Hi,

Mike has asked that we reach out to those that have outbreaks, letting them know we want to post some numbers. Let me know what you think.

Thanks,  
Mary

---

Hello, we wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

#### Facility Outbreak Data by County

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,

Mary

## Situation Report

### Colorado COVID-19 Response

**Incident Name: COVID-19 Support CO-COEM-I070**

**Incident Type: COVID-19 Pandemic**

**EOC Activation Level: Level 1 - Activation**

**Operational Period: 04/30/2020 08:00 - 20:00**

---

The State of Colorado has established a Unified Command Center and will be putting out one daily Situation Report for information regarding the 2019 novel coronavirus (COVID-19).

**Distribution: Local Public Health Directors, Local Public Health Emergency Response Coordinators, Regional Staff/Epidemiologists, Healthcare Coalition Readiness & Response Coordinators, Division of Homeland Security and Emergency Management (DHSEM)**

If someone in your agency needs to receive this situation report, please forward the email to them, so they can click "sign up here" at the bottom of this situation report.

Additionally, all guidance is subject to change. For the most recent guidance, please refer to the Google folders or contact CDPHE.

---

## Incident Summary

CDPHE Department Operations Center (DOC) is consolidated at the State Emergency Operations Center (SEOC) to form the Unified Coordination Center (UCC). The UCC is operating Level 1 for the Colorado COVID-19 Pandemic.

4/9/2020: Governor Polis signed an Executive Order (D 2020 032) extending the Colorado disaster emergency declaration for COVID-19 for an additional 30 days from 4/8/2020.

3/28/2020: Governor Polis secured Major Disaster Status (DR-4498) for the Colorado COVID-19 Pandemic.

3/13/2020: President Trump declared the Coronavirus Disease 2019 (COVID-19) a pandemic an emergency declaration pursuant to section 501 (b) of the Robert T. Stafford Disaster Relief and Emergency Assistance Act.

3/11/20: Governor Polis issued a written State of Emergency for Colorado.

3/11/20: The World Health Organization (WHO) declared coronavirus (COVID-19) as a pandemic.

## Safety and Security

### Community Safety:

The daily Colorado Department of Public Health and Environment (CDPHE) COVID-19 Pandemic case summary includes:

### Colorado Case Summary (Updated 4/30/20 at 4:00pm)

Note: This summary only includes data through 4/29/20 and does not reflect cases since then.

- 15,284 cases\* (up by 526)
- 2,697 hospitalized (up by 76)
- 56 of 64 counties affected (no change)
- 72,390 people tested\*\* (up by 2,941)
- 777 deaths (up by 11)
- 159 outbreaks at residential and non-hospital health care facilities (up by 2)

*\*The number of cases includes people who have had a test that indicated they were positive for COVID-19. The number of cases also includes epidemiologically-linked cases -- or cases where public health epidemiologists have determined that infection is highly likely because a person exhibited symptoms and had close contact with someone who tested positive. The number of epidemiologically-linked cases represents a very small portion of the reported cases.*

*\*\*The total number of people tested may not include all negative results.*

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

**Note:** This information impacts the Health and Medical Lifeline

## **Government Services:**

Currently 63 out of 64 Counties have declared local disasters.

## **Health and Medical**

### **Medical Care:**

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites **will only accept patients who are being transferred from hospitals and health care facilities** - the sites will not be open for members of the public seeking medical care or diagnosis.

### **How the medical surge system works:**

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.
4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

### **Confirmed Tier 3 Alternative Care Sites**

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

#### **Denver Convention Center**

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

#### **The Ranch, Larimer County Fairgrounds and Events Complex**

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020

- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

#### **Public Health:**

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

#### **Communications**

##### **Alerts, Warnings, and Messages:**

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

#### **Transportation**

##### **Mass Transit:**

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

### *Colorado Dept. of Transportation (CDOT)*

CDOT suspended its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

### **Action Items**

4/27/2020: Governor Polis released the Safer at Home Executive Order D 2020 044.

<https://www.colorado.gov/governor/news/gov-polis-issues-executive-order-safer-home> and

<https://covid19.colorado.gov/safer-at-home>

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

CDPHE regularly updates this Colorado COVID-19 Pandemic information here:

<https://covid19.colorado.gov/>

**Note:** This information impacts the Health and Medical Lifeline

**Government Services:**

Currently 63 out of 64 Counties have declared local disasters.

**Health and Medical**

**Medical Care:**

The UCC has worked with the Colorado Hospital Association, local communities and the US Army Corps of Engineers to select and prepare alternative care sites throughout the State that can be repurposed to provide medical care for patients who have stabilized in-hospital and no longer require critical care. Alternative care sites serve as medical shelters and are not field hospitals.

The state and its local government partners have completed leases on two large-scale facilities to serve as alternative care sites: The Colorado Convention Center in Denver, and The Ranch - Larimer County Fairgrounds and Events Complex in Loveland. The Army Corps of Engineers will begin construction Friday to retro-fit them to serve as Tier 3 medical shelters. The UCC also plans to finalize leases with three other alternative care sites by the end of the week, and is working to secure additional facilities.

It is important for the public to know that the alternative care sites **will only accept patients who are being transferred from hospitals and health care facilities** - the sites will not be open for members of the public seeking medical care or diagnosis.

**How the medical surge system works:**

1. Individuals showing signs of illness should seek guidance by calling their primary care physician, a nurse care line or community health center. If an individual is having difficulty breathing, and they suspect COVID-19, they should seek urgent care at a hospital-based emergency department. Triage will determine which care setting is appropriate.
2. Patients with critical needs are admitted into a critical care setting (ICU or medical nursing unit) - this is considered Tier 1 care.
3. As patients within a hospital recover, they may be transferred by a fleet of state-managed ambulances to an ambulatory surgical center, free-standing emergency department, or critical access hospital -- all which can provide acute care to COVID-19 patients whose needs fall below critical care. This is considered Tier 2 care. A state dispatch center will manage these patient transfers among facilities.
4. As further recovery ensues, healing patients may be transferred by the state-managed ambulance fleet to alternative care sites that have been created by the state, by hospitals and/or by state/local partnerships with public health and emergency management. This is considered Tier 3 care. Alternative Care Sites are medical shelters. They are not hospitals.
5. Patients who are ready to return home but who can't because of extenuating circumstances or because they need to quarantine in order to protect others, may be transferred by non-EMS to a hotel that has been converted to a medical shelter. This is Tier 4 care.

**Confirmed Tier 3 Alternative Care Sites**

Two Tier 3 facilities are under lease and construction will begin this week. The facilities are located in Denver and Larimer counties. Tier 3 care facilities will have resources and staff capable of caring for patients who are recovering from COVID-19 who no longer need a critical or acute level of care.

**Denver Convention Center**

- Location: Denver, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 600

## The Ranch, Larimer County Fairgrounds and Events Complex

- Location: Loveland, Colorado
- Construction Complete Date: April 29, 2020
- Operational Date: May 15, 2020
- Beds Available on Operational Date: 195

Colorado has signed letters of intent with St. Anthony North in Westminster, St. Mary-Corwin Medical Center in Pueblo, and Western Slope Memory Care in Grand Junction, to serve as alternative care sites. These sites were previously medical facilities and thus have resources that enable care for higher acuity patients than Tier 3 sites.

### Public Health:

4/22/2020: Starting this week, CDPHE epidemiologists began to review the cause of death information on death certificates and began to enter COVID-19 caused deaths into the state's database if those deaths had not previously been reported to the state. Due to the lag in time between when a person dies and when the state receives the death certificate information, there could continue to be a short delay in getting and reporting some of the data to the public.

This data entry will include adding "probable" COVID-19 deaths. A death is classified as "probable" if the decedent was a Colorado resident who had no known positive laboratory test for COVID-19 but the death certificate lists as a cause of death "COVID-19" or an equivalent. Because of this review and data entry of death certificates by epidemiologists, we anticipate an increase in the total number of COVID-19 deaths in Colorado by about 130 this week. This is not because those individuals died this week, but because their deaths have now been recorded in the state system.

In addition, the state has been collaborating with the Colorado Hospital Association to share data that helps provide a picture of the level of demand that the pandemic disease is placing on hospitals across the state. Starting today, the state's [hospital data dashboard](#) will display information on current ventilator usage and availability across all Colorado hospitals, as well as the number of hospitalized patients who are suspected - but not confirmed - of having COVID (known as "patients under investigation").

4/10/2020: The State of Colorado activated new crisis standards of care for emergency medical services and personal protective equipment earlier this week to help health care providers make decisions when responding to COVID-19. These standards are specific to the COVID-19 response.

- The emergency medical services crisis standards outline recommendations for how dispatchers, emergency transport services, and first-responders operate.
- The personal protective equipment crisis standards outline recommendations on use of PPE and alternate equipment to provide some protection from disease transmission.

## Communications

### Alerts, Warnings, and Messages:

Public Information:

2/28/2020: The State established a Joint Information Center (JIC) for the Colorado COVID-19 Pandemic.

## Transportation

### Mass Transit:

*Regional Transportation District (RTD)*

4/10/2020: RTD public transit, as critical infrastructure, continues to operate for essential travel. A service reduction plan will take effect April 19. Fare collection is suspended at this time on all services.

Capacity is now limited to approximately 15 passengers per bus, 20 on larger buses, and 30 riders per rail car. If necessary, buses will bypass stops if social distancing limits are reached.

Essential travel include trips for groceries, to get necessary healthcare and medication, or to reach an

essential job. Don't take unnecessary trips, limit time spent in RTD stations to 10 minutes and, as often as possible, keep a distance of 6 feet between yourself and other passengers.

Additional information: <https://www.rtd-denver.com/coronavirus>

#### *Colorado Dept. of Transportation (CDOT)*

CDOT suspended its Bustang and Outrider bus service between cities throughout the state, effective March 29. The suspension is meant to reduce intercity travel. The suspension is planned to last through at least April 26th and will be reevaluated as guidance or gubernatorial orders change. Service will be suspended after the Stay at Home order expires. No date yet on when it will be back in service.

#### **Action Items**

4/27/2020: Governor Polis released the Safer at Home Executive Order D 2020 044.

<https://www.colorado.gov/governor/news/gov-polis-issues-executive-order-safer-home> and <https://covid19.colorado.gov/safer-at-home>

4/23/2020: The Colorado Department of Public Health and Environment (CDPHE) released a new public health order. [Public Health Order 20 26](#) requires that workers in these businesses who have close contact (within six feet) with other employees or the public wear cloth masks while working. It also orders these workers to wear gloves if they are in close contact with customers. The public health order encourages employers to provide masks and gloves for their employees.

The critical businesses impacted by this public health order include banks, child care facilities, pharmacies, and grocery stores. They are defined in [Public Health Order 20 24](#) and listed on the COVID-19 website at [covid19.colorado.gov/stay-home-except-essential-needs](https://covid19.colorado.gov/stay-home-except-essential-needs).

4/17/2020: Governor Polis signed an Executive Order D 2020 039, ordering all workers in critical businesses and critical government functions to wear non-medical face coverings. The critical businesses and critical government functions are described in Public Health Order 20-24.

4/8/2020: The Colorado state Unified Command Center (UCC) has developed a statewide plan to manage an expected surge in demand for intensive care unit (ICU) and acute care treatment for COVID-19 patients.

Governor Polis issued a statewide Stay at Home Public Health order (Executive Order D 2020 017) that began at 6:00 am, March 26th. On April 6, 2020, the Governor updated the Public Health Order 20-24 to be extended at least until April 26, 2020.

Hi,

Mike was asking about case numbers. He is saying that we will need to address that, either with numbers or explaining why we don't have them.

Have you heard back from CarGill on this subject? Should we try and say something in this press release?

Thanks,

Mary

Jennifer House - CDPHE <[jennifer.house@state.co.us](mailto:jennifer.house@state.co.us)>

Here are my notes, it's what I covered in the call today but thought it may be helpful for you to have in written form. Thank you!

Upon arrival at the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines for staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees get their temperature taken. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Buses they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in the break areas. Handmade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open. High chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across from each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

**Isolation and Quarantine:**

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned

**Cleaning/Disinfection**

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizing disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging weekend. There are extensive logs documenting the cleaning and disinfection procedures.

**Overall impression:**

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Subject: Data Email  
Hi,

Does this sound okay to you?

Hello, we wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

## Facility Outbreak Data by County

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,

Mary

### NCHD Operational Changes

#### **Do we still have the same operating hours?**

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### **How do I contact NCHD staff?**

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call our Public Health Nurse, Kandi Jamison at 970-848-3811 x 3023.

#### **Are we offering all our normal services?**

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### **Vital Records:**

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### **Environmental Health:**

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: April 9th, 2020 and May 7th, 2020.

- Washington County: April 15th, 2020 and May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Please call your local public health nurse.

**WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

**Questions about COVID-19**

**What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

**How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **83 confirmed cases** in northeast Colorado. 62 in Morgan County, 13 in Logan County, 2 in Yuma County, 4 in Phillips County, and two in Washington County. (Current 0800, 4/13/2020) Count does not include pending cases.

**How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

**Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease
  - HIV
  - Immunocompromised

**Where can I get more information?**

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

### How long does it take to start showing symptoms of COVID-19?

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

### Can a person with COVID-19 spread the disease without having symptoms?

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

### **I think I have symptoms of COVID-19?**

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

### **I think I may have been exposed to COVID-19, what should I do?**

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

## **Questions about Testing for COVID-19**

### **How can I get tested for COVID-19?**

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- **CALL OR EMAIL** a health care provider first. If the provider recommends you get testing or care, follow the provider's advice **BEFORE** going into any health facility. Ask your provider about private lab sites where you can get tested.
- **DO NOT** go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- **DO** call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

### **When will I get my results?**

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

## **Questions about Treatment of COVID-19**

### **Is there a vaccine post-exposure?**

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus.

### **How is COVID-19 treated?**

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.

- At this time, it is unknown if you can get the disease more than once.

## Questions about Prevention of COVID-19

### What can I do to protect myself or my family from becoming ill?

#### Preventive actions

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

#### Practice social distancing

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

#### Stay informed

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.covid19.colorado.gov)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

### Should I wear a face mask in the community to prevent COVID-19?

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

### What cleaning products should I use to protect against COVID-19?

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](https://www.cdc.gov/coronavirus/2019-ncov/diseases/COVID-19/faq.html#faq-10). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

## Travel Information

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

**In accordance with CDC's recommendations a Warning Level 3 has been designated for the following countries- CDC recommends that travelers avoid all nonessential travel to these destinations:**

- Australia
- Brazil
- Canada
- Chile
- Ecuador
- India
- Indonesia
- Japan
- Israel
- Malaysia
- Pakistan

- Philippines
- Qatar
- Romania
- Russia
- Saudi Arabia
- Singapore
- South Africa
- South Korea
- Thailand
- Turkey

**A Warning Level 2 has been designated for:**

**Global Outbreak Notice-** CDC recommends that older adults and people of any age with serious chronic medical conditions should consider postponing nonessential travel to most global destinations.

### PPE and Medical Supply Information

#### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. [Learn what to do if you are sick.](#)

**If you are NOT sick:** Make or buy a cloth covering that will cover your mouth and nose and use it whenever **you are outside your own house or yard**. Scarves and bandanas will work as coverings. Wash your face covering frequently.

#### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### School and Childcare Information

#### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

#### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand

sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Schools should work with the local health department and other relevant leadership to communicate the possible COVID-19 exposure to the school community.** This communication to the school community should align with the communication plan in the school's emergency operations plan. In such a circumstance, it is critical to maintain confidentiality of the student or staff member as required by the Americans with Disabilities Act and the Family Education Rights and Privacy Act.
- **If a child or staff member has been identified with COVID-19, school and program administrators should seek guidance from local health officials to determine when students and staff should return to schools and what additional steps are needed for the school community.** In addition, students and staff who are well but are taking care of or share a home with someone with a case of COVID-19 should follow instructions from local health officials to determine when to return to school.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th.

- Key Points:
  - Work from home is permitted and encouraged where possible.
  - Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
  - All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
- Model and encourage everyday actions to limit the spread of illness.
- More accurate information on these sites:
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-explained>
  - <https://covid19.colorado.gov/schools-workplaces-community>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention.

If you have family members living there are want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:

COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234  
 You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

### NCHD Operational Changes

#### Do we still have the same operating hours?

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### How do I contact NCHD staff?

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call your local Public Health Nurse:
  - Yuma and Holyoke: Kandi Jamison x3023
  - Sterling: Brandee Martinez x1236
  - Fort Morgan: Christine Covelli x2236
  - Akron: Tricia Garrett x2254

#### Are we offering all our normal services?

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: April 9th, 2020 and May 7th, 2020.
  - Washington County: April 15th, 2020 and May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.

### **WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## **Questions about COVID-19**

### **What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

### **How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **99 confirmed cases** in northeast Colorado. 76 in Morgan County, 13 in Logan County, 2 in Yuma County, 4 in Phillips County, and 4 in Washington County. (Current 0800, 4/13/2020) Count does not include pending cases.

### **How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

### **Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease
  - HIV
  - Immunocompromised

### Where can I get more information?

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

### **How long does it take to start showing symptoms of COVID-19?**

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

### **Can a person with COVID-19 spread the disease without having symptoms?**

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

### **I think I have symptoms of COVID-19?**

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

### **I think I may have been exposed to COVID-19, what should I do?**

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

## **Questions about Testing for COVID-19**

### **How can I get tested for COVID-19?**

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

### **When will I get my results?**

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

## **Questions about Treatment of COVID-19**

### **Is there a vaccine post-exposure?**

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).

The best way to prevent illness is to avoid being exposed to this virus.

### **How is COVID-19 treated?**

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for

hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

#### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.
- At this time, it is unknown if you can get the disease more than once.

### **Questions about Prevention of COVID-19**

#### **What can I do to protect myself or my family from becoming ill?**

##### **Preventive actions**

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

##### **Practice social distancing**

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

##### **Stay informed**

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.covid19.colorado.gov)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

#### **Should I wear a face mask in the community to prevent COVID-19?**

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

#### **What cleaning products should I use to protect against COVID-19?**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](#). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

### **Travel Information**

CDC recommends that travelers avoid all nonessential international travel because of the COVID-19 pandemic. Some health care systems are overwhelmed and there may be limited access to adequate medical care in affected areas. Many countries are implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and in-country travel may be unpredictable. If you choose to travel internationally, your travel plans may be disrupted, and you may have to remain outside the United States for an indefinite length of time.

CDC also recommends all travelers defer all cruise ship travel worldwide.

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

## PPE and Medical Supply Information

### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. Excellent guidance at <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>

**If you are NOT sick:** CDC recommends that everyone wear a cloth face covering over their nose and mouth when in the community setting, including during travel if they must travel. This is an additional public health measure people should take to reduce the spread of COVID-19 in addition to social distancing, frequent hand cleaning and other everyday preventive actions. A cloth face covering is not intended to protect the wearer, but may prevent the spread of virus from the wearer to others. This would be especially important in the event that someone is infected but does not have symptoms.

### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### Requesting PPE?

All requests for PPE need to go through our Logistics Section.  
Transfer caller to Logistics Section x1225

## School and Childcare Information

### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care

Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Schools should work with the local health department and other relevant leadership to communicate the possible COVID-19 exposure to the school community.** This communication to the school community should align with the communication plan in the school's emergency operations plan. In such a circumstance, it is critical to maintain confidentiality of the student or staff member as required by the Americans with Disabilities Act and the Family Education Rights and Privacy Act.
- **If a child or staff member has been identified with COVID-19, school and program administrators should seek guidance from local health officials to determine when students and staff should return to schools and what additional steps are needed for the school community.** In addition, students and staff who are well but are taking care of or share a home with someone with a case of COVID-19 should follow instructions from local health officials to determine when to return to school.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.
- Key Points:
  - Work from home is permitted and encouraged where possible.

- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
  - All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
  - Model and encourage everyday actions to limit the spread of illness.
  - More accurate information on these sites:
    - <https://covid19.colorado.gov/stay-home-except-essential-needs>
    - <https://covid19.colorado.gov/public-health-executive-orders-explained>
    - <https://covid19.colorado.gov/schools-workplaces-community>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing.

If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at:

<https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020.

The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:

COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

## Seeking Mental Health Support

24/7 Crisis Hotline: National Suicide Prevention Lifeline Network:

[www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

Crisis Text Line

Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

Free Community Support Line: This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

Centennial Mental Health:

Logan County (970) 522-4392

Morgan County (970) 867-4924

Phillips County (970) 854-2114

Sedgwick County (970) 474-3769

Washington County (970) 345-2254

Yuma County - Wray (970) 332-3133

Yuma County - Yuma (970) 848-5412

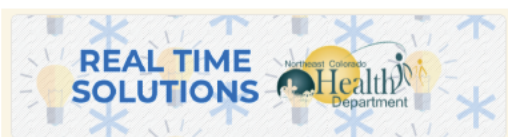

# WEDNESDAY, APRIL 15

**WE WANT TO HEAR FROM YOU.**

### Problem Solving In Real Time

Employees at the Northeast Colorado Health Department are brilliant and creative. During a month of COVID-19 response we have implemented Incident Command and continued core public health services.

This is a large undertaking in a short amount of time. We are seeking to learn about challenges you are experiencing regarding communication, protocol, or any other part of operations.

We are anxious to learn from all of our everyday leaders. Use this form to share your ideas on how to solve the problems you are encountering.

Everything on this form is anonymous.

Ideas about how to improve new processes at NCHD during COVID-19 Repsonse? We want to hear them.

Click through to this **form**.

## TELEWORKING STATS

**25% OF NCHD EMPLOYEES ARE TELEWORKING ALL OR SOME DAYS A WEEK.**

**TIMESHEETS NEED TO BE COMPLETED BY 3:30 PM TODAY.**

### WISDOM FROM INCIDENT COMMAND

De-covid when you go home tonight.

### IT'S A CONFUSING TIME

Need help navigating changes? **Centennial has offered free counseling to public health professionals.** Phone numbers listed in COVID-19 Shared Google Folder.

### SOCIAL DISTANCING

John Travolta inspires us with his dance moves and perfect social distancing height of six feet.

**Disco fever is the only fever we want.** Stay six feet away from your coworkers. Music and dancing is optional.

LOVE FROM A DISTANCE  
THE COOP GROUP

When all else fails,  
fresh tactics!

JOHN TRAVOLTA

### NCHD Operational Changes

#### Do we still have the same operating hours?

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### How do I contact NCHD staff?

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call your local Public Health Nurse:
  - Yuma and Holyoke: Kandi Jamison x3023
  - Sterling: Brandee Martinez x1236
  - Fort Morgan: Christine Covelli x2236
  - Akron: Tricia Garrett x2254

#### Are we offering all our normal services?

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.

- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: April 9th, 2020 and May 7th, 2020.
  - Washington County: April 15th, 2020 and May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.

#### **WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

### **Questions about COVID-19**

#### **What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

#### **How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **116 confirmed cases** in northeast Colorado. 92 in Morgan County, 13 in Logan County, 2 in Yuma County, 4 in Phillips County, and 5 in Washington County. (Current 0800, 4/13/2020) Count does not include pending cases.

#### **How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

#### **Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease
  - HIV

- Immunocompromised

### Where can I get more information?

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public

health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

#### **How long does it take to start showing symptoms of COVID-19?**

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

#### **Can a person with COVID-19 spread the disease without having symptoms?**

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

#### **I think I have symptoms of COVID-19?**

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

#### **I think I may have been exposed to COVID-19, what should I do?**

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

### **Questions about Testing for COVID-19**

#### **How can I get tested for COVID-19?**

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- **CALL OR EMAIL** a health care provider first. If the provider recommends you get testing or care, follow the provider's advice **BEFORE** going into any health facility. Ask your provider about private lab sites where you can get tested.
- **DO NOT** go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- **DO** call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

#### **When will I get my results?**

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

### **Questions about Treatment of COVID-19**

#### **Is there a vaccine post-exposure?**

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus.

#### **How is COVID-19 treated?**

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

#### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.
- At this time, it is unknown if you can get the disease more than once.

### **Questions about Prevention of COVID-19**

#### **What can I do to protect myself or my family from becoming ill?**

##### **Preventive actions**

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

##### **Practice social distancing**

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

##### **Stay informed**

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.colorado.gov/covid19)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

#### **Should I wear a face mask in the community to prevent COVID-19?**

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

#### **What cleaning products should I use to protect against COVID-19?**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](#). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

### **Travel Information**

CDC recommends that travelers avoid all nonessential international travel because of the COVID-19 pandemic. Some health care systems are overwhelmed and there may be limited access to adequate medical care in affected areas. Many countries are implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and in-country travel may be unpredictable. If you choose to

travel internationally, your travel plans may be disrupted, and you may have to remain outside the United States for an indefinite length of time.

CDC also recommends all travelers defer all cruise ship travel worldwide.

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

## PPE and Medical Supply Information

### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. Excellent guidance at <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>

**If you are NOT sick:** CDC recommends that everyone wear a cloth face covering over their nose and mouth when in the community setting, including during travel if they must travel. This is an additional public health measure people should take to reduce the spread of COVID-19 in addition to social distancing, frequent hand cleaning and other everyday preventive actions. A cloth face covering is not intended to protect the wearer, but may prevent the spread of virus from the wearer to others. This would be especially important in the event that someone is infected but does not have symptoms.

### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### Requesting PPE?

All requests for PPE need to go through our Logistics Section.  
Transfer caller to Logistics Section x1225

## School and Childcare Information

### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care

Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Schools should work with the local health department and other relevant leadership to communicate the possible COVID-19 exposure to the school community.** This communication to the school community should align with the communication plan in the school's emergency operations plan. In such a circumstance, it is critical to maintain confidentiality of the student or staff member as required by the Americans with Disabilities Act and the Family Education Rights and Privacy Act.
- **If a child or staff member has been identified with COVID-19, school and program administrators should seek guidance from local health officials to determine when students and staff should return to schools and what additional steps are needed for the school community.** In addition, students and staff who are well but are taking care of or share a home with someone with a case of COVID-19 should follow instructions from local health officials to determine when to return to school.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.
- Key Points:
  - Work from home is permitted and encouraged where possible.

- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
  - All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
  - Model and encourage everyday actions to limit the spread of illness.
  - More accurate information on these sites:
    - <https://covid19.colorado.gov/stay-home-except-essential-needs>
    - <https://covid19.colorado.gov/public-health-executive-orders-explained>
    - <https://covid19.colorado.gov/schools-workplaces-community>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:  
 COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234  
 You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

## Seeking Mental Health Support

24/7 Crisis Hotline: National Suicide Prevention Lifeline Network:  
www.suicidepreventionlifeline.org  
1-800-273-TALK (8255) (Veterans, press 1)

### Crisis Text Line

Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

Free Community Support Line: This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

### Centennial Mental Health:

Logan County (970) 522-4392

Morgan County (970) 867-4924

Phillips County (970) 854-2114

Sedgwick County (970) 474-3769

Washington County (970) 345-2254

Yuma County - Wray (970) 332-3133

Yuma County - Yuma (970) 848-5412

## Concerns about Cargill

### **I think I was exposed to COVID-19 at work.**

Contact Cargill Medical with your questions.

### **How many confirmed cases of COVID-19 are at Cargill?**

To protect privacy our agency does not disclose the city or workplace for positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

### **I want to register a formal complaint about Cargill?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smart phone, our staff can work through the form with you over the phone.

### NCHD Operational Changes

#### Do we still have the same operating hours?

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### How do I contact NCHD staff?

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call your local Public Health Nurse:
  - Yuma and Holyoke: Kandi Jamison x3023
  - Sterling: Brandee Martinez x1236
  - Fort Morgan: Christine Covelli x2236
  - Akron: Tricia Garrett x2254

#### Are we offering all our normal services?

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.

- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: April 9th, 2020 and May 7th, 2020.
  - Washington County: April 15th, 2020 and May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.

#### **WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

### **Questions about COVID-19**

#### **What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

#### **How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **137 confirmed cases** in northeast Colorado. 113 in Morgan County, 13 in Logan County, 2 in Yuma County, 4 in Phillips County, and 5 in Washington County. (Current 1600, 4/15/2020) Count does not include pending cases.

#### **How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

#### **Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease
  - HIV

- Immunocompromised

### Where can I get more information?

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public

health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

#### **How long does it take to start showing symptoms of COVID-19?**

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

#### **Can a person with COVID-19 spread the disease without having symptoms?**

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

#### **I think I have symptoms of COVID-19?**

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

#### **I think I may have been exposed to COVID-19, what should I do?**

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

### **Questions about Testing for COVID-19**

#### **How can I get tested for COVID-19?**

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- **CALL OR EMAIL** a health care provider first. If the provider recommends you get testing or care, follow the provider's advice **BEFORE** going into any health facility. Ask your provider about private lab sites where you can get tested.
- **DO NOT** go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- **DO** call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

#### **When will I get my results?**

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

### **Questions about Treatment of COVID-19**

#### **Is there a vaccine post-exposure?**

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19). The best way to prevent illness is to avoid being exposed to this virus.

#### **How is COVID-19 treated?**

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

#### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.
- At this time, it is unknown if you can get the disease more than once.

### **Questions about Prevention of COVID-19**

#### **What can I do to protect myself or my family from becoming ill?**

##### **Preventive actions**

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

##### **Practice social distancing**

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

##### **Stay informed**

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.colorado.gov/covid19)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

#### **Should I wear a face mask in the community to prevent COVID-19?**

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

#### **What cleaning products should I use to protect against COVID-19?**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](https://www.cdc.gov/media/releases/2020/s0519-covid-19-disinfectants.html). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

### **Travel Information**

CDC recommends that travelers avoid all nonessential international travel because of the COVID-19 pandemic. Some health care systems are overwhelmed and there may be limited access to adequate medical care in affected areas. Many countries are implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and in-country travel may be unpredictable. If you choose to

travel internationally, your travel plans may be disrupted, and you may have to remain outside the United States for an indefinite length of time.

CDC also recommends all travelers defer all cruise ship travel worldwide.

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

## PPE and Medical Supply Information

### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. Excellent guidance at <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>

**If you are NOT sick:** CDC recommends that everyone wear a cloth face covering over their nose and mouth when in the community setting, including during travel if they must travel. This is an additional public health measure people should take to reduce the spread of COVID-19 in addition to social distancing, frequent hand cleaning and other everyday preventive actions. A cloth face covering is not intended to protect the wearer, but may prevent the spread of virus from the wearer to others. This would be especially important in the event that someone is infected but does not have symptoms.

### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### Requesting PPE?

All requests for PPE need to go through our Logistics Section.  
Transfer caller to Logistics Section x1225

## School and Childcare Information

### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care

Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Schools should work with the local health department and other relevant leadership to communicate the possible COVID-19 exposure to the school community.** This communication to the school community should align with the communication plan in the school's emergency operations plan. In such a circumstance, it is critical to maintain confidentiality of the student or staff member as required by the Americans with Disabilities Act and the Family Education Rights and Privacy Act.
- **If a child or staff member has been identified with COVID-19, school and program administrators should seek guidance from local health officials to determine when students and staff should return to schools and what additional steps are needed for the school community.** In addition, students and staff who are well but are taking care of or share a home with someone with a case of COVID-19 should follow instructions from local health officials to determine when to return to school.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.
- Key Points:
  - Work from home is permitted and encouraged where possible.

- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
  - All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
  - Model and encourage everyday actions to limit the spread of illness.
  - More accurate information on these sites:
    - <https://covid19.colorado.gov/stay-home-except-essential-needs>
    - <https://covid19.colorado.gov/public-health-executive-orders-explained>
    - <https://covid19.colorado.gov/schools-workplaces-community>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing.

If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at:

<https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020.

The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:

COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

## Seeking Mental Health Support

## Concerns about Cargill

### **I think I was exposed to COVID-19 at work.**

Contact Cargill Medical with your questions.

### **How many confirmed cases of COVID-19 are at Cargill?**

To protect privacy our agency does not disclose the city or workplace for positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

### **I want to register a formal complaint about Cargill?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### NCHD Operational Changes

#### Do we still have the same operating hours?

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### How do I contact NCHD staff?

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call your local Public Health Nurse:
  - Yuma and Holyoke: Kandi Jamison x3023
  - Sterling: Brandee Martinez x1236
  - Fort Morgan: Christine Covelli x2236
  - Akron: Tricia Garrett x2254

#### Are we offering all our normal services?

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.

- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.

#### **WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

### **Questions about COVID-19**

#### **What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

#### **How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **175 confirmed cases** in northeast Colorado. 145 in Morgan County, 17 in Logan County, 2 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1600, 4/17/2020) Count does not include pending cases.

#### **How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

#### **Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease

- HIV
- Immunocompromised

### Where can I get more information?

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

### How long does it take to start showing symptoms of COVID-19?

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

### Can a person with COVID-19 spread the disease without having symptoms?

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

### I think I have symptoms of COVID-19?

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

### I think I may have been exposed to COVID-19, what should I do?

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

## Questions about Testing for COVID-19

### How can I get tested for COVID-19?

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

### When will I get my results?

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

## Questions about Treatment of COVID-19

### Is there a vaccine post-exposure?

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).

The best way to prevent illness is to avoid being exposed to this virus.

### How is COVID-19 treated?

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.
- At this time, it is unknown if you can get the disease more than once.

## **Questions about Prevention of COVID-19**

### **What can I do to protect myself or my family from becoming ill?**

#### **Preventive actions**

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

#### **Practice social distancing**

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

#### **Stay informed**

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.colorado.gov/covid19)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

### **Should I wear a face mask in the community to prevent COVID-19?**

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

### **What cleaning products should I use to protect against COVID-19?**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](#). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

## **Travel Information**

CDC recommends that travelers avoid all nonessential international travel because of the COVID-19 pandemic. Some health care systems are overwhelmed and there may be limited access to adequate medical care in affected areas. Many countries are implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and in-country travel may be unpredictable. If you choose to travel internationally, your travel plans may be disrupted, and you may have to remain outside the United States for an indefinite length of time.

CDC also recommends all travelers defer all cruise ship travel worldwide.

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

## PPE and Medical Supply Information

### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. Excellent guidance at <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>

**If you are NOT sick:** CDC recommends that everyone wear a cloth face covering over their nose and mouth when in the community setting, including during travel if they must travel. This is an additional public health measure people should take to reduce the spread of COVID-19 in addition to social distancing, frequent hand cleaning and other everyday preventive actions. A cloth face covering is not intended to protect the wearer, but may prevent the spread of virus from the wearer to others. This would be especially important in the event that someone is infected but does not have symptoms.

### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### Requesting PPE?

All requests for PPE need to go through our Logistics Section.  
Transfer caller to Logistics Section x1225

## School and Childcare Information

### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

- Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations.** If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.
- Key Points:
  - Work from home is permitted and encouraged where possible.
  - Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.

- All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
  - Model and encourage everyday actions to limit the spread of illness.
  - More accurate information on these sites:
    - <https://covid19.colorado.gov/stay-home-except-essential-needs>
    - <https://covid19.colorado.gov/public-health-executive-orders-explained>
    - <https://covid19.colorado.gov/schools-workplaces-community>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing.

If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at:

<https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020.

The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:

COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

### Seeking Mental Health Support

24/7 Crisis Hotline: National Suicide Prevention Lifeline Network:

[www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

#### Crisis Text Line

Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

Free Community Support Line: This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

#### Centennial Mental Health:

Logan County (970) 522-4392

Morgan County (970) 867-4924

Phillips County (970) 854-2114

Sedgwick County (970) 474-3769

Washington County (970) 345-2254

Yuma County - Wray (970) 332-3133

Yuma County - Yuma (970) 848-5412

#### Concerns about Cargill

##### **I think I was exposed to COVID-19 at work.**

Contact Cargill Medical with your questions.

##### **How many confirmed cases of COVID-19 are at Cargill?**

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

##### **I want to register a formal complaint about Cargill?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

#### Concerns about Leprino Foods

##### **I think I was exposed to COVID-19 at work.**

Contact Leprino with your questions.

##### **How many confirmed cases of COVID-19 are at Leprino?**

To protect privacy our agency does not disclose the city or workplace of positive cases.

##### **I want to register a formal complaint about Leprino?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### NCHD Operational Changes

#### Do we still have the same operating hours?

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### How do I contact NCHD staff?

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call your local Public Health Nurse:
  - Yuma and Holyoke: Kandi Jamison x3023
  - Sterling: Brandee Martinez x1236
  - Fort Morgan: Christine Covelli x2236
  - Akron: Tricia Garrett x2254

#### Are we offering all our normal services?

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.

- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.

#### **WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

### **Questions about COVID-19**

#### **What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

#### **How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **175 confirmed cases** in northeast Colorado. 145 in Morgan County, 17 in Logan County, 2 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1600, 4/17/2020) Count does not include pending cases.

#### **How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

#### **Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease

- HIV
- Immunocompromised

### Where can I get more information?

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

### How long does it take to start showing symptoms of COVID-19?

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

### Can a person with COVID-19 spread the disease without having symptoms?

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

### I think I have symptoms of COVID-19?

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

### I think I may have been exposed to COVID-19, what should I do?

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

## Questions about Testing for COVID-19

### How can I get tested for COVID-19?

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

### When will I get my results?

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

## Questions about Treatment of COVID-19

### Is there a vaccine post-exposure?

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).

The best way to prevent illness is to avoid being exposed to this virus.

### How is COVID-19 treated?

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.
- At this time, it is unknown if you can get the disease more than once.

## **Questions about Prevention of COVID-19**

### **What can I do to protect myself or my family from becoming ill?**

#### **Preventive actions**

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

#### **Practice social distancing**

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

#### **Stay informed**

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.covid19.colorado.gov)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

### **Should I wear a face mask in the community to prevent COVID-19?**

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

### **What cleaning products should I use to protect against COVID-19?**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](#). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

## **Travel Information**

CDC recommends that travelers avoid all nonessential international travel because of the COVID-19 pandemic. Some health care systems are overwhelmed and there may be limited access to adequate medical care in affected areas. Many countries are implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and in-country travel may be unpredictable. If you choose to travel internationally, your travel plans may be disrupted, and you may have to remain outside the United States for an indefinite length of time.

CDC also recommends all travelers defer all cruise ship travel worldwide.

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

## PPE and Medical Supply Information

### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. Excellent guidance at <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>

**If you are NOT sick:** CDC recommends that everyone wear a cloth face covering over their nose and mouth when in the community setting, including during travel if they must travel. This is an additional public health measure people should take to reduce the spread of COVID-19 in addition to social distancing, frequent hand cleaning and other everyday preventive actions. A cloth face covering is not intended to protect the wearer, but may prevent the spread of virus from the wearer to others. This would be especially important in the event that someone is infected but does not have symptoms.

### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### Requesting PPE?

All requests for PPE need to go through our Logistics Section.  
Transfer caller to Logistics Section x1225

## School and Childcare Information

### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

- Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations.** If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.
- Key Points:
  - Work from home is permitted and encouraged where possible.
  - Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.

- All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
  - Model and encourage everyday actions to limit the spread of illness.
  - More accurate information on these sites:
    - <https://covid19.colorado.gov/stay-home-except-essential-needs>
    - <https://covid19.colorado.gov/public-health-executive-orders-explained>
    - <https://covid19.colorado.gov/schools-workplaces-community>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing.

If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at:

<https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020.

The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:

COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

### Seeking Mental Health Support

24/7 Crisis Hotline: National Suicide Prevention Lifeline Network:

[www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

#### Crisis Text Line

Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

Free Community Support Line: This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

#### Centennial Mental Health:

Logan County (970) 522-4392

Morgan County (970) 867-4924

Phillips County (970) 854-2114

Sedgwick County (970) 474-3769

Washington County (970) 345-2254

Yuma County - Wray (970) 332-3133

Yuma County - Yuma (970) 848-5412

### Concerns about Cargill

#### **I think I was exposed to COVID-19 at work.**

Contact Cargill Medical with your questions.

#### **How many confirmed cases of COVID-19 are at Cargill?**

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

#### **I want to register a formal complaint about Cargill?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

#### **I think I was exposed to COVID-19 at work.**

Contact Leprino with your questions.

#### **How many confirmed cases of COVID-19 are at Leprino?**

To protect privacy our agency does not disclose the city or workplace of positive cases.

#### **I want to register a formal complaint about Leprino?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

michellep@nchd.org

April 6, 2020

FOR IMMEDIATE RELEASE

## Updated Public Health Order Expands

Sterling, Colo. – April 6, 2020: An updated Public Health Order (PHO) implementing stay at home requirements was issued on Thursday, April 1, 2020. NCHD is actively providing information to reduce confusion around this PHO. The intent of this PHO is to minimize the number of people exposed to this virus in our communities and workplaces, and preserve critical emergency and healthcare capacity across the State of Colorado. There is scientific evidence that the most effective way to slow the spread of communicable diseases, such as COVID-19, is to limit interactions among people and increase distance between people in the work environment.

All individuals currently living within the State of Colorado are ordered to stay at home whenever possible and may only leave their residence to perform necessary activities.

**Necessary activities** include tasks necessary to a person's or family's health and safety, obtaining necessary services or supplies, engaging in outdoor activities or to perform work for a critical business or critical government function. When engaging in necessary activities, people are strongly encouraged to stay local. People who are sick are required to stay at their residence at all times except as necessary to seek medical care, and must not go to work, even for critical business.

All travel, including, but not limited to, travel by automobile or public transit, except for **necessar tra e** is not allowed. People who have been identified as critical workers and need to travel for work purposes can use the “Fillable Critical Business Self-Certification” document provided as a business resource at <https://www.nchd.org/co>. This document is voluntary and not a requirement of the state public health order but can assist both public health and law enforcement to ensure compliance. NCHD strongly recommends all critical businesses download and complete the “Fillable Business Social Distancing Self-Certification” document as well and have this document available for review if asked by public health or law enforcement.

This order implements a fifty percent reduction in nonessential business, in-person work, and extreme social distancing. All businesses that are required to close down their in-person work under this Order may continue to carry out minimum basic operations defined as: a) maintain the value of the business’ inventory, ensure security, process payroll and employee benefits or related functions, and b) facilitate employees of business being able to continue to work remotely. Businesses that can continue to operate through work-at-home arrangements with their employees are encouraged to do so. To successfully contain the spread of this virus, all employers and individuals are required to practice social distancing requirements to the greatest extent possible.

There have been lots of questions and concerns about what is meant by “Critical Business”. Any business, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed below, may continue to operate. The list includes healthcare operations, critical infrastructure, critical manufacturing, critical retail, and critical services, news media, financial and professional institutions, providers of basic necessities to economically disadvantaged populations, construction, defense, critical services necessary to maintain the safety, sanitation and critical operations of residences or other critical businesses, vendors that provide critical

services or products, including logistics and technology support, child care, educational institutions that provide critical services to students and the general public. For a complete list of businesses within each category you can go to <https://covid19.colorado.gov/stay-home-except-essential-needs>. Critical businesses are required to comply with guidance and directives for maintaining a clean and safe work environment issued by CDPHE and NCHD.

Currently, the United States has more confirmed cases than any other country in the world, including China. People want to know what to do and how to take control. The best way to do that is to follow the statewide stay-at-home public health order. We now have 39 cases in the six county region served by NCHD.

These are tough choices for businesses to make in order to abide by the intent and spirit of the law. Many businesses are being conscientious and abiding by the order, demonstrating their commitment to their communities. If you have a concern, you may submit a form at <https://www.nchd.org/co>. The intent of NCHD is to provide additional education to businesses that might not understand the order.

Abril 8, 2020  
INFORMACIÓN INMEDIATA

## Recomendaciones para celebraciones familiares religiosas

Sterling, Colorado - 8 de abril de 2020: El lunes, el gobernador Polis extendió la orden de quedarse en casa hasta el 26 de abril. NCHD quiere recordar a todos que es importante seguir cumpliendo con la orden de quedarse en casa para reducir la velocidad de la propagación de COVID-19.

El próximo fin de semana, que es un momento de importantes tradiciones religiosas y familiares, puede plantear desafíos para muchas familias y comunidades. Para muchos de nosotros, nuestra fe y comunidad espiritual son fundamentales para nuestro bienestar. Muchas iglesias y otras organizaciones religiosas han tomado medidas en las últimas semanas para proporcionar servicios y apoyos en línea para sus congregaciones. NCHD recomienda que las personas, las familias y las organizaciones de todo el noreste de Colorado se mantengan firmes en el cumplimiento.

*"Ahora es el momento de tomar medidas para evitar enfermarse", dijo Trish McClain, directora de NCHD. "Entendemos que las personas pueden estar ansiosas y frustradas por los límites de la orden de quedarse en casa durante este fin de semana especial, pero estamos alentando a las personas a seguir cumpliendo. Depende de cada uno de nosotros proteger a nuestras poblaciones de mayor riesgo. no le da a este virus la oportunidad de propagarse".*

Mostrar cómo valoramos la santidad de la vida incluye actuar para reducir la propagación de este virus mortal al ser innovadores para cumplir con seguridad. Los residentes del noreste de Colorado son resistentes y creativos. NCHD alienta a las familias y comunidades a celebrar con medidas en línea o remotas. Cuantas más personas sigan el orden de permanencia en el hogar y las pautas de distanciamiento social, antes podremos volver a un estilo de vida más normal. Hagamos esto juntos.

April 8, 2020

FOR IMMEDIATE RELEASE

## **Reco en ations or Fa i an Re i ious Ce e rations**

Sterling, Colo. – April 8, 2020: On Monday, Governor Polis extended the Stay-At-Home order through April 26. Northeast Colorado Health Department (NCHD) wants to remind everyone that although we are embarking on Easter weekend and concluding Holy Week, it's extremely important to continue to comply with the Stay-At-Home Order to slow the spread of COVID-19.

This coming weekend, which is a time of significant religious and family traditions, may pose challenges to many families and communities. For many of us, our faith and spiritual community are critical to our well-being. In recent weeks, many churches and other religious organizations have taken steps to provide online services and support for their congregations. We encourage those practices to continue through the holiday and to resist the urge to get together even for family gatherings. Individuals, families and organizations across northeast Colorado should remain steady in complying.

*“Now is the time to take measures to avoid getting yourself and others sick,” said Trish McClain, Director of NCHD. “We understand that people may be anxious and frustrated by the limitations of the Stay-At-Home order during this special weekend, but*

*we are encouraging people to continue to comply—it is up to each of us to protect our highest risk populations by not giving this virus a chance to spread.”*

Showing how we value the sanctity of life includes acting to reduce the spread of this deadly virus by being innovative in safely meeting. Northeast Colorado residents are resilient and creative. NCHD encourages families and communities to celebrate using online or remote measures. The more people that follow the stay at home order and social distancing guidelines, the sooner we can all go back to a more normal way of life. Let's do this together.

JARED POLIS

#DoingMyPartCO

# CO CASES OF COVID-19 BY AGE GROUP, HOSPITALIZATION AND OUTCOME

#DoingMyPartCO

GOVERNOR JARED POLIS

**FACILITY-LEVEL OUTBREAKS**

**HOSPITAL DISCHARGE DATA**

# NEW DATA REPORTS: FACILITY-LEVEL OUTBREAKS

- **Health care settings**

- Including long-term care facilities, assisted living facilities, independent living facilities/senior communities that offer healthcare, inpatient rehab facilities, and long-term acute care hospitals.
- There are currently 231 nursing facilities, 706 assisted living facilities, and 21 intermediate care facilities in Colorado.

- **Correctional settings**

- Including state prisons, county and city jails, community corrections, detention settings, and work release facilities.

- **Other settings:**

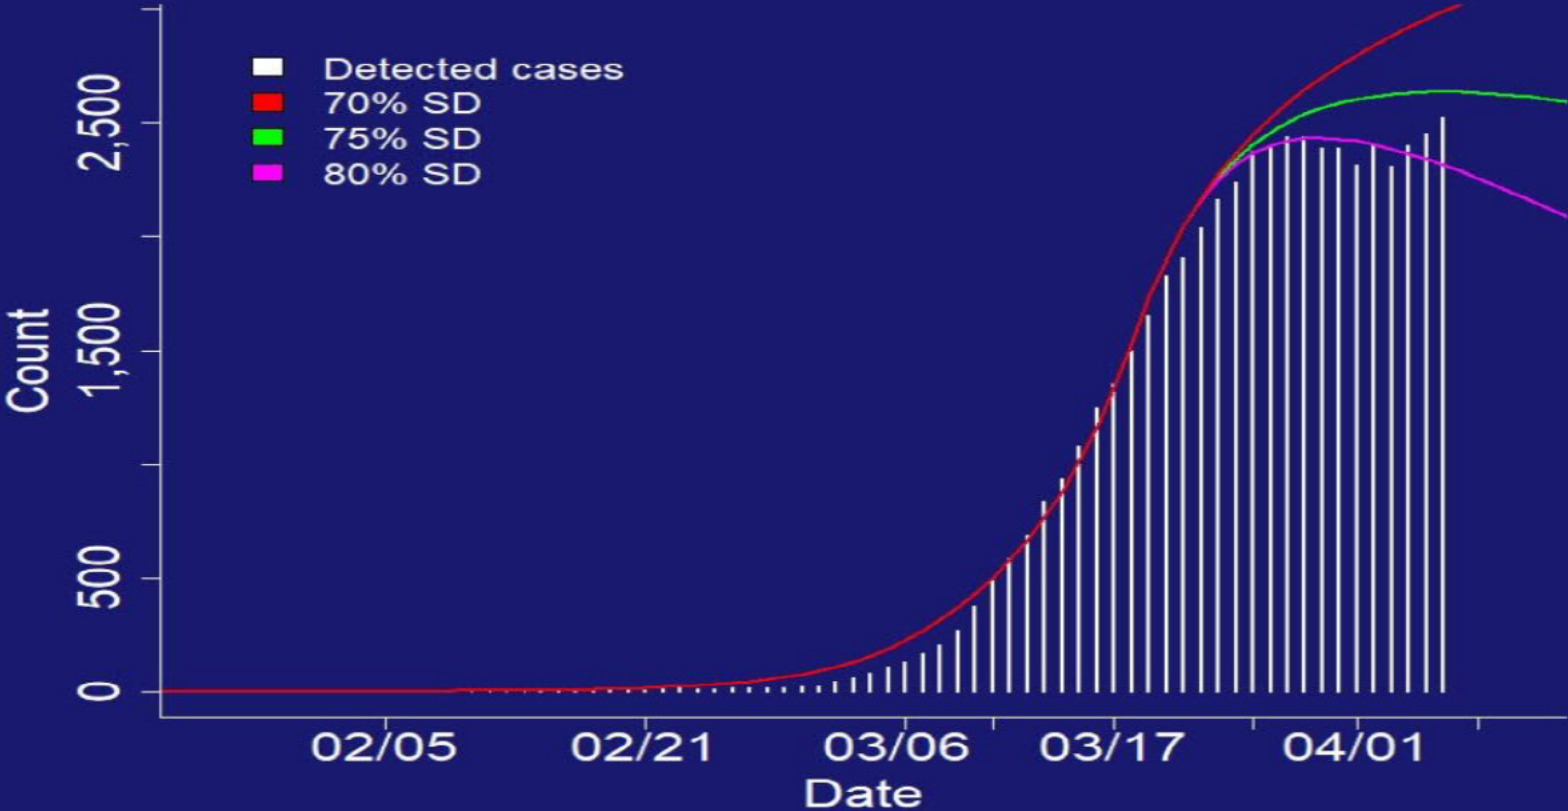

- This could include factories, workplaces with crowded work conditions, camps, schools, child care centers, and independent living facilities/senior communities that do not offer health care.

# NEW DATA REPORTS: DISCHARGED DATA

Date	Patients discharged on this date	Hospitalized patients as of date	Hospitalized patients with positive COVID test	Hospitalized with COVID symptoms but no test
April 8		1,270	840	430
April 9		1,286	856	430
April 10		1,234	837	397
April 11		1,172	844	328
April 12	167	1,182	827	355
April 13	150	1,193	844	349
April 14	204	1,215	886	329

# UPDATED MODEL WITH ESTIMATES OF ACHIEVED SOCIAL DISTANCING

#DoingMyPartCO

GOVERNOR JARED POLIS

1

## Urgent (We are here now)

- Suppress virus growth
- Understand true cases
- Expand testing and tracing capacity
- Expand healthcare capacity
- Determine cost-benefit of individual social distancing policies

2

## Stabilization

- Keep R around 1
- Increase testing, contact tracing, quarantining, isolating
- Ongoing public education on hygiene and social distancing
- Ban large gatherings
- Dynamic changes based on data
- Achieve maximum benefit at lowest cost

3

## Recovery

- Build population level immunity or treatment approach
- Lift all restrictions and get back to our Colorado way of life
- Monitor for outbreaks

## PRINCIPLES THAT GUIDE DECISION MAKING

Work to suppress virus

Increased ability to conduct testing and containment

Additional protections for those who are most at risk for COVID-19

Ability of health care system to handle increased demand

Social distancing policies that can be sustainable

Ongoing monitoring and evaluation of policies and their impact

# WORK TO SUPPRESS VIRUS

- Within the next 5 days we expect the data and the science to tell us what level of suppression the stay at home order has achieved
- Within the next 5 days we expect to have the data and science to guide us on what level of ongoing social distancing we need to strive to effectively manage future spread

# INCREASED ABILITY TO CONDUCT TESTING AND CONTAINMENT

- Expand testing capacity

Testing must be coupled with robust containment efforts statewide

- Robust containment includes:
  - Expanded contact tracing capacity
  - In process of increasing epidemiology staff
  - Expand isolation support services

# ONGOING MONITORING

AND EVALUATION OF POLICIES AND THEIR IMPACT

- Ongoing monitoring of the impact of implemented policies including the need to reinstate certain measures, such as stay-at-home orders, at the community level, regionally or statewide, if necessary, but these five principles will guide decision-making.

## ADDITIONAL PROTECTIONS FOR THOSE WHO ARE MOST AT RISK FOR COVID-19

- Determine, implement and evaluate additional steps to protect nursing homes and all congregate care facilities
- Determine, implement and evaluate additional steps to protect those with underlying chronic illnesses
- Action plan for responding to outbreaks as they occur

# ABILITY OF HEALTH CARE SYSTEM TO HANDLE INCREASED DEMAND

- Hospitals have internally increased bed capacity
- New beds through alternative care sites:
  - Ranch, Larimer County Fairgrounds and Events Complex
    - Construction Finish Date: April 29, 2020
  - Denver Convention Center
    - Construction Finish Date: April 27, 2020
  - St. Anthony North in Westminster
    - Construction finish date: May 8
  - St. Mary-Corwin Medical Center in Pueblo
    - Construction finish date: May 8
  - Western Slope Memory Care in Grand Junction.
    - Construction finish date: Target May 8

# SOCIAL DISTANCING POLICIES THAT CAN BE SUSTAINABLE

- Social distancing policies that are effective and allow for greater economic growth and sustainability

WE'RE ALL IN THIS  
TOGETHER

April 16, 2020

FOR IMMEDIATE RELEASE

## **Confirmed Deaths Associated with COVID-19 in Northeast Colorado**

Sterling, Colo – April 16, 2020: It is with heavy hearts that the Northeast Colorado Health Department (NCHD) announced that we have been notified of 3 confirmed deaths, one each in Logan, Morgan and Yuma Counties that are associated with COVID-19 and additional deaths may be attributed to COVID-19 pending further review. The case investigations are ongoing. We are working with local County Coroners and funeral directors, as well as the Colorado Department of Public Health and Environment (CDPHE) to investigate details and more information will be forthcoming when it is available.

*“We want to express our sadness and condolences to the families and loved ones of these individuals,” said Trish McClain, Director of NCHD. “These are difficult times for everyone and is especially challenging for families who have lost loved ones. “*

Tracking death data for COVID-19 differs from tracking positive cases in several ways. Because of multiple factors involved, NCHD’s data for deaths associated with COVID-19 may be delayed and may not always match the information available on the

CDPHE website, however NCHD will diligently work to bring you the most up to date information available.

NCHD and partnering agencies have been doing everything possible to protect the health of the residents of our communities. The unfortunate loss of these loved ones reaffirms that everyone must continue being diligent with social distancing and being out in the community only when it is necessary in order to make sure we are all doing everything possible to protect those who are most vulnerable among us.

As of April 16, 2020 the total of positive COVID-19 test results in northeast Colorado is 162 (Yuma County (2), Morgan County (133), Logan County (17), Washington County (5), Phillips County (5) and we know there are several test results pending so these numbers will likely continue to increase.

NCHD continues to emphasize the importance of abiding the public health order to stay at home. It is important that we all take steps to protect our families, ourselves, our friends and our communities. We want to remind people that if you believe you have been exposed, self-quarantine for 14 days. If you develop any of the cold or flu-like symptoms, self-isolate and call your primary care provider. Your healthcare provider is able to provide the most direct guidance relative to your health conditions.

Information about COVID-19 continues to change as we learn more about this virus. Reliable and up-to-date information is available at <https://covid19.colorado.gov/> or by calling CO Help at 1-303-389-1687 or 1-877-462-2911 or email them at [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org).

Abril 20, 2020

INFORMACIÓN INMEDIATA

## Reporte e Departamento de Salud e Noreste e Colorado en

### Respuesta e Car i a COVID 19

-Sterling, Colorado - 20 de abril de 2020: a medida que continúa la pandemia de COVID-19, el enfoque nacional se ha centrado en la preocupación por la fortaleza de la cadena de suministro de alimentos. Teniendo múltiples negocios críticos que están asociados con el procesamiento de alimentos en nuestro distrito de salud de seis condados (Logan, Morgan, Phillips, Sedgwick, Washington y Yuma), el Departamento de Salud del Noreste de Colorado (NCHD) continúa trabajando en estrecha colaboración con cada negocio para proporcionar apoyo técnico y orientación para mejorar la protección del personal contra las infecciones para que puedan permanecer abiertos de manera segura.

Una de esas instalaciones que está a la vanguardia de la atención estatal y nacional es la instalación de procesamiento de carne Cargill ubicada en Fort Morgan. Después de una invitación para recorrer la planta, la Directora de Salud Pública, Trish McClain, dirigió en un informe al Departamento de Salud Pública del Estado, los procesos y

procedimientos sin precedentes que la administración de las instalaciones ha implementado para mantener seguros los productos alimenticios y los empleados.

*"Más de 2,000 personas cuentan con esta planta para sus cheques de pago, pero nadie discute el hecho de que sus vidas son aún más importantes", expresa el Directora McClain. "Creo que Cargill ha hecho de la salud de los empleados una prioridad, y sus prácticas son un ejemplo para otras empresas de la industria alimentaria".*

El informe del departamento de salud identifica que Cargill está aplicando de manera proactiva la orientación de los Centros para el Control y la Prevención de Enfermedades para cubrirse la cara a los empleados, medidas de limpieza adicionales, uso de equipos de protección personal y prácticas de distanciamiento social. En muchas áreas, han ido más allá de la orientación general e implementado enfoques innovadores para la seguridad de los empleados.

*"Estamos tomando decisiones guiadas por nuestros valores", dijo Tyler Luft, gerente general de la instalación de proteínas Fort Morgan de Cargill. "El equipo está trabajando para mantener a los empleados seguros, alimentar a la nación y mantener la economía agrícola en movimiento".*

Esta sinceridad se extiende a la transparencia de la gerencia con NCHD en los esfuerzos para evaluar activamente al personal, sus modificaciones significativas al flujo de empleados y la conversión de la línea de producción, así como la aplicación de las directivas de aislamiento y cuarentena al desactivar las insignias del personal muestra cuán proactivos y cuán trascendentales son sus esfuerzos para proteger al personal.

Los casos de COVID-19 han seguido aumentando en nuestro distrito de salud de seis condados, incluido Fort Morgan, enfatizando la necesidad de distanciamiento social y quedarse en casa a menos que se realicen las actividades necesarias. Hasta ahora, NCHD en cooperación con Cargill ha sido notificado de 23 resultados positivos para los empleados, lo que lleva a 1 muerte. La compañía continúa aplicando una cuarentena obligatoria de 14 días para cualquier miembro del equipo que resulte positivo para COVID-19, así como para cualquier empleado con el que hayan estado en contacto cercano.

*"Cargill continúa trabajando en estrecha colaboración con el NCHD para garantizar que sigamos los protocolos de seguridad apropiados". dijo Luft. "Somos parte de esta comunidad y queremos trabajar juntos para mantenernos seguros, la gente en el trabajo y el país alimentados".*

April 20, 2020

FOR IMMEDIATE RELEASE

## **Northeast Colorado Health Department Reports on Carroll COVID 19 Response**

Sterling, Colo. – April 20, 2020: As the COVID-19 pandemic continues, the national focus has turned to concern about the strength of the food supply chain. Having multiple critical businesses that are associated with food processing in our six county (Logan, Morgan, Phillips, Sedgwick, Washington and Yuma) health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with each business to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the forefront of state and national attention is the Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, Public Health Director, Trish McClain addressed in a report to the State Public Health Department, unprecedented processes and procedures that facility management have put in place to keep food product and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important,” expresses Director

McClain “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The health department report identifies that Cargill is proactively applying Centers for Disease Control and Prevention guidance for employee face covering, added cleaning measures, personal protective equipment usage and social distancing practices. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“We are making decisions guided by our values,” said Tyler Luft, general manager for Cargill’s Fort Morgan protein facility. “The team is working to keep employees safe, feed the nation and keep the agricultural economy moving.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our six county health district, including Fort Morgan, emphasizing the need for social distancing and to stay home unless performing necessary activities. So far, NCHD in cooperation with Cargill has been notified of 23 positive results for employees, leading to 1 death. The company continues to enforce a mandatory 14-day quarantine for any team member who tests positive for COVID-19 as well as any employees who they have come into close contact with.

“Cargill continues to work in close partnership with the NCHD to ensure we are following the appropriate safety protocols.” said Luft. “We are part of this

community and want to work together to keep each other safe, people at work and the country fed.”

Subject: Re: Eben Exer Press Release on our website

I have removed it from our web page.

Mary

On Mon, Apr 13, 2020 at 10:06 AM NCHD PIO <pio@nchd.org> wrote:

Mike does think a press release from NCHD should be written but maybe instead of focusing on Eben Ezer, they just be used as an example of how easy this virus can spread even when a facility is doing everything they are supposed to do. I will start drafting something and include something about NCHD supporting this facility through their ordeal. I will send something for both of you to read.

I also hear that there have been questions coming to our staff because of the way their press release was worded in talking about neighborhoods. I knew what they meant and it never occurred to me that the community of Brush might take it to mean it was spreading in their community neighborhoods which wasn't what Eben Ezer meant. I will figure out how to add that in as well.

In the meantime, Trish, I think we should take their press release off of our website. I agree with Mary that it shouldn't be on our website. It should be on theirs.

Thanks

Hi,

I was thinking about how we added their press release to our News Release website page and although I agree with wanting to support the facility, I am not sure if that is the place to put it since it came from them. It's their press release and I feel like that page is for our news releases. What are your thoughts?

My suggestion would be to write a quick press release on how NCHD is supporting Eben Exer through this ordeal and then link to their press release that way. What do you think?

Mary

Subject: Press Release from Eben Ezer Lutheran Care Center  
This is a press release prepared by Eben Ezer Lutheran Care Center.

NEWS RELEASE

FOR IMMEDIATE RELEASE

CONTACT: Shelly Griffith, CEO  
PHONE: 970-842-2861, extension 9212

Cases of COVID-19, the illness resulting from the novel coronavirus, have been diagnosed at our Eben Ezer community. The affected neighbors are in quarantine in our cluster neighborhood. In order to protect the privacy of our neighbors, identifying information and medical records will not be released to the public. We have notified public health officials as required and are following procedures recommended by the Centers for Disease Control & Prevention. We are taking every step as recommended by authorities to contain the spread. We want to make neighbors, their families, and our dedicated staff aware of this situation and reassure everyone that we are on top of it. Developments are changing day by day, minute by minute. Our focus remains on the health and well-being of our community. We must also recognize our team for the concern and commitment they have shown to our neighbors during this challenging time. Our mission has never been more meaningful.

Eben Ezer, the Colorado Department of Public Health & Environment (CDPHE), Northeast Colorado Health Department and partnering agencies are working diligently to ensure ill patients are receiving appropriate care and measures are being taken to limit further spread of disease. Proactive efforts are focused on identifying, isolating and testing all of those who may be at risk.

“Eben Ezer has notified our neighbors, families and team members of the current situation. We began restricting visitors to the campus on March 11<sup>th</sup> with full restriction put into effect March 13<sup>th</sup> to protect the health of the residents and health care workers at our community. We have tested 7 of our neighbors for COVID-19 of which 6 came back positive. Prior to this incident and ongoing, we have been following all CMS, CDC and state and local health department guidelines concerning COVID-19. Our team members have been and will continue to be screened when they arrive to work, including checking temperature, to ensure no additional sickness is brought into our buildings. If they have a fever over 100.4 they are sent home and asked to contact their primary care physician. Our team members are being diligent on practicing proper hand washing and the use of personal protective equipment. All staff have received recurring education on these practices,” says Shelly Griffith, Eben Ezer CEO.

Eben Ezer is not the first long term care community in the state to have a confirmed case. We need your help in battling this virus, we ask our larger community to continue to adhere to the Stay at Home order. Thank you all for your support and assistance as we work to combat the spread of this virus.

Eben Ezer will continue to monitor and adhere to the recommendations set forth by the Centers for Disease Control (CDC). We are proud of our positive reputation in the community we serve and provide our senior adults the quality care and services they deserve and expect from us. We will continue to provide updates regularly to our Eben Ezer community. For more information, please contact Shelly Griffith at 970-842-2861, ext 9212.

###

NEWS RELEASE

INFORMACIÓN INMEDIATA

CONTACT: Shelly Griffith, CEO  
PHONE: 970-842-2861, extension 9212

Los casos de COVID-19, la enfermedad resultante del nuevo coronavirus, han sido diagnosticados en nuestra comunidad Eben Ezer. Los vecinos afectados están en cuarentena en nuestro vecindario en racimo. Para proteger la privacidad de nuestros vecinos, la información de identificación y los registros médicos no se divulgarán al público. Hemos notificado a los funcionarios de salud pública según sea necesario y estamos siguiendo los procedimientos recomendados por los Centros para el Control y la Prevención de Enfermedades. Estamos tomando todas las medidas recomendadas por las autoridades para contener la propagación. Queremos que los vecinos, sus familias y nuestro dedicado personal estén al tanto de esta situación y asegurar a todos que estamos al tanto. Los desarrollos están cambiando día a día, minuto a minuto. Nuestro enfoque permanece en la salud y el bienestar de nuestra comunidad. También debemos reconocer a nuestro equipo por la preocupación y el compromiso que han demostrado con nuestros vecinos durante este momento difícil. Nuestra misión nunca ha sido más significativa.

Eben Ezer, el Departamento de Salud Pública y Medio Ambiente de Colorado (CDPHE), el Departamento de Salud del Noreste de Colorado y las agencias asociadas están trabajando diligentemente para garantizar que los pacientes enfermos reciban la atención adecuada y se tomen medidas para limitar la propagación de la enfermedad. Los esfuerzos proactivos se centran en identificar, aislar y probar a todos aquellos que puedan estar en riesgo.

"Eben Ezer ha notificado a nuestros vecinos, familias y miembros del equipo sobre la situación actual. Comenzamos a restringir a los visitantes al campus el 11 de marzo con una restricción total puesta en vigencia el 13 de marzo para proteger la salud de los residentes y los trabajadores de atención médica en nuestra comunidad. Hemos probado 7 de nuestros vecinos para COVID-19 de los cuales 6 dieron positivo. Antes de este incidente y en curso, hemos seguido todas las pautas de los CMS, los CDC y los departamentos de salud estatales y locales con respecto a COVID-19. Los miembros de nuestro equipo han sido y seguirán siendo examinados cuando lleguen al trabajo, incluida la verificación de la temperatura, para garantizar que no ingresen enfermedades adicionales en nuestros edificios. Si tienen fiebre de más de 100.4, son enviados a casa y se les pide que se comuniquen con su médico de atención primaria. Los miembros de nuestro equipo están siendo diligentes en la práctica del lavado de manos adecuado y el uso de equipos de protección personal. Todo el personal ha recibido educación recurrente sobre estas prácticas ", dice Shelly Griffith, CEO de Eben Ezer.

Eben Ezer no es la primera comunidad de cuidados a largo plazo en el estado en tener un caso confirmado. Necesitamos su ayuda para combatir este virus, le pedimos a nuestra comunidad más grande que continúe cumpliendo con el pedido de Stay at Home. Gracias a todos por su apoyo y asistencia mientras trabajamos para combatir la propagación de este virus.

Eben Ezer continuará monitoreando y cumpliendo con las recomendaciones establecidas por los Centros para el Control de Enfermedades (CDC). Estamos orgullosos de nuestra reputación positiva en la comunidad a la que servimos y brindamos a nuestros adultos mayores la atención y los servicios de calidad que se merecen y esperan de nosotros. Continuaremos proporcionando actualizaciones regularmente a nuestra comunidad Eben Ezer. Para obtener más información, comuníquese con Shelly Griffith al 970-842-2861, ext 9212.

## Instructions for Administrative Staff and Information Triage Team

**UPDATED VERSION 04.13.2020 8:00 AM**

**Purpose:** Connect public inquiries to accurate extensions and staff during IMT response.

---

### Information Triage Team

To log in to the system to help triage calls, simply press the COVID English (or COVID Spanish) button located at the top of your phone. To log back out of the system, simply press the button again. Please do not forget to log out when you are away from your desk, or when you go home for the day.

### Script for Administrative Staff and Information Triage Team:

---

*Thank you for calling your local health department. How may I help you?*

*[Listen to response] [Use triage table to transfer call]*

*Our staff is committed to providing the best service during this time.*

*I am transferring your call to [name or department]. Staff are trying to stay close to their phones and checking their voicemail every day.*

*Please refer to our website for up to date information, [nchd.org](http://nchd.org).*

### Frequently Asked Questions and Appropriate Staff

<b>Family Planning Scheduling</b> (e.g. Schedule a Depo shot, need a pregnancy test, etc.)	<b>Public Nursing Staff</b> <b>Yuma and Holyoke Clients:</b> Transfer to Kandi Jamison x3023  <b>Fort Morgan Clients:</b> Transfer to the Family Planning Clinic x2231  <b>Sterling and Julesburg Clients:</b> Transfer to Brandee Martinez x2232
<b>WIC Scheduling or General WIC Questions</b>	<b>WIC Staff</b> <b>Sterling Clients:</b> Eva Flores x1251  <b>Holyoke and Julesburg Clients</b> Jodi Murray x5022 A majority of Jodi's clients are familiar with contacting her in Holyoke and Julesburg.  <b>Fort Morgan and Akron Clients</b> Taylor Guzman x2252  <b>Yuma Clients:</b> Janet Vazquez x3025

<b>Medical Providers</b>	<b>Investigation Group Supervisor</b> Tammy Hort x1241
<b>Media Inquiries</b>	<b>PIO</b> Michelle Pemberton, Mary Brumage x1291
<b>General Health and Transmission Questions</b> Is it safe to travel right now? How contagious is COVID-19? What can I do to protect my family?	<b>Nursing Staff</b>  <b>Trish McClain</b> X2248  <b>Morning Only:</b> <b>Christine Covelli</b> x2231
<b>COVID-19 Testing</b> I think I have symptoms of COVID-19. What should I do? Where can I go to be tested? Are they offering any testing in my town?	<b>Nursing Staff</b>  <b>Trish McClain</b> x2248  <b>Morning Only:</b> <b>Christine Covelli</b> x2231
<b>Complaints about Businesses Violating Public Health Orders</b>	<b>Mickey George</b> x2226
<b>Restaurants, Hotels, Childcare, Retail Stores Other Than Grocery</b> Do I need to cancel my event? Do I need to close my store? Do I need to close my restaurant? Do I need to close my childcare center?	<b>Environmental Health Group Supervisor:</b>  Mel Bustos x2262 (He will triage as necessary to other EH staff)
<b>Community Resources</b> I need help with childcare or nutrition during school closures. I need guidance for closing my school.	<b>Planning Section:</b>  Sherri Yahn x1200

# TUESDAY, APRIL 14 UPDATES

Our daily **FAQ and Script** help answer public calls with accuracy.

**Updates to FAQ:**  
Questions about COVID-19  
Travel Information  
PPE and Medical Supply

**New Sections:**  
Clarification about Eben Ezer Press Release  
Seeking Mental Health Support

**Problem Solving In Real Time**

Employees at the Northeast Colorado Health Department are brilliant and creative. During a month of COVID-19 response we have implemented Incident Command and continued core public health services.

This is a large undertaking in a short amount of time. We are seeking to learn about challenges you are experiencing regarding communication, protocol, or any other part of operations.

We are anxious to learn from all of our everyday leaders. Use this form to share your ideas on how to solve the problems you are encountering.

Everything on this form is anonymous.

Ideas about how to improve new processes at NCHD during COVID-19 Repsonse? We want to hear them.

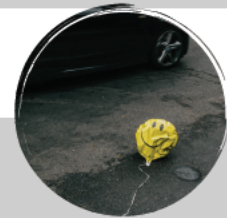

Click through to this **form**.

All Mask Requests  
email [logistics@nchd.org](mailto:logistics@nchd.org)

## WISDOM FROM OUR DIRECTOR

“ Find things that fill you up and hopefully don't eat any toads. ”

## BURNING OUT?

Talk to your supervisor about PTO, staff rotations, and teleworking options.

## SOCIAL DISTANCING

E.T. is about 3 feet tall.

Envision **two wrinkly aliens** between you and your coworkers to help you maintain the recommended 6 feet.

LOVE FROM A DISTANCE  
THE COOP GROUP

Problems are nothing but wake up calls for creativity. Gerhard Gschwandtner

## Instructions for Administrative Staff and Information Triage Team

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

## Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

## Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

## When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 214 confirmed cases in northeast Colorado. 177 in Morgan County, 23 in Logan County, 3 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1530, 4/20/2020) Count does not*

include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

### What resources are available for mental health services?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

### 24/7 Crisis Hotlines:

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## Complaints about Businesses Violating Public Health Orders

### How do I file a complaint about a business violating Public Health Orders?

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## Childcare

**What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?** *Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.*

**What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

*Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.*

**When should we exclude children or staff?**

*Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.*

*Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.*

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

### Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against

SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

## Stay at Home Order

**The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.**

Key Points:

- *Work from home is permitted and encouraged where possible.*
- *Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.*
- *Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.*
- *All gatherings of individuals of any size for any reason other than critical business or government functions are banned.*
- *All non-critical businesses statewide are closed to the public.*
- *All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.*
- *Bars and restaurants are closed, but takeout and delivery options are permitted.*
- *Theaters, sports venues, casinos, and other gathering places are closed.*
- *Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.*
- *Houses of worship may remain open, but must practice social distancing or use electronic platforms.*
- *Urge employees to stay home when they are sick, and be flexible with sick leave benefits.*
- *Model and encourage everyday actions to limit the spread of illness.*
- *More details on the Stay-at-Home Order on these trust-worthy sites:*
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>
  - <https://covid19.colorado.gov/schools-workplaces-community>

## Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the

positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

## Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

## Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

## When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 214 confirmed cases in northeast Colorado. 177 in Morgan County, 23 in Logan County, 3 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1530, 4/20/2020) Count does not*

include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

### What resources are available for mental health services?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

## Complaints about Businesses Violating Public Health Orders

### How do I file a complaint about a business violating Public Health Orders?

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## Childcare

**What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?** *Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.*

**What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

*Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.*

**When should we exclude children or staff?**

*Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.*

*Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.*

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

## Workplaces & Businesses

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

### Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work.

See CDC's recommendations for household cleaning and disinfection. See EPA's list of Products and Services to Protect Against COVID-19 here:

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

## Stay at Home Order

**The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.**

Key Points:

- *Work from home is permitted and encouraged where possible.*
- *Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.*
- *Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.*
- *All gatherings of individuals of any size for any reason other than critical business or government functions are banned.*
- *All non-critical businesses statewide are closed to the public.*
- *All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.*
- *Bars and restaurants are closed, but takeout and delivery options are permitted.*
- *Theaters, sports venues, casinos, and other gathering places are closed.*
- *Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.*
- *Houses of worship may remain open, but must practice social distancing or use electronic platforms.*
- *Urge employees to stay home when they are sick, and be flexible with sick leave benefits.*
- *Model and encourage everyday actions to limit the spread of illness.*
- *More details on the Stay-at-Home Order on these trust-worthy sites:*
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>

## Eben Ezer Press Release

*Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.*

*If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234*

*You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)*

## **Cargill and Leprino Foods**

### **Concerns about Cargill**

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

### **Concerns about Leprino Foods**

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

## Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

## Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

## When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 214 confirmed cases in northeast Colorado. 177 in Morgan County, 23 in Logan County, 3 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1530, 4/20/2020) Count does not*

include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

### What resources are available for mental health services?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

### 24/7 Crisis Hotlines:

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## Complaints about Businesses Violating Public Health Orders

### How do I file a complaint about a business violating Public Health Orders?

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## Childcare

**What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?** *Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.*

**What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

*Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.*

**When should we exclude children or staff?**

*Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.*

*Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.*

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

## Instructions for Administrative Staff and Information Triage Team

**UPDATED VERSION 04.20.2020 8:00 AM**

**Purpose:** Connect public inquiries to accurate extensions and staff during IMT response.

---

### Information Triage Team

To log in to the system to help triage calls, simply press the COVID English (or COVID Spanish) button located at the top of your phone. To log back out of the system, simply press the button again. Please do not forget to log out when you are away from your desk, or when you go home for the day.

### Script for Administrative Staff and Information Triage Team:

---

*Thank you for calling your local health department. How may I help you?*

*[Listen to response] [Use triage table to transfer call]*

*Our staff is committed to providing the best service during this time.*

*I am transferring your call to [name or department]. Staff are trying to stay close to their phones and checking their voicemail every day.*

*Please refer to our website for up to date information, [nchd.org](http://nchd.org).*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 233 confirmed cases in northeast Colorado. 195 in Morgan County, 24 in Logan County, 3 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1530, 4/20/2020) Count does not include pending cases.*

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

**Where can I go if I need help with rent, food resources, healthcare, or other financial help?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**What resources are available for mental health services?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

**24/7 Crisis Hotlines:**

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## Complaints about Businesses Violating Public Health Orders

**How do I file a complaint about a business violating Public Health Orders?**

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone, NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms

while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses

Nothing is changing at this time, as the Stay at Home Order is in effect until April 26th. The Governor's office has been talking about reopening Colorado and how it can be done safely. This will be determined by several factors like expanded testing as well as stabilizing/declining positive COVID-19 cases. The plans for each county may look different depending on these factors. Our department will maintain communication with businesses as policies change at the state and local levels. Our website [nchd.org](http://nchd.org) is the best website for up to date information about changes to the Stay-at-Home order.

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fx8Pw7XlyUe8/view>

## Stay at Home Order

**The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.**

Key Points:

- Work from home is permitted and encouraged where possible.
- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
- Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
- All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
- All non-critical businesses statewide are closed to the public.
- All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
- Bars and restaurants are closed, but takeout and delivery options are permitted.
- Theaters, sports venues, casinos, and other gathering places are closed.
- Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
- Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
- Model and encourage everyday actions to limit the spread of illness.
- More details on the Stay-at-Home Order on these trust-worthy sites:
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>

- <https://covid19.colorado.gov/schools-workplaces-community>

## Eben Ezer Press Release

*Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.*

*If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234*

*You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)*

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

### Concerns about Leprino Foods

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## **PPE Requests**

### **Where can we request more PPE and supplies for our local healthcare facility?**

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## **COVID-19 in the Northeast Region**

### **How common is COVID-19 in the US? Colorado? My County?**

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 233 confirmed cases in northeast Colorado. 195 in Morgan County, 24 in Logan County, 3 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1530, 4/20/2020) Count does not include pending cases.*

### **How can I help in my community?**

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

## Complaints about Businesses Violating Public Health Orders

**How do I file a complaint about a business violating Public Health Orders?**

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms

while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses

Nothing is changing at this time, as the Stay at Home Order is in effect until April 26th. The Governor's office has been talking about reopening Colorado and how it can be done safely. This will be determined by several factors like expanded testing as well as stabilizing/declining positive COVID-19 cases. The plans for each county may look different depending on these factors. Our department will maintain communication with businesses as policies change at the state and local levels. Our website [nchd.org](http://nchd.org) is the best website for up to date information about changes to the Stay-at-Home order.

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fx8Pw7XlyUe8/view>

## Stay at Home Order

**The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.**

Key Points:

- Work from home is permitted and encouraged where possible.
- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
- Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
- All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
- All non-critical businesses statewide are closed to the public.
- All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
- Bars and restaurants are closed, but takeout and delivery options are permitted.
- Theaters, sports venues, casinos, and other gathering places are closed.
- Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
- Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
- Model and encourage everyday actions to limit the spread of illness.
- More details on the Stay-at-Home Order on these trust-worthy sites:
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>

- <https://covid19.colorado.gov/schools-workplaces-community>

## Eben Ezer Press Release

*Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.*

*If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234*

*You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)*

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

### Concerns about Leprino Foods

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 251 confirmed cases in northeast Colorado. 211 in Morgan County, 24 in Logan County, 5 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1600, 4/22/2020) Count does not include pending cases.*

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Complaints about Businesses Violating Public Health Orders

**How do I file a complaint about a business violating Public Health Orders?**

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms

while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses

Nothing is changing at this time, as the **Closure of Certain Businesses is in effect through April 30th**. The **Stay at Home Order is in effect through April 26th**. The Governor's office has been talking about reopening Colorado and how it can be done safely. This will be determined by several factors like expanded testing as well as stabilizing/declining positive COVID-19 cases. The plans for each county may look different depending on these factors. Our department will maintain communication with businesses as policies change at the state and local levels. Our website [nchd.org](http://nchd.org) is the best website for up to date information about changes to the Stay-at-Home order.

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fx8Pw7XlyUe8/view>

## Stay at Home Order

**The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.**

Key Points:

- Work from home is permitted and encouraged where possible.
- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
- Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
- All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
- All non-critical businesses statewide are closed to the public.
- All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
- Bars and restaurants are closed, but takeout and delivery options are permitted.
- Theaters, sports venues, casinos, and other gathering places are closed.
- Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
- Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
- Model and encourage everyday actions to limit the spread of illness.
- More details on the Stay-at-Home Order on these trust-worthy sites:
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>

- <https://covid19.colorado.gov/schools-workplaces-community>

## Eben Ezer Press Release

*Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.*

*If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234*

*You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)*

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

### Concerns about Leprino Foods

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020 and June 16th, 2020.
  - Sedgwick County: May 7th, 2020 and June 25th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 273 confirmed cases in northeast Colorado. 231 in Morgan County, 25 in Logan County, 6 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1600, 4/23/2020) Count does not include pending cases.*

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Complaints about Businesses Violating Public Health Orders

**How do I file a complaint about a business violating Public Health Orders?**

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone, NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms

while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses

Nothing is changing at this time, as the **Closure of Certain Businesses is in effect through April 30th**. The **Stay at Home Order is in effect through April 26th**. The Governor's office has been talking about reopening Colorado and how it can be done safely. This will be determined by several factors like expanded testing as well as stabilizing/declining positive COVID-19 cases. The plans for each county may look different depending on these factors. Our department will maintain communication with businesses as policies change at the state and local levels. Our website [nchd.org](http://nchd.org) is the best website for up to date information about changes to the Stay-at-Home order.

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fx8Pw7XlyUe8/view>

## Stay at Home Order

**The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.**

Key Points:

- Work from home is permitted and encouraged where possible.
- Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
- Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
- All gatherings of individuals of any size for any reason other than critical business or government functions are banned.
- All non-critical businesses statewide are closed to the public.
- All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
- Bars and restaurants are closed, but takeout and delivery options are permitted.
- Theaters, sports venues, casinos, and other gathering places are closed.
- Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
- Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
- Model and encourage everyday actions to limit the spread of illness.
- More details on the Stay-at-Home Order on these trust-worthy sites:
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>

- <https://covid19.colorado.gov/schools-workplaces-community>

## Eben Ezer Press Release

*Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.*

*If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234*

*You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)*

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

### Concerns about Leprino Foods

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020 and June 16th, 2020.
  - Sedgwick County: May 7th, 2020 and June 25th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*
- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### When will I get my test results?

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

***Healthcare workers:*** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

***Critical Businesses:*** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

*CDPHE's Website has the most up to date information for this rapidly changing situation.*

*We currently have 273 confirmed cases in northeast Colorado. 231 in Morgan County, 25 in Logan County, 6 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1600, 4/23/2020) Count does not include pending cases.*

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

## Complaints about Businesses Violating Public Health Orders

**How do I file a complaint about a business violating Public Health Orders?**

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms

while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

## **Workplaces & Businesses**

### **Reopening of Businesses**

Numerous questions are emerging as the state enters the Safer-at-Home phase.

Many non-critical businesses are overseen by the Department of Regulatory Agencies (DORA). While we recognize that there is pent-up demand to return to work in all aspects of the economy, including those deemed "non-critical" under the Governor's Stay-at-Home Order, DORA has stressed that if you are not currently operating as a critical service business, you should not open your doors on April 27th. Governor Polis is expected to officially announce in the coming days the parameters for personal services businesses to re-open with strict precautions beginning on Friday, May 1st.

Please note that the Governor's lifting of statewide restrictions does not relieve businesses from complying with local public health orders. There is potential for each of the counties within our jurisdiction to either be stricter than what is being released by the Governor, or to apply for a waiver to the Governor for reopening local businesses. If you work in a community where county-specific orders extend restrictions on work or travel, you will need to await the lifting of those local orders before you resume operations. In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health; and
- Finding a way to best document customer interaction for contact tracing (if needed)

*Non-critical businesses should watch the Sunday press conference, and then wait for further information from your local public health agency.*

*Our website, [www.nchd.org/co](http://www.nchd.org/co) will have the most up to date information regarding county-specific Safer-at-Home instructions.*

## **Masks**

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

*Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:*

*<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>*

## **Cleaning Guidance for COVID-19**

*Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>*

*See CDC's recommendations for household cleaning and disinfection here:*

*<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>*

*CDPHE also has cleaning guidance located at:*

*<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>*

## **Stay at Home Order**

***The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.***

*Key Points:*

- *Work from home is permitted and encouraged where possible.*

- *Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.*
- *Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.*
- *All gatherings of individuals of any size for any reason other than critical business or government functions are banned.*
- *All non-critical businesses statewide are closed to the public.*
- *All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.*
- *Bars and restaurants are closed, but takeout and delivery options are permitted.*
- *Theaters, sports venues, casinos, and other gathering places are closed.*
- *Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.*
- *Houses of worship may remain open, but must practice social distancing or use electronic platforms.*
- *Urge employees to stay home when they are sick, and be flexible with sick leave benefits.*
- *Model and encourage everyday actions to limit the spread of illness.*
- *More details on the Stay-at-Home Order on these trust-worthy sites:*
  - <https://covid19.colorado.gov/stay-home-except-essential-needs>
  - <https://covid19.colorado.gov/public-health-executive-orders-resource>
  - <https://covid19.colorado.gov/schools-workplaces-community>

## Eben Ezer Press Release

*Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.*

*If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234*

*You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)*

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

**Concerns about Leprino Foods**

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020 and June 16th, 2020.
  - Sedgwick County: May 7th, 2020 and June 25th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

## Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

## When will I get my test results?

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If you were tested in one of our 6 counties:** Transfer to Tammy Hort at x1241

**If you tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

## How does the Safer at Home Order impact me?

- Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public
- Individuals are ordered to limit:
  - Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and
  - Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.
- Prohibit public gatherings of ten (10) persons or more in both public spaces and private commercial venues.
- All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:
  - Individuals who are 65 years and older
  - Individuals with chronic lung disease or moderate to severe asthma

- Individuals who have serious heart conditions
- Individuals who are immunocompromised
- Pregnant women; and
- Individuals determined to be high risk by a licensed healthcare provider.
- All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 551 confirmed cases in northeast Colorado. 278 in Morgan County, 256 in Logan County, 6 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 2100, 4/26/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Call 2-1-1**

### What resources are available for mental health services?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** *This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.*

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

#### **24/7 Crisis Hotlines:**

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## **Complaints about Businesses Violating Public Health Orders**

### **How do I file a complaint about a business violating Public Health Orders?**

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

*Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently*

touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in

*need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.*

*Learn more at <https://covidchildcarecolorado.com/>*

## **Workplaces & Businesses**

### **Reopening of Businesses (Safer at Home)**

***Numerous questions are emerging as the state enters the Safer-at-Home phase.***

*The Safer at Home Executive Order D 2020 044 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Executive Order is tentatively set to expire 30 days from April 27, 2020, but can be amended or extended at any time. Read the Safer at Home Executive Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed. Local counties will be working with NCHD to determine if it is safe to relax guidelines more than the State. To do so, the county would need to demonstrate proof of 14 consecutive days of decline of infection of COVID-19 within the county. They also must submit an application to CDPHE that includes a written COVID-19 suppression plan approved by the appropriate local public health authority, all hospitals within the jurisdiction, and elected leadership. Our website, [www.nchd.org/co](http://www.nchd.org/co) will have the most up to date information.*

*Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.*

*Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.*

### **Monday, April 27**

*Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols.*

*The Governor also signed Executive Order D 2020 045, which will allow medical, dental, and veterinary voluntary or elective surgeries and procedures to resume as long as the health care facility or other setting is following the required safety protocols as set out in the Executive Order. Under this Executive Order, facilities performing these procedures must establish a plan to reduce or stop voluntary or elective surgeries and procedures if there is a surge of COVID-19 infections in the county or municipality in which they are located. CDPHE will determine the conditions that constitute a surge.*

### **Friday, May 1**

Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements.

Personal services can open if they are implementing best practices. Information regarding best practices will be forthcoming.

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here:

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with

customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

### **Branding & Cattle Operations Requiring a Group Setting**

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## **Eben Ezer Press Release**

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020. The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline: COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

## **Cargill and Leprino Foods**

### **Concerns about Cargill**

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

## Concerns about Leprino Foods

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

*All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.*

### Vital Records:

- *Our staff will continue to process all vital records requests.*
- *We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.*
- *Allow for up to 72 hours for the record to be processed.*

### Environmental Health:

- *Water testing will continue as usual.*
- *Water and Septic Inspections related to loans will be coordinated on a case by case basis.*
- *Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.*

### Nursing Services:

- *Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:*
  - *Phillips County: May 12th, 2020 and June 16th, 2020.*
  - *Sedgwick County: May 7th, 2020 and June 25th, 2020.*
  - *Washington County: May 13th, 2020 and June 17th, 2020.*
- *In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.*
- *Nursing staff are assisting with COVID-19 case investigations.*

### WIC Services:

- *All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.*
- *Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.*

## **General Questions about COVID-19**

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### **Where can I get tested?**

*NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.*

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*

- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *Prohibit public gatherings of ten (10) persons or more in both public spaces and private commercial venues.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 608 confirmed cases in northeast Colorado. 328 in Morgan County, 262 in Logan County, 6 in Yuma County, 6 in Phillips County, and 6 in Washington County. (Current 1600, 4/27/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Call 2-1-1**

#### **What resources are available for mental health services?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during

business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## **Complaints about Businesses Violating Public Health Orders**

### **How do I file a complaint about a business violating Public Health Orders?**

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to

prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those.

Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

**Numerous questions are emerging as the state enters the Safer-at-Home phase.**

The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.

#### **Monday, April 27**

Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols.

The Governor also signed Executive Order D 2020 045, which will allow medical, dental, and veterinary voluntary or elective surgeries and procedures to resume as long as the health care facility or other setting is following the required safety protocols as set out in the Executive Order. Under this Executive Order, facilities performing these procedures must establish a plan to reduce or stop voluntary or elective surgeries and procedures if there is a surge of COVID-19 infections in the county or municipality in which they are located. CDPHE will determine the conditions that constitute a surge.

#### **Friday, May 1**

Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements.

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 [here](#):

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection [here](#):

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

### **Branding & Cattle Operations Requiring a Group Setting**

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## **Cargill and Leprino Foods**

### **Concerns about Cargill**

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### **Concerns about Leprino Foods**

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to

prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those.

Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

**Numerous questions are emerging as the state enters the Safer-at-Home phase.**

The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.

#### **Monday, April 27**

Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols.

The Governor also signed Executive Order D 2020 045, which will allow medical, dental, and veterinary voluntary or elective surgeries and procedures to resume as long as the health care facility or other setting is following the required safety protocols as set out in the Executive Order. Under this Executive Order, facilities performing these procedures must establish a plan to reduce or stop voluntary or elective surgeries and procedures if there is a surge of COVID-19 infections in the county or municipality in which they are located. CDPHE will determine the conditions that constitute a surge.

#### **Friday, May 1**

Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements.

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 [here](#):

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection [here](#):

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

### **Branding & Cattle Operations Requiring a Group Setting**

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## **Cargill and Leprino Foods**

### **Concerns about Cargill**

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### **Concerns about Leprino Foods**

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

*All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.*

### Vital Records:

- *Our staff will continue to process all vital records requests.*

- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020 and June 16th, 2020.
  - Sedgwick County: May 7th, 2020 and June 25th, 2020.
  - Washington County: May 13th, 2020 and June 17th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.

- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *Prohibit public gatherings of ten (10) persons or more in both public spaces and private commercial venues.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## **PPE Requests**

### **Where can we request more PPE and supplies for our local healthcare facility?**

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 640 confirmed cases in northeast Colorado. 351 in Morgan County, 269 in Logan County, 7 in Yuma County, 6 in Phillips County, and 7 in Washington County. (Current 1630, 4/28/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Call 2-1-1**

#### **What resources are available for mental health services?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

## **Complaints about Businesses Violating Public Health Orders**

### **How do I file a complaint about a business violating Public Health Orders?**

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

*Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a*

distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

#### **Numerous questions are emerging as the state enters the Safer-at-Home phase.**

The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.

#### **Monday, April 27**

Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).

Public Health Order 20-29: Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), may restart in accordance with the priorities, requirements, and specific criteria outlined within the order.

#### **Friday, May 1**

Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements. Ensure they have completed a Business Social Distancing Protocol, as mentioned above.

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 [here](#):

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection [here](#):

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

*All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.*

### Vital Records:

- *Our staff will continue to process all vital records requests.*

- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020 and June 16th, 2020.
  - Sedgwick County: May 7th, 2020 and June 25th, 2020.
  - Washington County: May 13th, 2020 and June 17th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.

- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *Prohibit public gatherings of ten (10) persons or more in both public spaces and private commercial venues.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## **PPE Requests**

### **Where can we request more PPE and supplies for our local healthcare facility?**

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 640 confirmed cases in northeast Colorado. 351 in Morgan County, 269 in Logan County, 7 in Yuma County, 6 in Phillips County, and 7 in Washington County. (Current 1630, 4/28/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Call 2-1-1**

#### **What resources are available for mental health services?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

### **24/7 Crisis Hotlines:**

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## **Complaints about Businesses Violating Public Health Orders**

### **How do I file a complaint about a business violating Public Health Orders?**

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

*Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a*

distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

#### **Numerous questions are emerging as the state enters the Safer-at-Home phase.**

*The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.*

*A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.*

*Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.*

*Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.*

#### **Monday, April 27**

*Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).*

*Public Health Order 20-29: Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), may restart in accordance with the priorities, requirements, and specific criteria outlined within the order.*

#### **Friday, May 1**

*Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements. Ensure they have completed a Business Social Distancing Protocol, as mentioned above.*

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 [here](#):

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection [here](#):

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Branding & Cattle Operations Requiring a Group Setting

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

## **Complaints about Businesses Violating Public Health Orders**

### **How do I file a complaint about a business violating Public Health Orders?**

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

*Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a*

distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

**Numerous questions are emerging as the state enters the Safer-at-Home phase.**

*The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.*

*A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.*

*Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.*

*Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.*

#### **Monday, April 27**

*Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).*

*Public Health Order 20-29: Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), may restart in accordance with the priorities, requirements, and specific criteria outlined within the order.*

#### **Friday, May 1**

*Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements. Ensure they have completed a Business Social Distancing Protocol, as mentioned above.*

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 [here](#):

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection [here](#):

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Branding & Cattle Operations Requiring a Group Setting

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Brandee Martinez x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Tricia Garrett x2254*

### Are we offering all our normal services?

*All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.*

### Vital Records:

- *Our staff will continue to process all vital records requests.*

- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### Nursing Services:

- Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:
  - Phillips County: May 12th, 2020 and June 16th, 2020.
  - Sedgwick County: May 7th, 2020 and June 25th, 2020.
  - Washington County: May 13th, 2020 and June 17th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.
- Nursing staff are assisting with COVID-19 case investigations.

#### WIC Services:

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

## General Questions about COVID-19

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### Where can I get tested?

NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.

- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *Prohibit public gatherings of ten (10) persons or more in both public spaces and private commercial venues.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 674 confirmed cases in northeast Colorado. 372 in Morgan County, 281 in Logan County, 9 in Yuma County, 5 in Phillips County, and 7 in Washington County. (Current 1630, 4/28/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

#### **Call 2-1-1**

### What other resources are available for rural communities?

USDA and its Federal partners have programs that can be used to provide immediate and long-term assistance to rural communities affected by the COVID-19 outbreak. These programs can support recovery efforts for rural residents, businesses and communities through:

- technical, training, and management assistance;

- financial assistance; and
- state and local assistance.

The COVID-19 Federal Rural Resource Guide organizes funding opportunities identified in the CARES Act and other federal resources that can help support rural America. Opportunities are categorized by customer and assistance type. The Resource Guide can be found [here](#).

### What resources are available for mental health services?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## Complaints about Businesses Violating Public Health Orders

### How do I file a complaint about a business violating Public Health Orders?

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

**A new Safer at Home Business Resource Page has been added to our website. Businesses with questions can be referred [here](#) for the most up to date information. CDPHE has also launched a Safer at Home webpage with a large amount of information and guidance materials. Access that page [here](#).**

### **Numerous questions are emerging as the state enters the Safer-at-Home phase.**

The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.

### **Monday, April 27**

Retail businesses can open for curbside delivery. Real estate home showings can resume. Voluntary or elective medical, dental, and veterinary surgeries and procedures may resume if facilities are following required safety protocols. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).

Public Health Order 20-29: Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), may restart in accordance with the priorities, requirements, and specific criteria outlined within the order.

### **Friday, May 1**

Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements. Ensure they have completed a Business Social Distancing Protocol, as mentioned above.

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here:

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

## Masks

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

*Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:*

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Branding & Cattle Operations Requiring a Group Setting

*All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:*

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

*There is also a good branding document from the Nebraska Department of Agriculture:*

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

**Concerns about Leprino Foods**

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

### 3 POSITIVE MESSAGING CAMPAIGNS ARE BEING LAUNCHED ON SOCIAL MEDIA

- A Community Social distancing event will begin on Thursday. Employees are encouraged to post photos on how you are social distancing.
- Local heros will be an event for first responders and medical personnel on the front lines.
- Business Evolution will ask critical businesses how they have evolved/changed during COVID-19.

**IF YOU HAVE IDEAS ON OTHER  
POSITIVE MESSAGING CAMPAIGNS,  
OR GETTING THEM OUT TO THE COMMUNITY,  
SEND YOUR IDEAS TO MARY**

Keeping employees and call volumes in mind, a new Safer at Home business page is being added to the website today. Stay tuned!

### WISDOM FROM OUR PUBLIC HEALTH DIRECTOR

Be sure to De-COVID at night! Do something fun, enjoy the outside, or just relax!

### Business Social Distancing Protocols

NCHD is asking businesses to complete a Social Distancing Protocol. If you receive one, please scan them and upload them [HERE](#)

### SOCIAL DISTANCING

Shaq's shoes are 16" long.

Imagine your coworkers have just completed a basketball game, and have stinky feet!

The thought of 4.5 extra large stinky shoes is bound to keep you **6 feet away!**

Shelly,

Tammy Hort has been in contact with you this morning. After discussing risk communication options with staff from CDPHE, Trish McClain, our Public Health Director, and I would like to schedule a call with you at some point later today. We would like to present the options and discuss with you what would be the best way for NCHD to support you and your facility.

Trish and I are available between 3-4 p.m. this afternoon or we could do a call at 5 p.m. or later into the evening. It probably won't take any longer than 30 minutes.

Let us know what might work well for your schedule. Thanks.

Daniel Sullivan  
Skinner - DOC, Annie <annie.skinner@state.co.us>

Hi Everyone,

We wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

**Facility Outbreak Data by County**

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,  
Mary

Hi Everyone,

We wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

**Facility Outbreak Data by County**

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,  
Mary

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,  
Mary

Subject: Press Release regarding deaths  
Good afternoon,

NCHD has become aware of multiple deaths that have occurred this past week. 1 in Logan County occurred but the rest have been in Morgan County.

There is a process that is followed to release death information to CDPHE. We want to be respectful of that process. In addition, we could have some backlash if we as a local public health agency puts out a press release about deaths, when CDPHE number of deaths isn't reflecting our counties yet.

Therefore, please stay tuned and I will be in touch with you tomorrow as I have more information. When we do get ready to release a press release we will send to you for review before it is released to the media.

Thank you  
Michelle Pemberton

Subject: EMS Transporting

Shelly,

I asked Mike Burnett when I got back into our DOC about whether EMS is transporting patients who are positive for COVID and have a DNR. He said that while the NE RETAC did report on the Crisis Standards of Care EMS Document being signed at today's meeting, he recommends you contact your local EMS to check on what their specific policy is about this.

Hi Daniel,

Attached is the draft press release. There are several areas marked in red needing additional information from your organization. Please feel free to make suggestions or edits throughout.

Thanks,

Mary

April 20, 2020

FOR IMMEDIATE RELEASE

### **Northeast Colorado Health Department Reports on Cargill COVID-19 Response**

Sterling, Colo. – April 20, 2020: As the COVID-19 pandemic continues, the national focus has turned to concern about the strength of the food supply chain. Having multiple critical businesses that are associated with food processing in our six county (Logan, Morgan, Phillips, Sedgwick, Washington and Yuma) health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with

each business to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the forefront of state and national attention is the Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, Public Health Director, Trish McClain addressed in a report to the State Public Health Department, unprecedented processes and procedures that facility management have put in place to keep food products and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important,” expresses Director McClain “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The health department report identifies that Cargill is proactively applying Centers for Disease Control and Prevention guidance for employee face covering, added cleaning measures, personal protective equipment usage and social distancing practices. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“We are making decisions guided by our values,” said Tyler Luft, general manager for Cargill’s Fort Morgan protein facility. “The team is working to keep employees safe, feed the nation and keep the agricultural economy moving.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our six county health district, including Fort Morgan, emphasizing the need for social distancing and to stay home unless performing necessary activities. So far, NCHD in cooperation with Cargill has been notified of 23 positive results for employees, leading to 1 death. The company continues to enforce a mandatory 14-day quarantine for any team member who tests positive for COVID-19 as well as any employees who they have come into close contact with.

“Cargill continues to work in close partnership with the NCHD to ensure we are following the appropriate safety protocols,” said Luft. “We are part of this community and want to work together to keep each other safe, people at work and the country fed.”

###

## Reporte del Departamento de Salud del Noreste de Colorado en

### Respuesta de Cargill a COVID-19

-Sterling, Colorado - 20 de abril de 2020: a medida que continúa la pandemia de COVID-19, el enfoque nacional se ha centrado en la preocupación por la fortaleza de la cadena de suministro de alimentos. Teniendo múltiples negocios críticos que están asociados con el procesamiento de alimentos en nuestro distrito de salud de seis condados (Logan, Morgan, Phillips, Sedgwick, Washington y Yuma), el Departamento de Salud del Noreste de Colorado (NCHD) continúa trabajando en estrecha colaboración con cada negocio para proporcionar apoyo técnico y orientación para mejorar la protección del personal contra las infecciones para que puedan permanecer abiertos de manera segura.

Una de esas instalaciones que está a la vanguardia de la atención estatal y nacional es la instalación de procesamiento de carne Cargill ubicada en Fort Morgan. Después de una invitación para recorrer la planta, la Directora de Salud Pública, Trish McClain, dirigió en un informe al Departamento de Salud Pública del Estado, los procesos y procedimientos sin precedentes que la administración de las instalaciones ha implementado para mantener seguros los productos alimenticios y los empleados.

*"Más de 2,000 personas cuentan con esta planta para sus cheques de pago, pero nadie discute el hecho de que sus vidas son aún más importantes", expresa el Directora McClain. "Creo que Cargill ha hecho de la salud de los empleados una prioridad, y sus prácticas son un ejemplo para otras empresas de la industria alimentaria".*

El informe del departamento de salud identifica que Cargill está aplicando de manera proactiva la orientación de los Centros para el Control y la Prevención de Enfermedades para cubrirse la cara a los empleados, medidas de limpieza adicionales, uso de equipos de protección personal y prácticas de distanciamiento social. En muchas áreas, han ido más allá de la orientación general e implementado enfoques innovadores para la seguridad de los empleados.

*"Estamos tomando decisiones guiadas por nuestros valores", dijo Tyler Luft, gerente general de la instalación de proteínas Fort Morgan de Cargill. "El equipo está trabajando para mantener a los empleados seguros, alimentar a la nación y mantener la economía agrícola en movimiento".*

Esta sinceridad se extiende a la transparencia de la gerencia con NCHD en los esfuerzos para evaluar activamente al personal, sus modificaciones significativas al flujo de empleados y la conversión de la línea de producción, así como la aplicación de las directivas de aislamiento y cuarentena al desactivar las insignias del personal muestra cuán proactivos y cuán trascendentales son sus esfuerzos para proteger al personal.

Los casos de COVID-19 han seguido aumentando en nuestro distrito de salud de seis condados, incluido Fort Morgan, enfatizando la necesidad de distanciamiento social y quedarse en casa a menos que se realicen las actividades necesarias. Hasta ahora, NCHD en cooperación con Cargill ha sido notificado de 23 resultados positivos para los empleados, lo que lleva a 1 muerte. La compañía continúa aplicando una cuarentena obligatoria de 14 días para cualquier miembro del equipo que resulte positivo para COVID-19, así como para cualquier empleado con el que hayan estado en contacto cercano.

*"Cargill continúa trabajando en estrecha colaboración con el NCHD para garantizar que sigamos los protocolos de seguridad apropiados". dijo Luft. "Somos parte de esta comunidad y queremos trabajar juntos para mantenernos seguros, la gente en el trabajo y el país alimentados".*

Hi Daniel,

We are still getting some calls in relation to the Cargill outbreak.

We were wondering if you were planning to, or if you would want to, put out a press release about your visit from CDC last Friday? Since the visit was because of your exemplary processes and procedures, and they were looking for guidelines for other facilities, we were thinking that was a very positive message for you and the community.

Please let us know your thoughts.

Thanks,

Mary

Subject: NCHD Data Reporting

Hi Everyone,

We wanted to give you a heads up that we are updating our data presented on our website and adding more detail to our daily numbers. Beginning Monday, we will be combining all facility outbreak in each county into one number, see the example below.

**Facility Outbreak Data by County**

Logan	Morgan	Phillips	Sedgwick	Washington	Yuma	Total
*XXX	**XXX	0	0	0	0	XXX

\*Cases for Logan County are associated with testing conducted at the Sterling Correctional Facility.

\*\*Cases for Morgan County are associated with outbreaks at Cargill, Leprino Foods, and Eben Ezer Lutheran Care Center.

Currently, we are getting a lot of negative feedback about the lack of data and our credibility is in question. In order for our messages to save lives, it is imperative that we are reliable and seen as a reputable source of information. So we felt that adding this information is necessary. Please let us know your thoughts and/or feedback.

Thanks,  
Mary

Subject: Denver Post on outbreak at Sterling facility

Good afternoon, Elise,

So far the effect on staff at the Sterling Correctional Facility has been minimal. We are continuing to monitor the COVID-19 cases within the community.

Since April 16, NCHD has coordinated with the Sterling Regional MedCenter (SRMC), the Logan County Emergency Manager and other local officials regarding this situation. SRMC had already been working with the Department of Corrections prior to the conversation we had with all parties on April 16. Steps taken by the Sterling Correctional Facility have been effective in protecting staff members thus far. SRMC has a Surge Plan in place but have had no unusual concern about the effects they may see as a result of the outbreak at the Sterling Correctional Facility.

Please let me know if you have any further questions or concerns.

Elise,

For specific numbers of inmates at the Sterling Correctional Facility that have tested positive for COVID-19, I am going to refer you to their PIO, Annie Skinner. Annie is copied on this email and should be better able to help you.

Thank you.

Thanks, Michelle, I appreciate it.

One quick follow up: Of the 262 positive cases in Logan County (as of yesterday afternoon), how many are inmates at the Sterling Correctional Facility?

Elise

GOOD MORNING.

WE WERE JUST INFORMED THAT OUR SHIPMENT OF DISINFECTANT WIPES HAS BEEN REDIRECTED TO FEMA FOR EMERGENCY COUNTERVENTION. WE APOLOGIZE FOR THE IMPACT ON YOU AND WE HAVE PROCESSED A CREDIT TO YOUR CREDIT CARD IN THE AMOUNT OF \$752.00. IF WE LEARN OF ANY OTHER SOURCE, WE WILL ADVISE YOU IMMEDIATELY.

THANK YOU.

Subject: N95 masks

We had a shipment of 500 N95 masks that were to be delivered yesterday, April 16th that did not arrive. We are finding several of our shipments that had definitive delivery dates assigned to them are being stalled awaiting clearance to export from China.

We are currently using CDC guidance to treat and re-use N95 masks but after receiving daily treatments for a week now some of the masks are starting to lose their integrity and are needing to be replaced. We only have 18 N95 masks left on hand and we anticipate needing to replace more than that through the weekend and by early next week we are going to need to replace all masks that have received 10+ treatments which will be 140 in total.

Thanks,

Subject: Letters in support of opening The Body Firm Fitness Center

To Morgan County Commissioners,

Below are the remarks I received yesterday from the Northeast Colorado Board of Health in reference to opening up our gym and other fitness facilities in Morgan County:

*Paula,*

*I appreciate the time, effort and resources you have put into your reopening plan. And I agree with you that a gym in rural Colorado looks much different from a gym in metro Denver. However, the order is very clear about gyms and a waiver to open your facility as a gym would need to come through Morgan County to be submitted to the state health department for approval.*

I have since then submitted to the local Board of Health our detailed protocol as to how we will and can open safely. I have also sent a petition to Governor Polis, as well as state and national representatives, containing over 1300 signatures requesting that gyms in Colorado be allowed to open. I will attach to this correspondence letters from some of our gym members describing how we are a responsible business, how they have trust in our ability to open safely, and how the gym is a necessity for their health and rehabilitation. Our members have been calling and writing us continuously the past few days wondering why we are not open and why we are not advocating for them. They want and need us to be available for them so they can get back on track with their physical and mental health. We owe it to them to get this ball moving, and moving quickly.

We will be offering one-on-one personal training to clients starting Friday, May 1. On Monday, May 4th, we will expand it to 4 clients to 1 trainer as is expressly allowed by the latest state directive. This, however, is unfair to the majority of our clients who can not afford to pay the \$50 per personal training session. We need to be able to offer our service at an affordable price to everyone. By keeping the numbers limited to just small personal training sessions, as mandated by Governor Polis, only wealthy people will now be able to enjoy good health and fitness. This does not suit our demographic. We need to be open and functioning for our community immediately.

I urge you to please submit a waiver to the State Health Department to open our gym facility and any other in the county that has set up their appropriate protocol. Please help the Governor and the State Health Department see that small businesses in small communities operate on a different level than inner-city, large businesses. We can control the number of people in our doors, social distancing, and a strong cleaning protocol much more effectively than a larger gym rolling through thousands of people. We need to have that local control on a county level just like Governor Polis has asked for on a state level.

Please help us to help our community and clients. We look forward to your response and anything else that we can do to get our doors open.

Thank you.

Paula Hough

Hi Tammy,

Thanks for taking the time to update us yesterday. I wanted to circle back to see if you had a chance to send me the Eben Ezer line list yet.

So far I have not yet received anything. We're hoping to get these by noon today to update the database.

If they were able to send you an updated list yesterday, that would be great for us to have. If not, we would appreciate the line list you mentioned receiving from last Thursday.

Thank you!

Hi Stacey. I did receive the line list from Eben Ezer yesterday afternoon. I am comparing CEDRS cases with the staff and resident list. They are reporting via paper and using the line list form that was available in the first guidance tools. There is a staff member available today in our office that is going to put this info into the Excel spreadsheet I was given by Dr. Gershman.

Once that is done, I will share with you.

Tammy

Subject: Denver Post on outbreak at Sterling facility  
To: <trishm@nchd.org>, <maryb@nchd.org>

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health Department had a few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at

Thanks,  
Elise

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health

Department had a few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at

Thanks,  
Elise

Subject: APPROVE: Safer at Home and Golf Courses  
Greetings owners/operators,

The Northeast Colorado Health Department would like to take the time to update you regarding moving forward with the Safer at Home guidelines. We know this is a lot of information, so please be sure to read the entire email. You may also refer to the attached orders and guidance for further information. Listed below is just some of the information you need to be aware of.

The Safer at Home **Public Health Order 20-28** outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. This Public Health Order **begins Monday April 27, 2020** and will continue to be in effect **until 11:59 p.m. on May 26, 2020**, unless extended, rescinded, superseded, or amended in writing. A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

The key message at this time is that you must continue to operate following your approved plan. A few things to note in the new Safer at Home Order:

- Many of the courses in our area also serve food or beverages. The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public:
  1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
  2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption.

All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory Social Distancing Requirements, except as prohibited or limited by Executive Order D 2020 044 or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

This means that there shall be **no dining or consumption of food or beverage on the premises**, as currently stated in your approved plan.

Social Distancing Requirements: To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

#### **Beginning on April 27th:**

Your course may continue to operate as listed in your approved plan. The only change currently is in regards to your pro shop. All Non-Critical Retail, as defined within the order, may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory social distancing requirements,

Non-Critical Retail (the category containing retail shops) must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#) (attached), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#) (also attached). Refer symptomatic employees to the [CDPHE Symptom Tracker](#). Post signage for employees and customers on good hygiene and other sanitation practices.

Non-Critical Retail must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.
5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

#### **Effective May 1st:**

Non-Critical Retail must continue implementing the measures within the workplace listed above from April 27th, and in addition:

1. Maintain 6 foot distancing between patrons and employees;
2. Effectively symptom monitor employees as listed in Section II.I;
3. Provide face coverings, and gloves as necessary and appropriate, to employees;

4. Ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. Provide dedicated, in-store hours for vulnerable or at-risk individuals.

Non-Critical Retail must continue to implement the measures regarding employees listed above from April 27th.

Non-Critical Retail must implement the measures to minimize disease transmission for customers listed above from April 27th, in addition to the following measures:

1. Limit the number of customers on the premises as needed to make 6 foot distancing between customers attainable;
2. Provide decals and demarcation for waiting area in lines that meet social distancing criteria;
3. Create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
4. Create signage to encourage the use of masks and gloves by customers while on the premises; and
5. Provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

#### **Activity/Groups:**

Individuals are encouraged to only leave their Residence to perform Necessary Activities, provided they comply at all times and to the greatest extent possible with Social Distancing Requirements. People at high risk of severe illness from COVID-19 are urged not to leave their residence except as necessary to receive medical care. People who are sick must not leave their residence except as necessary to receive medical care, and must not go to work, even for a Critical Business. Individuals may participate in local and personal recreation in outside public spaces, as an authorized Necessary Activity, in groups no larger than 10 and practicing social distancing maintaining 6 feet between participants. Travel for recreational purposes should be limited to your own community like your county of residence or traveling no more than about 10 miles.

#### **Public Health Order 20-26 already in effect (Face Coverings/Gloves) for Courses with Restaurants:**

All employees of Critical Businesses or performing Critical Government Functions who work in close proximity to other employees or with the public shall wear a medical or non-medical face covering to help prevent the spread of disease. Employers who operate Critical Businesses or manage Critical Government Functions should make every effort to provide their workforce with medical or non-medical face coverings. Unless working in a healthcare setting, employers should provide non-medical face coverings for their employees. Employers shall make every effort to assign employees who cannot wear face coverings for health or safety reasons to perform work that does not bring the worker into close proximity with other employees or the public.

- Workers who may routinely or consistently come within 6 feet of other workers or the public are considered to be in close proximity to others and must wear a medical or non-medical face covering that covers the worker's nose and mouth, unless doing so would inhibit the individual's health. Workers with health issues that preclude them from wearing a face covering must document those concerns with their employer.
- A worker may use a face covering provided by their employer, if available, or may choose to use their own face covering. Cloth face coverings should fit snugly but comfortably against the side of the face, include multiple layers of fabric, allow for breathing without restriction, and be able to be laundered and machine dried without damage or change to shape. Face coverings need to cover the nose and mouth at all times and should remain in place until taken off safely. If a worker's face covering moves during work, it needs to be replaced with one that does not need to be frequently adjusted to reduce touching of the face. Workers should replace face coverings when theirs becomes dirty, wet, and/or difficult to breathe through.
- Workers who prepare or handle food that will be made available to the public for purchase, such as restaurant or grocery store workers, must wear a face covering while performing tasks involving food preparation and handling.

All employees of Critical Businesses or performing Critical Government Functions who come into contact with customers or goods should wear gloves, if gloves are provided by their employer. Employees in food and child care industries shall minimally utilize disposable gloves as normally required by their governing regulations. Employees that are directly involved with disinfecting equipment and surfaces within critical business and/or have direct contact with customers **shall wear gloves** when involved in these activities.

Please refer to our website at <https://www.nchd.org/co> for the most up to date information regarding COVID-19 in the Northeast Region.

----- Forwarded message -----  
From: Trish McClain <trishm@nchd.org>  
To: \_All Employees <\_AllEmployees@nchd.org>  
Cc:  
Bcc:  
Date: Thu, 7 May 2020 15:49:37 -0600  
Subject: Colorado Open Records Act (CORA) request  
As stated in the call yesterday, we need to gather emails. Here's the info below:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please note the dates--nothing before March and nothing after April 30.

Here's some additional information from our attorney about how picky we should be when looking for the emails:

I would generally stick with the plain language of the request. The request only seeks "emails" concerning these entities, so it isn't necessary to include voicemails or any other correspondence even if you can convert it into email (you are not required to create records). I would say that if your staff generally refers to the Sterling Correctional Facility by a different name or reference, you should make an effort to include it, although I wouldn't go out of your way to include any ancillary references that doesn't specifically concern the correctional facilities (such as the Dept. of Corrections, etc.). Emails sent

by NCHD to a listserve as a HAN should also be included, but if a listserve contains information not specifically directed to the District, it doesn't need to be included.

Please forward any emails that you think would be applicable to this CORA request to [Operations@nchd.org](mailto:Operations@nchd.org). Please have them to the Ops email by Tuesday, May 12. And please send an email to my email address with how much time you spent doing this work. If you anticipate it taking more than an hour, please let me know ASAP.

This may not apply to everyone so if you don't have any emails you need to forward to the Ops email address, don't worry about it.

Thanks for all that you do!! Trish

To: Trish McClain <trishm@nchd.org>, Tammy Hort <tammyh@nchd.org>, Matthew Bauer <mbauer@weldgov.com>

Good Afternoon,

I wanted to provide you with a flow diagram on how we are exiting and re-entering people back into our workforce.

I am close to signing a global contract with Quest Diagnostics who will provide the services for our serological testing, across the US, and our PCR testing outside of CO.

My intention is to test our 100+ positive employees in CO on May 11<sup>th</sup> for IgG. That will put all of those employees at a minimum of 14 days out since a confirmed result. If they show a presence for IgG they will return to work. If not, they will

remain out and be retested 7 days later.

If you have concerns or comments I would be interested in hearing them. This is the best process we can devise that does not rely on "a wish and prayer" on when to bring people back to work.

Kind Regards,

Jason

Good morning,

I hope you are doing well. I wanted to provide a quick update on a few things I have heard from my contacts at Leprino. They will be gassing the entire plant over the next couple days with chlorine dioxide. After this is completed, they will go in and clean all equipment. They envision bringing in mi k late Saturday to early Sunday with production starting up soon after that. Obviously before I give any green light, I want to make sure you all are on board with that and that you have received everything you need in order for them to reopen. If there is anything my team and I can do, please let me know. We are in that plant several times each month and have great familiarity with it.

Thank you all.

## **PUBLIC HEALTH ORDER 20-28 SAFER AT HOME**

### **PURPOSE OF THE ORDER**

I issue this Public Health Order (PHO or Order) pursuant to the Governor's directive in **Executive Order D 2020 044 Safer at Home** in response to the existence of thousands of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, as there is substantial evidence of community spread of COVID-19 throughout the State, it is crucial to take measures now that can mitigate further spread of disease in our communities.

### **FINDINGS**

1. Governor Polis issued Executive Order D 2020 003 on March 11, 2020, declaring a disaster emergency in Colorado due to the presence of COVID-19. Since that time, the Governor has taken numerous steps to implement measures to mitigate the spread of disease within Colorado, and has further required that several public health orders be issued to implement his orders.
2. I have issued public health orders pertaining to the limitation of visitors and nonessential individuals in skilled nursing facilities, intermediate care facilities, and assisted living residences; closing bars and restaurants to in-person services; defining the terms of the Governor's stay at home requirements and critical business designations; requiring hospitals to report information relevant to the COVID-19 response; and requiring the wearing of face coverings in the workplace and urging their use in public. These measures all act in concert to reduce the exposure of individuals to disease, and are necessary steps to protect the health and welfare of the public. Additionally, in reducing the spread of disease, these requirements help to preserve the medical resources needed for those in our communities who fall ill and require medical treatment, thus protecting both the ill patients and the healthcare workers who courageously continue to treat patients.
3. As of April 25, 2020, there are 13,441 known cases of COVID-19 in Colorado; however, testing for COVID-19 is not yet common. As of April 25, 2020, 2,438 Coloradans have been hospitalized and 680 Coloradans have died from COVID-19. Multiple sources of data show that COVID-19 transmission and the use of healthcare due to COVID-19 have leveled off in

Colorado. Our work to “flatten the curve” appears to be succeeding, and the Governor has ordered some lessening of the current stay at home restrictions as a result.

4. **Executive Order D 2020 044** authorizes transitioning from a stay at home model, as described in **Executive Order D 2020 017** and **Public Health Order 20-24** as amended, to a **Safer at Home** model. **Safer at Home** still requires that **Vulnerable Individuals** remain at home, but allows limited reopening of postsecondary institutions and certain businesses. Additionally, individuals are encouraged to stay at home as much as possible and practice Social Distancing to reduce the likelihood of disease transmission, but certain activities, such as gathering in groups of no more than ten for activities, are permitted. As we continue to combat COVID-19 in our communities, continuing restrictions on individual travel and necessary activities remain appropriate.

### INTENT

This Order sets forth the requirements for implementation of Safer at Home, as directed by Governor Polis. Individual restrictions remain in place concerning limitations on activities, travel, and public gatherings. Workplace restrictions remain necessary to implement standard Social Distancing Requirements, cleaning standards, and other items necessary to reduce the possibility of disease spread. Additionally, certain businesses and activities require specific guidance based on their business practices, and those are included in the appendices to this Order.

### ORDER

Unless otherwise specifically noted in this Order, the requirements of this Order are effective April 27, 2020. This Order supersedes and replaces Public Health Orders 20-22 and 20-24, as amended.

#### I. **Safer at Home**

**A.** All individuals currently living within the State of Colorado are encouraged to stay at home and avoid unnecessary interactions whenever possible in order to reduce the spread of disease. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, defined in Section III below, and are encouraged to leave their residences only to perform or utilize **Necessary Activities**, defined in Section III below.

**B.** Individuals are urged to wear non-medical cloth face coverings that cover the nose and mouth whenever in public as required by **Executive Order D 2020 044**.

**C.** All public and private gatherings of any number of people occurring outside a residence are limited to no more than (10) individuals, except for the purposes expressly permitted in this PHO, which include **Necessary Activities**. Nothing in this Order prohibits the gathering of members living in the same residence.

**D.** People at high risk of severe illness from COVID-19 are urged to stay in their residence at all times except as necessary to seek medical care. **Vulnerable Individuals** cannot be compelled to work for any business or government function, including a Critical Business or Critical Government Function, during the pendency of this pandemic emergency. People who are sick must stay in their residence at all times except as necessary to seek medical care, and must not go to work, even for a **Critical Business**, defined in Section III below.

**E.** Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

**F.** Governmental and other entities are strongly urged to make shelter available to people experiencing homelessness as soon as possible and to the maximum extent practicable, and are authorized to take all reasonable steps necessary to provide non-congregate sheltering along with necessary support services to members of the public in their jurisdiction as necessary to protect all members of the community. People experiencing homelessness are urged to protect their health and safety by complying with **Social Distancing Requirements** at all times.

**G.** Individuals are encouraged to limit travel to **Necessary Travel**, defined in Section III below, including but not limited to, travel by automobile or public transit. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Businesses** or maintain **Critical Governmental Functions** as authorized in Section II of this Order. People riding on public transit must comply with **Social Distancing Requirements** to the greatest extent feasible.

**H.** Individuals may participate in local and personal recreation in outside public spaces, as an authorized **Necessary Activity**, in groups no larger than 10 and practicing social distancing maintaining 6 feet between participants. Travel for recreational purposes should be limited to your own community like your county of residence or traveling no more than about 10 miles. Playgrounds and playground equipment remain closed. Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals complying with **Social Distancing Requirements**; except for members of a single household, sharing equipment is prohibited.

## **II. Business Requirements**

**A.** The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public:

1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption;
3. Cigar bars;
4. Gyms, except for the limited purpose authorized in Section I.H;
5. Movie and performance theaters, opera houses, concert halls, and music halls;
6. Casinos; and
7. Horse tracks and simulcast facilities, also known as off-track betting facilities.

These restrictions do not apply to any of the following:

1. Room service in hotels;
2. Health care facilities, residential care facilities, congregate care facilities, and juvenile justice facilities;
3. Crisis shelters or similar institutions;
4. Airport concessionaires;
5. Institutions of higher education offering dining hall services located in or adjacent to campus dormitories that are accessed through student, staff, faculty, or campus associated identification, as well as grab and go food services within these institutions, while exercising social distancing measures of at least six feet between individuals;

6. Fitness centers and nonessential personal services included in residential facilities, such as hotels, apartment or condominium complexes or similar housing arrangements, that are limited to use only by hotel guests or residents of the housing who are following social distancing requirements of at least 6 feet between individuals, and the hotel or property managers are performing frequent environmental cleaning; and
7. Any emergency facilities necessary for the response to these events.

**B.** All **Critical Businesses** and **Critical Government Functions**, as defined in Section III below, may continue to operate. **Critical Businesses** must comply with **Social Distancing Requirements** at all times, adopt work from home or tele-work policies for any operations that can be done remotely, and implement other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other **Critical Retail** shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line. **Critical Business** and **Critical Government Functions** shall continue to promote telecommuting to the greatest extent possible.

**C.** All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory **Social Distancing Requirements**, except as prohibited or limited by **Executive Order D 2020 044** or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

**D.** All **Non-Critical Retail**, as defined in Section III below, may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory social distancing requirements, similar to the requirements for **Critical Retail**. Additional requirements for **Critical** and **Non-Critical Retail** are contained in **Appendix A** of this Order.

**E.** All **Field Services**, including real estate, may resume operations, in accordance with the requirements of this Order including **Appendix B**. Real estate includes in-person real estate showings and marketing services which must adhere to **Social Distancing Requirements** with cleaning and disinfection between each showing, but may not hold open houses.

**F.** Other health care services not covered by Executive Order 20 0XX **Voluntary or Elective Surgeries Or Procedures**, in certain limited healthcare settings may resume if done in accordance with the requirements of **Appendix E**.

**G.** Effective May 1, 2020, **Non-Critical Retail** and limited **Personal Services** may resume in-person services if they meet the requirements in Section II.I below and the additional requirements outlined for these services in **Appendices B and D** of this Order.

**H.** Effective May 4, 2020, **Non-Critical Office-Based Businesses** operating in an office and not a production environment, as defined in Section III below, may allow up to fifty (50) percent of their employees to conduct in-person work that takes place outside a private residence in accordance with the requirements in Section II.I below and the additional requirements outlined in **Appendix C**.

**I. All Business and Government Functions. Critical Businesses, Critical Government Functions, Non-Critical Office-Based Businesses, Personal Services, Limited Healthcare Settings, and Non-Critical Retail** shall all follow the protocols below:

1. Employers and sole proprietors shall take all of the following measures within the workplace to minimize disease transmission, in accord with the [CDPHE Guidance](#):

- a. deputize a workplace coordinator(s) charged with addressing COVID-19 issues;
- b. maintain 6 foot separation between employees and discourage shared spaces;
- c. [clean and disinfect](#) all high touch areas;
- d. post signage for employees and customers on good hygiene;
- e. ensure proper ventilation;
- f. avoid gatherings (meetings, waiting rooms, etc) of more than 10 people;
- g. implement symptom monitoring protocols (including workplace temperature monitoring), conduct daily temperature checks and monitor symptoms in employees. A sample form can be found [here](#). If an employee reports any symptoms, refer symptomatic employees to the [CDPHE Symptom Tracker](#) and take all of the following steps:
  1. send employee home immediately;
  2. increase cleaning in your facility and require social distancing of staff at least 6 feet apart from one another;

3. exclude employee until they are fever-free, without medication, for 72 hours and 7 days have passed since their first symptom; and
    4. if multiple employees have these symptoms, contact your local health department; and
    - h. eliminate or regularly [clean and disinfect](#) any items in common spaces, such as break rooms, that are shared between individuals, such as condiments, coffee makers, vending machines.
2. Employers shall take all of the following measures regarding employees to minimize disease transmission:
  - a. require employees to stay home when showing any symptoms or signs of sickness, and connect employees to company or state benefits providers;
  - b. provide work accommodations for **Vulnerable Individuals**, who remain subject to **Stay at Home** advisement, prioritizing telecommuting, as **Vulnerable Individuals** shall not be compelled to go to work during the pendency of this pandemic emergency;
  - c. provide to the greatest extent possible flexible or remote scheduling for employees who may have child or elder care obligations, or who live with a person who still needs to observe **Stay at Home** due to underlying condition, age, or other factor;
  - d. encourage and enable remote work whenever possible;
  - e. encourage breaks to wash hands or use hand sanitizer;
  - f. phase shift and breaks to reduce density; and
  - g. provide appropriate protective gear like [gloves, masks, and face coverings](#).
3. Employers and sole proprietors shall implement the following measures regarding customers to minimize disease transmission:
  - a. create whenever possible special hours for **Vulnerable Individuals** only;
  - b. encourage 6 foot distancing inside of the business for all patrons;
  - c. encourage customer use of protection like gloves and face coverings;
  - d. provide hand sanitizer at the entrances to the greatest extent possible; and
  - e. use contactless payment solutions, no touch trash cans, etc. whenever possible.

4. Employers with over fifty (50) employees in any one location shall, in addition to the above requirements, implement the following protocols:
  - a. implement stations for symptom screening and temperature checks, and follow the requirements in Section II.G.1.g above;
  - b. close common areas to disallow gatherings of employees;
  - c. implement mandatory cleaning and disinfection protocols; and
  - d. require mandatory adherence to **Social Distancing Requirements**.

**J. Work Accommodations.** Employers must provide reasonable work accommodations for **Vulnerable Individuals** who are still under the **Stay at Home** advisement, such as telecommuting. Employers are encouraged to provide reasonable work accommodations for individuals who reside with or are caring for **Vulnerable Individuals**, or facing child care needs while schools remain closed.

**K. Specific Industry Requirements.** Additional requirements for specific industries are included in the following Appendices to this Order:

1. Appendix A: Critical and Non-Critical Retail Requirements
2. Appendix B: Field Services
3. Appendix C: Non-Critical Office-Based Businesses and Offices
4. Appendix D: Personal Services
5. Appendix E: Limited Healthcare Settings

### III. Definitions

**A. Necessary Activities.** For purposes of this PHO, individuals are encouraged to only leave their Residence to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 are urged not to leave their residence except as necessary to receive medical care. People who are sick must not leave their residence except as necessary to receive medical care, and must not go to work, even for a **Critical Business**. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by

way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.

3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public who live in the vicinity to engage in walking, hiking, biking, running, and similar outdoor activities, basketball and tennis courts may be open for use by individuals or members of the same household only, but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. For other parks, check with the local jurisdiction and follow any requirements for that jurisdiction. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III, below.
4. Performing work providing for businesses, government entities, and industries authorized Section II of this Order, or to otherwise carry out activities permitted in this Order.
5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**, and other businesses or industries authorized in Section II of this Order; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of residence from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) travel to transport children between separate households pursuant to a parenting plan or other agreement governing parental responsibilities; (6) non-residents returning to their place of residence; (7) moving to a new residence, including individuals whose Residence is unsafe due to domestic violence concerns.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed in **Appendix F**, must continue to comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. A list of Critical Businesses is contained in **Appendix F** to this Order.

**D. Critical Government Functions.** The provision, operation and support of the following state and local government functions shall continue:

1. Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
2. Emergency response
3. Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
4. Legislative and executive branch functions
5. Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)
6. Designated emergency shelters
7. Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
8. Public utility plant facilities for generation and distribution (drinking water and wastewater infrastructure, hubs, treatment plants, substations and pumping stations for power and gas, but not including towers, poles, power lines, and oil and gas buried pipelines)
9. Transportation. All public and private airports, airlines, taxis, transportation network companies (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
10. Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
11. Hazardous material safety
12. Services to at-risk populations and **Vulnerable Individuals**
13. Activities related to federal, state, and local elections, including any required acts of a political party, provided **Social Distancing Requirements** are observed to the greatest extent possible
14. Any government service, state or local, required for the public health and safety, government functionality, or vital to restoring normal services

**E. Field Services** means a service that is being provided out in the field as opposed to a company property, including third party private properties, such as a third party household.

**F. Gym** means a building or room used for indoor sports or exercise, such as fitness, dance, exercise or group classes, exercise studios and centers, recreation centers, bowling alleys, pools, and other indoor athletic facilities.

**G. Horse track** means a licensed race track, which is any premises licensed pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes for the conduct of racing. Sections 44-32-102(2)(a), (2)(b), (3), (8) & (24), C.R.S.

**H. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business's inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their residences are allowable pursuant to this Order; continue filling online product orders and to process customer orders remotely. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**I. Non-Critical Office-Based Business** means any commercial business that is conducted in an office and not a production environment and is not included in the list of **Critical Businesses** in **Appendix F**.

**J. Non-Critical Retail** means any retail service that is not included in the list of critical retail services in **Appendix F**. Examples of **Non-Critical Retail** include retailers of clothing, home goods, cell phone stores, mattresses, appliances, thrift shops, apothecaries, vape and tobacco shops, craft, hobby and fabric stores, fishing tackle retailers, sporting goods, boutiques, etc.

**K. Limited Healthcare Settings** means those locations where certain healthcare services are provided, including acupuncture (not related to personal services), athletic training (not related to personal services), audiology services, services by hearing aid providers, chiropractic care, massage therapy (not related to personal services), naturopathic care, occupational therapy services, optometry services, podiatry services, physical therapy, and speech language pathology services. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and patients, e.g. 5 chiropractors providing services to 5 customers, with **Social Distancing Requirements** in place of 6 feet distancing between customers receiving services. Employees must wear medical grade masks at all times, and patients must wear at least a [cloth face covering](#) at all times.

**L. Personal Services** means services and products that are not necessary to maintain an individual's health or safety, or the sanitation or essential operation of a business or residence. **Personal Services** include, but are not limited to, pastoral services except as specified in **Appendix F**, personal training, dog grooming, or body art and also applies to noncritical professionals regulated by the Division of Professions and Occupations, within the Department of Regulatory Agencies (DORA) including but not limited to services provided by personal beauty professionals such as hairstylists, barbers, cosmetologists, estheticians, nail technicians, as well as massage therapists, whose work requires these professionals to be less than six feet from the person for whom the services are being provided. Massage therapy services ordered by a healthcare professional should consult **Executive Order D 2020 027**. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and customers, e.g. 5 hairstylists providing services to 5 customers, with **Social Distancing Requirements** of at least 6 feet distancing between different customers receiving services. Both employees and customers must wear at least a cloth face covering or a medical grade mask at all times. Only services that can be performed without the customer removing their mask are permitted.

**M. "Safer at Home"** means individuals stay in your place of residence as much as possible, and avoid unnecessary social interactions.

**N. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**O. Simulcast facility** means a licensed in-state simulcast facility pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes, also commonly referred to as an "off-track betting facility" or "OTB". Sections 44-32-102(11) & (21), C.R.S.

**P. Stay at Home** means to stay in your place of residence, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support, perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**.

**Q. "Vulnerable Individual"** means:

1. Individuals who are 65 years and older;
2. Individuals with chronic lung disease or moderate to severe asthma;

3. Individuals who have serious heart conditions;
4. Individuals who are immunocompromised;
5. Pregnant women; and
6. Individuals determined to be high risk by a licensed healthcare provider.

**IV. Postsecondary Institutions.** Programs and courses at postsecondary institutions that cannot be conducted remotely, generally due to equipment requirements, may be conducted through limited in-person instruction. Institutions that wish to resume providing in-person instruction must inform the Colorado Department of Higher Education and ensure that **Social Distancing Requirements** are strictly followed. Additionally, students are allowed to opt out of the in-person instruction; such students will be treated no differently than students in all other courses that have ceased in-person instruction due to the COVID-19 situation.

**V. Variance Requests.** Any Colorado county may request a variance from the Colorado Department of Public Health and Environment authorizing implementation of an alternative COVID-19 suppression plan that differs from part or all the requirements of **Executive Order D 2020 044** or this Order. The variance request must include an alternative COVID-19 suppression plan endorsed by the local public health agency and adopted by the county commissioners or other county-level governing body, in addition to verification from local hospitals that they have the capacity to serve all people needing their care. Further guidance on variance requests is contained in **Appendix G**.

#### **VI. Enforcement**

This Order will be enforced by all appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties, including jail time, and fines, and may also be subject to discipline on a professional license based upon the applicable practice act.

#### **VII. Severability**

If any provision of this Order or the application thereof to any person or circumstance is held to be invalid, the remainder of the Order, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

### **VIII. Duration**

This Order shall become effective at 6:00 a.m. on Monday April 27, 2020 and will continue to be in effect until 11:59 p.m. on May 26, 2020, unless extended, rescinded, superseded, or amended in writing.

**Appendix G: County Variance Requests**

## APPENDIX A. CRITICAL AND NON-CRITICAL RETAIL REQUIREMENTS

**I.** Effective April 27, 2020, in addition to meeting the requirements of this Order, and specifically Section II.I, **Non-Critical Retail** may may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory **Social Distancing Requirements**, except as prohibited or limited by this Order. Restricting interactions to curbside pick-up or delivery minimizes touch. **Non-Critical Retailers** are encouraged to continue curbside pick-up or delivery for longer term service wherever possible. **Critical** and **Non-Critical Retailers** must implement the requirements in Section II.I, in addition to the specific requirements in this Appendix.

**A.** **Critical** and **Non-Critical Retail** must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#). Refer symptomatic employees to the [CDPHE Symptom Tracker](#).
4. Post signage for employees and customers on good hygiene and other sanitation practices.

**B.** **Critical** and **Non-Critical Retail** must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.

5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

C. Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

**II.** Effective May 1, 2020, **Non-Critical Retail** may open at fifty percent (50%) capacity for in-person services if the business can demonstrate compliance with all of the following requirements:

**A.** **Critical and Non-Critical Retail** must continue implementing the measures within the workplace listed in Section I.A of this **Appendix A**, and in addition:

1. maintain 6 foot distancing between patrons and employees;
2. effectively symptom monitor employees as listed in Section II.I;
3. provide face coverings, and gloves as necessary and appropriate, to employees;
4. ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. provide dedicated, in-store hours for vulnerable or at-risk individuals.

**B.** **Critical and Non-Critical Retail** must implement the measures regarding employees listed in Section I.B of this **Appendix A**.

**C.** **Critical and Non-Critical Retail** must implement the measures to minimize disease transmission for customers listed in Section I.C of this **Appendix A** in addition to the following measures:

1. limit the number of customers on the premises as needed to make 6 foot distancing between customers attainable;
2. provide decals and demarcation for waiting area in lines that meet social distancing criteria;
3. create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
4. create signage to encourage the use of masks and gloves by customers while on the premises; and

5. provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

## APPENDIX B: FIELD SERVICES

I. Effective April 27, 2020, **Field Services** may resume if the business can demonstrate compliance with the requirements in Section II.I of this Order, in addition to the following requirements specific to **Field Services**:

A. Employers must implement the following measures regarding employees to minimize disease transmission:

1. adhere to all general rules or guidance on social gathering limitations when working out of the office;
2. implement procedures for field-based employees to monitor for symptoms and report-in to management daily on health status.
3. comply with the **Social Distancing Requirements** and maintain a 6 foot distance between employees and from their customers;
4. provide gloves and masks for any customer interactions or work being done in third-party home or office spaces;
5. When scheduling or conducting field services, either the employer or an employee must inquire whether third-party homes have individuals symptomatic for COVID-19 or have been in contact with known positive cases, and exercise caution when inside the home and interacting with anyone in the home if they do;
6. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, and location of contact, as well as the contact's phone number and/or email address;
7. require that all tools or equipment be sanitized after each customer visit;.
8. prioritize work accommodations for **Vulnerable Individuals**, prioritizing telecommuting;
9. provide guidance and encouragement on personal sanitation, including frequently washing hands. This guidance should include all of the following:
  - a. frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol;
  - b. cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve;
  - c. avoid touching your eyes, nose, and mouth with unwashed hands;
  - d. stay home if you're sick, and keep your children home if they are sick; and
  - e. clean high touch surfaces in your home, and personal items such as cell phones, using regular household products.

**B.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. provide estimates, invoices, receipts, and other documentation electronically to negate the need for paper;
2. provide contactless payment options in the field whenever possible;
3. encourage customers to maintain 6 foot distancing from field service employees; and
4. encourage customers to use facial coverings when field services are being conducted.

## APPENDIX C: NON-CRITICAL OFFICE-BASED BUSINESSES

**I.** Effective May 4, 2020, **Non-Critical Office-based Businesses** may resume at fifty percent (50%) of their in-office occupancy if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers must implement the following measures within the workplace to minimize disease transmission:

1. ensure a minimum of 6 feet of space between all desks and workspaces;
2. modify the flow of people traffic to minimize contacts, such as identifying doors for entry or exit only;
3. conduct standard office cleaning with increased frequency and supplement with sanitization of high touch areas, in accord with [CDPHE guidelines](#);
4. provide employees with cleaning and disinfecting products and guidance on daily workspace cleaning routines; and
5. post signage for employees and customers on good hygiene and new office practices.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. maintain in-office occupancy at no more than 50% of total by maximizing use of telecommuting and developing in-office rotation schedules;
2. minimize the number of in-person meetings and maintain 6 foot distancing in those meetings;
3. provide guidance and encouragement on maintaining 6 foot distancing and taking breaks to wash hands;
4. require gloves and masks for any customer interactions; and
5. allow telecommuting to the greatest extent possible.

**C.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. require 6 foot distancing measures wherever possible, such as marked space in check-out lines;
2. encourage customers to use facial coverings when on the business premises;
3. provide hand sanitizer at entrances and other high-traffic locations; and
4. implement hours where service is only provided to **Vulnerable Individuals** if possible.

## APPENDIX D: PERSONAL SERVICES

**I.** Effective May 1, 2020, **Personal Services** may resume if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers and sole proprietors must implement the following measures within the workplace to minimize disease transmission:

1. Employ strict hygiene guidelines and cleaning and disinfection procedures for all contact surfaces and tools, in accordance with [CDPHE Worker and Customer Protection Guidelines for Non-Healthcare Industries](#);
2. Ensure a minimum of 6 feet of separation between clients and customers, including services for pets, when not directly performing service;
3. Post signage for employees and customers on good hygiene and safety measures being taken; and
4. Minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. Services with close personal contact, such as beauty professionals, massage, etc., must implement the following:
  - a. wear a face covering and gloves at all times, or, if wearing gloves is not feasible or appropriate, meticulous hand washing;
  - c. change gloves and wash hands between every individual or pet served;
  - d. clean and disinfect all shared equipment and tools between every individual or pet served; and
  - e. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number and/or email address.
2. Personal services with low personal contact, such as movers or repair services, must implement the following:
  - a. maintain a minimum of 6 feet of separation between customers and adhere to social gathering limits of no more than 10 people. For real estate work, open houses are prohibited;
  - b. require face coverings and, if feasible, gloves for any customer interactions; and

- c. provide guidance on strict hygiene precautions to employees.

**C. Personal Services** must implement the following measures regarding customers to minimize disease transmission:

1. provide customer services by appointment only, do not allow walk-ins or waiting for an appointment, and limit all pet training classes or other activities associated with picking up pets to no more than 10 customers at a time and all following **Social Distancing Requirements**;
2. require customers to wear face coverings; if a customer does not have a mask, a "disposable mask" could be provided;
3. conduct symptoms check for all customers of services with close personal contact and decline to provide services to anyone who has symptoms. A sample form can be found [here](#); and
4. provide contactless payment options whenever possible.

## APPENDIX E: LIMITED HEALTHCARE SETTINGS

I. Effective April 27, 2020, **Limited Healthcare Settings** may resume if the healthcare entity can demonstrate compliance with the requirements of this Order, including Section II.I and may restart voluntary and elective surgeries and procedures in limited healthcare facilities and offices with required personal protective equipment (PPE) in accord with the priorities, requirements, and specific criteria below.

A. Employers and sole proprietors of **Limited Healthcare Settings** must implement the following measures within the overall workplace, including administrative and front office operations, to minimize disease transmission:

1. The practice must have access to adequate PPE in order to sustain recommended PPE use for its workforce for two weeks without the need for emergency PPE-conserving measures. If a practice proposes to extend the use of or reuse PPE, it must follow CDC guidance.<sup>1</sup>
2. The practice must implement strict infection control policies as recommended by the CDC.<sup>2</sup>
3. The practice must ensure a minimum of 6 feet of separation between clients and patients, when not directly performing service, with no more than ten (10) people in the facility;
4. The practice must post signage for employees and patients on good hygiene and safety measures being taken; and
5. The practice must minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.
6. Practices must maintain a plan to reduce or stop voluntary and elective surgeries and procedures should a surge/resurgence of COVID-19 cases occur in their region.

B. Employers of **Limited Healthcare Settings** must implement the following measures regarding employees to minimize disease transmission:

1. Services with close, direct personal contact must implement the following:
  - a. wear medical grade mask and gloves at all times;
  - b. change gloves and wash hands between every patient;
  - c. clean and disinfect all shared equipment and tools between every patient; and

---

<sup>1</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>

<sup>2</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html>

- d. maintain a detailed log of patient interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number
2. Services with low personal contact must implement the following:
  - a. maintain a minimum of six 6 feet of separation between customers and limit to no more than ten (10) people in the facility.
  - b. require face coverings and, if feasible, gloves for any customer interactions; and
  - c. provide guidance on strict hygiene precautions to employees.
3. The practice must require all administrative personnel to wear a facemask, that can be cloth if necessary. Masks may be removed when social distancing of at least 6 feet if possible (e.g., after entering a private office). In order to ensure staff can take off their masks for meals and breaks, scheduling and location for meals and breaks should ensure that at least a 6-foot distance can be maintained between staff when staff needs to remove their mask. It is important for healthcare settings to emphasize that hand hygiene is essential to maintaining employee safety, even if staff are wearing masks. If the facemask is touched, adjusted or removed, hand hygiene should be performed.

**C. Limited Healthcare Settings** must implement the following measures regarding customers to minimize disease transmission:

1. The practice must provide services by appointment only, do not allow walk-ins or waiting for an appointment;
2. The practice must require patients to wear face coverings; if a patient does not have a mask, a "disposable medical mask" could be provided;
3. The practice must conduct symptoms checks for all patients, decline to provide services to anyone who has symptoms, and refer them to their primary care physician. A sample form can be found [here](#); and
4. The practice must provide contactless payment options whenever possible;
5. The practice must follow social distancing protocols of maintaining at least a 6-foot distance between individuals wherever possible such as in waiting rooms and other small spaces, and should use physical barriers within patient care areas when possible.
6. The practice must appropriately schedule patients, so that providers have sufficient time to change PPE and ensure rooms and equipment can be cleaned and disinfected between each patient.
7. The practice should continue to maximize the use of telehealth and virtual office or clinic visits.

8. The practice should use virtual waiting rooms when possible, with patients who are able to wait in their cars not entering the office until they can be moved immediately to an exam room.
9. The practice should implement source control for everyone entering the office or clinic, including requiring all patients and visitors to wear a cloth mask when entering any healthcare building, and if they arrive without a mask, one should be provided.

D. As best practice, it is recommended that once voluntary and elective surgeries and procedures resume, **Limited Healthcare Settings** reassess their operations every two weeks, in order to ensure:

1. All of the above approaches and criteria are being met;
2. Procedures are prioritized based on whether their continued delay will have an adverse health outcome.
  - a. Voluntary and elective surgeries and procedures should be prioritized based on indication and urgency<sup>3</sup>;
3. Strong consideration is given to the balance of risks versus benefits for patients in higher-risk groups such as those over age 65 and those with compromised immune systems or lung and heart function;
4. All patients are pre-screened for COVID-19 risk factors and symptoms prior to delivering care, via telehealth when applicable; and
5. Compliance with the guidance and directives for maintaining a clean and safe work environment issued by the CDPHE and any applicable local health department for critical businesses is maintained, including compliance with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible.

---

<sup>3</sup> Urgent and emergent care should continue in accordance with OHA and CMS guidance.

## APPENDIX F: CRITICAL BUSINESSES

**Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

### 1. Healthcare Operations, Including:

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities
- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

### 2. Critical Infrastructure, Including:

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater

- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation, excluding private, short-term vacation-style rentals such as those arranged through an online hosting platform, including but not limited to VRBO or Airbnb, rented for a period of 30 days or fewer, homeowner rentals, and privately owned residences for rent, except if offered for use for the public health response.
- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain
- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection
- Flight schools, but only for the purpose of FAA-required pilot proficiency, and currency activities and practical checkrides, not for elective routine flight instruction

### **3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products
- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

#### 4. Critical Retail, Including:

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Liquor stores
- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products), excluding retailers of only health and nutrition-related products (vitamins, minerals, supplements, herbs, sports nutrition, diet and energy products)
- Establishments engaged in the sale of products that support working from home (this exclusion does not include businesses that primarily sell hobby craft supplies)

#### 5. Critical Services, Including:

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, automobile online sales with no touch delivery service, auto supply and repair (including retail dealerships that include repair and maintenance, but not in person retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries, with strict compliance with **Social Distancing Requirements** for employees and any attendees of services
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible. Houses of worship may remain open, however, these

institutions are encouraged to implement electronic platforms to conduct services whenever possible or to conduct smaller (10 or fewer congregants while ensuring 6 feet in between congregants), more frequent services to allow strict compliance with **Social Distancing Requirements**.

- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities
- Moving services
- In person group counseling or recovery meetings for substance abuse or behavioral health following social distancing of 6 feet and no more than 10 participants

## **6. News Media**

- Newspapers
- Television
- Radio
- Other media services

## **7. Financial and Professional Institutions, Including:**

- Banks and credit institutions
- Insurance and payroll
- Services related to financial markets
- Professional services, such as legal, title companies, or accounting services, real estate appraisals and transactions

## **8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

**9. Construction, Including but not Limited To:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals who provide services necessary to maintain the safety, sanitation, and critical operation of residences and other **Critical Businesses** or **Critical Government Functions**, and other essential services

**10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations
- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor (including maintenance and repair of ordinary household and business appliances but not in-person retail sales of such products)
- Automotive and bicycle repair
- Disinfection
- Snow removal
- Bail bonds agents
- Pest control

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics

- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**13. Educational Institutions that Provide Critical Services to Students and the General Public:**

- P-12 public school and private schools for the purpose of providing meals, housing, facilitating or providing materials for distance learning, and providing other essential services to students, provided that **Social Distancing Requirements** are observed.
- Postsecondary institutions, including private and public colleges and universities, for the purpose of facilitating distance learning, providing in person classroom or laboratory education for less than 10 students per classroom or lab in medical training fields only, or performing essential functions, provided that **Social Distancing Requirements** are observed, such as security, medical and mental health services, housing, food services, and critical research.

## **APPENDIX G: COUNTY VARIANCE REQUESTS**

Governor Jared Polis issued **Executive Order D 2020 044 Safer at Home** effective April 27, 2020. The key elements of the Order are that most people still stay at home as much as possible and avoid unnecessary social interactions; vulnerable populations continue to stay at home except to support or perform necessary activities or participate in critical government functions or critical businesses; there is limited reopening of postsecondary institutions, and certain business operations are permitted; people are still encouraged to stay within their county of residence or employment as much as possible; public gatherings of more than ten (10) persons are prohibited; and Coloradans are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public.

Any county that desires to apply for a variance from part or all of the executive order may do so after meeting the following criteria and submitting an alternative COVID-19 suppression plan to be approved or denied by Colorado Department of Public Health and the Environment (CDPHE), attention Executive Director, Jill Hunsaker Ryan, MPH.

Criteria for variance consideration:

- 1) The local public health agency endorses the alternative plan;
- 2) Local hospitals can verify that they have the capacity to serve all people needing their care; and;
- 3) The county commissioners (or other county-level governing body) vote affirmatively to adopt the alternative plan in place of the state Safer-At-Home order.

The local variance process allows communities that are not experiencing a high rate of transmission to tailor social distancing policies to local conditions, in order to promote community wellness and economic stability. To protect other communities and hospital systems statewide, it is paramount that the local variance process only be used when transmission is at a low enough level to be suppressed through testing and containment efforts to detect positive cases, ensure successful isolation and quarantine close contacts. Examples of local conditions that should be considered in seeking a variance include: a low number of new cases per day, cases declining for the past 14 days, declining positive tests as a percent of total tests for the past 14 days, low and stable case growth rate or equivalent, and having an early warning system to detect an increase in community spread or outbreaks, with triggers for tightening restrictions to prevent a breach of local hospital system capacity. Considerations and triggers should be documented in the plan submitted to CDPHE.

The following framework is being used by the State of Colorado to move between levels of social distancing. This may be helpful guidance in developing a local request:

**Colorado’s Framework for Social Distancing**

<b>Stay at Home</b>	<b>Safer At Home</b>	<b>Protect Your Neighbor</b>
<ul style="list-style-type: none"> <li>● Widespread suppression is required to stem exponential disease transmission</li> <li>● People are staying at home with limited exceptions</li> <li>● Healthcare/hospital capacity is still limited</li> <li>● Testing availability and containment capacity is still being built</li> <li>● People are encouraged to not travel between counties except for work or to obtain necessary services</li> </ul>	<ul style="list-style-type: none"> <li>● Disease has been suppressed and hospital capacity is not threatened.</li> <li>● Health care capacity is increasing</li> <li>● Testing availability and containment capacity are increasing</li> <li>● Most people still stay at home as much as possible and avoid unnecessary social interactions</li> <li>● Vulnerable populations stay home with limited exceptions</li> <li>● People are encouraged not to travel between counties except for work or to obtain necessary services</li> <li>● Public health has an early warning system to detect a significant increase in cases or greater demand for medical care</li> </ul>	<ul style="list-style-type: none"> <li>● Disease transmission is low</li> <li>● Healthcare capacity is robust</li> <li>● Testing availability and containment capacity are working at scale</li> <li>● It’s safer for people to socialize more normally, while taking significant precautions</li> <li>● Strong protections for vulnerable populations are still needed</li> <li>● Public health has an early warning system in place to detect a significant increase in cases or greater demand for medical care</li> </ul>

The Colorado Department of Public Health and Environment is available to provide technical assistance to any county considering a variance. The department will consider applications for variances based on the submitted plan’s rationale for a step down and the presence of an early

warning system with triggers for tightening back up. CDPHE reserves the right to approve or deny applications. Counties that choose to not comply with this executive order or an approved variance will be subject to the loss of emergency preparedness funds.

Hello,

How are things going with Leprino? I was wondering if they've provided a list of individuals yet or if you have a list of their cases?

Thanks,

Amanda

Hi Jason. I have a couple other questions.

1. Do these individuals work at the plant on the weekend?
2. Is everyone there full time or are some part time/PRN? I am wondering about other employment outside of Leprino.

Thanks! Tammy

wrote:

Tammy and Trish,

I hope your day is going better than mine.

We received results back from Fort Morgan this morning. I would like to schedule a call to discuss asap. Alternatively I am headed up to Fort Morgan around 12:30 today which would put me at the plant around 2. Could we meet there? We will need some assistance and meeting at the facility and doing a walk through would be helpful to us.

Hey Tammy,

Sorry for the delay.

Here is a draft survey we have for employer based outbreaks:

<https://weldtempevents.wufoo.com/forms/q4k2zks1n71ebb/>

You'll have to click through because additional items may expand, depending on the selection.

I would like to use an online survey as much as possible to avoid data entry but we are also likely going to offer paper surveys that can be faxed back.

Let me know what your thoughts are.

Hi Matt. There are 18 positives out of 68 tests on Sunday. We had a short call with Jason as he was driving to Fort Morgan for a meeting and look around.

Would be great if we used the same questions for each plant, this way Leprino would have consistent data if possible.

I do not want to make this difficult so wondering about using what you have used for JBS with a modification to ask about contacts from Cargill, JBS, etc.

Thanks a heap! Tammy

Thank you again for the conversation today.

Please find attached the proposal we discussed.

As additional follow-up items:

1) We will have a follow-up call tomorrow or Monday. Matt or Tammy to advise on the date and time.

- 2) Leprino agreed to share our current data for quarantined employees at both plants.
- 3) Leprino agreed to perform follow-up questionnaires for positive patients if Weld or Morgan county would like assistance.
- 4) I would like to propose a regularly scheduled conference call between the three of you, our Plant HR Managers, Denver HR and myself. If you are amenable to that please advise on a proposal for how often and when.
- 5) Please let me know when you would like to visit the plants. I am available all next week.
- 6) We will be executing our plan tomorrow and will start with testing about 120 people between the 2 plants.

Kind Regards,

Jason

Tammy Hort <tammyh@nchd.org>

Chantelle,

Thanks so much for letting us know what the plan is for testing for Cargill. It sounds great. Glad Kelli was able to connect with the state lab. And thank you Catherine--I understand about moving targets. If there's anything we can do on our end, just let us know. Have a good evening! Trish

On Wed, Apr 29, 2020 at 3:05 PM Chantelle Johnson

wrote:

Trish – thanks for all your help and cooperation these past few weeks.

I have been on the phone with Kelli at Marathon – they have been in touch with Patrick at the state Health Department and are expected to receive 200 test kits today. We will send symptomatic employees over to Marathon to be tested as they

screen out of our process. A courier will pick up the specimens at Marathon and transport to the State Lab for processing. We hope to start this early next week. That meets our testing needs at this time.

Cathy is working on getting you the data of our employees currently out on quarantine and isolation – we will include name, last day work, and reason why they are out. It is a moving target as we add new folks, bring those back to work that are ready, etc. Cathy is doing some fine tuning and should have that to you in the next day or so.

Again - thanks for all your help, we appreciate it.

**[EXTERNAL]** This email came from outside of Cargill. Do not click links or open attachments unless you recognize the sender. If you suspect this is spam, send this email as an attachment to [spam@cargill.com](mailto:spam@cargill.com)

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state

lab

- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plan or become symptomatic during the day. They would also recommend testing for close contacts of symptomatic people, even if those close contacts aren't symptomatic
- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

Hello,

I wanted to let you guys know that I'll be updating numbers on our Outbreak page for Cargill. I found 60 cases in CEDRS with employment data as Cargill.

Trish, are you still in communication with Cargill? How are they doing?

Thank you Tammy for being so thorough with your investigations. Please let us know how we can help you with data entry if you need it!

Good afternoon,

The plant manager for Cargill in Fort Morgan called me today and they have some questions regarding testing. Who would be the best person to direct these to? These are the questions:

1. Would Cargill be able to get one of the Abbott Diagnostic rapid testing devices and what would be the requirements?
2. If rapid testing is not available, where would they send tests that they collect on site? I did say the CDPHE lab is accepting samples as well as Quest and LabCorp
3. They do have a 3rd party health care provider located in Fort Morgan (Marathon Health) that could assist with collection, however they are concerned about having adequate PPE and not sure how to procure adequate PPE since they may not be deemed a priority when it comes to distribution/supply chains
4. Not a question but just some information: Cargill would test any employee that was either symptomatic or had some risks identified from their screening tool--basically anyone that they would ask to either isolate or quarantine based on the current screening/temp checks they have in place for any staff coming into the plant.

I believe Cargill corp is having a meeting about this today so as I hear more I'll loop you in. Thanks! Trish

Hello,

I just had 2 things to follow up on regarding Cargill.

1. We received a message from a physician at Salud and they are receiving multiple calls per day from patients involved in the packing plant-associated outbreaks who have been told to obtain work release authorization from their doctors in order to return to work.

- Do you know what Cargill is recommending to their employees? Cases should not require doctor authorizations to return to work as long they met that 7 day minimum requirement. This is a burden on the healthcare system if cases are asking doctors to "clear" them.

2. We need a line list of cases that are employees of Cargill, at the very least we need updated numbers on how many are confirmed cases and how many are probable.

Thanks,

Amanda

Hi Scott. Is it possible to have a copy of your line list of employees that have been tested, quarantined, isolated? State health is asking if there is a possibility to see your data.

Thanks so much. Tammy

Hi Kim,

We were contacted by Lori Jane with Fox31 today. She is asking if we are in contact with someone at Leprino? My plan was to let her know that we are collaborating with Leprino Foods, offering tech and that you have implemented CDC guidance processes previously. And to give them your contact information. Would you like to suggest something different? Please give me a call if you would like

Thanks,  
Mary

Mary Brumage <maryb@nchd.org>

Hi Jason,

Thank you for this information. Would it be ok if my PIO, Mary, (cc'd here) contacted you in regards to some requests from media re: Leprino? If not you, could requests to? We would like to work in partnership so we try not to answer questions about specific company info unless the company is in agreement. Thanks!

Subject: Notes from Call

Mel asked me to keep notes on the 11:00 call. My desk phone stopped working where the notes end. It stopped one other time during the call, but only for a few seconds. I am unsure why it stop used correct? So, if you have any changes or additions please feel free to add them.

Hello LPHA Partners,

We are so grateful for the incredibly hard work of you and your teams to control COVID-19 in Colorado and to protect us all. Thank you for all you are doing!

Epi Team 2 at CDPHE has reorganized and expanded to better support the transition for local public health agencies to lead COVID-19 outbreak investigations and now include the outbreak epis as part of our teams. This shift in roles will allow us to provide additional technical assistance, coordination and subject-matter expertise support. Please see the UPDATED team 2 roster below when emailing us!

For newly reported outbreaks, the investigations will be led by the appropriate LPHA as outlined in the [COVID Outbreak Response Responsibilities](#) document shared on the LPHA call Tuesday. We will designate a CDPHE Team 2 member as a point of contact for each outbreak as outlined in [COVID Outbreak Response Responsibilities](#) document.

At the beginning and end of an outbreak, LPHAs should ask facilities to complete an [Outbreak Form](#). LPHAs should also obtain [line lists](#) from facilities each Monday (line lists should be current through Sunday). LPHAs should share these line lists with the CDPHE Team 2 point of contact for the outbreak by noon every Tuesday.

Each week, the CDPHE point of contact will enter data from the Outbreak Form and updated line list into the internal CDPHE outbreak database by Wednesday morning. New outbreaks will be entered into the outbreak databases within 24 hrs of notification. This CDPHE outbreak database will be used to compile aggregate probable and confirmed case data for reporting to the public.

For existing outbreaks, we are developing a plan to transition those to the LPHAs with appropriate support and data transfer. As we iron out the details we will share this transfer to individual LPHAs in the next week.

Just in case we wind up playing phone tag:

At Cargill, I have a few issues.

I have heard a rumor that if the employee did not actually get tested for COVID and cannot provide a positive test, they are not being paid for their time off. From our direction at the clinic level we are not a mass testing site, we are only allowed to test health care workers, prison staff, and those that are sick enough to go to ER/be admitted (we don't have that many swabs). We know there are positive patients there, and if they are symptomatic we are assuming that it is COVID.

What do we do with that?

Where is our closest mass testing site?

Thanks,

Sandra Boone NP

----- Forwarded message -----

From: **Trish McClain** <trishm@nchd.org>  
Date: Wed, Apr 15, 2020 at 4:32 PM  
Subject: Efforts made at Cargill-site visit notes from 4/14  
To: Ziegler - CDPHE, Katie <katie.ziegler@state.co.us>, Amanda Metz - CDPHE <amanda.metz@state.co.us>, Alden - CDPHE, Nisha <nisha.alden@state.co.us>, Ginger Stringer - CDPHE <ginger.stringer@state.co.us>, Tammy Hort <tammyh@nchd.org>, Jennifer House - CDPHE <jennifer.house@state.co.us>

Here are my notes, it's what I covered in the call today but thought it may be helpful for you to have in written form. Thank you!

Upon arrival at the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, googles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they

use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Tammy

We received a call in our lab from Cargill Occupational Health requesting results on one particular patient. We are not allowed to release that info just like any other medical record – do you know if there is something set up to release results to them?  
Thanks

*Jackie Danielsen RN, CIC, IPEH*

In the meantime these were some of the questions we have that we can discuss on the call tomorrow.

Effectiveness of current interventions.

Are exposed employees (work or home) still be excluded/quarantined?

What does outbreak epi curve look like? Stable, increasing, decreasing? What's the most current case count of confirmed cases? Do we know how many probable cases are associated with Cargill?

What are triggers for closing the facility or other more aggressive outbreak control?  
Does the facility know to not hire anyone from JBS right now?

To: Tammy Hort RN, CIC <tammyh@nchd.org>, Laura Bacon <laurab@nchd.org>  
Cc: Alli Howe <allih@nchd.org>

We've had several Cargill questions and rumors yesterday and today. Kandi also mentioned getting several calls on the Spanish line yesterday and Mickey said she has also got several Cargill calls. What would you like us to tell these callers? Should we transfer them all to both of you or can we give them some info?

"The health dept set up a testing site for Cargill"

"My family member was exposed to someone who was positive at Cargill- the positive case said the health dept said we have to get tested"

"I have to get tested because I work in food service for Cargill"

"Cargill sent home 50 employees with fevers"

Etc, Etc, Etc.....

Thanks,  
Christine

Scott is really working at making the powers that be to understand the importance of infection control in this situation. It is a real benefit to have him there.

We also have a positive Eben Ezer employee that I will interview shortly. I am also investigating the death more after speaking to CDPHE. It will not be reported until I change the status - I have control over something today!

On Mon, Apr 6, 2020 at 11:16 AM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

I just spoke to Scott Reyez. They are kicking booty! When an employee calls in as a positive, the direct family members that work at the plant are sent home for the 14 day quarantine - and paid for those 14 days. He is even able to trace back carpooling and then those people are quarantined! He has a whole board that shows how the positives are intertwined.

They are able to space some of fab employees 6' apart but in some areas that is not possible. All fab employees are wearing a mask or scarf. Cleaning handrails and doorknobs every hour, lunch room has changed the seating so people are not gathering together, cleaning offices several times a day.

They are doing great. Scott and I will continue to report positives so he can take care of the plant and we can take care of the rest.

Tammy

Hi Scott. Mel let me know that you gave him a call about another employee that reported a positive test.

If you have questions, please contact me. I can tell you that we had 10 new cases reported in our region today so are working through the investigations.

Thanks. Tammy

Trish, Mary and Michelle

I wanted to let you know we are going to release the proactive statement below. Since we don't know the exact number that will be reported on through the state, we intentionally left out the exact number. We will share how many employees we tested (nearly 390) when asked. I plan to share by 12:45 to be ahead of the state.

Let me know if you need anything else from us and feel free to send any media inquiries that you receive about this to me.

Thanks again for your partnership. Kim

## Media Statement

Consistent with our desire to prioritize the health and safety of our employees, Leprino Foods took the proactive step of testing every employee in our Fort Morgan plant. We conducted the testing in partnership with the Northeast Colorado Health Department. As an essential business, we took this unprecedented approach because we had concerns about elevated COVID-19 activity in the Fort Morgan area and the lack of publicly available testing.

So far, approximately 80% of our workforce received a negative result for the SARS-CoV2 virus. Those employees who tested positive have been told that they are not to return to the workplace until they have been medically cleared. Significantly, nearly half of those who tested positive were asymptomatic. We believed that testing our entire workplace was necessary to ensure that we removed those asymptomatic positive cases from our workforce and pave the way for eventually returning to full operations at the plant.

As a result of this testing and the deep cleaning and disinfecting of the facility during the course of this week, we are planning to resume partial operations in a phased approach over this coming weekend. Employees with a negative test result and no symptoms will return to work. We will continue ongoing monitoring of all our employees, including targeted testing. We will also continue with daily temperature checks, health questionnaires, social distancing, wellbeing checks, and heightened cleaning protocols.

wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

**MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

## SANITATION

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Subject: FAQ + Staff Extension List  
Hello all,

Just a small update. Under **Complaints about Businesses Violating Public Health Orders** it should have Mickey George x2226, as she is back today. So, if you could send those calls to her versus Amber that would be great! The updated FAQ + Extensions List is attached.

Also, Josie G is Teleworking today. She has assured me that if she gets a COVID Spanish message on her voicemail it will be sent to her email, and she will follow-up.

Thanks for doing great work! Any questions, just let me know.

Subject: RE: Heads up: Leprino Foods

Thanks Trish. Still a significant number. And these are cumulative from beginning of March or only from the testing we did beginning April 19<sup>th</sup>?

We are thinking around 60-70. The ones that have come through as of last Friday, 4/24 are listed in the state disease reporting system so the state does have access to that data. Trish

wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases

- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

## SANITATION

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. For more information, please visit [www.leprinofoods.com](http://www.leprinofoods.com).

Please let me know if you have questions.

Thank you,

Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary

wrote:

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the

Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Hi Scott. You just spoke to our new nurse concerning guidelines for new nurses. I am sharing the CDC site for healthcare workers which should provide information that may be helpful to your agency.

I would recommend these new staff be monitored with temps and symptom check prior to shift start every day; and having someone in medical take the temps and self monitor/record temps in the evening and on days off.

CDC: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

If you need anything else, my direct contact information is below and my cell is 571-1570.

Subject: Cargill Questions  
To: [melb@nchd.org](mailto:melb@nchd.org) <[melb@nchd.org](mailto:melb@nchd.org)>

Good day Mr. Bustos –

Thanks for talking with me this morning, your time is valuable and I know you are very busy with all that is going on. Tyler Luft our General Manager, Gene Guerrero our EHS Manager and myself wanted to reach out with a few questions and get your expert opinion, guidance and thought on a few items. As an “essential business” in this community we want to maintain best practices and keeping all involved in daily operations safe.

1. If a employee were to test positive for COVID-19, would Cargill be notified and instructed to take further measures?
2. If a employee were to test positive for COVID-19, what is the Health Dept vs. Cargill's responsibility related to cleaning/disinfected; in addition to the efforts already in place at Cargill?
3. If there happen to be more than one employee that would require isolation until they are able to find transportation home, is it reasonable for those individuals to be seated in the same isolation room with appropriate PPE i.e. mask and social distancing?

These are a few of our questions. As we are able to talk I'm sure a few more will come to mind. This is all very new to all of us and I realize all the answers may not be right there, but it will be good to discuss and learn. Let me know when a good time will be to have a Skype call or Conference call. I know all are very busy, so its whenever you all have a moment.

*Best,*

*Scott Reyez, BSN, RN, CCRN*

*Health Services Manager*

*1505 E. Burlington Ave., Fort Morgan, CO*

Hi,  
I am the Medical Director at Ebenezer and am seeking some guidance . They continue to have new cases of COVID 19, and I have a few suggestions but need some expert advice. They also have met resistance from the Banner Facility in Brush re testing ; they often refuse to test .  
I also am the Medical Director for the Washington County Nursing home and care for residents there.  
My cell phone - 970-481-6887, Akron Clinic-I'll be there on Monday-970-345-6336.  
I know you are very busy so just when you have a chance or you can direct me to other sources .  
Thank you,  
Dr.Caitlin Ahern

Hi Tammy,

Thanks for taking the time to update us yesterday. I wanted to circle back to see if you had a chance to send me the Eben Ezer line list yet.

So far I have not yet received anything. We're hoping to get these by noon today to update the database.

If they were able to send you an updated list yesterday, that would be great for us to have. If not, we would appreciate the line list you mentioned receiving from last Thursday.

Thank you!

**Subject:** Re: New CDPHE outbreak point of contact

Hi Stacey. I did receive the line list from Eben Ezer yesterday afternoon. I am comparing CEDRS cases with the staff and resident list. They are reporting via paper and using the line list form that was available in the first guidance tools. There is a staff member available today in our office that is going to put this info into the Excel spreadsheet I was given by Dr. Gershman.

Once that is done, I will share with you.

Tammy

Hi Tammy,

As my time working on COVID response at CDPHE ends on Friday, your new point of contact here (starting today) is **STACEY MARTIN** (on loan from CDC-Fort Collins) who will provide excellent support.

Her email is: [zmt0@cdc.gov](mailto:zmt0@cdc.gov)

Please send Stacey the next line list, when available.

Nice working with you, and best regards,

Ken Gershman

Subject: Symptom Free Residents  
To: Tammy Hort RN, CIC <tammyh@nchd.org>  
Cc: Marilyn Ford Theresa Gonzales <

Hello Tammy,

Question for you, we have a few residents who are now free of symptoms. We would like to know your recommendation on when we should remove isolation precautions. Do you feel we can follow the 7 and 3 day rule?

Shelly M. Griffith, CPA, NHA

I'm afraid I sent you a duplicate sheet yesterday. Our count is 22 positive, 2 negative. The one sheet that I sent were all included on other sheets. Please double check for me. Thanks.

Subject: Outbreak number and a chat with Marilyn

Hi Shelly, the outbreak number for Eben Ezer is **2020-44-001**.

Also, would it be possible for me to chat with someone this afternoon to go through a few names I have of possible residents? Not all the tests coming through EMCH have the facility address as the resident's address. I just want to make sure I have everyone correct.

I also have a couple employees identified so far. There may be more as we contact people.

Thanks. Tammy

Good Morning Tammy,

Below is some information on one of our employees

Onset of symptoms = April 6

Fever free = April 12, 13, 14

Still having headache, dizziness and shortness of breath. Cough has almost subsided.

What are you seeing for symptom resolution and what is your recommendation on a return to work for the above employee with these remaining symptoms? Carolyn and I are discussing this employees return to work.

I just wanted to reach out and let you know we appreciate you both. You are working so hard and have been so available to us. While today's meeting did not provide additional suggestions we did meet following to review all we have done or should be doing. With our physical layout and current construction on the campus I feel we have reduced traffic flow as much as practically possible. Tomorrow will be day 10 for our first group of residents that presented symptoms. Again we appreciate you and please let us know if other questions or ideas present.

Good morning to you both. I just had a short conversation with the Administrator at Eben Ezer - their situation has grown exponentially. I don't know what to tell them to do at this point.

Are you both available for a conference call with their admin team and me today?

Thanks. Tammy

Subject: Re: Eben Ezer line lists  
To: Tammy Hort RN, CIC <tammyh@nchd.org>

Hi Tammy - thanks again for sending the line lists. I have a few questions:

- 1) what does the asterisk mean next to the 1st resident - GK ?
- 2) Looks like the 3rd resident (MR) has had UTI symptoms since Feb 19, but otherwise no new symptoms consistent with COVID (and then tested positive) ?
- 3) Are there any symptomatic residents who have not been tested or have test results pending ?  
If so, they should be included on the line list as well.
- 4) Is staff person KG the one who exposed the hallway of residents ?
- 5) Where does the 2nd positive staff person (CW) work in relation to KG, and to the hallway of positive residents ?

**Please let me know if you and/or the facility would like another call with one of our senior healthcare outbreaks staff (e.g., Janell Nichols).**

Regards,  
Ken G  
CDPHE

To: [\\_All Employees](#) <[\\_AllEmployees@nchd.org](#)>

Eben Ezer Lutheran Care Center in Brush has prepared a press release and NCHD assisted to send it to the media this morning.

Mike thought it might be a good idea for all staff to be aware.

Alli, you might want to prepare some guidance for staff in case they receive calls with questions.

Thank you.

To: Tammy Hort RN, CIC <tammyh@nchd.org>

So, as you already know, this meets our criteria (2 or more positive residents) for a CONFIRMED outbreak and will be added to our official CDPHE (webpage) stats (aggregate count) tomorrow. It will also be reported to the State Emergency Operations Center which will be releasing facility names at some point.

Please forward this info to the Director/Administrator of Eben Ezer Lutheran Care Center.

Happy Monday! I hope you were able to catch a little break this weekend!

I am in the process of entering an outpatient from EMCH info CEDRS and Linda Thorpe wanted me to let you know she is a CNA at Eben Ezer. I am trying to give Priscilla a little break and entering my own so please let me know if I am messing something up or forgetting some important info! Starting tomorrow, we will be sending everything to Children's which should give us a 24 hour turnaround!!

Thanks!!

I wanted to let you know we are going to release the proactive statement below. Since we don't know the exact number that will be reported on through the state, we intentionally left out the exact number. We will share how many employees we tested (nearly 390) when asked. I plan to share by 12:45 to be ahead of the state.

Let me know if you need anything else from us and feel free to send any media inquiries that you receive about this to me.

Thanks again for your partnership. Kim

#### Media Statement

Consistent with our desire to prioritize the health and safety of our employees, Leprino Foods took the proactive step of testing every employee in our Fort Morgan plant. We conducted the testing in partnership with the Northeast Colorado Health Department. As an essential business, we took this unprecedented approach because we had concerns about elevated COVID-19 activity in the Fort Morgan area and the lack of publicly available testing.

So far, approximately 80% of our workforce received a negative result for the SARS-CoV2 virus. Those employees who tested positive have been told that they are not to return to the workplace until they have been medically cleared. Significantly, nearly half of those who tested positive were asymptomatic. We believed that testing our entire workplace was necessary to ensure that we removed those asymptomatic positive cases from our workforce and pave the way for eventually returning to full operations at the plant.

As a result of this testing and the deep cleaning and disinfecting of the facility during the course of this week, we are planning to resume partial operations in a phased approach over this coming weekend. Employees with a negative test result and no symptoms will return to work. We will continue ongoing monitoring of all our employees, including targeted testing. We will also continue with daily temperature checks, health questionnaires, social distancing, wellbeing checks, and heightened cleaning protocols.

We are thinking around 60-70. The ones that have come through as of last Friday, 4/24 are listed in the state disease reporting system so the state does have access to that data.  
Trish

On Tue, Apr 28, 2020 at 5:26 PM Kimberly DeVigil

wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility

- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

## SANITATION

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. For more information, please visit [www.leprinofoods.com](http://www.leprinofoods.com).

Please let me know if you have questions.

Thank you,

Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary

On Sat, Apr 25, 2020 at 2:13 PM Kimberly DeVigil

wrote:

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

We are thinking around 60-70. The ones that have come through as of last Friday, 4/24 are listed in the state disease reporting system so the state does have access to that data. Trish

On Tue, Apr 28, 2020 at 5:26 PM Kimberly DeVigil wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### **SANITATION**

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Trish, Mary and Michelle

I wanted to let you know we are going to release the proactive statement below. Since we don't know the exact number that will be reported on through the state, we intentionally left out the exact number. We will share how many employees we tested (nearly 390) when asked. I plan to share by 12:45 to be ahead of the state.

Let me know if you need anything else from us and feel free to send any media inquiries that you receive about this to me.

Thanks again for your partnership. Kim

### Media Statement

Consistent with our desire to prioritize the health and safety of our employees, Leprino Foods took the proactive step of testing every employee in our Fort Morgan plant. We conducted the testing in partnership with the Northeast Colorado Health Department. As an essential business, we took this unprecedented approach because we had concerns about elevated COVID-19 activity in the Fort Morgan area and the lack of publicly available testing.

So far, approximately 80% of our workforce received a negative result for the SARS-CoV2 virus. Those employees who tested positive have been told that they are not to return to the workplace until they have been medically cleared. Significantly, nearly half of those who tested positive were asymptomatic. We believed that testing our entire workplace was necessary to ensure that we removed those asymptomatic positive cases from our workforce and pave the way for eventually returning to full operations at the plant.

As a result of this testing and the deep cleaning and disinfecting of the facility during the course of this week, we are planning to resume partial operations in a phased approach over this coming weekend. Employees with a negative test result and no symptoms will return to work. We will continue ongoing monitoring of all our employees, including targeted testing. We will also continue with daily temperature checks, health questionnaires, social distancing, wellbeing checks, and heightened cleaning protocols.

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

#### **SANITATION**

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary

wrote:

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We

conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.

- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Subject: RE: Heads up: Leprino Foods

Trish, Mary and Michelle

I wanted to let you know we are going to release the proactive statement below. Since we don't know the exact number that will be reported on through the state, we intentionally left out the exact number. We will share how many employees we tested (nearly 390) when asked. I plan to share by 12:45 to be ahead of the state.

Let me know if you need anything else from us and feel free to send any media inquiries that you receive about this to me.

Thanks again for your partnership. Kim

Media Statement

Consistent with our desire to prioritize the health and safety of our employees, Leprino Foods took the proactive step of testing every employee in our Fort Morgan plant. We conducted the testing in partnership with the Northeast Colorado Health Department. As an essential business, we took this unprecedented approach because we had concerns about elevated COVID-19 activity in the Fort Morgan area and the lack of publicly available testing.

So far, approximately 80% of our workforce received a negative result for the SARS-CoV2 virus. Those employees who tested positive have been told that they are not to return to the workplace until they have been medically cleared. Significantly, nearly half of those who tested positive were asymptomatic. We believed that testing our entire workplace was necessary to ensure that we removed those asymptomatic positive cases from our workforce and pave the way for eventually returning to full operations at the plant.

As a result of this testing and the deep cleaning and disinfecting of the facility during the course of this week, we are planning to resume partial operations in a phased approach over this coming weekend. Employees with a negative test result and no symptoms will return to work. We will continue ongoing monitoring of all our employees, including targeted testing. We will also continue with daily temperature checks, health questionnaires, social distancing, wellbeing checks, and heightened cleaning protocols.

On Tue, Apr 28, 2020 at 5:26 PM Kimberly DeVigil wrote:

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19
- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

### **SANITATION**

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. Hi Kimberly,

I was wondering if this was a press release or if this was just for our information? I have a call from Colorado Business Journal asking if there are positive cases at the plant and why you decided to do testing and close the plant? I don't want to share anything you sent to us in confidence.

Mary

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the higher level of COVID-19 activity within the Fort Morgan community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a contact at the Fort Morgan Times, please let me know and I will reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Subject: RE: Heads up: Leprino Foods

This was for your information, but it is a summary of the information we sent out.

Do you all have any ideas yet on what number will be shared tomorrow?

Here is what we shared with reporters:

News Desk:

Our top priority is providing Leprino Foods employees with a healthy and safe workplace and reducing the risk of COVID-19 exposure to our workforce. In partnership with the Northeast Colorado Health Department, we proactively began onsite COVID-19 testing of our Fort Morgan plant employees based on our risk assessments. We conducted this proactive testing in this facility due to the higher level of COVID-19 activity within the community and the plant. There are approximately 350 employees who work at the plant and testing should be completed on Monday, April 27. Due to the ongoing testing and awaiting test results, we are not in a position to share exact numbers at this time.

As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the Fort Morgan plant beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time we will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

During this time of closure, the following actions will be taken:

- We will do a deep cleaning of the entire facility
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26
- Employees who would otherwise have been able to work will be paid during this closure
- In addition, employees at high risk due to age (age 65 or above) will remain out of the workforce with pay until further notice

It is important to note that sanitation and hygiene in our plant environments are robust on a normal basis, as it is extremely important to ensure the safety of our food. We have stringent requirements for PPE, enhanced handwashing protocols, and plant automation that reduces the number of people on our production floors and creates social distancing. During the COVID-19 situation, beginning in March, we have further enhanced our sanitation processes and instituted a number of other protocols, such as:

#### **MINIMIZING RISK**

- Temperature check requirements when entering the facility
- Employee health questionnaire when entering the facility
- Adjusted attendance guidelines to encourage sick employees to stay home
- Supplemental pay offerings for employees required to be off work due to COVID-19

- Increased COVID-19 communication including announcements, postings, and video updates
- COVID-19 employee questions and suggestions box
- Detailed employee exposure risk assessment process applied to situations with confirmed positive COVID-19 employee cases
- Wellbeing checks
- Social distancing
- Enhanced PPE requirements (All Plant employees are required to wear nose and mouth coverings at all times)

## SANITATION

- In addition to the already robust cleaning and sanitation in our plants, we have increased daily sanitation of common areas and surfaces
- Implementation of detail cleaning for targeted areas identified as increased risk for exposure

Quote from NCHD:

"Leprino has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine as needed. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Leprino has made employee health a priority and their practices are an example for other food industry companies to follow." Trish McClain, Public Health Director for Northeast Colorado Health Department (NCHD)

Also here is our boilerplate for your info:

Leprino Foods Company, headquartered in Denver, Colorado, is a global leader in the production of premium-quality cheese and dairy ingredients. Leprino Foods is the largest producer of mozzarella cheese in the world and a leading manufacturer of lactose, whey protein and sweet whey. For more information, please visit [www.leprinofoods.com](http://www.leprinofoods.com).

Please let me know if you have questions.

Thank you,

Kim DeVigil

Thanks, Michelle, I appreciate it.

One quick follow up: Of the 262 positive cases in Logan County (as of yesterday afternoon), how many are inmates at the Sterling Correctional Facility?

Elise

On Mon, Apr 27, 2020 at 1:44 PM Michelle Pemberton <michellep@nchd.org> wrote:

Good afternoon, Elise,

So far the effect on staff at the Sterling Correctional Facility has been minimal. We are continuing to monitor the COVID-19 cases within the community.

Since April 16, NCHD has coordinated with the Sterling Regional MedCenter (SRMC), the Logan County Emergency Manager and other local officials regarding this situation. SRMC had already been working with the Department of Corrections prior to the conversation we had with all parties on April 16. Steps taken by the Sterling Correctional Facility have been effective in protecting staff members thus far. SRMC has a Surge Plan in place but have had no unusual concern about the effects they may see as a result of the outbreak at the Sterling Correctional Facility.

Please let me know if you have any further questions or concerns.

Subject: Denver Post on outbreak at Sterling facility  
To: <trishm@nchd.org>, <maryb@nchd.org>

Hi Trish and Mary,

My name is Elise Schmelzer and I'm a reporter at The Denver Post. I'm reaching out because I'm writing a story about the COVID-19 outbreak at the Sterling Correctional Facility. I wanted to see if someone with Northeast Colorado Health Department had a few minutes today to talk to me about the impact an outbreak in the prison would have on local operations and capacity, if any at all.

I'm primarily thinking of DOC staff who live in the community and work in the facility. Are you guys preparing for an uptick in cases connected to the prison?

Let me know what you guys think. I can be reached here or at

Thanks,  
Elise

Trish, we have been talking about posting the Eben Ezer press release on our website. One suggestion was to put a button under the picture of cases that when clicked on goes to that press release (Spanish would be below it). Or we could just put a link to Eben Ezer's website.

I know we need to ask Shelly before we do anything. I guess I wanted your thoughts on this matter. Either I am tired today or I am just on the fence about a lot of stuff. I attached a screen shot of what I am talking about in regards to the location.

Thanks.

Shelly,

I don't believe that there will be a broadcast of locations of LTC facilities by the state and I think there is still time for Eben Ezer to notify everyone that we talked about yesterday. CDPHE is trying to get a big picture look at LTC in the state for the governor. We will do our best to support you, your staff, residents and families through this process. I think it would still be helpful to have our call tomorrow morning so that we can coordinate how to do a thoughtful, thorough release that is factual and accurate and shows what a good job your facility is doing to keep residents and staff safe. We'll get through this together. Thanks! Trish

On Thu, Apr 9, 2020 at 12:36 PM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

Hi Shelly, CDPHE is asking for all LTC outbreak forms to be submitted ASAP so wanted to let you know I am going to submit in a few minutes.

Also, would whomever is the keeper of the staff and resident line lists please fax me a copy to 522-1412 - does not matter how complete.

Thanks so much.

Tammy

Shelly,

I don't believe that there will be a broadcast of locations of LTC facilities by the state and I think there is still time for Eben Ezer to notify everyone that we talked about yesterday. CDPHE is trying to get a big picture look at LTC in the state for the governor. We will do our best to support you, your staff, residents and families through this process. I think it would still be helpful to have our call tomorrow morning so that we can coordinate how to do a thoughtful, thorough release that is factual and accurate and shows what a good job your facility is doing to keep residents and staff safe. We'll get through this together. Thanks! Trish

On Thu, Apr 9, 2020 at 12:36 PM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

Hi Shelly, CDPHE is asking for all LTC outbreak forms to be submitted ASAP so wanted to let you know I am going to submit in a few minutes.

Also, would whomever is the keeper of the staff and resident line lists please fax me a copy to 522-1412 - does not matter how complete.

Thanks so much.

Tammy

Subject: Re: Set up visit to Cargill facility

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

On Thu, Apr 16, 2020 at 1:02 PM Hale, Christa R. (CDC/NIOSH/WSD) <hgk5@cdc.gov> wrote:

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,

christa

Subject: Re: CarGill Case Numbers

I think we should put in there some place for numbers--something like "as of (date) Cargill has been notified of \_\_\_ positive results for employees and have placed \_\_\_ employees on isolation based on symptoms reported or assessed during their screening process. Cargill has also placed \_\_\_ employees in quarantine because of potential exposure either at the plant or during carpooling." This can show how proactive and far reaching they are really trying to be. Dan and/or Tyler can help us with the numbers. T

Here are my notes, it's what I covered in the call today but thought it may be helpful for you to have in written form. Thank you!

Upon arrival at the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different

entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Good afternoon, Ben,

Trish McClain, our Public Health Director passed along your email asking about Cargill.

First, I want to make sure you have updated contact information for our agency. Mary Brumage and myself are the Public Information Officers for NCHD during our COVID response. Mary's email is [maryb@nchd.org](mailto:maryb@nchd.org) and her phone is 970-522-3741 ext. 1257. My information is [michellep@nchd.org](mailto:michellep@nchd.org) and my phone is 970-522-3741 ext. 1239.

In regards to Cargill, our investigation into exact numbers is ongoing but there are employees that have tested positive. NCHD is maintaining technical assistance to Cargill and other businesses in Fort Morgan to ensure protocols and practices are followed in order to keep their employees safe. We are working with Cargill management and our director along with other public health professionals were conducting a site visit this afternoon and I don't have any additional information to share with you at this point.

Thank you.

Hi, Trish –

My name is Ben Warwick, and I'm the Senior Assignment Editor at CBS4 in Denver. I tried reaching out to Jessa Sage, the listed PIO, but it seems the email address listed is no longer valid. We have gotten a report that at least one Cargill employee at the Fort Morgan plant has tested positive for COVID-19. Has NCHD received any reports about a positive case at the plant? What are the steps the county is taking to mitigate any outbreak at the plant? Please reply all as our Assignment Desk is copied on this email, and if possible forward the best email/contact information for you or your public information officer. Thank you so much.

Subject: Re: Cargill in Fort Morgan

Thank you for your reply. I will send this on to Luke with your contact information and he can connect with you for further info if he would like. We will incorporate some of this information in our press release as well, which will probably go out tomorrow. We will make sure you see it before we send it out. Thanks so much for your help with this. Trish

wrote:

Thanks,

We are eager to share our efforts with folks through whatever channel we can. I've outlined our efforts below which you can include in your release. You can also give Luke my info and I can talk with him directly. I also spoke with a reporter, Jack Harvel, from the Fort Morgan times to share our information, but haven't seen a story from him post yet. I lived in Denver for 7 years and have worked with Luke previously.

At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.

Thank you so much for the partnership on this.

Cheers,  
Daniel Sullivan

Nice to virtually meet you Dan.

I emailed Luke back yesterday to say I was checking in with my team and would let him know if we could answer any of his questions. We haven't agreed to any kind of interview but thought it may be helpful to do a general press release to help explain the increase in positive cases in Morgan County. There has been a lot more testing in Morgan County compared to the other 5 counties we cover so their numbers are going to be higher. We would be glad to include information about Cargill if you think that would be helpful or I could connect you and Luke and you could take care of it from your

end. NCHD is still going to do a press release regarding the numbers but we can do it without referencing Cargill at all.

I've included Michelle and Mary on this email thread as they are our public information officers and any press release would start with them.

From your perspective Dan, what would be most helpful? Thanks! Trish

Hi Katie,

Just left you a voicemail. My cell is -might be easier to connect that way. Also, this is the email request we received:

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

Tyler,

I got a call from Jennifer House, she's the state epi. She wanted to reassure me that the purpose of this visit is for the CDC team to glean ideas and develop guidance for other food service industry companies. Jennifer said she's been very pleased at what she's heard about Cargill and wanted to share best practices. I think it could be beneficial for the CDC team to take a look and see the great things you are doing and please know that NCHD will support whatever you think is best for Cargill. Thanks! Trish

Hi Daniel,

We are still getting some calls in relation to the Cargill outbreak.

We were wondering if you were planning to, or if you would want to, put out a press release about your visit from CDC last Friday? Since the visit was because of your exemplary processes and procedures, and they were looking for guidelines for other facilities, we were thinking that was a very positive message for you and the community.

Please let us know your thoughts.

Thanks,

Mary

NCHD has gotten numerous calls/emails from news outlets both local and from Denver. I would like to have some type of joint press release that both Cargill and NCHD can put out that may help to stem some of the multiple requests for information that we are getting. When can we meet on google hangouts/zoom/conference call to talk this over? Thanks! Trish

[maryb@nchd.org](mailto:maryb@nchd.org)

April 20, 2020

FOR IMMEDIATE RELEASE

## **Northeast Colorado Health Department Reports on Cargill COVID-19 Response**

Sterling, Colo. – April 20, 2020: As the COVID-19 pandemic continues, the national focus has turned to concern about the strength of the food supply chain. Having multiple critical businesses that are associated with food processing in our six county (Logan, Morgan, Phillips, Sedgwick, Washington and Yuma) health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with each business to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the forefront of state and national attention is the Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, Public Health Director, Trish McClain addressed in a report to the State Public Health Department, unprecedented processes and procedures that facility management have put in place to keep food products and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important,” expresses Director McClain “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The health department report identifies that Cargill is proactively applying Centers for Disease Control and Prevention guidance for employee face covering, added cleaning measures, personal protective equipment usage and social distancing practices. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“We are making decisions guided by our values,” said Tyler Luft, general manager for Cargill’s Fort Morgan protein facility. “The team is working to keep employees safe, feed the nation and keep the agricultural economy moving.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement

of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our six county health district, including Fort Morgan, emphasizing the need for social distancing and to stay home unless performing necessary activities. So far, NCHD in cooperation with Cargill has been notified of 23 positive results for employees, leading to 1 death. The company continues to enforce a mandatory 14-day quarantine for any team member who tests positive for COVID-19 as well as any employees who they have come into close contact with.

“Cargill continues to work in close partnership with the NCHD to ensure we are following the appropriate safety protocols,” said Luft. “We are part of this community and want to work together to keep each other safe, people at work and the country fed.”

INFORMACIÓN INMEDIATA

## **Reporte del Departamento de Salud del Noreste de Colorado en**

### **Respuesta de Cargill a COVID-19**

-Sterling, Colorado - 20 de abril de 2020: a medida que continúa la pandemia de COVID-19, el enfoque nacional se ha centrado en la preocupación por la fortaleza de la cadena de suministro de alimentos. Teniendo múltiples negocios críticos que están asociados con el procesamiento de alimentos en nuestro distrito de salud de seis condados (Logan, Morgan, Phillips, Sedgwick, Washington y Yuma), el Departamento de Salud del Noreste de Colorado (NCHD) continúa trabajando en estrecha colaboración con cada negocio para proporcionar apoyo técnico y orientación para mejorar la protección del personal contra las infecciones para que puedan permanecer abiertos de manera segura.

Una de esas instalaciones que está a la vanguardia de la atención estatal y nacional es la instalación de procesamiento de carne Cargill ubicada en Fort Morgan. Después de una invitación para recorrer la planta, la Directora de Salud Pública, Trish McClain, dirigió en un informe al Departamento de Salud Pública del Estado,

los procesos y procedimientos sin precedentes que la administración de las instalaciones ha implementado para mantener seguros los productos alimenticios y los empleados.

*"Más de 2,000 personas cuentan con esta planta para sus cheques de pago, pero nadie discute el hecho de que sus vidas son aún más importantes", expresa el Directora McClain. "Creo que Cargill ha hecho de la salud de los empleados una prioridad, y sus prácticas son un ejemplo para otras empresas de la industria alimentaria".*

El informe del departamento de salud identifica que Cargill está aplicando de manera proactiva la orientación de los Centros para el Control y la Prevención de Enfermedades para cubrirse la cara a los empleados, medidas de limpieza adicionales, uso de equipos de protección personal y prácticas de distanciamiento social. En muchas áreas, han ido más allá de la orientación general e implementado enfoques innovadores para la seguridad de los empleados.

*"Estamos tomando decisiones guiadas por nuestros valores", dijo Tyler Luft, gerente general de la instalación de proteínas Fort Morgan de Cargill. "El equipo está trabajando para mantener a los empleados seguros, alimentar a la nación y mantener la economía agrícola en movimiento".*

Esta sinceridad se extiende a la transparencia de la gerencia con NCHD en los esfuerzos para evaluar activamente al personal, sus modificaciones significativas al flujo de empleados y la conversión de la línea de producción, así como la aplicación de las directivas de aislamiento y cuarentena al desactivar las insignias del personal muestra cuán proactivos y cuán trascendentales son sus esfuerzos para proteger al personal.

Los casos de COVID-19 han seguido aumentando en nuestro distrito de salud de seis condados, incluido Fort Morgan, enfatizando la necesidad de distanciamiento social y quedarse en casa a menos que se realicen las actividades necesarias. Hasta ahora, NCHD en cooperación con Cargill ha sido notificado de 23 resultados positivos para los empleados, lo que lleva a 1 muerte. La compañía continúa aplicando una cuarentena obligatoria de 14 días para cualquier miembro del equipo que resulte positivo para COVID-19, así como para cualquier empleado con el que hayan estado en contacto cercano.

*"Cargill continúa trabajando en estrecha colaboración con el NCHD para garantizar que sigamos los protocolos de seguridad apropiados". dijo Luft. "Somos parte de esta comunidad y queremos trabajar juntos para mantenernos seguros, la gente en el trabajo y el país alimentados".*

FOR IMMEDIATE RELEASE

## **Northeast Colorado Health Department Reports on Cargill COVID-19 Response**

Sterling, Colo. – April 20, 2020: As the COVID-19 pandemic continues, the national focus has turned to concern about the strength of the food supply chain. Having multiple critical businesses that are associated with food processing in our six county (Logan, Morgan, Phillips, Sedgwick, Washington and Yuma) health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with each business to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the forefront of state and national attention is the Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, Public Health Director, Trish McClain addressed in a report to the State Public Health Department, unprecedented processes and procedures that facility management have put in place to keep food products and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important,” expresses Director McClain “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The health department report identifies that Cargill is proactively applying Centers for Disease Control and Prevention guidance for employee face covering, added cleaning measures, personal

protective equipment usage and social distancing practices. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“We are making decisions guided by our values,” said Tyler Luft, general manager for Cargill’s Fort Morgan protein facility. “The team is working to keep employees safe, feed the nation and keep the agricultural economy moving.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our six county health district, including Fort Morgan, emphasizing the need for social distancing and to stay home unless performing necessary activities. So far, NCHD in cooperation with Cargill has been notified of 23 positive results for employees, leading to 1 death. The company continues to enforce a mandatory 14-day quarantine for any team member who tests positive for COVID-19 as well as any employees who they have come into close contact with.

“Cargill continues to work in close partnership with the NCHD to ensure we are following the appropriate safety protocols,” said Luft. “We are part of this community and want to work together to keep each other safe, people at work and the country fed.”

Tyler,

I got a call from Jennifer House, she's the state epi. She wanted to reassure me that the purpose of this visit is for the CDC team to glean ideas and develop guidance for other food service industry companies. Jennifer said she's been very pleased at what she's heard about Cargill and wanted to share best practices. I think it could be beneficial for the CDC team to take a look and see the great things you are doing and please know that NCHD will support whatever you think is best for Cargill. Thanks! Trish

Hi Daniel,

We are still getting some calls in relation to the Cargill outbreak.

We were wondering if you were planning to, or if you would want to, put out a press release about your visit from CDC last Friday? Since the visit was because of your exemplary processes and procedures, and they were looking for guidelines for other facilities, we were thinking that was a very positive message for you and the community.

Please let us know your thoughts.

Thanks,

Mary

NCHD has gotten numerous calls/emails from news outlets both local and from Denver. I would like to have some type of joint press release that both Cargill and NCHD can put out that may help to stem some of the multiple requests for information that we are getting. When can we meet on google hangouts/zoom/conference call to talk this over? Thanks! Trish

Subject: RE: Cargill in Fort Morgan

Thanks,

We are eager to share our efforts with folks through whatever channel we can. I've outlined our efforts below which you can include in your release. You can also give Luke my info and I can talk with him directly. I also spoke with a reporter, Jack Harvel, from the Fort Morgan times to share our information, but haven't seen a story from him post yet. I lived in Denver for 7 years and have worked with Luke previously.

At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting

social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.

Thank you so much for the partnership on this.

Cheers,  
Daniel Sullivan

Nice to virtually meet you Dan.

I emailed Luke back yesterday to say I was checking in with my team and would let him know if we could answer any of his questions. We haven't agreed to any kind of interview but thought it may be helpful to do a general press release to help explain the increase in positive cases in Morgan County. There has been a lot more testing in Morgan County compared to the other 5 counties we cover so their numbers are going to be higher. We would be glad to include information about Cargill if you think that would be helpful or I could connect you and Luke and you could take care of it from your end. NCHD is still going to do a press release regarding the numbers but we can do it without referencing Cargill at all.

I've included Michelle and Mary on this email thread as they are our public information officers and any press release would start with them.

From your perspective Dan, what would be most helpful? Thanks! Trish

Hey Trish,

Glad we can connect over email. I hope this finds you healthy and hunkered down. I am curious how you left it Luke. Are you planning to do an interview and would it be helpful to share the measures we have taken at our facilities? Or would you prefer to connect him and I to handle?

Thanks,  
Daniel Sullivan

Hi Katie,

Just left you a voicemail. My cell is the email request we received:

-might be easier to connect that way. Also, this is

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

To: \_All Employees <\_AllEmployees@nchd.org>  
Cc:  
Bcc:  
Date: Thu, 7 May 2020 15:49:37 -0600  
Subject: Colorado Open Records Act (CORA) request  
As stated in the call yesterday, we need to gather emails. Here's the info below:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 1
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30,
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates Mar

Please note the dates--nothing before March and nothing after April 30.

Here's some additional information from our attorney about how picky we should be when looking for the emails:

I would generally stick with the plain language of the request. The request only seeks "emails" concerning these entities, so it isn't necessary to include voicemails or any other correspondence create records). I would say that if your staff generally refers to the Sterling Correctional Facility by a different name or reference, you should make an effort to include it, although I wouldn't go doesn't specifically concern the correctional facilities (such as the Dept. of Corrections, etc.). Emails sent by NCHD to a listserv as a HAN should also be included, but if a listserv contains info to be included.

Please forward any emails that you think would be applicable to this CORA request to [Operations@nchd.org](mailto:Operations@nchd.org). Please have them to the Ops email by Tuesday, May 12. And please send an email to me you anticipate it taking more than an hour, please let me know ASAP.

This may not apply to everyone so if you don't have any emails you need to forward to the Ops email address, don't worry about it.

Thanks for all that you do!! Trish

Subject: Colorado Open Records Act (CORA) request

As stated in the call yesterday, we need to gather emails. Here's the info below:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please note the dates--nothing before March and nothing after April 30.

Here's some additional information from our attorney about how picky we should be when looking for the emails:

I would generally stick with the plain language of the request. The request only seeks "emails" concerning these entities, so it isn't necessary to include voicemails or any other correspondence even if you can convert it into email (you are not required to create records). I would say that if your staff generally refers to the Sterling Correctional Facility by a different name or reference, you should make an effort to include it, although I wouldn't go out of your way to include any ancillary references that doesn't specifically concern the correctional facilities (such as the Dept. of Corrections, etc.). Emails sent by NCHD to a listserve as a HAN should also be included, but if a listserve contains information not specifically directed to the District, it doesn't need to be included.

Please forward any emails that you think would be applicable to this CORA request to [Operations@nchd.org](mailto:Operations@nchd.org). Please have them to the Ops email by Tuesday, May 12. And please send an email to my email address with how much time you spent doing this work. If you anticipate it taking more than an hour, please let me know ASAP.

This may not apply to everyone so if you don't have any emails you need to forward to the Ops email address, don't worry about it.

Thanks for all that you do!! Trish

Mel,

Bars, Gyms, Movie theatres - Being evaluated will be our response? Who would you like those to go to so that I can update the FAQ/Staff Extension List?

Also as a heads up the order under I.H (top of page 4) says "Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals complying with Social Distancing Requirements; except for members of a single household, sharing equipment is prohibited." I know one gym here that does have classes/personal training groups, and they do several of these a day under normal circumstances. I am guessing they may want to do some of this.

Agriculture is still an essential service, so they will not be asked to reduce by 50% per the new order from the governor. They should have some sort of guidance from USDA for the packing side of things. As far as the kitchen goes, they can do business for takeout. If employees order, and they want to allow them to eat at work, they should just practice social distancing. Stagger lunch hours, have people spaced out, clean tables between, eat in their cars or outside where they can space out nicely. I am not sure what it looks like over there to give other suggestions.

Subject: Colorado Open Records Act (CORA) request

As stated in the call yesterday, we need to gather emails. Here's the info below:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please note the dates--nothing before March and nothing after April 30.

Here's some additional information from our attorney about how picky we should be when looking for the emails:

I would generally stick with the plain language of the request. The request only seeks "emails" concerning these entities, so it isn't necessary to include voicemails or any other correspondence even if you can convert it into email (you are not required to create records). I would say that if your staff generally refers to the Sterling Correctional Facility by a different name or reference, you should make an effort to include it, although I wouldn't go out of your way to include any ancillary references that doesn't specifically concern the correctional facilities (such as the Dept. of Corrections, etc.). Emails sent by NCHD to a listserve as a HAN should also be included, but if a listserve contains information not specifically directed to the District, it doesn't need to be included.

Please forward any emails that you think would be applicable to this CORA request to [Operations@nchd.org](mailto:Operations@nchd.org). Please have them to the Ops email by Tuesday, May 12. And please send an email to my email address with how much time you spent doing this work. If you anticipate it taking more than an hour, please let me know ASAP.

This may not apply to everyone so if you don't have any emails you need to forward to the Ops email address, don't worry about it.

Thanks for all that you do!! Trish

Thanks Michelle, that's what I was figuring. She was a little upset at first but after our conversation she thanked me for the work we do, so I would say that was a successful conversation! And thank you! I appreciate it! Thank you for all that you do!

On Mon, May 4, 2020 at 2:17 PM Michelle Pemberton <michellep@nchd.org> wrote:

Mary is right, Conner. You handled this perfectly! We actually have a note below the deaths now that talks about the fact that deaths will not appear on our website until the death certificate has been processed by CDPHE. Depending upon circumstances this process could take a few days.

FYI - in this case Logan County Coroner (Dave Tennant) gave us a courtesy call last Friday before it became public but he was getting in touch with the daughter as well and the mortuary (whoever that was going to be) would probably be the one submitting the death certificate to the state so it could take a few days.

Thanks for all you are doing, Conner! You are doing great work and I believe EH has had it the hardest because you are dealing with the businesses and you are down one with Teena's retirement. I know you are appreciated but you might not be told so I wanted you to know you are appreciated! You are doing a great job! Thank you! 😊

Hello Gals,

I received a call from a concerned citizen about the Logan County Death Count on our website. She was concerned because she saw on the news that one of the inmates at the Prison in Sterling died of COVID and it wasn't showing up on our death counts for Logan County. I told her I understood her concern and that there are a number of reasons that the website may not be showing that death yet, that we generally update it with what is reported and that it may take a few days to register on our counts. She understood and just voiced her concern that information is very important to the public. I offered to get her in touch with whomever updates the case and death counts but she was content. I thought this was in the website/PIO area so I should let you know.

Thanks for all you do!

Good afternoon, I discussed this with Mrs Trish there are still a few questions. but she said that this department will look into the possibility. below are some of our concerns I'm sure there will be more. I would be happy to meet with Captain Cyrus Clarkson and CSU staff to discuss this in more detail. Thanks and have a nice day. Mel

1. This facility and food service is overseen by CDPHE Division of Environmental Health and Sustainability They might have some ideas on this also.
2. Being that there is a population turnover will this be an ongoing program.
3. The logistics of the whole process.
4. Being that we do have some staff that are not comfortable with the training that puts a limit on our resources.

wrote:

Hi Everyone,

A couple of Extension colleagues are working with the Sterling Correctional Facility, and in a round-about way the topic of ServSafe certification training for the inmates who are working in the facility's kitchen came up. I received a few details about what they are looking for from Captain Cyrus Clarkson and would like your input. From what I understand, they currently have one culinary arts instructor who is certified as a proctor and one staff who is in the process of becoming an instructor/proctor. They would like to certify approximately 380 inmates who work in the facility kitchen, which I realize is not at all doable for our group to tackle and not financially feasible for the facility, but am wondering what your thoughts are about offering a class/classes for them?

Thanks in advance for your input!

Joy

Cargill- Fabrication

New address:

Reports feeling sick since 4/1/20 but Cargill made him work because he did not have a fever. States he went to CPMG on 4/6/20 for check up and had routine labwork. States labwork was normal and they told him he was "picture perfect health."

He then describes having symptoms of a heart attack while working at Cargill on 4/14/20 and was sent to hospital in Fort Morgan. He was later transferred to MCR where they placed a stent and tested for COVID-19. In his words "Corona caused me to have a heart attack and shut my heart down. I was picture perfect health before."

He has a telehealth follow up visit with MCR on 5/1/20 scheduled.

He was upset because Cargill was only checking temps and not sending people home for other symptoms. He said Scott from Cargill assisted with heart attack symptoms while at work on 4/14.

Subject: Cargill questions

We've had several Cargill questions and rumors yesterday and today. Kandi also mentioned getting several calls on the Spanish line yesterday and Mickey said she has also got several Cargill calls. What would you like us to tell these callers? Should we transfer them all to both of you or can we give them some info?

"The health dept set up a testing site for Cargill"

"My family member was exposed to someone who was positive at Cargill- the positive case said the health dept said we have to get tested"

"I have to get tested because I work in food service for Cargill"

"Cargill sent home 50 employees with fevers"

Etc, Etc, Etc.....

Thanks,  
Christine

Hi Tammy,

Jan Schiller at \_\_\_\_\_ would like to talk to someone about Ebenezer. I asked Laura who to send this call to and she said to give this to you. This lady said she knows someone who works at the funeral home and "they are dropping like flies". Her mom lives there and she thinks it's too late to get her out and she is very distraught. Would you call her when you can, please. I told her we were actually closed until 1:00.

Thank you,  
Michelle

Subject: ATTN Hunt Group + Admin FAQ Update  
We've had a lot of calls from businesses concerned and confused about directions for non-critical businesses to reopen.

Here is what we'd like you to answer the question for the remainder of the day.

*Numerous questions are emerging as the state enters the Safer-at-Home phase.*

*Many non-critical businesses are overseen by the Department of Regulatory Agencies (DORA). While we recognize that there is pent-up demand to return to work in all aspects of the economy, including Home Order, DORA has stressed that if you are not currently operating as a critical service business, you should not open your doors on April 27th. Governor Polis is expected to officially announce businesses to re-open with strict precautions beginning on Friday, May 1st.*

*Please note that the Governor's lifting of statewide restrictions does not relieve businesses from complying with local public health orders. There is potential for each of the counties within our jurisdiction Governor, or to apply for a waiver to the Governor for reopening local businesses. If you work in a community where county-specific orders extend restrictions on work or travel, you will need to await. In the meantime, non-critical businesses may begin to prepare for reopening by:*

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health; and
- Finding a way to best document customer interaction for contact tracing (if needed)

*Non-critical businesses should watch the Sunday press conference, and then wait for further information from your local public health agency. Our website, [www.nchd.org/co](http://www.nchd.org/co) will have the most up to date information regarding county-specific Safer-at-Home instructions.*

Updated FAQ attached. (Workplaces & Businesses > Reopening of Businesses)

Best,

Alli

Subject: Eben Ezer Press Release

Eben Ezer Lutheran Care Center in Brush has prepared a press release and NCHD assisted to send it to the media this morning.

Mike thought it might be a good idea for all staff to be aware.

Alli, you might want to prepare some guidance for staff in case they receive calls with questions.

Thank you.

Hello all,

Just a small update. Under **Complaints about Businesses Violating Public Health Orders** it should have Mickey George x2226, as she is back today. So, if you could send those calls to her versus Ambe attached.

Also, Josie G is Teleworking today. She has assured me that if she gets a COVID Spanish message on her voicemail it will be sent to her email, and she will follow-up.

Thanks for doing great work! Any questions, just let me know.

Subject: Re: incoming Calls

Mel,

Bars, Gyms, Movie theatres - Being evaluated will be our response? Who would you like those to go to so that I can update the FAQ/Staff Extension List?

Also as a heads up the order under I.H (top of page 4) says "Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals or members of a single household, sharing equipment is prohibited." I know one gym here that does have classes/personal training groups, and they do several of these a day under normal circumstances.

Subject: Re: incoming Calls

I would add the golf courses. I have voicemails or emails for two of them already. There are usually tournaments at the golf courses that serve as fundraisers for high school sports in May and June.

Thinking ahead to June, I would put junior high and high school summer league games on the radar (basketball, volleyball, etc). Normally there is some time of game going on at NJC on Monday-Thu starting to circulate about it too. Summer practices are also worth considering. CHSAA canceled spring sports and student and coach contact until 6/1. After June 1, they are saying all decisions rega

I believe these are the major areas addressed on our tracker. If we can cover these to start with, I think we will cover most of the businesses we receive calls on.

Subject: ATTN Hunt Group + Admin FAQ Update  
We've had a lot of calls from businesses concerned and confused about directions for non-critical businesses to reopen.

Here is what we'd like you to answer the question for the remainder of the day.

*Numerous questions are emerging as the state enters the Safer-at-Home phase. Many non-critical businesses are overseen by the Department of Regulatory Agencies (DORA). While we recognize that there is pent-up demand to return to work in all aspects of the economy, including Home Order, DORA has stressed that if you are not currently operating as a critical service business, you should not open your doors on April 27th. Governor Polis is expected to officially announce if businesses to re-open with strict precautions beginning on Friday, May 1st. Please note that the Governor's lifting of statewide restrictions does not relieve businesses from complying with local public health orders. There is potential for each of the counties within our jurisdiction Governor, or to apply for a waiver to the Governor for reopening local businesses. If you work in a community where county-specific orders extend restrictions on work or travel, you will need to await in the meantime, non-critical businesses may begin to prepare for reopening by:*

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health; and
- Finding a way to best document customer interaction for contact tracing (if needed)

*Non-critical businesses should watch the Sunday press conference, and then wait for further information from your local public health agency. Our website, [www.nchd.org/co](http://www.nchd.org/co) will have the most up to date information regarding county-specific Safer-at-Home instructions.*

Updated FAQ attached. (Workplaces & Businesses > Reopening of Businesses)

Best,  
Alli

Subject: FAQ + Staff Extension List  
Hello all,

Just a small update. Under **Complaints about Businesses Violating Public Health Orders** it should have Mickey George x2226, as she is back today. So, if you could send those calls to her versus Ambe attached.

Also, Josie G is Teleworking today. She has assured me that if she gets a COVID Spanish message on her voicemail it will be sent to her email, and she will follow-up.

Thanks for doing great work! Any questions, just let me know.

 Mel,

Bars, Gyms, Movie theatres - Being evaluated will be our response? Who would you like those to go to so that I can update the FAQ/Staff Extension List?  
 Also as a heads up the order under I.H (top of page 4) says "Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals or members of a single household, sharing equipment is prohibited." I know one gym here that does have classes/personal training groups, and they do several of these a day under normal circumstances

Subject: Re: incoming Calls

I would add the golf courses. I have voicemails or emails for two of them already. There are usually tournaments at the golf courses that serve as fundraisers for high school sports in May and June.

Thinking ahead to June, I would put junior high and high school summer league games on the radar (basketball, volleyball, etc). Normally there is some time of game going on at NJC on Monday-Thursdays starting to circulate about it too. Summer practices are also worth considering. CHSAA canceled spring sports and student and coach contact until 6/1. After June 1, they are saying all decisions regarding

Subject: Heads up: Leprino Foods  
To: Mary Brumage <maryb@nchd.org>

Mary,

I wanted you to give you a heads up that we will close the Fort Morgan plant beginning tomorrow, Sunday, April 26. This is the result of the proactive testing we started last week in response to the h community and the plant. With the high number of positive results, including those who are asymptomatic, we want to prioritize the health and safety of our employees. The plant will remain closed fo determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.

We also feel it is important to let the local media know about our desire to prioritize the health and safety of our employees and wanted to let you know in case you receive any calls. If you have a con reach out to them.

Here are the key messages:

- Our top priority is providing our employees with a healthy and safe workplace and reducing the risk of COV D-19 exposure to our workforce.
- We've shared with you previously that, in partnership with the Northeast Colorado Health Department (NECHD), we began onsite COVID-19 testing of Fort Morgan plant employees. We cond COVID-19 activity within the community and the plant.
- As a result of this proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), we will close the plant beginning Sunday, April 26. The plant will reevaluate and determine next steps. We feel this extreme measure is necessary and important for the safety and health of our employees.
- We will continue COVID-19 testing of all Fort Morgan employees who have not already been tested. Testing will be conducted on Sunday, April 26.
- During this time of closure, the plant will do a deep cleaning of the entire facility
- We are actively working with our dairy suppliers and customers to inform them of this decision and make any accommodations needed
- The plant will work closely with the NECHD throughout the closure and will partner with them on evaluation of plant reopening
- We will keep you informed as we know more information
- Employees who would otherwise have been able to work will be paid during this closure

Please let me know if you would like to talk. My cell is below. Thank you for your partnership. Kim

Subject: ATTN Hunt Group + Admin FAQ Update

We've had a lot of calls from businesses concerned and confused about directions for non-critical businesses to reopen.

Here is what we'd like you to answer the question for the remainder of the day.

*Numerous questions are emerging as the state enters the Safer-at-Home phase. Many non-critical businesses are overseen by the Department of Regulatory Agencies (DORA). While we recognize that there is pent-up demand to return to work in all aspects of the economy, including Home Order, DORA has stressed that if you are not currently operating as a critical service business, you should not open your doors on April 27th. Governor Polis is expected to officially announce instructions for businesses to re-open with strict precautions beginning on Friday, May 1st.*

*Please note that the Governor's lifting of statewide restrictions does not relieve businesses from complying with local public health orders. There is potential for each of the counties within our jurisdiction to apply for a waiver to the Governor for reopening local businesses. If you work in a community where county-specific orders extend restrictions on work or travel, you will need to await the meantime, non-critical businesses may begin to prepare for reopening by:*

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health; and
- Finding a way to best document customer interaction for contact tracing (if needed)

*Non-critical businesses should watch the Sunday press conference, and then wait for further information from your local public health agency. Our website, [www.nchd.org/co](http://www.nchd.org/co) will have the most up to date information regarding county-specific Safer-at-Home instructions.*

Updated FAQ attached. (Workplaces & Businesses > Reopening of Businesses)

Best,  
Alli

FYI about Sterling Correctional. T

----- Forwarded message -----

From: **Mary Brumage** <maryb@nchd.org>  
Date: Tue, Apr 21, 2020 at 12:25 PM  
Subject: Call with Deanna  
To: Trish McClain <trishm@nchd.org>, Michelle Pemberton <michellep@nchd.org>

Hi, here is a quick update from a call with Deanna this morning.

I wanted to ask her if she had any additional information on Media Mapping on other outbreak facilities.

She sent me a document from JBS. I have added it our PI folder under guidance. She said it has a lot of internal processes, but might help us.

She also sent a document on media talking points from a mine that had an outbreak. She said she thought it might get us thinking.

She finished by talking about how the state was taking lead on the Sterling Correctional Facility outbreak. She said there will be a press release and she will send it to us once it has approval. If we get calls, we are just to forward any questions to their DOC PIO, Annie Skinner. her contact information is in the NCHD\_PIO contact folder.

Thaniks,  
Mary

My goal is to have accurate info for providers or employers who call asking about testing options. This is all great info to keep handy and greatly appreciate your help.

And anything you can do to help SCF employees is greatly appreciated by all! Good public health work!

Protecting Health; Inspiring Prevention

On Thu, Apr 30, 2020 at 6:29 PM Bacon, Jeffrey <J

wrote:

Hi Tammy

Thank you for the quick response. At present, we do testing of all symptomatic healthcare workers in our sick clinic at the family care clinic. The greatest need appears to be in the prison population and employees at present but if we would need to increase, it may be possible with some planning. As always we want to be respectful of our community clinics. If the employee prefers their own pcp, we do not want to interfere but merely fill a gap. If there is more need in the community or if you see some trends please let me know a rough estimate of numbers.

Our thought would be to start with the symptomatic DOC employees first and there are already positive cases that we are seeing. I did speak with Warden Long this afternoon and thought this would be very helpful.

Our thought would be to do drive through testing on only symptomatic employees of the DOC on Tuesday and Wednesday of next week starting at 7am at the Family Care Clinic for the symptomatic DOC employees. If we need to do more I can ask for more testing as well. Do you think there is a gap in our health care worker testing as well?

Anyway please let me know what more we can do to help.

Jeff

**To:** Bacon, Jeffrey  
**Subject:** [EXTERNAL] Re: Symptomatic CDOC employee testing

I do believe the other clinics in town would greatly appreciate the opportunity to have their DOC employees tested. Would this opportunity also include non-DOC staff that are symptomatic and need tested for work purposes such as nursing home staff, assisted living staff, businesses with ill staff?

Thank you!

On Thu, Apr 30, 2020 at 3:16 PM Bacon, Jeffrey <

wrote:

Hi there:

I just spoke with my leaders from Banner Medical Group (the clinics) regarding sick of symptomatic CDOC employees. We are willing to test all employees that are symptomatic at this time regardless of who there pcp is.

We also discussed that it would be ideal if we could do this in a few half days if possible.

A few things we would need to coordinate would be a number to test (roughly) and dates to do. Again we can do symptomatic testing both testing in the clinic and in the ER, however we would like to use the ER for true emergencies and possible admissions.

I would appreciate you thoughts and comments.

Jeff

The SCF numbers are in bold and the Logan residents are at the end and not bolded. This info could very well change. DOC has not released much of anything since Wednesday or Thursday so this information is from CEDRS and not DOC - these are reported positives only.

Not sure how to state that these are not the official DOC numbers and I do not believe should be available to publish. But ya both know that I do not want to share anything so, do what you feel is appropriate.

Subject: RE: Fort Morgan Testing and Request for Information - Follow Up 4.29.20

Trish – thanks for all your help and cooperation these past few weeks.

I have been on the phone with Kelli at Marathon – they have been in touch with Patrick at the state Health Department and are expected to receive 200 test kits today. We will send symptomatic employees over to Marathon to be tested as they screen out of our process. A courier will pick up the specimens at Marathon and transport to the State Lab for processing. We hope to start this early next week. That meets our testing needs at this time.

Cathy is working on getting you the data of our employees currently out on quarantine and isolation – we will include name, last day work, and reason why they are out. It is a moving target as we add new folks, bring those back to work that are ready, etc. Cathy is doing some fine tuning and should have that to you in the next day or so.

Again - thanks for all your help, we appreciate it.

**[EXTERNAL]** This email came from outside of Cargill. Do not click links or open attachments unless you recognize the sender. If you suspect this is spam, send this email as an attachment to [spam@cargill.com](mailto:spam@cargill.com)

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state lab
- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plan or become symptomatic during the day. They would also recommend testing for close contacts of symptomatic people, even if those close contacts aren't symptomatic
- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing

available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

Subject: Re: Fort Morgan Testing and Request for Information - Follow Up 4.29.20

Chantelle,

Thanks so much for letting us know what the plan is for testing for Cargill. It sounds great. Glad Kelli was able to connect with the state lab. And thank you Catherine--I understand about moving targets. If there's anything we can do on our end, just let us know. Have a good evening! Trish

On Wed, Apr 29, 2020 at 3:05 PM Chantelle Johnson <

wrote:

Trish – thanks for all your help and cooperation these past few weeks.

I have been on the phone with Kelli at Marathon – they have been in touch with Patrick at the state Health Department and are expected to receive 200 test kits today. We will send symptomatic employees over to Marathon to be tested as they screen out of our process. A courier will pick up the specimens at Marathon and transport to the State Lab for processing. We hope to start this early next week. That meets our testing needs at this time.

Cathy is working on getting you the data of our employees currently out on quarantine and isolation – we will include name, last day work, and reason why they are out. It is a moving target as we add new folks, bring those back to work that are ready, etc. Cathy is doing some fine tuning and should have that to you in the next day or so.

Again - thanks for all your help, we appreciate it.

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state lab
- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plan or become symptomatic during the day. They would also recommend testing for close contacts of symptomatic people, even if those close contacts aren't symptomatic
- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

Good morning Vinny,

Cargill in Fort Morgan continues to operate and I believe JBS in Greeley reopened earlier this week. I am not in a position to forecast meat shortages but have not heard of any concerns regarding this on the calls/information that I have access to. Hope you are doing well. Thanks! Trish

Subject: FAQ + Staff Extension List  
Hello all,

Just a small update. Under **Complaints about Businesses Violating Public Health Orders** it should have Mickey George x2226, as she is back today. So, if you could send those calls to her versus Amber that would be great! The updated FAQ + Extensions List is attached.

Also, Josie G is Teleworking today. She has assured me that if she gets a COVID Spanish message on her voicemail it will be sent to her email, and she will follow-up.

Thanks for doing great work! Any questions, just let me know.

Subject: Testing information

Good afternoon,

I had talked with Tyler a few days ago and he said testing was still being considered for Cargill employees. I wanted to let you know of some info I learned today on a state call:

- If you wanted to testing onsite at your facility using your own staff to collect samples (or even a 3rd party contractor), the state would be willing to supply test kits and run the tests at the state lab
- If you wanted to use Marathon to do the testing, we could request PPE for the testing staff if that is needed
- The state does have some resources in regards to language/translation that would be available if you would find that helpful (I know you already have language supports but this is available if you need it)
- The state would recommend testing for those employees that have a positive answer on their screening tool upon entering the plan or become symptomatic during the day. They would also recommend testing for close contacts of symptomatic people, even if those close contacts aren't symptomatic
- They still have the National Guard available to do some mass testing and that could be an option somewhere in Morgan County that you could send employees to; this would make testing available without being on your campus but would only be for a certain point in time and not ongoing

I'd be glad to talk more about this or find out additional information if needed.

Also, the state is requesting a line list of all positive employees, as well as those that are being sent home for quarantine and isolation. This helps them to see the actual burden of disease as well as assess if more targeting testing may be warranted. I think Tammy had asked Scott about this and I know you have a chain of command to follow.

Let me know if there's anything I can do to help. Thanks! Trish

Hi Trish,

Luke Runyon here again from KUNC. Hope you're doing well.

I'm writing with an interview request. I'm working on a story about worker safety in meatpacking plants for NPR, and I'm going to focus most of my attention in the story on the Cargill and JBS plants in Fort Morgan and Greeley.

Because you recently toured the plant in Fort Morgan, and have been in touch with the company, I'd like to arrange an interview to talk about that experience.

I'm hoping to wrap up the story by Thursday evening. Let me know if you're able to talk this afternoon, tomorrow or Thursday morning.

Thanks,

Luke

**Subject:** Re: COVID-19 cases in Morgan County

Good afternoon Luke,

My team and I have been working on a press release to discuss the increase in positive cases in Morgan County. At this point, one of the major factors is that there is more testing going on in Morgan County, thus we are seeing more positives. I did reach out to Cargill and part of their response is as follows:

*At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.*

I've also copied Daniel Sullivan on this email as he is the Cargill Media Director for their Protein operations. He could give you more information on the plant in Fort Morgan. I've also copied Michelle and Mary, they are the Public Information Officers for NCHD and would be happy to make sure you are on our list for any press releases that we do. Thanks again for contacting us. Trish

wrote:

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

Subject: Fwd: Leprino

Matt shared an online survey they are using for JBS and probably Leprino. Is this something we can do? Maybe Kelly can share the link with the positive employees? Paper forms can also be avail

A few questions I would like to ask but with better verbiage:

What is your work station, duties...

- Do you have a household contact or close contact who works at a job site that has a COV D outbreak.
- I would like to ask if an employee has a second job other than at Leprino.
- Is there anyone outside of your household that may have been exposed within the past 14 days? If so, please provide name and phone number.
- Would also like a list of symptoms
- Onset date

Other ideas?

Hey Tammy,

Sorry for the delay.

Here is a draft survey we have for employer based outbreaks:

<https://weldtempevents.wufoo.com/forms/q4k2zks1n71ebb/>

You'll have to click through because additional items may expand, depending on the selection.

I would like to use an online survey as much as possible to avoid data entry but we are also likely going to offer paper surveys that can be faxed back.

Let me know what your thoughts are.

**Caution:** This email originated from outside of Weld County Government. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Hi Matt. There are 18 positives out of 68 tests on Sunday. We had a short call with Jason as he was driving to Fort Morgan for a meeting and look around.

Would be great if we used the same questions for each plant, this way Leprino would have consistent data if possible.

I do not want to make this difficult so wondering about using what you have used for JBS with a modification to ask about contacts from Cargill, JBS, etc.

Thanks a heap! Tammy

If you just want to type your response in this email, I can put it on the post since I know where it is.

Dear Ms. McClain,

I am concerned about today's report on Cargill's mitigation practices as Morgan County's COV D19 cases continue to climb. Positive cases have gone from 40 to 180 in less than ten days. In a rural area the death of four of its citizens causes us all further angst.

The wording in the above publication on CARGILL's enforcement of a "mandatory 14-day quarantine for any member that tests positive for COVID-19 . . ." Yet according to the State of Colorado's guidance CARGILL should be complying with those of the higher standard of ISOLATION. Which means completely away from people UNTIL "no fever for at least 72 hours (that is three full days of no fever AND other symptoms have improved (for example, when your cough or shortness of breath have improved) AND At least 7 days have passed since your symptoms first appeared

Now I understand that testing is now very limited, and the original CDC guidelines of until "two negative tests for COV D-19 came back within a forty eight hour period" are no longer relevant or more do realize there is absolutely no mention whatsoever on the Northeastern Colorado Department of Health guidelines, but I do wish to prevail on you to consider the states current stance.

Your esteemed department and CARGILL's Mr. Luft may well be under a mistaken notion that COVID-19 is a "two week only sickness" instead of a highly contagious disease that requires time to "return to normal" take precedence. (Surely not.)

Does CARGILL only allow employees two weeks leave? What if the exposed to, now quarantined, become sickened? Do they then get tested and then properly isolated as recommended by the State of Colorado, or should I address CARGILL for further clarification?

Hi Trish,

How about tomorrow at 3pm? I can call you then. What's a good number to reach you? I'm at 720-391-6702.

Thanks so much,
Kate

On Wed, Apr 22, 2020 at 12:15 PM Trish McClain <trishm@nchd.org> wrote:
Good to meet you as well Kate. And thank you Deborah for the introduction.

I could meet at 4:30 today or 3:00 tomorrow or I also currently have most of Friday afternoon open. Let me know what works for you--I look forward to connecting. Trish

On Wed, Apr 22, 2020 at 11:50 AM Greenberg - CDA, Kate <kate.greenberg@state.co.us> wrote:
Deborah, thanks so much for making the connection.

Trish, it's great to formally meet you. I wanted to reach out to offer my support to you and your team as you deal with rapidly-evolving public health scenarios in the meat processing sector. We are supporting our state and public health officials in protecting public health.

If you have a few minutes in the coming days, I would welcome a call simply to get acquainted and discuss ways we can work together. Let me know what might work for you and I can get some

All my best,
Kate

Thanks to everyone for being flexible and transparent around this tour. Good news. Tyler Luft (cc'd) is the plant manager in Fort Morgan. He's available to give a tour to the CDC team today. It would work best if everyone arrives between 12-12:30. He will focus the tour on screening and the steps taken to promote a safe work environment in the plant. Tyler's contact info is:

Please provide the names and titles of everyone attending from the CDC. Let me know what else you need.

Thanks again.

Katie

Good morning, Katie:

Just checking in to see if we can talk about a potential last minute visit by our NIOSH team. We have heard very good things about the measures Cargill has put in place to protect their workers and we'd love to see them in person, if the opportunity is available today. We definitely understand if it is not possible and appreciate your efforts to explore the possibility.

We are stationed up in Greeley. You can reach me via email or phone

Thanks!

christa

Good afternoon Christa,

I've been able to talk with both the Cargill plant manager here in Fort Morgan as well as Katie Smith, Cargill Director for State Governmental Affairs about having you and your team come to visit the plant. Katie and I thought it would be best to introduce you virtually so that you can communicate directly to help coordinate the scheduling of the visit. I would be happy to be a part of the visit when you come out and I'm willing to help however I can to facilitate things. I've also copied Jennifer House, CDPHE Epidemiologist as she and I have also talked about this visit. Let me know how else I can help. Thank you! Trish

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

We have heard very good things about the measures Cargill has put in place to protect their workers and we'd love to see them in person, if the opportunity is available today. We definitely understand if it is not possible and appreciate your efforts to explore the possibility.

We are stationed up in Greeley. You can reach me via email or phone

Thanks!

christa

Thanks so much for your assistance, Trish. We fully recognize that this is a last-minute request as we try to get this important visit in before we have to redeploy.

Katie: Let me know the best way to get in touch. You can call me at either number below.

Again, thanks all for all of your help as we do our best to help the industry in Colorado and as a whole.

Best,

christa

Good afternoon Christa,

I've been able to talk with both the Cargill plant manager here in Fort Morgan as well as Katie Smith, Cargill Director for State Governmental Affairs about having you and your team come to visit the plant. Katie and I thought it would be best to introduce you virtually so that you can communicate directly to help coordinate the scheduling of the visit. I would be happy to be a part of the visit when you come out and I'm willing to help however I can to facilitate things. I've also copied Jennifer House, CDPHE Epidemiologist as she and I have also talked about this visit. Let me know how else I can help. Thank you! Trish

Hi Trish:

We had some internal discussions before I was going to call you back and then it worked out that Jennifer House was going to call you instead of me. I'm not sure when that will happen (realizing I've been on other issues since she called so she might have already called you!).

Thanks!  
christa

Hello Christa,

I wasn't aware of a visit with Cargill set for tomorrow. I did talk to the plant manager and he is unaware as well. I think a visit could be arranged but tomorrow is too short of notice given the chain of command that the plant manager has to go through in order to get approval. I'm glad to discuss it with you when you are out of your meeting and I'm sure we can figure out a date that will work for the site visit you request. I look forward to talking with you. Trish

Good afternoon, Trish:

I received your contact information from Dr. Jennifer House at the state health department. She indicated that you would be able to facilitate a visit by the CDC Team (specifically the staff from the CDC National Institute for Occupational Safety and Health [NIOSH]) to the Fort Morgan Cargill plant on Friday April 16. There was some confusion about whether this site visit was already set up and I just received your contact information.

I am going into a meeting at 1 PM, but if you are able to chat let me know and I can call you as soon as possible. Otherwise, I'll also follow up this email with a call once our meeting is complete, as I imagine your email inbox is getting a lot of hits right now.

Best,  
christa

Subject: update  
Good morning,

We will be doing a press release in the next day or two because there have been some deaths related to COVID-19 in our region. We have to wait until the death certificates are finalized at the state level in order to make sure our numbers and CDPHE numbers are in agreement before we release anything. For instance, we had a person at end of life for another (non respiratory) medical reason and they also tested positive for COVID-19--if the death cert lists COVID-19 as a contributing factor, then we count it, if not, we don't. I will keep you posted on that.

Cargill has been getting a lot of attention since JBS closed several plants, including Greeley. Mel and I did a site visit yesterday and they are doing a good job of taking appropriate precautions with their staff in regards to PPE, sanitizing and disinfecting, social distancing, screening, isolation and quarantine. I've been in conversation with both the state and with Cargill corporate health to discuss setting up a testing site for their employees. I think it would be helpful for us to determine the actual health status of their workforce and we could then see how the measures they are implemented are having the desired impact. Cargill staff have been great to work with and we have been transparent with them as far as any conversations the state has with us. I've also been assertive in that this needs to be a partnership and not a heavy handed approach as Cargill is part of our community and we will be working together long after COVID-19 is over. I have a call this afternoon with Cargill and CDPHE to discuss testing some more. Again, I'll keep you posted.

Seaboard Foods sent us information on what they are doing to keep their staff safe and we have let them know we are available if they need us.

We have distributed a lot of PPE to regional hospitals and long term care facilities while they await shipments from private suppliers.

We are implementing staffing rotation through the incident management team and expanding telework options for staff to help everyone deal with the increased stress of the response. We've been at this for 5 weeks now and it's going to drag on for awhile.

We will have our BOH meeting via Zoom this month.

If you have other questions about things I haven't covered here, just let me know. Thanks!

--

Subject: Re: efforts made at Cargill-Draft #2

Upon arrival to the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, googles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Subject: Cargill Test Support Discussion

Good morning,

I wanted to give an update. I did a site visit to Cargill yesterday and also talked to the corporate health person about the benefits of testing. She had some questions I couldn't answer so I have her and the plant manager doing a conference call this afternoon with a CDPHE epi person to hopefully get those answered. Would it be possible to have someone from this group on that call--Chantelle (Cargill corporate health person) did ask me about capacity--how many tests/hour would be collected, how long would the testing site be active, turnaround time for results. I think Amanda can handle some of the test specific questions--PCR/etc but it may be helpful to have someone from this group on as well. It will be at 3pm today. Let me know and I can send you the invitation. Thanks! Trish

Subject: efforts made at Cargill-Draft

Upon arrival to the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. All staff are provided masks and/or face shields depending on their position. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, quaternary ammonia is used to disinfect (it is approved to be food safe). In common areas and offices there is a combination of applied disinfectant as well as fogging (Decon 7 and Pure) that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

In the meantime these were some of the questions we have that we can discuss on the call tomorrow.

Effectiveness of current interventions.

Are exposed employees (work or home) still be excluded/quarantined?

What does outbreak epi curve look like? Stable, increasing, decreasing? What's the most current case count of confirmed cases? Do we know how many probable cases are associated with Cargill?

What are triggers for closing the facility or other more aggressive outbreak control?

Does the facility know to not hire anyone from JBS right now?

Subject: RE: COVID-19 cases in Morgan County

Hi Trish,

I did receive confirmation from Cargill that they have positive COVID-19 cases linked to their processing facility in Fort Morgan. While the company did confirmation the presence of the virus, they wouldn't confirm the number of cases. Is that something NCHD is tracking? And if so, can you share that number?

Thanks much,

Luke

**Subject:** Re: COVID-19 cases in Morgan County

Good afternoon Luke,

My team and I have been working on a press release to discuss the increase in positive cases in Morgan County. At this point, one of the major factors is that there is more testing going on in Morgan County, thus we are seeing more positives. I did reach out to Cargill and part of their response is as follows:

*At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping*

*international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.*

I've also copied Daniel Sullivan on this email as he is the Cargill Media Director for their Protein operations. He could give you more information on the plant in Fort Morgan. I've also copied Michelle and Mary, they are the Public Information Officers for NCHD and would be happy to make sure you are on our list for any press releases that we do. Thanks again for contacting us. Trish

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

As the situation develops in Weld and Morgan County, here is a warning order for potential National Guard testing sites.

Weld County: potential testing on Tuesday for Community Corrections and jail. Approx 250-300 pax. Awaiting confirmation from Dr. Wallace, Weld County Dept Public Health & Environment Director. If it's a go, then need:

- 1) Location(s) - Weld
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - WCDPHE
- 4) Arrangements for security/traffic control - Weld/SEOC
- 5) PIO - Weld
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

Morgan County: potential testing of Cargill employees this week. Pax numbers unknown. Awaiting decision from Trish McClain, Northeast Colorado Health Department. If it's a go, then need:

- 1) Location(s) - Morgan
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - NCHD/CDPHE
- 4) Arrangements for security/traffic control - Morgan/SEOC
- 5) PIO - Morgan
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

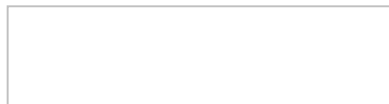

CONG - BPT operate two sites simultaneously. Send feasibility of doing two and capacity at each if there are two to SEOC NLT Monday 1600

More to follow

MJW

Warning Orders are a standby order for military units. We should probably expect contact from them tomorrow because their planning will start sooner rather than later.

---

As the situation develops in Weld and Morgan County, here is a warning order for potential National Guard testing sites.

Weld County: potential testing on Tuesday for Community Corrections and jail. Approx 250-300 pax. Awaiting confirmation from Dr. Wallace, Weld County Dept Public Health & Environment Director. If it's a go, then need:

- 1) Location(s) - Weld
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - WCDPHE
- 4) Arrangements for security/traffic control - Weld/SEOC
- 5) PIO - Weld
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

Morgan County: potential testing of Cargill employees this week. Pax numbers unknown. Awaiting decision from Trish McClain, Northeast Colorado Health Department. If it's a go, then need:

- 1) Location(s) - Morgan
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - NCHD/CDPHE
- 4) Arrangements for security/traffic control - Morgan/SEOC
- 5) PIO - Morgan
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

CONG - BPT operate two sites simultaneously. Send feasibility of doing two and capacity at each if there are two to SEOC NLT Monday 1600

More to follow
