Oct 8 from 9.30 am to 12.00 pm

at the Boardroom, Asia Pacific Foundation of Canada

220 - 890 West Pender Street, Vancouver, BC

Confirmed participants in this meeting include:

Mr. David Emerson

Grand Chief Ed John, First Nations Summit of BC

Mr Dave Potter, CEO, BC First Nations Energy and Mining Council

Mr Paul Blom, Natural Resources Director, BC First Nations Energy and Mining Council

Mr Yuen Pau Woo, President & CEO, Asia Pacific Foundation of Canada

[redacted]

We look forward to your participation in this meeting.

Please RSVP to Angie Hsu at: 604 630 1555 or angie.hsu@asiapacific.ca. Thank you.

Hi Gail,

I think that it would be improper to attend Water Group's facilities at this point and I'd certainly wouldn't want these folks to pay for our travel costs. The apparent sell job is pretty blatant in my view.

Doesn't appear that AFN has found any willing FNs per our earlier discussions with them. My new water engineer has analysed H20 Pros approach (she also attended the last meeting with AFN and H2O Pros) and is of the view that this type of water purification method could be performed by any number of private outfits. Should the Department still agree that a pilot or feasibility project is the way to go then the work should be tendered. I'd suspect that we'd get a fair price and better results if we went that way.

My two cents worth. Thanks.

Garry

Subject: water quality issues

Gail--the meeting we had at AFN offices a couple of weeks ago with Gary in attendance and Seb on the phone seemed to move this along quite a bit
i believe folks are trying to identify 3 types of reserves--one very

remote and challenging-one on wells and one on a piped water system
this variety of challenges will really test the point of use system-
Patrick Hill who heads up H2O PROS has been meeting with the world wide manufacturers of this type of system and their major manufacturing plant is in Regina
the manufacturer--Water Group--would like to arrange a tour of their plant and a briefing for everyone involved in this venture
wondering if it would be possible for Gary or Seb or both to travel to Regina on Oct 21 to see first hand how all of this works-
if appropriate Water Group would pay for the trip--wondering if this would be of interest to you-or your staff--bc-

To: Mitchell, Gail
Cc: Labelle, Sébastien
Subject: Re: Fwd: point of use water systems

Thanks, Gail. Seems like H2O Pros (John) and Bruce aren't exactly coordinated on this issue. Or they may be playing both sides against the middle. At any rate your previous email to John was quite clear - ie deal directly with the region (*Funding decisions related to infrastructure investments are made at the regional level and Mr. Payne is well placed to outline plans for the communities that you have been working with and how your system might address needs in those communities.*)

Would suggest, too, that Bruce, John, and Bing from AFN deal directly with MB Region and not ourselves at HQ. Seb made the point last week that the small system protocols are now firmly in place to deal with this matter from an implementation point of view and we should encourage their use.

Garry

>>> Gail Mitchell 11/29/2010 2:55 PM >>>

Garry

I have forwarded the request from H2O to Ron Payne - as it appears that most interest is coming from Manitoba.

Gail

>>> Bruce Carson <bacarson@ucalgary.ca> 11/29/2010 8:56 AM >>>

Gail and Gary--thanks to a lot of hard work on every bodies

part-starting with Gary and Irving identifying certain Bands and their

Reserves as ideal to test this technology

a critical mass of Bands have agreed to have point of use systems

installed by H20 PROS and in fact they are now receiving Band Resolutions

it is important now to identify next steps and map out the process

from now to installation

wondering if it was possible to meet either thursday or friday of this

week in order to define the forward path--look forward to meeting--bc

Bruce,

I will paste in the info I have so far. The dept (HQ) was skittish about singling out specific FNs so have provided a contact for someone you could contact directly. In the meantime, the contact with the region may provide something additional. If so, I will flip it along.

And for the record, I don't know what a franchise player is but I still despise those seal protesters and [redacted]tay active on the file as best I can. K

Here is the contact info in the Ontario govt: Chief Drinking Water Inspector and ADM of the Safe Drinking Water Branch John Stager John.Stager@ontario.ca.

As for FNs, they suggest contacting the First Nations Technical Services Corporation who could be well positioned to provide more detailed advice in terms of which First Nations might be interested and/or have an adequate level capacity to pursue H2O technology, as they run the Circuit Rider [redacted]ining Program in Ontario. The CEO is Bob Howsam (rhowsam@ofntsc.org)

Really appreciate our meeting last week-as I indicated it would be really helpful in getting a pilot

project up and running for the point of use systems if you could identify 2-3 bands or reserves that have water quality issues-affecting health -but also had some money in their capital projects budget to contribute to cost of installation

[redacted] Look forward to hearing from you and working on this project--also will keep you 2 posted as I work with the AFN on their Energy and Mining International Summit they are planning for the end of June--bc

Hi Bruce,

Our Ontario RDG (very strong and trusted) recommends you touch base with Bob Howsam - he's mentioned below. He would be best to help find what you are looking for. Because this is a business related issue, the dept didn't want to lock down any recommendations. I wish we could be more helpful.

[redacted]ed

>>> Bruce Carson <bruce.carson@canadaschool-ee.ca> 1/18/2011 8:36 PM >>>
This is great-will be helpful but if you could as said. Last week identify a couple which have water issues and some cash--that would be perfect--bc

Bruce,

I will paste in the info I have so far. The dept (HQ) was skittish about singling out specific FNs so have provided a contact for someone you could contact directly. In the meantime, the contact with the region may provide something additional. If so, I will flip it along.

And for the record, I don't know what a franchise player is but I still despise those seal protesters and stay active on the file as best I can. K

[redacted]Here is the contact info in the Ontario govt: Chief Drinking Water Inspector and ADM of the Safe Drinking Water Branch John Stager John.Stager@ontario.ca.

As for FNs, they suggest contacting the First Nations Technical Services Corporation who could be well positioned to provide more detailed advice in terms of which First Nations might be interested

and/or have an adequate level capacity to pursue H2O technology, as they run the Circuit Rider Training Program in Ontario. The CEO is Bob Howsam (rhowsam@ofntsc.org)

ISSUE

Media enquiry related to meetings with H2O Global representatives(14/03/2011)

KEY MESSAGES

We can confirm that Ms. Mitchell, along with members of her staff, have met with representatives of H2O Global on several occasions over the last several months to discuss issues related to water infrastructure on reserve.

Such meetings with stakeholders are a regular and essential part of departmental officials' activities, as they benefit from the perspectives and advice of technical experts, academics, and others, and discuss ways in which we can work together to ensure that significant progress is made in improving water conditions on reserves across Canada.

#161503

IF PRESSED ON CONTRACTS:

No contracts have been awarded to H20 Global Group as a result of these meetings. If pressed on what information was provided to H2O Global

We provided information on process and procurement of infrastructure in FN communities. INAC encouraged the representatives of H2O to speak directly with FN communities about their product since purchasing decisions are made by FN communities.

IF PRESSED ON MEETINGS WITH Minister/ministerial staff and Bruce Carson

INAC is aware of H2O's project and have provided information that they would provide to any firms that request it regarding planning process and procurement of infrastructure in FN communities.

The Minister's staff was informally briefed on what the proposed water project is about.

No contract has been awarded and no instructions to do so were ever exchanged.

IF PRESSED ON LOBBYING ACTIVITIES

Questions related to Mr. Carson's status as a lobbyist would be best addressed by Mr. Carson or the Office of the Commissioner of Lobbying of Canada
