

OPEN LETTER TO THE MASSACHUSETTS LEGISLATURE: OPPOSE THE SO-CALLED "RIGHT TO REPAIR" LEGISLATION

As independent automotive service technicians, we urge you to OPPOSE the so-called "Right to Repair" bill.

The big chain auto parts retailers and their lobbyists are telling our customers and lawmakers we cannot fix cars and trucks without this legislation. That is absolutely NOT TRUE, and these false and misleading claims are hurting our businesses and our reputations.

WE CAN CURRENTLY REPAIR ANY CAR brought to us. Since 2002, our shops have had access to the same factory service tools and information available to the dealers - at the same price they pay. This legislation does NOTHING to help us with access or price.

The TRUTH is this legislation is NOT about automotive repairs at all. It's about multi-billion dollar global corporations scheming to access proprietary information from automakers so they can make cheap knock-off parts in places like China.

These global corporations have failed to get this legislation passed in several state legislatures and in Congress. Lawmakers nationwide have held countless hearings and debated "Right to Repair" but have rejected it every time. Why? Because this bill does NOTHING to help independent repair shops OR our customers.

Therefore, we – the undersigned – strongly urge you to oppose the "Right to Repair" legislation. It won't help Massachusetts repair shops or auto owners. It should be rejected once and for all.
