Our current inventory of alcohol wipes is 800 and are burn rate is 280/day. We currently have all our tubs of germicidal sani wipes out on the units and burn through tub of 160 wipes about every one day per unit. We had an order into our medical supply vendor for both supplies for delivery tomorrow but they were unable to fulfill either item.

Good morning,

Abdi is requesting a note to excuse him from work for 2 weeks because his immune system is low. He said Cargill is asking anyone with medical conditions to get a note from their doctor for 2 weeks paid leave due to the Coronavirus.

Can you please call him with an interpreter before 2:30pm. The number he gave me was

He did not want to leave the office without a note but I let him know that I could not provide that without talking to Tammy.

Thanks,  
Christine

Hi,

Mike has asked that we reach out to those that have outbreaks, letting them know we want to post some numbers. Let me know what you think.

Thanks,  
Mary

---

Hello, we wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

**Facility Outbreak Data by County**

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,

Mary

Attachments: [4-24-2020 UPDATE FAQ - E Issueses .pdf](#)

---

We've had a lot of calls from businesses concerned and confused about directions for non-critical businesses to reopen.

Here is what we'd like you to answer the question for the remainder of the day.

*Numerous questions are emerging as the state enters the Safer-at-Home phase.*

*Many non-critical businesses are overseen by the Department of Regulatory Agencies (DORA). While we recognize that there is pent-up demand to return to work in all aspects of the economy including those deemed "non-critical" under the Governor's Stay-at-Home Order DORA has stressed that if you are not currently operating as a critical service business you should not open your doors on April 27th. Governor Polis is expected to officially announce in the coming days the parameters for personal services businesses to re-open with strict precautions beginning on Friday May 1st.*

*Please note that the Governor's lifting of statewide restrictions does not relieve businesses from complying with local public health orders. There is potential for each of the counties within our jurisdiction to either be stricter than what is being released by the Governor or to apply for a waiver to the Governor for reopening local businesses. If you work in a community where county-specific orders extend restrictions on work or travel you will need to await the lifting of those local orders before you resume operations. In the meantime non-critical businesses may begin to prepare for reopening by*

- *Deep cleaning prior to reopening*
- *Planning how to operate while following social distancing guidelines*
- *Determining how to best screen/monitor staff's health and*
- *Finding a way to best document customer interaction for contact tracing (if needed)*

*Non-critical businesses should watch the Sunday press conference and then wait for further information from your local public health agency. Our website [www.nchd.org/qa](http://www.nchd.org/qa) will have the most up to date information regarding county-specific Safer-at-Home instructions.*

Updated FAQ attached. (Workplaces & Businesses > Reopening of Businesses)

Good morning. Thank you for the press release a few days back. Very helpful. As you know, President Trump has ordered meat plants to stay open. Do you have a response, considering the situation at Cargill in Fort Morgan? Is Colorado facing or anticipating any meat shortages -- or lulls -- as far as you now? Thank you. Vinny

**Subject:** Call with Deanna  
**Date:** Tuesday, April 21, 2020 12:25:53 PM

---

Hi, here is a quick update from a call with Deanna this morning.

I wanted to ask her if she had any additional information on Media Mapping on other outbreak facilities.

She sent me a document from JBS. I have added it our PI folder under guidance. She said it has a lot of internal processes, but might help us.

She also sent a document on media talking points from a mine that had an outbreak. She said she thought it might get us thinking.

She finished by talking about how the state was taking lead on the Sterling Correctional Facility outbreak. She said there will be a press release and she will send it to us once it has approval. If we get calls, we are just to forward any questions to their DOC PIO, Annie Skinner. her contact information is in the NCHD\_PIO contact folder.

Thaniks,  
Mary

Hi guys,

An employee called from Cargill, she would not leave her name but she did leave her number. She had multiple complaints and was pleading for help. She would not leave a complaint on the website with fear of losing her job. Would you please follow up. Her phone number is  
She is off of work today.

Thank you,  
Mickey

Good afternoon, Ben,

Trish McClain, our Public Health Director passed along your email asking about Cargill.

First, I want to make sure you have updated contact information for our agency. Mary Brumage and myself are the Public Information Officers for NCHD during our COVID response. Mary's email is [maryb@nchd.org](mailto:maryb@nchd.org) and her phone is 970-522-3741 ext. 1257. My information is michellep@nchd.or and my phone is 970-522-3741 ext. 1239.

In regards to Cargill, our investigation into exact numbers is ongoing but there are employees that have tested positive. NCHD is maintaining technical assistance to Cargill and other businesses in Fort Morgan to ensure protocols and practices are followed in order to keep their employees safe. We are working with Cargill management and our director along with other public health professionals were conducting a site visit this afternoon and I don't have any additional information to share with you at this point.

Thank you.

Hi, Trish –

My name is Ben Warwick, and I'm the Senior Assignment Editor at CBS4 in Denver. I tried reaching out to Jessa Sage, the listed PIO, but it seems the email address listed is no longer valid. We have gotten a report that at least one Cargill employee at the Fort Morgan plant has tested positive for COVID-19. Has NCHD received any reports about a positive case at the plant? What are the steps the county is taking to mitigate any outbreak at the plant? Please reply all as our Assignment Desk is copied on this email, and if possible forward the best email/contact information for you or your public information officer. Thank you so much.

**Subject:** Cargill is doing a great job!!  
**Date:** Monday, April 06, 2020 11:16:33 AM

---

I just spoke to Scott Reyez. They are kicking booty! When an employee calls in as a positive, the direct family members that work at the plant are sent home for the 14 day quarantine - and paid for those 14 days. He is even able to trace back carpooling and then those people are quarantined! He has a whole board that shows how the positives are intertwined.

They are able to space some of fab employees 6' apart but in some areas that is not possible. All fab employees are wearing a mask or scarf. Cleaning handrails and doorknobs every hour, lunch room has changed the seating so people are not gathering together, cleaning offices several times a day.

They are doing great. Scott and I will continue to report positives so he can take care of the plant and we can take care of the rest.

Tammy

Hello Ms McClain and Ms. Brumage:

Shelby Weiman in the governor's press office referred me.

What is today's status of operations at the Cargill beef plant to Fort Morgan?

Will it be closed for sanitation like JBS in Greeley or will it remain on reduced hours for the foreseeable future?

Thank you. Vinny Del Giudice, reporter, Bloomberg News Denver.

We've had several Cargill questions and rumors yesterday and today. Kandi also mentioned getting several calls on the Spanish line yesterday and Mickey said she has also got several Cargill calls. What would you like us to tell these callers? Should we transfer them all to both of you or can we give them some info?

"The health dept set up a testing site for Cargill"

"My family member was exposed to someone who was positive at Cargill- the positive case said the health dept said we have to get tested"

"I have to get tested because I work in food service for Cargill"

"Cargill sent home 50 employees with fevers"

Etc, Etc, Etc.....

Thanks,  
Christine

Good morning,

I wanted to give an update. I did a site visit to Cargill yesterday and also talked to the corporate health person about the benefits of testing. She had some questions I couldn't answer so I have her and the plant manager doing a conference call this afternoon with a CDPHE epi person to hopefully get those answered. Would it be possible to have someone from this group on that call--Chantelle (Cargill corporate health person) did ask me about capacity--how many tests/hour would be collected, how long would the testing site be active, turnaround time for results. I think Amanda can handle some of the test specific questions--PCR/etc but it may be helpful to have someone from this group on as well. It will be at 3pm today. Let me know and I can send you the invitation. Thanks! Trish

**Subject:** Cargill testing questions  
**Date:** Thursday, April 23, 2020 1:09:17 PM

---

Good afternoon,

The plant manager for Cargill in Fort Morgan called me today and they have some questions regarding testing. Who would be the best person to direct these to? These are the questions:

1. Would Cargill be able to get one of the Abbott Diagnostic rapid testing devices and what would be the requirements?
2. If rapid testing is not available, where would they send tests that they collect on site? I did say the CDPHE lab is accepting samples as well as Quest and LabCorp
3. They do have a 3rd party health care provider located in Fort Morgan (Marathon Health) that could assist with collection, however they are concerned about having adequate PPE and not sure how to procure adequate PPE since they may not be deemed a priority when it comes to distribution/supply chains
4. Not a question but just some information: Cargill would test any employee that was either symptomatic or had some risks identified from their screening tool--basically anyone that they would ask to either isolate or quarantine based on the current screening/temp checks they have in place for any staff coming into the plant.

I believe Cargill corp is having a meeting about this today so as I hear more I'll loop you in. Thanks! Trish

Hi Trish and Kate,

I'd like to connect you both for coordination on the Cargill outbreak.

Trish, Kate Greenberg is the Commissioner for the Colorado Department of Agriculture. You may have been introduced to her on an LPHA director call regarding Farmers Markets in the past few weeks, and she has a wonderful lens of understanding public health.

Kate, Trish McClain is the Executive Director of Northeast Colorado Health Department (Morgan, Logan, Washington, Yuma, Phillips, Sedgwick) and is whip smart! I'm glad you two are connecting!

Let me know of any ways I can be helpful.

Thank you both,  
Deborah

## Situation Report

### Colorado COVID-19 Response

**Incident Name: COVID-19 Support CO-COEM-I070**

## **Incident Type: COVID-19 Pandemic**

**EOC Activation Level: Level 1 - Activation**

**Operational Period: 04/30/2020 08:00 - 20:00**

---

The State of Colorado has established a Unified Command Center and will be putting out one daily Situation Report for information regarding the 2019 novel coronavirus (COVID-19).

**Distribution: Local Public Health Directors, Local Public Health Emergency Response Coordinators, Regional Staff/Epidemiologists, Healthcare Coalition Readiness & Response Coordinators, Division of Homeland Security and Emergency Management (DHSEM)**

If someone in your agency needs to receive this situation report, please forward the email to them, so they can click "sign up here" at the bottom of this situation report.

Additionally, all guidance is subject to change. For the most recent guidance, please refer to the Google folders or contact CDPHE.

---

### **Incident Summary**

CDPHE Department Operations Center (DOC) is consolidated at the State Emergency Operations Center (SEOC) to form the Unified Coordination Center (UCC). The UCC is operating Level 1 for the Colorado COVID-19 Pandemic.

4/9/2020: Governor Polis signed an Executive Order (D 2020 032) extending the Colorado disaster emergency declaration for COVID-19 for an additional 30 days from 4/8/2020.

3/28/2020: Governor Polis secured Major Disaster Status (DR-4498) for the Colorado COVID-19 Pandemic.

3/13/2020: President Trump declared the Coronavirus Disease 2019 (COVID-19) a pandemic an emergency declaration pursuant to section 501 (b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

3/11/20: Governor Polis issued a written State of Emergency for Colorado.

3/11/20: The World Health Organization (WHO) declared coronavirus (COVID-19) as a pandemic.

### **Safety and Security**

#### **Community Safety:**

The daily Colorado Department of Public Health and Environment (CDPHE) COVID-19 Pandemic case summary includes:

**Colorado Case Summary (Updated 4/30/20 at 4:00pm)**

Note: This summary only includes data through 4/29/20 and does not reflect cases since then.

- 15,284 cases\* (up by 526)
- 2,697 hospitalized (up by 76)
- 56 of 64 counties affected (no change)
- 72,390 people tested\*\* (up by 2,941)
- 777 deaths (up by 11)
- 159 outbreaks at residential and non-hospital health care facilities (up by 2)

*\*The number of cases includes people who have had a test that indicated they were positive for COVID-19. The number of cases also includes epidemiologically-linked cases -- or cases where public health epidemiologists have determined that infection is highly likely because a person exhibited symptoms and had close contact with someone who tested positive. The number of epidemiologically-linked cases represents a very small portion of the reported cases.*

*\*\*The total number of people tested may not include all negative results.*

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

Note: This information impacts the Health and Medical Lifeline

Government Services:

Currently 63 out of 64 Counties have declared local disasters.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

Alerts, Warnings, and Messages:

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

## Transportation

Mass Transit:

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

*Colorado Dept. of Transportation (CDOT)*

CDOT suspended its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

## Action Items

4/27/2020: Governor Polis released the Safer at Home Executive Order D 2020 044.

<https://www.colorado.gov/governor/news/gov-polis-issues-executive-order-safer-home> and

<https://covid19.colorado.gov/safer-at-home>

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-

19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

Note: This information impacts the Health and Medical Lifeline

Government Services:

Currently 63 out of 64 Counties have declared local disasters.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

Alerts, Warnings, and Messages:

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

## Transportation

Mass Transit:

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

*Colorado Dept. of Transportation (CDOT)*

CDOT suspended its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

## Action Items

4/27/2020: Governor Polis released the Safer at Home Executive Order D 2020 044.

<https://www.colorado.gov/governor/news/gov-polis-issues-executive-order-safer-home> and

<https://covid19.colorado.gov/safer-at-home>

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-

19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

### **Incident Summary**

CDPHE Department Operations Center (DOC) is consolidated at the State Emergency Operations Center (SEOC) to form the Unified Coordination Center (UCC). The UCC is operating Level 1 for the Colorado COVID-19 Pandemic.

4/9/2020: Governor Polis signed an Executive Order (D 2020 032) extending the Colorado disaster emergency declaration for COVID-19 for an additional 30 days from 4/8/2020.

3/28/2020: Governor Polis secured Major Disaster Status (DR-4498) for the Colorado COVID-19 Pandemic.

3/13/2020: President Trump declared the Coronavirus Disease 2019 (COVID-19) a pandemic an emergency declaration pursuant to section 501 (b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

3/11/20: Governor Polis issued a written State of Emergency for Colorado.

3/11/20: The World Health Organization (WHO) declared coronavirus (COVID-19) as a pandemic.

### **Safety and Security**

#### **Community Safety:**

The daily Colorado Department of Public Health and Environment (CDPHE) COVID-19 Pandemic case summary includes:

**Colorado Case Summary (Updated 4/28/20 at 4:00pm)**

Note: This summary only includes data through 4/27/20 and does not reflect cases since then.

- 14,316 cases\* (up by 437)
- 2,571 hospitalized (up by 86)
- 56 of 64 counties affected (no change)
- 67,094 people tested\*\* (up by 753)
- 736 deaths (up by 30)
- 149 outbreaks at residential and non-hospital health care facilities (up by 5)

*\*The number of cases includes people who have had a test that indicated they were positive for COVID-19. The number of cases also includes epidemiologically-linked cases -- or cases where public health epidemiologists have determined that infection is highly likely because a person exhibited symptoms and had close contact with someone who tested positive. The number of epidemiologically-linked cases represents a very small portion of the reported cases.*

*\*\*The total number of people tested may not include all negative results.*

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

Note: This information impacts the Health and Medical Lifeline

Government Services:

Currently 63 out of 64 Counties have declared local disasters.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

Alerts, Warnings, and Messages:

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

## Transportation

Mass Transit:

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

*Colorado Dept. of Transportation (CDOT)*

CDOT suspended its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

## Action Items

4/27/2020: Governor Polis released the Safer at Home Executive Order D 2020 044.

<https://www.colorado.gov/governor/news/gov-polis-issues-executive-order-safer-home> and

<https://covid19.colorado.gov/safer-at-home>

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-

19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

Alerts, Warnings, and Messages:

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

## Transportation

Mass Transit:

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

*Colorado Dept. of Transportation (CDOT)*

CDOT is suspending its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

## Action Items

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical

businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

## Situation Report

### Colorado COVID-19 Response

**Incident Name: COVID-19 Support CO-COEM-I070**

## **Incident Type: COVID-19 Pandemic**

**EOC Activation Level: Level 1 - Activation**

**Operational Period: 04/24/2020 08:00 - 20:00**

---

The State of Colorado has established a Unified Command Center and will be putting out one daily Situation Report for information regarding the 2019 novel coronavirus (COVID-19).

**Distribution: Local Public Health Directors, Local Public Health Emergency Response Coordinators, Regional Staff/Epidemiologists, Healthcare Coalition Readiness & Response Coordinators, Division of Homeland Security and Emergency Management (DHSEM)**

If someone in your agency needs to receive this situation report, please forward the email to them, so they can click "sign up here" at the bottom of this situation report.

Additionally, all guidance is subject to change. For the most recent guidance, please refer to the Google folders or contact CDPHE.

---

### **Incident Summary**

CDPHE Department Operations Center (DOC) is consolidated at the State Emergency Operations Center (SEOC) to form the Unified Coordination Center (UCC). The UCC is operating Level 1 for the Colorado COVID-19 Pandemic.

4/9/2020: Governor Polis signed an Executive Order (D 2020 032) extending the Colorado disaster emergency declaration for COVID-19 for an additional 30 days from 4/8/2020.

3/28/2020: Governor Polis secured Major Disaster Status (DR-4498) for the Colorado COVID-19 Pandemic.

3/13/2020: President Trump declared the Coronavirus Disease 2019 (COVID-19) a pandemic an emergency declaration pursuant to section 501 (b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

3/11/20: Governor Polis issued a written State of Emergency for Colorado.

3/11/20: The World Health Organization (WHO) declared coronavirus (COVID-19) as a pandemic.

### **Safety and Security**

#### **Community Safety:**

The daily Colorado Department of Public Health and Environment (CDPHE) COVID-19 Pandemic case summary includes:

**Colorado Case Summary (Updated 4/24/20 at 4:00pm)**

Note: This summary only includes data through 4/23/20 and does not reflect cases since then.

- 12,256 cases\* (up by 994)
- 2,366 hospitalized (up by 129)
- 56 of 64 counties affected (no change)
- 56,789 people tested\*\* (up by 4,465)
- 674 deaths (up by 122)
- 134 outbreaks at residential and non-hospital health care facilities (up by 4)

*\*The number of cases includes people who have had a test that indicated they were positive for COVID-19. The number of cases also includes epidemiologically-linked cases -- or cases where public health epidemiologists have determined that infection is highly likely because a person exhibited symptoms and had close contact with someone who tested positive. The number of epidemiologically-linked cases represents a very small portion of the reported cases.*

*\*\*The total number of people tested may not include all negative results.*

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

Note: This information impacts the Health and Medical Lifeline

Government Services:

Currently 63 out of 64 Counties have declared local disasters.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

Alerts, Warnings, and Messages:

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

## Transportation

Mass Transit:

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

*Colorado Dept. of Transportation (CDOT)*

CDOT is suspending its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

## Action Items

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical

businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### Confirmed Tier 3 Alternative Care Sites

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### Denver Convention Center

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized

patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Situation Report

### Colorado COVID-19 Response

**Incident Name: COVID-19 Support CO-COEM-I070**

## **Incident Type: COVID-19 Pandemic**

**EOC Activation Level: Level 1 - Activation**

**Operational Period: 04/21/2020 08:00 - 20:00**

---

The State of Colorado has established a Unified Command Center and will be putting out one daily Situation Report for information regarding the 2019 novel coronavirus (COVID-19).

**Distribution: Local Public Health Directors, Local Public Health Emergency Response Coordinators, Regional Staff/Epidemiologists, Healthcare Coalition Readiness & Response Coordinators, Division of Homeland Security and Emergency Management (DHSEM)**

If someone in your agency needs to receive this situation report, please forward the email to them, so they can click "sign up here" at the bottom of this situation report.

Additionally, all guidance is subject to change. For the most recent guidance, please refer to the Google folders or contact CDPHE.

---

### **Incident Summary**

CDPHE Department Operations Center (DOC) is consolidated at the State Emergency Operations Center (SEOC) to form the Unified Coordination Center (UCC). The UCC is operating Level 1 for the Colorado COVID-19 Pandemic.

4/9/2020: Governor Polis signed an Executive Order (D 2020 032) extending the Colorado disaster emergency declaration for COVID-19 for an additional 30 days from 4/8/2020.

3/28/2020: Governor Polis secured Major Disaster Status (DR-4498) for the Colorado COVID-19 Pandemic.

3/13/2020: President Trump declared the Coronavirus Disease 2019 (COVID-19) a pandemic an emergency declaration pursuant to section 501 (b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

3/11/20: Governor Polis issued a written State of Emergency for Colorado.

3/11/20: The World Health Organization (WHO) declared coronavirus (COVID-19) as a pandemic.

### **Safety and Security**

#### **Community Safety:**

The daily Colorado Department of Public Health and Environment (CDPHE) COVID-19 Pandemic case summary includes:

**Colorado Case Summary (Updated 4/19/20 at 4:00pm)**

Note: This summary only includes data through 4/18 and does not reflect cases since then.

- 10,447 cases\* (up by 341)
- 2,003 hospitalized (up by 123)
- 56 of 64 counties affected (no change)
- 48,704 people tested\*\* (up by 1,238)
- 486 deaths (up by 37)
- 119 outbreaks at residential and non-hospital health care facilities (up by 6)

*\*The number of cases includes people who have had a test that indicated they were positive for COVID-19. The number of cases also includes epidemiologically-linked cases -- or cases where public health epidemiologists have determined that infection is highly likely because a person exhibited symptoms and had close contact with someone who tested positive. The number of epidemiologically-linked cases represents a very small portion of the reported cases.*

*\*\*The total number of people tested may not include all negative results.*

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

Note: This information impacts the Health and Medical Lifeline

Government Services:

Currently 63 out of 64 Counties have declared local disasters.

## Health and Medical

### Medical Care:

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites will only accept patients who are being transferred from hospitals and health care facilities - the sites will not be open for members of the public seeking medical care or diagnosis.

How the medical surge system works:

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below

critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.

4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

#### **Confirmed Tier 3 Alternative Care Sites**

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### **Denver Convention Center**

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### **The Ranch, Larimer County Fairgrounds and Events Complex**

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### **Public Health:**

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

4/5/2020: The Governor's Expert Emergency Epidemic Response Committee recommended the State's Crisis Standards of Care plan (CSC Plan), which was verbally adopted by the Governor.

#### **Communications**

##### **Alerts, Warnings, and Messages:**

##### **Public Information:**

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

#### **Transportation**

**Mass Transit:*****Regional Transportation District (RTD)***

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus> - Last Updated: 04/10/2020 11:29am

***Colorado Dept. of Transportation (CDOT)***

CDOT is suspending its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. (Last update 4/18/2020)

**Action Items**

April 17, 2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

April 8, 2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

## Action Items

April 8, 2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

April 17, 2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

## Cargill- Fabrication

New address:

Reports feeling sick since 4/1/20 but Cargill made him work because he did not have a fever. States he went to CPMG on 4/6/20 for check up and had routine labwork. States labwork was normal and they told him he was "picture perfect health."

He then describes having symptoms of a heart attack while working at Cargill on 4/14/20 and was sent to hospital in Fort Morgan. He was later transferred to MCR where they placed a stent and tested for COVID-19. In his words "Corona caused me to have a heart attack and shut my heart down. I was picture perfect health before."

He has a telehealth follow up visit with MCR on 5/1/20 scheduled.

He was upset because Cargill was only checking temps and not sending people home for other symptoms. He said Scott from Cargill assisted with heart attack symptoms while at work on 4/14.

**Subject:** Re: Concern about Death Counts  
**Date:** Monday, May 04, 2020 2:21:35 PM

---

Thanks Michelle, that's what I was figuring. She was a little upset at first but after our conversation she thanked me for the work we do, so I would say that was a successful conversation! And thank you! I appreciate it! Thank you for all that you do!

On Mon, May 4, 2020 at 2:17 PM Michelle Pemberton <[michellep@nchd.org](mailto:michellep@nchd.org)> wrote:

Mary is right, Conner. You handled this perfectly! We actually have a note below the deaths now that talks about the fact that deaths will not appear on our website until the death certificate has been processed by CDPHE. Depending upon circumstances this process could take a few days.

FYI - in this case Logan County Coroner (Dave Tennant) gave us a courtesy call last Friday before it became public but he was getting in touch with the daughter as well and the mortuary (whoever that was going to be) would probably be the one submitting the death certificate to the state so it could take a few days.

Thanks for all you are doing, Conner! You are doing great work and I believe EH has had it the hardest because you are dealing with the businesses and you are down one with Teena's retirement. I know you are appreciated but you might not be told so I wanted you to know you are appreciated! You are doing a great job! Thank you!

Hello Gals,

I received a call from a concerned citizen about the Logan County Death Count on our website. She was concerned because she saw on the news that one of the inmates at the Prison in Sterling died of COVID and it wasn't showing up on our death counts for Logan County. I told her I understood her concern and that there are a number of reasons that the website may not be showing that death yet, that we generally update it with what is reported and that it may take a few days to register on our counts. She understood and just voiced her concern that information is very important to the public. I offered to get her in touch with whomever updates the case and death counts but she was content. I thought this was in the website/PIO area so I should let you know.

Thanks for all you do!

---

This document must be circulating widely among first responders... I've gotten it forwarded to me from four different people so far this evening from three different counties.

The dispatch center here in Sterling called and asked about it again - and said they have a regular conference call with a number of 911 centers in the state, and are being told that Tri-County Health Dept and either Boulder or Broomfield (cant remember what she said) are sharing address information with the 911 centers that they are logging into their CAD systems.

I know what your position is, and I would just ask for some additional consideration on the matter, given this information. I personally believe that public health has just as much of an obligation to do everything we can to protect the health and safety of first responders, as we do to protect patient privacy. As this draws on, and as we start to have more EMS and law enforcement personnel exposed, it genuinely does pose some very serious concerns and ramifications for pretty much all of these small communities.

I'm just going to be frank with you, as I would hope that you expect me to be... as you know, I've gotten a number of calls and emails over the past couple months about this, and I gotta be real honest, it is difficult to defend our position when these agencies are as genuinely impassioned and concerned about the safety of their personnel as what NCHD is being about the privacy of our cases.

I think that sharing some amount of information can be done smartly, and I think we need to put some trust in our partners to safeguard the information appropriately.

-Mike

So, as you already know, this meets our criteria (2 or more positive residents) for a CONFIRMED outbreak and will be added to our official CDPHE (webpage) stats (aggregate count) tomorrow. It will also be reported to the State Emergency Operations Center which will be releasing facility names at some point.

Hi,

Does this sound okay to you?

Hello, we wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

**Facility Outbreak Data by County**

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,

Mary

The Northeast Colorado Health Department would like to host a weekly standing COVID-19 response coordination call with partner organizations from across our six counties. It is important that we all partner together in this response -- and to that end we want to make sure everyone understands NCHD's preparedness activities and response actions, and we want to make sure to give all of you an opportunity to talk about yours and to talk through any questions or concerns anyone may have.

An agenda will be emailed out prior to the meeting.

We will be recording this call and will make it available to anyone who might not be able to join due to scheduling conflicts.

**Date:** Monday, April 27, 2020 1:44:33 PM

---

Good afternoon, Elise,

So far the effect on staff at the Sterling Correctional Facility has been minimal. We are continuing to monitor the COVID-19 cases within the community.

Since April 16, NCHD has coordinated with the Sterling Regional MedCenter (SRMC), the Logan County Emergency Manager and other local officials regarding this situation. SRMC had already been working with the Department of Corrections prior to the conversation we had with all parties on April 16. Steps taken by the Sterling Correctional Facility have been effective in protecting staff members thus far. SRMC has a Surge Plan in place but have had no unusual concern about the effects they may see as a result of the outbreak at the Sterling Correctional Facility.

Please let me know if you have any further questions or concerns.

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health Department had a few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at 512-289-1024.

Thanks,  
Elise

Eben Ezer Lutheran Care Center in Brush has prepared a press release and NCHD assisted to send it to the media this morning.

Mike thought it might be a good idea for all staff to be aware.

Alli, you might want to prepare some guidance for staff in case they receive calls with questions.

Thank you.

Good Morning,

Eben Ezer has restricted all non-essential visitors from visiting our campus, are actively screening all employees for temperature of 100.4 or higher or have a sore throat, new or worsening cough and new shortness of breath, limiting vendors to specific drop locations for supplies and screening them for symptoms. Our current and foreseeable needs are staff and PPE supplies.

Thank you

**Date:** Wednesday, April 15, 2020 9:50:59 AM

---

Upon arrival to the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. All staff are provided masks and/or face shields depending on their position. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services

staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, quaternary ammonia is used to disinfect (it is approved to be food safe). In common areas and offices there is a combination of applied disinfectant as well as fogging (Decon 7 and Pure) that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Here are my notes, it's what I covered in the call today but thought it may be helpful for you to have in written form. Thank you!

Upon arrival at the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Shelly,

I asked Mike Burnett when I got back into our DOC about whether EMS is transporting patients who are positive for COVID and have a DNR. He said that while the NE RETAC did report on the Crisis Standards of Care EMS Document being signed at today's meeting, he recommends you contact your local EMS to check on what their specific policy is about this.

Here is the link to the document referenced: [https://drive.google.com/file/d/1iE15ZO1\\_48-kcA\\_-gGZJ2D9HZhw2TuIA/view](https://drive.google.com/file/d/1iE15ZO1_48-kcA_-gGZJ2D9HZhw2TuIA/view)

---

Chiefs and Sheriffs:

We are in uncharted territory in northeast Colorado with regard to the idea of enforcing the current public health orders which have closed or otherwise restricted certain businesses, and required citizens to stay-at-home except under specific circumstances.

Following the guidance recently provided by the Colorado Attorney General's office, NCHD is preparing a process which we will launch probably in the March 30-31 timeframe, to be able to accept and investigate initial reports of non-compliance from members of the public (probably through our website - but details will be provided once our process is finalized).

Obviously the first step, as advised by the AG, will be for us to reach out and attempt to provide some education to the parties involved, regarding the importance of complying with the orders. But as indicated in the attached AG letter to law enforcement agencies, it may become necessary in some instances for us to ask for your help in assisting with additional enforcement efforts.

In that regard, we would like to ask you all to please familiarize yourselves with these four attachments and the AG's press release copied below:

1. Letter from AG providing guidance to LE agencies
2. FAQ on enforcement
3. Business closure public health order
4. Stay-at-home public health order

Our Environmental Health staff has already spent many days reaching out to local businesses in all six counties and providing them with education and consultation on how the orders affect them.

After the governor announced in yesterday's press conference that people should contact their local public health agency (LPHA) to file complaints, we began receiving calls from the public. While we certainly hope that legitimate complaints will be few and far between, it is clearly in our best interest to have a process in place and all be on the same page with regard to how best to resolve any potential issues.

We appreciate and respect your partnership in these tough times! I'll be reaching out again, once our process is finalized and in place.

In the mean time, if you have any questions or concerns, please feel free to reach out to me (contact info below) or to Trish McClain, who is our Public Health Director:

Date: Sat, Mar 21, 2020 at 12:32 PM

Subject: **RELEASE: State officials urge Coloradans to follow state public health order, outline enforcement process**

Hello LPHA Directors,

Please see the news release below and attached information related to enforcement of public health orders. The Attorney General's Office wants to emphasize that they are available for technical assistance for enforcement issues for local public health partners, your county attorneys, and the local DAs. They set up an email address for you to communicate with their office: [covid19-support@coag.gov](mailto:covid19-support@coag.gov).

Huge thank you to the AG Office team for providing this additional information!

This evening's Daily Update will follow later today.

Thank you all,  
Deborah

FOR IMMEDIATE RELEASE

**State law enforcement and public health officials urge Coloradans to follow state public health order during coronavirus emergency**

*Enforcement guidance includes voluntary compliance, stronger action when necessary*

March 20, 2020 (DENVER, Colo.)— State officials today provided guidance to local law enforcement and local public health agencies on enforcing the state public health order that the state health department issued earlier this week to protect Coloradans from the widespread transmission of COVID-19.

Officials from the Attorney General's Office, the Colorado Department of Public Health and Environment (CDPHE), and the Colorado Department of Public Safety are urging Colorado residents to exercise civic and personal responsibility and voluntarily comply the public health order. Leaders from these state agencies, however, said they will use their authority under state law to enforce the order when necessary and appropriate.

"The State has taken decisive action to protect Coloradans from the spread of COVID-19. We understand that residents may feel anxious or frustrated by limits on gatherings or closures of businesses and institutions around the state," said Attorney General Phil Weiser. "Our expectation is that residents will respect their fellow Coloradans, use good judgment and follow the public health order. When necessary and appropriate, however, we will work with our state and local law enforcement partners to ensure that residents obey the order."

"The gravity of the public health orders are appropriate for the gravity of this situation," said Jill Hunsaker Ryan, executive director of CDPHE. "The transmission of COVID-19 is an event unlike anything we have seen and we must take dramatic precautions to save lives. These policy decisions are grounded in science and what has been learned from other countries and states. The swifter and more decisively we act, the greater the possibility that we can flatten the epidemiological curve, preserve the availability of hospital beds for those who need them, and eventually return to normal life."

Earlier this week, the executive director of CDPHE issued [Public Health Order 20-22](#) Closing Bars, Restaurants, Theaters, Gymnasiums, Casinos, Nonessential Personal Services Facilities, and Horse Track and Off-Track Betting Facilities Statewide. The order went into full effect on March 19, 2020, and remains in effect until April 30, 2020, unless it is extended in writing by the executive director.

Under Colorado law, it is unlawful for any person, association, or corporation to willfully violate, disobey, or disregard the provisions of the public health laws or the terms of this or any other public health order. Any person who violates the order may be subject to civil and criminal penalties.

Residents who suspect that someone is violating the order should first contact their local public health agency to report any concerns. Residents may also file a report with the Attorney General's Office at [covid19@coag.gov](mailto:covid19@coag.gov) if local law enforcement or a local public health agency is unresponsive.

For more information about public health orders and how they are enforced [click here](#).

Hello all,

Just a small update. Under **Complaints about Businesses Violating Public Health Orders** it should have Mickey George x2226, as she is back today. So, if you could send those calls to her versus Amber that would be great! The updated FAQ + Extensions List is attached.

Also, Josie G is Teleworking today. She has assured me that if she gets a COVID Spanish message on her voicemail it will be sent to her email, and she will follow-up.

Thanks for doing great work! Any questions, just let me know.

---

As the situation develops in Weld and Morgan County, here is a warning order for potential National Guard testing sites.

Weld County: potential testing on Tuesday for Community Corrections and jail. Approx 250-300 pax. Awaiting confirmation from Dr. Wallace, Weld County Dept Public Health & Environment Director. If it's a go, then need:

- 1) Location(s) - Weld
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - WCDPHE
- 4) Arrangements for security/traffic control - Weld/SEOC
- 5) PIO - Weld
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

Morgan County: potential testing of Cargill employees this week. Pax numbers unknown. Awaiting decision from Trish McClain, Northeast Colorado Health Department. If it's a go, then need:

- 1) Location(s) - Morgan
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - NCHD/CDPHE
- 4) Arrangements for security/traffic control - Morgan/SEOC
- 5) PIO - Morgan
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

CONG - BPT operate two sites simultaneously. Send feasibility of doing two and capacity at each if there are two to SEOC NLT Monday 1600

More to follow

MJW

**To:** Monaghan - CDPHE, Deborah <[deborah.monaghan@state.co.us](mailto:deborah.monaghan@state.co.us)>  
**Cc:** Regional Epi List

<

Hello all,

Here is the guidance from the CDPHE Epi/Ops group:

## Summary of HAN Guidance

- Provides clarification about the guidance on travel to Eagle, Gunnison, Pitkin and Summit as it pertains to health care workers (HCWs) and HCW exclusion
- Brief summary of the Colorado Springs bridge tournament situation
- Clarification of current recommendations for testing, isolation and quarantine in long term care facilities (and a link to the new LTCF guidance on the CDPHE website)
- New guidance on release from isolation for the general public and for HCWs including non-test-based options for both categories
- New return to work recommendations for HCWs from CDC

## Disease Reporting

- Today we became aware of errors in communication in disease reporting that resulted in several individuals receiving incorrect results. We are working with the lab to reconcile reports and correct the misinformation provided. These errors occurred with the rapid increase in testing and reliance on manual processes. As we move to regular lab approval procedures and reporting through ELR into CEDRS, we don't expect this to be an ongoing issue.
- IDRPs and the lab are pushing the backlog of cases into CEDRS beginning today. Cases with a 3/17 report date reflect both NEW cases reported today and cases previously reported. For cases previously reported, the report date will be corrected.
- Positive cases will now primarily be reported to LPHAs when positive tests are imported into CEDRS from electronic lab reports from CDPHE lab and commercial labs.
- Check CEDRS frequently throughout the day for new cases. Make sure that you have redundancy in your agency for monitoring CEDRS.
- Regularly update CEDRS records to complete information on onset date, hospitalization, outcome, and whether or not cases are a resident of a long term care facility.

- A surveillance form will be added soon that will include variables for ICU admission, transmission type (person-to-person, community, travel, etc), and county where exposure occurred.
- County where exposure occurred only needs to be completed for cases who are identified and investigated in Colorado but are not Colorado residents. For these cases, please select “out of state” for the event county and on the surveillance form, select the county where the person was staying where the exposure is thought to have occurred.
- Symptomatic contacts to lab-confirmed cases should be entered into CEDRS as probable cases.
- Public case counts are available at [covid19.colorado.gov](https://covid19.colorado.gov)
- Current case definitions:
  - Confirmed case - positive lab test
  - Probable case - epi-linked to a confirmed or probable case with compatible symptoms OR case with compatible symptoms with 2 indeterminate lab tests
  - Suspect case - this case designation in CEDRS is a placeholder for cases with 1 indeterminate test while the second test pending. These cases do not require public health investigation. If the second test is either positive or indeterminate the case definition will change to probable or confirmed and the case can be investigated at that time. If the second test is negative the case will be marked as not meeting case definition and deleted.

### **Case/Contact Interview Prioritization**

- Prioritize interviews of known high risk cases and controls (hospitalized,  $\geq 65$ , health care workers, long-term care facility residents, individuals with underlying conditions)
- Your CDPHE epi team is available for consultation and facilitating communication between jurisdictions.

- Travelers
  - We are no longer sending out travel notifications for high-risk areas
  - We will only be notifying counties of travelers with known airplane and cruise ship exposures.
  - Colorado residents from the Grand Princess cruise that are currently in quarantine in federal facilities will be returning to Colorado this week - all are asymptomatic. CDPHE will provide quarantine letters and follow up at the end of their quarantine period. We will notify counties of their residents who are returning and more information about timing for situational awareness.

### Community Mitigation

- Local public health agencies should contact Ben Henderson ([benjamin.s.henderson@state.co.us](mailto:benjamin.s.henderson@state.co.us)) to help with community mitigation planning issues, such as business concerns about closure, policy decisions, etc.
- Colorado Department of Public Safety - Division of Criminal Justice reached out to us about planning for community correctional facilities. These facilities will be reaching out to LPHAs for planning purposes.

If you have any questions, please reach out to Nisha Alden ([nisha.alden@state.co.us](mailto:nisha.alden@state.co.us)).

Good morning Vinny,

Cargill in Fort Morgan continues to operate and I believe JBS in Greeley reopened earlier this week. I am not in a position to forecast meat shortages but have not heard of any concerns regarding this on the calls/information that I have access to. Hope you are doing well. Thanks! Trish

Hi, here is a quick update from a call with Deanna this morning.

I wanted to ask her if she had any additional information on Media Mapping on other outbreak facilities.

She sent me a document from JBS. I have added it our PI folder under guidance. She said it has a lot of internal processes, but might help us.

She also sent a document on media talking points from a mine that had an outbreak. She said she thought it might get us thinking.

She finished by talking about how the state was taking lead on the Sterling Correctional Facility outbreak. She said there will be a press release and she will send it to us once it has approval. If we get calls, we are just to forward any questions to their DOC PIO, Annie Skinner. her contact information is in the NCHD\_PIO contact folder.

Thaniks,  
Mary

Hi, Trish –

My name is Ben Warwick, and I'm the Senior Assignment Editor at CBS4 in Denver. I tried reaching out to Jessa Sage, the listed PIO, but it seems the email address listed is no longer valid. We have gotten a report that at least one Cargill employee at the Fort Morgan plant has tested positive for COVID-19. Has NCHD received any reports about a positive case at the plant? What are the steps the county is taking to mitigate any outbreak at the plant? Please reply all as our Assignment Desk is copied on this email, and if possible forward the best email/contact information for you or your public information officer. Thank you so much.

**Subject:** Fwd: Cargill testing questions  
**Date:** Friday, April 24, 2020 5:30:52 PM

---

Hi Tyler

I asked the state the questions you and I discussed about testing, you can see their answers below. The survey form that is linked below is for a community testing center--we may be able to have Marathon act as a CTC. Currently testing supplies for the NP swabs are coming through NCHD to send out to community partners. These swabs have to go back to the CDPHE lab but if you end up using a commercial lab, they would need to provide the test kits as the viral medium used in the swabs we are receiving was developed at CDPHE and may not be compatible with other labs' testing equipment. I hope this helps as you and your team look at your options. Let me know what else I can do to help. Trish

Hi Trish, see answers in Red. Maren, there is one question about PPE I thought you may have more information about.

On Thu, Apr 23, 2020 at 1:09 PM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

Good afternoon,

The plant manager for Cargill in Fort Morgan called me today and they have some questions regarding testing. Who would be the best person to direct these to? These are the questions:

1. Would Cargill be able to get one of the Abbott Diagnostic rapid testing devices and what would be the requirements?

**There should be Abbott Dx testing matching in Sterling**

2. If rapid testing is not available, where would they send tests that they collect on site? I did say the CDPHE lab is accepting samples as well as Quest and LabCorp

**Yes, either CDPHE or other commercial labs are fine to send tests to.**

3. They do have a 3rd party health care provider located in Fort Morgan (Marathon Health) that could assist with collection, however they are concerned about having adequate PPE and not sure how to procure adequate PPE since they may not be deemed a priority when it comes to distribution/supply chains.

**We might have PPE for outbreak response. Maren, would you be able to answer this one?**

4. Not a question but just some information: Cargill would test any employee that was either symptomatic or had some risks identified from their screening tool--basically anyone that they would ask to either isolate or quarantine based on the current screening/temp checks they have in place for any staff coming into the plant.

I believe Cargill corp is having a meeting about this today so as I hear more I'll loop you in. Thanks! Trish

Hi Trish,

Luke Runyon here again from KUNC. Hope you're doing well.

I'm writing with an interview request. I'm working on a story about worker safety in meatpacking plants for NPR, and I'm going to focus most of my attention in the story on the Cargill and JBS plants in Fort Morgan and Greeley.

Because you recently toured the plant in Fort Morgan, and have been in touch with the company, I'd like to arrange an interview to talk about that experience.

I'm hoping to wrap up the story by Thursday evening. Let me know if you're able to talk this afternoon, tomorrow or Thursday morning.

Thanks,

Luke

**Subject:** Re: COVID-19 cases in Morgan County

Good afternoon Luke,

My team and I have been working on a press release to discuss the increase in positive cases in Morgan County. At this point, one of the major factors is that there is more testing going on in Morgan County, thus we are seeing more positives. I did reach out to Cargill and part of their response is as follows:

*At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.*

I've also copied Daniel Sullivan on this email as he is the Cargill Media Director for their Protein operations. He could give you more information on the plant in Fort Morgan. I've also copied Michelle and Mary, they are the Public Information Officers for NCHD and would be happy to make sure you are on our list for any press releases that we do. Thanks again for contacting us. Trish

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health Department had a few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at 512-289-1024.

Thanks,  
Elise

Here are my notes, it's what I covered in the call today but thought it may be helpful for you to have in written form. Thank you!

Upon arrival at the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, googles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

## Gov. Polis Presents Key Indicators That Will be Considered in Modifying Colorado's Social Distancing Guidance

**DENVER** - Governor Jared Polis announced the key indicators that are guiding Colorado's process for ongoing updates to policies, guidance, and requirements on statewide social distancing measures. These will be used to get the state through COVID-19 pandemic while minimizing loss of life and further economic disruption.

**"Coloradans have done an amazing job of staying at home. Staying at home whenever possible is likely to remain one of the most important, if not the most important tool we have to flatten the curve and save lives. But we also know that we are in this for the long haul. It is likely to be many months until there is a vaccine or herd immunity, and we need a way of life that is sustainable psychologically and economically while meeting the health goals spelled out today,"** said Gov. Jared Polis. **"As we reopen our state, we know that things will work differently than they did before, and we must enshrine social distancing in the way we live, work, and play in a sustainable way for a matter of months. The science and data will provide the information we need to adapt our policies to build upon what works and change what isn't working."**

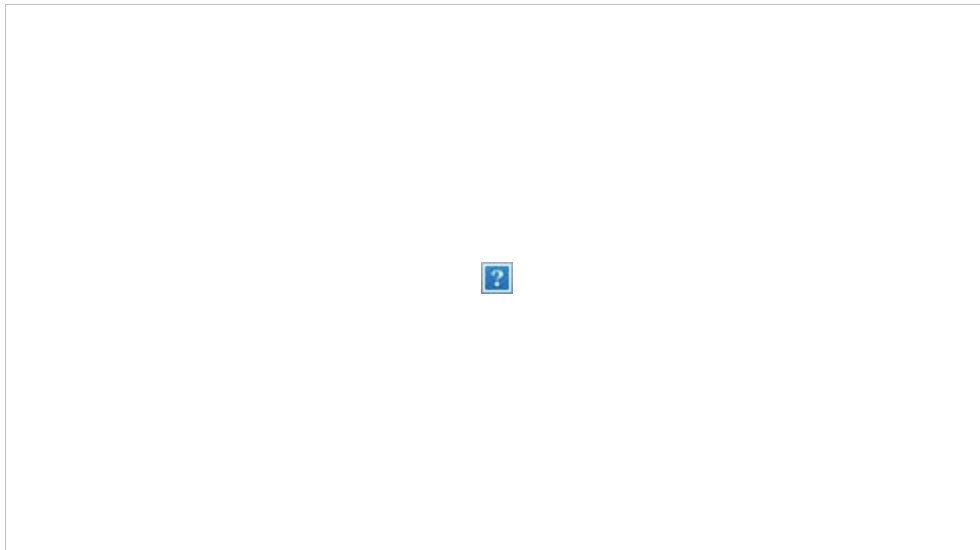

The Governor thanked Coloradans for working together to help flatten the curve and save lives. The Governor also noted that expanding capacity for health care beds is on track. Gov. Polis is focused on sustainability and ensuring that Coloradans are able to safely earn a living without the risk of running out of hospital beds after the expiration of the stay-at-home order.

Current steps to stop the spread of COVID-19, including the temporary closure of bars and restaurants in Colorado communities, the state's stay-at-home order, and the cultural adaptation of mask-wearing, have yielded positive results in slowing the spread of COVID-19. But these swift measures have also taken a toll on the state and local economies and threatened the state's health care system and most vulnerable populations.

Until Colorado builds immunity - through a vaccine or herd immunity - or until scientists are able to deliver a truly effective clinical treatment, the state will need to:

- Implement social distancing measures in an economically and psychologically sustainable manner
- Ensure the capacity to care for those who are ill (COVID-19 and non-COVID-19 related illnesses) without sacrificing the quality of care
- Increase efforts to prevent infection in vulnerable Coloradans

The Governor outlined three stages for the state's response to COVID-19: urgent, stabilization, and recovery. Colorado is currently in the urgent phase and the Governor discussed how Colorado will get to stabilization and recovery.

The state of Colorado continues working toward a return to a sustainable way of life that protects public health and the economy. Key elements of that strategy include:

- Increasing the capability to protect Coloradans and communities through forms of testing and support for those who test positive or have been exposed.
  - Increased testing
  - Testing must be coupled with robust containment efforts locally, regionally, and statewide.
  - Robust containment includes: Expanded contact tracing capacity; Increased

epidemiology staff; Expanded isolation support services.

- Reducing the spread to vulnerable Coloradans who are at risk.
  - Taking additional steps to protect nursing homes, senior care facilities.
  - Action plan for responding to outbreaks as they occur
- Hospitals and health systems managing increased demand.
  - Hospitals have internally increased beds
  - New beds through additional alternative care sites:
    - Ranch, Larimer County Fairgrounds and Events Complex
    - Colorado Convention Center in Denver
    - St. Anthony North in Westminster
    - St. Mary-Corwin Medical Center in Pueblo
    - Western Slope Memory Care in Grand Junction
- Businesses maintaining physical and social distancing.
  - Non-critical businesses will need to engage in similar social distancing measures, which will be enforced, as the critical businesses are during this period of time including but not limited to wearing masks, physical distancing, staggering shifts, and allowing telecommuting to the extent practicable

These key indicators will inform ongoing monitoring and potential modifications of social distancing measures, like reinstating stay-at-home orders at the community level, regionally or statewide if necessary.

Within the next five days, the state expects the data and the science to determine what level of suppression the stay-at-home order has achieved. Also within the next five days, the state expects to have the data and science to determine what level of ongoing social

distancing Coloradans need to strive for to effectively manage the future spread of COVID-19.

Moving forward, the state will be reporting facility-level data on a weekly basis. This information will include the name and type of the facility, date the outbreak occurred, and total cases reported there. Data will cover health care, correctional and other settings. This can include long-term care facilities, assisted living facilities, state prisons, county and city jails, factories, schools, child care centers, and more. There are currently 231 nursing facilities, 706 assisted living facilities and 21 intermediate care facilities in Colorado. In addition, the Colorado Hospital Association has announced that hospitals will now be releasing information about discharges.

## Gov. Polis Takes Action in Response to COVID-19

DENVER - Gov. Polis today extended two Executive Orders as part of Colorado's response to COVID-19.

The Governor extended an Executive Order authorizing certain State agencies to promulgate and issue emergency rules extending the expiration date for certain licenses and other documents to limit in-person renewals and enable state agencies to better respond to COVID-19. This includes state park passes

and licenses for health care facilities, Medicaid and CHIP providers, commercial drivers, and more. Read the full Executive Order [here](#).

In addition, the Governor amended and extended an Executive Order that suspends certain statutes concerning criminal justice to provide the Colorado Department of Corrections with discretion to combat the spread of COVID-19 in State prisons. Read the full Executive Order [here](#).

Good afternoon, Kyle,

I did get your voicemail. NCHD is working with Cargill management and our director along with other public health professionals were conducting a site visit this afternoon but I have no update at this point. When I have further information I will be calling you back. Thank you.

In the meantime these were some of the questions we have that we can discuss on the call tomorrow.

Effectiveness of current interventions.

Are exposed employees (work or home) still be excluded/quarantined?

What does outbreak epi curve look like? Stable, increasing, decreasing? What's the most current case count of confirmed cases? Do we know how many probable cases are associated with Cargill?

What are triggers for closing the facility or other more aggressive outbreak control?

Does the facility know to not hire anyone from JBS right now?

Hello Tyler,

This is the invitation I received for the call this afternoon. I can give you information on who is invited based on my best guess as I don't know all of them.

Claire Whitehead--works for either the state health department or emergency management--I don't know her and she may be the organizer of the meeting and not actually participating

Scott Bookman--works for Colorado Department of Public Health and Environment (state health dept) and is the co-Incident Commander--it is shared command with Colorado Office of Emergency Management.

Mike Willis--Director for the Colorado Office of Emergency Management--he's the co-Incident Commander with Scott.

Mark Boley--probably works for either the state health department or emergency management--I don't know him

Trevor Denney-- probably works for either the state health department or emergency management--I don't know him

OEM Morgan County--this is Roger Doll, he's the Morgan County Emergency Manager

Chris Sorenson--he works for the Colorado Department of Public Safety

Jason Reed--I don't know him

Mike Burnett--he's our Response Coordination Officer for NCHD, he's also our Incident Commander for our agency

I hope this helps. Please let me know if there is anything else I can do for you. Thanks! Trish

**To:** Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)>

Trish,  
Here was the initial correspondence from Dr. Wallace and I to JBS after Dr. Wallace had inspected the plant. Note that at the time this went out, the plant had 2 deaths (now 3) and 8 people intubated, so it would be good to get an earlier start on Cargill.

Thanks,  
Jill

Here is the information from Susan about Leprino Foods donation process. Thank you to Susan and Ericka for attending our meeting and sharing how you want to be involved in the community. Attached is also a flier for our upcoming Parenting Class and the International Music Fest.

----- Forwarded message -----

**From:** **Susan Priemel** <  
**Date:** Thu, Apr 6, 2017 at 11:25 AM  
**Subject:** Leprino Foods Grant and Donation process  
**To:** Mary Gross

Mary,

Thank you for inviting us to your meeting this morning. Erica Mendez and I were happy to attend and we learned a lot about the area non-profit organizations that were present. Going forward, Leprino Foods will have one or two of our LFC Foundation team members present at your monthly meetings to ensure Leprino Foods is helping the community in the best ways possible. I have attached the following for you to share with the non-profit group...my business card with all my contact information, and Leprino Foods Grant applications for 2018 Grant requests (one is for Less than \$10,000 requests, the other for Greater than \$10,000 requests).

LFC Foundation mission – “The Leprino Foods Company Foundation drives positive change in our communities by leveraging time, talent and resources to improve education, nutrition, fitness and local needs.” The Fort Morgan LFC Foundation team started 9/25/15 and currently has 18 members consisting of 12 hourly employees (from 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> shifts, all plant depts.), 4 supervisors (each from a different dept.) and two managers (HR and warehouse). Team meets monthly to review monetary donation requests. All requests (monetary, product)

are shared via email to ensure requests are processed timely. The team will promptly notify requestors via email, regarding status of requests – if approved or not. The team is also in charge of Plant collection drives for area non-profits: Non-perishable Food/Personal Hygiene items, Winter coats, Prom attire, School supplies, Giving Trees, etc.

What will the Foundation Fund? The Foundation has four areas of focus: Education, Nutrition, Fitness and Local Needs. These are consistent with the core values of the Company and the Leprino family.

Annual Grants process – The LFC Foundation team will give Morgan County non-profit (501c3) organizations a Grant application to complete and email back to the Plant. The team will then invite each applicant to come to the Plant and meet with the team so that we better understand what the non-profit organization does for the community and what projects they are requesting Grant money for. After meeting with all the applicants, the LFC Foundation team meets to review all applications and brainstorm which will receive an LFC Grant and how much the Grant will be for. Process begins in November, with completion in March or April. All Grant applications will be reviewed within 90 days. The Fort Morgan LFC Foundation team gave \$15,000 in Grants in 2016 and is in the process of giving \$20,000 in Grants for 2017. All Grant recipients are asked to submit a post-grant summary report after completion of the project or post usage of the funds.

Requests for donations (monetary and product), Collection Drives and Volunteers process – Begins with a phone call or email. All requests need to be in writing, which can include flyers or posters of fundraising events, and can be emailed, mailed or faxed to my attention. First time donation requests need to be accompanied with a W-9 form. (Once we have your W-9 on file, you do not have to resend with each donation request.) Requests for items (product and gift baskets) for fundraising live and silent auctions are fulfilled quickly. Requests for Collection drives are reviewed by the team, and if approved put into action quickly. Collection drives need to be in place for approximately 2 weeks for maximum collection, due to the many different shift times and work schedules. If items are deemed to be needed quicker than 2 weeks, the team will review and vote on whether to outright purchase items instead of holding a collection drive. Requests for Volunteers, like collection drives, the more advanced notice we get the better to give all employees the opportunity to sign up to volunteer.

Well I hope this information helps explain the Leprino Foods Grant process as well as the process for requesting donations, collection drives and volunteers. Everyone is welcome to contact me with their questions.

Thank you,

**Susan Priemel**

**From:** [Tammy Hort RN, CIC](#)  
**To:** [Trish McClain](#)  
**Subject:** Fwd: Leprino  
**Date:** Thursday, April 23, 2020 11:49:26 AM

---

Matt shared an online survey they are using for JBS and probably Leprino. Is this something we can do? Maybe Kelly can share the link with the positive employees? Paper forms can also be available. Is this something Mary can put together?

A few questions I would like to ask but with better verbiage:

What is your work station, duties...

- Do you have a household contact or close contact who works at a job site that has a COVID outbreak.
- I would like to ask if an employee has a second job other than at Leprino.
- Is there anyone outside of your household that may have been exposed within the past 14 days? If so, please provide name and phone number.
- Would also like a list of symptoms
- Onset date

Other ideas?

**To:** Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)>

Hey Tammy,

Sorry for the delay.

Here is a draft survey we have for employer based outbreaks:

<https://weldtempevents.wufoo.com/forms/q4k2zks1n71ebb/>

You'll have to click through because additional items may expand, depending on the selection.

I would like to use an online survey as much as possible to avoid data entry but we are also likely going to offer paper surveys that can be faxed back.

Let me know what your thoughts are.

**Caution:** This email originated from outside of Weld County Government. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Matt. There are 18 positives out of 68 tests on Sunday. We had a short call with Jason as he was driving to Fort Morgan for a meeting and look around.

Would be great if we used the same questions for each plant, this way Leprino would have consistent data if possible.

I do not want to make this difficult so wondering about using what you have used for JBS with a modification to ask about contacts from Cargill, JBS, etc.

Thanks a heap! Tammy

Shelly,

Tammy Hort has been in contact with you this morning. After discussing risk communication options with staff from CDPHE, Trish McClain, our Public Health Director, and I would like to schedule a call with you at some point later today. We would like to present the options and discuss with you what would be the best way for NCHD to support you and your facility.

Trish and I are available between 3-4 p.m. this afternoon or we could do a call at 5 p.m. or later into the evening. It probably won't take any longer than 30 minutes.

Let us know what might work well for your schedule. Thanks.

Hi Stacey. I did receive the line list from Eben Ezer yesterday afternoon. I am comparing CEDRS cases with the staff and resident list. They are reporting via paper and using the line list form that was available in the first guidance tools. There is a staff member available today in our office that is going to put this info into the Excel spreadsheet I was given by Dr. Gershman.

Once that is done, I will share with you.

Tammy

Good evening,

Most of you are probably aware this has been coming. We would like to go ahead and get this submitted to the media tonight. Probably won't send until 6 p.m. Please review.

Thank you  
Michelle

**Date:** Wednesday, April 15, 2020 7:39:30 AM

---

Sonya, I didn't intend to leave you off of this email last night but realized this morning that I had. NCHD will be putting out a press release at some point soon regarding deaths in northeast Colorado. Logan and Morgan Counties are both involved. While your facility may not be directly connected to any of the deaths the reality is that your facility might have increased call volume as a result. When NCHD does get ready to send a press release we will include you for review so that you have input and a heads up for preparations.

Thanks.  
Michelle

Good afternoon,

NCHD has become aware of multiple deaths that have occurred this past week. 1 in Logan County occurred but the rest have been in Morgan County.

There is a process that is followed to release death information to CDPHE. We want to be respectful of that process. In addition, we could have some backlash if we as a local public health agency puts out a press release about deaths, when CDPHE number of deaths isn't reflecting our counties yet.

Therefore, please stay tuned and I will be in touch with you tomorrow as I have more information. When we do get ready to release a press release we will send to you for review before it is released to the media.

Thank you  
Michelle Pemberton

I have it translated and I made both the English and Spanish versions into PDFs in preparation for when we release to the media later this morning following the coordination call. We don't usually send it to the media as a Word document but usually only as a PDF.

I am attaching everything for your records as well.

Thanks.

I had hoped to send this out sooner but it has been quite a week.

I wanted to provide this summary since some of you couldn't be on the entire call:

Attached please find the guidance document that was referenced during the call that was distributed from the state health department.

While the Northeast Colorado Health Department recommends strongly that churches continue to encourage their congregations to follow the state Stay at Home order this weekend, there may come a time after the order is lifted that drive-in alternatives might be less risky. In addition to the guidance document, the additional items to consider if a church decides to move forward with a drive-in venue for services are:

1. All vehicles must be parked at least 6 feet apart
2. All occupants need to wear masks if the vehicle windows are going to be down
3. All occupants need to remain in their vehicles at all times
4. If restroom facilities are available, only one person at a time may utilize the restroom and they should be wearing a mask
5. No food/beverages/communion should be distributed or available at the venue

When the Stay at Home order is lifted (to be determined later this month depending on how the models predict the behavior/spread of the virus), social distancing will still be in place which includes gatherings of more than 10 people. The lifting of those orders will most likely be gradual so it may be best to continue to plan services to be done via online or other remote methods.

Vaccine for COVID-19 is not available at this time though there are several companies and research firms that are working toward this; it may be several months before this is achieved and available on a wide scale.

I really appreciate all you have done to ensure the health and well being of your congregations. I know that spiritual health is just as important and I applaud the efforts you are making to help your people cope during this difficult time. Please let me know if you have any questions or if there is any way that NCHD can be of assistance. Trish

On Wed, Apr 8, 2020 at 2:40 PM NCHD PIO <[pio@nchd.org](mailto:pio@nchd.org)> wrote:

Thank you again to those who were able to participate on the call at 1 p.m. with NCHD. We appreciate your partnership with us to keep the public safe across the six county region we serve. We also appreciate all you are doing to support the people of your community during this challenging time!!

I am attaching the press release that went out this afternoon in English and Spanish. Also, you can share it on Facebook (<https://www.facebook.com/pg/northeasthealth>) or you can also access NCHD press releases on our website (<https://www.nchd.org/co>). We appreciate your assistance in reinforcing the message to stay home and not have large family gatherings or other potential community exposures.

FYI. Do you want me to share this with anyone else?

----- Forwarded message -----

**From:** **Herbert - CDPHE, Deanna** <[deanna.herbert@state.co.us](mailto:deanna.herbert@state.co.us)>  
**Date:** Wed, Apr 22, 2020 at 12:24 PM  
**Subject:** Release from DOC regarding testing at SCF  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Not sure if this is the final version, but it should be pretty close. This is what DOC is putting out today regarding testing at Sterling Correctional Facility. **This is for situational awareness only:**

**Department of Corrections and Colorado Department of Public Health and Environment to Conduct COVID-19 Testing at Sterling Correctional Facility**

*The Department has had 8 inmates test positive at the facility*

The Department of Corrections (DOC), in collaboration with the Colorado Department of Public Health and Environment (CDPHE), will be conducting widespread targeted testing for COVID-19 at the Sterling Correctional facility over the next several days. The facility has had 8 inmates, both symptomatic and asymptomatic, test positive for COVID-19. DOC will be testing inmates in several units of the east side of the facility, including units where inmates have either tested positive or were previously quarantined..

DOC health officials have been conducting detailed contact tracing investigations, and the facility has been on Phase III modified operations with inmates remaining in their cells on quarantine since April 14, 2020.

“This testing will allow us to better identify, isolate and treat any inmate who is positive for COVID-19 and help to prevent the spread of the virus as much as possible in an environment where social distancing is very difficult,” said Department of Corrections Executive Director, Dean Williams. “By conducting this testing and isolating positive inmates, we are working to mitigate the risk of larger numbers of inmates becoming ill and potentially creating an impact on the public health and medical system.”

The DOC and CDPHE anticipate the additional testing could result in a noticeable increase in the number of reported positive cases.

“Any time we do widespread testing in a facility with an outbreak, we expect to see an increase in cases due to the increase in testing, not necessarily due to an increase in transmission,” said Ginger Stringer, field epidemiologist and COVID-19 response epidemiology

lead, Colorado Department of Public Health and Environment. “Our strategy is to be aggressive with our testing to identify cases who may be asymptomatic, and provide recommendations to prevent the further spread of infection.”

Detailed information on DOC’s Response to the COVID-19 pandemic can be found at:

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,

christa

Sharing our daily update related to the ongoing processes with Coronavirus (COVID-19)

- We have now tested 16 patients – still with only two being resulted – both of those test results are ‘negative’
- We continue our Hospital Incident Command Center on a virtual basis – absorbing information from Banner Health, the State, and the County
- We are currently a Tier 1 Hospital, which means that we have *no or very minimal positive cases* within our community or service area
- We continued to narrow our focus related to visitors, access to the environment and elective services – all in an effort to break that chain of transmission
  - Today, we began proactively rescheduling screening exams (mammography, ultrasound, bone density) to eight (8) weeks out
  - We also cancelled any “in house” (or in hospital) sleep studies until the beginning of May and then we will re-evaluate
- We have held steady on our inventory of personal protective equipment (PPE) and we are grateful for your collaboration in utilizing these products efficiently
- We received notice that nationally, smaller “piggy-back” solution bags may have limited availability and Supply Chain and Pharmacy have partnered to find an innovative resolution
- The Emergency Department continues to triage patients with respiratory symptoms into a designated area within in the department; this has worked very effectively.
- We have added “red zone” (or ‘safe zone’) areas to all of our inpatient rooms;
- We will continue to strategize a safe, effective method to care for patients that may be admitted with the suspected virus – and we will continue to provide you with updates related to this process

BMG-Here are some updates from BMG COVID meeting from Dr. Gregory.

- We have also placed a visitor restrictions within the clinics. We currently are asking patients when they schedule and come in that there are no additional visitors. There are of course the following exceptions:
  1. One parent for pediatric patients
  2. One caregiver if needed for safety (example: Alzheimer’s patients)
- We will be posting signage in regards to our visitor restrictions today.
- I have included codes in a slide below on the appropriate G Code to use for charting telephone visits. Banner is also working on how to handle doing large scale telehealth visits if needed. More to come on that over the weekend.
- Banner has now suspended all visits in Colorado for any patients that may safely wait to be seen for 30 days. This has now also expanded into the specialty providers. As of yesterday afternoon we started rescheduling all of our Orthopedic patients and General Surgery patients. We will continue to see any urgent or emergent needs in the office.
- We also need to use PPE supplies only in situations that are indicated for usage.
- **Effective immediately – we are no longer performing COVID testing on most patients with symptoms**
- **ONLY test patients who are symptomatic AND are Health Care Workers (HCW) OR require hospitalization as an inpatient.**
- N95 respirator masks should **ONLY** be used in **airborne isolation rooms** or when

**performing aerosol generating procedures** on patients with potential/confirmed COVID-19 infection. N95s should **NOT** be used on patients. If patients in precautions require transport outside of their room, place a standard procedure mask on them.

- Eye protection, both goggles and face shield not attached to a mask may be disinfected and reused. Disinfect eye protection with a standard alcohol wipe (prep pad), wetting all surfaces and allow to air dry.

Shelly

Thank you for letting me know about the email. I think you have stated things very well. Morgan County is required to abide by the Safer At Home order unless they submit a variance. In order for the variance to even be considered, it has to have the support of local public health and every hospital in the county. Keeping our healthcare partners intact and functioning is my highest priority. If any of our partners feel less than confident about a variance application, I will stand with them and not sign off on it. I know there is incredible pressure from some business to have the ability to be open and while the ability to earn a living is very important, protecting lives is even more so. I stand with you. Thanks! Trish

wrote:

Good Morning All,

I have recently sent an email to our county commissioners recognizing them for all they are doing and asking that before they make decisions on future county decisions in regards to lifting stay at home orders that they reach out to each of your organizations for your input. I recognize that many of you are already having these direct conversations with them, but in full disclosure I wanted you to know that I referenced you in my email.

Thank you for all you are doing during this time.

Here was the body of my email to the commissioners for your reference.

*Good Morning Commissioners,*

*I hope you are all doing well.*

*I understand there is discussion occurring on how the County may update or change Stay at Home orders as directed by Governor Polis. I recognize the pressures you are all receiving in reference to how the county should be 'Open' for business and understand how negatively many in our community have been affected by this virus.*

*What I would like to share with you is a perspective from someone who is seeing how deadly and devastating this virus can be. Here at Eben Ezer our organization was as ready to fight this as many. We were handcuffed by not having supply lines open to us as we were not a Tier1 priority for PPE. In essence, this weakened our ability to stand ready to protect our team and our elders. While we have experienced many deaths, I am happy to report that we have many who have been able to fight off this nasty, virulent virus. As we continue moving through this, we will continue to advocate for the need to have nursing homes in that tier 1, although that is another discussion. What I want you to take away from this is how vulnerable healthcare workers and the elderly are to this virus. The combination of those over the age of 65 and the number of healthcare workers in our county is great, significant enough for this consideration.*

*I ask that when you make your decision on how and when we open our community back up, be sure to reach out to those who are in the trenches of this. Ask your local hospital leaders, senior living providers, the local health departments, and EMS providers for their input prior to making your decision.*

*I absolutely support the need to get our community going again, yet I strongly believe that our community is not ready yet. Thank you for your consideration and please let me know if I can offer you any support or answer any questions you might have.*

I will have the lab send 100 swabs to you at NCHD and you can distribute them for outbreak response as needed.

On Thu, Apr 16, 2020 at 9:16 AM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

That would be helpful. EMCH continues to test HCW from Eben Ezer and I know they have had Cargill staff there as well. Do you need their mailing address or do you send them to us (NCHD) and we get them to the hospital? Thank you for your help. Trish

On Thu, Apr 16, 2020 at 8:59 AM Stringer - CDPHE, Ginger <[ginger.stringer@state.co.us](mailto:ginger.stringer@state.co.us)> wrote:

If they need swabs for outbreak response (Eben Ezer?) we can send a few from our lab. This is DRAFT language from a document we're working on with the lab about swab options...

**DRAFT Colorado State Laboratory COVID-19 Swab Options DRAFT**

**\*\*\* Additional sample types are under review in the laboratory and will be added to this guidance as they become available\*\*\***

The Colorado State Public Health Laboratory has validated an expanded set of sample collection options for COVID-19 RT-PCR testing. All of the following swab and transport media types are acceptable for sample submission at the state public health laboratory.

**Swab options**

Nasopharyngeal (NP) swab  
Oropharyngeal (OP) swab  
Mid-turbinate specimen flocked swab  
Anterior nares round foam swab

\*Self collected swabs collected in the presence of a medical professional are acceptable, home collected swabs are NOT acceptable

**Transport Media options** - minimum of 1mL sample volume required at state lab

Viral/Universal transport media (VTM/UTM) - commercial or laboratory prepared

Liquid Amies

Phosphate Buffered Saline (PBS)

Normal Saline

How to get swabs for sample collection:

- Routine procurement routes
- Request through LPHAs
- LPHAs can request through State Emergency Operations Center (SEOC)
- LPHAs can request through their CDPHE Epidemiology Team for outbreak response

Considerations for swabs sent to other facilities

- *The swabs and transport media types listed above have been validated for the platforms in use at the state laboratory. Other labs may have different systems in place with different sample tube or swab requirements. If you are sending samples to labs other than the state lab for testing, please verify sample submission criteria with any other commercial laboratory prior to submitting you samples there*
- *Do NOT use any swab/transport media that contains guanidine thiocyanate for testing on the Hologic Panther System - this system uses a bleach disinfecting step that will produce cyanide gas when combines with guanidine thiocyanate*

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

Thank you for the update.

On Wed, Apr 15, 2020 at 11:26 AM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

Good morning,

We will be doing a press release in the next day or two because there have been some deaths related to COVID-19 in our region. We have to wait until the death certificates are finalized at the state level in order to make sure our numbers and CDPHE numbers are in agreement before we release anything. For instance, we had a person at end of life for another (non respiratory) medical reason and they also tested positive for COVID-19--if the death cert lists COVID-19 as a contributing factor, then we count it, if not, we don't. I will keep you posted on that.

Cargill has been getting a lot of attention since JBS closed several plants, including Greeley. Mel and I did a site visit yesterday and they are doing a good job of taking appropriate precautions with their staff in regards to PPE, sanitizing and disinfecting, social distancing, screening, isolation and quarantine. I've been in conversation with both the state and with Cargill corporate health to discuss setting up a testing site for their employees. I think it would be helpful for us to determine the actual health status of their workforce and we could then see how the measures they are implemented are having the desired impact. Cargill staff have been great to work with and we have been transparent with them as far as any conversations the state has with us. I've also been assertive in that this needs to be a partnership and not a heavy handed approach as Cargill is part of our community and we will be working together long after COVID-19 is over. I have a call this afternoon with Cargill and CDPHE to discuss testing some more. Again, I'll keep you posted.

Seaboard Foods sent us information on what they are doing to keep their staff safe and we have let them know we are available if they need us.

We have distributed a lot of PPE to regional hospitals and long term care facilities while they await shipments from private suppliers.

We are implementing staffing rotation through the incident management team and expanding telework options for staff to help everyone deal with the increased stress of the response. We've been at this for 5 weeks now and it's going to drag on for awhile.

We will have our BOH meeting via Zoom this month.

If you have other questions about things I haven't covered here, just let me know. Thanks!

**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Hi Jared,

Just talked to Mike--thanks for calling him. I will keep you in the loop re: Cargill--as Mike said, we're kind of in a holding pattern until their corporate decides if they want to do testing.

Also, if there's anything else that NCHD can help with in regards to the City, just let me know. My cell is --you can call me anytime. Thanks! Trish

Tina found this, but we are looking for current numbers, correct?

The DOC announced the first case of COVID-19 in a staff member – a parole officer in Sterling who did not work in the prison – on March 26, and a day later confirmed two other employees, one of them an SCF employee, had tested positive.

----- Forwarded message -----

Mary,

I wasn't sure if you saw this. It was just posted this afternoon. It does give some info on testing and employees that were found positive.

<https://www.journal-advocate.com/2020/04/23/doc-still-testing-for-covid-19-at-sterling-prison/#comments4/23/doc-still-testing-for-covid-19-at-sterling-prison/#comments>

Trish,  
Here was the initial correspondence from Dr. Wallace and I to JBS after Dr. Wallace had inspected the plant. Note that at the time this went out, the plant had 2 deaths (now 3) and 8 people intubated, so it would be good to get an earlier start on Cargill.

Thanks,  
Jill

Good Morning,

Following up on the testing being done on all the employees at Leprino. Seems like you guys got out in front of this after the JBS and Cargill situation. I'm looking to see if you can release any numbers on positive tests from the Leprino Plant. Asymptomatic and those who were ill. Appreciate any information you might be able to provide. Thank you

[Open gyms letter from Vicki Pena.docx](#)

---

To Morgan County Commissioners,

Below are the remarks I received yesterday from the Northeast Colorado Board of Health in reference to opening up our gym and other fitness facilities in Morgan County:

*Paula,*

*I appreciate the time, effort and resources you have put into your reopening plan. And I agree with you that a gym in rural Colorado looks much different from a gym in metro Denver. However, the order is very clear about gyms and a waiver to open your facility as a gym would need to come through Morgan County to be submitted to the state health department for approval.*

I have since then submitted to the local Board of Health our detailed protocol as to how we will and can open safely. I have also sent a petition to Governor Polis, as well as state and national representatives, containing over 1300 signatures requesting that gyms in Colorado be allowed to open. I will attach to this correspondence letters from some of our gym members describing how we are a responsible business, how they have trust in our ability to open safely, and how the gym is a necessity for their health and rehabilitation. Our members have been calling and writing us continuously the past few days wondering why we are not open and why we are not advocating for them. They want and need us to be available for them so they can get back on track with their physical and mental health. We owe it to them to get this ball moving, and moving quickly.

We will be offering one-on-one personal training to clients starting Friday, May 1. On Monday, May 4th, we will expand it to 4 clients to 1 trainer as is expressly allowed by the latest state directive. This, however, is unfair to the majority of our clients who can not afford to pay the \$50 per personal training session. We need to be able to offer our service at an affordable price to everyone. By keeping the numbers limited to just small personal training sessions, as mandated by Governor Polis, only wealthy people will now be able to enjoy good health and fitness. This does not suit our demographic. We need to be open and functioning for our community immediately.

I urge you to please submit a waiver to the State Health Department to open our gym facility and any other in the county that has set up their appropriate protocol. Please help the Governor and the State Health Department see that small businesses in small communities operate on a different level than inner-city, large businesses. We can control the number of people in our doors, social distancing, and a strong cleaning protocol much more effectively than a larger gym rolling through thousands of people. We need to have that local control on a county level just like Governor Polis has asked for on a state level.

Please help us to help our community and clients. We look forward to your response and anything else that we can do to get our doors open.

Thank you.

**From:** [Mary Brumage](#)  
**To:** [Trish McClain](#)  
**Subject:** Message on FaceBook  
**Date:** Thursday, April 23, 2020 10:42:12 AM

---

Hi,

Below is a very LONG comment/question from someone on FaceBook.

Do you have time to respond to this? If not, I can and then have you edit it, but I thought you might want it in your words since it was written to you:

If you just want to type your response in this email, I can put it on the post since I know where it is.

Dear Ms. McClain,

I am concerned about today's report on Cargill's mitigation practices as Morgan County's COVID19 cases continue to climb. Positive cases have gone from 40 to 180 in less than ten days. In a rural county of only 29,000 people, this is very concerning. I am sure the death of four of its citizens causes us all further angst.

The wording in the above publication on CARGILL's enforcement of a "mandatory 14-day quarantine for any member that tests positive for COVID-19 . . ." Yet according to the State of Colorado's guidelines ref <http://covid19.colorado.gov/how-to-isolate>, CARGILL should be complying with those of the higher standard of ISOLATION. Which means completely away from people UNTIL "no fever for at least 72 hours (that is three full days of no fever without using medicine that reduces fevers)

AND

other symptoms have improved (for example, when your cough or shortness of breath have improved)

AND

At least 7 days have passed since your symptoms first appeared

Now I understand that testing is now very limited, and the original CDC guidelines of until "two negative tests for COVID-19 came back within a forty eight hour period" are no longer relevant or mentioned on its website as it was just a few week's previous, and I do realize there is absolutely no mention whatsoever on the Northeastern Colorado Department of Health guidelines, but I do wish to prevail on you to consider the states current stance.

Your esteemed department and CARGILL's Mr. Luft may well be under a mistaken notion that COVID-19 is a "two week only sickness" instead of a highly contagious disease that requires time to recover AND isolate. And that the essential duties of "feeding the nation" take precedence. (Surely not.)

Does CARGILL only allow employees two weeks leave? What if the exposed to, now quarantined, become sickened? Do they then get tested and then properly isolated as recommended by the State's standards? Do you know if CARGILL allows for further paid leave, or should I address CARGILL for further clarification?

---

We had a shipment of 500 N95 masks that were to be delivered yesterday, April 16th that did not arrive. We are finding several of our shipments that had definitive delivery dates assigned to them are being stalled awaiting clearance to export from China.

We are currently using CDC guidance to treat and re-use N95 masks but after receiving daily treatments for a week now some of the masks are starting to lose their integrity and are needing to be replaced. We only have 18 N95 masks left on hand and we anticipate needing to replace more than that through the weekend and by early next week we are going to need to replace all masks that have received 10+ treatments which will be 140 in total.

Thanks,

**Subject:** NCHD Data Reporting  
**Date:** Thursday, April 30, 2020 4:14:53 PM

---

Hi Everyone,

We wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

#### Facility Outbreak Data by County

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,  
Mary

---

Attached is the newly released Public Health Order (20-28 Safer-At-Home) just issued by the Colorado Department of Public Health & Environment.

This PHO was issued pursuant to the stipulations of the Executive Order issued by Governor Polis last evening.

Please keep in mind that the provisions of this new PHO are in effect for all counties unless/until specific county variance plans are accepted and approved by CDPHE.

Have a great week!  
Mike

**Subject:** Outbreak information to be released every Wednesday  
**Date:** Wednesday, April 15, 2020 7:00:37 PM

---

This was sent out this evening--it says that the information is released every Wednesday, starting today. I believe Cargill could be listed as having an outbreak given the number of confirmed positives we have. Just wanted to make sure you are aware. Thanks

### **State will release additional facility-level data on confirmed outbreaks**

(DENVER) April 15, 2020: Starting today, the Colorado Department of Public Health and Environment (CDPHE) will release more information about confirmed COVID-19 outbreaks in long-term care and other facilities weekly. This is a change aimed at promoting transparency, protecting the public, and providing more insight into the extent of COVID-19 outbreaks statewide.

A confirmed outbreak means there are two or more confirmed cases of COVID-19 in a facility or (non-household) group with onset in a 14-day period. The information will be available on the state's website at [covid19.colorado.gov/outbreak-data](https://covid19.colorado.gov/outbreak-data) on the [COVID-19 website](#). Information will be updated weekly on Wednesday by the end of the day.

Facilities included in the outbreak report will include:

- Health care settings
  - Including long-term care facilities, assisted living facilities, independent living facilities/senior communities that offer healthcare, inpatient rehab facilities, and long-term acute care hospitals.
  - There are currently 231 nursing facilities, 706 assisted living facilities, and 21 intermediate care facilities in Colorado.
- Correctional settings
  - Including state prisons, county and city jails, community corrections, detention settings, and work release facilities.
- Other settings:
  - This could include factories, workplaces with crowded work conditions, camps, schools, child care centers, and independent living

facilities/senior communities that do not offer health care.

Each Wednesday, CDPHE will report the following detailed outbreak data:

- Facility name.
- Facility type.
- Date the outbreak was confirmed.
- Total reported cases (confirmed and probable).
  - Residents and staff in health care settings.
  - Residents/inmates/detainees/staff correctional settings.
- Total reported deaths (confirmed and probable).

Continue to stay up to date by visiting [covid19.colorado.gov](https://covid19.colorado.gov).

**Subject:** Personal advice  
**Date:** Tuesday, April 21, 2020 10:31:30 AM

---

Hi, Trish –

I am hoping you might be willing to give me some personal advice, on a completely confidential basis. If you don't feel comfortable doing so I understand, but I am struggling with a decision and thought you might have the insight I need.

My daughter works at Eben Ezer, in the food service area. She works part time, three of four days a week from about 4 to 8 p.m. We have allowed her to continue to work because they are short staffed and seem to be practicing good prevention measures and providing PPE. But things seem to be getting worse there, with the virus spreading throughout the facility. We have told her we may have to have her stop going to work, and she says how can I just quit now when they need me most?

This seems to me to be a no-brainer, and I should not even have a second thought about risking my daughter's health and life, not to mention the rest of our household. But I don't know the real risks and thought you might have better knowledge of that.

I guess my question is, if it were your daughter, what would you do?

I know I'm putting you on the spot, and like I said I understand if you'd rather not answer, but please let me know your thoughts if you can...

Thanks, either way,

John

NEWS RELEASE

FOR IMMEDIATE RELEASE

**CONTACT:** Shelly Griffith, CEO  
**PHONE:** 970-842-2861, extension 9212

Cases of COVID-19, the illness resulting from the novel coronavirus, have been diagnosed at our Eben Ezer community. The affected neighbors are in quarantine in our cluster neighborhood. In order to protect the privacy of our neighbors, identifying information and medical records will not be released to the public. We have notified public health officials as required and are following procedures recommended by the Centers for Disease Control & Prevention. We are taking every step as recommended by authorities to contain the spread. We want to make neighbors, their families, and our dedicated staff aware of this situation and reassure everyone that we are on top of it. Developments are changing day by day, minute by minute. Our focus remains on the health and well-being of our community. We must also recognize our team for the concern and commitment they have shown to our neighbors during this challenging time. Our mission has never been more meaningful.

Eben Ezer, the Colorado Department of Public Health & Environment (CDPHE), Northeast Colorado Health Department and partnering agencies are working diligently to ensure ill patients are receiving appropriate care and measures are being taken to limit further spread of disease. Proactive efforts are focused on identifying, isolating and testing all of those who may be at risk.

“Eben Ezer has notified our neighbors, families and team members of the current situation. We began restricting visitors to the campus on March 11<sup>th</sup> with full restriction put into effect March 13<sup>th</sup> to protect the health of the residents and health care workers at our community. We have tested 7 of our neighbors for COVID-19 of which 6 came back positive. Prior to this incident and ongoing, we have been following all CMS, CDC and state and local health department guidelines concerning COVID-19. Our team members have been and will continue to be screened when they arrive to work, including checking temperature, to ensure no additional sickness is brought into our buildings. If they have a fever over 100.4 they are sent home and asked to contact their primary care physician. Our team members are being diligent on practicing proper hand washing and the use of personal protective equipment. All staff have received recurring education on these practices,” says Shelly Griffith, Eben Ezer CEO.

Eben Ezer is not the first long term care community in the state to have a confirmed case. We need

your help in battling this virus, we ask our larger community to continue to adhere to the Stay at Home order. Thank you all for your support and assistance as we work to combat the spread of this virus.

Eben Ezer will continue to monitor and adhere to the recommendations set forth by the Centers for Disease Control (CDC). We are proud of our positive reputation in the community we serve and provide our senior adults the quality care and services they deserve and expect from us. We will continue to provide updates regularly to our Eben Ezer community. For more information, please contact Shelly Griffith at 970-842-2861, ext 9212.

###

#### NEWS RELEASE

#### INFORMACIÓN INMEDIATA

CONTACT: Shelly Griffith, CEO

PHONE: 970-842-2861, extension 9212

Los casos de COVID-19, la enfermedad resultante del nuevo coronavirus, han sido diagnosticados en nuestra comunidad Eben Ezer. Los vecinos afectados están en cuarentena en nuestro vecindario en racimo. Para proteger la privacidad de nuestros vecinos, la información de identificación y los registros médicos no se divulgarán al público. Hemos notificado a los funcionarios de salud pública según sea necesario y estamos siguiendo los procedimientos recomendados por los Centros para el Control y la Prevención de Enfermedades. Estamos tomando todas las medidas recomendadas por las autoridades para contener la propagación. Queremos que los vecinos, sus familias y nuestro dedicado personal estén al tanto de esta situación y asegurar a todos que estamos al tanto. Los desarrollos están cambiando día a día, minuto a minuto. Nuestro enfoque permanece en la salud y el bienestar de nuestra comunidad. También debemos reconocer a nuestro equipo por la preocupación y el compromiso que han demostrado con nuestros vecinos durante este momento difícil. Nuestra misión nunca ha sido más significativa.

Eben Ezer, el Departamento de Salud Pública y Medio Ambiente de Colorado (CDPHE), el Departamento de Salud del Noreste de Colorado y las agencias asociadas están trabajando diligentemente para garantizar que los pacientes enfermos reciban la atención adecuada y se tomen medidas para limitar la propagación de la enfermedad. Los esfuerzos proactivos se centran en identificar, aislar y probar a todos aquellos que puedan estar en riesgo.

“Eben Ezer ha notificado a nuestros vecinos, familias y miembros del equipo sobre la situación actual. Comenzamos a restringir a los visitantes al campus el 11 de marzo con una restricción total puesta en vigencia el 13 de marzo para proteger la salud de los residentes y los trabajadores de atención médica en nuestra comunidad. Hemos probado 7 de nuestros vecinos para COVID-19 de los cuales 6 dieron positivo. Antes de este incidente y en curso, hemos seguido todas las pautas de los CMS, los CDC y los departamentos de salud estatales y locales con respecto a COVID-19. Los miembros de nuestro equipo han sido y seguirán siendo examinados cuando lleguen al trabajo,

incluida la verificación de la temperatura, para garantizar que no ingresen enfermedades adicionales en nuestros edificios. Si tienen fiebre de más de 100.4, son enviados a casa y se les pide que se comuniquen con su médico de atención primaria. Los miembros de nuestro equipo están siendo diligentes en la práctica del lavado de manos adecuado y el uso de equipos de protección personal. Todo el personal ha recibido educación recurrente sobre estas prácticas ", dice Shelly Griffith, CEO de Eben Ezer.

Eben Ezer no es la primera comunidad de cuidados a largo plazo en el estado en tener un caso confirmado. Necesitamos su ayuda para combatir este virus, le pedimos a nuestra comunidad más grande que continúe cumpliendo con el pedido de Stay at Home. Gracias a todos por su apoyo y asistencia mientras trabajamos para combatir la propagación de este virus.

Eben Ezer continuará monitoreando y cumpliendo con las recomendaciones establecidas por los Centros para el Control de Enfermedades (CDC). Estamos orgullosos de nuestra reputación positiva en la comunidad a la que servimos y brindamos a nuestros adultos mayores la atención y los servicios de calidad que se merecen y esperan de nosotros. Continuaremos proporcionando actualizaciones regularmente a nuestra comunidad Eben Ezer. Para obtener más información, comuníquese con Shelly Griffith al 970-842-2861, ext 9212.

**Date:** Tuesday, April 14, 2020 4:05:57 PM

---

Good afternoon,

NCHD has become aware of multiple deaths that have occurred this past week. 1 in Logan County occurred but the rest have been in Morgan County.

There is a process that is followed to release death information to CDPHE. We want to be respectful of that process. In addition, we could have some backlash if we as a local public health agency puts out a press release about deaths, when CDPHE number of deaths isn't reflecting our counties yet.

Therefore, please stay tuned and I will be in touch with you tomorrow as I have more information. When we do get ready to release a press release we will send to you for review before it is released to the media.

Thank you  
Michelle Pemberton

April 20, 2020

FOR IMMEDIATE RELEASE

### **Northeast Colorado Health Department Reports on Cargill COVID-19 Response**

Sterling, Colo. – April 20, 2020: As the COVID-19 pandemic continues, the national focus has turned to concern about the strength of the food supply chain. Having multiple critical businesses that are associated with food processing in our six county (Logan, Morgan, Phillips, Sedgwick, Washington and Yuma) health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with each business to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the forefront of state and national attention is the Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, Public Health Director, Trish McClain addressed in a report to the State Public Health Department, unprecedented processes and procedures that facility management have put in place to keep food products and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important,” expresses Director McClain “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The health department report identifies that Cargill is proactively applying Centers for Disease Control and Prevention guidance for employee face covering, added cleaning measures, personal protective equipment usage and social distancing practices. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“We are making decisions guided by our values,” said Tyler Luft, general manager for Cargill’s Fort Morgan protein facility. “The team is working to keep employees safe, feed the nation and keep the agricultural economy moving.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our six county health district, including Fort Morgan, emphasizing the need for social distancing and to stay home unless performing necessary activities. So far, NCHD in cooperation with Cargill has been notified of 23 positive results for employees, leading to 1 death. The company continues to enforce a mandatory 14-day quarantine for any team member who tests positive for COVID-19 as well as any employees who they have come into close contact with.

“Cargill continues to work in close partnership with the NCHD to ensure we are following the appropriate safety protocols,” said Luft. “We are part of this community and want to work together to keep each other safe, people at work and the country fed.”

## INFORMACIÓN INMEDIATA

### Reporte del Departamento de Salud del Noreste de Colorado en

### Respuesta de Cargill a COVID-19

-Sterling, Colorado - 20 de abril de 2020: a medida que continúa la pandemia de COVID-19, el enfoque nacional se ha centrado en la preocupación por la fortaleza de la cadena de suministro de alimentos. Teniendo múltiples negocios críticos que están asociados con el procesamiento de alimentos en nuestro distrito de salud de seis condados (Logan, Morgan, Phillips, Sedgwick, Washington y Yuma), el Departamento de Salud del Noreste de Colorado (NCHD) continúa trabajando en estrecha colaboración con cada negocio para proporcionar apoyo técnico y orientación para mejorar la protección del personal contra las infecciones para que puedan permanecer abiertos de manera segura.

Una de esas instalaciones que está a la vanguardia de la atención estatal y nacional es la instalación de procesamiento de carne Cargill ubicada en Fort Morgan. Después de una invitación para recorrer la planta, la Directora de Salud Pública, Trish McClain, dirigió en un informe al Departamento de Salud Pública del Estado, los procesos y procedimientos sin precedentes que la administración de las instalaciones ha implementado para mantener seguros los productos alimenticios y los empleados.

*"Más de 2,000 personas cuentan con esta planta para sus cheques de pago, pero nadie discute el hecho de que sus vidas son aún más importantes", expresa el Directora McClain. "Creo que Cargill ha hecho de la salud de los empleados una prioridad, y sus prácticas son un ejemplo para otras empresas de la industria alimentaria".*

El informe del departamento de salud identifica que Cargill está aplicando de manera proactiva la orientación de los Centros para el Control y la Prevención de Enfermedades para cubrirse la cara a los empleados, medidas de limpieza adicionales, uso de equipos de protección personal y prácticas de distanciamiento social. En muchas áreas, han ido más allá de la orientación general e implementado enfoques innovadores para la seguridad de los empleados.

*"Estamos tomando decisiones guiadas por nuestros valores", dijo Tyler Luft, gerente general de la instalación de proteínas Fort Morgan de Cargill. "El equipo está trabajando para mantener a los empleados seguros, alimentar a la nación y mantener la economía agrícola en movimiento".*

Esta sinceridad se extiende a la transparencia de la gerencia con NCHD en los esfuerzos para evaluar activamente al personal, sus modificaciones significativas al flujo de empleados y la conversión de la línea de producción, así como la aplicación de las directivas de aislamiento y cuarentena al desactivar las insignias del personal muestra cuán proactivos y cuán trascendentales son sus esfuerzos para proteger al personal.

Los casos de COVID-19 han seguido aumentando en nuestro distrito de salud de seis condados, incluido Fort Morgan, enfatizando la necesidad de distanciamiento social y quedarse en casa a menos que se realicen las actividades necesarias. Hasta ahora, NCHD en cooperación con Cargill ha sido notificado de 23 resultados positivos para los empleados, lo que lleva a 1 muerte. La compañía continúa aplicando una cuarentena obligatoria de 14 días para cualquier miembro del equipo que resulte positivo para COVID-19, así como para cualquier empleado con el que hayan estado en contacto cercano.

*"Cargill continúa trabajando en estrecha colaboración con el NCHD para garantizar que sigamos los protocolos de seguridad apropiados". dijo Luft. "Somos parte de esta comunidad y queremos trabajar juntos para mantenernos seguros, la gente en el trabajo y el país alimentados".*

Thank you again to those who were able to participate on the call at 1 p.m. with NCHD. We appreciate your partnership with us to keep the public safe across the six county region we serve. We also appreciate all you are doing to support the people of your community during this challenging time!!

I am attaching the press release that went out this afternoon in English and Spanish. Also, you can share it on Facebook (<https://www.facebook.com/pg/northeasthealth>) or you can also access NCHD press releases on our website (<https://www.nchd.org/co>). We appreciate your assistance in reinforcing the message to stay home and not have large family gatherings or other potential community exposures.

Michelle Pemberton

Sonya, I didn't intend to leave you off of this email last night but realized this morning that I had. NCHD will be putting out a press release at some point soon regarding deaths in northeast Colorado. Logan and Morgan Counties are both involved. While your facility may not be directly connected to any of the deaths the reality is that your facility might have increased call volume as a result. When NCHD does get ready to send a press release we will include you for review so that you have input and a heads up for preparations.

Thanks.  
Michelle

Cc: Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)>, Mike Burnett <[mikeb@nchd.org](mailto:mikeb@nchd.org)>, NCHD PIO <[pio@nchd.org](mailto:pio@nchd.org)>, Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Good afternoon,

NCHD has become aware of multiple deaths that have occurred this past week. 1 in Logan County occurred but the rest have been in Morgan County.

There is a process that is followed to release death information to CDPHE. We want to be respectful of that process. In addition, we could have some backlash if we as a local public health agency puts out a press release about deaths, when CDPHE number of deaths isn't reflecting our counties yet.

Therefore, please stay tuned and I will be in touch with you tomorrow as I have more information. When we do get ready to release a press release we will send to you for review before it is released to the media.

Thank you  
Michelle Pemberton

I appreciate your response and I am hesitating supporting any thing other that what the state outlined. I feel this puts the hospitals at risk. We have tested twice as many in the past 7 days as in the prior 7. So I feel we be hesitant to with the current orders but could support for the next 2 weeks or more to see the impact. Thanks

Thanks

Linda

**To:** Thorpe, Linda <>  
**Subject:** Re: [EXTERNAL] Re: State of our County

You are correct. If we want to have less restrictions than what is included in the Safer at Home orders, we have to provide a detailed plan (variance application) that has to be approved by elected officials, all hospitals in the county and local public health. Morgan County is not applying for a variance at this time because I have already stated I won't sign off on it--they know that both of our hospitals don't support it and I will side with the hospitals. I reiterated in our special board of health meeting today that when I hear our hospitals implementing surge plans, even if it's just for a day, that gives me great concern. Though I understand the pressure our commissioners are facing regarding businesses wanting to open, I'm not going to throw our health care partners under that bus. I hope you are doing ok during this time. Trish

**Subject:** [EXTERNAL] Re: State of our County

Shelly

Thank you for letting me know about the email. I think you have stated things very well. Morgan County is required to abide by the Safer At Home order unless they submit a variance. In order for the variance to even be considered, it has to have the support of local public health and every hospital in the county. Keeping our healthcare partners intact and functioning is my highest priority. If any of our partners feel less than confident about a variance application, I will stand with them and not sign off on it. I know there is incredible pressure from some business to have the ability to be open and while the ability to earn a living is very important, protecting lives is even more so. I stand with you. Thanks! Trish

wrote:

Good Morning All,

I have recently sent an email to our county commissioners recognizing them for all they are doing and asking that before they make decisions on future county decisions in regards to lifting stay at home orders that they reach out to each of your organizations for your input. I recognize that many of you are already having these direct conversations with them, but in full disclosure I wanted you to know that I referenced you in my email.

Thank you for all you are doing during this time.

Here was the body of my email to the commissioners for your reference.

*Good Morning Commissioners,*

*I hope you are all doing well.*

*I understand there is discussion occurring on how the County may update or change Stay at Home orders as directed by Governor Polis. I recognize the pressures you are all receiving in reference to how the county should be 'Open' for business and understand how negatively many in our community have been affected by this virus.*

*What I would like to share with you is a perspective from someone who is seeing how deadly and devastating this virus can be. Here at Eben Ezer our organization was as ready to fight this as many. We were handcuffed by not having supply lines open to us as we were not a Tier I priority for PPE. In essence, this weakened our ability to stand ready to protect our team and our elders. While we have experienced many deaths, I am happy to report that we have many who have been able to fight off this nasty, virulent virus. As we continue moving through this, we will continue to advocate for the need to have nursing homes in that tier 1, although that is another discussion. What I want you to take away from this is how vulnerable healthcare workers and the elderly are to this virus. The combination of those over the age of 65 and the number of healthcare workers in our county is great, significant enough for this consideration.*

*I ask that when you make your decision on how and when we open our community back up, be sure to reach out to those who are in the trenches of this. Ask your local hospital leaders, senior living providers, the local health departments, and EMS providers for their input prior to making your decision.*

*I absolutely support the need to get our community going again, yet I strongly believe that our community is not ready yet. Thank you for your consideration and please let me know if I can offer you any support or answer any questions you might have.*

**Subject:** Re: [EXTERNAL] Re: State of our County

You are correct. If we want to have less restrictions than what is included in the Safer at Home orders, we have to provide a detailed plan (variance application) that has to be approved by elected officials, all hospitals in the county and local public health. Morgan County is not applying for a variance at this time because I have already stated I won't sign off on it--they know that both of our hospitals don't support it and I will side with the hospitals. I reiterated in our special board of health meeting today that when I hear our hospitals implementing surge plans, even if it's just for a day, that gives me great concern. Though I understand the pressure our commissioners are facing regarding businesses wanting to open, I'm not going to throw our health care partners under that bus. I hope you are doing ok during this time. Trish

Shelly

Thank you for letting me know about the email. I think you have stated things very well. Morgan County is required to abide by the Safer At Home order unless they submit a variance. In order for the variance to even be considered, it has to have the support of local public health and every hospital in the county. Keeping our healthcare partners intact and functioning is my highest priority. If any of our partners feel less than confident about a variance application, I will stand with them and not sign off on it. I know there is incredible pressure from some business to have the ability to be open and while the ability to earn a living is very important, protecting lives is even more so. I stand with you. Thanks! Trish

Trish,

If there is anyway to get swabs for testing? We have seen a significant increase in Eben Ezer testing.

We use NP swab Daycorn or Foluq with viral media.

Thanks

Linda

Subject: [Non-DoD Source] Testing Warning Order

All active links contained in this email were disabled. Please verify the identity of the sender, and confirm the authenticity of all links contained within the message prior to copying and pasting the address to a Web browser.

---

As the situation develops in Weld and Morgan County, here is a warning order for potential National Guard testing sites.

Weld County: potential testing on Tuesday for Community Corrections and jail. Approx 250-300 pax. Awaiting confirmation from Dr. Wallace, Weld County Dept Public Health & Environment Director. If it's a go, then need:

- 1) Location(s) - Weld
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - WCDPHE
- 4) Arrangements for security/traffic control - Weld/SEOC
- 5) PIO - Weld
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

Morgan County: potential testing of Cargill employees this week. Pax numbers unknown. Awaiting decision from Trish McClain, Northeast Colorado Health Department. If it's a go, then need:

- 1) Location(s) - Morgan
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - NCHD/CDPHE
- 4) Arrangements for security/traffic control - Morgan/SEOC
- 5) PIO - Morgan
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

CONG - BPT operate two sites simultaneously. Send feasibility of doing two and capacity at each if there are two to SEOC NLT Monday 1600

More to follow

Hi,

Yes, Michelle gave me a link to a good article on this subject that listed some of these issues.

<https://www.journal-advocate.com/2020/04/19/report-rural-colorado-has-economic-barriers-to-social-distancing/>

I sent an email back to him, letting him know that an interview today would be impossible and asked if he could send a list of questions?

Hope that was a good response.

Mary

Hi,

I know you are all busy today and I have meetings most of the day as well so I am going to let him know we don't have time to do a facetime interview. From the link he provided, I am concluding that he is referring to our food plants and the processing lines not conducive to 6 feet apart. I could tell him that it can be a challenge, but that our local business are following CDC recommendations and have reduced shift hours in order to allow for social distancing requirements. And in the case of Cargill, Face shields are provided depending on the employee's job and work stations on the production line are either 6 feet apart or separated by thick plastic dividers to prevent contact between staff in close proximity.

I have not seen anything from Leprino, so I can't speak for that facility but Trish, you did say that they are following CDC procedures.

What do you think?

Mary

Subject: 9News Request for Wednesday

To: [maryb@nchd.org](mailto:maryb@nchd.org) <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hello,

This is Anusha Roy with 9News.

I hope you are staying safe.

We are working on a story about the Colorado Health Institute study that shows areas that face more obstacles to implementing social distancing.

One of the areas pointed out was rural Colorado.

<https://www.coloradohealthinstitute.org/research/colorado-covid-19-social-distancing-index>

We would love to connect for a zoom/facetime interview today regarding the unique challenges in rural Colorado?

And how the state moving to slowly reopen would impact social distancing when there were already challenges to be dealt with?

We are working on a story for 6 p.m. so let me know if we can line something up later this morning or early afternoon?

You can reach me at (303) 500 - 2934 or via e-mail.

Best,

Anusha

On Wed, Apr 22, 2020 at 11:16 AM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

In looking at the link, it shows Yuma county as high risk. I'd like more time to review the data before we respond to this. I think our aging population as well as essential workforce (agriculture) and poverty rates all play a role in this. I wouldn't say anything about Cargill or Leprino right now. I'd really like to study this more. Thanks! T

On Wed, Apr 22, 2020 at 10:20 AM Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)> wrote:

Hi,

I know you are all busy today and I have meetings most of the day as well so I am going to let him know we don't have time to do a facetime interview.

From the link he provided, I am concluding that he is referring to our food plants and the processing lines not conducive to 6 feet apart. I could tell him that it can be a challenge, but that our local business are following CDC recommendations and have reduced shift hours in order to allow for social distancing requirements. And in the case of Cargill, Face shields are provided depending on the employee's job and work stations on the production line are either 6 feet apart or separated by thick plastic dividers to prevent contact between staff in close proximity.

I have not seen anything from Leprino, so I can't speak for that facility but Trish, you did say that they are following CDC procedures.

What do you think?

Mary

Subject: 9News Request for Wednesday

To: [maryb@nchd.org](mailto:maryb@nchd.org) <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hello,

This is Anusha Roy with 9News.

I hope you are staying safe.

We are working on a story about the Colorado Health Institute study that shows areas that face more obstacles to implementing social distancing.

One of the areas pointed out was rural Colorado.

<https://www.coloradohealthinstitute.org/research/colorado-covid-19-social-distancing-index>

We would love to connect for a zoom/facetime interview today regarding the unique challenges in rural Colorado?

And how the state moving to slowly reopen would impact social distancing when there were already challenges to be dealt with?

We are working on a story for 6 p.m. so let me know if we can line something up later this morning or early afternoon?

You can reach me at

Best,

Anusha

Leslie,

We do not have any alcohol wipes or sani wipes and not sure we will receive any, at this time we will cancel your order. Sorry for the inconvenience. Please let us know if you need anything else.

On Mon, Apr 13, 2020 at 5:20 PM Leslie Mason <[l](#)> wrote:

Our current inventory of alcohol wipes is 800 and are burn rate is 280/day. We currently have all our tubs of germicidal sani wipes out on the units and burn through tub of 160 wipes about every one day per unit. We had an order into our medical supply vendor for both supplies for delivery tomorrow but they were unable to fulfill either item.

Sharing our daily update related to the ongoing processes with Coronavirus (COVID-19)

- We have now tested 16 patients – still with only two being resulted – both of those test results

- are 'negative'
- We continue our Hospital Incident Command Center on a virtual basis – absorbing information from Banner Health, the State, and the County
  - We are currently a Tier 1 Hospital, which means that we have *no or very minimal positive cases* within our community or service area
  - We continued to narrow our focus related to visitors, access to the environment and elective services – all in an effort to break that chain of transmission
    - Today, we began proactively rescheduling screening exams (mammography, ultrasound, bone density) to eight (8) weeks out
    - We also cancelled any “in house” (or in hospital) sleep studies until the beginning of May and then we will re-evaluate
  - We have held steady on our inventory of personal protective equipment (PPE) and we are grateful for your collaboration in utilizing these products efficiently
  - We received notice that nationally, smaller “piggy-back” solution bags may have limited availability and Supply Chain and Pharmacy have partnered to find an innovative resolution
  - The Emergency Department continues to triage patients with respiratory symptoms into a designated area within in the department; this has worked very effectively.
  - We have added “red zone” (or ‘safe zone’) areas to all of our inpatient rooms;
  - We will continue to strategize a safe, effective method to care for patients that may be admitted with the suspected virus – and we will continue to provide you with updates related to this process

BMG-Here are some updates from BMG COVID meeting from Dr. Gregory.

- We have also placed a visitor restrictions within the clinics. We currently are asking patients when they schedule and come in that there are no additional visitors. There are of course the following exceptions:
  1. One parent for pediatric patients
  2. One caregiver if needed for safety (example: Alzheimer’s patients)
- We will be posting signage in regards to our visitor restrictions today.
- I have included codes in a slide below on the appropriate G Code to use for charting telephone visits. Banner is also working on how to handle doing large scale telehealth visits if needed. More to come on that over the weekend.
- Banner has now suspended all visits in Colorado for any patients that may safely wait to be seen for 30 days. This has now also expanded into the specialty providers. As of yesterday afternoon we started rescheduling all of our Orthopedic patients and General Surgery patients. We will continue to see any urgent or emergent needs in the office.
- We also need to use PPE supplies only in situations that are indicated for usage.
- **Effective immediately – we are no longer performing COVID testing on most patients with symptoms**
- **ONLY test patients who are symptomatic AND are Health Care Workers (HCW) OR require hospitalization as an inpatient.**
- N95 respirator masks should **ONLY** be used in **airborne isolation rooms** or when **performing aerosol generating procedures** on patients with potential/confirmed COVID-19 infection. N95s should **NOT** be used on patients. If patients in precautions require transport outside of their room, place a standard procedure mask on them.
- Eye protection, both goggles and face shield not attached to a mask may be disinfected and reused. Disinfect eye protection with a standard alcohol wipe (prep pad), wetting all surfaces and allow to air dry.

Good morning Vinny,  
Cargill in Fort Morgan continues to operate and I believe JBS in Greeley reopened earlier this week. I am not in a position to forecast meat shortages but have not heard of any concerns regarding this on the calls/information that I have access to. Hope you are doing well. Thanks! Trish

On Wed, Apr 29, 2020 at 10:24 AM Vincent Del Giudice (BLOOMBERG/ NEWSROOM:) wrote:

Good morning. Thank you for the press release a few days back. Very helpful. As you know, President Trump has ordered meat plants to stay open. Do you have a response, considering the situation at Cargill in Fort Morgan? Is Colorado facing or anticipating any meat shortages -- or lulls -- as far as you now? Thank you. Vinny

Hi, here is a quick update from a call with Deanna this morning.

I wanted to ask her if she had any additional information on Media Mapping on other outbreak facilities.

She sent me a document from JBS. I have added it our PI folder under guidance. She said it has a lot of internal processes, but might help us.

She also sent a document on media talking points from a mine that had an outbreak. She said she thought it might get us thinking.

She finished by talking about how the state was taking lead on the Sterling Correctional Facility outbreak. She said there will be a press release and she will send it to us once it has approval. If we get calls, we are just to forward any questions to their DOC PIO, Annie Skinner. her contact information is in the NCHD\_PIO contact folder.

Thanks,  
Mary

Thank you for your reply. I will send this on to Luke with your contact information and he can connect with you for further info if he would like. We will incorporate some of this information in our press release as well, which will probably go out tomorrow. We will make sure you see it before we send it out. Thanks so much for your help with this. Trish

On Thu, Apr 9, 2020 at 2:16 PM Daniel Sullivan <[Daniel\\_Sullivan@cargill.com](mailto:Daniel_Sullivan@cargill.com)> wrote:

Thanks,

We are eager to share our efforts with folks through whatever channel we can. I've outlined our efforts below which you can include in your release. You can also give Luke my info and I can talk with him directly. I also spoke with a reporter, Jack Harvel, from the Fort Morgan times to share our information, but haven't seen a story from him post yet. I lived in Denver for 7 years and have worked with Luke previously.

At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.

Thank you so much for the partnership on this.

Cheers,  
Daniel Sullivan

Nice to virtually meet you Dan.

I emailed Luke back yesterday to say I was checking in with my team and would let him know if we could answer any of his questions. We haven't agreed to any kind of interview but thought it may be helpful to do a general press release to help explain the increase in positive cases in Morgan County. There has been a lot more testing in Morgan County compared to the other 5 counties we cover so their numbers are going to be higher. We would be glad to include information about Cargill if you think that would be helpful or I could connect you and Luke and you could take care of it from your end. NCHD is still going to do a press release regarding the numbers but we can do it without referencing Cargill at all.

I've included Michelle and Mary on this email thread as they are our public information officers and any press release would start with them.

From your perspective Dan, what would be most helpful? Thanks! Trish

Hi Katie,

Just left you a voicemail. My cell is 970-571-0153--might be easier to connect that way. Also, this is the email request we received:

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

Thanks,

We are eager to share our efforts with folks through whatever channel we can. I've outlined our efforts below which you can include in your release. You can also give Luke my info and I can talk with him directly. I also spoke with a reporter, Jack Harvel, from the Fort Morgan times to share our information, but haven't seen a story from him post yet. I lived in Denver for 7 years and have worked with Luke previously.

At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.

Thank you so much for the partnership on this.

Cheers,  
Daniel Sullivan

Nice to virtually meet you Dan.

I emailed Luke back yesterday to say I was checking in with my team and would let him know if we could answer any of his questions. We haven't agreed to any kind of interview but thought it may be helpful to do a general press release to help explain the increase in positive cases in Morgan County. There has been a lot more testing in

Morgan County compared to the other 5 counties we cover so their numbers are going to be higher. We would be glad to include information about Cargill if you think that would be helpful or I could connect you and Luke and you could take care of it from your end. NCHD is still going to do a press release regarding the numbers but we can do it without referencing Cargill at all.

I've included Michelle and Mary on this email thread as they are our public information officers and any press release would start with them.

From your perspective Dan, what would be most helpful? Thanks! Trish

On Mon, Apr 6, 2020 at 11:16 AM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

I just spoke to Scott Reyez. They are kicking booty! When an employee calls in as a positive, the direct family members that work at the plant are sent home for the 14 day quarantine - and paid for those 14 days. He is even able to trace back carpooling and then those people are quarantined! He has a whole board that shows how the positives are intertwined.

They are able to space some of fab employees 6' apart but in some areas that is not possible. All fab employees are wearing a mask or scarf. Cleaning handrails and doorknobs every hour, lunch room has changed the seating so people are not gathering together, cleaning offices several times a day.

They are doing great. Scott and I will continue to report positives so he can take care of the plant and we can take care of the rest.

Hello,

We were wondering if you guys have an updated line list from Cargill? We are noticing higher rates in Morgan County and wondering if this is due to Cargill or potentially other reasons?

Thanks!

Good afternoon,

I talked with Tyler, the plant manager at Cargill earlier today. There are no employees other than cleaning crews in the plant over the weekend so I will go on Monday to take a look at what they have in place. We talked with the Cargill team on March 24 to make a plan for how they were going to screen, exclude workers that had s/s, etc. Here's a list of things we have been told are occurring at Cargill since our call on 3/24: s/s screening and temp check upon entering the campus-- they have tape that measures out 6 ft increments so employees don't cluster reworking of cafeteria so workers don't sit across from each other

telling staff to stay home when they are sick--staff have paid sick leave  
truck drivers are not allowed in the plant  
any contractors coming in are screened for s/s and temp prior to entry to the plant

Tammy had contact with their medical person on 4/6 and here is what was reported then:  
when an employee calls in with positive s/s, any direct family members that also work at the plant are sent home for quarantine and paid for those days

Scott has been tracing carpool members and also having those workers quarantine  
areas of the plant that do not allow for 6 ft between workers--workers are wearing masks/scarf  
handrails and doorknobs being cleaned every hour, increased cleaning of offices as well

When I talked with Tyler today here are additional measures:  
this weekend they are installing heavy plastic shee ing between work stations where 6 ft is not able to be obtained  
fogging common areas and offices with a disinfectant called Decon 7  
expecting 5000 masks from a Broomfield manufacturer on Thursday (?) and the plan is to give each employee 2 masks with instructions on how to wash one/wear one  
they've emptied the vending machines and doing whatever they can think of to reduce common touch points

Hope this helps. I plan to go on Monday with the Morgan County Emergency Manager and our Regional Homeland Security Director to look at operations there. Let me know what else I can do. Trish

Are the positive cases in CEDRS? If so, is Cargill listed for employer? We will want to track all confirmed and probable cases attributed to Cargill. I can go in and update the outbreak field in CEDRS to "Cargill Meat Solutions" so that we can track these in their own line list.

Could you provide some more information on how many employees work at Cargill, what the set up is like (is social distancing possible, etc), what measures they are taking to reduce transmission?

Thanks,  
Katie

Good afternoon,

I talked with Tyler, the plant manager at Cargill earlier today. There are no employees other than cleaning crews in the plant over the weekend so I will go on Monday to take a look at what they have in place. We talked with the Cargill team on March 24 to make a plan for how they were going to screen, exclude workers that had s/s, etc. Here's a list of things we have been told are occurring at Cargill since our call on 3/24: s/s screening and temp check upon entering the campus--they have tape that measures out 6 ft increments so employees don't cluster reworking of cafeteria so workers don't sit across from each other telling staff to stay home when they are sick--staff have paid sick leave truck drivers are not allowed in the plant any contractors coming in are screened for s/s and temp prior to entry to the plant

Tammy had contact with their medical person on 4/6 and here is what was reported then:

when an employee calls in with positive s/s, any direct family members that also work at the plant are sent home for quarantine and paid for those days

Scott has been tracing carpool members and also having those workers quarantine

areas of the plant that do not allow for 6 ft between workers--workers are wearing masks/scarf

handrails and doorknobs being cleaned every hour, increased cleaning of offices as well

When I talked with Tyler today here are additional measures:

this weekend they are installing heavy plastic shee ing between work stations where 6 ft is not able to be obtained

fogging common areas and offices with a disinfectant called Decon 7

expecting 5000 masks from a Broomfield manufacturer on Thursday (?) and the plan is to give each employee 2 masks with instructions on how to wash one/wear one

they've emptied the vending machines and doing whatever they can think of to reduce common touch points

Hope this helps. I plan to go on Monday wi h the Morgan County Emergency Manager and our Regional Homeland Security Director to look at operations there. Let me know what else I can do. Trish

Thanks, Tammy!

Are the positive cases in CEDRS? If so, is Cargill listed for employer? We will want to track all confirmed and probable cases attributed to Cargill. I can go in and update the outbreak field in CEDRS to "Cargill Meat Solutions" so that we can track these in their own line list.

Could you provide some more information on how many employees work at Cargill, what the set up is like (is social distancing possible, etc), what measures they are taking to reduce transmission?

Thanks,

Katie

Hi Trish,

I was wanting to follow up and see if you were able to do a site visit of Cargill today? Could you also send me Tyler, the plant manager's contact info (full name, phone, email) so that I may update his info in our outbreak database as the main point of contact for the facility?

Thanks,  
Katie

Good afternoon,

I talked with Tyler, the plant manager at Cargill earlier today. There are no employees other than cleaning crews in the plant over the weekend so I will go on Monday to take a look at what they have in place. We talked with the Cargill team on March 24 to make a plan for how they were going to screen, exclude workers that had s/s, etc. Here's a list of things we have been told are occurring at Cargill since our call on 3/24: s/s screening and temp check upon entering the campus--they have tape that measures out 6 ft increments so employees don't cluster reworking of cafeteria so workers don't sit across from each other telling staff to stay home when they are sick--staff have paid sick leave truck drivers are not allowed in the plant any contractors coming in are screened for s/s and temp prior to entry to the plant

Tammy had contact with their medical person on 4/6 and here is what was reported then:

when an employee calls in with positive s/s, any direct family members that also work at the plant are sent home for quarantine and paid for those days

Scott has been tracing carpool members and also having those workers quarantine areas of the plant that do not allow for 6 ft between workers--workers are wearing masks/scarf handrails and doorknobs being cleaned every hour, increased cleaning of offices as well

When I talked with Tyler today here are additional measures:

this weekend they are installing heavy plastic sheeting between work stations where 6 ft is not able to be obtained fogging common areas and offices with a disinfectant called Decon 7

expecting 5000 masks from a Broomfield manufacturer on Thursday (?) and the plan is to give each employee 2 masks with instructions on how to wash one/wear one

they've emptied the vending machines and doing whatever they can think of to reduce common touch points

Hope this helps. I plan to go on Monday with the Morgan County Emergency Manager and our Regional Homeland Security Director to look at operations there. Let me know what else I can do. Trish

On Sat, Apr 11, 2020 at 12:56 PM Ziegler - CDPHE, Katie <[katie.ziegler@state.co.us](mailto:katie.ziegler@state.co.us)> wrote:

Thanks, Tammy!

Are the positive cases in CEDRS? If so, is Cargill listed for employer? We will want to track all confirmed and probable cases attributed to Cargill. I can go in and update the outbreak field in CEDRS to "Cargill Meat Solutions" so that we can track these in their own line list.

Could you provide some more information on how many employees work at Cargill, what the set up is like (is social distancing possible, etc), what measures they are taking to reduce transmission?

Thanks,  
Katie

Good morning,

I wanted to give an update. I did a site visit to Cargill yesterday and also talked to the corporate health person about the benefits of testing. She had some questions I couldn't answer so I have her and the plant manager doing a conference call this afternoon with a CDPHE epi person to hopefully get those answered. Would it be possible to have someone from this group on that call--Chantelle (Cargill corporate health person) did ask me about capacity--how many tests/hour would be collected, how long would the testing site be active, turnaround time for results. I think Amanda can handle some of the test specific questions--PCR/etc but it may be helpful to have someone from this group on as well. It will be at 3pm today. Let me know and I can send you the invitation. Thanks! Trish

Hi Tyler

I asked the state the questions you and I discussed about testing, you can see their answers below. The survey form that is linked below is for a community testing center--we may be able to have Marathon act as a CTC. Currently testing supplies for the NP swabs are coming through NCHD to send out to community partners. These swabs have to go back to the CDPHE lab but if you end up using a commercial lab, they would need to provide the test kits as the viral medium used in the swabs we are receiving was developed at CDPHE and may not be compatible with other labs' testing equipment. I hope this helps as you and your team look at your options. Let me know what else I can do to help. Trish

On Thu, Apr 23, 2020 at 1:09 PM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

Good afternoon,

The plant manager for Cargill in Fort Morgan called me today and they have some questions regarding testing. Who would be the best person to direct these to? These are the questions:

1. Would Cargill be able to get one of the Abbott Diagnostic rapid testing devices and what would be the requirements?

**There should be Abbott Dx testing matching in Sterling**

2. If rapid testing is not available, where would they send tests that they collect on site? I did say the CDPHE lab is accepting samples as well as Quest and LabCorp

**Yes, either CDPHE or other commercial labs are fine to send tests to.**

3. They do have a 3rd party health care provider located in Fort Morgan (Marathon Health) that could assist with collection, however they are concerned about having adequate PPE and not sure how to procure adequate PPE since they may not be deemed a priority when it comes to

distribution/supply chains.

**We might have PPE for outbreak response. Maren, would you be able to answer this one?**

4. Not a question but just some information: Cargill would test any employee that was either symptomatic or had some risks identified from their screening tool--basically anyone that they would ask to either isolate or quarantine based on the current screening/temp checks they have in place for any staff coming into the plant.

I believe Cargill corp is having a meeting about his today so as I hear more I'll loop you in. Thanks! Trish

Good afternoon,

The plant manager for Cargill in Fort Morgan called me today and they have some questions regarding testing. Who would be the best person to direct these to? These are the questions:

1. Would Cargill be able to get one of the Abbott Diagnostic rapid testing devices and what would be the requirements?

**There should be Abbott Dx testing matching in Sterling**

2. If rapid testing is not available, where would they send tests that they collect on site? I did say the CDPHE lab is accepting samples as well as Quest and LabCorp

**Yes, either CDPHE or other commercial labs are fine to send tests to.**

3. They do have a 3rd party health care provider located in Fort Morgan (Marathon Health) that could assist with collection, however they are concerned about having adequate PPE and not sure how to procure adequate PPE since they may not be deemed a priority when it comes to distribution/supply chains.

**We might have PPE for outbreak response. Maren, would you be able to answer this one?**

4. Not a question but just some information: Cargill would test any employee that was either symptomatic or had some risks identified from their screening tool--basically anyone that they would ask to either isolate or quarantine based on the current screening/temp checks they have in place for any staff coming into the plant.

Not a question but just some information: Cargill would test any employee that was either symptomatic or had some risks identified from their screening tool--basically anyone that they would ask to either isolate or quarantine based on the current screening/temp checks they have in place for any staff coming into the plant.

I believe Cargill corp is having a meeting about this today so as I hear more I'll loop you in. Thanks! Trish

I have requested a line list from Cargill. I was told that my request would be sent up to the management which then probably needs to travel to corporate.

Cargill was not requesting letters from physicians to my knowledge. They had a system in place to bring the employee back to work which included meeting with a member of their Occ Health team. There may be circumstances in which a medical note is needed; which is not part of our investigation activities.

Lastly, I am entering all CDC forms into CEDRS as well as updating employer information. I do have several probables to enter and if you need that number, I will count those for you today. We are finding probables during our investigation and making every effort to gather information for the overall case count; some families will share and others refuse.

I will start a line list of the case I have entered into CEDRS. This info cannot happen overnight and at best, you will have something by the middle of next week. If there is a way to pull information from CEDRS to expedite the process for me, I would be most grateful.

Tammy

Hello,

I just had 2 things to follow up on regarding Cargill.

1. We received a message from a physician at Salud and they are receiving multiple calls per day from patients involved in the packing plant-associated outbreaks who have been told to obtain work release authorization from their doctors in order to return to work.

- Do you know what Cargill is recommending to their employees? Cases should not require doctor authorizations to return to work as long they met that 7 day minimum requirement. This is a burden on the healthcare system if cases are asking doctors to "clear" them.

2. We need a line list of cases that are employees of Cargill, at the very least we need updated numbers on how many are confirmed cases and how many are probable.

Thanks,  
Amanda

There may be circumstances in which a medical note is needed; which is not part of our investigation activities.

Lastly, I am entering all CDC forms into CEDRS as well as updating employer information. I do have several probables to enter and if you need that number, I will count those for you today. We are finding probables during our investigation and making every effort to gather information for the overall case count; some families will share and others refuse.

I will start a line list of the case I have entered into CEDRS. This info cannot happen overnight and at best, you will have something by the middle of next week. If there is a way to pull information from CEDRS to expedite the process for me, I would be most grateful.

Tammy

On Thu, Apr 23, 2020 at 3:22 PM Amanda Metz - CDPHE <[amanda.metz@state.co.us](mailto:amanda.metz@state.co.us)> wrote:

Hello,

I just had 2 things to follow up on regarding Cargill.

1. We received a message from a physician at Salud and they are receiving multiple calls per day from patients involved in the packing plant-associated outbreaks who have been told to obtain work release authorization from their doctors in order to return to work.  
- Do you know what Cargill is recommending to their employees? Cases should not require doctor authorizations to return to work as long they met that 7 day minimum requirement. This is a burden on the healthcare system if cases are asking doctors to "clear" them.

2. We need a line list of cases that are employees of Cargill, at the very least we need updated numbers on how many are confirmed cases and how many are probable.

Thanks,  
Amanda

Greetings owners/operators,

The Northeast Colorado Health Department would like to take the time to update you regarding moving forward with the Safer at Home guidelines. We know this is a lot of information, so please be sure to read the entire email. You may also refer to the attached orders and guidance for further information. Listed below is just some of the information you need to be aware of.

The Safer at Home **Public Health Order 20-28** outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. This Public Health Order **begins Monday April 27, 2020** and will continue to be in effect **until 11:59 p.m. on May 26, 2020**, unless extended, rescinded, superseded, or amended in writing. A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

The key message at this time is that you must continue to operate following your approved plan. A few things to note in the new Safer at Home Order:

- Many of the courses in our area also serve food or beverages. The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public:
  1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
  2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption.

All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory Social Distancing Requirements, except as prohibited or limited by Executive Order D 2020 044 or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

This means that there shall be **no dining or consumption of food or beverage on the premises**, as currently stated in your approved plan.

Social Distancing Requirements: To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds

as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**Beginning on April 27th:**

Your course may continue to operate as listed in your approved plan. The only change currently is in regards to your pro shop. All Non-Critical Retail, as defined within the order, may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory social distancing requirements,

Non-Critical Retail (the category containing retail shops) must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#) (attached), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#) (also attached). Refer symptomatic employees to the [CDPHE Symptom Tracker](#). Post signage for employees and customers on good hygiene and other sanitation practices.

Non-Critical Retail must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.
5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

**Effective May 1st:**

Non-Critical Retail must continue implementing the measures within the workplace listed above from April 27th, and in addition:

1. Maintain 6 foot distancing between patrons and employees;
2. Effectively symptom monitor employees as listed in Section II.I;
3. Provide face coverings, and gloves as necessary and appropriate, to employees;
4. Ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. Provide dedicated, in-store hours for vulnerable or at-risk individuals.

Non-Critical Retail must continue to implement the measures regarding employees listed above from April 27th.

Non-Critical Retail must implement the measures to minimize disease transmission for customers listed above from April 27th, in addition to the following measures:

1. Limit the number of customers on the premises as needed to make 6 foot distancing between

- customers attainable;
2. Provide decals and demarcation for waiting area in lines that meet social distancing criteria;
  3. Create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
  4. Create signage to encourage the use of masks and gloves by customers while on the premises; and
  5. Provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

**Activity/Groups:**

Individuals are encouraged to only leave their Residence to perform Necessary Activities, provided they comply at all times and to the greatest extent possible with Social Distancing Requirements. People at high risk of severe illness from COVID-19 are urged not to leave their residence except as necessary to receive medical care. People who are sick must not leave their residence except as necessary to receive medical care, and must not go to work, even for a Critical Business. Individuals may participate in local and personal recreation in outside public spaces, as an authorized Necessary Activity, in groups no larger than 10 and practicing social distancing maintaining 6 feet between participants. Travel for recreational purposes should be limited to your own community like your county of residence or traveling no more than about 10 miles.

**Public Health Order 20-26 already in effect (Face Coverings/Gloves) for Courses with Restaurants:**

All employees of Critical Businesses or performing Critical Government Functions who work in close proximity to other employees or with the public shall wear a medical or non-medical face covering to help prevent the spread of disease. Employers who operate Critical Businesses or manage Critical Government Functions should make every effort to provide their workforce with medical or non-medical face coverings. Unless working in a healthcare setting, employers should provide non-medical face coverings for their employees. Employers shall make every effort to assign employees who cannot wear face coverings for health or safety reasons to perform work that does not bring the worker into close proximity with other employees or the public.

- Workers who may routinely or consistently come within 6 feet of other workers or the public are considered to be in close proximity to others and must wear a medical or non-medical face covering that covers the worker's nose and mouth, unless doing so would inhibit the individual's health. Workers with health issues that preclude them from wearing a face covering must document those concerns with their employer.
- A worker may use a face covering provided by their employer, if available, or may choose to use their own face covering. Cloth face coverings should fit snugly but comfortably against the side of the face, include multiple layers of fabric, allow for breathing without restriction, and be able to be laundered and machine dried without damage or change to shape. Face coverings need to cover the nose and mouth at all times and should remain in place until taken off safely. If a worker's face covering moves during work, it needs to be replaced with one that does not need to be frequently adjusted to reduce touching of the face. Workers should replace face coverings when theirs becomes dirty, wet, and/or difficult to breathe through.
- Workers who prepare or handle food that will be made available to the public for purchase, such as restaurant or grocery store workers, must wear a face covering while performing tasks involving food preparation and handling.

All employees of Critical Businesses or performing Critical Government Functions who come into contact with customers or goods should wear gloves, if gloves are provided by their employer. Employees in food and child care industries shall minimally utilize disposable gloves as normally required by their governing regulations. Employees that are directly involved with disinfecting equipment and surfaces within critical business and/or have direct contact with customers **shall wear gloves** when involved in these activities.

I am looking to do an information push to all of the licensed Retail Food Facilities in Yuma and Washington Counties (also for use for information push in other areas by the rest of EH). Please review with any questions or concerns before we send this out. THANKS!

Greetings owners/operators,

The Northeast Colorado Health Department would like to take the time to update you regarding moving forward with the Safer at Home guidelines. We know this is a lot of information, so please be sure to read the entire email. You may also refer to the attached orders and guidance for further information. Listed below is just some of the information you need to be aware of.

The Safer at Home **Public Health Order 20-28** outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. This Public Health Order **begins Monday April 27, 2020** and will continue to be in effect **until 11:59 p.m. on May 26, 2020**, unless extended, rescinded, superseded, or amended in writing.

The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public (**no dining**):

1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption;

All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory Social Distancing Requirements, except as prohibited or limited by Executive Order D 2020 044 or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

**Social Distancing Requirements:** To reduce the risk of disease transmission, individuals shall

maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands

**Beginning on April 27th:**

Critical Retail (the category containing retail food establishments) must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#) (attached), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#) (also attached). Refer symptomatic employees to the [CDPHE Symptom Tracker](#). Post signage for employees and customers on good hygiene and other sanitation practices.

Critical Retail must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.
5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

**Effective May 1st:**

Critical Retail must continue implementing the measures within the workplace listed above from April 27th, and in addition:

1. Maintain 6 foot distancing between patrons and employees;
2. Effectively symptom monitor employees as listed in Section II.I;
3. Provide face coverings, and gloves as necessary and appropriate, to employees;
4. Ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. Provide dedicated, in-store hours for vulnerable or at-risk individuals.

Critical and Non-Critical Retail must continue to implement the measures regarding employees listed above from April 27th.

Critical and Non-Critical Retail must implement the measures to minimize disease transmission for customers listed above from April 27th, in addition to the following measures:

1. Limit the number of customers on the premises as needed to make 6 foot distancing between customers attainable;
2. Provide decals and demarcation for waiting area in lines that meet social distancing criteria;
3. Create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
4. Create signage to encourage the use of masks and gloves by customers while on the premises; and
5. Provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

**Public Health Order 20-26 already in effect (Face Coverings/Gloves):**

All employees of Critical Businesses or performing Critical Government Functions who work in close proximity to other employees or with the public shall wear a medical or non-medical face covering to help prevent the spread of disease. Employers who operate Critical Businesses or manage Critical Government Functions should make every effort to provide their workforce with medical or non-medical face coverings. Unless working in a healthcare setting, employers should provide non-medical face coverings for their employees. Employers shall make every effort to assign employees who cannot wear face coverings for health or safety reasons to perform work that does not bring the worker into close proximity with other employees or the public.

- Workers who may routinely or consistently come within 6 feet of other workers or the public are considered to be in close proximity to others and must wear a medical or non-medical face covering that covers the worker's nose and mouth, unless doing so would inhibit the individual's health. Workers with health issues that preclude them from wearing a face covering must document those concerns with their employer.
- A worker may use a face covering provided by their employer, if available, or may choose to use their own face covering. Cloth face coverings should fit snugly but comfortably against the side of the face, include multiple layers of fabric, allow for breathing without restriction, and be able to be laundered and machine dried without damage or change to shape. Face coverings need to cover the nose and mouth at all times and should remain in place until taken off safely. If a worker's face covering moves during work, it needs to be replaced with one that does not need to be frequently adjusted to reduce touching of the face. Workers should replace face coverings when theirs becomes dirty, wet, and/or difficult to breathe through.
- Workers who prepare or handle food that will be made available to the public for purchase, such as restaurant or grocery store workers, must wear a face covering while performing tasks involving food preparation and handling.

All employees of Critical Businesses or performing Critical Government Functions who come into contact with customers or goods should wear gloves, if gloves are provided by their employer. Employees in food and child care industries shall minimally utilize disposable gloves as normally required by their governing regulations. Employees that are directly involved with disinfecting equipment and surfaces within critical business and/or have direct contact with customers **shall wear gloves** when involved in these activities.

Please refer to our website at <https://www.nchd.org/co> for the most up to date information regarding COVID-19 in the Northeast Region.

Hi Trish,

How about tomorrow at 3pm? I can call you then. What's a good number to reach you? I'm at 720-391-6702.

Thanks so much,  
Kate

On Wed, Apr 22, 2020 at 12:15 PM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

Good to meet you as well Kate. And thank you Deborah for the introduction.

I could meet at 4:30 today or 3:00 tomorrow or I also currently have most of Friday afternoon open. Let me know what works for you--I look forward to connecting. Trish

On Wed, Apr 22, 2020 at 11:50 AM Greenberg - CDA, Kate <[kate.greenberg@state.co.us](mailto:kate.greenberg@state.co.us)> wrote:

Deborah, thanks so much for making the connection.

Trish, it's great to formally meet you. I wanted to reach out to offer my support to you and your team as you deal with rapidly-evolving public health scenarios in the meat processing sector. We are working hard to mitigate closures wherever possible while supporting our state and public health officials in protecting public health.

If you have a few minutes in the coming days, I would welcome a call simply to get acquainted and discuss ways we can work together. Let me know what might work for you and I can get something set up.

All my best,  
Kate

Hi Daniel,

We are still getting some calls in relation to the Cargill outbreak.

We were wondering if you were planning to, or if you would want to, put out a press release about your visit from CDC last Friday? Since the visit was because of your exemplary processes and procedures, and they were looking for guidelines for other facilities, we were thinking that was a very positive message for you and the community.

Please let us know your thoughts.

Thanks,  
Mary

Hello LPHA Partners,

We are so grateful for the incredibly hard work of you and your teams to control COVID-19 in Colorado and to protect us all. Thank you for all you are doing!

Epi Team 2 at CDPHE has reorganized and expanded to better support the transition for local public health agencies to lead COVID-19 outbreak investigations and now include the outbreak epis as part of our teams. This shift in roles will allow us to provide additional technical assistance, coordination and subject-matter expertise support. Please see the UPDATED team 2 roster below when emailing us!

For newly reported outbreaks, the investigations will be led by the appropriate LPHA as outlined in the [COVID Outbreak Response Responsibilities](#) document shared on the LPHA call Tuesday. We will designate a CDPHE Team 2 member as a point of contact for each outbreak as outlined in [COVID Outbreak Response Responsibilities](#) document.

At the beginning and end of an outbreak, LPHAs should ask facilities to complete an [Outbreak Form](#). LPHAs should also obtain [line lists](#) from facilities each Monday (line lists should be current through Sunday). LPHAs should share these line lists with the CDPHE Team 2 point of contact for the outbreak by noon every Tuesday.

Each week, the CDPHE point of contact will enter data from the Outbreak Form and updated line list into the internal CDPHE outbreak database by Wednesday morning. New outbreaks will be entered into the outbreak databases within 24 hrs of notification. This CDPHE outbreak database will be used to compile aggregate probable and confirmed case data for reporting to the public.

For existing outbreaks, we are developing a plan to transition those to the LPHAs with appropriate support and data transfer. As we iron out the details we will share this transfer to individual LPHAs in the next week.

Hi Trish,

Luke Runyon here again from KUNC. Hope you're doing well.

I'm writing with an interview request. I'm working on a story about worker safety in meatpacking plants for NPR, and I'm going to focus most of my attention in the story on the Cargill and JBS plants in Fort Morgan and Greeley.

Because you recently toured the plant in Fort Morgan, and have been in touch with the company, I'd like to arrange an interview to talk about that experience.

I'm hoping to wrap up the story by Thursday evening. Let me know if you're able to talk this afternoon, tomorrow or Thursday morning.

Thanks,

Luke

**Subject:** Re: COVID-19 cases in Morgan County

Good afternoon Luke,

My team and I have been working on a press release to discuss the increase in positive cases in Morgan County. At this point, one of the major factors is that there is more testing going on in Morgan County, thus we are seeing more positives. I did reach out to Cargill and part of their response is as follows:

*At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.*

I've also copied Daniel Sullivan on this email as he is the Cargill Media Director for their Protein operations. He could give you more information on the plant in Fort Morgan. I've also copied Michelle and Mary, they are the Public Information Officers for NCHD and would be happy to make sure you are on our list for any press releases that we do. Thanks again for contacting us. Trish

I agree that there is more testing occurring in Morgan County so we've got more identified cases. I don't want to advertise the Logan symptom tracker as this was pushed out without any input from us and CDPHE is going to launch a statewide symptom tracker in the next few days that will cover all of our counties. Really good ideas Mary and I think we can certainly use some of them in our response to KUNC. T

Thanks for the information.

In regards to sharing this on our social media I am not in favor of only doing something for one of our six counties. I really think we need to stick to regional messaging on NCHD's social media.

Thanks again. We will wait to hear back from Cargill but this will be good information to add in what we respond to KUNC.

Hi,

I was talking with Tammy after our call and was questioning if we should explain to the reporter that we are seeing a surge in cases because of the decisions by medical facilities to test compared to in Logan where medical facilities are choosing to save them for more severe cases. She lead me to a Logan County Symptom Checker, where there are more like 64 people that have the symptoms and are guided to quarantine (these are just the people that know about the site). Maybe it's not a surge in Morgan county but a predictable spread of the virus and Morgan County is really no different than other counties, Cargill or not?

Not sure if you knew about that site or not, but here is the

link. <https://datastudio.google.com/u/0/reporting/14sBg3dS6JLbSs9q3Ljs4HGx3Zuvnvy46/page/2e3KB>

**Also wondering if we should share this site on social media?**

Just thought I would share my thoughts.

Thanks for the information.

In regards to sharing this on our social media I am not in favor of only doing something for one of our six counties. I really think we need to stick to regional messaging on NCHD's social media.

Thanks again. We will wait to hear back from Cargill but this will be good information to add in what we respond to KUNC.

Hi,

I was talking with Tammy after our call and was questioning if we should explain to the reporter that we are seeing a surge in cases because of the decisions by medical facilities to test compared to in Logan where medical facilities are choosing to save them for more severe cases. She lead me to a Logan County Symptom Checker, where there are more like 64 people that have the symptoms and are guided to quarantine (these are just the people that know about the site). Maybe it's not a surge in Morgan county but a predictable spread of the virus and Morgan County is really no different than other counties, Cargill or not?

Not sure if you knew about that site or not, but here is the link. <https://datastudio.google.com/u/0/reporting/14sBg3dS6JLbSs9q3Ljs4HGx3Zuvnvy46/page/2e3KB>

**Also wondering if we should share this site on social media?**

Just thought I would share my thoughts.

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health Department had a few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at 512-289-1024.

Thanks,  
Elise

Good afternoon, Elise,

So far the effect on staff at the Sterling Correctional Facility has been minimal. We are continuing to monitor the COVID-19 cases within the community.

Since April 16, NCHD has coordinated with the Sterling Regional MedCenter (SRMC), the Logan County Emergency Manager and other local officials regarding this situation. SRMC had already been working with the Department of Corrections prior to the conversation we had with all parties on April 16. Steps taken by the Sterling Correctional Facility have been effective in protecting staff members thus far. SRMC has a Surge Plan in place but have had no unusual concern about the effects they may see as a result of the outbreak at the Sterling Correctional Facility.

Please let me know if you have any further questions or concerns.

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health Department had a

few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at 512-289-1024.

Thanks,  
Elise

I sent a response, Mary. I didn't speak with her but I did send her a response that Mike approved and Trish later let me know that she thought it was a good response. We don't need to do anything further with this one unless she contacts us again.

Thanks.

Hi,

Did you talk to her?

Since there are only two cases of staff who have been affected, I would say that we are prepared but not planning anything different. The state is managing the outbreak so supplies of PPE are coming from them so we are unaffected by that. Is that it?

Mary

Good afternoon, Elise,

So far the effect on staff at the Sterling Correctional Facility has been minimal. We are continuing to monitor the COVID-19 cases within the community.

Since April 16, NCHD has coordinated with the Sterling Regional MedCenter (SRMC), the Logan County Emergency Manager and other local officials regarding this situation. SRMC had already been working with the Department of Corrections prior to the conversation we had with all parties on April 16. Steps taken by the Sterling Correctional Facility have been effective in protecting staff members thus far. SRMC has a Surge Plan in place but have had no unusual concern about the effects they may see as a result of the outbreak at the Sterling Correctional Facility.

Please let me know if you have any further questions or concerns.

It's fine to take it off our website. I agree that we need to do something that shows our support for Eben Ezer and all facilities as we work together. Thank you! T

On Mon, Apr 13, 2020 at 10:06 AM NCHD PIO <[pio@nchd.org](mailto:pio@nchd.org)> wrote:

Mike does think a press release from NCHD should be written but maybe instead of focusing on Eben Ezer, they just be used as an example of how easy this virus can spread even when a facility is doing everything they are supposed to do. I will start drafting something and include something about NCHD supporting this facility through their ordeal. I will send something for both of you to read.

I also hear that there have been questions coming to our staff because of the way their press release was worded in talking about neighborhoods. I knew what they meant and it never occurred to me that the community of Brush might take it to mean it was spreading in their community neighborhoods which wasn't what Eben Ezer meant. I will figure out how to add that in as well.

In the meantime, Trish, I think we should take their press release off of our website. I agree with Mary that it shouldn't be on our website. It should be on theirs.

Thanks

On Mon, Apr 13, 2020 at 9:47 AM Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)> wrote:

Hi,

I was thinking about how we added their press release to our News Release website page and although I agree with wanting to support the facility, I am not sure if that is the place to put it since it came from them. It's their press release and I feel like that page is for our news releases.

What are your thoughts?

My suggestion would be to write a quick press release on how NCHD is supporting Eben Exer through this ordeal and then link to their press release that way.

What do you think?

Mary

**Subject:** Re: efforts made at Cargill-Draft #2  
**Date:** Wednesday, April 15, 2020 10:50:36 AM

---

Upon arrival to the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their

badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Good afternoon, Kyle,

I did get your voicemail. NCHD is working with Cargill management and our director along with other public health professionals were conducting a site visit this afternoon but I have no update at this point. When I have further information I will be calling you back. Thank you.

Trish – thanks for all your help and cooperation these past few weeks.

I have been on the phone with Kelli at Marathon – they have been in touch with Patrick at the state Health Department and are expected to receive 200 test kits today. We will send symptomatic employees over to Marathon to be tested as they screen out of our process. A courier will pick up the specimens at Marathon and transport to the State Lab for processing. We hope to start this early next week. That meets our testing needs at this time.

Cathy is working on getting you the data of our employees currently out on quarantine and isolation – we will include name, last day work, and reason why they are out. It is a moving target as we add new folks, bring those back to work that are ready, etc. Cathy is doing some fine tuning and should have that to you in the next day or so.

Again - thanks for all your help, we appreciate it.

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state lab
- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plan or become symptomatic during the day. They would also recommend testing for close contacts of symptomatic people, even if those close contacts aren't symptomatic
- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

Chantelle,

Thanks so much for letting us know what the plan is for testing for Cargill. It sounds great. Glad Kelli was able to connect with the state lab. And thank you Catherine--I understand about moving targets. If there's anything we can do on our end, just let us know. Have a good evening! Trish

On Wed, Apr 29, 2020 at 3:05 PM Chantelle Johnson <  
wrote:

Trish – thanks for all your help and cooperation these past few weeks.

I have been on the phone with Kelli at Marathon – they have been in touch with Patrick at the state Health Department and are expected to receive 200 test kits today. We will send symptomatic employees over to Marathon to be tested as they screen out of our process. A courier will pick up the specimens at Marathon and transport to the State Lab for processing. We hope to start this early next week. That meets our testing needs at this time.

Cathy is working on getting you the data of our employees currently out on quarantine and isolation – we will include name, last day work, and reason why they are out. It is a moving target as we add new folks, bring those back to work that are ready, etc. Cathy is doing some fine tuning and should have that to you in the next day or so.

Again - thanks for all your help, we appreciate it.

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state lab
- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plant or become symptomatic during the day. They would also recommend testing for close

contacts of symptomatic people, even if those close contacts aren't symptomatic

- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

I wanted to let you know we are going to release the proactive statement below. Since we don't know the exact number that will be reported on through the state, we intentionally left out the exact number. We will share how many employees we tested (nearly 390) when asked. I plan to share by 12:45 to be ahead of the state.

Let me know if you need anything else from us and feel free to send any media inquiries that you receive about this to me.

Thanks again for your partnership. Kim

#### **Media Statement**

Consistent with our desire to prioritize the health and safety of our employees, Leprino Foods took the proactive step of testing every employee in our Fort Morgan plant. We conducted the testing in partnership with the Northeast Colorado Health Department. As an essential business, we took this unprecedented approach because we had concerns about elevated COVID-19 activity in the Fort Morgan area and the lack of publicly available testing.

So far, approximately 80% of our workforce received a negative result for the SARS-CoV2 virus. Those employees who tested positive have been told that they are not to return to the workplace until they have been medically cleared. Significantly, nearly half of those who tested positive were asymptomatic. We believed that testing our entire workplace was necessary to ensure that we removed those asymptomatic positive cases from our workforce and pave the way for eventually returning to full operations at the plant.

As a result of this testing and the deep cleaning and disinfecting of the facility during the

course of this week, we are planning to resume partial operations in a phased approach over this coming weekend. Employees with a negative test result and no symptoms will return to work. We will continue ongoing monitoring of all our employees, including targeted testing. We will also continue with daily temperature checks, health questionnaires, social distancing, wellbeing checks, and heightened cleaning protocols.

We are thinking around 60-70. The ones that have come through as of last Friday, 4/24 are listed in the state disease reporting system so the state does have access to that data. Trish

On Tue, Apr 28, 2020 at 5:26 PM Kimberly DeVigil > wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began

onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### **SANITATION**

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. For more information, please visit [www.leprinofoods.com](http://www.leprinofoods.com).

Please let me know if you have questions.

Thank you,

Kim DeVigil

wrote:

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### **SANITATION**

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive

results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the

workforce with pay until further notice

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video

updates

- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### SANITATION

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from

Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including

those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### **SANITATION**

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video

updates

- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### SANITATION

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. For more information, please visit [www.leprinofoods.com](http://www.leprinofoods.com).

Please let me know if you have questions.

Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from

Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

We are thinking around 60-70. The ones that have come through as of last Friday, 4/24 are listed in the state disease reporting system so the state does have access to that data. Trish

On Tue, Apr 28, 2020 at 5:26 PM Kimberly DeVigil wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the

workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

### MINIMIZING RISK

Hi All,

A situation has arisen that may be more and more common.

A student emailed saying she and her parents are very sick. I asked what was  
needed and her mother responded asking about telehealth. The mother said they  
work at Cargill and have all had a fever for three days. They are not patients of

Salud and cannot be seen there. They are trying to reach Banner Health in Brush but no response yet.

The family has food and medicine, but have only basic information from the television. They need more info.

I gave the mother the Colorado Health number: 303.389.1687  
and the CDH covid website: <https://covid19.colorado.gov/covid-19-resources-health-care-providers-and-local-public-health-agencies>

Is there anything more that can be done? Do we have a protocol for assisting students and families?

J

NCHD has gotten numerous calls/emails from news outlets both local and from Denver. I would like to have some type of joint press release that both Cargill and NCHD can put out that may help to stem some of the multiple requests for information that we are getting. When can we meet on google hangouts/zoom/conference call to talk this over? Thanks! Trish

Mel,

Bars, Gyms, Movie theatres - Being evaluated will be our response? Who would you like those to go to so that I can update the FAQ/Staff Extension List?

Also as a heads up the order under I.H (top of page 4) says "Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals complying with Social Distancing Requirements; except for members of a single household, sharing equipment is prohibited." I know one gym here that does have classes/personal training groups, and they do several of these a day under normal circumstances. I am guessing they may want to do some of this.

I would add the golf courses. I have voicemails or emails for two of them already. There are usually tournaments at the golf courses that serve as fundraisers for high school sports in May and June.

Thinking ahead to June, I would put junior high and high school summer league games on the radar (basketball, volleyball, etc). Normally there is some time of game going on at NJC on Monday-Thursday through the month of June. I have seen information starting to circulate about it too. Summer practices are also worth considering. CHSAA canceled spring sports and student and coach contact until 6/1. After June 1, they are saying all decisions regarding student and coach contact will be made at the local level.

Thanks Roger for forwarding the information.

Hello All,

I just wanted to make sure you all are aware of this option for PPE Sanitization from the State of Colorado.

<https://www.battelle.org/inb/battelle-critical-care-decontamination-system-for-covid19>

The State of Colorado is approved for two systems by the U.S. HHS and the Federal Emergency Management Agency. A second location is being secured within the state to house the second system.

All healthcare personnel is eligible for the free N95 decontamination, including emergency medical service personnel, nurses, nursing assistants, physicians, technicians, therapists, phlebotomists, pharmacists, dentists and dental hygienists, students and trainees, contractual staff not employed by the healthcare facility, and persons not directly involved in patient care, but who could be exposed to infectious agents that can be transmitted in the healthcare setting (e.g., clerical, dietary, environmental services, laundry, security, engineering, and facilities management, administrative, billing, and volunteer personnel). Additionally, non-medical personnel participating in emergency response due to COVID-19 also qualify as a healthcare professional under the [Battelle Emergency Use Authorization](#).

How to sign up:

- To get N95 respirators cleaned, health care providers must first fill out an enrollment form at [battelle.org/decon](http://battelle.org/decon).
- Battelle will return an email with links to the enrollment contract, instructions, and the Battelle point of contact.
- The enrollee will be given a three-digit code, which must be written on the respirators with a permanent marker.
- The respirators need to be unsoiled, free of blood, mucus, makeup, lip balm, etc. Place all masks into a single plastic bag and tie off the bag when it is full. Any soiled masks will be thrown out. The bag must be placed into a second plastic bag that should be wiped down with disinfectant.
- The respirators must be placed into a shipping box and labeled with the three-digit code and a biohazard sticker.
- The enrollee contacts a shipper to coordinate pickup and delivery.

[Follow the step-by-step process of how to submit respirators for decontamination.](#)

In the meantime these were some of the questions we have that we can discuss on the call tomorrow.

Effectiveness of current interventions.

Are exposed employees (work or home) still be excluded/quarantined?

What does outbreak epi curve look like? Stable, increasing, decreasing? What's the most current case count of confirmed cases? Do we know how many probable cases are associated with Cargill?

What are triggers for closing the facility or other more aggressive outbreak control?

Does the facility know to not hire anyone from JBS right now?

In the meantime these were some of the questions we have that we can discuss on the call tomorrow.

Effectiveness of current interventions.

Are exposed employees (work or home) still be excluded/quarantined?

What does outbreak epi curve look like? Stable, increasing, decreasing? What's the most current case count of confirmed cases? Do we know how many probable cases are associated with Cargill?

What are triggers for closing the facility or other more aggressive outbreak control?

Does the facility know to not hire anyone from JBS right now?

Good morning,  
I just spoke with the Cargill plant manager and he has been instructed by his corporate leadership to not participate in this afternoon's call. Apparently Cargill corporate is meeting today to discuss testing and then they will get back to the Fort Morgan Cargill plant manager. I'm hoping he'll have some direction by the end of the day but I can't promise that. I will still plan to be on the call at 3:30. Thanks everyone for your help. Trish

Good morning,

I just spoke with the Cargill plant manager and he has been instructed by his corporate leadership to not participate in this afternoon's call. Apparently Cargill corporate is meeting today to discuss testing and then they will get back to the Fort Morgan Cargill plant manager. I'm hoping he'll have some direction by the end of the day but I can't promise that. I will still plan to be on the call at 3:30. Thanks everyone for your help. Trish

Hello Tyler,

This is the invitation I received for the call this afternoon. I can give you information on who is invited based on my best guess as I don't know all of them.

Claire Whitehead--works for either the state health department or emergency management--I don't know her and she may be the organizer of the meeting and not actually participating

Scott Bookman--works for Colorado Department of Public Health and Environment (state health dept) and is the co-Incident Commander--it is shared command with Colorado Office of Emergency Management.

Mike Willis--Director for the Colorado Office of Emergency Management--he's the co-Incident Commander with Scott.

Mark Boley--probably works for either the state health department or emergency management--I don't know him

Trevor Denney-- probably works for either the state health department or emergency management--I don't know him

OEM Morgan County--this is Roger Doll, he's the Morgan County Emergency Manager

Chris Sorenson--he works for the Colorado Department of Public Safety  
Jason Reed--I don't know him  
Mike Burnett--he's our Response Coordination Officer for NCHD, he's also our Incident Commander for our agency

I hope this helps. Please let me know if there is anything else I can do for you. Thanks! Trish

**To:** [Hunsaker Ryan - CDPHE, Jill](#)  
**Subject:** Re: JBS Voluntary Closure Letter from Friday  
**Date:** Saturday, April 11, 2020 2:27:06 PM

---

Hi Jill,

I've talked with the plant manager today and he is talking to his corporate people. No employees on site this weekend except for cleaning crews and contractors--they are having plastic sheeting installed where workstations can't be 6 feet apart. They are also fogging a disinfectant in common areas and offices this weekend.

It sounds like they would be potentially open to testing so that those asymptomatic or mildly symptomatic employees could be excluded appropriately but again, he needs to check with his corp people.

I said I'd like to look at the plant on Monday--he said either Monday or Tuesday but I will work on it being Monday since we really need to know what's going on for sure. I believe I have the authority to go inspect regardless of whether they really want me to but I'd prefer it be mutually agreed upon. The Morgan County Emergency Manager and the Regional Director of Homeland Security have both agreed to go with me.

The state epi team is working with Tammy--thanks. Let me know what else you need from us. Thanks!  
Trish

On Sat, Apr 11, 2020 at 11:25 AM Hunsaker Ryan - CDPHE, Jill  
<[jill.hunsakerryan@state.co.us](mailto:jill.hunsakerryan@state.co.us)> wrote:

Trish,

Here was the initial correspondence from Dr. Wallace and I to JBS after Dr. Wallace had inspected the plant. Note that at the time this went out, the plant had 2 deaths (now 3) and 8 people intubated, so it would be good to get an earlier start on Cargill.

Thanks,  
Jill

Just an FYI. We just updated the Governor and Director Ryan on our decision to close the plant. They asked a bunch of questions but are supportive. Director Ryan was on the phone so I would expect the State to light up your phone soon.

Subject: Leprino Foods Grant and Donation process

To: Mary Gross

Mary,

Thank you for inviting us to your meeting this morning. Erica Mendez and I were happy to

attend and we learned a lot about the area non-profit organizations that were present. Going forward, Leprino Foods will have one or two of our LFC Foundation team members present at your monthly meetings to ensure Leprino Foods is helping the community in the best ways possible. I have attached the following for you to share with the non-profit group... my business card with all my contact information, and Leprino Foods Grant applications for 2018 Grant requests (one is for Less than \$10,000 requests, the other for Greater than \$10,000 requests).

LFC Foundation mission – “The Leprino Foods Company Foundation drives positive change in our communities by leveraging time, talent and resources to improve education, nutrition, fitness and local needs.” The Fort Morgan LFC Foundation team started 9/25/15 and currently has 18 members consisting of 12 hourly employees (from 1<sup>st</sup>, 2<sup>nd</sup> and 3<sup>rd</sup> shifts, all plant depts.), 4 supervisors (each from a different dept.) and two managers (HR and warehouse). Team meets monthly to review monetary donation requests. All requests (monetary, product) are shared via email to ensure requests are processed timely. The team will promptly notify requestors via email, regarding status of requests – if approved or not. The team is also in charge of Plant collection drives for area non-profits: Non-perishable Food/Personal Hygiene items, Winter coats, Prom attire, School supplies, Giving Trees, etc.

What will the Foundation Fund? The Foundation has four areas of focus: Education, Nutrition, Fitness and Local Needs. These are consistent with the core values of the Company and the Leprino family.

Annual Grants process – The LFC Foundation team will give Morgan County non-profit (501c3) organizations a Grant application to complete and email back to the Plant. The team will then invite each applicant to come to the Plant and meet with the team so that we better understand what the non-profit organization does for the community and what projects they are requesting Grant money for. After meeting with all the applicants, the LFC Foundation team meets to review all applications and brainstorm which will receive an LFC Grant and how much the Grant will be for. Process begins in November, with completion in March or April. All Grant applications will be reviewed within 90 days. The Fort Morgan LFC Foundation team gave \$15,000 in Grants in 2016 and is in the process of giving \$20,000 in Grants for 2017. All Grant recipients are asked to submit a post-grant summary report after completion of the project or post usage of the funds.

Requests for donations (monetary and product), Collection Drives and Volunteers process – Begins with a phone call or email. All requests need to be in writing, which can include flyers or posters of fundraising events, and can be emailed, mailed or faxed to my attention. First time donation requests need to be accompanied with a W-9 form. (Once we have your W-9 on file, you do not have to resend with each donation request.) Requests for items (product and gift baskets) for fundraising live and silent auctions are fulfilled quickly. Requests for Collection drives are reviewed by the team, and if approved put into action quickly. Collection drives need to be in place for approximately 2 weeks for maximum

collection, due to the many different shift times and work schedules. If items are deemed to be needed quicker than 2 weeks, the team will review and vote on whether to outright purchase items instead of holding a collection drive. Requests for Volunteers, like collection drives, the more advanced notice we get the better to give all employees the opportunity to sign up to volunteer.

Well I hope this information helps explain the Leprino Foods Grant process as well as the process for requesting donations, collection drives and volunteers. Everyone is welcome to contact me with their questions.

Thank you,

**Susan Priemel**

On Thu, Apr 23, 2020 at 11:49 AM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

Matt shared an online survey they are using for JBS and probably Leprino. Is this something we can do? Maybe Kelly can share the link with the positive employees? Paper forms can also be available. Is this something Mary can put together?

A few questions I would like to ask but with better verbiage:

What is your work station, duties...

- Do you have a household contact or close contact who works at a job site that has a COVID outbreak.
- I would like to ask if an employee has a second job other than at Leprino.
- Is there anyone outside of your household that may have been exposed within the past 14 days? If so, please provide name and phone number.
- Would also like a list of symptoms
- Onset date

Other ideas?

Hey Tammy,

Sorry for the delay.

Here is a draft survey we have for employer based outbreaks:

<https://weldtempevents.wufoo.com/forms/q4k2zks1n71ebb/>

You'll have to click through because additional items may expand, depending on the selection.

I would like to use an online survey as much as possible to avoid data entry but we are also likely going to offer paper surveys that can be faxed back.

Let me know what your thoughts are.

**Sent:** Tuesday, April 21, 2020 3:05 PM

**To:** Matthew Bauer <[mbauer@weldgov.com](mailto:mbauer@weldgov.com)>

**Subject:** Leprino

**Caution:** This email originated from outside of Weld County Government. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Matt. There are 18 positives out of 68 tests on Sunday. We had a short call with Jason as he was driving to Fort Morgan for a meeting and look around.

Would be great if we used the same questions for each plant, this way Leprino would have consistent data if possible.

I do not want to make this difficult so wondering about using what you have used for JBS with a modification to ask about contacts from Cargill, JBS, etc.

Thanks a heap! Tammy

I think that's a great idea! And if we could have the clients fill it in--what a time saver! Yes, let's figure out a way to get this up and running. Mary can help with wording and stuff. T

On Thu, Apr 23, 2020 at 11:49 AM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

Matt shared an online survey they are using for JBS and probably Leprino. Is this something we can do? Maybe Kelly can share the link with the positive employees? Paper forms can also be available. Is this something Mary can put together?

A few questions I would like to ask but with better verbiage:

What is your work station, duties...

- Do you have a household contact or close contact who works at a job site that has a COVID outbreak.
- I would like to ask if an employee has a second job other than at Leprino.
- Is there anyone outside of your household that may have been exposed within the past 14 days? If so, please provide name and phone number.
- Would also like a list of symptoms
- Onset date

Other ideas?

Hi,

Below is a very LONG comment/question from someone on FaceBook.

Do you have time to respond to this? If not, I can and then have you edit it, but I thought you might want it in your words since it was written to you:

If you just want to type your response in this email, I can put it on the post since I know where it is.

Dear Ms. McClain,

I am concerned about today's report on Cargill's mitigation practices as Morgan County's COVID19 cases continue to climb. Positive cases have gone from 40 to 180 in less than ten days. In a rural county of only 29,000 people, this is very concerning. I am sure the death of four of its citizens causes us all further angst.

The wording in the above publication on CARGILL's enforcement of a "mandatory 14-day quarantine for any member that tests positive for COVID-19 . . ." Yet according to the State of Colorado's guidelines ref <http://covid19.colorado.gov/how-to-isolate>, CARGILL should be complying with those of the higher standard of ISOLATION. Which means completely away from people UNTIL "no fever for at least 72 hours (that is three full days of no fever without using medicine that reduces fevers)

AND

other symptoms have improved (for example, when your cough or shortness of breath have improved)

AND

At least 7 days have passed since your symptoms first appeared

Now I understand that testing is now very limited, and the original CDC guidelines of until "two negative tests for COVID-19 came back within a forty eight hour period" are no longer relevant or mentioned on its website as it was just a few week's previous, and I do realize there is absolutely no mention whatsoever on the Northeastern Colorado Department of Health guidelines, but I do wish to prevail on you to consider the states current stance.

Your esteemed department and CARGILL's Mr. Luft may well be under a mistaken notion that COVID-19 is a "two week only sickness" instead of a highly contagious disease that requires time to recover AND isolate. And that the essential duties of "feeding the nation" take precedence. (Surely not.)

Does CARGILL only allow employees two weeks leave? What if the exposed to, now quarantined, become sickened? Do they then get tested and then properly isolated as recommended by the State's standards? Do you know if CARGILL allows for further paid leave, or should I address CARGILL for further clarification?

Hi Everyone,

We wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

#### Facility Outbreak Data by County

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,  
Mary

Yes, 3:30 p.m. will work.

Basically, Shelly, CDPHE is being pressured to provide a list of Long Term Care Facilities to the media on a regular basis. So your facility won't be on that list yet but we just wanted to discuss your options ahead of time. Prior to learning about your facility, NCHD had drafted a press release around an outbreak in a long term care facility. We do not have to release anything to the media but eventually your facility will be on that list that will go to the media. We just wanted to have a conversation with you about your options around public information.

Your options would include just waiting to see what happens when it comes out on the list from CDPHE or NCHD could put out a press release with your input/approval before it goes out or you could put out your own press release (NCHD is willing to assist and support you in the language). We will support your decision for your facility. That is all we are going to talk about today with you.

We can call you at 3:30 p.m. We have the ability to do it as a conference call. What is the best phone number for us to call?

Thank you.

Shelly,

Tammy Hort has been in contact with you this morning. After discussing risk communication options with staff from CDPHE, Trish McClain, our Public Health Director, and I would like to schedule a call with you at some point later today. We would like to present the options and discuss with you what would be the best way for NCHD to support you and your facility.

Trish and I are available between 3-4 p.m. this afternoon or we could do a call at 5 p.m. or later into the evening. It probably won't take any longer than 30 minutes.

Let us know what might work well for your schedule. Thanks.

Kimberly, the lady you did your call with is asking for a quote about how one of our food processing plants is cooperating with us on testing and following procedures. I just took something from your report... will this work for a quote from you?

"Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed... They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

so you would like a quote from us about how one of our food processing plants is cooperating with us on testing and following procedures?

On Fri, Apr 24, 2020 at 3:12 PM Kimberly DeVigil <

wrote:

Of course! Yes. No worries.

We are planning our strategy to proactively reach out to local Fort Morgan media to share with them information about our testing and results. We plan to do this on Monday. We would appreciate if you would allow us to share a quote from NEHD. Would you be willing to do that?

This is what Weld County provided (and they are going to provide a name for attribution):

Leprino Foods has been working in cooperation with the Weld County Department of Public Health and Environment (WCDPHE) during the outbreak investigation. WCDPHE has assured us that we are taking the right steps to prevent illness in the workplace. We will continue to work closely with WCDPHE for the duration of the COVID-19 pandemic.

**Subject:** RE: NE CO HD Contacts

To further prioritize the wellbeing of our employees, we are partnering with Weld County Department of Public Health, the Northeast Colorado Department of Public Health and the Colorado Department of Public Health and Environment (CDPHE) laboratory to trial onsite COVID-19 testing at our Fort Morgan and Greeley locations. We began testing on Sunday, April 19.

***If needed:*** As a critical infrastructure industry, our employees are on the front lines and working hard each day to keep our business running in order to maintain the nation's food supply. To keep our employees and our workplaces healthy and safe we have instituted rigorous cleaning procedures at all locations, as well as other safety protocols, such as temperature checks, enhanced facial coverings, employee health questionnaires and wellbeing checks. We are grateful to our employees who continue to provide nutrition and supply a global food chain that are essential during this COVID-19 crisis. We are committed to using our resources available to ensure a safe workplace.

Thank you again for the conversation today.

Please find attached the proposal we discussed.

As additional follow-up items:

- 1) We will have a follow-up call tomorrow or Monday. Matt or Tammy to advise on the date and time.
- 2) Leprino agreed to share our current data for quarantined employees at both plants.
- 3) Leprino agreed to perform follow-up questionnaires for positive patients if Weld or Morgan county would like assistance.
- 4) I would like to propose a regularly scheduled conference call between the three of you, our Plant HR Managers, Denver HR and myself. If you are amenable to that please advise on a proposal for how often and when.
- 5) Please let me know when you would like to visit the plants. I am available all next week.
- 6) We will be executing our plan tomorrow and will start with testing about 120 people between the 2 plants.

Kind Regards,

Jason

Shelly,

I don't believe that there will be a broadcast of locations of LTC facilities by the state and I think there is still time for Eben Ezer to notify everyone that we talked about yesterday. CDPHE is trying to get a big picture look at LTC in the state for the governor. We will do our best to support you, your staff, residents and families through this process. I think it would still be helpful to have our call tomorrow morning so that we can coordinate how to do a thoughtful, thorough release that is factual and accurate and shows what a good job your facility is doing to keep residents and staff safe. We'll get through this together. Thanks! Trish

On Thu, Apr 9, 2020 at 12:36 PM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

Hi Shelly, CDPHE is asking for all LTC outbreak forms to be submitted ASAP so wanted to let you know I am going to submit in a few minutes.

Also, would whomever is the keeper of the staff and resident line lists please fax me a copy to 522-1412 - does not matter how complete.

Thanks so much.

---

Thank you again for the conversation today.

Please find attached the proposal we discussed.

As additional follow-up items:

- 1) We will have a follow-up call tomorrow or Monday. Matt or Tammy to advise on the date and time.
- 2) Leprino agreed to share our current data for quarantined employees at both plants.
- 3) Leprino agreed to perform follow-up questionnaires for positive patients if Weld or Morgan county would like assistance.
- 4) I would like to propose a regularly scheduled conference call between the three of you, our Plant HR Managers, Denver HR and myself. If you are amenable to that please advise on a proposal for how often and when.
- 5) Please let me know when you would like to visit the plants. I am available all next week.
- 6) We will be executing our plan tomorrow and will start with testing about 120 people between the 2 plants.

Kind Regards,

Jason

Hi Tammy,

Thanks for taking the time to update us yesterday. I wanted to circle back to see if you had a chance to send me the Eben Ezer line list yet.

So far I have not yet received anything. We're hoping to get these by noon today to update the database.

If they were able to send you an updated list yesterday, that would be great for us to have. If not, we would appreciate the line list you mentioned receiving from last Thursday.

Thank you!

Hi Stacey. I did receive the line list from Eben Ezer yesterday afternoon. I am comparing CEDRS cases with the staff and resident list. They are reporting via paper and using the line list form that was available in the first guidance tools. There is a staff member available today in our office that is going to put this info into the Excel spreadsheet I was given by Dr. Gershman.

Once that is done, I will share with you.

Tammy

### State will release additional facility-level data on confirmed outbreaks

(DENVER) April 15, 2020: Starting today, the Colorado Department of Public Health and Environment (CDPHE) will release more information about confirmed COVID-19 outbreaks in long-term care and other facilities weekly. This is a change aimed at promoting transparency, protecting the public, and providing more insight into the extent of COVID-19 outbreaks statewide.

A confirmed outbreak means there are two or more confirmed cases of COVID-19 in a facility or (non-household) group with onset in a 14-day period. The information will be available on the state's website at [covid19.colorado.gov/outbreak-data](https://covid19.colorado.gov/outbreak-data) on the [COVID-19 website](#). Information will be updated weekly on Wednesday by the end of the day.

Facilities included in the outbreak report will include:

- Health care settings
  - Including long-term care facilities, assisted living facilities, independent living facilities/senior communities that offer healthcare, inpatient rehab facilities, and long-term acute care hospitals.
  - There are currently 231 nursing facilities, 706 assisted living facilities, and 21 intermediate care facilities in Colorado.
- Correctional settings

- Including state prisons, county and city jails, community corrections, detention settings, and work release facilities.
- Other settings:
  - This could include factories, workplaces with crowded work conditions, camps, schools, child care centers, and independent living facilities/senior communities that do not offer health care.

Each Wednesday, CDPHE will report the following detailed outbreak data:

- Facility name.
- Facility type.
- Date the outbreak was confirmed.
- Total reported cases (confirmed and probable).
  - Residents and staff in health care settings.
  - Residents/inmates/detainees/staff correctional settings.
- Total reported deaths (confirmed and probable).

Continue to stay up to date by visiting [covid19.colorado.gov](https://covid19.colorado.gov).

Warning

This message originated from outside of the City of Fort Morgan. Do not click any links or open any attachments unless you trust the sender and you are expecting this message.

Hi John,

What a tough spot for your family to be in. I can tell you that Eben Ezer is working hard to keep their staff safe, with PPE and screening. I don't know if your daughter has direct contact with residents but if she does, she should be wearing appropriate PPE and practicing good hand hygiene, which I'm sure she already is. With long term care facility outbreaks, the tough thing is that the population you are dealing with is already quite vulnerable as many have compromising health issues and because of this, the outcomes for this population (the residents) will be worse than that of the general population.

As a public health person, I don't believe that the staff are at greater risk if they are wearing appropriate PPE and are practicing all the guidance and direction given to them. Eben Ezer has been very cooperative with NCHD and the state during all this and have been receptive to any suggestions/guidance given to them. They are truly working diligently following CDC guidelines to get the outbreak under control. Other facilities in the state with outbreaks are facing similar challenges because this is such a fragile population.

As a parent, I would also struggle with sending my daughter to work if I was worried at all about her health and safety.

I don't have any good answers to give you John. I'm sorry. Trish

On Tue, Apr 21, 2020 at 10:31 AM John Brennan <[john.brennan@cityoffortmorgan.com](mailto:john.brennan@cityoffortmorgan.com)> wrote:

Hi, Trish –

I am hoping you might be willing to give me some personal advice, on a completely confidential basis. If you don't feel comfortable doing so I understand, but I am struggling with a decision and thought you might have the insight I need.

My daughter works at Eben Ezer, in the food service area. She works part time, three of four days a week from about 4 to 8 p.m. We have allowed her to continue to work because they are short staffed and seem to be practicing good prevention measures and providing PPE. But things seem to be getting worse there, with the virus spreading throughout the facility. We have told her we may have to have her stop going to work, and she says how can I just quit now when they need me most?

This seems to me to be a no-brainer, and I should not even have a second thought about risking my daughter's health and life, not to mention the rest of our household. But I don't know the real risks and thought you might have better knowledge of that.

I guess my question is, if it were your daughter, what would you do?

I know I'm putting you on the spot, and like I said I understand if you'd rather not answer, but please let me know your thoughts if you can...

Thanks, either way,

John

HI Tammy,

Jan Schiller at \_\_\_\_\_ would like to talk to someone about Ebenezer. I asked Laura who to send this call to and she said to give this to you. This lady said she knows someone who works at the funeral home and "they are dropping like flies". Her mom lives there and she thinks it's too late to get her out and she is very distraught. Would you call her when you can, please. I told her we were actually closed until 1:00.

Thank you,  
Michelle

Hi Tony

One of my nurses contacted them and this was her email to let me know how it went:

"I spoke to Mark at Global Harvest Foods. The conversation went very well. He is going to have that employee go home and self quarantine for the 14 days. And I explained to him about what needs to happen if a person is exposed to a positive person or a symptomatic person and if they have an employee test positive. He was very nice and was grateful for the information and said that they would get it taken care of on their end."

Let me know if you have further concerns. Thanks! Trish

Hi Tony

One of my nurses contacted them and this was her email to let me know how it went:

"I spoke to Mark at Global Harvest Foods. The conversation went very well. He is going to have that employee go home and self quarantine for the 14 days. And I explained to him about what needs to happen if a person is exposed to a positive person or a symptomatic person and if they have an employee test positive. He was very nice and was grateful for the information and said that they would get it taken care of on their end."

Let me know if you have further concerns. Thanks! Trish

Trish, we have been talking about posting the Eben Ezer press release on our website. One suggestion was to put a button under the picture of cases that when clicked on goes to that press release (Spanish would be below it). Or we could just put a link to Eben Ezer's website.

I know we need to ask Shelly before we do anything. I guess I wanted your thoughts on this matter. Either I am tired today or I am just on the fence about a lot of stuff. I attached a screen shot of what I am talking about in regards to the location.

Thanks.

I have it translated and I made both the English and Spanish versions into PDFs in preparation for when we release to the media later this morning following the coordination call. We don't usually send it to the media as a Word document but usually only as a PDF.

I am attaching everything for your records as well.

Thanks.

I think we should leave the Eben Ezer thing alone for now. Don't worry about doing another press release about them. Let's just focus on the mental health aspect and how people can access resources. We could say something in there about the stay at home order's purpose and how we should continue to follow it but also how stressful it can be and here's some resources to help or something like that. Maybe something like staying at home is a full time job and here's some tools to help you do it .... I don't know--you two are the creative ones. Oh, I'm going to send you a link Matthew sent to me about social distancing--super powerful. T

On Mon, Apr 13, 2020 at 2:52 PM NCHD PIO <[pio@nchd.org](mailto:pio@nchd.org)> wrote:

Trish,

Here is what I have started. Maybe it is enough. Maybe it isn't. Mike wants me to start addressing Mental Health at the end of each article but it didn't feel right to me and Mary thinks I need to do something separate for MH. We are in agreement so I am working on it.

There is one paragraph that if I include I do need to ask Shelly to review and only include if she is okay with it. I wanted to get your feedback first. This doesn't feel good to me yet but feel I should ask your direction not Mike's at this point. He is in another space all together today.

Thanks  
Michelle

P. S. Please let me know about Cargill. I just have a gut feeling we are going to need to put something out but I need you and Mike to let me know when and the vision for what we need to communicate to the public.

---

I had hoped to send this out sooner but it has been quite a week.

I wanted to provide this summary since some of you couldn't be on the entire call:

Attached please find the guidance document that was referenced during the call that was distributed from the state health department.

While the Northeast Colorado Health Department recommends strongly that churches continue to encourage their congregations to follow the state Stay at Home order this weekend, there may come a time after the order is lifted that drive-in alternatives might be less risky. In addition to the guidance document, the additional items to consider if a church decides to move forward with a drive-in venue for services are:

1. All vehicles must be parked at least 6 feet apart
2. All occupants need to wear masks if the vehicle windows are going to be down
3. All occupants need to remain in their vehicles at all times
4. If restroom facilities are available, only one person at a time may utilize the restroom and they should be wearing a mask
5. No food/beverages/communion should be distributed or available at the venue

When the Stay at Home order is lifted (to be determined later this month depending on how the models predict the behavior/spread of the virus), social distancing will still be in place which includes gatherings of more than 10 people. The lifting of those orders will most likely be gradual so it may be best to continue to plan services to be done via online or other remote methods.

Vaccine for COVID-19 is not available at this time though there are several companies and research firms that are working toward this; it may be several months before this is achieved and available on a wide scale.

I really appreciate all you have done to ensure the health and well being of your congregations. I know that spiritual health is just as important and I applaud the efforts you are making to help your people cope during this difficult time. Please let me know if you have any questions or if there is any way that NCHD can be of assistance. Trish

Thank you again to those who were able to participate on the call at 1 p.m. with NCHD. We appreciate your partnership with us to keep the public safe across the six county region we serve. We also appreciate all you are doing to support the people of your community during this challenging time!!

I am attaching the press release that went out this afternoon in English and Spanish. Also, you can share it on Facebook (<https://www.facebook.com/pg/northeasthealth>) or you can also access NCHD press releases on our website (<https://www.nchd.org/co>). We appreciate your assistance in reinforcing the message to stay home and not have large family gatherings or other potential community exposures.

Michelle Pemberton

**Jamie Bauder Knox**

Sun, Apr 26, 4:46 PM (17 hours ago)

to me, Jane

 Trish & Jane,

I want to thank both of you ladies for taking the time to respond to me.

I need to clarify a couple of items I was not clear on.

When speaking with Melvin my question was were we able to start grooming on April 27th or May 1st. His reply was we were not able to start grooming until NCHD gave us the go ahead. He did not know when that would be and that coupled with the article in the JA by Jeff Rice that said the Health Board would meet this next week to begin to put a plan in place, I began to be concerned that our opening would be several weeks out. According to Melvin, I could not start grooming under Governor Polis's order, that the go ahead could only come from NCHD because it is a health order.

We did cease all grooming operations on March 26th when the Stay at Home order was put into place. I had also stated that we had strict precautions in place since the first of April that was an error. We had curbside drop off and pick up in place prior to the stay at home order being issued. Early on we started procedures to keep everyone as safe as possible. Trish I can certainly see why you thought we were grooming at that time. I apologize for the error. I was overwhelmed when writing the letter because I had just rescheduled roughly 250 grooming appointments in the days prior when I thought we were going to be able to be open on April 27th.

I hope this clears things up. I am optimistic that NCHD will let us resume operations as soon as the Governor gives the go ahead.

Again thank you ladies for your concern and quick response. I appreciate it very much.

Jamie

On Sun, Apr 26, 2020 at 3:43 PM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote  
Hello Jamie and Jane,

If you go to this link  
<https://covid19.colorado.gov/stay-home-except-essential-needs>

and scroll down toward the bottom of the page, there are two columns--one is Yes and one is No. Dog grooming falls in the "No" column, meaning that this type of business is not supposed to be operating during the Stay-At-Home order. I am confident that we will be receiving guidance either later today or tomorrow that will allow low dog groomers to resume business operations in a safe manner since the Stay-At-Home order will expire today.

I agree with you Jamie, that the information coming from the state level has been confusing, especially in regards to timelines. This link is to a draft copy of the Governor's Safer-At-Home presentation. [https://92de1ffe-dda9-4a10-80c5-6f143c9803a6.filesusr.com/ugd/8c9496\\_d4464d1b3d92f4988d446770834929a3.pdf](https://92de1ffe-dda9-4a10-80c5-6f143c9803a6.filesusr.com/ugd/8c9496_d4464d1b3d92f4988d446770834929a3.pdf). The 13th slide shows his timeline. Though this is a draft, if nothing significantly changes between now and when this is officially released, it appears that you could resume dog grooming on May 1st.

Because the Stay-At-Home order was in place on April 23 and doesn't expire until today, you were told to discontinue dog grooming because that was in violation of the state order. The press conferences have been confusing as far as when easing of restrictions were going to occur. The Stay-At-Home order does expire today. The Safer-At-Home order will go into effect tomorrow at which time more guidance should be available for many sectors of business that have not been able to operate for the last few weeks.

I hope that guidance for all businesses that want to safely reopen is read by available this week as all of us want to make sure small businesses like yours are able to continue to provide services in a safe manner. I commend all the precautions you have had in place for your daycare and boarding services and I think you are in a good place to resume grooming once the state guidance is available. Thank you both for reaching out and I can help to track down more answers, just let me know. Trish

April 26, 2020

Dear Ms. McClain

I am writing this letter regarding the inability for businesses to engage in dog grooming "until further notice" from the Northeastern Colorado Health Department per my telephone conversation with Melvin Bustos Environmental Health Manager on April 23, 2020. This action is placing an undue stress on my small business due to inconsistent timelines and communication.

Initially Governor Jared Polis stated on his live TV press conference on April 20<sup>th</sup> that noncritical businesses would be able to resume business with strict precautions. I moved forward scheduling grooming appointments for my significant backlog of customers. On April 22<sup>nd</sup> during a live TV press conference the Governor stated noncritical businesses would open on May 1, 2020. This lack of clarity at the state level has already incurred a substantial hardship on my business which relies on tightly scheduled appointments for already frustrated clients now being changed on extremely short notice. Rescheduling these clients over a several weeklong timeframe consumes an immense amount of time as a business owner is deeply frustrating for clients and can damage relationships with the business.

NCHD's inability to provide firm information regarding differences from state policy and reasoning will incur further undue hardship to my revenue client relationships and Logan Counties economic activity.

I would like to make you aware of the strict precautions I have had in place since the beginning of April.

- Social distancing of employees of at least 6 feet.
- Greater than 50% reduction in workforce.
- Curbside drop off and pick up of all grooming, daycare and boarding dogs.
- Online payment for grooming, daycare and boarding.
- Online ordering and payment of food and supplies.
- Curbside and home delivery of food and supplies.
- For in store shopping or pickup/drop off only 1 customer allowed in the store at a time.
- After every in-store customer interaction every surface that was touched is cleaned and sanitized. This includes indoor and outdoor doorknobs and handles the checkout counter credit card machine and stylus and any other areas that the customer may have touched.
- Employees use hand sanitizer after every customer interaction.
- Extensive use of social media text messaging email and website to inform the public of our policy changes.
- In-store signage to direct customers as to our new policies.
- Since April 17<sup>th</sup> masks have been utilized when in contact with customers.

The daycare and boarding portion of my business has been deemed essential and we have followed recommended precautions mentioned while conducting business. When dogs are groomed they are bathed in soap and water cited as a best practice for combatting SARS-CoV-2. Additionally it is standard policy to clean and sanitize working surfaces equipment and tubs between dogs being groomed which will continue being carried out per standard policy.

Grooming dogs is important for both aesthetic purposes as well as health purposes.

- Ungroomed dogs can experience fur tangling and/or matting that can cause skin irritation wounds and infection of the dog.
- Uncropped hair can also cause ear and eye irritations/infections.
- Uncropped nails can grow into the paw pads requiring veterinary care. This has potential to change the posture and gait of the dog negatively impacting shoulder back and hip operation.
- Many of these effects build up over time necessitating professional grooming (and potentially veterinary care if not professionally groomed) to a greater degree as they worsen.

Other negative effects can be found at <https://www.aspc.org/news/hair-comes-trouble-why-pets-need-regular-grooming>

Most dog owners are not trained dog groomers and do not have the training experience equipment and knowledge to manage proper/professional grade grooming. Clients unfamiliar with professional grooming or who have not had their dog professionally groomed recently may cause injury or worsen the dog's condition by attempting to groom in the home themselves.

The SARS-CoV-2 virus and COVID19 are a very dangerous threat that we as a community need to exercise great care in managing. My business is following all recommendations to prevent the spread of this virus.

Dog grooming needs to be restarted as soon as possible based on its inclusion in Governor Polis's "Safer at Home" program due to inherently lower public risk and necessity for maintaining dog hygiene.

With that in mind the dog grooming reopening process is a complex and time sensitive matter. Clear and accurate communication is crucial to maintain this division of my business in Northeast Colorado. It will be extremely difficult and damaging to adjust the schedules of myself my staff and my 1695 customers if NCHD cannot provide documentation which aligns with Governor Polis in policies or provides differing policies and accompanying justifications for deviating from state guidance.

Please provide documentation as soon as possible on this matter to prevent further harm and difficulty to dog grooming businesses in Northeast Colorado.

Sincerely

Jamie Bauder-Knox

### Jamie Bauder Knox

Sun, Apr 26, 4:46 PM (17 hours ago)

to me, Jane

Trish & Jane,

I want to thank both of you ladies for taking the time to respond to me.

I need to clarify a couple of items I was not clear on.

When speaking with Melvin my question was were we able to start grooming on April 27th or May 1st. His reply was we were not able to start grooming until NCHD gave us the go ahead. He did not know when that would be and that coupled with the article in the JA by Jeff Rice that said the Health Board would meet this next week to begin to put a plan in place, I began to be concerned that our opening would be several weeks out. According to Melvin, I could not start grooming under Governor Polis's order, that the go ahead could only come from NCHD because it is a health order.

We did cease all grooming operations on March 26th when the Stay at Home order was put into place. I had also stated that we had strict precautions in place since the first of April that was an error. We had curbside drop off and pick up in place prior to the stay at home order being issued. Early on we started procedures to keep everyone as safe as possible. Trish I can certainly see why you thought we were grooming at that time. I apologize for the error. I was overwhelmed when writing the letter because I had just rescheduled roughly 250 grooming appointments in the days prior when I thought we were going to be able to be open on April 27th.

I hope this clears things up. I am optimistic that NCHD will let us resume operations as soon as the Governor gives the go ahead.

Again thank you ladies for your concern and quick response. I appreciate it very much.

Jamie

On Sun, Apr 26, 2020 at 3 43 PM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote  
Hello Jamie and Jane,

If you go to this link  
<https://covid19.colorado.gov/stay-home-except-essential-needs>

and scroll down toward the bottom of the page, there are two columns—one is Yes and one is No. Dog grooming falls in the "No" column, meaning that this type of business is not supposed to be operating during the Stay-At-Home order. I am confident that we will be receiving guidance either later today or tomorrow that will allow dog groomers to resume business operations in a safe manner since the Stay-At-Home order will expire today.

I agree with you Jamie, that the information coming from the state level has been confusing, especially in regards to timelines. This link is to a draft copy of the Governor's Safer-At-Home presentation. [https://92de1fe-d4a9-4a10-80c5-6f143c98034e.filesuser.com/userfiles/36c\\_dad6d3165d924f9b8d4-4670824926a3.pdf](https://92de1fe-d4a9-4a10-80c5-6f143c98034e.filesuser.com/userfiles/36c_dad6d3165d924f9b8d4-4670824926a3.pdf)  
The 13th slide shows his timeline. Though this is a draft, if nothing significantly changes between now and when this is officially released, it appears that you could resume dog grooming on May 1st.

Because the Stay-At-Home order was in place on April 23 and doesn't expire until today, you were told to discontinue dog grooming because that was in violation of the state order. The press conferences have been confusing as far as when easing of restrictions were going to occur. The Stay-At-Home order does expire today. The Safer-At-Home order will go into effect tomorrow at which time more guidance should be available for many sectors of business that have not been able to operate for the last few weeks.

I hope that guidance for all businesses that want to safely reopen is readily available this week as all of us want to make sure small businesses like yours are able to continue to provide services in a safe manner. I commend all the precautions you have had in place for your daycare and boarding services and I think you are in a good place to resume grooming once the state guidance is available. Thank you both for reaching out and if I can help to track down more answers, just let me know. Trish

I would like to make you aware of the strict precautions I have had in place since the beginning of April.

- Social distancing of employees of at least 6 feet.
- Greater than 50% reduction in workforce.
- Curbside drop off and pick up of all grooming daycare and boarding dogs.
- Online payment for grooming daycare and boarding.
- Online ordering and payment of food and supplies.
- Curbside and home delivery of food and supplies.
- For in store shopping or pickup/drop off only 1 customer allowed in the store at a time.
- After every in-store customer interaction every surface that was touched is cleaned and sanitized. This includes indoor and outdoor doorknobs and handles the checkout counter credit card machine and stylus and any other areas that the customer may have touched.
- Employees use hand sanitizer after every customer interaction.
- Extensive use of social media text messaging email and website to inform the public of our policy changes.
- In-store signage to direct customers as to our new policies.
- Since April 17<sup>th</sup> masks have been utilized when in contact with customers.

The daycare and boarding portion of my business has been deemed essential and we have followed recommended precautions mentioned while conducting business. When dogs are groomed they are bathed in soap and water cited as a best practice for combatting SARS-CoV-2. Additionally it is standard policy to clean and sanitize working surfaces equipment and tubs between dogs being groomed which will continue being carried out per standard policy.

Grooming dogs is important for both aesthetic purposes as well as health purposes.

- Ungroomed dogs can experience fur tangling and/or matting that can cause skin irritation wounds and infection of the dog.
- Unclipped hair can also cause ear and eye irritations/infections.
- Unclipped nails can grow into the paw pads requiring veterinary care. This has potential to change the posture and gait of the dog negatively impacting shoulder back and hip operation.
- Many of these effects build up over time necessitating professional grooming (and potentially veterinary care if not professionally groomed) to a greater degree as they worsen.

Other negative effects can be found at <https://www.aspc.org/news/hair-comes-trouble-why-pets-need-regular-grooming>

Most dog owners are not trained dog groomers and do not have the training experience equipment and knowledge to manage proper/professional grade grooming. Clients unfamiliar with professional grooming or who have not had their dog professionally groomed recently may cause injury or worsen the dog's condition by attempting to groom in the home themselves.

The SARS-CoV-2 virus and COVID19 are a very dangerous threat that we as a community need to exercise great care in managing. My business is following all recommendations to prevent the spread of this virus.

Dog grooming needs to be restarted as soon as possible based on its inclusion in Governor Polis's "Safer at Home" program due to inherently lower public risk and necessity for maintaining dog hygiene.

With that in mind the dog grooming reopening process is a complex and time sensitive matter. Clear and accurate communication is crucial to maintain this division of my business in Northeast Colorado. It will be extremely difficult and damaging to adjust the schedules of myself my staff and my 1695 customers if NCHD cannot provide documentation which aligns with Governor Polis in policies or provides differing policies and accompanying justifications for deviating from state guidance.

Please provide documentation as soon as possible on this matter to prevent further harm and difficulty to dog grooming businesses in Northeast Colorado.

Sincerely

Jamie Bauder-Knox

Thank you so much for getting back to me.  
I do want to clarify a couple of things that I was not clear on.

I need to clarify a couple of items I was not clear on.

When speaking with Melvin my question was were we able to start grooming on April 27th or May 1st.  
His reply was we were not able to start grooming until NCHD gave us the go ahead. He did not know when that would be and that coupled with the article in the JA by Jeff Rice that said the Health Board would meet this next week to begin to put a plan in place.  
I began to be concerned that our opening would be several weeks out. According to Melvin, I could not start grooming under Governor Polis's order, that the go ahead could only come from NCHD because it is a health order.

We did cease all grooming operations on March 26th when the Stay at Home order was put into place.  
I had also stated that we had strict precautions in place since the first of April that was an error. We had curbside drop off and pick up in place prior to the stay at home order being issued. Early on we started procedures to keep everyone as safe as possible. Including limiting people in the store to one at a time.

I have sent this letter to several other board members and the Logan County Commissioners.

Thank you for your time and consideration.

Dear Ms. Knox.

Thank you for taking time to reach out to me. I appreciate the detail that you have provided for me regarding your business practices.

I will forward your letter to the other NCHD board members for their review as well. We have a meeting scheduled for Wednesday afternoon in which we will discuss the issues you have outlined in your message.

Sincerely,

April 26 2020

Dear Ms. Mahaffey

I am writing this letter regarding the inability for businesses to engage in dog grooming "until further notice" from the Northeastern Colorado Health Department per my telephone conversation with Melvin Bustos Environmental Health Manager on April 23 2020. This action is placing an undue stress on my small business due to inconsistent timelines and communication.

Initially Governor Jared Polis stated on his live TV press conference on April 20<sup>th</sup> that noncritical businesses would be able to resume business with strict precautions. I moved forward scheduling grooming appointments for my significant backlog of customers. On April 22<sup>nd</sup> during a live TV press conference the Governor stated noncritical businesses would open on May 1 2020. This lack of clarity at the state level has already incurred a substantial hardship on my business which relies on tightly scheduled appointments for already frustrated clients now being changed on extremely short notice. Rescheduling these clients over a several weeks long timeframe consumes an immense amount of time as a business owner is deeply frustrating for clients and can damage relationships with the business.

NCHD's inability to provide firm information regarding differences from state policy and reasoning will incur further undue hardship to my revenue client relationships and Logan Counties economic activity.

I would like to make you aware of the strict precautions I have had in place since the beginning of April.

- Social distancing of employees of at least 6 feet.
- Greater than 50% reduction in workforce.
- Curbside drop off and pick up of all grooming daycare and boarding dogs.
- Online payment for grooming daycare and boarding.
- Online ordering and payment of food and supplies.
- Curbside and home delivery of food and supplies.
- For in store shopping or pickup/drop off only 1 customer allowed in the store at a time.
- After every in-store customer interaction every surface that was touched is cleaned and sanitized. This includes indoor and outdoor doorknobs and handles the checkout counter credit card machine and styler and any other areas that the customer may have touched.
- Employees use hand sanitizer after every customer interaction.
- Extensive use of social media text messaging email and website to inform the public of our policy changes.
-

- In-store signage to direct customers as to our new policies.
- Since April 17<sup>th</sup> masks have been utilized when in contact with customers.

The daycare and boarding portion of my business has been deemed essential and we have followed recommended precautions mentioned while conducting business. When dogs are groomed they are bathed in soap and water cited as a best practice for combatting SARS-CoV-2. Additionally it is standard policy to clean and sanitize working surfaces equipment and tubs between dogs being groomed which will continue being carried out per standard policy.

**Subject:** Release from DOC regarding testing at SCF

**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Not sure if this is the final version, but it should be pretty close. This is what DOC is putting out today regarding testing at Sterling Correctional Facility. **This is for situational awareness only:**

## **Department of Corrections and Colorado Department of Public Health and Environment to Conduct COVID-19 Testing at Sterling Correctional Facility**

*The Department has had 8 inmates test positive at the facility*

The Department of Corrections (DOC), in collaboration with the Colorado Department of Public Health and Environment (CDPHE), will be conducting widespread targeted testing for COVID-19 at the Sterling Correctional facility over the next several days. The facility has had 8 inmates, both symptomatic and asymptomatic, test positive for COVID-19. DOC will be testing inmates in several units of the east side of the facility, including units where inmates have either tested positive or were previously quarantined..

DOC health officials have been conducting detailed contact tracing investigations, and the facility has been on Phase III modified operations with inmates remaining in their cells on quarantine since April 14, 2020.

“This testing will allow us to better identify, isolate and treat any inmate who is positive for COVID-19 and help to prevent the spread of the virus as much as possible in an environment where social distancing is very difficult,” said Department of Corrections Executive Director, Dean Williams. “By conducting this testing and isolating positive inmates, we are working to mitigate the risk of larger numbers of inmates becoming ill and potentially creating an impact on the public health and medical system.”

The DOC and CDPHE anticipate the additional testing could result in a noticeable increase in the number of reported positive cases.

“Any time we do widespread testing in a facility with an outbreak, we expect to see an increase in cases due to the increase in testing, not necessarily due to an increase in transmission,” said Ginger Stringer, field epidemiologist and COVID-19 response epidemiology lead, Colorado Department of Public Health and Environment. “Our strategy is to be aggressive with our testing to identify cases who may be asymptomatic, and provide recommendations to prevent the further spread of infection.”

Detailed information on DOC’s Response to the COVID-19 pandemic can be found at:

Shelly,

I don't believe that there will be a broadcast of locations of LTC facilities by the state and I think there is still time for Eben Ezer to notify everyone that we talked about yesterday. CDPHE is trying to get a big picture look at LTC in the state for the governor. We will do our best to support you, your staff, residents and families through this process. I think it would still be helpful to have our call tomorrow morning so that we can coordinate how to do a thoughtful, thorough release that is factual and accurate and shows what a good job your facility is doing to keep residents and staff safe. We'll get through this together. Thanks! Trish

On Thu, Apr 9, 2020 at 12:36 PM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

Hi Shelly, CDPHE is asking for all LTC outbreak forms to be submitted ASAP so wanted to let you know I am going to submit in a few minutes.

Also, would whomever is the keeper of the staff and resident line lists please fax me a copy to 522-1412 - does not matter how complete.

Thanks so much.

Tammy

And I was notified there is another Brush Family Medicine employee that is positive. I think this may be #5!

Leprino will probably end up on the outbreak list this Wednesday. I believe Team 2 is way behind the ball on this one which is fine by me. They are itching for Eben Ezer data so I will clear the demographics and send them last weeks spreadsheet. I know there are many many more residents to add. And they asked about a line list from Cargill, I said it has been requested so out of our hands at this point. CEDRS was updated with current investigations so they do have quite a bit of data to look at.

Thanks Shelly. I will remove the names and DOB from the residents and staff as promised and replace with the case number or Mr/Ms Probable. Will send this to CDPHE tomorrow. I do apologize for the numbers associated with the outbreak being posted on the state's website.

Tammy

**Subject:** SECURE line list

Hi Shelly. I have attached the line list. I used the line lists provided by Marilyn and added more staff as we received positive results. If you have additions or changes, please send to me and I will update.

I will be sending this to CDPHE but without the names of the staff or residents. Instead, I will use their CEDRS case numbers for the positives and for those without testing, will use Probable 1, Probable 2, etc.

Please let me know if you have questions. I did leave off the one Assisted Living resident and the Apartment resident.

Hi Trish:

We had some internal discussions before I was going to call you back and then it worked out that Jennifer House was going to call you instead of me. I'm not sure when that will happen (realizing I've been on other issues since she called so she might have already called you!).

Thanks!

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Thanks to everyone for being flexible and transparent around this tour. Good news. Tyler Luft (cc'd) is the plant manager in Fort Morgan. He's available to give a tour to the CDC team today. It would work best if everyone arrives between 12-12:30. He will focus the tour on screening and the steps taken to promote a safe work environment in the plant. Tyler's contact info is: 620 644 2410

Please provide the names and titles of everyone attending from the CDC. Let me know what else you need.

Thanks again.

Katie

Thanks for chatting with me, Katie, and trying to make this last minute site visit work. I look forward to hearing from you either way.

Trish: Katie is going to try to get us in today, but she needs to talk to some folks first. So we are understandably still in a maybe situation. I wasn't sure if you wanted to visit the plan with us, given that you have already visited. We can certainly keep you in the loop with regards to timing if we are able to go.

Best,  
christa

Good morning, Katie:

Just checking in to see if we can talk about a potential last minute visit by our NIOSH team. We have heard very good things about the measures Cargill has put in place to protect their workers and we'd love to see them in person, if the opportunity is available today. We definitely

understand if it is not possible and appreciate your efforts to explore the possibility.

We are stationed up in Greeley. You can reach me via email or phone (404-307-3607).

Thanks!

christa

Hello Christa,  
I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant

manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Good morning:

I just wanted to follow up quickly to say thank you so much for accommodating our visit yesterday. It was very informative for us to see how a different plant is implementing measures to ensure social distancing and proper sanitation in the face of COVID-19.

We sincerely appreciate your willingness to have us at your facility and the time that you spent with us.

Stay safe and stay healthy!

Thanks to everyone for being flexible and transparent around this tour. Good news. Tyler Luft (cc'd) is the plant manager in Fort Morgan. He's available to give a tour to the CDC team today. It would work best if everyone arrives between 12-12:30. He will focus the tour on screening and the steps taken to promote a safe work environment in the plant. Tyler's contact info is: 620 644 2410

Please provide the names and titles of everyone attending from the CDC. Let me know what else you need.

Thanks again.  
Katie

Thanks to everyone for being flexible and transparent around this tour. Good news. Tyler Luft (cc'd) is the plant manager in Fort Morgan. He's available to give a tour to the CDC team today. It would work best if everyone arrives between 12-12:30. He will focus the tour on screening and the steps taken to promote a safe work environment in the plant. Tyler's contact info is: 620 644 2410

Please provide the names and titles of everyone attending from the CDC. Let me know what else you need.

Thanks again.  
Katie

Good morning, Katie:

Just checking in to see if we can talk about a potential last minute visit by our NIOSH team. We have heard very good things about the measures Cargill has put in place to protect their workers and we'd love to see them in person, if the opportunity is available today. We definitely understand if it is not possible and appreciate your efforts to explore the possibility.

We are stationed up in Greeley. You can reach me via email or phone (404-307-3607).

Thanks!

Good afternoon Christa,

I've been able to talk with both the Cargill plant manager here in Fort Morgan as well as Katie Smith, Cargill Director for State Governmental Affairs about having you and your team come to visit the plant. Katie and I thought it would be best to introduce you virtually so that you can communicate directly to help coordinate the scheduling of the visit. I would be happy to be a part of the visit when you come out and I'm willing to help however I can to facilitate things. I've also copied Jennifer House, CDPHE Epidemiologist as she and I have also talked about this visit. Let me know how else I can help. Thank you! Trish

Hello Christa,  
I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

Excellent. Thanks so much, Katie!

Tyler: Thank you very much for accommodating us today. I know it will be a disruption, but hopefully a relatively minor one. We will plan to bring our typical PPE for COVID-19 (N-95, goggles, gown, and gloves). Let us know if we need to bring anything else and, of course, we understand we will need to wear any PPE you might provide for the sake of safety.

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department.

She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

Good afternoon Christa,

I've been able to talk with both the Cargill plant manager here in Fort Morgan as well as Katie Smith, Cargill Director for State Governmental Affairs about having you and your team come to visit the plant. Katie and I thought it would be best to introduce you virtually so that you can communicate directly to help coordinate the scheduling of the visit. I would be happy to be a part of the visit when you come out and I'm willing to help however I can to facilitate things. I've also copied Jennifer House, CDPHE Epidemiologist as she and I have also talked about this visit. Let me know how else I can help. Thank you! Trish

Good morning, Katie:

Just checking in to see if we can talk about a potential last minute visit by our NIOSH team. We have heard very good things about the measures Cargill has put in place to protect their workers and we'd love to see them in person, if the opportunity is available today. We definitely understand if it is not possible and appreciate your efforts to explore the possibility.

We are stationed up in Greeley. You can reach me via email or phone (404-307-3607).

Thanks!  
christa

Good afternoon Christa,

I've been able to talk with both the Cargill plant manager here in Fort Morgan as well as Katie Smith, Cargill Director for State Governmental Affairs about having you and your team come to visit the plant. Katie and I thought it would be best to introduce you virtually so that you can communicate directly to help coordinate the scheduling of the visit. I would be happy to be a part of the visit when you come out and I'm willing to help however I can to facilitate things. I've also copied Jennifer House, CDPHE Epidemiologist as she and I have also talked about this visit. Let me know how else I can help. Thank you! Trish

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

**Subject:** Re: Set up visit to Cargill facility

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

On Thu, Apr 16, 2020 at 1:02 PM Hale, Christa R. (CDC/NIOSH/WSD) <[hgk5@cdc.gov](mailto:hgk5@cdc.gov)> wrote:

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,

christa

Shelly

Thank you for letting me know about the email. I think you have stated things very well. Morgan County is required to abide by the Safer At Home order unless they submit a variance. In order for the variance to even be considered, it has to have the support of local public health and every hospital in the county. Keeping our healthcare partners intact and functioning is my highest priority. If any of our partners feel less than confident about a variance application, I will stand with them and not sign off on it. I know there is incredible pressure from some business to have the ability to be open and while the ability to earn a living is very important, protecting lives is even more so. I stand with you. Thanks! Trish

On Wed, Apr 29, 2020 at 9:24 AM Shelly Griffith <[sgriffith@ebenezer-cares.org](mailto:sgriffith@ebenezer-cares.org)> wrote:

Good Morning All,

I have recently sent an email to our county commissioners recognizing them for all they are doing and asking that before they make decisions on future county decisions in regards to lifting stay at home orders that they reach out to each of your organizations for your input. I recognize that many of you are already having these direct conversations with them, but in full disclosure I wanted you to know that I referenced you in my email.

Thank you for all you are doing during this time.

Here was the body of my email to the commissioners for your reference.

*Good Morning Commissioners,*

*I hope you are all doing well.*

*I understand there is discussion occurring on how the County may update or change Stay at Home orders as directed by Governor Polis. I recognize the pressures you are all receiving in reference to how the county should be 'Open' for business and understand how negatively many in our community have been affected by this virus.*

*What I would like to share with you is a perspective from someone who is seeing how deadly and devastating this virus can be. Here at Eben Ezer our organization was as ready to fight this as many. We were handcuffed by not having supply lines open to us as we were not a Tier1 priority for PPE. In essence, this weakened our ability to stand ready to protect our team and our elders. While we have experienced many deaths, I am happy to report that we have many who have been able to fight off this nasty, virulent virus. As we continue moving through this, we will continue to advocate for the need to have nursing homes in that tier 1, although that is another discussion. What I want you to take away from this is how vulnerable healthcare workers and the elderly are to this virus. The combination of those over the age of 65 and the number of healthcare workers in our county is great, significant enough for this consideration.*

*I ask that when you make your decision on how and when we open our community back up,*

*be sure to reach out to those who are in the trenches of this. Ask your local hospital leaders, senior living providers, the local health departments, and EMS providers for their input prior to making your decision.*

*I absolutely support the need to get our community going again, yet I strongly believe that our community is not ready yet. Thank you for your consideration and please let me know if I can offer you any support or answer any questions you might have.*

<[ginger.stringer@state.co.us](mailto:ginger.stringer@state.co.us)> wrote:

If they need swabs for outbreak response (Eben Ezer?) we can send a few from our lab. This is DRAFT language from a document we're working on with the lab about swab options...

### **DRAFT Colorado State Laboratory COVID-19 Swab Options DRAFT**

**\*\*\* Additional sample types are under review in the laboratory and will be added to this guidance as they become available\*\*\***

The Colorado State Public Health Laboratory has validated an expanded set of sample collection options for COVID-19 RT-PCR testing. All of the following swab and transport media types are acceptable for sample submission at the state public health laboratory.

#### **Swab options**

Nasopharyngeal (NP) swab  
Oropharyngeal (OP) swab  
Mid-turbinate specimen flocked swab  
Anterior nares round foam swab

\*Self collected swabs collected in the presence of a medical professional are acceptable, home collected swabs are NOT acceptable

**Transport Media options** - minimum of 1mL sample volume required at state lab

Viral/Universal transport media (VTM/UTM) - commercial or laboratory

prepared  
Liquid Amies  
Phosphate Buffered Saline (PBS)  
Normal Saline

How to get swabs for sample collection:

- Routine procurement routes
- Request through LPHAs
- LPHAs can request through State Emergency Operations Center (SEOC)
- LPHAs can request through their CDPHE Epidemiology Team for outbreak response

Considerations for swabs sent to other facilities

- *The swabs and transport media types listed above have been validated for the platforms in use at the state laboratory. Other labs may have different systems in place with different sample tube or swab requirements. If you are sending samples to labs other than the state lab for testing, please verify sample submission criteria with any other commercial laboratory prior to submitting you samples there*
- *Do NOT use any swab/transport media that contains guanidine thiocyanate for testing on the Hologic Panther System - this system uses a bleach disinfecting step that will produce cyanide gas when combines with guanidine thiocyanate*

I will have the lab send 100 swabs to you at NCHD and you can distribute them for outbreak response as needed.

That would be helpful. EMCH continues to test HCW from Eben Ezer and I know they have had Cargill staff there as well. Do you need their mailing address or do you send them to us (NCHD) and we get them to the hospital? Thank you for your help. Trish

On Thu, Apr 16, 2020 at 8:59 AM Stringer - CDPHE, Ginger <[ginger.stringer@state.co.us](mailto:ginger.stringer@state.co.us)> wrote:

If they need swabs for outbreak response (Eben Ezer?) we can send a few from our lab. This is DRAFT language from a document we're working on with the lab about swab options...

### **DRAFT Colorado State Laboratory COVID-19 Swab Options DRAFT**

**\*\*\* Additional sample types are under review in the laboratory and will be added to this guidance as they become available\*\*\***

The Colorado State Public Health Laboratory has validated an expanded set of sample collection options for COVID-19 RT-PCR testing. All of the following swab and transport media types are acceptable for sample submission at the state public health laboratory.

#### **Swab options**

Nasopharyngeal (NP) swab  
Oropharyngeal (OP) swab  
Mid-turbinate specimen flocked swab  
Anterior nares round foam swab

\*Self collected swabs collected in the presence of a medical professional are acceptable, home collected swabs are NOT acceptable

**Transport Media options** - minimum of 1mL sample volume required at state lab

Viral/Universal transport media (VTM/UTM) - commercial or laboratory prepared  
Liquid Amies  
Phosphate Buffered Saline (PBS)  
Normal Saline

How to get swabs for sample collection:

- Routine procurement routes

- Request through LPHAs
- LPHAs can request through State Emergency Operations Center (SEOC)
- LPHAs can request through their CDPHE Epidemiology Team for outbreak response

Considerations for swabs sent to other facilities

- *The swabs and transport media types listed above have been validated for the platforms in use at the state laboratory. Other labs may have different systems in place with different sample tube or swab requirements. If you are sending samples to labs other than the state lab for testing, please verify sample submission criteria with any other commercial laboratory prior to submitting you samples there*
- *Do NOT use any swab/transport media that contains guanidine thiocyanate for testing on the Hologic Panther System - this system uses a bleach disinfecting step that will produce cyanide gas when combines with guanidine thiocyanate*

Trish,

If there is anyway to get swabs for testing? We have seen a significant increase in Eben Ezer testing.

We use NP swab Daycorn or Foluq with viral media.

Thanks

Linda

**To:** Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)>

Trish,  
If there is anyway to get swabs for testing? We have seen a significant increase in Eben Ezer testing.

We use NP swab Daycorn or Foluq with viral media.

Thanks

Linda

Good morning,  
I wanted to circle back to make sure I haven't missed anything. Is it correct to say that at this time Cargill will not be pursuing a testing option for the Fort Morgan site?  
Thanks and hope you both have a good day. Trish

I appreciate the time you spent on the call. I apologize that it was not more coordinated. There has been a disconnect between state public health (Amanda Hettinger and Amanda Metz) and the state emergency operations center (Mark & Jason/National Guard) and I think the call really showed that. I hope you got the information that was needed in order to make the best decision you can for your employees and your company. I'll support whatever you decide. We (me, Michelle & Mary--my PIOs, Daniel Sullivan) have a call tomorrow morning to work on a joint press release. Thanks again for your time today. Trish

Tyler,

I got a call from Jennifer House, she's the state epi. She wanted to reassure me that the purpose of this visit is for the CDC team to glean ideas and develop guidance for other food service industry companies. Jennifer said she's been very pleased at what she's heard about Cargill and wanted to share best practices. I think it could be beneficial for the CDC team to take a look and see the great things you are doing and please know that NCHD will support whatever you think is best for Cargill. Thanks! Trish

On Wed, Apr 15, 2020 at 11:26 AM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

Good morning,

We will be doing a press release in the next day or two because there have been some deaths related to COVID-19 in our region. We have to wait until the death certificates are finalized at the state level in order to make sure our numbers and CDPHE numbers are in agreement before we release anything. For instance, we had a person at end of life for another (non respiratory) medical reason and they also tested positive for COVID-19--if the death cert lists COVID-19 as a contributing factor, then we count it, if not, we don't. I will keep you posted on that.

Cargill has been getting a lot of attention since JBS closed several plants, including Greeley. Mel and I did a site visit yesterday and they are doing a good job of taking appropriate precautions with their staff in regards to PPE, sanitizing and disinfecting, social distancing, screening, isolation and quarantine. I've been in conversation with both the state and with Cargill corporate health to discuss setting up a testing site for their employees. I think it would be helpful for us to determine the actual health status of their workforce and we could then see how the measures they are implemented are having the desired impact. Cargill staff have been great to work with and we have been transparent with them as far as any conversations the state has with us. I've also been assertive in that this needs to be a partnership and not a heavy handed approach as Cargill is part of our community and we will be working together long after COVID-19 is over. I have a call this afternoon with Cargill and CDPHE to discuss testing some more. Again, I'll keep you posted.

Seaboard Foods sent us information on what they are doing to keep their staff safe and we have let them know we are available if they need us.

We have distributed a lot of PPE to regional hospitals and long term care facilities while they await shipments from private suppliers.

We are implementing staffing rotation through the incident management team and expanding telework options for staff to help everyone deal with the increased stress of the response. We've been at this for 5 weeks now and it's going to drag on for awhile.

We will have our BOH meeting via Zoom this month.

If you have other questions about things I haven't covered here, just let me know. Thanks!

Agriculture is still an essential service, so they will not be asked to reduce by 50% per the new order from the governor. They should have some sort of guidance from USDA for the packing side of things. As far as the kitchen goes, they can do business for takeout. If employees order, and they want to allow them to eat at work, they should just practice social distancing. Stagger lunch hours, have people spaced out, clean tables between, eat in their cars or outside where they can space out nicely. I am not sure what it looks like over there to give other suggestions.

Question for all of you:

Would you be in favor of the statewide Stay at Home Order being extended through the end of April instead of expiring on April 11? Morgan County now has 15 cases, 8 of those being reported today. You can reply to me directly or to the group. I will keep your replies to me confidential. Thank you! Trish

Question for all of you:

Would you be in favor of the statewide Stay at Home Order being extended through the end of April instead of expiring on April 11? Morgan County now has 15 cases, 8 of those being reported today. You can reply to me directly or to the group. I will keep your replies to me confidential. Thank you! Trish

Hi Trish,

Since I'm not working in the medical field, I'm not the best source of a vote. However, as a higher risk community member, I would prefer that it be extended as we don't seem to have peaked in Colorado yet. It's too bad that we don't have access to information on the number of cases who have recovered and been successfully discharged from the hospital. I would also wish we could do something about enforcement of quarantine orders for those exposed or positive. I know that's a sticky wicket, but there continue to be folks out there who are not taking this seriously.

Thanks so much for your efforts on the behalf of our citizens. You are an amazing group of people trying to keep us all safe.

Carol Brom

**State will release additional facility-level data on confirmed outbreaks**

(DENVER) April 15, 2020: Starting today, the Colorado Department of Public Health and Environment (CDPHE) will release more information about confirmed COVID-19 outbreaks in long-term care and other facilities weekly. This is a change aimed at promoting transparency, protecting the public, and providing more insight into the extent of COVID-19 outbreaks statewide.

A confirmed outbreak means there are two or more confirmed cases of COVID-19 in a facility or (non-household) group with onset in a 14-day period. The information will be available on the state's website at [covid19.colorado.gov/outbreak-data](https://covid19.colorado.gov/outbreak-data) on the [COVID-19 website](#). Information will be updated weekly on Wednesday by the end of the day.

Facilities included in the outbreak report will include:

- Health care settings
  - Including long-term care facilities, assisted living facilities, independent living facilities/senior communities that offer healthcare, inpatient rehab facilities, and long-term acute care hospitals.

- There are currently 231 nursing facilities, 706 assisted living facilities, and 21 intermediate care facilities in Colorado.
- Correctional settings
  - Including state prisons, county and city jails, community corrections, detention settings, and work release facilities.
- Other settings:
  - This could include factories, workplaces with crowded work conditions, camps, schools, child care centers, and independent living facilities/senior communities that do not offer health care.

Each Wednesday, CDPHE will report the following detailed outbreak data:

- Facility name.
- Facility type.
- Date the outbreak was confirmed.
- Total reported cases (confirmed and probable).
  - Residents and staff in health care settings.
  - Residents/inmates/detainees/staff correctional settings.
- Total reported deaths (confirmed and probable).

Continue to stay up to date by visiting [covid19.colorado.gov](https://www.covid19.colorado.gov).

#### **El Estado publicará datos adicionales a nivel de cada instalación acerca de brotes confirmados**

(DENVER) 15 de abril de 2020: A partir de hoy, el Departamento de Salud Pública y Medio Ambiente de Colorado (CDPHE) publicará información adicional semanalmente sobre los brotes confirmados en las instalaciones de cuidados de larga duración y otras instalaciones. Este cambio tiene el objetivo de fomentar la transparencia, proteger al público y brindar mayor entendimiento acerca del grado de los brotes del COVID-19 en el estado.

Un brote confirmado implica que hay dos o más casos confirmado de personas infectadas del COV D-19 en una instalación o grupo no residencial, con el inicio de los síntomas en un periodo de 14 días. La información se publicará en la página web del estado [covid19.colorado.gov/outbreak-data](https://www.covid19.colorado.gov/outbreak-data) y la [página web del COVID-19](https://www.covid19.colorado.gov). Se actualizará la información de modo semanal, cada miércoles al final del día.

Se incluirán en el informe de brotes las siguientes instalaciones:

- Establecimientos sanitarios
  - Incluyendo las instalaciones de cuidados de larga duración, de vivienda asistida, de vivienda independiente, comunidades para personas mayores que ofrecen atención médica, instalaciones de rehabilitación internada y hospitales de cuidados intensivos de larga duración.

- Actualmente hay 231 instalaciones de enfermería, 706 de vivienda asistida y 21 de cuidados intermedios en Colorado.
- Establecimientos correccionales
  - Incluyendo las prisiones estatales, las cárceles de condado y municipal, los centros de correcciones comunitarias y de detención, además de las instalaciones de libertad condicional para trabajar.
- Otros entornos:
  - Podría incluir fábricas, lugares de trabajo con condiciones laborales de áreas concurridas, campamentos, escuelas, centros de guarderías e instalaciones de vivienda independiente/comunidades para personas mayores que no ofrecen atención médica.

Cada miércoles, el CDPHE publicará los siguientes datos detallados acerca de los brotes:

- Nombre de la instalación.
- Tipo de la instalación.
- Fecha en que fue confirmado el brote.
- Total de casos de infecciones reportadas (confirmadas y probables).
  - Residentes y personal de establecimientos sanitarios.
  - Residentes/presos/detenidos/personal de entornos correccionales.
- Total de muertes reportadas (confirmadas y probables).

Manténgase informado en: [covid19.colorado.gov](https://www.colorado.gov/covid19).

Hi Deanna,

Are you planning to release if any of the staff are sick? Mike says that is something we are going to be asked.

Thanks,  
Mary

On Wed, Apr 22, 2020 at 12:24 PM Herbert - CDPHE, Deanna <[deanna.herbert@state.co.us](mailto:deanna.herbert@state.co.us)> wrote:

Hi Mary,

Not sure if this is the final version, but it should be pretty close. This is what DOC is putting out today regarding testing at Sterling Correctional Facility. This is for situational awareness only:

**Department of Corrections and Colorado Department of Public Health and Environment to Conduct COVID-19 Testing at Sterling Correctional Facility**

*The Department has had 8 inmates test positive at the facility*

The Department of Corrections (DOC), in collaboration with the Colorado Department of Public Health and Environment (CDPHE), will be conducting widespread targeted testing for COVID-19 at the Sterling Correctional facility over the next several days. The facility

has had 8 inmates, both symptomatic and asymptomatic, test positive for COVID-19. DOC will be testing inmates in several units of the east side of the facility, including units where inmates have either tested positive or were previously quarantined..

DOC health officials have been conducting detailed contact tracing investigations, and the facility has been on Phase III modified operations with inmates remaining in their cells on quarantine since April 14, 2020.

“This testing will allow us to better identify, isolate and treat any inmate who is positive for COVID-19 and help to prevent the spread of the virus as much as possible in an environment where social distancing is very difficult,” said Department of Corrections Executive Director, Dean Williams. “By conducting this testing and isolating positive inmates, we are working to mitigate the risk of larger numbers of inmates becoming ill and potentially creating an impact on the public health and medical system.”

The DOC and CDPHE anticipate the additional testing could result in a noticeable increase in the number of reported positive cases.

“Any time we do widespread testing in a facility with an outbreak, we expect to see an increase in cases due to the increase in testing, not necessarily due to an increase in transmission,” said Ginger Stringer, field epidemiologist and COVID-19 response epidemiology lead, Colorado Department of Public Health and Environment. “Our strategy is to be aggressive with our testing to identify cases who may be asymptomatic, and provide recommendations to prevent the further spread of infection.”

Detailed information on DOC’s Response to the COVID-19 pandemic can be found at:

<https://www.colorado.gov/pacific/cdoc/covid-19-faq-and-updates>

---

Hi Shelly. I have attached the line list. I used the line lists provided by Marilyn and added more staff as we received positive results. If you have additions or changes, please send to me and I will update.

I will be sending this to CDPHE but without the names of the staff or residents. Instead, I will use their CEDRS case numbers for the positives and for those without testing, will use Probable 1, Probable 2, etc.

Please let me know if you have questions. I did leave off the one Assisted Living resident and the Apartment resident.

Tammy

Good afternoon, I discussed this with Mrs Trish there are still a few questions. but she said that this department will look into the possibility. below are some of our concerns I'm sure there will be more. I would be happy to meet with Captain Cyrus Clarkson and CSU staff to discuss this in more detail. Thanks and have a nice day. Mel

1. This facility and food service is overseen by CDPHE Division of Environmental Health and Sustainability They might have some ideas on this also.
2. Being that there is a population turnover will this be an ongoing program.
3. The logistics of the whole process.
4. Being that we do have some staff that are not comfortable with the training that puts a limit on our resources.

Hi Everyone,

A couple of Extension colleagues are working with the Sterling Correctional Facility, and in a round-about way the topic of ServSafe certification training for the inmates who are working in the facility's kitchen came up. I received a few details about what they are looking for from Captain Cyrus Clarkson and would like your input. From what I understand, they currently have one culinary arts instructor who is certified as a proctor and one staff who is in the process of becoming an instructor/proctor. They would like to certify approximately 380 inmates who work in the facility kitchen, which I realize is not at all doable for our group to tackle and not financially feasible for the facility, but am wondering what your thoughts are about offering a class/classes for them?

Thanks in advance for your input!

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

**Subject:** State of our County  
**Date:** Wednesday, April 29, 2020 9:24:14 AM

---

Good Morning All,

I have recently sent an email to our county commissioners recognizing them for all they are doing and asking that before they make decisions on future county decisions in regards to lifting stay at home orders that they reach out to each of your organizations for your input. I recognize that many of you are already having these direct conversations with them, but in full disclosure I wanted you to know that I referenced you in my email.

Thank you for all you are doing during this time.

Here was the body of my email to the commissioners for your reference.

*Good Morning Commissioners,*

*I hope you are all doing well.*

*I understand there is discussion occurring on how the County may update or change Stay at Home orders as directed by Governor Polis. I recognize the pressures you are all receiving in reference to how the county should be 'Open' for business and understand how negatively many in our community have been affected by this virus.*

*What I would like to share with you is a perspective from someone who is seeing how deadly and devastating this virus can be. Here at Eben Ezer our organization was as ready to fight this as many. We were handcuffed by not having supply lines open to us as we were not a Tier I priority for PPE. In essence, this weakened our ability to stand ready to protect our team and our elders. While we have experienced many deaths, I am happy to report that we have many who have been able to fight off this nasty, virulent virus. As we continue moving through this, we will continue to advocate for the need to have nursing homes in that tier I, although that is another discussion. What I want you to take away from this is how vulnerable healthcare workers and the elderly are to this virus. The combination of those over the age of 65 and the number of healthcare workers in our county is great, significant enough for this consideration.*

*I ask that when you make your decision on how and when we open our community back up, be sure to reach out to those who are in the trenches of this. Ask your local hospital leaders, senior living providers, the local health departments, and EMS providers for their input prior to making your decision.*

*I absolutely support the need to get our community going again, yet I strongly believe that our community is not ready yet. Thank you for your consideration and please let me know if I can offer you any support or answer any questions you might have.*

Trish,  
If there is anyway to get swabs for testing? We have seen a significant increase in Eben Ezer testing.

We use NP swab Daycorn or Foluq with viral media.

Thanks

Linda

**From:** [Trish McClain](#)  
**To:** [Tyler Luft](#); [Chantelle Johnson](#)  
**Subject:** Testing information  
**Date:** Tuesday, April 28, 2020 4:58:44 PM

---

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state lab
- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plan or become symptomatic during the day. They would also recommend testing for close contacts of symptomatic people, even if those close contacts aren't symptomatic
- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

**Subject:** Testing Warning Order  
**Date:** Sunday, April 12, 2020 7:32:17 PM

---

As the situation develops in Weld and Morgan County, here is a warning order for potential National Guard testing sites.

Weld County: potential testing on Tuesday for Community Corrections and jail. Approx 250-300 pax. Awaiting confirmation from Dr. Wallace, Weld County Dept Public Health & Environment Director. If it's a go, then need:

- 1) Location(s) - Weld
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - WCDPHE
- 4) Arrangements for security/traffic control - Weld/SEOC
- 5) PIO - Weld
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

Morgan County: potential testing of Cargill employees this week. Pax numbers unknown. Awaiting decision from Trish McClain, Northeast Colorado Health Department. If it's a go, then need:

- 1) Location(s) - Morgan
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - NCHD/CDPHE
- 4) Arrangements for security/traffic control - Morgan/SEOC
- 5) PIO - Morgan
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

CONG - BPT operate two sites simultaneously. Send feasibility of doing two and capacity at each if there are two to SEOC NLT Monday 1600

More to follow

I just wanted to reach out and let you know we appreciate you both. You are working so hard and have been so available to us. While today's meeting did not provide additional suggestions we did meet following to review all we have done or should be doing. With our physical layout and current construction on the campus I feel we have reduced traffic flow as much as practically possible. Tomorrow will be day 10 for our first group of residents that presented symptoms. Again we appreciate you and please let us know if other questions or ideas present.

**Subject:** Thanks for being on today's call  
**Date:** Wednesday, April 15, 2020 4:01:42 PM

---

I appreciate the time you spent on the call. I apologize that it was not more coordinated. There has been a disconnect between state public health (Amanda Hettinger and Amanda Metz) and the state emergency operations center (Mark & Jason/National Guard) and I think the call really showed that. I hope you got the information that was needed in order to make the best decision you can for your employees and your company. I'll support whatever you decide. We (me, Michelle & Mary--my PIOs, Daniel Sullivan) have a call tomorrow morning to work on a joint press release. Thanks again for your time today. Trish

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)  
Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,  
Mary

Tyler,

I got a call from Jennifer House, she's the state epi. She wanted to reassure me that the purpose of this visit is for the CDC team to glean ideas and develop guidance for other food service industry companies. Jennifer said she's been very pleased at what she's heard about Cargill and wanted to share best practices. I think it could be beneficial for the CDC team to take a look and see the great things you are doing and please know that NCHD will support whatever you think is best for Cargill. Thanks! Trish

Good morning,

We will be doing a press release in the next day or two because there have been some deaths related to COVID-19 in our region. We have to wait until the death certificates are finalized at the state level in order to make sure our numbers and CDPHE numbers are in agreement before we release anything. For instance, we had a person at end of life for another (non respiratory) medical reason and they also tested positive for COVID-19--if the death cert lists COVID-19 as a contributing factor, then we count it, if not, we don't. I will keep you posted on that.

Cargill has been getting a lot of attention since JBS closed several plants, including Greeley. Mel and I did a site visit yesterday and they are doing a good job of taking appropriate precautions with their staff in regards to PPE, sanitizing and disinfecting, social distancing, screening, isolation and quarantine. I've been in conversation with both the state and with Cargill corporate health to discuss setting up a testing site for their employees. I think it would be helpful for us to determine the actual health status of their workforce and we could then see how the measures they are implemented are having the desired impact. Cargill staff have been great to work with and we have been transparent with them as far as any conversations the state has with us. I've also been assertive in that this needs to be a partnership and not a heavy handed approach as Cargill is part of our community and we will be working together long after COVID-19 is over. I have a call this afternoon with Cargill and CDPHE to discuss testing some more. Again, I'll keep you posted.

Seaboard Foods sent us information on what they are doing to keep their staff safe and we have let them know we are available if they need us.

We have distributed a lot of PPE to regional hospitals and long term care facilities while they await shipments from private suppliers.

We are implementing staffing rotation through the incident management team and expanding telework options for staff to help everyone deal with the increased stress of the response. We've been at this for 5 weeks now and it's going to drag on for awhile.

We will have our BOH meeting via Zoom this month.

If you have other questions about things I haven't covered here, just let me know. Thanks!

**Subject:** Heads up: Leprino Foods  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed

The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening

- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Good morning just spoke with Lindsey Seghi of Western Sugar Plant in Fort Morgan. I was told that they had an employee that tested positive for the virus. We went through some of the social distancing issues, cleaning and disinfecting at the plant. I gave some ideas learned at Cargill and I will be sending some more guidance concerning this aspect . There is still at least one month left to finish the campaign (production) Below is what I have so far. Let me know if anyone has ideas, concerns. or new protocol concerning Mfg

I have sent email invitations out for Monday's board meeting. Information is also below if this way is easier for you to access the meeting link. Join Zoom Meeting <https://us02web.zoom.us/j/85264200258?pwd=NXczeVpibWp6U0w5ZTB2bjZVUVR1dz09> Meeting ID: 852 6420 0258 Password: 032552 One tap mobile +13462487799,,85264200258#,,#032552# US (Houston)

Wow it has been a month since we last met and what a month it has been. We are still working remotely and anticipate doing so for a while. We are doing well working within the groove we are in and do not want to rock the boat! We have raised or have been told we are being awarded as of this email \$186,250 in funding earmarked specific to covid19 response. We have applied for additional funding or potentially another \$37,000 and are discussing submitting an application for \$25,000 for food assistance.

We are all still working remotely the majority of the time. We have begun to see an increase in requests for assistance. We are looking at offering up to potentially \$750 in rent and or utilities depending on need and funding. We anticipate providing ongoing support for individuals that need it as long as funding allows. We received 5 pallets of FEMA baby supplies yesterday and had partner agencies and some child care providers pick some up. We will distribute them to families we are working with over the next week unless they are requesting wipes and size 5 diapers which did not arrive yet. Sue and I are participating in as many conversations as we can to learn about community needs and also share what we can offer. Jennifer Fernandez helped with the Mobile Food pantry this week and distributed 250 bags with community information in them. PAT staff is still making video calls and regular calls to their families. The Partnership (Early Childhood Council) interviewed 4 candidates this week and hired Brittany Smith. Brittany will begin full time on May 11th! YEA for me as I have been trying and not keeping up with all the ECC work that needs done since Mandy left her position last month.

One thing that we will need to do for the board meeting is approve an enhanced travel policy. All of the other policies met the needs requested due to our fiscal review. I failed to get an enhanced travel policy in front of you. I know we discussed it but I was unclear at the time what I needed. I believe what we will need to add to our current policy is an approval process for travel and some mechanism of showing that the travel requested is true or can be verified. I will work on this before our meeting Monday.

Finally, I have a quote for about \$3,000 to move the electrical conduit at the Brush office away from the apartment doorway and reroute an electrical outlet that was not done correctly. I have a quote for \$2,000 to build a staircase for the apartment door. We did receive notice we will be receiving \$5,000 from the Housing Coalition (?) which we were asked to submit a request for. We initially said we would look at getting the apartment ready to go as well as support the tenant training started in cooperation with FMCUP.

Whew...I am sure there is more to update you but it is Friday afternoon and it has been a very busy week so that is all I can think of at this time. Let me know if you have any questions. I will try to get an agenda, updated travel policy and financial reports together for you by the meeting.

Thank you all for your time yesterday. As discussed the Fort Morgan Leadership Team and I walked the plant yesterday. Please find below a summary of our next steps.

Some background on what we currently have in place (for several weeks now):

- Maximum occupancy limits on meeting rooms and other common areas.
- Seating limited to one person per table in the break rooms
- Temperature checks and a health screener for anyone entering the facility
- Close proximity devices (like our air showers) used for GMP's have been turned off
- In some locations we have floors marked with proper distancing where queues are likely
- Facemasks and snoods (see the picture attached) in place for all employees
- Curtain barriers in place for our hand pack line (people stand shoulder to shoulder about 5 feet apart)
- Disinfecting of high touch surfaces multiple times per shift
- Deep clean and disinfecting protocol for enactment when we have a positive case in the plant
- Contact tracing and risk assessment protocols for all positive employees
- Expanded staggering of shift changes to help minimize the number of people flowing into and out of the plant at one time
- Constant communication with all employees at a plant level and from Denver

Based on our conversation we are also implementing the following asap:

- Chairs will be removed from pre-shift meeting rooms and the floors marked where people are to stand to prevent unintentional crowding
- Expanded marking of floors where ques form to ensure we do not have crowding
- Routine Chlorine Dioxide gassing of all common areas in the plant
- Moving the smoke area to a location that is visible from the Manager's windows and marking the ground to ensure distancing
- Maxing out air exchanges on all HVAC units in the plant
- Mandating use of N95 masks in control rooms and offices where we have higher density populations. We are not requiring these on the line as breathing under heavy exertion would become an issue.
- Having "hall monitors" in our locker rooms to ensure distancing. This is our closest confinement area in the plant.

We do have a **request for you**. We are wondering if you would be willing to make a short video (2 – 3 minutes) talking about the importance of social distancing and masks in and out of work. It continues to amaze us how people "just don't get it" even with all the communication we have done. There was a situation with an employee yesterday, identified in contact tracing, that went fishing with a positive employee! We are hoping that maybe a message direct from a public health official may have an impact. If you are willing I would have Kim DeVigil work with you on talking points and the logistics of the video (we have been shooting them on webcams).

We are testing an additional 30 people today in Fort Morgan that have been identified through contact tracing. We will also be up there tomorrow to test our every other day asymptomatic people as well as catch any stragglers from our tracing and risk assessments.

I have attached a number of the documents referenced above for your review and input. We are always open to feedback and ideas.

Finally, when Kelly can catch her breath today she will send you the summary of the positive and negative employees that we have tested.

Kind Regards,

Jason

Hi Jason. I have a couple other questions.

1. Do these individuals work at the plant on the weekend?

2. Is everyone there full time or are some part time/PRN? I am wondering about other employment outside of Leprino.

Thanks! Tammy

Tammy and Trish,

I hope your day is going better than mine.

We received results back from Fort Morgan this morning. I would like to schedule a call to discuss asap. Alternatively I am headed up to Fort Morgan around 12:30 today which would put me at the plant around 2. Could we meet there? We will need some assistance and meeting at the facility and doing a walk through would be helpful to us.

Subject: Hazardous practices at SCF.

To: <[melb@nchd.org](mailto:melb@nchd.org)>

To anyone who can assist: My name is Shannon E. Russum. I live at 414 State Street in Sterling, Co. 80751. I am requesting an investigation at the Sterling Correctional facility. Starting today Friday the 17th of April 2020 they have started a new practice I feel very strongly places the entire community at risk. Today the correctional facility has started using non-essential staff to make direct contact with each and every inmate. Taking there temperature and asking health related question. The staff they are using are mental health staff. The gave them a 10 minute course on how to take a mask on and off. Not an N95 mask. A simple surgical mask. Along with a pair of gloves. I cannot speak for every member of the mental health team but I am certain the majority of them have not been trained in the prevention and spread of dangerous diseases. I feel this poses a serious health risk to all involved in this procedure including the inmates. I have a background in medical health. I know for a fact this is not something you can teach in a 10 minute class. As a result my fear is a serious cross contamination of COVID-19 taking place. Just now results in more people in direct contact with each and every inmate and intern returning home to their families in the community of Sterling. I am asking

On Mon, Apr 6, 2020 at 3:50 PM Penny Stumpf <pennys@nchd.org> wrote:

Hello Mel,

I hope your day is going well. I just had a long conversation with someone from Cargill very concerned about some of the practices going on there. She wanted to remain anonymous, but felt there were some issues that are very concerning and wanted to report them.

Her biggest concern is the cafeteria. She said that they cram every one into there for lunch and breaks. They are all going up the stairs at the same time and there is not any social distancing as there is not room when everyone goes at once. Her other concern is that there is only 1 bathroom as the other is being remodeled and everyone has to wait in line to get to the bathroom. Again everyone is very close together and it can not be helped. She did state that one day they did try to limit the number of employees in the cafeteria, but it was stated it slowed down production too much so they went back to sending everyone at the same time. They did put up some screens between tables, but 4 - 6 people sit at the tables shoulder to shoulder so it was basically the same with no social distancing.

She did state that they have done some things differently on the floor to try to help with the spread. She also pointed out that everyone has to be in the cafeteria and that seems to be a place where people could be easily infected and none of the rules are being followed. She is very fearful about getting the disease and states they are sending sick people home all the time.

I realize that you have been working with Cargill, but I thought I would just send her concerns on to you. I'm not sure we can really do anything, but she is going to call me back later this week to let me know what is happening there. Thank you Mel for everything that you are doing.

Penny
