Subject: Re: Cargill Questions

I also like what Heather had to say:

*Agriculture is still an essential service, so they will not be asked to reduce by 50% per the new order from the governor. They should have some sort of guidance from USDA for the packing side of things. As far as the kitchen goes, they can do business for takeout. If employees order, and they want to allow them to eat at work, they should just practice social distancing. Stagger lunch hours, have people spaced out, clean tables between, eat in their cars or outside where they can space out nicely. I am not sure what it looks like over there to give other suggestions.*

We have heard about their cafeteria being full—we can certainly give suggestions.

Also, I would imagine that their cleaning is probably dictated by USDA which would be fine, wouldn't it Mel?

And if they have someone that is sick at work, I think putting a mask on them while they wait/social distancing is about as good as they can get.

I can do a call between 10-12 on Tuesday (3/24) or between 2-3:30. If that doesn't work we can look at Wednesday. T

On Mon, Mar 23, 2020 at 4:37 PM Tammy Hort RN, CIC <[tammyh@nchd.org](mailto:tammyh@nchd.org)> wrote:

If there is an employee that tests positive, Cargill will be notified - need to know who the employee stands by on the fab line, etc.

I would like to know what will need to be done for the employee if 14 days of quarantine or isolation is required. NCHD cannot assist the employee with all the paperwork involved with short term disability PLUS it is highly unlikely the employee would be seen by a PCP.

Is there any way they can practice social distancing in the locker rooms and cafeteria?

Subject: Cargill Questions

To: [melb@nchd.org](mailto:melb@nchd.org) <[melb@nchd.org](mailto:melb@nchd.org)>

Good day Mr. Bustos –

Thanks for talking with me this morning, your time is valuable and I know you are very busy with all that is going on. Tyler Luft our General Manager, Gene Guerrero our EHS Manager and myself wanted to reach out with a few questions and get your expert opinion, guidance and thought on a few items. As an “essential business” in this community we want to maintain best practices and keeping all involved in daily operations safe.

1. If a employee were to test positive for COVID-19, would Cargill be notified and instructed to take further measures?
2. If a employee were to test positive for COVID-19, what is the Health Dept vs. Cargill's responsibility related to cleaning/disinfected; in addition to the efforts already in place at Cargill?
3. If there happen to be more than one employee that would require isolation until they are able to find transportation home, is it reasonable for those individuals to be seated in the same isolation room with appropriate PPE i.e. mask and social distancing?

These are a few of our questions. As we are able to talk I'm sure a few more will come to mind. This is all very new to all of us and I realize all the answers may not be right there, but it will be good to discuss and learn. Let me know when a good time will be to have a Skype call or Conference call. I know all are very busy, so its whenever you all have a moment.

*Best,*

*Scott Reyez, BSN, RN, CCRN*

*Health Services Manager*

**Subject:** Re: [EXTERNAL] Re: State of our County

You are correct. If we want to have less restrictions than what is included in the Safer at Home orders, we have to provide a detailed plan (variance application) that has to be approved by elected officials, all hospitals in the county and local public health. Morgan County is not applying for a variance at this time because I have already stated I won't sign off on it--they know that both of our hospitals don't support it and I will side with the hospitals. I reiterated in our special board of health meeting

today that when I hear our hospitals implementing surge plans, even if it's just for a day, that gives me great concern. Though I understand the pressure our commissioners are facing regarding businesses wanting to open, I'm not going to throw our health care partners under that bus. I hope you are doing ok during this time. Trish

Shelly

Thank you for letting me know about the email. I think you have stated things very well. Morgan County is required to abide by the Safer At Home order unless they submit a variance. In order for the variance to even be considered, it has to have the support of local public health and every hospital in the county. Keeping our healthcare partners intact and functioning is my highest priority. If any of our partners feel less than confident about a variance application, I will stand with them and not sign off on it. I know there is incredible pressure from some business to have the ability to be open and while the ability to earn a living is very important, protecting lives is even more so. I stand with you. Thanks! Trish

> wrote:

Good Morning All,

I have recently sent an email to our county commissioners recognizing them for all they are doing and asking that before they make decisions on future county decisions in regards to lifting stay at home orders that they reach out to each of your organizations for your input. I recognize that many of you are already having these direct conversations with them, but in full disclosure I wanted you to know that I referenced you in my email.

Thank you for all you are doing during this time.

Here was the body of my email to the commissioners for your reference.

*Good Morning Commissioners,*

*I hope you are all doing well.*

*I understand there is discussion occurring on how the County may update or change Stay at Home orders as directed by Governor Polis. I recognize the pressures you are all receiving in reference to how the county should be 'Open' for business and understand how negatively many in our community have been affected by this virus.*

*What I would like to share with you is a perspective from someone who is seeing how deadly and devastating this virus can be. Here at Eben Ezer our organization was as ready to fight this as many. We were handcuffed by not having supply lines open to us as we were not a Tier1 priority for PPE. In essence, this weakened our ability to stand ready to protect our team and our elders. While we have experienced many deaths, I am happy to report that we have many who have been able to fight off this nasty, virulent virus. As we continue moving through this, we will continue to advocate for the need to have nursing homes in that tier 1, although that is another discussion. What I want you to take away from this is how vulnerable healthcare workers and the elderly are to this virus. The combination of those over the age of 65 and the number of healthcare workers in our county is great, significant enough for this consideration.*

*I ask that when you make your decision on how and when we open our community back up, be sure to reach out to those who are in the trenches of this. Ask your local hospital leaders, senior living providers, the local health departments, and EMS providers for their input prior to making your decision.*

*I absolutely support the need to get our community going again, yet I strongly believe that our community is not ready yet. Thank you for your consideration and please let me know if I can offer you any support or answer any questions you might have.*

Shelly M. Griffith, CPA, NHA

*What I would like to share with you is a perspective from someone who is seeing how deadly and devastating this virus can be. Here at Eben Ezer our organization was as ready to fight this as many. We were handcuffed by not having supply lines open to us as we were not a Tier1 priority for PPE. In essence, this weakened our ability to stand ready to protect our team and our elders. While we have experienced many deaths, I am happy to report that we have many who have been able to fight off this nasty, virulent virus. As we continue moving through this, we will continue to advocate for the need to have nursing homes in that tier 1, although that is another discussion. What I want you to take away from this is how vulnerable healthcare workers and the elderly are to this virus. The combination of those over the age of 65 and the number of healthcare workers in our county is great, significant enough for this consideration.*

*I ask that when you make your decision on how and when we open our community back up, be sure to reach out to those who are in the trenches of this. Ask your local hospital leaders, senior living providers, the local health departments, and EMS providers for their input prior to making your decision.*

*I absolutely support the need to get our community going again, yet I strongly believe that our community is not ready yet. Thank you for your consideration and please let me know if I can offer you any support or answer any questions you might have.*

Subject: Re: [EXTERNAL] Re: State of our County

You are correct. If we want to have less restrictions than what is included in the Safer at Home orders, we have to provide a detailed plan (variance application) that has to be approved by elected officials, all hospitals in the county and local public health. Morgan County is not applying for a variance at this time because I have already stated I won't sign off on it--they know that both of our hospitals don't support it and I will side with the hospitals. I reiterated in our special board of health meeting today that when I hear our hospitals implementing surge plans, even if it's just for a day, that gives me great concern. Though I

understand the pressure our commissioners are facing regarding businesses wanting to open, I'm not going to throw our health care partners under that bus. I hope you are doing ok during this time. Trish

Shelly

Thank you for letting me know about the email. I think you have stated things very well. Morgan County is required to abide by the Safer At Home order unless they submit a variance. In order for the variance to even be considered, it has to have the support of local public health and every hospital in the county. Keeping our healthcare partners intact and functioning is my highest priority. If any of our partners feel less than confident about a variance application, I will stand with them and not sign off on it. I know there is incredible pressure from some business to have the ability to be open and while the ability to earn a living is very important, protecting lives is even more so. I stand with you. Thanks! Trish

Trish,  
If there is anyway to get swabs for testing? We have seen a significant increase in Eben Ezer testing.

We use NP swab Daycorn or Foluq with viral media.

Thanks

Linda

Subject: Re: Press Release: NCHD Reminds Everyone COVID-19 Spreads Easily

I think we should leave the Eben Ezer thing alone for now. Don't worry about doing another press release about them. Let's just focus on the mental health aspect and how people can access resource's purpose and how we should continue to follow it but also how stressful it can be and here's some resources to help or something like that. Maybe something like staying at home is a full time two are the creative ones. Oh, I'm going to send you a link Matthew sent to me about social distancing--super powerful. T

t's fine to take it off our website. I agree that we need to do something that shows our support for Eben Ezer and all facilities as we work together. Thank you! T

On Mon, Apr 13, 2020 at 10 06 AM NCHD PIO <[pio@nchd.org](mailto:pio@nchd.org)> wrote:

Mike does think a press release from NCHD should be written but maybe instead of focusing on Eben Ezer, they just be used as an example of how easy this virus can spread even when a facility something and include something about NCHD supporting this facility through their ordeal. I will send something for both of you to read.

I also hear that there have been questions coming to our staff because of the way their press release was worded in talking about neighborhoods. I knew what they meant and it never occurred to spreading in their community neighborhoods which wasn't what Eben Ezer meant. I will figure out how to add that in as well.

In the meantime, Trish, I think we should take their press release off of our website. I agree with Mary that it shouldn't be on our website. It should be on theirs.

Thanks

On Mon, Apr 13, 2020 at 9:47 AM Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)> wrote:

Hi,  
I was thinking about how we added their press release to our News Release website page and although I agree with wanting to support the facility, I am not sure if that is the place to put it since page is for our news releases.  
What are your thoughts?

My suggestion would be to write a quick press release on how NCHD is supporting Eben Exer through this ordeal and then link to their press release that way.  
What do you think?

Mary

I had hoped to send this out sooner but it has been quite a week.

I wanted to provide this summary since some of you couldn't be on the entire call:

Attached please find the guidance document that was referenced during the call that was distributed from the state health department.

While the Northeast Colorado Health Department recommends strongly that churches continue to encourage their congregations to follow the state Stay at Home order this weekend, there may come less risky. In addition to the guidance document, the additional items to consider if a church decides to move forward with a drive-in venue for services are:

1. All vehicles must be parked at least 6 feet apart
2. All occupants need to wear masks if the vehicle windows are going to be down
3. All occupants need to remain in their vehicles at all times
4. If restroom facilities are available, only one person at a time may utilize the restroom and they should be wearing a mask
5. No food/beverages/communion should be distributed or available at the venue

When the Stay at Home order is lifted (to be determined later this month depending on how the models predict the behavior/spread of the virus), social distancing will still be in place which includes what is most likely to be gradual so it may be best to continue to plan services to be done via online or other remote methods.

Vaccine for COVID-19 is not available at this time though there are several companies and research firms that are working toward this; it may be several months before this is achieved and available.

I really appreciate all you have done to ensure the health and well being of your congregations. I know that spiritual health is just as important and I applaud the efforts you are making to help your people have any questions or if there is any way that NCHD can be of assistance. Trish

On Wed, Apr 8, 2020 at 2:40 PM NCHD PIO <pio@nchd.org> wrote:

Thank you again to those who were able to participate on the call at 1 p.m. with NCHD. We appreciate your partnership with us to keep the public safe across the six county region we serve. We are grateful to our community during this challenging time!!

I am attaching the press release that went out this afternoon in English and Spanish. Also, you can share it on Facebook (<https://www.facebook.com/pg/northeasthealth>) or you can also access NCHD's website. We appreciate your assistance in reinforcing the message to stay home and not have large family gatherings or other potential community exposures.

Michelle Pemberton

Question for all of you:

Would you be in favor of the statewide Stay at Home Order being extended through the end of April instead of expiring on April 11? Morgan County now has 15 cases, 8 of those being reported today. You can reply to me directly or to the group. I will keep your replies to me confidential. Thank you! Trish

Hello,

You very well may be aware of this already, I just got off a call with a HUD representative authorizing health departments to notify independent living operators positive results of those who live in these communities. We of course will not be sharing this information but allows us to be vigilant to help prevent potential exposures.

I hope you are all doing well!! Thank you for doing what you are!!

To: [liaison@nchd.org](mailto:liaison@nchd.org) <[liaison@nchd.org](mailto:liaison@nchd.org)>

## Sharing our daily update related to the ongoing processes with Coronavirus (COVID-19)

- We have now tested 16 patients – still with only two being resulted – both of those test results are ‘negative’
- We continue our Hospital Incident Command Center on a virtual basis – absorbing information from Banner Health, the State, and the County
- We are currently a Tier 1 Hospital, which means that we have *no or very minimal positive cases* within our community or service area
- We continued to narrow our focus related to visitors, access to the environment and elective services – all in an effort to break that chain of transmission
  - Today, we began proactively rescheduling screening exams (mammography, ultrasound, bone density) to eight (8) weeks out
  - We also cancelled any “in house” (or in hospital) sleep studies until the beginning of May and then we will re-evaluate
- We have held steady on our inventory of personal protective equipment (PPE) and we are grateful for your collaboration in utilizing these products efficiently
- We received notice that nationally, smaller “piggy-back” solution bags may have limited availability and Supply Chain and Pharmacy have partnered to find an innovative resolution
- The Emergency Department continues to triage patients with respiratory symptoms into a designated area within in the department; this has worked very effectively.
- We have added “red zone” (or ‘safe zone’) areas to all of our inpatient rooms;
- We will continue to strategize a safe, effective method to care for patients that may be admitted with the suspected virus – and we will continue to provide you with updates related to this process

BMG-Here are some updates from BMG COVID meeting from Dr. Gregory.

- We have also placed a visitor restrictions within the clinics. We currently are asking patients when they schedule and come in that there are no additional visitors. There are of course the following exceptions:
  1. One parent for pediatric patients
  2. One caregiver if needed for safety (example: Alzheimer's patients)
- We will be posting signage in regards to our visitor restrictions today.
- I have included codes in a slide below on the appropriate G Code to use for charting telephone visits. Banner is also working on how to handle doing large scale telehealth visits if needed. More to come on that over the weekend.
- Banner has now suspended all visits in Colorado for any patients that may safely wait to be seen for 30 days. This has now also expanded into the specialty providers. As of yesterday afternoon we started rescheduling all of our Orthopedic patients and General Surgery patients. We will continue to see any urgent or emergent needs in the office.
- We also need to use PPE supplies only in situations that are indicated for usage.
- **Effective immediately – we are no longer performing COVID testing on most patients with symptoms**
- **ONLY test patients who are symptomatic AND are Health Care Workers (HCW) OR require hospitalization as an inpatient.**
- N95 respirator masks should ONLY be used in **airborne isolation rooms** or when **performing aerosol generating procedures** on patients with potential/confirmed COVID-19 infection. N95s should **NOT** be used on patients. If patients in precautions require transport outside of their room, place a standard procedure mask on them.
- Eye protection, both goggles and face shield not attached to a mask may be disinfected and reused. Disinfect eye protection with a standard alcohol wipe (prep pad), wetting all surfaces and allow to air dry.

## Leprino Foods Company Foundation Local Community Grant Program Application Grant Requests Greater than 10,000

---

The Leprino Foods Company Foundation has established the Local Community Grant Program to support programs with national or regional scope that impact Leprino communities. Contributions from the Foundation will be made directly to qualified\* organizations. These grants are only available upon invitation from the Leprino Foods Company Foundation Board and are not available to specific programs that receive funds from other Leprino Foods Company programs.

Only invited organizations providing services in the following areas should submit an application:

- Education
- Nutrition
- Fitness
- Local Needs
- Consistent with the core values of the Company and the Leprino family

The completed application should be emailed to \_\_\_\_\_. The grant will be reviewed within **90** days of the date of submission.

A key goal of our grant program is understanding the effectiveness of the initiatives our grants help to fund. To this end, we request that grantees submit a six-month project update and a full post-grant report one year after receiving initial funding. Our goal is to inform and improve our decision-making and, where appropriate, share this learning with future grantees.

The six-month project update letter should provide a progress report on the project, including any changes in direction or significant budget adjustments. A post-grant report is due one year after receipt of initial grant funds and should include an assessment from the Executive Director on the strategic impact of the grant and both quantitative and qualitative results of the project completed. Information on lessons learned, including unexpected outcomes or insights, is especially helpful to our process. This report should also include an itemized comparison of the actual project costs vs. original budget.

\* Grants are made only to nonprofit organizations that provide services in our focus areas and are certified as tax exempt under Sections 501(c)(3) or 170(c) of the Internal Revenue Code and are classified as "not a private foundation" under Section 509(a). Hospitals, educational institutions, and governmental institutions meeting these requirements are eligible to apply. Organizations that have completed and filed Form 1023 but not yet received an IRS determination letter are not eligible to apply. Organizations eligible for funding must operate in a manner that supports the values of the company and the family.

**Organization Information**

1. Have you received any grants or donations from Leprino Foods in the past? If so, please indicate the date of the grant, the amount and the purpose.

2. Describe the organization's mission and current goals:

3. Provide a brief description of the organization's current programs. Please include population and numbers served, as well as expected results.
4. Describe any challenges and opportunities facing the organization in the next three to five years.

### **Program Information**

5. Will the grant be used towards a specific project or part of the operating budget?
6. If the grant will be used for a specific project please list the details of the project including the issue and/or opportunity addressed, goals and objectives, activities, and timeline.
7. Please describe the communities and individuals that the program/project will benefit:
8. What is the budget for the entire program/project? \_\_\_\_\_  
What is your organization's total operating budget? \_\_\_\_\_
9. Can the program provide opportunities for groups of Leprino Foods Company employees to volunteer? If so, please describe them.
10. If applicable, please describe how the grant will provide support to a Leprino community and how it can be scaled over time.

### **Evaluation**

11. Describe how the organization plans to measure the impact of this grant and what success for this grant will look like?
12. For program or project requests: Summarize any existing research or evaluation results that demonstrate the program or project impact.

### **Leadership and Governance**

13. Describe the role of the board of directors in advancing the mission of the organization:

Attachments – Please attach the following (If available)

- Organization budget
- Program or project budget, if applicable
- Current (year-to-date) financial statements
- Most recent year-end financial statements, and audit
- Major contributors
- Board of directors list
- Proof of IRS federal tax-exempt status
- Key staff bios
- Annual report
- Evaluation results: organization’s evaluation results relevant to this request

**Authorization**

*The undersigned certifies that they are authorized to represent the organization applying for a grant and that the information contained in this application is accurate. The undersigned agrees that if a grant is awarded to the organization:*

*(1) The grant will be used for the purpose outlined in the grant award letter and may not be expended for any other purpose without prior written approval from Leprino Foods Company Foundation.*

*(2) Leprino Foods Company and the Leprino Foods Company Foundation have received nothing of material value in exchange for the grant, and*

*(3) Information about the organization and the grant may be used by Leprino Foods Company Foundation in any published materials.*

## HEALTH UPDATE | COVID-19 UPDATE | March 26, 2020

Health care providers: Please distribute widely in your office

This information is for the public health and health care community. Do not post this document on a public web or social media site.

### Key points

- As the volume of COVID-19 cases reported in Colorado increases, many patients may only be notified of their diagnosis by their provider. Current instructions on isolation for patients and quarantine for contacts are provided below. CDPHE is asking providers to give these instructions to patients when notifying them of a COVID-19 diagnosis (see below for details).
- To report a suspected or confirmed outbreak of COVID-19 in a long-term care facility (LTCF), please complete the “Outbreak Reporting Form for Long-Term Care Facilities” and securely email this to [CDPHE\\_HAIOutbreak@state.co.us](mailto:CDPHE_HAIOutbreak@state.co.us), or contact your local public health agency. The outbreak reporting form is available at: <https://cha.com/wp-content/uploads/2020/03/COVID-19-Outbreak-Reporting-Form-for-Long-Term-Care-Facilities.pdf>  
Additional resources for LTCFs can be found at: <https://covid19.colorado.gov/covid-19-resources-health-care-providers-and-local-public-health-agencies>
- CDC has new guidance including on therapeutic options (which includes information on hydroxychloroquine and chloroquine in addition to remdesivir), optimizing PPE, and special settings such as correctional facilities and long term care facilities; see below for links.
- CDPHE is no longer providing drive-through testing in the Denver metropolitan area. Please do not refer patients to CDPHE’s call center for information on getting tested for COVID-19, as we are unable to arrange testing or identify testing locations.
- University of Nebraska Medical Center has published their protocol for disinfection of N95 masks using Ultraviolet Germicidal Irradiation (UVGI); more information below.
- The U.S. Department of Health and Human Services (HHS) has announced new priorities for COVID-19 testing; prioritization for testing in Colorado adapted from this guidance is described below. Consider collecting samples to test all individuals who meet Tier 1 and Tier 2 prioritization criteria. If sending specimens to a commercial laboratory is not feasible, contact local public health (<https://www.colorado.gov/pacific/cdphe/find-your-local-public-health-agency>) about having specimens tested at the state public health lab.
- Samples submitted to the Colorado state public health lab without required information and labeling will not be processed, which may delay results. Information and labeling requirements are described below.
- Infection preventionists or others entering COVID-19 cases into CEDRS should check for

duplicates before entering a case, as a laboratory may already have reported the patient.

- Given the level of community transmission, health care workers caring for immunosuppressed or other high risk patients (<https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/people-at-higher-risk.html>) should wear facemasks (surgical masks) during all patient care when feasible.

## Background information

As of March 25, 2020 CDPHE has reported 1,086 cases of COVID-19 and 19 deaths. CDC confirmation is no longer required to confirm a positive result. This count includes both lab confirmed and probable cases (patients with compatible symptoms and close contact with a confirmed case). Case counts are updated daily and can be found at [covid19.colorado.gov](https://covid19.colorado.gov) under “Cases in Colorado: Data visualization.”

## Recommendations / guidance

### New CDC guidance

CDC continues to add and update guidance documents; a full list of new and updated guidance is available at: <https://www.cdc.gov/coronavirus/2019-ncov/whats-new-all.html>. A few new documents to highlight include the following:

- Information for Clinicians on Therapeutic Options for COVID-19 Patients: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/therapeutic-options.html>
- Preventing the Spread of COVID-19 in Retirement Communities and Independent Living Facilities (Interim Guidance): <https://www.cdc.gov/coronavirus/2019-ncov/community/retirement/guidance-retirement-response.html>
- Interim Guidance on Management of Coronavirus Disease 2019 (COVID-19) in Correctional and Detention Facilities: <https://www.cdc.gov/coronavirus/2019-ncov/community/correction-detention/guidance-correctional-detention.html>
- Strategies for Optimizing the Supply of PPE: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>
- CDC has launched an online “self-checker” for the public to use to help determine if they require medical care for COVID-19; it can be found at: <https://www.cdc.gov/coronavirus/2019-ncov/symptoms-testing/index.html>

### Instructions for patients diagnosed with COVID-19 and their close contacts

Due to the rising number of confirmed COVID-19 cases in Colorado, CDPHE is asking that clinicians provide the current guidance on isolation to patients at the time of their diagnosis with COVID-19, **including those with likely COVID-19 who will not be tested**, to ensure that timely recommendations are provided to reduce spread of disease.

Isolation recommendations:

- Under the non-test-based release from isolation strategy, patients with COVID-19 (either laboratory-confirmed or suspected based on history) should self-isolate until: at least 7 days after symptom onset AND fever has resolved for 72 hours without antipyretics AND symptoms are improving.

#### Quarantine recommendations for asymptomatic close contacts:

- Close contacts of patients with confirmed or likely COVID-19 should be instructed to self-quarantine for 14 days from the time of their last contact with the patient.
- CDC has recently updated their risk categories for non-healthcare exposure (<https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>); a high risk contact is defined as someone who is living in the same household as, being an intimate partner of, or providing care in a non-healthcare setting (such as a home) for a person with symptomatic laboratory-confirmed COVID-19 infection without using recommended precautions for home care and home isolation.
- Close contacts who are HCWs should be instructed to notify occupational health immediately for additional instructions.

#### **Patients who are healthcare workers (including first responders and staff in long term care or other residential facilities)**

- Patients diagnosed with COVID-19 (either laboratory confirmed or suspected) who are healthcare workers should contact their supervisor and occupational health to report their diagnosis.
- Public health guidance for health care worker return to work guidance was summarized in the CDC HAN dated March 17, 2020 and is available at <https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/hcp-return-work.html>.
- CDPHE recommends 10 day isolation for healthcare workers diagnosed with COVID-19 when possible due to limited data about shedding of viable virus beyond 7 days; however, we fully recognize the staffing challenges facing many facilities and understand that this may not be possible in many settings.
- Healthcare workers should work with occupational health to determine an appropriate return to work strategy.

#### **Information on isolation and quarantine can be found at the following locations**

- Discontinuation of home isolation: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/disposition-in-home-patients.html>
- Guidance on isolating at home: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-prevent-spread.html>
- Guidance on home care for COVID-19 patients: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-home-care.html>
- Definitions of isolation and quarantine:  
<https://covid19.colorado.gov/isolation-and-quarantine>

## Ultraviolet Germicidal Irradiation (UVGI) for N95 masks

The University of Nebraska Medical Center recently published their decontamination protocol for N95 masks: <https://www.nebraskamed.com/sites/default/files/documents/covid-19/n-95-decon-process.pdf>

The University of Nebraska cites several studies indicating efficacy of UVGI against viruses - including single-stranded RNA viruses such as coronaviruses - and notes preservation of filtration capacity after UVGI. Please note that the specific protocol used at University of Nebraska **has not been peer-reviewed**, and CDPHE cannot officially recommend this method at this time. Consider frequent quality control checks during implementation of UVGI, should your organization choose this option. CDC still recommends following Strategies for Optimizing the Supply of PPE at this time: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>.

## Instructions for submitting COVID-19 specimens to the State Lab

It is critical that all COVID-19 samples sent to the State Lab for testing have all required provider/facility, patient, and sample information completed in LabOnline (<https://labonline.cdphe.state.co.us/Account/SignIn>) or the COVID-19 (Non-surveillance) Test Request form (<https://drive.google.com/file/d/1qJuQFzrmdN4-vgfH27OFeyrczN753aBr/view>). The LabOnline chain of custody or test request form must be submitted along with the patient sample. **Samples that are submitted without the required information will not be processed until this information is received, which means results will not be able to be delivered in a timely manner.** Additionally, all samples submitted must have a label affixed to the sample that contains the following information: patient name, date of birth, and sex.

## Testing prioritization

CDPHE recommends prioritization based on the following criteria adapted from the U.S. Department of Health and Human Services testing priorities. Providers should consider collecting samples to test all individuals who meet Tier 1 and Tier 2 prioritization criteria below. If sending specimens to a commercial laboratory is not feasible, contact local public health (<https://www.colorado.gov/pacific/cdphe/find-your-local-public-health-agency>) about having specimens tested at the state public health lab.

The Colorado State Public Health Lab will continue to prioritize analysis of COVID-19 samples based on public health prioritization criteria. Public health prioritization criteria are: symptomatic healthcare workers, people hospitalized with severe illness, people with symptoms who live in residential facilities such as nursing homes or correctional settings, anyone with symptoms at risk of severe illness due to COVID-19, and outbreaks or clusters of respiratory illness being investigated by public health.

The State Lab uses the patient information submitted with the sample to prioritize tests, as appropriate. If a specimen is marked as being for a patient who meets the criteria, these samples are added to the next "batch" of testing. Samples that do not meet public health criteria may be sent to a reference lab (e.g., LabCorp) for processing, which may delay results.

TIER 1
<ul style="list-style-type: none"> <li>• Hospitalized patients</li> <li>• Health care workers with symptoms</li> </ul>
TIER 2
<ul style="list-style-type: none"> <li>• Patients in long-term care facilities or other residential settings such as homeless shelters or correctional facilities with symptoms</li> <li>• Patients over age 65 with symptoms</li> <li>• Patients with underlying conditions with symptoms*</li> <li>• First responders with symptoms</li> <li>• Critical infrastructure workers with symptoms**</li> <li>• People with symptoms who work with vulnerable populations or in group residential settings</li> </ul>
TIER 3
<ul style="list-style-type: none"> <li>• Other individuals with symptoms</li> </ul>

\*A list of people who are at higher risk of severe disease can be found at: <https://www.cdc.gov/coronavirus/2019-ncov/specific-groups/people-at-higher-risk.html>; however, this list may not be complete.

\*\*Critical infrastructure workers are those working in these sectors (<https://www.cisa.gov/critical-infrastructure-sectors>) who have a unique role in their work that cannot easily be transferred to other workers.

### Updated release from isolation information

	TEST-BASED STRATEGY	NON-TEST-BASED STRATEGY
Most members of general public with confirmed or suspected COVID-19 (non-HCW*, not hospitalized)	Not recommended	-At least 3 days (72 hours) after recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); AND -At least 7 days have passed since symptoms first appeared
HCWs with confirmed or suspected COVID-19*	-Resolution of fever without the use of fever-reducing medications and -Improvement in respiratory symptoms (e.g., cough, shortness of breath), and -Negative results of an FDA Emergency Use Authorized molecular	-At least 3 days (72 hours) after recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); AND

	assay for COVID-19 from at least two consecutive nasopharyngeal swab specimens collected $\geq 24$ hours apart (total of two negative specimens)	-At least 10** days have passed since symptoms first appeared
Hospitalized patients with confirmed COVID-19***	-Resolution of fever, without use of antipyretic medication -Improvement in illness signs and symptoms; AND -Negative results of an FDA Emergency Use Authorized molecular assay for COVID-19 from at least two consecutive nasopharyngeal specimens collected $\geq 24$ hours apart	-At least 3 days (72 hours) have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); AND -At least 7 days have passed since symptoms first appeared (at least 10 days if the patient resides in, or is being transferred to, a long-term care setting)

\*Healthcare worker or other professional that works with high-risk patients or in a group residential facility. Of note, health care workers also need to follow additional guidance including wearing a mask until at least 14 days after symptom onset and not seeing severely immunocompromised patients until 14 days after illness onset; additional details can be found in the HAN dated March 17, 2020 or at: <https://www.cdc.gov/coronavirus/2019-ncov/healthcare-facilities/hcp-return-work.html>

\*\*7 days could be considered in settings with a healthcare worker shortage; preliminary data suggest most shedding of live virus ends around 7 days.

\*\*\*Test based strategy is preferred when available for all hospitalized patients, as they may have longer periods of viral shedding than patients with mild or moderate disease. In particular, patients who are severely immunocompromised (e.g., medical treatment with immunosuppressive drugs, bone marrow or solid organ transplant recipients, inherited immunodeficiency, poorly controlled HIV) may also be contagious for longer than others according to CDC. CDC also recommends a test-based strategy when possible for patients who will be transferred to a long-term care or assisted living facility. If testing is not readily available, facilities may use the non-test-based strategy for discontinuation of transmission-based precautions. Facilities may choose to extend the period of isolation beyond the non-test-based-strategy duration, on a case by case basis in consultation with local and state public health authorities, for those who are severely immunocompromised or being transferred to a long-term care facility.

**Northeast Colorado Health Department Business Social Distancing Protocol**

*Must be completed for each facility or work site*

Business Name: Quintech LLC

Facility Address: 529 N. Albany

Approx. gross square footage of space open to the public: 2,000 sq. Ft.

**Businesses must implement all applicable measures listed below, and be prepared to explain why any measure that is not implemented is inapplicable to the business.**

**Signage**

- A copy of this Social Distancing Protocol has been placed at each public entrance to the work site.
- Signs have been placed at each public entrance of the facility or work site to inform all employees and customers that they should: avoid entering the facility or location if they have a cough or fever; maintain a minimum six-foot distance from one another; sneeze and cough into a cloth or tissue or, if not available, into one's elbow; and not shake hands or engage in any unnecessary physical contact.  
*[sign template attached]*

**Measures To Protect Employee Health** *(check all that apply to the facility or work site)*

- Everyone who can carry out their work duties from home has been directed to do so.
- Individual discussions have taken place with employees about the fact that older adults and those with chronic medical conditions may be at higher risk for serious illness. Options have been explained to high risk employees, including ways to minimize face-to-face interactions, maintaining six feet of distance from other people, remote work if possible, and leave policies for employees who choose not to come to work.
- All employees have been told not to come to work if sick (including any of the following: headache, sore throat, fever, dry cough, recent inability to taste and smell, shortness of breath, ear aches, body aches, diarrhea, fatigue, vomiting, and abdominal pain).
- Symptom checks are being conducted before employees may enter the work site. *[template attached]*
- Copies of this Protocol have been distributed to all employees.
- Workers who interact in close proximity with other employees, or with the public, must wear medical or non-medical cloth face coverings that cover the nose and mouth while working, except where doing so would inhibit that individual's health.
- Optional — Describe other measures:

**Measures To Prevent Unnecessary Contact** (check all that apply to the facility or work site)

- Contactless payment systems have been provided or, if not feasible, payment systems are sanitized regularly. Describe:

Payments can be dropped off at office, phoned in, etc.

- Curb-side drop-off/pick-up of products is available.
- People are prevented from self-serving any items that are food-related (including bulk food, plates, cups, lids, etc.).
- Optional—Describe other measures (e.g. providing senior-only hours):

**Measures To Reduce Exposures in Employee Transportation** (check all that apply to the facility or work site)

- Hand sanitizer is used by each passenger when entering the vehicle.
- The number of passengers has been reduced by 50% of the vehicle's occupancy, and passengers sit in locations to maximize the distance between one another.
- Passengers will wear a non-medical, cloth face-covering when in a vehicle containing more than 1 person.
- Windows will remain open and ventilation is increased.
- All high-contact surfaces of the vehicle are disinfected at the end of each day.

*Any additional measures not included here should be listed on separate pages,  
which the business may attach to this document.*

- A copy of this Social Distancing Protocol has been emailed to the Northeast Colorado Health Department at: [operations@nchd.org](mailto:operations@nchd.org)

**You may contact the following person with any questions or comments about this protocol:**

Name: Jeffery West

Phone number: 970-848-2515

**Measures To Keep People At Least Six Feet Apart** (check all that apply to the facility or work site)

- All employees have been instructed to maintain at least six feet of distance from customers and each other (employees may momentarily come closer when needed to accept payment, deliver goods or services, or when otherwise unavoidable).
- All desks, individual work stations, or work areas are separated by at least six feet.
- Tape or other markings have been placed at least six feet apart in customer line areas inside the store and on sidewalks to public entrances with signs directing customers to use the markings to maintain distance.
- Order areas are separated from delivery areas to prevent customers from gathering.
- Optional — Describe other measures:  
\_\_\_\_\_

**Measures To Prevent Crowds From Gathering:** (check all that apply to the facility or work site)

- The number of customers in the store at any one time is limited to \_\_\_\_\_, which allows for customers and employees to easily maintain at least six-foot distance from one another at all practicable times.
- An employee is monitoring the door to ensure that the maximum number of customers in the facility set forth above is not exceeded.
- Optional—Describe other measures:  
due to closure of most of our facility, foot traffic/or crowds are extremely limited  
(nonexistent)

**Measures To Increase Sanitization** (check all that apply to the facility or work site)

- Hand sanitizer, soap and water, or effective disinfectant is available to the public and employees at or near the entrance of the facility or work site, at checkout counters, workstations, and anywhere else where people have direct interactions. Location(s) include:  
In front of entrance, all bathrooms, tanning rooms (only rooms available besides bathrooms)
- Disinfecting wipes or spray that is effective against COVID-19 are available near workstations and all high-contact surfaces (including payment portals, carts, baskets, pens, shared tools, heavy equipment, etc.). Location(s) include:  
Front desk, tanning rooms
- Employee(s) have been assigned to disinfect all high-contact surfaces frequently.
- Break rooms, bathrooms, and other common areas are being disinfected on the following schedule:
  - Break Rooms \_\_\_\_\_
  - Bathrooms every other day
  - Other tanning rooms after every customer
- Optional — Describe other measures:  
\_\_\_\_\_

Conference call with Cargill regarding COVID-19  
3/24/20 @ 11:00 am

What is currently being done by Cargill:

- Break times can sit beside another employee, but not across. All employees are to be facing in one direction. No face to face contact.
- 6ft distancing the best they can.
- Health screening people who come in. Temperature screening in a separate room for anyone who does not pass the initial screening.
- Stay home if not feeling well, asking employees to self-quarantine 14 days when needed.
- Social distancing space when come in the main door.
- Where truck drivers come in, they do not enter the main part of the plant. They have contact with security, and social distancing has been put in place.
- Cattle haulers do not enter the main part of the plant, they go to another location to drop of papers.
- Contractors must go through screening just like employees and management.
- Additional cleaning – ramped up handrails, doorways, cafeteria, restrooms, etc. (multiple times per day).
- Professional vending company that does the cafeteria has changed station set ups. The salad bar is gone. Everything is individually wrapped or served by a food service worker.

Other items covered:

- If confirmed covid-19 case, they as an employer would be notified after the NCHD investigation is completed.
- Discussed how to handle those employees notifying them that they aren't feeling well, how to handle self-isolation orders from a doctor, and verified if the employee is not tested that we won't know about it.
- Questions regarding contact when symptomatic. Contact established by Trish as within 6' for more than 10 minutes. Those wearing appropriate PPE would not be considered as having contact.
- Trish will send guidelines regarding quarantine vs. isolation.
- They want to accomplish 100% screening by the end of this week.
- If an employee is ill, they need to contact Cargill's Health Services or HR for questions. They did not want to provide their contact numbers to NCHD. Have the employee call the appropriate Cargill contact.
- Cafeteria: Stressed extra handwashing and appropriate glove use.

Good to know! I'm sure they don't want to be on the news like JBS. T

On Mon, Apr 6, 2020 at 11:16 AM Tammy Hort RN, CIC <tammyh@nchd.org> wrote:

I just spoke to Scott Reyez. They are kicking booty! When an employee calls in as a positive, the direct family members that work at the plant are sent home for the 14 day quarantine - and paid for those 14 days. He is even able to trace back carpooling and then those people are quarantined! He has a whole board that shows how the positives are intertwined.

They are able to space some of fab employees 6' apart but in some areas that is not possible. All fab employees are wearing a mask or scarf. Cleaning handrails and doorknobs every hour, lunch room has changed the seating so people are not gathering together, cleaning offices several times a day.

They are doing great. Scott and I will continue to report positives so he can take care of the plant and we can take care of the rest.

Tammy

# Battelle CCDS™<sup>1</sup> Process

## HOW IT WORKS

### Battelle CCDS Critical Care Decontamination System™

**BATTELLE**

#### Your Facility's Responsibility

- Your Battelle POC will provide you with 3-digit codes for each facility
- The 3-digit code must be written on each individual N95

- Collect all N95 respirators into a single plastic bag
- Once the plastic bag is filled, tie off the bag and put it into another plastic bag

- Clean the outside bag with disinfectant
- Shipping box must be labeled with the 3-digit code and a biohazard sticker

- You can either use a logistics provider of your choice or Battelle's preferred logistics provider

#### Battelle CCDS™ Process

- Your shipments are barcoded to ensure chain of custody
- Your N95 respirators are exposed to the vapor phase hydrogen peroxide process
- After processing, your N95 respirators are verified to ensure they are free of decontaminant

- The logistics provider returns your decontaminated N95 respirators back to your facility

# Battelle CCDS™<sup>1</sup> Process

## HEALTH CARE PROVIDER SIGN-UP PROCESS Battelle CCDS Critical Care Decontamination System™

**BATTELLE**

### 1 Sign up with Battelle

- Visit [battelle.org/decon](http://battelle.org/decon) to fill out the enrollment form
- Battelle emails enrollee links to the enrollment contract, instructions, and the Battelle POC

[battelle.org/decon](http://battelle.org/decon)

### 2 Contact Us to Get Your Code

- Enrollee signs contract and contacts Battelle POC to receive their 3-digit codes for each facility

### 3 Properly Label Respirators

- Once the 3-digit codes are received from Battelle, enrollee collects N95 respirators
- N95 respirators must be unsoiled (free of blood, mucus, make-up, lip balm, etc.) and labeled with a permanent marker

### 4 Collect & Bag All N95 Respirators

- Enrollee collects all N95 respirators into a single plastic bag
- Once the plastic bag is filled, tie off the bag and put it into another plastic bag

### 5 Properly Package

- Clean the outside bag with disinfectant
- Shipping box must be labeled with the 3-digit code and a biohazard sticker

### 6 Ship to CCDS Site

- Enrollee contacts their chosen logistics provider to coordinate pick-up and delivery of their N95 respirators
- Enrollee can either use a logistics provider of their choice or Battelle's preferred logistics provider

### 7 Decontaminated & Returned

- Your shipments are barcoded to ensure chain of custody
- Your N95 respirators are processed and then verified to ensure they are free of decontaminant
- Your decontaminated N95 respirators are returned to your facility

# Battelle CCDS™<sup>1</sup> Process

## Bleach concentrations for sanitizing, disinfection and use in outbreak settings

### Background

The concentration of sodium hypochlorite (the active ingredient in bleach) has increased from 5.25-6.00% to 8.25%. While some stores may still carry the lower concentration of bleach, many companies plan to discontinue manufacturing the less concentrated bleach. Due to this concentration change, the dilutions of bleach have changed in order to achieve the same parts per million (ppm) that are effective at killing pathogens. It is important that the appropriate concentrations of bleach are used, because higher concentrations can be corrosive and irritating to the respiratory tract, skin and eyes; lower concentrations are not effective at killing pathogens.

Bleach is used at varying dilutions for sanitizing, routine disinfection, and norovirus disinfection. Refer to the appropriate regulations or guidance documents for additional information about the concentration needed for the task at hand. In general, sanitizing solutions should be used on food contact surfaces in restaurants and homes, toys, and other commonly handled items, such as doorknobs. Disinfecting solutions should be used in restrooms, on diaper changing tables in child care facilities, and to disinfect areas contaminated by bodily fluids. Around a case of norovirus, during outbreaks of norovirus, and during outbreaks of unknown viral gastroenteritis, the norovirus dilution should be used for disinfection.

For bleach to be effective, it must be applied at the appropriate dilution to a clean surface. The surface must stay wet for the entire contact time.

### Proper Bleach Use

Purpose	Final ppm	Dilution	Contact time*	Follow up procedure
Routine Sanitizing (examples: food contact surfaces in child care facilities and restaurants)	50-200	½ teaspoon-2 teaspoons bleach: 1 gallon water**	2 minutes	Air dry or dry with paper towel.
Routine Disinfecting (examples: diaper changing areas in child care facilities and restaurant restrooms)	2400	½ cup bleach: 1 gallon water**	5 minutes	Air dry or dry with paper towel. Food contact surfaces and toys must be rinsed and sanitized.
Norovirus Disinfecting (examples: Norovirus outbreak or gastrointestinal outbreak of unknown etiology)	5000	1 cup bleach: 1 gallon water**	1 minute	Air dry or dry with paper towel. Food contact surfaces must be rinsed and sanitized.

\*for the contact time, surface area must remain wet for entire time in order to be effective

\*\*1 gallon equals 16 cups

## **Other Disinfectants for Child Care Facilities**

The Division of Environmental Health and Sustainability provides a list of disinfectants approved for use in child care facilities:

[https://www.colorado.gov/pacific/sites/default/files/DEHS\\_ChildCare\\_ApprovedDisinfectants\\_Rev2.pdf](https://www.colorado.gov/pacific/sites/default/files/DEHS_ChildCare_ApprovedDisinfectants_Rev2.pdf)

## **Other Disinfectants for Norovirus**

There are numerous commercially available products that EPA has registered as appropriate for disinfection for norovirus:

[http://www.epa.gov/oppad001/list\\_g\\_norovirus.pdf](http://www.epa.gov/oppad001/list_g_norovirus.pdf)

# ROUTINE SANITIZING

2 minutes contact time

# ROUTINE DISINFECTING

5 minutes contact time

# NOROVIRUS DISINFECTING

1 minute contact time

## NCHD Board of Health

### February 22, 2020 Meeting Minutes

**Board of Health Members Present:** Byron Pelton, Mark Turner, Samantha Mahaffey, Tony Wells, Robin Wiley, Terry Hofmeister, Laura Teague, Jon Becker

**Board of Health Members Absent:**

**Staff Members Present:** Trish McClain, Alli Howe, Penny Stumpf, Mel Bustos, Christine Covelli, Janelle Machamer, Michelle Pemberton, Conner Gerken

**Public Present:** Tim Larson (CDPHE), Corey Ehrlich (Farmer), Greg Ehrlich (Farmer), Wayne Stark (Farmer), Ronald Geisels (Farmer), Patrick Stanley (MWRD), Jason Zimbelmon (MWRD), Daniel Shockman (MWRD), Ben Frissel (Weld County Dept of Public Health) by phone

### Call to Order

#### 1. Public Comment

- Greg Ehrlich, a farmer impacted by biosolids on a farm in Wiggins, CO, presented additional information to the board of health. Pictures were presented of equipment used by Metro Grow to place biosolids on ground on a neighboring farm as well as pictures of the biosolids laying on top of the ground demonstrating that they are not being worked into the ground adequately. He also explained that he had made numerous calls to Tim Larson at CDPHE beginning in December but only received one call back from CDPHE.
- Trish read an email she received from Andy Rowell of Wiggins Farms to the board members.

#### 2. Acceptance of the Agenda

- Commissioner Turner moved to change the agenda to allow for Tim Larson from CDPHE to present information on biosolids regulations to the board first on the agenda. Laura Teague seconded and motion passed.

#### 3. Presentation of Biosolids Regulatory Requirements by CDPHE

Tim Larson, CDPHE – Mr. Larson presented on biosolids regulatory requirements. Commissioner Wiley asked for clarification on domestic versus industrial waste. Samantha Mahaffey asked for clarification on what is meant by “treatment”. Commissioner Pelton asked

about hormones. Commissioner Wiley asked about metals. Mr. Larson provided explanations to clarify for each.

When handled properly the biosolids can be recycled. Colorado recycles close to 85% while nationally recycle rates are around 50-55%. Biosolids regulations were provided to the board under “old business” in their books. Mr. Larson explained that CDPHE regulates individual biosolid sites. He went on to explain Section 405 of the Clean Water Act; Section 503.7 requirements for application of biosolids. He also explained ‘beneficial use’. Once CDPHE receives a letter of intent, he reaches out to the local public health agency to ensure they also received a copy of the letter of intent for an application site. Notice of Authorization is either issued or denied once it has been evaluated. Usually this is a 60 day turn around. This decision can be appealed within 30 days.

Mr. Larson also explained classifications for metals and pathogens, what is regulated and maximum amounts allowed. In addition, vector attraction reduction was presented. Commissioner Wiley asked about which one of the vector attraction reduction methods was used on the farm in Wiggins that is being referenced today. Mr. Larson said they used #7 Aerobic. He went on to discuss storage of biosolids. Commissioner Wiley asked about what is meant by “incorporating biosolids”. Commissioner Pelton asked about what happens when the ground is frozen. Mr. Larson explained ‘incorporating’ as well as the fact that biosolids should not be applied if the ground is frozen. Commissioner Hofmeister asked who polices these regulations to ensure there is compliance. Mr. Larson said he does it for the entire state of Colorado. He does rely on local public health for assistance. Commissioner Hofmeister asked if one person is enough for the entire state. Mr. Larson explained that currently CDPHE doesn’t even have enough funding to support his position full time. Mr. Ehrlich asked about control of odors. Mr. Larson explained that odor isn’t part of the biosolids regulations. Mr. Larson explained that solid waste regulations are separate from biosolids regulations. Next, he explained Land Application Restricted Use. Rules about application near state waters and groundwater was also reviewed. Crop restrictions were also covered. Reporting requirements, inspections, and notification of noncompliance were also discussed. Commissioner Hofmeister asked about requirements when the application is close to a town or city. Mr. Larson explained that there are no regulations in regards to the distance they can apply in relationship to a municipality. There is also no requirement in regards to odor. Commissioner Wiley asked about someone being more closely regulated and can that be explained. Mr. Larson explained that a municipality and/or county can have stricter regulations than the EPA or the state. He told the NCHD Board of Health members that they could have stricter regulations than the state of Colorado. Commissioner Pelton asked Mr. Larson to provide his presentation to Trish so she can send it to them as board members and Mr. Larson made it available. Trish will send it to the board members. Mr. Larson left some business cards.

Ben Frissel with Weld County Department of Public Health explained that Weld County follows state regulations for biosolids with only a couple of exceptions. Weld County does have a stricter regulation for biosolid application and odor than the state of Colorado. While their odor regulation is stricter, the threshold is still pretty high and he has only had one or two cases that have been affected.

Commissioner Hofmeister asked Mr. Larson about how quality of life plays into these regulations. Mr. Larson has found that most of the time that neighbors are cooperative but to

some extent odors are part of farming. Appliers usually work with farmers and neighbors. Commissioner Wiley stated that when neighbors don't work together then it ends up resulting in extra regulations and none of us want that.

Commissioner Pelton thanked Mr. Larson and Ben Frissel from Weld County.

#### **4. Acceptance of the Previous Meeting Minutes**

- Commissioner Wiley moved to accept the January meeting minutes. Samantha Mahaffey seconded and motion passed.

#### **5. Acceptance of the Financials**

- Janelle Machamer presented the financial report for January, 2020. Commissioner Becker moved to accept the January financials. Commissioner Wells seconded and motion passed.

#### **6. Director's Report**

- Communicable Disease report was presented. As of February 19, we have had 30 hospitalized influenza cases in our region. Influenza A is now the prevalent strain being seen. No word yet if the season has peaked. There have been 3 pediatric deaths in the state of Colorado since the beginning of the season. Other communicable disease reported included tuberculosis in our region.
- COVID-19 (novel coronavirus) – At this point we have had no confirmed cases in Colorado. In our region we do have one person we are monitoring for 14 days as required but so far they are not symptomatic. CDPHE and NCHD are monitoring but the risk is low. In the United States we have more people dying from influenza so that is a higher risk. Worldwide there have been people who have died from coronavirus and that could be due to lack of access to healthcare in other regions of the world. Commissioner Wiley asked about why coronavirus is getting so much attention if more people are dying from influenza. Trish explained that it may be because they don't know a lot about coronavirus. There has been a rumor that there has been a mass quarantine in Sterling. Denver Channel 7 News and the Sidney Sun Telegraph Newspaper have reached out to NCHD today. We will be putting a press release out to ensure the public knows there is no quarantine in our region and there hasn't been any quarantine.
- Electronic Health Record/Practice Management system – planning to go live with CureMD in early April. Penny has done a good job of coordinating everything including training and equipment. Commissioner Pelton asked about billing. Penny explained that they are in the process of going back to do billing for the past year.
- Trish explained to the board about WIC funding in the next fiscal year. Laura Teague moved to support a request for WIC funding. Commissioner Wiley seconded and motion passed.

#### **7. Client Health Services Division Administrative Report**

- NCHD's Oral Health Team and Reproductive Health staff are moving from a central-model to a contracting-model. In our Reproductive Health program our nurse practitioner resigned but we have had great support from a practitioner out of Weld County. We are working on getting a contract in place with a nurse practitioner in Logan County.

- Tobacco program staff have had continued momentum with municipally-focused policy work and have youth boards in Yuma and Morgan Counties. They are also in the midst changes at the federal level. Alli will be taking some Yuma County youth to a conference in Denver focused on tobacco policy work this coming Friday, February 28.
- Trish gave Alli approval to restructure the Client Health Services Division. To strengthen our early childhood prevention programs we have created an Early Prevention Department in the CHS Division. This department will lead our Healthy Child Clinics, Child Fatality Prevention Contract, and Essentials for Childhood Contract and future contracts to impact early childhood health.
- Alli told the board about some pending funding requests: Tony Grampsas Youth Services Program (\$200,000 – 3 year contract) and Colorado Health Foundation (\$693,000 3 year contract) and CDPHE Family Planning Program (\$107,028 1 year contract) – expect notification on all 3 by April or May.
- The immunization program completed VFC recertification in all six counties. Immunity Community Honor Role has been awarded to Yuma 1 and Wray RD-2. Christine completed a phone interview with a reporter from the Mountain West News Bureau regarding low MMR vaccination rates at Woodlin School. Also, we have received an additional \$6,837 from CDPHE to use toward storage units and back-up power supply. There are a couple of immunization bills before the legislature that may affect our work as a health department and we will keep the board updated.
- Colorado Heart Healthy Solutions has had some great success in Sedgwick County this past month. This program serves adults to reduce risk for cardiovascular disease.

#### **8. Operations Division Administrative Report**

- NCHD held a second Leadership Summit on January 21 to plan for 2020. It was a great opportunity to review our Public Health Improvement Plan and conduct some strategic planning for the coming year.
- Healthy Communities has changed over to a new system (Lighting System) the first week of February and there have been many issues with the new system. The Healthy Communities program provides assistance to clients on their Medicaid benefits. We have met all deliverables so will be receiving full funding for this fiscal year.
- Maintenance update for the Sterling office includes new hand rails that have been installed at all entrances where steps are present for safety.
- Our IT staff are working closely with Connecting Point to make sure all equipment is compatible with the CureMD system. We have 9 staff who will be Super Users so have scheduled 2 trainings each week until we go live. NCHD will be able to build this system to meet our needs. April 8 is the anticipated date for implementation. A Wednesday was selected because while we do have clinics scheduled it isn't one of our busier days. Commissioner Pelton asked about a contingency plan in case it doesn't work and Penny expressed that we do have a plan if things don't go as planned.

#### **9. Environmental Health Division Administrative Report**

- Town of Hillrose had a sanitary survey was performed on January 13, 2020 and no significant violations were identified.

- CHS-M&M Co-Op Wiggins Station submitted a “No Further Action” request and the Division of Oil & Public Safety reviewed it on January 13, 2020 and will require no further investigation or remedial action at this time.
- The Upper Highland HOA failed to maintain a minimum 0.2 mg/L distribution system residual disinfectant concentration during December, 2019 and they also exceeded the maximum contamination level for combined uranium during the 4<sup>th</sup> quarter of 2019. The supplier must provide Tier 2 public notification to all persons served no later than February 15, 2020
- Town of Akron – Effective 1/16/2020 the Water Quality Control Division will regulate the WPA well as a groundwater under the direct influence of surface water source. Mel will provide more information to Commissioner Wells as he knows more.
- Opened Morgan Community College store and coffee shop.
- Opened Delish by Pebbles in Yuma.
- Das Grebbel mobile unit will be operating in Logan County.
- Messages have been left for the new Merino Convenience Store regarding a plan review but there has been no response.
- New OWTS contractor, Ronny Christensen out of Sidney, NE.
- 80% of Food licenses have been completed but still working on other program licenses.
- NCHD met both statutory requirements for FDA Standards 2 & 3 by January 1, 2020.
- Mel and Heather plan to attend the bi-annual National Conference for Food Protection being held in Denver the end of March/early April. We applied for a mini grant to cover the costs.
- NCHD received an excellent grade for 3<sup>rd</sup> quarter review of child care inspections.
- 4<sup>th</sup> quarter Delegated Program Data Report was shared with the board.
- Will be holding a Food Safety Meeting on Thursday, April 9 before we have the Food Safety Awards.

#### **10. Program Highlight – Immunizations (Christine Covelli)**

- Christine explained the three vaccine funding for immunizations: VFC, 317 and Private.
- She explained inventory management, storage and handling as well as administration and safety involved in running the immunization program successfully.
- We had lower coverage rates in all 6 counties this year. Commissioner Hofmeister asked if there is anything they can do as commissioners to help increase this rate.
- In 2019, NCHD gave 2,749 total vaccines, and saw 1,224 total patients for immunizations.
- NCHD campaigns, Recall & Reminder, specialty clinics offered during back to school and flu seasons, incentives provided by our immunization program, technical support provided to schools as well as community clinics and providers, and community outreach.
- Christine also introduced the board to each of the nurses working in their respective counties.
- In 2020 we hope to conduct a Flu POD in the fall in Yuma at Smithfield, update our Recall/Reminder program, implementing back up batteries/generators in our smaller counties and moving to an electronic health record.

- Laura Teague asked if we run out of vaccine in one program can we use from another program temporarily and then reconcile when more is received. Christine explained that there are some limited options for them to follow but they are supposed to only use the each vaccine purchased as allocated. NCHD does experience some challenges due to requirements to have vaccines at all six sites. Sometimes vaccine is wasted but it is minimal.

### **Old Business**

11. Resolution of biosolids complaint in Wiggins, CO - Commissioner Hofmeister appreciated hearing the state regulations. He would like to see two groups in Wiggins improve communication and begin working together. Commissioner Hofmeister expressed that he wants to walk out today with everyone feeling satisfied. He believes in quality of life so would like to see a plan be negotiated today so that everyone can be in agreement and he opened the meeting for comment.
  - Daniel Shockman with Metro Grow spoke and provided two suggestions in regards to what their business could do to resolve the current issues: a) They could schedule applications at different times of the year so that application is done in the spring when it can be disked in right away, b) Another suggestion is to have some of their guys do application later in the day (Metro Grow's normal work day is earlier than the farming schedule). Commissioner Wiley asked if Metro Grow has thought about implementing their own rules about application on frozen ground. Pat Stanley from Metro Grow responded and spoke about the fact that they can't tell the farmer what to do after they apply the biosolids
  - Wayne Stark, a farmer, stated that this was the only year they have had complaints about that particular field. They will try to do a better job of incorporating the biosolids.
  - Commissioners expressed that if the two groups don't come together then more regulations will have to be put into place and that isn't helpful to anyone. The commissioners would really like to see these two groups work together so that additional regulations aren't required.
  - Greg Ehrlich again expressed frustration about odor.
  - Commissioner Wiley expressed that the board doesn't want to pass additional regulations so reiterated the same request that they work together as neighbors and self-regulate so the board of health doesn't have to regulate.
  - All parties expressed they would work together to resolve the current issues and complaints. The board took no action at this time.

12.

### **New Business**

13. Family Planning Fee Scale – A new 2020 Family Planning Fee Scale was presented to the board for approval. Samantha Mahaffey moved that the new sliding fee scale be accepted. Commissioner Hofmeister seconded and motion passed.

14.

### **Executive Session**

### **Meeting Adjourned**

Commissioner Pelton adjourned the meeting of the Board of Health at 3:26 p.m.

Approved,

Respectfully Submitted,

Commissioner Byron Pelton, President

Commissioner Terry Hofmeister, Secretary

Note: These minutes represent only a summary of the proceedings of the February 26, 2020 meeting of the Northeast Colorado Board of Health. A complete and accurate record of the proceedings is available on a tape recording that is retained in the Northeast Colorado Health Department Regional Office at 700 Columbine Street, Sterling, CO 80751.

700 Columbine St., Sterling, CO 80751 - (970) 522-3741 – (877) 795-0646 - [www.nchd.org](http://www.nchd.org)

### March 2020 Financial Report

- When the Agency's 2019 audit is finalized the accounting system will continue to have the year 2019 open. NCHD revenues over expenditures will increase until the year is closed out. The following will list each month to verify the agency is balancing until the audit is completed and the year 2019 is closed.

December	<b>191,116.09</b>
January	<b>217,846.49</b>
February	<b>-47,779.50</b>
March	<b>-116,206.65</b>
<hr/>	
Total	<b>244,976.43</b>

### Overall Summary:

- In March, the Agency deposited \$207,550.06 and paid out \$267,290.31 in AP, payroll and payroll liabilities. The agency transferred \$280,000.00 through MCT.
- PTO pay out balance is \$137,547.44, which is for 6,292.75 hours. Added to the liability balance is 13.70% for Pera and 2.9% for Medicare for a total of \$160,380.32. PTO balance relates to an average of 787 days and 19 days per employee for 41 employees. When an employee reaches the maximum balance of 360, they will not accrue until PTO is taken and their balance drops below the 360.

### Revenue:

- Accounts Receivable at the end of March was \$276,682.84 and the current balance will be presented at the board meeting.
- The agency billed out \$113,508.11 in contracts which was an increase from February's billing. The agency also received \$25,000 in purchase order payments.
- Fees (\$-725.31) and Medicaid (\$-4,566.16) decreased. Private insurance (\$2,191.56) and donations (\$107.00) increased.

## Expenses:

- In March the total expenses increased from February (\$29,771.70).
- There was one PTO payout in the EH division.
- Travel (\$-1,629.14), postage (\$-456.18), incentives (\$-1,195.75), utilities (\$-329.56), photocopies (\$-214.96), maintenance (\$-1,770.74), software main/licenses (\$-6,115.74) decreased from February.
- Supplies (\$1,687.75), communications (\$1,285.01), equipment (\$3,177.37), programs expense (\$3,647.36) and professional fees (\$11,045.09) increased from February.
- Equipment purchased in March was a laptop for the new manager position in the Nursing Division (\$1,850.89), storage cabinets in the EH lab area in Sterling (\$1,950.00), a table and storage cabinets for the EPR program (\$1,511.50) and additional phone equipment from Peak Communications for the Covid-19 response (\$1,450.00).
- Program expenses included meeting/training expenses (\$1,149.27), dues (\$285.00), publications & subscriptions (\$25.00), advertising (\$215.50), recruitment (\$492.35), contraceptives (\$289.65), laboratory (\$685.00), and staff development (\$-1,182.90) due to cancelled trainings.
- Regarding Covid-19, all expenses and future income will be tracked separately with a new program code.

Respectfully submitted,

Janelle L. Machamer  
Accountant

# Northeast Colorado Health Department

April 22, 2020

Dear Board of Health Members,

First, let me thank you for all of your support these last several weeks. The COVID-19 pandemic has been all-encompassing for me so this report will not reflect much more than that. Your emails, texts and phone calls have been appreciated and I hope if you have questions or concerns that you know you can call me at any time.

Second, I want to recognize the hard work of the NCHD staff. This response is truly a marathon and we could never have started this race without the heavy lifting done by Mike Burnett, Tammy Hort, and Michelle Pemberton. We started this journey the first week of March and then brought in the rest of the Incident Management Team on March 13 and have been at it ever since. The IMT staff are made up of a variety of employees and they have all risen to the challenge of taking on roles that they may or may not have practiced during annual exercises. And they just keep going. I am beyond proud of the people I work with.

COVID-19 response activities include but are not limited to:

- Case investigation, contact tracing, quarantine and isolation
- Coordination of ESF-8 duties, including receiving and distributing Strategic National Stockpile supplies
- Outbreak follow-up/investigation at Eben Ezer, Cargill, and Leprino
- Communication coordination—with partnering agencies, CDPHE, local media, state media, social media and website, information requests—Michelle and Mary have done an amazing job fielding the many media requests we have gotten
- Continuity of Operations—teleworking staff, schedule adjustments, remote delivery of services, Alli and Heather have put in so much work to keep our staff updated and prepared to answer questions—I've included a day's worth of communication for your review
- Countless remote meetings with a variety of participants—the planning section staff have done great work to get all of these meetings covered.
- EH staff, headed by Mel, have done amazing work to provide guidance to restaurants, golf courses, and other businesses while still continuing to provide routine EH services such as septic and water.
- Data collection—the COOP group is tracking all the calls that come in so we know if there are other topics that we need to provide more information about
- Adjusting payroll to accommodate the need for staff to access the Emergency Leave as described in the Families First Coronavirus Response Act. Janelle and Penny have worked hard to figure out what is required since the Act was pushed out without much guidance at all. I've included the document we are using for our staff to access this leave benefit.
- Reopening Colorado—this has been the topic of several calls and webinars. Hopefully we will be able to figure out what works in NE Colorado and be able to find that balance. I think we are still going

*- Serving Logan, Morgan, Phillips, Sedgwick, Washington and Yuma counties since 1948 -*

to see increases in cases in our region because testing has been so limited, but we are hoping to increase capacity with our health provider partners in the next week or two.

If there are non-COVID-19 topics you need information on, please let me know.

Thank you for your support of the work we do.

Sincerely,

Trish McClain  
Public Health Director

### NCHD Operational Changes

#### Do we still have the same operating hours?

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month. Call our Public Health Nurse, Kandi Jamison x3023 to ask about scheduling an appointment.

Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.

#### How do I contact NCHD staff?

- Our staff is available by phone and email even if they are remotely working.
- Questions about clinics and schedules call your local Public Health Nurse:
  - Yuma and Holyoke: Kandi Jamison x3023
  - Sterling: Brandee Martinez x1236
  - Fort Morgan: Christine Covelli x2236
  - Akron: Tricia Garrett x2254

#### Are we offering all our normal services?

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients will be screened for symptoms when they arrive before going back to clinic rooms. Clients with new symptoms like fever will be asked to reschedule their appointment when they're feeling better.

#### Vital Records:

- Our staff will continue to process all vital records requests.
- We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates. We request that if you're coming into our office that you are healthy and symptom free.
- Allow for up to 72 hours for the record to be processed.

#### Environmental Health:

- Water testing will continue as usual.
- Water and Septic Inspections related to loans will be coordinated on a case by case basis.
- All staff are available for questions and concerns.

- Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.

#### **Nursing Services:**

- Nursing services will continue. Some locations will have reduced hours of operation due to COVID-19 response efforts. The following counties will be open for nursing services one day a month:
  - Phillips County: April 21st, 2020 and May 12th, 2020.
  - Sedgwick County: May 7th, 2020.
  - Washington County: May 13th, 2020.
- In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.

#### **WIC Services:**

- All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, appointments are available over the phone. Your WIC Educator will contact you about conducting the appointment over the phone.
- Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

### **Questions about COVID-19**

#### **What is a coronavirus and what is COVID-19?**

- Coronaviruses are a large family of viruses. Not all coronaviruses are COVID-19.
- A novel (or new) coronavirus is a strain of virus that has not been previously identified in humans.
- Rarely, animal coronaviruses can evolve and infect people and then spread between people, such as has been seen with Middle East Respiratory Syndrome (MERS) and Severe Acute Respiratory Syndrome (SARS). These viruses have caused outbreaks internationally and have been known to cause severe illness. Scientists think this is what happened with COVID-19
- COVID-19 now is spreading from person to person in many countries and states, including Colorado.

#### **How common is COVID-19 in the US? Colorado? My County?**

[CDPHE's Website](#) has the most up to date information for this rapidly changing situation.

We currently have **175 confirmed cases** in northeast Colorado. 145 in Morgan County, 17 in Logan County, 2 in Yuma County, 5 in Phillips County, and 6 in Washington County. (Current 1600, 4/17/2020) Count does not include pending cases.

#### **How serious is COVID-19?**

Since COVID-19 is a new disease and there is more to learn about the virus, the current understanding about how it spreads is largely based on what is known about similar respiratory illnesses.

- Reported illnesses have ranged from mild symptoms to severe illness and death.
- According to the World Health Organization, about 80% of COVID-19 cases are mild.
- Higher risk groups include:
  - Older people (over age 60), especially those over 80 years.
  - People who have chronic medical conditions like heart, lung, or kidney disease, or diabetes.
  - Older people with chronic medical conditions are at greatest risk.

#### **Who is at risk for COVID-19?**

Certain people will have an increased risk of infection:

- People who have traveled to areas where widespread community transmission is occurring.
- People who had direct close contact with someone who was confirmed to have COVID-19.

Some people are at higher risk for getting very sick from COVID-19. That includes:

- Older adults (over age 60), especially those over 80 years.
- People who have serious chronic medical conditions like:
  - Kidney disease
  - Heart disease
  - Diabetes
  - Lung disease

- HIV
- Immunocompromised

### Where can I get more information?

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

## Questions about Transmission of COVID-19

### How is COVID-19 spread?

- COVID-19 spreads from person to person and is thought to occur mainly through respiratory droplets produced when an infected person coughs or sneezes, similar to how influenza and other respiratory viruses spread.
- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.
- People are thought to be most contagious when they are most symptomatic (the sickest).
- Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.
- How easily a virus spreads from person-to-person can vary. Some viruses are highly contagious (spread easily), like measles, while other viruses do not spread as easily. Another factor is whether the spread is sustained, spreading continually without stopping.
- The virus that causes COVID-19 seems to be spreading easily and sustainably in the community (“community spread”) in some affected [geographic areas](#)

### Does COVID-19 stay in the air?

In general, coronaviruses do not stay in the air like measles (which can live up to two hours in the air). However, there is still a lot to learn about COVID-19, and we can't be sure that this virus doesn't stay in the air. We are taking a cautious approach to prevent spread.

### Can I get COVID-19 from contaminated food or water?

Coronaviruses are generally thought to be spread from person-to-person through respiratory droplets. Currently there is no evidence to support transmission of COVID-19 associated with food. Before preparing or eating food it is important to always wash your hands with soap and water for 20 seconds for general food safety. Throughout the day wash your hands after blowing your nose, coughing or sneezing, or going to the bathroom.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

In general, because of poor survivability of these coronaviruses on surfaces, there is likely very low risk of spread from food products or packaging that are shipped over a period of days or weeks at ambient, refrigerated, or frozen temperatures.

## Questions about Symptoms of COVID-19

### What are the symptoms of COVID-19?

- Common signs of infection include respiratory symptoms: fever, cough, shortness of breath and breathing difficulties.
- In more severe cases, infection can cause pneumonia, severe acute respiratory syndrome, kidney failure and death.

### How long do COVID-19 symptoms last?

How long someone is actively sick can vary depending on the severity of the illness. The decision on when to release someone from isolation is made on a case-by-case basis in consultation with doctors, infection prevention and control experts, and public health officials and involves considering specifics of each situation including disease severity, illness signs and symptoms, and results of laboratory testing for that patient.

### How long does it take to start showing symptoms of COVID-19?

It is unknown how long it takes a person to develop symptoms but it is believed to be anywhere from 2 - 14 days.

### Can a person with COVID-19 spread the disease without having symptoms?

People are thought to be most contagious when they are most symptomatic (the sickest). Some spread might be possible before people show symptoms; there have been reports of this occurring with this new coronavirus, but this is not thought to be the main way the virus spreads.

### I think I have symptoms of COVID-19?

If you feel sick with a fever, cough, or difficulty breathing, you should isolate yourself from others. If you need medical advice, call a healthcare provider or nurse line. It is important to **CALL** ahead **BEFORE** going to see a health care provider, urgent care, or emergency room in order to limit the spread of COVID-19. Tell them your symptoms and where or how you might have been exposed. Your healthcare professional will work with your state's public health department and CDC to determine if you need to be tested for COVID-19.

### I think I may have been exposed to COVID-19, what should I do?

If you don't have symptoms but know you have been in close contact with someone who has been diagnosed with COVID-19 or has symptoms (fever, coughing, shortness of breath), you should quarantine yourself.

## Questions about Testing for COVID-19

### How can I get tested for COVID-19?

The Health Department does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.

You must have an order from your healthcare provider:

- CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.
- DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.
- DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.

### When will I get my results?

The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.

Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.

**If tested in one of our 6 counties, transfer to Tammy Hort at x1241**

**If tested at a Colorado Drive Up Location:** Individuals will be contacted directly with their results as soon as possible. **Do not** call the state lab, the state health department, or a local public health agency to get your results.

## Questions about Treatment of COVID-19

### Is there a vaccine post-exposure?

There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19).

The best way to prevent illness is to avoid being exposed to this virus.

### How is COVID-19 treated?

Most individuals recover by resting and drinking plenty of liquids. Consult your primary care provider about taking any pain and fever-reducing medications. Most patients with COVID-19 will not require medical supportive care. Clinical management for hospitalized patients with COVID-19 is focused on supportive care of complications. The decision to monitor these patients in the inpatient or outpatient setting should be made on a case-by-case basis.

### **If I've had COVID-19 in the past, can I get it again?**

- Using the CDC-developed diagnostic test, a negative result means that the virus that causes COVID-19 was not found in the person's sample. In the early stages of infection, it is possible the virus will not be detected.
- For COVID-19, a negative test result for a sample collected while a person has symptoms likely means that the COVID-19 virus is not causing their current illness.
- At this time, it is unknown if you can get the disease more than once.

## **Questions about Prevention of COVID-19**

### **What can I do to protect myself or my family from becoming ill?**

#### **Preventive actions**

- Frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol.
- Cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve.
- Avoid touching your eyes, nose, and mouth with unwashed hands
- Stay home if you're sick, and keep your children home if they are sick.
- Daily, clean surfaces in your home, and personal items such as cell phones, using regular household products.

#### **Practice social distancing**

- Try to keep 6 feet between yourself and other people whenever possible, particularly when you or others are sick. No hugs, no handshakes.
- Work from home if you can.
- Keep children and teens from gathering in other public places when school is closed.
- Stay home.
- Avoid group gatherings. The smallest group in the largest space poses the least risk. Our current advice is to not attend gatherings of more than 10 people.

#### **Stay informed**

- For general questions, contact CO HELP, Colorado's COVID-19 hotline:
  - Call 303-389-1687 or 1-877-462-2911 for answers in many languages including English, Spanish (Español), Mandarin (普通话), and more.
  - Email [COHELP@RMPDC.org](mailto:COHELP@RMPDC.org) (answers in English only).
- State public health web page: [covid19.colorado.gov](https://www.covid19.colorado.gov)
- Facebook ([facebook.com/CDPHE](https://www.facebook.com/CDPHE)) and Twitter ([@CDPHE](https://twitter.com/CDPHE))
- CDC web page [cdc.gov/coronavirus/2019-ncov](https://www.cdc.gov/coronavirus/2019-ncov)

### **Should I wear a face mask in the community to prevent COVID-19?**

Everyone is encouraged to wear a mask when in public. Make or buy a cloth covering that will cover your mouth and nose and use it whenever you are outside your own house or yard. Scarves and bandanas will work as coverings.

### **What cleaning products should I use to protect against COVID-19?**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, most common EPA-registered household disinfectants will work. See CDC's recommendations [for household cleaning and disinfection](#). See EPA's list of Products and Services to Protect Against COVID-19 here <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

## **Travel Information**

CDC recommends that travelers avoid all nonessential international travel because of the COVID-19 pandemic. Some health care systems are overwhelmed and there may be limited access to adequate medical care in affected areas. Many countries are implementing travel restrictions and mandatory quarantines, closing borders, and prohibiting non-citizens from entry with little advance notice. Airlines have cancelled many international flights and in-country travel may be unpredictable. If you choose to travel internationally, your travel plans may be disrupted, and you may have to remain outside the United States for an indefinite length of time.

CDC also recommends all travelers defer all cruise ship travel worldwide.

For travel guidance, please visit: <https://www.cdc.gov/coronavirus/2019-ncov/travelers/index.html>

## PPE and Medical Supply Information

### What to do?

**If you are sick:** You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) and before you enter a healthcare provider's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then you should do your best to cover your coughs and sneezes, and people who are caring for you should wear a facemask if they enter your room. Excellent guidance at <https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html>

**If you are NOT sick:** CDC recommends that everyone wear a cloth face covering over their nose and mouth when in the community setting, including during travel if they must travel. This is an additional public health measure people should take to reduce the spread of COVID-19 in addition to social distancing, frequent hand cleaning and other everyday preventive actions. A cloth face covering is not intended to protect the wearer, but may prevent the spread of virus from the wearer to others. This would be especially important in the event that someone is infected but does not have symptoms.

### Who needs PPE?

Patients with confirmed or possible COVID-19 should wear a facemask when being evaluated. Health care personnel should adhere to [Standard, Contact, and Airborne](#) Precautions, including the use of eye protection, N95 respirators, gowns, gloves, face shield/eye protection, etc.

### Requesting PPE?

All requests for PPE need to go through our Logistics Section.  
Transfer caller to Logistics Section x1225

## School and Childcare Information

### What actions should school and childcare programs take to plan for an outbreak?

- Review, update, and implement emergency operations plans (EOPs).
- Continue to educate students, staff and families on the importance of hand hygiene and respiratory etiquette.
- Monitor and plan for absenteeism.
  - Review the usual absenteeism patterns at your school among both students and staff.
  - Review attendance and sick leave policies. Encourage students and staff to stay home when sick. Use flexibility, when possible, to allow staff to stay home to care for sick family members.
  - Alert local health officials about increases in absences, particularly those that appear due to respiratory illnesses.
- Work with local education representatives and the local health officials to determine what actions should be taken to mitigate transmission.
- Monitor and plan for addressing fear and bullying related to COVID-19.
- Communicate early and repeatedly with parents directly what the policies and procedures will be to allow parents to assure proper guardianship and care of children.
- Ensure continuity of education.

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

- Encourage students and staff to take [everyday preventive actions](#) to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children.

**What actions should my school take if a sick student or staff member attended school before being confirmed as a COVID-19 case?**

- **Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations.** If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

**If a student in our school has been around someone being tested should they be excluded?**

The child should only be excluded if they are symptomatic.

**Should I close our school/childcare program if there's been COVID-19 cases in my school?**

**Any decision about school dismissal or cancellation of school events should be made in coordination with your local health officials.** Schools are not expected to make decisions about dismissal and event cancellation independent of their local health officials. Dismissal and event cancellation decisions should be considered on a case-by-case basis using information from health officials about the local conditions.

**If napping mats are used:**

Children should be kept at least 6 feet apart if possible and mats should be cleaned after each use.

**When should we exclude children/students/staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

**How would I know if someone at school or work is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

**Workplace and Business Information**

- The State issued a Stay-at-Home Order on March 26th. It is valid until April 26th.
- Key Points:
  - Work from home is permitted and encouraged where possible.
  - Grocery stores, gas stations, pharmacies, health care facilities, public transportation and other critical businesses will remain open. Cannabis and liquor stores will remain open. Please note that cities and counties may have specific rules around the purchase, consumption, and delivery of liquor and cannabis. Please check your local government website to see if they have more specific rules.
  - Although this order does not apply to critical business, social distancing will be mandated for those businesses that remain open.
  - All gatherings of individuals of any size for any reason other than critical business or government functions are banned.

- All non-critical businesses statewide are closed to the public.
  - All non-critical businesses must close in-office personnel functions. Keep employees working from home whenever possible.
  - Bars and restaurants are closed, but takeout and delivery options are permitted.
  - Theaters, sports venues, casinos, and other gathering places are closed.
  - Pastoral services for individuals who are in crisis or in need of end-of-life services are allowed.
  - Houses of worship may remain open, but must practice social distancing or use electronic platforms.
- Urge employees to stay home when they are sick, and be flexible with sick leave benefits.
  - Model and encourage everyday actions to limit the spread of illness.
  - More accurate information on these sites:
    - <https://covid19.colorado.gov/stay-home-except-essential-needs>
    - <https://covid19.colorado.gov/public-health-executive-orders-explained>

### Volunteer Information

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

### Complaints about Businesses Violating Public Health Orders

Businesses are part of the solution as our communities practice social distancing.

If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at:

<https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

### Clarification about Eben Ezer Press Release

Eben Ezer issued a press release about positive cases at their facility on Friday, April 10, 2020.

The press release stated that the affected residents are in quarantine and they are following all procedures recommended by the Centers for Disease Control and Prevention. The press release referred to the residents as Neighbors and the positive locations as Neighborhoods. This refers only to the Eben Ezer campus and does not mean that the local Brush neighborhoods have an outbreak.

If you have family members living there and want to ask specific questions about the facility's practices, please use their public COVID-19 Hotline:

COVID-19 Phone Hotline: (970) 842-2861 Then dial ext. 101234

You can also send an email to [info@ebenezer-cares.org](mailto:info@ebenezer-cares.org)

### Seeking Mental Health Support

24/7 Crisis Hotline: National Suicide Prevention Lifeline Network:

[www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

#### Crisis Text Line

Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

Free Community Support Line: This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

#### Centennial Mental Health:

Logan County (970) 522-4392

Morgan County (970) 867-4924

Phillips County (970) 854-2114

Sedgwick County (970) 474-3769

Washington County (970) 345-2254

Yuma County - Wray (970) 332-3133

Yuma County - Yuma (970) 848-5412

### Concerns about Cargill

#### **I think I was exposed to COVID-19 at work.**

Contact Cargill Medical with your questions.

#### **How many confirmed cases of COVID-19 are at Cargill?**

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

#### **I want to register a formal complaint about Cargill?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

#### **I think I was exposed to COVID-19 at work.**

Contact Leprino with your questions.

#### **How many confirmed cases of COVID-19 are at Leprino?**

To protect privacy our agency does not disclose the city or workplace of positive cases.

#### **I want to register a formal complaint about Leprino?**

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

## Instructions for Administrative Staff and Information Triage Team

**UPDATED VERSION 04.20.2020 8:00 AM**

**Purpose:** Connect public inquiries to accurate extensions and staff during IMT response.

---

### Information Triage Team

To log in to the system to help triage calls, simply press the COVID English (or COVID Spanish) button located at the top of your phone. To log back out of the system, simply press the button again. Please do not forget to log out when you are away from your desk, or when you go home for the day.

### Script for Administrative Staff and Information Triage Team:

---

*Thank you for calling your local health department. How may I help you?*

*[Listen to response] [Use triage table to transfer call]*

*Our staff is committed to providing the best service during this time.*

*I am transferring your call to [name or department]. Staff are trying to stay close to their phones and checking their voicemail every day.*

*Please refer to our website for up to date information, [nchd.org](http://nchd.org).*

**Northeast Colorado Health Department response to the Family First Coronavirus Act**

---

The Families First Coronavirus Response Act (FFCRA or Act) was passed to assist families facing new challenges due to caring for sick relatives or children due to school closures. Employers are mandated to provide their employees with expanded family and medical leave for specified reasons related to COVID-19. These provisions will apply from April 1, 2020 through December 31, 2020.

**ELIGIBLE EMPLOYEES**

Employees who have been employed for at least 30 days prior to their leave request.

**QUALIFYING REASONS FOR LEAVE RELATED TO COVID-19**

An employee is entitled to take leave related to COVID-19 if the employee is unable to work, including unable to telework, because the employee is caring for his or her child whose school or place of care is closed (or child care provider is unavailable) due to COVID-19 related reasons.

**The employee is entitled to** up to 12 weeks of expanded family and medical leave paid at 2/3 for qualifying staff. This is paid at up to \$200.00 daily and \$10,000.00 total. A part-time employee is eligible for leave for the number of hours that the employee is normally scheduled to work over that period. NCHD will continue to pay the employer's portion of health insurance, vision, life, PERA while the employee will still be responsible for any additional insurance they have purchased such as family members, dental and/or AFLAC?

---

Family First Coronavirus Response Act (FFCRA) Documentation:

Complete the following information to request Family Leave (FMLA) for FFCRA.

Name of employee requesting leave	
Date(s) for which leave is requested	
Reason for leave	
Name(s) of the child(ren) being cared for	
The name of the school, place of care, or child care provider that has closed or become unavailable.	
A statement from the employee that he or she is unable to work because of the reason	
A statement from the employee that no other suitable person is available to care for the child.	

*700 Columbine St., Sterling, CO 80751 - (970) 522-3741 – (877) 795-0646 - [www.nchd.org](http://www.nchd.org)*

April 22, 2020  
Client Health Services Division  
Monthly Board of Health Report

Dear Board of Health,

Client Health Services staff have marvelously transitioned to assisting with COVID-19 response as well as providing core public health services for your county residents. For example, Client Health Services staff have led in our bilingual COVID-19 public phone line. We have made modifications to service delivery based on available staffing and COVID-19 response efforts.

Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours and close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings. Clinical staff are scheduled to work in Akron, Julesburg, and Holyoke one day a month.

To protect our staff we are requiring all clients to be healthy and symptom free if they are coming to our offices. All clients are screened for symptoms prior to their appointment and when they first arrive before going back to clinic rooms. Clients with new symptoms, like fever, will be asked to reschedule their appointment when they're feeling better.

In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services for eligible appointments. Patients for non-eligible appointments work with our nurses to complete their paperwork over the phone. This reduces the amount of time clients spend in our office.

All WIC benefits and services are being offered remotely via phone and mail. Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.

We are in frequent contact with all funders to ensure we are meeting requirements or amending our scope of work accordingly.

Respectfully Submitted,

Alli Howe, MPH, CHES  
Director of Client Health Services

*700 Columbine St., Sterling, CO 80751 - (970) 522-3741 – (877) 795-0646 - [www.nchd.org](http://www.nchd.org)*

NCHD Operations  
Board of Health Report  
April 22, 2020

Dear Board of Health,  
The highlights from March and April include the following:

#### **Administration**

- Worked with Continuity of Operations (COO) group to implement the Travel and Health Screener. This document was developed by the COO group to screen all clients coming into NCHD for Covid-19 symptoms.
- We have put all training for the CureMD Practice Management System on hold due to Covid-19 response.

#### **Human Resources**

- We hired two new managers in March. Monica Miller, Health Promotion and Prevention Manager and Kathy Reinhardt, Early Prevention Manager.
- We worked with our attorney and Dana from CTSI on the new Families First Coronavirus Response Act. We have several staff that are now working from home due to childcare issues and schools being closed. If they do not have enough work to keep them busy 40 hours per week, they would be eligible for paid FMLA with this act now in place.

#### **Healthy Communities**

- Abby Rahm, our FTE in Healthy Communities, is now teleworking from home. This program has not been affected by Covid-19. It is actually very busy right now informing newly eligible Medicaid clients of their benefits. There have also been numerous meetings and groups putting together the new contract.
- All Healthy Communities contractors are working with the Colorado Association of Local Public Health Officials (CALPHO) on the new FY21 contract. This updated contract has been sent to the Department of Health Care Policy and Financing (HCPF).

#### **IT**

- IT worked with Peak Communications to get all the phones working in the Operations Center. Several staff, along with IT worked with Peak to separate out the English and Spanish lines to better work with all of our clients.
- Several older laptops were updated by IT, as the WIC staff needed them to telework from home.

- With several staff teleworking from home, IT worked with Peak Communications to forward office extension to cell phones at staff homes.

**Other**

- Staff Anniversaries in April: Eva Flores, WIC Educator, has been with NCHD 1 year. Sherri Yahn, Health Integration Manager, has been with NCHD 32 years. Karla Young, Community Health Navigator II, has been with NCHD 2 years.

Sincerely,  
Penny Stumpf

700 Columbine St., Sterling, CO 80751 - (970) 522-3741 – (877) 795-0646 - [www.nchd.org](http://www.nchd.org)

Environmental Health Division  
Board of Health Report

Dear Board of Health,  
The Environmental Health Division has the following highlights for April 2020:

- **CDPHE WATER/WASTEWATER**

- **Morgan**

- A sanitary survey was performed on December 13, 2019 by CDPHE at Town of Wiggins 3 Significant Deficiencies were Identified. (Waste Water)
    - A sanitary survey was performed on December 13, 2019 by CDPHE at Town of Log Lane 1 Significant deficiency was Identified and 7 violations. (Waste Water)
    - A Violation Notice Failure to Distribute Public Notification or Timely Report was issued to the Town of Log Lane. (Water)

- 

- **Logan**

- According to CDPHE records, CALICHE SCHOOL exceeded the Maximum Contaminant Level (MCL) for TTHM during First Quarter, 2020. The calculated compliance value is 0.15055 mg/L and the MCL is 80 ug/L (0.08 mg/L). (Water)
    - A Violation Notice Failure to Distribute Public Notification or Timely Report was issued to the Town of Merino. (Water)
    - A Violation Notice Failure to Distribute Public Notification or Timely Report was issued to the UPPER HIGHLAND HOA Since that time, the Department has determined the Supplier met the requirement. Therefore, the violation issued on 4/14/2020 has been rescinded along with any public notice requirements. (Water)
    - CDPHE issued a “Boil Water Advisory” for the Town of Fleming on April, 14, 2020 due to a line break resulting in a loss of pressure to the system. Loss of pressure may allow disease-causing organisms to enter the water system. The order was rescinded on April 16, 2020. (water)

- 

- **Sedgwick**

- A Violation Notice Failure to Distribute Public Notification or Timely Report was issued to the Town of Ovid. (Water)
    - According to CDPHE, the Town of JULESBURG exceeded the Maximum Contaminant Level (MCL) for GROSS ALPHA (WITHOUT RADON AND URANIUM) during 1st Quarter, 2020. The calculated compliance value is 15.515 pCi/L and the MCL is 15 pCi/L.9 (Water)

-

- **Phillips**
- **Washington**
- 
- **Yuma**
- According to CDPHE GAYTAN WS exceeded the Maximum Contaminant Level (MCL) for NITRATE at Facility ID 011 - Sample Point ID 011 during First Quarter, 2020. The calculated compliance value is 11.55 mg/L and the MCL is 10 mg/L. (Water)
- CDPHE has received and reviewed the Final Plans and Specifications for the Gaytan Water System's Nitrate Removal Project, The design meets or exceeds the requirements of the State of Colorado Design Criteria For Potable Water Systems (Design Criteria) and is hereby approved. (Water)
- A Violation Notice Failure to Distribute Public Notification or Timely Report was issued to the Town of Eckley. (Water)
- **RETAIL FOOD (RFE)**
  - **Morgan**
    - Mel & Conner helped with Health Fair Morgan County
    - Mel & Conner did food safety training with Brush Schools.
    - 
    - **Yuma**
    - 
    - **Phillips**
    - 
    - **Sedgwick**
    - 
    - **Logan**
      - Change of Ownership for Riverview Golf Club,
      - Opened US 6 Country Store (Merino Convenience Store),
      - Opened Overland Trail Cafe (relocated from Atwood Interchange to Ramada Inn)
      - Working on Plan Review for Das Grebble Haus (new trailer).
  - **Washington**
  -
- **MISCELLANEOUS**
  - Obtained access to CDPHE Water Quality Control Portal to be able to do monthly reporting of water samples

Sincerely,  
Melvin Bustos

The Honorable Jared Polis,  
The Governor of Colorado  
200 East Colfax Avenue  
Denver, CO 80203

Dear Governor Polis,

The Colorado Association of Local Public Health Officials represents every public health agency on the frontlines of the COVID-19 response, serving every county and every person in the state of Colorado.

We are writing to present an evidence-based, data-driven, best practice public health approach to relaxing stay-at-home orders and other limitations on commerce and social activity. This framework was developed using a number of reference documents including AEI's [National Coronavirus Response A Roadmap to Reopening](#), [When and How to Close due to COVID-19 Spread](#) from [Prevent Pandemics](#), and the Occupational Safety and Health Administration [Guidance on Preparing Workplaces for COVID-19](#).

First let us say that throughout all of this, we believe that continued use of face-coverings is critical to any phase of reopening prior to the availability of pharmaceutical interventions (vaccines). Page one of this framework lays out the specific indicators that, if completely met, could lead communities to consider degrees of re-opening. Page two describes the approach to reopening and identifies the crucial triggers and conditions to be met as communities evaluate critical businesses readiness to phase in reopening. We believe that by using this checklist format and referencing familiar iconography and the metaphor of Colorado's ski industry the basic message is clear.

While additional guidance and detail will need to be created and agreed upon for some of the protocols, you can see that this approach can address the immediate need of getting a plan in place to begin relaxing the stay-at-home orders, while giving public health the opportunity to research and develop guidance that is meaningful, widely applicable across all counties and remains protective of the public's health.

We appreciate this opportunity to present to you this model that represents the power of public health's thought partnership and collaboration. Please do not hesitate to contact us with additional questions.

Yours in health,

Liane Jollon, RN  
Executive Director  
San Juan Basin Public Health Department  
President, Colorado Association of Local

Jason Vahling, MPH  
Director, Broomfield Public Health Department  
Health and Human Services  
President Elect, Colorado Association of Local

# Colorado Roadmap - The New Normal

## Indicators that must be met to move into the Stabilization Phase

1. **A sustained decrease in cases for at least 14 days**
  - a. Measured by new cases per day, self-reports (where applicable), and positivity rates
  - b. Proxy measurement - new cases among healthcare workers
  - c. Proxy measurement - outbreaks and/or new cases within skilled nursing facilities
  - d. Proxy measurement - hospital admission for COVID-19

2. **Hospitals are safely able to treat patients without resorting to crisis standards of care**
  - a. Hospital census - regional census may be helpful
  - b. Access to regional alternative care center or regional plans are in place
  - c. Hospitalizations are stable or decreasing

3. **Testing can be performed for all people with symptoms consistent with COVID-19 infection**
  - a. Working towards testing capacity that is routinely accessible to every person who is symptomatic within 24 hours and results can be returned within 12-24 hours of specimen collection.

4. **Active monitoring can be accomplished for all COVID-19 cases and their contacts**
  - a. Isolation orders can be delivered within 6 hours of case report
  - b. Active monitoring and isolation must be in place
  - c. Capacity improved and maintained at state and local level with roles delineated
  - d. Enforcement capacity and process is clear in every jurisdiction

5. **Clear protocol in place that requires social distancing and assists with case identification**
  - a. Older adults (age 60 and older) and individuals with underlying medical conditions that are at increased risk of serious COVID-19 are encouraged not to attend (including employees) or to tele-work where possible.
  - b. Employees must be screened for COVID-19 symptoms each day. Anyone symptomatic will be excluded from work for at least 7 days, will be tested within 48 hours, and will have face coverings provided for all household members.
  - c. Social distancing measures must be employed to ensure that employees and the public can easily maintain a minimum of 6 foot distance.
  - d. Social distancing protocol is provided to all employees and available to any customer
  - e. Enforcement capacity and process is clear in every jurisdiction

**Getting to the Recovery Phase will require that vaccine is widely available**

# Approach for the Stabilization Phase - The New Normal

 Actions	 Green Circle Initial reopening Meet the 1-5 Criteria	 Blue Square 4-8 weeks after initial reopening No significant increase in cases Criteria 1-5 met & maintained	 Black Diamond 8-16 weeks after initial reopen No significant increase in cases Criteria 1-5 met & maintained

Child care	Open with guidance	Continue with guidance	Continue with guidance
Summer Camps	No	Re-open with Guidance	Continue with guidance
Recreation and sports	Reopen with restrictions	Expand by gathering size	No Limit
Incoming Travel	Strictly limited	Limited	Open

# Closure Criteria

Action	Tighten immediately (if not already on)	Maximum tightening
Wash hands often	Already on	Continue
Cover coughs	Already on	Yes
Don't go out if sick	Already on	Yes
Face mask if sick to go out	Already on	Yes
Face mask for all in community	No	Consider
Surface and object cleaning	Already on	Yes
Increase ventilation	Already on	Yes
Quarantine of contacts of cases	Already on	Yes
Physical distancing to 6 feet when possible – avoid crowding	Turn on	Yes
Stop visits to nursing homes, hospitals, congregate facilities	Already on	Yes
Ban all gatherings including religious (above 10, 50 people)	Yes for 50 or more*	Yes, all non-household
Restaurant closures	Open – only delivery/to go	Open - only delivery/ to go
Bar closures	Open – only delivery/to go	Turn on
Special situation business closures**	Partial closure*	Yes, all
General business closures (non-essential)	Turn on	Yes
University closures	Yes (Online encouraged)	Yes (Online encouraged)
K-12 closures	Yes (Online encouraged)	Yes (Online encouraged)
Day care closures	Yes	Yes
Quarantine of travelers from high-prevalence areas	Yes, voluntary	Yes, mandatory

\*People over age 60 and those who are medically vulnerable , including employees, continue to shelter in place, including employees.

\*\*Special business situations include strategically important entities (e.g., infrastructure), entities which can reopen while ensuring safe commute, physical distancing, exclusion of anyone ill, and mandatory handwashing/sanitizing at entry and periodically during day.

## PLAN TO REOPEN MESA COUNTY

### GUIDELINES FOR ALL PHASES AND SECTORS (AS APPLICABLE):

- Perform routine environmental cleaning and disinfection
  - [Healthcare facilities](#)
  - [Postmortem care facilities](#)
  - [Laboratories](#)
  - [Other, non-healthcare facilities](#)
- Monitor workforce for compatible symptoms.
- Non-COVID symptomatic employees should wear a cloth face cover
- Implement or maintain return to work policies
  - [Healthcare facilities](#)
  - [Critical infrastructure workers after exposure](#)

### PHASE 1-

#### Public gatherings

- Allow gatherings of no more than 10 people and maintain physical distancing whenever possible

#### Businesses

- Encourage telework, wherever possible
- Practice 6 foot physical distancing
- Close common areas where employees are likely to congregate OR implement physical distance protocols
- Continue to limit or prohibit non-essential travel
- Consider return to work in phases as applicable
- Implement or maintain flexible [sick leave policies and practices](#)
- Consider accommodations for vulnerable populations

#### Retail, personal services, and restaurants (as applicable)

- Practicing 6 foot physical distancing
- Implement or continue early opening for high-risk populations
- Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
- Utilize face cloth coverings for employees and contracted workers whose duties include close contact with members of the public
- Continue curbside services in businesses where it applies
- Close-down waiting areas
- Space tables and lines
- Implement no-touch payment, as appropriate
- Encourage all public to wear masks to enter retail businesses

#### Health Care

- Elective surgeries can resume

#### Recreation

- Maintain physical distancing in outdoor settings (6ft for hikers, 15ft for runners/bikers)

- Open outdoor recreation facilities where adequate controls can be implemented to ensure physical distancing
- Limit gatherings to no more than 10 people
- Maintain restrictions and cleaning guidelines for restrooms

#### **Education**

- Open in-person learning for specific settings (e.g. technical college)
- Limit classrooms to no more than 10 people
- Maintain 6 foot physical distancing in classrooms

#### **CONSIDERATIONS:**

- Large venues (movie theaters, sporting venues, places of worship) can operate IF strict physical distancing practices are possible
- Gyms can open IF strict physical distancing and cleaning practices are possible
- Businesses and recreation facilities NOT permitted to open in this phase will be based on epidemiological evidence of risk for transmission, populations that may be at higher risk for severe disease, and inability to meet the limitations on size of gatherings or congregations

#### **ONGOING PROHIBITIONS:**

- Services to high-risk populations
- Visitation to hospitals and senior living facilities
- Schools and organized youth activities that are currently closed
- Bars

### **PHASE 2-**

#### **Public gatherings**

- Allow gatherings of maximum 50 people and maintain physical distancing whenever possible

#### **Businesses**

- Non-essential travel can resume
- Follow guidance for number of personnel in building based on square footage (based on fire code as the denominator)
- Maintain 6 foot physical distance in common areas where employees are likely to congregate.
- Consider accommodations for vulnerable populations

#### **Retail settings:**

- Bars may operate with diminished standing-room occupancy, as applicable
- Gyms can remain open IF strict physical distancing practices are possible
- Grocery stores maintain phase 1 operations, but relax the face covering requirement

#### **Education:**

- Schools and organized youth activities can reopen

#### **ONGOING PROHIBITIONS:**

- Services to high-risk populations
- Visitation to hospitals and senior living facilities

### **PHASE 3-**

- Resume unrestricted staffing of worksites
- Resume visits to senior care facilities and hospitals
- Large venues (movie theaters, sporting venues, places of worship) can operate under limited physical distancing practices are possible

### **NOTES:**

MCPH will continue to monitor the spread of disease through syndromic surveillance (COVID-like symptoms), testing, and hospitalizations.

- Newly reported cases of COVID-19 will be investigated within 24 hours
- All cases will be adequately isolated for minimum of 7 days with an objective of no household transmission

Complaints for non-compliance will be handled through the MCPH hotline 970-683-2300 and [healthinfo@mesacounty.us](mailto:healthinfo@mesacounty.us)

04/20/2020

Department Head and Elected Official Workshop

1. Returning to operational level per department
  - a. what department are you associated with?
  - b. how are your operations going to this point?
  - c. do you need to return to a full in office workplace?
  
2. Changing of behaviors (internally and externally)
  - a. Is disease transmission under control?
  - b. Can we detect, test, isolate, and treat every case and trace every case contact?
    1. virus shed may be happening 3-4 days before anyone shows symptoms
  - c. Do we have hot spot risks and vulnerable places, such as nursing homes?
  - d. Are other workplaces, schools and essential places have established preventative measures?
  - e. Can our risk of importing new cases be manageable?
  - f. Are our communities fully educated, engaged and empowered to live under a new NORMAL?
  
3. What procedures and policies do we need to put into place to maintain a safe environment for ourselves as well as our public?
  
4. What if stay at home orders continue and courthouse needs to remain closed?
  
5. Is there a need to have stress management / mental health addressed?
  
6. Global picture views beyond your department confines: What does our income and loss areas start to look like the longer this goes on. Where might you start looking at budget cuts to slow the bleed of non or delayed payments from taxes? How can we as a County Team begin this whole strategic planning process?

## Take Steps to Protect Yourself

### Clean Your Hands Often

Wash your hands often with soap and water for at least 20 seconds, especially after you have been in a public place, or after blowing your nose, coughing, or sneezing. If soap and water are not readily available, use a hand sanitizer that contains at least 60 percent alcohol. Cover all surfaces of your hands and rub them together until they feel dry. Avoid touching your eyes, nose, and mouth with unwashed hands.

### Avoid Close Contact and Practice Social Distancing

Avoid close contact with people who are sick. Practice social distancing by keeping 6 feet between yourself and other people whenever possible. This is especially important for vulnerable populations who are at higher risk of getting very sick.

## Take Steps to Protect Others

### Stay Home If You Are Sick

Stay at home from work if you are sick, except to get medical care. Also, stay home if you have a member of your household who is seriously ill and may be contagious.

### Cover Coughs and Sneezes

Cover your mouth and nose with a tissue when you cough or sneeze, or use the inside of your elbow. Throw used tissues in the trash. Immediately wash your hands with soap and water for at least 20 seconds. If soap and water are not readily available, clean your hands with a hand sanitizer that contains at least 60 percent alcohol.

### Clean and Disinfect

Clean AND disinfect frequently touched surfaces daily. This includes tables, doorknobs, light switches, countertops, desks, phones, keyboards, toilets, faucets, and sinks, as well as door handles, steering wheels and other surfaces in vehicles. If surfaces are dirty, clean them: Use detergent or soap and water prior to disinfection.

### Reserve Facemasks for Individuals Who Are Sick

If you are sick, you should wear a simple surgical facemask when you are around other people, such as when you are sharing a room or a vehicle, and before you enter a healthcare provider's office. This keeps respiratory droplets from spreading to those who are not ill.

If you are NOT sick, you do not need to wear a facemask unless you are caring for someone who is sick, and they are not able to wear a facemask. In those cases, you should wear an N95 Respirator facemask.

A draft report from the Northeast Colorado Health Department, lead by Trish McLain, obtained by CBS4 concludes, "I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow."

and hopes the plant can safely remain open

two key reasons to keep it going. "One is to ensure that we get products to store we are contracted to deliver and produce, and the other part is just to keep our members employed."

The health department report on Cargill found employees' temperatures are taken before entering, they are questioned about symptoms, given shields, allowed to wear masks and spaced or put between dividers. Those who take a bus from Greeley or Sterling are having their temperatures taken before they get on the bus and are given masks.

More than 2,000 people count on this plant for their paychecks, but no one disputes even more important are their lives.

---

Daniel – discuss a joint press release; spoke with Jared yesterday – email about observations – do they want that to be part of the press release

Better for them if it comes from NCHD. He can review and edit or even add some quotes.

Industry language correct so that it makes sense.

Food safety and employee safety are top priorities of Cargill. Cargill has a lot of facilities in China where this particular virus was first identified so learned a lot of lessons from experiences they had in other parts of their business and other parts of the world.

700 Columbine St., Sterling, CO 80751 - (970) 522-3741 - 877-795-0646 - [www.nchd.org](http://www.nchd.org)

## **Car i Fort Mor an P ant Tour Re ie**

Upon arrival at the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

#### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services.

Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

#### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

#### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Good to know! I'm sure they don't want to be on the news like JBS. T

On Mon, Apr 6, 2020 at 11:16 AM Tammy Hort RN, CIC <tammyh@nchd.org> wrote:

I just spoke to Scott Reyez. They are kicking booty! When an employee calls in as a positive, the direct family members that work at the plant are sent home for the 14 day quarantine - and paid for those 14 days. He is even able to trace back carpooling and then those people are quarantined! He has a whole board that shows how the positives are intertwined.

They are able to space some of fab employees 6' apart but in some areas that is not possible. All fab employees are wearing a mask or scarf. Cleaning handrails and doorknobs every hour, lunch room has changed the seating so people are not gathering together, cleaning offices several times a day.

They are doing great. Scott and I will continue to report positives so he can take care of the plant and we can take care of the rest.

Tammy

Conference call with Cargill regarding COVID-19  
3/24/20 @ 11:00 am

What is currently being done by Cargill:

- Break times can sit beside another employee, but not across. All employees are to be facing in one direction. No face to face contact.
- 6ft distancing the best they can.
- Health screening people who come in. Temperature screening in a separate room for anyone who does not pass the initial screening.
- Stay home if not feeling well, asking employees to self-quarantine 14 days when needed.
- Social distancing space when come in the main door.
- Where truck drivers come in, they do not enter the main part of the plant. They have contact with security, and social distancing has been put in place.
- Cattle haulers do not enter the main part of the plant, they go to another location to drop of papers.
- Contractors must go through screening just like employees and management.
- Additional cleaning – ramped up handrails, doorways, cafeteria, restrooms, etc. (multiple times per day).
- Professional vending company that does the cafeteria has changed station set ups. The salad bar is gone. Everything is individually wrapped or served by a food service worker.

Other items covered:

- If confirmed covid-19 case, they as an employer would be notified after the NCHD investigation is completed.
- Discussed how to handle those employees notifying them that they aren't feeling well, how to handle self-isolation orders from a doctor, and verified if the employee is not tested that we won't know about it.
- Questions regarding contact when symptomatic. Contact established by Trish as within 6' for more than 10 minutes. Those wearing appropriate PPE would not be considered as having contact.
- Trish will send guidelines regarding quarantine vs. isolation.
- They want to accomplish 100% screening by the end of this week.
- If an employee is ill, they need to contact Cargill's Health Services or HR for questions. They did not want to provide their contact numbers to NCHD. Have the employee call the appropriate Cargill contact.
- Cafeteria: Stressed extra handwashing and appropriate glove use.

## Leprino Foods - COVID 19 Absence Tracking (FTM)

ABSENCE DETAILS	QUARANTINE				ATTENDANCE SCENARIO	
Absence Details	Quarantine (Yes/No)	Mandatory/ Self Initiated	Quarantine Start	Quarantine End	Guidelines Scenario #	Decision
EE went to Dr. for possible strep throat. EE was instead told he had preliminary symptoms for COVID-19 and was put on 14 day medical quarantine - However, they did not issue a test, told him to come back for test if symptoms were worse - UPDATE 03/24/2020 EE not showing any new symptoms - was released to come back to work	Yes	Mandatory	3/17/20	3/24/20	18	No Points - EE is applying for FMLA granted personal leave for time being
Married to employee above - was put on quarantine by doctor for 14 days	Yes	Mandatory	3/17/20	3/31/20	18	No Points - EE too new for FMLA - Granted personal leave for time being
Employee did not clock in for work because she was exhibiting flu like symptoms. Fever broke about 3pm on 03/19/2020 - she is feeling better and has been released to work by her doctor	No				2	No Points -
EE did not clock in for work because of fever - went to doctor was diagnosed with Respiratory infection and told to call Hartford and file CMLA	No				2	No Points for first day - remaining days will be determined through CMLA process
EE left work in middle of shift for symptoms unrelated to virus - no fever	No				3	Attendance policy applies -
EE left in the middle of the shift received phone call daughter had fever - daughter was diagnosed with Strep Throat	No				5	No point for first dat - remaining days needed will fall under FMLA process
EE called because girlfriend is showing COVID Symptoms - has been tested awaiting test results - Update 03/24/2020 Girlfriends test came back negative, he has been released to come back to work 03/25/2020	Yes	Mandatory	3/18/20	3/24/20	14	Personal leave until test results received - no points
Employee did not clock in for work due to fever - will return after being fever free for 24 hours	No				2	No points - depending on how symptoms progress will determine how to move forward
Employee originally called in for flu like symptoms - diagnosed with influenza type a - Update 03/21/2020 EE symptoms got worse, doctor put him in quarantine for 14 days - Update 4/3/2020 - When EE was set to return on next scheduled shift, was told by doctor that symptoms had not been gone long enough to return - RTW Changed to 4/6/2020	Yes	Mandatory	3/21/20	Tbd	2	Employee to follow up and file claim with Hartford
Employee has been quarantined by medical official for 5-14 days for displaying possible covid-19 symptoms. No test taken	Yes	Mandatory	3/19/20	3/30/20	20	No Points - EE has been instructed to file claim with Hartfor for Personal Illness
Employee was concerned that her roommate has Covid-19 - roommate has been symptomatic for about 2 weeks and has not been tested for Covid-19	No				17	Employee was allowed to work, reminded of social distancing and sanitation, told her to follow up with me if things change

Employee called in for fever - did virtual visit with UHC who told her to quarantine for 5-14 days depending on if symptoms progress - UPDATED 03/24/2020 has been fever free for 24 hours, doctor told her to wait remaining 3 days and if no symptoms represent, can return to work - Updated 3/27/2020, when EE tried to get permission to go to back, was advised should be quarantined for 14 days - Anticipated RTW 04/05/2020	Yes	Mandatory	3/20/20	4/6/20	2	No points - EE in process of filing claim with Hartford
Employee called in for Fever - thought was getting better but on Sunday if spiked again - waiting for direction from doctor on next steps	No				2	No points
Employee left home sick after after vomiting in bathroom, was not covid related initially - went to doctor for follow up visit on 03/20/2020 and was told to self quarantine - was diagnosed with Strep throat on 03/26/2020 and was told can return to work on 03/30/2020	Yes	Mandatory	3/20/20	3/20/20	18	Working through getting Aetna claim filed
Employee went to doctor with flue like symptoms - was told to quarantine for 5-7 days if symptoms don't worsen able to return back to work - Update 03/24/2020 - has been fever free for over 24 hours - has been released back to work 03/24/2020	Yes	Mandatory	3/18/20	3/24/20	18	Personal leave - no points, will get release to come back to work
EE called in because of fever - followed up with doctor who said to quarantine for 5-7 days if symptoms don't worsen to return back to work	Yes	Mandatory	3/18/20	3/30/20	18	Personal leave - no points, will get release to come back to work
EE called in for fever - had doctors appointment on 03/23/2020 - diagnosed with severe sinus infection, put on antibiotics and released back to work after three days -	No				2	Filing claim with Hartford for the remaining days off
EE called in with fever - doctors appointment on 03/24/2020 was told believed complications from Strep from previous week. Was told to not return to work for 5 days and if fever free for 24 hours could return on 03/30/2020	Yes	Mandatory	3/24/20	3/30/20	2	No attendance point for first day - calling Hartford to begin CMLA process
EE called in with fever - will return after 24 hours fever free - not seeking medical attention right now	No				2	No point
EE is working from home until getting guidance from doctor. EE experiencing tightness in chest and difficulty breathing, she did not know at the time whether she had a fever - Update 3/27/2020 - was advised to take 3 days off after fever or 10 days off after symptoms onset - EE is going to use sick time	No				3	Exempt level employee - working from home until symptoms are clear or doctor advises otherwise
EE called because husband had fever, wanted to know if she could still work. Fever only symptom of husband and EE denies contact with him. Employee not experiencing any symptoms herself. Employee has not yet been tested for COVID19 but is trying to get in to be tested.</p> <p>Employee has known social contact with his uncle on 3/7/20, employee's uncle has since tested positive for COVID19.</p> <p>3/21/20 - Employee tested positive for COVID19</p>	Yes	Mandatory	3/7/20	4/5/20	7	Employee tested positive for COVID19, will allow to RTW after additional quarantine and can answer "no" to all 4 questions. No attendance impact.
<p>Employee was sent home for displaying cold and flu like symptoms at work on 3/10/20. Provided Dr note, released to RTW on 3/16/20</p>	No	Mandatory	3/10/20	3/18/20	2	Employee called in sick with fever and flu symptoms, employee has seen dr and was diagnosed with pneumonia, employee is released to RTW on 3/16/20 per dr. Next scheduled shift is 3/18/20
<p>Employee was displaying cold and flu like symptoms at work and was sent home &amp; encouraged to take temp. Contacted by HR business partner on 3/16 and has not been able to get in to see physician.</p> <p>On 3/17, confirmed her symptoms were better, and she did see a virtual physician. Physician had no concern that she could have COVID-19, and has a doctor note. Plans to be back to shift on 3/18/20.</p>	Yes	Self	3/14/20	3/18/20	1	Sick time applied for 2 day absent, employee RTW on 3/18/2020
<p>Employee called in sick with symptoms and fever. Employee was tested for COVID19. Test results came back negative. Employee is feeling better and no longer displaying symptoms.</p>	Yes	Mandatory	3/13/20	3/18/20	1	Employee called in sick with fever and flu symptoms, employee tested negative for COVID19 and can answer "no" to all four questions, RTW on 3/18/20. Sick time applied for missed days, no attendance impact.
<p>Employee felt like she was running a fever during shift and notified her supervisor. We allowed employee to leave to take temperature. Employee's temp was @ 99 degrees. Employee was allowed to return to work and finished her shift.</p>	No				1	Employee missed approx. 1hr of work, this time will go unpaid and no attendance impact.
<p>Employee was out previous week for flu like symptoms, is going to dr. Saw doctor on 3/14/2020 and was confirmed to have bronchitis, but doctor wanted her to test for COVID-19 and planning to get tested on 3/14/20.</p> <p>Employee could not get in to be tested for COVID19 and was still experiencing symptoms so went to emergency room and was instructed that she did not need to be tested for COVID19 due to the nature of her symptoms. Employee is doing better and symptoms are subsiding. Employee is planning to when symptoms are gone.</p>	Yes	Mandatory	3/10/20	4/3/20	1	Employee called in sick with fever and flu symptoms, employee has seen dr and was directed not to test for COVID19, will RTW when she can answer "no" to all four questions. Sick time will be applied, no attendance impact.
<p>Employee called in with fever and flu symptoms. Was not able to get in to see dr. Took over counter medicine and is feeling better.</p>	No		3/16/20	3/17/20	2	Employee called in sick with fever and flu symptoms, employee was not able to get in to see a dr., Employee RTW on 3/17/20 and was able to answer "no" to all four questions. Sick time applied, no attendance impact.

3/16/2020- Employee has been experiencing cold/flu like symptoms, and temp off and on. He is attempting to see doctor, but has not been able to get in yet. 3/18/2020 - Followed up with Damen, and he is still experiencing symptoms off and on. He spoke to a doctor, and they encouraged him to quarantine for 14 days, but he has not been tested.	Yes	Mandatory	3/16/20	3/30/20	2	Employee called in with fever and flu symptoms, has not been able to get in to see dr. but was able to talk to dr. over the phone and was directed to quarantine for 14 days due to symptoms. Employee was not required to test for COVID19. No attendance impact.
Employee left work due to her getting a call that her daughter is having cold/flu like symptoms and a fever of 102 degrees. Employee was able to get daughter into dr. and she was able to RTW on 3/17. Her daughter seems to be doing better and no longer has fever.	No				5	Employee left work (partial shift absence) to care for ill family member with flu symptoms and fever. Employee was able to return to work the next day. Sick time applied, no attendance impact.
Employee was sent home & encouraged to monitor symptoms. HR business partner contacted and employee explained symptoms to be headache, and flu like symptoms. Planning on going to doctor tomorrow. Employee is not able to get in to see dr. until next week. Employee is monitoring symptoms closely, and will keep me posted and will follow up to see how things are progressing.	Yes	Self	3/16/20	3/25/20	1	Sick time applied, no attendance impact, RTW is TBD, will monitor symptoms and progress on seeing dr.
Employee has a fever as well as other symptoms. Has not been to see dr. Will continue to monitor symptoms and try to see dr. Doctor advised quarantine for 10 days from onset of symptoms (3/31). Her return to work date is tentatively 3/31	Yes	Self	3/16/20	3/31/20	1	Sick time applied, no attendance impact, RTW is TBD, will monitor symptoms and progress on seeing dr.
Employee was sent home due to having a fever of 101 degrees and cold and flu like symptoms. Employee is taking over the counter medications but has not been able to get in to see dr.	Yes	Self	3/16/20	3/20/20	1	Sick time applied, no attendance impact, RTW is TBD, will monitor symptoms and progress on seeing dr.
Employee called in has recently went to the dr. and tested for the flu due to fever and flu symptoms, employee was a not recommended to be tested for COVID19 be dr., currently experiencing symptoms, should have negative flu test results tomorrow and is able to RTW on 3/19/20, will provide dr's note	No				2	Sick time applied, no attendance impact, RTW is estimated for 3/19/2020 per dr note.
Employee called in to take care for daughter that was sick with fever and symptoms. Daughter tested positive for strep throat. Employee does not have symptoms and should be returning to work on 3/19/2020	No				5	Employee called in to care for ill family member with flu symptoms and fever. RTW on 3/19/20. Sick time applied, no attendance impact.
Employee's roommate was notified that a coworkers' wife and son were being tested for COVID-19.	No				14	Employee was instructed not to come into work today until we confirmed all of the details. Employee is able to answer all four questions "no" and will be returning to work on 3/19/20, employee is not displaying symptoms.
Employee had personal contact with Aunt on 3/14/2020. Employee's uncle (lives with aunt), has been sick with fever and symptoms. Employee's uncle has tested for COVID19 and is waiting on results. Employee has not had contact with Uncle. Employee's aunt is not experiencing symptoms or being recommended to test for COVID19.	No					Employee called prior to shift and will not need to miss work. Employee will be allowed to RTW since she can answer "no" to all four questions.
Employee's children were placed under a 10 day quarantine. They have symptoms of sore throat, coughing and elevated temps. Doctors have ruled out pneumonia and bronchitis. Employee does feel a little off, but does not have a temp. Children are not being tested for COVID19 due to the limited availability of testing.	Yes	Mandatory	3/18/20	3/28/20	6	Employee was sent home from work due to being notified his children were sent home per dr quarantine for 10 days. The employee will be quarantined for 10 days since they live in the same household.

Employee's Dad's coworker tested positive, he is quarantined for 14 days. No one has any symptoms. Sister lived with employee's dad. Employee saw sister on Sunday 3/15, had close physical contact for about 10 minutes. Family members are not getting tested.	No					Employee called prior to shift and came in for shift. Since employee did not have contact with a positive case she was able to come to work.
Called in stating his wife had a 101 fever. Was incorrectly directed by supervisor to stay home. Called him back and let him know he needs to go into work since he has no symptoms. He decided he needs to stay home to take care of his wife and will take the attendance hit.	No				2	Employee will take attendance hit for absence for normal sick day for care of family member and planning to RTW on 3/19/20
Employee's spouse was seen by urgent care due to fever and displaying symptoms of COVID19, Due to lack of availability of testing supplies and saving them for high priority patients the employee's spouse was not tested and directed to do a 10 day quarantine. Employee will do the same since same household.	Yes	Mandatory	3/19/20	4/4/20	19	Employee will follow spouse's 10 day quarantine and be off work. No attendance impact.
Employee is experiencing cold/flu like symptoms. Went to the doctor, and was tested for normal flu, but has also been instructed to test for COVID-19. Getting tested for COVID-19 today. ETA on return to work will depend on results, and symptoms. Employee's test results came back positive for COVID-19 on 3/27/20 - quarantine until 4/10/20.	Yes	Mandatory	3/20/20	4/8/20	2	Employee was sent to be tested for COVID19 by Dr. on 3/19/2020, employee will be trying to get tested on 3/20/20 and will update us on status. Employee will stay off work, no attendance impact.
Employee went to see the doctor, and was tested for flu/strep. Both tests came back negative. They said she did not qualify to test for COVID-19. Doctor thinks it just a normal virus and instructed her to stay home for two days and then return back to work. Her return to work date now is Monday 3/23.	Yes	Mandatory	3/19/20	3/19/20	2	Employee will stay off work per dr. direction until 3/23, will make sure employee can answer "no" to all four questions before returning. No attendance impact.
Employee was coughing and she was feeling ill. Supervisor advised her to do some computer learnings in HR Lab. EE called out this evening and contacted a virtual doctor and sent note recommending that she stay out for one day. Note states that EE should be home quarantined until she is 72 hours symptom free	Yes	Mandatory	3/19/20	3/30/20	1	Employee will stay off work per dr. direction until 3/23, will make sure employee can answer "no" to all four questions before returning. No attendance impact.
Employee called in sick. She started feeling sick today - cold and flu and fever. Going to hospital to get checked out today will update me after she has gone. We will touch base before she returns to work on Tuesday.					2	Employee will stay off work until she can answer "no" to all four questions. Will stay in contact regarding dr note. No attendance impact.

4/12 - Contaacted supervisor that his 3 roommates work at JBS and have been tested. One has tested positive already, waiting on other two results. Will be off work through quarantine and possibly after pending other test results.	Yes	Mandatory	4/12/20	4/26/20	8	14 Day Company Quarantine
4/13 - called in with fever, cough, and upset stomach. LVM	No				2	Employee has RTW
Breathing or moving has severe chest pains. Employee was instructed to go home and set up a Teladoc appointment. When asked about his symptoms it was only severe chest pain, though he had a small temp the day before (04.11).	No				2	
Running a temp around this morning so EE was sent home. Head cold symptoms (runny nose, and congestion). Understands she will need to be symptom free for 24 hrs. Tentative return to work at this time will be 4/8/2020.	No				2	Employee has RTW
Has a cold/ cough - Not coughing as much- No fever. Feeling hot and Cold and just feels lcky.	No				2	Employee has RTW
4/13 - Person that he's been dating, spent night with her on Saturday (overnight). She just got results today - 1:06p. Also saw her on Thursday for overnight. Had sore throat, dry throat. Was in NFDm packaging and dryer. Will quarantine for 14 days.	Yes	Mandatory	4/13/20	4/27/20	8	14 Day Quarantine
4/13- EE experiencing cold like symptoms. No fever. Will monior symptoms to verify return to work.	No				2	
Was there at friends house who works at JBS for about 4-5 hours on Saturday. Friend tested. Test came back positive. Off on Sun/Mon- Will be sending me test results of his friend	Yes	Mandatory	4/12/20	4/26/20	14	14 Day Quarantine
Dad works at JBS- Has not been tested yet. Has not had any direct communication from the plant. I advised John to stay out the 14 days and requested that he sends employment verification for his father. He said that everyone feels fine and that he will contact me if/when his father is tested.	Yes	Mandatory	4/13/20	4/27/20	8	14 Day Quarantine
Matching boyfriends quarantine since they live together- They live together. She does have a cough.						
Was there at friends house who works at JBS for about 4-5 hours on Saturday. Friend tested. Test came back positive. Off on Sun/Mon- Will be sending me test results of his friend	Yes	Mandatory	4/12/20	4/26/20	8	14 Day Quarantine
4/13 - He stated that he had a headache, and was feeling sick to his stomach	No				2	Employee has RTW
4/14 - Employees Mother in Law and Sister in Law both work at JBS. They currently take care of her and Feliciano Estrada-Aguilar's kids when they are at work. (He's in cheese).	Yes	Mandatory	4/14/20	4/28/20	14	14 Day Quarantine
4/14 - Employees Mother in Law and Sister in Law both work at JBS. They currently take care of her and Feliciano Estrada-Aguilar's kids when they are at work. (He's in cheese).	Yes	Mandatory	4/14/20	4/28/20	14	14 Day Quarantine
4/14 - Lives with Mother and Sister who work at JBS, same as Carolina/Feliciano. Sending me JBS documentation and will get me test results when they get them.	Yes	Mandatory	4/14/20	4/28/20	14	14 Day Quarantine
Wife did not get tested, they went by her symptoms and advised her to stay home for 14 days. She went into to the ER. His wife went into the hospital because she couldnt breathe. He did not go to the ER with her. She sent over paperwork telling her to self quarantine until she gets back with the doctor on	Yes	Mandatory	4/14/20	4/28/20	5	Employee has RTW

## Sanitation Standard Operating Procedure Guidelines

### **Environmental Cleaning & Disinfection Recommendations for Facilities with Suspected/Confirmed COVID-19 Contagion**

In the event that someone in one of our plants tests positive or is suspected of being positive for the COVID-19 virus, please utilize the following guidelines for conducting environmental cleaning and disinfecting of the areas potential exposed to the virus by the individual in question – **employee welfare, common, and production areas**. This would be a **one-time deep clean** reaction (to each event), then followed by the COVID-19 preventative cleaning steps already in place and at the existing frequencies.

**PPE:** Normal PPE for handling cleaning chemicals are required, and normal PPE for conducting cleaning and sanitizing in production areas should be utilized. PPE should protect the individual from the potential of exposure to the virus during cleaning of surfaces. Persons who will be conducting the cleaning in these areas should ensure they are wearing gloves and face shield or eye protection.

- Disposable Gloves
- Rain gear (disposable aprons or smocks in non-wet clean production areas, if available)
- Eye protection or face shield

**Cleaning & Disinfecting Chemicals:** Will be dependent upon the areas to be cleaned and the chemicals available in the facility to be cleaned and disinfected, but could include the following:

- Normal janitorial cleaning/disinfecting products
- Mild detergent or chlorinated alkaline solution (dilute)
- Alcohol or Alcohol/Quat wipes
- Chlorine Dioxide solution (dilute – 100 ppm)
- Quaternary Ammonium Compound solution(Quat, dilute – 200-400 ppm)
- Chlorine solution (dilute bleach or sodium hypochlorite, dilute – 200 ppm)

Concentrations of quat sanitizers can differ from product to product, follow instructions on label for all chemicals.

**Tools:** Use normal cleaning tools for the areas to be cleaned, but any tool that cannot be adequately disinfected or sterilized (steam or ClO<sub>2</sub> gas) must be disposed of. Mop heads, towels and other soft materials used should be single use. Mop handles, buckets, etc. can be disinfected or sterilized.

- Disposable Wipes/towels and Mops
- Buckets and mop buckets
- Dedicated Trash bags
- Spray bottles and pump up sprayers
- Normal plant sanitation equipment

**Instruction/Direction:** All areas where the individual may have exposed surfaces to the virus will need to be identified, isolated, cleared out and cordoned off. Individuals who will be conducting the cleaning and disinfecting should be trained in proper handling of chemicals, proper use and disposal of PPE and cleaning tools, and proper communication to leadership of any findings/potential risks.

**Procedure: Lunch/break rooms, locker/bathrooms, general purpose hallways, other common areas with hard surfaces**

- Seal and remove all trash/garbage bags from the identified areas wearing required PPE and ensuring no stirring up of air.
- Remove any laundry baskets, mark as contaminated, and secure for laundry pick
- Open individual's locker and remove all personal items placing in a sealed bag or otherwise disposing of unnecessary items. Secure in another area for later disinfection.
- Ensure other employees remove any exposed personal items from these areas (lunch boxes, for instance) when clearing the area.
- Once the areas have been cleared, begin wiping down/cleaning all hard surfaces that may have been contacted by the individual or all hard surfaces in the room (lockers, countertops, walls, sinks, faucets, toilets, tables, chairs, benches, keyboards, time clocks, light switches, etc.) with normal cleaning chemicals. Dispose of wipes or towels used for wiping down/cleaning in tightly seal garbage bag.
- Mop floors with normal cleaning solution, changing solution as it gets dirty. Dispose of mop head after use. Utilize wet floor/slippery floor signage as needed – but traffic in these areas should be minimal.
- Allow surfaces to dry. Wet mop or wet wipe with water to remove any remaining or excess soap/cleaning solution residue. Bag up all disposable cleaning material, tightly seal and dispose of in the proper manner (health department guidelines?). If gloves are removed, employee should wash hands and replace with new gloves.
- Disinfect all same surfaces using 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), or alcohol (60-70%, follow label instruction), by spraying or wiping and letting air dry.
- Disinfect all floors by mopping with 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), alcohol (60-70%, follow label instruction), or bleach/chlorine solution (400 ppm, follow label instructions) by spraying or mopping and letting air dry.
- Non disposable cleaning tools (buckets, sprayers, mop handles, etc.) should be isolated (bagged if possible) and removed to be deep cleaned and sterilized later.
- Employees should remove disposable gloves and aprons then immediately wash their hands. Clean other PPE that is not disposable and then wash their hands again. Employees should change out of their uniforms used for cleaning & disinfecting into a new uniform. Dirty uniforms should be gently bagged or isolated for laundering. Boots should be disinfected.

### Office Areas:

- *Same as outlined above for all hard surfaces and personal belongings for the individual.*
- Carpets should NOT be immediately vacuumed. Instead, the carpets should be wet cleaned with carpet cleaner, if available, using soap and water. If carpet cleaning is not an option (or in addition), lightly spray with a 200 – 400 ppm quat solution as above for floors using spray bottles or pump up sprayer on a mist setting. **DO NOT USE Chlorine or Chlorine Dioxide** (may bleach/destroy carpeting). Do NOT soak/drench the carpet – just a light application to dampen the surface of the carpet. Allow to air dry.
- Vacuum carpet areas as per normal after cleaning, sanitizing, and air drying.

### Production Areas or Normal Wet Clean Areas: (One time reaction to positive employee confirmation, focus on areas affected most by the employee)

- Perform normal cleaning and sanitation as soon as it is possible to shut down the areas. COVID-19 is not a food safety issue so the risk to product is small, but the risk to other employees remains – so cleaning the production environment as soon as possible is advised.
- Follow the normal 8 Steps of Wet cleaning with normal PPE but consider face shields for those cleaning the specific areas where the infected individual worked (protect the eyes, nose, face from touching and spraying). Same applies as stated above for glove changing and handwashing.
- During dry cleaning/dry pick up ensure trash bags in the potentially infected area are tightly sealed and disposed of the proper manner.
- Utilized dedicated employees and cleaning tools in areas that were potentially infected, whenever possible.
- Prior to the sanitize step (Step 8), we will need to conduct a disinfection step on all surfaces by following the label instruction on the existing sanitizer or using an alternative (peracetic acid for instance) if the label does not claim disinfection. Allow the required contact time.
- Following disinfection, all product contact surfaces will need to be thoroughly rinsed. The environment does not need to be rinsed – unless there is a risk of interaction with the sanitizer chemical to be used in the next sanitizing step.
- After required rinsing now proceed to the normal procedures for Step 8 – sanitizing at no rinse product contact concentrations.
- Collect, isolate and store all cleaning tools used in potentially infected areas for deep cleaning and sterilization. Launder or otherwise clean rain gear used by employees in contaminated areas. If rain gear cannot be adequately cleaned, then dispose and replace.

### Dry Clean Only Production Areas:

- Don PPE as above.
- Perform normal dry cleaning with extra emphasis on GENTLE brushing to minimize dusting.
- Remove as much powder and dust from the potentially infected areas by vacuuming with a HEPA filtered vacuum – do not use a centralized vacuum!

- Dispose of vacuum contents and HEPA filter in sealed bags. Remove vacuum cleaner and ancillary parts for deep cleaning and sterilization.
- Wipe down/mop with alcohol all high touch areas and any/all hard surfaces – including floors - that could have been potentially contaminated by the individual.
- Dispose of all wipes & mop heads in a sealed bag.
- May need to consider chlorine dioxide gassing of potentially contaminated dry clean only areas.

**Follow up Cleaning & Sanitizing/Disinfecting:**

- After initial deep cleaning, follow up spraying/wiping of hard surfaces and mopping of floors with disinfectant should occur 2 -3 times per shift as being followed now. In production areas, high touch and potentially contaminated surfaces can also be wiped down – preferably with alcohol wipes – during production 2 – 3 times per shift.
- Continue until further notice.
- Also, the individual’s personal belongings and plant PPE/gear should be cleaned and disinfected with alcohol wipes, and potentially bagged and chlorine dioxide gassed. Likewise, employees conducting cleaning and disinfecting tasks in the potentially contaminated areas should detail alcohol clean and disinfect their bump caps, radios, flashlights, other plant PPE/gear that might have been exposed.

Each situation in each plant will present unique challenges and opportunities that may require adjustment to these guidelines for procedures. Please contact Monty Bohanan and/or Don Northrup for discussion and with any questions as these events arise.

## INTERIM Guidelines for Preparation and Response to Single Cases and Outbreaks of COVID-19 in Long-Term Care Settings

Issued: 03/14/2020

Date of Update	Description of Update
03/25/2020	Updates to symptom screening and case symptoms, reporting to public health, surveillance and monitoring, source control, testing, outbreak precautions, discontinuation of isolation, return of residents to the facility following hospitalization or new admission to the facility, return of HCP to work after suspected or confirmed COVID-19, outbreak resolution.

**Scope:** The purpose of this document is to provide guidance to long-term care facilities (LTCFs) when a resident or healthcare personnel is suspected or confirmed to have COVID-19 and to provide recommendations to prevent transmission within the facility. These recommendations are specific for nursing homes, including skilled nursing facilities. Much of this information could also be applied in assisted living facilities. Guidance provided in this document is based on currently available information at the time it was drafted and is subject to change.

**Background:** A new respiratory disease, coronavirus-19 (COVID-19) is currently spreading globally and there have been instances of community spread within the United States. This disease is caused by the virus SARS-CoV-2. The Colorado Department of Public Health and Environment (CDPHE) is currently monitoring the situation closely. Updated case counts are available on the CDPHE website: [Coronavirus Disease 2019 \(COVID-19\) in Colorado](#).

Residents of LTCFs, which are often older people and those with underlying health conditions, seem to be at especially high risk for developing serious illness associated with COVID-19. Healthcare workers and close contacts of people with COVID-19 are also at elevated risk for exposure. Respiratory illnesses have the potential to spread easily in these settings due to the communal nature of the environment.

**Definition of Healthcare Personnel (HCP):** HCP refers to all persons, paid and unpaid, working in healthcare settings engaged in resident care activities, including: resident assessment for triage, entering examination rooms or resident rooms to provide care or clean

and disinfect the environment, obtaining clinical specimens, handling soiled medical supplies or equipment, and coming in contact with potentially contaminated environmental surfaces.

**Preparation:** Steps that LTCFs can take to prepare for community spread of COVID-19 and to prevent introduction of COVID-19 into the facility include:

1. Review the facility emergency plan.
2. Establish relationships with key healthcare and public health partners.
3. Communicate about COVID-19 with your staff.
4. Communicate about COVID-19 with your residents.
5. Ensure proper use of recommended personal protective equipment (PPE).
6. Conduct an inventory of available PPE and ensure adequate supply of PPE.
7. Reinforce sick leave policies and restrict ill HCP from work.
8. Ensure supplies are available for hand hygiene and respiratory etiquette.
9. Restrict visitors according to public health order 20-20 and guidelines from the Centers for Medicare and Medicaid Services (CMS) and the Centers for Disease Control and Prevention (CDC).
10. Cancel group activities and communal dining.
11. Implement active screening of residents and HCP for symptoms and signs of infection (See Surveillance and Monitoring, below).
12. Ensure adequate supplies and procedures for environmental cleaning and disinfection.

Resources for preparation can be found here:

- [Steps Healthcare Facilities Can Take Now to Prepare for Coronavirus Disease 2019 \(COVID-19\) \(CDC\)](#).
- [Preparing for COVID-19: Long-term Care Facilities, Nursing Homes \(CDC\)](#).
- [Notice of Public Health Order 20-20](#).
- [Concept of Operations \(CONOPS\) for Coronavirus Disease \(COVID-19\) Personal Protection Equipment Shortage \(CDPHE\)](#).

## Response

### Key Information about COVID-19

- **Agent:** SARS-CoV-2
- **Incubation Period:** Range 2 to 14 days
- **Transmission/Communicability:** The virus is thought to spread mainly from person-to-person.
  - Between people who are in close contact with one another (within about 6 feet),
  - Through respiratory droplets produced when an infected person coughs or sneezes.
- These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs.

- It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or possibly their eyes, but this is not thought to be the main way the virus spreads.

## Case Definitions

- **Respiratory illness in LTCFs:** [Fever (>100 F)] OR [lower respiratory illness (new cough or shortness of breath)]

*\*Note\* When COVID-19 is detected in the surrounding community of the LTCF, a high index of suspicion should be maintained. The medical director or local public health agency might consider loosening the respiratory illness case definition to account for upper respiratory symptoms in an outbreak highly suspected of being due to COVID-19 in which residents have a broader array of symptoms or signs (see [Interim Clinical Guidance for Management of Patients with Confirmed Coronavirus Disease \(COVID-19\) \(CDC\)](#) for updated information on clinical presentation of COVID-19).*

- **Suspected COVID-19 outbreak:** two cases of respiratory illness, at least one in a resident, within a 1-week period without a positive test for COVID-19. Residents or staff with clinically relevant respiratory illness should be considered as suspect COVID-19 cases until the disease can be ruled out, even if other etiologies have been identified. We are still learning about the rates of potential co-infection with other respiratory pathogens among individuals with COVID-19.
- **Confirmed COVID-19 outbreak:** two cases of respiratory illness, at least one in a resident, within a 1-week period with at least one positive test for COVID-19.

## Reporting to Public Health

Any suspected or confirmed case or outbreak of COVID-19 should immediately be reported to the local or state public health agency. To report, utilize the [Outbreak Reporting Form for Long-Term Care Facilities](#). Send this form to your local public health agency OR to CDPHE by securely emailing a completed form to: [HAIOutbreak@state.co.us](mailto:HAIOutbreak@state.co.us). You may also contact your local public health agency or the Colorado Department of Public Health and Environment at 303-692-2700 (8:30 - 5:00, Monday - Friday) or 303-370-9395 (after-hours, holidays and weekends).

## Surveillance and Monitoring

**Surveillance for Respiratory Illness in Residents during COVID-19:** Routinely monitor residents for symptoms (shortness of breath, new or change in cough, sore throat, rhinorrhea, myalgia or fatigue, headache, diarrhea, nausea or vomiting), temperature and other vital signs including pulse oximetry daily. Increase monitoring of all residents to twice daily if there is a suspected or confirmed COVID-19 outbreak in the facility.

CDPHE provides a basic tracking tool: [Line List Template to Monitor Residents and Staff](#). Collection of additional variables may be recommended in the setting of a suspected or confirmed COVID-19 outbreak.

Residents with the following symptoms should be considered for potential COVID-19:

- Fever
- Cough
- Shortness of breath
- Symptoms of mild upper respiratory infection in the setting of a suspected or confirmed COVID-19 outbreak (sore throat, rhinorrhea, myalgia or fatigue, headache, diarrhea, nausea or vomiting) or signs of new hypoxemia

Residents should *also* be assessed for other etiologies (e.g. influenza, RSV, etc.) according to clinical suspicion. See Testing section below for more information.

#### **Surveillance for Respiratory Illness in HCP during COVID-19:**

- Screen all staff at the beginning of their shift for fever or respiratory symptoms (shortness of breath, new or change in cough, sore throat, rhinorrhea, myalgia or fatigue, headache, diarrhea, nausea or vomiting) and close contact with an ill household member.
  - Actively take their temperature and document absence of fever, shortness of breath, new or change in cough, sore throat, and other above symptoms.
  - Keep a record of other healthcare facilities where your staff are working (these staff may pose a higher risk) and ask about exposure to facilities with recognized COVID-19 cases.
- As part of routine practice, ask healthcare personnel (including consultant personnel) to regularly monitor themselves for fever and symptoms of respiratory infection.
- CDPHE provides a basic tracking tool: [Line List Template to Monitor Residents and Staff](#). Collection of additional variables may be recommended in the setting of a suspected or confirmed COVID-19 outbreak.

#### **Source Control/What to do when a resident with respiratory illness is identified**

- Do not wait for confirmation of a diagnosis to implement infection control precautions.
- Place a facemask over the resident's nose and mouth until the resident can be properly isolated. In times of PPE shortages, consider the use of tissues or other barriers to cover the resident's mouth and nose. Ensure that residents have access to a trash receptacle to dispose of used tissues and a method for hand hygiene.
- Place the resident in a private room with the door closed. If roommates cannot be moved, ensure at least 6 feet separation between residents and utilize curtains or other physical dividers for separation.

- Per CDC guidance, residents with known or suspected COVID-19 in the long-term care setting do not need to be placed into an airborne infection isolation room (AIIR) ([Preparing for COVID-19: Long-term Care Facilities, Nursing Homes \(CDC\)](#)).
- Only essential personnel should enter the room. Implement staffing policies to minimize the number of HCP who enter the room.
- If symptomatic residents need to leave their room (e.g., for medical care), the resident should wear a facemask or use tissues as source control when they are outside of their room or affected unit.
- Avoid transferring residents with symptoms of respiratory illness to unaffected units or other facilities unless medically necessary.

### Source Control/What to do when a HCP with symptoms is identified

- Remind HCP to stay home when they are ill.
- If HCP develops a fever or symptoms of respiratory infection while at work, they should immediately put on a facemask, inform their supervisor, and leave the workplace. In times of PPE shortages, use tissues or other barriers to cover the HCP's mouth and nose. Ill staff should seek medical care if necessary (make sure to call ahead) and practice self-isolation at home.
- Consult occupational health/infection prevention or other appropriate administrative personnel on decisions about further evaluation and return to work. Consult public health as necessary.

### Testing

Residents with respiratory illness should be tested for COVID-19. Residents should also be tested for influenza, RSV, and other respiratory viruses according to clinical suspicion and facility protocols.

**Note that COVID-19 testing should not wait for results of other virus testing.** In situations where the capacity for COVID-19 is limited and appropriate infection control measures for COVID-19 are in place, it may be reasonable to test for influenza or RSV first if there is a short turnaround time for test results. However, providers must also consider the possibility of coinfection with COVID-19.

COVID19 testing may be performed at a commercial laboratory or at the state public health laboratory if they meet current testing criteria.

Facilities should submit samples for influenza, RSV, and other respiratory viruses via their usual testing protocols (not to CDPHE).

Staff ill with respiratory symptoms should also be tested for COVID-19 and influenza, at a minimum, through their usual healthcare provider or alternate testing site.

During an investigation of a confirmed COVID-19 outbreak, once two or more residents on a unit have tested positive for COVID-19, then additional COVID-19 testing on the unit may be unnecessary, and all residents on the unit with compatible symptoms should be cared for as if COVID-19 positive. COVID-19 testing should be conducted on other units to establish the extent of COVID-19 spread. HCP with symptoms of COVID-19 should be prioritized for testing. Postmortem testing for COVID-19 should be completed following undiagnosed deaths suspected to be due to COVID-19.

## Specimen Collection

- Follow guidance from CDC and CDPHE regarding which specimens to obtain for COVID-19 testing (e.g., nasopharyngeal or lower respiratory specimens).
  - [Evaluating and Testing Persons for Coronavirus Disease 2019 \(COVID-19\) \(CDC\)](#)
  - [Interim Guidance for Collection and Submission of Postmortem Specimens from Deceased Persons Under Investigation \(PUI\) for COVID-19, February 2020 \(CDC\)](#)
  - [COVID-19 resources for health care providers and local public health agencies \(CDPHE\)](#)
- When collecting diagnostic respiratory specimens (e.g., nasopharyngeal swab) from a possible COVID-19 patient, CDC recommends:
  - Specimen collection should be performed in a private area, such as an examination room with the door closed.
  - HCP in the room should wear an N-95 or higher-level respirator (or facemask if a respirator is not available), eye protection, gloves, and a gown.
  - The number of HCP present during the procedure should be limited to only those essential for patient care and procedure support. Visitors and roommates should not be present for specimen collection.
- In the LTCF setting, **consult with public health as needed** and consider the following options for appropriate specimen collection activities:
  - Identify and designate an office space or conference room, for COVID-19 specimen collection. Consider designating this room for this purpose for an extended period of time.
  - Collect the specimen outdoors (if weather allows and is feasible given resident status).
  - Collect the specimen in the resident's room with the door closed.
    - If the resident has roommates, consider moving to other locations while the specimen is being collected. Do not allow residents or staff back in the room until a sufficient time has elapsed for enough air changes to remove potentially infectious particles has occurred ([Airborne Contaminant Removal \(CDC\)](#))
    - If roommates cannot be moved, ensure at least 6 feet separation between residents, and use curtains or other physical dividers for separation.

- If recommended PPE is not available, consider alternate sites of sample collection or use the highest level of PPE available in consultation with public health.
- Clean and disinfect procedure room surfaces promptly in accordance with CDC guidance ([Interim Infection Prevention and Control Recommendations for Patients with Suspected or Confirmed Coronavirus Disease 2019 \(COVID-19\) in Healthcare Settings \(CDC\)](#)) .

### Infection control (for suspected or confirmed case/outbreak)

*Note: Guidelines for infection prevention and control of COVID-19 may change as we learn more about the disease. The guidance provided below should be used as a guide.*

*For the most up-to-date information, visit CDC's website for [Infection Control Guidance \(Infection Control \(CDC\)\)](#) and [Strategies to Prevent Spread of COVID-19 in LTCFs: Healthcare Facilities \(CDC\)](#).*

*See [Outbreak Investigation Infection Prevention Checklist for Long-Term Care Facilities](#) for a checklist of infection prevention measures to implement during a suspected or confirmed outbreak.*

- **Isolation:** Residents with respiratory illness should be confined to their rooms with the door to the room closed whenever possible while symptomatic.
- **Quarantine:** In the event that a resident is exposed to another resident who is a confirmed positive case, quarantine of up to 14 days is recommended.
- **Standard and transmission-based precautions.** In general, when caring for residents with undiagnosed respiratory illness, use Standard Precautions, Contact Precautions, and Droplet Precautions with eye protection unless the suspected diagnosis requires Airborne Precautions (e.g. tuberculosis) or aerosol-generating procedures (AGPs) are expected to be performed.
- **Aerosol generating procedures (AGPs):** Some procedures performed on a patient with known or suspected COVID-19 could generate infectious aerosols (e.g., sputum induction, open suctioning of airways). If performed, LTCFs should follow CDC guidance on precautions to take when performing AGPs: [Interim Infection Prevention and Control Recommendations for Patients with Suspected or Confirmed Coronavirus Disease 2019 \(COVID-19\) in Healthcare Settings \(CDC\)](#). There is separate guidance for specimen collection as described above.
- **Tracking contacts:** Facilities should keep a log of all persons who care for or enter the rooms or care area of residents with COVID19. CDPHE has developed a HCP Tracking Form to add in this process: [Colorado Health Care Personnel Tracking Form](#).
- **HCP Exposures.** CDC has interim guidance available on How to Conduct a Risk Assessment and Public Health Management of Public Health Personnel with Potential Exposures in A Healthcare Setting to Patients with COVID-19: [Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential](#)

[Exposure in a Healthcare Setting to Patients with Coronavirus Disease \(COVID-19\) \(CDC\)](#). Exposed HCP should be notified and undergo risk assessment prior to continuing work in the facility in which the exposure occurred or any other healthcare facility.

- **Environmental Infection Control.**
  - Ensure frequent daily cleaning with an EPA-registered, hospital-grade disinfectant of commonly touched environmental surfaces to decrease environmental contamination. Refer to [List N](#) on the EPA website for EPA-registered disinfectants that have qualified under EPA's emerging viral pathogens program for use against SARS-CoV-2.
  - Use dedicated or disposable noncritical resident-care equipment (e.g., blood pressure cuffs). If equipment will be used for more than one resident, clean and disinfect such equipment before use on another resident according to the manufacturer's instructions.
  - Once the patient has been discharged or transferred, HCP, including environmental services personnel, should refrain from entering the vacated room until sufficient time has elapsed for enough air changes to remove potentially infectious particles (e.g., a minimum of 2 hours; more information on [clearance rates under differing ventilation conditions](#) is available). After this time has elapsed, the room should undergo appropriate cleaning and surface disinfection before it is returned to routine use.

**If a suspect or confirmed COVID-19 outbreak is identified in a LTCF (using the definitions above) the following precautions should also be implemented in accordance with CDC guidelines:**

- **Cohorting of Residents and Staff:** Implement protocols for cohorting ill residents with designated HCP. Contact public health for guidance on cohorting and consult the 'Patient Placement' section in the following guidance document: [Interim Infection Prevention and Control Recommendations for Patients with Suspected or Confirmed Coronavirus Disease 2019 \(COVID-19\) in Healthcare Settings \(CDC\)](#).
- **Resident Activities and Resident Screening:**
  - Encourage residents to remain in their room. If there are cases in the facility, restrict residents (to the extent possible) to their rooms except for medically necessary purposes. If they leave their room, residents should wear a facemask, perform hand hygiene, limit their movement in the facility, and perform social distancing (stay at least 6 feet away from others).
  - Cancel group field trips and activities, as well as communal dining.
  - Screen residents for fever or respiratory symptoms (shortness of breath, new or change in cough, sore throat, rhinorrhea, myalgia or fatigue, headache, diarrhea, nausea or vomiting) and monitor vital signs and pulse oximetry twice daily.
- **Visitor Restriction:**
  - Restrict all visitors to the facility ([Notice of Public Health Order 20-20](#)). Exceptions might be considered in limited circumstances (e.g., end of life

event). In those circumstances, the visitor should wear PPE as recommended by Public Health Order 20-20 and restrict their visit to the resident's room.

- **Healthcare Personnel:**
  - Implement universal use of facemasks for HCP while in the facility.
  - Implement contingency capacity strategies for PPE use ([Strategies for Optimizing the Supply of PPE \(CDC\)](#)).
- **New Admissions:** The facility should halt new admissions until further consultation with public health.

### Case Management

- **Management in facility:** Residents with milder illness may be treated in the facility if felt to be medically appropriate by their healthcare provider. For more information about clinical management and treatment, see: [Interim Clinical Guidance for Management of Patients with Confirmed Coronavirus Disease \(COVID-19\) \(CDC\)](#).
- **Acute care management:** Transfer of residents to an acute care facility could be considered in the following circumstances:
  - If a resident requires a higher level of care due to medical necessity.
  - If the LTCF is not able to implement or maintain recommended precautions to appropriately care for and protect other residents, transfer to another facility should be considered in consultation with public health and the accepting facility (See Return to the Facility After Hospitalization, below).
- **Transport:** When transporting residents who require hospitalization, residents should wear a facemask over their nose and mouth to contain secretions. **Ensure transport personnel and the receiving hospital are informed of COVID-19 suspicion or diagnosis before arrival. This will allow the transport service and healthcare facility the opportunity to properly prepare.**

### Discontinuation of Isolation

- CDC recommends a test-based strategy for discontinuation of transmission-based precautions: [Interim Guidance for Discontinuation of Transmission-Based Precautions and Disposition of Hospitalized Patients with COVID-19 \(CDC\)](#).
  - Resolution of fever without the use of fever-reducing medications and
  - Improvement in respiratory symptoms (e.g., cough, shortness of breath), and
  - Negative results of an FDA Emergency Use Authorized COVID-19 molecular assay for detection of SARS-CoV-2 RNA from at least two consecutive nasopharyngeal swab specimens collected  $\geq 24$  hours apart (total of two negative specimens)
- When testing is not available, CDPHE recommends a non-test-based strategy. Standard, Droplet, and Contact Precautions, including eye protection, should be maintained on residents with respiratory symptoms, regardless of testing results, until the following criteria are met:
  - At least 3 days (72 hours) after recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); AND

- At least 10 days have passed since symptoms first appeared.
- Facilities may consult public health on a case by case basis as necessary for guidance regarding special populations (e.g., severely immunocompromised persons).
- Additionally, all residents should remain in their rooms, and staff and essential visitors should practice universal masking until the outbreak is resolved, defined as 14 days after the onset of symptoms (fever or respiratory symptoms) of the last case (in residents and staff). This might be applied to an affected unit or the entire facility.
- These recommendations assume adequate supply of PPE. PPE sparing strategies, including extended use of facemask and eye protection, may apply. In selected situations, the isolation criteria might be modified by public health authorities.

### **Return to the Facility after Hospitalization or New Admission to the Facility**

- Residents with a history of COVID-19 can be admitted to the facility if transmission-based precautions have been discontinued in the hospital based on the above test-based or non-test-based strategies.
  - If the resident's symptoms are resolved, no further restrictions are necessary unless resident activities are restricted due to an ongoing potential or confirmed outbreak.
  - If the resident has persistent symptoms from COVID-19 (e.g., persistent cough), they should be placed in a single room, and restricted to their room.
- Residents with a history of COVID-19 that have not met criteria for discontinuation of transmission-based precautions should go to a facility with adequate personal protective equipment supplies and an ability to adhere to infection prevention and control recommendations for the care of COVID-19 patients. Preferably, the patient would be placed at a facility that has already cared for COVID-19 cases, in a specific unit designated to care for COVID-19 residents. Consultation with public health is advised.
- Long-term care facilities should admit any individuals that they would normally admit to their facility, including individuals from hospitals where a case of COVID-19 was/is present. CMS has additional guidance: [Guidance for Infection Control and Prevention of Coronavirus Disease 2019\(COVID-19\) in nursing homes \(CMS\)](#).
- If the facility has an ongoing suspected or confirmed COVID-19 outbreak, public health should be consulted for best recommendations for admission to the facility.

### **Return of HCP to Work after Confirmed or Suspected COVID-19**

- See [Return to Work Criteria for HCP with Confirmed or Suspected COVID-19 \(CDC\)](#) for test-based and non-test-based strategies for determining when HCP may return to work. Note, that if a non-test-based strategy is used, CDPHE recommends that at least 3 days (72 hours) have passed since recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); and, at least *10 days* have passed since symptoms first appeared. The more stringent criteria recommended by CDPHE are based on evidence of cases of prolonged shedding of virus, and may need to be modified in consultation with public health in settings of staffing shortages. (Seven days could be considered in settings with a healthcare worker shortage; preliminary data suggest most shedding of live virus ends around 7 days.)

- After returning to work, HCP should follow return to work practices and work restrictions as outlined by CDC (see Return to Work Criteria link, above).

#### **Outbreak Resolution**

- Resolution is defined as 14 days after the onset of symptoms (fever or respiratory symptoms) of the last case (in residents and staff), with infection prevention and control precautions in place during that time.
- Consideration can be given to unit-specific outbreak resolution in consultation with public health.

FOR IMMEDIATE RELEASE

CONTACT: Shelly Griffith, CEO

PHONE: 970-842-2861, extension 9212

Cases of COVID-19, the illness resulting from the novel coronavirus, have been diagnosed at our Eben Ezer community. The affected neighbors are in quarantine in our cluster neighborhood. In order to protect the privacy of our neighbors, identifying information and medical records will not be released to the public. We have notified public health officials as required and are following procedures recommended by the Centers for Disease Control & Prevention. We are taking every step as recommended by authorities to contain the spread. We want to make neighbors, their families, and our dedicated staff aware of this situation and reassure everyone that we are on top of it. Developments are changing day by day, minute by minute. Our focus remains on the health and well-being of our community. We must also recognize our team for the concern and commitment they have shown to our neighbors during this challenging time. Our mission has never been more meaningful.

Eben Ezer, the Colorado Department of Public Health & Environment (CDPHE), Northeast Colorado Health Department and partnering agencies are working diligently to ensure ill patients are receiving appropriate care and measures are being taken to limit further spread of disease. Proactive efforts are focused on identifying, isolating and testing all of those who may be at risk.

“Eben Ezer has notified our neighbors, families and team members of the current situation. We began restricting visitors to the campus on March 11<sup>th</sup> with full restriction put into effect March 13<sup>th</sup> to protect the health of the residents and health care workers at our community. We have tested 7 of our neighbors for COVID-19 of which 6 came back positive. Prior to this incident and ongoing, we have been following all CMS, CDC and state and local health department guidelines concerning COVID-19. Our team members have been and will continue to be screened when they arrive to work, including checking temperature, to ensure no additional sickness is brought into our buildings. If they have a fever over 100.4 they are sent home and asked to contact their primary care physician. Our team members are being diligent on practicing proper hand washing and the use of personal protective equipment. All staff have received recurring education on these practices,” says Shelly Griffith, Eben Ezer CEO.

Eben Ezer is not the first long term care community in the state to have a confirmed case. We need your help in battling this virus, we ask our larger community to continue to adhere to the Stay at Home order. Thank you all for your support and assistance as we work to combat the spread of this virus.

Eben Ezer will continue to monitor and adhere to the recommendations set forth by the Centers for Disease Control (CDC). We are proud of our positive reputation in the community we serve and provide our senior adults the quality care and services they deserve and expect from us. We will continue to provide updates regularly to our Eben Ezer community. For more information, please contact Shelly Griffith at 970-842-2861, ext 9212.

March 17, 2020

## CDPHE Environmental Cleaning Guidance for COVID-19 Households AND Regulated Facilities

### Households, workplaces, vehicles

The Colorado Department of Public Health and Environment is providing the following recommendations to routinely clean and disinfect commonly touched surfaces to control the spread of the virus that causes COVID-19. The following guidance is based on [Interim Recommendations for US Households with Suspected/Confirmed Coronavirus Disease 2019](#) as well as [Interim Recommendations for US Community Facilities with Suspected/Confirmed Coronavirus Disease 2019](#).

Based on what is currently known about the virus, spread from person-to-person happens most frequently among close contacts (within about 6 feet). This type of transmission occurs via respiratory droplets. Transmission of COVID-19 to persons from surfaces contaminated with the virus has not been documented. Current evidence suggests that COVID-19 may remain viable for hours to days on surfaces made from a variety of materials. Cleaning of visibly dirty and high touch surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in households and community settings.

- **Cleaning** refers to the removal of germs, dirt, and impurities from surfaces. Cleaning does not kill germs, but by removing them, it lowers their numbers and the risk of spreading infection.
- **Disinfecting** refers to using chemicals to kill germs on surfaces. This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface *after* cleaning, it can further lower the risk of spreading infection.

### How to Clean and Disinfect Surfaces

- **Cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility**
  - It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
  - Clean and disinfect all areas (e.g., offices, bathrooms, and common areas) used by the ill persons, focusing especially on frequently touched surfaces. Continue to follow all cleaning and disinfecting recommendations provided below.
- Wear disposable gloves when cleaning and disinfecting surfaces. Gloves should be discarded after each cleaning. If reusable gloves are used, those gloves

should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other purposes. Clean hands immediately after gloves are removed.

- If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.
- For disinfection, diluted household bleach solutions, alcohol solutions with at least 70% alcohol, and most common EPA-registered household disinfectants should be effective. Consult the manufacturer's instructions for cleaning and disinfection products used.
- Diluted household bleach solutions can be used if appropriate for the surface. Check the label on the bleach container to be sure it provides claims about disinfecting and instructions for mixing. Follow manufacturer's instructions for mixing, application and proper ventilation. Avoid using bottles of bleach that you think may be older than one year, or are past their expiration date as marked on the bottle. Never mix household bleach with ammonia or any other cleanser. Unexpired household bleach will be effective against coronaviruses when properly diluted.
  - Prepare a bleach solution by mixing:
    - 5 tablespoons (1/3rd cup) bleach per gallon of water. This a "standard recipe," be sure to check the label as bleach comes in different concentrations.
    - 4 teaspoons bleach per quart of water
  - Products with EPA-approved emerging viral pathogens are expected to be effective against COVID-19 based on data for harder to kill viruses. Follow the manufacturer's instructions for all cleaning and disinfection products (e.g., concentration, application method and contact time, etc.). The list of EPA-approved products for emerging viral pathogens expected to be effective against COVID-19 can be accessed at this link:  
<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>
- For soft (porous) surfaces such as carpeted floor, rugs, and drapes, remove visible contamination if present and clean with appropriate cleaners indicated for use on these surfaces. After cleaning:
  - Launder items as appropriate in accordance with the manufacturer's instructions. If possible, launder items using the warmest appropriate water setting for the items and dry items completely, or
- Use products with the EPA-approved emerging viral pathogens claims (examples at this [link](#)) that are suitable for porous surfaces.

### How to Clean and Disinfect Clothing, Towels, and Linens

- Wear disposable gloves when handling dirty laundry from an ill person and then discard after each use. If using reusable gloves, those gloves should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other household purposes. [Wash hands](#) immediately after gloves are removed.
  - If no gloves are used when handling dirty laundry, wash hands afterwards.
  - If possible, do not shake dirty laundry. This will minimize the possibility of dispersing virus through the air.
  - Launder items as appropriate in accordance with the manufacturer's instructions. If possible, launder items using the warmest appropriate water setting for the items and dry items completely. Dirty laundry from an ill

- person can be washed with other people's items.
- Clean and disinfect clothes hampers according to guidance above for surfaces. If possible, consider placing a bag liner that is either disposable (can be thrown away) or can be laundered.

## **Regulated Facilities: Schools, Child Care Facilities, Retail Food Establishments and Public Accommodations**

The following guidance is designed to clarify proper cleaning, sanitizing and disinfecting of surfaces within regulated facilities such as schools, child care facilities, retail food establishments and public accommodations.

- **Clean** means to be free of dust and debris or to remove dirt and debris by vacuuming or scrubbing and washing with soap and water.
- **Disinfect** means to eliminate most or all pathogens. This is generally accomplished in these settings by the use of liquid chemical solutions such as a mixture of household bleach and water.
- **Sanitization** is not as strong as disinfecting, but still removes many pathogens, but is safe to use on surfaces used for food preparation.

## **Cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility**

- It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
- Clean and disinfect all areas used by the ill persons, focusing especially on frequently touched surfaces. Continue to follow all cleaning and disinfecting recommendations provided below.

### **Specific Guidance for Schools**

Schools should clean and disinfect commonly touched surfaces as they normally would in the event of increased rates of influenza and other respiratory infections. However, in kitchens and food preparation areas, schools should sanitize food contact surfaces as usual and of course, follow guidance on exclusion of ill workers, proper and frequent handwashing and respiratory hygiene, which is true for all settings.

### **Specific Guidance for Child Care Facilities**

In child care facilities, we are recommending routine cleaning and sanitizing of kitchens and areas used primarily for food and bottle preparation. We recommend cleaning and disinfecting commonly touched surfaces. If toys children may mouth or table tops used for the service of food are disinfected, they should be rinsed and allowed to air-dry before being used or returned to use by children.

## Specific Guidance for Restaurants

Restaurants and other retail food establishments should continue routine cleaning and sanitizing of food preparation surfaces in the kitchen and other food storage areas. We are recommending routine cleaning and disinfecting commonly touched surfaces in the dining and customer areas. Detailed guidance on heightened cleaning and disinfecting practices for restaurants can be accessed at this link:

[https://drive.google.com/file/d/1pXAFPXCTLgBZvTJpuqrH45YeLB\\_Jc2wP/view](https://drive.google.com/file/d/1pXAFPXCTLgBZvTJpuqrH45YeLB_Jc2wP/view)

## Specific Guidance for Hotels

Hotels and other public accommodations cleaning rooms used by a known case or a quarantined or isolated individual should follow recommended CDC guidance: [Interim Guidance for Environmental Cleaning and Disinfection for U.S. Households with Suspected or Confirmed Coronavirus Disease 2019](#).

- It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
- In areas where ill persons have visited or used, continue routine cleaning and disinfection as in this guidance

## Care of the Environment

The information below has been modified for relevance. The complete guidance can be [accessed at this link:https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html](https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html)

### Recommendation:

- IV.F.1. Establish policies and procedures for routine and targeted cleaning of environmental surfaces as indicated by the level of patient contact and degree of soiling. (II)
- IV.F.2. Clean and disinfect surfaces that are likely to be contaminated with pathogens, including those that are in close proximity to the patient (e.g., bed rails, over bed tables) and frequently-touched surfaces in the patient care environment (e.g., door knobs, surfaces in and surrounding toilets in patients' rooms) on a more frequent schedule compared to that for other surfaces (e.g., horizontal surfaces in waiting rooms) (IB)
- IV.F.3. Use EPA-registered disinfectants that have microbiocidal (i.e., killing) activity against the pathogens most likely to contaminate the patient-care environment. Use in accordance with manufacturer's instructions (IB/IC)
- IV.F.5. Include multi-use electronic equipment in policies and procedures for preventing contamination and for cleaning and disinfection, especially those items that are used by patients, those used during delivery of patient care, and mobile devices that are moved in and out of patient rooms frequently (e.g., daily) (IB)
- IV.F.5.a. No recommendation for use of removable protective covers or washable keyboards. (Unresolved issue)

These recommendations provide supplemental information to the general cleaning and disinfecting recommendations already provided by the Department and are consistent with US FDA. It is important to note that labeled instructions must be followed on all sanitizing and disinfecting products, sanitizers must be EPA registered and disinfectants must be EPA registered and hospital-grade (effective against *Salmonella choleraesuis* (enteric), *Staphylococcus aureus*, and *Pseudomonas aeruginosa*)

## CDPHE Environmental Cleaning Guidance for COVID-19 Households AND Regulated Facilities

### Households, workplaces, vehicles

The Colorado Department of Public Health and Environment is providing the following recommendations to routinely clean and disinfect commonly touched surfaces to control the spread of the virus that causes COVID-19. The following guidance is based on [Interim Recommendations for US Households with Suspected/Confirmed Coronavirus Disease 2019](#) as well as [Interim Recommendations for US Community Facilities with Suspected/Confirmed Coronavirus Disease 2019](#).

Based on what is currently known about the virus, spread from person-to-person happens most frequently among close contacts (within about 6 feet). This type of transmission occurs via respiratory droplets. Transmission of COVID-19 to persons from surfaces contaminated with the virus has not been documented. Current evidence suggests that COVID-19 may remain viable for hours to days on surfaces made from a variety of materials. Cleaning of visibly dirty and high touch surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in households and community settings.

- **Cleaning** refers to the removal of germs, dirt, and impurities from surfaces. Cleaning does not kill germs, but by removing them, it lowers their numbers and the risk of spreading infection.
- **Disinfecting** refers to using chemicals to kill germs on surfaces. This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface *after* cleaning, it can further lower the risk of spreading infection.

### How to Clean and Disinfect Surfaces

- **Cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility**
  - It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
  - Clean and disinfect all areas (e.g., offices, bathrooms, and common areas) used by the ill persons, focusing especially on frequently touched surfaces. Continue to follow all cleaning and disinfecting recommendations provided below.
- Wear disposable gloves when cleaning and disinfecting surfaces. Gloves should be discarded after each cleaning. If reusable gloves are used, those gloves

should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other purposes. Clean hands immediately after gloves are removed.

- If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.
- For disinfection, diluted household bleach solutions, alcohol solutions with at least 70% alcohol, and most common EPA-registered household disinfectants should be effective. Consult the manufacturer's instructions for cleaning and disinfection products used.
- Diluted household bleach solutions can be used if appropriate for the surface. Check the label on the bleach container to be sure it provides claims about disinfecting and instructions for mixing. Follow manufacturer's instructions for mixing, application and proper ventilation. Avoid using bottles of bleach that you think may be older than one year, or are past their expiration date as marked on the bottle. Never mix household bleach with ammonia or any other cleanser. Unexpired household bleach will be effective against coronaviruses when properly diluted.
  - Prepare a bleach solution by mixing:
    - 5 tablespoons (1/3rd cup) bleach per gallon of water. This a "standard recipe," be sure to check the label as bleach comes in different concentrations.
    - 4 teaspoons bleach per quart of water
  - Products with EPA-approved emerging viral pathogens are expected to be effective against COVID-19 based on data for harder to kill viruses. Follow the manufacturer's instructions for all cleaning and disinfection products (e.g., concentration, application method and contact time, etc.). The list of EPA-approved products for emerging viral pathogens expected to be effective against COVID-19 can be accessed at this link:  
<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>
- For soft (porous) surfaces such as carpeted floor, rugs, and drapes, remove visible contamination if present and clean with appropriate cleaners indicated for use on these surfaces. After cleaning:
  - Launder items as appropriate in accordance with the manufacturer's instructions. If possible, launder items using the warmest appropriate water setting for the items and dry items completely, or
- Use products with the EPA-approved emerging viral pathogens claims (examples at this [link](#)) that are suitable for porous surfaces.

### How to Clean and Disinfect Clothing, Towels, and Linens

- Wear disposable gloves when handling dirty laundry from an ill person and then discard after each use. If using reusable gloves, those gloves should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other household purposes. [Wash hands](#) immediately after gloves are removed.
  - If no gloves are used when handling dirty laundry, wash hands afterwards.
  - If possible, do not shake dirty laundry. This will minimize the possibility of dispersing virus through the air.
  - Launder items as appropriate in accordance with the manufacturer's instructions. If possible, launder items using the warmest appropriate water setting for the items and dry items completely. Dirty laundry from an ill

- person can be washed with other people's items.
- Clean and disinfect clothes hampers according to guidance above for surfaces. If possible, consider placing a bag liner that is either disposable (can be thrown away) or can be laundered.

## **Regulated Facilities: Schools, Child Care Facilities, Retail Food Establishments and Public Accommodations**

The following guidance is designed to clarify proper cleaning, sanitizing and disinfecting of surfaces within regulated facilities such as schools, child care facilities, retail food establishments and public accommodations.

- **Clean** means to be free of dust and debris or to remove dirt and debris by vacuuming or scrubbing and washing with soap and water.
- **Disinfect** means to eliminate most or all pathogens. This is generally accomplished in these settings by the use of liquid chemical solutions such as a mixture of household bleach and water.
- **Sanitization** is not as strong as disinfecting, but still removes many pathogens, but is safe to use on surfaces used for food preparation.

## **Cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility**

- It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
- Clean and disinfect all areas used by the ill persons, focusing especially on frequently touched surfaces. Continue to follow all cleaning and disinfecting recommendations provided below.

### **Specific Guidance for Schools**

Schools should clean and disinfect commonly touched surfaces as they normally would in the event of increased rates of influenza and other respiratory infections. However, in kitchens and food preparation areas, schools should sanitize food contact surfaces as usual and of course, follow guidance on exclusion of ill workers, proper and frequent handwashing and respiratory hygiene, which is true for all settings.

### **Specific Guidance for Child Care Facilities**

In child care facilities, we are recommending routine cleaning and sanitizing of kitchens and areas used primarily for food and bottle preparation. We recommend cleaning and disinfecting commonly touched surfaces. If toys children may mouth or table tops used for the service of food are disinfected, they should be rinsed and allowed to air-dry before being used or returned to use by children.

## Specific Guidance for Restaurants

Restaurants and other retail food establishments should continue routine cleaning and sanitizing of food preparation surfaces in the kitchen and other food storage areas. We are recommending routine cleaning and disinfecting commonly touched surfaces in the dining and customer areas. Detailed guidance on heightened cleaning and disinfecting practices for restaurants can be accessed at this link:

[https://drive.google.com/file/d/1pXAFPXCTLgBZvTJpuqrH45YeLB\\_Jc2wP/view](https://drive.google.com/file/d/1pXAFPXCTLgBZvTJpuqrH45YeLB_Jc2wP/view)

## Specific Guidance for Hotels

Hotels and other public accommodations cleaning rooms used by a known case or a quarantined or isolated individual should follow recommended CDC guidance: [Interim Guidance for Environmental Cleaning and Disinfection for U.S. Households with Suspected or Confirmed Coronavirus Disease 2019](#).

- It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
- In areas where ill persons have visited or used, continue routine cleaning and disinfection as in this guidance

## Care of the Environment

The information below has been modified for relevance. The complete guidance can be [accessed at this link:https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html](https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html)

### Recommendation:

- IV.F.1. Establish policies and procedures for routine and targeted cleaning of environmental surfaces as indicated by the level of patient contact and degree of soiling. (II)
- IV.F.2. Clean and disinfect surfaces that are likely to be contaminated with pathogens, including those that are in close proximity to the patient (e.g., bed rails, over bed tables) and frequently-touched surfaces in the patient care environment (e.g., door knobs, surfaces in and surrounding toilets in patients' rooms) on a more frequent schedule compared to that for other surfaces (e.g., horizontal surfaces in waiting rooms) (IB)
- IV.F.3. Use EPA-registered disinfectants that have microbiocidal (i.e., killing) activity against the pathogens most likely to contaminate the patient-care environment. Use in accordance with manufacturer's instructions (IB/IC)
- IV.F.5. Include multi-use electronic equipment in policies and procedures for preventing contamination and for cleaning and disinfection, especially those items that are used by patients, those used during delivery of patient care, and mobile devices that are moved in and out of patient rooms frequently (e.g., daily) (IB)
- IV.F.5.a. No recommendation for use of removable protective covers or washable keyboards. (Unresolved issue)

These recommendations provide supplemental information to the general cleaning and disinfecting recommendations already provided by the Department and are consistent with US FDA. It is important to note that labeled instructions must be followed on all sanitizing and disinfecting products, sanitizers must be EPA registered and disinfectants must be EPA registered and hospital-grade (effective against *Salmonella choleraesuis* (enteric), *Staphylococcus aureus*, and *Pseudomonas aeruginosa*)

March 17, 2020

## CDPHE Environmental Cleaning Guidance for COVID-19 Households AND Regulated Facilities

### Households, workplaces, vehicles

The Colorado Department of Public Health and Environment is providing the following recommendations to routinely clean and disinfect commonly touched surfaces to control the spread of the virus that causes COVID-19. The following guidance is based on [Interim Recommendations for US Households with Suspected/Confirmed Coronavirus Disease 2019](#) as well as [Interim Recommendations for US Community Facilities with Suspected/Confirmed Coronavirus Disease 2019](#).

Based on what is currently known about the virus, spread from person-to-person happens most frequently among close contacts (within about 6 feet). This type of transmission occurs via respiratory droplets. Transmission of COVID-19 to persons from surfaces contaminated with the virus has not been documented. Current evidence suggests that COVID-19 may remain viable for hours to days on surfaces made from a variety of materials. Cleaning of visibly dirty and high touch surfaces followed by disinfection is a best practice measure for prevention of COVID-19 and other viral respiratory illnesses in households and community settings.

- **Cleaning** refers to the removal of germs, dirt, and impurities from surfaces. Cleaning does not kill germs, but by removing them, it lowers their numbers and the risk of spreading infection.
- **Disinfecting** refers to using chemicals to kill germs on surfaces. This process does not necessarily clean dirty surfaces or remove germs, but by killing germs on a surface *after* cleaning, it can further lower the risk of spreading infection.

### How to Clean and Disinfect Surfaces

- **Cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility**
  - It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
  - Clean and disinfect all areas (e.g., offices, bathrooms, and common areas) used by the ill persons, focusing especially on frequently touched surfaces. Continue to follow all cleaning and disinfecting recommendations provided below.
- Wear disposable gloves when cleaning and disinfecting surfaces. Gloves should be discarded after each cleaning. If reusable gloves are used, those gloves should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other purposes. Clean hands immediately after gloves are removed.

- If surfaces are dirty, they should be cleaned using a detergent or soap and water prior to disinfection.
- For disinfection, diluted household bleach solutions, alcohol solutions with at least 70% alcohol, and most common EPA-registered household disinfectants should be effective. Consult the manufacturer's instructions for cleaning and disinfection products used.
- Diluted household bleach solutions can be used if appropriate for the surface. Check the label on the bleach container to be sure it provides claims about disinfecting and instructions for mixing. Follow manufacturer's instructions for mixing, application and proper ventilation. Avoid using bottles of bleach that you think may be older than one year, or are past their expiration date as marked on the bottle. Never mix household bleach with ammonia or any other cleanser. Unexpired household bleach will be effective against coronaviruses when properly diluted.
  - Prepare a bleach solution by mixing:
    - 5 tablespoons (1/3rd cup) bleach per gallon of water. This a "standard recipe," be sure to check the label as bleach comes in different concentrations.
    - 4 teaspoons bleach per quart of water
  - Products with EPA-approved emerging viral pathogens are expected to be effective against COVID-19 based on data for harder to kill viruses. Follow the manufacturer's instructions for all cleaning and disinfection products (e.g., concentration, application method and contact time, etc.). The list of EPA-approved products for emerging viral pathogens expected to be effective against COVID-19 can be accessed at this link: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>
- For soft (porous) surfaces such as carpeted floor, rugs, and drapes, remove visible contamination if present and clean with appropriate cleaners indicated for use on these surfaces. After cleaning:
  - Launder items as appropriate in accordance with the manufacturer's instructions. If possible, launder items using the warmest appropriate water setting for the items and dry items completely, or
- Use products with the EPA-approved emerging viral pathogens claims (examples at this [link](#)) that are suitable for porous surfaces.

### How to Clean and Disinfect Clothing, Towels, and Linens

- Wear disposable gloves when handling dirty laundry from an ill person and then discard after each use. If using reusable gloves, those gloves should be dedicated for cleaning and disinfection of surfaces for COVID-19 and should not be used for other household purposes. [Wash hands](#) immediately after gloves are removed.
  - If no gloves are used when handling dirty laundry, wash hands afterwards.
  - If possible, do not shake dirty laundry. This will minimize the possibility of dispersing virus through the air.
  - Launder items as appropriate in accordance with the manufacturer's instructions. If possible, launder items using the warmest appropriate water setting for the items and dry items completely. Dirty laundry from an ill person can be washed with other people's items.
  - Clean and disinfect clothes hampers according to guidance above for surfaces. If possible, consider placing a bag liner that is either disposable (can be thrown away) or can be laundered.

## Regulated Facilities: Schools, Child Care Facilities, Retail Food Establishments and Public Accommodations

The following guidance is designed to clarify proper cleaning, sanitizing and disinfecting of surfaces within regulated facilities such as schools, child care facilities, retail food establishments and public accommodations.

- **Clean** means to be free of dust and debris or to remove dirt and debris by vacuuming or scrubbing and washing with soap and water.
- **Disinfect** means to eliminate most or all pathogens. This is generally accomplished in these settings by the use of liquid chemical solutions such as a mixture of household bleach and water.
- **Sanitization** is not as strong as disinfecting, but still removes many pathogens, but is safe to use on surfaces used for food preparation.

### Cleaning and disinfection after persons suspected/confirmed to have COVID-19 have been in the facility

- It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left. If possible, wait up to 24 hours before beginning cleaning and disinfection.**
- Clean and disinfect all areas used by the ill persons, focusing especially on frequently touched surfaces. Continue to follow all cleaning and disinfecting recommendations provided below.

### Specific Guidance for Schools

Schools should clean and disinfect commonly touched surfaces as they normally would in the event of increased rates of influenza and other respiratory infections. However, in kitchens and food preparation areas, schools should sanitize food contact surfaces as usual and of course, follow guidance on exclusion of ill workers, proper and frequent handwashing and respiratory hygiene, which is true for all settings.

### Specific Guidance for Child Care Facilities

In child care facilities, we are recommending routine cleaning and sanitizing of kitchens and areas used primarily for food and bottle preparation. We recommend cleaning and disinfecting commonly touched surfaces. If toys children may mouth or table tops used for the service of food are disinfected, they should be rinsed and allowed to air-dry before being used or returned to use by children.

### Specific Guidance for Restaurants

Restaurants and other retail food establishments should continue routine cleaning and sanitizing of food preparation surfaces in the kitchen and other food storage areas. We are recommending routine cleaning and disinfecting commonly touched surfaces in the dining and customer areas. Detailed guidance on heightened cleaning and disinfecting practices for restaurants can be accessed at this link:

<https://drive.google.com/file/d/1UkYpBGNMdi7uhjeLYmfOxsX6GA0e0Yqu/view>

### Specific Guidance for Hotels

Hotels and other public accommodations cleaning rooms used by a known case or a quarantined or isolated individual should follow recommended CDC guidance: [Interim Guidance for Environmental Cleaning and Disinfection for U.S. Households with Suspected or Confirmed Coronavirus Disease 2019](#).

- It is recommended to close off areas used by the ill persons and wait as long as practical before beginning cleaning and disinfection to minimize potential for exposure to respiratory droplets. Open outside doors and windows to increase air circulation in the area. **Restrict access for two hours after the sick person has left.** If possible, wait up to 24 hours before beginning cleaning and disinfection.
- In areas where ill persons have visited or used, continue routine cleaning and disinfection as in this guidance

#### Care of the Environment

The information below has been modified for relevance. The complete guidance can be accessed at this

link:<https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html>

#	Recommendation	Category
IV.F.1.	Establish policies and procedures for routine and targeted cleaning of environmental surfaces as indicated by the level of patient contact and degree of soiling.	II
IV.F.2.	Clean and disinfect surfaces that are likely to be contaminated with pathogens, including those that are in close proximity to the patient (e.g., bed rails, over bed tables) and frequently-touched surfaces in the patient care environment (e.g., door knobs, surfaces in and surrounding toilets in patients' rooms) on a more frequent schedule compared to that for other surfaces (e.g., horizontal surfaces in waiting rooms)	IB

# **COVID-19 RISK ASSESSMENT QUESTIONNAIRE:**

*FOR CO-WORKERS OF A CONFIRMED POSITIVE COVID-19 EMPLOYEE*

*Note to interviewer: Maintain a distance of at least 6 feet when performing any interviews.*

The following questionnaire is designed to evaluate the potential risk to employees of COVID-19 exposure, based on CDC guidance and publications.

**Date of Review:** \_\_\_\_\_

**Name of employee:** \_\_\_\_\_

**Position / Shift** \_\_\_\_\_

**Name of interviewer:** \_\_\_\_\_

**Position:** \_\_\_\_\_

**Reference Date Ranges:** \_\_\_\_\_ (2 days before symptom onset to last date infected employee worked)

## **EXPOSURE ASSESSMENT QUESTIONS:**

Dates worked infected employee (within the reference date ranges):

What areas of the facility did you work while in the presence of the infected employee?

During the reference date range, estimate time spent in different proximity ranges to the infected person:

<b>PROXIMITY</b>	<b>EXAMPLES</b>	<b>TOTAL TIME SPENT (Minutes)</b>
Less than 12"	Talking into someone's ear in a noisy work area	
12" – 3 feet	Working side by side (close enough to touch). Face to face communication	
3 feet – 6 feet	Working in the same area, occasional work within 6 feet	
6 – 10 feet	Maintained standard for "social distancing". Break room or work area.	
Greater than 10 ft	Same room only	

Did the person sneeze or cough while in your presence?

Did they cover their cough?

When did it happen?

How close were you when it happened?

How many other people were within 6 feet when this happened?

Do you remember the names of those people (list)?

Did you make any physical contact, or share food and drink?

What kind of PPE were you wearing, if any, while being within 6 feet of the infected person?

Are you feeling ok or ill today?

## RISK ASSESSMENT SUMMARY

Note the best location on the risk chart based on the employee's interaction and duration of exposure with the infected person. Provide notes based on your determination for recommended action.

Exposure	Directly Coughed or Sneezed On	Cough or sneeze < 3 feet	Cough or sneeze < 6 feet	Distance < 3 feet	Distance < 3 feet	Side by Side (3-6 feet)	Social Distanced > 6 feet	Same room > 10 feet
Duration	Once or more	Once or more	Single Incident	Intermittent or > 5 min.	Single or < 5 min.	Any	Any	Any
Risk	<b>HIGH</b>	<b>HIGH</b>	<b>ELEVATED</b>	<b>ELEVATED</b>	<b>MEDIUM</b>	<b>MEDIUM</b>	<b>LOW</b>	<b>LOW</b>
Action	14 Days Off Work, Monitor	14 Days Off Work, Monitor	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	No Action	No Action

Interviewer Notes:

## Coronavirus Disease 2019

# COVID-19

### GUIDANCE FOR PLACES OF WORSHIP

For many of us, our faith and spiritual community are critical to our well-being, especially in a time of crisis. The Colorado Department of Public Health and Environment supports the necessary transition to electronic platforms during the COVID-19 pandemic.

In addition, places of worship with adequate parking lot resources may safely hold “drive-in” services as long as the following guidelines are followed at all times. Showing how we value the sanctity of life and are acting to reduce the spread of this deadly virus by being innovative in safely meeting, the pastoral and spiritual needs of Coloradans is the calling of this moment in time.

#### Guidelines for drive-in type venues (e.g., Easter or other large services for holidays)

- Practice the social/physical distancing requirements outlined below.
- Use electronics that attendees can have inside the car or use a radio channel to broadcast the audio and/or video.
  - If you will be providing devices, ensure they are cleaned and sanitized prior to passing them out.
  - It is preferable for attendees to use their own, personal devices for audio/video.
- Attendees need to stay in their vehicles and not socialize through their vehicle windows.
- Public restrooms must be cleaned and have signage posted that they should be used by only one person at a time. [Cleaning guidance](#).
- There should be no other opportunity for in-person interaction. Do not have food or beverage or any other services at the site. Do not make available gathering spaces at this location for attendees to gather outside of their vehicles.

#### General guidelines for broadcasting services with a crew of 10 or fewer people

(See [Public Health Order 20-24](#))

##### Follow all social/physical distancing requirements

- Direct those having symptoms of COVID-19-- as well as people who have had close contact with a person who has symptoms like dry cough, chest tightness, and/or fever-- to refrain from participating in any aspect of in-person services and stay at home at all times unless they need medical care.
- People must be at least 6 feet apart at all times while seated and standing.
  - Brainstorm virtual alternatives to handshaking, handholding, hugging, communion, passing the peace, etc.
  - Remember, the smaller the group, the larger the space, and the healthier the people are beforehand, the lower the risk of transmission.
- Those most at risk, including people over age 65 and anyone with a pre-existing immune or respiratory condition, are urged to remain home at all times unless they need immediate medical care.
- Consider providing hand sanitizer and tissues in convenient locations.

- Ensure attendees wear coverings (e.g., cloth mask or bandana) over their mouths and noses while attending services.
- Consider taking attendees' temperatures and asking about signs of illness before admitting them into the place of worship. Disallow individuals with elevated temperatures or signs of illness (coughing, runny nose, sneezing).

**Clean and disinfect all surfaces before and after any in-person gathering.**

- [Follow these guidelines.](#)

Change in Pulse Ox (PO)

## COVID-19: Extra Preventative Measures in Production Areas for Employee Safety

Begin the following simple steps immediately and continue until further notice:

- 1) Twice per shift, **floors** in all wet clean production areas and hallways with drains must be treated with either 100 ppm chlorine dioxide solution or 200-400 ppm quat solution, by misting or foaming.
  - a. Use pump up sprayers or foamers. Achieve complete coverage by lightly applying and allowing to air dry.
  - b. After allowing contact time and air drying up to one hour, remove any puddling or dry out any remaining wet areas by lightly squeegeeing or using disposable towels.
  - c. This measure is counter to our efforts to dry out the environment completely during production, but the exception is being made now for the sake of employee health. In between treatments we still need to dry out the environment as much as possible.
  
- 2) Twice per shift, hand-work areas and **High Touch surfaces** must be misted with 100 ppm chlorine dioxide or 200-400 ppm quat solution using spray bottles.
  - a. Spray bottles will need to be tagged with secondary container tags appropriate for the chemical solution being used.
  - b. Hand and High-touch surfaces include but are NOT limited to tables, keypad, HMI screens, handles, hand trucks, check-weights, etc.
  - c. **Mist, do not drench.** This application is in addition to any normal cleaning needed or regular treatments of these areas at beginning, end or throughout the shift.

*Also, increase frequency of dry cleaning and alcohol wiping high touch areas in our Dry Clean Only areas to at least twice per shift.*

- 3) Wipe down hand and high-touch surfaces in **production offices** using alcohol wipes or misting with 100 ppm chlorine dioxide or 200-400 ppm quat solution using spray bottles and then wipe clean/dry.
  - a. Minimally at the end of shift before leaving/handing off the area, but as needed – especially in areas utilized by multiple people throughout the shift.
  - b. Areas to be treated would include phones, radios, tables, keyboards, chairs, PPE, etc.
  - c. Implement a routine and frequency for alcohol mopping or mopping with 100 ppm chlorine dioxide or 200-400 ppm quat solution the office floors. Need to assess ability to dry out, floor construction, etc. and establish mop handling, storage, disposal rules.

## **Frequently Asked Questions: Enforcement of Public Health Orders**

### **What is a public health order?**

Under Colorado law, the executive director of the Colorado Department of Public Health and Environment (CDPHE) has the authority to close theaters, schools, and other public places. The executive director also may forbid gatherings of people, or may seek isolation or quarantine of individuals, when necessary to protect the public health, and to investigate and control the causes of epidemic and communicable diseases affecting the public health.

### **Why are public health orders important?**

The impact of a pandemic—such as that presented by COVID-19—can be best managed through limiting exposure to the virus. This imperative requires public health mandates that limit the situations where the virus can spread rapidly. By “social distancing,” and not operating establishments that bring people together, we will save lives, particularly of those most vulnerable to the virus, such as older residents.

### **What is Public Health Order 20-22?**

The executive director of CDPHE has issued Public Health Order 20-22 Closing Bars, Restaurants, Theaters, Gymnasiums, Casinos, Nonessential Personal Services Facilities, and Horse Track and Off-Track Betting Facilities Statewide to protect the public health and safety from the spread of COVID-19. Under Colorado law, it is unlawful for any person, association, or corporation to willfully violate, disobey, or disregard the provisions of the public health laws or the terms of this or any other public health order. The order went into full effect on March 19, 2020, and remains in effect until April 30, 2020, unless it is extended in writing by the executive director.

### **Are residents and businesses required to follow Public Health Order 20-22?**

Yes. Any person who violates the order may be subject to civil and criminal penalties. Violation of a public health order is a misdemeanor and can be punished by a fine of up to \$1,000 or up to one year in jail. Individuals who violate the order may also be responsible for some costs of the health agencies in abating the cause of sickness, and could have a state license—such as a restaurant or liquor license—revoked. Law enforcement has normal powers to address any criminal violations related to the order.

### **How can local law enforcement or local public health agencies enforce Public Health Order 20-22?**

Under Colorado law, counties and local public health agencies have the authority to administer and enforce the order. The State is recommending that local law enforcement and/or local public health agencies first reach out to the entity to seek voluntary compliance. However, local county attorneys or district attorneys can bring any civil or criminal action requested by the local public health director for a local violation of the order. A county attorney representing a local public health agency can seek a judge’s order in state court to force an individual or business to immediately comply with the order.

### **How can the State enforce Public Health Order 20-22?**

Under Colorado law, CDPHE has the authority to enforce the order. This may happen when a local public health agency is unable or unwilling to enforce the order. The Colorado Attorney General, representing CDPHE, can seek a judge’s order in state court to force an individual or business to immediately comply with the order or, where a district attorney is willing and able, can work with them to do so.

### **What can residents do if they suspect someone is violating Public Health Order 20-22?**

Residents should first contact their local public health agency to report any potential violations of the order. Residents may also file a report with the Attorney General’s Office at [covid19@coag.gov](mailto:covid19@coag.gov) if local law enforcement or a local public health agency is unresponsive.

Since COVID-19 is now circulating in communities across Colorado, all LTCFs should implement additional measures to prevent COVID-19 from entering the facility. Prevention measures should be implemented immediately to protect residents from possible COVID-19 infection. Rapid Response measures should be implemented immediately when even a single case of respiratory illness is identified in a resident.

## I. Prevention

Every LTCF should immediately implement the following:

### Restrictions for Visitors and Non-Essential Healthcare Personnel

- Post signage at the front entrance restricting visitors and non-essential staff.
- Restrict all volunteers and non-essential healthcare personnel from entering the facility.
- Restrict all visitation except for certain compassionate care situations, such as end of life situations. (See Public Health Order 20-20.)
  - All essential visitors must be screened when entering the building, to include fever, any respiratory symptoms or other symptoms of infection, and potential exposure to COVID-19.
  - All visitors should sign-in, including: name of visitor, resident that was visited, date of visit and time.
  - Visitors should perform hand hygiene and wear a facemask when entering the building.
  - Visitors should be limited to 2 persons for a resident.

### Monitor Staff and Residents for Fever and Symptoms of Respiratory Infection

- All staff should be screened at the beginning of their shift for fever (take temperature) or respiratory symptoms (shortness of breath, cough, sputum production, sore throat, rhinorrhea); consider also subjective fever, chills, myalgias, fatigue, anorexia, headache, diarrhea, nausea or vomiting. All staff should also be asked about close contact with ill persons.
- Any staff member with identified illness (as defined above) should immediately put on a facemask or use a tissue for source control and leave the facility. They should be excluded from work based on return-to-work criteria. <sup>1</sup>
- Any staff with an identified exposure to COVID-19 should undergo risk assessment and follow the CDC recommendations for monitoring and work restrictions. <sup>2</sup>
- Active monitoring of all residents should occur once daily to include temperature, heart rate, blood pressure, respiratory rate, pulse oximetry, changes in mental status, and any respiratory symptoms (shortness of breath, cough, sputum production, sore throat, rhinorrhea); consider also subjective fever, chills, myalgias, fatigue, anorexia, headache, diarrhea, nausea or vomiting.
- Reinforce sick leave policies. Remind staff not to report to work when ill with even mild symptoms.

### Social Distancing

- Restrict all residents to their rooms as much as possible, making sure residents remain safe and considering resident well-being and mental health. Try to keep residents within a unit, wing or floor when possible.
- If residents must leave their room, they should perform hand hygiene, limit their movement within the facility, and perform social distancing (stay at least 6 feet from others).
- All group activities should be cancelled.
- Communal dining should be cancelled unless assistance is required as part of the resident care plan. Residents requiring assistance with feeding should maintain a 6-foot distance from other residents during supervised meals and staff should perform hand hygiene when moving from one resident to another.

### Isolation Precautions

- Implement universal use of facemasks for all facility staff. Strongly consider extended use of facemasks when PPE supply in the community is limited.<sup>3</sup>

- Limit staff movement; cohort staff to a unit when possible, including across multiple shifts.
- Discourage staff from working in multiple facilities, when possible.
- Standard precautions should always be followed.
- Reinforce adherence to infection prevention and control measures, including hand hygiene and selection and use of PPE. Have healthcare staff demonstrate competency with putting on and removing PPE.
- Residents who must regularly leave the facility for care (e.g., hemodialysis) should wear facemasks when outside of their rooms including when outside of the facility.
- When possible, all long-term care facility residents, whether they have COVID-19 symptoms or not, should cover their noses and mouths when staff are in their room. Residents can use tissues for this. They could also use cloth, non-medical masks when those are available. Residents should not use medical facemasks unless they are COVID-19-positive or assumed to be COVID-19-positive.

### Communicate with Staff, Residents and Families

- Educate residents and families, including
  - Information about COVID-19
  - Actions the facility is taking to protect them and their loved ones, including visitor restrictions and how they can protect themselves.

### Supplies

- Ensure adequate hand hygiene supplies: Put alcohol-based hand sanitizer with 60-95% alcohol in every resident room (ideally both inside and outside of the room) and other resident care and common areas (e.g., in dining room at front entrance). Make sure that sinks are well-stocked with soap and paper towels for handwashing.
- Make necessary PPE available in areas where resident care is provided.
- Put a trash can near the exit inside the resident room to make it easy for staff to discard PPE prior to exiting the room, or before providing care for another resident in the same room.
- Ensure adequate supplies for respiratory hygiene and cough etiquette.
  - Make tissues and facemasks available for coughing people.
  - Consider designating staff to steward those supplies and encourage appropriate use by residents, visitors and staff.
- Assess current facility inventory of PPE. Facilities should have supplies of:
  - facemasks
  - respirators (if available and the facility has a respiratory protection program with trained, medically cleared, and fit-tested providers)
  - gowns
  - gloves
  - eye protection (i.e., face shield or goggles)
- Ensure adequate supplies and procedures for environmental cleaning and disinfection.

### Environmental Cleaning and Disinfection

- Ensure that all non-dedicated, non-disposable resident care equipment is cleaned and disinfected according to manufacturer's instructions after each use (e.g., thermometers, pulse ox, blood pressure cuffs, resident lifts) prior to use on additional residents.
- Use an EPA-registered, hospital-grade disinfectant to frequently clean high-touch surfaces and shared resident care equipment in addition to routine environmental cleaning. Refer to the EPA website for a complete list of approved disinfectants with an emerging viral pathogen claim: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>.
- Validate environmental services staff members processes: (1) Follow label instructions on the hospital grade disinfectant; (2) Validate disinfection policies and procedures (e.g., cleaning from clean to dirty, changing gloves and performing hand hygiene between rooms and between resident surfaces within the same room).

## II. Rapid Response

Additional measures to be implemented when suspected illness (fever or respiratory symptoms) is identified in even a single resident:

### Restrict New Admissions

- If you have one or more residents with fever or respiratory symptoms, do not admit new residents to the facility until an outbreak of COVID-19 has been ruled out and/or the outbreak is contained (14 days after the date of symptom onset of the last known case). (Under certain circumstances, admissions might be considered in consultation with public health.)

### Monitor Staff and Residents for Fever and Symptoms of Respiratory Infection

- Increase active monitoring of all residents to twice daily to include temperature, heart rate, blood pressure, respiratory rate, pulse oximetry, changes in mental status, and any respiratory symptoms (shortness of breath, cough, sputum production, sore throat, rhinorrhea); consider also including subjective fever, chills, myalgias, fatigue, anorexia, headache, diarrhea, nausea or vomiting.

### Social Distancing

- Restrict all residents to their rooms with the door shut to the extent possible, ensuring resident safety, well-being and mental health.
- If residents with fever or respiratory symptoms must leave their room, they should perform hand hygiene, limit their movement within the facility, perform social distancing (stay at least 6 feet from others), and should also wear a facemask or use tissues for source control.

### Isolation Precautions

- Restrict staff movement between areas of the facility with and without ill residents (which might be accomplished by cohorting staff to a unit across multiple shifts). Staff as much as possible should not work across units or floors. Facilities should also use separate staffing teams for COVID-19-positive residents to the best of their ability. The goal is to decrease the number of different staff interacting with each resident as well as the number of times those staff interact with the resident.
- Staff should follow standard, contact and droplet precautions (with eye protection) for any resident with fever, respiratory symptoms, or when COVID-19 is suspected.<sup>3,4,5</sup>
- Avoid transferring residents between different units. When designating separate units or facilities to care for COVID-19-positive residents and COVID-19-negative residents, it is recommended to consult with public health prior to moving residents.
- When EMS is activated, notify them that the facility is currently experiencing a suspected or confirmed outbreak of COVID-19 prior to their arrival so they may don appropriate PPE prior to resident contact.
- If transfer is medically indicated, inform the receiving facility that the facility is currently experiencing a suspected or confirmed outbreak of COVID-19 verbally in addition to written documentation prior to the arrival of the resident at the receiving facility.
- All visitors that must enter the facility (e.g., compassionate care) must wear appropriate PPE if visiting a resident with suspected or confirmed COVID-19 (e.g., gloves, gown, facemask and eye protection). In times of PPE shortages, prioritize a facemask.

### Testing

- When one or more residents are identified with fever or respiratory symptoms, collect nasopharyngeal specimens on symptomatic residents as early as possible in the course of illness. They should be tested for COVID-19 and influenza at a minimum; consider RSV and other respiratory viruses according to clinical suspicion. COVID-19 testing should not wait for results of other viral testing.

- Consider post-mortem testing on residents who die of respiratory illness or die unexpectedly when a suspected or confirmed COVID-19 outbreak is ongoing.
- Once COVID-19 has been detected in two or more residents on a unit, the facility can consider cessation of further testing on that specific unit. If residents on other units develop symptoms as described above, perform testing as listed above.

### Environmental Cleaning and Disinfection

- Limit shared medical equipment: dedicate equipment for residents with respiratory illness or elevated temperature when possible.

### Communication

- Communicate with staff, residents, and families about the suspected or confirmed COVID-19 outbreak, and steps the facility is taking to halt the outbreak. Confirmed outbreaks will be publicly reported by facility name by the state emergency operations center.

### Notify Public Health Immediately

- If you have a single suspected or confirmed case of COVID-19, or a suspected ( $\geq 2$  ill residents) or confirmed ( $\geq 2$  ill residents including  $\geq 1$  positive test) outbreak of COVID-19, report to public health immediately.

#### <sup>1</sup> Return-to-work criteria for healthcare personnel with identified illness:

##### *Test-based criteria:*

- o Resolution of fever without the use of fever-reducing medications AND
- o Improvement in respiratory symptoms (e.g., cough, shortness of breath) AND
- o Negative results of an FDA Emergency Use Authorized molecular assay for COVID-19 from at least two consecutive nasopharyngeal swab specimens collected  $\geq 24$  hours apart (total of two negative specimens)

##### *Non-test-based criteria:*

- o At least 3 days (72 hours) after recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath) AND
- o At least 10 days have passed since symptoms first appeared.

#### <sup>2</sup> Risk-assessment for healthcare personnel with an identified exposure to COVID-19:

- o CDC guidance for risk-assessment for healthcare personnel can be found here <https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-risk-assesment-hcp.html>.
- o Facilities could consider allowing asymptomatic healthcare personnel who have had an exposure to a COVID-19 resident to continue to work after options to improve staffing have been exhausted and in consultation with their occupational health program. These healthcare personnel should still report temperature and absence of symptoms each day prior to starting work. Facilities could have exposed healthcare personnel wear a facemask while at work for the 14 days after the exposure event if there is a sufficient supply of facemasks. If healthcare personnel develop even mild symptoms consistent with COVID-19, they must cease resident care activities, don a facemask (if not already wearing), and notify their supervisor or occupational health services prior to leaving work.
- o Healthcare personnel with known exposures to COVID-19 should also follow community-based restrictions, found here <https://www.cdc.gov/coronavirus/2019-ncov/php/public-health-recommendations.html>.

#### <sup>3</sup> PPE-sparing strategies:

- o See CDC PPE-sparing strategies for more information (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>).
- o CDC's optimization strategies for PPE offer options for use when PPE supplies are stressed, running low, or absent. Contingency strategies can help stretch PPE supplies when shortages are anticipated, for example if facilities have sufficient supplies now but are likely to run out soon. Crisis strategies can be considered during severe PPE shortages and should be used with the contingency options to help stretch available supplies for the

most critical needs. As PPE availability returns to normal, healthcare facilities should promptly resume standard practices.

- Sequence for proper donning and doffing of PPE: <https://www.cdc.gov/hai/pdfs/ppe/ppe-sequence.pdf>.

<sup>4</sup>CDC and CMS recommend that if COVID-19 transmission occurs in the facility, healthcare personnel should wear full PPE (gowns, gloves, facemask and eye protection) for the care of all residents irrespective of COVID-19 diagnosis or symptoms. When PPE shortages are present, this recommendation may be impractical for implementation by healthcare facilities, and PPE use should be prioritized for use with any resident with fever, respiratory symptoms, or when COVID-19 is suspected.

<sup>5</sup>Discontinuation of Isolation for Residents:

*Test-based criteria:*

- CDC recommends a test-based strategy for discontinuation of transmission-based precautions: Interim Guidance for Discontinuation of transmission-based Precautions and Disposition of Hospitalized Residents with COVID-19 (CDC).
  - Resolution of fever without the use of fever-reducing medications and
  - Improvement in respiratory symptoms (e.g., cough, shortness of breath), and
  - Negative results of an FDA Emergency Use Authorized COVID-19 molecular assay for detection of SARS-CoV-2 RNA from at least two consecutive nasopharyngeal swab specimens collected  $\geq 24$  hours apart (total of two negative specimens)

*Non-test-based criteria:*

- When testing is not available, CDPHE recommends a non-test-based strategy. Standard, Droplet, and Contact Precautions, including eye protection, should be maintained on residents with respiratory symptoms, regardless of testing results, until the following criteria are met:
  - At least 3 days (72 hours) after recovery defined as resolution of fever without the use of fever-reducing medications and improvement in respiratory symptoms (e.g., cough, shortness of breath); AND
  - At least 10 days have passed since symptoms first appeared.
  - Facilities may consult public health on a case by case basis as necessary for guidance regarding special populations (e.g., severely immunocompromised persons).

## COVID-19 and HIPAA: Disclosures to law enforcement, paramedics, other first responders and public health authorities

**Does the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule allow a covered entity to share the name or other identifying information of an individual who has been infected with, or exposed to, the virus SARS-CoV-2, or the disease caused by the virus, Coronavirus Disease 2019 (COVID-19), with law enforcement, paramedics, other first responders, and public health authorities without an individual's authorization?**

Yes, the HIPAA Privacy Rule permits a covered entity to disclose the protected health information (PHI) of an individual who has been infected with, or exposed to, COVID-19, with law enforcement, paramedics, other first responders, and public health authorities<sup>1</sup> without the individual's HIPAA authorization, in certain circumstances, including the following<sup>2</sup>:

- ***When the disclosure is needed to provide treatment.*** For example, HIPAA permits a covered skilled nursing facility to disclose PHI about an individual who has COVID-19 to emergency medical transport personnel who will provide treatment while transporting the individual to a hospital's emergency department. 45 CFR 164.502(a)(1)(ii); 45 CFR 164.506(c)(2).
- ***When such notification is required by law.*** For example, HIPAA permits a covered entity, such as a hospital, to disclose PHI about an individual who tests positive for COVID-19 in accordance with a state law requiring the reporting of confirmed or suspected cases of infectious disease to public health officials. 45 CFR 164.512(a).
- ***To notify a public health authority in order to prevent or control spread of disease.*** For example, HIPAA permits a covered entity to disclose PHI to a public health authority

---

<sup>1</sup> Under HIPAA, "public health authority" means an agency or authority of the United States, a State, a territory, a political subdivision of a State or territory, or an Indian tribe, or a person or entity acting under a grant of authority from or contract with such public agency, including the employees or agents of such public agency or its contractors or persons or entities to whom it has granted authority, that is responsible for public health matters as part of its official mandate. 45 CFR 164.501 (definition of "public health authority").

<sup>2</sup> The HIPAA Privacy Rule limitations only apply if the entity or individual that is disclosing protected health information meets the definition of a HIPAA covered entity or business associate. This guidance provides examples of disclosures from certain types of entities, some of which are covered by HIPAA, and others that may not be. While the entities in the examples are covered under HIPAA, the examples are not intended to imply that all public health authorities, 911 call centers, or prison doctors, for example, are covered by HIPAA and are required to comply with the HIPAA Rules.

(such as the Centers for Disease Control and Prevention (CDC), or state, tribal, local, and territorial public health departments) that is authorized by law to collect or receive PHI for the purpose of preventing or controlling disease, injury, or disability, including for public health surveillance, public health investigations, and public health interventions. 45 CFR 164.512(b)(1)(i); *see also* 45 CFR 164.501 (providing the definition of “public health authority”).

- ***When first responders may be at risk of infection.*** A covered entity may disclose PHI to a first responder who may have been exposed to COVID-19, or may otherwise be at risk of contracting or spreading COVID-19, if the covered entity is authorized by law, such as state law, to notify persons as necessary in the conduct of a public health intervention or investigation. For example, HIPAA permits a covered county health department, in accordance with a state law, to disclose PHI to a police officer or other person who may come into contact with a person who tested positive for COVID-19, for purposes of preventing or controlling the spread of COVID-19. 45 CFR 164.512(b)(1)(iv).
- ***When the disclosure of PHI to first responders is necessary to prevent or lessen a serious and imminent threat to the health and safety of a person or the public.*** A covered entity may disclose PHI to prevent or lessen a serious and imminent threat to a person or the public, when such disclosure is made to someone they believe can prevent or lessen the threat, which may include the target of the threat. For example, HIPAA permits a covered entity, consistent with applicable law and standards of ethical conduct, to disclose PHI about individuals who have tested positive for COVID-19 to fire department personnel, child welfare workers, mental health crisis services personnel, or others charged with protecting the health or safety of the public if the covered entity believes in good faith that the disclosure of the information is necessary to prevent or minimize the threat of imminent exposure to such personnel in the discharge of their duties. 45 CFR 164.512(j)(1).
- ***When responding to a request for PHI by a correctional institution or law enforcement official having lawful custody of an inmate or other individual,*** if the facility or official represents that the PHI is needed for:
  - providing health care to the individual;
  - the health and safety of the individual, other inmates, officers, employees and others present at the correctional institution, or persons responsible for the transporting or transferring of inmates;
  - law enforcement on the premises of the correctional institution; or
  - the administration and maintenance of the safety, security, and good order of the correctional institution.

For example, HIPAA permits a covered entity, such as a physician, located at a prison medical facility to share an inmate’s positive COVID-19 test results with correctional guards at the facility for the health and safety of all people at the facility. 45 CFR 164.512(k)(5).

**General Considerations:** Except when required by law, or for treatment disclosures, a covered entity must make reasonable efforts to limit the information used or disclosed under any provision listed above to that which is the “minimum necessary” to accomplish the purpose for the disclosure. 45 CFR 164.502(b).

In some cases, more than one provision of the HIPAA Privacy Rule may apply to permit a particular use or disclosure of PHI by a covered entity. The illustrative examples below involve uses and disclosures of PHI that are permitted under 45 CFR 164.512(a), 164.512(b)(1), and/or 164.512(j)(1), depending on the circumstances.

#### **ADDITIONAL EXAMPLES:**

- **Example:** A covered entity, such as a hospital, may provide a list of the names and addresses of all individuals it knows to have tested positive, or received treatment, for COVID-19 to an EMS dispatch for use on a per-call basis. The EMS dispatch (even if it is a covered entity) would be allowed to use information on the list to inform EMS personnel who are responding to any particular emergency call so that they can take extra precautions or use personal protective equipment (PPE).

**Discussion:** Under this example, a covered entity should not post the contents of such a list publicly, such as on a website or through distribution to the media. A covered entity under this example also should not distribute compiled lists of individuals to EMS personnel, and instead should disclose only an individual’s information on a per-call basis. Sharing the lists or disclosing the contents publicly would not ordinarily constitute the minimum necessary to accomplish the purpose of the disclosure (*i.e.*, protecting the health and safety of the first responders from infectious disease for each particular call).

- **Example:** A 911 call center may ask screening questions of all callers, for example, their temperature, or whether they have a cough or difficulty breathing, to identify potential cases of COVID-19. To the extent that the call center may be a HIPAA covered entity, the call center is permitted to inform a police officer being dispatched to the scene of the name, address, and screening results of the persons who may be encountered so that the officer can take extra precautions or use PPE to lessen the officer’s risk of exposure to COVID-19, even if the subject of the dispatch is for a non-medical situation.

**Discussion:** Under this example, a 911 call center that is a covered entity should only disclose the minimum amount of information that the officer needs to take appropriate precautions to minimize the risk of exposure. Depending on the circumstances, the minimum necessary PHI may include, for example, an individual’s name and the result of the screening.

Covered entities should consult other applicable laws (*e.g.*, state and local statutes and regulations) in their jurisdiction prior to using or making disclosures of individuals' PHI, as such laws may place further restrictions on disclosures that are permitted by HIPAA.

Information about HIPAA Privacy and COVID-19 is available at  
<https://www.hhs.gov/sites/default/files/february-2020-hipaa-and-novel-coronavirus.pdf>.

Information about disclosures of PHI to law enforcement officials is available in OCR's HIPAA Guide for Law Enforcement at  
[https://www.hhs.gov/sites/default/files/ocr/privacy/hipaa/understanding/special/emergency/final\\_hipaa\\_guide\\_law\\_enforcement.pdf](https://www.hhs.gov/sites/default/files/ocr/privacy/hipaa/understanding/special/emergency/final_hipaa_guide_law_enforcement.pdf).

Information about uses and disclosures of PHI for public health is available at  
<https://www.hhs.gov/hipaa/for-professionals/special-topics/public-health/index.html>.

## D 2020 042

### EXECUTIVE ORDER

#### **Extending Executive Order D 2020 015 Authorizing the Executive Directors of Certain State Agencies to Promulgate and Issue Emergency Rules Extending the Expiration Date of Licenses and Other Documents Due to the Presence of COVID-19**

Pursuant to the authority vested in the Governor of the State of Colorado and, in particular, pursuant to Article IV, Section 2 of the Colorado Constitution and the relevant portions of the Colorado Disaster Emergency Act, C.R.S. § 24-33.5-701 *et seq.*, I, Jared Polis, Governor of the State of Colorado, hereby issue this Executive Order extending Executive Order D 2020 015 authorizing the executive directors of certain State agencies to promulgate and issue emergency rules extending the expiration date of licenses and other documents for thirty (30) additional days due to the presence of coronavirus disease 2019 (COVID-19) in Colorado.

#### **I. Background and Purpose**

On March 5, 2020, the Colorado Department of Public Health and Environment's (CDPHE) public health laboratory confirmed the first presumptive positive COVID-19 test result in Colorado. Since then, the number of confirmed cases has continued to climb, and we have evidence of widespread community spread throughout the State. I verbally declared a disaster emergency on March 10, 2020, and on March 11, 2020, I issued the corresponding Executive Order D 2020 003, as amended by Executive Orders D 2020 018 and D 2020 032. On March 25, 2020, I requested that the President of the United States declare a Major Disaster for the State of Colorado, pursuant to the Stafford Act. The President approved that request on March 28, 2020.

My administration, along with other State, local, and federal authorities, has undertaken a wide array of actions to respond to and mitigate the effects of the pandemic, prevent further spread, preserve our healthcare resources, and provide needed flexibility to address the collateral consequences of the pandemic.

The economic impacts of COVID-19 are significant, and threaten to undermine the economic stability of many Coloradans and local businesses. The risk of contamination posed by COVID-19 has necessitated closure of multiple businesses. Employers and employees in virtually all sectors of the economy have been hit hard. We must take action to shore up economic security, employment, community cohesion, and community recovery.

This Executive Order extends Executive Order D 2020 015 for thirty (30) additional days.

**II. Duration**

Executive Order D 2020 015, as extended by this Executive Order, shall expire thirty (30) days from April 23, 2020, unless extended further by Executive Order. In all other respects, Executive Order D 2020 015 shall remain in full force and effect as originally promulgated.

GIVEN under my hand and the  
Executive Seal of the State of  
Colorado, this twenty third day  
of April, 2020

A handwritten signature in blue ink that reads "Jared Polis".

Jared Polis  
Governor

## D 2020 043

### EXECUTIVE ORDER

#### **Amending and Extending Executive Order D 2020 016 Temporarily Suspending Certain Regulatory Statutes Concerning Criminal Justice**

Pursuant to the authority vested in the Governor of the State of Colorado and, in particular, pursuant to Article IV, Section 2 of the Colorado Constitution and the relevant portions of the Colorado Disaster Emergency Act, C.R.S. § 24-33.5-701 *et seq.*, I, Jared Polis, Governor of the State of Colorado, hereby issue this Executive Order amending and extending Executive Order D 2020 016 which temporarily suspends certain regulatory statutes concerning criminal justice due to the presence of coronavirus disease 2019 (COVID-19) in Colorado.

#### **I. Background and Purpose**

On March 5, 2020, the Colorado Department of Public Health and Environment's (CDPHE) public health laboratory confirmed the first presumptive positive COVID-19 test result in Colorado. Since then, the number of confirmed cases has continued to climb, and we have evidence of widespread community spread throughout the State. I verbally declared a disaster emergency on March 10, 2020, and on March 11, 2020, I issued the corresponding Executive Order D 2020 003, as amended by Executive Orders D 2020 018 and D 2020 032. On March 25, 2020, I requested that the President of the United States declare a Major Disaster for the State of Colorado, pursuant to the Stafford Act. The President approved that request on March 28, 2020.

My administration, along with other State, local, and federal authorities, has taken a wide array of actions to mitigate the effects of the pandemic, prevent further spread, and protect against overwhelming our health care resources.

We must take action to minimize the duration of this epidemic and of the disruption to our daily lives. The virus that causes COVID-19 is spread primarily by close contact between people and through respiratory droplets when an infected person coughs or sneezes. Public health experts recommend we practice "social distancing," or maintaining a physical distance of six (6) feet or more from other people, as a way to slow the spread of COVID-19.

The potential spread of COVID-19 in jails and prisons poses a significant threat to prisoners and staff who work in those facilities, as well as the communities to which they return.

On March 25, 2020, I issued Executive Order D 2020 016, temporarily suspending certain regulatory statutes concerning criminal justice to provide the Colorado Department of

Corrections (DOC) with the discretion necessary to combat the spread of COVID-19 in State prisons.

Pursuant to Executive Order D 2020 016, DOC has implemented various measures and operational changes aimed at preventing the spread of COVID-19. To date, the State and DOC have been able to prevent the mass spread of COVID-19 in DOC facilities. Despite the State's success so far in safeguarding our detained and incarcerated populations, COVID-19 remains a significant health threat to offenders and staff, and DOC must take additional measures to prevent its spread.

This Executive Order amends and extends Executive Order D 2020 016 for an additional thirty (30) days and temporarily suspends additional statutes so that DOC can take further action to prevent the spread of COVID-19 in Colorado prisons.

## **II. Amendments**

Section II of Executive Order D 2020 016 is amended to include the following:

- I. I temporarily suspend the provisions of C.R.S. §§ 17-27.5-102(2) and (4) regarding the standards and criteria for intensive supervision programs and the notice requirement for placement of a nonparoled offender in an intensive supervision program. I direct the Executive Director of DOC to develop alternative standards and criteria for intensive supervision programs with the goal of expediting release of offenders pursuant to Executive Order D 2020 016. DOC shall provide notice of placement of a nonparoled offender in an intensive supervision program as soon as practicable.
- J. I temporarily suspend the provisions related to time credit deductions for offenders sentenced directly to a community corrections program in C.R.S. § 18-1.3-301(1)(i). The administrator of each community corrections program shall have discretion to make awards of time credit deductions to offenders as he or she deems necessary and appropriate to safely facilitate the reduction of the State's incarcerated population.

**III. Duration**

Executive Order D 2020 016, as amended and extended by this Executive Order, shall expire thirty (30) days from April 23, 2020, unless extended further by Executive Order. In all other respects, Executive Order D 2020 016 shall remain in full force and effect as originally promulgated.

GIVEN under my hand and the  
Executive Seal of the State of  
Colorado, this twenty-third  
day of April, 2020

A handwritten signature in blue ink that reads "Jared Polis".

Jared Polis  
Governor

## Data Statements

4/23/20

### Discrepancies between state and local data

- Colorado Department of Public Health and Environment's (CDPHE) dashboard displays preliminary case and fatality information. This data is reported into Colorado's Electronic Disease Reporting System (CEDRS) by a variety of agencies that are the original source of collecting the data:
  - Private labs
  - Public labs
  - Hospital infection preventionists
  - State and local public health officials
- Information on this dashboard may change as new or different information is discovered through case investigations performed at the local level. Therefore, numbers and information provided by local agencies may be more up-to-date than the statewide dashboard.

### Outbreak Data

- Outbreak data is reportable to public health from the following types of facilities:
  - Residential and non-hospital healthcare facilities
  - Correctional settings
  - Other settings (such as factories, workplaces with crowded work conditions, camps, schools, and childcare centers)
- Due to the large number of facilities, and the number of outbreaks at any given time, public health may not have the resources to update outbreak numbers on a daily basis. In addition, because facilities are focused on disease control measures during an outbreak, the number of cases reported for each facility may be incomplete until a final report is submitted by the facility at the end of the outbreak.

### Death Data

- There are currently two mechanisms for reporting COVID-19 deaths to the state. While reports are usually received within a few days of the date of death, neither process provides consistent same-day data.
  - First, when available, health care providers, coroners, and local public health provide information on the outcome of cases with COVID through CEDRS.
    - The date a death is reported may not be the same as the actual date of death.
  - Second, all deaths in Colorado, from all causes, are also reported through Colorado's vital records system through registration of death certificates.
    - The cause of death on a death certificate is assigned by the medical certifier, either a physician or coroner.
    - Vital Statistics conducts searches of deaths related to COVID-19 and reports those directly to the epi/surveillance team.

- It normally takes several days to complete an autopsy and register a death certificate.
- CDPHE has been working with other state partners to streamline the process of reporting the date of death in a timelier manner.

#### **Hospital and Recovery Data**

- Public health does not have the capacity to maintain individual contact with each person who may have had COVID-19 across the state. Instead, we rely on a broad network of individual health care providers and hospitals to report the data that shows up on our dashboard. Those sources are currently only reporting positive cases, hospitalizations, and deaths. It does not include people who may not have been tested and recovered at home.
- The Colorado Hospital Association has started reporting discharge data, this helps to provide a snapshot of people who have recovered from the most severe illnesses related to COVID-19.
- All hospital data is collected and maintained by the individual hospitals, and is shared in aggregate form by the state of Colorado in partnership with the Colorado Hospital Association. Our data sharing agreement with the hospitals does not permit the state to release facility-level data. For that information, you will need to contact the individual hospitals that maintain that data. For questions and more information, please contact the Colorado Hospital Association.

April 22, 2020

Dear Board of Health Members,

First, let me thank you for all of your support these last several weeks. The COVID-19 pandemic has been all-encompassing for me so this report will not reflect much more than that. Your emails, texts and phone calls have been appreciated and I hope if you have questions or concerns that you know you can call me at any time.

Second, I want to recognize the hard work of the NCHD staff. This response is truly a marathon and we could never have started this race without the heavy lifting done by Mike Burnett, Tammy Hort, and Michelle Pemberton. We started this journey the first week of March and then brought in the rest of the Incident Management Team on March 13 and have been at it ever since. The IMT staff are made up of a variety of employees and they have all risen to the challenge of taking on roles that they may or may not have practiced during annual exercises. And they just keep going. I am beyond proud of the people I work with.

COVID-19 response activities include but are not limited to:

- Case investigation, contact tracing, quarantine and isolation
- Coordination of ESF-8 duties, including receiving and distributing Strategic National Stockpile supplies
- Outbreak follow-up/investigation at Eben Ezer, Cargill, and Leprino
- Communication coordination—with partnering agencies, CDPHE, local media, state media, social media and website, information requests—Michelle and Mary have done an amazing job fielding the many media requests we have gotten
- Continuity of Operations—teleworking staff, schedule adjustments, remote delivery of services, Alli and Heather have put in so much work to keep our staff updated and prepared to answer questions—I've included a day's worth of communication for your review
- Countless remote meetings with a variety of participants—the planning section staff have done great work to get all of these meetings covered.
- EH staff, headed by Mel, have done amazing work to provide guidance to restaurants, golf courses, and other businesses while still continuing to provide routine EH services such as septic and water.
- Data collection—the COOP group is tracking all the calls that come in so we know if there are other topics that we need to provide more information about
- Adjusting payroll to accommodate the need for staff to access the Emergency Leave as described in the Families First Coronavirus Response Act. Janelle and Penny have worked hard to figure out what is required since the Act was pushed out without much guidance at all. I've included the document we are using for our staff to access this leave benefit.
- Reopening Colorado—this has been the topic of several calls and webinars. Hopefully we will be able to figure out what works in NE Colorado and be able to find that balance. I think we are still going

*- Serving Logan, Morgan, Phillips, Sedgwick, Washington and Yuma counties since 1948 -*

to see increases in cases in our region because testing has been so limited, but we are hoping to increase capacity with our health provider partners in the next week or two.

If there are non-COVID-19 topics you need information on, please let me know.

Thank you for your support of the work we do.

Sincerely,

Trish McClain

**Department of  
Regulatory Agencies**

## **Department of Regulatory Agencies (DORA) Guidance on Critical vs. Non-Critical Business Professions**

Please consult the following lists for guidance concerning the “critical” versus “non-critical” designations of DORA-regulated professions and services in light of the COVID-19 crisis. Once you have located your professional license type, we encourage you to read any associated Executive or State-Issued Public Health Orders for further direction, and to be aware of the Statewide [“Stay-at-Home” Order](#) issued by Governor Jared Polis, effective March 26 through April 11, 2020, as well as any county or city specific health or “stay-at-home” orders. Other COVID-related communications and notifications, separated by profession, can be found on [DORA’s website](#).

**“Critical Professions” Under DORA’s Purview (Note: The following professions must still adhere to the mandates in [Executive Order D 2020 009](#) prohibiting elective, non-emergency procedures\*\*, as well as the social distancing requirements in [Amended Public Health Order 20-24](#), and apply [telehealth practices](#) as recommended by the Colorado Department of Public Health and Environment (CDPHE) where possible):**

- Acupuncture (ONLY if providing services through a medical office or practice *and* if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Addiction Counselor
- Advanced Practice Nurse
- Anesthesiologist Assistant
- Athletic Trainer (ONLY if providing services through a medical office or practice *and* if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Audiology
- Certified Nurse Aide
- Chiropractic (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Dental (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Direct-Entry Midwife
- Hearing Aid Provider (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Licensed Practical Nurse
- Marriage and Family Therapy

- Massage Therapy (ONLY if providing services through a medical office or practice *and* if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Medical
- Naturopathic Doctor (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Nursing
- Nursing Home Administrator
- Occupational Therapy (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Optometry (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Osteopath
- Pharmacist
- Pharmacy Intern
- Pharmacy Technician
- Physical Therapy (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Physician
- Podiatry
- Professional Counselor
- Psychology
- Psychiatric Technician
- Registered Psychotherapy
- Respiratory Therapy
- Social Work
- Speech-Language Pathology (ONLY if adhering to Executive Order D 2020 009 prohibiting elective procedures)
- Surgical Assistant and Surgical Technology
- Veterinary

**\*\*Note:** Rural and critical access hospitals are exempt from this Order, but are strongly advised to comply on a voluntary basis. Rural and critical access hospitals are, however, directed to comply with CDC guidelines for PPE preservation. Please refer directly to the order for further clarification in this area.

**Non-Critical Personal Services Professions (Must adhere to the mandates in [Public Health Order 20-22](#) regarding cessation of business activity, whether operating out of a business or a home):**

- Acupuncture (operating in a NON-medical practice)
- Athletic Trainer (operating in a NON-medical practice)
- Barber

- Cosmetologist
- Cosmetology Salon
- Dental Hygienist
- Esthetician
- Hair Stylist
- Massage Therapist (operating in a NON-medical practice)
- Nail Technician

**Critical, Non-Healthcare-Related Services Professions (Allowed to Operate in Compliance with [Executive Order D 2020 013](#) and [Amended Public Health Order 20-24](#)):**

- Appraisal Management Company
- Architect (if role cannot be performed remotely)
- Accountancy Firm
- Accountant (if role cannot be performed remotely)
- Bail Bonding Agents
- Banks
- Call and Demand Transportation Service (depending on need)
- Community Association Manager (if role cannot be performed remotely)
- Credit Unions
- Electrical Apprentices
- Electrical Contractors
- Electricians
- Electric Utilities
- Fire Crew Transport
- Funeral Home and Crematory
- Gas Pipeline Safety
- Hazardous Materials
- Homeowners Association
- Household Goods Movers (depending on nature of the job)
- Insurance Agents (Producers) (if role cannot be performed remotely)
- Insurance Companies
- Insurance Intermediaries (Public Adjusters) (if role cannot be performed remotely)
- Investment Adviser
- Investment Adviser Representative (if role cannot be performed remotely)
- Medicaid Client Transportation
- Money Transmitters
- Mortgage Broker Dealer
- Mortgage Loan Originator
- Natural Gas

- Nontransplant Tissue Banks
- Plumber
- Plumber Contractor
- Professional Engineer (if role cannot be performed remotely)
- Professional Land Surveyor (if role cannot be performed remotely)
- Rail
- Real Estate Appraiser
- Real Estate Broker (if role cannot be performed remotely)
- Savings and Loan Association
- Securities Broker Dealer
- Securities Sales Representative (if role cannot be performed remotely)
- Shuttle Service (with limits)
- Single Trip Hazmat
- Steam
- Taxi
- Telecommunications
- Title Insurance
- Tow Trucks
- Towing Carrier
- Transportation Network Company
- Trust Company
- Water Conditioning Contractor, Installer, and Principal
- Water Utilities
- Wholesale Drug Outlet

**Non-Critical Services Professions (Subject to [“Stay-at-Home” Order](#) as of March 26, 2020):**

- Boxing Official
- Boxing Promoter
- Combative Sports (see also [Public Health Order 20-23](#))
- Charter Scenic Buses
- Charter Services
- Children’s Activity Buses
- Electrical Apprentice
- Fantasy Contest
- Kickboxer
- Kickboxing Official
- Land Surveyor Intern

- Luxury Limousines
- Mixed Martial Arts Contestant
- Off Road Charter
- Outfitter
- Passenger Tramway
- Plumbing Apprentice
- Preneed Contract Seller (Funeral)
- Private Investigator
- Subdivision Developer

## WELCOME TO YOUR LOCAL PUBLIC HEALTH CLINIC

We're excited to help you today. Because there are cases of COVID-19 in our area we're doing things a little bit differently.

We're asking everyone to wear a face mask.

We've moved some services over the phone so fewer people have to come inside the clinic.

We clean our lobby and exam rooms more frequently.

We're asking everyone questions about their health history.

### YOUR HEALTH HISTORY

Answer yes or no to the following questions about your health:

YES NO

Within the last two weeks (14 days), have you been contacted by your employer and told that you were exposed to a co-worker that has tested positive?

Within the last two weeks (14 days), have you been contacted by the local health department and advised that you have tested positive for COVID-19?

Within the last two weeks (14 days), have you been asked to self-quarantine due to an exposure to COVID-19?

Have you been asked to stay at home from work because of any illness within the two weeks?

Answer yes or no to the following questions about the health of someone you live with (Spouse, roommate, family member, etc.):

YES NO

Within the last two weeks (14 days), has someone that you live with tested positive for COVID-19?

Within the last two weeks (14 days), has someone that you live with been contacted by the local health department or doctor and was informed that they tested positive for COVID-19?

Within the last two weeks (14 days), has someone that you live with been asked to stay at home from work because of any illness that has flu or cold like symptoms?

Thanks for answering our questions. A nurse will help you shortly.

SERVING LOGAN, MORGAN, PHILLIPS, SEDGWICK, WASHINGTON AND YUMA COUNTIES SINCE 1948

Sterling, Colo. – March 31, 2020: As the COVID-19 pandemic continues, the national focus becomes concerned with the food supply chain. Having multiple critical businesses that are associated with national food processing in our 6 county health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with each facility to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the for-front of state and national concerns is Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, County Health Director, Trish McClain praised facility management on the unprecedented processes and procedures that are in place to keep product and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes even more important are their lives,” expresses Trish “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The report identifies that Cargill is proactively applying Centers for Disease Control guidance for employee face covering, added cleaning measures, personal protection equipment usage and social distancing. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“Cargill is an international corporation with locations world-wide, including Wuhan, China. We have learned a lot of lessons from experiences they had in other parts of their business and other parts of the world.”, **says Daniel Sullivan [title]** “Those successes have rapidly been implemented in our Fort Morgan facility to assist the safety of our workers. Industry confidentiality does not include food or employee safety, so we are eager to share these practices with other companies.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our 6 county health district, including Fort Morgan and the surrounding communities where Cargill employees shop and live. No matter the measures taken, exposure to Cargill employees is inevitable and today, the state has listed that location as an “Outbreak” facility. As of today NCHD, in cooperation with Cargill, has been notified of \_\_\_ positive

results for employees and have placed \_\_\_\_ employees on isolation based on symptoms reported or assessed during their screening process. Cargill has also placed \_\_\_\_ employees in quarantine because of potential exposure either at the plant or during carpooling.

“All these modification and procedures are established in the hope that the plant can safely remain open, with two key reasons to keep it going - one to ensure the food supply chain remains healthy and secondly to keep our members employed.” **States XXXX, Cargill Employee**

Eben Ezer continuará monitoreando y cumpliendo con las recomendaciones establecidas por los Centros para el Control de Enfermedades (CDC). Estamos orgullosos de nuestra reputación positiva en la comunidad a la que servimos y brindamos a nuestros adultos mayores la atención y los servicios de calidad que se merecen y esperan de nosotros. Continuaremos proporcionando actualizaciones regularmente a nuestra comunidad Eben Ezer. Para obtener más información, comuníquese con Shelly Griffith al 970-842-2861, ext 9212.

NEWS RELEASE

FOR IMMEDIATE RELEASE

CONTACT: Shelly Griffith, CEO

PHONE: 970-842-2861, extension 9212

Cases of COVID-19, the illness resulting from the novel coronavirus, have been diagnosed at our Eben Ezer community. The affected neighbors are in quarantine in our cluster neighborhood. In order to protect the privacy of our neighbors, identifying information and medical records will not be released to the public. We have notified public health officials as required and are following procedures recommended by the Centers for Disease Control & Prevention. We are taking every step as recommended by authorities to contain the spread. We want to make neighbors, their families, and our dedicated staff aware of this situation and reassure everyone that we are on top of it. Developments are changing day by day, minute by minute. Our focus remains on the health and well-being of our community. We must also recognize our team for the concern and commitment they have shown to our neighbors during this challenging time. Our mission has never been more meaningful.

Eben Ezer, the Colorado Department of Public Health & Environment (CDPHE), Northeast Colorado Health Department and partnering agencies are working diligently to ensure ill patients are receiving appropriate care and measures are being taken to limit further spread of disease. Proactive efforts are focused on identifying, isolating and testing all of those who may be at risk.

“Eben Ezer has notified our neighbors, families and team members of the current situation. We began restricting visitors to the campus on March 11<sup>th</sup> with full restriction put into effect March 13<sup>th</sup> to protect the health of the residents and health care workers at our community. We have tested 7 of our neighbors for COVID-19 of which 6 came back positive. Prior to this incident and ongoing, we have been following all CMS, CDC and state and local health department guidelines concerning COVID-19. Our team members have been and will continue to be screened when they arrive to work, including checking temperature, to ensure no additional sickness is brought into our buildings. If they have a fever over 100.4 they are sent home and asked to contact their primary care physician. Our team members are being diligent on practicing proper hand washing and the use of personal protective equipment. All staff have received recurring education on these practices,” says Shelly Griffith, Eben Ezer CEO.

Eben Ezer is not the first long term care community in the state to have a confirmed case. We need your help in battling this virus, we ask our larger community to continue to adhere to the Stay at Home order. Thank you all for your support and assistance as we work to combat the spread of this virus.

Eben Ezer will continue to monitor and adhere to the recommendations set forth by the Centers for Disease Control (CDC). We are proud of our positive reputation in the community we serve and provide our senior adults the quality care and services they deserve and expect from us. We will continue to provide updates regularly to our Eben Ezer community. For more information, please contact Shelly Griffith at 970-842-2861, ext 9212.

Eben Ezer will continue to monitor and adhere to the recommendations set forth by the Centers for Disease Control (CDC). We are proud of our positive reputation in the community we serve and provide our senior adults the quality care and services they deserve and expect from us. We will continue to provide updates regularly to our Eben Ezer community. For more information, please contact Shelly Griffith at 970-842-2861, ext 9212.

###

## Long Term Care Facility Outbreak Definitions

- **Respiratory illness:** [Fever (>100° F)] OR [lower respiratory illness (new cough or shortness of breath)]

*NOTE: When COVID-19 is detected in the surrounding community of the LTCF, a high index of suspicion should be maintained. The medical director or local public health agency might consider loosening the respiratory illness case definition to account for upper respiratory symptoms in an outbreak highly suspected of being due to COVID-19 in which residents have a broader array of symptoms or signs (see [Interim Clinical Guidance for Management of Patients with Confirmed Coronavirus Disease \(COVID-19\)](#) (CDC) for updated information on clinical presentation of COVID-19).*

- **Suspected COVID-19 outbreak:** Two or more cases of respiratory illness in residents with symptom onset within a 14 day period without a positive test for COVID-19. During the time when COVID-19 is circulating locally, the occurrence of acute febrile respiratory illness in several residents within a short time frame should be considered highly suspect for COVID-19 until proven otherwise.
- **Confirmed COVID-19 outbreak:** Two or more residents with new lab-confirmed diagnoses of COVID-19 by an FDA-approved COVID-19 test within a 14-day period,  
-OR-  
Two or more cases of respiratory illness in residents with symptom onset within a 14 day period and at least one resident with a new diagnosis of COVID-19 by an FDA-approved COVID-19 test.†

\* Long-term care facility includes nursing homes, assisted living facilities and residences, skilled nursing facilities and other residential settings

† Excluding residents with a diagnosis of COVID-19 known at time of admission to the facility.

Date of report:

State-assigned Outbreak #:

## Facility Information

Facility name:	Eben Ezer Lutheran Care Center			Type of long-term care facility (check only one):
Address:	122 Hospital Road			<input type="checkbox"/> Skilled nursing <input type="checkbox"/> Assisted living <input checked="" type="checkbox"/> Combined care
City:	Brush	Zip:	80723	<input checked="" type="checkbox"/> Other: independent living apts on campus
County:	Morgan			Name of reporter:
Phone 907-842-2861	Email:	sgriffith@ebenezer-cares.org		Tammy Hort, RN, CIC
				Title:

## Outbreak Information

### Residents

Number of residents in facility:	98		
Number of residents with respiratory illness (using definition above):	1		
Date of first symptom onset in a resident with respiratory disease:	4/4/2020		
Number of residents tested for COVID-19:	7	Number of residents positive for COVID-19:	6
Number of residents tested for influenza:	0	Number of residents positive for influenza:	0
Number of residents tested for RSV:	0	Number of residents positive for RSV:	0
Number of residents tested for other viral pathogens (e.g., with respiratory panels or other testing)	Number of residents with other respiratory pathogens identified (use comment box below to describe pathogens identified):		
If specimens have been sent for COVID-19 testing, which laboratories are performing testing?			
<input type="checkbox"/> CDPHE <input type="checkbox"/> Trident/Schryver <input checked="" type="checkbox"/> Quest <input type="checkbox"/> LabCorp <input type="checkbox"/> Other:			
Number of residents hospitalized:	0		
List hospitals where patients have been transferred:	3/30/2020		
Number of deaths:	0		
Comments (provide any other information regarding resident illness)			
low grade temps and nausea in 5 resident located same neighborhood, 1 resident in different neighborhood with temp and cough			

# COVID-19 Outbreak Report Form for Long Term Care Facilities

## Outbreak Information

### Staff

Number of staff in facility:	250		
Number of staff with respiratory illness (using definition above):	10		
Date of first symptom onset in a staff member with respiratory disease:	3/30/2020		
Number of staff tested for COVID-19:	5	Number of staff positive for COVID-19:	1
Number of staff tested for influenza:	0	Number of staff positive for influenza:	0
Number of staff tested for RSV:	0	Number of staff positive for RSV:	0
Number of staff tested for other viral pathogens (e.g., with respiratory panels or other testing)		Number of staff with other respiratory pathogens identified (use comment box below to describe pathogens identified):	
If specimens have been sent for COVID-19 testing, which laboratories are performing testing?			
<input type="checkbox"/> CDPHE <input type="checkbox"/> Trident/Schryver <input checked="" type="checkbox"/> Quest <input type="checkbox"/> LabCorp    Other:			
Number of staff hospitalized (if known):	0		
List hospitals where patients have been transferred:			
Comments (provide any other information regarding staff illness)			
1 positive staff member positive, couple with pending tests and couple with medical evals scheduled.			

Date of symptom onset/detection for the first case of COVID-19 during the outbreak: 4/4/2020

Status of outbreak (see definitions above; check only one):     Suspected COVID-19 outbreak     Confirmed COVID-19 outbreak

Comments:

Eben Ezer Community spread is evident in Morgan county. One resident hospitalized with a non-respiratory medical issue. Eben Ezer response has been well managed and according to guidelines.

Contact your local public health department or the Colorado Department of Public Health and Environment with questions about COVID-19.

To report a suspect or confirmed outbreak in a long-term care facility, complete this form and send it to your local health department or CDPHE via secure email to [CDPHE\\_HAIOutbreak@state.co.us](mailto:CDPHE_HAIOutbreak@state.co.us).

## **HIPAA Notice**

It is the intention of the Northeast Colorado Health Department (NCHD) to ensure the confidentiality and integrity of protected health information of both patients and employees, as required by HIPAA, professional ethics, accreditation standards, licensure requirements, and any other legal requirements. Employee/student/volunteer are expected to follow NCHD's policies, guidelines and standards for workforce performance expectations which are mandated by HIPAA. Violation of these rules and standards will constitute grounds for disciplinary actions up to and including termination, professional discipline and criminal prosecution.

Employees are required to comply with all relevant standards, including the following:

- An employee must not review employee or patient protected health information for any purpose other than treatment, payment or health care operations, and only with a legitimate need to know such information.
- An employee/student/volunteer must not disclose to others employee's patient protected health information for any purpose other than treatment, payment or health care operation, and only with the other having a legitimate need to know such information.
- An employee/student/volunteer must not discuss a patient's protected health information in a public area or outside of the agency's premises.
- An employee/student/volunteer must secure protected health information to avoid inadvertent disclosure.
- An employee/student/volunteer must not intentionally access or disclose protected health information in a manner inconsistent with NCHD policies and procedures, for personal gain, curiosity, concern or any other reason not permitted by HIPAA.
- An employee/student/volunteer must report to his or her supervisor their knowledge of any breach in HIPAA confidentiality standards.

I understand that my personal access code, user ID, access key, password and similar access information will be kept confidential at all times. I understand that I will not remove from NCHD any devices or media unless instructed or authorized to do so. I agree to return all means of access to PHI upon termination of my employment with NCHD.

I understand that my obligations will survive the termination of my employment or end of my affiliation with NCHD and its clients, regardless of the reason for such termination. I understand that my obligations extend to any PHI that I may acquire during the course of my employment or affiliation with NCHD or its clients, whether in oral, written or electronic form and regardless of the manner in which access was obtained.

NCHD will not take disciplinary action against any employee/student/volunteer who makes an internal complaint, participates in an investigation, or makes a disclosure to a federal or state oversight agency or public health authority authorized by law to oversee the relevant conduct of NCHD or to an appropriate health care accreditation organization, when the employee is acting in good faith on the belief that NCHD has engaged in conduct that is unlawful or otherwise violates professional or clinical standards.

*- Serving Logan, Morgan, Phillips, Sedgwick, Washington and Yuma counties since 1948 -*

I \_\_\_\_\_ acknowledge my understanding of my duties as set forth herein. I further understand that these duties apply during work hours and during off duty time. *I further understand that these duties and standards apply even after the termination of my employment with NCHD.* I understand that my failure to comply with these standards during my employment may result in disciplinary action, civil liability, and/or criminal prosecution. I understand that my failure to comply with these standards after my employment ends may result in civil liability and/or criminal prosecution.

## ESF8 COVID 19 UPDATE

March 23, 2020 1300

WebEx Call

### Colorado Plains Medical Center

- No visitors being allowed in at this time. Patients at end of life will be addressed individually.
- PPE: supply is holding, getting low on masks.
- Currently have available ICU beds.
- Screening all entrants to hospital (staff, patients, visitors)
- No Alternate Care Sites at this time.
- Staffing is appropriate.

### East Morgan County Hospital

- No visitors being allowed at this time.
- PPE: gowns are greatest need.
- NCMC ICU is full, most are Covid 19 patients.
- Looking at Alternate Care Sites for all Banner Health facilities; this includes ICU beds, will expand to all licensed beds first, then into nopathient care areas, and finally an actual alternate care site.

### Valley View Villa

- No visitors.
- Not allowing any outside services at all.
- No shared staff or services allowed at this time.
- Have established an isolation unit for clearance of patients returning to facility (will require 14 days).
- PPE: no issues at this time.
- Screening staff prior to start of work shift.
- Staffing is adequate at this time.

### Eben Ezer Lutheran Care Center

- No visitors.
- One location for all delivery drops.
- Universally screening all entrants to facility.
- Completing vital signs and respiratory assessments on all residents.
- Have established an isolation unit for returning patients (will require 14 days).
- PPE: very limited supplies at this time.
- Staffing: no daily issues.

### Morgan County Ambulance Service

- Screening by dispatch and with initial patient contact.
- Will initiate a "no transport" protocol (screen patient before bringing them into the facility) sometime this week.
- PPE: no issues at this time.
- Staffing: no issues at this time.

- Currently not doing transfers (hospital to hospital) for Covid 19 positive patients. Will look at getting one of the ambulances set up for this.

#### Brush School District

- Working to dispense necessary supplies and equipment for remote learning.
- Delivery meals now, started this week.

#### NECHD

- Press release regarding positive patients and results will come from NECHD; this includes the entire six county region.
- Expecting shipment of PPE from National Stopile.
- RTP site is in Sterling.
- Emergency declaration has been completed.

It was the consensus of the group on the call that weekly updates are helpful. S. Bass will send out an updated invite with the call number.

**ESF8 COVID 19 UPDATE**  
**March 30, 2020 1300**  
**WebEx Call**

Morgan County Emergency Management:

- Keeping Commissioners updated on events within the county.
- Looking at plans for Alternate Care Sites locally.
- Follow up with schools
- Checking with first responders to insure PPE needs are met.

Northeast Colorado Health Department:

- Working on setting up a complaint line for the public regarding the Stay at Home order on the website.
- Looking at law enforcement abilities and enforcing the order.
- Working with logistics to fill orders.
- Fielding calls and questions.
- No new cases right now.
- There will be a press release today on the Stay at Home order.

DHSEM:

- Monitoring the region (11 counties).
- Assist as needed at the local levels.
- Noted there should be a shipment of PPE within the next two weeks.
- Priority: surge planning.

Morgan County Ambulance Service:

- Have seen a drop in volume of calls.
- Current supply of PPE is holding.
- Trying to keep informed.

NERETAC:

- Has posted a contact list of all licensed ambulance agencies on website.
- Collecting Emergency Management preparedness list for hospitals for the website also.
- Has also posted some best practices to website.
- Looking at shortage of PPE.
- Will be offering a basic vent class this week and an advanced class next week.
- Surge planning.

Colorado Plains Medical Center:

- Still working to decrease the turnaround time for results for COVID 19 PUI.
- PPE supplies are holding.
- Working on surge capacity, will focus on internal capacity first.

East Morgan County Hospital:

- Staffing and supply levels okay.
- Census is down, volume is down.
- Will exhaust all resources on campus first before looking at ACS.
- First draft of surge plan has been sent to Banner for review.

Valley View Villa:

- Holding steady.
- Have one test out.

Eben Ezer:

- No new restrictions.
- New admits are being isolated.
- PPE supply is still tight.

Sunset Manor:

- No visitors.
- No symptomatic patients at this time.
- PPE: working through their corporate office to obtain adequate supplies, able to obtain them right now.
- Staffing: using agency staffing right now.

Brush School District:

- No PPE to share.
- Currently delivering 1160 meals/day.
- Trying to get mental health info out to everyone.

Salud:

- Using telehealth to see patients.
- Being very careful with their PPE.

Red Cross:

- Currently planning to do virtual case work.
- Will be using motel accommodations instead of setting up shelters.

**ESF8 COVID 19 UPDATE**  
**April 6, 2020 1300**  
**WEBEX**

**MORGAN COUNTY EMERGENCY MANAGEMENT**

- Status quo right now.
- State would like all facilities to update EMResource daily.

**NORTHEAST COLORADO HEALTH DEPARTMENT**

- There were 22 positive tests in Morgan County as of this morning.
- The State is requesting both daily and the weekly updates in EMResource, as they are using this information for state planning.

**CENTENNIAL MENTAL HEALTH**

- CMH will be starting a community support line tomorrow through FaceBook and their website.
- Also working on resources for first responders.
- Continue to shift to telehealth for all visits and patient support.

**DHSEM**

- One member of UC has tested positive for Covid 19.
- All staff are masked in the command center now.
- Waiting for the lease for The Ranch in Larimer County. This will be used as an alternate care facility for 100-1000 beds.
- Continue to monitor 213 requests.

**MORGAN COUNTY AMBULANCE SERVICE**

- Doing well right now.
- Call volume (normal) has increased slightly.
- PPE supplies are good.

**RED CROSS**

- Continue with virtual casework.

**COLORADO PLAINS MEDICAL CENTER**

- PPE supplies are holding.
- Have gone to universal masking; HCW have been masked since 3/16/20.
- Continue to work with corporate on finalizing surge plans – contingency and crisis, in conjunction with state guidance.
- Staffing is stable.
- Have seen an increase in positives through the ED, as well as increased admissions.

**EAST MORGAN COUNTY HOSPITAL**

- Have seen an increase in testing volume as well.
- Currently three patients in house, one positive, two PUI
- Two transfers this weekend.
- Social masking, N95s on clinical staff.
- Finalized surge plan.

**VALLEY VIEW VILLA**

- Universal masking.
- PPE supplies holding.
- All new admissions quarantined for 14 days.
- Staffing okay, some struggles with nursing.
- Had a state Infection Control survey, zero deficiencies. (CONGRATULATIONS!!!)

**EBEN EZER LUTHERAN CARE CENTER**

- Universal masking.
- Staffing stable.
- PPE is limited.
- All new admissions quarantined for 14 days.
- No positive cases.

**SUNSET MANOR**

- Universally masking.
- All admissions quarantined for 14 days.
- No positive cases in staff or residents.
- PPE holding, could use gowns.

**BRUSH SCHOOL DISTRICT**

- Working on alternate graduation plans.
- Continue to deliver meals.
- Still reaching out to students for remote learning.

**OTHER:**

- Shelter in Place Order: Unsure if this will be extended or not, expect further information during Governor Polis's news conference this evening. Do fully expect it to be extended through April 30<sup>th</sup>, given the surge in cases.
- The Ranch: Will be set up by the Army Corp of Engineers and staffed by state and federal, including equipment and personnel. Range of 100-1000 beds.

# Cubre bocas en el servicio alimentario

## Guía de consulta rápida

La orientación científica sigue evolucionando acerca del uso de cubrebocas para el público en general, incluyendo el consejo reciente que es posible que cualquier tipo de cubrebocas podría brindar cierto nivel de protección. Si lo desea, puede llevar uno en un establecimiento de alimentos. Debe igualmente seguir cumpliendo con todas las normas estatales y locales.

### El cubrebocas de tela DEBE:

- Estar limpio y en buena condición
- Ser cómodo, pero ajustado contra la forma de la cara
- Estar bien fijado
- Incluir múltiples capas de tela
- Permitir la respiración sin restricción
- Ser de una tela que se pueda lavar y secar a máquina

### El cubrebocas NO DEBE:

- Tener cualquier material colgante que pudiera crear un peligro de inocuidad alimentaria
- Tener ningún agujero o rasgadura

### Almacenamiento del cubrebocas de tela

- Almacenar con los artículos personales si no lo lleva puesto
- Lavar a diario
- No compartir con otros

### ¿Cómo llevar un cubrebocas de tela?

- Lavarse las manos antes y después de ponerse el cubrebocas
- No tocar el cubrebocas hasta quitárselo
- Colocarlo de tal manera que evite la necesidad de ajustarlo o tocarse la cara
- Si se ensucia o es difícil de respirar, debe quitárselo y no volver a ponérselo hasta lavarlo
- Quitarlo para comer y beber y si aún está en buenas condiciones, puede seguir usándolo durante el resto del turno

### ¿Se debe lavar el cubrebocas de tela? ¿Con qué frecuencia?

Sí. Se debe lavar rutinariamente, dependiendo de la frecuencia de uso.

### ¿Cómo se puede desinfectar/limpiar de manera segura?

Una lavadora es suficiente para lavar un cubrebocas de tela correctamente.

### ¿Cómo se puede quitar de manera segura un cubrebocas usado?

Es importante no tocar los ojos, nariz o boca en el acto de quitarse el cubrebocas de la cara y lavarse las manos de inmediato después de quitárselo.

Aviso: Los cubrebocas caseros y desechables no cumplen los criterios para ser Equipo de Protección Individual (EPI) y no se deben usar para tareas que requieran EPI, tales como una limpieza de peligros biológicos o el manejo de productos químicos concentrados.

# Facial Coverings in Food Service

## Quick Reference Guide

Scientific guidance continues to evolve around the use of facial coverings in the general public, including recent guidance that it is possible any face covering may provide some measure of protection. If desired, you have the option to wear a face covering in a food establishment. Continue to abide by all state and local requirements.

### Cloth face coverings SHOULD:

- be clean and in good repair
- fit snugly but comfortably against the sides of the face
- be secure
- include multiple layers of fabric
- allow for breathing without restriction
- be able to be laundered and machine dried

### Facial coverings SHOULD NOT:

- have any hanging from the facial covering that would create a food safety hazard
- have holes or tears

### Storage of Facial Coverings

- Stored with personal items
- On the wearer's face
- Laundered on a daily basis
- Facial coverings should not be shared with others

### Wearing a facial covering

- Wash your hands before and after putting a facial covering in place
- Do not touch the facial covering again until you remove it
- Facial coverings should be positioned so that there is no need to adjust or otherwise touch the face frequently
- If your facial covering becomes soiled, you should remove it and not wear it again until laundered
- Remove your facial covering to eat and drink and if it is still in good repair, you may continue to use it for the duration of your shift

### Should cloth face coverings be washed? How regularly?

Yes. They should be routinely washed depending on the frequency of use.

### How does one safely sterilize/clean a cloth face covering?

A washing machine should suffice in properly washing a face covering.

### How does one safely remove a used cloth face covering?

Individuals should be careful not to touch their eyes, nose, and mouth when removing their face covering and wash hands immediately after removing.

Note: Homemade and disposable facial coverings do not meet the standard of a respirator or protective equipment (PPE) and should not be used for tasks that require PPE such as biohazard clean up or handling concentrated chemicals.

April 17, 2020

FOR IMMEDIATE RELEASE

## **Northeast Colorado Health Department Reports on Carroll COVID 19 Response**

Sterling, Colo. – April 17, 2020: As the COVID-19 pandemic continues, the national focus has turned to concern about the strength of the food supply chain. Having multiple critical businesses that are associated with food processing in our six county (Logan, Morgan, Phillips, Sedgwick, Washington and Yuma) health district, Northeast Colorado Health Department (NCHD) is continuing to work closely with each business to provide technical support and guidance to improve staff protection from infection so that they can safely remain open.

One such facility that is at the forefront of state and national attention is the Cargill meat processing facility located in Fort Morgan. After an invitation to tour the plant, Public Health Director, Trish McClain addressed in a report to the State Public Health Department, unprecedented processes and procedures that facility management have put in place to keep food product and employees safe.

“More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important,” expresses Director

McClain “I believe Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow.”

The health department report identifies that Cargill is proactively applying Centers for Disease Control and Prevention guidance for employee face covering, added cleaning measures, personal protective equipment usage and social distancing practices. In many areas, they have gone beyond the general guidance and implemented innovative approaches to employee safety.

“We are making decisions guided by our values,” said Tyler Luft, general manager for Cargill’s Fort Morgan protein facility. “The team is working to keep employees safe, feed the nation and keep the agricultural economy moving.”

This sincerity extends to management’s transparency with NCHD on efforts to actively screen staff, their significant modifications to employee flow and production line conversion, as well as enforcement of isolation and quarantine directives by deactivating staff badges shows how proactive and how far-reaching their efforts are to protect staff.

Cases of COVID-19 have continued to increase in our six county health district, including Fort Morgan and just emphasizes the need for social distancing and to only be out in the public for necessary activities. So far, NCHD in cooperation with Cargill and has been notified of 23 positive results for employees, leading to 1 death. The company continues to enforce a mandatory 14-day quarantine for any team member who tests positive for COVID-19 as well as any employees who they have come into close contact with.

“Cargill continues to work in close partnership with the NCHD to ensure we are following the appropriate safety protocols.” said Luft. “We are part of this

community and want to work together to keep each other safe, people at work and the country fed.”

MORGAN COUNTY FAMILY PRESERVATION COMMISSION  
COMMUNITY ADVISORY COUNCIL/CCR COUNCIL  
ZOOM MEETING

APRIL 22, 2020

**FPP Membership:** Trish McClain (Co Chair), John Prouty (Co Chair), Earleen Oswalt (Secretary), Andrew McClary, Shantel Nelson (non-voting member), Cynthia Osborn, Mary Gross, Lisa Megel, Phil Moss, Jacque Frenier, Shaleena McKie

**ABSENT:** Andrew McClary, Lisa Megel

Jacque Frenier, Shantel Nelson and Cynthia Osborn were present by phone.

**CALL TO ORDER:** Trish McClain called the meeting to order at 7:38am.

**MINUTES:** Phil M moved and Shaleena M seconded the February 2020 minutes be approved. Passed.

**CORE REPORT:** Shantel Nelson reviewed the February and March CORE reports. February had a total of 38 cases serving 21 families. Non direct services: Mental Health-21 Substance Abuse-10 14 Family Group Decision Making Conference referrals with 10 held. In March CORE had 46 cases serving 24 families. Non direct services: Mental Health-23 Substance Abuse-9 5 Family Group Decision Making Conference referrals with 11 held. OOH Placements in February were 21 and 20 in March. Shantel reported CORE is fully staffed with the hiring of the new Life Skills worker, who is doing training online. Day Treatment educational services being provided remotely. Gina is the only therapist as Dan has left. Try to check on the clients by phone and at their homes, when possible, by staying outside, wearing masks and talking from a distance.

Mary G moved and Trish M seconded the reports be approved. Passed. (Attached as an official part of the minutes.)

**PSSF ANC CCR:** Mary Gross summarized current services. Mary and employees are working from home with picking and choosing, who will be at the office at any given time. Working hard to provide continuity of care with guidance from the State. Since Jennifer has resigned and moved to Arizona, the CCR position is open. Mary hopes to interview for the position next week, remotely of course. She is remotely interviewing for the Early Childhood Council position this week. Leticia is working part-time for CCR and Family Support. Contacts with families are being made by phone. CCR numbers are down of course, since families are usually more willing to accept the services with a face to face contact. Rent and utilities continue to be provided to clients in need. FEMA will be shipping baby supplies to the Family Center, but they do not have a date and the truck could show up without prior notice. Mary has been working hard to establish a place to store the supplies and a distribution method to agencies and individuals. Earleen volunteered to help distribute and law enforcement will also assist, if needed. It has been “interesting” and stressful, but the Family Center employees and Mary have stepped up to be there for clients, as much as social distancing and restrictions allow, mostly by phone. Earleen O moved and Jacque F seconded the report be approved. Passed.

**ISSUES FOR 2020:** Decided to table, however, several were identified at the January 2020 meeting.

**UPDATES:**

**Shaleena M** said Baby Bear Hugs has a new staff member and they are providing services as best they can under current guidelines and restrictions.

**Mary G.** Family Center fundraiser did well considering the concerns many had about attending. About 100 attendees. It was the 25<sup>th</sup> anniversary for the Family Center and unfortunate it fell at such a scary time, so several past Board members understandably did not feel comfortable attending.

**Phil M:** CMHC is providing phone lines to first responders and community members needing support. Approximately 70% of the employees are working from home. Psychiatrists are using their personal devices to monitor clients' medications. 20 of approximately 45-50 employees working at the office. Others are working from home. Productivity down 15% and intakes down 75%. Interestingly the suicide and substance abuse crisis calls down 75%. Groups are functioning virtually, but not as well as in person groups. At least for now the State has agreed to pay the same Medicaid rate for phone therapy as in person therapy.

**John P:** Probation expects that soon 50% to be working at the probation office and other 50% from home.

**Earleen O:** Since the Sunrise Optimist had to cancel their only fundraiser, the ColorRun, they donated their 300 masks to CPMC, EbenEzer, CDOT, Brush school lunch delivery ladies and individuals needing a mask.

**Trish M:** It has been stressful and long hours. Staff has been amazing. Learn from press conferences just like everybody what the latest news is and then must work to find out what it means to the health department in terms of guidelines and restrictions. Trying to be flexible. Can do WIC and take referrals remotely. Primary baby vaccines being provided at the office with everyone wearing masks and being safe, since cannot stop protecting children from other diseases. Can provide most services by phone and curbside pickup. Nobody can enter the building without a mask. Grateful for CMHC's support line for staff and the community. A frustration are the calls they receive from individuals and the media wanting information they cannot provide. People are scared. Also, people need to understand if a Morgan County COVID patient is sent to Greeley and does not survive, the death is included in Weld County statistics not Morgan's.

**A BIG THANK YOU TO ALL THE AGENCIES ADAPTING TO ALMOST DAILY CHANGES AND PROVIDING SERVICES THE BEST THEY CAN UNDER VERY TRYING AND SCARY CIRCUMSTANCES.**

**ADJOURNMENT:** 8:30am

**Submitted by: Earleen Oswald, Secretary Next Meeting: May 27, 2020**

**IT WAS QUITE AN EXPERIENCE HAVING THE MEETING REMOTELY BY ZOOM, BUT IT WAS GREAT THAT MOST MEMBERS WERE PRESENT AND WE HAD A GOOD MEETING, HOWEVER, EXACTLY WHO HAD THE RESPONSIBILITY TO DELIVER BREAKFAST TO US? I'M ASSUMING IT WAS ANDY OR LISA AND THEY ARE STILL OUT TRYING TO GET BREAKFAST BURRITOS DELIVERED. I KEEP CHECKING MY PORCH FOR THE PACKAGE.**

**GREAT TO SEE AND HAVE SOME KIND OF CONTACT WITH EVERYONE. WE MAY NOT HAVE LOOKED LIKE OUR USUAL CUTE SELVES, BUT WE DIDN'T CARE. STAY SAFE AND HEALTHY!!!!!!!**

# FACT SHEET FOR HEALTHCARE PERSONNEL

Battelle Decontamination System for Decontaminating Compatible N95 Respirators

March 29, 2020

Coronavirus  
Disease 2019  
(COVID-19)

You have been given a decontaminated N95 or N95 equivalent respirator that has been decontaminated using a decontamination system or reuse of a healthcare personnel in a healthcare setting to help prevent healthcare personnel exposure to pathogenic biologic airborne particulates during the COVID-19 pandemic.

This Fact Sheet informs you of the significant known and potential risks and benefits of the emergency use of decontaminated N95 or N95-equivalent respirators. These compatible N95 or N95-equivalent respirators have been decontaminated using the Battelle CCDS Critical Care Decontamination System™ (hereafter referred to as “decontaminated N95 respirators” and “Battelle Decontamination System” throughout this Fact Sheet).

Decontaminated N95 respirators that have been decontaminated using the Battelle Decontamination System are authorized for use by healthcare personnel in a healthcare setting during the COVID-19 pandemic.

---

What are the steps to use a respirator as a precaution against COVID-19?

---

## What are the steps to use a respirator as a precaution against COVID-19?

Many patients with confirmed COVID-19 have developed fever and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). However, limited information is currently available to characterize the full spectrum of clinical illness associated with COVID-19. Based on what is known about the virus that causes COVID-19, signs and symptoms may appear any time from 2 to 14 days after exposure to the virus. Based on preliminary data, the median incubation period is approximately 5 days, but may range 2-14 days.

Public health officials have identified cases of COVID-19 infection throughout the world, including the United States, which may pose risks for public health. Please

check the CDC webpage for the most up to date information.

## What are the steps to use a decontaminated N95 respirator?

- The Battelle Decontamination System has been authorized for emergency use to decontaminate compatible N95 or N95-equivalent respirators for reuse by healthcare personnel during the COVID-19 pandemic to prevent wearer exposure to pathogenic airborne particulates.
  - Compatible N95 or N95-equivalent respirators under the Battelle Emergency Use Authorization are those that do not contain cellulose-based materials.
- Successful testing on decontaminated N95 respirators demonstrated acceptable performance through 20 decontamination cycles for sporicidal activity, viricidal activity, filtration efficiency, breathability, form fit testing, and strap integrity testing, per authorized respirator.
- Use of decontaminated N95 respirators
  - ✓ Inspect respirators after each use prior to submission for decontamination
  - ✓ Discard respirators with visible soiling (e.g., blood) or damage – do not use and do not send for decontamination
  - ✓ Cellulose-based materials are incompatible with the Battelle decontamination process
  - ✓ The number of times a respirator has been decontaminated is written on the respirator (maximum 20 times)
  - ✓ Report problems with decontaminated N95 respirators to your healthcare facility
- Monitor healthcare personnel or signs and symptoms of potential infection with SARS-CoV-2 or other respiratory infection for up to and including 14 days after last contact with the SARS-CoV-2 virus and related material, and promptly report such information to Battelle.
- Report a decontamination observed upon receipt of the decontaminated N95 respirators, and

---

**Report Adverse Events** including problems with test performance or results, to MedWatch by submitting the online FDA Form 3500 (<https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home>) or by calling 1 800 FDA 1088

# FACT SHEET FOR HEALTHCARE PERSONNEL

Battelle Decontamination System for Decontaminating Compatible N95 Respirators

March 29, 2020

**Coronavirus  
Disease 2019  
(COVID-19)**

potential exposure of healthcare personnel from breaks in or other damage to or degradation of the decontaminated N95 respirators.

Use appropriate personal protective equipment (PPE) when caring for individuals suspected of having COVID-19 as outlined in the CDC webpages, including *Interim Infection Prevention and Control Recommendations for Patients with Confirmed Coronavirus Disease 2019 (COVID-19) or Persons Under Investigation for COVID-19 in Healthcare Settings, Infection Control, and FAQ about PPE*.

Current information on COVID-19 for healthcare personnel is available at CDC's webpage, *Information for Healthcare Professionals* (see links provided in "Where can I go for updates and more information" section).

**There are no known potential benefits or risks associated with using decontaminated N95 respirators**

Potential benefits include:

- May help prevent exposure to airborne pathogens, and therefore risk of infection or illness
- Extends the usability of compatible N95 or N95-equivalent respirators by allowing for decontamination and reuse

Potential risks include:

- Failure of filtration efficiency
- Reduced breathability
- Strap failure and ineffective face-fit
- Reused respirators may not have been effectively decontaminated of SARS-CoV-2 or other pathogens

**Overview of Battelle Decontamination System**

The Battelle Decontamination System is a self-contained decontamination device that uses vapor phase hydrogen peroxide (VPHP) for decontamination of compatible N95 or N95-equivalent respirators that are contaminated or potentially contaminated with SARS-CoV-2. N95 or N95-equivalent respirators containing cellulose-based materials are incompatible with the Battelle decontamination process.

Each decontamination cycle in the Battelle Decontamination System consists of injecting VPHP into the decontamination chamber until achieving a saturated atmosphere indicated by micro condensation; maintaining the VPHP exposure for a 150-minute dwell time; and allowing the VPHP to off gas to a level of 1 ppm prior to post decontamination processing. A minimum of five calibrated chemical indicators are dispersed throughout the system to indicate a successful decontamination cycle. This decontamination system enables the reuse of compatible N95 or N95-equivalent respirators that would otherwise be disposed of after a single use. However, respirators that are visibly soiled must be discarded and not reused or decontaminated.

**at is an EUA**

The United States FDA has made the emergency use of the Battelle Decontamination System to decontaminate compatible N95 or N95-equivalent respirators available under an emergency access mechanism called an Emergency Use Authorization (EUA). The EUA is supported by the Secretary of Health and Human Service's (HHS's) declaration that circumstances exist to justify the emergency use of medical devices, including alternative products used as medical devices, due to insufficient supply during the COVID-19 pandemic.

The Battelle Decontamination System has been made available under an EUA, and has not undergone the same type of review as an FDA-approved or cleared device. FDA may issue an EUA when certain criteria are met, which includes that there are no adequate, approved, available alternatives, and based on the totality of scientific evidence available, it is reasonable to believe that the Battelle Decontamination System may be effective at preventing healthcare personnel exposure to pathogenic airborne particulates during periods of insufficient respirator supply during the COVID-19 pandemic by decontaminating, for a maximum of 20 decontamination cycles per respirator, compatible N95 or N95-equivalent respirators that are contaminated or potentially contaminated with SARS-CoV-2 or other pathogenic microorganisms.

The EUA for the Battelle Decontamination System is in effect for the duration of the COVID-19 declaration

**Report Adverse Events** including problems with test performance or results, to MedWatch by submitting the online FDA Form 3500 (<https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home>) or by calling **1 800 FDA 10**

# FACT SHEET FOR HEALTHCARE PERSONNEL

Battelle Decontamination System for Decontaminating Compatible N95 Respirators

March 29, 2020

Coronavirus  
Disease 2019  
(COVID-19)

You have been given a **decontaminated N95 or N95 equivalent respirator** that has been decontaminated using a decontamination system **or reuse** **healthcare personnel in a health care setting** to help prevent healthcare personnel exposure to pathogenic biologic airborne particulates during the COVID-19 pandemic.

This Fact Sheet informs you of the significant known and potential risks and benefits of the emergency use of decontaminated N95 or N95-equivalent respirators. These compatible N95 or N95-equivalent respirators have been decontaminated using the Battelle CCDS Critical Care Decontamination System™ (hereafter referred to as “decontaminated N95 respirators” and “Battelle Decontamination System” throughout this Fact Sheet).

Decontaminated N95 respirators that have been decontaminated using the Battelle Decontamination System are authorized for use by healthcare personnel in a healthcare setting during the COVID-19 pandemic.

---

**Do not reuse a respirator as a precautionary measure as soon as possible.**

---

## What to do about COVID-19

Many patients with confirmed COVID-19 have developed fever and/or symptoms of acute respiratory illness (e.g., cough, difficulty breathing). However, limited information is currently available to characterize the full spectrum of clinical illness associated with COVID-19. Based on what is known about the virus that causes COVID-19, signs and symptoms may appear any time from 2 to 14 days after exposure to the virus. Based on preliminary data, the median incubation period is approximately 5 days, but may range 2-14 days.

Public health officials have identified cases of COVID-19 infection throughout the world, including the United States, which may pose risks for public health. Please

check the CDC webpage for the most up to date information.

## What you need to know about the emergency use of decontaminated N95 respirators

- The Battelle Decontamination System has been authorized for emergency use to decontaminate compatible N95 or N95-equivalent respirators for reuse by healthcare personnel during the COVID-19 pandemic to prevent wearer exposure to pathogenic airborne particulates.
  - Compatible N95 or N95-equivalent respirators under the Battelle Emergency Use Authorization are those that do not contain cellulose-based materials.
- Successful testing on decontaminated N95 respirators demonstrated acceptable performance through 20 decontamination cycles for sporicidal activity, virucidal activity, filtration efficiency, breathability, form fit testing, and strap integrity testing, per authorized respirator.
- **Use of decontaminated N95 respirators**
  - ✓ Inspect respirators after each use prior to submission for decontamination
  - ✓ Discard respirators with visible soiling (e.g., blood) or damage – do not use and do not send for decontamination
  - ✓ Cellulose-based materials are incompatible with the Battelle decontamination process
  - ✓ The number of times a respirator has been decontaminated is written on the respirator (maximum 20 times)
  - ✓ Report problems with decontaminated N95 respirators to your healthcare facility
- **Monitor healthcare personnel or signs and symptoms** of potential infection with SARS-CoV-2 or other respiratory infection for up to and including 14 days after last contact with the SARS-CoV-2 virus and related material, and promptly report such information to Battelle.
- **Report a reaction or irritation** observed upon receipt of the decontaminated N95 respirators, and

---

**Report Adverse Events** including problems with test performance or results, to MedWatch by submitting the online FDA Form 3500 (<https://www.accessdata.fda.gov/scripts/medwatch/index.cfm?action=reporting.home>) or by calling **1 800 FDA 1088**

## Instructions for Healthcare Facilities: Preparation and Collection of Compatible N95 Respirators for Decontamination by the Battelle Memorial Institute Using the Battelle Decontamination System

The U.S. Food and Drug Administration has authorized an Emergency Use Authorization (EUA) for the emergency use of the Battelle CCDS Critical Care Decontamination System™ (hereafter referred to as the “Battelle Decontamination System”) operated by the Battelle Memorial Institute (“Battelle”), for use in decontaminating compatible N95 or N95-equivalent respirators (“compatible N95 respirators”), for reuse by healthcare personnel. Healthcare personnel should follow these instructions, as well as procedures at their healthcare facility, to prepare compatible N95 respirators for decontamination by Battelle using the Battelle Decontamination System.

- Due to incompatibility, the Battelle Decontamination System is not authorized for use with respirators containing cellulose-based materials
- All compatible N95 respirators provided to Battelle must be free of any visual soiling or contamination (e.g., blood, bodily fluids, makeup)
- If N95 respirators are soiled or damaged, they will be disposed of and not returned after decontamination

### On-Site Collection/Marking

1. Your organization should create a collection station at the point of generation (i.e. hospital floor/unit)
2. Each station should have a bag provided by the healthcare facility to collect compatible N95 respirators.  
**NOTE: Bags are for compatible N95 respirators only. Do not throw other personal protective equipment (such as gloves), paper towels, or waste in the collection bag.**
3. With a permanent marker, the healthcare personnel should label their own individual compatible N95 respirators with a three-digit site code and a 2-digit location identifier (as shown below). The unique site code corresponds to the healthcare facility delivery address and will be assigned by Battelle. Your organization may designate the location identifier to correspond to a specific location/floor/unit within your site.
4. Healthcare personnel should follow the instructions provided by Battelle in Instructions for Healthcare Personnel: Preparation of Compatible N95 Respirators for Decontamination by the Battelle Memorial Institute Using the Battelle Decontamination.

—————      —————

**Site Code**                      **Site Location ID**

(Assigned by Battelle Point Of Contact)    (Assigned by Healthcare Facility)

### **Preparation for Shipment:**

1. Bags containing the contaminated compatible N95 respirators to be decontaminated by Battelle (“primary collection bag”) should be closed.
2. Place the primary collection bag into another bag (“secondary collection bag”) (provided by the healthcare facility), which is then closed.
3. Decontaminate the secondary collection bag with alcohol or other suitable decontaminant.
4. Place the decontaminated bags into a rigid, closed box (supplied by the healthcare facility) clearly labeled with a biohazard symbol, and tape the box securely shut.
5. Label the outside of the box with the 3-digit site code and 2-digit location identifier.

### **Shipment under the healthcare facility’s agreement with Battelle:**

1. Gather all boxes; complete one chain of custody form (provided by Battelle) per shipment, noting the number of boxes.
2. Coordinate with your organization’s courier service to arrange transfer to designated Battelle location.

### **Reuse Information:**

Following decontamination, you will be provided **decontaminated compatible N95 respirators** that have been processed through a decontamination system for reuse by healthcare personnel in a healthcare setting during the COVID-19 pandemic. Before reuse, the healthcare facility should review the chain of custody form, which indicates successful decontamination, accompanying the returned respirators. The healthcare facility should also inspect each returned, decontaminated compatible N95 respirator for:

1. Numeric indication of the decontamination cycle number. **NOTE: Compatible N95 respirators will be disposed of after 20 decontamination cycles.**
2. Visible damage or soiling. **NOTE: Compatible N95 Respirators should be discarded and not reused if visually damaged or soiled.**

**Any problems should be immediately reported to Battelle.**

**Battelle Contact: 1-800-201-2011 or [solutions@battelle.org](mailto:solutions@battelle.org)**

### Preparation for Shipment:

1. Bags containing the contaminated compatible N95 respirators to be decontaminated by Battelle (“primary collection bag”) should be closed.
2. Place the primary collection bag into another bag (“secondary collection bag”) (provided by the healthcare facility), which is then closed.
3. Decontaminate the secondary collection bag with alcohol or other suitable decontaminant.
4. Place the decontaminated bags into a rigid, closed box (supplied by the healthcare facility) clearly labeled with a biohazard symbol, and tape the box securely shut.
5. Label the outside of the box with the 3-digit site code and 2-digit location identifier.

### Shipment under the healthcare facility’s agreement with Battelle:

1. Gather all boxes; complete one chain of custody form (provided by Battelle) per shipment, noting the number of boxes.
2. Coordinate with your organization’s courier service to arrange transfer to designated Battelle location.

### Reuse Information:

Following decontamination, you will be provided **decontaminated compatible N95 respirators** that have been processed through a decontamination system for reuse by healthcare personnel in a healthcare setting during the COVID-19 pandemic. Before reuse, the healthcare facility should review the chain of custody form, which indicates successful decontamination, accompanying the returned respirators. The healthcare facility should also inspect each returned, decontaminated compatible N95 respirator for:

1. Numeric indication of the decontamination cycle number. **NOTE: Compatible N95 respirators will be disposed of after 20 decontamination cycles.**
2. Visible damage or soiling. **NOTE: Compatible N95 Respirators should be discarded and not reused if visually damaged or soiled.**

**Any problems should be immediately reported to Battelle.**

**Battelle Contact: 1-800-201-2011 or [solutions@battelle.org](mailto:solutions@battelle.org)**

Morgan County

Isolation and quarantine help protect the public by preventing exposure to people who are sick or have been exposed to people who are sick. This can include people who have tested positive for COVID-19, as well as people who have not been tested but have the symptoms of COVID-19 (fever, cough and shortness of breath). Generally, as long as the site is suitable, a person's residence is the preferred setting for quarantine and isolation, according to the CDC.

## The difference between isolation and quarantine

### ISOLATION

- Separates sick people with a contagious disease from people who are not sick.
  - Is for people who are already sick.
  - Is a routine procedure in hospitals and health care facilities.
  - Can be voluntary, but public health agencies have legal authority to issue isolation orders to people who are sick.
  - If you have tested positive for COVID-19 **OR** if you develop fever, cough, and shortness of breath, you should be in isolation (stay away from others) until:
    - You have had no fever for at least 72 hours (that is three full days of no fever without the use of medicine that reduces fevers)
    - AND**
    - other symptoms have improved (for example, when your cough or shortness of breath have improved)
    - AND**
    - At least **7 days** have passed since your symptoms first appeared
- CDC: What to do if you are in isolation: [cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html](https://www.cdc.gov/coronavirus/2019-ncov/if-you-are-sick/steps-when-sick.html)
- Health care workers may have to isolate for longer and should do what they are told by the health care facility they work for.

### QUARANTINE

- Separates people and restricts their movement if they were exposed to a contagious disease to see if they become sick. This could include exposure to a person who has tested positive for COVID-19 or a person with the symptoms of COVID-19.
- Is for people who are not sick, but who may have been exposed (in close contact with someone) who is sick. This could include members of your household, co-workers, or others you spend a great deal of time with (and are within six feet of for 10 minutes or more).
- Can be voluntary, but public health has legal authority to issue quarantine orders to people who were exposed to a contagious disease.

- Quarantined people:
  - Stay at home or in another location **for 14 days** so they don't spread the disease to healthy people.
  - Can seek medical treatment from a health care provider. In the case of COVID-19, they should **CALL** a provider or clinic first to get instructions **BEFORE** going to a health care office, hospital, or urgent care. If they have a medical emergency, they should tell the 911 dispatcher they are under quarantine for COVID-19.

## Enforcement of isolation and quarantine

- State and local public health agencies request that Coloradans and visitors from other states or countries voluntarily cooperate with isolation and quarantine instructions.
- State or local public health agencies may issue isolation and quarantine orders in some high-risk situations or if non-compliance is anticipated.
- If people do not follow the orders, public health agencies can involve law enforcement.
- If enforcement were to become necessary, the entity that issued the order (the state or local public health agency) could file an enforcement action in state district court asking a judge to enforce the order. The court could also levy fines but, on the whole, public health is more interested in compliance with the terms of the order.
- Public health agencies are working hard to make sure the needs of people in isolation/quarantine are being met to help ensure compliance.

## LEGAL AUTHORITY IN COLORADO

- [25-1-506: Powers and duties of county and district health departments \(Colorado Revised Statutes\).](#)
- [25-1.5-102: Epidemic and communicable diseases – powers and duties of the department \(Colorado Revised Statutes\).](#)

JBS USA Holdings, Inc.  
1770 Promontory Circle  
Greeley, CO 80634

RE: Disease Outbreak Investigation at JBS USA in Greeley, Colorado

Dear Mr. Nogueira:

The Colorado Department of Public Health and Environment (CDPHE) is engaged with the Weld County Department of Public Health and Environment (WCDPHE) in conducting a disease control investigation regarding an outbreak of coronavirus disease 2019 (COVID-19) at the JBS Meat Packing plant in Greeley, Colorado pursuant to our legal authorities in sections 25-1-122, 25-1-506(3)(b), and 25-1.5-102(1), C.R.S. We appreciate your agreeing to close the plant beginning at midnight on Friday, April 10, 2020, while we work with you to determine how best to protect the health of your employees and prevent any further spread of disease. You have agreed to provide the WCDPHE with an actionable and verifiable plan prior to reopening. If this criteria is met, the plant will reopen at 5:00 a.m. on Tuesday, April 14, 2020.

COVID-19 is a respiratory illness caused by a novel coronavirus. Symptoms include fever, cough or shortness of breath or difficulty breathing. In some cases it can be life threatening and fatal. COVID-19 is primarily spread by small droplets, such as those produced when someone coughs or sneezes. COVID-19 may also spread when an individual touches their face after touching a contaminated surface. Infected individuals are contagious before they become symptomatic. Additionally, some individuals never become symptomatic, which makes it difficult for public health officials to conduct contact-tracing or to quarantine individuals who are known to have been exposed.

At this time, we are aware of at least 43 confirmed COVID-19 cases reported since March 25 among employees of JBS. Among these confirmed cases, 14 cases have been hospitalized, 8 have been intubated, and there was one death. At least 32 cases reported working while symptomatic. We are also aware that from March 1 – April 2 there were at least 277 unduplicated visits to three major clinical partners in Weld County by JBS employees and some covered dependents who were evaluated for respiratory illness suspected or confirmed as COVID-19. In comparison, in one of Greeley's largest healthcare systems the average visits per day by JBS employees/dependents in February was two. While the vast majority of these cases are from employees who work the first shift at the plant, there are a large number of probable cases being investigated that include employees who work the second shift. The rapid nature of the spread of disease among JBS employees is very concerning, and the exponential spread of this disease across an employee population of several thousand would be devastating for both the employees and your company, and would quickly overwhelm the medical resources available in the hospitals and other health care providers in Greeley and surrounding communities.

The world is in the midst of a COVID-19 global pandemic, and we are using all available tools and strategies to reduce disease transmission and ultimately flatten the curve. Shutting down the JBS plant is essential to protecting the health of employees, their families, and the community at large. The closure will immediately disrupt transmission of COVID-19 and allow time for public health to work with you to:

- Conduct an employee testing and screening program to begin this weekend. Protocols need to be led and approved by the public health agencies. We request your assistance in communicating with employees;
- Identify ill workers and their contacts and ensure their exclusion from work for the necessary isolation and quarantine periods;
- Identify healthy, non-exposed workers who may be permitted to work after the closure period;
- Establish effective exposure, symptom and fever screening procedures for workers and policies for the exclusion of workers who screen positive;
- Implement public health reporting procedures for all symptomatic and exposed workers;
- Implement policies and procedures that ensure social distancing of all workers, this includes but is not limited to procedures for safe movement through the facility during arrival and departure from work and break times;
- Provide adequate access to PPE and hand washing and hand sanitizing equipment;
- Ensure that housekeeping staff are adhering to the cleaning and disinfecting guidelines set forth by the Centers for Disease Control and Prevention (CDC) and are using EPA approved disinfectants on surfaces throughout the facility;
- Increase signage and other communication educating workers about COVID-19 symptoms and the importance of social distancing, appropriate mask use, and hand hygiene in languages appropriate for workers in the facility;
- Plan for re-opening with a reduced level of staffing that ensures social distancing can be maintained at all times during each shift; and
- Work with WCDPHE on a plan to re-open with adequate, ongoing measures in place to prevent transmission.

It is quite possible that a brief closure and implementation of the strategies above will not be adequate to prevent transmission of COVID-19 at the plant. If transmission continues, additional measures, including extended closure, may be necessary. Public health resources at both the county and state level are available to advise you regarding the implementation of strategies to prevent further transmission of COVID-19 at the plant when it reopens.

The Governor and Senator Gardner will continue to work on acquiring more tests for the State and Weld County. Both public health departments will endeavor to assist in continuing to test employees as more tests become available.

Finally, we ask that you work with the Colorado Department of Labor and Employment to provide possible benefit assistance to the JBS impacted workers during this closure. Please contact Patrick Teegarden CDLE Director of Policy and Legislation at [patrick.teegarden@state.co.us](mailto:patrick.teegarden@state.co.us) or 303.908.0866 to coordinate messaging and assistance for your workforce.

All Law Enforcement Executives

RE: Recommendations on Enforcement for COVID-19 Public Health Orders

Dear Law Enforcement Executives:

As we all deal with the emerging issues related to the COVID-19 pandemic, we are continually facing new and unexpected challenges. One of these new challenges is the enforcement of Public Health Orders, specifically with non-compliant businesses.

As a first step, we recommend that law enforcement officials educate businesses and community members on the importance of the March 19<sup>th</sup> Public Health Order issued by CDPHE (see attached order and FAQs) as a means of encouraging voluntary compliance. As the order explains, by engaging in “social distancing” and not operating establishments that bring groups of people together, we will save lives, particularly of those most vulnerable to the virus—namely, the elderly and those with a compromised immune system.

As part of this education and outreach effort, we encourage you to enlist the public in filing complaints and calling out businesses that are engaging in dangerous conduct—namely, bringing groups of people together who can spread the virus. Whether via social media or the attention of local media outlets, we believe that public pressure and encouragement is a constructive force and will drive compliance. And the more we can drive voluntary compliance, the more we will save law enforcement resources and protect first responders.

For those businesses that fail to respond to a warning and/or public pressure, we recommend that agencies work first with local public health authorities to use the available civil remedies--as opposed to using criminal remedies. Notably, civil remedies allow for a quicker response and resolution. As for bars and restaurants, civil consequences can include the threat of losing their liquor license.

To pursue the civil remedy option, law enforcement should report the non-compliant business to their local public health agency (LPHA). LPHAs have statutory authority to enforce Public Health Orders issued by the Colorado Department of Public Health and Environment (CDPHE), in addition to their own Public Health Orders. The

LPHA can file a complaint in the District Court seeking enforcement of the Public Health Orders, usually through the County Attorney, requesting a temporary restraining order as well as temporary and permanent injunctive relief. This provides for immediate judicial enforcement of the Public Health Order. If, for any reason, the LPHA is non-responsive or unable to act, you can also reach out to the Attorney General's Office by email ([covid19@coag.gov](mailto:covid19@coag.gov)).

Only for cases where owners of establishments demonstrate a flat refusal to comply after a civil action would we recommend criminal action. Under the law, the criminal remedy is a Class 1 Misdemeanor, and would likely involve the issuance of a summons. (Many detention facilities around the state are lowering inmate populations and/or refusing new arrestees in order to limit the spread of COVID-19 within their facilities, making custodial arrests impractical.) Given the existing demands on the court system, criminal actions would likely not be immediate, but could still be pursued to address those actors who refused to comply in the face of civil remedies and warranted more serious punishment for their conduct.

Further, we suggest tracking all complaints, warnings, or enforcement actions regarding violations of public health orders in the law enforcement agency's Record Management Systems (RMS) to help document non-compliance issues and how these concerns were addressed.

Attached are three reference documents—a press release that will go out today, a FAQ document on the Public Health Order, and the March 19th Public Health Order—that include the specific statutory citations, in case this information is helpful. Please don't hesitate to follow up with Bo Bourgerie <[Erik.Bourgerie@coag.gov](mailto:Erik.Bourgerie@coag.gov)> if you have any questions.

Sincerely,

Philip J. Weiser

Leprino Foods Company  
April 30, 2020

April 27, 2020  
Reopen fitness facilities in Morgan County

To Whom It May Concern:

This letter is to address a need in the Morgan County community. The need is access to public gym and fitness facilities. As a member of The Body Firm Fitness Center, a locally owned business, located in Fort Morgan, I strongly believe my local facility can maintain attendance restrictions and cleaning standards well above regulation. This confidence is not only in the owner and employees, but also in my fellow members.

It is no mystery the benefits physical activity has on the body and mind. During these trying times, people have been doing their best to maintain their healthy habits but struggle due to the lack of community The Body Firm offers. Lack of physical activity can lead to weight gain, body strain, irregular sleep patterns and stress, which can lead to high blood pressure, depression, anxiety, and substance abuse. After a month away, even the strongest are feeling withdrawal.

Having been a committed member for over a year, I have seen a wide variety of individuals come through the front door. Students looking to increase their varsity sport performance, adult's 60+ maintaining muscle mass, obese individuals committing to a better life, body builders and the average Jane like myself. In the month away, I have done my best to socially distant cardio in my neighborhood and exercise in my living room, but after a long day of being an essential worker, it doesn't quite cut it. While I understand group classes will likely not resume, I have grown accustomed to group mentality, and encouraging myself and others at 5pm to finish our day strong.

I again state, I fully believe The Body Firm Fitness Center can maintain national and state regulations with the support of the local health department. The staff is committed to cleaning the facility throughout the day along with members as we workout.

Thank you very much for your consideration, we hope to see The Body Firm open its doors very soon.

Sincerely,

*Sarah Puryt*

Morgan county community member, avid gym go-er

Luke Dillie

April 28, 2020

To Whom It May Concern:

I am writing to voice my support in re-opening The Body Firm Fitness Center and local fitness centers with the support of Morgan County and the Northeast Colorado Department of Health. I have personally been a member of The Body Firm for over a decade and have witnessed firsthand the measures this team takes in their facility to ensure the health and wellbeing of their clients every day. As an avid fitness enthusiast, I have had the opportunity to experience numerous facilities since I have focused daily on strength and cardiovascular training to enhance my overall wellbeing and I have to share that the cleanliness, equipment safety and attention to detail by The Body Firm is second to none even when comparing it luxury fitness clubs such as Equinox. This facility is one that I have always felt safe at because of that attention to detail by the staff to cleanliness and disinfecting the equipment very routinely even before COVID-19.

The additional measures that will be implemented by The Body Firm to limit the number of clients in the facility as well as the support of social distancing while members are in the facility will ensure a positive transition to a new routine that allows us to have this vital component of our daily lives again. I personally believe members will adhere to these new regulations as we all are collectively responsible for our safety and wellbeing by being a part of this community of health and wellness enthusiasts. While many have utilized other resources for physical activity, some of us rely on the ability to use the equipment in facilities like The Body Firm to stay active and to maintain ourselves physically in ways that are not possible without the equipment. For me personally, this includes the ability to use equipment such as the Smith Machine and Hack Squat Machine to actively manage movement and pain from an injury in my right leg and hip in a way that medications and other routines cannot. Part of my recovery plan from my doctor and physical therapist is to train with strength training equipment a minimum of once per week targeting this area of my body to maintain movement in a way that I cannot simulate on my own. Of this experience, this has been the most difficult and I am very eager to return.

I hope you will strongly consider the re-opening of these facilities for those that use them as they are just as vital to our daily lives as any other business or service in our community.

Regards,

Luke Dillie

To Whom It May Concern:

We would like you to seriously reconsider the delay in allowing gyms to reopen. Morgan County is home to a very diverse population that values their health and fitness. Even though we have a low socio-economic population, we are still able to support several gyms within the county, which demonstrates the desire to be fit and healthy.

The Body Firm has a plan in place to adhere to guidelines to keep our members safe while allowing them to pursue their health and fitness goals. Our staff is committed to the well-being of our members and employees.

Again, please reconsider and allow our gyms to open ASAP.

Sincerely,

Julie Geist, Fitness Instructor, The Body Firm

Sheri Johnson, Fitness Instructor, The Body Firm

Shelly Frasier, Fitness Instructor, The Body Firm

# Colorado Roadmap - The New Normal

## Indicators that must be met to advance to the next Phase

1. **No significant increase in cases for at least 14 days**
  - a. Measured by new cases per day, self-reports (where applicable), and positivity rates
  - b. Proxy measurement - new cases among healthcare workers
  - c. Proxy measurement - outbreaks and/or new cases within skilled nursing facilities
  - d. Proxy measurement - hospital admission for COVID-19

2. **Hospitals are safely able to treat patients without resorting to crisis standards of care**
  - a. Hospital census - regional census may be helpful
  - b. Access to regional alternative care center or regional plans are in place
  - c. Hospitalizations are stable or decreasing

3. **Testing can be performed for all people with symptoms consistent with COVID-19 infection**
  - a. Working towards testing capacity that is routinely accessible to every person who is symptomatic within 24 hours and results can be returned within 12-24 hours of specimen collection.

4. **Active monitoring can be accomplished for all COVID-19 cases and their contacts**
  - a. Isolation orders can be delivered within 6 hours of case report
  - b. Active monitoring and isolation must be in place
  - c. Capacity improved and maintained at state and local level with roles delineated
  - d. Enforcement capacity and process is clear in every jurisdiction

5. **Clear protocol in place that requires social distancing and assists with case identification**
  - a. Older adults (age 60 and older) and individuals with underlying medical conditions that are at increased risk of serious COVID-19 are encouraged not to attend (including employees) or to tele-work where possible.
  - b. Employees must be screened for COVID-19 symptoms each day. Anyone symptomatic will be excluded from work for at least 7 days.
  - c. Social distancing measures must be employed to ensure that employees and the public can easily maintain a minimum of 6 foot distance.
  - d. Social distancing protocol is provided to all employees and available to any customer

**Getting to the Recovery Phase will require that vaccine is widely available**

## LOGAN COUNTY PLAN TO REOPEN

### GUIDELINES FOR ALL PHASES AND SECTORS (AS APPLICABLE):

- Perform routine environmental cleaning and disinfection
  - [Healthcare facilities](#)
  - [Postmortem care facilities](#)
  - [Laboratories](#)
  - [Other, non-healthcare facilities](#)
- Monitor workforce for compatible symptoms.
- Non-COVID symptomatic employees should wear a cloth face cover
- Implement or maintain return to work policies
  - [Healthcare facilities](#)
  - [Critical infrastructure workers after exposure](#)

### PHASE 1-

#### Public gatherings

- Allow gatherings of no more than 10 people and maintain physical distancing whenever possible

#### Businesses

- Encourage telework, wherever possible
- Practice 6 foot physical distancing
- Close common areas where employees are likely to congregate OR implement physical distance protocols
- Continue to limit or prohibit non-essential travel
- Consider return to work in phases as applicable
- Implement or maintain flexible [sick leave policies and practices](#)
- Consider accommodations for vulnerable populations

#### Retail, Personal services, and Restaurants (as applicable)

- Practicing 6 foot physical distancing
- Implement or continue early opening for high-risk populations
- Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
- Utilize face cloth coverings for employees and contracted workers whose duties include close contact with members of the public
- Continue curbside services in businesses where it applies
- Close-down waiting areas
- Space tables and lines
- Implement no-touch payment, as appropriate
- Encourage all public to wear masks to enter retail businesses

#### Health Care

- Elective surgeries can resume

**Recreation**

- Maintain physical distancing in outdoor settings (6ft for hikers, 15ft for runners/bikers)
- Open outdoor recreation facilities where adequate controls can be implemented to ensure physical distancing
- Limit gatherings to no more than 10 people
- Maintain restrictions and cleaning guidelines for restrooms

**Education**

- Must follow the Colorado Department of Education rules and guidelines

**CONSIDERATIONS:**

- Large venues (movie theaters, sporting venues, places of worship) can operate IF strict physical distancing practices are possible
- Gyms can open IF strict physical distancing and cleaning practices are possible
- Businesses and recreation facilities NOT permitted to open in this phase will be based on epidemiological evidence of risk for transmission, populations that may be at higher risk for severe disease, and inability to meet the limitations on size of gatherings or congregations

**ONGOING PROHIBITIONS:**

- Services to high-risk populations
- Visitation to hospitals and senior living facilities
- Schools and organized youth activities that are currently closed

**PHASE 2 - (4 weeks from Phase 1 No Significant increase in cases and Criteria 1 – 5 met and maintained)****Public gatherings**

- Allow gatherings of maximum 50 people and maintain physical distancing whenever possible

**Businesses**

- Non-essential travel can resume
- Follow guidance for number of personnel in building based on square footage (based on fire code as the denominator)
- Maintain 6 foot physical distance in common areas where employees are likely to congregate.
- Consider accommodations for vulnerable populations

**Retail settings:**

- Bars may operate with diminished standing-room occupancy, as applicable
- Gyms can remain open IF strict physical distancing practices are possible
- Grocery stores maintain phase 1 operations, but relax the face covering requirement

**Education:**

- Must follow the Colorado Department of Education rules and guidelines

**ONGOING PROHIBITIONS:**

- Services to high-risk populations

- Visitation to hospitals and senior living facilities

**PHASE 3-** (8 weeks from Phase 2 No Significant increase in cases and Criteria 1 – 5 met and maintained)

- Resume unrestricted staffing of worksites
- Resume visits to senior care facilities and hospitals
- Large venues (movie theaters, sporting venues, places of worship) can operate under limited physical distancing practices are possible

**NOTES:**

Northeast Colorado Health Department (NCHD) will continue to monitor the spread of disease through syndromic surveillance (COVID-like symptoms), testing, and hospitalizations.

- Newly reported cases of COVID-19 will be investigated within 24 hours
- All cases will be adequately isolated for minimum of 7 days with an objective of no household transmission

Complaints for non-compliance will be handled through the NCHD hotline 970-522-3741 and [healthinfo@mesacounty.us](mailto:healthinfo@mesacounty.us)

- Schools and organized youth activities that are currently closed

**PHASE 2 - (4 weeks from Phase 1 No Significant increase in cases and Criteria 1 – 5 met and maintained)****Public gatherings**

- Allow gatherings of maximum 50 people and maintain physical distancing whenever possible

**Businesses**

- Non-essential travel can resume
- Follow guidance for number of personnel in building based on square footage (based on fire code as the denominator)
- Maintain 6 foot physical distance in common areas where employees are likely to congregate.
- Consider accommodations for vulnerable populations

**Retail settings:**

- Bars may operate with diminished standing-room occupancy, as applicable
- Gyms can remain open IF strict physical distancing practices are possible
- Grocery stores maintain phase 1 operations, but relax the face covering requirement

**Education:**

- Must follow the Colorado Department of Education rules and guidelines

**ONGOING PROHIBITIONS:**

- Services to high-risk populations

- Visitation to hospitals and senior living facilities

**PHASE 3-** (8 weeks from Phase 2 No Significant increase in cases and Criteria 1 – 5 met and maintained)

- Resume unrestricted staffing of worksites
- Resume visits to senior care facilities and hospitals
- Large venues (movie theaters, sporting venues, places of worship) can operate under limited physical distancing practices are possible

**NOTES:**

Northeast Colorado Health Department (NCHD) will continue to monitor the spread of disease through syndromic surveillance (COVID-like symptoms), testing, and hospitalizations.

- Newly reported cases of COVID-19 will be investigated within 24 hours
- All cases will be adequately isolated for minimum of 7 days with an objective of no household transmission

Complaints for non-compliance will be handled through the NCHD hotline 970-522-3741 and [healthinfo@mesacounty.us](mailto:healthinfo@mesacounty.us)

**Meade - CDPHE, Katie** <katie.meade@state.co.us>  
To: melb@nchd.org

Wed, Apr 22, 2020 at 11:15 AM

I will be out of the office on 4/22/20. If you have an immediate concern, you may submit your concerns via the complaint intake email at [cdphe.hfdintake@state.co.us](mailto:cdphe.hfdintake@state.co.us) as this email will be monitored during my absence. I will respond to emails upon my return to the office. Thank you for your patience.

I also like what Heather had to say:

*Agriculture is still an essential service, so they will not be asked to reduce by 50% per the new order from the governor. They should have some sort of guidance from USDA for the packing side of things. As far as the kitchen goes, they can do business for takeout. If employees order, and they want to allow them to eat at work, they should just practice social distancing. Stagger lunch hours, have people spaced out, clean tables between, eat in their cars or outside where they can space out nicely. I am not sure what it looks like over there to give other suggestions.*

We have heard about their cafeteria being full--we can certainly give suggestions.

Also, I would imagine that their cleaning is probably dictated by USDA which would be fine, wouldn't it Mel?

And if they have someone that is sick at work, I think putting a mask on them while they wait/social distancing is about as good as they can get.

I can do a call between 10-12 on Tuesday (3/24) or between 2-3:30. If that doesn't work we can look at Wednesday. T

On Mon, Mar 23, 2020 at 4:37 PM Tammy Hort RN, CIC <tammyh@nchd.org> wrote:

If there is an employee that tests positive, Cargill will be notified - need to know who the employee stands by on the fab line, etc.

I would like to know what will need to be done for the employee if 14 days of quarantine or isolation is required. NCHD cannot assist the employee with all the paperwork involved with short term disability PLUS it is highly unlikely the employee would be seen by a PCP.

Is there any way they can practice social distancing in the locker rooms and cafeteria?

Subject: Cargill Questions

To: [melb@nchd.org](mailto:melb@nchd.org) <[melb@nchd.org](mailto:melb@nchd.org)>

Good day Mr. Bustos –

Thanks for talking with me this morning, your time is valuable and I know you are very busy with all that is going on. Tyler Luft our General Manager, Gene Guerrero our EHS Manager and myself wanted to reach out with a few questions and get your expert opinion, guidance and thought on a few items. As an “essential business” in this community we want to maintain best practices and keeping all involved in daily operations safe.

1. If a employee were to test positive for COVID-19, would Cargill be notified and instructed to take further measures?
2. If a employee were to test positive for COVID-19, what is the Health Dept vs. Cargill’s responsibility related to cleaning/disinfected; in addition to the efforts already in place at Cargill?
3. If there happen to be more than one employee that would require isolation until they are able to find transportation home, is it reasonable for those individuals to be seated in the same isolation room with appropriate PPE i.e. mask and social distancing?

These are a few of our questions. As we are able to talk I’m sure a few more will come to mind. This is all very new to all of us and I realize all the answers may not be right there, but it will be good to discuss and learn. Let me know when a good time will be to have a Skype call or Conference call. I know all are very busy, so its whenever you all have a moment.

*Best,*

*Scott Reyez, BSN, RN, CCRN*

*Health Services Manager*

If there is an employee that tests positive, Cargill will be notified - need to know who the employee stands by on the fab line, etc.

I would like to know what will need to be done for the employee if 14 days of quarantine or isolation is required. NCHD cannot assist the employee with all the paperwork involved with short term disability PLUS it is highly unlikely the employee would be seen by a PCP.

Is there any way they can practice social distancing in the locker rooms and cafeteria?

Subject: Cargill Questions

To: [melb@nchd.org](mailto:melb@nchd.org) <[melb@nchd.org](mailto:melb@nchd.org)>

Good day Mr. Bustos –

Thanks for talking with me this morning, your time is valuable and I know you are very busy with all that is going on. Tyler Luft our General Manager, Gene Guerrero our EHS Manager and myself wanted to reach out with a few questions and get your expert opinion, guidance and thought on a few items. As an “essential business” in this community we want to maintain best practices and keeping all involved in daily operations safe.

1. If a employee were to test positive for COVID-19, would Cargill be notified and instructed to take further measures?
2. If a employee were to test positive for COVID-19, what is the Health Dept vs. Cargill's responsibility related to cleaning/disinfected; in addition to the efforts already in place at Cargill?
3. If there happen to be more than one employee that would require isolation until they are able to find transportation home, is it reasonable for those individuals to be seated in the same isolation room with appropriate PPE i.e. mask and social distancing?

These are a few of our questions. As we are able to talk I'm sure a few more will come to mind. This is all very new to all of us and I realize all the answers may not be right there, but it will be good to discuss and learn. Let me know when a good time will be to have a Skype call or Conference call. I know all are very busy, so its whenever you all have a moment.

*Best,*

*Scott Reyez, BSN, RN, CCRN*

*Health Services Manager*

Upon arrival to the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, googles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. Face shields are provided depending on the employee's job on the line. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services. Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, approved chemicals are used to disinfect. In common areas and offices there is a combination of applied disinfectant as well as fogging with approved (CDC website) chemicals that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

### Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

Cc: Kelly Durham

David Merriam

Thank you all for your time yesterday. As discussed the Fort Morgan Leadership Team and I walked the plant yesterday. Please find below a summary of our next steps.

Some background on what we currently have in place (for several weeks now):

- Maximum occupancy limits on meeting rooms and other common areas.
- Seating limited to one person per table in the break rooms
- Temperature checks and a health screener for anyone entering the facility
- Close proximity devices (like our air showers) used for GMP's have been turned off
- In some locations we have floors marked with proper distancing where ques are likely
- Facemasks and snoods (see the picture attached) in place for all employees
- Curtain barriers in place for our hand pack line (people stand shoulder to shoulder about 5 feet apart)
- Disinfecting of high touch surfaces multiple times per shift
- Deep clean and disinfecting protocol for enactment when we have a positive case in the plant
- Contact tracing and risk assessment protocols for all positive employees
- Expanded staggering of shift changes to help minimize the number of people flowing into and out of the plant at one time
- Constant communication with all employees at a plant level and from Denver

Based on our conversation we are also implementing the following asap:

- Chairs will be removed from pre-shift meeting rooms and the floors marked where people are to stand to prevent unintentional crowding
- Expanded marking of floors where ques form to ensure we do not have crowding
- Routine Chlorine Dioxide gassing of all common areas in the plant
- Moving the smoke area to a location that is visible from the Manager's windows and marking the ground to ensure distancing
- Maxing out air exchanges on all HVAC units in the plant
- Mandating use of N95 masks in control rooms and offices where we have higher density populations. We are not requiring these on the line as breathing under heavy exertion would become an issue.
- Having "hall monitors" in our locker rooms to ensure distancing. This is our closest confinement area in the plant.

We do have a **request for you**. We are wondering if you would be willing to make a short video (2 – 3 minutes) talking about the importance of social distancing and masks in and out of work. It continues to amaze us how people "just don't get it" even with all the communication we have done. There was a situation with an employee yesterday, identified in contact tracing, that went fishing with a positive employee! We are hoping that maybe a message direct from a public health official may have an impact. If you are willing I would have Kim DeVigil work with you on talking points and the logistics of the video (we have been shooting them on webcams).

We are testing an additional 30 people today in Fort Morgan that have been identified through contact tracing. We will also be up there tomorrow to test our every other day asymptomatic people as well as catch any stragglers from our tracing and risk assessments.

I have attached a number of the documents referenced above for your review and input. We are always open to feedback and ideas.

Finally, when Kelly can catch her breath today she will send you the summary of the positive and negative employees that we have tested.

Kind Regards,

Jason

Hi Jason. I have a couple other questions.

1. Do these individuals work at the plant on the weekend?
2. Is everyone there full time or are some part time/PRN? I am wondering about other employment outside of Leprino.

Thanks! Tammy

Tammy and Trish,

I hope your day is going better than mine.

We received results back from Fort Morgan this morning. I would like to schedule a call to discuss asap. Alternatively I am headed up to Fort Morgan around 12:30 today which would put me at the plant around 2. Could we meet there? We will need some assistance and meeting at the facility and doing a walk through would be helpful to us.

Hi Mel,

Thanks for sending this along. CDPHE is unable to assist in this matter as the Department's jurisdiction is limited to the healthcare clinics within correctional facilities. I reached out to the complainant directly and provided her with the appropriate resources to report her concerns. Please let me know if I can assist further.

Sincerely,

Katie Meade

Subject: Hazardous practices at SCF.

To: <melb@nchd.org>

To anyone who can assist: My name is Shannon E. Russum. I live at 414 State Street in Sterling, Co. 80751. I am requesting an investigation at the Sterling Correctional facility. Starting today Friday the 17th of April 2020 they have started a new practice I feel very strongly places the entire community at risk. Today the correctional facility has started using non-essential staff to make direct contact with each and every inmate. Taking there temperature and asking health related question. The staff they are using are mental health staff. The gave them a 10 minute course on how to take a mask on and off. Not an N95 mask. A simple surgical mask. Along with a pair of gloves. I cannot speak for every member of the mental health team but I am certain the majority of them have not been trained in the prevention and spread of dangerous diseases. I feel this poses a serious health risk to all involved in this procedure including the inmates. I have a background in medical health. I know for a fact this is not something you can teach in a 10 minute class. As a result my fear is a serious cross contamination of COVID-19 taking place. Just now results in more people in direct contact with each and every inmate and intern returning home to their families in the community of Sterling. I am asking

## **Travel & Mileage Expense Reimbursement Policy**

Purpose: To ensure employees understand the policies and procedures related to being reimbursed for travel related expenses for Morgan County Family Center business.

1. Expenses will be reimbursed monthly.
2. Reimbursement report is to be turned in at the end of the month for which expenses were incurred. Mileage: actual mileage reimbursed at \$.50 cents per mile
3. Meals:
  - \* Original receipts turned in with report
  - \* Reimbursement will be up to, but will not exceed the state-approved per diem for location.
  - \* NO reimbursement for alcoholic beverages
  - \* TIPS: may be reimbursed if total amount of receipt with tip does not exceed allowed per diem rate for the meal.
5. Lodging: original receipt required
6. Parking/Tolls: original receipts required or if unavailable information on where parked & amount.
7. All travel must be preapproved ahead of time by the Executive Director or Supervisor.
8. Additional expenses accrued will be reviewed on a case by case basis. Expenses are not guaranteed to be approved. Original receipt is required for reimbursement of expenses.

**Northeast Colorado Health Department Business Social Distancing Protocol**

*Must be completed for each facility or work site*

Business Name: \_\_\_\_\_

Facility Address: \_\_\_\_\_

Approx. gross square footage of space open to the public: \_\_\_\_\_

**Businesses must implement all applicable measures listed below, and be prepared to explain why any measure that is not implemented is inapplicable to the business.**

**Signage**

- Signs have been placed at each public entrance of the facility or work site to inform all employees and customers that they should: avoid entering the facility or location if they have a cough or fever; maintain a minimum six-foot distance from one another; sneeze and cough into a cloth or tissue or, if not available, into one’s elbow; and not shake hands or engage in any unnecessary physical contact.  
*[sign template attached]*
- A copy of this Social Distancing Protocol has been placed at each public entrance to the work site.

**Measures To Protect Employee Health** *(check all that apply to the facility or work site)*

- Everyone who can carry out their work duties from home has been directed to do so.
- Individual discussions have taken place with employees about the fact that older adults and those with chronic medical conditions may be at higher risk for serious illness. Options have been explained to high risk employees, including ways to minimize face-to-face interactions, maintaining six feet of distance from other people, remote work if possible, and leave policies for employees who choose not to come to work.
- All employees have been told not to come to work if sick (including any of the following: headache, sore throat, fever, dry cough, recent inability to taste and smell, shortness of breath, ear aches, body aches, diarrhea, fatigue, vomiting, and abdominal pain).
- Symptom checks are being conducted before employees may enter the work site. *[template attached]*
- Copies of this Protocol have been distributed to all employees.
- Workers who interact in close proximity with other employees, or with the public, must wear medical or non-medical cloth face coverings that cover the nose and mouth while working, except where doing so would inhibit that individual’s health.
- Optional — Describe other measures:  
\_\_\_\_\_

**Measures To Keep People At Least Six Feet Apart** (check all that apply to the facility or work site)

- All employees have been instructed to maintain at least six feet of distance from customers and each other (employees may momentarily come closer when needed to accept payment, deliver goods or services, or when otherwise unavoidable).
- All desks, individual work stations, or work areas are separated by at least six feet.
- Tape or other markings have been placed at least six feet apart in customer line areas inside the store and on sidewalks to public entrances with signs directing customers to use the markings to maintain distance.
- Order areas are separated from delivery areas to prevent customers from gathering.
- Optional — Describe other measures:  

---

**Measures To Prevent Crowds From Gathering:** (check all that apply to the facility or work site)

- The number of customers in the store at any one time is limited to \_\_\_\_\_, which allows for customers and employees to easily maintain at least six-foot distance from one another at all practicable times.
- An employee is monitoring the door to ensure that the maximum number of customers in the facility set forth above is not exceeded.
- Optional—Describe other measures:  

---

**Measures To Increase Sanitization** (check all that apply to the facility or work site)

- Hand sanitizer, soap and water, or effective disinfectant is available to the public and employees at or near the entrance of the facility or work site, at checkout counters, workstations, and anywhere else where people have direct interactions. Location(s) include:  

---
- Disinfecting wipes or spray that is effective against COVID-19 are available near workstations and all high-contact surfaces (including payment portals, carts, baskets, pens, shared tools, heavy equipment, etc.). Location(s) include:  

---
- Employee(s) have been assigned to disinfect all high-contact surfaces frequently.
- Break rooms, bathrooms, and other common areas are being disinfected on the following schedule:
  - Break Rooms 

---
  - Bathrooms 

---
  - Other 

---
- Optional — Describe other measures:  

---

**Measures To Prevent Unnecessary Contact** (check all that apply to the facility or work site)

- Contactless payment systems have been provided or, if not feasible, payment systems are sanitized regularly. Describe:

---

- Curb-side drop-off/pick-up of products is available.
- People are prevented from self-serving any items that are food-related (including bulk food, plates, cups, lids, etc.).
- Optional—Describe other measures (e.g. providing senior-only hours):

---

**Measures To Reduce Exposures in Employee Transportation** (check all that apply to the facility or work site)

- Hand sanitizer is used by each passenger when entering the vehicle.
- The number of passengers has been reduced by 50% of the vehicle's occupancy, and passengers sit in locations to maximize the distance between one another.
- Passengers will wear a non-medical, cloth face-covering when in a vehicle containing more than 1 person.
- Windows will remain open and ventilation is increased.
- All high-contact surfaces of the vehicle are disinfected at the end of each day.

---

*Any additional measures not included here should be listed on separate pages,  
which the business may attach to this document.*

**You may contact the following person with any questions or comments about this protocol:**

**Name:**

---

**Phone number:**

---

## **NCHD District Operations Center**

### **Situation Report 03/19/2020**

**\*\*\*ALL UPDATES ARE IN RED\*\*\***

#### **SITUATION**

- Currently there has been two positive test result reported from Wray Hospital in Yuma County, as well as Morgan County
- DOC has been activated at Level 1 (full staffing) through this week from 0800-1700
- IMT (24 team members) has been activated and is staffing DOC as well as performing operational field duties
- **Following social distancing guidelines, we have transitioned from full staffing in the DOC to key leadership only with support staff working remotely. Combined in-person / remote-staffing and coordination is working well.**
- JIS has been activated
- Actively working with Colorado Division of Homeland Security and Emergency Management on the potential of a Public Health Emergency Declaration

#### **OBJECTIVES**

- Actively conduct disease surveillance activities in cooperation with appropriate partners throughout operational period
- Monitor news and social media outlets for intelligence throughout operational period
- Develop educational news release and disseminate to media and partners by 1200
- Develop RTP site plan by end of operational period
- Receive and process resource requests throughout operational period
- Activate Joint Information System and coordinate with partner agencies by 1200
- Develop process for tracking personnel time and supply expenditures by 1700
- Develop COOP guidance for NCHD offices, staff and clients/patients and disseminate by 1700

#### **COMMAND**

- Coordinating NCHD's preparedness and response activities with state and local OEM's
- Managing DOC and IMT
- Actively working with DOC on providing security, transportation, and escort for supplies.
- **Coordinating with Centennial Mental Health on plans for providing support to NCHD staff**

#### **PUBLIC INFORMATION**

- Public Affairs team is actively monitoring news outlets and social media to collect situational awareness in order to better direct communications strategies for the development and dissemination of materials appropriate for the education and protection of the public.
- Generating and sharing public health messaging and educational materials in both English and Spanish
- Activated JIS and actively engaging with partner agencies to share and disseminate coordinated messaging and educational materials

- Activated and staffing Spanish information line (970-522-3741 x1228), available 0800-1700 until further notice.
- Working with local radio stations to ensure messaging is provided in Spanish were available
- Working on putting out support information for small business' and employees

### **OPERATIONS**

- Providing guidance and consultation to partner organizations and local governments regarding decisions around social distancing and other non-pharmaceutical interventions
- Provided testing recommendations and guidance to facilities and jurisdictions

### **INVESTIGATION GROUP**

- Conducting disease surveillance activities in coordination with hospitals, medical providers, regional epidemiologists and CDPHE
- Investigating open cases of positive test results
- Assisting medical providers who have questions regarding state or federal guidance
- Providing consultation to medical providers regarding specific patient circumstances and/or potential COVID-19 exposures
- Actively sharing HAN's and other guidance geared towards medical providers
- Preparing additional nursing staff to assist with case investigation and contact tracing of patients who test positive for COVID-19
- Preparing for the issuance of quarantine and isolation orders, and developed plan for appropriate monitoring of patients while at home
- Educating partners on legal implications of quarantine and isolation orders

### **ENVIRONMENTAL HEALTH GROUP**

- Working with retail food establishments, bars and others to provide guidance and instructions regarding the CDPHE closure order
- Providing consultation to law enforcement and other partners with regard to implementation and enforcement of the closure order
- Working with facility owners on plans to prevent food waste in facilities that are closed

### **COOP GROUP**

- Activated NCHD COOP plan
- Activated NCHD's facility infection control plan and provided guidance and instructions for staff in all six county offices to screen all visitors and staff coming in, and regarding enhanced disinfection procedures in the offices
- Working with all NCHD program managers to scale back or refine day to day operations while still maintaining critical public health core services such as WIC, immunizations, vital records - this information will be available to the public as soon as possible
- Developed and disseminated regarding altered department activities in both English and Spanish to clients, patient and partner organizations who refer people here for services
- Developing telecommuting (work-at-home) plan to assist with transitioning in-person DOC activation to allow for minimum staffing in the facility for social distancing purposes, and to ensure that the entire IMT can still effectively and efficiently maintain operations at near full capacity with the majority of staff working remotely
- Developed minimum staffing plan to ensure county offices can remain open for services

### **PLANNING**

- Actively monitoring multiple sources of information from around the area to gain intelligence necessary to assist NCHD in targeting disease control efforts
- Participating in state and local conference calls with partners
- Engaging with all IMT members to capture information on activities and prepare daily situation report
- Assisting with the building of IAP

## **LOGISTICS**

- Developed Regional Transfer Point (RTP) site plan with Logan County Emergency Manager, in advance of receipt of SNS supplies
- Coordinating with partners and utilizing WebEOC to process resource requests from hospitals and long term care centers
- Updating facility profiles in IMATS (SNS inventory management system)
- Fulfilling resource requests for PPE from local cache
- **Drafted and disseminated new simplified resource request guidance**
- **Met w/ Colorado Dept of Corrections to review MOU and develop plan to utilize CDOC staff to provide security, escorts, storage and/or transportation of assets from the SNS**

## **FINANCE**

- Actively tracking employee time and expenses
- Actively tracking supply and resource expenses

700 Columbine St., Sterling, CO 80751 - (970) 522-3741 - 877-795-0646 - [www.nchd.org](http://www.nchd.org)

# COVID-19 Resources

## COVID-19 CASE COUNT BY COUNTY

as of 04/09/2020

County ↕	Age 20-39↕	Age 40-59↕	Age 60-79↕	Age 80+↕	Total↕
Logan	5	5	2	1	13
Morgan	9	28	13	7	57
Phillips	0	0	4	0	4
Sedgwick	0	0	0	0	0
Washington	1	0	1	0	2
Yuma	0	1	1	0	2
Total	15	34	21	8	78

The number of cases includes people who have had a test that indicated they were positive for COVID-19. The number of cases also includes epidemiologically-linked cases -- or cases where public health epidemiologists have determined that infection is highly likely because a person exhibited symptoms and had close contact with someone who tested positive. The number of epidemiologically-linked cases represents a very small portion of the reported cases.

NCHD / DHSEM Call – 4/9/20 at 11:00 am

Kevin: The state EOC and the Dept of Ag initiated a call regarding JBS. At JBS in Greeley, there have been a large number of complaints this week from staff regarding safety and lack of precautions with staff. There is said to be 20 confirmed cases at the JBS facility. Environmental staff visited the facility and found deficiencies in wellness checks with employees. The staff were educated. There is concern that we share the same workforce. Roger has done follow-up with Cargill. There is concern that the local media is starting to pick this up. Leadership cautioned. There was a discussion around shutting the facility down for 2 weeks using a public health order. This is a critical food supply. If shut down, there will be a mad dash by the community to pick up meat, paper towels, or other supplies. We do not want people thinking it is in the food. If the plant closed for 2 weeks, the workers will pick up and move on to the next job available. Feedlots will then have to shut down, manage capacities they have, then this trickles down to the farmer/rancher. There would be trucking concerns. Then Dairy and Leprino could be affected. There will be a call today, and then tomorrow will have a follow-up call with JBS. I would like to know what complaints we are receiving, and what the plan is moving forward?

Trish: We have had some complaints about failure for distancing, working next to each other, stressful, concerns regarding positive tests. Communications we have had as an agency with Scott Reyez, Tyler, and Gene discussed how to stay ahead of the issues. Tammy had sent an email Monday about her conversation with Scott. Upon a positive test, families are 14 day quarantined. They are tracing carpooling and quarantining those individuals as well. Some fabrication areas cannot distance, wearing scarf or mask, moving lunchroom seating around, cleaning offices and doorknobs. Scott has been taking care of the plant side, and we take care of other stuff. We received a media request wondering about Cargill and the spike of positive cases in Morgan County. More testing is being completed in Morgan County than surrounding counties. So, more will be seen with more testing. Media had reported on JBS Plant and wondered how many in Cargill. Tyler was informed about the inquiry. He is talking to their group. From our point of view, they are making a good effort. We have not inspected things. Since they are a big employer, and part of the food chain, we must show what they are doing to keep staff safe. More education or support from deficiencies. Have had some positive cases there, but unsure how many. We don't know how many have been tested, and testing is delayed. So, total numbers of tests are unknown. Heather can explain the complaints we have been receiving.

Heather: We have concerned employees calling in that are unwilling to file a complaint. The major concern is that when the facility knows someone is coming, they operate differently than they normally would. They know people are coming in, and by the time people pass the lengthy screening area, the operation has changed. There have only been a couple of complaints filled out, but we get more concerned callers than actual complaints. Our last discussion was that they are screening all employees, and they were going to have 100% screening of all people entering the building by the end of that week.

Roger: Contacted Tyler (plant manager) and Scott and have talked to Gene. They are making sure information goes through one or two people. Scott's information is the same as what you have reported. They are trying to screen everyone. They send several employees home daily via self-reporting or those feeling ill. They are trying to get them back to work as quickly as they can. They

report hourly cleaning, lunchroom separation, masks, face shields, social distance where they can (sometimes they can't). Screening is slowing how people come in the facility. They have made spaces for people to wait, which is marked to ensure people are 6' apart. I asked about production. They are concerned about information getting out. With the number of employees they have out of work, it is putting a damper on production. Regarding screening, they struggle with temperature services. They report 100% screening of all employees. There is one entrance in and out. Got a call from community member about them being closed and dispelled the rumor. HR person wondered about county employees or relatives that are concerned. Wondering with the number of cases if it isn't safe, and if people should continue to go out there. Rumors on closing, health, and safety are out there.

Kevin: These reports make me feel good. Taking notes on observations and discussions. If another scheduled call tomorrow, will report out on what is going on. No flags have been raised with these reports. Stories change as they go from one person to another. Not the first time JBS has had workplace concerns. Our workforce comes from Greeley daily, so it draws concerns. Have a lot of respect for the folks out there in production. I do see the concerns and based on reports today the concerns are less. Dr. Wallace may contact Trish today. Will leave it up to you as the professionals to keep working with Cargill.

Trish: We will continue to monitor. We know people are concerned. Tammy would let us know if something is wrong. If there were a large amount of our case count at Cargill, she would tell us. We are keeping open communication with Scott and Tyler. We understand the concerns. Bad news spreads way faster than the truth. If we have a concern, we will circle back. At this point, we are not doing anything to cast them in a bad light. Will not throw them to the Press. If Mark calls, I will talk to him to see what they are looking at doing. I reached out previously, and no reply. JBS seems to have more issues overall.

Kevin: I have not been in that plant in a very long time. Believes they have union reps and would think that they would be involved.

Roger: Cargill has been trying hard. It is in their best interest to keep staff healthy. They seem to be honest with communication. Nothing has been verified at this point. They are struggling with having enough personnel to screen. Messaging regarding jump in numbers needs addressed. Saying more testing, so more numbers in Morgan may help ease fears.

Trish: We have talked about that. Not panicking people but informing them. There was a large dump on Tuesday due to a lab dump of testing results. We are looking at a Long-Term Care facility outbreak in the county as well. We are looking to do a press release to understand the jump in numbers. Hopefully that will encourage people to stay home.

Kevin: I am reminding others that NCHD is doing a good job. Will pass on information and will do a follow-up call tomorrow. Two other topics while I have you. FYI, Don contacted that PPE is doing ok. However, they are running low on hand sanitizer. I put in a request through Morgan County up to the

State. There is a distillery in Lyons making disinfectant for \$15 a gallon. Will follow up with coroner's office to see if they have a need as well. Other concern is alack of planning statewide. Had an initial planning meeting over a week ago, and have others who could join the staff. Mortuary response trailer is available. PPE is available but hoping it doesn't go to that. Working with Mass fatality team.

Trish: Have also spoke to Don. Wash hands and wear a mask when you go out.

Kevin: Had a call with Kit Carson Health this morning. FYI, there was a donation of 6000 face masks at the local hospital. These went on with a couple other pallets. The word is that Ford dropped off face shields. They were going to ask the state how to get rid of them. Asked to see if hospitals in our region have a standing request for face shields. Will see if they can hold a couple hundred back for anything in the 213 process now. If we need to transfer to the North, will work with NCHD on that.

Mike: We have received several, and still have some on hand from our SNS shipment. Due to the rate we are going through things, there is no indication that we will get more. We would love to keep supplies in the region somehow. With current situations, we have pushed out a large amount of PPE. It has put a significant dent in our supplies.

Kevin: Larimer and Weld is soliciting test kits and supplies, so will try to keep as much as we can in our region.

4/27/20

To Whom It May Concern:

We are writing this letter in hopes to encourage a set date for the openings of local gyms and fitness centers. Both myself, my husband, and my son have been members of our local gym for over 10 years and exercise is a part of our daily routine.

It is hard to put into words how much going to our local gyms, whether it be to run on the treadmill to clear your mind, lift weights to relieve stress, or utilize the machines means to individuals.

This is particularly important to my husband, as he has limited movement in his feet and ankles so running and exercising outside on uneven ground is not an option.

You see my husband Mark was a State of Colorado Correctional Officer for many years, when he was ran over by a piece of heavy equipment in 2008 and was transported by ambulance to Medical Center of the Rockies. After several consultations doctors felt they could save his foot and discuss amputation later if needed. A month in the hospital, 9 surgeries, 12 screws, 2 skin grafts, & a bone graft later he began recovery. He had years of recovery ahead and additional surgeries and as a result became very depressed, and gained weight which in turn increased blood pressure levels. Paula, at The Body Firm, along with the rest of the staff would help us wheel him into the facility and help him lift weights for upper body, ride the exercise bike to increase movement on his ankle, and helped give him the support he needed at the time, in order for him not to just sit at home and give up.

I could go on and on about his recovery story, but the point I am trying to make is that your local gyms are just as important to the community as grocery stores, liquor stores, and/or the marijuana industry and should not be discriminated against. It would have been so easy for my husband to give up and drink his life away when he was told he may not ever walk again, and certainly would not be able to run again, but with the support of his family and the Body Firm Fitness Center, he was able to not only receive therapy daily but be able to get out of the house, interact, and feel like he was part of society again. We never had to worry about infections, cleanliness, or anything else when he was at the gym as The Body Firm has staff there to assist individuals and wipe down equipment even prior to Covid19.

Besides my husband, I have seen other members with disabilities, along with elderly (such as the Silver Sneakers Club) that utilize the local gyms on a daily basis. They are not as fortunate as others to be able to walk around the neighborhood or local park without assistance in order to get their daily exercise. So I ask why are they being discriminated upon? Why are we less important than a consumer who chooses to go to the local grocery store 3 times a week that has more than 10 people in it, and/or a consumer who chooses to buy a 6 pack of beer daily? After myself and/or any other gym member gets done using equipment that equipment is sprayed down prior to being used by another individual. I ask, is this the same precautions being used when someone reaches for a box of cereal at the local grocery store and then puts it back, or when you are opening up a cooler to grab an alcoholic beverage & exchanging money at these stores for your purchase?

At a time when studies show that people that are less healthy, such as those that are obese, or have high blood pressure, and/or diabetes, etc... have a higher risk of catching this awful disease why would you not want to open up the gyms? Please do not allow one business to take precedence over another when it comes to the physical & mental health and wellbeing of the community during these trying times. The local fitness centers understand the severity of the Covid19 decease and have taken additional precautions to not only sanitize more, but also limit the number of individuals in their facilities at a time. If our local gyms are taking the necessary steps to make it safe to reopen, then why are they not being allowed to do so, but a liquor store, marijuana dispensary, or grocery store are allowed too?

Please take the time to read this letter, address my concerns & questions, and give the community a date to look forward to on the opening of these gyms & give us something to look forward to other than getting drunk & high.

Thank you and stay healthy,

The Pena Family

## **PUBLIC HEALTH ORDER 20-26 FACE COVERINGS FOR CRITICAL BUSINESSES**

### **PURPOSE OF THE ORDER**

I issue this Public Health Order (PHO or Order) pursuant to the Governor's directive in **Executive Order D 2020 0139 Ordering Workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings** in response to the existence of thousands of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, as there is substantial evidence of community spread of COVID-19 throughout the State, it is crucial to take measures now that can mitigate further spread of disease in our communities.

### **FINDINGS**

1. Governor Polis issued Executive Order D 2020 003 on March 11, 2020, declaring a disaster emergency in Colorado due to the presence of COVID-19. Since that time, the Governor has taken numerous steps to implement measures to mitigate the spread of disease within Colorado, and has further required that several public health orders be issued to implement his orders.
2. I have issued public health orders pertaining to the limitation of visitors and nonessential individuals in skilled nursing facilities, intermediate care facilities, and assisted living residences; closing bars and restaurants to in-person services; and defining the terms of the Governor's stay at home requirements and critical business designations. These measures all act in concert to reduce the exposure of individuals to disease, and are necessary steps to protect the health and welfare of the public. Additionally, in reducing the spread of disease, these requirements help to preserve the medical resources needed for those in our communities who fall ill and require medical treatment, thus protecting both the ill patients and the healthcare workers who courageously continue to treat patients.
3. PHO 20-24 lists numerous critical businesses and government functions that must continue during our response to this pandemic. As many employees of Critical Businesses and Critical Government Functions serve in public-facing roles, in doing these jobs, they are risking that they may become ill through contact with others, and also that if they are ill and they may not know it, they may infect others. To protect against further spread of disease, Governor Polis has ordered that all workers in Critical Businesses and Critical Government Functions where workers interact in close proximity with other employees or with the public wear medical or

non-medical cloth face coverings that cover the nose and mouth while working, except where doing so would inhibit that individual's health, and also, to the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer.

## ORDER

**I. Face Coverings.** All employees of Critical Businesses or performing Critical Government Functions who work in close proximity to other employees or with the public shall wear a medical or non-medical face covering to help prevent the spread of disease. Employers who operate Critical Businesses or manage Critical Government Functions should make every effort to provide their workforce with medical or non-medical face coverings. Unless working in a healthcare setting, employers should provide non-medical face coverings for their employees. Employers shall make every effort to assign employees who cannot wear face coverings for health or safety reasons to perform work that does not bring the worker into close proximity with other employees or the public.

A. Workers who may routinely or consistently come within 6 feet of other workers or the public are considered to be in close proximity to others and must wear a medical or non-medical face covering that covers the worker's nose and mouth, unless doing so would inhibit the individual's health. Workers with health issues that preclude them from wearing a face covering must document those concerns with their employer.

B. A worker may use a face covering provided by their employer, if available, or may choose to use their own face covering. Cloth face coverings should fit snugly but comfortably against the side of the face, include multiple layers of fabric, allow for breathing without restriction, and be able to be laundered and machine dried without damage or change to shape. Face coverings need to cover the nose and mouth at all times and should remain in place until taken off safely. If a worker's face covering moves during work, it needs to be replaced with one that does not need to be frequently adjusted to reduce touching of the face. Workers should replace face coverings when theirs becomes dirty, wet, and/or difficult to breathe through.

C. Workers who prepare or handle food that will be made available to the public for purchase, such as restaurant or grocery store workers, must wear a face covering while performing tasks involving food preparation and handling.

D. As directed in **Executive Order D 2020 039**, workers in the congregate care settings identified in **Amended Public Health Order 20-20**, and all third parties entering congregate care settings must wear face coverings in the workplace.

**II. Gloves.** All employees of Critical Businesses or performing Critical Government Functions who come into contact with customers or goods should wear gloves, if gloves are provided by their employer. Employees in food and child care industries shall minimally utilize disposable gloves as normally required by their governing regulations. Employees that are

directly involved with disinfecting equipment and surfaces within critical business and/or have direct contact with customers shall wear gloves when involved in these activities.

**III. Enforcement.** This order will be enforced by any appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties including a fine of up to one thousand (1,000) dollars and imprisonment in the county jail for up to one year, pursuant to 25-1-114, C.R.S.

**IV. Severability.** If any provision of this PHO to the application thereof to any person or circumstance is held to be invalid, the remainder of the PHO, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this PHO are severable.

**VII. Duration.** This PHO shall become effective at 6:00 a.m. on Thursday April 23, 2020 and will continue to be in effect until 11:59 p.m. on May 17, 2020, unless extended, rescinded, superseded, or amended in writing.

## ORDEN PÚBLICA DE SALUD 20-26 TAPABOCAS EN NEGOCIOS ESENCIALES

### PRÓPOSITO DE LA ORDEN

Emito esta Orden de Salud Pública (PHO, por sus siglas en inglés, u orden), conforme con la directiva del gobernador en la **Orden Ejecutiva D 2020 0139 (Orden a trabajadores de los negocios esenciales y en funciones gubernamentales esenciales a usar mascarilla no médica)**, en respuesta a la existencia de miles de casos confirmados y presuntos de la enfermedad del coronavirus 2019 (COVID-19) y muertes relacionadas en el estado de Colorado. Asimismo, ya que existen pruebas sustanciales de una propagación comunitaria del COVID-19 a lo largo y ancho del estado, es vital tomar las medidas ahora para mitigar una mayor propagación de la enfermedad en nuestras comunidades.

### HALLAZGOS

1. El Gobernador Polis emitió la Orden Ejecutiva 2020 003 el 11 de marzo de 2020, declarando una emergencia por desastre en Colorado debido a la presencia de COVID-19. Desde ese entonces, ha tomado varias medidas para mitigar la propagación en el estado e igualmente ha requerido la emisión de varias órdenes de salud pública para la implementación de sus órdenes ejecutivas.
2. Yo he emitido órdenes de salud pública concerniente a la restricción de visitantes y personas no esenciales en las instalaciones de enfermería especializada, residencias de vivienda asistida y las instalaciones de cuidados intermedios; el cierre de bares y restaurantes para servicios presenciales; la definición de los términos de la orden del gobernador acerca de los requerimientos de quedarse en casa y la designación de negocios esenciales. Estas medidas actúan de una manera concertada para reducir la exposición de la comunidad a la enfermedad e igualmente son necesarias para proteger la salud y el bienestar del público. Además de reducir la propagación de la enfermedad, dichos requerimientos contribuyen a conservar los recursos médicos necesarios para aquellas personas en la comunidad que se enfermen o necesiten tratamiento médico y, por consiguiente, a proteger tanto los pacientes enfermos como los trabajadores sanitarios, quienes continúan atendiendo a pacientes con tanta valentía.
3. PHO 20-24 enumera los muchos negocios esenciales y funciones gubernamentales que deben continuar durante la respuesta ante esta pandemia. Ya que muchos de sus empleados desempeñan un papel que les requiere estar en contacto con el público, se exponen a enfermarse a través de dicho contacto con otros en la realización de sus labores. Es más, si están enfermos y no lo saben, podrían infectar a otros. Por lo tanto, para proteger contra una mayor propagación de la enfermedad, el Gobernador Polis ha ordenado a todos los trabajadores de los negocios esenciales y funciones gubernamentales esenciales, en dónde interactúan en estrecha proximidad con otros empleados o con el público, usar mascarilla médica o tapabocas no médico que cubra la nariz y boca durante el trabajo, con la excepción de situaciones que inhibirían la salud.

Adicionalmente, en la medida de lo posible, deberán llevar guantes cuando tengan contacto con clientes o productos, si el empleador los provee.

## ORDEN

**I. Tapabocas.** Todos los empleados de negocios esenciales o los que realizan una función esencial del gobierno y que trabajan en estrecha proximidad con otros empleados o con el público, deberán usar tapabocas médico o no médico para prevenir la propagación de la enfermedad. Los empleadores que operan dichos negocios o gestionan dichas funciones no deben escatimar esfuerzos para brindar a su fuerza laboral tapabocas, sean médicos o no. A menos que sea un trabajo en un entorno sanitario, los empleadores deben proveer un tapabocas no médico para los empleados. Asimismo, deberán hacer todo lo posible para asignar los empleados que no pueden usar tapabocas por razones de salud o seguridad a labores que no requieran que el trabajador tenga una estrecha proximidad con otros empleados o el público.

A. Se considera estrecha proximidad cuando un trabajador se encuentra a 6 pies o menos de forma rutinaria o constante de otros trabajadores o el público; en tal caso, deberá usar un tapabocas médico o no médico que cubra la nariz y boca, con la excepción de situaciones que inhibirían su salud. Los trabajadores con problemas de salud que les impiden el uso de tapabocas deberán documentar sus preocupaciones con el empleador.

B. Un trabajador puede usar el tapabocas que el empleador provee, si está disponible, o puede usar su propio tapabocas. Los tapabocas de tela deben ser cómodos, pero ajustados a la forma de la cara. Asimismo, deben incluir múltiples capas de tela, permitir la respiración sin restricción y ser de una tela que se pueda lavar y secar a máquina sin dañarse o cambiarse de forma. Deben cubrir la nariz y la boca en todo momento y permanecer en lugar hasta que se quite de manera segura. Si el tapabocas del trabajador se mueve en el transcurso del trabajo, se debe cambiarlo por uno que no requiera ser ajustado frecuentemente para así reducir la necesidad de tocarse la cara. Se deben reemplazar cuando se ensucian, se mojan y/o llega a ser difícil respirar.

C. Los trabajadores que preparan o manejan alimentos para la compra del público, como en un restaurante o supermercado, deberán usar tapabocas en la realización de sus labores relacionadas con la preparación y manejo de los alimentos.

D. Conforme a lo dispuesto en la **Orden Ejecutiva D 2020 039**, los trabajadores de entornos de cuidados institucionales, según identificado en la **Modificación de la Orden Pública de Salud 20-20**, además de toda tercera persona que entre a dichos entornos, deberán usar tapabocas en el lugar de trabajo.

**II. Guantes.** Todos los empleados de los negocios esenciales o los que realizan una función esencial del gobierno que tengan contacto con clientes o productos, deberán usar guantes, si el empleador los provee. Los empleados de las industrias de alimentos y de cuidados infantiles deberán usar guantes desechables, según los reglamentos normales pertinentes a su trabajo. Los que trabajen directamente con la desinfección de equipo y superficies dentro de los negocios esenciales y/o que tengan contacto directo con clientes deberán usar guantes en la realización de dichas actividades.

### III. Aplicación de esta orden

Se aplicará esta orden mediante cualquier medio legal. Se insta a las autoridades locales a determinar las mejores acciones para incentivar el máximo cumplimiento. El incumplimiento de esta orden podría resultar en sanciones, incluyendo una multa de hasta mil dólares (\$1,000) y reclusión en la cárcel del condado de hasta un año, conforme a 25-1-114, C.R.S.

### IV. Exclusiones

Si cualquier disposición de la presente Orden de Salud Pública (PHO), tanto su aplicación contra cualquier persona o circunstancia se determinara inválida, el resto de la PHO incluyendo la aplicación de dicha parte no se verá afectado. Igualmente, la disposición seguirá en plena vigencia para otras personas o circunstancias. A estos efectos, las disposiciones de esta PHO son aplicables una a una.

### V. Vigencia

Esta orden entrará en vigor a partir de las 6:00 a.m., jueves 23 de abril 2020 y seguirá en vigor hasta las 11:59 p.m., 17 de mayo 2020, a no ser que se extienda, rescinda, reemplace o modifique por escrito.

Jill Hunsaker Ryan, Directora Ejecutiva de MPH

22 de abril 2020

## ORDEN PÚBLICA DE SALUD 20-26 TAPABOCAS EN NEGOCIOS ESENCIALES

### PRÓPOSITO DE LA ORDEN

Emito esta Orden de Salud Pública (PHO, por sus siglas en inglés, u orden), conforme con la directiva del gobernador en la **Orden Ejecutiva D 2020 0139 (Orden a trabajadores de los negocios esenciales y en funciones gubernamentales esenciales a usar mascarilla no médica)**, en respuesta a la existencia de miles de casos confirmados y presuntos de la enfermedad del coronavirus 2019 (COVID-19) y muertes relacionadas en el estado de Colorado. ## ORDEN

**I. Tapabocas.** Todos los empleados de negocios esenciales o los que realizan una función esencial del gobierno y que trabajan en estrecha proximidad con otros empleados o con el público, deberán usar tapabocas médico o no médico para prevenir la propagación de la enfermedad. Los empleadores que operan dichos negocios o gestionan dichas funciones no deben escatimar esfuerzos para brindar a su fuerza laboral tapabocas, sean médicos o no. A menos que sea un trabajo en un entorno sanitario, los empleadores deben proveer un tapabocas no médico para los empleados. Asimismo, deberán hacer todo lo posible para asignar los empleados que no pueden usar tapabocas por razones de salud o seguridad a labores que no requieran que el trabajador tenga una estrecha proximidad con otros empleados o el público.

A. Se considera estrecha proximidad cuando un trabajador se encuentra a 6 pies o menos de forma rutinaria o constante de otros trabajadores o el público; en tal caso, deberá usar un tapabocas médico o no médico que cubra la nariz y boca, con la excepción de situaciones que inhibirían su salud. Los trabajadores con problemas de salud que les impiden el uso de tapabocas deberán documentar sus preocupaciones con el empleador.

B. Un trabajador puede usar el tapabocas que el empleador provee, si está disponible, o puede usar su propio tapabocas. Los tapabocas de tela deben ser cómodos, pero ajustados a la forma de la cara. Asimismo, deben incluir múltiples capas de tela, permitir la respiración sin restricción y ser de una tela que se pueda lavar y secar a máquina sin dañarse o cambiarse de forma. Deben cubrir la nariz y la boca en todo momento y permanecer en lugar hasta que se quite de manera segura. Si el tapabocas del trabajador se mueve en el transcurso del trabajo, se debe cambiarlo por uno que no requiera ser ajustado frecuentemente para así reducir la necesidad de tocarse la cara. Se deben reemplazar cuando se ensucian, se mojan y/o llega a ser difícil respirar.

C. Los trabajadores que preparan o manejan alimentos para la compra del público, como en un restaurante o supermercado, deberán usar tapabocas en la realización de sus labores relacionadas con la preparación y manejo de los alimentos.

D. Conforme a lo dispuesto en la **Orden Ejecutiva D 2020 039**, los trabajadores de entornos de cuidados institucionales, según identificado en la **Modificación de la Orden Pública de Salud 20-20**, además de toda tercera persona que entre a dichos entornos, deberán usar tapabocas en el lugar de trabajo.

**II. Guantes.** Todos los empleados de los negocios esenciales o los que realizan una función esencial del gobierno que tengan contacto con clientes o productos, deberán usar guantes, si el empleador los provee. Los empleados de las industrias de alimentos y de cuidados infantiles deberán usar guantes desechables, según los reglamentos normales pertinentes a su trabajo. Los que trabajen directamente con la desinfección de equipo y superficies dentro de los negocios esenciales y/o que tengan contacto directo con clientes deberán usar guantes en la realización de dichas actividades.

### III. Aplicación de esta orden

Se aplicará esta orden mediante cualquier medio legal. Se insta a las autoridades locales a determinar las mejores acciones para incentivar el máximo cumplimiento. El incumplimiento de esta orden podría resultar en sanciones, incluyendo una multa de hasta mil dólares (\$1,000) y reclusión en la cárcel del condado de hasta un año, conforme a 25-1-114, C.R.S.

### IV. Exclusiones

Si cualquier disposición de la presente Orden de Salud Pública (PHO), tanto su aplicación contra cualquier persona o circunstancia se determinara inválida, el resto de la PHO incluyendo la aplicación de dicha parte no se verá afectado. Igualmente, la disposición seguirá en plena vigencia para otras personas o circunstancias. A estos efectos, las disposiciones de esta PHO son aplicables una a una.

### V. Vigencia

Esta orden entrará en vigor a partir de las 6:00 a.m., jueves 23 de abril 2020 y seguirá en vigor hasta las 11:59 p.m., 17 de mayo 2020, a no ser que se extienda, rescinda, reemplace o modifique por escrito.

Jill Hunsaker Ryan, Directora Ejecutiva de MPH

22 de abril 2020

## **PUBLIC HEALTH ORDER 20-28 SAFER AT HOME**

### **PURPOSE OF THE ORDER**

I issue this Public Health Order (PHO or Order) pursuant to the Governor's directive in **Executive Order D 2020 044 Safer at Home** in response to the existence of thousands of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, as there is substantial evidence of community spread of COVID-19 throughout the State, it is crucial to take measures now that can mitigate further spread of disease in our communities.

### **FINDINGS**

1. Governor Polis issued Executive Order D 2020 003 on March 11, 2020, declaring a disaster emergency in Colorado due to the presence of COVID-19. Since that time, the Governor has taken numerous steps to implement measures to mitigate the spread of disease within Colorado, and has further required that several public health orders be issued to implement his orders.
2. I have issued public health orders pertaining to the limitation of visitors and nonessential individuals in skilled nursing facilities, intermediate care facilities, and assisted living residences; closing bars and restaurants to in-person services; defining the terms of the Governor's stay at home requirements and critical business designations; requiring hospitals to report information relevant to the COVID-19 response; and requiring the wearing of face coverings in the workplace and urging their use in public. These measures all act in concert to reduce the exposure of individuals to disease, and are necessary steps to protect the health and welfare of the public. Additionally, in reducing the spread of disease, these requirements help to preserve the medical resources needed for those in our communities who fall ill and require medical treatment, thus protecting both the ill patients and the healthcare workers who courageously continue to treat patients.
3. As of April 25, 2020, there are 13,441 known cases of COVID-19 in Colorado; however, testing for COVID-19 is not yet common. As of April 25, 2020, 2,438 Coloradans have been hospitalized and 680 Coloradans have died from COVID-19. Multiple sources of data show that COVID-19 transmission and the use of healthcare due to COVID-19 have leveled off in

Colorado. Our work to “flatten the curve” appears to be succeeding, and the Governor has ordered some lessening of the current stay at home restrictions as a result.

4. **Executive Order D 2020 044** authorizes transitioning from a stay at home model, as described in **Executive Order D 2020 017** and **Public Health Order 20-24** as amended, to a **Safer at Home** model. **Safer at Home** still requires that **Vulnerable Individuals** remain at home, but allows limited reopening of postsecondary institutions and certain businesses. Additionally, individuals are encouraged to stay at home as much as possible and practice Social Distancing to reduce the likelihood of disease transmission, but certain activities, such as gathering in groups of no more than ten for activities, are permitted. As we continue to combat COVID-19 in our communities, continuing restrictions on individual travel and necessary activities remain appropriate.

### INTENT

This Order sets forth the requirements for implementation of Safer at Home, as directed by Governor Polis. Individual restrictions remain in place concerning limitations on activities, travel, and public gatherings. Workplace restrictions remain necessary to implement standard Social Distancing Requirements, cleaning standards, and other items necessary to reduce the possibility of disease spread. Additionally, certain businesses and activities require specific guidance based on their business practices, and those are included in the appendices to this Order.

### ORDER

Unless otherwise specifically noted in this Order, the requirements of this Order are effective April 27, 2020. This Order supersedes and replaces Public Health Orders 20-22 and 20-24, as amended.

#### I. **Safer at Home**

A. All individuals currently living within the State of Colorado are encouraged to stay at home and avoid unnecessary interactions whenever possible in order to reduce the spread of disease. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, defined in Section III below, and are encouraged to leave their residences only to perform or utilize **Necessary Activities**, defined in Section III below.

B. Individuals are urged to wear non-medical cloth face coverings that cover the nose and mouth whenever in public as required by **Executive Order D 2020 044**.

**C.** All public and private gatherings of any number of people occurring outside a residence are limited to no more than (10) individuals, except for the purposes expressly permitted in this PHO, which include **Necessary Activities**. Nothing in this Order prohibits the gathering of members living in the same residence.

**D.** People at high risk of severe illness from COVID-19 are urged to stay in their residence at all times except as necessary to seek medical care. **Vulnerable Individuals** cannot be compelled to work for any business or government function, including a Critical Business or Critical Government Function, during the pendency of this pandemic emergency. People who are sick must stay in their residence at all times except as necessary to seek medical care, and must not go to work, even for a **Critical Business**, defined in Section III below.

**E.** Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

**F.** Governmental and other entities are strongly urged to make shelter available to people experiencing homelessness as soon as possible and to the maximum extent practicable, and are authorized to take all reasonable steps necessary to provide non-congregate sheltering along with necessary support services to members of the public in their jurisdiction as necessary to protect all members of the community. People experiencing homelessness are urged to protect their health and safety by complying with **Social Distancing Requirements** at all times.

**G.** Individuals are encouraged to limit travel to **Necessary Travel**, defined in Section III below, including but not limited to, travel by automobile or public transit. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Businesses** or maintain **Critical Governmental Functions** as authorized in Section II of this Order. People riding on public transit must comply with **Social Distancing Requirements** to the greatest extent feasible.

**H.** Individuals may participate in local and personal recreation in outside public spaces, as an authorized **Necessary Activity**, in groups no larger than 10 and practicing social distancing maintaining 6 feet between participants. Travel for recreational purposes should be limited to your own community like your county of residence or traveling no more than about 10 miles. Playgrounds and playground equipment remain closed. Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals complying with **Social Distancing Requirements**; except for members of a single household, sharing equipment is prohibited.

## **II. Business Requirements**

**A.** The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public:

1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption;
3. Cigar bars;
4. Gyms, except for the limited purpose authorized in Section I.H;
5. Movie and performance theaters, opera houses, concert halls, and music halls;
6. Casinos; and
7. Horse tracks and simulcast facilities, also known as off-track betting facilities.

These restrictions do not apply to any of the following:

1. Room service in hotels;
2. Health care facilities, residential care facilities, congregate care facilities, and juvenile justice facilities;
3. Crisis shelters or similar institutions;
4. Airport concessionaires;
5. Institutions of higher education offering dining hall services located in or adjacent to campus dormitories that are accessed through student, staff, faculty, or campus associated identification, as well as grab and go food services within these institutions, while exercising social distancing measures of at least six feet between individuals;

6. Fitness centers and nonessential personal services included in residential facilities, such as hotels, apartment or condominium complexes or similar housing arrangements, that are limited to use only by hotel guests or residents of the housing who are following social distancing requirements of at least 6 feet between individuals, and the hotel or property managers are performing frequent environmental cleaning; and
7. Any emergency facilities necessary for the response to these events.

**B.** All **Critical Businesses** and **Critical Government Functions**, as defined in Section III below, may continue to operate. **Critical Businesses** must comply with **Social Distancing Requirements** at all times, adopt work from home or tele-work policies for any operations that can be done remotely, and implement other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other **Critical Retail** shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line. **Critical Business** and **Critical Government Functions** shall continue to promote telecommuting to the greatest extent possible.

**C.** All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory **Social Distancing Requirements**, except as prohibited or limited by **Executive Order D 2020 044** or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

**D.** All **Non-Critical Retail**, as defined in Section III below, may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory social distancing requirements, similar to the requirements for **Critical Retail**. Additional requirements for **Critical** and **Non-Critical Retail** are contained in **Appendix A** of this Order.

**E.** All **Field Services**, including real estate, may resume operations, in accordance with the requirements of this Order including **Appendix B**. Real estate includes in-person real estate showings and marketing services which must adhere to **Social Distancing Requirements** with cleaning and disinfection between each showing, but may not hold open houses.

**F.** Other health care services not covered by Executive Order 20 0XX **Voluntary or Elective Surgeries Or Procedures**, in certain limited healthcare settings may resume if done in accordance with the requirements of **Appendix E**.

**G.** Effective May 1, 2020, **Non-Critical Retail** and limited **Personal Services** may resume in-person services if they meet the requirements in Section II.I below and the additional requirements outlined for these services in **Appendices B and D** of this Order.

**H.** Effective May 4, 2020, **Non-Critical Office-Based Businesses** operating in an office and not a production environment, as defined in Section III below, may allow up to fifty (50) percent of their employees to conduct in-person work that takes place outside a private residence in accordance with the requirements in Section II.I below and the additional requirements outlined in **Appendix C**.

**I. All Business and Government Functions. Critical Businesses, Critical Government Functions, Non-Critical Office-Based Businesses, Personal Services, Limited Healthcare Settings, and Non-Critical Retail** shall all follow the protocols below:

1. Employers and sole proprietors shall take all of the following measures within the workplace to minimize disease transmission, in accord with the [CDPHE Guidance](#):

- a. deputize a workplace coordinator(s) charged with addressing COVID-19 issues;
- b. maintain 6 foot separation between employees and discourage shared spaces;
- c. [clean and disinfect](#) all high touch areas;
- d. post signage for employees and customers on good hygiene;
- e. ensure proper ventilation;
- f. avoid gatherings (meetings, waiting rooms, etc) of more than 10 people;
- g. implement symptom monitoring protocols (including workplace temperature monitoring), conduct daily temperature checks and monitor symptoms in employees. A sample form can be found [here](#). If an employee reports any symptoms, refer symptomatic employees to the [CDPHE Symptom Tracker](#) and take all of the following steps:
  1. send employee home immediately;
  2. increase cleaning in your facility and require social distancing of staff at least 6 feet apart from one another;

3. exclude employee until they are fever-free, without medication, for 72 hours and 7 days have passed since their first symptom; and
    4. if multiple employees have these symptoms, contact your local health department; and
    - h. eliminate or regularly [clean and disinfect](#) any items in common spaces, such as break rooms, that are shared between individuals, such as condiments, coffee makers, vending machines.
2. Employers shall take all of the following measures regarding employees to minimize disease transmission:
  - a. require employees to stay home when showing any symptoms or signs of sickness, and connect employees to company or state benefits providers;
  - b. provide work accommodations for **Vulnerable Individuals**, who remain subject to **Stay at Home** advisement, prioritizing telecommuting, as **Vulnerable Individuals** shall not be compelled to go to work during the pendency of this pandemic emergency;
  - c. provide to the greatest extent possible flexible or remote scheduling for employees who may have child or elder care obligations, or who live with a person who still needs to observe **Stay at Home** due to underlying condition, age, or other factor;
  - d. encourage and enable remote work whenever possible;
  - e. encourage breaks to wash hands or use hand sanitizer;
  - f. phase shift and breaks to reduce density; and
  - g. provide appropriate protective gear like [gloves, masks, and face coverings](#).
3. Employers and sole proprietors shall implement the following measures regarding customers to minimize disease transmission:
  - a. create whenever possible special hours for **Vulnerable Individuals** only;
  - b. encourage 6 foot distancing inside of the business for all patrons;
  - c. encourage customer use of protection like gloves and face coverings;
  - d. provide hand sanitizer at the entrances to the greatest extent possible; and
  - e. use contactless payment solutions, no touch trash cans, etc. whenever possible.

4. Employers with over fifty (50) employees in any one location shall, in addition to the above requirements, implement the following protocols:
  - a. implement stations for symptom screening and temperature checks, and follow the requirements in Section II.G.1.g above;
  - b. close common areas to disallow gatherings of employees;
  - c. implement mandatory cleaning and disinfection protocols; and
  - d. require mandatory adherence to **Social Distancing Requirements**.

**J. Work Accommodations.** Employers must provide reasonable work accommodations for **Vulnerable Individuals** who are still under the **Stay at Home** advisement, such as telecommuting. Employers are encouraged to provide reasonable work accommodations for individuals who reside with or are caring for **Vulnerable Individuals**, or facing child care needs while schools remain closed.

**K. Specific Industry Requirements.** Additional requirements for specific industries are included in the following Appendices to this Order:

1. Appendix A: Critical and Non-Critical Retail Requirements
2. Appendix B: Field Services
3. Appendix C: Non-Critical Office-Based Businesses and Offices
4. Appendix D: Personal Services
5. Appendix E: Limited Healthcare Settings

### III. Definitions

**A. Necessary Activities.** For purposes of this PHO, individuals are encouraged to only leave their Residence to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 are urged not to leave their residence except as necessary to receive medical care. People who are sick must not leave their residence except as necessary to receive medical care, and must not go to work, even for a **Critical Business**. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by

way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.

3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public who live in the vicinity to engage in walking, hiking, biking, running, and similar outdoor activities, basketball and tennis courts may be open for use by individuals or members of the same household only, but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. For other parks, check with the local jurisdiction and follow any requirements for that jurisdiction. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III, below.
4. Performing work providing for businesses, government entities, and industries authorized Section II of this Order, or to otherwise carry out activities permitted in this Order.
5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**, and other businesses or industries authorized in Section II of this Order; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of residence from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) travel to transport children between separate households pursuant to a parenting plan or other agreement governing parental responsibilities; (6) non-residents returning to their place of residence; (7) moving to a new residence, including individuals whose Residence is unsafe due to domestic violence concerns.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed in **Appendix F**, must continue to comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. A list of Critical Businesses is contained in **Appendix F** to this Order.

**D. Critical Government Functions.** The provision, operation and support of the following state and local government functions shall continue:

1. Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
2. Emergency response
3. Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
4. Legislative and executive branch functions
5. Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)
6. Designated emergency shelters
7. Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
8. Public utility plant facilities for generation and distribution (drinking water and wastewater infrastructure, hubs, treatment plants, substations and pumping stations for power and gas, but not including towers, poles, power lines, and oil and gas buried pipelines)
9. Transportation. All public and private airports, airlines, taxis, transportation network companies (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
10. Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
11. Hazardous material safety
12. Services to at-risk populations and **Vulnerable Individuals**
13. Activities related to federal, state, and local elections, including any required acts of a political party, provided **Social Distancing Requirements** are observed to the greatest extent possible
14. Any government service, state or local, required for the public health and safety, government functionality, or vital to restoring normal services

**E. Field Services** means a service that is being provided out in the field as opposed to a company property, including third party private properties, such as a third party household.

**F. Gym** means a building or room used for indoor sports or exercise, such as fitness, dance, exercise or group classes, exercise studios and centers, recreation centers, bowling alleys, pools, and other indoor athletic facilities.

**G. Horse track** means a licensed race track, which is any premises licensed pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes for the conduct of racing. Sections 44-32-102(2)(a), (2)(b), (3), (8) & (24), C.R.S.

**H. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business's inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their residences are allowable pursuant to this Order; continue filling online product orders and to process customer orders remotely. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**I. Non-Critical Office-Based Business** means any commercial business that is conducted in an office and not a production environment and is not included in the list of **Critical Businesses** in **Appendix F**.

**J. Non-Critical Retail** means any retail service that is not included in the list of critical retail services in **Appendix F**. Examples of **Non-Critical Retail** include retailers of clothing, home goods, cell phone stores, mattresses, appliances, thrift shops, apothecaries, vape and tobacco shops, craft, hobby and fabric stores, fishing tackle retailers, sporting goods, boutiques, etc.

**K. Limited Healthcare Settings** means those locations where certain healthcare services are provided, including acupuncture (not related to personal services), athletic training (not related to personal services), audiology services, services by hearing aid providers, chiropractic care, massage therapy (not related to personal services), naturopathic care, occupational therapy services, optometry services, podiatry services, physical therapy, and speech language pathology services. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and patients, e.g. 5 chiropractors providing services to 5 customers, with **Social Distancing Requirements** in place of 6 feet distancing between customers receiving services. Employees must wear medical grade masks at all times, and patients must wear at least a [cloth face covering](#) at all times.

**L. Personal Services** means services and products that are not necessary to maintain an individual’s health or safety, or the sanitation or essential operation of a business or residence. **Personal Services** include, but are not limited to, pastoral services except as specified in **Appendix F**, personal training, dog grooming, or body art and also applies to noncritical professionals regulated by the Division of Professions and Occupations, within the Department of Regulatory Agencies (DORA) including but not limited to services provided by personal beauty professionals such as hairstylists, barbers, cosmetologists, estheticians, nail technicians, as well as massage therapists, whose work requires these professionals to be less than six feet from the person for whom the services are being provided. Massage therapy services ordered by a healthcare professional should consult **Executive Order D 2020 027**. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and customers, e.g. 5 hairstylists providing services to 5 customers, with **Social Distancing Requirements** of at least 6 feet distancing between different customers receiving services. Both employees and customers must wear at least a cloth face covering or a medical grade mask at all times. Only services that can be performed without the customer removing their mask are permitted.

**M. “Safer at Home”** means individuals stay in your place of residence as much as possible, and avoid unnecessary social interactions.

**N. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**O. Simulcast facility** means a licensed in-state simulcast facility pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes, also commonly referred to as an “off-track betting facility” or “OTB”. Sections 44-32-102(11) & (21), C.R.S.

**P. Stay at Home** means to stay in your place of residence, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support, perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**.

**Q. “Vulnerable Individual”** means:

1. Individuals who are 65 years and older;
2. Individuals with chronic lung disease or moderate to severe asthma;

3. Individuals who have serious heart conditions;
4. Individuals who are immunocompromised;
5. Pregnant women; and
6. Individuals determined to be high risk by a licensed healthcare provider.

**IV. Postsecondary Institutions.** Programs and courses at postsecondary institutions that cannot be conducted remotely, generally due to equipment requirements, may be conducted through limited in-person instruction. Institutions that wish to resume providing in-person instruction must inform the Colorado Department of Higher Education and ensure that **Social Distancing Requirements** are strictly followed. Additionally, students are allowed to opt out of the in-person instruction; such students will be treated no differently than students in all other courses that have ceased in-person instruction due to the COVID-19 situation.

**V. Variance Requests.** Any Colorado county may request a variance from the Colorado Department of Public Health and Environment authorizing implementation of an alternative COVID-19 suppression plan that differs from part or all the requirements of **Executive Order D 2020 044** or this Order. The variance request must include an alternative COVID-19 suppression plan endorsed by the local public health agency and adopted by the county commissioners or other county-level governing body, in addition to verification from local hospitals that they have the capacity to serve all people needing their care. Further guidance on variance requests is contained in **Appendix G**.

#### **VI. Enforcement**

This Order will be enforced by all appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties, including jail time, and fines, and may also be subject to discipline on a professional license based upon the applicable practice act.

#### **VII. Severability**

If any provision of this Order or the application thereof to any person or circumstance is held to be invalid, the remainder of the Order, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

### **VIII. Duration**

This Order shall become effective at 6:00 a.m. on Monday April 27, 2020 and will continue to be in effect until 11:59 p.m. on May 26, 2020, unless extended, rescinded, superseded, or amended in writing.

## APPENDIX A. CRITICAL AND NON-CRITICAL RETAIL REQUIREMENTS

**I.** Effective April 27, 2020, in addition to meeting the requirements of this Order, and specifically Section II.I, **Non-Critical Retail** may may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory **Social Distancing Requirements**, except as prohibited or limited by this Order. Restricting interactions to curbside pick-up or delivery minimizes touch. **Non-Critical Retailers** are encouraged to continue curbside pick-up or delivery for longer term service wherever possible. **Critical** and **Non-Critical Retailers** must implement the requirements in Section II.I, in addition to the specific requirements in this Appendix.

**A.** **Critical** and **Non-Critical Retail** must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#). Refer symptomatic employees to the [CDPHE Symptom Tracker](#).
4. Post signage for employees and customers on good hygiene and other sanitation practices.

**B.** **Critical** and **Non-Critical Retail** must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.

5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

C. Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

**II.** Effective May 1, 2020, **Non-Critical Retail** may open at fifty percent (50%) capacity for in-person services if the business can demonstrate compliance with all of the following requirements:

**A.** **Critical and Non-Critical Retail** must continue implementing the measures within the workplace listed in Section I.A of this **Appendix A**, and in addition:

1. maintain 6 foot distancing between patrons and employees;
2. effectively symptom monitor employees as listed in Section II.I;
3. provide face coverings, and gloves as necessary and appropriate, to employees;
4. ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. provide dedicated, in-store hours for vulnerable or at-risk individuals.

**B.** **Critical and Non-Critical Retail** must implement the measures regarding employees listed in Section I.B of this **Appendix A**.

**C.** **Critical and Non-Critical Retail** must implement the measures to minimize disease transmission for customers listed in Section I.C of this **Appendix A** in addition to the following measures:

1. limit the number of customers on the premises as needed to make 6 foot distancing between customers attainable;
2. provide decals and demarcation for waiting area in lines that meet social distancing criteria;
3. create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
4. create signage to encourage the use of masks and gloves by customers while on the premises; and

5. provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

## APPENDIX B: FIELD SERVICES

I. Effective April 27, 2020, **Field Services** may resume if the business can demonstrate compliance with the requirements in Section II.I of this Order, in addition to the following requirements specific to **Field Services**:

A. Employers must implement the following measures regarding employees to minimize disease transmission:

1. adhere to all general rules or guidance on social gathering limitations when working out of the office;
2. implement procedures for field-based employees to monitor for symptoms and report-in to management daily on health status.
3. comply with the **Social Distancing Requirements** and maintain a 6 foot distance between employees and from their customers;
4. provide gloves and masks for any customer interactions or work being done in third-party home or office spaces;
5. When scheduling or conducting field services, either the employer or an employee must inquire whether third-party homes have individuals symptomatic for COVID-19 or have been in contact with known positive cases, and exercise caution when inside the home and interacting with anyone in the home if they do;
6. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, and location of contact, as well as the contact's phone number and/or email address;
7. require that all tools or equipment be sanitized after each customer visit;.
8. prioritize work accommodations for **Vulnerable Individuals**, prioritizing telecommuting;
9. provide guidance and encouragement on personal sanitation, including frequently washing hands. This guidance should include all of the following:
  - a. frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol;
  - b. cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve;
  - c. avoid touching your eyes, nose, and mouth with unwashed hands;
  - d. stay home if you're sick, and keep your children home if they are sick; and
  - e. clean high touch surfaces in your home, and personal items such as cell phones, using regular household products.

**B.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. provide estimates, invoices, receipts, and other documentation electronically to negate the need for paper;
2. provide contactless payment options in the field whenever possible;
3. encourage customers to maintain 6 foot distancing from field service employees; and
4. encourage customers to use facial coverings when field services are being conducted.

## APPENDIX C: NON-CRITICAL OFFICE-BASED BUSINESSES

**I.** Effective May 4, 2020, **Non-Critical Office-based Businesses** may resume at fifty percent (50%) of their in-office occupancy if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers must implement the following measures within the workplace to minimize disease transmission:

1. ensure a minimum of 6 feet of space between all desks and workspaces;
2. modify the flow of people traffic to minimize contacts, such as identifying doors for entry or exit only;
3. conduct standard office cleaning with increased frequency and supplement with sanitization of high touch areas, in accord with [CDPHE guidelines](#);
4. provide employees with cleaning and disinfecting products and guidance on daily workspace cleaning routines; and
5. post signage for employees and customers on good hygiene and new office practices.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. maintain in-office occupancy at no more than 50% of total by maximizing use of telecommuting and developing in-office rotation schedules;
2. minimize the number of in-person meetings and maintain 6 foot distancing in those meetings;
3. provide guidance and encouragement on maintaining 6 foot distancing and taking breaks to wash hands;
4. require gloves and masks for any customer interactions; and
5. allow telecommuting to the greatest extent possible.

**C.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. require 6 foot distancing measures wherever possible, such as marked space in check-out lines;
2. encourage customers to use facial coverings when on the business premises;
3. provide hand sanitizer at entrances and other high-traffic locations; and
4. implement hours where service is only provided to **Vulnerable Individuals** if possible.

## APPENDIX D: PERSONAL SERVICES

**I.** Effective May 1, 2020, **Personal Services** may resume if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers and sole proprietors must implement the following measures within the workplace to minimize disease transmission:

1. Employ strict hygiene guidelines and cleaning and disinfection procedures for all contact surfaces and tools, in accordance with [CDPHE Worker and Customer Protection Guidelines for Non-Healthcare Industries](#);
2. Ensure a minimum of 6 feet of separation between clients and customers, including services for pets, when not directly performing service;
3. Post signage for employees and customers on good hygiene and safety measures being taken; and
4. Minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. Services with close personal contact, such as beauty professionals, massage, etc., must implement the following:
  - a. wear a face covering and gloves at all times, or, if wearing gloves is not feasible or appropriate, meticulous hand washing;
  - c. change gloves and wash hands between every individual or pet served;
  - d. clean and disinfect all shared equipment and tools between every individual or pet served; and
  - e. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number and/or email address.
2. Personal services with low personal contact, such as movers or repair services, must implement the following:
  - a. maintain a minimum of 6 feet of separation between customers and adhere to social gathering limits of no more than 10 people. For real estate work, open houses are prohibited;
  - b. require face coverings and, if feasible, gloves for any customer interactions; and

- c. provide guidance on strict hygiene precautions to employees.

**C. Personal Services** must implement the following measures regarding customers to minimize disease transmission:

1. provide customer services by appointment only, do not allow walk-ins or waiting for an appointment, and limit all pet training classes or other activities associated with picking up pets to no more than 10 customers at a time and all following **Social Distancing Requirements**;
2. require customers to wear face coverings; if a customer does not have a mask, a "disposable mask" could be provided;
3. conduct symptoms check for all customers of services with close personal contact and decline to provide services to anyone who has symptoms. A sample form can be found [here](#); and
4. provide contactless payment options whenever possible.

## APPENDIX E: LIMITED HEALTHCARE SETTINGS

I. Effective April 27, 2020, **Limited Healthcare Settings** may resume if the healthcare entity can demonstrate compliance with the requirements of this Order, including Section II.I and may restart voluntary and elective surgeries and procedures in limited healthcare facilities and offices with required personal protective equipment (PPE) in accord with the priorities, requirements, and specific criteria below.

A. Employers and sole proprietors of **Limited Healthcare Settings** must implement the following measures within the overall workplace, including administrative and front office operations, to minimize disease transmission:

1. The practice must have access to adequate PPE in order to sustain recommended PPE use for its workforce for two weeks without the need for emergency PPE-conserving measures. If a practice proposes to extend the use of or reuse PPE, it must follow CDC guidance.<sup>1</sup>
2. The practice must implement strict infection control policies as recommended by the CDC.<sup>2</sup>
3. The practice must ensure a minimum of 6 feet of separation between clients and patients, when not directly performing service, with no more than ten (10) people in the facility;
4. The practice must post signage for employees and patients on good hygiene and safety measures being taken; and
5. The practice must minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.
6. Practices must maintain a plan to reduce or stop voluntary and elective surgeries and procedures should a surge/resurgence of COVID-19 cases occur in their region.

B. Employers of **Limited Healthcare Settings** must implement the following measures regarding employees to minimize disease transmission:

1. Services with close, direct personal contact must implement the following:
  - a. wear medical grade mask and gloves at all times;
  - b. change gloves and wash hands between every patient;
  - c. clean and disinfect all shared equipment and tools between every patient;and

---

<sup>1</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>

<sup>2</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html>

- d. maintain a detailed log of patient interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number
2. Services with low personal contact must implement the following:
  - a. maintain a minimum of six 6 feet of separation between customers and limit to no more than ten (10) people in the facility.
  - b. require face coverings and, if feasible, gloves for any customer interactions; and
  - c. provide guidance on strict hygiene precautions to employees.
3. The practice must require all administrative personnel to wear a facemask, that can be cloth if necessary. Masks may be removed when social distancing of at least 6 feet if possible (e.g., after entering a private office). In order to ensure staff can take off their masks for meals and breaks, scheduling and location for meals and breaks should ensure that at least a 6-foot distance can be maintained between staff when staff needs to remove their mask. It is important for healthcare settings to emphasize that hand hygiene is essential to maintaining employee safety, even if staff are wearing masks. If the facemask is touched, adjusted or removed, hand hygiene should be performed.

**C. Limited Healthcare Settings** must implement the following measures regarding customers to minimize disease transmission:

1. The practice must provide services by appointment only, do not allow walk-ins or waiting for an appointment;
2. The practice must require patients to wear face coverings; if a patient does not have a mask, a "disposable medical mask" could be provided;
3. The practice must conduct symptoms checks for all patients, decline to provide services to anyone who has symptoms, and refer them to their primary care physician. A sample form can be found [here](#); and
4. The practice must provide contactless payment options whenever possible;
5. The practice must follow social distancing protocols of maintaining at least a 6-foot distance between individuals wherever possible such as in waiting rooms and other small spaces, and should use physical barriers within patient care areas when possible.
6. The practice must appropriately schedule patients, so that providers have sufficient time to change PPE and ensure rooms and equipment can be cleaned and disinfected between each patient.
7. The practice should continue to maximize the use of telehealth and virtual office or clinic visits.

8. The practice should use virtual waiting rooms when possible, with patients who are able to wait in their cars not entering the office until they can be moved immediately to an exam room.
9. The practice should implement source control for everyone entering the office or clinic, including requiring all patients and visitors to wear a cloth mask when entering any healthcare building, and if they arrive without a mask, one should be provided.

D. As best practice, it is recommended that once voluntary and elective surgeries and procedures resume, **Limited Healthcare Settings** reassess their operations every two weeks, in order to ensure:

1. All of the above approaches and criteria are being met;
2. Procedures are prioritized based on whether their continued delay will have an adverse health outcome.
  - a. Voluntary and elective surgeries and procedures should be prioritized based on indication and urgency<sup>3</sup>;
3. Strong consideration is given to the balance of risks versus benefits for patients in higher-risk groups such as those over age 65 and those with compromised immune systems or lung and heart function;
4. All patients are pre-screened for COVID-19 risk factors and symptoms prior to delivering care, via telehealth when applicable; and
5. Compliance with the guidance and directives for maintaining a clean and safe work environment issued by the CDPHE and any applicable local health department for critical businesses is maintained, including compliance with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible.

---

<sup>3</sup> Urgent and emergent care should continue in accordance with OHA and CMS guidance.

## APPENDIX F: CRITICAL BUSINESSES

**Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

### 1. Healthcare Operations, Including:

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities
- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

### 2. Critical Infrastructure, Including:

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater

- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation, excluding private, short-term vacation-style rentals such as those arranged through an online hosting platform, including but not limited to VRBO or Airbnb, rented for a period of 30 days or fewer, homeowner rentals, and privately owned residences for rent, except if offered for use for the public health response.
- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain
- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection
- Flight schools, but only for the purpose of FAA-required pilot proficiency, and currency activities and practical checkrides, not for elective routine flight instruction

### **3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products
- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

#### 4. Critical Retail, Including:

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Liquor stores
- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products), excluding retailers of only health and nutrition-related products (vitamins, minerals, supplements, herbs, sports nutrition, diet and energy products)
- Establishments engaged in the sale of products that support working from home (this exclusion does not include businesses that primarily sell hobby craft supplies)

#### 5. Critical Services, Including:

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, automobile online sales with no touch delivery service, auto supply and repair (including retail dealerships that include repair and maintenance, but not in person retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries, with strict compliance with **Social Distancing Requirements** for employees and any attendees of services
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible. Houses of worship may remain open, however, these

institutions are encouraged to implement electronic platforms to conduct services whenever possible or to conduct smaller (10 or fewer congregants while ensuring 6 feet in between congregants), more frequent services to allow strict compliance with **Social Distancing Requirements**.

- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities
- Moving services
- In person group counseling or recovery meetings for substance abuse or behavioral health following social distancing of 6 feet and no more than 10 participants

## **6. News Media**

- Newspapers
- Television
- Radio
- Other media services

## **7. Financial and Professional Institutions, Including:**

- Banks and credit institutions
- Insurance and payroll
- Services related to financial markets
- Professional services, such as legal, title companies, or accounting services, real estate appraisals and transactions

## **8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

**9. Construction, Including but not Limited To:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals who provide services necessary to maintain the safety, sanitation, and critical operation of residences and other **Critical Businesses** or **Critical Government Functions**, and other essential services

**10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations
- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor (including maintenance and repair of ordinary household and business appliances but not in-person retail sales of such products)
- Automotive and bicycle repair
- Disinfection
- Snow removal
- Bail bonds agents
- Pest control

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics

- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**13. Educational Institutions that Provide Critical Services to Students and the General Public:**

- P-12 public school and private schools for the purpose of providing meals, housing, facilitating or providing materials for distance learning, and providing other essential services to students, provided that **Social Distancing Requirements** are observed.
- Postsecondary institutions, including private and public colleges and universities, for the purpose of facilitating distance learning, providing in person classroom or laboratory education for less than 10 students per classroom or lab in medical training fields only, or performing essential functions, provided that **Social Distancing Requirements** are observed, such as security, medical and mental health services, housing, food services, and critical research.

## **APPENDIX G: COUNTY VARIANCE REQUESTS**

Governor Jared Polis issued **Executive Order D 2020 044 Safer at Home** effective April 27, 2020. The key elements of the Order are that most people still stay at home as much as possible and avoid unnecessary social interactions; vulnerable populations continue to stay at home except to support or perform necessary activities or participate in critical government functions or critical businesses; there is limited reopening of postsecondary institutions, and certain business operations are permitted; people are still encouraged to stay within their county of residence or employment as much as possible; public gatherings of more than ten (10) persons are prohibited; and Coloradans are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public.

Any county that desires to apply for a variance from part or all of the executive order may do so after meeting the following criteria and submitting an alternative COVID-19 suppression plan to be approved or denied by Colorado Department of Public Health and the Environment (CDPHE), attention Executive Director, Jill Hunsaker Ryan, MPH.

Criteria for variance consideration:

- 1) The local public health agency endorses the alternative plan;
- 2) Local hospitals can verify that they have the capacity to serve all people needing their care; and;
- 3) The county commissioners (or other county-level governing body) vote affirmatively to adopt the alternative plan in place of the state Safer-At-Home order.

The local variance process allows communities that are not experiencing a high rate of transmission to tailor social distancing policies to local conditions, in order to promote community wellness and economic stability. To protect other communities and hospital systems statewide, it is paramount that the local variance process only be used when transmission is at a low enough level to be suppressed through testing and containment efforts to detect positive cases, ensure successful isolation and quarantine close contacts. Examples of local conditions that should be considered in seeking a variance include: a low number of new cases per day, cases declining for the past 14 days, declining positive tests as a percent of total tests for the past 14 days, low and stable case growth rate or equivalent, and having an early warning system to detect an increase in community spread or outbreaks, with triggers for tightening restrictions to prevent a breach of local hospital system capacity. Considerations and triggers should be documented in the plan submitted to CDPHE.

The following framework is being used by the State of Colorado to move between levels of social distancing. This may be helpful guidance in developing a local request:

**Colorado’s Framework for Social Distancing**

<b>Stay at Home</b>	<b>Safer At Home</b>	<b>Protect Your Neighbor</b>
<ul style="list-style-type: none"> <li>● Widespread suppression is required to stem exponential disease transmission</li> <li>● People are staying at home with limited exceptions</li> <li>● Healthcare/hospital capacity is still limited</li> <li>● Testing availability and containment capacity is still being built</li> <li>● People are encouraged to not travel between counties except for work or to obtain necessary services</li> </ul>	<ul style="list-style-type: none"> <li>● Disease has been suppressed and hospital capacity is not threatened.</li> <li>● Health care capacity is increasing</li> <li>● Testing availability and containment capacity are increasing</li> <li>● Most people still stay at home as much as possible and avoid unnecessary social interactions</li> <li>● Vulnerable populations stay home with limited exceptions</li> <li>● People are encouraged not to travel between counties except for work or to obtain necessary services</li> <li>● Public health has an early warning system to detect a significant increase in cases or greater demand for medical care</li> </ul>	<ul style="list-style-type: none"> <li>● Disease transmission is low</li> <li>● Healthcare capacity is robust</li> <li>● Testing availability and containment capacity are working at scale</li> <li>● It’s safer for people to socialize more normally, while taking significant precautions</li> <li>● Strong protections for vulnerable populations are still needed</li> <li>● Public health has an early warning system in place to detect a significant increase in cases or greater demand for medical care</li> </ul>

The Colorado Department of Public Health and Environment is available to provide technical assistance to any county considering a variance. The department will consider applications for variances based on the submitted plan’s rationale for a step down and the presence of an early

warning system with triggers for tightening back up. CDPHE reserves the right to approve or deny applications. Counties that choose to not comply with this executive order or an approved variance will be subject to the loss of emergency preparedness funds.

## **PUBLIC HEALTH ORDER 20-28 SAFER AT HOME**

### **PURPOSE OF THE ORDER**

I issue this Public Health Order (PHO or Order) pursuant to the Governor's directive in **Executive Order D 2020 044 Safer at Home** in response to the existence of thousands of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, as there is substantial evidence of community spread of COVID-19 throughout the State, it is crucial to take measures now that can mitigate further spread of disease in our communities.

### **FINDINGS**

1. Governor Polis issued Executive Order D 2020 003 on March 11, 2020, declaring a disaster emergency in Colorado due to the presence of COVID-19. Since that time, the Governor has taken numerous steps to implement measures to mitigate the spread of disease within Colorado, and has further required that several public health orders be issued to implement his orders.
2. I have issued public health orders pertaining to the limitation of visitors and nonessential individuals in skilled nursing facilities, intermediate care facilities, and assisted living residences; closing bars and restaurants to in-person services; defining the terms of the Governor's stay at home requirements and critical business designations; requiring hospitals to report information relevant to the COVID-19 response; and requiring the wearing of face coverings in the workplace and urging their use in public. These measures all act in concert to reduce the exposure of individuals to disease, and are necessary steps to protect the health and welfare of the public. Additionally, in reducing the spread of disease, these requirements help to preserve the medical resources needed for those in our communities who fall ill and require medical treatment, thus protecting both the ill patients and the healthcare workers who courageously continue to treat patients.
3. As of April 25, 2020, there are 13,441 known cases of COVID-19 in Colorado; however, testing for COVID-19 is not yet common. As of April 25, 2020, 2,438 Coloradans have been hospitalized and 680 Coloradans have died from COVID-19. Multiple sources of data show that COVID-19 transmission and the use of healthcare due to COVID-19 have leveled off in

Colorado. Our work to “flatten the curve” appears to be succeeding, and the Governor has ordered some lessening of the current stay at home restrictions as a result.

4. **Executive Order D 2020 044** authorizes transitioning from a stay at home model, as described in **Executive Order D 2020 017** and **Public Health Order 20-24** as amended, to a **Safer at Home** model. **Safer at Home** still requires that **Vulnerable Individuals** remain at home, but allows limited reopening of postsecondary institutions and certain businesses. Additionally, individuals are encouraged to stay at home as much as possible and practice Social Distancing to reduce the likelihood of disease transmission, but certain activities, such as gathering in groups of no more than ten for activities, are permitted. As we continue to combat COVID-19 in our communities, continuing restrictions on individual travel and necessary activities remain appropriate.

### INTENT

This Order sets forth the requirements for implementation of Safer at Home, as directed by Governor Polis. Individual restrictions remain in place concerning limitations on activities, travel, and public gatherings. Workplace restrictions remain necessary to implement standard Social Distancing Requirements, cleaning standards, and other items necessary to reduce the possibility of disease spread. Additionally, certain businesses and activities require specific guidance based on their business practices, and those are included in the appendices to this Order.

### ORDER

Unless otherwise specifically noted in this Order, the requirements of this Order are effective April 27, 2020. This Order supersedes and replaces Public Health Orders 20-22 and 20-24, as amended.

#### I. **Safer at Home**

A. All individuals currently living within the State of Colorado are encouraged to stay at home and avoid unnecessary interactions whenever possible in order to reduce the spread of disease. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, defined in Section III below, and are encouraged to leave their residences only to perform or utilize **Necessary Activities**, defined in Section III below.

B. Individuals are urged to wear non-medical cloth face coverings that cover the nose and mouth whenever in public as required by **Executive Order D 2020 044**.

**C.** All public and private gatherings of any number of people occurring outside a residence are limited to no more than (10) individuals, except for the purposes expressly permitted in this PHO, which include **Necessary Activities**. Nothing in this Order prohibits the gathering of members living in the same residence.

**D.** People at high risk of severe illness from COVID-19 are urged to stay in their residence at all times except as necessary to seek medical care. **Vulnerable Individuals** cannot be compelled to work for any business or government function, including a Critical Business or Critical Government Function, during the pendency of this pandemic emergency. People who are sick must stay in their residence at all times except as necessary to seek medical care, and must not go to work, even for a **Critical Business**, defined in Section III below.

**E.** Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

**F.** Governmental and other entities are strongly urged to make shelter available to people experiencing homelessness as soon as possible and to the maximum extent practicable, and are authorized to take all reasonable steps necessary to provide non-congregate sheltering along with necessary support services to members of the public in their jurisdiction as necessary to protect all members of the community. People experiencing homelessness are urged to protect their health and safety by complying with **Social Distancing Requirements** at all times.

**G.** Individuals are encouraged to limit travel to **Necessary Travel**, defined in Section III below, including but not limited to, travel by automobile or public transit. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Businesses** or maintain **Critical Governmental Functions** as authorized in Section II of this Order. People riding on public transit must comply with **Social Distancing Requirements** to the greatest extent feasible.

**H.** Individuals may participate in local and personal recreation in outside public spaces, as an authorized **Necessary Activity**, in groups no larger than 10 and practicing social distancing maintaining 6 feet between participants. Travel for recreational purposes should be limited to your own community like your county of residence or traveling no more than about 10 miles. Playgrounds and playground equipment remain closed. Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals complying with **Social Distancing Requirements**; except for members of a single household, sharing equipment is prohibited.

## **II. Business Requirements**

**A.** The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public:

1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption;
3. Cigar bars;
4. Gyms, except for the limited purpose authorized in Section I.H;
5. Movie and performance theaters, opera houses, concert halls, and music halls;
6. Casinos; and
7. Horse tracks and simulcast facilities, also known as off-track betting facilities.

These restrictions do not apply to any of the following:

1. Room service in hotels;
2. Health care facilities, residential care facilities, congregate care facilities, and juvenile justice facilities;
3. Crisis shelters or similar institutions;
4. Airport concessionaires;
5. Institutions of higher education offering dining hall services located in or adjacent to campus dormitories that are accessed through student, staff, faculty, or campus associated identification, as well as grab and go food services within these institutions, while exercising social distancing measures of at least six feet between individuals;

6. Fitness centers and nonessential personal services included in residential facilities, such as hotels, apartment or condominium complexes or similar housing arrangements, that are limited to use only by hotel guests or residents of the housing who are following social distancing requirements of at least 6 feet between individuals, and the hotel or property managers are performing frequent environmental cleaning; and
7. Any emergency facilities necessary for the response to these events.

**B.** All **Critical Businesses** and **Critical Government Functions**, as defined in Section III below, may continue to operate. **Critical Businesses** must comply with **Social Distancing Requirements** at all times, adopt work from home or tele-work policies for any operations that can be done remotely, and implement other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other **Critical Retail** shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line. **Critical Business** and **Critical Government Functions** shall continue to promote telecommuting to the greatest extent possible.

**C.** All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory **Social Distancing Requirements**, except as prohibited or limited by **Executive Order D 2020 044** or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

**D.** All **Non-Critical Retail**, as defined in Section III below, may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory social distancing requirements, similar to the requirements for **Critical Retail**. Additional requirements for **Critical** and **Non-Critical Retail** are contained in **Appendix A** of this Order.

**E.** All **Field Services**, including real estate, may resume operations, in accordance with the requirements of this Order including **Appendix B**. Real estate includes in-person real estate showings and marketing services which must adhere to **Social Distancing Requirements** with cleaning and disinfection between each showing, but may not hold open houses.

**F.** Other health care services not covered by Executive Order 20 0XX **Voluntary or Elective Surgeries Or Procedures**, in certain limited healthcare settings may resume if done in accordance with the requirements of **Appendix E**.

**G.** Effective May 1, 2020, **Non-Critical Retail** and limited **Personal Services** may resume in-person services if they meet the requirements in Section II.I below and the additional requirements outlined for these services in **Appendices B and D** of this Order.

**H.** Effective May 4, 2020, **Non-Critical Office-Based Businesses** operating in an office and not a production environment, as defined in Section III below, may allow up to fifty (50) percent of their employees to conduct in-person work that takes place outside a private residence in accordance with the requirements in Section II.I below and the additional requirements outlined in **Appendix C**.

**I. All Business and Government Functions. Critical Businesses, Critical Government Functions, Non-Critical Office-Based Businesses, Personal Services, Limited Healthcare Settings, and Non-Critical Retail** shall all follow the protocols below:

1. Employers and sole proprietors shall take all of the following measures within the workplace to minimize disease transmission, in accord with the [CDPHE Guidance](#):

- a. deputize a workplace coordinator(s) charged with addressing COVID-19 issues;
- b. maintain 6 foot separation between employees and discourage shared spaces;
- c. [clean and disinfect](#) all high touch areas;
- d. post signage for employees and customers on good hygiene;
- e. ensure proper ventilation;
- f. avoid gatherings (meetings, waiting rooms, etc) of more than 10 people;
- g. implement symptom monitoring protocols (including workplace temperature monitoring), conduct daily temperature checks and monitor symptoms in employees. A sample form can be found [here](#). If an employee reports any symptoms, refer symptomatic employees to the [CDPHE Symptom Tracker](#) and take all of the following steps:
  1. send employee home immediately;
  2. increase cleaning in your facility and require social distancing of staff at least 6 feet apart from one another;

3. exclude employee until they are fever-free, without medication, for 72 hours and 7 days have passed since their first symptom; and
    4. if multiple employees have these symptoms, contact your local health department; and
    - h. eliminate or regularly [clean and disinfect](#) any items in common spaces, such as break rooms, that are shared between individuals, such as condiments, coffee makers, vending machines.
2. Employers shall take all of the following measures regarding employees to minimize disease transmission:
  - a. require employees to stay home when showing any symptoms or signs of sickness, and connect employees to company or state benefits providers;
  - b. provide work accommodations for **Vulnerable Individuals**, who remain subject to **Stay at Home** advisement, prioritizing telecommuting, as **Vulnerable Individuals** shall not be compelled to go to work during the pendency of this pandemic emergency;
  - c. provide to the greatest extent possible flexible or remote scheduling for employees who may have child or elder care obligations, or who live with a person who still needs to observe **Stay at Home** due to underlying condition, age, or other factor;
  - d. encourage and enable remote work whenever possible;
  - e. encourage breaks to wash hands or use hand sanitizer;
  - f. phase shift and breaks to reduce density; and
  - g. provide appropriate protective gear like [gloves, masks, and face coverings](#).
3. Employers and sole proprietors shall implement the following measures regarding customers to minimize disease transmission:
  - a. create whenever possible special hours for **Vulnerable Individuals** only;
  - b. encourage 6 foot distancing inside of the business for all patrons;
  - c. encourage customer use of protection like gloves and face coverings;
  - d. provide hand sanitizer at the entrances to the greatest extent possible; and
  - e. use contactless payment solutions, no touch trash cans, etc. whenever possible.

4. Employers with over fifty (50) employees in any one location shall, in addition to the above requirements, implement the following protocols:
  - a. implement stations for symptom screening and temperature checks, and follow the requirements in Section II.G.1.g above;
  - b. close common areas to disallow gatherings of employees;
  - c. implement mandatory cleaning and disinfection protocols; and
  - d. require mandatory adherence to **Social Distancing Requirements**.

**J. Work Accommodations.** Employers must provide reasonable work accommodations for **Vulnerable Individuals** who are still under the **Stay at Home** advisement, such as telecommuting. Employers are encouraged to provide reasonable work accommodations for individuals who reside with or are caring for **Vulnerable Individuals**, or facing child care needs while schools remain closed.

**K. Specific Industry Requirements.** Additional requirements for specific industries are included in the following Appendices to this Order:

1. Appendix A: Critical and Non-Critical Retail Requirements
2. Appendix B: Field Services
3. Appendix C: Non-Critical Office-Based Businesses and Offices
4. Appendix D: Personal Services
5. Appendix E: Limited Healthcare Settings

### III. Definitions

**A. Necessary Activities.** For purposes of this PHO, individuals are encouraged to only leave their Residence to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 are urged not to leave their residence except as necessary to receive medical care. People who are sick must not leave their residence except as necessary to receive medical care, and must not go to work, even for a **Critical Business**. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by

way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.

3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public who live in the vicinity to engage in walking, hiking, biking, running, and similar outdoor activities, basketball and tennis courts may be open for use by individuals or members of the same household only, but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. For other parks, check with the local jurisdiction and follow any requirements for that jurisdiction. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III, below.
4. Performing work providing for businesses, government entities, and industries authorized Section II of this Order, or to otherwise carry out activities permitted in this Order.
5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**, and other businesses or industries authorized in Section II of this Order; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of residence from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) travel to transport children between separate households pursuant to a parenting plan or other agreement governing parental responsibilities; (6) non-residents returning to their place of residence; (7) moving to a new residence, including individuals whose Residence is unsafe due to domestic violence concerns.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed in **Appendix F**, must continue to comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. A list of Critical Businesses is contained in **Appendix F** to this Order.

**D. Critical Government Functions.** The provision, operation and support of the following state and local government functions shall continue:

1. Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
2. Emergency response
3. Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
4. Legislative and executive branch functions
5. Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)
6. Designated emergency shelters
7. Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
8. Public utility plant facilities for generation and distribution (drinking water and wastewater infrastructure, hubs, treatment plants, substations and pumping stations for power and gas, but not including towers, poles, power lines, and oil and gas buried pipelines)
9. Transportation. All public and private airports, airlines, taxis, transportation network companies (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
10. Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
11. Hazardous material safety
12. Services to at-risk populations and **Vulnerable Individuals**
13. Activities related to federal, state, and local elections, including any required acts of a political party, provided **Social Distancing Requirements** are observed to the greatest extent possible
14. Any government service, state or local, required for the public health and safety, government functionality, or vital to restoring normal services

**E. Field Services** means a service that is being provided out in the field as opposed to a company property, including third party private properties, such as a third party household.

**F. Gym** means a building or room used for indoor sports or exercise, such as fitness, dance, exercise or group classes, exercise studios and centers, recreation centers, bowling alleys, pools, and other indoor athletic facilities.

**G. Horse track** means a licensed race track, which is any premises licensed pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes for the conduct of racing. Sections 44-32-102(2)(a), (2)(b), (3), (8) & (24), C.R.S.

**H. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business's inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their residences are allowable pursuant to this Order; continue filling online product orders and to process customer orders remotely. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**I. Non-Critical Office-Based Business** means any commercial business that is conducted in an office and not a production environment and is not included in the list of **Critical Businesses** in **Appendix F**.

**J. Non-Critical Retail** means any retail service that is not included in the list of critical retail services in **Appendix F**. Examples of **Non-Critical Retail** include retailers of clothing, home goods, cell phone stores, mattresses, appliances, thrift shops, apothecaries, vape and tobacco shops, craft, hobby and fabric stores, fishing tackle retailers, sporting goods, boutiques, etc.

**K. Limited Healthcare Settings** means those locations where certain healthcare services are provided, including acupuncture (not related to personal services), athletic training (not related to personal services), audiology services, services by hearing aid providers, chiropractic care, massage therapy (not related to personal services), naturopathic care, occupational therapy services, optometry services, podiatry services, physical therapy, and speech language pathology services. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and patients, e.g. 5 chiropractors providing services to 5 customers, with **Social Distancing Requirements** in place of 6 feet distancing between customers receiving services. Employees must wear medical grade masks at all times, and patients must wear at least a [cloth face covering](#) at all times.

**L. Personal Services** means services and products that are not necessary to maintain an individual's health or safety, or the sanitation or essential operation of a business or residence. **Personal Services** include, but are not limited to, pastoral services except as specified in **Appendix F**, personal training, dog grooming, or body art and also applies to noncritical professionals regulated by the Division of Professions and Occupations, within the Department of Regulatory Agencies (DORA) including but not limited to services provided by personal beauty professionals such as hairstylists, barbers, cosmetologists, estheticians, nail technicians, as well as massage therapists, whose work requires these professionals to be less than six feet from the person for whom the services are being provided. Massage therapy services ordered by a healthcare professional should consult **Executive Order D 2020 027**. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and customers, e.g. 5 hairstylists providing services to 5 customers, with **Social Distancing Requirements** of at least 6 feet distancing between different customers receiving services. Both employees and customers must wear at least a cloth face covering or a medical grade mask at all times. Only services that can be performed without the customer removing their mask are permitted.

**M. "Safer at Home"** means individuals stay in your place of residence as much as possible, and avoid unnecessary social interactions.

**N. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**O. Simulcast facility** means a licensed in-state simulcast facility pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes, also commonly referred to as an "off-track betting facility" or "OTB". Sections 44-32-102(11) & (21), C.R.S.

**P. Stay at Home** means to stay in your place of residence, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support, perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**.

**Q. "Vulnerable Individual"** means:

1. Individuals who are 65 years and older;
2. Individuals with chronic lung disease or moderate to severe asthma;

3. Individuals who have serious heart conditions;
4. Individuals who are immunocompromised;
5. Pregnant women; and
6. Individuals determined to be high risk by a licensed healthcare provider.

**IV. Postsecondary Institutions.** Programs and courses at postsecondary institutions that cannot be conducted remotely, generally due to equipment requirements, may be conducted through limited in-person instruction. Institutions that wish to resume providing in-person instruction must inform the Colorado Department of Higher Education and ensure that **Social Distancing Requirements** are strictly followed. Additionally, students are allowed to opt out of the in-person instruction; such students will be treated no differently than students in all other courses that have ceased in-person instruction due to the COVID-19 situation.

**V. Variance Requests.** Any Colorado county may request a variance from the Colorado Department of Public Health and Environment authorizing implementation of an alternative COVID-19 suppression plan that differs from part or all the requirements of **Executive Order D 2020 044** or this Order. The variance request must include an alternative COVID-19 suppression plan endorsed by the local public health agency and adopted by the county commissioners or other county-level governing body, in addition to verification from local hospitals that they have the capacity to serve all people needing their care. Further guidance on variance requests is contained in **Appendix G**.

#### **VI. Enforcement**

This Order will be enforced by all appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties, including jail time, and fines, and may also be subject to discipline on a professional license based upon the applicable practice act.

#### **VII. Severability**

If any provision of this Order or the application thereof to any person or circumstance is held to be invalid, the remainder of the Order, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

**VIII. Duration**

This Order shall become effective at 6:00 a.m. on Monday April 27, 2020 and will continue to be in effect until 11:59 p.m. on May 26, 2020, unless extended, rescinded, superseded, or amended in writing.

- Appendix G: County Variance Requests**

## APPENDIX A. CRITICAL AND NON-CRITICAL RETAIL REQUIREMENTS

**I.** Effective April 27, 2020, in addition to meeting the requirements of this Order, and specifically Section II.I, **Non-Critical Retail** may may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory **Social Distancing Requirements**, except as prohibited or limited by this Order. Restricting interactions to curbside pick-up or delivery minimizes touch. **Non-Critical Retailers** are encouraged to continue curbside pick-up or delivery for longer term service wherever possible. **Critical** and **Non-Critical Retailers** must implement the requirements in Section II.I, in addition to the specific requirements in this Appendix.

**A.** **Critical** and **Non-Critical Retail** must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#). Refer symptomatic employees to the [CDPHE Symptom Tracker](#).
4. Post signage for employees and customers on good hygiene and other sanitation practices.

**B.** **Critical** and **Non-Critical Retail** must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.

5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

C. Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

**II.** Effective May 1, 2020, **Non-Critical Retail** may open at fifty percent (50%) capacity for in-person services if the business can demonstrate compliance with all of the following requirements:

**A.** **Critical and Non-Critical Retail** must continue implementing the measures within the workplace listed in Section I.A of this **Appendix A**, and in addition:

1. maintain 6 foot distancing between patrons and employees;
2. effectively symptom monitor employees as listed in Section II.I;
3. provide face coverings, and gloves as necessary and appropriate, to employees;
4. ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. provide dedicated, in-store hours for vulnerable or at-risk individuals.

**B.** **Critical and Non-Critical Retail** must implement the measures regarding employees listed in Section I.B of this **Appendix A**.

**C.** **Critical and Non-Critical Retail** must implement the measures to minimize disease transmission for customers listed in Section I.C of this **Appendix A** in addition to the following measures:

1. limit the number of customers on the premises as needed to make 6 foot distancing between customers attainable;
2. provide decals and demarcation for waiting area in lines that meet social distancing criteria;
3. create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
4. create signage to encourage the use of masks and gloves by customers while on the premises; and

5. provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

## APPENDIX B: FIELD SERVICES

I. Effective April 27, 2020, **Field Services** may resume if the business can demonstrate compliance with the requirements in Section II.I of this Order, in addition to the following requirements specific to **Field Services**:

A. Employers must implement the following measures regarding employees to minimize disease transmission:

1. adhere to all general rules or guidance on social gathering limitations when working out of the office;
2. implement procedures for field-based employees to monitor for symptoms and report-in to management daily on health status.
3. comply with the **Social Distancing Requirements** and maintain a 6 foot distance between employees and from their customers;
4. provide gloves and masks for any customer interactions or work being done in third-party home or office spaces;
5. When scheduling or conducting field services, either the employer or an employee must inquire whether third-party homes have individuals symptomatic for COVID-19 or have been in contact with known positive cases, and exercise caution when inside the home and interacting with anyone in the home if they do;
6. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, and location of contact, as well as the contact's phone number and/or email address;
7. require that all tools or equipment be sanitized after each customer visit;.
8. prioritize work accommodations for **Vulnerable Individuals**, prioritizing telecommuting;
9. provide guidance and encouragement on personal sanitation, including frequently washing hands. This guidance should include all of the following:
  - a. frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol;
  - b. cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve;
  - c. avoid touching your eyes, nose, and mouth with unwashed hands;
  - d. stay home if you're sick, and keep your children home if they are sick; and
  - e. clean high touch surfaces in your home, and personal items such as cell phones, using regular household products.

**B.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. provide estimates, invoices, receipts, and other documentation electronically to negate the need for paper;
2. provide contactless payment options in the field whenever possible;
3. encourage customers to maintain 6 foot distancing from field service employees; and
4. encourage customers to use facial coverings when field services are being conducted.

## APPENDIX C: NON-CRITICAL OFFICE-BASED BUSINESSES

**I.** Effective May 4, 2020, **Non-Critical Office-based Businesses** may resume at fifty percent (50%) of their in-office occupancy if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers must implement the following measures within the workplace to minimize disease transmission:

1. ensure a minimum of 6 feet of space between all desks and workspaces;
2. modify the flow of people traffic to minimize contacts, such as identifying doors for entry or exit only;
3. conduct standard office cleaning with increased frequency and supplement with sanitization of high touch areas, in accord with [CDPHE guidelines](#);
4. provide employees with cleaning and disinfecting products and guidance on daily workspace cleaning routines; and
5. post signage for employees and customers on good hygiene and new office practices.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. maintain in-office occupancy at no more than 50% of total by maximizing use of telecommuting and developing in-office rotation schedules;
2. minimize the number of in-person meetings and maintain 6 foot distancing in those meetings;
3. provide guidance and encouragement on maintaining 6 foot distancing and taking breaks to wash hands;
4. require gloves and masks for any customer interactions; and
5. allow telecommuting to the greatest extent possible.

**C.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. require 6 foot distancing measures wherever possible, such as marked space in check-out lines;
2. encourage customers to use facial coverings when on the business premises;
3. provide hand sanitizer at entrances and other high-traffic locations; and
4. implement hours where service is only provided to **Vulnerable Individuals** if possible.

## APPENDIX D: PERSONAL SERVICES

**I.** Effective May 1, 2020, **Personal Services** may resume if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers and sole proprietors must implement the following measures within the workplace to minimize disease transmission:

1. Employ strict hygiene guidelines and cleaning and disinfection procedures for all contact surfaces and tools, in accordance with [CDPHE Worker and Customer Protection Guidelines for Non-Healthcare Industries](#);
2. Ensure a minimum of 6 feet of separation between clients and customers, including services for pets, when not directly performing service;
3. Post signage for employees and customers on good hygiene and safety measures being taken; and
4. Minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. Services with close personal contact, such as beauty professionals, massage, etc., must implement the following:
  - a. wear a face covering and gloves at all times, or, if wearing gloves is not feasible or appropriate, meticulous hand washing;
  - c. change gloves and wash hands between every individual or pet served;
  - d. clean and disinfect all shared equipment and tools between every individual or pet served; and
  - e. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number and/or email address.
2. Personal services with low personal contact, such as movers or repair services, must implement the following:
  - a. maintain a minimum of 6 feet of separation between customers and adhere to social gathering limits of no more than 10 people. For real estate work, open houses are prohibited;
  - b. require face coverings and, if feasible, gloves for any customer interactions; and

- c. provide guidance on strict hygiene precautions to employees.

**C. Personal Services** must implement the following measures regarding customers to minimize disease transmission:

1. provide customer services by appointment only, do not allow walk-ins or waiting for an appointment, and limit all pet training classes or other activities associated with picking up pets to no more than 10 customers at a time and all following **Social Distancing Requirements**;
2. require customers to wear face coverings; if a customer does not have a mask, a "disposable mask" could be provided;
3. conduct symptoms check for all customers of services with close personal contact and decline to provide services to anyone who has symptoms. A sample form can be found [here](#); and
4. provide contactless payment options whenever possible.

## APPENDIX E: LIMITED HEALTHCARE SETTINGS

I. Effective April 27, 2020, **Limited Healthcare Settings** may resume if the healthcare entity can demonstrate compliance with the requirements of this Order, including Section II.I and may restart voluntary and elective surgeries and procedures in limited healthcare facilities and offices with required personal protective equipment (PPE) in accord with the priorities, requirements, and specific criteria below.

A. Employers and sole proprietors of **Limited Healthcare Settings** must implement the following measures within the overall workplace, including administrative and front office operations, to minimize disease transmission:

1. The practice must have access to adequate PPE in order to sustain recommended PPE use for its workforce for two weeks without the need for emergency PPE-conserving measures. If a practice proposes to extend the use of or reuse PPE, it must follow CDC guidance.<sup>1</sup>
2. The practice must implement strict infection control policies as recommended by the CDC.<sup>2</sup>
3. The practice must ensure a minimum of 6 feet of separation between clients and patients, when not directly performing service, with no more than ten (10) people in the facility;
4. The practice must post signage for employees and patients on good hygiene and safety measures being taken; and
5. The practice must minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.
6. Practices must maintain a plan to reduce or stop voluntary and elective surgeries and procedures should a surge/resurgence of COVID-19 cases occur in their region.

B. Employers of **Limited Healthcare Settings** must implement the following measures regarding employees to minimize disease transmission:

1. Services with close, direct personal contact must implement the following:
  - a. wear medical grade mask and gloves at all times;
  - b. change gloves and wash hands between every patient;
  - c. clean and disinfect all shared equipment and tools between every patient; and

---

<sup>1</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>

<sup>2</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html>

- d. maintain a detailed log of patient interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number
2. Services with low personal contact must implement the following:
  - a. maintain a minimum of six 6 feet of separation between customers and limit to no more than ten (10) people in the facility.
  - b. require face coverings and, if feasible, gloves for any customer interactions; and
  - c. provide guidance on strict hygiene precautions to employees.
3. The practice must require all administrative personnel to wear a facemask, that can be cloth if necessary. Masks may be removed when social distancing of at least 6 feet if possible (e.g., after entering a private office). In order to ensure staff can take off their masks for meals and breaks, scheduling and location for meals and breaks should ensure that at least a 6-foot distance can be maintained between staff when staff needs to remove their mask. It is important for healthcare settings to emphasize that hand hygiene is essential to maintaining employee safety, even if staff are wearing masks. If the facemask is touched, adjusted or removed, hand hygiene should be performed.

**C. Limited Healthcare Settings** must implement the following measures regarding customers to minimize disease transmission:

1. The practice must provide services by appointment only, do not allow walk-ins or waiting for an appointment;
2. The practice must require patients to wear face coverings; if a patient does not have a mask, a "disposable medical mask" could be provided;
3. The practice must conduct symptoms checks for all patients, decline to provide services to anyone who has symptoms, and refer them to their primary care physician. A sample form can be found [here](#); and
4. The practice must provide contactless payment options whenever possible;
5. The practice must follow social distancing protocols of maintaining at least a 6-foot distance between individuals wherever possible such as in waiting rooms and other small spaces, and should use physical barriers within patient care areas when possible.
6. The practice must appropriately schedule patients, so that providers have sufficient time to change PPE and ensure rooms and equipment can be cleaned and disinfected between each patient.
7. The practice should continue to maximize the use of telehealth and virtual office or clinic visits.

8. The practice should use virtual waiting rooms when possible, with patients who are able to wait in their cars not entering the office until they can be moved immediately to an exam room.
9. The practice should implement source control for everyone entering the office or clinic, including requiring all patients and visitors to wear a cloth mask when entering any healthcare building, and if they arrive without a mask, one should be provided.

D. As best practice, it is recommended that once voluntary and elective surgeries and procedures resume, **Limited Healthcare Settings** reassess their operations every two weeks, in order to ensure:

1. All of the above approaches and criteria are being met;
2. Procedures are prioritized based on whether their continued delay will have an adverse health outcome.
  - a. Voluntary and elective surgeries and procedures should be prioritized based on indication and urgency<sup>3</sup>;
3. Strong consideration is given to the balance of risks versus benefits for patients in higher-risk groups such as those over age 65 and those with compromised immune systems or lung and heart function;
4. All patients are pre-screened for COVID-19 risk factors and symptoms prior to delivering care, via telehealth when applicable; and
5. Compliance with the guidance and directives for maintaining a clean and safe work environment issued by the CDPHE and any applicable local health department for critical businesses is maintained, including compliance with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible.

---

<sup>3</sup> Urgent and emergent care should continue in accordance with OHA and CMS guidance.

## APPENDIX F: CRITICAL BUSINESSES

**Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

### 1. Healthcare Operations, Including:

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities
- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

### 2. Critical Infrastructure, Including:

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater

- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation, excluding private, short-term vacation-style rentals such as those arranged through an online hosting platform, including but not limited to VRBO or Airbnb, rented for a period of 30 days or fewer, homeowner rentals, and privately owned residences for rent, except if offered for use for the public health response.
- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain
- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection
- Flight schools, but only for the purpose of FAA-required pilot proficiency, and currency activities and practical checkrides, not for elective routine flight instruction

### **3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products
- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

#### 4. Critical Retail, Including:

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Liquor stores
- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products), excluding retailers of only health and nutrition-related products (vitamins, minerals, supplements, herbs, sports nutrition, diet and energy products)
- Establishments engaged in the sale of products that support working from home (this exclusion does not include businesses that primarily sell hobby craft supplies)

#### 5. Critical Services, Including:

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, automobile online sales with no touch delivery service, auto supply and repair (including retail dealerships that include repair and maintenance, but not in person retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries, with strict compliance with **Social Distancing Requirements** for employees and any attendees of services
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible. Houses of worship may remain open, however, these

institutions are encouraged to implement electronic platforms to conduct services whenever possible or to conduct smaller (10 or fewer congregants while ensuring 6 feet in between congregants), more frequent services to allow strict compliance with **Social Distancing Requirements**.

- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities
- Moving services
- In person group counseling or recovery meetings for substance abuse or behavioral health following social distancing of 6 feet and no more than 10 participants

## **6. News Media**

- Newspapers
- Television
- Radio
- Other media services

## **7. Financial and Professional Institutions, Including:**

- Banks and credit institutions
- Insurance and payroll
- Services related to financial markets
- Professional services, such as legal, title companies, or accounting services, real estate appraisals and transactions

## **8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

**9. Construction, Including but not Limited To:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals who provide services necessary to maintain the safety, sanitation, and critical operation of residences and other **Critical Businesses** or **Critical Government Functions**, and other essential services

**10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations
- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor (including maintenance and repair of ordinary household and business appliances but not in-person retail sales of such products)
- Automotive and bicycle repair
- Disinfection
- Snow removal
- Bail bonds agents
- Pest control

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics

- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**13. Educational Institutions that Provide Critical Services to Students and the General Public:**

- P-12 public school and private schools for the purpose of providing meals, housing, facilitating or providing materials for distance learning, and providing other essential services to students, provided that **Social Distancing Requirements** are observed.
- Postsecondary institutions, including private and public colleges and universities, for the purpose of facilitating distance learning, providing in person classroom or laboratory education for less than 10 students per classroom or lab in medical training fields only, or performing essential functions, provided that **Social Distancing Requirements** are observed, such as security, medical and mental health services, housing, food services, and critical research.

## **APPENDIX G: COUNTY VARIANCE REQUESTS**

Governor Jared Polis issued **Executive Order D 2020 044 Safer at Home** effective April 27, 2020. The key elements of the Order are that most people still stay at home as much as possible and avoid unnecessary social interactions; vulnerable populations continue to stay at home except to support or perform necessary activities or participate in critical government functions or critical businesses; there is limited reopening of postsecondary institutions, and certain business operations are permitted; people are still encouraged to stay within their county of residence or employment as much as possible; public gatherings of more than ten (10) persons are prohibited; and Coloradans are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public.

Any county that desires to apply for a variance from part or all of the executive order may do so after meeting the following criteria and submitting an alternative COVID-19 suppression plan to be approved or denied by Colorado Department of Public Health and the Environment (CDPHE), attention Executive Director, Jill Hunsaker Ryan, MPH.

Criteria for variance consideration:

- 1) The local public health agency endorses the alternative plan;
- 2) Local hospitals can verify that they have the capacity to serve all people needing their care; and;
- 3) The county commissioners (or other county-level governing body) vote affirmatively to adopt the alternative plan in place of the state Safer-At-Home order.

The local variance process allows communities that are not experiencing a high rate of transmission to tailor social distancing policies to local conditions, in order to promote community wellness and economic stability. To protect other communities and hospital systems statewide, it is paramount that the local variance process only be used when transmission is at a low enough level to be suppressed through testing and containment efforts to detect positive cases, ensure successful isolation and quarantine close contacts. Examples of local conditions that should be considered in seeking a variance include: a low number of new cases per day, cases declining for the past 14 days, declining positive tests as a percent of total tests for the past 14 days, low and stable case growth rate or equivalent, and having an early warning system to detect an increase in community spread or outbreaks, with triggers for tightening restrictions to prevent a breach of local hospital system capacity. Considerations and triggers should be documented in the plan submitted to CDPHE.

The following framework is being used by the State of Colorado to move between levels of social distancing. This may be helpful guidance in developing a local request:

**Colorado’s Framework for Social Distancing**

<b>Stay at Home</b>	<b>Safer At Home</b>	<b>Protect Your Neighbor</b>
<ul style="list-style-type: none"> <li>● Widespread suppression is required to stem exponential disease transmission</li> <li>● People are staying at home with limited exceptions</li> <li>● Healthcare/hospital capacity is still limited</li> <li>● Testing availability and containment capacity is still being built</li> <li>● People are encouraged to not travel between counties except for work or to obtain necessary services</li> </ul>	<ul style="list-style-type: none"> <li>● Disease has been suppressed and hospital capacity is not threatened.</li> <li>● Health care capacity is increasing</li> <li>● Testing availability and containment capacity are increasing</li> <li>● Most people still stay at home as much as possible and avoid unnecessary social interactions</li> <li>● Vulnerable populations stay home with limited exceptions</li> <li>● People are encouraged not to travel between counties except for work or to obtain necessary services</li> <li>● Public health has an early warning system to detect a significant increase in cases or greater demand for medical care</li> </ul>	<ul style="list-style-type: none"> <li>● Disease transmission is low</li> <li>● Healthcare capacity is robust</li> <li>● Testing availability and containment capacity are working at scale</li> <li>● It’s safer for people to socialize more normally, while taking significant precautions</li> <li>● Strong protections for vulnerable populations are still needed</li> <li>● Public health has an early warning system in place to detect a significant increase in cases or greater demand for medical care</li> </ul>

The Colorado Department of Public Health and Environment is available to provide technical assistance to any county considering a variance. The department will consider applications for variances based on the submitted plan’s rationale for a step down and the presence of an early

warning system with triggers for tightening back up. CDPHE reserves the right to approve or deny applications. Counties that choose to not comply with this executive order or an approved variance will be subject to the loss of emergency preparedness funds.

## **PUBLIC HEALTH ORDER 20-28 SAFER AT HOME**

### **PURPOSE OF THE ORDER**

I issue this Public Health Order (PHO or Order) pursuant to the Governor's directive in **Executive Order D 2020 044 Safer at Home** in response to the existence of thousands of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, as there is substantial evidence of community spread of COVID-19 throughout the State, it is crucial to take measures now that can mitigate further spread of disease in our communities.

### **FINDINGS**

1. Governor Polis issued Executive Order D 2020 003 on March 11, 2020, declaring a disaster emergency in Colorado due to the presence of COVID-19. Since that time, the Governor has taken numerous steps to implement measures to mitigate the spread of disease within Colorado, and has further required that several public health orders be issued to implement his orders.
2. I have issued public health orders pertaining to the limitation of visitors and nonessential individuals in skilled nursing facilities, intermediate care facilities, and assisted living residences; closing bars and restaurants to in-person services; defining the terms of the Governor's stay at home requirements and critical business designations; requiring hospitals to report information relevant to the COVID-19 response; and requiring the wearing of face coverings in the workplace and urging their use in public. These measures all act in concert to reduce the exposure of individuals to disease, and are necessary steps to protect the health and welfare of the public. Additionally, in reducing the spread of disease, these requirements help to preserve the medical resources needed for those in our communities who fall ill and require medical treatment, thus protecting both the ill patients and the healthcare workers who courageously continue to treat patients.
3. As of April 25, 2020, there are 13,441 known cases of COVID-19 in Colorado; however, testing for COVID-19 is not yet common. As of April 25, 2020, 2,438 Coloradans have been hospitalized and 680 Coloradans have died from COVID-19. Multiple sources of data show that COVID-19 transmission and the use of healthcare due to COVID-19 have leveled off in

Colorado. Our work to “flatten the curve” appears to be succeeding, and the Governor has ordered some lessening of the current stay at home restrictions as a result.

4. **Executive Order D 2020 044** authorizes transitioning from a stay at home model, as described in **Executive Order D 2020 017** and **Public Health Order 20-24** as amended, to a **Safer at Home** model. **Safer at Home** still requires that **Vulnerable Individuals** remain at home, but allows limited reopening of postsecondary institutions and certain businesses. Additionally, individuals are encouraged to stay at home as much as possible and practice Social Distancing to reduce the likelihood of disease transmission, but certain activities, such as gathering in groups of no more than ten for activities, are permitted. As we continue to combat COVID-19 in our communities, continuing restrictions on individual travel and necessary activities remain appropriate.

### INTENT

This Order sets forth the requirements for implementation of Safer at Home, as directed by Governor Polis. Individual restrictions remain in place concerning limitations on activities, travel, and public gatherings. Workplace restrictions remain necessary to implement standard Social Distancing Requirements, cleaning standards, and other items necessary to reduce the possibility of disease spread. Additionally, certain businesses and activities require specific guidance based on their business practices, and those are included in the appendices to this Order.

### ORDER

Unless otherwise specifically noted in this Order, the requirements of this Order are effective April 27, 2020. This Order supersedes and replaces Public Health Orders 20-22 and 20-24, as amended.

#### I. Safer at Home

A. All individuals currently living within the State of Colorado are encouraged to stay at home and avoid unnecessary interactions whenever possible in order to reduce the spread of disease. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, defined in Section III below, and are encouraged to leave their residences only to perform or utilize **Necessary Activities**, defined in Section III below.

B. Individuals are urged to wear non-medical cloth face coverings that cover the nose and mouth whenever in public as required by **Executive Order D 2020 044**.

**C.** All public and private gatherings of any number of people occurring outside a residence are limited to no more than (10) individuals, except for the purposes expressly permitted in this PHO, which include **Necessary Activities**. Nothing in this Order prohibits the gathering of members living in the same residence.

**D.** People at high risk of severe illness from COVID-19 are urged to stay in their residence at all times except as necessary to seek medical care. **Vulnerable Individuals** cannot be compelled to work for any business or government function, including a Critical Business or Critical Government Function, during the pendency of this pandemic emergency. People who are sick must stay in their residence at all times except as necessary to seek medical care, and must not go to work, even for a **Critical Business**, defined in Section III below.

**E.** Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

**F.** Governmental and other entities are strongly urged to make shelter available to people experiencing homelessness as soon as possible and to the maximum extent practicable, and are authorized to take all reasonable steps necessary to provide non-congregate sheltering along with necessary support services to members of the public in their jurisdiction as necessary to protect all members of the community. People experiencing homelessness are urged to protect their health and safety by complying with **Social Distancing Requirements** at all times.

**G.** Individuals are encouraged to limit travel to **Necessary Travel**, defined in Section III below, including but not limited to, travel by automobile or public transit. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Businesses** or maintain **Critical Governmental Functions** as authorized in Section II of this Order. People riding on public transit must comply with **Social Distancing Requirements** to the greatest extent feasible.

**H.** Individuals may participate in local and personal recreation in outside public spaces, as an authorized **Necessary Activity**, in groups no larger than 10 and practicing social distancing maintaining 6 feet between participants. Travel for recreational purposes should be limited to your own community like your county of residence or traveling no more than about 10 miles. Playgrounds and playground equipment remain closed. Personal training and classes in any setting are limited to all members of a single household or a mixed group of 4 or fewer individuals complying with **Social Distancing Requirements**; except for members of a single household, sharing equipment is prohibited.

## **II. Business Requirements**

**A.** The following places of public accommodation remain closed to ingress, egress, use, and occupancy by members of the public:

1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption;
3. Cigar bars;
4. Gyms, except for the limited purpose authorized in Section I.H;
5. Movie and performance theaters, opera houses, concert halls, and music halls;
6. Casinos; and
7. Horse tracks and simulcast facilities, also known as off-track betting facilities.

These restrictions do not apply to any of the following:

1. Room service in hotels;
2. Health care facilities, residential care facilities, congregate care facilities, and juvenile justice facilities;
3. Crisis shelters or similar institutions;
4. Airport concessionaires;
5. Institutions of higher education offering dining hall services located in or adjacent to campus dormitories that are accessed through student, staff, faculty, or campus associated identification, as well as grab and go food services within these institutions, while exercising social distancing measures of at least six feet between individuals;

6. Fitness centers and nonessential personal services included in residential facilities, such as hotels, apartment or condominium complexes or similar housing arrangements, that are limited to use only by hotel guests or residents of the housing who are following social distancing requirements of at least 6 feet between individuals, and the hotel or property managers are performing frequent environmental cleaning; and
7. Any emergency facilities necessary for the response to these events.

**B.** All **Critical Businesses** and **Critical Government Functions**, as defined in Section III below, may continue to operate. **Critical Businesses** must comply with **Social Distancing Requirements** at all times, adopt work from home or tele-work policies for any operations that can be done remotely, and implement other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other **Critical Retail** shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line. **Critical Business** and **Critical Government Functions** shall continue to promote telecommuting to the greatest extent possible.

**C.** All places of public accommodation subject to Public Health Order 20-22, as amended, that offer food and beverages may continue to offer food and beverage using delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery or any manner set forth in that PHO and in accordance with mandatory **Social Distancing Requirements**, except as prohibited or limited by **Executive Order D 2020 044** or this Order. These entities include restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption; and bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages.

**D.** All **Non-Critical Retail**, as defined in Section III below, may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory social distancing requirements, similar to the requirements for **Critical Retail**. Additional requirements for **Critical** and **Non-Critical Retail** are contained in **Appendix A** of this Order.

**E.** All **Field Services**, including real estate, may resume operations, in accordance with the requirements of this Order including **Appendix B**. Real estate includes in-person real estate showings and marketing services which must adhere to **Social Distancing Requirements** with cleaning and disinfection between each showing, but may not hold open houses.

**F.** Other health care services not covered by Executive Order 20 0XX **Voluntary or Elective Surgeries Or Procedures**, in certain limited healthcare settings may resume if done in accordance with the requirements of **Appendix E**.

**G.** Effective May 1, 2020, **Non-Critical Retail** and limited **Personal Services** may resume in-person services if they meet the requirements in Section II.I below and the additional requirements outlined for these services in **Appendices B and D** of this Order.

**H.** Effective May 4, 2020, **Non-Critical Office-Based Businesses** operating in an office and not a production environment, as defined in Section III below, may allow up to fifty (50) percent of their employees to conduct in-person work that takes place outside a private residence in accordance with the requirements in Section II.I below and the additional requirements outlined in **Appendix C**.

**I. All Business and Government Functions. Critical Businesses, Critical Government Functions, Non-Critical Office-Based Businesses, Personal Services, Limited Healthcare Settings, and Non-Critical Retail** shall all follow the protocols below:

1. Employers and sole proprietors shall take all of the following measures within the workplace to minimize disease transmission, in accord with the [CDPHE Guidance](#):
  - a. deputize a workplace coordinator(s) charged with addressing COVID-19 issues;
  - b. maintain 6 foot separation between employees and discourage shared spaces;
  - c. [clean and disinfect](#) all high touch areas;
  - d. post signage for employees and customers on good hygiene;
  - e. ensure proper ventilation;
  - f. avoid gatherings (meetings, waiting rooms, etc) of more than 10 people;
  - g. implement symptom monitoring protocols (including workplace temperature monitoring), conduct daily temperature checks and monitor symptoms in employees. A sample form can be found [here](#). If an employee reports any symptoms, refer symptomatic employees to the [CDPHE Symptom Tracker](#) and take all of the following steps:
    1. send employee home immediately;
    2. increase cleaning in your facility and require social distancing of staff at least 6 feet apart from one another;

3. exclude employee until they are fever-free, without medication, for 72 hours and 7 days have passed since their first symptom; and
    4. if multiple employees have these symptoms, contact your local health department; and
    - h. eliminate or regularly [clean and disinfect](#) any items in common spaces, such as break rooms, that are shared between individuals, such as condiments, coffee makers, vending machines.
2. Employers shall take all of the following measures regarding employees to minimize disease transmission:
  - a. require employees to stay home when showing any symptoms or signs of sickness, and connect employees to company or state benefits providers;
  - b. provide work accommodations for **Vulnerable Individuals**, who remain subject to **Stay at Home** advisement, prioritizing telecommuting, as **Vulnerable Individuals** shall not be compelled to go to work during the pendency of this pandemic emergency;
  - c. provide to the greatest extent possible flexible or remote scheduling for employees who may have child or elder care obligations, or who live with a person who still needs to observe **Stay at Home** due to underlying condition, age, or other factor;
  - d. encourage and enable remote work whenever possible;
  - e. encourage breaks to wash hands or use hand sanitizer;
  - f. phase shift and breaks to reduce density; and
  - g. provide appropriate protective gear like [gloves, masks, and face coverings](#).
3. Employers and sole proprietors shall implement the following measures regarding customers to minimize disease transmission:
  - a. create whenever possible special hours for **Vulnerable Individuals** only;
  - b. encourage 6 foot distancing inside of the business for all patrons;
  - c. encourage customer use of protection like gloves and face coverings;
  - d. provide hand sanitizer at the entrances to the greatest extent possible; and
  - e. use contactless payment solutions, no touch trash cans, etc. whenever possible.

4. Employers with over fifty (50) employees in any one location shall, in addition to the above requirements, implement the following protocols:
  - a. implement stations for symptom screening and temperature checks, and follow the requirements in Section II.G.1.g above;
  - b. close common areas to disallow gatherings of employees;
  - c. implement mandatory cleaning and disinfection protocols; and
  - d. require mandatory adherence to **Social Distancing Requirements**.

**J. Work Accommodations.** Employers must provide reasonable work accommodations for **Vulnerable Individuals** who are still under the **Stay at Home** advisement, such as telecommuting. Employers are encouraged to provide reasonable work accommodations for individuals who reside with or are caring for **Vulnerable Individuals**, or facing child care needs while schools remain closed.

**K. Specific Industry Requirements.** Additional requirements for specific industries are included in the following Appendices to this Order:

1. Appendix A: Critical and Non-Critical Retail Requirements
2. Appendix B: Field Services
3. Appendix C: Non-Critical Office-Based Businesses and Offices
4. Appendix D: Personal Services
5. Appendix E: Limited Healthcare Settings

### III. Definitions

**A. Necessary Activities.** For purposes of this PHO, individuals are encouraged to only leave their Residence to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 are urged not to leave their residence except as necessary to receive medical care. People who are sick must not leave their residence except as necessary to receive medical care, and must not go to work, even for a **Critical Business**. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by

way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.

3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public who live in the vicinity to engage in walking, hiking, biking, running, and similar outdoor activities, basketball and tennis courts may be open for use by individuals or members of the same household only, but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. For other parks, check with the local jurisdiction and follow any requirements for that jurisdiction. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III, below.
4. Performing work providing for businesses, government entities, and industries authorized Section II of this Order, or to otherwise carry out activities permitted in this Order.
5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**, and other businesses or industries authorized in Section II of this Order; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of residence from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) travel to transport children between separate households pursuant to a parenting plan or other agreement governing parental responsibilities; (6) non-residents returning to their place of residence; (7) moving to a new residence, including individuals whose Residence is unsafe due to domestic violence concerns.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed in **Appendix F**, must continue to comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. A list of Critical Businesses is contained in **Appendix F** to this Order.

**D. Critical Government Functions.** The provision, operation and support of the following state and local government functions shall continue:

1. Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
2. Emergency response
3. Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
4. Legislative and executive branch functions
5. Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)
6. Designated emergency shelters
7. Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
8. Public utility plant facilities for generation and distribution (drinking water and wastewater infrastructure, hubs, treatment plants, substations and pumping stations for power and gas, but not including towers, poles, power lines, and oil and gas buried pipelines)
9. Transportation. All public and private airports, airlines, taxis, transportation network companies (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
10. Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
11. Hazardous material safety
12. Services to at-risk populations and **Vulnerable Individuals**
13. Activities related to federal, state, and local elections, including any required acts of a political party, provided **Social Distancing Requirements** are observed to the greatest extent possible
14. Any government service, state or local, required for the public health and safety, government functionality, or vital to restoring normal services

**E. Field Services** means a service that is being provided out in the field as opposed to a company property, including third party private properties, such as a third party household.

**F. Gym** means a building or room used for indoor sports or exercise, such as fitness, dance, exercise or group classes, exercise studios and centers, recreation centers, bowling alleys, pools, and other indoor athletic facilities.

**G. Horse track** means a licensed race track, which is any premises licensed pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes for the conduct of racing. Sections 44-32-102(2)(a), (2)(b), (3), (8) & (24), C.R.S.

**H. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business's inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their residences are allowable pursuant to this Order; continue filling online product orders and to process customer orders remotely. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**I. Non-Critical Office-Based Business** means any commercial business that is conducted in an office and not a production environment and is not included in the list of **Critical Businesses** in **Appendix F**.

**J. Non-Critical Retail** means any retail service that is not included in the list of critical retail services in **Appendix F**. Examples of **Non-Critical Retail** include retailers of clothing, home goods, cell phone stores, mattresses, appliances, thrift shops, apothecaries, vape and tobacco shops, craft, hobby and fabric stores, fishing tackle retailers, sporting goods, boutiques, etc.

**K. Limited Healthcare Settings** means those locations where certain healthcare services are provided, including acupuncture (not related to personal services), athletic training (not related to personal services), audiology services, services by hearing aid providers, chiropractic care, massage therapy (not related to personal services), naturopathic care, occupational therapy services, optometry services, podiatry services, physical therapy, and speech language pathology services. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and patients, e.g. 5 chiropractors providing services to 5 customers, with **Social Distancing Requirements** in place of 6 feet distancing between customers receiving services. Employees must wear medical grade masks at all times, and patients must wear at least a [cloth face covering](#) at all times.

**L. Personal Services** means services and products that are not necessary to maintain an individual's health or safety, or the sanitation or essential operation of a business or residence. **Personal Services** include, but are not limited to, pastoral services except as specified in **Appendix F**, personal training, dog grooming, or body art and also applies to noncritical professionals regulated by the Division of Professions and Occupations, within the Department of Regulatory Agencies (DORA) including but not limited to services provided by personal beauty professionals such as hairstylists, barbers, cosmetologists, estheticians, nail technicians, as well as massage therapists, whose work requires these professionals to be less than six feet from the person for whom the services are being provided. Massage therapy services ordered by a healthcare professional should consult **Executive Order D 2020 027**. These individual services may only be performed with 10 or fewer people in a single location at a maximum of 50% occupancy for the location, whichever is less, including both employees and customers, e.g. 5 hairstylists providing services to 5 customers, with **Social Distancing Requirements** of at least 6 feet distancing between different customers receiving services. Both employees and customers must wear at least a cloth face covering or a medical grade mask at all times. Only services that can be performed without the customer removing their mask are permitted.

**M. "Safer at Home"** means individuals stay in your place of residence as much as possible, and avoid unnecessary social interactions.

**N. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**O. Simulcast facility** means a licensed in-state simulcast facility pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes, also commonly referred to as an "off-track betting facility" or "OTB". Sections 44-32-102(11) & (21), C.R.S.

**P. Stay at Home** means to stay in your place of residence, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support, perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**.

**Q. "Vulnerable Individual"** means:

1. Individuals who are 65 years and older;
2. Individuals with chronic lung disease or moderate to severe asthma;

3. Individuals who have serious heart conditions;
4. Individuals who are immunocompromised;
5. Pregnant women; and
6. Individuals determined to be high risk by a licensed healthcare provider.

**IV. Postsecondary Institutions.** Programs and courses at postsecondary institutions that cannot be conducted remotely, generally due to equipment requirements, may be conducted through limited in-person instruction. Institutions that wish to resume providing in-person instruction must inform the Colorado Department of Higher Education and ensure that **Social Distancing Requirements** are strictly followed. Additionally, students are allowed to opt out of the in-person instruction; such students will be treated no differently than students in all other courses that have ceased in-person instruction due to the COVID-19 situation.

**V. Variance Requests.** Any Colorado county may request a variance from the Colorado Department of Public Health and Environment authorizing implementation of an alternative COVID-19 suppression plan that differs from part or all the requirements of **Executive Order D 2020 044** or this Order. The variance request must include an alternative COVID-19 suppression plan endorsed by the local public health agency and adopted by the county commissioners or other county-level governing body, in addition to verification from local hospitals that they have the capacity to serve all people needing their care. Further guidance on variance requests is contained in **Appendix G**.

#### **VI. Enforcement**

This Order will be enforced by all appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties, including jail time, and fines, and may also be subject to discipline on a professional license based upon the applicable practice act.

#### **VII. Severability**

If any provision of this Order or the application thereof to any person or circumstance is held to be invalid, the remainder of the Order, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this Order are severable.

**VIII. Duration**

This Order shall become effective at 6:00 a.m. on Monday April 27, 2020 and will continue to be in effect until 11:59 p.m. on May 26, 2020, unless extended, rescinded, superseded, or amended in writing.

- Appendix G: County Variance Requests**

## APPENDIX A. CRITICAL AND NON-CRITICAL RETAIL REQUIREMENTS

**I.** Effective April 27, 2020, in addition to meeting the requirements of this Order, and specifically Section II.I, **Non-Critical Retail** may may operate and offer goods through delivery service, window service, walk-up service, drive-through service, drive-up service, curbside delivery, or any other manner allowing for strict compliance with mandatory **Social Distancing Requirements**, except as prohibited or limited by this Order. Restricting interactions to curbside pick-up or delivery minimizes touch. **Non-Critical Retailers** are encouraged to continue curbside pick-up or delivery for longer term service wherever possible. **Critical and Non-Critical Retailers** must implement the requirements in Section II.I, in addition to the specific requirements in this Appendix.

**A.** **Critical and Non-Critical Retail** must implement the following measures within the workplace to minimize disease transmission:

1. Elevate and increase frequency of [cleaning practices](#), including cleaning and disinfection of high touch areas.
2. Restrict return policy to only items that can be properly sanitized prior to re-selling.
3. Conduct daily temperature checks and monitor symptoms in employees, logging all results. A sample screening tool can be found [here](#). Refer symptomatic employees to the [CDPHE Symptom Tracker](#).
4. Post signage for employees and customers on good hygiene and other sanitation practices.

**B.** **Critical and Non-Critical Retail** must implement the following measures regarding employees to minimize disease transmission:

1. Provide guidance and encouragement on maintaining 6 foot distancing between both employees and employees and customers.
2. Provide appropriate face coverings and gloves to all employees whenever possible, and also allow employees who can to provide their own appropriate face coverings and gloves for work activities. Employees without face coverings shall not perform tasks that require engagement with the public or with other coworkers.
3. Encourage frequent breaks to allow employees to wash or sanitize their hands.
4. Require employees to stay home when showing any symptoms or signs of sickness.

5. Provide personal protective equipment (PPE) for employees who are managing deliveries, returns, etc.

C. Employers must implement the following measures regarding customers to minimize disease transmission:

1. Require 6 foot distancing measures wherever possible, such as marked space in pick up lines.

**II.** Effective May 1, 2020, **Non-Critical Retail** may open at fifty percent (50%) capacity for in-person services if the business can demonstrate compliance with all of the following requirements:

**A.** **Critical and Non-Critical Retail** must continue implementing the measures within the workplace listed in Section I.A of this **Appendix A**, and in addition:

1. maintain 6 foot distancing between patrons and employees;
2. effectively symptom monitor employees as listed in Section II.I;
3. provide face coverings, and gloves as necessary and appropriate, to employees;
4. ensure ability to adequately clean and disinfect both back-room and retail spaces; and
5. provide dedicated, in-store hours for vulnerable or at-risk individuals.

**B.** **Critical and Non-Critical Retail** must implement the measures regarding employees listed in Section I.B of this **Appendix A**.

**C.** **Critical and Non-Critical Retail** must implement the measures to minimize disease transmission for customers listed in Section I.C of this **Appendix A** in addition to the following measures:

1. limit the number of customers on the premises as needed to make 6 foot distancing between customers attainable;
2. provide decals and demarcation for waiting area in lines that meet social distancing criteria;
3. create signage encouraging vulnerable and at-risk individuals to refrain from shopping outside of dedicated hours set aside for those who are more vulnerable or at-risk;
4. create signage to encourage the use of masks and gloves by customers while on the premises; and

5. provide hand sanitizer and wipes at entrances and other high-traffic locations to the greatest extent possible.

## APPENDIX B: FIELD SERVICES

I. Effective April 27, 2020, **Field Services** may resume if the business can demonstrate compliance with the requirements in Section II.I of this Order, in addition to the following requirements specific to **Field Services**:

A. Employers must implement the following measures regarding employees to minimize disease transmission:

1. adhere to all general rules or guidance on social gathering limitations when working out of the office;
2. implement procedures for field-based employees to monitor for symptoms and report-in to management daily on health status.
3. comply with the **Social Distancing Requirements** and maintain a 6 foot distance between employees and from their customers;
4. provide gloves and masks for any customer interactions or work being done in third-party home or office spaces;
5. When scheduling or conducting field services, either the employer or an employee must inquire whether third-party homes have individuals symptomatic for COVID-19 or have been in contact with known positive cases, and exercise caution when inside the home and interacting with anyone in the home if they do;
6. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, and location of contact, as well as the contact's phone number and/or email address;
7. require that all tools or equipment be sanitized after each customer visit;.
8. prioritize work accommodations for **Vulnerable Individuals**, prioritizing telecommuting;
9. provide guidance and encouragement on personal sanitation, including frequently washing hands. This guidance should include all of the following:
  - a. frequently and thoroughly wash your hands with soap and water for at least 20 seconds. If soap and water are not available, use hand sanitizer with at least 60% alcohol;
  - b. cover coughs and sneezes with a tissue, then throw the tissue in the trash, or use your inner elbow or sleeve;
  - c. avoid touching your eyes, nose, and mouth with unwashed hands;
  - d. stay home if you're sick, and keep your children home if they are sick; and
  - e. clean high touch surfaces in your home, and personal items such as cell phones, using regular household products.

**B.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. provide estimates, invoices, receipts, and other documentation electronically to negate the need for paper;
2. provide contactless payment options in the field whenever possible;
3. encourage customers to maintain 6 foot distancing from field service employees; and
4. encourage customers to use facial coverings when field services are being conducted.

## APPENDIX C: NON-CRITICAL OFFICE-BASED BUSINESSES

**I.** Effective May 4, 2020, **Non-Critical Office-based Businesses** may resume at fifty percent (50%) of their in-office occupancy if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers must implement the following measures within the workplace to minimize disease transmission:

1. ensure a minimum of 6 feet of space between all desks and workspaces;
2. modify the flow of people traffic to minimize contacts, such as identifying doors for entry or exit only;
3. conduct standard office cleaning with increased frequency and supplement with sanitization of high touch areas, in accord with [CDPHE guidelines](#);
4. provide employees with cleaning and disinfecting products and guidance on daily workspace cleaning routines; and
5. post signage for employees and customers on good hygiene and new office practices.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. maintain in-office occupancy at no more than 50% of total by maximizing use of telecommuting and developing in-office rotation schedules;
2. minimize the number of in-person meetings and maintain 6 foot distancing in those meetings;
3. provide guidance and encouragement on maintaining 6 foot distancing and taking breaks to wash hands;
4. require gloves and masks for any customer interactions; and
5. allow telecommuting to the greatest extent possible.

**C.** Employers must implement the following measures regarding customers to minimize disease transmission:

1. require 6 foot distancing measures wherever possible, such as marked space in check-out lines;
2. encourage customers to use facial coverings when on the business premises;
3. provide hand sanitizer at entrances and other high-traffic locations; and
4. implement hours where service is only provided to **Vulnerable Individuals** if possible.

## APPENDIX D: PERSONAL SERVICES

**I.** Effective May 1, 2020, **Personal Services** may resume if the business can demonstrate compliance with the requirements of this Order, including Section II.I, and all of the following:

**A.** Employers and sole proprietors must implement the following measures within the workplace to minimize disease transmission:

1. Employ strict hygiene guidelines and cleaning and disinfection procedures for all contact surfaces and tools, in accordance with [CDPHE Worker and Customer Protection Guidelines for Non-Healthcare Industries](#);
2. Ensure a minimum of 6 feet of separation between clients and customers, including services for pets, when not directly performing service;
3. Post signage for employees and customers on good hygiene and safety measures being taken; and
4. Minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.

**B.** Employers must implement the following measures regarding employees to minimize disease transmission:

1. Services with close personal contact, such as beauty professionals, massage, etc., must implement the following:
  - a. wear a face covering and gloves at all times, or, if wearing gloves is not feasible or appropriate, meticulous hand washing;
  - c. change gloves and wash hands between every individual or pet served;
  - d. clean and disinfect all shared equipment and tools between every individual or pet served; and
  - e. maintain a detailed log of customer interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number and/or email address.
2. Personal services with low personal contact, such as movers or repair services, must implement the following:
  - a. maintain a minimum of 6 feet of separation between customers and adhere to social gathering limits of no more than 10 people. For real estate work, open houses are prohibited;
  - b. require face coverings and, if feasible, gloves for any customer interactions; and

- c. provide guidance on strict hygiene precautions to employees.

**C. Personal Services** must implement the following measures regarding customers to minimize disease transmission:

1. provide customer services by appointment only, do not allow walk-ins or waiting for an appointment, and limit all pet training classes or other activities associated with picking up pets to no more than 10 customers at a time and all following **Social Distancing Requirements**;
2. require customers to wear face coverings; if a customer does not have a mask, a "disposable mask" could be provided;
3. conduct symptoms check for all customers of services with close personal contact and decline to provide services to anyone who has symptoms. A sample form can be found [here](#); and
4. provide contactless payment options whenever possible.

## APPENDIX E: LIMITED HEALTHCARE SETTINGS

I. Effective April 27, 2020, **Limited Healthcare Settings** may resume if the healthcare entity can demonstrate compliance with the requirements of this Order, including Section II.I and may restart voluntary and elective surgeries and procedures in limited healthcare facilities and offices with required personal protective equipment (PPE) in accord with the priorities, requirements, and specific criteria below.

A. Employers and sole proprietors of **Limited Healthcare Settings** must implement the following measures within the overall workplace, including administrative and front office operations, to minimize disease transmission:

1. The practice must have access to adequate PPE in order to sustain recommended PPE use for its workforce for two weeks without the need for emergency PPE-conserving measures. If a practice proposes to extend the use of or reuse PPE, it must follow CDC guidance.<sup>1</sup>
2. The practice must implement strict infection control policies as recommended by the CDC.<sup>2</sup>
3. The practice must ensure a minimum of 6 feet of separation between clients and patients, when not directly performing service, with no more than ten (10) people in the facility;
4. The practice must post signage for employees and patients on good hygiene and safety measures being taken; and
5. The practice must minimize in-home and in-facility services with remote alternatives whenever possible, such as drive-by services or virtual meetings.
6. Practices must maintain a plan to reduce or stop voluntary and elective surgeries and procedures should a surge/resurgence of COVID-19 cases occur in their region.

B. Employers of **Limited Healthcare Settings** must implement the following measures regarding employees to minimize disease transmission:

1. Services with close, direct personal contact must implement the following:
  - a. wear medical grade mask and gloves at all times;
  - b. change gloves and wash hands between every patient;
  - c. clean and disinfect all shared equipment and tools between every patient;and

---

<sup>1</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/ppe-strategy/index.html>

<sup>2</sup> <https://www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control.html>

- d. maintain a detailed log of patient interactions to enable contact tracing if it becomes necessary. The log should include name, date, details of services performed, and location of contact, as well as the contact's phone number
2. Services with low personal contact must implement the following:
  - a. maintain a minimum of six 6 feet of separation between customers and limit to no more than ten (10) people in the facility.
  - b. require face coverings and, if feasible, gloves for any customer interactions; and
  - c. provide guidance on strict hygiene precautions to employees.
3. The practice must require all administrative personnel to wear a facemask, that can be cloth if necessary. Masks may be removed when social distancing of at least 6 feet if possible (e.g., after entering a private office). In order to ensure staff can take off their masks for meals and breaks, scheduling and location for meals and breaks should ensure that at least a 6-foot distance can be maintained between staff when staff needs to remove their mask. It is important for healthcare settings to emphasize that hand hygiene is essential to maintaining employee safety, even if staff are wearing masks. If the facemask is touched, adjusted or removed, hand hygiene should be performed.

**C. Limited Healthcare Settings** must implement the following measures regarding customers to minimize disease transmission:

1. The practice must provide services by appointment only, do not allow walk-ins or waiting for an appointment;
2. The practice must require patients to wear face coverings; if a patient does not have a mask, a "disposable medical mask" could be provided;
3. The practice must conduct symptoms checks for all patients, decline to provide services to anyone who has symptoms, and refer them to their primary care physician. A sample form can be found [here](#); and
4. The practice must provide contactless payment options whenever possible;
5. The practice must follow social distancing protocols of maintaining at least a 6-foot distance between individuals wherever possible such as in waiting rooms and other small spaces, and should use physical barriers within patient care areas when possible.
6. The practice must appropriately schedule patients, so that providers have sufficient time to change PPE and ensure rooms and equipment can be cleaned and disinfected between each patient.
7. The practice should continue to maximize the use of telehealth and virtual office or clinic visits.

8. The practice should use virtual waiting rooms when possible, with patients who are able to wait in their cars not entering the office until they can be moved immediately to an exam room.
9. The practice should implement source control for everyone entering the office or clinic, including requiring all patients and visitors to wear a cloth mask when entering any healthcare building, and if they arrive without a mask, one should be provided.

D. As best practice, it is recommended that once voluntary and elective surgeries and procedures resume, **Limited Healthcare Settings** reassess their operations every two weeks, in order to ensure:

1. All of the above approaches and criteria are being met;
2. Procedures are prioritized based on whether their continued delay will have an adverse health outcome.
  - a. Voluntary and elective surgeries and procedures should be prioritized based on indication and urgency<sup>3</sup>;
3. Strong consideration is given to the balance of risks versus benefits for patients in higher-risk groups such as those over age 65 and those with compromised immune systems or lung and heart function;
4. All patients are pre-screened for COVID-19 risk factors and symptoms prior to delivering care, via telehealth when applicable; and
5. Compliance with the guidance and directives for maintaining a clean and safe work environment issued by the CDPHE and any applicable local health department for critical businesses is maintained, including compliance with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible.

---

<sup>3</sup> Urgent and emergent care should continue in accordance with OHA and CMS guidance.

## APPENDIX F: CRITICAL BUSINESSES

**Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

### 1. Healthcare Operations, Including:

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities
- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

### 2. Critical Infrastructure, Including:

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater

- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation, excluding private, short-term vacation-style rentals such as those arranged through an online hosting platform, including but not limited to VRBO or Airbnb, rented for a period of 30 days or fewer, homeowner rentals, and privately owned residences for rent, except if offered for use for the public health response.
- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain
- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection
- Flight schools, but only for the purpose of FAA-required pilot proficiency, and currency activities and practical checkrides, not for elective routine flight instruction

### **3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products
- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

#### 4. Critical Retail, Including:

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Liquor stores
- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products), excluding retailers of only health and nutrition-related products (vitamins, minerals, supplements, herbs, sports nutrition, diet and energy products)
- Establishments engaged in the sale of products that support working from home (this exclusion does not include businesses that primarily sell hobby craft supplies)

#### 5. Critical Services, Including:

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, automobile online sales with no touch delivery service, auto supply and repair (including retail dealerships that include repair and maintenance, but not in person retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries, with strict compliance with **Social Distancing Requirements** for employees and any attendees of services
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible. Houses of worship may remain open, however, these

institutions are encouraged to implement electronic platforms to conduct services whenever possible or to conduct smaller (10 or fewer congregants while ensuring 6 feet in between congregants), more frequent services to allow strict compliance with **Social Distancing Requirements**.

- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities
- Moving services
- In person group counseling or recovery meetings for substance abuse or behavioral health following social distancing of 6 feet and no more than 10 participants

## **6. News Media**

- Newspapers
- Television
- Radio
- Other media services

## **7. Financial and Professional Institutions, Including:**

- Banks and credit institutions
- Insurance and payroll
- Services related to financial markets
- Professional services, such as legal, title companies, or accounting services, real estate appraisals and transactions

## **8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

**9. Construction, Including but not Limited To:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals who provide services necessary to maintain the safety, sanitation, and critical operation of residences and other **Critical Businesses** or **Critical Government Functions**, and other essential services

**10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations
- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor (including maintenance and repair of ordinary household and business appliances but not in-person retail sales of such products)
- Automotive and bicycle repair
- Disinfection
- Snow removal
- Bail bonds agents
- Pest control

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics

- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**13. Educational Institutions that Provide Critical Services to Students and the General Public:**

- P-12 public school and private schools for the purpose of providing meals, housing, facilitating or providing materials for distance learning, and providing other essential services to students, provided that **Social Distancing Requirements** are observed.
- Postsecondary institutions, including private and public colleges and universities, for the purpose of facilitating distance learning, providing in person classroom or laboratory education for less than 10 students per classroom or lab in medical training fields only, or performing essential functions, provided that **Social Distancing Requirements** are observed, such as security, medical and mental health services, housing, food services, and critical research.

## **APPENDIX G: COUNTY VARIANCE REQUESTS**

Governor Jared Polis issued **Executive Order D 2020 044 Safer at Home** effective April 27, 2020. The key elements of the Order are that most people still stay at home as much as possible and avoid unnecessary social interactions; vulnerable populations continue to stay at home except to support or perform necessary activities or participate in critical government functions or critical businesses; there is limited reopening of postsecondary institutions, and certain business operations are permitted; people are still encouraged to stay within their county of residence or employment as much as possible; public gatherings of more than ten (10) persons are prohibited; and Coloradans are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public.

Any county that desires to apply for a variance from part or all of the executive order may do so after meeting the following criteria and submitting an alternative COVID-19 suppression plan to be approved or denied by Colorado Department of Public Health and the Environment (CDPHE), attention Executive Director, Jill Hunsaker Ryan, MPH.

Criteria for variance consideration:

- 1) The local public health agency endorses the alternative plan;
- 2) Local hospitals can verify that they have the capacity to serve all people needing their care; and;
- 3) The county commissioners (or other county-level governing body) vote affirmatively to adopt the alternative plan in place of the state Safer-At-Home order.

The local variance process allows communities that are not experiencing a high rate of transmission to tailor social distancing policies to local conditions, in order to promote community wellness and economic stability. To protect other communities and hospital systems statewide, it is paramount that the local variance process only be used when transmission is at a low enough level to be suppressed through testing and containment efforts to detect positive cases, ensure successful isolation and quarantine close contacts. Examples of local conditions that should be considered in seeking a variance include: a low number of new cases per day, cases declining for the past 14 days, declining positive tests as a percent of total tests for the past 14 days, low and stable case growth rate or equivalent, and having an early warning system to detect an increase in community spread or outbreaks, with triggers for tightening restrictions to prevent a breach of local hospital system capacity. Considerations and triggers should be documented in the plan submitted to CDPHE.

The following framework is being used by the State of Colorado to move between levels of social distancing. This may be helpful guidance in developing a local request:

**Colorado’s Framework for Social Distancing**

<b>Stay at Home</b>	<b>Safer At Home</b>	<b>Protect Your Neighbor</b>
<ul style="list-style-type: none"> <li>● Widespread suppression is required to stem exponential disease transmission</li> <li>● People are staying at home with limited exceptions</li> <li>● Healthcare/hospital capacity is still limited</li> <li>● Testing availability and containment capacity is still being built</li> <li>● People are encouraged to not travel between counties except for work or to obtain necessary services</li> </ul>	<ul style="list-style-type: none"> <li>● Disease has been suppressed and hospital capacity is not threatened.</li> <li>● Health care capacity is increasing</li> <li>● Testing availability and containment capacity are increasing</li> <li>● Most people still stay at home as much as possible and avoid unnecessary social interactions</li> <li>● Vulnerable populations stay home with limited exceptions</li> <li>● People are encouraged not to travel between counties except for work or to obtain necessary services</li> <li>● Public health has an early warning system to detect a significant increase in cases or greater demand for medical care</li> </ul>	<ul style="list-style-type: none"> <li>● Disease transmission is low</li> <li>● Healthcare capacity is robust</li> <li>● Testing availability and containment capacity are working at scale</li> <li>● It’s safer for people to socialize more normally, while taking significant precautions</li> <li>● Strong protections for vulnerable populations are still needed</li> <li>● Public health has an early warning system in place to detect a significant increase in cases or greater demand for medical care</li> </ul>

The Colorado Department of Public Health and Environment is available to provide technical assistance to any county considering a variance. The department will consider applications for variances based on the submitted plan’s rationale for a step down and the presence of an early

warning system with triggers for tightening back up. CDPHE reserves the right to approve or deny applications. Counties that choose to not comply with this executive order or an approved variance will be subject to the loss of emergency preparedness funds.

Sara Waite / Sterling Journal-Advocate

A barrier controls customer traffic into the Sterling Walmart on April 8, 2020, while an employee ensures that there are not too many people in the store to comply with social distancing restrictions.

# Report: Rural barriers to social distancing

Wide open spaces don't mean low infection risk

By Jeff Rice  
Journal-Advocate staff writer

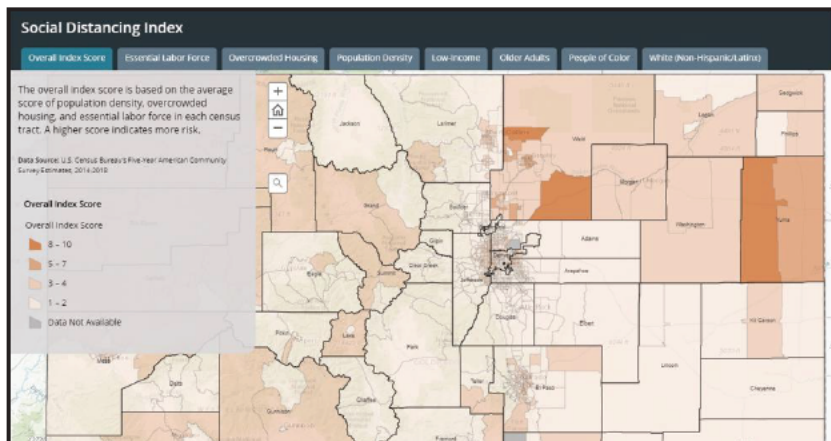

A new interactive map from the Colorado Health Institute pinpoints census tracts where people are likely to have the hardest time staying isolated because of crowded housing, dense neighborhoods, or the nature of their work.

Not surprisingly, the map shows that, according to the CHI release accompanying the map, social distancing is most difficult in neighborhoods around Denver County. What is surprising is that agricultural areas in northeastern Colorado also purportedly pose big obstacles to social distancing.

"Despite the wide-open spaces on the Eastern Plains, Yuma County and parts of Weld County have crowded living quarters and a high concentration of jobs that require workers to be physically present," the report says.

Just because an area has an overall low population density doesn't mean people can necessarily spread out during their normal working day.

"In general, rural communities have a higher percentage of workers deemed essential than the Front Range's cities and

The Colorado Health Institute's interactive social distancing map shows areas of greatest risk for COVID-19 infections because of difficulty with social distancing. Darker colors indicate higher risk.

suburbs," the report said. "Two essential sectors dominate rural employment — agriculture and education/health care/social services, according to the census data used for the index."

Agricultural workers help maintain the food supply for Colorado and the country as a whole. The Colorado Department of Public Health and Environment reported that as of April 15, 120 employees at two meat pack-

ing plants had tested positive for COVID-19, and five had died.

The report also blames generations of racial discrimination, even in rural areas, which causes crowded living conditions among people of color.

"Crowded areas in both rural and urban Colorado tend to have a higher proportion of people of color — a testament to current

## **SAFER AT HOME LOGAN COUNTY (Phase 1) APRIL 28**

### **CONDITIONS FOR LIFTING RESTRICTIONS**

**The World Health Organization has set forth the following guidelines for transitioning from a “scenario of community transmission to a sustainable, steady-state of low-level or no transmission:”**

#### **1. Disease Transmission is Under Control**

- The number of daily positive COVID-19 cases has remained flat since the first positive case was reported to Logan County on 03/22/2020; there are a total of 31 positive cases as of 04/28/2020. The greatest spike in numbers occurred in early April when five positive cases were reported for a single day, until the Department of Corrections Sterling Facility conducted mass testing of inmates and thus our numbers of positive cases (238) spiked on Friday 4/24/2020
- Logan County’s online Symptom Tracker has had 76 entries

#### **2. There are Sufficient Health System and Public Health Capabilities**

- Sterling Regional MedCenter has the capacity to begin testing for COVID-19 in their own labs
- Sterling Regional MedCenter has 6 ICU beds with the potential to expand to 12 with 5 critical and noncritical ventilators
- Northeast Colorado Health Department developed a community medical surge plan in collaboration with local hospitals. On average, the hospitals have enough PPE to last two months under normal conditions. Northeast Colorado Health Department has reserved 5% of the critical PPE supplies from the local Medical Cache allocation to backfill the hospitals as needed
- The Northeast Colorado Health Department Epidemiology team consists of three disease surveillance specialists who do contact investigations on every positive case. Case investigations are mostly completed within 24 hours. Contact tracing is also performed with people who were in direct contact with identified positive cases
- Among positive cases in Logan County, over half have been traced to a known Source

#### **3. Outbreak Risks in High-Vulnerability Settings are Minimized**

- Northeast Colorado Health Department Health address policies and procedures in nursing homes
- Northeast Colorado Health Department Health works with childcare facilities

#### **4. Workplace Preventive Measures are Established**

- Guidelines addressing prevention have been written and distributed to schools, workplaces, and other essential places as outlined in this document (Phases 1, 2, and 3)

#### 5. Risk of Imported Cases Managed

- Limits have been set for non-essential travel
- There are currently restrictions to prohibit camping in State Parks
- There are protocols in place related to transporting patients to Logan County hospitals from other regional hospitals
- The Sterling Municipal Airport has protocols for handling an exposed or potentially infectious person at the airport.

#### 6. Communities are Fully Engaged

- Northeast Colorado Health Department staff are working with healthcare facilities to implement physical distancing guidelines
- Northeast Colorado Health Department retail food licensing team, along with NCHD health educators are working with local businesses to implement physical distancing guidelines
- Northeast Colorado Health Department staff are working with local residents on education and compliance related to physical distancing guidelines
- Northeast Colorado Health Department is working with outdoor recreation facilities to implement physical distancing guidelines

#### **PUBLIC HEALTH RECOMMENDATIONS FOR ALL RESIDENTS OF LOGAN COUNTY**

- Maintain physical distancing (6 feet)
- Adults 65 years and older and high-risk populations should limit public interactions and stay at home as much as possible
- Use cloth face coverings for interactions where physical distancing is not possible or when entering public places
- People with symptoms should stay home and should not go to work
- Wash hands frequently with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol.

#### **DETERMINING SUCCESS DURING ALL PHASES OF REOPENING**

The determination on whether the social distancing policies are working will be based on: **1) keeping the proportion of positive tests to less than 10% of overall general population tests conducted when mass testing is supplied, and 2) staying below the threshold of less than 40 COVID-19 hospitalizations** among our local hospitals. If respective numbers for either of these measures exceeds the stated limit, actions will be taken to improve social distancing practices in Logan County. It may be necessary to reissue local Stay at Home orders. It is vital that everyone participate in this effort.

#### **GUIDELINES FOR ALL SECTORS:**

- Perform frequent environmental cleaning and disinfection (concentrate on high touch surfaces like tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.)
  - [Healthcare facilities](#)
  - [Postmortem care facilities](#)
  - [Laboratories](#)
  - [Other, non-healthcare facilities](#)

- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- Employees are encouraged to wear a non-medical cloth face covering over the nose and mouth while working, except where doing so would inhibit the individual's health
- Maintain at least six feet distance from each other
- Monitor workforce for compatible symptoms
- Implement or maintain return to work policies
  - [Healthcare facilities](#)
  - [Critical infrastructure workers after exposure](#)

## SPECIFIC RECOMMENDATIONS BY SECTOR

### Public gatherings

- Allow public gatherings of no more than 10 people
- Maintain at least six feet distance from each other
- Movie Theaters can open if they can meet the requirements of 30% capacity as long as social distancing can be used, patrons should wear mask as well, with the facility posting the appropriate signage on the recommendations
- No festivals or other large gatherings until at least June 12<sup>th</sup>, at which time the situation will be evaluated to determine when and if festivals and other types of large gatherings can resume
- Large venues shall remain **closed** (concert facilities, sporting event facilities, etc.)

### Offices

- Encourage telework, wherever possible
- Maintain at least six feet distance from customers and each other
- Desks, work stations, and other work areas should be separated by at least six feet. If fixed stations exist, separate employees or clients by leaving one station in between. Workstations separated by walls that are six feet or higher can remain as they are
- Implement or maintain physical barriers for high-contact settings (e.g. reception areas)
- Implement physical distance protocols in common areas (separate tables and chairs by at least six feet)
- Place markings on the floor to maintain at least six feet distance in customer lines; try to establish one-way passage as much as possible
- Only essential travel is allowed
- Consider return to work in phases as applicable
- Implement or maintain flexible [sick leave policies and practices](#)
- Consider accommodations for high-risk individuals or populations
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- All employees are encouraged to wear a non-medical cloth face covering over the nose and mouth while working, except where doing so would inhibit the individual's health

### **Retail and personal services (as applicable)**

- Critical businesses that were open under the stay at home order should maintain the same precautions and physical distancing practices
- As much as possible, continue curbside delivery while phasing into public opening
- Personal services (salons, tattoo parlors, dog grooming, etc.) and non-critical can open under the following guidelines.
  - Spread people out so there is at least six feet distance between individuals throughout
  - Limit the number of clients to 30% of the facility's capacity
  - Separate workstations (tables, chairs, etc.) by six feet. If fixed stations exist, separate clients by leaving one station in between. Workstations separated by walls that are six feet or higher can remain as they are
  - Implement or continue early opening for high-risk individuals
  - Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
  - Implement or maintain one-way entry/exit and aisles if possible
  - Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
  - Implement or maintain curbside services in businesses as a preferred method
  - Stagger shifts if feasible to decrease the number of employees at the business
  - Maintain at least six feet physical distancing in waiting areas
  - Place markings on the floor to maintain at least six feet distance in customer lines
  - Implement touchless payment methods when possible
  - Encourage the public to wear cloth face coverings to enter the businesses

### **Restaurants**

- Bars shall remain closed, including those that are part of restaurants, however if patrons are dining in with all the below measures met alcohol may be served at their table
- Continuing takeout and delivery is highly encouraged
- As much as possible, continue curbside delivery while phasing into public opening
- Spread people/tables out so there is at least six feet distance between individuals throughout
- Limit the number of clients to 30% of your capacity
- Place markings on the floor to maintain at least six feet distance in customer lines
- Implement touchless payment methods when possible
- Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
- Stagger shifts if feasible to decrease employee numbers at the business
- In-room dining shall follow strict physical distancing
- Group parties should be limited to no more than six people. People within a party should be family members or acquaintances who have previously been in contact with each other and there is limited risk of disease transmission
- Don't allow public sharing of utensils or condiments
- Buffets shall have an employee serving the food, no self-serving allowed
- Self-serving stations shall remain closed (drinking stations, bulk dry, etc.)
- Maintain physical distancing (six feet) in waiting areas
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- Encourage the public to wear cloth face coverings to enter the businesses

### **Elective, Medical and Health Services**

- Visitation to hospitals and senior living facilities is **prohibited** at this time
- **Necessary** surgeries can resume
- Elective health services can reopen with while adhering to the following precautions
  - Use adequate PPE that protects the provider and the client
  - Implement one-way entry/exit and aisles
  - Use an appointment system to minimize the time in waiting rooms
  - Maintain physical distancing (six feet) in waiting rooms
  - Implement or maintain physical barriers for high-contact settings (e.g. front desk)
  - Encourage the public to wear cloth face coverings to enter the businesses
  - Employees and contracted workers (other than providers) whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth

### **Recreation**

- Maintain physical distancing in outdoor settings (6ft while hiking, 15ft while running or biking)
- Open outdoor recreation facilities where adequate controls can be implemented to ensure physical distancing (six feet)
- Limit public gatherings to no more than 10 people
- Camping should be limited to one family per campsite
- No group camping allowed, in individual campsites or group campsites
- Playground equipment shall remain closed
- Swim beaches shall remain **closed**
- Perform frequent cleaning and disinfection of bathrooms and high-touch surfaces
- Only essential travel allowed; avoid traveling outside of your county or local community for recreation

### **Education**

- Limited in-person learning for specific settings (e.g. technical college)
- Limit classrooms to no more than 10 people
- Maintain at least six feet distance from each other
- Higher education, K-12, and organized youth activities shall remain **closed**
- Child cares can reopen with the following precautions
  - Perform frequent environmental cleaning and disinfection (concentrate on high touch surfaces like playgrounds, toys, tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.)
  - All employees shall wear a non-medical cloth face covering over the nose and mouth while working with children
  - Maintain at least six feet distance from coworkers
  - Implement physical distance protocols in common areas (separate tables and chairs by at least six feet)
  - Symptomatic children should be excluded from care
  - To the extent possible, limit the sharing of utensils, toys, and classroom materials
  - To the extent possible, limit shared spaces to one classroom at the time (e.g. playgrounds)

### Real Estate

- In-person home showings can resume
- Maintain at least six feet distance from customers and each other
- Cloth face coverings are highly encouraged
- Prior to a showing, ensure clients are not experiencing respiratory symptoms
- Open houses are **prohibited** at this time

### Places of worship

- Continue online or drive-by services as much as possible
- When offering on-site services:
  - Limit the number of participants to 30% of your capacity is strongly encouraged
  - Encourage all attendees who are 65 and above to stay at home and watch the services online, or provide a "senior service" exclusively for attendees 65 and above to attend in person as long as the social distancing can be obtained
  - Ask all attendees who have an underlying at-risk health condition to stay home and watch the services online
  - Operate with strict physical distancing practices
  - Spread people out so there is at least six feet distance between families throughout
  - Place markings on the floor to maintain at least six feet distance where lines form
  - Implement or maintain one-way entry/exit and aisles
  - Implement touchless offering options as much as possible
  - Encourage employees and the public to wear cloth face coverings
  - Discourage people from attending if they are experiencing any symptoms
  - Perform frequent cleaning and disinfection of bathrooms and high-touch surfaces

### Gyms

- Can operate IF the following physical distancing and cleaning practices are possible
  - Limit the number of clients to 30% of your capacity
  - Spread people out so there is at least six feet distance between individuals throughout
  - Group classes are not allowed
  - Saunas, pools (indoor and outdoor) and shared spaces should remain closed
  - Food/drink bars shall remain closed
  - Locker Rooms Facilities and Showers will remain closed

# SAFER AT HOME LOGAN COUNT

Page 1 APRIL 2

## CONDITIONS FOR LIFTING RESTRICTIONS

The Board of Health Ordinance is set forth to ensure in the event of a transition from a “scenario of community transmission to a sustainable, steady state of zero or no transmission:”

### 1. Disease Transmission is Under Control

- The number of daily positive COVID-19 cases has remained flat since the first positive case was reported to Logan County on 03/22/2020; there are a total of 24 positive cases as of 04/23/2020. The greatest spike in numbers occurred in early April when five positive cases were reported for a single day.
- Hospitalizations among Logan County residents have been minimal; there have been 6 total hospitalizations (4 discharged) as of 04/21/2020
- Logan County’s online Symptom Tracker has had 76 entries

### 2. There are Sufficient Health System and Public Health Capabilities

- Logan County hospitals test all elective surgery patients and at-risk healthcare staff. Initially, 500 tests per month will be performed among local hospitals with the ability to increase to 1,500 tests once surgery facilities are fully operational
- Sterling Regional MedCenter has the capacity to begin testing for COVID-19 in their own labs
- Sterling Regional MedCenter has 81 ICU beds with the potential to expand to 125 with 102 critical and noncritical ventilators
- Northeast Colorado Health Department developed a community medical surge plan in collaboration with local hospitals. On average, the hospitals have enough PPE to last two months under normal conditions. Northeast Colorado Health Department has reserved 20% of the critical PPE supplies from the local Medical Cache allocation to backfill the hospitals as needed
- The Northeast Colorado Health Department Epidemiology team consists of four disease surveillance specialists who do contact investigations on every positive case. Case investigations are completed within 24 hours. Contact tracing is also performed with people who were in direct contact with identified positive cases
- Among positive cases in Logan County, over half have been traced to a known Source

### 3. Outbreak Risks in High Vulnerability Settings are Minimal

- Northeast Colorado Health Department has a team assigned to correctional facilities in Logan County
- Northeast Colorado Health Department has a team assigned to local facilities that work with nearly 500 homeless individuals
- Northeast Colorado Health Department Health has a team assigned to address policies and procedures in nursing homes
- Northeast Colorado Health Department Health has a team that works with child care facilities
- Northeast Colorado Health Department has the ability to bring COVID-19 sampling offsite and the ability to train partners on how to do COVID-19 sampling

#### 4. **Core Prevention Measures are Established**

- Guidelines addressing prevention have been written and distributed to schools, workplaces, and other essential places as outlined in this document (Phases 1, 2, and 3)

#### 5. **Risk of Imported Cases Managed**

- Limits have been set for non-essential travel
- Recommendations have been sent to appropriate property owners discouraging short-term rentals
- Northeast Colorado Health Department is involved in a weekly meeting with members representing our federal lands, Colorado National Monument, Colorado Parks and Wildlife, local city park officials, and other outdoor-resource representatives
- There are currently restrictions to prohibit camping in State Parks
- 200 signs have been posted on public lands. The signs outline appropriate physical distancing practices in parking lots and trailheads
- There are protocols in place related to transporting patients to Logan County hospitals from other regional hospitals
- The Sterling Municipal Airport has protocols for handling an exposed or potentially infectious person at the airport. The Aircraft Rescue and Fire Fighting (ARFF) team is the lead at the airport

#### 6. **Communities are Fully Engaged**

- Northeast Colorado Health Department Nurses are working with healthcare facilities to implement physical distancing guidelines
- Northeast Colorado Health Department retail food licensing team, along with NCHD health educators are working with local businesses to implement physical distancing guidelines
- Northeast Colorado Health Department community organizers are working with local residents on education and compliance related to physical distancing guidelines
- Northeast Colorado Health Department is working with outdoor recreation facilities to implement physical distancing guidelines

### **PUBLIC HEALTH RECOMMENDATIONS FOR ALL RESIDENTS OF LOGAN COUNTY**

- Maintain physical distancing (6 feet)
- Adults 65 years and older and high-risk populations should limit public interactions and stay at home as much as possible
- Use cloth face coverings for interactions where physical distancing is not possible or when entering public places
- People with symptoms should stay home and should not go to work
- Wash hands frequently with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol.

### **DETERMINING SUCCESS DURING ALL PHASES OF REOPENING**

The determination on whether the social distancing policies are working will be based on: 1

reopen the proportion of positive tests to less than 10% of era tests conducted and 2 stay in the zero test results or less than 0 COVID 19 hospitalizations among our local hospitals. If respective numbers for either of these measures exceeds the stated limit,

actions will be taken to improve social distancing practices in Logan County. It may be necessary to reissue local Stay at Home orders. It is vital that everyone participate in this effort.

#### GUIDELINES FOR ALL SECTORS:

- Perform frequent environmental cleaning and disinfection (concentrate on high touch surfaces like tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.)
  - [Healthcare facilities](#)
  - [Postmortem care facilities](#)
  - [Laboratories](#)
  - [Other, non-healthcare facilities](#)
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- Employees are encouraged to wear a non-medical cloth face covering over the nose and mouth while working, except where doing so would inhibit the individual's health
- Maintain at least six feet distance from each other
- Monitor workforce for compatible symptoms
- Implement or maintain return to work policies
  - [Healthcare facilities](#)
  - [Critical infrastructure workers after exposure](#)

#### SPECIFIC RECOMMENDATIONS B SECTOR

##### Public gatherings

- Allow public gatherings of no more than 10 people
- Maintain at least six feet distance from each other
- No festivals or other large gatherings until at least July 1st, at which time the situation will be evaluated to determine when and if festivals and other types of large gatherings can resume
- Large venues shall remain closed (movie theaters, concert facilities, sporting event facilities, etc.)

##### Offices

- Encourage telework, wherever possible
- Maintain at least six feet distance from customers and each other
- Desks, work stations, and other work areas should be separated by at least six feet. If fixed stations exist, separate employees or clients by leaving one station in between. Workstations separated by walls that are six feet or higher can remain as they are
- Implement or maintain physical barriers for high-contact settings (e.g. reception areas)
- Implement physical distance protocols in common areas (separate tables and chairs by at least six feet)
- Place markings on the floor to maintain at least six feet distance in customer lines; try to establish one-way passage as much as possible

- Only essential travel is allowed
- Consider return to work in phases as applicable
- Implement or maintain flexible [sick leave policies and practices](#)
- Consider accommodations for high-risk individuals or populations
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- All employees are encouraged to wear a non-medical cloth face covering over the nose and mouth while working, except where doing so would inhibit the individual's health

### **Retail and personal services as applicable**

- Critical businesses that were open under the stay at home order should maintain the same precautions and physical distancing practices
- As much as possible, continue curbside delivery while phasing into public opening
- Personal services (salons, tattoo parlors, dog grooming, etc.) and non-critical can open under the following guidelines.
  - Spread people out so there is at least six feet distance between individuals throughout
  - **Limit the number of clients to 30% of the facility's fire code capacity**
  - Separate workstations (tables, chairs, etc.) by six feet. If fixed stations exist, separate clients by leaving one station in between. Workstations separated by walls that are six feet or higher can remain as they are
  - Implement or continue early opening for high-risk individuals
  - Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
  - Implement or maintain one-way entry/exit and aisles
  - Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
  - Implement or maintain curbside services in businesses as a preferred method
  - Stagger shifts if feasible to decrease the number of employees at the business
  - Maintain at least six feet physical distancing in waiting areas
  - Place markings on the floor to maintain at least six feet distance in customer lines
  - Implement touchless payment methods when possible
  - Encourage the public to wear cloth face coverings to enter the businesses

### **Restaurants**

- **Bars shall remain closed including those that are part of restaurants**
- Continuing takeout and delivery is highly encouraged
- As much as possible, continue curbside delivery while phasing into public opening
- Spread people/tables out so there is at least six feet distance between individuals throughout
- Limit the number of clients to 30% of your fire code capacity
- Place markings on the floor to maintain at least six feet distance in customer lines
- Implement touchless payment methods when possible
- Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
- Stagger shifts if feasible to decrease employee numbers at the business
- In-room dining shall follow strict physical distancing

- Group parties should be limited to no more than six people. People within a party should be family members or acquaintances who have previously been in contact with each other and there is limited risk of disease transmission
- Don't allow public sharing of utensils or condiments
- Buffets shall have an employee serving the food, no self-serving allowed
- Self-serving stations shall remain **closed** (drinking stations, bulk dry, etc.)
- Maintain physical distancing (six feet) in waiting areas
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- Encourage the public to wear cloth face coverings to enter the businesses

### **Elective Medical Health Services**

- Visitation to hospitals and senior living facilities is **prohibited** at this time
- Elective surgeries can resume
- Elective health services can reopen with while adhering to the following precautions
  - Use adequate PPE that protects the provider and the client
  - Implement one-way entry/exit and aisles
  - Use an appointment system to minimize the time in waiting rooms
  - Maintain physical distancing (six feet) in waiting rooms
  - Implement or maintain physical barriers for high-contact settings (e.g. front desk)
  - Encourage the public to wear cloth face coverings to enter the businesses
  - Employees and contracted workers (other than providers) whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth

### **Recreation**

- Maintain physical distancing in outdoor settings (6ft while hiking, 15ft while running or biking)
- Open outdoor recreation facilities where adequate controls can be implemented to ensure physical distancing (six feet)
- Limit public gatherings to no more than 10 people
- Camping should be limited to one family per campsite
- No group camping allowed, in individual campsites or group campsites
- Playground equipment shall remain closed
- Swim beaches shall remain **closed**
- Perform frequent cleaning and disinfection of bathrooms and high-touch surfaces
- Only essential travel allowed; avoid traveling outside of your county or local community for recreation

### **Education**

- Limited in-person learning for specific settings (e.g. technical college)
- Limit classrooms to no more than 10 people
- Maintain at least six feet distance from each other
- Higher education, K-12, and organized youth activities shall remain **closed**

- Child cares can reopen with the following precautions
  - Perform frequent environmental cleaning and disinfection (concentrate on high touch surfaces like playgrounds, toys, tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.)
  - All employees shall wear a non-medical cloth face covering over the nose and mouth while working with children
  - Maintain at least six feet distance from coworkers
  - Implement physical distance protocols in common areas (separate tables and chairs by at least six feet)
  - Symptomatic children should be excluded from care
  - To the extent possible, limit the sharing of utensils, toys, and classroom materials
  - To the extent possible, limit shared spaces to one classroom at the time (e.g. playgrounds)

### **Real Estate**

- In-person home showings can resume
- Maintain at least six feet distance from customers and each other
- Cloth face coverings are highly encouraged
- Prior to a showing, ensure clients are not experiencing respiratory symptoms
- Open houses are **prohibited** at this time

### **Places of Worship**

- Continue online or drive-by services as much as possible
- When offering on-site services:
  - Limit the number of participants to 30% of your fire code capacity
  - Operate with strict physical distancing practices
  - Spread people out so there is at least six feet distance between families throughout
  - Place markings on the floor to maintain at least six feet distance where lines form
  - Implement or maintain one-way entry/exit and aisles
  - Implement touchless offering options as much as possible
  - Encourage employees and the public to wear cloth face coverings
  - Discourage people from attending if they are experiencing any symptoms
  - Perform frequent cleaning and disinfection of bathrooms and high-touch surfaces

### **Gyms**

- Can operate IF the following physical distancing and cleaning practices are possible
  - Limit the number of clients to 30% of your fire code capacity
  - Spread people out so there is at least six feet distance between individuals throughout
  - Group classes are not allowed
  - Saunas, pools (indoor and outdoor) and shared spaces should remain closed
  - Food/drink bars shall remain closed

# SAFER AT HOME LOGAN COUNT

Page 1 APRIL 2

## CONDITIONS FOR LIFTING RESTRICTIONS

The Health Order is set forth to ensure a transition from a “scenario of community transmission to a sustainable, steady state of zero or no transmission:”

### 1. Disease Transmission is Under Control

- The number of daily positive COVID-19 cases has remained flat since the first positive case was reported to Logan County on 03/22/2020; there are a total of 24 positive cases as of 04/23/2020. The greatest spike in numbers occurred in early April when five positive cases were reported for a single day.
- Hospitalizations among Logan County residents have been minimal; there have been 6 total hospitalizations (4 discharged) as of 04/21/2020
- Logan County’s online Symptom Tracker has had 76 entries

### 2. There are Sufficient Health System and Public Health Capabilities

- Logan County hospitals test all elective surgery patients and at-risk healthcare staff. Initially, 500 tests per month will be performed among local hospitals with the ability to increase to 1,500 tests once surgery facilities are fully operational
- Sterling Regional MedCenter has the capacity to begin testing for COVID-19 in their own labs
- Sterling Regional MedCenter has 81 ICU beds with the potential to expand to 125 with 102 critical and noncritical ventilators
- Northeast Colorado Health Department developed a community medical surge plan in collaboration with local hospitals. On average, the hospitals have enough PPE to last two months under normal conditions. Northeast Colorado Health Department has reserved 20% of the critical PPE supplies from the local Medical Cache allocation to backfill the hospitals as needed
- The Northeast Colorado Health Department Epidemiology team consists of four disease surveillance specialists who do contact investigations on every positive case. Case investigations are completed within 24 hours. Contact tracing is also performed with people who were in direct contact with identified positive cases
- Among positive cases in Logan County, over half have been traced to a known Source

### 3. Outbreak Risks in High Vulnerability Settings are Minimized

- Northeast Colorado Health Department has a team assigned to correctional facilities in Logan County
- Northeast Colorado Health Department has a team assigned to local facilities that work with nearly 500 homeless individuals
- Northeast Colorado Health Department Health has a team assigned to address policies and procedures in nursing homes
- Northeast Colorado Health Department Health has a team that works with child care facilities
- Northeast Colorado Health Department has the ability to bring COVID-19 sampling offsite and the ability to train partners on how to do COVID-19 sampling

#### 4. **Core Prevention Measures are Established**

- Guidelines addressing prevention have been written and distributed to schools, workplaces, and other essential places as outlined in this document (Phases 1, 2, and 3)

#### 5. **Risk of Imported Cases Managed**

- Limits have been set for non-essential travel
- Recommendations have been sent to appropriate property owners discouraging short-term rentals
- Northeast Colorado Health Department is involved in a weekly meeting with members representing our federal lands, Colorado National Monument, Colorado Parks and Wildlife, local city park officials, and other outdoor-resource representatives
- There are currently restrictions to prohibit camping in State Parks
- 200 signs have been posted on public lands. The signs outline appropriate physical distancing practices in parking lots and trailheads
- There are protocols in place related to transporting patients to Logan County hospitals from other regional hospitals
- The Sterling Municipal Airport has protocols for handling an exposed or potentially infectious person at the airport. The Aircraft Rescue and Fire Fighting (ARFF) team is the lead at the airport

#### 6. **Communities are Fully Engaged**

- Northeast Colorado Health Department Nurses are working with healthcare facilities to implement physical distancing guidelines
- Northeast Colorado Health Department retail food licensing team, along with NCHD health educators are working with local businesses to implement physical distancing guidelines
- Northeast Colorado Health Department community organizers are working with local residents on education and compliance related to physical distancing guidelines
- Northeast Colorado Health Department is working with outdoor recreation facilities to implement physical distancing guidelines

### **PUBLIC HEALTH RECOMMENDATIONS FOR ALL RESIDENTS OF LOGAN COUNTY**

- Maintain physical distancing (6 feet)
- Adults 65 years and older and high-risk populations should limit public interactions and stay at home as much as possible
- Use cloth face coverings for interactions where physical distancing is not possible or when entering public places
- People with symptoms should stay home and should not go to work
- Wash hands frequently with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol.

### **DETERMINING SUCCESS DURING ALL PHASES OF REOPENING**

The determination on whether the social distancing policies are working will be based on: 1

reopen the proportion of positive tests to less than 10% of era tests conducted and 2 stay in the zero test results or less than 10 COVID-19 hospitalizations among our local hospitals. If respective numbers for either of these measures exceeds the stated limit,

actions will be taken to improve social distancing practices in Logan County. It may be necessary to reissue local Stay at Home orders. It is vital that everyone participate in this effort.

#### GUIDELINES FOR ALL SECTORS:

- Perform frequent environmental cleaning and disinfection (concentrate on high touch surfaces like tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.)
  - [Healthcare facilities](#)
  - [Postmortem care facilities](#)
  - [Laboratories](#)
  - [Other, non-healthcare facilities](#)
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- Employees are encouraged to wear a non-medical cloth face covering over the nose and mouth while working, except where doing so would inhibit the individual's health
- Maintain at least six feet distance from each other
- Monitor workforce for compatible symptoms
- Implement or maintain return to work policies
  - [Healthcare facilities](#)
  - [Critical infrastructure workers after exposure](#)

#### SPECIFIC RECOMMENDATIONS B SECTOR

##### Public gatherings

- Allow public gatherings of no more than 10 people
- Maintain at least six feet distance from each other
- No festivals or other large gatherings until at least July 1st, at which time the situation will be evaluated to determine when and if festivals and other types of large gatherings can resume
- Large venues shall remain closed (movie theaters, concert facilities, sporting event facilities, etc.)

##### Offices

- Encourage telework, wherever possible
- Maintain at least six feet distance from customers and each other
- Desks, work stations, and other work areas should be separated by at least six feet. If fixed stations exist, separate employees or clients by leaving one station in between. Workstations separated by walls that are six feet or higher can remain as they are
- Implement or maintain physical barriers for high-contact settings (e.g. reception areas)
- Implement physical distance protocols in common areas (separate tables and chairs by at least six feet)
- Place markings on the floor to maintain at least six feet distance in customer lines; try to establish one-way passage as much as possible

- Only essential travel is allowed
- Consider return to work in phases as applicable
- Implement or maintain flexible [sick leave policies and practices](#)
- Consider accommodations for high-risk individuals or populations
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- All employees are encouraged to wear a non-medical cloth face covering over the nose and mouth while working, except where doing so would inhibit the individual's health

### **Retail and personal services as applicable**

- Critical businesses that were open under the stay at home order should maintain the same precautions and physical distancing practices
- As much as possible, continue curbside delivery while phasing into public opening
- Personal services (salons, tattoo parlors, dog grooming, etc.) and non-critical can open under the following guidelines.
  - Spread people out so there is at least six feet distance between individuals throughout
  - **Limit the number of clients to 30% of the facility's fire code capacity**
  - Separate workstations (tables, chairs, etc.) by six feet. If fixed stations exist, separate clients by leaving one station in between. Workstations separated by walls that are six feet or higher can remain as they are
  - Implement or continue early opening for high-risk individuals
  - Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
  - Implement or maintain one-way entry/exit and aisles
  - Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
  - Implement or maintain curbside services in businesses as a preferred method
  - Stagger shifts if feasible to decrease the number of employees at the business
  - Maintain at least six feet physical distancing in waiting areas
  - Place markings on the floor to maintain at least six feet distance in customer lines
  - Implement touchless payment methods when possible
  - Encourage the public to wear cloth face coverings to enter the businesses

### **Restaurants**

- **Bars shall remain closed including those that are part of restaurants**
- Continuing takeout and delivery is highly encouraged
- As much as possible, continue curbside delivery while phasing into public opening
- Spread people/tables out so there is at least six feet distance between individuals throughout
- Limit the number of clients to 30% of your fire code capacity
- Place markings on the floor to maintain at least six feet distance in customer lines
- Implement touchless payment methods when possible
- Implement or maintain physical barriers for high-contact settings (e.g. cashiers)
- Stagger shifts if feasible to decrease employee numbers at the business
- In-room dining shall follow strict physical distancing

- Group parties should be limited to no more than six people. People within a party should be family members or acquaintances who have previously been in contact with each other and there is limited risk of disease transmission
- Don't allow public sharing of utensils or condiments
- Buffets shall have an employee serving the food, no self-serving allowed
- Self-serving stations shall remain **closed** (drinking stations, bulk dry, etc.)
- Maintain physical distancing (six feet) in waiting areas
- Employees and contracted workers whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth
- Encourage the public to wear cloth face coverings to enter the businesses

### **Elective Medical Health Services**

- Visitation to hospitals and senior living facilities is **prohibited** at this time
- Elective surgeries can resume
- Elective health services can reopen with while adhering to the following precautions
  - Use adequate PPE that protects the provider and the client
  - Implement one-way entry/exit and aisles
  - Use an appointment system to minimize the time in waiting rooms
  - Maintain physical distancing (six feet) in waiting rooms
  - Implement or maintain physical barriers for high-contact settings (e.g. front desk)
  - Encourage the public to wear cloth face coverings to enter the businesses
  - Employees and contracted workers (other than providers) whose duties include close contact with members of the public shall wear a non-medical cloth face covering over the nose and mouth

### **Recreation**

- Maintain physical distancing in outdoor settings (6ft while hiking, 15ft while running or biking)
- Open outdoor recreation facilities where adequate controls can be implemented to ensure physical distancing (six feet)
- Limit public gatherings to no more than 10 people
- Camping should be limited to one family per campsite
- No group camping allowed, in individual campsites or group campsites
- Playground equipment shall remain closed
- Swim beaches shall remain **closed**
- Perform frequent cleaning and disinfection of bathrooms and high-touch surfaces
- Only essential travel allowed; avoid traveling outside of your county or local community for recreation

### **Education**

- Limited in-person learning for specific settings (e.g. technical college)
- Limit classrooms to no more than 10 people
- Maintain at least six feet distance from each other
- Higher education, K-12, and organized youth activities shall remain **closed**

- Child cares can reopen with the following precautions
  - Perform frequent environmental cleaning and disinfection (concentrate on high touch surfaces like playgrounds, toys, tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.)
  - All employees shall wear a non-medical cloth face covering over the nose and mouth while working with children
  - Maintain at least six feet distance from coworkers
  - Implement physical distance protocols in common areas (separate tables and chairs by at least six feet)
  - Symptomatic children should be excluded from care
  - To the extent possible, limit the sharing of utensils, toys, and classroom materials
  - To the extent possible, limit shared spaces to one classroom at the time (e.g. playgrounds)

### **Real Estate**

- In-person home showings can resume
- Maintain at least six feet distance from customers and each other
- Cloth face coverings are highly encouraged
- Prior to a showing, ensure clients are not experiencing respiratory symptoms
- Open houses are **prohibited** at this time

### **Places of Worship**

- Continue online or drive-by services as much as possible
- When offering on-site services:
  - Limit the number of participants to 30% of your fire code capacity
  - Operate with strict physical distancing practices
  - Spread people out so there is at least six feet distance between families throughout
  - Place markings on the floor to maintain at least six feet distance where lines form
  - Implement or maintain one-way entry/exit and aisles
  - Implement touchless offering options as much as possible
  - Encourage employees and the public to wear cloth face coverings
  - Discourage people from attending if they are experiencing any symptoms
  - Perform frequent cleaning and disinfection of bathrooms and high-touch surfaces

### **Gyms**

- Can operate IF the following physical distancing and cleaning practices are possible
  - Limit the number of clients to 30% of your fire code capacity
  - Spread people out so there is at least six feet distance between individuals throughout
  - Group classes are not allowed
  - Saunas, pools (indoor and outdoor) and shared spaces should remain closed
  - Food/drink bars shall remain closed

# SOCIAL DISTANCING

COVID - 19 is primarily spread through respiratory droplets produced when an infected person coughs or sneezes

People who have sustained contact within 6 feet of an infected individual are most at risk of transmission

# DISTANCIAMIENTO SOCIAL

COVID - 19 se transmite principalmente a través de gotitas respiratorias producidas cuando una persona infectada tose o estornuda

Las personas que han mantenido contacto a menos de 6 pies de una persona infectada tienen mayor riesgo de transmisión

# SOCIAL DISTANCING

COVID - 19 is primarily spread through respiratory droplets produced when an infected person coughs or sneezes

People who have sustained contact within 6 feet of an infected individual are most at risk of transmission

# DISTANCIAMIENTO SOCIAL

COVID - 19 se transmite principalmente a través de gotitas respiratorias producidas cuando una persona infectada tose o estornuda

Las personas que han mantenido contacto a menos de 6 pies de una persona infectada tienen mayor riesgo de transmisión

# STAFF REVITALIZATION PLAN FOR COVID-19 RESPONSE

## IMPLEMENT STAFFING ROTATIONS

Management will work with Directors, COOP Group, and Incident Commander to implement staffing rotations for incident command roles and all other positions.

## INCREASE TELEWORK DAYS

Following the Minimum Basic Staffing Plan, Supervisors will work to increase teleworking days for eligible staff.

## EXPAND MONTHLY WELLNESS LEAVE

Monthly Wellness Leave is expanded to 4 hours for April and May 2020. These hours do not accrue. They are available for non exempt and exempt employees. Staff will request the time from their supervisor like typical Wellness Leave requests. Supervisors will work with COOP Group to ensure continuity of operations are met before granting Wellness Leave Request.

## PROMOTE MENTAL HEALTH

Incident Command, Directors, and Managers will regularly promote the free Centennial service and self-care through electronic newsletters, daily briefings, and personal conversations.

**Give yourself some grace and take a break.** DIRECTOR TRISH MCCLAIN

COVID-19 Response and mitigation efforts have drastically changed our normal operations and staffing since March 13th, 2020. Our staff are also experiencing stress due to the Stay-At-Home Order and major disruptions to daily life. Our agency will be at the forefront of coordinating regional response efforts for an undefined period of time.

It is our goal as an agency to create policies that support our staff and their families during this time of uncertainty.

The Staff Revitalization Plan for COVID-19 Response includes four tools for supervisors to use to maintain productive, rested, and effective staff. There is no requirement for supervisors to use all tools. Staff will have unique needs.

Any implementation will require the highest standards in communication with the COOP Group and Incident Command to ensure minimum basic staffing for operations.

**DATE OF ORDER: MARCH 25, 2020**

**AMENDED PUBLIC HEALTH ORDER 20-24 IMPLEMENTING STAY AT HOME  
REQUIREMENTS**

**PURPOSE OF THE ORDER**

I issue this Amended Public Health Order (PHO or Order) pursuant to the Governor's directive in Executive Orders D 2020 017 (**Ordering Coloradans to Stay at Home Due to the Presence of COVID-19 in the State**) in response to the existence of hundreds of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, there is substantial evidence of community spread of COVID-19 throughout the State. This Order has been amended to direct Coloradans to Stay at Home.

**FINDINGS**

1. Due to the increasing incidence of COVID-19 in the general public, the designation of pandemic by the World Health Organization, the Declaration of a Disaster Emergency by Governor Polis on March 10, 2020, and a National Emergency by the President of the United States on March 13, 2020, and previous PHOs issued by this Department, including PHO 20-20 (Restricting Visitors all all Colorado Skilled Nursing Facilities, Assisted Living Residences and Intermediate Care Facilities); PHO 20-22 (Closing Bars, Restaurants, Theaters, Gymnasiums, Casinos, Noncritical Personal Services Facilities, and Horse Track and Off-Track Betting Facilities Statewide); and PHO 20-23 (Implementing Social Distancing Measures); I hereby declare that the actions and prohibitions outlined in this PHO are necessary for the health and safety of the residents of Colorado.
2. Scientific evidence and best practices regarding the most effective manner to slow the transmission of communicable diseases generally and COVID-19 specifically, and evidence that the population of Colorado is at risk for serious health complications, including death, from COVID-19 make it imperative that the measures included in this PHO be taken immediately.
3. There is clear evidence that some individuals who contract the COVID-19 virus have no symptoms or have mild symptoms, which means they may not be aware they carry the virus. Because even people without symptoms can transmit the disease, and because evidence shows the disease is easily spread, gatherings promote transmission of COVID-19. COVID-19 also physically contributes to property loss, contamination, and damage due to its propensity to attach to surfaces for prolonged periods of time.

4. The scientific evidence also shows that at this stage of the emergency, it is critical to slow transmission as much as possible to protect the most vulnerable and to prevent Colorado's health care system from being overwhelmed. One proven way to slow the transmission is to limit interactions among people to the greatest extent practicable and increase the distance between people in the work environment. This PHO helps to reduce the property damage caused by COVID-19 and preserves the welfare of our residents by reducing the spread of the disease in our communities and our workplaces, and preserving critical emergency and healthcare capacity in the State.

## INTENT

5. The intent of this PHO is to minimize contact between residents and to the great extent possible minimize the exposure of the public to contaminated public surfaces. By staying home we can maximize the number of people isolating in place, reduce the number of people congregating in workplaces at one time and reduce the proximity of people in the workplace, and enable the services, businesses, and travel necessary to protect public health and safety and preserve the continuity of social and commercial life as we save lives.

6. When people leave their places of residence, whether to obtain or perform critical emergency services, recreate, go to work, or for other valid reasons, they should at all times comply with **Social Distancing Requirements** as defined in Section III.F below. All provisions of this PHO should be interpreted to effectuate this intent. Failure to comply with any of the provisions of this PHO constitutes an imminent threat to public health.

## ORDER

### I. STAY AT HOME

A. All individuals currently living within the State of Colorado are ordered to **Stay at Home whenever possible**. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, and may leave their **Residences** only to perform or utilize **Necessary Activities**.

B. All public and private gatherings of any number of people occurring outside a **Residence** are prohibited, except for the limited purposes expressly permitted in this PHO which include Essential Activities. Nothing in this PHO prohibits the gathering of members living in the same **Residence**.

C. People at high risk of severe illness from COVID-19 and people who are sick are urged to stay in their **Residence at all times** except as necessary to seek medical care.

D. Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

E. People experiencing homelessness are strongly urged to obtain shelter, and governmental and other entities are strongly urged to make shelter available as soon as possible and to the maximum extent practicable. People experiencing homelessness must comply with **Social Distancing Requirements** at all times.

F. All travel, including, but not limited to, travel by automobile or public transit, except **Necessary Travel** is prohibited. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Critical Businesses** or maintain **Critical Governmental Functions**. People riding on public transit must comply with **Social Distancing Requirements** as defined in Section III.F, below, to the greatest extent feasible.

## II. BUSINESS REQUIREMENTS

A. **Critical Businesses**, as defined below, are exempt, subject to certain limitations, from this PHO and are encouraged to remain open. **Critical Businesses** must comply with **Social Distancing Requirements** at all times and implement tele-work or other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other Critical Retail shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line.

B. To successfully contain the spread of the virus, all employers and individuals must observe **Social Distancing Requirements** at all times and to the greatest extent possible.

C. Child care facilities providing services exempted in this PHO must, to the extent possible, operate under the following mandatory conditions: (1) child care must be carried out in stable groups of 10 or fewer (“stable” means that the same 10 or fewer children are in the same group each day); (2) children shall not change from one group to another; (3) If more than one group of children is cared for at one facility, each group shall be in a separate group. Groups shall not mix with each other; (4) child care workers shall remain solely with one group of children. To the extent possible, child care shall be performed in compliance with **Social Distancing Requirements**.

### III. DEFINITIONS

A. **Necessary Activities.** For purposes of this PHO, individuals may leave their Residence only to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 and people who are sick, however, must not leave their **Residence** except as necessary to receive medical care. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.
3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public to engage in walking, hiking, biking, running, and similar outdoor activities but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III.F, below.

4. Performing work providing essential products and services for a **Critical Business** or **Critical Government Function** as defined in Section III.C and D, below, or to otherwise carry out activities permitted in this PHO.
5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of **Residence** from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) non-residents returning to their place of **Residence**.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the CDPHE and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

**1. Healthcare Operations, Including:**

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities

- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

**2. Critical Infrastructure, Including:**

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater
- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation
- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain
- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection

**3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products

- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

#### **4. Critical Retail, Including:**

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products)
- Establishments engaged in the sale of products that support working from home

#### **5. Critical Services, Including:**

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, auto supply and repair (including retail dealerships that include repair and maintenance, but not retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible
- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities

## **6. News Media**

- Newspapers
- Television
- Radio
- Other media services

## **7. Financial Institutions, Including:**

- Banks and credit institutions
- Insurance, payroll, and accounting services
- Services related to financial markets

## **8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

## **9. Construction, Including:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals for who provide services necessary to maintain the safety, sanitation, and critical operation of residences, and other essential services

## **10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations

- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor
- Automotive repair
- Disinfection
- Snow removal

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics
- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**D. Critical Government Functions.** The provision, operation and support of the following government functions shall continue:

1. Critical services, including
  - Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
  - Emergency response
  - Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
  - Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)

- Designated emergency shelters
- Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
- Public utility plant facilities for generation and distribution (hubs, treatment plants, substations and pumping stations for water, power and gas, but not including towers, poles, power lines, buried pipelines, transmission lines, distribution lines, and service lines)
- Transportation. Airlines, taxis, transportation network providers (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
- Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
- Hazardous material safety
- Services to at-risk populations and **Vulnerable Individuals**
- Any government service required for the public health and safety, government functionality, or vital to restoring normal services

**E. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business's inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their **Residences** are allowable pursuant to this Order. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**F. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**G. "Stay at Home"** means to stay in your place of **Residence**, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support, perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**.

**H.** “**Vulnerable Individual**” means anyone with a disability, anyone over the age of 60 and anyone with a serious underlying health condition.

**IV. Enforcement**

This order will be enforced by any appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties including a fine of up to one thousand (1,000) dollars and imprisonment in the county jail for up to one year, pursuant to 25-1-114, C.R.S.

**V. Severability**

If any provision of this PHO to the application thereof to any person or circumstance is held to be invalid, the remainder of the PHO, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this PHO are severable.

**VI. Duration**

This PHO shall become effective at 6:00 a.m. on Thursday March 26, 2020 and will continue to be in effect until 11:59 p.m. on April 11, 2020, unless extended, rescinded, superseded, or amended in writing.

Jill Hunsaker Ryan, MPH  
Executive Director

March 25, 2020

## Templated Messaging

### Cargill

- Cargill Management invited NCHD management to tour their facility on Tuesday.
- Cargill is working cooperatively with NCHD and taking additional measures.
- Cargill remains open for business.
- Goal of NCHD, CDPHE and Cargill is to sustain the food supply chain while keeping employees safe and healthy
- Number of cases questions – NCHD can confirm that Cargill has positive cases among their employees. Case investigation is ongoing so we cannot confirm an exact number of cases at this time.
- Are you worried about the situation – We are public health, we are worried about every situation related to this pandemic. Our main priority is the health of our community. More than 2,000 people count on this plant for their paychecks, but no one disputes the fact that their lives are even more important.
- When they say outbreak – It is an outbreak only if it shows up on the state website. More than two cases in a location or facility.

Main Message: Cargill is collaborating with NCHD and following CDC guidelines; in fact they have gone beyond the general guidance and implemented innovative approaches to employee safety. Cargill has made employee health a priority, and their practices are an example for other food industry companies to follow. Experiences from other facilities worldwide, including Wuhan, China, have been implemented in the Fort Morgan facility. All these modifications are to ensure they can continue to operate while ensuring the safety of their workers.

### Eben Ezer

- NCHD continues to work with Eben Ezer to ensure practices and protocols are followed ensuring the safety of residents and staff to the extent possible.
- Eben Ezer has followed CDC and CDPHE guidelines to ensure safety.
- NCHD is supporting Eben Ezer with supplies, such as procedure and N-95 masks

- There was exposure prior to when NCHD was aware of the virus in the community and NCHD is providing ongoing support to limit the chain of transmission.

#### Other Companies (Seaboard, Smithfield, Leprino)

- NCHD has been working with businesses in our six county region to provide technical assistance to ensure they are following practices and protocols to ensure the safety of their staff.

#### Concerns about a spike in cases if public health orders are eased or phased back

- Our primary concern is to save lives
- The goal is to ensure that hospitals have the capacity to treat all medical needs. We don't want COVID cases to overwhelm the healthcare system so that it is not effective.

#### Outbreak – Two or more confirmed cases that began in a 14-day period. [Get a definition](#)

- Working with businesses and facilities to provide technical assistance to ensure that practices and protocols are being followed to ensure the safety of residents and staff.

#### Messages after the Stay-At-Home Order is lifted and Phases

- Current phase is the Urgent Phase. The state needs to see a decline, not just a plateau in order to move to the next phase. Stabilization Phase will be the longest.
- This virus is here and we will be living with the virus so have to create a new normal that is sustainable socially and economically while not compromising medical capacity.
- Current Phase is putting too much pressure on all of these to be sustainable.
- Acting to save lives
- Not a contest to see what one can get away with.
- Maximize... minimize...
- While we don't yet know the exact details of the next phase, we are recommending that businesses plan for how they can conduct business

**Commented [TM1]:** We can also reference the info that Heather sent out from the President as well as the state plan when it is defined

while maintaining social distancing (i.e., staggering work shifts, teleworking, etc.)

- There will likely be specific guidance for individuals at higher risk versus others
- There is no magic wand but we do have science and we continue to learn more about this virus. We will continue to learn more in the days, weeks and months ahead.

Guidance for High Risk Populations will be different versus others

Testing resources aren't equal across the six counties

**Northeast Colorado Health Department response to the Family First Coronavirus Act**

---

The Families First Coronavirus Response Act (FFCRA or Act) was passed to assist families facing new challenges due to caring for sick relatives or children due to school closures. Employers are mandated to provide their employees with expanded family and medical leave for specified reasons related to COVID-19. These provisions will apply from April 1, 2020 through December 31, 2020.

**ELIGIBLE EMPLOYEES**

Employees who have been employed for at least 30 days prior to their leave request.

**QUALIFYING REASONS FOR LEAVE RELATED TO COVID-19**

An employee is entitled to take leave related to COVID-19 if the employee is unable to work, including unable to telework, because the employee is caring for his or her child whose school or place of care is closed (or child care provider is unavailable) due to COVID-19 related reasons.

**The employee is entitled to** up to 12 weeks of expanded family and medical leave paid at 2/3 for qualifying staff. This is paid at up to \$200.00 daily and \$10,000.00 total. A part-time employee is eligible for leave for the number of hours that the employee is normally scheduled to work over that period. NCHD will continue to pay the employer's portion of health insurance, vision, life, PERA while the employee will still be responsible for any additional insurance they have purchased such as family members, dental and/or AFLAC?

---

Family First Coronavirus Response Act (FFCRA) Documentation:

Complete the following information to request Family Leave (FMLA) for FFCRA.

Name of employee requesting leave	
Date(s) for which leave is requested	
Reason for leave	
Name(s) of the child(ren) being cared for	
The name of the school, place of care, or child care provider that has closed or become unavailable.	
A statement from the employee that he or she is unable to work because of the reason	
A statement from the employee that no other suitable person is available to care for the child.	

**DATE OF ORDER: APRIL 1, 2020**

**THIRD UPDATED PUBLIC HEALTH ORDER 20-24 IMPLEMENTING STAY AT HOME REQUIREMENTS**

**PURPOSE OF THE ORDER**

I issue this amended Public Health Order (PHO or Order) pursuant to the Governor's directive in Executive Orders D 2020 017 (**Ordering Coloradans to Stay at Home Due to the Presence of COVID-19 in the State**) in response to the existence of hundreds of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, there is substantial evidence of community spread of COVID-19 throughout the State. This Order has been amended to direct Coloradans to Stay at Home.

**FINDINGS**

1. Due to the increasing incidence of COVID-19 in the general public, the designation of pandemic by the World Health Organization, the Declaration of a Disaster Emergency by Governor Polis on March 10, 2020, and a National Emergency by the President of the United States on March 13, 2020, and previous PHOs issued by this Department, including PHO 20-20 (Restricting Visitors all all Colorado Skilled Nursing Facilities, Assisted Living Residences and Intermediate Care Facilities); PHO 20-22 (Closing Bars, Restaurants, Theaters, Gymnasiums, Casinos, Noncritical Personal Services Facilities, and Horse Track and Off-Track Betting Facilities Statewide); and PHO 20-23 (Implementing Social Distancing Measures); I hereby declare that the actions and prohibitions outlined in this PHO are necessary for the health and safety of the residents of Colorado.
2. Scientific evidence and best practices regarding the most effective manner to slow the transmission of communicable diseases generally and COVID-19 specifically, and evidence that the population of Colorado is at risk for serious health complications, including death, from COVID-19 make it imperative that the measures included in this PHO be taken immediately.
3. There is clear evidence that some individuals who contract the COVID-19 virus have no symptoms or have mild symptoms, which means they are likely unaware they carry the virus. Because even people without symptoms can transmit the disease, and because evidence shows the disease is easily spread, gatherings promote transmission of COVID-19. COVID-19 also physically contributes to property loss, contamination, and damage due to its propensity to attach to surfaces for prolonged periods of time.

4. The scientific evidence also shows that at this stage of the emergency, it is critical to slow transmission as much as possible to protect the most vulnerable and to prevent Colorado's health care system from being overwhelmed. One proven way to slow the transmission is to limit interactions among people to the greatest extent practicable and increase the distance between people in the work environment. This PHO helps to reduce the property damage caused by COVID-19 and preserves the welfare of our residents by reducing the spread of the disease in our communities and our workplaces, and preserving critical emergency and healthcare capacity in the State.

### INTENT

5. The intent of this PHO is to minimize contact between residents and to the greatest extent possible minimize the exposure of the public to contaminated public surfaces. By staying home we can maximize the number of people isolating in place, reduce the number of people congregating in workplaces at one time and reduce the proximity of people in the workplace, and enable the services, businesses, and travel necessary to protect public health and safety and preserve the continuity of social and commercial life as we save lives.

6. When people leave their places of residence, whether to obtain or perform critical emergency services, recreate, go to work, or for other valid reasons, they should at all times comply with **Social Distancing Requirements** as defined in Section III.F below. All provisions of this PHO should be interpreted to effectuate this intent. Failure to comply with any of the provisions of this PHO constitutes an imminent threat to public health.

### ORDER

The following authorities in Public Health Order 20-24 Implementing Fifty Percent Reduction in Nonessential Business In-Person Work and Extreme Social Distancing are hereby superseded by this Updated Public Health Order 20-24:

1. Any provision authorizing a noncritical business to remain open to in-person work by reducing their in-person workforce by fifty percent;
2. Any provision authorizing a noncritical business to remain open to in-person work by self-certifying that the business meets the Social Distancing Requirements for all employees.

Public Health Order 20-23 Implementing Social Distancing is hereby superseded by this Updated Public Health Order 20-24.

**I. STAY AT HOME**

**A.** All individuals currently living within the State of Colorado are ordered to **Stay at Home whenever possible**. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, and may leave their **Residences** only to perform or utilize **Necessary Activities**.

**B.** All public and private gatherings of any number of people occurring outside a **Residence** are prohibited, except for the limited purposes expressly permitted in this PHO which include Essential Activities. Nothing in this PHO prohibits the gathering of members living in the same **Residence**.

**C.** People at high risk of severe illness from COVID-19 are urged to stay in their **Residence at all times** except as necessary to seek medical care. People who are sick must stay in their Residence at all times except as necessary to seek medical care, and must not go to work, even for a **Critical Business**.

**D.** Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

**E.** Governmental and other entities are strongly urged to make shelter available to people experiencing homelessness as soon as possible and to the maximum extent practicable. People experiencing homelessness are urged to protect their health and safety by complying with **Social Distancing Requirements** at all times.

**F.** All travel, including, but not limited to, travel by automobile or public transit, except **Necessary Travel** is prohibited. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Critical Businesses** or maintain **Critical Governmental Functions**. People riding on public transit must comply with **Social Distancing Requirements** as defined in Section III.F, below, to the greatest extent feasible.

## II. BUSINESS REQUIREMENTS

A. **Critical Businesses**, as defined below, are exempt, subject to certain limitations, from this PHO and are encouraged to remain open. **Critical Businesses** must comply with **Social Distancing Requirements** at all times, adopt work from home or tele-work policies for any operations that can be done remotely, and implement other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other Critical Retail shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line.

B. To successfully contain the spread of the virus, all employers and individuals must observe **Social Distancing Requirements** at all times and to the greatest extent possible.

C. All businesses required to close down their in-person work under this Order may continue to carry out **Minimum Basic Operations** as defined below. Businesses that can continue to operate through work at home arrangements with their employees are encouraged to do so

D. Child care facilities providing services exempted in this PHO must, to the extent possible, operate under the following conditions: (1) child care must be carried out in stable groups of 10 or fewer (“stable” means that the same 10 or fewer children are in the same group each day); (2) children shall not change from one group to another; (3) If more than one group of children is cared for at one facility, each group shall be in a separate group. Groups shall not mix with each other; (4) child care workers shall remain solely with one group of children. To the extent possible, child care shall be performed in compliance with **Social Distancing Requirements**.

## III. DEFINITIONS

A. **Necessary Activities.** For purposes of this PHO, individuals may leave their Residence only to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 are urged not to leave their **Residence** except as necessary to receive medical care. People who are sick must not leave their Residence

except as necessary to receive medical care, and must not go to work, even for a **Critical Business**. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.
3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public who live in the vicinity to engage in walking, hiking, biking, running, and similar outdoor activities but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. For other parks, check with the local jurisdiction and follow any requirements for that jurisdiction. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III.F, below.
4. Performing work providing essential products and services for a **Critical Business** or **Critical Government Function** as defined in Section III.C and D, below, or to otherwise carry out activities permitted in this PHO.
5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of **Residence** from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) travel to transport children between separate households pursuant to a parenting plan or other agreement governing parental responsibilities; (6) non-residents returning to their place of **Residence**; (7) moving to a new Residence.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged primarily in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

**1. Healthcare Operations, Including:**

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities
- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

**2. Critical Infrastructure, Including:**

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater
- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation

- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain
- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection

### **3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products
- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

### **4. Critical Retail, Including:**

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Liquor stores

- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products)
- Establishments engaged in the sale of products that support working from home (this exclusion does not include businesses that primarily sell hobby craft supplies)

#### **5. Critical Services, Including:**

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, automobile online sales with no touch delivery service, auto supply and repair (including retail dealerships that include repair and maintenance, but not in person retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries, with strict compliance with **Social Distancing Requirements** for employees and any attendees of services
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible. Houses of worship may remain open, however, these institutions are encouraged to implement electronic platforms to conduct services whenever possible or to conduct smaller (10 or fewer congregants), more frequent services to allow strict compliance with **Social Distancing Requirements**.
- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities
- Moving services

#### **6. News Media**

- Newspapers
- Television

- Radio
- Other media services

**7. Financial and Professional Institutions, Including:**

- Banks and credit institutions
- Insurance and payroll
- Services related to financial markets
- Professional services, such as legal, title companies, or accounting services, real estate appraisals and transactions

**8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

**9. Construction, Including but not Limited To:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals who provide services necessary to maintain the safety, sanitation, and critical operation of residences and other **Critical Businesses** or **Critical Government Functions**, and other essential services

**10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations
- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor (including maintenance and repair of ordinary household and business appliances but not in-person retail sales of such products)
- Automotive and bicycle repair
- Disinfection
- Snow removal
- Bail bonds agents

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics
- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**13. Educational Institutions that Provide Critical Services to Students and the General Public:**

- K-12 public school and private schools for the purpose of providing meals, housing, facilitating or providing materials for distance learning, and providing other essential services to students, provided that **Social Distancing Requirements** are observed.
- Postsecondary institutions, including private and public colleges and universities, for the purpose of facilitating distance learning, providing in person classroom or laboratory education for less than 10 students per classroom or lab in medical training fields only, or performing essential functions, provided that **Social Distancing Requirements** are observed, such as security, medical and mental health services, housing, food services, and critical research.

**D. Critical Government Functions.** The provision, operation and support of the following state and local government functions shall continue:

1. Critical services, including

- Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
- Emergency response
- Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
- Legislative and executive branch functions
- Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)
- Designated emergency shelters
- Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
- Public utility plant facilities for generation and distribution (drinking water and wastewater infrastructure, hubs, treatment plants, substations and pumping stations for power and gas, but not including towers, poles, power lines, and oil and gas buried pipelines)
- Transportation. All public and private airports, airlines, taxis, transportation network providers (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
- Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
- Hazardous material safety
- Services to at-risk populations and **Vulnerable Individuals**
- Activities related to federal, state, and local elections, including any required acts of a political party, provided **Social Distancing Requirements** are observed to the greatest extent possible
- Any government service, state or local, required for the public health and safety, government functionality, or vital to restoring normal services

**E. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business's inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their **Residences** are allowable pursuant to this Order; continue filling online product orders and to process customer orders remotely. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**F. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**G. "Stay at Home"** means to stay in your place of **Residence**, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support, perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**.

**H. "Vulnerable Individual"** means anyone with a disability, anyone over the age of 60 and anyone with a serious underlying health condition.

**IV.** Pursuant to Executive Order 2020 017, local public health agencies may apply for relief from the Executive Order or this Public Health Order to more effectively meet local conditions and needs through a process to be established by CDPHE.

## **V. Enforcement**

This order will be enforced by any appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties including a fine of up to one thousand (1,000) dollars and imprisonment in the county jail for up to one year, pursuant to 25-1-114, C.R.S.

## **VI. Severability**

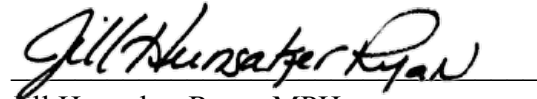

If any provision of this PHO to the application thereof to any person or circumstance is held to be invalid, the remainder of the PHO, including the application of such part or provision to other

persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this PHO are severable.

**VII. Duration**

This PHO shall become effective at 6:00 a.m. on Thursday April 2, 2020 and will continue to be in effect until 11:59 p.m. on April 11, 2020, unless extended, rescinded, superseded, or amended in writing.

**FPNTC**  
FAMILY PLANNING  
NATIONAL TRAINING CENTER

# Mandatory Child Abuse Reporting in Title X-Funded Family Planning Settings

Northeast Colorado Health  
Department

# Objectives

By the end of this training, participants will be able to:

- Identify at least one risk factor or possible indicator of child abuse or neglect
- Explain the mandatory child abuse reporting process in **Colorado**
- Describe at least two trauma-informed best practices that support family planning clients
- Identify at least one local resource for providers

# Mandatory Child Abuse Reporting

This training will address:

- State mandated child abuse reporting laws
- Information on whether child molestation, sexual abuse, rape, incest, intimate partner violence, and human trafficking are reportable as child abuse in our state

This training will NOT address:

- Other state reporting laws

# Mandatory Reporting: A Title X Legislative Mandate

“The Office of Population Affairs expects every Title X project will comply with applicable state laws in the proposed service area and will have project-wide monitoring and state-specific policies and procedures related to reporting of child abuse, child molestation, sexual abuse, rape, incest, intimate partner violence, and human trafficking.”

# Our Agency's Mandatory Child Abuse Reporting Policy

Our Mandatory Child Abuse Policy is located on the N:Drive

- All NCHD employees that suspect child abuse or neglect are also expected to report if there is a situation during business hours. Reporting can be done directly through the hot line or to local county department of human services.
- It is a class 3 misdemeanor in Colorado for a mandated reporter to fail to report suspected child abuse or neglect or knowingly makes a false report and is punishable under law.

# Setting the Stage with Clients: Consent and Confidentiality

# Title X Consent Rule

- Regulations require that Title X-funded services be made available to all adolescents, regardless of age.
  - Minors of any age may consent to services for themselves when those services are funded in full or in part by Title X.
  - Title X service provision cannot be conditioned on parental consent or notification, even if state law otherwise requires parental consent or notice.

# Title X Confidentiality Rule

- Client information must be kept confidential. Release of client information is prohibited, unless:
  - Client provides written authorization
  - Release of information is necessary to provide services
  - Release of information is required by law
    - Mandatory reporting “requires” the release of information when reporting is indicated
- If youth want to involve others in their care (parent, guardian, partner, etc.), they must provide permission.

# Communicating Consent, Confidentiality, and Its Limitations

- Start all adolescent visits with an explanation of:
  - Title X minor consent and the services it includes
  - Confidentiality and its limitations

# Sample Confidentiality Statement

*"Before we begin, I want to let you know that whatever you share with me is confidential, meaning between you and me, and select staff here on a need-to-know basis. The only exception is if I find out you've been hurting yourself, someone else, or you've been harmed, in which case I will need to reach out to get help. Do you have any questions about that?"*

# Sample Consent Statement

*“At our clinic, young people can give permission for pregnancy tests, birth control, STI testing, and other services related to family planning and sexual health without involving an adult, like a parent or guardian. We encourage you to talk with a parent or another adult whom you trust about your visit, but we can’t talk with them about these services without your permission. If we need to provide a service or treatment for something not related to family planning or sexual health, we do need your parent or guardian’s permission. And if that’s the case, we’ll figure out together how to involve them in your care without telling them about your family planning or sexual health needs.”*

# Recognizing Risk Factors for Sexual Coercion, Child Abuse, and Relationship Abuse

# Risk Factors Associated with Sexual Abuse and Coercion

- Early pubertal development in girls
- History of childhood physical or sexual abuse
- Living with a non-related adult male in the household
- Early (<14) dating or dating older partners
- Youth with disabilities
- Youth who have run away or are homeless
- Youth involved in the juvenile justice system

# Risk Factors Associated with Relationship Abuse/Dating Violence

- Being young: 16–24 years old
- Substance use, including alcohol
- Growing up in a household with domestic violence or abuse (as a survivor or a witness)
- Social isolation/lack of support
- Depression and suicide attempts
- Traditional gender norms and gender inequality
- Poverty and associated factors
- Jealousy, possessiveness, and negative emotion within an intimate relationship

# Family Planning-Related Indicators for Relationship Abuse/Dating Violence , Intimate Partner Violence

- Contraceptive non-use
- Decreased condom use
- Frequent STD testing
- Repeated pregnancy testing
- Multiple emergency contraception use
- Unintended pregnancy
- Rapid repeat pregnancies

# Responding to Risk Factors/Indicators

- Focus on clinical intervention
  - Explore client concerns
  - Listen nonjudgmentally
  - Provide access to:
    - support
    - counseling
    - safety planning
    - alternative housing
    - advocacy
  - Help to connect the abuse with possible health outcomes
- Evaluate if information prompts reporting duty

Colorado  
Child Abuse Reporting  
Laws and Process

# Who Must Report

## Who Must Report (cont.)

The following staff are mandated reporters in our state:

**ALL STAFF AT NCHD ARE CONSIDERED  
MANDATED REPORTERS**

## Who Must Report (cont.)

Suspicion or knowledge of abuse or neglect must be reported immediately by contacting local Human Services departments or by using the Colorado Child Abuse/Neglect Hotline at 1-844-264-5437. The hotline is open 24 hours a day 7 days a week.

Reporting can be done directly through the hotline, county department of human services or police department. Nurses and WIC educators may be helpful in assisting you with reporting.

# What Must Be Reported

# What Must Be Reported

Our state's definition of reportable child abuse:

- skin bruising
- Bleeding
- Malnutrition
- failure to thrive
- Burns
- fracture of any bone,
- Subdural hematoma
- death

The condition/ death

- is not justifiably explained;
- history is concerning and/or varying
- circumstances indicate condition may not be the product of an accident

# What Must Be Reported Cont.

- cases in which a child is subjected to unlawful sexual behavior
- child is subjected to emotional abuse
- child is subjected to human trafficking of a minor for sexual servitude
- child in need of services due to child's parents/legal guardian failing to provide the same adequate food, clothing, shelter, medical care, or supervision that a prudent parent would take.

# What Must Be Reported

Mandatory reporting and who committed the act of abuse:

- For reporting purposes, we are required to report all acts of abuse as defined by our state regardless of the perpetrator or the person that allowed the abuse.
- We are required to report all acts of neglect as defined by our state, perpetrated or allowed by parent, guardian, or other caregiver.

# What Must Be Reported

Mandatory reporting and intimate partner violence between adolescents:

In Colorado , abuse is defined as acts at the hands of anyone regardless of their role.

# What Must Be Reported

Mandatory reporting and rape:

- “Rape” in general refers to non-consensual sexual activity, though state law may use other terms
- Any case in which a child is subjected to unlawful sexual behavior as defined in [section 16-22-102\(9\), C.R.S.](#);

# What Must Be Reported

---

Mandatory reporting and statutory rape:

- “Statutory rape” refers to illegal sexual activity based on the age of one or both individuals.
- Child abuse reporting law does not require reporting all illegal sexual activity. It requires reporting abuse as defined in our state.
- The legal definition of **statutory rape** is sexual penetration or intrusion with someone who is under the age of 17. In Colorado, **statutory rape** is prosecuted as a type of **sexual assault**. It makes no difference if the sex itself was consensual.

# What Must Be Reported

Mandatory reporting and prostitution, commercial sexual exploitation of children, and sex trafficking:

Any case in which a child is subjected to human trafficking of a minor for sexual servitude, as described in [section 18-3-504, C.R.S.](#)

# What Must Be Reported

In most states, an abuse report is not indicated solely based on a suspicion of or diagnosis of a pregnancy or STD.

Suspicion of or diagnosis of a pregnancy or STD may trigger further exploration of situation.

# When to Report

# When to Report (cont.)

- A mandated reporter has reasonable cause to know or suspect child abuse or neglect.
- A reporter has observed a child being subjected to circumstances or conditions that would reasonably result in abuse or neglect.
- Commercial film and photographic print processors have knowledge of or observe any film, photograph, videotape, negative, or slide depicting a child engaged in an act of sexual conduct.

## When to Report (cont.)

You must make a report immediately.

# How to Report

# How to Report (cont.)

In our state, reports are made:

- Immediately using the Colorado Child Abuse/Neglect Hotline at 1-844-264-5437. The hotline is open 24 hours a day 7 days a week.
- Law Enforcement
- Local county Department of Human Services

# How to Report (cont.)

The following must be included in a report:

- Child's name, age, address, gender, and race
- Name and address of person responsible for abuse/neglect
- Nature and extent of injuries
- Family composition
- Source of the report: name, address, occupation
- Action taken by reporting source

# How to Report (cont.)

At a minimum, the following should be documented for agency files:

- Report has been completed and filed
- Date of visit and name of the informant
- Date(s) of alleged abuse
- Any injuries
- Date and time the report was submitted
- Name of the individual who took the report (if applicable)

# Trauma-Informed Reporting

# Trauma-Informed Reporting (cont.)

“A program, organization, or system that is trauma-informed:

- Realizes the widespread impact of trauma and understands potential paths for recovery;
- Recognizes the signs and symptoms of trauma in clients, families, staff, and others involved with the system;
- Responds by fully integrating knowledge about trauma into policies, procedures, and practices; and
- Seeks to actively resist re-traumatization.”

# Trauma-Informed Reporting

## Best Practice 1

1. Always address the reason the youth was seeking care first.

Example:

*“Let’s start with why you came in today... It sounds like there are a lot of things going on for you, and I am worried about your health and your safety.”*

# Trauma-Informed Reporting

## Best Practice 2

2. Respect what the youth wants to disclose and how (while considering your legal obligations).

- Provide options for follow-up, such as requesting that Child Protective Services (CPS) or law enforcement interview the client at the clinic, school, or another location of the youth's choice.

# Trauma-Informed Reporting

## Best Practice 3

3. Empower the youth by acknowledging the strength and courage it takes to disclose information about abuse.

Example:

*“It took courage for you to talk with me today about what has been happening. Sharing this, and getting help, shows what a very brave, strong young person you are. Even though you may feel frightened right now, you have taken the first step by sharing your story.”*

# Trauma-Informed Reporting

## Best Practice 4

4. Inform the youth of the need to report in order to get them the help they may need.

Example:

*“Remember at the beginning of your visit, when we talked about situations in which I might have to share information with other people in order to get the help you may need? This is one of those situations.*

*What has happened to you is dangerous, I am very worried about your safety, and I need to share what you have told me with [INSERT STATE-SPECIFIC INFORMATION HERE (clarify Child Protective Services or law enforcement)].”*

# Video

## Trauma-Informed Child Abuse Reporting in a Family Planning Setting

# Activity

Tanya, age 15, comes to your clinic wanting to change her method of birth control. She has been using oral contraceptives. You notice that she has a mark on her face that could be a slap mark. When you ask about it, she initially says that “it’s nothing,” but eventually discloses that her mother hit her when she discovered her birth control pills and learned that Tanya was sexually active. Tanya wants to switch to a more private method. You learn that her mother often hits her when she’s angry with her.

**How would you handle Tanya’s care?**

# Trauma-Informed Reporting

## Best Practice 5

5. Acknowledge that disclosing information and making a report may be a frightening process and provide messages of support.

Example:

*“I understand that this may be scary and that you are worried about what might happen. You may even feel really angry with me about this, but we still need to do it. You can be part of each step in the process, and I will show you what I write down in the report. I’ll let you know what usually happens with these reports, but, remember, every situation is different.”*

# Trauma-Informed Reporting

## Best Practice 6

6. Engage the youth in the reporting process:
- Show the paperwork
  - Allow them to be present when you call the report in, if this is feasible

Example:

*“Even though you don’t have a choice about whether or not I fill out this report, you can decide how much information you want to share with me; we can complete the paperwork together. We can ask the social worker/police officer to meet with you in a place where you feel safe, at a time that works for you.”*

# Trauma-Informed Reporting

## Best Practice 7

7. Educate the youth about his/her rights, safety, and unhealthy relationship patterns.

# Trauma-Informed Reporting

## Healthy Relationship Wheel and Questions

This wheel and discussion questions can help guide conversations with adolescents about healthy relationships.

### Discuss:

- » Which statements on this wheel describe your relationship with your partner?
- » Which statements on this wheel are the most important to you when you think of respect? Why?
- » Which statements on this wheel can help you deal with conflict (or disagreements) in a healthy way?

# Trauma-Informed Reporting Relationship Spectrum

All relationships exist on a spectrum from healthy to abusive with unhealthy somewhere in the middle.

**HEALTHY**

**UNHEALTHY**

**ABUSIVE**

A healthy relationship means that both partners are...	You may be in an unhealthy relationship if one of you is...	An abusive relationship starts when one of you...
<p><b>RESPECTFUL</b> You value each other as you are. You respect each other's emotional, digital and sexual boundaries.</p>	<p><b>DISRESPECTFUL</b> One or both partners is not considerate of the other's feelings and/or personal boundaries.</p>	<p><b>MISTREATS THE OTHER</b> One or both partners disrespects the feelings, thoughts, decisions, opinions, or physical safety of the other.</p>
<p><b>COMMUNICATIVE</b> You talk openly about problems, listen to each other and respect each other's opinions.</p>	<p><b>NON-COMMUNICATIVE</b> When problems arise, you fight or you don't discuss them at all.</p>	<p><b>COMMUNICATES IN A WAY THAT IS HARMFUL/INSULTING</b></p>
<p><b>TRUSTING</b> You believe what your partner has to say. You do not feel the need to "prove" each other's trustworthiness.</p>	<p><b>NOT TRUSTING</b> One partner doesn't believe what the other says, or feels entitled to invade their privacy.</p>	<p><b>MAKES ACCUSATIONS</b> One partner accuses the other for their harmful actions.</p>
<p><b>HONEST</b> You are honest with each other, but can still keep some things private.</p>	<p><b>DISHONEST</b> One or both partners tell lies.</p>	<p><b>DENIES THAT THE ABUSIVE ACTIONS ARE ABUSE</b> One or both partners makes excuses for abusive actions and/or minimizes the abusive behavior.</p>
<p><b>HAPPY TO SPEND TIME TOGETHER OR APART</b> You both can enjoy spending time apart, alone or with others.</p>	<p><b>NOT SPENDING TIME WITH OTHERS</b> Your partner's community is the only one you socialize in.</p>	<p><b>ISOLATES THE OTHER PARTNER</b> The partners spend all of their time together and one may feel unable to talk to others, especially about what's really happening in the relationship.</p>
<p><b>EQUAL</b> You make decisions together and hold each other to the same standards.</p>	<p><b>STRUGGLING FOR CONTROL</b> One partner feels their desires and choices are more important.</p>	<p><b>CONTROLS THE OTHER</b> One partner tells the other what to wear, who they can hang out with, where they can go and/or what they can do.</p>
<p><b>MAKING MUTUAL SEXUAL CHOICES</b> Both partners make decisions together and can openly discuss what each one is dealing with, like relationship problems and sexual choices.</p>	<p><b>PRESSURING THE OTHER INTO SEXUAL ACTIVITY</b> One person tries to make most of the decisions. He or she may pressure the other about sex or refuse to see how one's actions can hurt the other one.</p>	<p><b>FORCES SEXUAL ACTIVITY</b> One person makes all of the decisions in the relationship. One partner forces the other to have sex. It's an imbalance of power and control.</p>

Note: This tool was adapted from [loveisrespect.org](https://loveisrespect.org) with input from SYN-United Colorado (Youth Advisory Group).

# Intimate Partner Violence

- Intimate partner violence (IPV) is abuse or aggression that occurs in a close relationship.
- Stalking
- Physical violence
- Psychological aggression
- Sexual violence

# Signs of Intimate Partner Violence

- Excessive name calling
- Not allowing the client to speak for themselves
- Not allowing the client to seek/ receive specific services
- Controlling behavior
- Isolating the client

# Trauma-Informed Reporting

## Best Practice 8

8. Always assess for safety before the end of the visit.

- *“Are you currently safe where you are now?”*
- *“What has been the worst fight? Were weapons used?”*
- *“Do you ever think about hurting or killing yourself?”*
- *“Are you afraid that you could be hurt or killed?”*
- *“Do you have an adult you can confide in?”*
- *“Have you tried to leave your relationship before? If so, what happened?”*
- *“In a crisis, where would you go/who could you turn to for help?”*

# Trauma-Informed Reporting Best Practices Summary

If the youth does not feel safe returning to home or school:

- Contact reporting authority and request immediate response
- Emphasize importance of support from a trusted adult
- Offer to facilitate discussion with youth and adult to ensure clear communication, provide resources, and develop a safety plan
- Partner with domestic violence or sexual assault program advocates

# Key messages that convey support

*"I'm worried about your safety."*

*"I'm so sorry this is happening, you don't deserve it, no one deserves this."*

*"You're not alone, there is help available."*

*"It's not your fault."*

# Activity

Tanya is very nervous and afraid she won't be safe if her mother learns that her abuse has been reported.

What can you do to make sure Tanya feels safe and cared for?

# Other Reporting Considerations

# Parent/Guardian Notification

It is important to communicate to the youth:

- Title X confidentiality laws prevent the provider from disclosing to parents without permission from the youth
- Child Protective Services and law enforcement MAY inform parents/guardians that an abuse report has been filed

# Learn About the Reporting System

- Develop relationships with county reporting authorities to gain an understanding of how cases are prioritized
- Prepare clients for what is likely to happen when a report is filed
- Frame the information as “what usually happens in our county”

# When the State's Definition of Abuse and Neglect Differs From Ours

What situations do you consider “abusive” but are not included in our state law definition of abuse?

# When the State's Definition of Abuse and Neglect Differs From Ours (cont.)

Situations our state law defines as “abuse” that you do not consider “abusive.”

## efforts made at Cargill-Draft

1 message

---

Trish McClain <trishm@nchd.org>

Wed, Apr 15, 2020 at 9:50 AM

To: Mel Bustos <melb@nchd.org>, Tyler

Upon arrival to the plant, there is a long covered walkway, complete with lights, that employees enter to file into the building. It stretches across and around a large parking lot and there are painted lines every 6 feet so that workers don't cluster--this is monitored by staff.

Once employees enter the building, there is information posted along the walls in 9 different languages explaining the importance of social distancing.

A crew of several people in full PPE (gowns, gloves, masks, goggles, face shield, hard hats) greet the employees in a few stations. The first station is a staff member that dispenses hand sanitizer. The second station employees are asked about their travel in the last two weeks, if they have had contact with anyone with a positive COVID-19 test result or symptoms, how the employees themselves are feeling--any symptoms/etc. The next station is where employees' temperatures are checked--they use infrared forehead thermometers so no touching of people. Anyone that has a positive screen is escorted to a separate room for a more thorough assessment with nursing staff. If the employee is going to be sent home, they are taken out a different way than the way they came in so they do not go back where other employees are located. There is an attended room where employees can wait for rides if they didn't drive to work themselves.

Company buses run from Greeley and Sterling--staff riding the bus have to be symptom checked and temp screened before they get on the bus and they have to wear a mask (Cargill provides). Bus riders are allowed to enter the plant at a different entrance since they have already been screened.

Cargill went from two shifts to one shift starting 4/14/2020. All staff are provided masks and/or face shields depending on their position. Hand sanitizer is located at the entrance to the cafeteria and also in many areas throughout the plant. Staff are encouraged to wear homemade face masks/bandanas and they are also providing masks (procedure masks). Cargill is expecting 5000 washable masks this week--they will give 2 to each employee with CDC instructions on how to wash the masks so staff can wash one/wear one.

Work stations on the production line are either 6 feet apart or are separated by thick plastic dividers to prevent contact between staff in close proximity.

Breaks are staggered so that less people are in the cafeteria/break areas at the same time. Extra cleaning staff have been hired to wipe down walls, handrails, common touch points.

The hallway leading to the cafeteria has a staff member with hand sanitizer so that as staff come for breaks/meals they receive a spray of hand sanitizer before they eat and as they return to the production line.

The cafeteria has limited the amount of hot meal choices that they serve and has increased the number of ready to eat/grab and go items. Cooler doors for soda/water/other drinks are propped open during breaks so staff aren't touching handles. More tables and chairs have been installed in the cafeteria to help staff spread out. Tables that have bench style seating now have heavy plastic dividers so that there isn't any direct contact between staff sitting across or next to each other.

At the end of shift, there are multiple exits through which staff can leave to help avoid any bottlenecks.

### Isolation and Quarantine:

Staff that have positive screening at the entrance, during the work day, and those that call in saying they have symptoms are either sent home or asked to stay home for the appropriate isolation period. Their badges are deactivated so that any staff returning to work have to get cleared by Cargill's health services staff. Health staff are also able to track potential exposures related to carpooling and bus riders and they send home affected employees to quarantine for 14 days (this is paid time off) and those badges are also deactivated so staff have to be cleared through health services. Health services has a separate room in which to evaluate staff that come to them with symptoms/complaints. If a staff person needs to be sent home, they are escorted to the attended room mentioned earlier in this summary.

### Cleaning/Disinfection

As mentioned above, several staff have been hired in the last month to focus on cleaning. There are staff washing walls, mopping floors, wiping down railings and other common touch points. Sanitizers are used in the areas where there is open product, disinfectants are used everywhere else. At the end of the shift, quaternary ammonia is used to disinfect (it is approved to be food safe). In common areas and offices there is a combination of applied disinfectant as well as fogging (Decon 7 and Pure) that takes place every weekend. There are extensive logs documenting the cleaning and disinfection procedures.

Overall impression:

Cargill has been proactive in applying CDC guidance for cleaning/PPE/social distancing. They have been transparent with NCHD about their efforts and are actively screening staff and enforcing isolation and quarantine by deactivating staff badges. Cargill has messaging in multiple languages, which isn't new for them. Given their diverse employee population, they are well able to communicate via print and language line to their staff in a language that can be understood. They have made significant modifications to their employee flow, as well as the production line to protect their staff. I believe Cargill has made employee health a priority and their practices are an example for other food industry companies to follow.

## Guía de limpieza ambiental en relación con el COVID-19 elaborada por el Departamento de Salud Pública y Medio Ambiente de Colorado Instalaciones reguladas y hogares

### Hogares, lugares de trabajo, vehículos

El Departamento de Salud Pública y Medio Ambiente de Colorado (CDPHE) elaboró una serie de recomendaciones para la limpieza y desinfección de rutina de superficies de uso habitual con el objetivo de controlar la diseminación del virus que provoca la enfermedad causada por el coronavirus 2019, también conocido como COVID-19. La siguiente guía se basa en las [recomendaciones provisionarias para los hogares de Estados Unidos con casos presuntos o confirmados de COVID-19](#), así como en las [recomendaciones provisionarias para las instalaciones comunitarias de Estados Unidos con casos presuntos o confirmados de COVID-19](#).

Con base en lo que se sabe del virus, el contagio de persona a persona ocurre con mayor frecuencia cuando se establece contacto estrecho (de alrededor de 6 pies como máximo). Este tipo de transmisión se da por medio de gotículas respiratorias. No está documentada la transmisión de COVID-19 a las personas a través de superficies contaminadas por el virus. La evidencia actual sugiere que este puede permanecer vivo de horas a días sobre superficies de distintos materiales. La limpieza y posterior desinfección de superficies visiblemente sucias y de alto contacto con las personas se encuentra entre las mejores prácticas para prevenir la COVID-19 y otras enfermedades respiratorias virales en los hogares y entornos comunitarios.

- La **limpieza** se refiere a la eliminación de gérmenes, suciedad e impurezas de las superficies. No mata los gérmenes, pero al eliminarlos, disminuye su cantidad y el riesgo de diseminar la infección.
- La **desinfección** se refiere al uso de productos químicos para matar los gérmenes en las superficies. Este proceso no necesariamente limpia las superficies sucias o elimina los gérmenes, pero al matarlos en una superficie *luego* de la limpieza, puede reducir aún más el riesgo de diseminación de la infección.

### Cómo limpiar y desinfectar superficies

- **Limpieza y desinfección luego de que personas de quienes se sospeche o se sepa con seguridad que tienen COVID-19 hayan estado en las instalaciones**
  - Se recomienda clausurar las áreas utilizadas por personas enfermas y esperar cuanto sea posible para limpiar y desinfectar a fin de minimizar la posibilidad de exposición a las gotículas respiratorias. Abrir puertas y ventanas que dan al exterior para aumentar la circulación de aire en el área. **Restringir el acceso durante dos horas luego de que la persona se haya ido. Si es posible, esperar hasta 24 horas antes de proceder a la limpieza y desinfección.**

- Limpiar y desinfectar todas las áreas (p. ej., oficinas, baños y áreas de uso común) que hayan sido utilizadas por las personas enfermas, con especial atención a las superficies de contacto frecuente. Seguir aplicando todas las recomendaciones de limpieza y desinfección que se detallan a continuación.
- Para limpiar y desinfectar superficies, usar guantes descartables, que deberán desecharse luego de cada limpieza. Si se reutilizan los guantes, deben destinarse únicamente a la limpieza y desinfección de superficies para prevenir la COVID-19 y a ningún otro propósito. Lavarse las manos inmediatamente luego de sacarse los guantes.
- Si las superficies están sucias, deben limpiarse con detergente o jabón y agua antes de desinfectarlas.
- Para la desinfección, las soluciones de lejía diluida de uso doméstico, las soluciones de alcohol con al menos un 70 % de este producto, y los desinfectantes domésticos más comunes registrados en la Agencia de Protección Ambiental (EPA, por su sigla en inglés) deberían resultar eficaces. Consultar las instrucciones del fabricante de los productos de limpieza y desinfección utilizados.
- Si resultan apropiadas para la superficie en cuestión, se pueden usar soluciones de lejía diluida de uso doméstico. Consultar la etiqueta del recipiente de lejía para asegurarse de que el contenido sea desinfectante y leer las instrucciones para mezclarlo. Seguir las instrucciones del fabricante para la mezcla, aplicación y ventilación adecuadas. Evitar usar botellas de lejía que parezcan tener una antigüedad mayor a un año o que tengan una fecha de vencimiento ya pasada. Nunca mezclar lejía de uso doméstico con amoníaco o cualquier otro limpiador. Para ser eficaz contra el coronavirus, la lejía de uso doméstico no vencida debe estar correctamente diluida.
  - Para preparar una solución de lejía, mezclar lo siguiente:
    - 5 cucharadas (1/3 de taza) de lejía por galón de agua. Esta es una "receta estándar". Asegurarse de leer la etiqueta, ya que la lejía viene en diferentes concentraciones.
    - 4 cucharaditas de té por cuarto de galón de agua.
  - Los productos para patógenos virales emergentes aprobados por la EPA deben ser efectivos en el combate a la COVID-19, según los datos de virus más difíciles de eliminar. Al utilizar cualquier producto de limpieza y desinfección, seguir las instrucciones del fabricante (p. ej., en lo que respecta a la concentración, método de aplicación, tiempo de contacto, etc.). En el siguiente enlace, se puede acceder a la lista de productos para eliminar patógenos virales aprobados por EPA que serían efectivos contra la COVID-19: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>
- En el caso de superficies suaves (porosas), como pisos alfombrados, tapetes y cortinas, eliminar la contaminación visible, si la hay, y limpiar con los limpiadores adecuados para estas superficies. Luego de limpiar:
  - lavar todo según lo que indiquen las instrucciones del fabricante. De ser posible, hacer el lavado con el agua lo más caliente posible y secar todo completamente, o
- Usar productos que estén aprobados por la EPA para la eliminación de patógenos virales emergentes (ejemplos en este [enlace](#)) y que sean adecuados para superficies porosas.

## Cómo limpiar y desinfectar ropa, toallas y ropa de cama

- Usar guantes descartables para manipular la ropa sucia de una persona enferma, y luego desecharlos. Si se reutilizan los guantes, deben destinarse únicamente a la limpieza y desinfección de superficies para prevenir la COVID-19 y no deben usarse para ninguna otra tarea doméstica. [Lavarse las manos](#) inmediatamente luego de sacarse los guantes.
  - Si no se usan guantes para manipular la ropa sucia, lavarse las manos después de hacerlo.
  - Evitar en lo posible sacudir la ropa sucia. De ese modo, se minimizará el riesgo de que el virus se disperse por el aire.
  - lavar todo según lo que indiquen las instrucciones del fabricante. De ser posible, hacer el lavado con el agua lo más caliente posible y secar todo completamente. La ropa sucia de una persona enferma se puede lavar con la ropa de otras personas.
  - Limpiar y desinfectar los recipientes para la ropa sucia aplicando las recomendaciones anteriores para las superficies. También se puede utilizar una bolsa como forro, que sea descartable (que se pueda desechar) o que se pueda lavar.

#### **Instalaciones reguladas: escuelas, guarderías, establecimientos de venta de alimentos al por menor y alojamientos públicos**

La siguiente guía tiene como fin explicar cómo limpiar, higienizar y desinfectar adecuadamente las superficies en instalaciones reguladas como escuelas, guarderías, establecimientos de venta de alimentos al por menor y alojamientos públicos.

- **Limpio** significa estar libre de polvo o restos o eliminarlos aspirando o fregando y lavando con agua y jabón.
- **Desinfectar** significa eliminar la totalidad o la mayoría de los patógenos. Por lo general, esto se logra en los ambientes mencionados mediante el uso de soluciones químicas líquidas, como la mezcla de lejía de uso doméstico y agua.
- **Higienizar** no es tan potente como desinfectar, pero igual elimina muchos patógenos, y es un método seguro para las superficies en las que se preparan alimentos.

#### **Limpieza y desinfección luego de que personas de quienes se sospeche o se sepa con seguridad que tienen COVID-19 hayan estado en las instalaciones**

- Se recomienda clausurar las áreas utilizadas por personas enfermas y esperar cuanto sea posible para limpiar y desinfectar a fin de minimizar la posibilidad de exposición a las gotículas respiratorias. Abrir puertas y ventanas que dan al exterior para aumentar la circulación de aire en el área. **Restringir el acceso durante dos horas luego de que la persona se haya ido. Si es posible, esperar hasta 24 horas antes de proceder a la limpieza y desinfección.**
- Limpiar y desinfectar todas las áreas que hayan sido utilizadas por las personas enfermas, con especial atención a las superficies de contacto frecuente. Seguir aplicando todas las recomendaciones de limpieza y desinfección que se detallan a continuación.

### Guía específica para las escuelas

Las escuelas deben limpiar y desinfectar las superficies de uso habitual del mismo modo en que lo harían si hubiera un aumento de los casos de influenza y otras infecciones respiratorias. Sin embargo, en las cocinas y áreas de preparación de alimentos, deben higienizar de la forma habitual las superficies que estén en contacto con los alimentos y, por supuesto, seguir las pautas respecto de la no concurrencia a trabajar del personal enfermo, e implementar el lavado frecuente de manos y la higiene respiratoria, que se aplican a todos los entornos.

### Guía específica para las guarderías

Para las guarderías, recomendamos la limpieza e higienización de rutina de las cocinas y áreas utilizadas principalmente para la preparación de alimentos y biberones. Asimismo, aconsejamos limpiar y desinfectar las superficies de uso habitual. Si se desinfectan los juguetes que los niños puedan llevarse a la boca o las mesas utilizadas para servir la comida, es preciso enjuagarlos y dejar que se ventilen antes de ser utilizados o entregados a los niños.

### Guía específica para restaurantes

Los restaurantes y demás establecimientos de venta de alimentos al por menor deben seguir con la limpieza y medidas de higiene de rutina de las superficies donde se prepara la comida en la cocina y demás áreas de conservación de los alimentos. Recomendamos la limpieza y desinfección de rutina de las superficies de uso habitual en los comedores y áreas de clientes. En este enlace, se puede acceder a pautas detalladas sobre prácticas de limpieza y desinfección para restaurantes:

[https://drive.google.com/file/d/1pXAFPXCTLqBZvTJpuqrH45YeLB\\_Jc2wP/view](https://drive.google.com/file/d/1pXAFPXCTLqBZvTJpuqrH45YeLB_Jc2wP/view)

### Guía específica para hoteles

Los hoteles y demás alojamientos públicos en los que se haya quedado una persona enferma, en cuarentena o en aislamiento deberían seguir las recomendaciones del Centro para el Control de Enfermedades: [Pautas provisionarias para la limpieza y desinfección ambiental en hogares de Estados Unidos con casos presuntos o confirmados de COVID-19](#).

- Se recomienda clausurar las áreas utilizadas por personas enfermas y esperar cuanto sea posible para limpiar y desinfectar a fin de minimizar la posibilidad de exposición a las gotículas respiratorias. Abrir puertas y ventanas que dan al exterior para aumentar la circulación de aire en el área. **Restringir el acceso durante dos horas luego de que la persona se haya ido. Si es posible, esperar hasta 24 horas antes de proceder a la limpieza y desinfección.**
- En las áreas que hayan sido visitadas o utilizadas por personas enfermas, seguir con la limpieza y desinfección de rutina especificadas en esta pauta.

### Cuidado del entorno

La siguiente información fue modificada en función de la importancia de los contenidos. Se puede acceder a la guía completa en este vínculo:

<https://www.cdc.gov/infectioncontrol/guidelines/isolation/index.html>

#### Recomendaciones:

- IV.F.1. Implementar políticas y procedimientos específicos y de rutina de superficies ambientales, tal como lo indica el nivel de contacto del paciente y el grado de suciedad. (II)
- IV.F.2. Limpiar y desinfectar las superficies que puedan estar contaminadas por patógenos, como las que están cerca del paciente (p. ej., barandas de la cama, mesas de luz) y las de uso habitual en el entorno de asistencia al paciente (p. ej., los pestillos, las superficies del baño y de los alrededores del baño en las habitaciones de los pacientes) con más frecuencia que en el caso de otras superficies (p. ej., superficies horizontales de las salas de espera). (IB)
- IV.F.3. Utilizar desinfectantes registrados en la EPA que tengan acción microbicida contra los patógenos con mayores posibilidades de contaminar el entorno de asistencia al paciente. Hacerlo siguiendo las instrucciones del fabricante. (IB/IC)
- IV.F.5. Incluir los equipos electrónicos de múltiples usos en las políticas y procedimientos para prevenir la contaminación y para limpiar y desinfectar, en especial las cosas utilizadas por los pacientes, las utilizadas para la prestación de atención médica y los dispositivos móviles que se ingresan y retiran de las habitaciones de los pacientes con frecuencia (a saber, a diario). (IB)
- IV.F.5.a. No hay recomendaciones para la utilización de fundas protectoras o teclados lavables. (Cuestión sin resolver.)

Estas recomendaciones, que proporcionan información complementaria a las recomendaciones generales de limpieza y desinfección ya proporcionadas por el Departamento, están en consonancia con la Administración de Medicamentos y Alimentos (FDA, por su sigla en inglés) de Estados Unidos. Es importante tener en cuenta que deben seguirse las instrucciones que aparecen en las etiquetas de todos los productos de higienización y desinfección, y que estos deben estar registrados ante la EPA y ser de nivel hospitalario (eficaces contra *Salmonella choleraesuis* (entérica), *Staphylococcus aureus*, y *Pseudomonas aeruginosa*)

## Guía de limpieza ambiental en relación con el COVID-19 elaborada por el Departamento de Salud Pública y Medio Ambiente de Colorado Instalaciones reguladas y hogares

### Hogares, lugares de trabajo, vehículos

El Departamento de Salud Pública y Medio Ambiente de Colorado (CDPHE) elaboró una serie de recomendaciones para la limpieza y desinfección de rutina de superficies de uso habitual con el objetivo de controlar la diseminación del virus que provoca la enfermedad causada por el coronavirus 2019, también conocido como COVID-19. La siguiente guía se basa en las [recomendaciones provisionarias para los hogares de Estados Unidos con casos presuntos o confirmados de COVID-19](#), así como en las [recomendaciones provisionarias para las instalaciones comunitarias de Estados Unidos con casos presuntos o confirmados de COVID-19](#).

Con base en lo que se sabe del virus, el contagio de persona a persona ocurre con mayor frecuencia cuando se establece contacto estrecho (de alrededor de 6 pies como máximo). Este tipo de transmisión se da por medio de gotículas respiratorias. No está documentada la transmisión de COVID-19 a las personas a través de superficies contaminadas por el virus. La evidencia actual sugiere que este puede permanecer vivo de horas a días sobre superficies de distintos materiales. La limpieza y posterior desinfección de superficies visiblemente sucias y de alto contacto con las personas se encuentra entre las mejores prácticas para prevenir la COVID-19 y otras enfermedades respiratorias virales en los hogares y entornos comunitarios.

- La **limpieza** se refiere a la eliminación de gérmenes, suciedad e impurezas de las superficies. No mata los gérmenes, pero al eliminarlos, disminuye su cantidad y el riesgo de diseminar la infección.
- La **desinfección** se refiere al uso de productos químicos para matar los gérmenes en las superficies. Este proceso no necesariamente limpia las superficies sucias o elimina los gérmenes, pero al matarlos en una superficie *luego* de la limpieza, puede reducir aún más el riesgo de diseminación de la infección.

### Cómo limpiar y desinfectar superficies

- **Limpieza y desinfección luego de que personas de quienes se sospeche o se sepa con seguridad que tienen COVID-19 hayan estado en las instalaciones**
  - Se recomienda clausurar las áreas utilizadas por personas enfermas y esperar cuanto sea posible para limpiar y desinfectar a fin de minimizar la posibilidad de exposición a las gotículas respiratorias. Abrir puertas y ventanas que dan al exterior para aumentar la circulación de aire en el área. **Restringir el acceso durante dos horas luego de que la persona se haya ido. Si es posible, esperar hasta 24 horas antes de proceder a la limpieza y desinfección.**

- Limpiar y desinfectar todas las áreas (p. ej., oficinas, baños y áreas de uso común) que hayan sido utilizadas por las personas enfermas, con especial atención a las superficies de contacto frecuente. Seguir aplicando todas las recomendaciones de limpieza y desinfección que se detallan a continuación.
- Para limpiar y desinfectar superficies, usar guantes descartables, que deberán desecharse luego de cada limpieza. Si se reutilizan los guantes, deben destinarse únicamente a la limpieza y desinfección de superficies para prevenir la COVID-19 y a ningún otro propósito. Lavarse las manos inmediatamente luego de sacarse los guantes.
- Si las superficies están sucias, deben limpiarse con detergente o jabón y agua antes de desinfectarlas.
- Para la desinfección, las soluciones de lejía diluida de uso doméstico, las soluciones de alcohol con al menos un 70 % de este producto, y los desinfectantes domésticos más comunes registrados en la Agencia de Protección Ambiental (EPA, por su sigla en inglés) deberían resultar eficaces. Consultar las instrucciones del fabricante de los productos de limpieza y desinfección utilizados.
- Si resultan apropiadas para la superficie en cuestión, se pueden usar soluciones de lejía diluida de uso doméstico. Consultar la etiqueta del recipiente de lejía para asegurarse de que el contenido sea desinfectante y leer las instrucciones para mezclarlo. Seguir las instrucciones del fabricante para la mezcla, aplicación y ventilación adecuadas. Evitar usar botellas de lejía que parezcan tener una antigüedad mayor a un año o que tengan una fecha de vencimiento ya pasada. Nunca mezclar lejía de uso doméstico con amoníaco o cualquier otro limpiador. Para ser eficaz contra el coronavirus, la lejía de uso doméstico no vencida debe estar correctamente diluida.
  - Para preparar una solución de lejía, mezclar lo siguiente:
    - 5 cucharadas (1/3 de taza) de lejía por galón de agua. Esta es una "receta estándar". Asegurarse de leer la etiqueta, ya que la lejía viene en diferentes concentraciones.
    - 4 cucharaditas de té por cuarto de galón de agua.
  - Los productos para patógenos virales emergentes aprobados por la EPA deben ser efectivos en el combate a la COVID-19, según los datos de virus más difíciles de eliminar. Al utilizar cualquier producto de limpieza y desinfección, seguir las instrucciones del fabricante (p. ej., en lo que respecta a la concentración, método de aplicación, tiempo de contacto, etc.). En el siguiente enlace, se puede acceder a la lista de productos para eliminar patógenos virales aprobados por EPA que serían efectivos contra la COVID-19: <https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>
- En el caso de superficies suaves (porosas), como pisos alfombrados, tapetes y cortinas, eliminar la contaminación visible, si la hay, y limpiar con los limpiadores adecuados para estas superficies. Luego de limpiar:
  - lavar todo según lo que indiquen las instrucciones del fabricante. De ser posible, hacer el lavado con el agua lo más caliente posible y secar todo completamente, o
- Usar productos que estén aprobados por la EPA para la eliminación de patógenos virales emergentes (ejemplos en este [enlace](#)) y que sean adecuados para superficies porosas.

**Cómo limpiar y desinfectar ropa, toallas y ropa de cama**

- Usar guantes descartables para manipular la ropa sucia de una persona enferma, y luego desecharlos. Si se reutilizan los guantes, deben destinarse únicamente a la limpieza y desinfección de superficies para prevenir la COVID-19 y no deben usarse para ninguna otra tarea doméstica. [Lavarse las manos](#) inmediatamente luego de sacarse los guantes.
  - Si no se usan guantes para manipular la ropa sucia, lavarse las manos después de hacerlo.
  - Evitar en lo posible sacudir la ropa sucia. De ese modo, se minimizará el riesgo de que el virus se disperse por el aire.
  - lavar todo según lo que indiquen las instrucciones del fabricante. De ser posible, hacer el lavado con el agua lo más caliente posible y secar todo completamente. La ropa sucia de una persona enferma se puede lavar con la ropa de otras personas.
  - Limpiar y desinfectar los recipientes para la ropa sucia aplicando las recomendaciones anteriores para las superficies. También se puede utilizar una bolsa como forro, que sea descartable (que se pueda desechar) o que se pueda lavar.

#### **Instalaciones reguladas: escuelas, guarderías, establecimientos de venta de alimentos al por menor y alojamientos públicos**

La siguiente guía tiene como fin explicar cómo limpiar, higienizar y desinfectar adecuadamente las superficies en instalaciones reguladas como escuelas, guarderías, establecimientos de venta de alimentos al por menor y alojamientos públicos.

- **Limpio** significa estar libre de polvo o restos o eliminarlos aspirando o fregando y lavando con agua y jabón.
- **Desinfectar** significa eliminar la totalidad o la mayoría de los patógenos. Por lo general, esto se logra en los ambientes mencionados mediante el uso de soluciones químicas líquidas, como la mezcla de lejía de uso doméstico y agua.
- **Higienizar** no es tan potente como desinfectar, pero igual elimina muchos patógenos, y es un método seguro para las superficies en las que se preparan alimentos.

#### **Limpieza y desinfección luego de que personas de quienes se sospeche o se sepa con seguridad que tienen COVID-19 hayan estado en las instalaciones**

- Se recomienda clausurar las áreas utilizadas por personas enfermas y esperar cuanto sea posible para limpiar y desinfectar a fin de minimizar la posibilidad de exposición a las gotículas respiratorias. Abrir puertas y ventanas que dan al exterior para aumentar la circulación de aire en el área. **Restringir el acceso durante dos horas luego de que la persona se haya ido. March 19, 2020

**UPDATED NOTICE OF PUBLIC HEALTH ORDER 20-22 CLOSING BARS,  
RESTAURANTS, THEATERS, GYMNASIUMS, CASINOS, NONESSENTIAL  
PERSONAL SERVICES FACILITIES, AND HORSE TRACK AND OFF-TRACK BETTING  
FACILITIES STATEWIDE**

The Colorado Department of Public Health and Environment (CDPHE) is working to stop the spread of novel coronavirus 2019 (COVID-19). At this time I find it necessary to implement emergency measures to close down all bars, restaurants, theaters, gymnasiums and casinos in Colorado in an effort to protect and preserve the public health. This Order, originally issued on March 16, 2020, has been amended to close nonessential personal services facilities and racetrack and off-track pari-mutuel wagering facilities, exempt institutions of higher education in the services of meals, clarify that hotel dining services are not exempted other than in room dining services, add a definition of gymnasium, and extend the Order through April 30, 2020.

**FINDINGS**

1. COVID-19 was first detected in Wuhan, China in late 2019, and since then has spread to over 60 countries including the United States. There are 131 known presumptive positive cases of COVID-19 in Colorado as of March 16, 2020, and there is every expectation that more cases will be diagnosed.
2. COVID-19 is a respiratory illness caused by a novel coronavirus, and like other respiratory illnesses, is transmitted through person-to-person contact or by contact with surfaces contaminated with the virus. Persons infected with COVID-19 may become symptomatic anywhere from two to fourteen days after

exposure. Symptoms include fever, cough or shortness of breath or difficulty breathing.

3. Individuals with serious chronic health conditions and older adults are most at risk for becoming very ill with this disease.

3. On March 10, 2020, the Governor of Colorado declared a State of Emergency related to the presence of COVID-19 in the State. CDPHE has confirmed that COVID-19 continues to spread throughout the State of Colorado.

4. On March 13, 2020, the President of the United States declared a National Emergency due to COVID-19.

5. A significant number of Coloradans are at risk of serious health complications, including death, from COVID-19. Although most individuals who contract COVID-19 do not become seriously ill, persons with mild symptoms and asymptomatic persons with COVID-19 may place other vulnerable members of the public at significant risk. A large surge in the number of persons with serious infections can compromise the ability of the healthcare system to deliver necessary healthcare to the public. Colorado is experiencing a rapid increase in COVID-19 transmission that threatens the health of residents and risks overwhelming the healthcare system in the state of Colorado.

6. Pursuant to Colo. Rev. Stat. § 25-1.5-101(1)(a) and §25-1.5-102(1)(a)(I), this Public Health Order closes bars, restaurants, gyms, theaters, casinos, nonessential personal services facilities and horse track and off-track betting facilities to slow the spread of the COVID-19 virus. CDPHE has the duty to investigate and control the causes of epidemic or communicable diseases and conditions affecting public health and to establish, to close public places and forbid gatherings of people when necessary to protect the public health, and to establish, maintain and enforce isolation and quarantine, and, in pursuance

thereof and for this purpose only, to exercise such physical control over property and the persons of the people within this state as the department may find necessary for the protection of public health.

## ORDER

### I. **Definitions.** For purposes of this Order:

- A. **“Bar”** means any indoor area that is operated and licensed under article 3 of title 44, primarily for the sale and service of alcohol beverages for on-premises consumption and where the service of food is secondary to the consumption of such alcohol beverages. C.R.S. Section 25-14-203(3).
- B. **“Brew pub”** means a retail establishment that manufactures not more than one million eight hundred sixty thousand gallons of malt liquor and fermented malt beverages on its licensed premises or licensed alternating proprietor licensed premises, combined, each calendar year. C.R.S. Section 44-3-103(5).
- C. **“Casino”** means a licensed gaming establishment, which is any premises licensed pursuant to this Article 30 of Title 44 of the Colorado Revised Statutes for the conduct of gaming. C.R.S. Section 44-30-103(18).
- D. **“Cigar-tobacco bar”** means a bar that, in the calendar year ending December 31, 2005, generated at least five percent or more of its total annual gross income or fifty thousand dollars in annual sales from the on-site sale of tobacco products and the rental of on-site humidors, not including any sales from vending machines. C.R.S. Section 25-14-203(4).
- E. **“Distillery pub”** means a retail establishment:
  - (1) Whose primary purpose is selling and serving food and alcohol beverages for on-premises consumption; and

(2) That ferments and distills not more than forty-five thousand liters of spirituous liquor on its licensed premises each calendar year. C.R.S. Section 44-3-103(14).

- F. **“Gymnasium”** means a building or room used for indoor sports or exercise, such as fitness, dance, exercise or group classes, exercise studios and centers, recreation centers, bowling alleys, pools, and other indoor athletic facilities.
- G. **“Horse track”** means a licensed race track, which is any premises licensed pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes for the conduct of racing. C.R.S. Sections 44-32-102(2)(a), (2)(b), (3), (8) & (24) C.R.S.
- H. **“Restaurant”** means an establishment provided with special space, sanitary kitchen and dining room equipment, and persons to prepare, cook, and serve meals, where, in consideration of payment, meals, drinks, tobaccos, and candies are furnished to guests. For purposes of this order, “Restaurant” also includes any restaurant facilities located within a hotel, lodging and entertainment facility, resort hotel, or resort complex. C.R.S. Section 44-3-103(21), (29), (44), (45), (47).
- I. **“Nonessential personal services”** means services and products that are not necessary to maintain an individual’s health or safety, or the sanitation or essential operation of a business or residence. Nonessential personal services include, but are not limited to, hair or nail salons, spas, or tattoo or massage parlors.
- J. **“Simulcast facility”** means a licensed in-state simulcast facility pursuant to this Article 32 of Title 44 of the Colorado Revised Statutes, also commonly referred to as an “off-track betting facility” or “OTB”. Sections 44-32-102(11) & (21), C.R.S.
- K. **“Tavern”** means an establishment serving alcohol beverages in which the principal business is the sale of alcohol beverages at retail for consumption on the premises and where sandwiches and

light snacks are available for consumption on the premises.

C.R.S. Section 44-3-103(57).

- L. **“Public accommodation”** for purposes of this Order is a private entity that owns, operates, leases, or leases to, a place of public accommodation. Places of public accommodation subject to this Order include bars, taverns, brew pubs, distillery pubs, restaurants, gymnasiums, theaters, nonessential personal services facilities, and casinos.
- 
- II. A. Effective March 17, 2020 at 8:00 AM, and continuing through April 30, 2020, the following places of public accommodation are closed to ingress, egress, use, and occupancy by members of the public:
    1. Restaurants, food courts, cafes, coffeehouses, and other similar places of public accommodation offering food or beverage for on-premises consumption;
    2. Bars, taverns, brew pubs, breweries, microbreweries, distillery pubs, wineries, tasting rooms, special licensees, clubs, and other places of public accommodation offering alcoholic beverages for on-premises consumption;
    3. Cigar bars;
    4. Gymnasiums;
    5. Movie and performance theaters, opera houses, concert halls, and music halls; and
    6. Casinos.

Places of public accommodation subject to this section are encouraged to offer food and beverage using delivery service, window service, walk-up service, drive-through service, or drive-up service, and to use precautions in doing so to mitigate the potential transmission of COVID-19, including social distancing; however, no consumption of food or beverages is permitted onsite. In offering food or beverage, a place of public accommodation subject to this section may permit up to five

members of the public at one time in the place of public accommodation for the purpose of picking up their food or beverage orders, so long as those individuals are at least six feet apart from one another while on premises.

**B.** Effective March 19, 2020 at 8:00 AM and continuing through April 30, 2020, the following places of public accommodation are closed to ingress, egress, use, and occupancy by members of the public:

1. Non-essential personal services facilities; and
2. Horse tracks and simulcast facilities, also known as off-track betting facilities.

**III.** The restrictions imposed by this order do not apply to any of the following:

1. Places of public accommodation that offer food and beverage not for on-premises consumption, including grocery stores, markets, convenience stores, pharmacies, drug stores, and food pantries, other than those portions of the place of public accommodation subject to the requirements of Section II;
2. Room service in hotels;
3. Health care facilities, residential care facilities, congregate care facilities, and juvenile justice facilities;
4. Crisis shelters or similar institutions;
5. Airport concessionaires;
6. Institutions of higher education offering dining hall services located in or adjacent to campus dormitories that are accessed through student, staff, faculty, or campus associated identification, as well as grab and go food services within these institutions, while exercising social distancing measures of at least six feet between individuals;

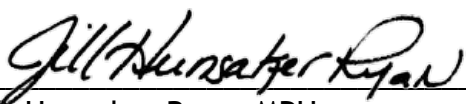

7. Fitness centers and nonessential personal services included in residential facilities, such as hotels, apartment or condominium complexes or similar housing arrangements, that are limited to use only by hotel guests or residents of the housing who are following social distancing requirements of at least 6 feet between individuals, and the hotel or property managers are performing frequent environmental cleaning; and
8. Any emergency facilities necessary for the response to these events.

The requirements in Section II.A of this Order took effect at 8:00 AM on March 17, 2020, and the requirements of Section II.B of this Order take effect at 8:00 AM on March 19, 2020, and all requirements remain in effect through April 30, 2020, unless otherwise extended in writing by the Executive Director.

CDPHE is tasked with protecting the health and welfare of the citizens of Colorado by investigating and controlling the causes of epidemic and communicable disease. This Order is necessary to control any potential transmission of disease to others. See sections 25-1.5-101(1)(a) and 25-1.5-102(1)(a)(I), C.R.S. Immediate issuance of this Order is necessary for the preservation of public health, safety, or welfare.

**FAILURE TO COMPLY WITH THIS ORDER IS SUBJECT TO THE PENALTIES CONTAINED IN SECTIONS 25-1-114, C.R.S, INCLUDING A FINE OF UP TO ONE THOUSAND (1,000) DOLLARS AND IMPRISONMENT IN THE COUNTY JAIL FOR UP TO ONE YEAR.**

  
\_\_\_\_\_  
Jill Hunsaker Ryan, MPH  
Executive Director

March 19, 2020  
Date

**DATE OF ORDER: MARCH 26, 2020**

**UPDATED PUBLIC HEALTH ORDER 20-24 IMPLEMENTING STAY AT HOME  
REQUIREMENTS**

**PURPOSE OF THE ORDER**

I issue this Amended Public Health Order (PHO or Order) pursuant to the Governor's directive in Executive Orders D 2020 017 (**Ordering Coloradans to Stay at Home Due to the Presence of COVID-19 in the State**) in response to the existence of hundreds of confirmed and presumptive cases of Coronavirus disease 2019 (COVID-19) and related deaths across the State of Colorado. Further, there is substantial evidence of community spread of COVID-19 throughout the State. This Order has been amended to direct Coloradans to Stay at Home.

**FINDINGS**

1. Due to the increasing incidence of COVID-19 in the general public, the designation of pandemic by the World Health Organization, the Declaration of a Disaster Emergency by Governor Polis on March 10, 2020, and a National Emergency by the President of the United States on March 13, 2020, and previous PHOs issued by this Department, including PHO 20-20 (Restricting Visitors all all Colorado Skilled Nursing Facilities, Assisted Living Residences and Intermediate Care Facilities); PHO 20-22 (Closing Bars, Restaurants, Theaters, Gymnasiums, Casinos, Noncritical Personal Services Facilities, and Horse Track and Off-Track Betting Facilities Statewide); and PHO 20-23 (Implementing Social Distancing Measures); I hereby declare that the actions and prohibitions outlined in this PHO are necessary for the health and safety of the residents of Colorado.
2. Scientific evidence and best practices regarding the most effective manner to slow the transmission of communicable diseases generally and COVID-19 specifically, and evidence that the population of Colorado is at risk for serious health complications, including death, from COVID-19 make it imperative that the measures included in this PHO be taken immediately.
3. There is clear evidence that some individuals who contract the COVID-19 virus have no symptoms or have mild symptoms, which means they may not be aware they carry the virus. Because even people without symptoms can transmit the disease, and because evidence shows the disease is easily spread, gatherings promote transmission of COVID-19. COVID-19 also physically contributes to property loss, contamination, and damage due to its propensity to attach to surfaces for prolonged periods of time.

4. The scientific evidence also shows that at this stage of the emergency, it is critical to slow transmission as much as possible to protect the most vulnerable and to prevent Colorado's health care system from being overwhelmed. One proven way to slow the transmission is to limit interactions among people to the greatest extent practicable and increase the distance between people in the work environment. This PHO helps to reduce the property damage caused by COVID-19 and preserves the welfare of our residents by reducing the spread of the disease in our communities and our workplaces, and preserving critical emergency and healthcare capacity in the State.

### INTENT

5. The intent of this PHO is to minimize contact between residents and to the greatest extent possible minimize the exposure of the public to contaminated public surfaces. By staying home we can maximize the number of people isolating in place, reduce the number of people congregating in workplaces at one time and reduce the proximity of people in the workplace, and enable the services, businesses, and travel necessary to protect public health and safety and preserve the continuity of social and commercial life as we save lives.

6. When people leave their places of residence, whether to obtain or perform critical emergency services, recreate, go to work, or for other valid reasons, they should at all times comply with **Social Distancing Requirements** as defined in Section III.F below. All provisions of this PHO should be interpreted to effectuate this intent. Failure to comply with any of the provisions of this PHO constitutes an imminent threat to public health.

### ORDER

The following authorities in Public Health Order 20-24 Implementing Fifty Percent Reduction in Nonessential Business In-Person Work and Extreme Social Distancing are hereby superseded by this Updated Public Health Order 20-24:

1. Any provision authorizing a noncritical business to remain open to in-person work by reducing their in-person workforce by fifty percent;
2. Any provision authorizing a noncritical business to remain open to in-person work by self-certifying that the business meets the Social Distancing Requirements for all employees.

Public Health Order 20-23 Implementing Social Distancing is hereby superseded by this Updated Public Health Order 20-24.

**I. STAY AT HOME**

A. All individuals currently living within the State of Colorado are ordered to **Stay at Home whenever possible**. Individuals living in shared or outdoor spaces must at all times, to the greatest extent possible, comply with **Social Distancing Requirements**, and may leave their **Residences** only to perform or utilize **Necessary Activities**.

B. All public and private gatherings of any number of people occurring outside a **Residence** are prohibited, except for the limited purposes expressly permitted in this PHO which include Essential Activities. Nothing in this PHO prohibits the gathering of members living in the same **Residence**.

C. People at high risk of severe illness from COVID-19 and people who are sick are urged to stay in their **Residence at all times** except as necessary to seek medical care.

D. Individuals experiencing symptoms of COVID-19 must self-isolate until their symptoms cease or until they have a negative test result. Due to limited testing availability and narrow criteria for testing, if an individual has tested positive for COVID-19 and/or has developed symptoms of COVID-19, including early or mild symptoms (such as cough and shortness of breath), they should be in isolation (staying away from others) until they have had no fever for at least seventy-two (72) hours (that is three full days of no fever without the use of medicine that reduces fevers), other symptoms have improved (such as cough or shortness of breath) and at least seven (7) days have passed since symptoms first appeared.

E. People experiencing homelessness are strongly urged to obtain shelter, and governmental and other entities are strongly urged to make shelter available as soon as possible and to the maximum extent practicable. People experiencing homelessness must comply with **Social Distancing Requirements** at all times.

F. All travel, including, but not limited to, travel by automobile or public transit, except **Necessary Travel** is prohibited. People must use public transit only for purposes of performing **Necessary Activities** or to travel to and from work to operate **Critical Businesses** or maintain **Critical Governmental Functions**. People riding on public transit must comply with **Social Distancing Requirements** as defined in Section III.F, below, to the greatest extent feasible.

## II. BUSINESS REQUIREMENTS

A. **Critical Businesses**, as defined below, are exempt, subject to certain limitations, from this PHO and are encouraged to remain open. **Critical Businesses** must comply with **Social Distancing Requirements** at all times and implement tele-work or other strategies, such as staggered schedules or re-designing workplaces, to create more distance between workers unless doing so would make it impossible to carry out critical functions. **Critical Businesses** that serve the public such as grocery stores and other Critical Retail shall comply with **Social Distancing Requirements** at all times including, but not limited to, when any customers are standing in line.

B. To successfully contain the spread of the virus, all employers and individuals must observe **Social Distancing Requirements** at all times and to the greatest extent possible.

C. All businesses required to close down their in-person work under this Order may continue to carry out **Minimum Basic Operations** as defined below. Businesses that can continue to operate through work at home arrangements with their employees are encouraged to do so

D. Child care facilities providing services exempted in this PHO must, to the extent possible, operate under the following mandatory conditions: (1) child care must be carried out in stable groups of 10 or fewer (“stable” means that the same 10 or fewer children are in the same group each day); (2) children shall not change from one group to another; (3) If more than one group of children is cared for at one facility, each group shall be in a separate group. Groups shall not mix with each other; (4) child care workers shall remain solely with one group of children. To the extent possible, child care shall be performed in compliance with **Social Distancing Requirements**.

## III. DEFINITIONS

A. **Necessary Activities**. For purposes of this PHO, individuals may leave their Residence only to perform any of the following **Necessary Activities**, provided they comply at all times and to the greatest extent possible with **Social Distancing Requirements** below. People at high risk of severe illness from COVID-19 and people who are sick, however, must not leave their **Residence** except as necessary to receive medical care. **Necessary Activities** include:

1. Engaging in activities or perform tasks essential to their health and safety, or to the health and safety of their family or household members, including, but not

- limited to, pets and livestock, such as, by way of example only and without limitation, obtaining medical supplies, walking your dog, feeding barnyard animals, obtaining durable medical equipment, obtaining medication, visiting a healthcare professional, or obtaining supplies they need to work from home.
2. Obtaining necessary services or supplies for themselves and their family or household members, or to deliver those services or supplies to others, such as, by way of example only and without limitation, food, pet supply, other household consumer products, and products or equipment necessary to maintain the safety, sanitation, and essential operation of a Residence.
  3. Engaging in outdoor activity, such as, by way of example and without limitation, walking, hiking, nordic skiing, snowshoeing, biking or running. For purposes of outdoor activity, State parks will remain open to the public to engage in walking, hiking, biking, running, and similar outdoor activities but all playgrounds, picnic areas, other similar areas conducive to public gathering, and attended areas shall be closed. For other parks, check with the local jurisdiction and follow any requirements for that jurisdiction. Additionally, the permitted outdoor activities in this PHO do not include activities that would violate the **Social Distancing Requirements** defined in Section III.F, below.
  4. Performing work providing essential products and services for a **Critical Business** or **Critical Government Function** as defined in Section III.C and D, below, or to otherwise carry out activities permitted in this PHO.
  5. Caring for a family member, a vulnerable person, or pet in another household, or to care for livestock kept at a location other than an individual's home.

**B. Necessary Travel.** For purposes of this Order, travel is Necessary for any of the following purposes: (1) providing or accessing **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses**; (2) receiving materials for distance learning, for receiving meals, and any other related services from educational institutions; (3) returning to a place of **Residence** from outside the jurisdiction; (4) travel required by law enforcement or court order; (5) non-residents returning to their place of **Residence**.

**C. Critical Business.** Any business, including any for profit or non-profit, regardless of its corporate structure, engaged in any of the commercial, manufacturing, or service activities listed below, may continue to operate as normal. **Critical Businesses** must comply with the guidance and directives for maintaining a clean and safe work environment issued by the Colorado Department of Public Health and Environment (CDPHE) and any applicable local health department. **Critical Businesses** must comply with **Social Distancing Requirements** and all PHOs currently in effect to the greatest extent possible and will be held accountable for doing

so. **Critical Businesses** do NOT include health clubs as defined in C.R.S. § 6-1-102(4.6), fitness and exercise gyms, and similar facilities, or any of the other businesses required to close by PHO 20-22.

“**Critical Business**” means:

**1. Healthcare Operations, Including:**

- Hospitals, clinics, and walk-in health facilities
- Medical and dental care, including ambulatory providers
- Research and laboratory services
- Medical wholesale and distribution
- Home health care companies, workers and aides
- Pharmacies
- Pharmaceutical and biotechnology companies
- Behavioral health care providers
- Veterinary care and livestock services
- Nursing homes, residential health care, or congregate care facilities
- Medical supplies and equipment manufacturers and providers, including durable medical equipment technicians and suppliers
- Blood banks

**2. Critical Infrastructure, Including:**

- Utilities and electricity, including generation, transmission, distribution and fuel supply
- Road and railways
- Oil and gas extraction, production, refining, storage, transport and distribution
- Public water and wastewater
- Telecommunications and data centers
- Transportation and infrastructure necessary to support critical businesses
- Hotels, and places of accommodation
- Businesses and organizations that provide food, shelter, social services, and other necessities of life for economically disadvantaged, persons with access and functional needs, or otherwise needy individuals
- Food and plant cultivation, including farming crops, livestock, food processing and manufacturing, animal feed and feed products, rendering, commodity sales, and any other work critical to the operation of any component of the food supply chain

- Any business that produces products critical or incidental to the construction or operation of the categories of products included in this subsection

### **3. Critical Manufacturing, Including:**

- Food processing, manufacturing agents, including all foods and beverages
- Chemicals
- Computers and computer components
- Medical equipment, components used in any medical device, supplies or instruments
- Pharmaceuticals
- Sanitary products
- Telecommunications
- Microelectronics/semiconductor
- Agriculture/farms
- Household paper products
- Any business that produces products critical or incidental to the processing, functioning, development, manufacture, packaging, or delivery of any of the categories of products included in this subsection
- Any manufacturing necessary to support a **Critical Business**

### **4. Critical Retail, Including:**

- Grocery stores including all food and beverage stores
- Farm and produce stands
- Gas stations and convenience stores
- Restaurants and bars (for take-out/delivery only as necessary under **Executive Order D 2020 011** and **PHO 20-22**, as amended)
- Marijuana dispensary (only for the sale of medical marijuana or curbside delivery pursuant to **Executive Order D 2020 011**)
- Liquor stores
- Firearms stores
- Hardware, farm supply, and building material stores
- Establishments engaged in the retail sale of food and any other household consumer products (such as cleaning and personal care products)
- Establishments engaged in the sale of products that support working from home

## 5. Critical Services, Including:

- Trash, compost, and recycling collection, processing and disposal
- Mail and shipping services, and locations that offer P.O. boxes
- Self-serve laundromats and garment and linen cleaning services for critical businesses
- Building cleaning and maintenance
- Child care services
- Automobile rental, auto supply and repair (including retail dealerships that include repair and maintenance, but not in person retail sales)
- Warehouse/distribution and fulfillment, including freight distributors
- Funeral homes, crematoriums, and cemeteries, with strict compliance with **Social Distancing Requirements** for employees and any attendees of services
- In-person pastoral services for individuals who are in crisis or in need of end of life services provided social distancing is observed to the greatest extent possible. Houses of worship may remain open, however, these institutions are encouraged to implement electronic platforms to conduct services whenever possible or to conduct smaller (10 or fewer congregants), more frequent services to allow strict compliance with **Social Distancing Requirements**.
- Storage for **Critical Businesses**
- Animal shelters, animal boarding services, animal rescues, zoological facilities, animal sanctuaries, and other related facilities

## 6. News Media

- Newspapers
- Television
- Radio
- Other media services

## 7. Financial and Professional Institutions, Including:

- Banks and credit institutions
- Insurance and payroll
- Services related to financial markets
- Professional services, such as legal, title companies, or accounting services, real estate appraisals and transactions

**8. Providers of Basic Necessities to Economically Disadvantaged Populations, Including:**

- Homeless shelters and congregate care facilities
- Food banks
- Human services providers whose function includes the direct care of patients in State-licensed or funded voluntary programs; the care, protection, custody and oversight of individuals both in the community and in State-licensed residential facilities; those operating community shelters and other critical human services agencies providing direct care or support

**9. Construction, Including but not Limited To:**

- Housing and housing for low-income and vulnerable people
- Skilled trades such as electricians, plumbers
- Other related firms and professionals for who provide services necessary to maintain the safety, sanitation, and critical operation of residences and other **Critical Businesses** or **Critical Government Functions**, and other essential services

**10. Defense**

- Defense, security, and intelligence-related operations supporting the State of Colorado, local government, the U.S. Government or a contractor for any of the foregoing
- Aerospace operations
- Military operations and personnel
- Defense suppliers

**11. Critical Services Necessary to Maintain the Safety, Sanitation and Critical Operations of Residences or Other Critical Businesses, Including:**

- Law enforcement
- Fire prevention and response
- Building code enforcement
- Security
- Emergency management and response
- Building cleaners or janitors
- General maintenance whether employed by the entity directly or a vendor

- Automotive and bicycle repair
- Disinfection
- Snow removal

**12. Vendors that Provide Critical Services or Products, Including Logistics and Technology Support, Child Care and Services:**

- Logistics
- Technology support for online and telephone services
- Child care programs and services
- Government owned or leased buildings
- **Critical Government Functions**

**13. Educational Institutions that Provide Critical Services to Students and the General Public:**

- K-12 public school and private schools for the purpose of providing meals, housing, facilitating or providing materials for distance learning, and providing other essential services to students, provided that **Social Distancing Requirements** are observed.
- Postsecondary institutions, including private and public colleges and universities, for the purpose of facilitating distance learning or performing essential functions, provided that **Social Distancing Requirements** are observed, such as security, medical and mental health services, housing, food services, and critical research.

**D. Critical Government Functions.** The provision, operation and support of the following government functions shall continue:

1. Critical services, including
  - Public safety (police stations, fire and rescue stations, correctional institutions, emergency vehicle and equipment storage, and, emergency operation centers)
  - Emergency response
  - Judicial branch operations, including attorneys if necessary for ongoing trials and required court appearances, unless appearances can be done remotely
  - Legislative and executive branch functions
  - Emergency medical (hospitals, ambulance service centers, urgent care centers having emergency treatment functions, and non-ambulatory

surgical structures but excluding clinics, doctors offices, and non-urgent care medical structures that do not provide these functions)

- Designated emergency shelters
- Communications (main hubs for telephone, broadcasting equipment for cable systems, satellite dish systems, cellular systems, television, radio, and other emergency warning systems, but excluding towers, poles, lines, cables, and conduits)
- Public utility plant facilities for generation and distribution (hubs, treatment plants, substations and pumping stations for water, power and gas, but not including towers, poles, power lines, buried pipelines, transmission lines, distribution lines, and service lines)
- Transportation. Airlines, taxis, transportation network providers (such as Uber and Lyft), vehicle rental services, paratransit, and other private, public, and commercial transportation and logistics providers necessary for **Necessary Activities**
- Transportation infrastructure (aviation control towers, air traffic control centers, and emergency equipment aircraft hangars), critical road construction and maintenance
- Hazardous material safety
- Services to at-risk populations and **Vulnerable Individuals**
- Any government service required for the public health and safety, government functionality, or vital to restoring normal services

**E. Minimum Basic Operations.** The minimum necessary activities to (1) maintain the value of the business’s inventory, ensure security, process payroll and employee benefits, or for related functions; or (2) facilitate employees of the business being able to continue to work remotely from their **Residences** are allowable pursuant to this Order. Any business supporting **Minimum Basic Operations** must comply at all times with **Social Distancing Requirements**.

**F. Social Distancing Requirements.** To reduce the risk of disease transmission, individuals shall maintain at least a six-foot distance from other individuals, wash hands with soap and water for at least twenty seconds as frequently as possible or using hand sanitizer, cover coughs or sneezes (into the sleeve or elbow, not hands), regularly clean high-touch surfaces, and not shake hands.

**G. “Stay at Home”** means to stay in your place of **Residence**, which includes hotels, motels, and shared rental facilities, and not leave unless necessary to provide, support,

perform, or operate **Necessary Activities, Minimum Basic Operations, Critical Government Functions, and Critical Businesses.**

**H.** “**Vulnerable Individual**” means anyone with a disability, anyone over the age of 60 and anyone with a serious underlying health condition.

**IV.** Pursuant to Executive Order 2020 017, local public health agencies may apply for relief from the Executive Order or this Public Health Order to more effectively meet local conditions and needs through a process to be established by CDPHE.

**V. Enforcement**

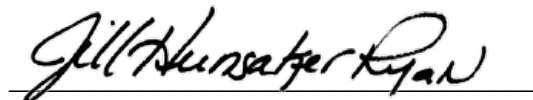

This order will be enforced by any appropriate legal means. Local authorities are encouraged to determine the best course of action to encourage maximum compliance. Failure to comply with this order could result in penalties including a fine of up to one thousand (1,000) dollars and imprisonment in the county jail for up to one year, pursuant to 25-1-114, C.R.S.

**VI. Severability**

If any provision of this PHO to the application thereof to any person or circumstance is held to be invalid, the remainder of the PHO, including the application of such part or provision to other persons or circumstances, shall not be affected and shall continue in full force and effect. To this end, the provisions of this PHO are severable.

**VII. Duration**

This PHO shall become effective at 6:00 a.m. on Thursday March 26, 2020 and will continue to be in effect until 11:59 p.m. on April 11, 2020, unless extended, rescinded, superseded, or amended in writing.

Jill Hunsaker Ryan, MPH  
Executive Director

March 26, 2020

Jason Eckert  
Senior Vice President  
Global Research, Development and Quality  
1830 W 38<sup>th</sup> Ave  
Denver, CO 80211

April 18, 2020

Dear Mr. Bauer, Ms. Hort and Ms. McClain,

Per our discussion this morning we would like to propose the following plan regarding the outbreak of the SARS-CoV-2 virus in our manufacturing facilities located in Greeley, CO and Fort Morgan, CO.

### **I. Symptomatic Employees:**

1. Employee is removed from work for a minimum of 72 hours symptom free and at least 7 days after the onset of symptoms.
2. Employee is tested for SARS-CoV-2.
  - a. If the employee is negative, they may return to work after the conditions in #1 above are met.
  - b. If the employee is positive, they will remain out of work for a minimum of 14 days at which point, if they have been symptom free for 72 hours, we will retest until we receive 2 negative results a minimum of 24 hours apart.
  - c. If the employee is positive, we will perform contact tracing and utilize our risk assessment protocol – see Appendix A
  - d. If the employee is positive, we will implement our deep clean and disinfection protocol in the employees work area and all common areas of the plant – see Appendix B

## **II. Asymptomatic Employee:**

1. Asymptomatic employees who have been identified via contact tracing in I.2.c. as being elevated or high risk will be tested every other day for 14 days starting at the point of contact of a co-worker that is positive for SARS-CoV-2.
2. The employee will remain at work unless they develop symptoms or test positive for SARS-CoV-2.
  - a. At that point we will follow I. – Symptomatic Employee protocols as outlined above.
  - b. If the employee continuously tests negative after 14 days, then testing will be discontinued.

**Appendix A**  
**Risk Assessment Protocol**

# **COVID-19 RISK ASSESSMENT**

## **QUESTIONNAIRE:**

*FOR CO-WORKERS OF A CONFIRMED POSITIVE COVID-19 EMPLOYEE*

*Note to interviewer: Maintain a distance of at least 6 feet when performing any interviews.*

The following questionnaire is designed to evaluate the potential risk to employees of COVID-19 exposure, based on CDC guidance and publications.

**Date of Review:** \_\_\_\_\_

**Name of employee:** \_\_\_\_\_

**Position / Shift** \_\_\_\_\_

**Name of interviewer:** \_\_\_\_\_

**Position:** \_\_\_\_\_

**Reference Date Ranges:** \_\_\_\_\_ (2 days before symptom onset to last date infected employee worked)

### **EXPOSURE ASSESSMENT QUESTIONS:**

Dates worked infected employee (within the reference date ranges):

What areas of the facility did you work while in the presence of the infected employee?

During the reference date range, estimate time spent in different proximity ranges to the infected person:

<b>PROXIMITY</b>	<b>EXAMPLES</b>	<b>TOTAL TIME SPENT (Minutes)</b>
Less than 12"	Talking into someone's ear in a noisy work area	
12" – 3 feet	Working side by side (close enough to touch). Face to face communication	
3 feet – 6 feet	Working in the same area, occasional work within 6 feet	
6 – 10 feet	Maintained standard for "social distancing". Break room or work area.	
Greater than 10 ft	Same room only	

Did the person sneeze or cough while in your presence?

Did they cover their cough?

When did it happen?

How close were you when it happened?

How many other people were within 6 feet when this happened?

Do you remember the names of those people (list)?

Did you make any physical contact, or share food and drink?

What kind of PPE were you wearing, if any, while being within 6 feet of the infected person?

Are you feeling ok or ill today?

## **RISK ASSESSMENT SUMMARY**

Note the best location on the risk chart based on the employee's interaction and duration of exposure with the infected person. Provide notes based on your determination for recommended action.

Exposure	Directly Coughed or Sneezed On	Cough or sneeze < 3 feet	Cough or sneeze < 6 feet	Distance < 3 feet	Distance < 3 feet	Side by Side (3-6 feet)	Social Distanced > 6 feet	Same room > 10 feet
Duration	Once or more	Once or more	Single Incident	Intermittent or > 5 min.	Single or < 5 min.	Any	Any	Any
Risk	HIGH	HIGH	ELEVATED	ELEVATED	MEDIUM	MEDIUM	LOW	LOW
Action	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	No Action	No Action

### **Interviewer Notes:**

**Appendix B**  
**Deep Cleaning and Disinfection Protocol**

## Sanitation Standard Operating Procedure Guidelines

### Environmental Cleaning & Disinfection Recommendations for Facilities with Suspected/Confirmed COVID-19 Contagion

In the event that someone in one of our plants tests positive or is suspected of being positive for the COVID-19 virus, please utilize the following guidelines for conducting environmental cleaning and disinfecting of the areas potential exposed to the virus by the individual in question – **employee welfare, common, and production areas**. This would be a **one-time deep clean** reaction (to each event), then followed by the COVID-19 preventative cleaning steps already in place and at the existing frequencies.

**PPE:** Normal PPE for handling cleaning chemicals are required, and normal PPE for conducting cleaning and sanitizing in production areas should be utilized. PPE should protect the individual from the potential of exposure to the virus during cleaning of surfaces. Persons who will be conducting the cleaning in these areas should ensure they are wearing gloves and face shield or eye protection.

- Disposable Gloves
- Rain gear (disposable aprons or smocks in non-wet clean production areas, if available)
- Eye protection or face shield

**Cleaning & Disinfecting Chemicals:** Will be dependent upon the areas to be cleaned and the chemicals available in the facility to be cleaned and disinfected, but could include the following:

- Normal janitorial cleaning/disinfecting products
- Mild detergent or chlorinated alkaline solution (dilute)
- Alcohol or Alcohol/Quat wipes
- Chlorine Dioxide solution (dilute – 100 ppm)
- Quaternary Ammonium Compound solution(Quat, dilute – 200-400 ppm)
- Chlorine solution (dilute bleach or sodium hypochlorite, dilute – 200 ppm)

Concentrations of quat sanitizers can differ from product to product, follow instructions on label for all chemicals.

**Tools:** Use normal cleaning tools for the areas to be cleaned, but any tool that cannot be adequately disinfected or sterilized (steam or ClO<sub>2</sub> gas) must be disposed of. Mop heads, towels and other soft materials used should be single use. Mop handles, buckets, etc. can be disinfected or sterilized.

- Disposable Wipes/towels and Mops
- Buckets and mop buckets
- Dedicated Trash bags
- Spray bottles and pump up sprayers
- Normal plant sanitation equipment

**Instruction/Direction:** All areas where the individual may have exposed surfaces to the virus will need to be identified, isolated, cleared out and cordoned off. Individuals who will be conducting the cleaning and disinfecting should be trained in proper handling of chemicals, proper use and disposal of PPE and cleaning tools, and proper communication to leadership of any findings/potential risks.

**Procedure: Lunch/break rooms, locker/bathrooms, general purpose hallways, other common areas with hard surfaces**

- Seal and remove all trash/garbage bags from the identified areas wearing required PPE and ensuring no stirring up of air.
- Remove any laundry baskets, mark as contaminated, and secure for laundry pick
- Open individual's locker and remove all personal items placing in a sealed bag or otherwise disposing of unnecessary items. Secure in another area for later disinfection.
- Ensure other employees remove any exposed personal items from these areas (lunch boxes, for instance) when clearing the area.
- Once the areas have been cleared, begin wiping down/cleaning all hard surfaces that may have been contacted by the individual or all hard surfaces in the room (lockers, countertops, walls, sinks, faucets, toilets, tables, chairs, benches, keyboards, time clocks, light switches, etc.) with normal cleaning chemicals. Dispose of wipes or towels used for wiping down/cleaning in tightly seal garbage bag.
- Mop floors with normal cleaning solution, changing solution as it gets dirty. Dispose of mop head after use. Utilize wet floor/slippery floor signage as needed – but traffic in these areas should be minimal.
- Allow surfaces to dry. Wet mop or wet wipe with water to remove any remaining or excess soap/cleaning solution residue. Bag up all disposable cleaning material, tightly seal and dispose of in the proper manner (health department guidelines?). If gloves are removed, employee should wash hands and replace with new gloves.
- Disinfect all same surfaces using 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), or alcohol (60-70%, follow label instruction), by spraying or wiping and letting air dry.
- Disinfect all floors by mopping with 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), alcohol (60-70%, follow label instruction), or bleach/chlorine solution (400 ppm, follow label instructions) by spraying or mopping and letting air dry.
- Non disposable cleaning tools (buckets, sprayers, mop handles, etc.) should be isolated (bagged if possible) and removed to be deep cleaned and sterilized later.
- Employees should remove disposable gloves and aprons then immediately wash their hands. Clean other PPE that is not disposable and then wash their hands again. Employees should change out of their uniforms used for cleaning & disinfecting into a new uniform. Dirty uniforms should be gently bagged or isolated for laundering. Boots should be disinfected.

## Office Areas:

- *Same as outlined above for all hard surfaces and personal belongings for the individual.*
- Carpets should NOT be immediately vacuumed. Instead, the carpets should be wet cleaned with carpet cleaner, if available, using soap and water. If carpet cleaning is not an option (or in addition), lightly spray with a 200 – 400 ppm quat solution as above for floors using spray bottles or pump up sprayer on a mist setting. **DO NOT USE Chlorine or Chlorine Dioxide** (may bleach/destroy carpeting). Do NOT soak/drench the carpet – just a light application to dampen the surface of the carpet. Allow to air dry.
- Vacuum carpet areas as per normal after cleaning, sanitizing, and air drying.

## Production Areas or Normal Wet Clean Areas: (One time reaction to positive employee confirmation, focus on areas affected most by the employee)

- Perform normal cleaning and sanitation as soon as it is possible to shut down the areas. COVID-19 is not a food safety issue so the risk to product is small, but the risk to other employees remains – so cleaning the production environment as soon as possible is advised.
- Follow the normal 8 Steps of Wet cleaning with normal PPE but consider face shields for those cleaning the specific areas where the infected individual worked (protect the eyes, nose, face from touching and spraying). Same applies as stated above for glove changing and handwashing.
- During dry cleaning/dry pick up ensure trash bags in the potentially infected area are tightly sealed and disposed of the proper manner.
- Utilized dedicated employees and cleaning tools in areas that were potentially infected, whenever possible.
- Prior to the sanitize step (Step 8), we will need to conduct a disinfection step on all surfaces by following the label instruction on the existing sanitizer or using an alternative (peracetic acid for instance) if the label does not claim disinfection. Allow the required contact time.
- Following disinfection, all product contact surfaces will need to be thoroughly rinsed. The environment does not need to be rinsed – unless there is a risk of interaction with the sanitizer chemical to be used in the next sanitizing step.
- After required rinsing now proceed to the normal procedures for Step 8 – sanitizing at no rinse product contact concentrations.
- Collect, isolate and store all cleaning tools used in potentially infected areas for deep cleaning and sterilization. Launder or otherwise clean rain gear used by employees in contaminated areas. If rain gear cannot be adequately cleaned, then dispose and replace.

**Dry Clean Only Production Areas:**

- Don PPE as above.
- Perform normal dry cleaning with extra emphasis on GENTLE brushing to minimize dusting.
- Remove as much powder and dust from the potentially infected areas by vacuuming with a HEPA filtered vacuum – do not use a centralized vacuum!
- Dispose of vacuum contents and HEPA filter in sealed bags. Remove vacuum cleaner and ancillary parts for deep cleaning and sterilization.
- Wipe down/mop with alcohol all high touch areas and any/all hard surfaces – including floors - that could have been potentially contaminated by the individual.
- Dispose of all wipes & mop heads in a sealed bag.
- May need to consider chlorine dioxide gassing of potentially contaminated dry clean only areas.

**Follow up Cleaning & Sanitizing/Disinfecting:**

- After initial deep cleaning, follow up spraying/wiping of hard surfaces and mopping of floors with disinfectant should occur 2 -3 times per shift as being followed now. In production areas, high touch and potentially contaminated surfaces can also be wiped down – preferably with alcohol wipes – during production 2 – 3 times per shift.
- Continue until further notice.
- Also, the individual's personal belongings and plant PPE/gear should be cleaned and disinfected with alcohol wipes, and potentially bagged and chlorine dioxide gassed. Likewise, employees conducting cleaning and disinfecting tasks in the potentially contaminated areas should detail alcohol clean and disinfect their bump caps, radios, flashlights, other plant PPE/gear that might have been exposed.

Each situation in each plant will present unique challenges and opportunities that may require adjustment to these guidelines for procedures. Please contact Monty Bohanan and/or Don Northrup for discussion and with any questions as these events arise.

DRAFT – FOR DISCUSSION PURPOSES ONLY

April 18, 2020

Matt Bauer, MPH, CHES  
Regional Epidemiologist  
Weld County Department of Public Health & Environment  
1555 North 17<sup>th</sup> Avenue  
Greeley, CO 80631

Dear Mr. Bauer,

Per our discussion this morning we would like to propose the following plan regarding the outbreak of the SARS-CoV-2 virus in our manufacturing facilities located in Greeley, CO and Fort Morgan, CO.

## **I. Symptomatic Employees:**

1. Employee is removed from work for a minimum of 72 hours symptom free and at least 7 days after the onset of symptoms.
2. Employee is tested for SARS-CoV-2.
  - a. If the employee is negative, they may return to work after the conditions in #1 above are met.
  - b. If the employee is positive, they will remain out of work for a minimum of 14 days at which point, if they have been symptom free for 72 hours, we will retest until we receive 2 negative results a minimum of 24 hours apart.
  - c. If the employee is positive, we will perform contact tracing and utilize our risk assessment protocol – see Appendix A

- d. If the employee is positive, we will implement our deep clean and disinfection protocol in the employees work area and all common areas of the plant – see Appendix B

## **II. Asymptomatic Employee:**

1. Asymptomatic employees who have been identified via contact tracing in I.2.c. as being elevated, or high risk will be tested every other day for 14 days starting at the point of contact of a co-worker that is positive for SARS-CoV-2.
2. The employee will remain at work unless they develop symptoms or test positive for SARS-CoV-2.
  - a. At that point we will follow I. – Symptomatic Employee protocols as outlined above.
  - b. If the employee continuously tests negative after 14 days, then testing will be discontinued.

**Appendix A**  
**Risk Assessment Protocol**

# **COVID-19 RISK ASSESSMENT**

## **QUESTIONNAIRE:**

*FOR CO-WORKERS OF A CONFIRMED POSITIVE COVID-19 EMPLOYEE*

*Note to interviewer: Maintain a distance of at least 6 feet when performing any interviews.*

The following questionnaire is designed to evaluate the potential risk to employees of COVID-19 exposure, based on CDC guidance and publications.

**Date of Review:** \_\_\_\_\_

**Name of employee:** \_\_\_\_\_

**Position / Shift** \_\_\_\_\_

**Name of interviewer:** \_\_\_\_\_

**Position:** \_\_\_\_\_

**Reference Date Ranges:** \_\_\_\_\_ (2 days before symptom onset to last date infected employee worked)

### **EXPOSURE ASSESSMENT QUESTIONS:**

Dates worked infected employee (within the reference date ranges):

What areas of the facility did you work while in the presence of the infected employee?

During the reference date range, estimate time spent in different proximity ranges to the infected person:

<b>PROXIMITY</b>	<b>EXAMPLES</b>	<b>TOTAL TIME SPENT (Minutes)</b>
Less than 12"	Talking into someone's ear in a noisy work area	
12" – 3 feet	Working side by side (close enough to touch). Face to face communication	
3 feet – 6 feet	Working in the same area, occasional work within 6 feet	
6 – 10 feet	Maintained standard for "social distancing". Break room or work area.	
Greater than 10 ft	Same room only	

Did the person sneeze or cough while in your presence?

Did they cover their cough?

When did it happen?

How close were you when it happened?

How many other people were within 6 feet when this happened?

Do you remember the names of those people (list)?

Did you make any physical contact, or share food and drink?

What kind of PPE were you wearing, if any, while being within 6 feet of the infected person?

Are you feeling ok or ill today?

## **RISK ASSESSMENT SUMMARY**

Note the best location on the risk chart based on the employee's interaction and duration of exposure with the infected person. Provide notes based on your determination for recommended action.

Exposure	Directly Coughed or Sneezed On	Cough or sneeze < 3 feet	Cough or sneeze < 6 feet	Distance < 3 feet	Distance < 3 feet	Side by Side (3-6 feet)	Social Distanced > 6 feet	Same room > 10 feet
Duration	Once or more	Once or more	Single Incident	Intermittent or > 5 min.	Single or < 5 min.	Any	Any	Any
Risk	<b>HIGH</b>	<b>HIGH</b>	<b>ELEVATED</b>	<b>ELEVATED</b>	<b>MEDIUM</b>	<b>MEDIUM</b>	<b>LOW</b>	<b>LOW</b>
Action	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	No Action	No Action

### **Interviewer Notes:**

**Appendix B**  
**Deep Cleaning and Disinfection Protocol**

## Sanitation Standard Operating Procedure Guidelines

### Environmental Cleaning & Disinfection Recommendations for Facilities with Suspected/Confirmed COVID-19 Contagion

In the event that someone in one of our plants tests positive or is suspected of being positive for the COVID-19 virus, please utilize the following guidelines for conducting environmental cleaning and disinfecting of the areas potential exposed to the virus by the individual in question – **employee welfare, common, and production areas**. This would be a **one-time deep clean** reaction (to each event), then followed by the COVID-19 preventative cleaning steps already in place and at the existing frequencies.

**PPE:** Normal PPE for handling cleaning chemicals are required, and normal PPE for conducting cleaning and sanitizing in production areas should be utilized. PPE should protect the individual from the potential of exposure to the virus during cleaning of surfaces. Persons who will be conducting the cleaning in these areas should ensure they are wearing gloves and face shield or eye protection.

- Disposable Gloves
- Rain gear (disposable aprons or smocks in non-wet clean production areas, if available)
- Eye protection or face shield

**Cleaning & Disinfecting Chemicals:** Will be dependent upon the areas to be cleaned and the chemicals available in the facility to be cleaned and disinfected, but could include the following:

- Normal janitorial cleaning/disinfecting products
- Mild detergent or chlorinated alkaline solution (dilute)
- Alcohol or Alcohol/Quat wipes
- Chlorine Dioxide solution (dilute – 100 ppm)
- Quaternary Ammonium Compound solution(Quat, dilute – 200-400 ppm)
- Chlorine solution (dilute bleach or sodium hypochlorite, dilute – 200 ppm)

Concentrations of quat sanitizers can differ from product to product, follow instructions on label for all chemicals.

**Tools:** Use normal cleaning tools for the areas to be cleaned, but any tool that cannot be adequately disinfected or sterilized (steam or ClO<sub>2</sub> gas) must be disposed of. Mop heads, towels and other soft materials used should be single use. Mop handles, buckets, etc. can be disinfected or sterilized.

- Disposable Wipes/towels and Mops
- Buckets and mop buckets
- Dedicated Trash bags
- Spray bottles and pump up sprayers
- Normal plant sanitation equipment

**Instruction/Direction:** All areas where the individual may have exposed surfaces to the virus will need to be identified, isolated, cleared out and cordoned off. Individuals who will be conducting the cleaning and disinfecting should be trained in proper handling of chemicals, proper use and disposal of PPE and cleaning tools, and proper communication to leadership of any findings/potential risks.

**Procedure: Lunch/break rooms, locker/bathrooms, general purpose hallways, other common areas with hard surfaces**

- Seal and remove all trash/garbage bags from the identified areas wearing required PPE and ensuring no stirring up of air.
- Remove any laundry baskets, mark as contaminated, and secure for laundry pick
- Open individual's locker and remove all personal items placing in a sealed bag or otherwise disposing of unnecessary items. Secure in another area for later disinfection.
- Ensure other employees remove any exposed personal items from these areas (lunch boxes, for instance) when clearing the area.
- Once the areas have been cleared, begin wiping down/cleaning all hard surfaces that may have been contacted by the individual or all hard surfaces in the room (lockers, countertops, walls, sinks, faucets, toilets, tables, chairs, benches, keyboards, time clocks, light switches, etc.) with normal cleaning chemicals. Dispose of wipes or towels used for wiping down/cleaning in tightly seal garbage bag.
- Mop floors with normal cleaning solution, changing solution as it gets dirty. Dispose of mop head after use. Utilize wet floor/slippery floor signage as needed – but traffic in these areas should be minimal.
- Allow surfaces to dry. Wet mop or wet wipe with water to remove any remaining or excess soap/cleaning solution residue. Bag up all disposable cleaning material, tightly seal and dispose of in the proper manner (health department guidelines?). If gloves are removed, employee should wash hands and replace with new gloves.
- Disinfect all same surfaces using 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), or alcohol (60-70%, follow label instruction), by spraying or wiping and letting air dry.
- Disinfect all floors by mopping with 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), alcohol (60-70%, follow label instruction), or bleach/chlorine solution (400 ppm, follow label instructions) by spraying or mopping and letting air dry.
- Non disposable cleaning tools (buckets, sprayers, mop handles, etc.) should be isolated (bagged if possible) and removed to be deep cleaned and sterilized later.
- Employees should remove disposable gloves and aprons then immediately wash their hands. Clean other PPE that is not disposable and then wash their hands again. Employees should change out of their uniforms used for cleaning & disinfecting into a new uniform. Dirty uniforms should be gently bagged or isolated for laundering. Boots should be disinfected.

## Office Areas:

- *Same as outlined above for all hard surfaces and personal belongings for the individual.*
- Carpets should NOT be immediately vacuumed. Instead, the carpets should be wet cleaned with carpet cleaner, if available, using soap and water. If carpet cleaning is not an option (or in addition), lightly spray with a 200 – 400 ppm quat solution as above for floors using spray bottles or pump up sprayer on a mist setting. **DO NOT USE Chlorine or Chlorine Dioxide** (may bleach/destroy carpeting). Do NOT soak/drench the carpet – just a light application to dampen the surface of the carpet. Allow to air dry.
- Vacuum carpet areas as per normal after cleaning, sanitizing, and air drying.

## Production Areas or Normal Wet Clean Areas: (One time reaction to positive employee confirmation, focus on areas affected most by the employee)

- Perform normal cleaning and sanitation as soon as it is possible to shut down the areas. COVID-19 is not a food safety issue so the risk to product is small, but the risk to other employees remains – so cleaning the production environment as soon as possible is advised.
- Follow the normal 8 Steps of Wet cleaning with normal PPE but consider face shields for those cleaning the specific areas where the infected individual worked (protect the eyes, nose, face from touching and spraying). Same applies as stated above for glove changing and handwashing.
- During dry cleaning/dry pick up ensure trash bags in the potentially infected area are tightly sealed and disposed of the proper manner.
- Utilized dedicated employees and cleaning tools in areas that were potentially infected, whenever possible.
- Prior to the sanitize step (Step 8), we will need to conduct a disinfection step on all surfaces by following the label instruction on the existing sanitizer or using an alternative (peracetic acid for instance) if the label does not claim disinfection. Allow the required contact time.
- Following disinfection, all product contact surfaces will need to be thoroughly rinsed. The environment does not need to be rinsed – unless there is a risk of interaction with the sanitizer chemical to be used in the next sanitizing step.
- After required rinsing now proceed to the normal procedures for Step 8 – sanitizing at no rinse product contact concentrations.
- Collect, isolate and store all cleaning tools used in potentially infected areas for deep cleaning and sterilization. Launder or otherwise clean rain gear used by employees in contaminated areas. If rain gear cannot be adequately cleaned, then dispose and replace.

### **Dry Clean Only Production Areas:**

- Don PPE as above.
- Perform normal dry cleaning with extra emphasis on GENTLE brushing to minimize dusting.
- Remove as much powder and dust from the potentially infected areas by vacuuming with a HEPA filtered vacuum – do not use a centralized vacuum!
- Dispose of vacuum contents and HEPA filter in sealed bags. Remove vacuum cleaner and ancillary parts for deep cleaning and sterilization.
- Wipe down/mop with alcohol all high touch areas and any/all hard surfaces – including floors - that could have been potentially contaminated by the individual.
- Dispose of all wipes & mop heads in a sealed bag.
- May need to consider chlorine dioxide gassing of potentially contaminated dry clean only areas.

### **Follow up Cleaning & Sanitizing/Disinfecting:**

- After initial deep cleaning, follow up spraying/wiping of hard surfaces and mopping of floors with disinfectant should occur 2 -3 times per shift as being followed now. In production areas, high touch and potentially contaminated surfaces can also be wiped down – preferably with alcohol wipes – during production 2 – 3 times per shift.
- Continue until further notice.
- Also, the individual's personal belongings and plant PPE/gear should be cleaned and disinfected with alcohol wipes, and potentially bagged and chlorine dioxide gassed. Likewise, employees conducting cleaning and disinfecting tasks in the potentially contaminated areas should detail alcohol clean and disinfect their bump caps, radios, flashlights, other plant PPE/gear that might have been exposed.

Each situation in each plant will present unique challenges and opportunities that may require adjustment to these guidelines for procedures. Please contact Monty Bohanan and/or Don Northrup for discussion and with any questions as these events arise.

Here's the info I got back:

Leprino: Currently our Fort Morgan plant has about 25% of its workforce out. We hope to bring back a majority of those individuals over the weekend.

We are at 50% capacity and hope to get back to full capacity by Monday. We need some key skilled labor to be returned to work for that to happen.

Cargill: Have been back at 2 shifts for a couple of weeks, they are between 75-80% capacity, probably 80% staff have returned to work.

Let me know if you need anything else. Thanks! Trish

Hi Trish -

First - Thank you for all you are doing. You have been a true professional example in very difficult times!

I wanted to reach out regarding some industries in Morgan County, specifically Cargill and Leprino.

Do you know what percent of their workforce has returned to work? and What capacity are they running at?

I thought I would reach out to you first since I know you have somewhat of a connection with them. I am simply looking forward to long term planning and future supply chain questions from the state.

Thank you in advance.

Good afternoon Kristin and Ned,

We received your CORA request yesterday and I have to admit I was somewhat surprised. NCHD has been the recipient of funding from The Colorado Trust and I feel like we have a good working relationship. If there is specific data you are trying to find, I guess I would have thought you would have just called or emailed us. I tried calling you, Kristin, but it said that the mailbox was full. Your request was quite broad and our staff time is very limited at this time with COVID-19 response activities. Do you have a specific time frame for which you want the information? I am willing to do this via the CORA route if that is what you need at this time but I also need you to understand that I have to take staff away from essential public health activities (besides COVID-19) to accomplish this. I would welcome your call or email to discuss this. Thank you! Trish

Dear Mary,

This is a request under the Colorado Open Records Act. I write stories related to health for the website of The Colorado Trust, a health equity foundation. Our website reaches a statewide audience of around 15,000 people a month, and we distribute some

of our content to news organizations in the state in order to reach a broader audience. I am covering the COVID-19 crisis and am working on a story about how the meatpacking and dairy plants in the state responded to the crisis.

I would like to request all communication related to Cargill meat processing plant or Leprino dairy plant and any aspect of the coronavirus pandemic, between the Northeast Colorado Health Department and the following entities:

-Cargill or any of its staff or representatives

-Leprino or any of its staff or representatives

-any state agency or office

-Teamsters Local Union No. 455

The request includes all emails, letters, orders, Zoom call recordings or any other communication from or to the Northeast Colorado health department related to food processing operations and COVID-19.

Thank you for your assistance.

Best regards,

Krisn Jones

The Colorado Trust

Subject: Re: Cargill Questions  
I also like what Heather had to say:

*Agriculture is still an essential service, so they will not be asked to reduce by 50% per the new order from the governor. They should have some sort of guidance from USDA for the packing side of things. As far as the kitchen goes, they can do business for takeout. If employees order, and they want to allow them to eat at work, they should just practice social distancing. Stagger lunch hours, have people spaced out, clean tables between, eat in their cars or outside where they can space out nicely. I am not sure what it looks like over there to give other suggestions.*

We have heard about their cafeteria being full--we can certainly give suggestions.

Also, I would imagine that their cleaning is probably dictated by USDA which would be fine, wouldn't it Mel?

And if they have someone that is sick at work, I think putting a mask on them while they wait/social distancing is about as good as they can get.

I can do a call between 10-12 on Tuesday (3/24) or between 2-3:30. If that doesn't work we can look at Wednesday. T

On Mon, Mar 23, 2020 at 4:37 PM Tammy Hort RN, CIC <tammyh@nchd.org> wrote:

If there is an employee that tests positive, Cargill will be notified - need to know who the employee stands by on the fab line, etc.

I would like to know what will need to be done for the employee if 14 days of quarantine or isolation is required. NCHD cannot assist the employee with all the paperwork involved with short term disability PLUS it is highly unlikely the employee would be seen by a PCP.

Is there any way they can practice social distancing in the locker rooms and cafeteria?

Subject: Cargill Questions

To: [melb@nchd.org](mailto:melb@nchd.org) <[melb@nchd.org](mailto:melb@nchd.org)>

Good day Mr. Bustos –

Thanks for talking with me this morning, your time is valuable and I know you are very busy with all that is going on. Tyler Luft our General Manager, Gene Guerrero our EHS Manager and myself wanted to reach out with a few questions and get your expert opinion, guidance and thought on a few items. As an “essential business” in this community we want to maintain best practices and keeping all involved in daily operations safe.

1. If a employee were to test positive for COVID-19, would Cargill be notified and instructed to take further measures?
2. If a employee were to test positive for COVID-19, what is the Health Dept vs. Cargill's responsibility related to cleaning/disinfected; in addition to the efforts already in place at Cargill?
3. If there happen to be more than one employee that would require isolation until they are able to find transportation home, is it reasonable for those individuals to be seated in the same isolation room with appropriate PPE i.e. mask and social distancing?

These are a few of our questions. As we are able to talk I'm sure a few more will come to mind. This is all very new to all of us and I realize all the answers may not be right there, but it will be good to discuss and learn. Let me know when a good time will be to have a Skype call or Conference call. I know all are very busy, so its whenever you all have a moment.

*Best,*

**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)

Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,

Mary

wrote:

Hi,

I just tried to give you a quick call.

I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!

Lori Jane

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,

Mary

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

Here's the info I got back:

Leprino: Currently our Fort Morgan plant has about 25% of its workforce out. We hope to bring back a majority of those individuals over the weekend.

We are at 50% capacity and hope to get back to full capacity by Monday. We need some key skilled labor to be returned to work for that to happen.

Cargill: Have been back at 2 shifts for a couple of weeks, they are between 75-80% capacity, probably 80% staff have returned to work.

Let me know if you need anything else. Thanks! Trish

Hi Trish -

First - Thank you for all you are doing. You have been a true professional example in very difficult times!

I wanted to reach out regarding some industries in Morgan County, specifically Cargill and Leprino.

Do you know what percent of their workforce has returned to work? and What capacity are they running at?

I thought I would reach out to you first since I know you have somewhat of a connection with them. I am simply looking forward to long term planning and future supply chain questions from the state.

Thank you in advance.

Subject: Re: Industry Operations

Here's the info I got back:

Leprino: Currently our Fort Morgan plant has about 25% of its workforce out. We hope to bring back a majority of those individuals over the weekend.

We are at 50% capacity and hope to get back to full capacity by Monday. We need some key skilled labor to be returned to work for that to happen.

Cargill: Have been back at 2 shifts for a couple of weeks, they are between 75-80% capacity, probably 80% staff have returned to work.

Let me know if you need anything else. Thanks! Trish

Hi Trish -

First - Thank you for all you are doing. You have been a true professional example in very difficult times!

I wanted to reach out regarding some industries in Morgan County.  
specifically Cargill and Leprino.

Do you know what percent of their workforce has returned to work? and  
What capacity are they running at?

I thought I would reach out to you first since I know you have somewhat of a connection with them. I am simply looking forward to long term planning and future supply chain questions from the state.

Thank you in advance.

Hi Trish,

Good talking with you just now. As we discussed, I'd like to withdraw my CORA request and instead receive the open records related to Cargill, Leprino, Sterling prison and Eben Ezer care facility that were already requested by KDVR reporter Lori Jane Gliha.

Thank you for your help.

Best,

Krisn

Good afternoon Kristin and Ned,

We received your CORA request yesterday and I have to admit I was somewhat surprised. NCHD has been the recipient of funding from The Colorado Trust and I feel like we have a good working relationship. If there is specific data you are trying to find, I guess I would have thought you would have just called or emailed us. I tried calling you, Kristin, but it said that the mailbox was full. Your request was quite broad and our staff time is very limited at this time with COVID-19 response activities. Do you have a specific time frame for which you want the information? I am willing to do this via the CORA route if that is what you need at this time but I also need you to understand that I have to take staff away from essential public health activities (besides COVID-19) to accomplish this. I would welcome your call or email to discuss this. Thank you! Trish

**Subject:** CORA request  
**To:** [maryb@nchd.org](mailto:maryb@nchd.org) <[maryb@nchd.org](mailto:maryb@nchd.org)>

Dear Mary,

This is a request under the Colorado Open Records Act. I write stories related to health for the website of The Colorado Trust, a health equity foundation. Our website reaches a statewide audience of around 15,000 people a month, and we distribute some

of our content to news organizations in the state in order to reach a broader audience. I am covering the COVID-19 crisis and am working on a story about how the meatpacking and dairy plants in the state responded to the crisis.

I would like to request all communication related to Cargill meat processing plant or Leprino dairy plant and any aspect of the coronavirus pandemic, between the Northeast Colorado Health Department and the following entities:

-Cargill or any of its staff or representatives

-Leprino or any of its staff or representatives

-any state agency or office

-Teamsters Local Union No. 455

The request includes all emails, letters, orders, Zoom call recordings or any other communication from or to the Northeast Colorado health department related to food processing operations and COVID-19.

Thank you for your assistance.

Best regards,

Krisn Jones

Subject: RE: COVID-19 cases in Morgan County

Hi Trish,

I did receive confirmation from Cargill that they have positive COVID-19 cases linked to their processing facility in Fort Morgan. While the company did confirmation the presence of the virus, they wouldn't confirm the number of cases. Is that something NCHD is tracking? And if so, can you share that number?

Thanks much,

Luke

**Subject:** Re: COVID-19 cases in Morgan County

Good afternoon Luke,

My team and I have been working on a press release to discuss the increase in positive cases in Morgan County. At this point, one of the major factors is that there is more testing going on in Morgan County, thus we are seeing more positives. I did reach out to Cargill and part of their response is as follows:

*At Cargill, we've taken extra steps to focus on safety and remain operational – including temporary wage increases, bonuses and waiving co-pays for COVID-19 testing. We also implemented additional safety measures like temperature testing, enhanced cleaning and sanitizing, prohibiting visitors, Stopping international and domestic travel for employees, adopting social distancing practices where possible and offering staggered breaks and shift flexibility. Last week, in anticipation of the latest CDC guidance on use of face coverings, we began providing face coverings and encouraging use of face coverings for all employees, as a supplement to the many social distancing practices we've put into place.*

I've also copied Daniel Sullivan on this email as he is the Cargill Media Director for their Protein operations. He could give you more information on the plant in Fort Morgan. I've also copied Michelle and Mary, they are the Public Information Officers for NCHD and would be happy to make sure you are on our list for any press releases that we do. Thanks again for contacting us. Trish

Hi Trish,

My name is Luke Runyon, and I'm a reporter for KUNC, the NPR station for northern Colorado. I'm based in Fort Collins.

I'm trying to gather some more information on a recent spike of confirmed COVID-19 cases in Morgan County. I've done some reporting on the cases in Weld County tied to the JBS meatpacking plant in Greeley. Are you seeing cases among workers at the Cargill beef plant in Fort Morgan? If so, how many cases are there among the plant's workforce?

If you're able to talk about this let me know. We could do an interview via phone.

Best,

Luke

---

As the situation develops in Weld and Morgan County, here is a warning order for potential National Guard testing sites.

Weld County: potential testing on Tuesday for Community Corrections and jail. Approx 250-300 pax. Awaiting confirmation from Dr. Wallace, Weld County Dept Public Health & Environment Director. If it's a go, then need:

- 1) Location(s) - Weld
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - WCDPHE
- 4) Arrangements for security/traffic control - Weld/SEOC
- 5) PIO - Weld
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

Morgan County: potential testing of Cargill employees this week. Pax numbers unknown. Awaiting decision from Trish McClain, Northeast Colorado Health Department. If it's a go, then need:

- 1) Location(s) - Morgan
- 2) Test kit availability and pickup location/POC - CDPHE Lab
- 3) Protocols for who gets tested - NCHD/CDPHE
- 4) Arrangements for security/traffic control - Morgan/SEOC
- 5) PIO - Morgan
- 6) PPE - CONG/SEOC
- 7) Lodging - CONG/SEOC

CONG - BPT operate two sites simultaneously. Send feasibility of doing two and capacity at each if there are two to SEOC NLT Monday 1600

More to follow

MJW

We can accept it over the phone. I've cc'd Lily on here--she's our admin staff in our Fort Morgan office. She knows how to take the payment over the phone. You can reach Lily at 970-867-4918, x2230.

On Wed, May 6, 2020 at 10:55 AM Lori Jane Gliha wrote:

Shall I wait for the final total, or are you asking for it in advance?

Do you take credit card over the phone?

That would be most ideal.

**Date:** Fri, May 1, 2020 at 11:57 AM  
**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**To:** Lori Jane Gliha  
**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)

Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,

Mary

wrote:

Hi,

I just tried to give you a quick call.

I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!

Lori Jane

**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,  
Mary

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

# WELCOME TO YOUR LOCAL PUBLIC HEALTH CLINIC

We're excited to help you today. Because there are cases of COVID-19 in our area we're doing things a little bit differently.

We're asking everyone to wear a face mask.

We've moved some services over the phone so fewer people have to come inside the clinic.

We clean our lobby and exam rooms more frequently.

We're asking everyone questions about their health history.

My name is:

My phone number is:

## YOUR HEALTH HISTORY

Answer yes or no to the following questions about your health:

YES NO

Within the last two weeks (14 days), have you been contacted by your employer and told that you were exposed to a co-worker that has tested positive?

Within the last two weeks (14 days), have you been contacted by your doctor or the local health department and advised that you have tested positive for COVID-19?

Within the last two weeks (14 days), have you been asked to self-quarantine due to an exposure to COVID-19?

Have you been asked to stay at home from work because of any illness with cold or flu-like symptoms within the last two weeks?

Answer yes or no to the following questions about the health of someone you live with (spouse, roommate, family member, etc.):

YES NO

Within the last two weeks (14 days), has someone that you live with tested positive for COVID-19?

Within the last two weeks (14 days), has someone that you live with been asked to stay at home from work because of any illness that has cold or flu-like like symptoms?

Thanks for answering our questions.

SERVING LOGAN, MORGAN, PHILLIPS, SEDGWICK, WASHINGTON AND YUMA COUNTIES SINCE 1948

## BIENVENIDOS A SU CLÍNICA LOCAL DE SALUD PÚBLICA.

Estamos felices de ayudarte hoy.

Debido a que hay casos de COVID-19 en nuestro área, estamos haciendo las cosas un poco diferente.

Les pedimos a todos que usen una mascarilla.

Estamos brindando algunos servicios por teléfono para que menos personas tengan que entrar a la oficina.

Limpiamos la sala de espera y los cuartos de exámenes con más frecuencia.

Estamos preguntando a todos sobre su historia de salud.

Mi nombre es:

Mi numero de telefono es:

### SU HISTORIA DE SALUD

Contesta si o no a las siguientes preguntas sobre su salud:

SI NO

En las últimas dos semanas (14 días), ha sido contactado por su empleador y le dijo que estuvo expuesto a un compañero de trabajo que dio positivo por COVID-19?

En las últimas dos semanas (14 días), ha sido contactado por un doctor o el departamento de salud local y avisado que usted dio positivo por COVID-19?

En las últimas dos semanas (14 días), te han pedido que te pongas en cuarentena por una exposición a COVID-19?

Tu trabajo ha pedido a que te quedas en casa por alguna enfermedad que tenga síntomas como la influenza o resfrio en los últimos dos semanas?

Contesta si o no a las siguientes preguntas sobre la salud de personas que vive con usted (esposa/o, compañero de cuarto o familiares, etc.):

SI NO

En las últimas dos semanas (14 días), alguien que vive con usted dio positivo por COVID-19?

En las últimas dos semanas (14 días), le han pedido a alguien que vive con usted que no vaya al trabajo debido a algún enfermedad que tenga síntomas como influenza o resfrio?

Gracias por contestar nuestras preguntas.

# BUDGET TRANSPARENCY PLAN

Preparations for reductions in  
budgets for FY21

05.06.2020

## Background

**NCHD revenue comes from several sources** including government and non government programs and foundations.

We have received notification to **prepare for budget cuts**, specifically for programs funded from Colorado Department of Public Health and Environment.

Suggestions have been submitted to the state and we are **awaiting the final budget from the Joint Budget Committee** to be signed by Governor Polis.

## Organizational Priorities

As we prepare for budget cuts for FY21 it is important to understand that the **organization as a whole will be considered**.

Positions will not be eliminated solely based on a specific **reduction from the State**.

A series of decisions will be made by Directors and Supervisors **based on the following priorities**:

**#1 Maintain Core Public Health Services**

**#2 Retain Qualified Public Health Staff**

## Next Steps

Once we have a clear picture on the financial impact on the agency for all funding sources for FY21:

Managers, Directors, and Finance work together to **reduce non-salary line items** and establish what deficits still exist for salaries.

Determine feasibility of using reserves for salaries for **one fiscal year for affected programs**.

**Find creative solutions to retain** all currently employed NCHD Staff. For example, move staff to alternate positions.

**Create a set of standards** to reduce NCHD staffing and **offer comprehensive support** to help reduced staff find other employment (employment coaching, interviews during work hours, letters of recommendation, etc.).

**DAILY  
COOP  
GROUP**

**WEDNESDAY, MAY 6**

## RECORD KEEPING

**All** incoming calls from the public need to be tracked.

Complete one form per caller.

Whoever answers the client's question needs to mark it on the Public Inquiry Tracker (i.e. **the last person on the phone with the client**).

 **Link to the new Public Inquiry Tracker here.**

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Laura Bacon x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Christine Covelli x1236*

### Are we offering all our normal services?

*All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.*

### Vital Records:

- *Our staff will continue to process all vital records requests.*
- *We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.*
- *Allow for up to 72 hours for the record to be processed.*

### Environmental Health:

- *Water testing will continue as usual.*
- *Water and Septic Inspections related to loans will be coordinated on a case by case basis.*
- *Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.*

### Nursing Services:

- *Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:*
  - *Phillips County: May 12th, 2020 and June 16th, 2020.*
  - *Sedgwick County: May 7th, 2020 and June 25th, 2020.*
  - *Washington County: May 13th, 2020 and June 17th, 2020.*
- *In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.*
- *Nursing staff are assisting with COVID-19 case investigations.*

### WIC Services:

- *All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.*
- *Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.*

## **General Questions about COVID-19**

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### **Where can I get tested?**

*NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.*

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*

- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *All public and private gatherings are limited to no more than ten (10) individuals, which include Necessary Activities. Nothing prohibits the gathering of members living in the same residence.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 834 confirmed cases in northeast Colorado: 460 in Morgan County, 348 in Logan County, 10 in Yuma County, 7 in Phillips County, and 9 in Washington County. Death Counts: 2 in Logan County, and 22 in Morgan County (Current 1900, 5/7/2020). Count does not include pending cases. Logan County case count includes Department of Corrections.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/get-help-now>

#### **Call 2-1-1**

**Help Colorado Now Website:** <https://helpcoloradonow.org/> has links to many great services. One of the services listed is the Colorado COVID Relief Fund Application. The Colorado COVID Relief Fund's purpose is to raise and coordinate allocation of funds based on prevention, impact and recovery needs of community-based organizations in Colorado.

*This Fund is organized to ensure that the most acute community needs across the state are being addressed and that community voice is reflected in all funding decisions made over time. Through this Fund, eligible community-based organizations across Colorado may receive a general operating grant of up to \$25,000.*

### **What other resources are available for rural communities?**

*USDA and its Federal partners have programs that can be used to provide immediate and long-term assistance to rural communities affected by the COVID-19 outbreak. These programs can support recovery efforts for rural residents, businesses and communities through:*

- *technical, training, and management assistance;*
- *financial assistance; and*
- *state and local assistance.*

*The COVID-19 Federal Rural Resource Guide organizes funding opportunities identified in the CARES Act and other federal resources that can help support rural America. Opportunities are categorized by customer and assistance type. The Resource Guide can be found [here](#).*

### **What kinds of resources are available for Farmers & Ranchers?**

*Colorado funders have come together to create the **Colorado Farm & Food Systems Respond & Rebuild Fund** in response to urgent producer supply chain disruptions that are emerging in our communities as a result of the COVID-19 pandemic. This Fund will provide flexible resources to producers and entities working to support the needs of small and mid-sized producers (with 2019 gross cash farm income between \$1,000 and \$1 million) who are negatively impacted as a result of COVID-19. The Fund is designed to strengthen work already happening in our communities and to increase the capacity of local organizations to respond to emerging needs. Get more information [here](#).*

### **What resources are available for mental health services?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** *This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.*

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

**24/7 Crisis Hotlines:**

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## Complaints about Businesses Violating Public Health Orders

### How do I file a complaint about a business violating Public Health Orders?

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

*Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.*

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

*Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of*

COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### **When should we exclude children or staff?**

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### **How would I know if someone is infected?**

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### **I'm an essential worker and need help with childcare.**

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## **Workplaces & Businesses**

### **Reopening of Businesses (Safer at Home)**

A new **Safer at Home Business Resource Page** has been added to our website. **Businesses with questions can be referred [here](#) for the most up to date information.** CDPHE has also launched

**a Safer at Home webpage with a large amount of information and guidance materials. Access that page [here](#).**

**Numerous questions have emerged as the state entered the Safer-at-Home phase.**

The Amended Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Amended Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home have been phased in. Different changes went into effect on April 27, May 1, and May 4. Businesses Information from the Safer at Home rollout:

- Offices have reopened at 50% with reduced in-person staffing capacity with best practices being implemented to protect the health and safety of employees. Businesses were encouraged to allow employees to continue telecommuting at higher levels if possible. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).
- Retail businesses have phased-in public opening implementing strict compliance with mandatory Social Distancing Requirements.
- Real estate home showings resumed as of April 27th.
- Personal services opened May 1st implementing best practices and strict compliance with mandatory Social Distancing Requirements. Further details can be found in the Amended Public Health Order 20-28 [here](#).
- Amended Public Health Order 20-29 is in effect. Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), restarted in accordance with the priorities, requirements, and specific criteria outlined within the order. Further details can be found in the Public Health Order [here](#).

Businesses should continue:

- *Deep cleaning following guidance below*
- *Operating while following all guidelines within Public Health Orders*
- *Screening/monitoring staff health*

### **Cleaning Guidance for COVID-19**

*Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here:*

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

*See CDC's recommendations for household cleaning and disinfection here:*

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

*CDPHE also has cleaning guidance located at:*

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### **Masks**

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

*Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:*

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

***The Amended Public Health Order 20-28 Safer at Home also requires workers to wear face coverings.***

*All Business and Government Functions. Critical Businesses, Critical Government Functions, Non-Critical Office-Based Businesses, Personal Services, Limited Healthcare Settings, and Non-Critical Retail all have guidelines within the order asking for face coverings to be provided and worn in different settings. Please refer to the order [here](#) for the guidelines for each type of business.*

### **Branding & Cattle Operations Requiring a Group Setting**

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed on April 26. The plant remained closed for cleaning, and was reopened at partial capacity. Full capacity will resume once a full work staff is available.***

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)

Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,

Mary

Hi,

I just tried to give you a quick call.

I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!

Lori Jane

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

wrote:

Trish and Mary

Emailing for two reasons: checking in and letting you know I don't plan for proactive media outreach this weekend when we start back up. I do have a very brief reactive statement and will send that to you for your info when I get it approved.

Secondly, I wanted to thank you very much for the quote you provided the other day. Can we continue to use that if we have media follow ups (which I am assuming we will have when we start the plant back up) or would you be okay with a shorter version per your email below "Leprino's commitment to employee health and strategy is incredible" or would either be OK? Please let me know your preference.

Thanks very much! Kim

**Subject:** RE: FW: COVID Testing and Return to Work Protocols - Leprino Foods

We will be happy to share that with you.

We will be doing a PCR swab and blood draw at the same time as well as a finger prick for a couple of rapid tests that have the best data so far. We are using the last bit as an internal look/see for future broadscale testing. Personally I am still highly skeptical of the rapid IgG test kits but I may get surprised, these two have rock solid data on paper.

At any rate we will be able to provide clear comparison data of PCR (first test and test at 14 days) with the ELISA IgG test. And as a side benefit we will be able to see if we have a strong correlation with the ELISA gold standard and the rapid tests.

I will share all of that data with you.

Since this will become public in Morgan county I appreciate you support. Your past quote has been incredibly helpful with the media. We know we are operating way above and beyond in our approach but if we can be the 0.01% and give others a path forward we are all in. We are unique in having a captured population with detailed health history and the internal ability to provide a diverse set of testing over time.

Kind Regards,

Jason

Hi Jason,

I appreciate seeing the algorithm you've developed to get people back to work. I've heard mixed messages about IgG testing but I'm not as versed in it as Matt. I think your criteria of 14 days/no fever/ +IgG test are far more stringent than I have seen even in health care workers. Leprino's commitment to employee health and safety is incredible. NCHD supports you in your criteria. I'd be interested to see what kind of data you get from the IgG testing, purely from a numbers geek standpoint. Thank you and let me know if there's anything you need from us. Trish

## NCHD Operational Changes

### Do we still have the same operating hours?

*Fort Morgan, Yuma, and Sterling offices will remain open with typical operating hours. We will have clinical staff work in Akron, Julesburg, and Holyoke one day a month.*

*Fort Morgan, Yuma, and Sterling offices will close doors at 4:00 PM to allow all NCHD staff to participate in emergency response debriefings.*

### How do I contact NCHD staff?

*Our staff is available by phone and email even if they are remotely working. Questions about clinics and schedules call your local Public Health Nurse:*

- *Yuma and Holyoke: Kandi Jamison x3023*
- *Sterling: Laura Bacon x1236*
- *Fort Morgan: Christine Covelli x2236*
- *Akron: Christine Covelli x1236*

### Are we offering all our normal services?

*All visitors will be screened for COVID-19 symptoms and travel history when they arrive. Visitors will also be provided a mask if they do not bring one into the office. Visitors may be asked to reschedule their appointment or return at a later time if deemed necessary by the nurse.*

### Vital Records:

- *Our staff will continue to process all vital records requests.*
- *We are encouraging all families who need birth or death certificates to use the online option VitalChek on the NCHD website for Birth Certificates.*
- *Allow for up to 72 hours for the record to be processed.*

### Environmental Health:

- *Water testing will continue as usual.*
- *Water and Septic Inspections related to loans will be coordinated on a case by case basis.*
- *Environmental Health Staff are working to contact all restaurants to answer questions about the new public health order and to help facilities follow the order.*

### Nursing Services:

- *Nursing services will continue with limited hours in some counties. The following counties will be open one day per month:*
  - *Phillips County: May 12th, 2020 and June 16th, 2020.*
  - *Sedgwick County: May 7th, 2020 and June 25th, 2020.*
  - *Washington County: May 13th, 2020 and June 17th, 2020.*
- *In order to reduce the amount of traffic in our office and promote social distancing, we are implementing the use of telehealth services. Nursing staff will work with patients to conduct part of their appointment over the phone.*
- *Nursing staff are assisting with COVID-19 case investigations.*

### WIC Services:

- *All WIC services will continue. However, to reduce unnecessary travel and encourage social distancing, WIC staff will work with clients to conduct the appointment over the phone.*
- *Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.*

## **General Questions about COVID-19**

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### **Where can I get tested?**

*NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.*

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*

- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *Prohibit public gatherings of ten (10) persons or more in both public spaces and private commercial venues.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 688 confirmed cases in northeast Colorado. 385 in Morgan County, 282 in Logan County, 9 in Yuma County, 5 in Phillips County, and 7 in Washington County. (Current 1630, 4/29/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

#### **Call 2-1-1**

### What other resources are available for rural communities?

USDA and its Federal partners have programs that can be used to provide immediate and long-term assistance to rural communities affected by the COVID-19 outbreak. These programs can support recovery efforts for rural residents, businesses and communities through:

- technical, training, and management assistance;

- financial assistance; and
- state and local assistance.

The COVID-19 Federal Rural Resource Guide organizes funding opportunities identified in the CARES Act and other federal resources that can help support rural America. Opportunities are categorized by customer and assistance type. The Resource Guide can be found [here](#).

### What resources are available for mental health services?

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

### 24/7 Crisis Hotlines:

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## Complaints about Businesses Violating Public Health Orders

### How do I file a complaint about a business violating Public Health Orders?

Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>

Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.

If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.

Depending on the information taken, we may or may not contact them for further information.

## Childcare

### What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?

Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.

### What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?

Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.

### When should we exclude children or staff?

Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.

Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.

Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.

### How would I know if someone is infected?

Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.

### I'm an essential worker and need help with childcare.

The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.

Learn more at <https://covidchildcarecolorado.com/>

## Workplaces & Businesses

### Reopening of Businesses (Safer at Home)

**A new Safer at Home Business Resource Page has been added to our website. Businesses with questions can be referred [here](#) for the most up to date information. CDPHE has also launched a Safer at Home webpage with a large amount of information and guidance materials. Access that page [here](#).**

### **Numerous questions are emerging as the state enters the Safer-at-Home phase.**

The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home will be phased in, with different changes going into effect April 27, May 1, and May 4.

### **Friday, May 1**

Retail businesses can phase-in a public opening if they are implementing strict compliance with mandatory Social Distancing Requirements. Real estate home showings resumed as of April 27th. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).

Personal services can open if they are implementing best practices. Further details can be found in the Public Health Order [here](#).

Public Health Order 20-29: Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), may restart in accordance with the priorities, requirements, and specific criteria outlined within the order. Further details can be found in the Public Health Order [here](#).

### **Monday, May 4**

Offices can reopen at 50% reduced in-person staffing capacity, if best practices are being implemented to protect the health and safety of employees. Businesses are encouraged to allow employees to continue telecommuting at higher levels if possible.

In the meantime, non-critical businesses may begin to prepare for reopening by:

- Deep cleaning prior to reopening
- Planning how to operate while following social distancing guidelines
- Determining how to best screen/monitor staff's health

### **Cleaning Guidance for COVID-19**

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 [here](#):

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection [here](#):

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

## Masks

***The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.***

*Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:*

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

## Branding & Cattle Operations Requiring a Group Setting

*All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:*

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

*There is also a good branding document from the Nebraska Department of Agriculture:*

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

*Contact Cargill Medical with your questions.*

***How many confirmed cases of COVID-19 are at Cargill?***

*To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.*

***I want to register a formal complaint about Cargill?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## Concerns about Leprino Foods

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

*Contact Leprino with your questions.*

***How many confirmed cases of COVID-19 are at Leprino?***

*To protect privacy our agency does not disclose the city or workplace of positive cases.*

***I want to register a formal complaint about Leprino?***

*Log a formal complaint through NCHD website <https://www.nchd.org/compliance>*

*If you don't have a computer or smartphone, our staff can work through the form with you over the phone.*

## **General Questions about COVID-19**

CDC FAQ: <https://www.cdc.gov/coronavirus/2019-ncov/faq.html>

CDPHE FAQ: <https://covid19.colorado.gov/frequently-asked-questions-faq>

### **Where can I get tested?**

*NCHD does not have tests. You will need to contact your primary care provider to see if you are eligible for a test.*

- *CALL OR EMAIL a health care provider first. If the provider recommends you get testing or care, follow the provider's advice BEFORE going into any health facility. Ask your provider about private lab sites where you can get tested.*

- *DO NOT go to an emergency room to get a test for COVID-19 unless you are having a medical emergency. For COVID-19, that means severe respiratory symptoms such as shortness of breath or breathing difficulties.*
- *DO call 911 or go to an emergency room if you are having a medical emergency. Tell the dispatcher your symptoms.*

### **When will I get my test results?**

*The person who requested the test will receive the results. If your health care provider requested the test, that provider will receive your results and communicate those results to you.*

*Testing times will vary. While waiting for test results, individuals should stay at home. Those who receive positive test results may be issued isolation orders.*

***If you were tested in one of our 6 counties:*** Transfer to Tammy Hort at x1241

***If you tested at a Colorado Drive Up Location:*** Individuals will be contacted directly with their results as soon as possible. Do not call the state lab, the state health department, or a local public health agency to get your results.

### **How does the Safer at Home Order impact me?**

- *Individuals are advised to wear non-medical cloth face coverings that cover the nose and mouth whenever in public*
- *Individuals are ordered to limit:*
  - *Social interactions to the greatest extent possible except as required to conduct Necessary Activities; and*
  - *Essential Travel to within their county of residence or employment as much as possible and recreational travel to no further than ten (10) miles from their residence.*
- *All public and private gatherings are limited to no more than ten (10) individuals, which include Necessary Activities. Nothing prohibits the gathering of members living in the same residence.*
- *All Vulnerable Individuals should Stay at Home, except when necessary to provide, support, perform, or operate Necessary Activities, Minimum Basic Operations, Critical Government Functions, Necessary Travel, or Critical Businesses, provided that Vulnerable Individuals cannot be compelled to perform in-person work for any business or government function, including a Critical Business or Critical Government Function. Vulnerable Individuals includes:*
  - *Individuals who are 65 years and older*
  - *Individuals with chronic lung disease or moderate to severe asthma*
  - *Individuals who have serious heart conditions*
  - *Individuals who are immunocompromised*
  - *Pregnant women; and*
  - *Individuals determined to be high risk by a licensed healthcare provider.*
- *All individuals who are sick or who test positive for COVID-19 are directed to Stay at Home except as necessary to care for themselves or seek medical care.*

## PPE Requests

### Where can we request more PPE and supplies for our local healthcare facility?

**Healthcare workers:** All requests for PPE need to go through NCHD's Logistics Section. Transfer caller to Logistics Section x1225.

**Critical Businesses:** NCHD does not have the capability to supply PPE to critical businesses. Workers may make or buy a cloth covering that will cover their mouth and nose. Scarves and bandanas will work as coverings.

## COVID-19 in the Northeast Region

### How common is COVID-19 in the US? Colorado? My County?

CDPHE's Website has the most up to date information for this rapidly changing situation.

We currently have 752 confirmed cases in northeast Colorado. 434 in Morgan County, 294 in Logan County, 9 in Yuma County, 6 in Phillips County, and 9 in Washington County. (Current 1630, 5/5/2020) Count does not include pending cases.

### How can I help in my community?

If interested in being a volunteer, or volunteer leader in your community, You can sign up to volunteer at <https://coloradoresponds.communityos.org/volunteer-registration>. If a volunteer need is identified, you will be contacted to utilize your skills.

## Public Assistance Information and Resources

### Where can I go if I need help with rent, food resources, healthcare, or other financial help?

#### **OnwardCO:**

Have you lost your job? OnwardCO is a one-stop resource for the people of Colorado impacted by job loss during the COVID-19 Pandemic <https://onwardco.org/>

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/get-help-now>

#### **Call 2-1-1**

**Help Colorado Now Website:** <https://helpcoloradonow.org/> has links to many great services. One of the services listed is the Colorado COVID Relief Fund Application. The Colorado COVID Relief Fund's purpose is to raise and coordinate allocation of funds based on prevention, impact and recovery needs of community-based organizations in Colorado.

*This Fund is organized to ensure that the most acute community needs across the state are being addressed and that community voice is reflected in all funding decisions made over time. Through this Fund, eligible community-based organizations across Colorado may receive a general operating grant of up to \$25,000.*

### **What other resources are available for rural communities?**

*USDA and its Federal partners have programs that can be used to provide immediate and long-term assistance to rural communities affected by the COVID-19 outbreak. These programs can support recovery efforts for rural residents, businesses and communities through:*

- *technical, training, and management assistance;*
- *financial assistance; and*
- *state and local assistance.*

*The COVID-19 Federal Rural Resource Guide organizes funding opportunities identified in the CARES Act and other federal resources that can help support rural America. Opportunities are categorized by customer and assistance type. The Resource Guide can be found [here](#).*

### **What kinds of resources are available for Farmers & Ranchers?**

*Colorado funders have come together to create the **Colorado Farm & Food Systems Respond & Rebuild Fund** in response to urgent producer supply chain disruptions that are emerging in our communities as a result of the COVID-19 pandemic. This Fund will provide flexible resources to producers and entities working to support the needs of small and mid-sized producers (with 2019 gross cash farm income between \$1,000 and \$1 million) who are negatively impacted as a result of COVID-19. The Fund is designed to strengthen work already happening in our communities and to increase the capacity of local organizations to respond to emerging needs. Get more information [here](#).*

### **What resources are available for mental health services?**

**CO Get Help Now Website:** <https://stayathomeco.colorado.gov/>

**Centennial Mental Health Free Community Support Line:** *This non-emergent support line provides emotional support and resources to individuals who are struggling with the effects of COVID-19. Call during business hours at the local Centennial office number, and a support team member will be available to direct your call.*

**Logan County** (970) 522-4392

**Morgan County** (970) 867-4924

**Phillips County** (970) 854-2114

**Sedgwick County** (970) 474-3769

**Washington County** (970) 345-2254

**Yuma County - Wray** (970) 332-3133

**Yuma County - Yuma** (970) 848-5412

## **24/7 Crisis Hotlines:**

**National Suicide Prevention Lifeline Network:** [www.suicidepreventionlifeline.org](http://www.suicidepreventionlifeline.org)

1-800-273-TALK (8255) (Veterans, press 1)

**Crisis Text Line:** Text TALK to 741-741 to text with a trained crisis counselor from the Crisis Text Line for free, 24/7

## **Complaints about Businesses Violating Public Health Orders**

### **How do I file a complaint about a business violating Public Health Orders?**

*Businesses are part of the solution as our communities practice social distancing. If a business is engaging in dangerous conduct, or if an individual is violating the Stay in Place Order, a complaint may be filed on our website at: <https://www.nchd.org/compliance>*

*Once completed, an email is sent to the person filing the complaint to let them know that we will be looking into their complaint.*

*If the caller does not have access to a computer or a smartphone. NCHD staff will describe the information on the page, and will complete the form on their behalf.*

*Depending on the information taken, we may or may not contact them for further information.*

## **Childcare**

### **What actions can staff and students take to prevent the spread of COVID-19 in my school/childcare program?**

*Encourage students and staff to take everyday preventive actions to prevent the spread of respiratory illnesses, such as staying home when sick; appropriately covering coughs and sneezes; cleaning frequently touched surfaces; and washing hands often with soap and water. If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water when your hands are visibly dirty. Remember to supervise young children when they use hand sanitizer to prevent swallowing alcohol, especially in childcare facilities. Hand sanitizers may only be used for staff and children three years of age or older, and only at times when hand washing facilities are not available per the Colorado Child Care Regulations. Child care facilities should limit group size to 10 children, keeping a distance of 3 to 6 feet as much as possible and not mixing groups of children. If napping mats are used: Children should be kept at least 6 feet apart if possible and mats should be disinfected after each use.*

### **What actions should my childcare facility take if a sick child or staff member attended school before being confirmed as a COVID-19 case?**

*Child care providers and preschools not operated by P-12 schools need to work with the local health department to determine whether it is safe to continue operations. If there is a positive or suspected case of COVID-19 in a student, parent of a student, or staff member at the child care or preschool facility, the facility*

*must work in partnership with the local health department on whether to close the facility or the affected portion of the facility. The facility or affected portion shall close for no less than twenty-four (24) hours, and implement protocol for responding to COVID-19 pursuant to CDPHE guidance and in partnership with the local health department.*

### **When should we exclude children or staff?**

*Children and staff should be assessed for signs of illness when they arrive and frequently throughout the day. Providers should also ask about potential exposures, particularly signs of illness consistent with COVID-19 in parents, guardians and other household members of children and staff.*

*Exclude children/students/staff with fever AND respiratory symptoms from child care/school/work until at least 24 hours after they no longer have a fever or signs of a fever (chills, feeling very warm, flushed appearance, or sweating) without the use of fever-reducing medicine.*

*Children and staff that have symptoms or known exposures to persons who have tested positive for COVID-19 must be isolated. Children and staff should stay home if they are ill and be sent home if they develop symptoms while in care. If a child cannot be picked up right away, they should be isolated from other children while staff continue to supervise them. According to the Governor's Executive Order D 2020 007 facilities with a single case of COVID-19 in a staff member, child or parent of a child in attendance must close for at least 72 hours. Closures should be reported to your licensing specialist and your local health department or CDPHE.*

### **How would I know if someone is infected?**

*Public Health will be notified about any positive cases. If we are aware of any cases in your school we will notify you and work with your school to address the situation.*

### **I'm an essential worker and need help with childcare.**

*The state will extend a full tuition credit to all essential workers identified in Updated Public Health Order 20-24 issued by the Colorado Department of Public Health and Environment. This 100% tuition credit will provide child care to all essential workers until May 17, 2020. The program is aimed at serving families in need of child care in order to continue to perform their critical duties. Parents who have options to keep their children at home with a family member or have other arrangements are encouraged to use those. Emergency child care provided through the Collaborative is for when all other non-group care settings have been exhausted and families have no other options.*

*Learn more at <https://covidchildcarecolorado.com/>*

## **Workplaces & Businesses**

### **Reopening of Businesses (Safer at Home)**

***A new Safer at Home Business Resource Page has been added to our website. Businesses with questions can be referred [here](#) for the most up to date information. CDPHE has also launched a Safer at Home webpage with a large amount of information and guidance materials. Access that page [here](#).***

**Numerous questions have emerged as the state entered the Safer-at-Home phase.**

The Safer at Home Public Health Order 20-28 outlines a new level in Colorado's response to the COVID-19 pandemic. This includes a more sustainable way of living for Coloradans while slowing the spread of the virus and allowing more Coloradans to return to work. The Public Health Order is in effect until 11:59 p.m. on May 26, 2020, but can be amended or extended at any time. Read the Safer at Home Public Health Order [here](#). No county specific guidance has been approved by the State of Colorado at this time. All items outlined in the Safer at Home Order must be followed.

A number of counties are developing plans to submit to CDPHE requesting variances to some of the specific restrictions outlined in the new Public Health Order. All aspects of the state order are in effect statewide unless/until a specific county has their variance request and plan approved by CDPHE. As soon as any of these are approved, we will post more information on our website at <https://www.nchd.org/co>.

Individuals should continue staying home as much as possible, and the Executive Order directs vulnerable populations, including seniors, to continue staying home, only leaving when absolutely necessary.

Changes happening during Safer at Home have been phased in. Different changes went into effect on April 27, May 1, and May 4. Businesses Information from the Safer at Home rollout:

- Offices have reopened at 50% with reduced in-person staffing capacity with best practices being implemented to protect the health and safety of employees. Businesses were encouraged to allow employees to continue telecommuting at higher levels if possible. Businesses are being asked to complete a Business Social Distancing Protocol. We are asking that it is filled out, the requirements are met, and that a copy is sent to us and posted on site. You can find the Protocol [here](#).
- Retail businesses have phased-in public opening implementing strict compliance with mandatory Social Distancing Requirements.
- Real estate home showings resumed as of April 27th.
- Personal services opened May 1st implementing best practices and strict compliance with mandatory Social Distancing Requirements. Further details can be found in Public Health Order 20-28 [here](#).
- Public Health Order 20-29 is in effect. Voluntary or Elective Surgeries or Procedures at Medical, Dental, and Veterinary settings, including healthcare facilities, offices or practices, surgical centers, hospitals, or any other healthcare setting (Facilities or Facility), restarted in accordance with the priorities, requirements, and specific criteria outlined within the order. Further details can be found in the Public Health Order [here](#).

Businesses should continue:

- Deep cleaning following guidance below
- Operating while following all guidelines within Public Health Orders

- Screening/monitoring staff health

### Cleaning Guidance for COVID-19

Clean and disinfect frequently touched surfaces such as tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks. If surfaces are dirty, clean them using detergent or soap and water prior to disinfection. To disinfect, use an EPA-registered household disinfectant effective against SARS-CoV-2 by following the manufacturer's instructions. See EPA's list of Disinfectants for Use Against SARS-CoV-2 here:

<https://www.epa.gov/pesticide-registration/list-n-disinfectants-use-against-sars-cov-2>

See CDC's recommendations for household cleaning and disinfection here:

<https://www.cdc.gov/coronavirus/2019-ncov/prevent-getting-sick/disinfecting-your-home.html>

CDPHE also has cleaning guidance located at:

<https://drive.google.com/file/d/1XQnjAL2nzdPnb7Dabz7-fX8Pw7XlyUe8/view>

### Masks

**The State issued an order requiring workers in Critical Businesses and Critical Government Functions to Wear Non-Medical Face Coverings on April 17th. It will expire thirty (30) days from April 17, 2020, unless extended further by Executive Order.**

Workers in Critical Businesses and Critical Government Function (outlined in PHO 20-24, as amended) where workers interact in close proximity with other employees or with the public have been ordered to wear medical or non-medical cloth face coverings that cover the nose and mouth while working (except where doing so would inhibit that individual's health) and; To the extent possible, wear gloves when in contact with customers or goods if gloves are provided to workers by their employer. Glove use has not been mandated at this time. To read the full order visit:

<https://www.colorado.gov/governor/sites/default/files/inline-files/D%202020%20039%20Masks.pdf>

**Public Health Order 20-28 Safer at Home also requires workers to wear face coverings.**

All Business and Government Functions. Critical Businesses, Critical Government Functions, Non-Critical Office-Based Businesses, Personal Services, Limited Healthcare Settings, and Non-Critical Retail all have guidelines within the order asking for face coverings to be provided and worn in different settings. Please refer to the order [here](#) for the guidelines for each type of business.

### Branding & Cattle Operations Requiring a Group Setting

All questions regarding cattle operations can be referred to the Department of Agriculture at: (303) 869-9000 or the Colorado Livestock Association at: (970) 378-0500. Colorado Livestock Association has a lot of good information on operations during COVID19 on their website at:

<https://coloradolivestock.org/cattle-processing-in-an-unusual-year-recommendations-to-prevent-covid-19-transmission/>

There is also a good branding document from the Nebraska Department of Agriculture:

<https://nda.nebraska.gov/COVID-19/BrandingGuidance.jpg>

## Cargill and Leprino Foods

### Concerns about Cargill

***I think I was exposed to COVID-19 at work.***

Contact Cargill Medical with your questions.

***How many confirmed cases of COVID-19 are at Cargill?***

To protect privacy our agency does not disclose the city or workplace of positive cases. Cargill is actively notifying all staff who may have contact with sick staff. They will notify you directly if you may have been exposed during work hours.

***I want to register a formal complaint about Cargill?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

### Concerns about Leprino Foods

***As a result of proactive testing and the high number of positive results, including those with no symptoms (asymptomatic), the plant was closed beginning Sunday, April 26. The plant will remain closed for a minimum of five days, at which time they will reevaluate and determine next steps.***

***I think I was exposed to COVID-19 at work.***

Contact Leprino with your questions.

***How many confirmed cases of COVID-19 are at Leprino?***

To protect privacy our agency does not disclose the city or workplace of positive cases.

***I want to register a formal complaint about Leprino?***

Log a formal complaint through NCHD website <https://www.nchd.org/compliance>

If you don't have a computer or smartphone, our staff can work through the form with you over the phone.

Hi Jason,

Thanks so much for all your work with the line lists/outbreak forms. You had mentioned yesterday that your team might have some bandwidth to help with case investigations for Leprino employees. I would like to take you up on that. I've attached the form that we would need completed for each positive employee. The Employment Information doesn't need to be completed as we already know where they work. Tammy has talked to a few employees at the beginning of the outbreak so some of the early ones are probably done--if your staff could ask if the employee has already talked to a nurse from NCHD, that would be great--if they have, the form notes can reflect that and just send it back to us.

Forms can be faxed to me at 970-867-0878 or sent via secure email.

The form is a fillable PDF but legible handwriting is also acceptable. Don't worry about the second page for contact tracing. I hope this makes sense. If you need further clarification, please let me know. Thanks again for your help, please let me know if you need anything from us. Trish

[Graph Ideas.pdf](#)

---

Hi All,

I've attached some initial data and graphs I've been working with so you can see where I'm at. I just learned how to run reports in CEDRS yesterday, so definitely a work in progress. I've also jotted down some thoughts about the type of information we may want to include on the website. I downloaded a free trial of Tableau (data dashboard) this morning too, so that might be something we can use in the future.

Some of the data is relatively easy to pull from CEDRS (i.e. total numbers per county by age/sex), but the more we break it down (i.e. Outbreak vs. Community) it becomes more complicated and manual (until data collection/entry into CEDRS becomes more standardized). My hope is to be able to figure out what data we want to include on the website and come up with an "easy" way to run these reports regularly.

Any and all feedback is welcome!

Shanna

**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**To:** Lori Jane Gliha  
**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)

Yes, we are in contact with Leprino Foods and we have verified that they are following all the

CDC guidelines.

Thanks,

Mary

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,

Mary

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

On Mon, May 4, 2020 at 4:30 PM Turpin - CDPHE, Bradley <[bradley.turpin@state.co.us](mailto:bradley.turpin@state.co.us)> wrote:

Good afternoon everyone,

I just got home from touring the Fort Morgan facility. Trish and I had a good meeting with Jason Eckert and the plant manager David. We were able to see their plan in action. We asked numerous questions and both individuals were very forthcoming. Since some in the group had sent me questions individually, I will address them below. All in all, Trish and I were very impressed and feel the facility is taking this very seriously. What we saw is happening in all facilities. Matthew, he mentioned we could take the same tour at their Greeley location if you were interested.

1. Shift transition & breaks: The facility has staggered start times for all employees so a line is not formed trying to get in. Everyone entering dons a mask, utilizes hand sanitizer, and has their temperature taken. Once in, they may have a little backlog at their locker rooms, but they limit it to 3 people max in the changing area. Those waiting outside the locker room stand on markers spaced 6' apart.
2. Masks: At a minimum, everyone is to at least wear a surgical style mask. They may bring their own mask or N-95s are supplied to high risk individuals: those working in areas where 6' separation is difficult.
3. 6' distancing and packing: The most congested areas Trish and I observed were the control rooms and a cheese packing line. For these areas, the workers don N-95 masks. In the control room, they limit the number of people to two at all times. For the cheese packers, they have installed plastic shields between the workstations. There is also hand sanitizer at each station, which was a normal practice before COVID.
4. Languages: The ability to speak, read, and write English is a condition of employment at Leprino. They recognize individuals do speak other languages but do not need to provide education in other languages.

As for the document we compiled over the weekend, Jason had a few questions:

1. The outbreak reporting form looks to be specific to LTCFs. Emily has confirmed this is the correct form. This is the reason we have yet to receive it. You only need it for the Denver facility, correct?
2. Line list: the document we linked also looked specific to LTCF. Should he proceed and complete any pertinent section? Is this needed only for the Denver site? I wrote for us to receive this every Friday. Is that adequate?

3. Serology testing: He understands our concerns. Quest is using a test recognized under the EUA from FDA. It is Jason's understanding this information will need to be reported to CDPHE. He is wondering how we would like to receive this information? They will begin this testing next Monday, so would like an answer ASAP. They will be testing approximately 200 employees, from all Colorado facilities, as I understand.

Lastly, I am not sure who all this needs to be communicated to. If someone is not on this email list and needs to be, let me know. Otherwise feel free to distribute these updates to staff within your agencies/division that need it.

Thank you everyone! Please respond to any questions ASAP so I can pass those on to Jason

Trish and Mary

Emailing for two reasons: checking in and letting you know I don't plan for proactive media outreach this weekend when we start back up. I do have a very brief reactive statement and will send that to you for your info when I get it approved.

Secondly, I wanted to thank you very much for the quote you provided the other day. Can we continue to use that if we have media follow ups (which I am assuming we will have when we start the plant back up) or would you be okay with a shorter version per your email below "Leprino's commitment to employee health and strategy is incredible" or would either be OK? Please let me know your preference.

Thanks very much! Kim

**Subject:** RE: FW: COVID Testing and Return to Work Protocols - Leprino Foods

We will be happy to share that with you.

We will be doing a PCR swab and blood draw at the same time as well as a finger prick for a couple of rapid tests that have the best data so far. We are using the last bit as an internal look/see for future broadscale testing. Personally I am still highly skeptical of the rapid IgG test kits but I may get surprised, these two have rock solid data on paper.

At any rate we will be able to provide clear comparison data of PCR (first test and test at 14 days) with the ELISA IgG test. And as a side benefit we will be able to see if we have a strong correlation with the ELISA gold standard and the rapid tests.

I will share all of that data with you.

Since this will become public in Morgan county I appreciate you support. Your past quote has been incredibly helpful with the media. We know we are operating way above and beyond in our approach but if we can be the 0.01% and give others a path forward we are all in. We are unique in having a captured population with detailed health history and the internal ability to provide a diverse

set of testing over time.

Kind Regards,

Jason

Hi Jason,

I appreciate seeing the algorithm you've developed to get people back to work. I've heard mixed messages about IgG testing but I'm not as versed in it as Matt. I think your criteria of 14 days/no fever/ +IgG test are far more stringent than I have seen even in health care workers. **Leprino's commitment to employee health and safety is incredible.** NCHD supports you in your criteria. I'd be interested to see what kind of data you get from the IgG testing, purely from a numbers geek standpoint. Thank you and let me know if there's anything you need from us. Trish

**Date:** Friday, May 01, 2020 11:37:09 AM

---

Hello,

We are currently investigating a 3rd Leprino location that might be an outbreak at their Denver Headquarter/Lab. We have cases that span across 5 jurisdictions and facilities across 3 jurisdictions. So in order to streamline communications with Leprino, CDPHE will take the lead moving forward with this outbreak. We have designated Brad Turpin from CDPHE to be the main point of contact with Leprino since he has a good working relationship with them already established from the food safety program.

We understand that the Fort Morgan facility has plans of reopening on Sunday, however, we would like to provide them some public health recommendations for reopening. The CDPHE COVID industry team is putting together a document to outline these recommendations for reopening. Once we complete them, we'll send them to NE for review with the goal of providing the recommendations by tomorrow.

-Amanda

Brad,

Thank you for the conversation today and thank you for taking lead at a State level. Please find attached our Safer at Work plan which includes a number of supporting documents and pictures for your review.

As discussed we will be restarting Fort Morgan this Sunday (receiving milk tomorrow).

I am copying Trish and Matt as they have been side by side with us the past several weeks.

Kind Regards,

Jason

**Date:** Monday, May 04, 2020 4:30:25 PM

---

Good afternoon everyone,

I just got home from touring the Fort Morgan facility. Trish and I had a good meeting with Jason Eckert and the plant manager David. We were able to see their plan in action. We asked numerous questions and both individuals were very forthcoming. Since some in the group had sent me questions individually, I will address them below. All in all, Trish and I were very impressed and feel the facility is taking this very seriously. What we saw is happening in all facilities. Matthew, he mentioned we could take the same tour at their Greeley location if you were interested.

1. Shift transition & breaks: The facility has staggered start times for all employees so a line is not formed trying to get in. Everyone entering dons a mask, utilizes hand sanitizer, and has their temperature taken. Once in, they may have a little backlog at their locker rooms, but they limit it to 3 people max in the changing area. Those waiting outside the locker room stand on markers spaced 6' apart.
2. Masks: At a minimum, everyone is to at least wear a surgical style mask. They may bring their own mask or N-95s are supplied to high risk individuals: those working in areas where 6' separation is difficult.
3. 6' distancing and packing: The most congested areas Trish and I observed were the control rooms and a cheese packing line. For these areas, the workers don N-95 masks. In the control room, they limit the number of people to two at all times. For the cheese packers, they have installed plastic shields between the workstations. There is also hand sanitizer at each station, which was a normal practice before COVID.
4. Languages: The ability to speak, read, and write English is a condition of employment at Leprino. They recognize individuals do speak other languages but do not need to provide education in other languages.

As for the document we compiled over the weekend, Jason had a few questions:

1. The outbreak reporting form looks to be specific to LTCFs. Emily has confirmed this is the correct form. This is the reason we have yet to receive it. You only need it for the Denver facility, correct?
2. Line list: the document we linked also looked specific to LTCF. Should he proceed and complete any pertinent section? Is this needed only for the Denver site? I wrote for us to receive this every Friday. Is that adequate?
3. Serology testing: He understands our concerns. Quest is using a test recognized under the EUA from FDA. It is Jason's understanding this information will need to be reported to CDPHE. He is wondering how we would like to receive this information? They will begin this testing next Monday, so would like an answer ASAP. They will be testing approximately 200 employees, from all Colorado facilities, as I understand.

Lastly, I am not sure who all this needs to be communicated to. If someone is not on this email list and needs to be, let me know. Otherwise feel free to distribute these updates to staff within your agencies/division that need it.

Thank you everyone! Please respond to any questions ASAP so I can pass those on to Jason

They would like to have some type of pay for testing arrangement for contractors that didn't get tested when they tested all of their employees. Would EMCH be willing to do that and if so, who should I direct them to? thanks! Trish

On Tue, May 5, 2020 at 4:20 PM Trish McClain <[trishm@nchd.org](mailto:trishm@nchd.org)> wrote:

Amanda,

Tammy and I talked about this and here are our thoughts:

Tammy: I am going to request that no updates to the website occur until I have a chance to discuss this line list with the medical manager. What is in CEDRS are those individuals identified via investigation; we did not investigate this line list. I do not know what is included in "symptomatic" and I have an idea of what "Dr. Order" may mean via conversations.

There are many questions that are not answered and we cannot make assumptions. It is very important to our agency that we maintain and protect the relationships we have with all of our facilities. These same facilities provide us with these list knowing and expecting that we will be a good steward of the information and apply what is known vs. what is not known or can be verified.

I know you understand

Trish: Please wait until we have this clarified with Cargill. I would ask you not to update your website with the 411 because that is not accurate. Cargill has been very liberal with who they send home or exclude. We don't count people who are quarantined as positive. Because not all of them are confirmed positive cases, this will cause all sorts of issues with our actual county count, not to mention panic in the county. Presumptives should NOT be the majority of our cases. We need to go by what is in CEDRS, which is what we know is accurate. More testing is occurring and I believe Cargill wanted to be able to test any symptomatic employee. They aren't there yet but are working toward that.

Thanks Amanda for working with us on this. Trish and Tammy

---

Amanda,

Tammy and I talked about this and here are our thoughts:

Tammy: I am going to request that no updates to the website occur until I have a chance to discuss this line list with the medical manager. What is in CEDRS are those individuals identified via investigation; we did not investigate this line list. I do not know what is included in "symptomatic" and I have an idea of what "Dr. Order" may mean via conversations.

There are many questions that are not answered and we cannot make assumptions. It is very important to our agency that we maintain and protect the relationships we have with all of our facilities. These same facilities provide us with these list knowing and expecting that we will be a good steward of the information and apply what is known vs. what is not known or can be verified.

I know you understand

Trish: Please wait until we have this clarified with Cargill. I would ask you not to update your website with the 411 because that is not accurate. Cargill has been very liberal with who they send home or exclude. We don't count people who are quarantined as positive. Because not all of them are confirmed positive cases, this will cause all sorts of issues with our actual county count, not to mention panic in the county. Presumptives should NOT be the majority of our cases. We need to go by what is in CEDRS, which is what we know is accurate. More testing is occurring and I believe Cargill wanted to be able to test any symptomatic employee. They aren't there yet but are working toward that.

Thanks Amanda for working with us on this. Trish and Tammy

Amanda,

Tammy and I talked about this and here are our thoughts:

Tammy: I am going to request that no updates to the website occur until I have a chance to discuss this line list with the medical manager. What is in CEDRS are those individuals identified via investigation; we did not investigate this line list. I do not know what is included in "symptomatic" and I have an idea of what "Dr. Order" may mean via conversations.

There are many questions that are not answered and we cannot make assumptions. It is very important to our agency that we maintain and protect the relationships we have with all of our facilities. These same facilities provide us with these list knowing and expecting that we will be a good steward of the information and apply what is known vs. what is not known or can be verified.

I know you understand

Trish: Please wait until we have this clarified with Cargill. I would ask you not to update your website with the 411 because that is not accurate. Cargill has been very liberal with who they send home or exclude. We don't count people who are quarantined as positive. Because not all of them are confirmed positive cases, this will cause all sorts of issues with our actual county count, not to mention panic in the county. Presumptives should NOT be the majority of our cases. We need to go by what is in CEDRS, which is what we know is accurate. More testing is occurring and I believe Cargill wanted to be able to test any symptomatic employee. They aren't there yet but are working toward that.

Thanks Amanda for working with us on this. Trish and Tammy

**Subject:** Case investigation

Hi Jason,

Thanks so much for all your work with the line lists/outbreak forms. You had mentioned yesterday that your team might have some bandwidth to help with case investigations for Leprino employees. I would like to take you up on that. I've attached the form that we would need completed for each positive employee. The Employment Information doesn't need to be completed as we already know where they work. Tammy has talked to a few employees at the beginning of the outbreak so some of the early ones are probably done--if your staff could ask if the employee has already talked to a nurse from NCHD, that would be great--if they have, the form notes can reflect that and just send it back to us.

Forms can be faxed to me at 970-867-0878 or sent via secure email.

The form is a fillable PDF but legible handwriting is also acceptable. Don't worry about the second page for contact tracing. I hope this makes sense. If you need further clarification, please let me know. Thanks again for your help, please let me know if you need anything from us. Trish

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nhd.org](mailto:maryb@nhd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation

that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**To:** Lori Jane Gliha  
**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)

Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,

Mary

wrote:

Hi,

I just tried to give you a quick call.

I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!

Lori Jane

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Hi,

I just tried to give you a quick call.

I have a few more questions:

what is the date of that report? Or - when was it sent to CDPHE?

- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!

Lori Jane

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,

Mary

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Subject: CORA: Sterling Correctional, Eben Ezer,

To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,  
Lori Jane Gliha

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.  
Sincerely,  
Lori Jane Gliha  
303-817-3177 (c)

**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)  
Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,  
Mary

We can accept it over the phone. I've cc'd Lily on here--she's our admin staff in our Fort Morgan office. She knows how to take the payment over the phone. You can reach Lily at 970-867-4918, x2230.

Shall I wait for the final total, or are you asking for it in advance?

Do you take credit card over the phone?

That would be most ideal.

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the

dates March 17 and April 30, 2020.

- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.  
Sincerely,  
Lori Jane Gliha

----- Forwarded message -----

From: **Lori Jane Gliha**

Date: Fri, May 1, 2020 at 11:57 AM

Subject: CORA: Sterling Correctional, Eben Ezer,

To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,  
Lori Jane Gliha

**Sent:** Monday, April 20, 2020 3:09 PM  
**To:** Lori Jane Gliha  
**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)  
Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,  
Mary

Hi,  
I just tried to give you a quick call.  
I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!  
Lori Jane

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,  
Mary

Hi Lori,

Thank you for the email and your call. I am communicating with Trish McClain on your request. She or I will get back to you shortly.

Thanks again,  
Mary

On Mon, Apr 20, 2020 at 11:18 AM Lori Jane Gliha wrote:

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

**Date:** Fri, May 1, 2020 at 11:57 AM  
**Subject:** CORA: Sterling Correctional, Eben Ezer,  
**To:** Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nhd.org](mailto:maryb@nhd.org)>

Hi Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation

that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.

Sincerely,

Lori Jane Gliha

**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)

Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,

Mary

Hi,

I just tried to give you a quick call.

I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!

Lori Jane

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,

Mary

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Just got this

----- Forwarded message -----

From: **Lori Jane Gliha** >  
Date: Fri, May 1, 2020 at 11:57 AM  
Subject: CORA: Sterling Correctional, Eben Ezer,  
To: Mary Brumage <[maryb@nchd.org](mailto:maryb@nchd.org)>

HI Mary,

Happy Friday!

I wanted to file a records request, and I was hoping, given the COVID19 situation, that you could accept this request electronically. If the online request form is important (I do not believe it is required under the law), please just staple this request to one of those sheets, as I will include all the pertinent information here.)

Please consider the below a request for records under CORA. Accept this as my affirmation that I will not be using these records for pecuniary gain. This is for a matter of public interest, as I am a journalist:

- All emails in which **Sterling Correctional Facility** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Leprino Foods** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Cargill and/or Cargill Meat Solutions** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.
- All emails in which **Eben Ezer Lutheran Care Center** is named (whether sent to or from the facility or to or from the state health department or internally) between and including the dates March 17 and April 30, 2020.

Please provide these records in their original form, electronically, rather than printed.

I appreciate your help.  
Sincerely,  
Lori Jane Gliha

**To:** Lori Jane Gliha  
**Subject:** Re: TODAY! PRESS RELEASE ABOUT CARGILL

Sorry, I am in the DOC and not at my desk today.

The report was sent on April 15, 2020. There are no other reports. NCHD was invited to tour the Cargill facility so that is what initiated this report. :0)  
Yes, we are in contact with Leprino Foods and we have verified that they are following all the CDC guidelines.

Thanks,  
Mary

Hi,  
I just tried to give you a quick call.  
I have a few more questions:

- what is the date of that report? Or - when was it sent to CDPHE?
- Do you have other reports/investigations that have been completed? If so, how do I see those?

Thanks!  
Lori Jane

Hi Lori,

Attached is the report.

I spoke to Trish about an interview and we really wouldn't have time to do a call today or tomorrow. Wednesday might work, but we really wouldn't have much more to add beyond this report and the press release. Let us know what you would like to do.

Thanks,  
Mary

Hi Mary,

I am a reporter from FOX31 in Denver.

I saw your press release related to Cargill today.

How can I obtain an actual copy of the report that was sent to the state health department?

Also would someone from your agency be available to do a brief interview with me today?

Thank you.

Lori Jane Gliha

Good Afternoon,

I wanted to provide you with a flow diagram on how we are exiting and re-entering people back into our workforce.

I am close to signing a global contract with Quest Diagnostics who will provide the services for our serological testing, across the US, and our PCR testing outside of CO.

My intention is to test our 100+ positive employees in CO on May 11<sup>th</sup> for IgG. That will put all of those employees at a minimum of 14 days out since a confirmed result. If they show a presence for IgG they will return to work. If not, they will remain out and be retested 7 days later.

If you have concerns or comments I would be interested in hearing them. This is the best process we can devise that does not rely on “a wish and prayer” on when to bring people back to work.

Kind Regards,

Jason

This is great!

I think the inmate thing seems fairly straight forward to separate, but with regard to the Morgan outbreaks I still really feel like we need to find a way (even if just for a short time) to articulate to people what impact those have on the total numbers. All three facilities replied to Mary's email positively at the notion of us sharing combined numbers. I dont know necessarily that we need to plan on doing that for an extended period of time, but if we can separate what we know for sure and then offer some explanation to people as to why it may not be a 100% complete number, and clarify some of the complexities in painting the picture (for example, many Cargill employees dont live within Morgan County, etc.), I think that will go a long way with the public. Then at some point (maybe after a week... or?) we can explain to people that we will no longer be separating the numbers due to the labor intensive manual searching that is required to extrapolate those associated with the outbreaks.

Just some food for thought.

| Hi All,

I've attached some initial data and graphs I've been working with so you can see where I'm at. I just learned how to run reports in CEDRS yesterday, so definitely a work in progress. I've also jotted down some thoughts about the type of information we may want to include on the website. I downloaded a free trial of Tableau (data dashboard) this morning too, so that might be something we can use in the future.

Some of the data is relatively easy to pull from CEDRS (i.e. total numbers per county by age/sex), but the more we break it down (i.e. Outbreak vs. Community) it becomes more complicated and manual (until data collection/entry into CEDRS becomes more standardized). My hope is to be able to figure out what data we want to include on the website and come up with an "easy" way to run these reports regularly.

Any and all feedback is welcome!

For the categories that there's less than 5 (the younger kids) we need to combine/cohort that data because it could be identifying. I don't want to individualize the outbreaks in Leprino, Eben Ezer, Cargill. IF we differentiate for Morgan county it will only be one lump of "outbreaks" and not specific locations. T

Hi All,

I've attached some initial data and graphs I've been working with so you can see where I'm at. I just learned how to run reports in CEDRS yesterday, so definitely a work in progress. I've also jotted down some thoughts about the type of information we may want to include on the website. I downloaded a free trial of Tableau (data dashboard) this morning too, so that might be something we can use in the future.

Some of the data is relatively easy to pull from CEDRS (i.e. total numbers per county by age/sex), but the more we break it down (i.e. Outbreak vs. Community) it becomes more complicated and manual (until data collection/entry into CEDRS becomes more standardized). My hope is to be able to figure out what data we want to include on the website and come up with an "easy" way to run these reports regularly.

Any and all feedback is welcome!

Shanna

Trish and Mary

Emailing for two reasons: checking in and letting you know I don't plan for proactive media outreach this weekend when we start back up. I do have a very brief reactive statement and will send that to you for your info when I get it approved.

Secondly, I wanted to thank you very much for the quote you provided the other day. Can we continue to use that if we have media follow ups (which I am assuming we will have when we start the plant back up) or would you be okay with a shorter version per your email below "Leprino's commitment to employee health and strategy is incredible" or would either be OK? Please let me know your preference.

Thanks very much! Kim

**Subject:** RE: FW: COVID Testing and Return to Work Protocols - Leprino Foods

We will be happy to share that with you.

We will be doing a PCR swab and blood draw at the same time as well as a finger prick for a couple of rapid tests that have the best data so far. We are using the last bit as an internal look/see for future broadscale testing. Personally I am still highly skeptical of the rapid IgG test kits but I may get surprised, these two have rock solid data on paper.

At any rate we will be able to provide clear comparison data of PCR (first test and test at 14 days) with the ELISA IgG test. And as a side benefit we will be able to see if we have a strong correlation with the ELISA gold standard and the rapid tests.

I will share all of that data with you.

Since this will become public in Morgan county I appreciate you support. Your past quote has been incredibly helpful with the media. We know we are operating way above and beyond in our approach but if we can be the 0.01% and give others a path forward we are all in. We are unique in having a captured population with detailed health history and the internal ability to provide a diverse set of testing over time.

Kind Regards,

Jason

**Subject:** Re: FW: COVID Testing and Return to Work Protocols - Leprino Foods

Hi Jason,

I appreciate seeing the algorithm you've developed to get people back to work. I've heard mixed messages about IgG testing but I'm not as versed in it as Matt. I think your criteria of 14 days/no fever/ +IgG test are far more stringent than I have seen even in health care workers. **Leprino's commitment to employee health and safety is incredible.** NCHD supports you in your criteria. I'd be interested to see what kind of data you get from the IgG testing, purely from a numbers geek standpoint. Thank

you and let me know if there's anything you need from us. Trish

Thanks for the update. Given the number of jurisdictions involved, it makes sense to have one point of contact for Leprino and I think Brad will do a great job. I appreciate you keeping NCHD in the loop with the reopening guidance and plans. We will remain available to you all and Leprino in Fort Morgan if they need any assistance or support. Have a good day! Trish

On Fri, May 1, 2020 at 11:37 AM Amanda Metz - CDPHE <[amanda.metz@state.co.us](mailto:amanda.metz@state.co.us)> wrote:

Hello,

We are currently investigating a 3rd Leprino location that might be an outbreak at their Denver Headquarter/Lab. We have cases that span across 5 jurisdictions and facilities across 3 jurisdictions. So in order to streamline communications with Leprino, CDPHE will take the lead moving forward with this outbreak. We have designated Brad Turpin from CDPHE to be the main point of contact with Leprino since he has a good working relationship with them already established from the food safety program.

We understand that the Fort Morgan facility has plans of reopening on Sunday, however, we would like to provide them some public health recommendations for reopening. The CDPHE COVID industry team is putting together a document to outline these recommendations for reopening. Once we complete them, we'll send them to NE for review with the goal of providing the recommendations by tomorrow.

Good morning everyone.

Just a quick update on this weekend's activities. Leprino did submit their response plan and that can be found here: [https://drive.google.com/file/d/1nbn6-Lw79hMg\\_FfrPNZqg2B9XM7g1JCg/view?usp=sharing](https://drive.google.com/file/d/1nbn6-Lw79hMg_FfrPNZqg2B9XM7g1JCg/view?usp=sharing)

CDPHE did have a few recommended edits. We made two requests and shared information regarding serology testing, as this may be the direction Leprino will move. All of this can be found here: <https://docs.google.com/document/d/1HL9ZWzLQadRWKAVI6sz0IYXtbg29VZ1gwdKMp7drjOw/edit>

I will be visiting the Fort Morgan facility today with NCHD. If you have anything that needs addressing, please let me know and I will try to get answers while I am there.

Have a good day.

Brad

Good morning everyone,  
Thanks for the clarification Rachel. I will let Jason at Leprino know that he doesn't have to do a new line list each week but can just add to the current one. I think the amount of work that goes into creating a line list from scratch is pretty daunting. I'll also let him know that if he can't fill in every column, that is ok as well as some of this information isn't available to him. I agree with Brad--the site visit went very well. Thanks! Trish

On Tue, May 5, 2020 at 8:24 AM Rachel H. Jervis <[rachel.jervis@state.co.us](mailto:rachel.jervis@state.co.us)> wrote:

Hi Brad,  
Thanks for the update.

The forms are universal for all settings. We'd just expect Leprino not to have residents (just staff). They are located under outbreaks on this page:

<https://covid19.colorado.gov/covid-19-resources-for-health-care-providers-and-local-public-health-agencies>

- [COVID-19 Outbreak report form \(PDF\)](#)
- [COVID-19 Line list template \(Excel\)](#)

However, we were alerted to a typo on the report form (page two says long term care facility) and are getting that updated. I'm also requesting that these docs be moved somewhere more prominent on our website.

We typically request updated linelists each Monday. But if the facility wants to do Friday, we'll take the data we can get! Public health needs this data for all THREE facilities having outbreaks.

Re: serology, can he provide us with a list of persons who were tested and results each week?

RJ

On Mon, May 4, 2020 at 4:30 PM Turpin - CDPHE, Bradley <[bradley.turpin@state.co.us](mailto:bradley.turpin@state.co.us)> wrote:

Good afternoon everyone,

I just got home from touring the Fort Morgan facility. Trish and I had a good meeting with Jason Eckert and the plant manager David. We were able to see their plan in action. We asked numerous questions and both individuals were very forthcoming. Since some in the group had sent me questions individually, I will address them below. All in all, Trish and I were very impressed and feel the facility is taking this very seriously. What we saw is happening in all facilities. Matthew, he mentioned we could take the same tour at their Greeley location if you were interested.

1. Shift transition & breaks: The facility has staggered start times for all employees so a line is not formed trying to get in. Everyone entering dons a mask, utilizes hand sanitizer, and has their temperature taken. Once in, they may have a little backlog at their locker rooms, but they limit it to 3 people max in the changing area. Those waiting outside the locker room stand on markers spaced 6'

apart.

2. Masks: At a minimum, everyone is to at least wear a surgical style mask. They may bring their own mask or N-95s are supplied to high risk individuals: those working in areas where 6' separation is difficult.

3. 6' distancing and packing: The most congested areas Trish and I observed were the control rooms and a cheese packing line. For these areas, the workers don N-95 masks. In the control room, they limit the number of people to two at all times. For the cheese packers, they have installed plastic shields between the workstations. There is also hand sanitizer at each station, which was a normal practice before COVID.

4. Languages: The ability to speak, read, and write English is a condition of employment at Leprino. They recognize individuals do speak other languages but do not need to provide education in other languages.

As for the document we compiled over the weekend, Jason had a few questions:

1. The outbreak reporting form looks to be specific to LTCFs. Emily has confirmed this is the correct form. This is the reason we have yet to receive it. You only need it for the Denver facility, correct?

2. Line list: the document we linked also looked specific to LTCF. Should he proceed and complete any pertinent section? Is this needed only for the Denver site? I wrote for us to receive this every Friday. Is that adequate?

3. Serology testing: He understands our concerns. Quest is using a test recognized under the EUA from FDA. It is Jason's understanding this information will need to be reported to CDPHE. He is wondering how we would like to receive this information? They will begin this testing next Monday, so would like an answer ASAP. They will be testing approximately 200 employees, from all Colorado facilities, as I understand.

Lastly, I am not sure who all this needs to be communicated to. If someone is not on this email list and needs to be, let me know. Otherwise feel free to distribute these updates to staff within your agencies/division that need it.

Thank you everyone! Please respond to any questions ASAP so I can pass those on to Jason

---

Hi Brad,  
Thanks for the update.

The forms are universal for all settings. We'd just expect Leprino not to have residents (just staff). They are located under outbreaks on this page:  
<https://covid19.colorado.gov/covid-19-resources-for-health-care-providers-and-local-public-health-agencies>

However, we were alerted to a typo on the report form (page two says long term care facility) and are getting that updated. I'm also requesting that these docs be moved somewhere more prominent on our website.

We typically request updated linelists each Monday. But if the facility wants to do Friday, we'll take the data we can get! Public health needs this data for all THREE facilities having outbreaks.

Re: serology, can he provide us with a list of persons who were tested and results each week?

RJ

Good afternoon everyone,

I just got home from touring the Fort Morgan facility. Trish and I had a good meeting with Jason Eckert and the plant manager David. We were able to see their plan in action. We asked numerous questions and both individuals were very forthcoming. Since some in the group had sent me questions individually, I will address them below. All in all, Trish and I were very impressed and feel the facility is taking this very seriously. What we saw is happening in all facilities. Matthew, he mentioned we could take the same tour at their Greeley location if you were interested.

1. Shift transition & breaks: The facility has staggered start times for all employees so a line is not formed trying to get in. Everyone entering dons a mask, utilizes hand sanitizer, and has their temperature taken. Once in, they may have a little backlog at their locker rooms, but they limit it to 3 people max in the changing area. Those waiting outside the locker room stand on markers spaced 6' apart.
2. Masks: At a minimum, everyone is to at least wear a surgical style mask. They may bring their own mask or N-95s are supplied to high risk individuals: those working in areas where 6' separation is difficult.
3. 6' distancing and packing: The most congested areas Trish and I observed were the control rooms and a cheese packing line. For these areas, the workers don N-95 masks. In the control room, they limit the number of people to two at all times. For the cheese packers, they have installed plastic shields between the workstations. There is also hand sanitizer at each station, which was a normal practice before COVID.
4. Languages: The ability to speak, read, and write English is a condition of employment at Leprino. They recognize individuals do speak other languages but do not need to provide education in other languages.

As for the document we compiled over the weekend, Jason had a few questions:

1. The outbreak reporting form looks to be specific to LTCFs. Emily has confirmed this is the correct form. This is the reason we have yet to receive it. You only need it for the Denver facility, correct?
2. Line list: the document we linked also looked specific to LTCF. Should he proceed and complete any pertinent section? Is this needed only for the Denver site? I wrote for us to receive this every Friday. Is that adequate?
3. Serology testing: He understands our concerns. Quest is using a test recognized under the EUA from FDA. It is Jason's understanding this information will need to be reported to CDPHE. He is wondering how we would like to receive this information? They will begin this testing next Monday, so would like an answer ASAP. They will be testing approximately 200 employees, from all Colorado facilities, as I understand.

Lastly, I am not sure who all this needs to be communicated to. If someone is not on this email list and needs to be, let me know. Otherwise feel free to distribute these updates to staff within your agencies/division that need it.

Thank you everyone! Please respond to any questions ASAP so I can pass those on to Jason

Hi Brad,

Can they fill out the Outbreak report form for each site? We didn't collect it for the other 2 facilities yet. Also, I'm working on creating a line list with all the confirmed cases that they can add on to it.

Hi Brad,

Do you have a sense of when Leprino will submit the outbreak report form? Trying to make sure that we get that entered before tomorrow morning and if we need to get them entered via a different mechanism (e.g. DDPHE or CDPHE).

Thanks!

Hi Brad,

NCHD received a line list for Fort Morgan from Jason on 5/2. We got it from Amanda via secure email. So I think the FM facility is on track as far as the update each Friday. Thanks! Trish

On Tue, May 5, 2020 at 12:00 PM Turpin - CDPHE, Bradley <[bradley.turpin@state.co.us](mailto:bradley.turpin@state.co.us)> wrote:

Before I reach out to Jason (and cause consternation) have either of your agencies received an outbreak reporting form from the Greeley and Fort Morgan locations?

We need from all three. I mistakenly thought they'd already done it for the Weld and Morgan locations.

Good afternoon everyone,

I just got home from touring the Fort Morgan facility. Trish and I had a good meeting with Jason Eckert and the plant manager David. We were able to see their plan in action. We asked numerous questions and both individuals were very forthcoming. Since some in the group had sent me questions individually, I will address them below. All in all, Trish and I were very impressed and feel the facility is taking this very seriously. What we saw is happening in all facilities. Matthew, he mentioned we could take the same tour at their Greeley location if you were interested.

1. Shift transition & breaks: The facility has staggered start times for all employees so a line is not formed trying to get in. Everyone entering dons a mask, utilizes hand sanitizer, and has their temperature taken. Once in, they may have a little backlog at their locker rooms, but they limit it to 3 people max in the changing area. Those waiting outside the locker room stand on markers spaced 6' apart.
2. Masks: At a minimum, everyone is to at least wear a surgical style mask. They may bring their own mask or N-95s are supplied to high risk individuals: those working in areas where 6' separation is difficult.
3. 6' distancing and packing: The most congested areas Trish and I observed were the control rooms and a cheese packing line. For these areas, the workers don N-95 masks. In the control room, they limit the number of people to two at all times. For the cheese packers, they have installed plastic shields between the workstations. There is also hand sanitizer at each station, which was a normal practice before COVID.
4. Languages: The ability to speak, read, and write English is a condition of employment at Leprino. They recognize individuals do speak other languages but do not need to provide education in other languages.

As for the document we compiled over the weekend, Jason had a few questions:

1. The outbreak reporting form looks to be specific to LTCFs. Emily has confirmed this is the correct form. This is the reason we

have yet to receive it. You only need it for the Denver facility, correct?

2. Line list: the document we linked also looked specific to LTCF. Should he proceed and complete any pertinent section? Is this needed only for the Denver site? I wrote for us to receive this every Friday. Is that adequate?

3. Serology testing: He understands our concerns. Quest is using a test recognized under the EUA from FDA. It is Jason's understanding this information will need to be reported to CDPHE. He is wondering how we would like to receive this information? They will begin this testing next Monday, so would like an answer ASAP. They will be testing approximately 200 employees, from all Colorado facilities, as I understand.

Lastly, I am not sure who all this needs to be communicated to. If someone is not on this email list and needs to be, let me know. Otherwise feel free to distribute these updates to staff within your agencies/division that need it.

Thank you everyone! Please respond to any questions ASAP so I can pass those on to Jason

---

Good morning everyone,

Thanks for the clarification Rachel. I will let Jason at Leprino know that he doesn't have to do a new line list each week but can just add to the current one. I think the amount of work that goes into creating a line list from scratch is pretty daunting. I'll also let him know that if he can't fill in every column, that is ok as well as some of this information isn't available to him. I agree with Brad--the site visit went very well. Thanks! Trish

On Tue, May 5, 2020 at 8:24 AM Rachel H. Jervis <[rachel.jervis@state.co.us](mailto:rachel.jervis@state.co.us)> wrote:

Hi Brad,

Thanks for the update.

The forms are universal for all settings. We'd just expect Leprino not to have residents (just staff). They are located under outbreaks on this page:

<https://covid19.colorado.gov/covid-19-resources-for-health-care-providers-and-local-public-health-agencies>

- [COVID-19 Outbreak report form](#) (PDF)
- [COVID-19 Line list template](#) (Excel)

However, we were alerted to a typo on the report form (page two says long term care facility) and are getting that updated. I'm also requesting that these docs be moved somewhere more prominent on our website.

We typically request updated linelists each Monday. But if the facility wants to do Friday, we'll take the data we can get! Public health needs this data for all THREE facilities having outbreaks.

Re: serology, can he provide us with a list of persons who were tested and results each week?

RJ

## **NCHD Board of Health**

**April 22, 2020 Meeting Minutes**

**Board of Health Members Present: Byron Pelton, Jon Becker, Terry Hofmeister, Laura Teague, Mark Turner, Tony Wells, Robin Wiley**

**Board of Health Members Absent: Samantha Mahaffey**

**Staff Members Present: Trish McClain, Mel Bustos, Alli Howe, Penny Stumpf, Michelle Pemberton, Janelle Machamer**

**Public Present: Marlena Yanez, Suzana Sweney, Paula Hough, Kim Grennan, Journal Advocate, Jim Zwetzig, Joe McBride**

### **Call to Order**

#### **1. Public Comment**

- Paula Hough from Body Fitness in Fort Morgan sent a plan to NCHD for opening their fitness center next week, if possible. Governor Polis said yesterday that he won't open fitness centers. She just asks that NCHD consider their plan with 3 phases and safety plans in place in order to open. Hoping that NCHD will consider a case by case. Also asked for clarification in regards to one-on-one trainings.
- Susan Sweney with Cycle Park in Fort Morgan wants to submit something to get approval for hosting an annual event on Memorial Day Weekend, 2020. She acknowledged that they typically attendance that is over the gathering size in the Safer At Home order. The event is outside and is working with the Motorcycle Association to create processes. They would adhere to any social distancing guidelines. Morgan County Ambulance has already said they would agree to assist with that event as they have in the past. Susan did clarify that the spectator area is the main area where people can gather tightly but they are considering either limiting to only family members or completely closing that area. Susan requested to be notified by first week or May or early part of the second week of May regarding a decision about whether they can hold the event as planned. Susan does request that she have enough time to confirm port-a-potties, handwashing stations, etc.
- Kim Grennan with Star Athletic Club explained the square footage of her facility and the number of rooms. They have submitted a plan to Michelle, Jon and Laura. She expressed appreciation for consideration of their plan.
- Mr. Cory Gaines sent some public comments in writing. Trish did forward to the board but Commissioner Pelton did request that the comments be read. Mr. Gaines sent two

**- Serving Logan, Morgan, Phillips, Sedgwick, Washington and Yuma counties since 1948 -**

emails: he expressed five facts that are true and valid and then went on to express his frustration with the Governor, CDPHE and NCHD – while each has been acting within their statutory rights, he feels they are infringing upon his personal rights. He went on to express frustration about state control rather than local control and would like to see the people have the right to speak and provide input into decisions that affect local economic ruin. He wrote to stand up and demand that people’s rights be recognized and he provided his phone and email contact.

- Commissioner Jim Zwetzig listened to CALPHO. He asked whether the Morgan County Commissioners will need to submit a plan or application to the Governor’s office to lift some restrictions. Eagle County submitted an application to open earlier than the state Stay-At-Home Order. Trish McClain explained that she understands that all counties will need to submit a plan to the Governor to get approval for early reopening. The Governor will be issuing a “Safer-At-Home” Order on April 27, but she is not sure about all of the details. However, there will be increments to re-opening.
- Commissioner Pelton asked about clarification on the Colorado roadmap to re-opening that was created by CALPHO. Trish explained that the NCHD board will need to consider whether this is the roadmap we will use to reopen businesses. Commissioner Wiley referenced the CALPHO call and some other documents he has read. If the Counties were to petition then the restaurants and bars would be the main businesses impacted by petitioning. Commissioner Becker recommended that NCHD board submit a plan so that we don’t continue to be in limbo. Commissioner Wiley expressed that NCHD cannot move forward with our own regulations. We will need to submit to the Governor. Local can be stricter, but not less strict. Trish expressed the concerns about economic concerns of local businesses and our constituents. NCHD wants to open businesses as soon as possible. We will do our best to open businesses as quickly as possible. It is imperative that we do it safely for everyone. Further discussion was held about the double standards and concerns about local control being taken away.
- Laura asked for clarification regarding what is meant when a hospital implements their surge plan. Trish explained that this means they are getting full. Both hospitals in Morgan County are conducting quite a bit of COVID testing. Trish emphasized that her primary concerns about all hospitals having the ability to test/treat for patients with COVID but also have adequate capacity to respond to other healthcare needs other than COVID alone. Commissioner Wiley expressed concern about writing a plan that fits all six counties. Yuma County is completely different from Morgan County. In Yuma County, the primary concern is about outsiders coming into their county and exposing Yuma County residents that don’t have immunity to this virus. Trish expressed that she feels that it will be different for each County across this six county district. Commissioner Pelton asked about using the Emergency Managers for each County to get this planning started.
- Susan asked about data on the NCHD website and locations of cases. Trish explained that NCHD doesn’t share that information because in some of our smaller communities that can be identifying information.

## 2. Acceptance of the Agenda

- Commissioner Laura Teague moved to accept the agenda. Robin seconded. Motion accepted.

### **3. Acceptance of the Previous Meeting Minutes**

- Commissioner Wiley moved to accept the February 26, 2020 meeting minutes. Commissioner Hofmeister seconded, and motion passed. Commissioner
- Pelton asked about minutes to the emergency meeting Trish had with the board in March, 2020. Those meeting minutes need to be included for the next meeting.

### **4. Acceptance of the Financials**

- Janelle Machamer presented the financial report for March, 2020. Laura Teague asked about any concerns about moving staff from other programs into the COVID response. Janelle did have managers email their state contacts for each contract. Two contracts responded to allow us to bill staff time to the COVID response. All other contracts would not at this time.
- Laura Teague moved to accept March financials. Commissioner Wiley seconded and motion passed.

### **5. Director's Report**

- Trish provided an update on NCHD's COVID-19 response activities including case investigation, contact tracing, quarantine and isolation.
- Coordination of ESF-8 duties and distribution of Strategic National Stockpile supplies. There were 19 pallets of supplies delivered to us and we are down to 3 pallets now so it has mostly been disseminated.
- Outbreak follow-up and investigation is ongoing at Eben Ezer, Cargill and Leprino.
- Public information and communication coordination with CDPHE, local media, outside of region media, social media and website as well as information requests.
- Continuity of operations has coordinated several aspects of NCHD operations including teleworking staff, schedule adjustments, remote delivery of services, scripting messaging for staff to use in answering questions from the public.
- EH staff, headed by Mel, have done amazing work to provide guidance to restaurants, golf courses and other businesses while still continuing to provide routine EH services such as septic and water.
- Adjustments have been made for payroll to accommodate the need for staff to access emergency leave described in the Families First Coronavirus Response Act.
- In regards to reopening Colorado, specifically northeast Colorado, local public health agencies are being asked for additional input for policies. There are questions coming from lots of businesses. Schools are asking if they can have graduations and if so, what would be the options.
- Trish explained about death statistics on NCHD's website. Deaths aren't counted by county of residence, but are counted by the County where the death occur. There are also numerous steps in order for the death certificate to be certified at the state level. NCHD is following CDPHE on numbers posted regarding deaths. NCHD is being careful. One example is a press release sent out last week regarding a death of a Yuma County resident who actually died in Weld County and is included in the death count for Weld County.
- Commissioner Wiley has spoken with local healthcare and Yuma county leaders and an ongoing concern is about turkey hunting that is scheduled to open on May 2. He is requesting a Public Health Order regarding people hunting locally in their own

community/County. Trish will work on that. Jeff Rice with Journal Advocate asked about whether it is okay for someone to come into Yuma County from neighboring Counties. Commissioner Wiley clarified that they just don't want people from the Front Range coming to Yuma County to hunt. Commissioner Pelton and Commissioner Wiley again clarified that this Public Health Order would only be for Yuma County and not for all six counties.

- Commissioner Pelton did ask about an email that came out regarding supply requests needing to go through NCHD. Trish clarified that for some supplies such as the National Strategic Plan supplies, or PPE do come through NCHD and are disseminated to local healthcare partners. Trish explained that other supplies should be obtained through the normal chain of contacts that are already in place.
- Commissioner Pelton expressed concerns about NCHD needs to communicate better with emergency managers. Alli asked for clarification on communication needs so that she can assist to improve the communication with Counties.

#### **6. Client Health Services Division Administrative Report**

- Client Health Services staff have transitioned to assisting with COVID-19 response.
- NCHD set up a bilingual COVID-19 public phone line.
- Fort Morgan, Yuma and Sterling offices will remain open with typical operating hours and close at 4 p.m. daily to allow all NCHD staff to participate in emergency response briefings. Clinical staff are scheduled to work at Akron, Julesburg and Holyoke one day per month.
- To protect our staff we are requiring all clients to complete a health screening to ensure they are healthy and symptom free if they are coming to our offices. All clients are screened prior to their appointment upon arrival. Clients with new symptoms such as fever will be asked to reschedule their appointment to a later date/time when they are feeling better.
- NCHD has implemented telehealth services for eligible appointments. For non-eligible appointments, nurses work with clients to complete the paperwork over the phone prior to the appointment to reduce the amount of time clients spend in our offices.
- All WIC benefits and services are being offered remotely via phone and mail. Physicians can still communicate with WIC staff regarding special formula and referrals for breastfeeding support.
- NCHD is in frequent contact with all funders to ensure we are meeting requirements and amending our scope of work accordingly.

#### **7. Operations Division Administrative Report**

- Have put all training for the CureMD Practice Management System on hold due to COVID-19 response.
- We hired two new managers in March: Monica Miller (Health Promotion & Prevention Manager) and Kathy Reinhardt (Early Prevention Manager).
- We have worked with our attorney and Dana from CTSI to ensure NCHD is complying with the new Families First Coronavirus Response Act. NCHD has several staff that are now working from home due to childcare issues and schools being closed. If they do not have enough work to keep them busy 40 hours per week, they would be eligible for paid FMLA with this act now in place.

- Healthy Communities is busy right now informing newly eligible Medicaid clients of their benefits. All Healthy Communities contractors are working with the Colorado Association of Local Public Health Officials (CALPHO) on the new FY21 contract.
- NCHD's IT staff worked with Peak Communications to get all the phones working in the District Operations Center (DOC) and to provide separate phone lines for English and Spanish in order to better serve all of our clients.
- Laura asked about how we are handling HIPAA concerns in regards to anyone working from home. Penny explained that employees working from home are not working on anything that would be a HIPAA violation.

#### **8. Environmental Health Division Administrative Report**

- CDPHE water and wastewater report updates were provided to the board for the town of Wiggins, and Log Lane Village in Morgan County.
- CDPHE water and wastewater report updates were provided to the board for Caliche school, town of Merino, Upper Highland HOA and town of Fleming in Logan County.
- CDPHE water and wastewater report updates were provided to the board for the town of Ovid and the town of Julesburg in Sedgwick County.
- CDPHE water and wastewater report updates were provided to the board for Gayton WS, and the Town of Eckley in Yuma County.
- Retail food reports were provided to the board as well. Mel and Conner provided food safety training with Brush Schools prior to COVID and completed a change of ownership at Riverview Golf Course in Logan County. Also, in Logan County, US 6 Country Store and Overland Trail Café opened in Logan County. EH staff are working on a plan review for Das Grebble Haus in Logan County as well.
- In February, prior to COVID, Mel and Conner assisted with the Morgan County Health Fair.

#### **Old Business**

- 9.
- 10.

#### **New Business**

11. Reopening in northeast Colorado – Commissioner Pelton had Trish to include Mesa County's reopening plan and some ideas shared with Tony Wells regarding reopening in northeast Colorado. Commissioner Becker expressed that locally we need to start moving forward with developing a plan regionally but also specific to each County. Can each County have plans developed by next Wednesday? Commissioner Hofmeister has meetings on Fridays with Phillips County leaders and plans to ask their opinion about reopening. Commissioner Wells let everyone know that there have been conversations in Washington County about tentative planning for reopening in Washington County with a meeting scheduled on Monday. Washington County doesn't have the healthcare facilities so they are aware that if people get sick they will be taken to Yuma, Logan or Morgan County facilities. He also expressed concerns about depression in people they haven't historically seen depression.

Commissioner Becker made a motion to have each County take steps to create individual County plans by the middle of next week. Commissioner Pelton seconded and motion passed unanimously. All emergency managers are to contact Trish and she will assign staff to work with each OEM.

12. NCHD Employee Handbook – Commissioner Pelton asked Trish to have this on the agenda. Commissioner Wiley moved to table the employee handbook for now. Commissioner Hofmeister seconded and motion passed.

13.

### **Executive Session**

### **Meeting Adjourned**

Commissioner Pelton Adjourned the meeting of the Board of Health at 3:02 p.m.

Approved,

Respectfully Submitted,

Commissioner Byron Pelton, President

Commissioner Terry Hofmeister, Secretary

## **NCHD Board of Health**

**April 29, 2020 Meeting Minutes**

**Board of Health Members Present: Byron Pelton, Jon Becker, Laura Teague, Samantha MaHaffey, Mark Turner, Robin Wiley, Terry Hofmeister, Tony Wells**

**Board of Health Members Absent:**

**Staff Members Present: Trish McClain, Michelle Pemberton**

**Public Present: Vickie Sandlin, James DePue, Lynaia South, Journal Advocate, Joe McBride, Sheriff Dave Martin, Jim Zwetzig, Marilee Johnson, Mark Arndt, Sterling Journal Advocate**

**Call to Order at 3:01 p.m.**

**1. Public Comment**

- No Public Comment

**2. Acceptance of the Agenda**

- Laura Teague moved to accept the agenda with changes. Samantha MaHaffey seconded and motion passed.

**3. Review of County Plans**

- A. Sedgwick County – Commissioner Turner updated the board regarding Sedgwick County’s application for a waiver. Primarily they added opening of gyms and in-restaurant dining. Trish sent a letter of support yesterday to Sedgwick County Board of Commissioners. Sedgwick County Board of Commissioners is submitting the application for a waiver to CDPHE.

Laura Teague moved to ratify Trish’s signature on the Sedgwick County plan. Commissioner Wiley seconded and motion passed.

- B. Logan County – Commissioner Pelton updated the board regarding Logan County’s application for a waiver. Held a meeting with the hospital, city of Sterling and other community leaders. Their plan will be for a waiver to open the movie theater, gyms, restaurants, and other businesses. The only businesses excluded in the Logan County plan are bars. Commissioner Wiley asked about how they distinguished between restaurants that serve alcohol and bars. Laura Teague asked about guidance for restaurants. Trish asked if Sterling Regional MedCenter signed off on the Logan County Plan and they did. Commissioner Pelton updated the group on their numbers in the community versus the Sterling Correctional Facility. Journal Advocate asked about the number of hospitalized,

**- Serving Logan, Morgan, Phillips, Sedgwick, Washington and Yuma counties since 1948 -**

specifically hospitalized in Sterling. Commissioner Pelton did not have those current numbers available at the meeting. Logan County plan does recommend that all businesses open at 30% of their occupancy. Discussion was held about recommendation versus enforcement. Journal Advocate did ask about redactions in the plan from the City of Sterling.

Commissioner Becker moved to ratify the Logan County plan. Commissioner Turner seconded and motion passed.

- C. Morgan County – Commissioner Becker updated the board regarding Morgan County’s application for a waiver. Morgan County has a question about whether Morgan County needs BOH approval if they will just follow the Safer At Home order but ask that either the board or Trish approve individual events or businesses that want to reopen earlier. Trish explained that there have been discussions among public health directors regarding whether they can make local decisions about specific venues, businesses. Currently, it is not allowed by the State. Right now it is an all or nothing. Morgan County wants to see businesses open but in a responsible manner. There wasn’t agreement on the definition of the responsible manner. Right now to get a waiver they have to submit it to the state. The Safer At Home Order doesn’t allow local public health agencies to approve individual events or businesses. Laura Teague suggests that Morgan County move forward as Commissioner Becker described and submit individual business/event waivers with letter of support from NCHD to the State. Laura also asked that NCHD provide data for the facility outbreaks versus community spread. Trish expressed that we are working on presenting the data better to the public. Commissioner Jim Zwetzig asked Trish McClain about known community spread versus unknown community spread and comparing to Morgan County testing to other Counties. Trish didn’t have exact numbers but based on memory, CPMC has tested around 200 and EMCH has tested almost the same number of individuals while SRMC has only tested 100 or less individuals. Morgan County would have submitted an application for a waiver except they are sure they couldn’t get both hospitals to sign off. Discussion about Morgan County numbers increasing versus Logan County numbers leveled off. Trish explained that Logan County’s facility outbreak at the prison is confined with minimal community spread (DOC staff) versus Morgan County facilities are all staff that are in the communities of Morgan County. Commissioner Art expressed that he envisioned it differently so that each individual business/event could get approval at the local level. NCHD was created for cost saving for the six counties and would carry out public health knowing local situations and conditions. Commissioners held discussions with local businesses regarding reopening guidance and businesses are willing to work with us. Trish expressed that if she had local authority over the state order she would consider individual businesses and events. Trish told Commissioner Becker she would be willing to take the good local business reopening plans and see if she can get approval from the state. Trish agrees with the Morgan County Commissioners and other public health directors that it would be good if local public health had the authority to approve individual business plans for reopening.

Commissioner Wells moved to accept the Morgan County plan. Commissioner Hofmeister seconded and motion passed.

- D. Phillips County – Commissioner Hofmeister updated the board regarding Phillips County’s application for a waiver. They would like to move into the phase II on May 15 with group gatherings of 50 people and described plans to use the Phillips County Event Center for some events in late May and summer. He described the events and dates. No individual businesses have requested reopening earlier than Safer At Home allows, but the waiver

would allow for them to do so if they wish. Phillips County wants to move forward with the application for a waiver. Commissioner Wells and Laura Teague asked questions for clarification. Commissioner Hofmeister did explain that a lot of participants in the planned events are from Phillips County but there will be out of area participants. Commissioner Pelton asked Trish if she has any feedback. Discussion was held about health screenings for the events. Trish asked about logistics for larger events. Commissioner Hofmeister did express they would provide guidance closer to the time. Laura Teague expressed concern about approving these type of events in Phillips County so should approve all county fairs at this time. Commissioner Wells stated that all this board is approving is the Phillips County plan to submit an application for a waiver. Final approval still will come from the State. Commissioner Turner moved to accept Phillips County's plan. Commissioner Wells seconded and motion passed.

E. Washington County – Commissioner Wells updated the board regarding Washington County's application for a waiver. Washington County is going to follow the Safer At Home Order. They are wanting to open the driver's license office and the clerk's office and have someone scheduled for next week to practice the process they have designed to see if it will work. Two other county offices will open on May 17 following the Safer At Home Order. Nursing home will remain closed to outside visitors until end of May, at least. Haven't heard a lot from the unincorporated communities in Washington County because most of them are already considered critical business. There is one bar in Washington County and wants to be able to reopen. This owner may ask NCHD to assist with applying for an individual waiver. At this time, they are continuing to plan for fair and other events later in the summer. Washington County Event Center will remain closed to outside events. Did have one event where food was distributed but otherwise everything else has been cancelled for May and will review it again at the end of May for June. Will wait to see what Phillips County gets as far as approval for their event planning. Commissioner Becker moved to accept Washington County's plan. Commissioner Hofmeister seconded and motion passed.

F. Yuma County – Commissioner Wiley updated the board regarding Yuma County's application for a waiver. Yuma County created a task force and are using Mesa County's plan as a guide and are following the Safer At Home Order with plan to reopen businesses asking that businesses and other organizations submit a plan to be reviewed by the task force. They also included larger events but with the triggering factors of the task force and measures (i.e., low numbers, no hospitalizations, etc.). Yuma County wants to not have to continue to request additional waivers in the future so hoping the triggering factors will satisfy the state requirements for a waiver and allow local decision making for reopening in Yuma County. Commissioner Wiley did tell the board that the hospitals and healthcare facilities in Yuma County are most concerned about outside travel and that this is their greatest threat. Their plan has been developed with the hope to make a case to allow for Yuma County to not be under any potential future statewide orders. Commissioner Wells moved to approve Yuma County's Plan. Seconded by Commissioner Hofmeister and motion passed.

#### **4. Public Health Order Compliance Form**

Commissioner Pelton expressed that it is important that the Northeast Colorado Health Department send a positive message to our communities and not encourage community members reporting on each other.

Trish explained that NCHD was getting a ton of calls from individuals who had lots of concerns. So this form was created. NCHD has used the form to educate businesses and

have the information. The form has not used it as a punitive form but some businesses have been confused about the orders so NCHD provided additional education. The reasoning was to save time by just providing a place for these complaints to go for us to evaluate in regards to whether to follow up on complaints or not. The purpose was to provide additional education and information. Commissioner Pelton had a business complain that they were open to sell furniture for medical purposes but they got a call from NCHD. Trish explained that by NCHD staff having the conversation then NCHD staff were able to better explain if they received additional complaints. Commissioner Becker expressed that he doesn't want to see neighbors against neighbors. Also, he wanted to express that in Morgan County they are considering anything related to agriculture be exempt and wants to be sure everyone is on the same page. Discussion was held about farm auctions, etc. not be shut down because they are a part of agriculture and the food supply chain. Commissioner Wiley asked that when a complaint form is submitted that the elected officials be sent the complaints so they can review and handle them as appropriate.

Commissioner Turner asked about someone being allowed to work at the Assessor's office if they are over 65 years old but they are the only person who has knowledge to do the job while the normal staff person is out for a surgical procedure. He asked for guidance and Trish provided guidance to allow this person to work from home if possible. There are certain parts of the job that have to be done from the Assessor's office. If she needs to be at work, whatever can be done to protect her such as requiring people coming in wear masks, etc. and work with her to provide as much protection as possible.

5. Commissioner Pelton asked about scheduling more frequent meetings for a while. Every two weeks preferred. Next meeting will be scheduled May 13, 2020. An email will go out to schedule a time on May 13, 2020 and then we will hold the regular board meeting

### **Meeting Adjourned**

Commissioner Pelton adjourned the meeting of the Board of Health at 4:32 p.m.

Approved,

Respectfully Submitted,

Commissioner Byron Pelton, President

Commissioner Terry Hofmeister, Secretary

Note: These minutes represent only a summary of the proceedings of the April 29, 2020 meeting of the Northeast Colorado Board of Health. A complete and accurate record of the proceedings is available on a tape recording that is retained in the Northeast Colorado Health Department Regional Office at 700 Columbine Street, Sterling, CO 80751.

# LOGAN COUNTY

EPIDEMIC CURVE DATA FOR COVID-19 CASES IN LOGAN COUNTY FROM ONSET (3.18.2020) TO PRESENT

05.07.2020

## COUNTY SUMMARY

The graph represents **cumulative positive cases in Logan County** as they are reported in the Colorado Electronic Disease Reporting System (CEDRS). **Inmates at the Colorado Department of Corrections are not counted in this data**, although we are tracking it.

The **first positive case was reported in Logan County on March 26, 2020**. Case numbers among residents of Logan County (excluding inmates) have remained stable and low until recently when they have increased slightly since the end of April.

As of May 7, 2020, there were **31 total cumulative cases**. Since the beginning of May 2020, there has been an average increase of about 3 cases per day reported in Logan County.

Many of the positive cases reported for Logan County at the state level can be attributed to testing at the Colorado Department of Corrections. Other factors may include access to testing among other variables.

## INTERPRETATION

An epidemic curve, or epi curve, is a **histogram that shows the distribution of cases over time**. The time intervals are displayed on the horizontal axis and case counts are displayed on the vertical axis.

The result is a **visual representation of illness onset in cases associated with an outbreak**. The epi curve can provide information on the progression of the outbreak (e.g., if the outbreak is ongoing, increasing in size, stabilizing, decreasing, over, etc.). The epi curve will also depict the rate of increase or decrease of cases over time.

## FUTURE DATA

Northeast Colorado Health Department is **planning to launch increased COVID-19 data** on its website starting the week of May 11, 2020.

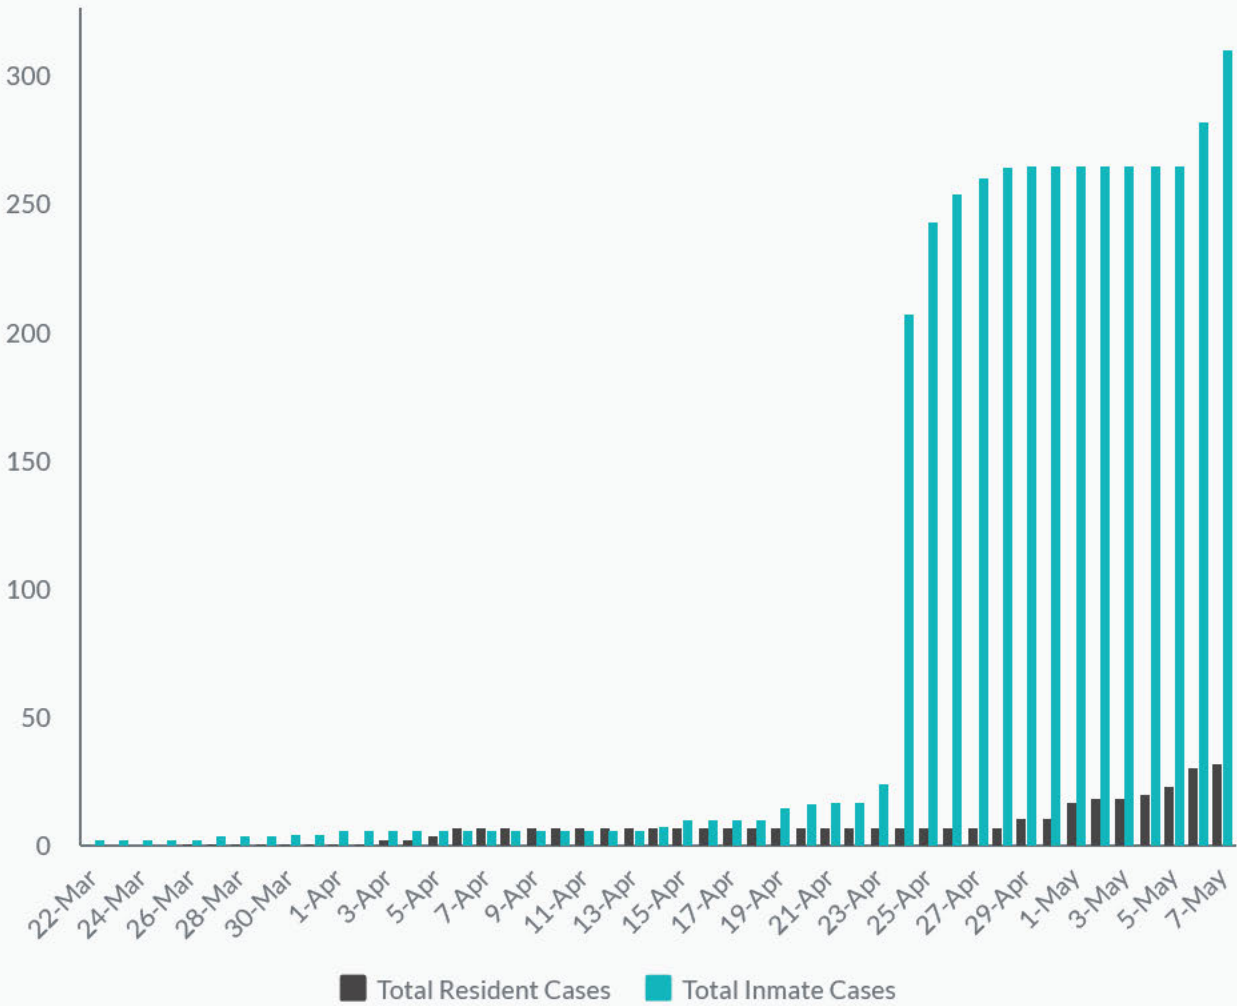

Additional data may include:

- Total case numbers for northeast Colorado
- Total case numbers for northeast Colorado by age
- Total case number by age / per county
- Total number of deaths by age / per county

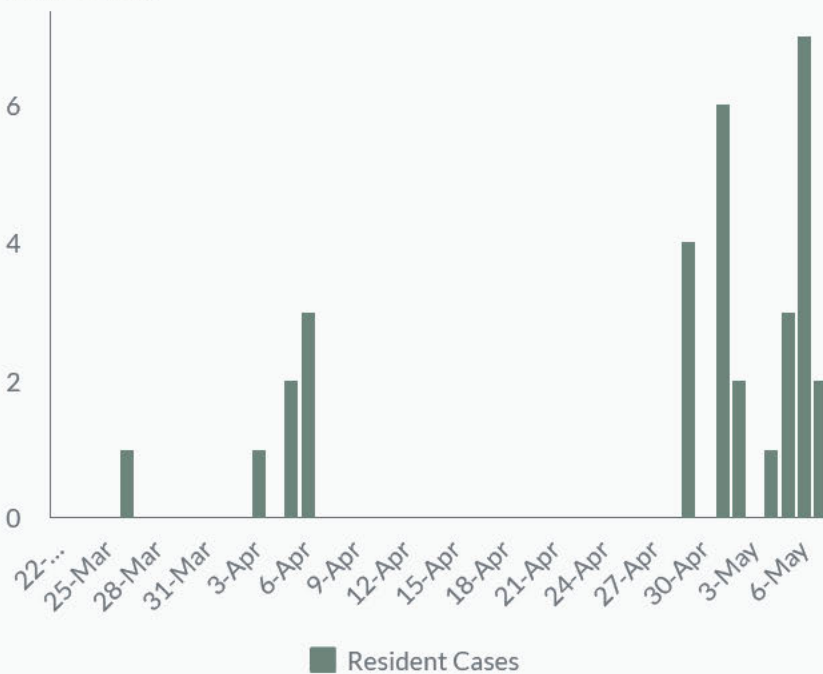

# LOGAN COUNTY

EPIDEMIC CURVE DATA FOR COVID-19 CASES IN LOGAN COUNTY FROM ONSET (3.18.2020) TO PRESENT

## CUMULATIVE CASES

## NEW CASES

SERVING LOGAN, MORGAN, PHILLIPS, SEDGWICK, WASHINGTON AND YUMA COUNTIES SINCE 1948

# MORGAN COUNTY

EPIDEMIC CURVE DATA FOR COVID-19 CASES IN MORGAN COUNTY FROM ONSET (3.18.2020) TO PRESENT

05.07.2020

## COUNTY SUMMARY

The graph represents cumulative positive cases in Morgan County as they are reported in the Colorado Electronic Disease Reporting System (CEDRS). **The first positive case was reported in Morgan County on March 18, 2020.** Case numbers were relatively low until the beginning of April when they began increasing.

As of May 7, 2020, there were **466 total cumulative cases**. Since the beginning of May 2020, there has been an average increase of about 10 cases per day reported in Morgan County.

Positive case increases could be attributed to major employers providing additional testing as well as increased availability of testing in the county.

## INTERPRETATION

An epidemic curve, or epi curve, is a **histogram that shows the distribution of cases over time**. The time intervals are displayed on the horizontal axis and case counts are displayed on the vertical axis.

The result is a **visual representation of illness onset in cases associated with an outbreak**. The epi curve can provide information on the progression of the outbreak (e.g., if the outbreak is ongoing, increasing in size, stabilizing, decreasing, over, etc.). The epi curve will also depict the rate of increase or decrease of cases over time.

## FUTURE DATA

Northeast Colorado Health Department is **planning to launch increased COVID-19 data** on its website starting the week of May 11, 2020.

Additional data may include:

- Total case numbers for northeast Colorado
- Total case numbers for northeast Colorado by age
- Total case number by age / per county
- Total number of deaths by age / per county

Brad,

As discussed, please find attached our Safer at Home protocols per Executive Order D 2020 044 Safer at Home.

I have also attached our agreed upon testing plan with the Weld and NE Health Departments as well as a number of other supporting documents and pictures.

Please feel free to call with any questions.

As discussed, we will have a partial restart of the Fort Morgan facility this coming Sunday, May 3<sup>rd</sup>.

Kind Regards

Jason Eckert

Matt Bauer, Weld County Health Department  
Mike Durkin, Leprino Foods President  
Jon Alby, Leprino Foods General Counsel

Pursuant to Section I.1 the following protocols and practices have been, and remain, in place at our factories in Fort Morgan and Greeley as well as our Denver Headquarters.

1.
  - a. Local Oversight is the responsibility of our Plant Managers for the Fort Morgan and Greeley facilities and our President at the Denver Headquarters. There are daily updates with our Leadership Team on the health and safety of our employees as well as active cases among all our manufacturing facilities across the country.
  - b. Distancing in break rooms, locker rooms, office areas, and meeting rooms are kept to a minimum of 6 feet of separation. The 6 foot of separation rule is not always achievable on our manufacturing lines although we try to meet that goal whenever possible through modified work arrangements and the use of different tools and methods of work.
  - c. Enhanced cleaning and disinfection of high touch areas is in place. It is important to remember that this is in addition to an already highly clean work and sanitary environment inherent with a dairy products processing facility.
  - d. We have had constant contact with our employees regarding hygiene, social distancing, and handwashing as well as other COVID related topics including face coverings. It is important to note that we had mandated the use of masks in our facilities and headquarters weeks before the State made their announcement.
  - e. Our HVAC systems are designed for a high turnover of room air in our factories. In the past couple of weeks, we have turned those units up to achieve the maximum air turns possible in the specific environment.
  - f. Necessary gatherings have been limited to less than 10 people and we have removed chairs from meeting rooms and break rooms to ensure that proper social distancing is in place. This has been in effect for several weeks.
  - g. We have had an employee screener and temperature checks in place at our facilities and headquarters for all employees, contractors and visitors for over a month. Any employee that calls in with COVID symptoms, answers yes to a screener question, or has a high temperature is immediately removed from the workplace.
    1. For the past two weeks we have tested any symptomatic employee. If they test positive for COVID they are quarantined for a minimum of 14 days and they must be symptom free for at least 72 hours without the use of fever reducing drugs. Employees that test negative remain out of work for a minimum of 7 days since the onset of symptoms and 72 hours free of symptoms and without the use of fever reducing drugs.
    2. The employee's work area is cleaned and sanitized as soon as we receive notification of a positive result.
    3. Contact tracing is immediately implemented in the factory and any identified employees are screened using the Risk Assessment. Elevated and High Risk employees are monitored for symptoms and may be tested for COVID.

- 4. We are in constant contact with the NE Health Department and Weld County Health Department.
- h. Common areas in the facilities are cleaned and disinfected multiple times per day.

2.

- a. Employees are required to stay at home when sick and are compensated through our various employee benefit programs which include a supplemental pay program consisting of up to 80 hours of COVID pay, as well as existing sick time, short-term disability, long-term disability, and vacation time.
- b. Individuals over the age of 65 or that are immunocompromised are out of the workplace and are given flexible and remote work assignments.
- c. Our headquarters has been on a work from home arrangement for over a month for all employees except critical infrastructure workers that run our central testing laboratories. Employees at our manufacturing facilities cannot work from home.
- d. As a dairy company, aggressive handwashing and hand sanitizing is not new to us. Employees wash and sanitize their hands after any break and multiple times an hour when they are working on the processing lines.
- e. Shift times and break times were phased several weeks ago to reduce pressure on our common areas including break rooms and locker rooms.
- f. We have required masks for over a month. We provide the option of a homemade mask, surgical mask (provided), or grain mask (provided) for line and office workers. Individuals in close quarter control rooms and functions that work in close quarters like maintenance are required to wear N95 masks.

3.

Appendix A  
Weld and NE Health Department Alignment  
April 18, 2020

Jason Eckert  
Senior Vice President  
Global Research, Development and Quality  
1830 W 38<sup>th</sup> Ave  
Denver, CO 80211

April 18, 2020

Dear Mr. Bauer, Ms. Hort and Ms. McClain,

Per our discussion this morning we would like to propose the following plan regarding the outbreak of the SARS-CoV-2 virus in our manufacturing facilities located in Greeley, CO and Fort Morgan, CO.

### **I. Symptomatic Employees:**

1. Employee is removed from work for a minimum of 72 hours symptom free and at least 7 days after the onset of symptoms.
2. Employee is tested for SARS-CoV-2.
  - a. If the employee is negative, they may return to work after the conditions in #1 above are met.
  - b. If the employee is positive, they will remain out of work for a minimum of 14 days at which point, if they have been symptom free for 72 hours, we will retest until we receive 2 negative results a minimum of 24 hours apart.
  - c. If the employee is positive, we will perform contact tracing and utilize our risk assessment protocol – see Appendix A
  - d. If the employee is positive, we will implement our deep clean and disinfection protocol in the employees work area and all common areas of the plant – see Appendix B

## **II. Asymptomatic Employee:**

1. Asymptomatic employees who have been identified via contact tracing in I.2.c. as being elevated or high risk will be tested every other day for 14 days starting at the point of contact of a co-worker that is positive for SARS-CoV-2.
2. The employee will remain at work unless they develop symptoms or test positive for SARS-CoV-2.
  - a. At that point we will follow I. – Symptomatic Employee protocols as outlined above.
  - b. If the employee continuously tests negative after 14 days, then testing will be discontinued.

**Appendix A**  
**Risk Assessment Protocol**

# **COVID-19 RISK ASSESSMENT**

## **QUESTIONNAIRE:**

*FOR CO-WORKERS OF A CONFIRMED POSITIVE COVID-19 EMPLOYEE*

*Note to interviewer: Maintain a distance of at least 6 feet when performing any interviews.*

The following questionnaire is designed to evaluate the potential risk to employees of COVID-19 exposure, based on CDC guidance and publications.

**Date of Review:** \_\_\_\_\_

**Name of employee:** \_\_\_\_\_

**Position / Shift** \_\_\_\_\_

**Name of interviewer:** \_\_\_\_\_

**Position:** \_\_\_\_\_

**Reference Date Ranges:** \_\_\_\_\_ (2 days before symptom onset to last date infected employee worked)

### **EXPOSURE ASSESSMENT QUESTIONS:**

Dates worked infected employee (within the reference date ranges):

What areas of the facility did you work while in the presence of the infected employee?

During the reference date range, estimate time spent in different proximity ranges to the infected person:

<b>PROXIMITY</b>	<b>EXAMPLES</b>	<b>TOTAL TIME SPENT (Minutes)</b>
Less than 12"	Talking into someone's ear in a noisy work area	
12" – 3 feet	Working side by side (close enough to touch). Face to face communication	
3 feet – 6 feet	Working in the same area, occasional work within 6 feet	
6 – 10 feet	Maintained standard for "social distancing". Break room or work area.	
Greater than 10 ft	Same room only	

Did the person sneeze or cough while in your presence?

Did they cover their cough?

When did it happen?

How close were you when it happened?

How many other people were within 6 feet when this happened?

Do you remember the names of those people (list)?

Did you make any physical contact, or share food and drink?

What kind of PPE were you wearing, if any, while being within 6 feet of the infected person?

Are you feeling ok or ill today?

## **RISK ASSESSMENT SUMMARY**

Note the best location on the risk chart based on the employee's interaction and duration of exposure with the infected person. Provide notes based on your determination for recommended action.

Exposure	Directly Coughed or Sneezed On	Cough or sneeze < 3 feet	Cough or sneeze < 6 feet	Distance < 3 feet	Distance < 3 feet	Side by Side (3-6 feet)	Social Distanced > 6 feet	Same room > 10 feet
Duration	Once or more	Once or more	Single Incident	Intermittent or > 5 min.	Single or < 5 min.	Any	Any	Any
Risk	HIGH	HIGH	ELEVATED	ELEVATED	MEDIUM	MEDIUM	LOW	LOW
Action	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	Monitor Daily for Symptoms	No Action	No Action

### **Interviewer Notes:**

**Appendix B**  
**Deep Cleaning and Disinfection Protocol**

## Sanitation Standard Operating Procedure Guidelines

### Environmental Cleaning & Disinfection Recommendations for Facilities with Suspected/Confirmed COVID-19 Contagion

In the event that someone in one of our plants tests positive or is suspected of being positive for the COVID-19 virus, please utilize the following guidelines for conducting environmental cleaning and disinfecting of the areas potential exposed to the virus by the individual in question – **employee welfare, common, and production areas**. This would be a **one-time deep clean** reaction (to each event), then followed by the COVID-19 preventative cleaning steps already in place and at the existing frequencies.

**PPE:** Normal PPE for handling cleaning chemicals are required, and normal PPE for conducting cleaning and sanitizing in production areas should be utilized. PPE should protect the individual from the potential of exposure to the virus during cleaning of surfaces. Persons who will be conducting the cleaning in these areas should ensure they are wearing gloves and face shield or eye protection.

- Disposable Gloves
- Rain gear (disposable aprons or smocks in non-wet clean production areas, if available)
- Eye protection or face shield

**Cleaning & Disinfecting Chemicals:** Will be dependent upon the areas to be cleaned and the chemicals available in the facility to be cleaned and disinfected, but could include the following:

- Normal janitorial cleaning/disinfecting products
- Mild detergent or chlorinated alkaline solution (dilute)
- Alcohol or Alcohol/Quat wipes
- Chlorine Dioxide solution (dilute – 100 ppm)
- Quaternary Ammonium Compound solution(Quat, dilute – 200-400 ppm)
- Chlorine solution (dilute bleach or sodium hypochlorite, dilute – 200 ppm)

Concentrations of quat sanitizers can differ from product to product, follow instructions on label for all chemicals.

**Tools:** Use normal cleaning tools for the areas to be cleaned, but any tool that cannot be adequately disinfected or sterilized (steam or ClO<sub>2</sub> gas) must be disposed of. Mop heads, towels and other soft materials used should be single use. Mop handles, buckets, etc. can be disinfected or sterilized.

- Disposable Wipes/towels and Mops
- Buckets and mop buckets
- Dedicated Trash bags
- Spray bottles and pump up sprayers
- Normal plant sanitation equipment

**Instruction/Direction:** All areas where the individual may have exposed surfaces to the virus will need to be identified, isolated, cleared out and cordoned off. Individuals who will be conducting the cleaning and disinfecting should be trained in proper handling of chemicals, proper use and disposal of PPE and cleaning tools, and proper communication to leadership of any findings/potential risks.

**Procedure: Lunch/break rooms, locker/bathrooms, general purpose hallways, other common areas with hard surfaces**

- Seal and remove all trash/garbage bags from the identified areas wearing required PPE and ensuring no stirring up of air.
- Remove any laundry baskets, mark as contaminated, and secure for laundry pick
- Open individual's locker and remove all personal items placing in a sealed bag or otherwise disposing of unnecessary items. Secure in another area for later disinfection.
- Ensure other employees remove any exposed personal items from these areas (lunch boxes, for instance) when clearing the area.
- Once the areas have been cleared, begin wiping down/cleaning all hard surfaces that may have been contacted by the individual or all hard surfaces in the room (lockers, countertops, walls, sinks, faucets, toilets, tables, chairs, benches, keyboards, time clocks, light switches, etc.) with normal cleaning chemicals. Dispose of wipes or towels used for wiping down/cleaning in tightly seal garbage bag.
- Mop floors with normal cleaning solution, changing solution as it gets dirty. Dispose of mop head after use. Utilize wet floor/slippery floor signage as needed – but traffic in these areas should be minimal.
- Allow surfaces to dry. Wet mop or wet wipe with water to remove any remaining or excess soap/cleaning solution residue. Bag up all disposable cleaning material, tightly seal and dispose of in the proper manner (health department guidelines?). If gloves are removed, employee should wash hands and replace with new gloves.
- Disinfect all same surfaces using 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), or alcohol (60-70%, follow label instruction), by spraying or wiping and letting air dry.
- Disinfect all floors by mopping with 100 ppm chlorine dioxide solution, 400 ppm quaternary ammonium solution (follow product label instructions), alcohol (60-70%, follow label instruction), or bleach/chlorine solution (400 ppm, follow label instructions) by spraying or mopping and letting air dry.
- Non disposable cleaning tools (buckets, sprayers, mop handles, etc.) should be isolated (bagged if possible) and removed to be deep cleaned and sterilized later.
- Employees should remove disposable gloves and aprons then immediately wash their hands. Clean other PPE that is not disposable and then wash their hands again. Employees should change out of their uniforms used for cleaning & disinfecting into a new uniform. Dirty uniforms should be gently bagged or isolated for laundering. Boots should be disinfected.

## Office Areas:

- *Same as outlined above for all hard surfaces and personal belongings for the individual.*
- Carpets should NOT be immediately vacuumed. Instead, the carpets should be wet cleaned with carpet cleaner, if available, using soap and water. If carpet cleaning is not an option (or in addition), lightly spray with a 200 – 400 ppm quat solution as above for floors using spray bottles or pump up sprayer on a mist setting. **DO NOT USE Chlorine or Chlorine Dioxide** (may bleach/destroy carpeting). Do NOT soak/drench the carpet – just a light application to dampen the surface of the carpet. Allow to air dry.
- Vacuum carpet areas as per normal after cleaning, sanitizing, and air drying.

## Production Areas or Normal Wet Clean Areas: (One time reaction to positive employee confirmation, focus on areas affected most by the employee)

- Perform normal cleaning and sanitation as soon as it is possible to shut down the areas. COVID-19 is not a food safety issue so the risk to product is small, but the risk to other employees remains – so cleaning the production environment as soon as possible is advised.
- Follow the normal 8 Steps of Wet cleaning with normal PPE but consider face shields for those cleaning the specific areas where the infected individual worked (protect the eyes, nose, face from touching and spraying). Same applies as stated above for glove changing and handwashing.
- During dry cleaning/dry pick up ensure trash bags in the potentially infected area are tightly sealed and disposed of the proper manner.
- Utilized dedicated employees and cleaning tools in areas that were potentially infected, whenever possible.
- Prior to the sanitize step (Step 8), we will need to conduct a disinfection step on all surfaces by following the label instruction on the existing sanitizer or using an alternative (peracetic acid for instance) if the label does not claim disinfection. Allow the required contact time.
- Following disinfection, all product contact surfaces will need to be thoroughly rinsed. The environment does not need to be rinsed – unless there is a risk of interaction with the sanitizer chemical to be used in the next sanitizing step.
- After required rinsing now proceed to the normal procedures for Step 8 – sanitizing at no rinse product contact concentrations.
- Collect, isolate and store all cleaning tools used in potentially infected areas for deep cleaning and sterilization. Launder or otherwise clean rain gear used by employees in contaminated areas. If rain gear cannot be adequately cleaned, then dispose and replace.

**Dry Clean Only Production Areas:**

- Don PPE as above.
- Perform normal dry cleaning with extra emphasis on GENTLE brushing to minimize dusting.
- Remove as much powder and dust from the potentially infected areas by vacuuming with a HEPA filtered vacuum – do not use a centralized vacuum!
- Dispose of vacuum contents and HEPA filter in sealed bags. Remove vacuum cleaner and ancillary parts for deep cleaning and sterilization.
- Wipe down/mop with alcohol all high touch areas and any/all hard surfaces – including floors - that could have been potentially contaminated by the individual.
- Dispose of all wipes & mop heads in a sealed bag.
- May need to consider chlorine dioxide gassing of potentially contaminated dry clean only areas.

**Follow up Cleaning & Sanitizing/Disinfecting:**

- After initial deep cleaning, follow up spraying/wiping of hard surfaces and mopping of floors with disinfectant should occur 2 -3 times per shift as being followed now. In production areas, high touch and potentially contaminated surfaces can also be wiped down – preferably with alcohol wipes – during production 2 – 3 times per shift.
- Continue until further notice.
- Also, the individual's personal belongings and plant PPE/gear should be cleaned and disinfected with alcohol wipes, and potentially bagged and chlorine dioxide gassed. Likewise, employees conducting cleaning and disinfecting tasks in the potentially contaminated areas should detail alcohol clean and disinfect their bump caps, radios, flashlights, other plant PPE/gear that might have been exposed.

Each situation in each plant will present unique challenges and opportunities that may require adjustment to these guidelines for procedures. Please contact Monty Bohanan and/or Don Northrup for discussion and with any questions as these events arise.

## Employee and Visitor Acknowledgement

By clocking in for my shift, I acknowledge my response as “no” to all of the following questions:

1. In the last 14 days, have you or someone living in your household, an intimate partner, or someone you are caring for been diagnosed with COVID-19 (Coronavirus), **or** have received a presumptive positive diagnosis for Covid-19, **or** are symptomatic and undergoing Covid-19 testing?

YES  NO

2. Have you had any close social contact (CDC defined as less than 6 feet) with a confirmed case of COVID-19 in the last 14 days **and** have not completed a Contact Risk Assessment with local LFC Human Resources?

YES  NO

3. Have you or someone living in your household, or an intimate partner, traveled internationally in the last 14 days?

YES  NO

4. Do you currently have, or have you had within the last 24 hours, any cold or flu symptoms and a fever greater than 100.4 F (38 C)?

YES  NO

**NOTE: If you answered “yes” to any of the above questions, do not clock in for your shift, go home, and then notify your supervisor.**

## Social Distancing & Coronavirus Prevention Behavior Expectations

This One Point Lesson is intended to outline expectations to all employees for behaviors as it relates to social distancing and coronavirus prevention at the Fort Morgan Plant.

Coronavirus continues to pose a health and safety risk to individuals during our daily lives. Of the 82 positive Covid-19 cases at the FTM plant, most employees had mild to moderate cold/flu-like symptoms, with 45% of those tested having no symptoms at all. That is why it is imperative that we minimize any potential exposure risk in our plant in order to ensure the safest work environment possible.

Therefore, all employees must abide by the following guidelines. These guidelines are effective immediately and will be enforced until further notice by the Plant Manager:

- ***Wear an N95 face masks if working in an area or performing a task that requires you to be within 6' of another individual.*** N95 masks will also be available for any other individual by request. As with all other masks, N95's may be removed while eating or drinking but are to be put back on immediately afterwards. Due to limited supply of these masks, one mask per employee per day. *Please note: DO NOT drive while wearing the N95 mask as it can pose a significant safety hazard when worn while driving and may result in an accident.*
- ***Do not share personal tools.*** Plant supplied tools that are used by multiple people (example: sample dippers, tools from parts room, etc.) require the user to wear nitrile gloves and to sanitize their gloved hands and the tool before and after each use.
- ***Follow social distancing protocol in the Break room that includes one chair per table, and 6' spacing between people.*** This expectation also includes the outside patio break tables. Additional break room seating is set up in the main conference room upstairs. 6' distancing must also be maintained around the canteen area, microwaves, refrigerator, etc.
- ***Do not share food or drinks at any time.***
- ***Maintain 6' social distancing inside productions areas as much as possible.*** Some jobs may require employees to come within 6' of each other due to their job requirements or communication needs. These interactions need to be as brief as possible and limited to less than 5 minutes. Because some of these interactions are unavoidable due to the nature of the work, we have implemented the N95 mask requirement as further protection for our employees.
- ***Maintain 6' social distancing in the locker rooms, even while changing.*** There are floor markings for you to utilize to help you visualize the required distance from each other. If there is no area available where your locker is, change in another area that is not occupied, and put your belongings in your locker when your area becomes free. Shift start times have been staggered as much as possible to limit the amount of people in the locker room at one time. If there is no available place to change, there are floor markings outside the locker room that identify where to wait while maintaining social distancing.
- ***Observe the one-way locker room travel guidelines.*** You may enter the locker rooms from the clean locker room entrance only and exit from the red line room side only.

- **Maintain 6' social distancing around the time clocks.** Floor markings are there to help indicate where you may stand while waiting to clock in and/or out.
- **If you have any COVID-19, cold, or flu-like symptoms, do not report to work.** Contact the Attendance Hotline and the HR Department. If you become ill while at work, you are to notify your supervisor immediately so that your work area can be cleaned and sanitized following your departure from the plant. Do not return to work until you have contacted HR and have been cleared to return to work.
- **If you live in the same household as someone who is displaying any COVID-19 like symptoms, you are not to report to work.** Contact the Attendance Hotline and the HR Department for guidance.

Please note that the social distancing and coronavirus prevention behaviors outlined in this document are in the best interest of all Fort Morgan employees, and will be enforced accordingly including corrective action.

In addition to the expectations employees must follow at work, we also strongly encourage all employees to follow state social distancing and “safer-at-home” guidelines while not at work, such as wearing face covers when out in public places (i.e. grocery stores), minimizing participation at social gatherings with more than 10 people, practicing good hand sanitizing practices, etc.

The safety and health of our employees is our utmost concern and includes encouraging you to always practice safe behaviors, not just while at work.

Do you want to say any delays caused by these practices (e.g. waiting for locker room or time clock) will not impact your pay? To contact HR if any issues?

## Topic Alert – Forklift/EPJ Sanitation

- Why:**  
To meet the spirit of OSHA 1910.106, the implementing rule, cleaning procedures for forklifts is part of the OSHA 1910.106.
- Required Action:**  
To see what your forklift cleaning procedure is for the available information for your fleet, go to [www.osha-slc.com](http://www.osha-slc.com)
- Guidelines:**
1. Use a certified forklift cleaner (FC) cleaner or approved glove gloves at all times.
  2. Remove all oil and grease and inspect, test, and lubricate the forklift before use.
  3. Use a forklift cleaner (FC) cleaner at all times.
  4. Use a forklift cleaner (FC) cleaner at all times.
  5. Use a forklift cleaner (FC) cleaner at all times.
