

FinSpy Mobile is closing the gap of interception capabilities for Governments for most common **smart phone platforms**.

Specifically, organizations **without network or off-air based interception** capabilities can access Mobile Phones and intercept the devices with enhanced capabilities. Furthermore, the solution offers **access to encrypted communications** as well as **data stored on the devices** that is not transmitted.

Traditional tactical or strategic Interception solutions **Face challenges** that can only be **solved using offensive systems** like FinSpy Mobile:

- Data not transmitted over any network and kept on the device
- Encrypted Communications in the Air-Interface, which avoid the usage of tactical active or passive Off-Air Systems
- End-to-end encryption from the device such as Messengers, Emails or PIN messages

FinSpy Mobile has been giving successful results to Government Agencies who gather information **remotely from Target Mobile Phones**.

When FinSpy Mobile is installed on a mobile phone it can be **remotely controlled and monitored** no matter where in the world the Target is located.
