- People are encouraged to only leave home for essential reasons (e.g. essential work or for grocery shopping, etc.)
- Social distancing is encouraged
- Wearing of masks in public is encouraged and may become mandatory
- All city parks and public facilities are closed and public gatherings of more than 10 people are banned
- More stringent measures may be on the horizon depending on the spread of the disease

To this point, CVPD and other city departments have relied on public education, information campaigns and voluntary compliance. This has worked to some extent, but city staff still have a steady stream of reports of people in public violating the core health advisories. While police department personnel can reach most areas of the city via vehicle or on foot, some large areas, or areas of rugged terrain may make it impractical.

Limited use of speaker-equipped drones proposed:

CVPD has several small drones which may be equipped with a speaker to give pre-recorded announcements or live announcements from about 50'-75' above the ground (above that height, the speaker is less effective). The police department has a total of 4 speaker equipped drones in its fleet.

Sample homeless outreach announcement (urban canyons/encampments): "This is a public health advisory. This is the Chula Vista Police Department. We are concerned about your safety due to the current pandemic. There are handwashing stations, social services and shelter space available. If you choose not to seek help, please wear a mask and observe social distancing for your health and safety. Please contact any CVPD officer or call 211 for more information"

Sample public announcement script for closed public area violations: "This is a public health advisory. This is the Chula Vista Police Department. All city parks, public spaces and trails are closed due to the current pandemic and we are concerned for your safety. We are requesting that you leave the area and return home. Also, please wear a mask and observe social distancing when in public". Please note this script would only be used in an emergency or extreme situation. In most cases, officers will use the patrol vehicle loud speaker to make announcements.

<image001.jpg>

Sample Speaker Equipped Drone

CVPD has not used speaker equipped drones in real-world scenarios to date, but it has considered their use in a variety of scenarios where traditional air support may be unavailable or delayed. Some California agencies have been using speaker equipped drones under certain limited circumstances, such as:

- Making announcements while searching for missing persons in an area (especially when helicopters are not available)
- Making announcements to persons in difficult to reach terrain
- Making announcements through doors or windows on burglary calls or other unknown or dangerous scenarios asking occupants to come out so officers do not have to expose themselves to communicate

There are several key benefits to such use cases as well as new uses outlined below, which are even more relevant in the current response pandemic:

- CVPD has very limited staff and will be stretched thin during the pandemic. Using drones can help officers reach more people over a larger area in a timely manner to deliver information via speaker:
 - Advise of social distancing and use of masks and ask for voluntary compliance
 - Advise of park/public area/trail closures and ask for voluntary compliance
 - Advise and maintain order with large groups (larger than 10) or social distancing under certain circumstances
 - If the department is directed to move to a “warning” or “enforcement” stance later in the pandemic response, the drones can be used to give fair warning, ask for compliance or give directions to people in difficult to reach areas (trails, parks, large closed areas of rugged terrain, etc.)
- Social distancing is important to our staff – using drones to maintain distance from individuals or groups may keep them safer under some circumstances
- Drones may be used to make scripted announcements to homeless encampments and communities in urban canyons and other difficult to reach areas. Such announcements may include:
 - Information about health precautions related to the virus (i.e.: use of masks, social distancing, sanitation and cleanliness, etc.)
 - Information about seeking health care should they have symptoms
 - Information about the location of wash stations, shelter opportunities, food distribution centers and social services
 - Communicate any other health or enforcement related information to groups if necessary

CVPD drones never be used for certain tasks:

- CVPD drones will not use any form of microphone or listening device – they can only broadcast via the speaker
- CVPD drones will not use night vision cameras on speaker equipped drones
- CVPD drones will not be used for random patrol or surveillance of citizens or lawful gatherings
- CVPD drones will not be weaponized in any form (lethal or less lethal)
- CVPD drones will not utilize facial recognition software

Conclusion:

CVPD’s drone team values community trust and input and is extremely sensitive to the public perception of police drones. At the same time, public health and safety and the safety of our first responders is of paramount importance during this unprecedented outbreak. CVPD will need every tool available to respond to the crisis to keep the community safe. CVPD’s proposed use of speaker equipped drones is lawful and Constitutional as outlined in the above noted use cases. CVPD is also working with the Federal Aviation Administration for the necessary waivers for deployment of speaker equipped drones and will operate fully within FAA regulations and the agency’s waivers.

Please let me know of any thoughts or concerns you might have as soon as possible. The situation is fast moving and unpredictable and we are doing our best to stay ahead of the impact on our community. Thank you for your thoughts and support during this challenging time. I am confident that with your support and the support of our community that our team at CVPD is up to the task at hand and we will emerge an even stronger community.

History of CVPD drone program:

CVPD's current drone program began in 2016 with the formation of a Unmanned Aerial System (UAS or Drone) working group. The UAS working group researched police use of drones, best practices and policies, civil rights implications of police drones and solicited community input. CVPD officials met with community leaders, held public forums, engaged with the Community Advisory Committee and developed UAS program policies and procedures with public input that conformed to the expectations of our community. CVPD also established a UAS website to share important topics such as Frequently Asked Questions (FAQ's) and to allow the community to see policies and program details and ask questions via email. This website has expanded with the program and become more transparent as the program progressed. In fact, CVPD's UAS program is nationally recognized and is often cited as the benchmark of public safety drone programs with regard to accountability, transparency and community engagement.

In May 2018, CVPD's drone program was selected by the FAA to participate in the newly formed UAS Integration Pilot Program. In October 2018, CVPD started operations known as Drone as a First Responder (DFR) to deploy drones pro-actively to calls for service. The concept of DFR is to launch a drone pro-actively to calls with the goal of arriving first to live stream video of the call to give better information to first responders. Better intelligence and situational awareness allows first responders to make better plans and respond with the appropriate tools, tactics and resources. This results in increased efficiency, better call outcomes and has proven to be a powerful de-escalation tool.

To date, CVPD has flown over 1,917 missions in support of priority calls for service with an average response time of less than three minutes. CVPD has also partnered with the Chula Vista Fire Department to share critical live stream information with their Battalion Chiefs and Captains as they respond to emergencies. DFR is a powerful new public safety tool that benefits both the police department and the fire department and makes Chula Vista safer. Chula Vista's drone program is successful to a great extent because of stakeholder and community support. The police department has always endeavored to be as transparent as possible and operates the program knowing that it is ultimately accountable to stakeholders, local leaders and the community at large.

For more information please see the department's UAS website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>.

Hi George,

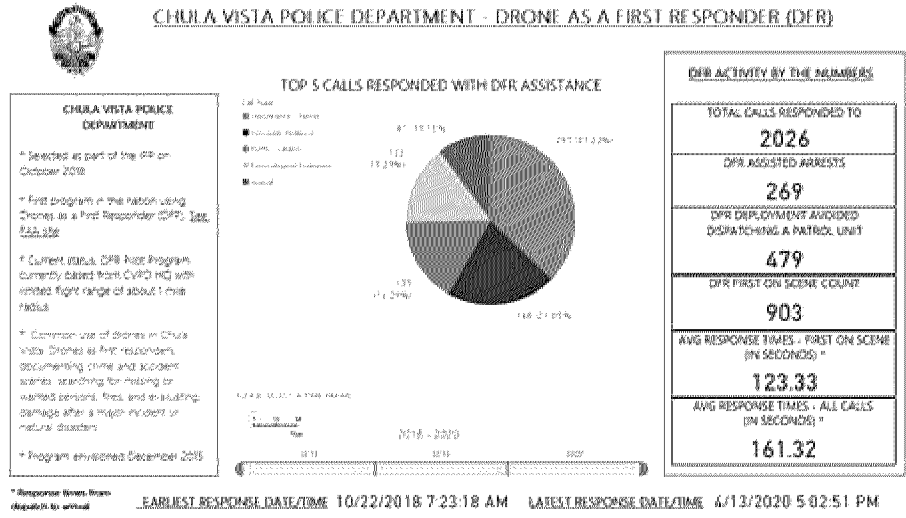

Thanks for reconnecting, things are fine here overall and I hope you and your family and colleagues are doing well. We have two fixed launch sites with a 3NM radius to each and we are hoping to have FAA approval shortly to stand up 2-3 more sites in other sites of our city to have near 100% coverage 7 days a week (70 hours). We outsourced our PICs at the launch sites to a company called Flying Lion to help us reduce the need for sworn staffing to do those tasks. It also allows us more flexibility and scalability. Finally, we just surpassed 2,000 DFR flights over the weekend so it's still going strong and we hope to expand further. Those are the major highlights. Link and snapshot of our dashboard below.

Stay well,
Vern

How Will COVID-19 Impact the Present and Future of the Drone Industry?

Tuesday, April 28, 2020 | 11:00AM – 12:00PM Eastern Time

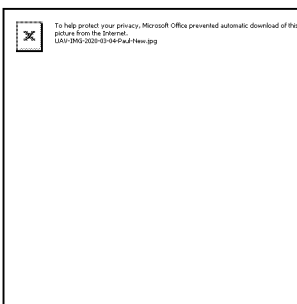

The ways businesses function have already been reshaped by COVID-19, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are coming and the impact of the pandemic will be seen and felt by the drone industry over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like?

Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Hi George,

Thanks for reconnecting, things are fine here overall and I hope you and your family and colleagues are doing well. We have two fixed launch sites with a 3NM radius to each and we are hoping to have FAA approval shortly to stand up 2-3 more sites in other sites of our city to have near 100% coverage 7 days a week (70 hours). We outsourced our PICs at the launch sites to a company called Flying Lion to help us reduce the need for sworn staffing to do those tasks. It also allows us more flexibility and scalability. Finally, we just surpassed 2,000 DFR flights over the weekend so it's still going strong and we hope to expand further. Those are the major highlights. Link and snapshot of our dashboard below.

Stay well,
Vern

Wally,

Phil had a good idea to shorten and make the text pop:

- Square miles covered by drone = 8
- Encampments reached = 26
- People offered services via speaker = 16
- Persons personally served = 3
- Time to provide outreach and service = 3 hours
- Time to provide same service without drone support = 2 days

FROM THE EDITOR

Greetings!

Every day, drones are making headlines in the fight against COVID-19. New technologies like indoor UV-light sanitation drones are being developed. Tested technologies, like agricultural spray drones, are being repurposed. Drones are being used to inform and encourage citizens to observe shelter-in-place rules, which is generating some public concern; and, where there are opportunities, drone delivery is being tested out in earnest. With the added necessity for social distancing, traditional tasks for commercial drones like asset management, inspections, surveillance, and data collection, have become even more compelling. These new developments seem to indicate that there is growing mainstream interest in the capabilities of drone technology. And in the long term, this should be a good thing for the industry.

But translating that interest into dollars, especially in the here and now, is a much more complicated task. Regulatory bodies are working at half capacity, supply chains have been globally interrupted, unemployment is growing, non-essential businesses that can't function remotely are effectively shut down, and, in an effort to keep the lights on, businesses are having to make tough decisions about how they are going to weather the storm. All of these conditions are impacting how businesses within our industry can operate—we may be able to fly, but the businesses we serve may not be operational or able to invest in our services. Our

feature story with Brandon Torres Declet CEO of MEASURE explores what this means for the drone industry, what we can do to mitigate the impact, and more.

"The biggest thing to keep in mind is that we will persevere," stated Declet in his interview. "We all have to focus on communicating the value that drone technology and associated software offers our clients. If we stay with that, I believe we'll get through this."

Be well and stay safe!

Brandon Torres Delet, CEO of MEASURE, Discusses the Macroeconomic Effects of COVID-19 on the Drone Industry

By Danielle Gagne

Brandon Torres Delet, CEO of MEASURE, has been speaking about the potential macroeconomic effects on the drone industry since this crisis began. Wanting to explore his insights further and what this crisis could mean for the industry in the short and long term, Commercial UAV News connected with Delet to discuss how the economic impact of this crisis is affecting, and could affect, the industry; ways he thinks we can mitigate the impact; how this crisis may impact important regulations like Remote ID; and more.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it’s our goal to provide our communities with resources that can help them make sense of both. We’re taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What’s the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

Tuesday, April 28, 2020 | 11:00AM - 12:00PM Eastern Time

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What

has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

Wednesday, May 13, 2020 | 12:00PM - 1:00PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Subject: Smart Cities DFR Presentation
When: Monday, April 20, 2020 8:00 AM-5:00 PM (UTC-08:00) Pacific Time (US & Canada).
Where: DFR

Not sure who was working this day so I included both.

Hi Dennis and Heather, we'll be happy to host again. I'm copying the Chief and my drone program manager to mark their calendars for April 20th. If you need more info to promote the tour, you can point them to our website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

we just surpassed 1,300 flights with over 200 arrests attributable to the program. Keep in mind that we don't fly in bad wind and rain, but weather permitting we can do flight demos. Even if we had bad weather (which is rare in CV) we could tour and show our videos and presentation.

**Best,
Vern**

Subject: tour of Chula Vista at Smart Cities Week 2020

Warning:
External
Email

Hi Dennis,

Happy New Year! I'm reaching out because we are kicking things into high gear for Smart Cities Week 2020 and I'm hopeful that we can once again showcase the City of Chula Vista at the event.

We are working with a new logistics partner, based here in the States--the folks at the Wireless Infrastructure Association. We're very excited, but it's also been a lengthy transition process, so I'm just now getting things off the ground in regards to programming.

We intend to offer mobile workshops at this year's event and would really like to bring a group to Chula Vista for another "Drones as First Responders" tour.

We are targeting Monday, April 20 in the afternoon--I believe around 1:30PM, once we factor in transportation from the venue.

Can you let me know what next steps would look like in order to move forward with replicating this tour?

Of course, we would love to welcome Mayor Salas as well as yourself and others from the City back as speakers! I'm working on the agenda and can make more specific asks on that front in the next week or so.

In the interim, let me know your thoughts on the tour! I hope you and your family are well and enjoyed the holidays!

Best,
Heather

Hi Wally,

The video is great but the Chief wanted a slight modification of the stats at the end, perhaps a fade in and out of the following:

- CVPD's Homeless Outreach Team (H.O.T.) team is using tool possible to communicate with and serve our community's most vulnerable populations
- On April 15th, members of the H.O.T team and CVPD drone team partnered with social service and health providers to reach unsheltered persons in difficult to reach areas
- By using speaker equipped drones, CVPD was able to cover 8 square miles of challenging canyon terrain in an effort to communicate with persons at risk from COVID-19
- The homeless persons living in the canyons were offered free health screenings, social services, hygiene kits, food and they were educated about how to stay clean to prevent the spread of COVID-19 in our community
- This innovative approach allowed the H.O.T. Team to cover 8 square miles of difficult to reach canyon areas that they would have otherwise had to cover on foot
- 26 active homeless encampments were identified and reached via speaker
- 16 people were seen and offered services via speaker
- 3 people chose to receive services with the nurse and social workers and were provided food and hygiene kits
- The total time to provide these services was 3 hours. H.O.T. team members estimated it would have taken them two full days of difficult hiking to provide the same service without drone assistance
- The use of speaker equipped drones for outreach in difficult terrain helps the H.O.T. team cover the area faster so they more available to serve other unsheltered persons in our community and help prevent the spread of COVID-19
- The Chula Vista Police Department is working hard to serve and protect every member of our community, especially the most vulnerable during these challenging times
- Chula Vista Police Department – The Heart Behind the Badge

Close with the stay safe CV branding

Episode 34: Are drones really helping fight COVID-19, DJI rumors, and more

This week on the InterDrone Podcast, the team sat down to discuss DJI's rebuttal of the rumors that they're closing their US operations, they discussed using drones to disinfect large indoor areas to rid them of COVID-19, the petition for a drone emoji, and more. As with all episodes, the podcast concluded with the latest in UAS industry funding. View funding, or submit your round of funding [here](#).

Subject: 2020 Goldstein Awards

Dear Colleague:

Each year in advance of the Annual Problem-Oriented Policing Conference, the POP Center puts out a call for submissions for projects to be considered for the Herman Goldstein Award for Excellence in Problem-Oriented Policing. The award recognizes outstanding police officers and police agencies that engage in innovative and effective problem-solving efforts and achieve measurable success in reducing specific crime, disorder, and public-safety problems. We encourage you to submit your agencies' project(s) for consideration for this year's award. The finalists for the award are invited to present their projects at the conference, and the audience judges each project to help determine the overall winner. The submission of your projects contributes greatly to the growing body of knowledge about what works in policing. All Goldstein Award submissions are added to our website, which is searchable, and used by police around the world.

At this time, no final decision has been made regarding the status of the 2020 POP Conference, which is currently scheduled to be held from September 28-30 in Ann Arbor, Michigan. We anticipate that by early June we will have better information upon which to move forward with, delay or cancel the conference. Regardless, the Goldstein Awards are proceeding as normal. Should the conference be cancelled or rescheduled, submissions from this year can be updated and resubmitted for the 2021 conference. For more information on how to submit your project for consideration, and to view submissions from past winners and finalists, please click the link below. The submission deadline for this year's award is **June 1, 2020**.

[Goldstein Award Submission Guidelines](#)

Sincerely,
Center for Problem-Oriented Policing

Hi George,

Thanks for reconnecting, things are fine here overall and I hope you and your family and colleagues are doing well. We have two fixed launch sites with a 3NM radius to each and we are hoping to have FAA approval shortly to stand up 2-3 more sites in other sites of our city to have near 100% coverage 7 days a week (70 hours). We outsourced our PICs at the launch sites to a company called Flying Lion to help us reduce the need for sworn staffing to do those tasks. It also allows us more flexibility and scalability. Finally, we just surpassed 2,000 DFR flights over the weekend so it's still going strong and we hope to expand further. Those are the major highlights. Link and snapshot of our dashboard below.

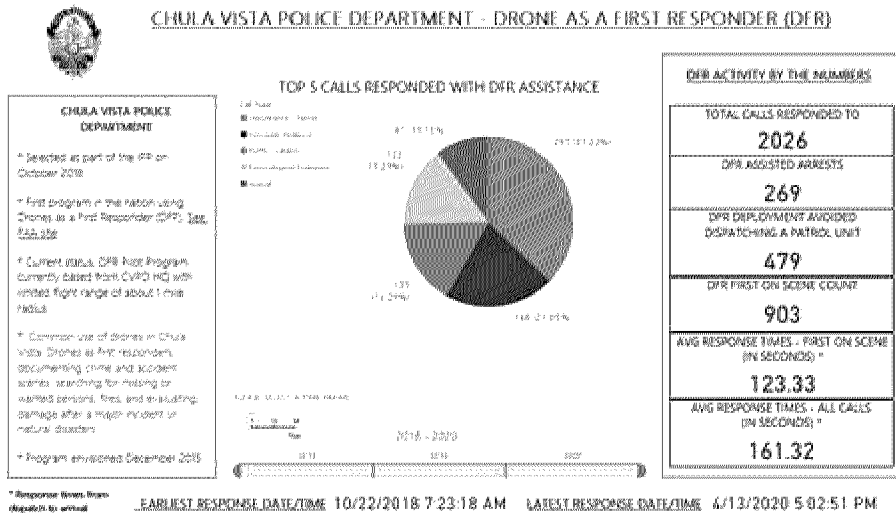

Stay well,

Hi Mario,

I'm the Captain in charge of CVPD's drone program. As just a point of clarification, we did not help them set up their program. They did a tour last year of our program and they decided to emulate our program to some extent. While we both use the same hardware and software, operationally, they are very different. Please give me a call at 619-691-5218 to discuss and then we can set a time to meet.

Best,
Vern

Hello, we are trying to set up a story to run on Monday with the Tijuana Police Department on their new drone program.

We understand Chula Vista Police helped set them up with the operation.
Would you be willing to do an online interview on Monday to talk about it?

Mario

Hi Mario, it was a pleasure speaking with you. Attached is a copy of an article that I wrote for Police Chief Magazine about our DFR program and below is a link to our program on our website. A big difference between our programs is public transparency and accountability, which you can see with our outreach efforts.

Chief Kennedy and Captain Sallee,

I appreciate your time this morning. Thank you for sending the information. I look forward to your presentation to our work group.

Please meet my friend, and fellow Commission Federal Program Manager, Dr. Laura Wyckoff. Dr. Wyckoff is leading the Social Problems Working Group.

Laura,

Please meet my friends, Chief Roxana Kennedy and Captain Vern Sallee, from the Chula Vista (CA) Police Department. The Chula Vista Drone Program is awesome. Chief Kennedy and Captain Sallee will present to my Technology Working Group next Wednesday afternoon.

The link and the attachment illustrate how this innovative leadership team is using their drone program in support of homeless outreach.

Thank you all.

Subject: 2020 Goldstein Awards

Warning:
External
Email

Dear Colleague:

Each year in advance of the Annual Problem-Oriented Policing Conference, the POP Center puts out a call for submissions for projects to be considered for the Herman Goldstein Award for Excellence in Problem-Oriented Policing. The award recognizes outstanding police officers and police agencies that engage in innovative and effective problem-solving efforts and achieve measurable success in reducing specific crime, disorder, and public-safety problems. We encourage you to submit your agencies' project(s) for consideration for this year's award. The finalists for the award are invited to present their projects at the conference, and the audience judges each project to help determine the overall winner. The submission of your projects contributes greatly to the growing body of knowledge about what works in policing. All Goldstein Award submissions are added to our website, which is searchable, and used by police around the world.

At this time, no final decision has been made regarding the status of the 2020 POP Conference, which is currently scheduled to be held from September 28-30 in Ann Arbor, Michigan. We anticipate that by early June we will have better information upon which to move forward with, delay or cancel the conference. Regardless, the Goldstein Awards are proceeding as normal. Should the conference be cancelled or rescheduled, submissions from this year can be updated and resubmitted for the 2021 conference. For more information on how to submit your project for consideration, and to view

submissions from past winners and finalists, please click the link below. The submission deadline for this year's award is **June 1, 2020**.

Hello Captain,

It was a pleasure to speak with you this morning.

As we discussed this morning, here are some available dates for a remote demo of FD1DRONE's advance Ai solutions powered by Moss analytics.

Next week anytime after 9am pst.

The following dates:

04/22 or 04/24.

You also mentioned we could coordinate/schedule everything through Kirby or Don Redman?

Here is my direct cell **PERSONAL/PRIV** for any questions.

preview:<https://www.fly-drone.com>

Location of interest TBD but can be anywhere there is good subject matter.

Cheers

National News

USA Today: Protests draw thousands over state stay-at-home orders during coronavirus pandemic

Multiple states have seen protests as stay-a-home orders meant to curb the spread of the coronavirus continue.

Many protesters were angry about the economic ramifications the restrictions are causing.

The protests are occurring as President Donald Trump and governors debate over when states should loosen the restrictions put in place to ensure people practice social distancing.

CNBC: Scammers are defrauding unemployed Americans

Americans are filing for unemployment benefits in record numbers, and scammers are trying to cash in.

Fraudsters are swarming to take advantage of the health and economic crises caused by the coronavirus.

Amid the schemes is one in which scammers offer to help individuals file for unemployment insurance benefits, the U.S. Department of Labor's Office of Inspector General said Thursday in a fraud alert.

Local News

Baltimore Sun: Dysfunction in Baltimore police homicide unit went unaddressed as killings hit historic levels

During Baltimore Police Commissioner Michael Harrison's first week on the job last year, a top aide sent him a short, casual email: "For reading whenever you have a chance."

Attached was a detailed report — marked "NOT FOR DISSEMINATION" — that in staid language made clear that the city's homicide unit was highly dysfunctional, ineffective and in need of immediate reform.

There were too few detectives with too little training, supervision and equipment. And they had more cases than they could handle. Instead of catching killers, they were placing unsolved investigations on the back burner within a matter of weeks, with no effective process for dealing with the cold cases that inevitably piled up.

The Police Executive Research Forum had produced the taxpayer-funded report in 2016 to help reverse a worrying decline in solved cases.

But instead of implementing the plans, the Baltimore Police Department mostly sat on them — and kept them from the public — as it churned through three police commissioners and the city racked up another thousand homicides. In the process, the department's rate of solving cases tumbled even lower, to roughly half the national average for cities of Baltimore's size.

KCRA Sacramento: Q&A: Sacramento Police Chief weighs in on enforcing stay-at-home order

Sacramento Police Department announced Wednesday that law enforcement agencies across the area will start enforcing the stay-at-home order.

Sacramento Police Chief Daniel Hahn spoke with KCRA 3's Marlei Martinez about what changes due to the coronavirus mean for the public and police officers.

Oklahoman: OKC police unveils \$50,000 drone program

The Oklahoma City Police Department on Wednesday unveiled two drones for use at the scenes of traffic accidents and outdoor crimes.

The drone program cost about \$50,000 and will help investigators create 3D renderings of scenes.

International News

Driving.co.uk: Metropolitan Police launch road crimes team as driving behavior worsens under lockdown

London's Metropolitan Police have launched a new team intended to stop the city's most dangerous drivers.

The Road Crime team, launched on Tuesday, has already made key arrests, according to its lead, Detective Superintendent Andy Cox.

DS Cox spoke to Driving.co.uk last week about extreme speeding in and around London during the lockdown, one instance of which was a Tesla driver going at 134mph in a 40mph zone. Subsequent incidents include someone driving at 151mph on the M1 — more than twice the speed limit.

Police Executive Appointments

Chicago Tribune: David Brown takes post as Chicago's acting top cop

Former Dallas police Chief David Brown took over the reins Wednesday afternoon as Chicago's acting police superintendent, city officials said, days before the job is expected to become permanent.

At a ceremony in police headquarters for outgoing interim Superintendent Charlie Beck, he presented his superintendent's star to Brown, who is now in charge of the nation's second largest police department.

Good News of the Day

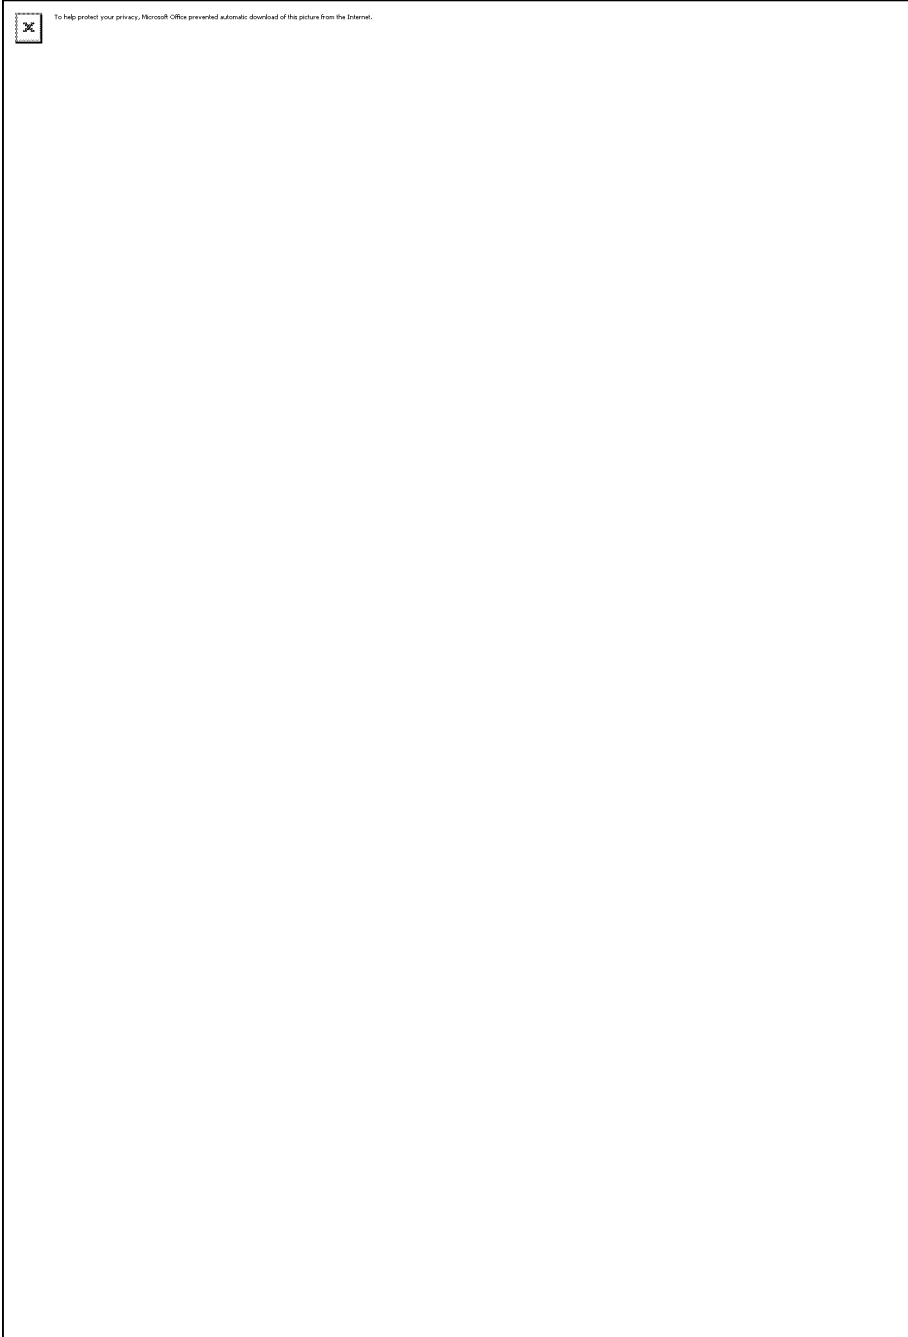

Columbus Dispatch: Columbus police officer drives to Virginia to reunite dog with owner

A Columbus police officer went above and beyond over the weekend to reunite a dog with its rightful owner.

Officer Dana Rogers, who joined the division in 2017, said in an email to The Dispatch that the dog had been dropped off at a police substation near the division's training academy on North Hague Avenue on the city's West Side.

The dog, an 8-year-old Jack Russell Terrier, was found by Rogers' sergeant at the start of the second shift Saturday and had a harness, leash and collar with tags identifying her as "Sadie."

US Marines Make First Operational GA-ASI MQ-9A Flight in Middle East

By The Editor on Apr 17, 2020 06:59 am

On March 20, 2020, U.S. Marine Corps (USMC) pilots and sensor operators from Marine Unmanned Aerial Vehicle Squadron 1 (VMU-1) conducted their first operational flight of an MQ-9A Reaper in the Middle East. The multi-sensor reconnaissance-equipped MQ-9A UAS produced by General Atomics Aeronautical Systems, Inc. has provided crucial support to USMC's forward operations on the [...]

Dornier 335 – Hitler's Steel Arrow

By The Editor on Apr 17, 2020 06:00 am

One of WWII's strangest aircraft was also one of its best. The Dornier Do 335 Pfeil ("Arrow") was a Nazi Germany World War II heavy fighter built by the Dornier company. The two-seater trainer version was called Ameisenbär ("anteater"). The Pfeil's performance was much better than other twin-engine designs due to its unique push-pull configuration [...]

Hi Charles,

Thanks for the follow up. As we discussed, we are in emergency operations for COVID-19 and not really “tackling” anything new with our drone program at the moment. We really are stretched thin tech and staffing-wise. We really do rely on Motorola as our integrator for our software so Gopal really is the person to take a look at new technology.

That being said, at Kirby’s convenience, he can evaluate your technology and how it may be integrated into our program. He has some priorities he’s working on for us so the dates you are proposing may be overly optimistic. Kirby will touch base with you to see when he can fit you in. Even then, it will be some time before we can tackle anything new – our first priority is adding launch sites, not analytics. The analytics should come from our Motorola service provider.

Best,
Vern

Hello Captain,

It was a pleasure to speak with you this morning.

As we discussed this morning, here are some available dates for a remote demo of FD1DRONE's advance Ai solutions powered by Moss analytics.

Next week anytime after 9am pst.

The following dates:

04/22 or 04/24.

You also mentioned we could coordinate/schedule everything through Kirby or Don Redman?

Here is my direct cell **PERSONAL/PRI** for any questions

Subject: NBC News question - on a deadline

Hi there,

I'm April, a journalist at NBC News. I'm writing because we're looking into a story about all the unexpected ways first responders are using drones during the pandemic, especially to reach people when everyone is supposed to be social distancing, per CDC guidelines.

I'm curious if you all have used your drones for homeless outreach yet, or if that's just being discussed now. I saw in some of the interviews already done with your department and the press that this is something you all have considered, but I haven't seen it reported that homeless outreach or interacting with your homeless communities is a way that drones are now being used.

Is anyone available to comment on this? Feel free to call me anytime,
too 415-917-7510

Hope this finds you well in these deeply uncertain times.
All my best,
-April

Please describe the incident that led to this commendation.

Question: How does the CVPD best serve the community of Chula Vista -- including the most vulnerable populations -- during the COVID-19 pandemic?

There are numerous answers to this important question, and one of them is this: reach out to homeless individuals who are living in isolated areas of our community.

And this action was effectively initiated on April 15, and included intelligent and ethical utilization of the Department drones, and help from some appropriate resources external to the Department.

Great work. And you definitely have full community support -- and we feel pride in our Department -- when you take actions like this.

Hi Mario,

I'm the Captain in charge of CVPD's drone program. As just a point of clarification, we did not help them set up their program. They did a tour last year of our program and they decided to emulate our program to some extent. While we both use the same hardware and software, operationally, they are very different. Please give me a call at 619-691-5218 to discuss and then we can set a time to meet.

Captain,

You mentioned that we might be able to do this in person and send a crew to the station.

Is that still a possibility?

If so, reporter Brandon Lewis and His videographer Brain White could come by around 11 am and keep the social distancing requirements?

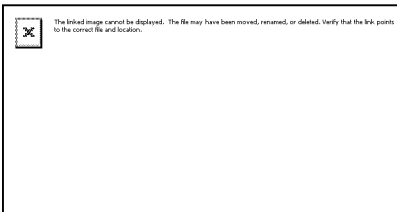

If not he can send over a Zoom invite for an 11 am interview.

Let me know, Thank you.

Mario

Hi Mario,

I'm the Captain in charge of CVPD's drone program. As just a point of clarification, we did not help them set up their program. They did a tour last year of our program and they decided to emulate our program to some extent. While we

both use the same hardware and software, operationally, they are very different. Please give me a call at 619-691-5218 to discuss and then we can set a time to meet.

Hi George,

Thanks for reconnecting, things are fine here overall and I hope you and your family and colleagues are doing well. We have two fixed launch sites with a 3NM radius to each and we are hoping to have FAA

approval shortly to stand up 2-3 more sites in other sites of our city to have near 100% coverage 7 days a week (70 hours). We outsourced our PICs at the launch sites to a company called Flying Lion to help us reduce the need for sworn staffing to do those tasks. It also allows us more flexibility and scalability. Finally, we just surpassed 2,000 DFR flights over the weekend so it's still going strong and we hope to expand further. Those are the major highlights. Link and snapshot of our dashboard below.

Stay well,
Vern

Hi Vern,

Great to hear from you, and thank you for sharing an update on this. I think it would be a great time to highlight the positive results of using this technology for public communication, especially with what is going on in New York and the recent coverage by DroneLife. A lot of these stories are grassroots efforts but Chula Vista is creating policy and rules around how this can be used and that I think is an important thing to highlight.

On a similar but tangential note, what do you make of AceCore's new loudspeaker drone?

Let me know if you'd be open to a quick call to grab a few original quotes.

Take care.

Danielle

Good day all! Hope you are all safe and healthy.

We've received the guidance and have looked through it. Thank you Lisa. Our first interest for Colorado is to build out a template by which an entity can facilitate the requests for help via the Governor. I have my staff working to draft this template. Could simply be guidance with contact info, could be a fill in the blank form etc. We'd be interested to share a draft for review by this group when we've got something together.

In Colorado, we're supporting our fusion center as the state level coordinator of such a request. Our hope, is that by doing so, we help our stakeholders across the state with expeditious access to federal C-UAS resources in addition to native resources.

It's like helping agencies with CoA's all over again.

Thank you and be safe,

Ben Miller

Good morning,

The COPS Office has requested that we share the following memorandum from the Attorney General regarding counter-drone activities authorized under the Preventing Emerging Threats Act of 2018 – *Guidance Regarding Department Activities to Protect Certain Facilities or Assets from Unmanned Aircraft and Unmanned Aircraft Systems*.

We hope everyone is staying safe and healthy. We will be in touch in the near future regarding the third meeting of the state and local UAS Working Group.

Sincerely,

Lisa M. Mantel

DJI Mavic Air 2 User Manual Leak Reveals New Details

By The Editor on Apr 20, 2020 06:57 am

DJI is on the verge of releasing a sequel to the much-loved Mavic Air, two years after the popular drone was announced. The clues of a Mavic Air 2 landing soon came after images leaked online in March, with an FCC filing arriving soon after. And now DJI has teased a launch event set for April 27. [...]

Iranian Army Gets Combat Drones with 930-Mile

Range

By The Editor on Apr 20, 2020 06:44 am

The Iranian armed forces have acquired three bomb-carrying drones with a range of 1,500 kilometers (932 miles), Defense Minister Amir Hatami said on Saturday. Speaking at a ceremony on the delivery of the unmanned aerial vehicles, Defense Minister Brigadier General Amir Hatami said the Army is receiving three types of pilotless aircraft manufactured by domestic defense [...]

Subject: Sallee Bio

Follow Up Flag: Follow up
Flag Status: Completed

Captain Vern Sallee began his law enforcement career in 1995 as a CVPD sponsored recruit and attended the San Diego Regional Police Academy.

Since October 2018, Captain Sallee has led a significant expansion CVPD's UAS program known as Drone as a First Responder (DFR) as part of the Federal Aviation Administration's UAS Integration Pilot Program (IPP). CVPD's groundbreaking DFR program has been recognized nationally as a revolutionary public safety model which provides real-time video and decision quality data to officers on routine calls for service. Captain Sallee is a subject matter expert with the Office of Community Oriented Policing (COPS Office) UAS Working group, to help develop guidance for police agencies to effectively use UAS technology to enhance public safety, while also protecting the public from the malicious use of UAS. He has also represented CVPD as a presenter and subject matter expert on police use of drones at the FBIAA national conference, the IACP technology conference, the IACP national conference and numerous other UAS and public safety forums.

Captain Sallee serves as the Police Department's representative on the City of Chula Vista's Smart Cities team; with the goal of utilizing technology and partnerships to improve municipal services and responsiveness throughout the City. Finally, Captain Sallee has led efforts to improve department transparency by leading the department's participation in the White House Police Data Initiative. Captain Sallee led Chula Vista's efforts to be one of the first 53 police departments in the country to commit to publicly sharing data on citizen complaints, officer demographics and other non-crime related statistics to improve transparency and community trust.

Captain Sallee has a Master of Science Degree in Administrative Studies with a criminal justice emphasis from Missouri State University and a bachelor's degree in psychology from San Diego State University. He is a graduate of the Los Angeles Police Department Leadership Program, California P.O.S.T. Command College (Class 53) and the FBI National Academy (Class 270). He has been published in Police Chief Magazine and is a former adjunct community college instructor; having taught police ethics, forensic photography and police community relations.

Subject: 2nd Drone overflight in support of HOT Outreach mission

Captain,

We are planning to do the second drone overflight of encampments in support of the HOT Team's outreach mission this Friday (04/24/20) at 0900. The drone team will arrive on site at 0800 to setup and the HOT Team will arrive at 0900 for a 0900 start.

The location will be the Bonita "jungle" area with the Hot Team staging and Drone LZ on Plaza Bonita Road just north of Bonita Road.

Please let me know if this works for you so I can move forward with the ops plan.

Email**

Dear Captain Sallee -

We're connected on LinkedIn, here is me (<https://www.linkedin.com/in/smita-majumder/>), just so this is not anonymous.

I wanted to reach out to you to talk about introducing autonomous swarm control to your existing drone solution in Chula Vista.

I'd like to introduce Unmanned Life (unmanned.life), *an intelligent platform that can control and coordinate a swarm of drones, tasked with different payloads (like loudspeakers, cameras, thermal imaging, etc), all controlled through a single interface.*

I am aware that Chula Vista has been using drones for crowd control, but ***I would love to speak with you about our solution, especially since it will work with your current drones, without having to buy new drones.***

Two things I'd love for you to consider when thinking about our platform:

- Swarm control and Artificial Intelligence can be key in scaling up of drone applications in public safety and emergency management
- The other factor I'd like to emphasize about Unmanned Life's platform is that it *does not require the purchase of new drones*, our platform can integrate and work with your existing drones being used.

I have attached a short document on the use cases we are currently looking to implement with various public safety agencies and governments.

I would really love to get 15 minutes of your time to discuss how Unmanned Life can work with Chula Vista PD to implement drone solutions. Perhaps we can set up a brief call next week? Does Tuesday or Wednesday any time work for you? I can call you at your work number. Please let me know.

I greatly look forward to hearing back from you!

Warm Regards,
Smita

DJI LEAVING THE US?

WHAT THAT MEANS FOR YOUR FLEET

Some significant changes are coming to the US drone market with DJI's announcement that they are removing their American footprint and heading back to the motherland. Instead of having staff here in the States, they will be providing support directly from China. One of the reasons cited by DJI is that regulations are getting stricter and stricter for Chinese companies to sell drones to members of the public safety community. Cue sad song for the world's largest drone company being bullied.

So, what does this mean for your DJI fleet? The most frustrating part of

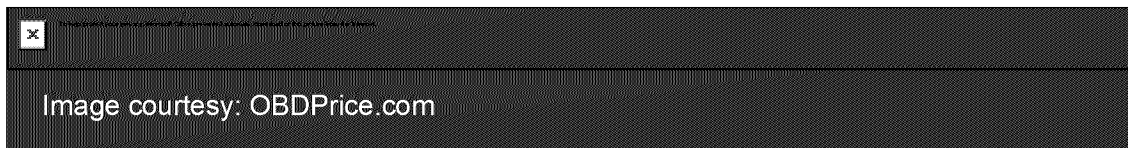

this move for customers will likely be the longer wait times for repairs and maintenance. However, smaller drone manufacturers are ready to fill the void left by DJI.

If you have questions about this topic, join us Wednesday, April 22, 2020 for a Facebook Live event to discuss and answer questions about DJI's abrupt exit from the US. Our CEO, Matt Sloane, and COO, Ben Kroll, will be your hosts!

If you missed the last Facebook Live event where we discussed Beyond Visual Line of Sight, you can check that out on Youtube by following this link!

MAVIC 2 REPLACEMENT FROM AUTEL

DIFFERENT COMPANY, SAME CHINESE TECH?

Over the weekend, Autel made an announcement with specs and pricing on two platforms of their new EVO II. They also released the specs on a 3rd model, but don't expect to see pricing... yet. The first two drones are pretty run of the mill platforms. They boast higher quality video and pictures, but that's to be expected with new tech, unless you're a cell phone manufacturer that takes features away...*cough* APPLE! *cough* HEADPHONE JACKS! *cough*.

The third option is the competitor to the Mavic 2 Enterprise Dual, that

we've all been waiting for with bated breath! They're keeping us waiting on pricing, but rumors are going around that it will be close to \$10,000. Over \$8,000 more than the next model down... Which is... substantial! Why the massive price jump? Again, we're working on rumors here, but we've heard that the thermal system Autel has come up with is comparable to the XT2 from DJI. Ya know? The \$13,000 camera that goes on the \$11,000 Matrice?

Worth keeping in mind that these are all just rumors. Suppose we'll have to keep waiting til footage from the drone comes out. Maybe the price for new drones will start going down for a change? We're all for wishful thinking these days.

Forward

ALL WE ASKED FOR WERE...

POLARIS MRZR'S WITH FRICKIN LASER'S!

Photo courtesy: Raytheon

Drones are great when they're in the hands of the good guys, but what about the bad actors of the world? What do we do when terrorist organizations get a hold of some relatively inexpensive drones, and use them to crash extremely expensive fighter jets? In January of 2018, Syrian rebels launched a swarm of cheap drones against Russia's main airbase in Syria. All of the drones were shot down or electronically captured and landed.

But, the US military has their own answer if that were to happen here or at one of our foreign bases. Three, actually. Thanks to Raytheon.

The first is a Polaris MRZR with a giant laser attached to the back. This allows for high speed chases in more remote or rocky areas...you know, like Colorado. The laser system on board is the same system that the Predator and Reaper drones use! It allows for detecting, identifying, tracking, and killing drones. Basically the Liam Neeson of lasers.

The other two options are basically \$20 million microwaves designed to not cook popcorn or a drone with heat, but to basically scramble them with massive amounts of energy. A single blast from one of these puppies can take down multiple drones, which makes them the perfect “Rogue Drones over Colorado” weapons.

Subject: RE: Site Awareness & Planning Getting Real-Time analytics

Hi Charles,

Thanks for the follow up. As we discussed, we are in emergency operations for COVID-19 and not really “tackling” anything new with our drone program at the moment. We really are stretched thin tech and staffing-wise. We really do rely on Motorola as our integrator for our software so Gopal really is the person to take a look at new technology.

That being said, at Kirby’s convenience, he can evaluate your technology and how it may be integrated into our program. He has some priorities he’s working on for us so the dates you are proposing may be overly optimistic. Kirby will touch base with you to see when he can fit you in. Even then, it will be some time before we can tackle anything new – our first priority is adding launch sites, not analytics. The analytics should come from our Motorola service provider.

Best,

Vern

September 15-17, 2020

Paris Las Vegas
Las Vegas | NV | USA

Dear Industry Professional,

With so much uncertainty in the world right now, we want to share some good news: Commercial UAV Expo Americas is scheduled to take place as planned September 15-17, 2020 in Las Vegas.

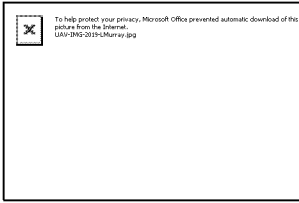

More than 90 leading companies have already committed to exhibit, representing 60% of the exhibit floor. We are working closely with our Advisory Board on the education program and will announce programming in June including up to the minute content on how to survive and thrive in the drone industry amidst COVID-19. New offerings, including Law-Tech Connect as well as new incarnations of favorites including “Beyond the Cage” Outdoor Drone Demos and DRONERESPONDERS Public Safety Summit are in development. FAA updates, industry successes, best practices and case studies including practical, actionable information from industry experts will arm you with information for navigating the way forward and building your drone business.

As event organizers, our first priority is your safety and we will continue to monitor the CDC and WHO guidelines to ensure that any event we run is safe for all to attend. We are working with our contractors and partners to establish new protocols and practices for increased levels of hygiene, safety and security. Stay tuned for details on these efforts in the coming months.

Rest assured that while we are physically distancing, we’re working harder than ever to keep the community connected. Our digital doors are open. We continue to bring you the latest news and information through our online platform Commercial UAV News, including more news and interviews with thought-leaders than we’ve ever featured before. We’ve added additional webinars including How Will COVID-19 Impact the Present and Future of the Drone Industry and Is the World Ready for Drone Delivery?

We’re committed to helping you navigate through this extraordinary period. And we’ll be here for you in brighter days ahead.

Sincerely,

Lisa Murray, Director
Commercial UAV Expo Americas

THE COMMERCIAL UAV EXPO FOR:

Mon., Sep 14 & Tues Sep 15:
UAM Summit

#expouav20

Presented by:

Tues, Sep 15:
Pre-Conference Programming, Workshops,
Outdoor Drone Demos
NOTE: Exhibits are ONLY open for Happy Hour

Wed., Sep 16 & Thurs., Sep 17:
Conference Programming & Exhibits

1-3 December 2020 | Amsterdam

How Will COVID-19 Impact the Present and Future of the Drone Industry?

Tuesday, April 28, 2020 | 11:00AM – 12:00PM Eastern Time

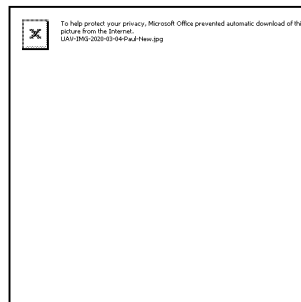

The ways businesses function have already been reshaped by COVID-19, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are coming and the impact of the pandemic will be seen and felt by the drone industry over the coming months and years. How can drones be utilized in emergency situations such as the current pandemic? How does the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? Will the drone space have a "new normal"?

Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Subject: NBC News question - on a deadline

Hi there,

I'm April, a journalist at NBC News. I'm writing because we're looking into a story about all the unexpected ways first responders are using drones during the pandemic, especially to reach people when everyone is supposed to be social distancing, per CDC guidelines.

I'm curious if you all have used your drones for homeless outreach yet, or if that's just being discussed now. I saw in some of the interviews already done with your department and the press that this is something you all have considered, but I haven't seen it reported that homeless outreach or interacting with your homeless communities is a way that drones are now being used.

Is anyone available to comment on this? Feel free to call me anytime, too 415-917-7510

Hope this finds you well in these deeply uncertain times.

All my best,

-April

April 21, 2020

PERF's COVID-19 coronavirus resources, including past editions of the Daily COVID-19 Report, are available at <https://www.policeforum.org/coronavirus>.

In today's Daily COVID-19 report, we have 3 items:

--A summary of a comprehensive report by the NYPD about many aspects of its COVID-19 response, including terrorism threats, drone threats, and racist propoganda associated with COVID-19.

--A brief interview with Miami Police Chief Jorge Colina, who recently learned that he is infected with the COVID-19 virus.

--An interview with Chief Constable Iain Livingstone of Police Scotland.

NYPD Report Details Terrorist and Other Threats

The NYPD generously sent us a copy of its "COVID-19 Law Enforcement Brief" to share with PERF members. Click on [this link](#) to see the full report.

NYPD COVID-19 Snapshot

As of April 15, 2020

- 6,052 uniformed officers (16.7% of the NYPD) were on sick report.
- 3,417 uniformed officers tested positive for COVID-19.
- 733 civilian employees tested positive for COVID-19.
- 27 COVID-19 fatalities (6 uniform, 16 civilian and 5 auxiliary officers).
- 1,307 uniformed officers returning full duty after COVID-19.
- 143 civilian employees returning after COVID-19.

Terrorism & Disinformation

Ideologically-motivated actors have tried to exploit COVID-19 through their messaging and propaganda efforts in order to incite violence.

The NYPD Intelligence Bureau assesses that racially and ethnically motivated violent extremists, Salafi-jihadist extremists inspired by or linked to foreign terrorist organizations, and nation-state adversaries will continue to leverage public fears associated with the ongoing pandemic in extremist messaging and disinformation.

Hospitals are a top security concern, as extremists may seek to target such facilities to amplify their message.

Intentional Exposure

The NYPD has authorized its officers to summons or arrest individuals who claim to have COVID-19 and intentionally or negligently expose others to the virus.

If the target of exposure is a police officer, the available arrest charges include violating the health code, obstructing governmental administration (second degree), or, in cases of spitting, harassment (second degree). A summons may be issued in lieu of arrest if the officer is concerned about further exposure. Similarly, individuals intentionally exposing other members of the public to COVID-19 can be summonsed for a health code violation. Acts of intentional exposure have been categorized as terrorist crimes in certain jurisdictions across the United States, and the US Department of Justice has signaled a willingness to charge such incidents under existing terrorism statutes. The NYPD has not pursued such prosecution.

Drone Activity

The NYPD has observed a significant amount of drone activity in the vicinity of locations associated with the COVID-19 response, in particular Hart Island, where New York City is interring unclaimed bodies, and the USNS Comfort. Since April 7, the NYPD Intelligence Bureau has responded to nine such incidents. Where appropriate, the drone operators are summonsed and the vehicle is vouchered as evidence. NYPD is coordinating with neighboring law enforcement agencies to share information relating to drone incidents and to coordinate a response.

PPE-Related Scams

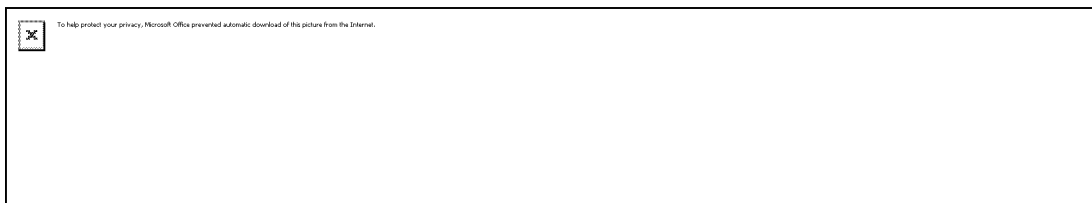

Scams involving personal protective equipment (PPE) are targeting hospitals, health care unions, and government agencies both in and outside the US.

Driven by the need to procure the unusually large amounts of PPE necessary to address the pandemic, buyers are engaging with new, unverified sellers, increasing their exposure to fraud.

Hate Crimes

While hate crimes in New York City declined in the first quarter of 2020 compared to the first quarter of 2019, **NYC is seeing an increase in hate and bias incidents--ranging from harassment to assault--specifically targeting individuals of Asian descent**, reported in all 5 boroughs. Since March 7, the NYPD has received 11 COVID-19 related complaints, and 10 arrests have been made. One incident involved three teenage girls who attacked a 51-year-old woman with an umbrella while riding a bus in the Bronx. The woman sustained injuries to her face that required stitches. The teens were arrested and charged with assault as a hate crime. It is possible the number of such bias incidents is underreported.

Racist and Ethnically Motivated Violent Extremist Propaganda

Interview with Miami Police Chief Jorge Colina

Chuck Wexler: *Jorge, how are you, and what symptoms have you had?*

Chief Colina: On Thursday, I coughed a few times and left work a little early. By Thursday evening, I had a bit more of a cough and some stomach pain. The pain woke me up in the middle of the night. By Friday morning, I had a low-grade fever, stomach pain, and the cough. I didn't go to work, and I called the fire chief to send someone over to give me an antibody test. It came back positive, and they

swabbed me again to do an antigen test, which is much more accurate. Friday night I felt terrible. By mid-day Saturday I started to feel a little better. I forced myself out of bed and walked around a bit on my patio, which is what my doctor recommended. Since then I've been feeling better. I try to get some fresh air, walk, and exercise my lungs.

Wexler: *Are you quarantining yourself?*

Chief Colina: Yes, I'm completely quarantined and will be for 14 days at a minimum.

Wexler: *Have you delegated your work responsibilities to others?*

Chief Colina: I'm delegating some things to Ron Papier, my deputy chief. For example, he's handling a budget meeting today. It's stressful for me to not participate in that, but I'm tired and I know he can handle it.

Wexler: *Is there anything else you'd like to add?*

Chief Colina: I've heard from quite a few chiefs, including (Aurora, Illinois Police Chief) Kristen Ziman and (Detroit Police Chief) James Craig, who both tested positive as well. It's very uplifting to hear from your peers and know that they're rooting for you and praying for you.

Police Scotland Chief Constable Iain Livingstone

PERF Executive Director Chuck Wexler recently interviewed Police Scotland Chief Constable Iain Livingstone about the impact of the COVID-19 pandemic in Scotland, and how Police Scotland is adjusting to the crisis.

Police Scotland is the second largest police force in the UK, with 17,500 officers and 5,500 support staff. It was established in 2013 and is responsible for all policing and security across Scotland, covering over one-third of the UK land mass.

As of April 19, 8,187 people in Scotland have tested positive for COVID-19, and 903 have died.

Key Takeaways:

1. **Mutual Aid:** Even though the Irish Sea separates Scotland from Northern Ireland, the two countries' police forces have signed a mutual aid agreement, so they can help each other with dispatch operations.

2. **Modernizing policing and the justice system:** The COVID-19 pandemic is bringing some necessary modernization to the criminal justice system in Scotland, such as obtaining witness statements and other types of evidence remotely.

And Chief Constable Livingstone believes that the value of some COVID-related changes in police culture and traditions, such as allowing officers to work remotely when it's possible, may continue to be recognized after the COVID crisis is over.

3. **Changes in calls for service:** Like other countries, Scotland is experiencing a significant drop in crime due to COVID-19, but also a sharp increase in calls about people disobeying social distancing orders.

4. **Protecting vulnerable people against cybercrime:** Police Scotland is concerned that the COVID-19 pandemic is causing people with little experience with computers to learn how to go online, but because of their inexperience, they are especially vulnerable to cyber-criminals.

Following is the interview with Chief Constable Livingstone:

Wexler: Iain, what is your approach to protecting Scotland against COVID?

Chief Constable Livingstone: The only effective intervention at the moment is social distancing. **Without a vaccine or a robust testing mechanism, the only way to slow the spread is social distancing.** And the only way to achieve that is through voluntary citizen participation or policing. The curfew and lockdown in the UK have a legal framework and sanctions behind it.

Enforcement is a last resort. We're relying on traditional engagement with our communities, going back to Sir Robert Peel's principles. We ask officers to engage, explain, encourage,

and then, if need be, you enforce. We only look to enforce if there is a willful disregard to comply.

Say there's a group of kids having a drinking party at a house. We tell them they're in breach of the regulations, tell them to go home, and they apologize and leave. In that case, we'd leave them with a warning. We have the enforcement power, but we're relying on policing by consent.

So police are a key contributor, but this is a public health issue. To me, this underlines how policing is so much more than enforcement. I spent most of my career as a detective, and law enforcement is at the heart of what we do. The policing mandate speaks to community cohesion, fairness, and justice, but policing almost has a broader public health responsibility as well, and that's certainly what we're seeing at the moment.

Wexler: Have you seen changes in calls for service and crime?

Chief Constable Livingstone: The volume of calls taken is down about 10%. On any one day, we receive about 7,000 calls. The volume is slightly lower, but the nature of them is very different.

Our crime reports are down significantly. **But this time last year, we would receive maybe have 250 public nuisance calls per day. Now we're getting about 1,000 per day for things like breach of curfew.**

Calls for crime are down. For example, we typically take over 300 calls per day for theft, which includes burglary and robbery. But this week, we've taken 130. We haven't seen any change in calls about commercial burglary or domestic burglary. Street robberies are significantly down. Generally, crime is down about 30%.

We have been increasing our public messaging about cyber security. There are a number of late adopters of digital technology who are going online now. Our assessment is that there's an increased vulnerability there, so we're pushing education and prevention. We're messaging specific advice on Facebook, Twitter, and other social media. That includes fundamentals about password protection and not responding to any unsolicited contacts. We tell people that if they have any concerns, they should contact the police for advice.

Coordination with the Police Service of Northern Ireland

Police Scotland just signed a memorandum of understanding with the Police Service of Northern Ireland to provide mutual support. If either agency has a surge in emergency calls, the other agency would pick up some of the overflow. So the caller gets a prompt response and we're not leaving people unanswered.

There's a cultural link between Northern Ireland and Scotland, so people would still get that level of comfort and reassurance. And we have close working ties with that agency.

Minimizing the Risk to Officers

We have operational guidance to encourage social distancing and maintain that two-meter gap. But we know that officers all over the world sometimes have to go in and have a closer engagement. As John Timoney used to say, "Policing is a contact sport."

To mitigate that, we've increased our personal protective equipment. Almost 2,000 of our 17,500 officers are trained with specific PPE. That includes elbow-length gloves, properly fitted masks, and protective suits.

If there is any potential COVID element to any call, we try to deploy those officers. They are in our operational support units, which are specifically trained on search and public order. Those officers have received additional training and are being dispatched to any call that we identify as having a COVID-related factor.

COVID Is Creating Opportunities to Modernize the Justice System and Police Traditions

Policing in Scotland is naturally conservative. We value our traditions and we value our history. That's a great strength, but at times it means that we're not dynamic enough.

We've had about a half-dozen murders during this period, and there's a difficulty in responding to those, in protecting against COVID while handling the body recovery, forensic capture, scene protection, and evidence gathering. So we've been creative in how we've gathered evidence, using methods like letter drops as opposed to face-to-face interactions, and doing interviews by telephone.

Our courts have introduced legislation to allow the use of digital evidence, so people can submit evidence from afar.

So we've sort of been stuck in a dated model of criminal justice for a while, but COVID has forced us to start using new technologies during this emergency situation. We can keep those changes as we go forward, to make a more efficient and fair system.

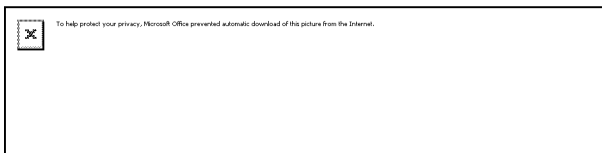

Traditionally, we all start very early in the morning and physically come together as a command team, asking people to travel great distances so we're all in the same office.

I think some of the flexible working and working from home using technology recognizes people's well-being while still delivering public value.

There are even some changes to our infrastructure elements. We had almost 30 custody centers spread across the whole of Scotland, and we've slashed that down to 15 because of COVID. We may have to reopen some other custody centers going forward, but we may not.

We might see greater efficiencies, we might see greater flexibility in our criminal justice system, and we might see more flexibility in our own working practices that enhances the well-being of our officers and staff.

The PERF Daily COVID-19 Report is part of the Critical Issues in Policing project, supported by the Motorola Solutions Foundation.

PERF also is grateful to the Howard G. Buffett Foundation for supporting PERF's COVID-19 work.

Citadel Defense Launches New AI and Machine Learning Software to Detect and Defeat Drones

By The Editor on Apr 21, 2020 06:51 am

Citadel Defense, a supplier of combat-proven counter drone technology to militaries, governments, and commercial organizations, has expanded its AI solution to detect, identify, and defeat unmanned systems in the air, on land, or at sea. Where other C-UAS sensing modalities using radar or cyber takeover tactics are limited by ground clutter or responsiveness to new [...] [Read in browser »](#)

Dealmakers Use Drones to Help Complete Transactions

By The Editor on Apr 21, 2020 06:35 am

Dealmakers are starting to use drones to help facilitate transactions while observing social distancing. According to insiders, the company Coty Incorporated and suitors for Coty's professional beauty unit, which can cost up to 8 billion USD, are

now considering the use of flying drones across their manufacturing facilities. It is a means of keeping Coty's divestiture plans, [...]

Hi Vern – thanks so much for getting back to me and for this additional information. I just tried giving you a call.

I wanted to get your response to concerns that were shared with us from homeless service providers and advocates about the use of drones for outreach to these communities.

Specifically, a number of homeless advocates we interviewed noted that although drones might be faster and safer for police trying to maintain social distance, homeless people traditionally have a less than amicable relationship with police because of a history of criminalization and harassment. For this reason, they say that outreach to these communities in a public health crisis is best conducted with trained homeless outreach professionals who know how to best communicate and learn the needs of those experiencing trauma.

Homeless service advocates also said that mental health issues are prevalent in homeless communities, and flying a drone overhead that's broadcasting messages to people who have never had a drone speak to them before could scare people who need assistance more than help them.

There's also a concern that public health messages that first come from the police could undermine the work of public health workers sharing the same information because of a distrust with the police.

If you have any comment on any of this, I'm happy to have a call or take responses over email. I do see in your release that the department is working public health officials and providing health services with its drone announcement over the encampments.

Thank you,
April

Subject: RE: [EXTERNAL] RE: NBC News question - on a deadline

Hi April, yes, we are using several DJI drones. We did receive 3 Mavic 2 Enterprise drone kits from DJI as part of their Disaster Relief Program and we had one in our fleet already. The 3 Mavic's are on a free 90 day lease from DJI and will be returned after the pandemic.

Our fleet is as follows:

- 3 DJI Matrice M-210 v.2 drones with 30x zoom cameras (for our Drone as a First Responder program)
- 4 Mavic 2 Enterprise drone kits (3 from the Disaster Relief Program) – these are the only ones with speakers
- 4 Skydio2 drones (American made with amazing sense and avoid technology)
- 1 Parrot ANAFI drone (French made)
- 1 DJI Inspire 2 for traffic collision reconstruction and outdoor crime scene documentation via Pix4d (photogrammetry)

We had a robust drone program prior to the corona virus outbreak but accepted the additional speaker equipped drones to enhance our capabilities during the outbreak. It's important to note that DJI, while a Chinese company, is about 70-80% of the drone market and their products are the most technologically advanced, reliable and cost effective. They have a drone for just about every conceivable use that fits our needs, but we also try to support American made drones or French drones (Parrot), when their product fits the mission. We have security measures in place to protect all drone related data.

Feel free to call me at 619-691-5218 should you have further questions or clarifications. I'd like to emphasize the good public safety work we are doing with the drones vs. the manufacturer if possible. Thanks for your follow up.

Best,
Vern

All,

As a follow up to the drone discussion, we put together a quick montage to supplement our presentation with the President's Commission on Law Enforcement and the Administration of Justice technology group in today's testimony by Chief Kennedy and I.

While we didn't have time to have a more professionally produced video made, it does a pretty good job of informing the viewer of the wide array of calls we support on a daily basis and the impact we have on crime fighting and public safety. This is why we believe the Drone as a First Responder model will be a paradigm shift in law enforcement and the fire service and public safety in general (wow, look, we just opened up your next market beyond cops – 26,000 fire departments, lol).

It's good to hear that Axon is taking this space seriously. Having developed and proven this concept at CVPD we are working diligently to help other agencies take this to scale nationally. I'm sure you saw Clovis PD just announced they are replicating our program and there are many other interested agencies. We look forward to working with great tech partners to build this new drone ecosystem in support of public safety operations and as a customer, we view competition as to our advantage. Good luck in your program and you are welcome to visit to see our ops in person in the future.

Is the World Ready for Drone Delivery?

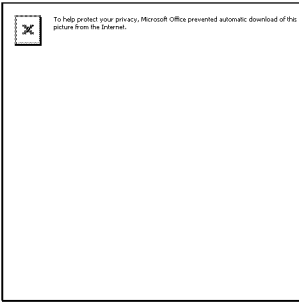

Wednesday, May 13, 2020 | 12:00PM - 1:00PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public.

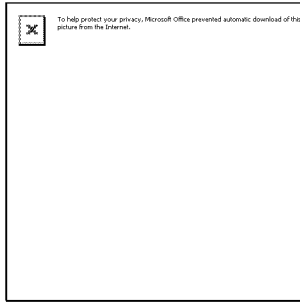

Join us to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

National News

Stateline: As protests spread, states tread carefully to avoid inflaming extremists

As enraged protesters swarm state capitols and prominent militia leaders boast about gathering in large numbers, states are doing little to crack down on the anti-government groups that are defying stay-at-home orders.

Trackers say extremist groups of all types are using the pandemic to foment misinformation, stoke anger against the government or prepare to take advantage of breakdowns in society. Many of the protesters don't belong to such groups. Nevertheless, state and local officials fear that any action to stop the demonstrations on public health grounds could inflame radicals who have a broader anti-government agenda.

Reuters: Coronavirus shelter-at-home rules upend U.S. child abuse prevention system

Social distancing restrictions aimed at curbing the spread of the coronavirus have taken a steep toll on the already fragile systems U.S. cities and states use to track and prevent child abuse and neglect.

Chronically understaffed and underfunded agencies across the country say calls to the hotlines they rely on to flag abuse and neglect are down by as much as 70%.

Teachers report U.S. child abuse cases far more than any other group of people, but stay-at-home restrictions have curtailed their collective ability to look out for children's well-being. Doctors, who also report many cases, are typically not seeing children for routine checkups at this time.

Local News

Philadelphia Inquirer: N.J. has charged more than 1,700 for violating stay-at-home orders but just a handful of citations have been issued in Pa.

More than 1,700 people have been charged with breaking the stay-at-home order in New Jersey from March 21, when they went into effect, through April 15, according to Attorney General Gurbir S. Grewal's office, which releases a daily list of violators.

Meanwhile, across the border in Pennsylvania, only a handful of people have been cited for breaking Gov. Tom Wolf's stay-at-home order. From state police to municipal departments, Pennsylvania authorities said they're enforcing the order with warnings, not citations.

KSDK St. Louis: St. Louis area police academies still training recruits -- from a distance

She might not hear them greeting anyone with the required "good morning ma'am" or "good afternoon sir," or see them donning their uniforms eating in the breakroom or hitting the gym together, but St. Louis Police Academy Director Lt. Angela Dickerson says she knows the next generation of police officers is busy learning the profession.

Dickerson shuttered the academy in March after the city limited crowds to fewer than 10 people to try and reduce the spread of COVID-19. The city's two classes of about 30 recruits each suddenly became too big of a crowd.

But the demand to get recruits through training and on the streets is unrelenting.

And, like many departments, St. Louis has had to get creative to avoid a complete shutdown of its police recruit classes – many of which began weeks, even months, before the COVID-19 outbreak took hold.

Dickerson said most of the recruits use a video conferencing app every day to attend virtual classes.

Bellevue (WA) Reporter: Bellevue police town hall addresses racism stemming from COVID-19 outbreak

If and when a hate crime or biased-related incident happens, call the police.

This was the main message members of the Bellevue Police Department (BPD) had for the public during a virtual town hall held April 8.

The meeting was held in response to nationwide reports of members of the Asian and Asian American communities being targeted as a result of the COVID-19 outbreak. The first cases of COVID-19 occurred in China and as a result, people of Chinese and Asian descent have been seen by some as carriers of the coronavirus who could infect others.

Bellevue Police Chief Steve Mylett said he has seen news reports of incidents targeting Asians nationwide and has personally heard of situations locally. For this, he apologized to those who have been targeted for what they experienced.

In addition to Mylett, BPD assistant chief Carl Kleinknecht attended the virtual town hall meeting to answer questions submitted by members of the public. BPD Det. Zhong Zhu was also in attendance to translate the meeting into Mandarin.

Denver Post: Federal judge orders Denver to comply with ICE subpoenas at city jails

A federal judge on Monday ordered Denver to comply with subpoena requests issued by U.S. Immigration and Customs Enforcement, potentially ending a months-long feud between the city and the federal agency.

The Denver Sheriff Department in January refused to comply with administrative subpoenas issued by ICE that sought information on several people who had been held in jail and who had entered the country illegally. ICE's move to subpoena the sheriff's department was unprecedented — the first time it had ever subpoenaed a law enforcement agency — and a process ICE said it turned to as a last resort to force Denver's cooperation.

United States Magistrate Judge Michael Hegarty sided with ICE in his Monday ruling, affirming that the agency has the authority to issue the subpoenas and that the sheriff department must give ICE up-to-date information on the men's home and work addresses, emergency contacts and bonds.

NBC Connecticut: Westport Police to test 'pandemic drone' that can sense fevers, coughing

Westport police are going to be testing a "pandemic drone" that can monitor people's temperatures from 190 feet away and detect sneezing, coughing and heart and breathing rates amid the COVID-19 pandemic.

Westport police said they are working with Draganfly, a drone company, to test technology in an effort to help combat the spread of the coronavirus.

Washington Post: D.C. police take over as federal firearms licensee in the District

D.C. police are now in charge of facilitating the sale of pistols to city residents after the District's only federal firearms licensee abruptly stopped work in March, citing a spike in demand during the pandemic.

The move announced Monday gives the police department responsibility for deciding who can legally possess a firearm, and then acting as an intermediary between purchasers and sellers. City residents cannot legally buy guns without such a go-between.

The police department had to apply for a federal firearms license to act as the gun broker. A department spokesman said the license was granted last week.

International News

Irish Times: Arrests under Covid-19 legislation more than quadruple in a week

The number of people arrested by gardaí for breaching the Covid-19 movement restrictions has more than quadrupled in the last week.

Between April 13th and 19th, Gardaí arrested 25 people for failing to comply with restrictions on non-essential travel and exercise more than 2km from the home. A total of 32 people have now been arrested since the regulations came into force on April 8th.

Another two people were also arrested last week on the instruction of a medical professional. The emergency legislation grants gardaí the power to detain people who are infected with Covid-19 who refuse to self-isolate, if the direction comes from a health worker.

There were another 261 people arrested for other offences after being caught by gardaí enforcing the Covid-19 restrictions.

Associated Press: Police battle uptick of unrest in locked-down Paris

Paris police are facing a modest uptick of unrest in the oft-troubled suburbs of the locked-down French capital, making a small number of arrests after fires were set and fireworks lobbed to shatter the calm imposed by stay-home measures to counter the coronavirus.

A scattering of vehicle and trash-can blazes and firework explosions on the outskirts of Paris this week have so far been far milder than previous outbreaks of violence. But the renewed tensions are also a reminder of policing difficulties that have long simmered in troubled neighborhoods of the city, before the virus lockdown forced most people indoors.

Paris police said officers arrested nine people in two suburbs overnight Tuesday. They were suspected of either possessing fireworks or gathering together to commit violence.

Police Executive Appointments

KAGS Bryant (TX): College Station PD Chief of Police retires after 35 years

After three decades with the College Station Police Department, Chief of Police Scott McCollum is retiring.

When chief McCollum first came to Aggieland, he was on the path to be a veterinarian, until different plans drew him to a new career.

"After one week serving as a police officer, I was amazed that I was getting paid to do something that I truly loved, which was interacting with the community and the rest is history," said CSPD Chief of Police Scott McCollum.

With many achievements on his belt, chief says his greatest highlight is the new CSPD facility, which has been in the works for six years.

[View in Browser](#)

Good morning. In today's AP Morning Wire:

- › AP Exclusive: Inside a New York hospital emergency room.
- › Trump suspends new immigration green cards for 60 days.
- › The three big unknowns about the virus as reopening sought.
- › Millions of refugees in harm's way around globe in crowded camps.

TAMER FAKAHANY
DEPUTY DIRECTOR - GLOBAL NEWS COORDINATION, LONDON

The Rundown

AP PHOTO/JOHN MINCILLO

AP Exclusive: Inside a NY ER where staff saves lives, suffers in hot spot inferno

"It's been a nightmare."

That's how a hospital director of emergency medicine described the days and nights. "We have a volume of sick people like you can't believe. In one shift, I pronounced six people dead."

Saint Joseph's Medical Center, besieged by patients with the coronavirus in one of the poorest sections of Yonkers, just over a mile from the northern border of New York City's Bronx borough, has also seen half its staff test positive for the disease.

The medical team are suffering as they try and save lives in one of the nation's worst virus hot spots.

The AP's Brian Mahoney and John Minchillo were granted access inside the emergency room for this powerful reportage with haunting images.

AP PHOTO/ALEX BRANDON

Trump bars green card immigration for 60 days; virus unknowns concern as reopening pursued

President Donald Trump has said he would be placing a 60-day pause on the issuance of green cards in an effort to limit competition for jobs in a U.S. economy devastated by the coronavirus. But he said there would be "certain exemptions." The executive order would bar only those seeking permanent residency, not temporary workers, Jill Colvin, Elliot Spagat and Ben Fox report.

Congress is hurrying to approve the next virus aid package, a \$483 billion deal backed by the White House that would replenish a small business payroll fund and pump more money into hospitals and testing programs. The Senate has approved the package and the House is asking lawmakers to return for a Thursday vote.

Virus Unknowns: Some scientific unknowns about COVID-19 are deeply worrying and complicating efforts to reopen the economy. The issues go beyond the logistics of how many tests are available. For example, it's not

yet clear how often people can spread the virus without showing symptoms, reports AP medical writer Lauran Neergaard.

Reopening Will Be Tough: Even with many former virus hot spots seeing a reduction in new deaths and hospitalizations, a flurry of cancellations of major events around the world have underscored that efforts to return to normal life could still be an arduous and disheartening journey.

Going it Alone: Governors in 17 U.S. states have committed to regional coordination to reopen their economies, but none are in the South, where leaders are going it alone, just as they did in imposing restrictions. Governors in the Deep South have resisted any appearance of synchronization as questions about when and how to ease restrictions become increasingly politically-driven.

More from the AP U.S. team:

- **Protests Misinformation:** A wave of Facebook groups launched by pro-gun advocacy groups and conservative activists has mobilized people to protest stay-at-home orders in states around the country. The pages have gained nearly 1 million followers in a matter of days and have become hotbeds for misinformation, conspiracy theories and skepticism around the pandemic, reports Amanda Seitz.
- **Missed Milestones:** For millions of Class of 2020 teenagers living through the outbreak in America, coming-of-age moments like the prom, graduation, an 18th birthday, look and feel vastly different. Tamara Lush has that story.
- **One Good Thing:** Riddle me this: A New Jersey teen has enlisted a team of volunteers to write encouraging and entertaining emails for sick kids. Around the U.S., hospitals have been coming up with similar remote ways to fill the void.

AP PHOTO/SHAFIQR RAHMAN

Millions of refugees at great risk in crowded camps, almost none tested for virus

There are over 70 million people worldwide who have been driven from their homes by war and unrest. Up to 10 million are packed into refugee camps and informal settlements.

Almost none have been tested for the coronavirus and with little testing in camps, the virus can spread unchecked until people start showing symptoms. An outbreak would be catastrophic — and could prolong the pandemic, report Joseph Krauss, Rishabh R. Jain and Cara Anna.

"If it's killing people daily in America, then what do you think will happen to us?" asked one refugee in Kenya's sprawling Dadaab camp.

Earth Experiment: Coyotes, pumas and goats are wandering around cities, while air across the world is becoming less polluted. Scientists are noticing changes to Earth's environment as millions of people stay home because of the coronavirus. The planet is becoming wilder and cleaner, reports AP science writer Seth Borenstein.

India's Clean Air: For more focus on the country where six out of 10 of the world's most polluted cities exist - the extended lockdown has led to an unexpected bonus.

See more on Earth Day turning 50 below in the AP Science section.

More from the AP Global team:

- › **China's Yangtze River**: The reopening of ferry services on the Yangtze, one of China's mother rivers, has been an important symbolic step to get business and daily life back to normal in Wuhan where the pandemic began.
- › **Brazil's Fight for Supplies**: The competition for medical equipment to treat patients is an internal and bitter one. Some states are vying for material with the government of President Jair Bolsonaro, who is already sharply at odds with many governors over containment measures.
- › **France's Quarantine Islands**: This photo gallery from the Frioul archipelago finds an eerie sense that history is repeating itself. The islands off Marseille served as a quarantine center during deadly epidemics in centuries past, helping to shield the mainland from infection. Now, amid the lockdown, and with no tourists, the islands' few residents again feel cut off.

Hello, Capt. Sallee:

Thank you for reaching out regarding our recent PYMNTS.com article on your department's drone usage (<https://www.pymnts.com/coronavirus/2020/california-cops-enlist-drones-for-lockdown-enforcement/>).

Based on the information you provided, our piece has been revised to remove the references to "enforcement" and "night vision." That said, as I'm sure you're aware, your state and other states' limits on businesses are being widely referred to by the public at this point as "lockdowns" or "lockdown orders," so we didn't feel it inaccurate to retain that term in our headline.

We apologize for any error and we hope you and your officers are staying safe.

Sincerely,

Jerry Kronenberg

FROM THE EDITOR

Greetings!

Over the past several weeks, Commercial UAV News has reported on various aspects of the COVID-19 global pandemic and how it is impacting the industry in both **positive** and **challenging** ways. On Tuesday, April 28th from 11AM to 12PM Eastern, we'll be hosting a free webinar, "How Will COVID-19 Impact the Present and Future of the Drone Industry?" featuring a panel of industry insiders to give us their unique perspectives on a variety of topics and concerns that have come about as a result of the pandemic. It will be a great opportunity for all of us to come together to discuss pressing topics that are impacting the industry today. I hope to see everyone there!

Be well and stay safe!

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

Tuesday, April 28, 2020 | 11:00AM - 12:00PM Eastern Time

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to

discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

Wednesday, May 13, 2020 | 12:00PM - 1:00PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale.

However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Team,

I had the pleasure of taking Fritz for a ride this afternoon. As one would guess, I dropped him off and the next call for service was a drone deployment.

Incident L034135

The Skydio was deployed for a subject who jumped the fence into an elementary school. I was able to see one subject on the roof of the school. Officers contacted the subject and submitted a FI.

Hi Vern – thanks so much for getting back to me and for this additional information. I just tried giving you a call.

I wanted to get your response to concerns that were shared with us from homeless service providers and advocates about the use of drones for outreach to these communities.

Specifically, a number of homeless advocates we interviewed noted that although drones might be faster and safer for police trying to maintain social distance, homeless people traditionally have a less than amicable relationship with police because of a history of criminalization and harassment. For this reason, they say that outreach to these communities in a public health crisis is best conducted with trained homeless outreach professionals who know how to best communicate and learn the needs of those experiencing trauma.

Homeless service advocates also said that mental health issues are prevalent in homeless communities, and flying a drone overhead that's broadcasting messages to people who have never had a drone speak to them before could scare people who need assistance more than help them.

There's also a concern that public health messages that first come from the police could undermine the work of public health workers sharing the same information because of a distrust with the police.

If you have any comment on any of this, I'm happy to have a call or take responses over email. I do see in your release that the department is working public health officials and providing health services with its drone announcement over the encampments.

Thank you,
April

Subject: RE: [EXTERNAL] RE: NBC News question - on a deadline

Hi April, yes, we are using several DJI drones. We did receive 3 Mavic 2 Enterprise drone kits from DJI as part of their Disaster Relief Program and we had one in our fleet already. The 3 Mavic's are on a free 90 day lease from DJI and will be returned after the pandemic.

Our fleet is as follows:

- 3 DJI Matrice M-210 v.2 drones with 30x zoom cameras (for our Drone as a First Responder program)
- 4 Mavic 2 Enterprise drone kits (3 from the Disaster Relief Program) – these are the only ones with speakers
- 4 Skydio2 drones (American made with amazing sense and avoid technology)
- 1 Parrot ANAFI drone (French made)
- 1 DJI Inspire 2 for traffic collision reconstruction and outdoor crime scene documentation via Pix4d (photogrammetry)

We had a robust drone program prior to the corona virus outbreak but accepted the additional speaker equipped drones to enhance our capabilities during the outbreak. It's important to note that DJI, while a Chinese company, is about 70-80% of the drone market and their products are the most

technologically advanced, reliable and cost effective. They have a drone for just about every conceivable use that fits our needs, but we also try to support American made drones or French drones (Parrot), when their product fits the mission. We have security measures in place to protect all drone related data.

Feel free to call me at 619-691-5218 should you have further questions or clarifications. I'd like to emphasize the good public safety work we are doing with the drones vs. the manufacturer if possible. Thanks for your follow up.

Best,
Vern

**Warning:
External
Email**

Hi there,

I'm April, a journalist at NBC News. I'm writing because we're looking into a story about all the unexpected ways first responders are using drones during the pandemic, especially to reach people when everyone is supposed to be social distancing, per CDC guidelines.

I'm curious if you all have used your drones for homeless outreach yet, or if that's just being discussed now. I saw in some of the interviews already done with your department and the press that this is something you all have considered, but I haven't seen it reported that homeless outreach or interacting with your homeless communities is a way that drones are now being used.

Is anyone available to comment on this? Feel free to call me anytime, too 415-917-7510

Hope this finds you well in these deeply uncertain times.

All my best,

-April

Cc: Roxana Kennedy
Subject: CVPD - Presentation to the President's Commission on Law Enforcement
Attachments: April 2020 Presidential Commission Policing Presentation- Kennedy Final.pdf; 2020 Presidential Commission - Sallee final.pdf

Importance: High

Hi Katelyn,

Per our discussion, Chief Kennedy and I were invited to speak as public safety drone SME's for the President's Commission on Law Enforcement (Technology Group) (<https://www.justice.gov/ag/presidential-commission-law-enforcement-and-administration-justice/working-groups>). We testified via phone yesterday to the Technology group along with NYPD discussing Facial Recognition and Wilmington, DE discussing their drone program. Total testimony was about 30 minutes for the chief and I and there were no substantial questions in the aftermath.

Joe Heaps with USDOJ was our POC for the group and coordinated getting us started. Executive Assistant Director Darrin Jones of the FBI's Science and Technology Branch chaired the session. Joe mentioned that he has worked extensively with Mike O'Shea so the FAA could have Mike reach out to the Joe to chat should the FAA want to hear more about the process.

I am attaching PDFs of the Chief's PPT and my PPT. We also included links to two Youtube videos with – one is the “Taco Shop – Man with a Gun” call you have already seen. The second was a montage video of several of our successful missions. By the way, we surpassed 2,100 missions this week and we are planning on our second homeless outreach drone mission tomorrow (Friday) with the same format. Thanks again to you and the FAA's IPP team for all your support. Your professionalism and support, and that of the FAA's IPP team, has been amazing and we are very grateful!

Please let me know if you have further questions and stay healthy!

Drone Montage: <https://youtu.be/BXCGu7-Gutg>
Man with a (Fake) Gun: <https://youtu.be/bYc1zybIIIE>

TECHNOLOGY

This group shall focus on how new, innovative, and developing technologies (e.g. encryption, autonomous vehicles, artificial intelligence, unmanned air systems) affect law enforcement in terms of both challenges and opportunities.

Chairs

Executive Assistant Director Darrin E. Jones,
Science and Technology Branch, Federal Bureau of
Investigation

Chief Thomas Ruocco, TX Department of Public
Safety

Members

Chief John Ortolano, Hobbs, NM, Police Department

BJ Pak, United States Attorney -S-GA

Sheriff Al Cannon, Charleston County, SC

Chief Robert Tracy, Wilmington, DE, Police Department

Chief Jimmy Ferise, North Richland Hills, TX, Police Department

Chief Richard Smith, Kansas City, MO, Police Department

Subject: Thank you for agreeing to participate in a Subject Matter Expert talk

Warning:
External
Email

Thank you for agreeing to participate. I am following up on behalf of the President's Commission on Law Enforcement and the Administration of Justice in regards to your participation in the upcoming virtual Subject Matter Expert talk. I wanted to provide some brief background information on the Commission. In October 2019, President Trump signed Executive Order 13986 establishing the formation of the Commission on Law Enforcement and Administration of Justice. This is not the first time such a national review of law enforcement has occurred. In 1965, President Lyndon B. Johnson authorized a similar commission to study ways to improve American efforts to fight crime. While many important reforms and developments resulted from President Johnson's crime commission, much has changed in the past half century.

Attorney General Barr has been tasked with design, development and implementation of the President's Commission on Law Enforcement and Administration of Justice. This includes providing a report for the President and law enforcement based on the findings and work of the Commission. An integral part of the Commission's work is hearing from experts and practitioners with firsthand experience in the field about best practices, lessons learned, challenges, successful programs and initiatives, and innovative strategies to address and enhance law enforcement and the administration of justice. You have been identified as an expert in the field who could provide invaluable information to the Commission.

The Commission held the first hearing in February focused on Officer Wellness and Safety. Due to COVID-19 we have moved to virtual hearings.

We are excited that you will be able to present. Your expertise and experience are essential to us.

Please send me your bio.
Please email me your testimony.

Below are some guidelines for the written testimony:

- Prose and/or PowerPoint.
- Include your name, title, and organization you are representing.
- Please feel free to include specific and clear recommendations for the Commission.

Each panelist will have 5-8 minutes to present. The Question and Answer session will follow the conclusion of all witness testimony.

If you have any questions please feel free to contact me, Joe Heaps, Federal Program Manager, at 202-598-0808, or email joe.heaps@usdoj.gov.

Again, thank you for your willingness to testify!

V/R,
Joe Heaps

We had a robust drone program prior to the corona virus outbreak but accepted the additional speaker equipped drones to enhance our capabilities during the outbreak. It's important to note that DJI, while a Chinese company, is about 70-80% of the drone market and their products are the most technologically advanced, reliable and cost effective. They have a drone for just about every conceivable use that fits our needs, but we also try to support American made drones or French drones (Parrot), when their product fits the mission. We have security measures in place to protect all drone related data.

Feel free to call me at 619-691-5218 should you have further questions or clarifications. I'd like to emphasize the good public safety work we are doing with the drones vs. the manufacturer if possible. Thanks for your follow up.

Best,
Vern

Hi Vern – thanks so much for this! I have a few detail questions:

Can you tell me if you're using DJI drones and if so, did you get them as part of the company's Disaster Relief program or did you buy them?

Also, were new drones acquired for the purpose of helping during the pandemic?

Warning:
External
Email Hi there,

I'm April, a journalist at NBC News. I'm writing because we're looking into a story about all the unexpected ways first responders are using drones during the pandemic, especially to reach people when everyone is supposed to be social distancing, per CDC guidelines.

I'm curious if you all have used your drones for homeless outreach yet, or if that's just being discussed now. I saw in some of the interviews already done with your department and the press that this is something you all have considered, but I haven't seen it reported that homeless outreach or interacting with your homeless communities is a way that drones are now being used.

Is anyone available to comment on this? Feel free to call me anytime, too 415-917-7510

Hope this finds you well in these deeply uncertain times.
All my best,

-April

Connecticut police to test 'pandemic drone' that monitors health of residents

Police in Westport, [Conn.](#), said they will be testing a "pandemic drone" that can scan the body temperatures of residents to determine if they have fevers or other health symptoms in an effort to combat the [coronavirus](#).

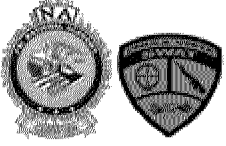

Aerospace company Draganfly announced in a news release the drones will be equipped with a specialized sensor and computer vision systems that can display heart and respiratory rates. They can also detect people coughing in crowds, police said.

"One of the major problems for cities and towns like Westport in managing and responding to a pandemic like the COVID-19 virus, is finding out who could be infected and how widespread the disease has spread," said Westport First Selectman, Jim Marpe. "One way to do this is to look for underlying symptoms." Westport is located in Fairfield County, which is considered the epicenter for the virus outbreak in Connecticut. It's the state's closest county to New York City and has almost half of Connecticut's 20,360 confirmed cases, according to data from Johns Hopkins.

Police said the goal of the program is to provide better health monitoring support for potential at-risk groups, including the elderly or those with preexisting health conditions.

Azerbaijani Drone Downed in Disputed Zone

By The Editor on Apr 23, 2020 06:50 am

Nagorno-Karabakh Air Defense units have shot down an Azerbaijani military drone on Tuesday. In a statement, the NKR Defense Army said the Israeli-made drone was hit by one of its air-defense units early in the afternoon immediately after entering its airspace over a southern section of the Armenian-Azerbaijani “line of contact” around Karabakh. It promised [...]

Subject: [EXTERNAL] CVPD homeless outreach mission (speaker equipped drone)

Hi Joe,

Per our discussion, attached is the press release from last week's operation (our first and probably the first in the nation). We are doing another operation tomorrow morning at 0900 in the Bonita area. Lt. Henry Martin is my lead on the operation and will be your point of contact. Please see the video embedded in the press release that helps tell the story. Hope you can make it.

Best,
Vern

Good afternoon Diana,

Per our conversation last week, will be trying to put you in touch with subject matter experts who I think meet your needs. Introducing you to Fritz Reber and Kabe Termes with Skydio (both copied on this email).

Fritz is a former CVPD captain and colleague of mine and is a subject matter expert in police use of drones. Kabe is a drone subject matter expert and was formerly with Cape Aerial Telepresence, Motorola Solutions and is now with Skydio. Kabe and Fritz worked together on building our Drone as a First Responder program from the ground up and both have extensive experience with the FAA regulatory structure and the police use of drones.

I reached out to Fritz and Kabe and briefed them on your needs and they will be happy to assist you in any way they can. Fritz is based in San Diego but Kabe lives in the bay area (Skydio's HQ is in Redwood City) and is a great local resource for you to have.

I think it's great that you reached out early on the Fleet Week planning process and Fritz and Kabe will be great resources for you. Please let me know if I can be of further assistance!

Hi Lisa, thanks for sharing the info. Overall it looks good.

A couple notes:

- Toward the end it references an incident at an "In and Out Burger" this was actually a local taco shop.
- CVPD also uses speaker equipped drones for homeless outreach (see attached press release with link to video)
- Our patrol officers use drones to check difficult to reach areas such as rooftops or search large fenced areas and use drones with lights to help illuminate areas at night.
- We currently have 15 pilots and have flown over 2,100 drone missions in response to emergency calls for service

Let us know if you need anything further.

Warm regards,
Vern

Subject: CVPD Disaster Relief Program drone update
Attachments: Junge flight path 2.JPG; Junge flight path 1.JPG

Importance: High

Follow Up Flag: Follow up
Flag Status: Completed

Good morning Romeo,

Last Friday, our drone team assisted our Homeless Outreach Team on a second COVID related homeless outreach mission in an area informally known as "The Jungle". This area encompasses multiple jurisdictions and has a relatively high population of homeless persons. Our drone team flew 2 missions in Chula Vista's jurisdiction with a speaker equipped drone to identify camps and communicate with difficult to reach persons.

We had a tremendous response with 12 people coming to our staging area for COVID related services. These services included a free health screening, free masks, a free sanitation kit, educational materials and information about resources and local handwashing stations and restrooms established by the county. The joint mission included CVPD's drone team, CVPD's Homeless Outreach Team, a County nurse and Psychological Emergency Response Team clinician and members from homeless service providers. Three people are willing to accept shelter and our team is vetting them for appropriate placement.

See the following news story highlighting the mission: <https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>

I also attached flight maps of the missions to give a sense of the complex outreach area with a lot of camps and rough terrain. Although there are some roads and paths nearby, vehicle equipped speakers would not have gotten the job done. The speaker equipped drone allowed us to cover a large area in about an hour and a half. Our Homeless Outreach Team sergeant estimated that the same mission on foot would have taken most of a 10 hour shift to complete safely. The FAA's support of our program allowed CVPD to have a positive impact on our community while efficiently delivering services to those in need. The efficiencies and time saved helps free up our team to focus on more face to face outreach on the streets, which is still our preferred method of interacting with the homeless community.

Also, our patrol folks have been deploying spotlight equipped drones on night missions quite a bit. They have been able to check roofs, clear backyards or illuminate large areas in support of patrol folks. We have had a lot of positive feedback on the performance and importance of having additional drone support in the field, outside of our normal DFR workload. Thanks again for your support. The additional drones are deployed several times a week on a variety of missions. Our pilots love them and use them as often as makes sense on call.

Subject: CVPD 2nd drone outreach mission (Fri 4/24)
Attachments: Junge flight path 2.JPG; Junge flight path 1.JPG

Follow Up Flag: Follow up
Flag Status: Completed

Good morning Katelyn,

Last Friday, our drone team assisted our Homeless Outreach Team on a second COVID related homeless outreach mission in an area informally known as "The Jungle". This area encompasses multiple jurisdictions and has a relatively high population of homeless persons. Our drone team flew 2 missions in Chula Vista's jurisdiction with a speaker equipped drone to identify camps and communicate with difficult to reach persons. Other adjacent jurisdictions, including National City and the County of San Diego, were not covered during this mission, although there are many dozens more camps in the larger area.

We had a tremendous response with 12 people coming to our staging area for COVID related services. These services included a free health screening, free masks, a free sanitation kit, educational materials and information about resources and local handwashing stations and restrooms established by the county. The joint mission included CVPD's drone team, CVPD's Homeless Outreach Team, a County nurse and Psychological Emergency Response Team clinician and members from homeless service providers. Three people are willing to accept shelter and our team is vetting them for appropriate placement.

See the following news story highlighting the mission: <https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>

I also attached flight maps of the missions to give a sense of the complex outreach area with a lot of camps and rough terrain. Although there are some roads and paths nearby, vehicle equipped speakers would not have gotten the job done considering the terrain. The speaker equipped drone allowed us to cover a large area in about an hour and a half. Our Homeless Outreach Team sergeant estimated that the same mission on foot would have taken most of a 10 hour shift to complete safely. The FAA's support of our program allowed CVPD to have a positive impact on our community while efficiently delivering services to those in need. The efficiencies and time saved helps free up our team to focus on more face to face outreach on the streets, which is still our preferred method of interacting with the homeless community.

If appropriate, feel free to share this with the FAA and thank their team for their continued support!

Hi Vern,

Nice to hear from you as always, and glad to see that Mike is already engaging to assist!

I've been meaning to let you know that I was so impressed with your recent video on the drone outreach to the homeless community in your area. It really touched me to know that they are being used for such a wonderful humanitarian effort! Kudos to you and the CVPD team and thank you for all you are doing every day, and especially to aid in the COVID response.

Kind Regards,
Maria

Subject: touching base

Good morning Mike and Maria, I hope all is well with you and your families and colleagues.

I'm touching base because I received an inquiry from Diana McKibben with the Strategic Intelligence Group for the Northern California Intelligence Center (fusion center). She has been tasked with assisting San Francisco PD with a UAS strategy for their annual Fleet Week in the fall. This includes drone operations as well as counter-UAS planning.

I thought Mike might be a good contact for Diana to get started with at the FAA as the L.E. liaison to ensure they have the best planning possible, especially in airspace as complex as San Francisco. SFPD does not have a drone program but I'm looping Diana in with Tom Madigan with Alameda County S.O. which has a really robust program. Alameda S.O. already provides mutual aid air support to SFPD so he should have a good grasp of how to approach and assist with planning.

Mike, would it be ok for me to loop you in on an introductory email to get Diana looped into the FAA for her planning purposes in support of SFPD?

Best,
Vern

Vern,

Feel free to loop me in! I am good friends with Tom Madigan as well and worked with their program both when I was at DOJ and now at the FAA.

Keep safe and well,

Mike

Delivery Drones Consume More Energy than Vans

By The Editor on Apr 27, 2020 06:58 am

Using delivery drones in cities consumes up to ten times more energy than electric vans because they can only carry one parcel at a time and require frequent back and forth trips, a new study finds. Dr. Thomas Kirschstein, an economist at the department of Production and Logistics at Martin Luther University in Halle-Wittenberg, Germany, [...]

Is the World Ready for Drone Delivery?

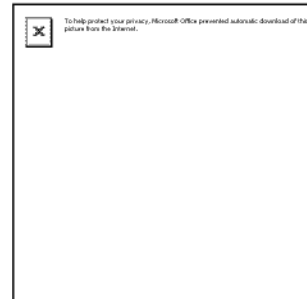

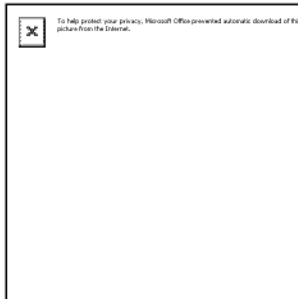

Wednesday, May 13, 2020 | 12:00PM - 1:30PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. During this webinar on May 13, industry leaders will discuss the impact that drone delivery would have on the world.

Join us to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

US Air Force Kicks Off Search for a Flying Car

By The Editor on Apr 29, 2020 06:58 am

The US Air Force on April 27 kicked off Agility Prime, a new effort to help industry create a “flying car” for both commercial and military. The goal of Agility Prime is to avoid the “cautionary tale” of a previous transformative technology: small unmanned aerial systems, said Will Roper, the assistant secretary of the Air Force for [...]

UPS and CVS to Deliver Prescriptions by Drone in Florida

By The Editor on Apr 29, 2020 06:56 am

UPS and CVS Health Corporation said that UPS subsidiary UPS Flight Forward (UPSFF) will use drones to deliver prescription medicines from a CVS pharmacy to The Villages, Florida for the largest U.S. retirement community, home to more than 135,000 residents. The service will use Matternet’s M2 drone system. Drone transport offers a fast delivery option for medicines [...]

US Dept of Transport Report on Blockchain for UAS

By The Editor on Apr 29, 2020 06:45 am

The U.S. Department of Transportation's Volpe Center has just published a report discussing the use of blockchain for unmanned aircraft systems (UAS). The report cites the use of blockchain for ensuring security and providing identity management solutions as well as air traffic management, flight authorization, and UAS conflict management. Flight data recorders or the black [...]

MIT Develops Drone Control by Muscle Gesture

By The Editor on Apr 29, 2020 06:16 am

A team from MIT's Computer Science and Artificial Intelligence Laboratory (CSAIL) came up with a method that dials us closer to more seamless human-robot collaboration. The system, called "Conduct-A-Bot," uses human muscle signals from wearable sensors to pilot a robot's movement. "We envision a world in which machines help people with cognitive and physical work, [...]

Airbus Simulation Tool for UTM Systems of the Future

By The Editor on Apr 29, 2020 06:05 am

At Airbus UTM, we use our unique simulation tool to explore and evaluate concepts, services, and architectures that will serve as critical foundation pieces of a robust and future proof UTM framework. The Prototype Environment One of the first efforts kicked-off within Altiscope, the Acubed project that became Airbus UTM, was the development of a [...]

US Navy Officially Releases UFO Videos

By The Editor on Apr 29, 2020 06:00 am

The US Department of Defense has authorized the release of three unclassified Navy videos, one taken in November 2004 and the other two in January 2015, which have been circulating in the public domain after unauthorized releases in 2007 and 2017. The U.S. Navy previously acknowledged that these videos circulating in the public domain were [...]

Subject: Grant For Drone Purchases

**Warning:
External
Email**

Aerial Armor is the nation's leading drone detection service provider and top systems integrator. Given our position in this industry we have the ability to provide drones and related equipment to our valued clients.

Law Enforcement: DOJ/Bureau of Justice Assistance has a special grant to help with the COVID-19 response. This grant, with proper justification, can be used to purchase UAS.

From the Deputy Director of BJA: BJA has \$850m available under the Coronavirus Emergency Supplemental Funding (CESF) Program to assist eligible states, local units of government, and tribes in preventing, preparing for, and responding to the coronavirus. The solicitation can be found at

<https://bja.ojp.gov/sites/g/files/xyckuh186/files/media/document/bja->

[2020-18553.pdf](#), and the eligible allocations can be found at

<https://bj.a.ojp.gov/program/fy20-cesf-allocations>.

UAS is listed as a purchase that would require prior approval by BJA:

“Unmanned Aerial Systems (UAS), Unmanned Aircraft (UA), and/or

Unmanned Aerial Vehicles (UAV) – if the recipient requests to

purchase an UAS, UA, and/or UAV, Federal Aviation Administration

approval must be obtained as outlined here:

https://www.faa.gov/news/fact_sheets/news_story.cfm?newsId=22615.

Documentation related to these purchases should be included with the

application or the applicant must receive written prior approval from

BJA post-award through the submission and approval of a GAN.

If you or your department have interest in creating or adding to your drone fleet please reach out to us and we will be more than happy to assist you.

Respectfully,

Josh Strange

Sales and Marketing Manager

Cc: Madigan, Thomas F., Sheriff
Subject: RE: UAS Program

Good morning Diana,

My final intro is Tom Madigan from the Alameda County Sheriff's office (although I see that Mike O'Shea with the FAA had the same idea for your local expert). Tom leads the Alameda County UAS program, one of the most robust and professional police drone programs I've seen. I've presented alongside Tom before and seen him present and I believe that he and his team have provided mutual aid UAS support to SFPD on multiple occasions. I am confident that he can assist you with advice for your planning purposes.

Tom, this was what I wanted to chat about to give you a heads up. This looks to be right up your alley and in your backyard. I hope you will be able to share your thoughts with Diana.

For either of you, please let me know if I can be of any assistance.

Warm regards,
Vern

Live video communications for first responders, public safety, and homeland security

- **Use live video to stay connected with the field.**
- **Give command-and-control real-time eyes in the field, enabling quicker and more informed decisions as events unfold.**

Hello, Capt. Vern,

We hope that you, your families and colleagues are staying safe and healthy.

VidOvation is helping first responders, public safety, and homeland security get crucial real-time information from the field to your command center to drastically improve the decision-making process. The critical mission of first responders, law enforcement, firefighters, emergency medical services, public safety, and homeland security are more challenging and complex than ever before.

The use of mobile video communications and portable Internet connectivity keep personnel in the field connected with their command center. This technology can give command-and-control real-time eyes in the field, enabling quicker and more informed decisions as events unfold.

Learn more about live video communications [Click]

Compact and lightweight field transmitters are available for the transmission of body-worn, in-vehicle, and drone camera systems back to a centralized command center. Larger rack-mounted field transmission systems are available for deployment in mobile command vehicles or for temporary command centers with cellular and Internet connectivity. These systems bond or

combine up to 12 IP connections, including cellular, the public Internet, satellite, WAN, and more, into a robust and reliable video, audio, and data transmission stream.

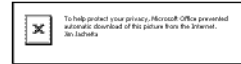

Command and control can make quicker and more informed decisions by having eyes in the field to observe events as they unfold in real-time remotely.

We look forward to hearing from you to discuss how we can help with any of your live video communications and cellular internet connectivity needs.

Thank you.

All the best,

Jim Jachetta, EVP & CTO

Subject: RE: Request for feedback - eLearning course on use of drones by public safety

Hi Lisa, thanks for sharing the info. Overall it looks good.

A couple notes:

- Toward the end it references an incident at an "In and Out Burger" this was actually a local taco shop.
- CVPD also uses speaker equipped drones for homeless outreach (see attached press release with link to video)
- Our patrol officers use drones to check difficult to reach areas such as rooftops or search large fenced areas and use drones with lights to help illuminate areas at night.
- We currently have 15 pilots and have flown over 2,100 drone missions in response to emergency calls for service

Let us know if you need anything further.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

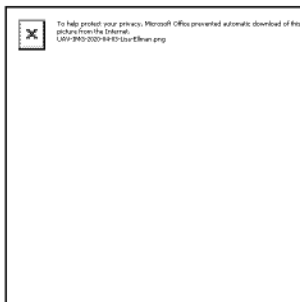

Tuesday, April 28, 2020 | 11:00AM – 12:00PM Eastern Time

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years.

- What has this situation taught us about how drones can be utilized in emergency situations?
- How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology?
- What will the “new normal” in the drone space look like?

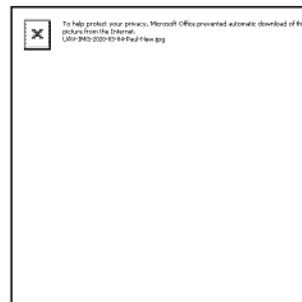

Join us today to discuss these topics and many others, followed by a live Q&A session with the audience.

National News

Associated Press: After COVID-19: Anxious, wary first responders back on job

The new coronavirus doesn't care about a blue uniform or a shiny badge. Police, firefighters, paramedics and corrections officers are just a 911 call away from contracting COVID-19 and spreading it.

With N95 masks hanging off their duty belts and disposable blue gloves stuffed in their back pockets, they respond to radio calls, make arrests and manage prisoners. But their training never covered something quite like this — what has been called an "invisible bullet."

It's sickened thousands of America's first responders and killed dozens more.

But many have recovered, and they're going back to work — back to the crime scene, back into the ambulance, back to the jail. Going back to this deadly pandemic's front lines.

Government Technology: Police are using drones for coronavirus management

In a matter of weeks, drones have arrived as a tool for local police departments looking to help control further outbreak of COVID-19 cases.

Thus far, the most common use case appears to be utilizing the machines to reinforce social distancing rules. If a crowd gathers in a public area, an officer will deploy a drone that will, via loudspeakers and a recorded message, urge citizens to disperse. This use case originated in countries like China and Spain.

Local News

Baton Rouge Advocate: One of two BRPD officers dies from injuries in Conrad Drive shooting; suspect taken into custody

A veteran Baton Rouge police officer died Sunday after he and his colleague were shot while responding to tips about a homicide suspect in the city's Howell Park neighborhood.

Baton Rouge Police Chief Murphy Paul said the second officer remains in the hospital "fighting for his life." The suspect — who was wanted in a domestic violence homicide that morning — was taken into custody without incident several hours after the shooting, which occurred about 12:30 p.m. on Conrad Drive.

Officials have not identified either of the officers, but Paul said the one who died had served with the department for 21 years.

Arizona Daily Star: Tucson creates new ordinance to deter aggressive 'First Amendment auditors'

The Tucson Police Department will no longer be forced to star in videos that cater to cop-haters.

The City Council took action last week on a distinctly 21st century problem: people showing up at crime scenes with cellphones in hand, looking to create conflicts they can post online for profit.

It's a trend seen by law enforcers around the country and around the state, the Arizona Daily Star found in a review of court records and related documentation.

The provocateurs are part of a loose network of people who call themselves “First Amendment auditors” and claim they’re protecting the public’s right to monitor government activities.

Tucson City Council members unanimously passed a new ordinance to curb such activity after viewing video of an extended verbal attack on a pair of TPD officers earlier this year.

The council created a new Class 2 misdemeanor punishable by a maximum \$750 fine. It allows TPD to arrest those who refuse to stay outside crime scene boundaries while filming at police calls.

CNY Central: New text line and confidential website for domestic violence victims in NY

Domestic violence reports are on the rise and there is new help available in New York.

According to NY State, reports are up 30-percent in April compared to last year. With people spending more time at home due to COVID-19 restrictions, people in New York in need of help can text a hotline or go to a confidential online site.

People looking for help can text 844-997-2121 or chat with a professional on the new confidential website. The text and online services will be staffed 24 hours a day, 7 days a week with experts in the area of domestic violence. Governor Cuomo says the new text program and confidential online service will make it easier for victims in isolation to contact the Office for the Prevention of Domestic Violence and get the help they need.

International News

BBC News: Coronavirus: Recorded crime in Scotland down by a quarter since lockdown

Recorded crime in Scotland has fallen by about 25% during the coronavirus lockdown, Police Scotland have said.

The number of serious assaults dropped by about 40% and house break-ins were down 30% compared with the same period last year.

However, "public nuisance" incidents - generally related to people reporting others for breaking lockdown rules - have more than doubled.

Police Scotland said they now accounted for about a fifth of all calls.

Fraud has also increased by more than 10% between 24 March and 19 April, according to the quarterly figures.

Irish News: PSNI Chief Constable Simon Byrne says attracting nationalists as support staff could solve recruitment problem

The issue with Catholic recruitment to the PSNI could be solved by first encouraging people to join the organisation as civilian staff, Chief Constable Simon Byrne has said.

Between 2002 and 2009 the proportion of Catholic officers increased from eight per cent to 30 per cent.

Catholic officers currently make up around 32 per cent of the organisation, however that drops to just over 19 per cent of PSNI civilian support staff.

Mr Bryne said he was just one of a line of chief constables "over the years who all wrestled with this issue".

Police Executive Appointments

VT Digger: Burlington delays police chief search, Morrison to remain in role

Burlington is delaying its search for a new police chief for a year due to the coronavirus pandemic, Mayor Miro Weinberger announced Friday.

Interim Police Chief Jennifer Morrison will continue in her role until June, when Deputy Police Chief Jon Murad will take over until Morrison returns in October. Morrison is leaving the position over the summer to help take care of her husband, who will be undergoing a medical procedure in Boston.

Announcements

Prosecutors Against Gun Violence: Virtual Summit: Prosecutors Respond to COVID-19

Prosecutors Against Gun Violence will hold a virtual summit about gun violence during the COVID-19 pandemic on **Thursday, May 7th from noon - 4:00 p.m. Eastern time**. Topics will include:

- Domestic Violence
- Child Abuse
- GVRO/ERPO
- Safe Storage
- Considerations for Jail Release
- Firearm Suicide

Good News of the Day

ABC News: Boston police officer belts out 'America the Beautiful' to spread comfort and peace

When a Boston police officer shared a video of her powerful rendition of "American the Beautiful" online, it caught the attention of Kelly Ripa and thousands of others awed by her take on the song.

Kim Tavares, a self-taught singer, has been with the Boston Police Department for 19 years. Amid the coronavirus pandemic, Tavares said she wanted to find a way to share a message of unity and peace during such a tumultuous time.

Photo of the Day

Hennepin County (MN) Sheriff's Office

The HCSO distributed 100 cloth face masks to the community at the Brian Coyle Center in the Cedar-Riverside neighborhood. The CDC recommends everyone wear cloth face coverings in public places. We are planning to hold several more mask distribution events in the near future.

Julia Sanchez

From: Vern Sallee <vsallee@chulavistapd.org>
Sent: Friday, May 1, 2020 1:36 PM
To: Joshua Isner
Subject: CVPD Drone as a First Responder (DFR) Program Follow Up
Attachments: Sallee CVPD DFR Article.pdf

Importance: High

Good Afternoon Josh,

Per our conversation, attached is the article on DFR I wrote for Police Chief Magazine which was just published in the March edition. Ours is the most advanced police drone program in the country as the only police department in the FAA's UAS Integration Pilot Program, and with over 2,217 drone flights pro-actively in response to emergency calls for service. We fly an average of 15 flights per day and can cover about 17 square miles with our FAA Certificate of Authorization. We are in the late stages of the FAA approval process to allow 100% drone coverage of the city. As you will see from the videos below, DFR is a radical paradigm shift in policing and de-escalation.

Chief Kennedy and I have presented nationally and internationally to police organizations and drone industry organizations and dozens of police departments have toured our operations. We have also testified to the Presidential Commission on Policing as subject matter experts and we are members of the COPS office SLTT Unmanned Aircraft System Working Group for best practices in police drone use.

There is no doubt in my mind that drones are the next "big thing" in police technology, and DFR is the most consequential drone concept on the horizon – there are over 18,000 state, local, tribal and territorial police departments but only around 200 have manned helicopter units. DFR brings 80% of the benefits of a helicopter (they have limited flight time, can't physically rescue people and can't keep up with most pursuits yet but can do most other tasks) at less than 2-3% equipment cost and less than 15% of the hourly operating cost. The hourly operating costs will go down with automation and regulatory changes at the FAA.

The DFR article combined with the videos will give you a good idea of the potential of the technology.

CVPD UAS Program website: <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Snip of CVPD DFR Activity Dashboard (live dashboard is on our website):

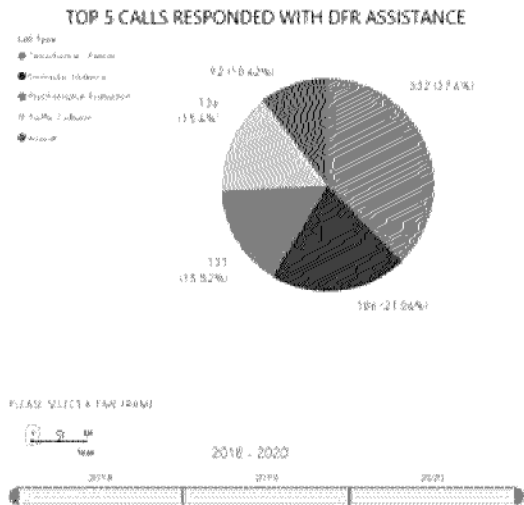

Drone-Related Activity Dashboard

[Liteye Expands Counter UAS Layered Approach with Raytheon Missiles & Defense's Phaser](#)

By The Editor on May 01, 2020 06:58 am

Together with its Colorado based teammate Numerica, Liteye Systems, Inc. has seen significant success in approaching the UAS problem-set through a collaborative and layered strategy. "We recognize a need for our systems to integrate with higher level C2 networks, but we also appreciate the need for our systems to work effectively by itself or directly [...]

[IDF Drone Crashes in Gaza Strip](#)

By The Editor on May 01, 2020 06:23 am

An IDF drone crashed in the Gaza Strip on Monday night, the IDF confirmed. The IDF noted that the reason for the crash was a technical malfunction and that there was no fear of an intelligence leak or loss of information. Similar drones have previously crashed in the Gaza Strip and in Lebanon. The Skylark [...]

Drone Mapping a UNESCO Archeological Site

By The Editor on May 01, 2020 06:15 am

SimActive Inc., a developer of photogrammetry software, announced that its Correlator3D product is used to map the UNESCO World Heritage Site of Halin in Myanmar. The archaeological project involved the deployment of drones to gather data necessary to prepare orthophoto maps and digital elevation models. The goal is to find new features as well as [...]

Drone Light Show Thanks Healthcare and Essential Workers

By The Editor on May 01, 2020 06:14 am

On Tuesday evening, Verge Aero, the leader in high performance drone light shows, delivered a unique aerial tribute to medical staff and essential workers on the frontline of the COVID-19 pandemic. The display of gratitude took place opposite the Hospital of the University of Pennsylvania and The Children's Hospital of Pennsylvania as part of the global #LightItBlue and local #PhillyShinesBlue campaigns, not far from [...]

Why was the BF109 so Slow Compared with the P51?

By The Editor on May 01, 2020 06:00 am

Why is the ME 109G with it's huge engine in a small airframe about 40-60 mph slower than the P 51 Mustang? In this video we look at the key differences between the Merlin 1650 and Daimler Benz DB 605 as they relate to power. Greg's Airplanes and Automobiles has more videos available on related [...]

Did You Know...

Latest Updates On COVID-19

We know there is a lot of information about COVID-19 and want to help our residents and businesses stay up-to-date. Our COVID-19 webpage is updated every weekday with the most current information. Some important things to know include:

Face Coverings: The County has declared effective May 1 that everyone must wear a face covering when outside their home and within six feet of anyone not in their household. In addition, face coverings are required when visiting or in line at any essential business such as a grocery/convenience store, bank, post office, gas station, etc. MTS also is requiring all bus and trolley riders wear a face covering beginning May 1. Face coverings can be masks, bandannas, folded t-shirt, scarf, or whatever you have available. It must cover your nose and mouth. Children under two are not required to wear face coverings.

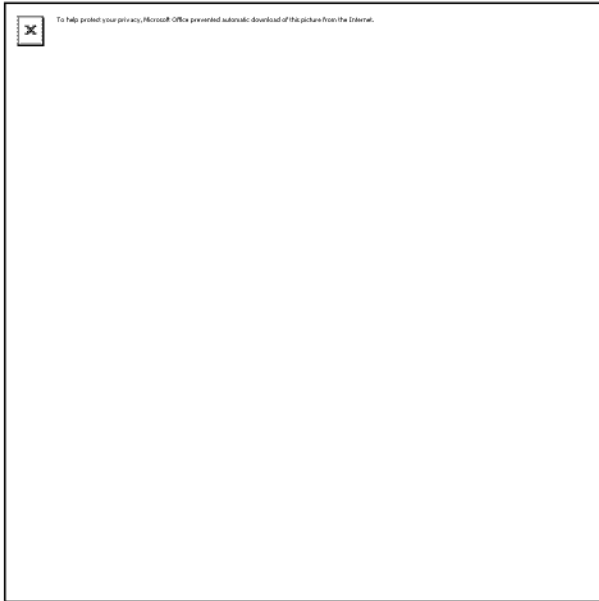

City Parks: All City parks, including dog parks in Chula Vista, remain closed. This means no picnics, no playing on the playground equipment, no sports activities, no gatherings in any park. You may walk, bicycle or run in your neighborhood park but you must keep moving - no stopping. Park restrooms and parking lots also remain closed. Remember to maintain a six foot social distance between others and wear your face covering!

Food Resources: For emergency food resources and food distribution events, residents may call 2-1-1 or the San Diego Food Bank at (866) 350-3663.

Food, Utility, Housing, Healthcare and More: Residents can call 2-1-1 San Diego to receive a variety of information. The assistance is available in 200 languages for 6,000 services and resources. Or visit them online.

Housing/Eviction Moratorium: In March, the City Council passed a moratorium that stops residential/commercial tenant evictions and suspends foreclosure for nonpayment of rent or mortgage when a tenant's or homeowner's income has been substantially impacted by COVID-19 and that impact can be adequately documented. The moratorium runs through May 31, 2020, unless extended by the Chula Vista City Council. Check the Housing webpage for details.

Information for Seniors: The Chula Vista Police Department Senior Volunteer Program checks on seniors with phone calls in their You Are Not Alone program. Call (619) 476-2417 for more information. The Parks and Recreation Department also has a wealth of information for seniors on their [virtual website](#). Special shopping hours have been scheduled at many Chula Vista grocery stores to help you stay healthy during this time; check their website or call for specific hours.

Mental Health Services: The County of San Diego Access and Crisis Line is available 24/7 at (888) 724-7240. [Or check online](#) for other resources.

Physical Health, Reading and Education: Our [Virtual Community Center](#) has a vast array of choices including: Virtual Recreation with fitness, education and activity; Virtual Library to check out all the virtual library services; Virtual Tours of world museums and U.S. National Parks; Stay Connected with tips for staying connected with friends

remotely; Stay Nourished; and Stay Informed.

Small Business Resources: A variety of programs are available to assist small businesses. Our Economic Development Department provides the latest [on their webpage](#).

Redistricting Commission

City residents are encouraged to apply for the 2020 Redistricting Commission. The Commission will be tasked with determining whether to recommend revisions to the City Council district boundaries, in light of the 2020 Census information. Any adjustments to the boundaries will be used in future elections, beginning in 2022. In 2012, voters approved an amendment to the City Charter that City Councilmembers would be elected by geographic district beginning with the 2016 election. Consequently, the first Districting Commission was formed and the current districts were approved in 2015.

Minimum qualifications for the Redistricting Commission members are that the applicant must be a Chula Vista resident, a registered voter and at least 18 years of age. Detailed requirements and qualifications necessary to serve as a Commissioner can be found in the City Charter, Section 300.5. Applications, which will be accepted now through July 31 at 5 p.m., can be [submitted online](#). For further information about the application process, contact the City Clerk's office at (619) 691-5041 or [by email](#).

After July 31, the Charter Review Commission will review all completed applications and select ten of the most qualified. Out of those ten, four will be selected randomly to be Redistricting Commission members, then those four members will meet and select the final three for a total of seven members from the initial list of ten. The three applicants selected by the first four members will be submitted to the City Council for appointment to the Redistricting Commission.

The goal is to seat the Redistricting Commission by September 2020, which gives the members one year to complete the task of recommending the revised districts

for Council consideration and approval by October 2021.

Sweetwater Park

The Port of San Diego Board of Port Commissioners has approved a Coastal Development Permit (CDP) for the future Sweetwater Park on the Chula Vista Bayfront. Sweetwater Park, planned for the northern portion of the Chula Vista waterfront near E Street and Bay Boulevard, is envisioned as a meadow-type open space to showcase the unique natural assets of San Diego Bay, encouraging passive recreation to complement the adjacent Sweetwater Marsh National Wildlife Refuge. Proposed features include: meadows and specialty gardens, mounded grasslands; nature playground; picnic area; various pedestrian and bicycle paths; sand dunes; and multiple overlooks for Bayfront viewing.

Sweetwater Park is one of two future parks currently in the design phase for the Chula Vista Bayfront Project. Sweetwater Park, along with Harbor Park, will account for more than half of the new park space planned for the Chula Vista waterfront.

The approved CDP will allow for completion of the design of the park. Future financing for the Gaylord Pacific Resort Hotel and Convention Center will include funding for Sweetwater Park and other public infrastructure and amenities. Next steps for the park include award of a construction contract and then start of construction. Sweetwater Park is required to be completed prior to a Certificate of Occupancy being issued for Gaylord Pacific.

In addition, construction work has begun at E Street and Bay Boulevard as part of the Costa Vista RV Resort project. This work

will result in periodic traffic impacts, including lane closures, through August 2020. Construction will take part in phases and the contractor will post current signs on the roadway to each construction area. The work also will have some minimal and periodic impacts on the Bayshore Bikeway. While the Bayshore Bikeway will remain open, cyclists and pedestrians can expect detours and temporary delays.

The Chula Vista Bayfront Project, a partnership between the Port of San Diego and the City of Chula Vista, envisions a vibrant, innovative destination in the San Diego region - a unique and welcoming place for people to live, work and play. When the project is complete, the public will enjoy more than 200 acres of parks, a shoreline promenade, walking trails, RV camping, shopping, dining and more. [Visit the website](#) for more information about and updates on the Chula Vista Bayfront Project.

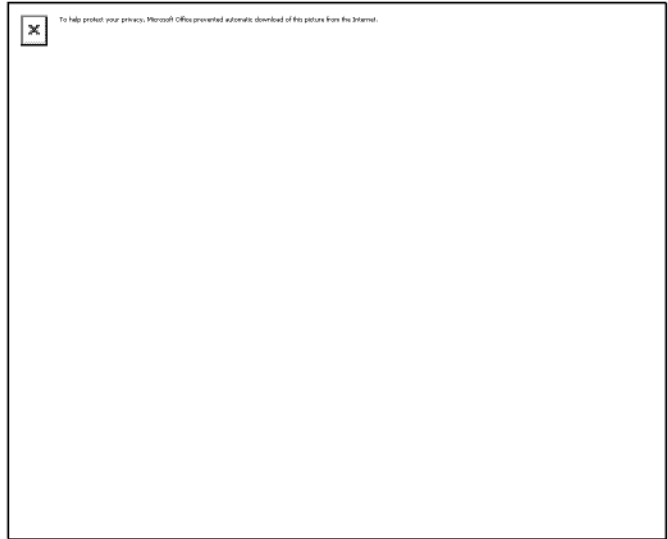

Fire Squads

The Chula Vista Fire Department has purchased two new Type 6 Squads/Patrol Apparatus. These apparatus are to improve service delivery in the Eastern Battalion (B52) of Chula Vista and are staffed with a Fire Captain and a Firefighter Paramedic. Squad 63 and Squad 62, which currently uses a full size truck, will transition to the new vehicles after they are outfitted with radios and equipment. Both Squads will be placed in service by the end of May.

Squads 62 and 63 will improve coverage in Districts 1 and 3 by augmenting the staffing of the Fire Department during peak call hours to keep other crews in service/available. Squads have the ability to respond quicker due to the smaller vehicle size and can cover territory between Fire stations. Type 6 Squads also are equipped to allow for immediate fire attack.

The Squads cost \$280,000 each and were purchased with Measure P funds. Measure P is the half-cent, ten year tax passed by Chula Vista voters in 2016.

Did you know...

...the **Chula Vista Police Department Homeless Outreach Team (HOT) team** has coordinated with local social

service agencies and the County of San Diego to increase outreach and expand services to members of Chula Vista's homeless community. CVPD's HOT team provides face to face service and support to homeless clients whenever possible and has enjoyed tremendous success in serving a vulnerable community. While the HOT team is generally able to reach most of the City's homeless population, there are some pockets of the homeless community that present a unique challenge to serve. Chula Vista has dozens of square miles of urban canyons that have difficult terrain and dense foliage. CVPD officers often go into these environments on foot to reach people, which is a time consuming, arduous and oftentimes dangerous endeavor. Moreover, it is even more of a challenge for social service providers to accompany CVPD staff on these outreach efforts.

Partnering with its drone team, the HOT team personnel recently staged services near common exits to canyons with known homeless encampments and used a speaker equipped drone to communicate public health messages in English and Spanish. This was a public health outreach mission and not an enforcement operation and no homeless persons were displaced or forced to move. During the outreach, eight square miles were covered reaching 26 encampments via speaker. Using the drone, the HOT team was able to provide outreach in three hours which normally would have taken two days.

...while City buildings may be closed to the public, staff is still working hard to maintain our City and to keep residents and businesses informed. In addition to public safety, the **Chula Vista Public Library** continues its

programming including story hour and digital resources and **Parks and Recreation** is featuring many interesting activities in the [Virtual Community Center](#). Check it out! Also, **Public Works Department** staff continue to maintain parks, drains, and streets including filling potholes. Other City staff are working remotely answering emails and providing assistance to residents and businesses. Got questions? [Email](#) Communications. Emails are answered Monday-Friday from 8 a.m. to 5 p.m.

...**Baron's Market** is opening May at the Otay Ranch Town Center. [Check the website](#) for exact opening date and store hours. Welcome to the neighborhood!

...the City has formed a new **Task Force** implementing strategies to reduce the spread of COVID-19 in Chula Vista. The Police Department, together with the Fire Department, Economic Development, Public Works and Development Services, are collaborating with businesses, stakeholder organizations, community leaders, and with the general public to flatten the curve. The Task Force is conducting walk-about to City businesses advising them of current COVID-19 situations in Chula Vista and guide them in complying with health directives and requirements. In a recent walk-about along the Third Avenue corridor between Orange Avenue and G Street, they contacted 132 businesses and 33 members of the public. While some businesses were operating outside the requirements of health orders, the Task Force reported that local grocery stores are doing a great job in complying. Grocery stores are actively monitoring the number of customers in the store, sanitizing shopping carts and frequently-touched surfaces, and maintaining social distancing. Walk-about teams plan to visit more businesses throughout the City.

...in mid-April, the Chula Vista Fire and Police Departments coordinated a **Salute to Chula Vista Hospital Workers** to honor them for their courageous and dedicated work during the COVID-19 pandemic. Fire and Police vehicles visited Scripps Chula Vista Hospital and Sharp Chula Vista Medical

Center. At each location, CVFD and CVPD waved handwritten signs of thanks with lights and sirens leading the way. A Santee firefighter accompanied them on bagpipes as well as a flyover from the San Diego Sheriff ASTREA helicopter. Thank you to all health care workers! You are our heroes!

...don't forget that many of your favorite **local restaurants are still open** for take-out and delivery. These businesses need your patronage as we all get through these difficult times together. From Third Avenue to Main Street to the Otay Ranch Town Center and everything in between, a variety of tasty options are available. Check your favorite for hours and availability. Free metered parking in downtown Chula Vista will be available through the month of May.

...the **Census** is still on! Chula Vista needs 41 percent more residents to fill out the Census 2020 so our community receives federal funding for the next ten years. Our Chula Vista schools, healthcare and housing deserve a fair share! Do your part and [fill it out](#).

...congratulations to **City Engineers** who were awarded the Construction Management Association of America (CMAA) San Diego's Annual Project Achievement Award Winner. They received first place on projects totaling over \$15 million for the Willow Street Bridge Replacement Project, involving a complex bridge replacement with

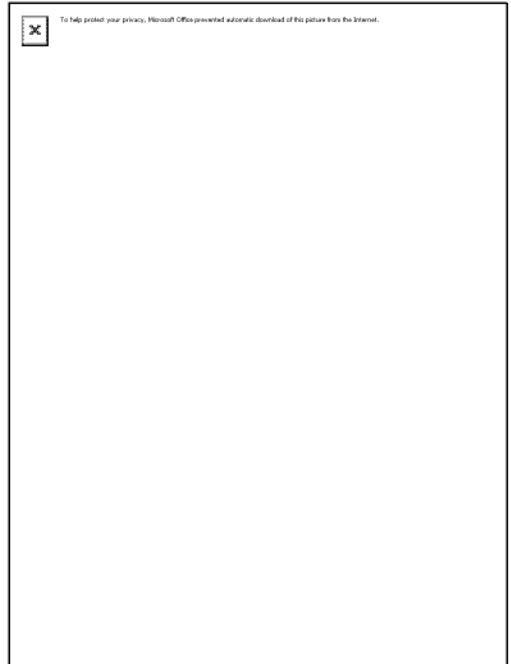

Photo courtesy of Rick Eaton for the Star News

challenging site and foundation conditions, constructability concerns, environmental restrictions, and evolving design criteria. Kleinfelder was the bridge design engineer and TY Lin International was the construction management resident engineer. Way to go!

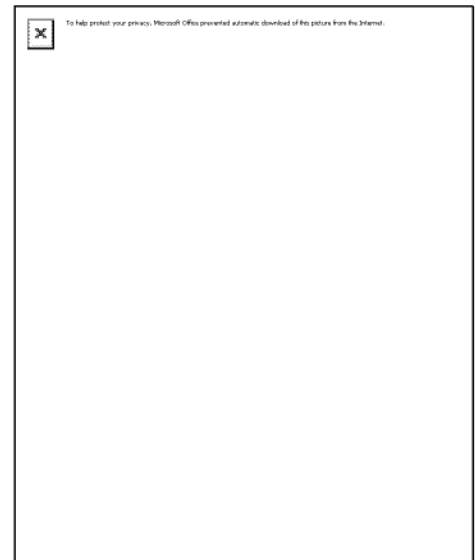

...the Chula Vista City Council has initiated an internal recruitment process for a new **City Manager** to replace **Gary Halbert** who is retiring in June after six years at the helm. An ad hoc committee will lead the recruitment effort. Mayor Mary Casillas Salas said, "We feel we have the talent on our current leadership team to select our next City Manager. During this time of uncertainty and challenges, we want a candidate who has the knowledge, skills, and leadership abilities to step right into the role and not miss a beat." Halbert has been with the City since 2008 and has served as Assistant City Manager and Director of Development Services. Previously, he was Assistant City Manager in Santee and before that served for more than 20 years at the City of San Diego. Thank you, Gary! We will miss you.

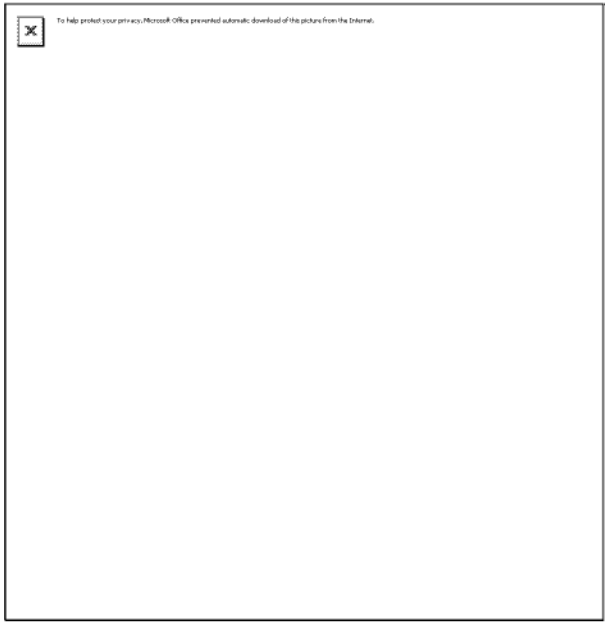

...we understand that many are seeing **an increase of coyote sightings** in your neighborhoods. We cannot trap, kill or relocate wildlife. The main deterrent is to not have a food source for them. Trash should not be left out in bags and trash cans should be secured. Food, like pet food, should not be left outside. Even bird feeders should be kept in high areas not accessible to coyotes. Fruit that drops from trees should be picked up quickly. Residents are urged to call both California Fish and Game at (858) 467-4201 and San Diego County Wildlife Services at 1-800-486-0010 since both of these agencies are tasked to deal with coyote populations.

...construction on the **new Fire Station 9** at 100 Moss Street began on April 13. It is the second fire station to break ground this year with Fire Station 5, 341 Orange Avenue, commencing construction in March. Traffic patterns have changed to allow the fire engines to access the new station efficiently. Both new stations are designed to replace older stations and are being built in neighborhoods that have seen a growth in population. Fire Stations 5 and 9 are funded by Measure P, estimated to cost \$17.9 million, with a projected completion date of mid-2021. The new stations are planned to serve the community for the next fifty years.

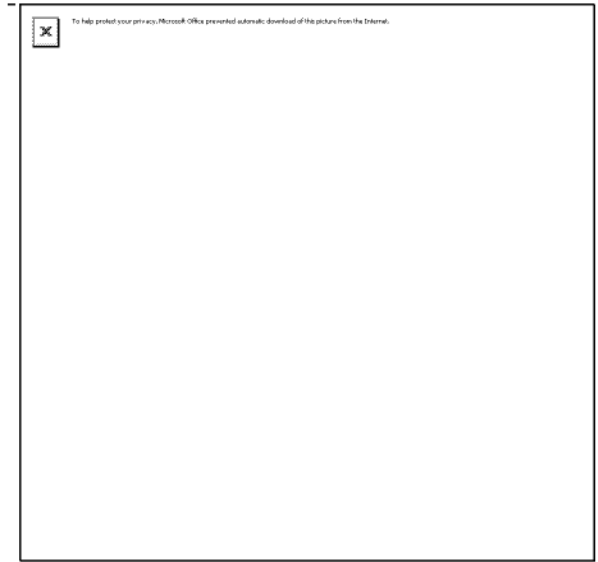

...in more Fire Department news, **Chula Vista Fire Academy 20-01**, the largest yet, completed their 16-week training with strict precautions. They will have a virtual graduation on May 21 with 23 new recruits becoming Chula Vista Firefighters! Recently they were honored by the department and their families with a surprise drive-by celebration at the Fire Station 4 training center. [Check it out on this video!](#) Congratulations and welcome to the Chula Vista family!

...in mid-April, the City resumed the **Operation Pride program** coordinated by **Sam Alzubaidi, Park Ranger Program Manager, and Frank Herrera, Park Ranger Supervisor**. On a weekly basis, the two search the City for illegal encampments and locations frequented by the homeless population including City parks. They issue a notification for any belongings they find giving the owner 24 hours to remove them. When they return and the items are still there, Sam and Frank remove the items and clean up the area. Recently they were joined by several employees from **Public Works** on large clean-ups. Some of the locations are not only unsanitary, they can be dangerous (storm drains, culverts, needles, biohazard waste, etc.). Operation Pride works closely with the Police Department HOT team. Since April 13, they have removed 23,825 pounds of trash and debris! Thank you Sam, Frank, and Public Works for keeping our City clean and safe. You rock!

Before

After

Events

Per the Governors directive, all May events within the City of Chula Vista, have either been postponed to a later date or cancelled. Due to current health and safety conditions surrounding the coronavirus, this is the best option to keep the health of everyone in Chula Vista a priority. Please check individual event websites for further details.

Virtual Day of the Child

Each year, the community of Chula Vista looks forward to the Day of the Child celebration sponsored by the Chula Vista Community Collaborative. This year's festival, originally planned for April 18, had to be postponed due to the COVID-19 outbreak. Annually the festival draws close to 5,000 people including adults and children featuring over 100 displays and activities for kids and families.

Rather than waiting for the live festival, CV PAL asked the Community Collaborative for their help in doing a virtual Day of the Child celebration. The virtual celebration will be **online starting April 30 and will be available the entire month of May.**

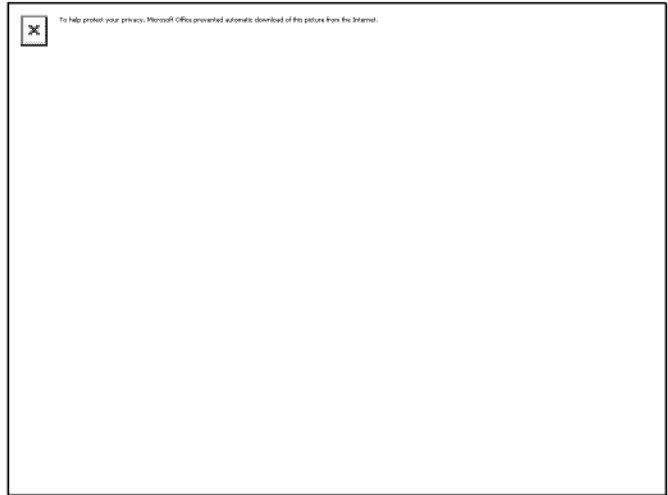

Some of the workshops include dual-language story time where Mayor Mary Casillas Salas will read a children's book in Spanish; while Police Chief Roxana Kennedy will read a story in English. There also will be science demonstrations by Chula Vista Police Officers and Firefighters as well as fitness segments for all ages by the San Diego Seals Lacrosse team, and other fitness professionals. In addition, kids can learn how to do fingerprint art with a Chula Vista Police forensics specialist, and kids will be able to do yoga from Arts 4 Learning San Diego. All workshops will be available [through the website.](#)

Virtual City Meetings

The City Council has been meeting remotely during the COVID-19 pandemic and will continue to do so until further notice with Council Chambers closed to the public. The next City Council meeting will be **Tuesday, May 5.** Residents are invited to [provide comments](#) once the agenda is posted. All comments will be

available to the public and the City Council using the eComment portal. Comments must be received prior to the time the Mayor calls for the close of the commenting period. Comments received after such time will not be considered by the City Council. If you have difficulty or are unable to submit a comment, please contact the Office of the City Clerk for assistance [via email](#) or call (619) 691-5041.

Members of the public can [watch the meeting](#) via livestream on Tuesdays at 5 p.m. In addition, most Chula Vista City Council meetings are video recorded and aired live on AT&T U-verse channel 99 (throughout the County), and on Cox Cable channel 24 (only in Chula Vista). Recorded meetings are also aired on Wednesdays at 7 p.m. (both channels) and are archived on the City's website.

Virtual Public Workshop on Chula Vista Fire Department Ambulance Transport Services

CVFD will present an overview of implementing fire department based emergency medical transport services in Chula Vista on **Wednesday, May 6**, at 5 p.m. Chula Vista is expected to improve service to the community by adding more ambulance units/hours to the system, reducing outlier response times in the east, decreasing the costs of transport bills for patients, and providing unified dispatch of first responder and transport resources with no impact to the City's General Fund or other public services. The public will be able to provide input and ask questions during the workshop. [Visit the City Calendar](#) for details on how to participate.

Virtual Public Workshop on Development of FY 2020-21 Budget

Staff will present an update on the budget planning process, impacts of COVID-19 closures on general fund, and next steps at a Budget Workshop on **Monday, May 11**, at 6 p.m. The public will be able to provide input and ask questions during the workshop. [Visit the City Calendar](#) for details on how to participate. Additionally, public input will be [accepted online](#) after the workshop.

Other Virtual Meetings

Currently, the following meetings are scheduled as teleconference meetings. Civil Service Commission on May 7, at 5:15 p.m.; Measure A Citizens' Oversight Commission on May 14, at 6 p.m.; and the Planning Commission on May 27, at 6 p.m. Check for updates and details on the [board and commission page](#).

Public Works Week

May 17-23 is designated as Public Works week with the theme, "The Rhythm of Public Works," which describes our communities as a symphony of essential services working in concert to create a thriving environment. Public Works includes Wastewater: Sewer main and lateral maintenance and construction, CCTV, and utility mark-outs; Stormwater: channel, storm drain, culvert maintenance; Street crews: pavement, sidewalk, signing & striping, right away median maintenance, graffiti removal, trash and debris removal; Urban Forestry: tree trimming and removal; Open Space maintenance; Building C&R and custodial maintenance; Fleet services; PW Admin, dispatch and support staff. Partners include City Engineers, Gardeners and Park Rangers.

In addition to ongoing maintenance efforts, (potholes, graffiti removal), our Public Works Department has been instrumental during the coronavirus emergency. They have responded throughout the city, providing disinfecting supply kits to public counters in open facilities, servicing City vehicles critical to public safety, fabricating public signage promoting closure and social distancing restrictions, and devised a successful rain storm response strategy to prevent injuries or property loss. Thank you, Public Works, for all you do...we appreciate you!

Episode 36: DJI Mavic Air 2 Release, FAA Grants BVLOS Waiver, CVS, UPS & DroneUp Deliver prescriptions, & more

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

This week on the InterDrone podcast we sat down with Sally French, aka The Drone Girl, and Douglas Spotted Eagle of Sundance Media Group. Sally French and the InterDrone team discussed the DJI Mavic Air 2 Release, the FAA granting a BVLOS waiver, CVS, UPS, & DroneUp delivering prescriptions during COVID to retirement communities, & much more.

We then sat down with Douglas Spotted Eagle to speak about what industries he sees poised to have the most growth with regards to their UAS operations and uses, and where he sees knowledge gaps in the field, and much more.

[Listen Now>>](#)

FAA Responds Quickly To COVID Drone Waiver

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

COVID-19 has prompted the FAA to loosen its notoriously tight restrictions on drones flying beyond visual line of site (BVLOS). What's more, the FAA approved the exemption within 24 hours, suggesting a nimbleness that was previously

unheard of. The waiver is contingent on the effects of virus restrictions and expires June 30, 2020, or as soon as federal or state COVID-19 control measures allow for conventional inspection methods.

[Read More>>](#)

Session of the Week

Michael Blades of Frost & Sullivan led last week's webinar titled, '**Global Commercial UAS Market Outlook, 2020**'. The webinar addressed the current trends in the commercial UAS market, what technologies are driving the commercial UAS market, where the growth opportunities are, and more.

'Not well-received': Connecticut police department scraps 'pandemic drone' program after outcry

The Westport Police Department, located in Connecticut's hardest-hit county of Fairfield, has abandoned its idea to use high-tech drones that can detect symptoms of coronavirus infection from up to 190 feet away. The backtracking came after people expressed privacy concerns about the program. On Thursday, Police Chief Foti Koskinas and First Selectman Jim Marpe said the drone surveillance plan would not come to fruition because it was "not well-received," according to Westport News.

[Read More>>](#)

UPS and CVS will use drones to deliver prescriptions in Florida

The drone deliveries will begin in early May. The first flights will be less than half a mile and will be delivered to a pickup location near the retirement community. Initially, a UPS ground vehicle will complete the delivery to the resident's door. The prescriptions will be delivered from one CVS store, with two additional stores joining at a later date.

FROM THE EDITOR

Greetings!

First of all, I would like to thank everyone who registered and attended our recent webinar, "How Will COVID-19 Impact the Present and Future of the Drone Industry?", we had a wonderful turnout and had some great questions come from the audience. If you weren't able to attend, you can watch it on demand [here](#). Our next webinar, "Is the World Ready for Drone Delivery?", will be held on May 13th from 12 PM to 1 PM Eastern.

If you want to get up to date on what is happening now in drone delivery, our featured article talks about a recent [last mile drone delivery test](#) held in conjunction with DroneUp, UPS, and CIT. During the interview, we got a rare, in-depth inside look at how the tests were designed and conducted, and the key takeaways. We also cover UPS' and CVS' plans to deliver prescriptions to The Villages in Florida.

Be well and stay safe!

Danielle Gagne
Commercial UAV News Editor

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy

to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

Wednesday, May 13, 2020 | 12:00PM - 1:00PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Subject: AAR 05/03/20

Good morning,

UAS was used for one incident overnight:

CVL037324

PIC – Agent E. Linney

VO – Officer R. Anderson

Officers responded to 1543 Tierra Bonita Place in response to multiple calls from neighbors of a subject yelling about killing himself, blood, and blowing someone's head off. Enterprise 3 with light attachment was deployed to get eyes on the residence before officers made contact. I was able to clear most of the front of the residence, including seeing inside a second story window with the drone. I was also able to clear the backyard but was unable to see in backyard windows due to large trees in the backyard area. Upon making contact at the residence, no one answered the door, so officers cleared.

Sincerely,

Agent Evan Linney #1081

Subject: AAR 05/02/20

Today, UAS flew 11 missions from both locations. The camera "sway" is still present. The drone disconnected from CAPE during one mission, but was safely returned to the station by the PIC.

- CVL036875 Dispensary Search Warrant, 2675 Faivre St. UAS assisted S.I.U. and N.E.T. with the service of a search warrant at the dispensary.
- CVL036899 Traffic Hazard, 3992 Main St. Call heard via Live911. Reporting Party advised a truck had just spilled a load of glass bottles in front of his residence, creating a traffic hazard. UAS arrived on scene prior to Patrol and it appeared to be a small number of recyclables in the roadway, not presenting an emergency. Patrol responded and advised the RP.
- CVL036903 Possible Narcotics/ Stolen Vehicle, 1420 Hilltop Dr. UAS responded to a report of possible narcotics sales taking place in two vehicles in the parking lot of the apartment complex. UAS arrived on scene after the first Patrol unit. As the Officer aired the plates on the vehicles, one returned as an active stolen. UAS remained overhead while a hot stop was conducted and the occupants were detained.
- CVL036927 Fight, Broadway/ H St. Call heard via Live911. Reporting Party advised that there were 6 transients in an active fist fight. UAS arrived on scene prior to Patrol and saw that the transients were now hugging, and there was no active fight. Units were updated and cleared the call after checked the transients' wellbeing.
- CVL036948 Possible Wanted Subject, 1100 Hilltop Dr. UAS responded when an Officer stopped a subject who possibly matched a BOLO of a wanted subject. UAS arrived overhead and remained on scene until additional units arrived to cover the contact Officer.
- CVL036970 Person Down, 498 Broadway. Call heard via Live911 about a subject down on the sidewalk having difficulty breathing. UAS arrived on scene prior to Code-3 en route Patrol. UAS updated location of call after units were dispatched to 498 H St. Medics arrived on scene and handled call.
- CVL036970 Welfare Check, I-805/ Telegraph Canyon Rd. UAS checked for a report of a transient sleeping in the grassy area near the freeway off-ramp. Subject was no longer present and call was cleared without Patrol resources.
- CVL036978 Reckless Driver, 1037 Oleander Ave. UAS responded to check the registered owner's address for a vehicle seen driving recklessly across the Eastlake Country Club golf course. UAS arrived in the area, when a unit advised that the vehicle had been seen traveling southbound on Oleander Ave. UAS and Patrol checked all side streets near the R.O. address but the vehicle was no longer in the area.
- CVL036979 Suspicious Circumstances, 784 Ash Ave. UAS responded to a report of suspicious circumstances after the Reporting Party advised that he had located a device stuck on the bottom of his vehicle. RP advised that the device was "ticking." UAS remained overhead as units evaluated the incident and treated the device as a hazardous object. The drone disconnected from CAPE during this flight.
- CVL037000 Suspicious Circumstances, 670 Flower St. UAS responded to a call of a subject that possibly took items from the school. UAS arrived on scene prior to Patrol but there was no one matching the Reporting Party's description. UAS checked the surrounding streets, and Patrol clarified that the RP did not see the subject take anything.
- CVL036979 Suspicious Circumstances, 370 K St./ 784 Ash Ave. UAS assisted Patrol with checking the address for a subject possibly involved with the device at the Ash Ave. address. UAS made several return flights due to depleting the batteries while overhead.

Ascent Vision Technologies Releases X-MADIS

Upgrade

By The Editor on May 04, 2020 06:12 am

As the need to continue to adapt to the growing threat posed by small unmanned aerial systems (sUAS), Ascent Vision Technologies (AVT) has released the latest variant of the eXpeditionary Mobile Air Defense Integrated System (X-MADIS), offering next-generation portable, on-the-move counter sUAS capabilities. The newest version of the X-MADIS incorporates several new hardware components for [...]

Vern Sallee

Hello Vern,
Congrats on an amazing career at CVPD. The DFR activity stats are most impressive and I'm hoping your success at CVPD will encourage other PDs to adopt DFR as well. I was involved in a drone delivery project for the UN 2 yrs ago and would love to connect with you on LI.
Best Regards,
Ray

Good morning Jon,

Sorry for the delay in response. It was a pleasure speaking with you last week about Redondo Beach's exploration of DFR. Lt. Don Redmond is our drone program manager and he led the PD's RFP process with ultimately selected Flying Lion for our RPIC provider. Don can provide you with a copy of the contract and the RFP if you wish. We're happy to support and share information with you to expand your program. Feel free to contact Don or me anytime.

Warm regards,
Vern

Attachments: Sallee CVPD DFR Article.pdf

Sir,

Thank you very much for your quick response. There has been no formal academic study or evaluation of our program to this point, but not for lack of transparency or engagement on our part. The concept is new and has really gained traction only in the last year as we refined operations and garnered multiple successful outcomes. Also, we have more data behind us now for more independent analysis.

The concept of DFR was conceived of and built by CVPD in partnership with a startup called Cape Aerial Telepresence (which has since been acquired by Motorola Solutions). CVPD and Cape were accepted into the FAA's Integration Pilot Program in May 2018 and we launched the pilot program in October 2018. As with any new concept, we had to overcome quite a few challenges technically and operationally. There are still challenges today but with 2,256 missions under our belt, we are confident that the concept can be taken to scale nationally and improve policing outcomes dramatically. This will accelerate as the technology matures, becomes more automated and the FAA adopts regulations more favorable to integrating drones into the National Air Space system (NAS).

In terms of outside evaluation/transparency, here is what we have done so far:

- Quarterly reports to the FAA sharing mission flight data as part of the FAA UAS IPP program (as I mentioned, we are the only police department in the program)
- Formal Quarterly presentation in Washington DC to the FAA's IPP team in January 2020
- I wrote an article published in the March 2020 edition of Police Chief Magazine (see attachment)
- Chief Kennedy and I are UAS program Subject Matter experts participating in the USDOJ Office of Community Oriented Policing (COPS) State, Local, Tribal, and Territorial Unmanned Aircraft System Working Group (https://cops.usdoj.gov/html/dispatch/06-2019/Directors_Message.html)
- On April 27, 2020, Chief Kennedy and I presented the DFR program in a virtual hearing to the President's Commission on Law Enforcement and Administration of Justice (technical committee) as Police UAS subject matter experts (<https://www.justice.gov/ag/presidential-commission-law-enforcement-and-administration-justice/working-groups>)
- Formal presentation by Chief Kennedy and I at the International Association of Chiefs of Police Conference in Chicago, Oct. 2019 (~400+ police professionals in the audience)
- Formal presentation by Chief Kennedy and I at the FBI National Academy Associates' conference in Phoenix, July 2019 (~200 + police professionals in the audience)
- March 2019, CVPD's DFR program was awarded the California Police Chief's Association's Technology Innovation Award (<https://www.sandiegouniontribune.com/news/public-safety/sd-me-chula-vista-police-drone-program-california-cpca-award-20190318-story.html>)

- The Tijuana (MX) Police Department (just 10 miles south of us across the border) is using the same technology and has over 2,000 missions (although they run a surveillance model, while we run a response model). They implemented their model within a few months of having their mayor and police chief visit our program.
- The Clovis, CA Police Department is implementing DFR and the Redondo Beach Police Department is considering implementing DFR and many other agencies have expressed an interest in the concept

As you can probably tell, we have been very systematic with regard to how we approached this concept and how we refined our operations, beginning with community outreach and transparency. As proud as we are of our public safety outcomes, we are even more proud of our community support to what could have been a controversial program. If you have any other questions or if you would like to chat, I can be reached at 619-691-5218.

In all sincerity, thank you for reaching back out to us. Wishing you the best of health and safety in these difficult times,

Warm regards,
Vern

Hello Captain,

The email that you recently sent to Arnold Ventures (AV) was forwarded to me. The video clip that you sent was powerful and it demonstrates the value of a teleoperator communicating with the officers in the field. I lead the policing portfolio at AV and we indeed have recently supported an aerial surveillance pilot project in Baltimore for the purposes of evaluating its efficacy.

At Arnold Ventures we focus on developing the research base for innovative solutions (including technological) to challenging problems and then thinking of sustainable ways to bring those solutions to scale. Is any outside evaluation of CVPD's drone as first responder project occurring?

Best regards,
Walter

Re: Paradigm shift in community safety and police de-escalation being piloted at the Chula Vista Police Department

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Good afternoon, I recently read an article of your organization's support of an innovative public safety program in Baltimore, MD utilizing aircraft and high resolution cameras to combat a high homicide rate. I wanted to bring to your attention a program pioneered by the Chula Vista Police Department called Drone as a First Responder (DFR) which has as much, if not quite a bit more potential to make communities safer.

DFR utilizes drones equipped with 30x zoom cameras to launch from pre-determined sites to respond to emergency calls for service. The intent of the model is to get the drone on scene before officers and stream live video of the incident to their cell phones and computers to inform their response. With better information, officers, supervisors and managers can use the right resources, tools and tactics to de-escalate and resolve an incident. When officers have real-time video, or decision quality data, they make better decisions and there are better public safety outcomes for the community. This results in safer communities, safer officers and even safer suspects. This is especially important on mental health calls, where limited information for officers can result in bad incident outcomes. CVPD's DFR drones have responded to hundreds of mental health calls and given officers critical information needed to safely help the person in crisis.

CVPD has flown over 2,200 missions in response to emergency calls since October 2018 and is the only police department in the country to participate in the FAA's UAS Integration Pilot Program. The program has broad public support and does not rely on "surveillance" like the Baltimore model, because it only responds to emergency calls. I have attached a link to a powerful video of just one of our calls where a tragic outcome was likely avoided: <https://www.youtube.com/watch?v=bYc1zybIIIE&feature=youtu.be>

This technology is fully integrated into CVPD's 911 response system and also helps support fire department operations. The drones average 15 missions per day in support of emergency calls and it is far more cost effective than a police helicopter program (which only about 200 of 18,000 police departments in the U.S. have).

Your organization is seeking innovative ways to advance community safety and DFR is an entirely new paradigm to improve community safety, de-escalation and help police minimize the use of force to address a given incident. CVPD is trying to expand launch sites to cover the rest of the city and demonstrate to other agencies how this technology can save lives. I would love to speak with anyone in your organization who may wish to learn more about our program and see if there is a way we could garner support to take this to scale locally, regionally and eventually nationally to advance the police profession and community safety. Thank you in advance for any consideration.

Respectfully,

Vern

SKYFIRE TRAINING DISCOUNTS

AND OUR LATEST FACEBOOK LIVE

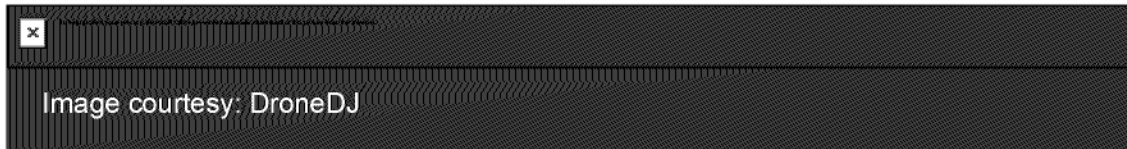

We are so excited for the propellers to start spinning again! To celebrate, we are offering a discount through June 15th to any department who signs up 5 or more people for our Basic or Advanced Training. The class can be scheduled for later in the year when you are ready for take off! For more information about either class, please reach out to us @ info@skyfireconsulting.com.

We're also holding a Facebook Live event tomorrow, May 6th at 1PM ET, covering the topic of Part 107 vs. COA. Our CEO, Matt Sloane, and COO, Ben Kroll, will be your hosts!

If you missed the last Facebook Live event where we discussed Chinese Drones, American Drones, and COVID-19, you can check that out on YouTube by following [this link!](#)

HOW DO YOU LIKE YOUR EGGS?

OVER BUILDINGS?

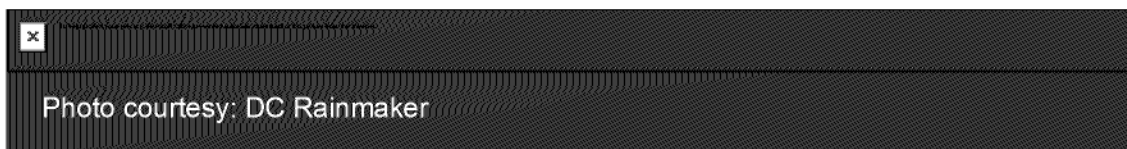

Well it's over. Pack it up. There's a drone shaped like an egg. Coming up with new drones designs is always a tough one to crack. But it seems PowerVision knew egg-sactly what they were doing when they hatched up a plan to get people talking about their new drone, the PowerEgg X.

It has similar specs to other drones on the market, though claims to have heavy rain resistance (costs more to get a different shell) and the ability to land on water. Some facts we simply can't egg-nore, 'cause that's pretty awesome. They also claim to be able to fly in high winds that would normally leave a drone with egg on its face. Now, we've definitely eggs-aggurated the egg puns for this story, but that's just our egg-stravagent nature.

 Share  Tweet  Forward

NOT QUITE THE WILD WEST...

BUT WE THINK YOU'LL ENJOY THIS SHOOTOUT

The new DJI Mavic Air 2 has been released upon the world and with it some pretty awesome improvements from the original Mavic Air. The new Air has an updated APAS system (Advanced Pilot Assistant System), 3D mapping with the help of APAS, and improved re-acquisition of lost subjects abilities.

In the video linked in this article, DC Rainmaker tests the new Mavic Air 2 against the Skydio 2. He runs both drones through an “obstacle course” of trees, signs, and even over water to test their obstacle avoidance capabilities.

While both are impressive drones, they both have strengths and weaknesses. Unsurprisingly, the Mavic Air appears to win when it comes to reliability -- it’s much better at sticking close to the subject and doesn’t lose sight as often. The downside? It’s a bit slower than the Skydio 2. However, unless your department plans to hire Usain Bolt to serve warrants, or climb ladders the slower speed compared to the Skydio 2 is a non-issue.

The Skydio 2 was certainly faster than the Mavic Air, demonstrated by its ability to keep up with DC Rainmaker even while he sped away on his bicycle. The downside is lack of consistency -- the Skydio doesn’t seem to always make the right choices when presented with complex obstacles. From our own testing at Skyfire, the Skydio 2 also has some challenges indoors due to lower lighting.

Both are solid drones, with amazing advancements in the field of subject tracking.

ROGUE DRONES

LATVIAN EDITION

Over the weekend, Latvia basically shut down their airspace after an SIA UAVFactory drone went missing during a test flight. Normally it would be fine right? Let's just wait the standard 30-35 minutes, and the drone will run out of juice and we'll be good, right? WRONG. This behemoth, 57 lb, 18 ft drone had 90 hours worth of fuel. For reference, that's the weight of the average 8 year old, capable of hurling through the air at 45 mph for almost 4 days.

Can you imagine you're in a nice Latvian cafe, eating your potato pancakes and beetroot soup, and a Pterodactyl lands on your table?

By Monday, flights were resuming normal activity, so they must have found the drone feeding on local school children or terrorizing a small village.

Runaway Drone Closes Riga Airport

By The Editor on May 05, 2020 06:45 am

The airspace over Riga International Airport has been closed due to a lost and possibly still uncontrolled drone flying in Latvian airspace, Minister of Transport Talis Linkaits (New Conservative Party) announced. The airport's spokeswoman Laura Karnite told LETA that because of the closure of the airspace, a flight from the Chinese city of Urumqi to [...]

Dear Vern,

I hope you are doing well. I wanted to introduce myself as the new Researcher at CB Films and reopen the line of communication with yourself.

Despite the virus throwing us many hurdles, we are still very excited about the project, particularly the CVPD drone program. I just read your article in March's Police Chief Magazine, which was very informative and I am really keen to move forward and hopefully talk to Kabe Termes and Captain Fritz Reber.

I would love to set up a call with yourself and Malcolm our Managing Director so that you can discuss the proposal in further detail.

Kind regards,

Rachel McCarthy
Researcher
Email: Research@cb-films.tv

On Thu, 14 Nov 2019 at 11:25, CB Films Research <research@cb-films.tv> wrote:
Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Vern Sallee

Subject: Drone Police - Documentary Series

**Warning:
External
Email**

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

New Dates for InterDrone 2020!

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

The health and safety of every member of our community and our team are of the utmost importance to us. After closely monitoring the risk and impact of COVID-19 on a daily basis, and speaking at length with members of our community, InterDrone, which had been scheduled for August 18-21, 2020, has been postponed to December 15-17, 2020. The event will still be held at the Hyatt Regency in Dallas, TX.

Recent developments have made it impossible to effectively execute an August event that delivers the level of connection, education, and customer value our community expects.

We are focused on continuing to help foster connection and learning within the commercial drone community, and to provide the necessary support and information to prepare our community for a successful 2020 event!

InterDrone's mission is to connect, educate, and provide the necessary knowledge, tools, and business connections to advance the commercial drone industry.

We appreciate your ongoing loyalty to InterDrone and thank you in advance for your understanding. Our website www.InterDrone.com will continue to be the place to find the most up to date information regarding the event and any updates.

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

InterDrone has become the commercial drone industry's trusted resource and knowledge platform

Through **webinars, podcasts, white papers, archived keynote presentations, panel discussions**, and more, UAS industry participants have exposure to the most necessary information and relationships needed to transform their business and bring the commercial drone industry forward.

Recorded Sessions

Watch keynote presentations, panel discussion, and industry workshops from the thought-leaders who are shaping the commercial UAV and UAS industries on the **InterDrone LaunchPad!**

Subject: U.S. Department of Transportation Announces Technology Partners for Remote ID Development

Categories: Green Category

**Warning:
External
Email**

**For Immediate Release
May 5, 2020
Contact: pressoffice@faa.gov**

WASHINGTON ? The U.S. Department of Transportation?s Federal Aviation Administration (FAA) today announced the eight companies that will assist the Federal government in establishing requirements for future suppliers of Remote Identification (Remote ID). Remote ID will enable Unmanned Aircraft Systems (UAS), commonly called drones, to provide identification and location information while operating in the nation?s airspace.

The FAA selected the following companies to develop technology requirements for future Remote ID UAS Service Suppliers (USS): Airbus, AirMap, Amazon, Intel, One Sky, Skyward, T-Mobile, and Wing. These companies were selected through a Request for Information process in December 2018.

?The FAA will be able to advance the safe integration of drones into our nation?s airspace from these technology companies? knowledge and expertise on remote identification,? said U.S. Transportation Secretary Elaine L. Chao.

This initial group will support the FAA in developing technology requirements for other companies to develop applications needed for Remote ID. The applications will provide drone identification and location information to safety and security authorities while in flight.

The technology is being developed simultaneously with the [proposed Remote ID rule](#). Application requirements will be announced when the final rule is published. The FAA will then begin accepting applications for entities to become Remote ID suppliers. The FAA will provide updates when other entities can apply to become qualified Remote ID USS on [FAA.gov](#).

Drones are a fast-growing segment of the transportation sector with nearly 1.5 million drones and 160,000 remote pilots now registered with the FAA. The agency's ability to develop Remote ID technology simultaneously with the rule enables the FAA to continue to build on a UAS Traffic Management (UTM) system that has demonstrated global leadership through the [small UAS rule](#) and the implementation of the [Low Altitude Authorization and Notification Capability \(LAANC\)](#), which automates the application and approval process for most UAS operators to obtain airspace authorizations.

Is the World Ready for Drone Delivery?

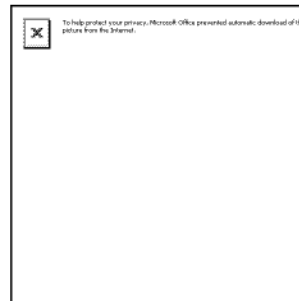

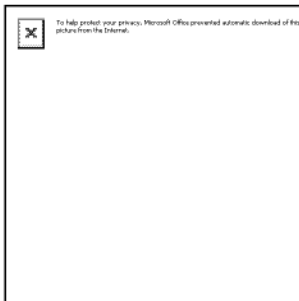

Wednesday, May 13, 2020 | 12:00PM - 1:30PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. During this webinar on May 13, industry leaders will discuss the impact that drone delivery would have on the world.

Join us to talk about what opportunities are beginning to open, what obstacles are still in place, and other ways the conversation around this industry is changing.

To: South County EDC Members and San Diego Industrial Drone Consortium

On behalf of Tactical Drone Solutions, we share the following message to all of our members and the San Diego Industrial Drone Consortium:

Tactical Drone Solutions, ("TDS"), a San Diego-based UAS system and service provider, has developed a new UAS testing, development and training center for use by UAS-industry stakeholders, local & state public safety agencies and other government organizations.

Under an exclusive agreement with the leaseholder of Nichols Field, (a private-use airport east of the Lower Otay Reservoir), TDS provides access to, and management of the site for use by commercial and government UAS-centric organizations. The property, also the location of some civilian and military parachute training, consists of a 40 acre parcel bordered by the Otay Mountain Ecological Reserve to the south and east, Otay Lake to the west, and Otay Lakes Road to the north. The location completely encompasses uncontrolled airspace, with the floor of Class B airspace at 4,800'. The entire property is outside Brown Field Municipal Airport Class D airspace. UAS activities are scheduled outside of parachute operations, so UAS operators have complete access to the airspace, including the airspace to the east, south and west of the facility.

This site is not affiliated with the FAA IPP UAV test site located by High Tech High in Chula Vista. However, unlike the Chula Vista site, the Nichols Field site offers significant services and amenities that UAV industry firms and stakeholders will find desirable, including: uncontrolled airspace, restrooms, facilities & classrooms, hangars, a 2,000' paved runway, privacy, high-speed internet and WiFi, and the ability to conduct waiver-based operations.

For more information, including images and video of the facility, go to: <https://tacticaldronesolutions.com/new-uav-testing-training-site/>, or contact Ron Lee at Tactical Drone Solutions.

Ron Lee, President
Tactical Drone Solutions, LLC

FROM THE EDITOR

Greetings!

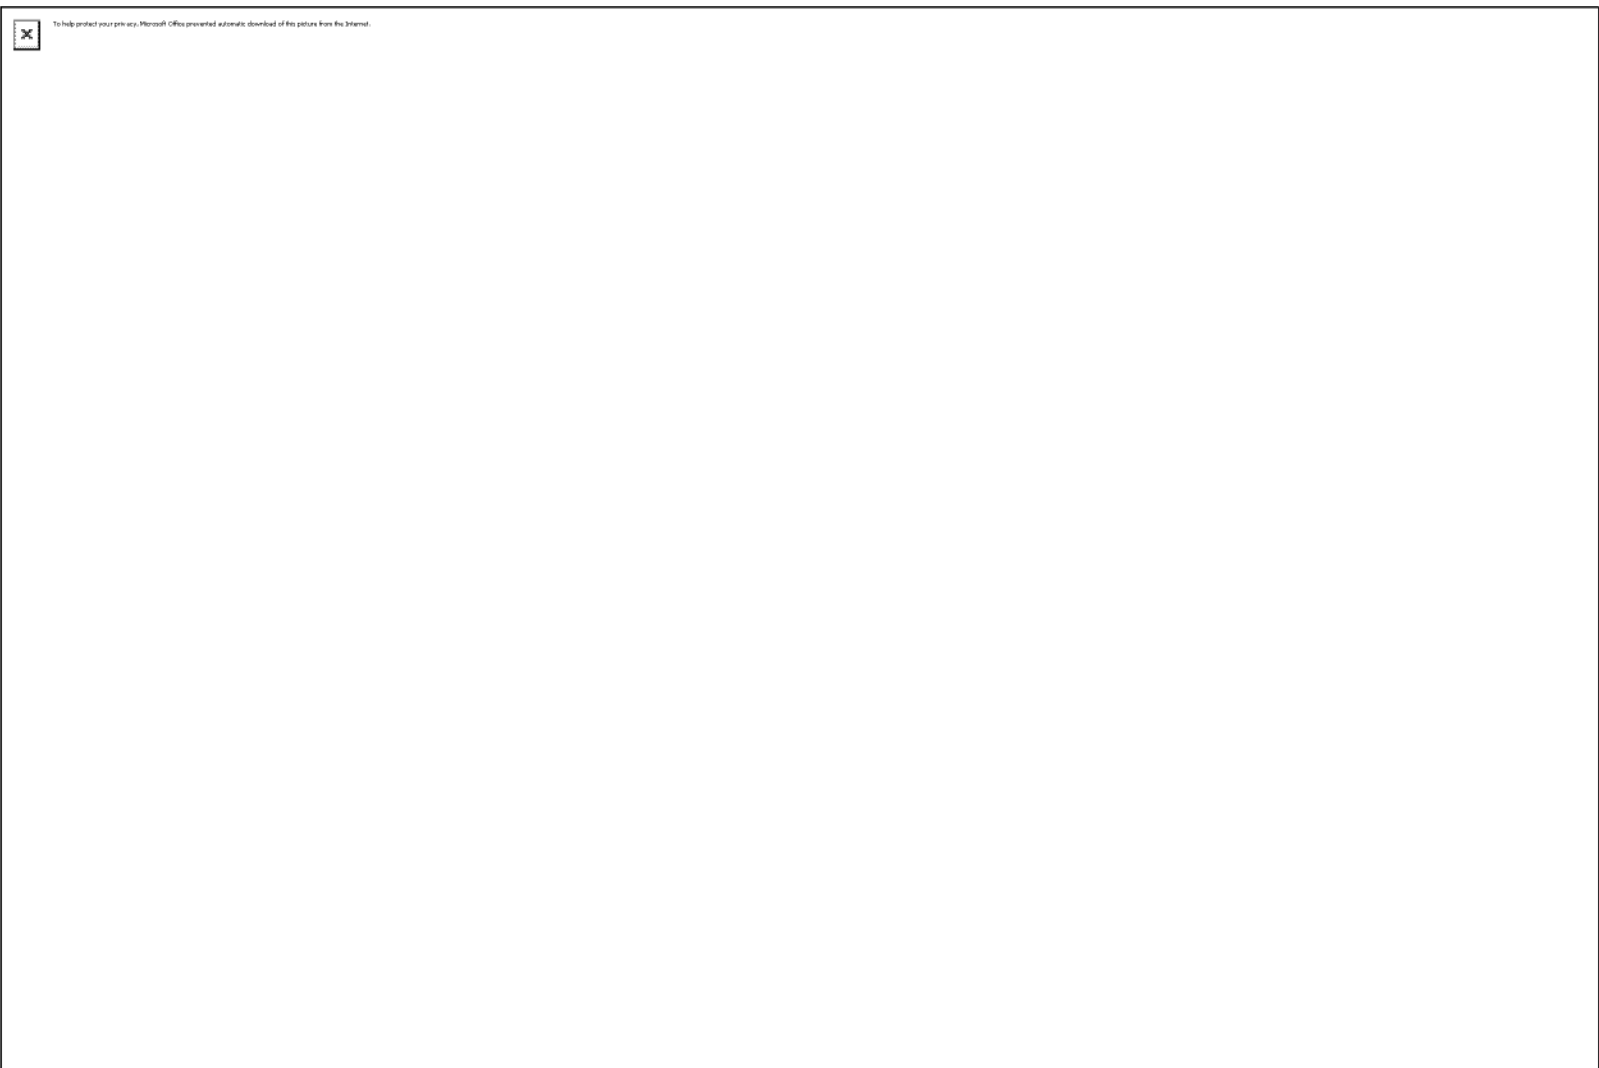

Our next webinar, "Is the World Ready for Drone Delivery?", is fast approaching and will be held on May 13th from 12 PM to 1:30 PM EDT. I am looking forward to the opportunity to moderate a conversation that will look into the entire state of the drone delivery ecosystem from regulations, public opinion, and connectivity to hardware and safety.

I hope everyone can join in to listen to our discussion with Dan Czerwonka, Head of Global Regulatory Affairs, Zipline; Michael Healander, President & CEO, Airspace Link, Inc.; Alexander Harmsen, CEO & Co-Founder, Iris Automation; Ed De Reyes, Chairman and CEO, Sabrewing Aircraft Company, Inc.; and Matt Fanelli, Director of Strategy and Operations, Skyward, A Verizon Company to get their take on where drone delivery is headed now and in the near future.

Be well and stay safe!

Danielle Gagne
Commercial UAV News Editor

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and

the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

Wednesday, May 13, 2020 | 12:00PM - 1:00PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Hello Cpt Sallee and Lt Redmond,

Hope you and your team are doing ok in the middle of all of the craziness the world is experiencing. Thank you for all that you and your team are doing to keep the community safe.

I wanted to see if you were ready for us to send you a couple of our Nomad 360 Scene lights <https://www.foxfury.com/products/nomad-360-scene-light> to have your team use them and see how they compare and fit with their every day tasks.

Please let me know and I will be happy to send you a couple via UPS.

Thank you so much and please stay safe.
Have a nice day!

Best regards,

Maria Cugini

Hello Cpt Sallee,

Thank you for the opportunity of going to your facility three weeks ago. I just spoke with Sgt Briley and he mentioned that he was submitting the reports of his findings of the different products he evaluated to you so you could make a decision on what is the best lighting solution for your team.

I just replied to him on the email below.

We are a smaller niche lighting solution company, although much smaller than some of the other lighting brands, our products are unique and provide solutions to Military, LE and Fire markets that others don't because of the benefits and quality of our products.

As mentioned below, we would love the opportunity of shipping a couple of lights to your team, so they can fully evaluate our products like they have done with the Streamlight.

More specifically, while others sell products, we focus on complete solutions to solve problems. These solutions integrate drones, scanners, software,...

We work with many strategic partners, as probably Tim Martin from Huntington Beach has shared and David Paul from Oceanside PD.

Thank you so much, and please let me know how we can help your team.

Have a great weekend!

Best regards,

Maria Cugini

Subject: RE: Quotes

Hello Sgt Briles,

Thank you so much for your email and for talking to me today.

What were your thoughts on P4 drone lighting system? Could you share some feedback on how the kit performed? Would love to hear it.

In regards to our conversation on the Nomads Scene Light, please let me know if you need any additional information on them so you can make the proper evaluation. I can arrange to send you a couple of them so you have the opportunity of evaluating for as long as you need them, as you did with some of our competitors lights, vs just seeing them work for one hour, and us doing the demonstrations. You can then compare them side by side. I think this will allow you to make a better comparison if you have them and use them yourself.

The Nomad features and product life far outweigh the price difference. They are waterproof, durable, easy to deploy, and you can walk in front of them without blocking the light. If your life depends on the tools you use, you probably want the best. We simply ask that you try ours like you are trying Streamlight so you can perform the most informed decision.

I am glad you had a chance to speak with Tim Martin form Huntington PD and David Paul from Oceanside PD.

We will be honored to be able to work with Chula Vista PD; be it on the drone side or traffic or even Swat. If you think our products perform to what your team needs, please let me know what you need form us. Performance and reliability far outlast any pricing difference.

Thank you so much and I look forward in hearing from you.

Best regards,

DJI's latest industrial drone has 55 minute flight time, 15 km video range

The Matrice line has long been DJI's all-in-one industrial product offering. These models are much larger and more utilitarian than its consumer or prosumer line and feature capabilities that align with those markets. Where consumers use drones for photography, industries, and public service operations are increasingly looking to drones to gather data.

Getting America Back to Work Using Drones

Thursday, May 21 | 4:00PM - 5:00PM ET

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy?

Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

This webinar is part of “Our Digital Doors are Open” series, designed to inform and connect the industry until we can gather in person again.

Subject: New PERF report about drones

Follow Up Flag: Follow up
Flag Status: Completed

**Warning:
External
Email**

Dear PERF member,

I'm writing to send you a new PERF report about one of the most innovative technologies in policing today—drones.

This report is about two separate but related issues: (1) the use of drones by police agencies to protect public safety and (2) the careless use of drones by the public in ways that may endanger public safety, and criminal use of drones to facilitate acts of terrorism or other crimes.

Our report, ***Drones: A Report on the Use of Drones by Public Safety Agencies—and a Wake-Up Call about the Threat of Malicious Drone Attacks***, is available online by clicking here: <https://www.policeforum.org/assets/Drones.pdf>.

Nearly every day there are news reports of police using drones to support operations such as search and rescue missions, crime scene photography, locating armed and dangerous suspects, and accident reconstruction.

In fact, some departments are currently using drones to help enforce social distancing restrictions and stay-at-home orders during the COVID-19 pandemic.

The use of drones is undoubtedly a growing trend. In September 2018, PERF began researching drone use by police agencies and distributed surveys to 860 police departments across the nation. Of the 282 departments that responded to PERF's survey, 47 percent reported using drones and another 34 percent said they are interested in purchasing them in the future.

Yet, many agencies interested in starting a drone program aren't sure where to begin. With so many drones on the market, how does an agency choose the right one? What other equipment is needed? What sources of funding are available?

To address these questions and produce policy guidance for law enforcement agencies, PERF—with support from the U.S. Department of Justice's Office of Community Oriented Policing Services and in cooperation with the U.S. Department of Homeland Security —hosted a two-day national conference to discuss promising practices and lessons learned from drone deployments by leading departments. Our report presents recommendations and resources for police agencies that are looking to implement a drone program in a safe and effective manner.

During the conference, participants also discussed the separate issue of what law enforcement agencies must begin to do to reduce the threat of malicious use of drones by criminals, terrorists, or criminal organizations for criminal acts (e.g., to attack members of the public or commit acts of mass destruction).

The United States remains extremely vulnerable to drone attacks. Local police and sheriffs' departments still are unable to purchase or use most radio frequency-based counter-drone technologies, because of concerns such as the danger of interference with air traffic radio signals in the National Airspace System. Despite these limitations on local police authority, PERF's report provides practical recommendations on how police organizations can begin preparing for and responding to unlawful drone use, including terrorist attacks.

We hope you find this report useful.

Best,

Chuck

On Thu, 14 Nov 2019 at 11:25, CB Films Research <research@cb-films.tv> wrote:

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

**Warning:
External
Email**

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

Golf Ball Downs Drone

By The Editor on May 11, 2020 06:16 am

Matthias Schwab, a Professional Golfer from Austria, made a 'drone-in-one.' As the European Tour pro tees off at a golf course in Schladming, Austria, a drone to his right shoots past while recording a video posted to Schwab's Instagram account on Friday. There is no sound. The drone ascends toward the skies above. The drone descends toward [...]

Primoco UAV Model One 150 Flies 15 Hours Non-Stop

By The Editor on May 11, 2020 06:12 am

Primoco UAV recently demonstrated the successful completion of a 15 hour and three-minute continuous unmanned flight. Utilizing Sagetech Avionics' transponders integrated with UAV Navigation's Vector autopilot, The Primoco Model One 150 beat the previous company record of 12 hours, eight minutes. The ADS-B out feature of Sagetech Avionics' XPS transponder allowed for the aircraft to [...]

Free Skydio Public Safety Drone program

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Subject: Free Skydio Public Safety Drone program

Follow Up Flag: Follow up

Flag Status: Completed

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,

Vern

Email**

This is the narrative I've been sending out:

Thanks for reaching out! Hope you are doing well in these crazy times. I've sent the ERP application for the free drone in a separate email. Please let me know if you don't get it!

The ERP is a no-string-attached donation of a drone to first responders to use to assist during this crisis. The hope is that public safety agencies across the country can utilize the Skydio 2 to stay safe. The use cases vary from agency to agency so I'd be interested to hear how you might utilize this platform in your line of work.

I've also linked to the Skydio Tactical Advisory Committee (STAC) which is essentially just an email list of the who's who in the public safety UAS world. I use the info to stay connected and use the email list to send out updates etc. I started this before the Covid 19 crisis just to formalize the communication between public safety end users and the manufacturers who make the tools they use. This is generally the group from which I'll send the drones, but if for some reason you don't want to join, no worries, you are still in the running for the Skydio 2 drone. I've sent you the ERP application in a separate email. Both are short applications that I made myself so don't expect much :)
Hope you are safe!

Here is the link to join STAC, the mission is explained there:
<https://www.droneresponders.org/skydio-tactical-advisory-committee>

Again, I'll send the ERP application for the free drone in a separate email,

Best,
Fritz

Application for Skydio Tactical Advisory Committee (STAC) Program

The Public Safety Team at Skydio has a single mission; to make the best drones for First Responders in the world. Skydio understands that in order to make drones that meet the needs of First Responders, we have to listen to what you want in a drone.

To that end, Skydio is announcing the Skydio Tactical Advisory Committee (STAC) Program. Selectees will consist of individuals and agencies in the First Responder ecosystem such as Police, Fire, Lifeguard, Rescue, Corrections, IMT, EMS, etc.. STAC Members will receive access to exclusive webinars, product releases/updates, and notifications of Skydio events. Most importantly however, as subject matter experts in public safety operations, STAC Members will be perfect product development resources for Skydio. Your opinion will be sought, valued, and utilized to make the best drones in the world. All selectees will be listed on DRONERESPONDERS as Skydio Tactical Advisory Committee (STAC) Members.

If you want to be a STAC Member and help an American drone company build the best drone ever to serve Public Safety, then please answer the following 10 questions:

Email address *

Name *

Position *

Phone

What Agency or Organization do you work with? *

What experience do you have with Public Safety UAS Operations? (One paragraph)

List any articles, media exposure, or other publicity highlighting you or your organization related to UAS operations.

List any experience with Skydio products, including your experience with Skydio 2.

Have you pre-ordered a Skydio 2? (not a requirement for selection)

- () Yes
- () No

If you answered yes to the previous question and have pre-ordered, please tell us your order number so we may expedite your delivery if selected.

List any other information relevant to your selection as a Skydio Tactical Advisory Committee (STAC)

Subject:

Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

He you go Charlie! Let me know if you submit it and I'll give him a heads up.

Best,
 Vern

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "**NA270**" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
 Vern

Vern Sallee
 Patrol Operations Division Captain
 Chula Vista Police Department

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "A270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern,

I wanted to let you know I submitted for this program. Thanks this is a cool opportunity since we have people who are licensed but don't have a drone yet.

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern Sallee
Patrol Operations Division Captain

Is the World Ready for Drone Delivery?

Wednesday, May 13, 2020 | 12:00PM - 1:30PM Eastern Time

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. During this webinar on May 13, industry leaders will discuss the impact that drone delivery would have on the world.

Join us to talk about what opportunities are beginning to open, what obstacles are still in place, and other ways the conversation around this industry is changing.

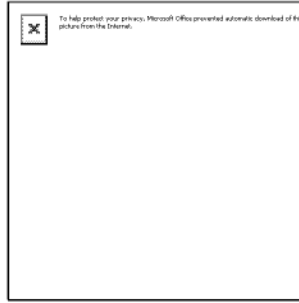

This webinar is part of “Our Digital Doors are Open” series, designed to inform and connect the industry until we can gather in person again.

Estonia Monitors Latvian Border with Thread Systems Stream C UAV

By The Editor on May 13, 2020 06:55 am

The 2nd Infantry Brigade of the Defense Forces supported the Police and Border Guard Board by monitoring Estonia's southern border with a Stream C unmanned aircraft system (UAS), produced by Thread Systems to enable the detection of illegal border crossing attempts. The Defense Forces launched Thread's unmanned aircraft near Antsla to conduct surveillance rounds over [...]

German Military Considers Using Armed Drones

By The Editor on May 13, 2020 06:50 am

The German Defense Ministry has started an Expert Hearing that includes several representatives of civil society along with members of parliamentary parties to discuss whether the drones should be purchased. The aim, the ministry says, is to trigger a "broad social debate" and lead into a long consultation period. The

topic of armed drones is [...]

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Hey Vern,

Good to hear from you and hope all is well for you. Thank you for sending this as we are in the very early stages of beginning a drone program so this might be really good for us if we are awarded one. Can I ask you what kind of justification are they looking for relating to the current covid issues? Do you have one and what are you using it for? Any help is greatly appreciated.

Jon

My drone supervisor applied yesterday (not knowing about the NA270). So Carlsbad PD applied, submitted by Sgt. Shaun Lawton.

Stay safe and healthy!

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

My buddy is looking to support Mississippi – he has not donated one there yet. If you submit, I'm pretty sure you'll have a higher priority.

Hey Vern,

Is this a temporary thing or are they permanently giving agencies these drones?

Thanks for the heads up Vern! I just sent in our request. I bought one of the Skydio2's after your presentation in Phoenix. (Had to wait quite a while, but it is a fun drone!)

I did add in the "NA270" to the narrative, I will wait and see what the response.

Thanks again and I hope you are doing well!!!

Subject: [SUSPICIOUS] Free Skydio Public Safety Drone program

[NOTICE: This message originated outside the City of Grants Pass -- **DO NOT CLICK** on links or open attachments unless you are sure content is safe.]

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

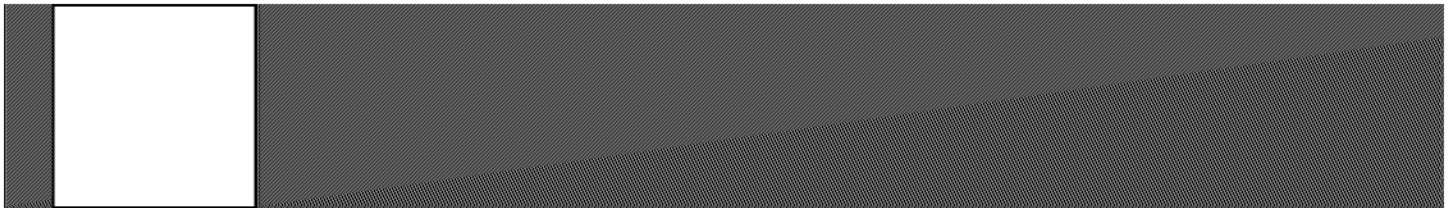

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class,

not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

My drone supervisor applied yesterday (not knowing about the NA270). So Carlsbad PD applied, submitted by Sgt. Shaun Lawton.

Stay safe and healthy!

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Thanks for the heads up Vern! I just sent in our request. I bought one of the Skydio2's after your presentation in Phoenix. (Had to wait quite a while, but it is a fun drone!)

I did add in the "NA270" to the narrative, I will wait and see what the response.

Thanks again and I hope you are doing well!!

Subject: [SUSPICIOUS] Free Skydio Public Safety Drone program

[NOTICE: This message originated outside the City of Grants Pass -- **DO NOT CLICK** on links or open attachments unless you are sure content is safe.]

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

My drone supervisor applied yesterday (not knowing about the NA270). So Carlsbad PD applied, submitted by Sgt. Shaun Lawton.

Stay safe and healthy!

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put ♦NA270♦ in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I ♦ll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I ♦m not sure about our friends with International agencies at this time, but I ♦m sure it would not hurt if you filled out the request as well.

Warmest regards,
 Vern

Subject: Free Skydio Public Safety Drone program

WARNING: External e-mail

Please verify sender before opening attachments or clicking on links.

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern,

Thank you for the offer. I submitted an application tonight. I just hope it doesn't require another three months of Intelligence Theory training.

Respectfully,

Lieutenant Eric Miller
Bayside Police Department
9075 N. Regent Road
Bayside, WI 53217

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern Sallee

Subject: Podcast Interview

Warning: External Email
--

Vern and Fritz,

DRONERESPONDERS will be launching its new podcast program in June.

I'd like to invite Chula Vista as one of our first podcast programs. I'd like you both to be involved so I can talk with Fritz as to the beginning of the program and Vern as what's happened since and what's next. I need you both to be on a computer that you can use a microphone to ensure the best audio quality.

COULD YOU ALL DO THIS NEXT THURSDAY AT 2 PM EST?

I will use these questions to guide the program but want it to be as conversational as possible.

For Fritz,

What is Chula Vista's Drone as a First Responder Program?

What was the impetus for starting this program?

Was this concept tried elsewhere before Chula Vista?

Can you provide some background of where and when previously done?

How did the DFR Program become a part of the San Diego FAA Integration Pilot Program?

What was done early on to inform the community and how was it received?

In order to move forward with such a new program (1st of its kind in the U.S.), it requires support from an innovative and supportive chief, tell me about Chief Roxanna Kennedy and her involvement.

What were the early successes and how did these successes impact the DFR program going forward?

For Vern,

Where is the DFR program today (stats)?

What value does the DFR program provide for the community, for responders?

How does the DFR Program impact Chula Vista PD's efficiency and/or effectiveness?

Can you provide some of the most impactful responses and explain why?

How did the FAA IPP help to make the DFR program operational/successful?

Recently, the Chula Vista FD joined the DFR program to explore benefits from a fire/EMS perspective. How is that going forward and are there any good stories to share?

The Chula Vista DFR Program has garnered global recognition. Can you tell about some of your most exciting experiences sharing DFR with other agencies/organizations?

Are other departments reaching out to learn and possibly implement a similar program? How many have visited Chula Vista to learn?

The COVID19 pandemic has created some unique challenges. How has Chula Vista's program been used in response to COVID19? Any lessons learned?

How is COVID19 presently impacting your drone program and how will it impact in the future?

Lastly, what's next for the DFR program (CPLA/Skydio)? What is CPLA and why is it so important to public safety?

How does Skydio impact the safety case and effectiveness of a CPLA?

Anything else that we didn't cover that you'd like to share?

Well that's a wrap.

Thanks,

Charles

Good morning Vern,

I forwarded your emails to the Captain who oversees our drone program. I will follow up with him on Monday if he hasn't given me an answer or reached out himself by then.

If we cannot use them, I like the idea of the another governmental agency being able to use it.

Talk to you soon!

CAUTION: This email originated from outside the County of Kauai. Do not click links or open attachments even if the sender is known to you unless it is something you were expecting.

Good morning Rod,

It was great speaking with you yesterday and catching up. As we discussed, my friend and former colleague, Fritz Reber (copied on this email), now works for Skydio (<https://www.skydio.com/>) as their law enforcement/public safety rep. Skydio is giving away 100 Skydio2 public safety kits for free to support agencies during the emergency. It is my understanding that the public safety kit is valued at about \$2,200.

Fritz is trying to deliver a skydio to agencies in all 50 states and would love to support an agency in Hawaii. If Kauaii PD would like one, Fritz would be glad to chat with your drone leader about the platform. If Kauaii PD can't use it, I'm sure he would consider the FD, search and rescue or other government agency if you wanted to put them in touch with him.

Thanks and stay well!

Best,
Vern

Dear Vern,

Thank you so much for your time on Wednesday. Malcolm said you were most helpful and we are raring to go on this project.

We look forward to hearing from you soon.

Kind regards,

Rachel

Dear Vern,

I hope you are well, I wanted to follow up my email. Are we able to arrange a call this week?

Kind regards,

Rachel

On Wed, 6 May 2020 at 22:30, CB Films Research <research@cb-films.tv> wrote:

Dear Vern,

I hope you are doing well. I wanted to introduce myself as the new Researcher at CB Films and reopen the line of communication with yourself.

Despite the virus throwing us many hurdles, we are still very excited about the project, particularly the CVPD drone program. I just read your article in March's Police Chief Magazine, which was very informative and I am really keen to move forward and hopefully talk to Kabe Termes and Captain Fritz Reber.

I would love to set up a call with yourself and Malcolm our Managing Director so that you can discuss the proposal in further detail.

Kind regards,

Rachel McCarthy
 Researcher

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

X-37B Spacecraft's Microwave Power Beam Experiment Could Power UAVs

By The Editor on May 15, 2020 06:55 am

The shadowy X-37B, the Air Force's unmanned, reusable spacecraft, is set to launch for its sixth flight on May 16 from Cape Canaveral Air Force Station, Florida. While most of the payloads set for the flight are standard fare for space experiments, at least the ones that are disclosed, one of them has immense potential implications [...]

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency?쑈 drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put ?쑈A270??in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I?쑈I give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I?쑈 not sure about our friends with International agencies at this time, but I?쑈 sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Subject: RE: Free Skydio Public Safety Drone program

Hi Jon,

They are looking to expand their Public Safety footprint so they are looking to support PD's during the pandemic. Use cases can be situational awareness of tough to reach areas, checking backyards/perimeters on burglaries, checking rooftops for points of entry or discarded evidence, monitoring trails and open space. We have 8 drones in patrol, 4 of which are Skydio 2's, and our officers use them for situational awareness. We've had gun calls in parks that we don't want to walk into and the drone can give us eyes on while keeping our officers at a safe distance. I'm pretty sure that any basic justification will be beneficial to them. Best of luck!

Warm regards,
Vern

Hey Vern,

Good to hear from you and hope all is well for you. Thank you for sending this as we are in the very early stages of beginning a drone program so this might be really good for us if we are awarded one. Can I ask you what kind of justification are they looking for relating to the current covid issues? Do you have one and what are you using it for? Any help is greatly appreciated.

Jon

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

FROM THE EDITOR

Greetings!

Thank you to all who attended our last webinar, "Is the World Ready for Drone Delivery?" It was a rare opportunity to get the in-depth insights of experts within the drone delivery ecosystem and will no doubt fuel more follow on discussions in the months and years to come. If you were unable to join us, you can download the webinar on demand [here](#).

In keeping with our commitment to delivering timely content, our next webinar, "Getting America Back to Work Using Drones" on Thursday, May 21st from 4:00 to 5:30 PM ET. Moderated by Grant Guillot, Partner at Adams and Reese LLP, this webinar will address the many ways we can, should, and are able to get America back to work using drones. A panel of five industry-leading experts—who have all found ways to survive and thrive during this period—will discuss how the industry can redefine and pivot their operations to adjust to and leverage today's new way of doing business. I hope to see you there!

Be well and stay safe!

Danielle Gagne

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

Thursday May 21, 2020 | 4:00PM - 5:30PM Eastern Time

As entire industries work to "get back to normal" many companies have defined a new normal that is allowing them to survive and thrive. How exactly

have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what's at stake for any organization clinging to "the way we've always done it," how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Subject: RE: From Yoshimi
Attachments: Sallee CVPD DFR Article.pdf

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Regards,

Yoshi

Warning: External Email

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

Good morning Yoshimi,

Thank you for reaching out to us about our drone program. We would be happy to give you a tour of our operations and discuss challenges and lessons learned. I am copying Lt. Don Redmond, who manages the program. I am the captain in charge of the patrol division and oversee UAS operations so either of us can help you. Did you have a timeline in mind for your visit and would it just be your or others?

Warm regards,

Vern

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

Subject: Chula Vista Police Records Request
Attachments: CPRA Gaetz Responsive Documents.pdf

Importance: High

Dear Congressman Matt Gaetz:

Thank you for your interest in the Chula Vista Police Department's drone program. This communication is in timely response to your May 6, 2020 request for public records, pursuant under the California Public Records Act, Cal. Gov. Code section 6250 et seq., which the Department received by email on the same day.

For the period of March 1, 2020 to the date of your request, you asked for documents regarding: How Chula Vista PD drones have been used in responding to the Coronavirus pandemic, including enforcing stay at home orders; how the Department acquired the drones; the drone manufacturer; and any cybersecurity policy the Department implements for its drones.

The Department has records responsive to your requests. Please see the attached PDF: **CPRA Gaetz Responsive Documents.pdf**

More information on the Department's drone program is available at the following link:
<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

If you have any questions about our drone program or how CVPD uses drones in general, please don't hesitate to contact me.

Respectfully,

Vern Sallee
Patrol Operations Division Captain
Chula Vista Police Department

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Regards,

Yoshi

Getting America Back to Work Using Drones

Thursday, May 21 | 4:00PM - 5:00PM ET

Many companies have defined a new normal that is allowing them to survive and thrive as the entire world works together to “get back to normal.” How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy?

Join us on **May 21st at 4:00 PM ET** to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future, and much more.

This webinar is part of “Our Digital Doors are Open” series, designed to inform and connect the industry until we can gather in person again.

Follow Up Flag: Follow up
Flag Status: Completed

Warning: External Email
--

Attached is an updated Vendor Contact Report. Today's call was a follow-call with AirMap, a SD IPP Member. Their maps, created for the SD IPP, include CV and the CV Drone Test Site. They can display all manned and pre-planned drone flight data. They leverage FlightAware & Primary Radar. If CV is interested in evaluating the AirMap solution to increase airspace awareness, let me know. They are willing to add some users for access. It will be at no cost for at least 6-months, then subject to subscription if we need continued access (subject to negotiation).

I'm not sure if Katelyn needs to be involved since it's a "SD IPP" map, I doubt it. Let me know if you'd like to evaluate further.

Besides this lengthy report, I plan on creating a diagram that shows vendor solutions, overlaid against our requirements moving forward. It will help to assess this information versus just reading a lengthy report I believe.

Thanks,

Kirby

Hi!

Good to see you 'virtually' at last week's Firehouse.com webinar "*SGI/COAs, LAANC, Waivers & Situational Awareness in One Mobile Application*". Thank you for taking time out of your day to join the session with Justin Steinke from AiRXOS, and David Fleckenstein from the Washington State Department of Transportation. With over 300 first responders joining the session, it seems COAs, waivers, and drone programs are top of mind among many of your colleagues. In fact, many have already reached out after the webinar to get started using First Responder!

As we mentioned, we are happy to offer our First Responder application for **FREE** for the next 60 days, and we can get you started on it in a few days. Whether you have a new drone program or a well established one, it might be worth it to try it out.

GET ON-BOARDED NOW

GET MORE INFORMATION NOW

It's that simple! We want to see you succeed with your UAS program, and we're happy to discuss the First Responder application, and UAS programs in general, to help you achieve the program results you're looking for.

Looking forward to talking with you!

RAYTHEON

BACK AT IT WITH THE DRONE HUNTING

You may remember the \$20 million microwave from Raytheon we mentioned in a previous newsletter, well, they're back with a new toy for drone hunting.

This new product is called the Coyote 2. The Coyote may look like a drone-seeking missile, but it's more than that. It's a jet powered, controllable interceptor that can fly at 60 mph. The project manager for the Coyote 2 said that they were using less expensive parts for the

Coyote, making it cheap enough to go after cheaper drones. He said they used “commercial, off-the-shelf components”. What shelf is he talking about? And how can we get THAT shelf, in OUR shed?

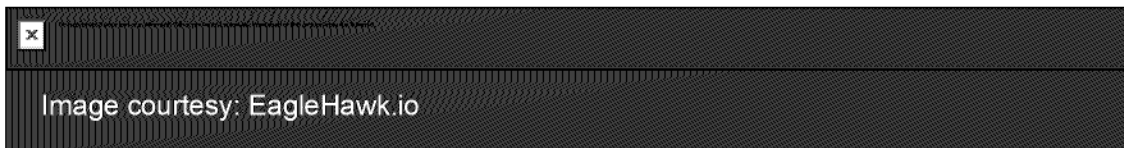

With fins on the outside and a turbine with controllable thrust on the back, Raytheon VP James McGovern claims it has “dog-fight capabilities”. I mean, that’s totally awesome!

Unlike their microwave, the Coyote 2 is a little more to the point. They use an explosive warhead on the end to annihilate the target. Remember when we said they cut costs to go after cheap drones? This is why. One time use, baby!

These interceptors are a long-range answer to the rogue drone problem. If any sneak by, they get POPPED! Did ya catch that? A microwave joke.

ARE DRONES THE NEW JANITORS?

AT LARGE VENUES THEY MIGHT BE!

We know, we know. Everyone is tired of hearing about COVID-19. But with all of these amazing new uses for drones, we’ve never been happier to turn on the news!

EagleHawk developed a system to spray disinfectant on large areas like indoor and outdoor sports stadiums. What originated as a UAS roof inspecting business, is now a drone disinfecting business! When

EagleHawk realized that work drying up during the pandemic, they refocused on how they could jump in and help. The result? An efficient way of killing COVID coo-tees! They've begun marketing their services to colleges, minor and major league sporting venues.

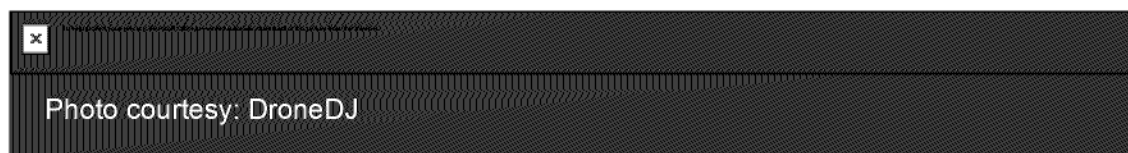

Their design keeps the disinfectant on the ground, in a tank, and uses a pump to get it to the drone for spraying. This way the drone doesn't even need to stop to reload! The best part? The big drone with the sprayers needs a smaller drone to keep the hose from getting hung up, so it's like it's got it's own little cheerleader! Too cute!

Here's to hoping crowded stadiums exist in our nearish future!

THEY'VE DONE IT AGAIN!

THE MATRICE 300 FROM DJI

We're sure by now you've watched the videos and read up on ALL the specs about the new Matrice 300, but we feel an obligation to discuss this new monster from DJI.

It seems to be a perfect successor to the M200 series in just about every way. The sensors to keep it from hitting obstacles are mounted on the top to avoid obstruction from the legs and the props have been shifted underneath the motors for the same reason. The flight time is big too.

Because of the larger props creating more lift, and the new batteries (TB60), they are boasting 55 minute flight times while not carrying a payload. Almost an hour of flight time from any battery powered quadcopter is impressive.

And they didn't stop with the drone. The new smart controller also has some new bells and whistles. With the new transmission system, the controller can stay connected for over 9 miles. That's three times further than our eyes can see, factoring in the curvature of our beloved Mother Earth! It also has a slot on the back to plug in a WB37 Cendence battery for seemingly unlimited use (as long as you have A LOT of WB37s, of course). You can connect two controllers to the M300 just like you could with the M200. With the newest tech you can effectively double the range of flight by having the second pilot take control of the bird once the first pilot is about to lose sight.

We're excited to see how well this new drone will do once it's in the hands of public safety. We think it will be an absolute beast and will be an obvious upgrade from your M200 or M210.

There are lots of other features we didn't cover here, so if you want to know more or in case you missed it, we had a talk with our good friend Mike Mocerino from W.S. Darley & Co. last Wednesday. If you would like to watch that video, check out our video section on Facebook, or follow the link [HERE](#) to see it on our Youtube channel. Be sure to like and subscribe for future updates!

Our next Facebook Live will be tomorrow at 12pm Est. with Josh Pruitt from DroneSense to talk about DroneSense 2.0!

Today, UAS flew 14 missions from both locations. There were 3 camera disconnects today, from both drones.

- CVL041822 Disabled Vehicle, Third Ave./ H St. UAS responded to a report of a disabled vehicle blocking the intersection, while no Patrol units were available. The vehicle was seen being pushed out of the intersection and no longer creating a traffic impediment. A tow truck arrived shortly thereafter and call was cleared without Patrol resources.
- CVL041831 Fight, 175 Broadway. UAS responded with Patrol to check for reports of subjects fighting at the address. The Reporting Party then advised that there was no fight and the subjects were only talking. Call was cleared.
- CVL041825 Person Causing Disturbance, 100 Brightwood Ave. UAS responded to check for subjects described as drinking alcohol while working on a vehicle in the area. An additional Reporting Party advised that these subjects were now fighting. Patrol located the involved parties and UAS remained overhead until units went Code 4.
- CVL041836 Suspicious Circumstances, 123 Broadway. UAS checked on a report of subjects possibly removing items from the former dispensary. UAS arrived on scene and the building was still boarded up. There were no subjects in the yard or garage. Call was cleared for S.I.U.
- CVL041843 Possible Wanted Subject/ Vehicle Pursuit. UAS responded to a request from a Detective unit for a vehicle stop with a subject possibly involved in a recent murder. UAS on scene prior to Patrol and was able to update the location of the subject as he took several apparent counter-surveillance steps, making multiple U-turns and parking several times. UAS provided updates for incoming units for the traffic stop. During this important flight, a camera disconnect was encountered, leading to zero zoom capability. UAS guided Patrol in for the traffic stop, which became a failure to yield at high rates of speed. UAS was unable to provide license plate info or direction of travel due to the loss of zoom. Vehicle was last seen traveling northbound on Broadway passing C St. and all units lost visual. Video file was also corrupted.
- CVL041864 Check the Area, 670 Oxford St. UAS responded with Patrol to check for aggressive transients reported to be leaving the park, according to the park ranger. UAS and Patrol checked the surrounding parking lots, but the described subjects had left the area.
- CVL041869 Weapon Threat, 745 H St. Call heard via Live911 regarding a subject threatening another subject with a knife. UAS arrived on scene prior to Patrol. The victim had reportedly left the scene,

and Dispatch was spectating while landline with the Reporting Party. Dispatch was able to clarify the suspect's location with the RP, and UAS was able to locate them. UAS provided updates and guided units in to contact the suspect.

- CVL041878 Check the Area, I-5/ E St. Call heard via Live911 while overhead pervious call. Reporting Party advised that a subject was leaning over the bridge of the I-5 under the SR-54. UAS checked the area, no one was seen in the area described, and CHP responded.
- CVL041881 Fire, 677 F St. Call heard on Live911. Reporting Party did not know her address but stated the dumpster in her apartment complex was on fire, next to several parked vehicles. UAS arrived on scene via RapidSOS, and located the fire. UAS advised Dispatch and information was relayed to CVFD.
- CVL041889 Restraining Order Violation, 1195 Monserate Ave. Call heard via Live911 regarding a subject violating a TRO. UAS arrived on scene as patrol units arrived. While UAS was en route it had a camera disconnect with severely hampered overwatch for patrol. Two subjects walked up to the corner of Monserate and E. Oxford as officers arrived and I could not see them due to not being able to zoom.
- CVL041891 Security Check, 539 Laguna St. UAS responded with Patrol to check for a subject possibly inside of the Reporting Party's vehicle. The RP was watching his vehicle via a security camera system. UAS arrived on scene prior to Patrol but was unable to see inside of the vehicle due to it being under a tree.
- CVL041916 Person Causing Disturbance, 502 Broadway. Call heard via Live911. Reporting Party advised a transient subject was inside of the business creating a disturbance and harassing customers. UAS arrived on scene and the subject appeared to be gone on arrival. A camera disconnect was encountered on this flight while zooming. A call for service was not created. UAS created a CFS to log video
- CVL041936 Domestic Violence, 745 E St. Call heard via Live911 regarding a subject with a cane attempting to hit a vehicle. UAS arrived on scene prior to Patrol, but the subject and vehicle were not in the parking lot. Patrol arrived and checked inside of the McDonald's. All parties were gone.
- CVL041938 Person Down, Broadway/ I St. UAS checked for a report of a transient subject laying on the sidewalk. UAS arrived on scene prior to Patrol, and the subject was still there. UAS updated units of the location of the transient and she later checked ok.

Hi Vern,

We do understand the impact of these camera disconnects to your operations. We are currently collecting as much data as possible. We have a few items we are reviewing within QA and will be surfacing it with the Engineering team once we have enough information to support this. We will provide an update tomorrow on where we are at regarding this issue.

Best,
Norm

Runaway Drone Landed Safely in Tree

By The Editor on May 19, 2020 06:50 am

The drone which went missing in Latvian airspace at the beginning of May, was found in a forest massif in Garkalne district on Friday, May 15. An eyewitness reported the location of the drone. After receiving the information, the experts of the State Aviation Agency (CAA) and the representatives of the drone owner went to the [...] [Read in browser »](#)

House Republicans to Probe Use of Chinese-Made Drones by Public Safety Agencies

By The Editor on May 19, 2020 06:40 am

Republicans on the House Judiciary Committee are demanding information from Homeland Security officials on how a Chinese company's drones are being used by public safety agencies during the virus outbreak. SZ DJI Technology Co., the world's largest civilian drone maker, announced last month it was giving 100 drones to more than 40 local governments in 22 states to help [...]

Mosquito Night Navigation Inspires New Drone Obstacle Avoidance System

By The Editor on May 19, 2020 06:19 am

Scientists have used the principles that guide a mosquito's nocturnal flight to develop a quadcopter equipped with an elegant collision-avoidance sensory system. Their research, published in *Science*, demonstrates how the mosquito avoids obstacles in the dark by sensing changes in the airflows generated by its flapping wings. The international collaborative research group, which includes Dr Simon Walker from [...]

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern Sallee

Not just no state taxes, but a free state. My wife and I may make a run out to the Austin area in the coming months to check it out. We need water though so lake or river front would be nice.

Stay safe as well!

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone

program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern Sallee

CBP Predator Crashes on Runway at Mathis Field

By The Editor on May 18, 2020 06:56 am

A U.S. Customs and Border Protection (CBP) Air and Marine Operations (AMO) Unmanned Aircraft System (UAS) experienced a nose-wheel collapse, resulting in a hard landing, on arrival at its home base on Mathis Field, San Angelo Regional Airport, on May 15. The hard landing resulted in the aircraft departing from the runway and coming to [...]

EHang and LN Holdings Open World's First 'UAM' Theme Hotel

By The Editor on May 18, 2020 06:42 am

EHang Holdings Limited announced that it has entered a strategic partnership with LN Holdings, a Shenzhen-listed tourism platform company, to further commercialize its AAVs by integrating Urban Air Mobility ("UAM") solutions into the latter's hotel/tourism businesses. This collaboration will not only broaden the use cases for AAVs, but will also expand the partnerships in the [...]

Ukrspesystems Launches UAS Components Division

By The Editor on May 18, 2020 06:15 am

In response to the growing demand from customers to use parts and components that were firstly introduced in the PD-1 UAS for their own projects, Ukrspesystems decided to launch a new subdivision. UAS Components is now available. For the past few months we've been working with the limited number of clients to test all solutions [...]

Julia Sanchez

Subject: DFR drone testing
Location: PD

Start: Tue 5/26/2020 8:00 AM
End: Tue 5/26/2020 4:00 PM
Show Time As: Tentative

Recurrence: (none)

Meeting Status: Not yet responded

Organizer: Don Redmond

Norm Serrano is bringing three drones for us to test for DFR. These are next generation (non-DJI) drones with some great features. Norm would really like our (your) input. The plan would be to test at ground level and then DFR operations.

- Atlas Mesh (has the 1 to 2 capability already, TO can fly multiple drones, camera may be an issue).
<https://www.atlasdynamics.eu/mesh>
- Vantage Robotics (20X zoom camera, in/out door drone, certified for flight over people, 50 minute flight time)
<https://vantagerobotics.com/>
- Inspired Flight (30X zoom camera, parachute, 20 minute flight time) <https://www.inspiredflight.io/>

Subject: Re: CVPD and SWC

Thanks, Don.

I've added Davis to this email thread so he can review the MOU as well.

In the MOU, you state:

CVPD will provide SWC law enforcement personnel access to live-stream drone video during DFR operations.

Can we change that to:

CVPD will provide SWC law enforcement personnel as well as the Director of the SWC Drone Technology and Applications Program access to live-stream drone video during DFR operations.

It seems to me that showing a real-time application to students would be pretty unique. But, if this is beyond what we can do, I understand.

Beyond that, I'll leave it to Kindred and her team to make any final recommendations. I think I will need to develop a separate MOU with Flying Lion regarding student participation, correct? Perhaps you and I could discuss that at a different time.

Thanks,
 Ken

p.s. Davis, I attached a copy of the MOU to this email for your review.

Hello Kindred,

Lt. Don Redmond and I met with the ASO Exec team last week to discuss the idea of the CVPD using SWC as a drone launch site.

The meeting went quite well, and the student leaders seemed very accepting of the concept.

Can you let us know the next step in the process?

Thanks a lot,
Ken

I hope you're doing well!

Two remote FAA UAS Symposium editions for remote pilots! Register now!

The [5th Annual FAA UAS Symposium](#) is coming to you this summer through two remote episodes: July 8-9 and August 18-19. Episode II will NOT be a repeat of Episode I. Each episode will have its own distinctive focus areas, speakers and participants. Engage with FAA and industry leadership during presentations, breakouts and virtual networking to help shape the future of UAS integration. Our experts will be ready to answer your questions from our virtual support center each day!

FAA UAS Symposium ? Episode I

July 8-9, 2020

Key Topics: Airspace integration, Unmanned Traffic Management (UTM), STEM, type certification, operational approvals, LAANC, DroneZone updates and international integration.

FAA UAS Symposium ? Episode II

August 18-19, 2020

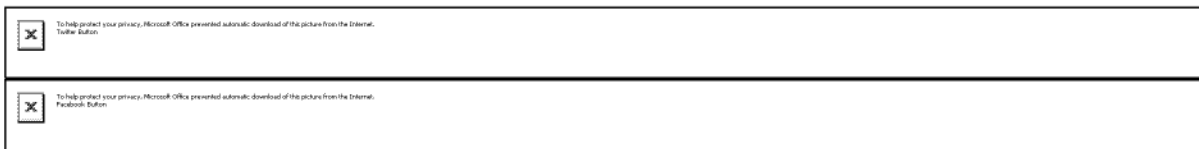

Key Topics: Integration Pilot Program (IPP), TFRs and assistance for public safety, emergency operations, airport security and response plans, authorizations and waivers, real world operations and accident investigations.

Here's what people are talking about today and what you'll hear at the Symposium: BVLOS, Remote ID, technology and innovation, international, drone delivery, public safety, flight time, Part 107 waiver and authorizations, safety and more.

Here's the buzz for the two episodes:

- Drones are here for good. Explore the positive uses of drones from public safety to infrastructure and package delivery.
- Connect with the drone community and network online with your peers, government and industry.
- Get more out of your drone business. Discover success stories, hear from the government and grow your network.
- Safety propels innovation. Learn how safety concerns generate new UAS capabilities.
- Get your questions answered by the experts!

Register today. Follow us on social media for updates. We hope you will join us this summer!

On May 20, 2020, at 6:55 PM, Vern Sallee <vsallee@chulavistapd.org> wrote:

Good afternoon Simone,

Thank you for reaching out to us about our drone program. You are correct, as you mentioned, our Drone as a First Responder (DFR) program has been operational since October 2018, long before the current crisis. We have continued DFR operations during the crisis, but the operations are part of our normal patrol response protocols and unrelated to the emergency.

Under CVPD's DFR model, we respond to emergency calls for service only (typically 911 calls) and we have not used drones (DFR or Part 107 flights) to surveil or keep an eye out for violations of Governor Newsom's Executive Order for social distancing or open businesses. CVPD has taken an "education first" approach to the emergency, which is best done face to face between our officers and members of our community. We do not use any of our drones for random patrol or enforcement and this policy has not changed during the emergency.

The only Corona Virus specific missions we have used drones for were homeless outreach in difficult to reach urban canyons (see attachment and following link: <https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>). These two operations were Public Operator Part 107 flights and not related to DFR (Part 107 is simply a manual flight by an FAA licensed drone pilot). For more information on our drone program you can visit our website: <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>.

If you still have questions, I'm sure that Lt. Redmond or I could find time to chat more.

Warm regards,

Vern

Hi Capt. Vern Sallee and Lt. Redmond,

Lt. Peak passed me your contact info.

I am working on a story about policing the pandemic, and highlighting ways — outside of arrests — that departments are utilizing.

The California Chiefs of Police Association suggested that I contact your department about the Drone as a First Responder Program.

I am aware that the program has been around long before the pandemic, however, can we set up a phone interview to discuss how the program has helped officers keep an eye out for those who violate Gov. Newsom's executive order (social distancing, non essential business who are open, etc?)

Would you have time on Thursday (tomorrow)?

Best,

Simone

I will email her now to discuss. I will handle.

FYI,

I came in yesterday at 0500-1500 to hit dispatch and Team 1 roll call for Live911 training. I am coming in late today because I will be attending Dispatch (2000 hrs) and Team 3 (2200 hours) roll calls to roll out Live911. I am working from home this morning until I come in at around 1. Text, email or call me on my cell if you need me this morning.

Good afternoon Simone,

Thank you for reaching out to us about our drone program. You are correct, as you mentioned, our Drone as a First Responder (DFR) program has been operational since October 2018, long before the current crisis. We have continued DFR operations during the crisis, but the operations are part of our normal patrol response protocols and unrelated to the emergency.

Under CVPD's DFR model, we respond to emergency calls for service only (typically 911 calls) and we have not used drones (DFR or Part 107 flights) to surveil or keep an eye out for violations of Governor Newsom's Executive Order for social distancing or open businesses. CVPD has taken an "education first" approach to the emergency, which is best done face to face between our officers and members of our community. We do not use any of our drones for random patrol or enforcement and this policy has not changed during the emergency.

The only Corona Virus specific missions we have used drones for were homeless outreach in difficult to reach urban canyons (see attachment and following link:

<https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>). These two operations were Public Operator Part 107 flights and not related to DFR (Part 107 is simply a manual flight by an FAA licensed drone pilot). For more information on our drone program you can visit our website: <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>.

If you still have questions, I'm sure that Lt. Redmond or I could find time to chat more.

Getting America Back to Work Using Drones

Thursday, May 21 | 4:00PM - 5:00PM ET

As the entire world works together to "get back to normal," many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy?

Join us to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what's at stake for any organization clinging to "the way we've always done it," how innovations in the present will define a path for the future, and much more.

This webinar is part of "Our Digital Doors are Open" series, designed to inform and connect the industry until we can gather in person again.

US Navy MQ-4 Triton Flying Operational Missions from Guam

By The Editor on May 21, 2020 06:41 am

Almost three months after arriving in Guam, a pair of MQ-4C Triton autonomous, unmanned aircraft have integrated into fleet operations and training flights and stretched the Navy's maritime domain awareness across the Indo-Pacific, according to the US Navy. The Navy is counting on the Triton, which can operate at greater than 50,000-foot altitudes and at [...]

Follow Up Flag: Follow up
Flag Status: Completed

Good afternoon Simone,

Thank you for reaching out to us about our drone program. You are correct, as you mentioned, our Drone as a First Responder (DFR) program has been operational since October 2018, long before the current crisis. We have continued DFR operations during the crisis, but the operations are part of our normal patrol response protocols and unrelated to the emergency.

Under CVPD's DFR model, we respond to emergency calls for service only (typically 911 calls) and we have not used drones (DFR or Part 107 flights) to surveil or keep an eye out for violations of Governor Newsom's Executive Order for social distancing or open businesses. CVPD has taken an "education first" approach to the emergency, which is best done face to face between our officers and members of our community. We do not use any of our drones for random patrol or enforcement and this policy has not changed during the emergency.

The only Corona Virus specific missions we have used drones for were homeless outreach in difficult to reach urban canyons (see attachment and following link: <https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>). These two operations were Public Operator Part 107 flights and not related to DFR (Part 107 is simply a manual flight by an FAA licensed drone pilot). For more information on our drone program you can visit our website: <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>.

If you still have questions, I'm sure that Lt. Redmond or I could find time to chat more.

Warm regards,
 Vern

Hi Capt. Vern Sallee and Lt. Redmond,
 Lt. Peak passed me your contact info.

I am working on a story about policing the pandemic, and highlighting ways — outside of arrests — that departments are utilizing.
 The California Chiefs of Police Association suggested that I contact your department about the Drone as a First Responder Program.

I am aware that the program has been around long before the pandemic, however, can we set up a phone interview to discuss how the program has helped officers keep an eye out for those who violate Gov. Newsom's executive order (social distancing, non essential business who are open, etc?)

Would you have time on Thursday (tomorrow)?

Best,
 Simone

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Regards,

Yoshi

Thank you so much Vern & Don,

All right, I ll let you know when I have a specific date.

And there is one thing I have to tell you, my English skill is not fluent, but I really want to build a good relationship with you in the future. So, please let me know if my meaning is not clear.

Have a good weekend!

Yoshimi

Warning: External Email

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don t mind. Is it possible?

Warm regards,

Yoshimi

Good morning Yoshimi,

Thank you for reaching out to us about our drone program. We would be happy to give you a tour of our operations and discuss challenges and lessons learned. I am copying Lt. Don Redmond, who manages the program. I am the captain in charge of the patrol division and oversee UAS operations so either of us can help you. Did you have a timeline in mind for your visit and would it just be your or others?

Warm regards,

Vern

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,
Yoshimi Yanai

Absolutely. During the pandemic we used our drones for homeless outreach in difficult to reach urban canyons (see attachment and following link: <https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>). Like many departments, our department's response to the pandemic took an "education first" approach. The drone usage was consistent with that, helping provide a platform to outreach to our homeless population. Two operations were conducted, and information was released to the media about them (see attached).

Although we used the drones for this specific purpose during the pandemic, for some time Chula Vista has operated an innovative and unique drone program that we call "Drone as a First Responder" (DFR). For more information on our drone program you can visit our website: <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>.

If your questions are likely specific to the drone program or its use to outreach to the homeless, I'm cc'ing Captain Vern Sallee on this email. He is the manager for the drone program overall, and may be able to provide more details. Let us know if you have any questions.

Hi Captain Collum,

That's wonderful! Thank you for agreeing to participate. I have copied Chuck's Executive Assistant, Soline Simenauer, on this email. She will follow up with you regarding the conference call.

In the meantime, are you able to provide a few bullet points on your agency's use of drones during the pandemic? This will help us prepare specific questions for Chuck to ask. For example, we saw the story on Chula Vista using drones to [conduct outreach to the homeless](#) population and provide information about the coronavirus, including steps they should take to protect themselves. We would be interested to hear about these innovative uses in more detail, as well as any challenges/solutions you've developed over the past few months.

Thank you and have a wonderful weekend!

Dear Chief Kennedy,

As you may have seen, PERF has released daily [COVID-19 Reports](#) documenting agencies' responses to the COVID-19 outbreak. PERF would like to produce a COVID-19 report detailing the unique ways police agencies are using drones during the pandemic. For example, some agencies have used drones to enforce social distancing orders. We were hoping you (or your designee) would be able to participate in a conference call next Wednesday, May 27, from 1:00 pm – 2:00 pm EDT with Chuck Wexler and other police executives to discuss this topic.

I know this is a busy time, but we hope this is something you would be interested in. If you would like to participate, Chuck's assistant, Soline Simenauer will follow up with your office to confirm your availability.

I look forward to hearing back from you soon.

Episode 39: DJI Loses Patent Suit, Charges Filed after Shot Down Drone, & Interview with Amit Ganjoo of ANRA Technologies

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

This week on the InterDrone podcast we sat down with Amit Ganjoo of ANRA Technologies, and Billy Kyle, drone pilot, entrepreneur, and founder of the Billy Kyle YouTube channel. We discussed how DJI Drones could be kicked out of US market after losing a patent suit to Autel, man shoots down drone, gets hit with felony charges in Minnesota, only 1% of public safety drones that are used in the US are made in the US. Is this a problem? Our interview with Amit Ganjoo of ANRA Technologies, and much more!

[Listen Now>>](#)

Will Autel really prevent DJI from selling its drones in the United States?

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

A few days ago, it was announced that Autel Robotics USA secured a trial victory, with the help of its lawyers at Steptoe, with the US International Trade Commission (ITC). Back on March 2nd, the ITC found that SZ DJI Technology Co. Ltd., and 7 other entities collectively known as 'DJI,' violated Section 337 of the Tariff Act of 1930, as amended, by importing and selling drones that infringe on Autel's US Patent No. 9, 260,184.

NON RESPONSIVE

Two remote FAA UAS Symposium editions for remote pilots! Register now!

The [5th Annual FAA UAS Symposium](#) is coming to you this summer through two remote episodes: July 8-9 and August 18-19. Episode II will NOT be a repeat of Episode I. Each episode will have its own distinctive focus areas, speakers and participants. Engage with FAA and industry leadership during presentations, breakouts and virtual networking to help shape the future of UAS integration. Our experts will be ready to answer your questions from our virtual support center each day!

FAA UAS Symposium – Episode I

July 8-9, 2020

Key Topics: Airspace integration, Unmanned Traffic Management (UTM), STEM, type certification, operational approvals, LAANC, DroneZone updates and international integration.

FAA UAS Symposium – Episode II

August 18-19, 2020

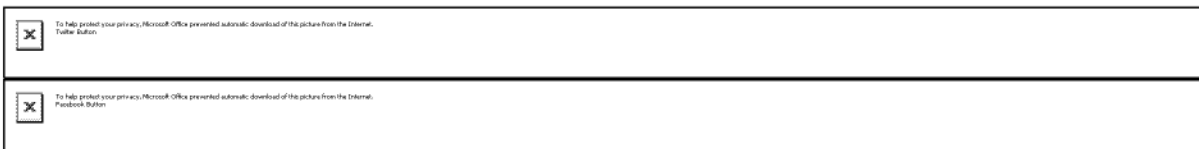

Key Topics: Integration Pilot Program (IPP), TFRs and assistance for public safety, emergency operations, airport security and response plans, authorizations and waivers, real world operations and accident investigations.

Here's what people are talking about today and what you'll hear at the Symposium: BVLOS, Remote ID, technology and innovation, international, drone delivery, public safety, flight time, Part 107 waiver and authorizations, safety and more.

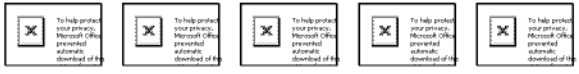

Here's the buzz for the two episodes:

- Drones are here for good. Explore the positive uses of drones from public safety to infrastructure and package delivery.
- Connect with the drone community and network online with your peers, government and industry.
- Get more out of your drone business. Discover success stories, hear from the government and grow your network.
- Safety propels innovation. Learn how safety concerns generate new UAS capabilities.
- Get your questions answered by the experts!

Register today. Follow us on social media for updates. We hope you will join us this summer!

**FROM THE EDITOR**

Greetings!

Today, there are a lot of great things happening that I am excited about. First, I was able to talk to Sharon Rossmark, CEO of Women And Drones , Brenda Wilson, President of DieHard RC, and Susan Bickford, CEO of New England UAV, about how we can work together to build a future of gender equality within the drone industry. The conversation was not only insightful and important for our industry but was a much needed boost of inspiration in these difficult times.

Second, the Commercial UAV Expo Europe 2020 is going virtual. And although I was looking forward to seeing everyone face-to-face in December, this transition is going to ensure that exhibitors and participants can network and connect safely. A major reason why I gravitated toward Commercial UAV is that this technology is always on the leading edge of innovation. Going virtual is just another innovative push forward and we are ready to rise to the occasion to continue facilitating the industry in imagining how we can make this world safer, better, and more efficient.

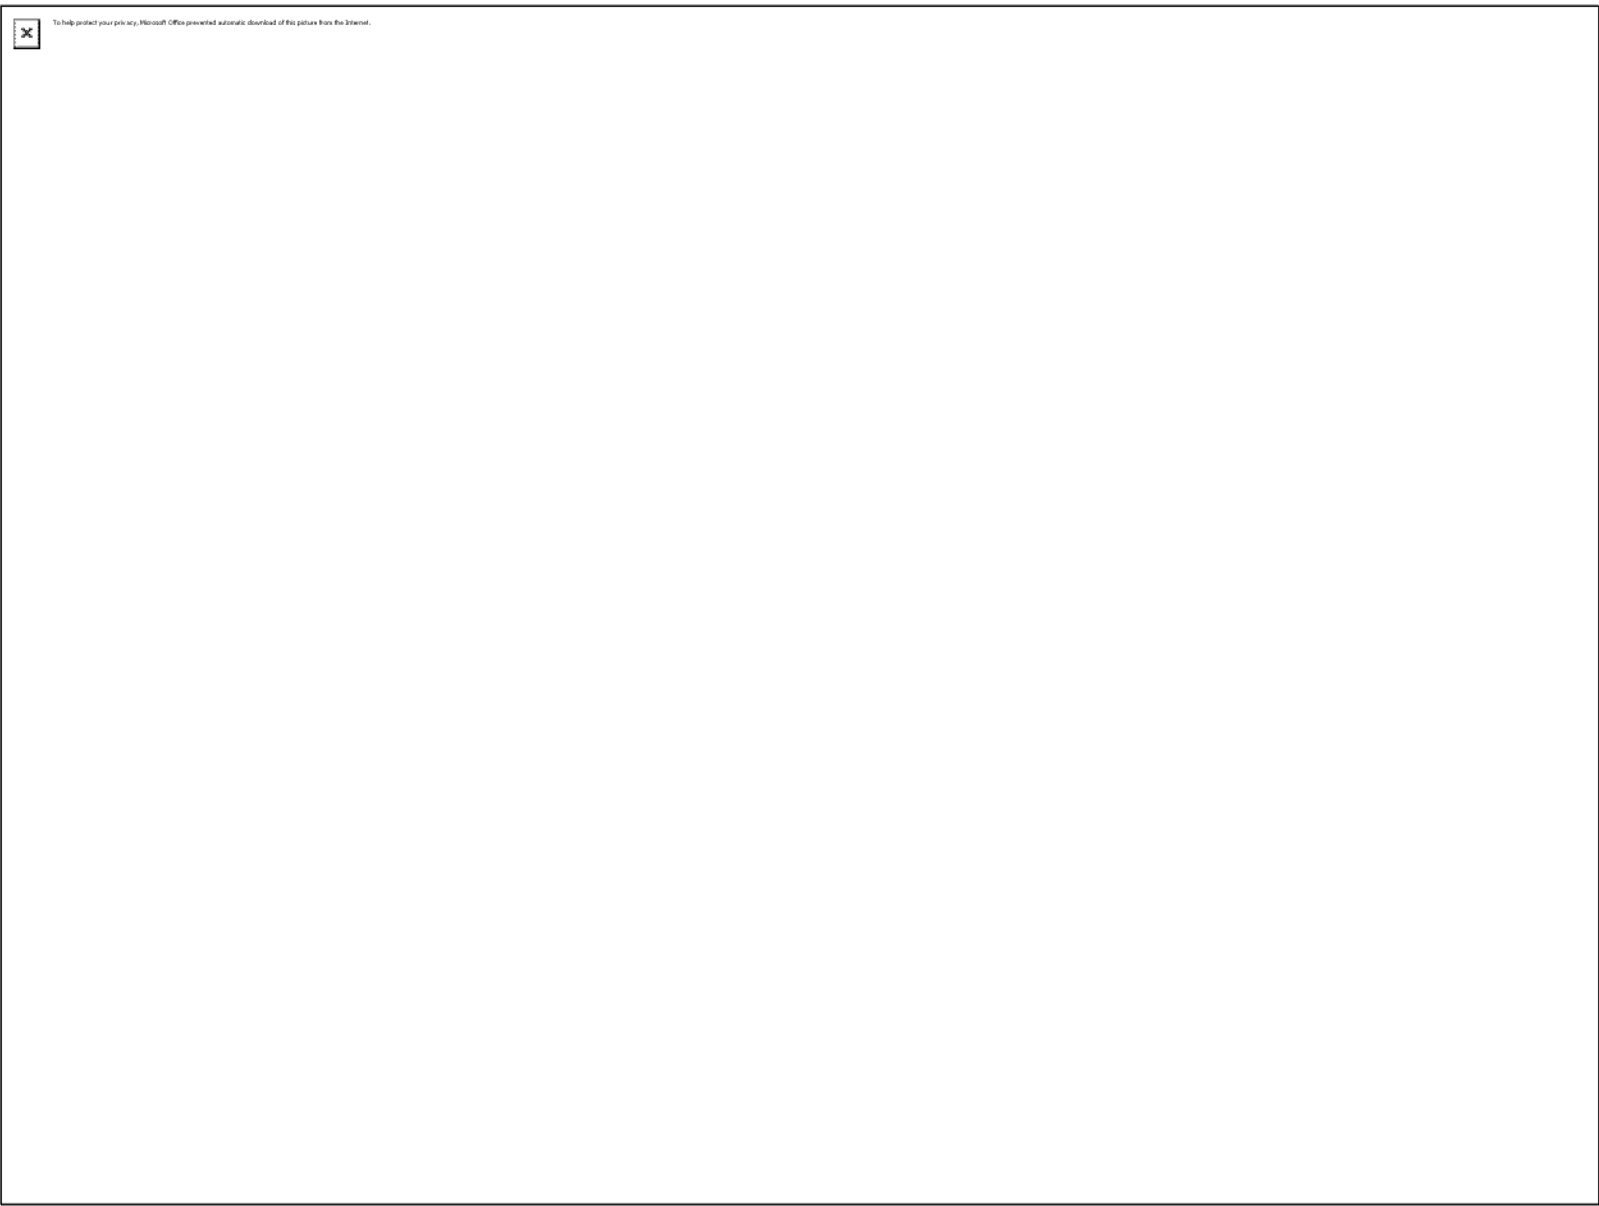

And finally, in keeping with finding new ways to do things, our next webinar, "Getting America Back to Work Using Drones" is today from 4:00 to 5:00 PM ET. Moderated by Grant Guillot, Partner at Adams and Reese LLP, this webinar brings together industry leaders to discuss how they have defined a new normal that is allowing them to survive and thrive. It promises to be a lively and engaging conversation and I hope to see you all there!

Be well and stay safe!

FEATURED STORY

What 1,000 Drones for 1,000 Girls Can Do for the Commercial Drone Industry

By Danielle Gagne

In a rare, all women video interview, we connected with Sharon Rossmark, CEO of Women And Drones , Brenda Wilson, President of DieHard RC, and Susan Bickford, CEO of New England UAV, to talk about their plans for their newest program, 1,000 Drones for a 1,000 Girls, what other forms of outreach they have done or are planning, how these programs can empower young children as well as inspire their parents and communities to embrace drone technology, and much more.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it’s our goal to provide our communities with resources that can help them make sense of both. We’re taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?
On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

Thursday May 21, 2020 | 4:00PM - 5:30PM Eastern Time

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have

been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you .

Sincerely, Stay healthy,

Yoshi

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,

Vern

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don t mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
 Vern

Vern Sallee

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Regards,

Yoshi

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

Good morning Yoshimi,

Thank you for reaching out to us about our drone program. We would be happy to give you a tour of our operations and discuss challenges and lessons learned. I am copying Lt. Don Redmond, who manages the program. I am the captain in charge of the patrol division and oversee UAS operations so either of us can help you. Did you have a timeline in mind for your visit and would it just be your or others?

Warm regards,

Vern

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you .

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system.

I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached.

But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

A DIFFERENT KIND OF SWARM

THE CREEPY CRAWLY KIND

Well it wouldn't be 2020 without a swarm of locusts, right? India is currently dealing with the worst swarm of locust the country has seen in 30 years. Now, you're thinking, "Wow, a swarm of locust sounds awful." But don't worry, it's much worse! This is a swarm of desert locust, which are somehow much more aggressive than normal ravenous grasshoppers.

These locusts can fly roughly 90 miles a day and eat their body weight in vegetation every day. Now, it's only 2 grams but some of these swarms can have over 80 million adults in just 1 square kilometer. Put away your calculators; we did the math. That's over 350,000 lbs of vegetation eaten

in one day per square mile. Also, swarms can reach the billions in numbers. You'll have to just use your imagination for that number. We don't have enough fingers and toes here for that math.

“What does this have to do with drones?”, you might be asking our editorial staff.

Well dear reader, the Indian government has been using drones to spray insecticides along with fire trucks to slow down the swarm. In the two districts where they were deployed, they are seeing that about 70% of the locusts have been destroyed. Locusts also hate loud noises. If you've ever stood underneath a large multi-prop drone, you know it sounds like it's own swarm!

GO NUTS

FOR DONUTS

National Donut day has come and gone again this year and we're pretty sure some of our police officer friends didn't miss out on this important date. (we kid, we kid). But, this year, LaMar's Donuts started a program called the Essential Service Awards. The program is aimed at providing a smile and a boost to front line workers during the COVID outbreak.

While 19 people have already won a year's worth of donuts, some of the winners received their first donuts by drone! The article shows a video of the drop off, and while they missed the launch pad by a few feet, we rate the mission a 10 out of 10. Donuts aren't really going to change the world,

but it's nice to see communities giving back to their essential workers in different and unique ways! And by using drones no less!

SEARCH AND RESCUE, EH?

SO MANY ACRONYMS!

Search and rescue in isolated and rural areas is, for obvious reasons, really big in Canada. Recently, Kongsberg Geospatial, Larus Technologies, and the Civil Air Search and Rescue Association of Canada (CASARA) have teamed up to incorporate geospatial software, artificial intelligence, and machine vision software into search and rescue efforts in the vast wilderness of Canada. We're going to need to take a breather after that sentence...

The project is being called the Optical Vision Enhancement and Refinement of Sensor Exploitation Effectiveness, or thankfully OVERSEE.

The ultimate goal is to help CASARA members and GSAR (Ground Search and Rescue) workers use BVLOS to aid their search and rescue efforts.

There are a ton more acronyms in this article, and to be honest, we thought it might have been written in French when we did our first read through. But we love the technical nitty gritty!

Chief Kennedy –

That sounds great, and completely understandable! We are planning to do these webinars monthly, so we can tentatively aim for an August or September date. I will follow up with you in July to assess the policing environment and see if we can figure out a solid timeframe. If you have any questions in the meantime, please let me know. Thank you, and stay safe!

Best,

Julie Malear

Subject: RE: CPLA BVLOS Tactical Waiver, SGIs and tear gas

Charles, thanks for the update. By the way, I 100% agree with no weapons of any kind on drones. It's in our policy specifically and would be detrimental to our mission. Thanks for putting this out there!

From: Charles Werner <charles@droneresponders.org>
Sent: Saturday, June 13, 2020 7:08 AM
To: Charles Werner <charles@droneresponders.org>
Subject: CPLA BVLOS Tactical Waiver, SGIs and tear gas

Warning: External Email
--

To All,

I hope you are all doing well and remaining safe.

I am writing to update you on the latest activity on two fronts.

First an update on discussions with the FAA regarding the CPLA BVLOS Waiver. Presently, there has been progress and a blanket waiver concept is in the review process at the FAA. While not going into detail, the activity and discussions with the FAA have been very positive and supportive. Much appreciation to many of you who have been pushing waivers forward, even though most have been denied. It's a learning process. Special thanks to Chris Sadler, Vern Sallee and Brandon Karr who have done great work to validate the need and address the safety concerns. This work has been instrumental in helping the thought process at the FAA.

I have also heard from a number of departments about frustration regarding SGI denials for dangerous situations (flash floods, protests, etc.) that are known to occur in a short period where preauthorization of SGI is not only necessary but could PREVENT injury and/or death of citizens. Based on current guidelines, the emergent condition has to exist presently and waiting for the condition to occur eliminates any chance of keeping people out of harms way. This discussion has been forwarded to the FAA for review and further discussion. And as I have said many times, this is not a criticism of the SOSOC but more focused on an evolutionary process to expand safe and effective ways to deploy UAS.

Lastly, I have seen the new advertised tear gas launch attachment. This troubles me greatly and I will explain in a moment. I have been asked by a couple law enforcement agencies to support getting the approval to be able to use drones to dangle a tear gas canister over an area as ground tear gas applications are being defeated by protestors using traffic comes to their effectiveness. Given the current and UNFAIR demonization of law enforcement on every front, I strongly urge agencies NOT to use tear gas from drones as it will create a major escalation in negative view on the use of drones by both law enforcement and public safety in general. I would further suggest to stay away from anything that looks like weaponization of drones by law enforcement. The question is already very much in the headlines with criticisms regarding drones used for surveillance of protestors. Additionally and collectively we as a public safety community must take these opportunities to highlight and promote the many other "non" law enforcement successful use cases. We have come a long way from where we started, let's keep our eye on the ball to ensure our collective actions do not lead to more drone use restrictions placed on public safety. Just as extreme examples of the current state, we have seen the pull back on facial recognition software applications, cancellation of COPS and Live PD TV shows

and the ridiculous chants of “defund the police”. Sorry for the long rant and if others disagree but I am just trying to highlight how far we have come and how much we could lose.

I welcome your thoughts.

Sincerely,

Charles

Hi Vern,

How are you? I just want to introduce myself, my name is Suzanne and I'm helping out on the development of CB Films' factual series that documents the use of drones/UAVs in modern police operations, it's a really exciting project and I'm thrilled to be involved.

I understand it's been a really tough time at present, with the ongoing pandemic and rioting in the U.S. and across the world, including the UK, that being said I hope it's okay for me to contact you and see how we can further the conversation about securing access and moving this amazing project onto a commission as everyone here at CB Films is incredibly passionate to tell the story of your work.

Best Wishes,

Suzanne

On Thu, 14 Nov 2019 at 11:25, CB Films Research <research@cb-films.tv> wrote:

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner

Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

US to Change Policy on Overseas Drone Sales

By The Editor on Jun 15, 2020 06:57 am

The Trump administration plans to reinterpret a Cold War-era arms agreement between 34 nations with the goal of allowing U.S. defense contractors to sell more American-made drones to a wide array of nations, three defense industry executives and a U.S. official told Reuters. The policy change, which has not been previously reported, could open up [...]

Dubai Police Manned Drone Crashes During Exhibition

By The Editor on Jun 15, 2020 06:55 am

A manned eVTOL from the Dubai Police crashed a few days ago during a live display. The video has been uploaded by the manufacturer Hoversurf, to show that the security measures were effective. The barometer in Dubai refused and an accident occurred – a down from a height of 30 meters. All safety systems worked [...]

We're a big county with multiple agencies 8 different precincts all with their own elected department head. And the sheriff's office too. Each Pct is different we have 200 deputies and Pct 4 for example had 450.

My guess is Pct 1 got it they are using it downtown as they have responsibilities for security for all county buildings in the city. Check roof tops. No worries.

Thanks

Have a good one.

Just wanted to update you

Thanks again

Kirk

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Kirk

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put **"NA270"** in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class,

not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday, June 24, 2020 | 11:00AM - 12:00PM Eastern Time

The earlier that a project or asset starts collecting high quality, consistent data, the more insights you will be able to extract and the richer the data will be into the development of a digital twin. Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction project enables all necessary stakeholders to reference the same consistent data.

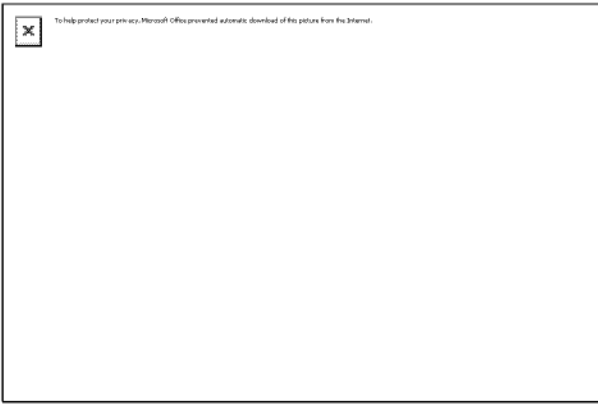

Join us for this free webinar as we discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high quality, consistent data
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety and decision making

Hey Kirk,

Sorry for the delay, I sent one out to Harris County/Lt. Don Plant. This came through Gene Robinson who you may know...let me know if you need more info and I can help in any way. Hope all is well,
 Fritz

On Wed, Jun 17, 2020 at 12:16 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirk,

I hope all is well with you, your family and colleagues during this difficult time.

I'm copying Fritz Reber with Skydio. I followed up with him when you first emailed me and I think he mentioned that Skydio already provided a Skydio2 to Harris County. Fritz, can you confirm with Kirk who requested it for his agency? I know they are large and have several divisions so he may not have known that they already have one. If I'm incorrect, hopefully, Skydio can grant the agency one.

Best,

Vern

To: Cade Metz
Subject: RE: Connecting you with the Chula Vista Police -- Skydio story
Attachments: Sallee CVPD DFR Article.pdf

Cade,

It was great speaking with you. Per our discussion on Drone as a First Responder (DFR) vs. “reactive” or more traditional “drone in a trunk” flights, attached is an article I wrote for Police Chief Magazine in the March 2020 edition. While not specific to Skydio, it should give you a sense of potential public safety use cases (police, fire, EMS, search and rescue and lifeguard services) for drones in general.

More specific to your Skydio questions - A.I. and sophisticated obstacle avoidance will only make drone flight operations safer and allow first responders to focus on the emergency at hand. The Skydio2 has the most sophisticated AI system and obstacle avoidance technology that I have seen of any drone, by a long shot, and I’m excited to see what the X2 will bring. We want our cops to be cops and focus on the emergency task at hand. A.I. and sophisticated obstacle avoidance helps smooth the training and piloting skill gaps of manual flight so it is a huge advantage for first responders and flight safety.

A couple relevant stats:

- CVPD has 4 Skydio2 drones within its fleet (along with some others from DJI and Parrot)
- CVPD has 15 licensed drone pilots, mostly assigned to the patrol division – they check out drones for their shift for emergency calls where we can’t reach with DFR (yet)
- CVPD responds to emergency calls with DFR as well as traditional field deployments (manual flight) depending on need and location
- DFR currently relies on DJI M-200 and DJI M-210 v2 platforms because they can carry a heavier camera payload. Skydio2’s and other smaller drones are used in field deployments. I’m hoping the X2 will have features that put it in the same class as the M-210 v2, at a minimum
- There are over 18,000 state, local, tribal, territorial (SLTT) police agencies in the U.S. and over 27,000 fire departments. Only slightly more than 200 police agencies have manned helicopter units. Drone technology will bring aerial support and aerial intelligence to those agencies who could otherwise never afford a helicopter. The same benefits would be applicable for other first responders, such as fire, ems, search and rescue and lifeguard services.

Also, a couple links for background. Although not specific to Skydio, it sounds like the Skydio X2 has the potential to be an excellent DFR drone, just as the Skydio2 has been excellent for our field deployments.

Link to CVPD UAS Program: <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

FAA UAS Integration Pilot Program (IPP): https://www.faa.gov/uas/programs_partnerships/integration_pilot_program/

As I mentioned, I’m happy to be available should you have follow up questions or need clarification.

By The Editor on Jun 22, 2020 06:54 am

A trial with the use of drones will begin at Schiphol. During the trial, there will be drones with cameras for inspection of taxiways, small buildings and aircraft and drones that transport light goods between different locations at the airport. In this way, the potential benefits of drones are explored, for example, to inspect structures [...]

US Army Drones Could Change Shape Mid-Flight

By The Editor on Jun 22, 2020 06:49 am

Soon, the U.S. Army will be able to deploy autonomous air vehicles that can change shape during flight, according to new research presented at the AIAA Aviation Forum and Exposition's virtual event June 16. Researchers with the U.S. Army's Combat Capabilities Development Command's Army Research Laboratory and Texas A&M University published findings of a two-year study in fluid-structure interaction. Their [...]

Deep Drone Acrobatics

By The Editor on Jun 22, 2020 06:14 am

Performing acrobatic manoeuvres with quadrotors is extremely challenging. Acrobatic flight requires high thrust and extreme angular accelerations that push the platform to its physical limits. Professional drone pilots often measure their level of mastery by flying such manoeuvres in competitions. In this work, we propose to learn a sensorimotor policy that enables an autonomous quadrotor [...]

Drone-Delivered Soap Bubbles Help Pollinate Flowers

By The Editor on Jun 22, 2020 06:11 am

As pollinators, bees are hard to beat. Still, that hasn't prevented researchers from working on a high-tech alternative: drones that blow soap bubbles to transport pollen to a flower. It's a "really cool" approach, says Henry Williams, a roboticist at the University of Auckland, who was not involved in the work. But some biologists are [...]

Subject: Multiple Perspectives on U.S. Foreign Drone Policy

Categories: Green Category

**Warning:
External
Email**

**FROM THE EDITOR**

Greetings!

The commercial drone industry has always been focused on defining the type of work that drones can do to help make workflows faster, safer, and cheaper—the repetitive, dirty, and dangerous jobs that can deliver real value to businesses. From construction and infrastructure and transportation to energy and utilities, collecting high-quality site data to monitor assets has always been a key use case for businesses.

With COVID-19 reducing the workforce and preventing many of us from being physically on the job site, this has become more important than ever. Having a centimeter-level digital twin of our assets that can be accessed remotely is enabling businesses to make informed decisions from the safety of their own homes, allowing managers to strategically utilize their workforce to make necessary visits and repairs.

This Wednesday, June 24th, at 11:00AM to 12:00PM EST, we will be co-hosting a webinar with Eye-Bot Aerial Solutions, “No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase,” to further explore how establishing a single source of truth through collecting high-quality data can help businesses operate and run remotely while reducing time and costs. I hope to see you there!

In other news, today we have a double feature with Dawn M.K. Zoldi of P3 Tech Consulting and Grant Guillot of Adams and Reese LLP discussing multiple perspectives on America's foreign drone policies.

Be well and stay safe!

Danielle Gagne

The Art of War: How Concerns About Chinese Drones Could Propel the Commercial Drone Industry to New Heights

By Dawn M.K. Zoldi

The debate about whether foreign drone policy is more about politics or technology will continue, but the U.S. position and response has been clear and unified. The United States government doesn't really want to sort through the logistics of allowing foreign-made drones to be utilized by their agencies; it wants to adopt and support technology that is American-made.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how

the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday June 24, 2020 | 11:00AM - 12:00PM Eastern Time

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design

- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

Subject: Re: Drone Police - Documentary Series

<p>Warning: External Email</p>

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police"

movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police" movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

I snipped a bit from your article and made some edits. Here's what it looks like currently. Will you make sure I didn't take anything out of context? It still has some more proofreading to go through, so there could be additional edits to come, but nothing drastic.

Chula Vista's Drone Program Excels During Pandemic
 By Vern Sallee

When everyone was social distancing, the Chula Vista Police Department was dispatching its first responder drones to backyard searches, domestic violence calls and scouting on gun calls. The drones became force multipliers, supporting patrol officers with unprecedented situational awareness to help police obtain better outcomes on emergency calls.

The drone program has helped officers on hundreds of calls during the COVID-19 emergency, responding on average to 10 to 15 calls a day.

Although Chula Vista police established its drone program in 2016, its assistance during emergency situations during the COVID-19 pandemic has been a powerful tool. When an emergency call is received, the closest drone is launched, arriving on scene before officers to live stream video to first responders.

This is especially valuable on mental-health calls, disturbance calls and potentially dangerous situations with limited information for officers. The real-time intelligence is integrated into response protocols, allowing officers and supervisors to approach the scene more safely and bring the right tools, tactics and resources to resolve a call. In a policing environment where de-escalation is important, drones are a huge assist.

Remotely operated drones are deployed at fixed launch sites ready to respond to emergency calls. Since October 2018, Chula Vista Police drones have flown over 2,400 missions and have assisted in 312 arrests. The drone program operates 70 hours a week over 17 square miles. The average response time is 150 seconds. There are 15 officers in patrol who are licensed drone pilots by the Federal Aviation Administration.

Chula Vista Police and Fire Department personnel, like all first responders, are at heightened risk for exposure while responding to emergencies. Over time, Chula Vista Police have shown that an experienced first responder drone operator can clear an average of 23% of emergency calls without the need to dispatch officers. This retains officers for higher priority calls and helps them avoid unnecessary personal contact and exposure the coronavirus.

Chula Vista was one of the first police agencies in the nation to deploy speaker-equipped drones for outreach to the homeless population in difficult to reach urban canyons. The homeless outreach missions covered miles of territory and reached dozens of people in about a quarter of the time it would have taken on foot.

Even though drones provide dynamic assistance, they can't replace officers on the ground. At their best, drones can provide real-time intelligence in support of officers. But agencies must be aware of community concerns and have strong policies and protocols in effect. Transparency, open communication and engagement with community leaders and stakeholders is critical to address privacy and police overreach concerns.

Done properly, a police drone program provides intelligence that makes communities safer, officers safer and even suspects safer. In this time of limited budgets and stress on organizations, Chula Vista's drone program has helped officers on the ground plan and effect better call outcomes, even during one of the most challenging times in our collective memory. For more information about CVPD's drone program, please visit <https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>.

Lessons learned?

Implementing the EOC and ICS systems to help plan early on was important. There has been good communication between the city and county and within the city itself. This is largely due to implementing and following ICS with clear lines of responsibility for planning and operations.

Sir,

I serve as VP of Business Development for Ascent AeroSystems, a U.S. owned and operated sUAS manufacturer. We design and build the world's only rugged, all-weather, fully modular "coaxial" drones for public safety, military, and industrial users. We work extensively with the U.S. Department of Defense and currently provide systems to U.S. Special Operations Command, Naval Air Systems Command, Naval Surface Warfare Center, U.S. Army Combat Capability Development Command, Air Force Research Lab, DARPA Laboratory, and several defense industry OEMs.

We have also entered the public safety market and have begun partnerships with local police department Air Support Units similar to Chula Vista's, as well as UAS software companies that design software specifically tailored to law enforcement and first responder requirements. I have attached a short brochure and invite you to visit our website at www.ascentaerosystems.com to learn more about us.

Would you be open to a short introductory call to discuss our system and our unique capabilities for law enforcement?

Very Respectfully,
Paul Fermo
VP Business Development
Ascent AeroSystems Inc.

Remote access to critical assets is more important than ever.

Check out today's webinar:

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday, June 24, 2020 | 11:00AM - 12:00PM Eastern Time

The earlier that a project or asset starts collecting high quality, consistent data, the more insights you will be able to extract and the richer the data will be into the development of a digital twin. Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction project enables all necessary stakeholders to reference the same consistent data.

Join us today for this free webinar as we discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

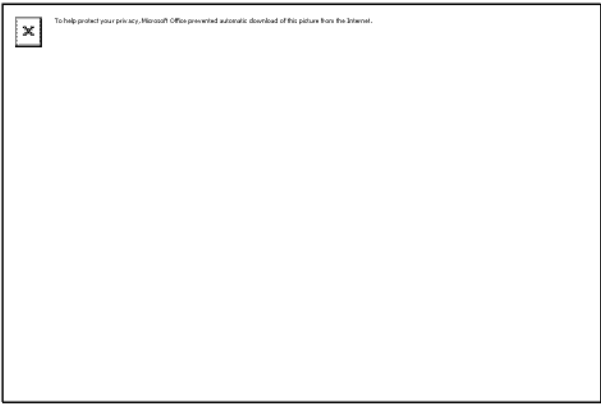

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high quality, consistent data
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design

- Learn how Shell Polymers uses Eye-bot’s data collection and processing methodology to enhance collaboration, improve safety and decision making

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police"

movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

On Thu, 14 Nov 2019 at 11:25, CB Films Research <research@cb-films.tv> wrote:

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

**Warning:
External
Email**

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

Lessons learned?

Implementing the EOC and ICS systems to help plan early on was important. There has been good communication between the city and county and within the city itself. This is largely due to implementing and following ICS with clear lines of responsibility for planning and operations.

Lessons learned?

Implementing the EOC and ICS systems to help plan early on was important. There has been good communication between the city and county and within the city itself. This is largely due to implementing and following ICS with clear lines of responsibility for planning and operations.

Vern,

Thanks very much for your response.

Lt. Redmond, I was very impressed by your program review that was webcasted recently and would love the opportunity to chat with you about your work. We have recently been working with Ft Wayne, IN PD Air Support Unit and have a long relationship with multiple organizations within the Department of Defense. You can learn more about us here: www.ascentaerosystems.com.

Are you available next week for a short call?

Very Respectfully,
 Paul Fermo
 VP Business Development
 Ascent AeroSystems Inc.

Sir,

I serve as VP of Business Development for Ascent AeroSystems, a U.S. owned and operated sUAS manufacturer. We design and build the world's only rugged, all-weather, fully modular "coaxial" drones for public safety, military, and industrial users. We work extensively with the U.S. Department of Defense and currently provide systems to U.S. Special Operations Command, Naval Air Systems Command, Naval Surface Warfare Center, U.S. Army Combat Capability Development Command, Air Force Research Lab, DARPA Laboratory, and several defense industry OEMs.

We have also entered the public safety market and have begun partnerships with local police department Air Support Units similar to Chula Vista's, as well as UAS software companies that design software specifically tailored to law enforcement and first responder requirements. I have attached a short brochure and invite you to visit our website at www.ascentaerosystems.com to learn more about us.

Would you be open to a short introductory call to discuss our system and our unique capabilities for law enforcement?

Very Respectfully,
Paul Fermo
VP Business Development
Ascent AeroSystems Inc.

**FROM THE EDITOR**

Greetings!

As the ability to fly BVLOS becomes more of a necessity for drone operators and companies to accomplish important tasks such as life-saving drone deliveries and critical infrastructure inspections, figuring out how we can make that case to the FAA to obtain waivers and, eventually more permanent regulations, has become more important than ever.

The need to make a safety case is undoubtedly complex and challenging, from needing to prove your aircraft is equipped with all the necessary safety mechanisms to demonstrating that you can navigate the sky safely by having a clear picture of the airspace and where you are located and oriented within it. Our featured article this week discusses how we can build drone detection infrastructure to help the industry have a more complete and safer picture of the sky.

Be well and stay safe!

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone

technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables

aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

On-Demand

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

Vodafone Idea Enters India's Drone Delivery Ecosystem

By The Editor on Jun 25, 2020 06:50 am

Vodafone Idea is set to enter India's drone ecosystem by partnering with Zomato in the upcoming "beyond visual line of sight" (BVLOS) drone experiments being organised by India's civil aviation regulator. BVLOS drone operations allow remote piloting of drones, and do not need to be manoeuvred by keeping the drone in sight. This a crucial [...]

Russia to Replace Helicopters in Arctic by Drones

By The Editor on Jun 25, 2020 06:24 am

Russian defense firm Rostec is partnering with Aeroxo, a small startup based in Moscow and Riga, to make tilt-rotor drones for dangerous Arctic operations. "The Roselektronika holding (part of Rostec) will begin production of unmanned convertiplanes, which in the future will be able to operate in the Far North," RIA News reported. According to RIA [...]

The Heart Behind the Badge

Dear Community and Supporters,

For the past six months I have been Executive Director of the Chula Vista Police Foundation which has been an amazing journey. I have witnessed first hand the love each officer has for the community and pride in their job. I have seen the compassion each officer carries out their duties. The demands placed on our public safety professionals is impressive. Their job takes ***courage***.

The officers are trained in public safety, yet they have become mental health experts, addiction treatment assistants, juvenile and family therapy counselors and more. The challenges of homelessness have similarly fallen on their shoulders. Chula Vista's Homeless Outreach Team is rooted in compassionate care and has become a model for similar teams around the world. Our officers take on these diverse responsibilities because of their reverence for ***humanity***.

Our officers are sometimes called to homes in desperate need of help only to learn there is an elderly homebound. The individual is in need of assistance to go to the store for basic needs or purchase their prescription drugs. The officers do these acts of kindness, why? Because the officers think 'That could be my grandma or grandpa,' demonstrating ***compassion***.

A police officer's job is sometimes thankless, often emotionally exhausting, and always physically draining. This is true now more than ever. We have seen horrific scenes in the media – shocking videos of officers in other regions doing

horrible things that have eroded public trust and tainted the uniform for all who wear it. The actions committed by these few have also impacted our local officers and damaged their morale. But they continue to work each and every day, with the same compassion and care for our community. They are models of ***dedication***.

At the same time, the Chula Vista Police Department continues its work to enhance community safety and de-escalate encounters. The department's Drone as a First Responder program has been a huge success on the west side of the city. Drone technology has allowed officers to get "eyes on" emergency situations from the air. It has provided more time for officers to evaluate potential threats, or the absence of threats, before entering a dangerous situation. It has allowed officers to have better tools, more distance, and cautious techniques to de-escalate many situations. The program has gained worldwide attention. The department wants to expand the program onto the east side of the city, but the program continues to be unfunded. Funding for the drone program does not come from the city's general fund budget. Instead, the generous contributions of the Chula Vista Police Foundation, coupled with other resources, has helped to provide this incredible tool to our community. If you would like to support the expansion of this program, the Police Foundation appreciates your donations which are tax-deductible. (Visit us at chulavistapolicefoundation.org.) The Police Foundation supports the department as a national leader in ***innovation***.

In closing, I encourage us all to remember how the community of Chula Vista is unique from so many others. Let us speak out with a unified voice to share why the Chula Vista Police Department is different than others seen on the news or social media feeds. Let us educate others on why Chula Vista is so special. The attached document provides many more facts and details. I encourage you to get to know Who We Are – A Comprehensive Look at the Chula Vista Police Department. [who we are](#)

I ask for your support, your prayers, and your voice – not just today, but for the long road ahead. Let Chula Vista be a light in what sometimes feels like a darkening world. Let us unite our hearts as we stand together with the Chula Vista Police Department and its personnel. Join me as we thank the men and women in uniform for their dedication to making our city the safest in San Diego County

With love and prayers-

Becky Cortez

Warning: External Email	Hi Vern,
--	----------

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police" movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

Hi Vern,

Lovely to meet you and speak to you yesterday,

I know you're inundated and didn't want to intrude too much, but wondered if you'd heard anything from the Chief's assistant?

I'm happy to get in contact too if that's easier for you?

If you know her/his email address I'm happy to chase,

Best Wishes,

Suzanne

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

Iran Unveils New Drone with 1,000 Km Range

By The Editor on Jun 30, 2020 06:50 am

The Islamic Republic has been increasingly developing its domestic arms industry for years now, having started to do so in the face of international sanctions and its inability to buy weapons systems abroad. In recent years, the country has developed its own tanks, transports, radars, air defence systems, and jets, among other things. The Islamic [...]

Are you in the drone business or simply have a passion for flying drones? The 5th Annual FAA UAS Symposium - Remotely Piloted Edition is coming to YOU this summer! Join in two remote episodes to get the latest on critical technology challenges and innovative solutions that are advancing safe drone integration.

Engage with FAA, industry and other global technology leaders during presentations, breakouts and virtual networking to help shape the future of UAS integration!

Episode I takes off next week!

July 8 â€“ 9, 2020

Don't miss discussions on: Global collaboration, airspace integration, Unmanned Traffic Management (UTM), STEM, UAS type certification and operational approvals, LAANC, analytics and Artificial Intelligence and DroneZone updates.

August 18 â€“ 19, 2020

Be part of the latest conversations on: Drone Integration Pilot Program (IPP), TFRs and assistance for public safety, emergency operations, airport UAS detection and response plans, authorizations and waivers, handling drone complaints, real world operations and accident investigations.

What's now and what's next on drone technology? Find out at the FAA UAS Symposium

Are you in the drone business or simply have a passion for flying drones? The [5th Annual FAA UAS Symposium](#) is coming to you this summer through two remote episodes: July 8-9 and August 18-19. We want to connect with YOU on the critical technology challenges and innovative solutions that are advancing safe drone integration.

Engage with FAA, business and other global technology leaders during presentations, breakouts and virtual networking to help shape the future of [UAS integration](#).

FAA UAS Symposium ? Episode I

July 8-9, 2020

Don't miss discussions on: Global collaboration, airspace integration, Unmanned Traffic Management (UTM), STEM, UAS type certification and operational approvals, LAANC, analytics and Artificial Intelligence and DroneZone updates.

FAA UAS Symposium ? Episode II

August 18-19, 2020

Be part of the latest conversations on: Drone Integration Pilot Program (IPP), TFRs and assistance for public safety, emergency operations, airport UAS detection and response plans, authorizations and waivers, handling drone complaints, real world operations and accident investigations.

More highlights:

- Drones are here for good. **Explore** the positive uses of drones from public safety to infrastructure and package delivery.
- **Connect** with the drone community and **network** online with your peers from around the world.
- Learn about drone businesses and **discover success stories**.
- Safety propels innovation. Learn how safety concerns generate **new UAS capabilities**.
- Get your questions answered by the experts at our **virtual FAA UAS Support Center** and during the **how-to sessions!**

Register today. Follow us on social media for the latest drone news. We hope you will join us this summer!

Webinar: Night Drone Crime Scene Mapping

Tuesday, June 30th, 1pm PST

Hi Vern,

Drone use in the public safety industry has amazing potential to save lives and give law enforcement the tools they need to get the job done. Join us tomorrow afternoon for a webinar to learn more about the unique use of drones to document crime scenes.

This 90 minute webinar is designed to showcase the drones, equipment, and processes needed to map nighttime crime scenes. We will cover the equipment needed to capture aerial night forensic scenes, how to process the data on site for rapid verification/report, and how to process the data back in the office for more detailed 3D maps and models.

We are so excited to be sponsoring this event with [Autel Robotics](#) and [Sundance Media Group](#). Registration is free, please click on the link below.

We hope to see you tomorrow!

GA-ASI Demonstrates Automatic Takeoff and Landing Enhancements

By The Editor on Jun 29, 2020 06:57 am

As part of the ongoing U.S. Air Force contract for MQ-9A Reaper modernization, General Atomics Aeronautical Systems, Inc. (GA-ASI) demonstrated three expanded Automatic Takeoff and Landing Capability (ATLC) enhancements that provide the MQ-9A with a dramatic increase in operational flexibility. One enhancement enables the MQ-9A to land at an alternate or "divert" airfield in which [...]

Episode 44: Pilots prefer manual flight to autopilot, DAC meeting, inside Utah's UAS use

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

This week on the InterDrone podcast, we sat down with Sally French, aka The Drone Girl from TheDroneGirl.com and Paul Wheeler, the Unmanned Aerial Systems Program Manager for the Utah Department of Transportation. We spoke about the latest DAC (Drone Advisory Committee) meeting, the DroneUp study which found drone delivery pilots preferred manual flight to autopilot, we discussed new capital investments into drones for renewable energy inspection, and much more. The episode concludes with an interview with Paul Wheeler, about how he has grown his drone fleet at UDOT to over three dozen aircraft.

Greetings!

From solar, laser, and wind to batteries, hydrogen, and even jet propulsion, there are a number of solutions out there that can get your drone into the sky. Some of these technologies have been around since the drone industry began, but there are also new and innovative options being developed all the time that are enabling longer flight times and heavier payloads.

With all of the powering solutions out there, it can be a challenge to decide what is best for your needs in terms of endurance, longevity, cost, and efficiency, especially as drone operations become more complex and move beyond visual line of sight. This week's featured article explores the many different types of powering solutions out there to help you sort through the host of options out there to find the one that is best for you and your operation.

Be well and stay safe!

Powering Solutions for Your Drone, Part 1: Small to Mid-Sized Drones

By Danielle Gagne

For this two-part series, Commercial UAV News is breaking down the various powering solutions out there to help new and experienced drone users alike understand what is available today and the best use cases for each option out there. To do so, we reached out to seven different companies that specialize in powering solutions for drones from small and mid-sized to heavy-lift cargo to obtain their expert insights on what makes these powering solutions run, their capabilities, what they are best suited for, and more.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone

technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables

aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

On-Demand

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

The Panelists

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Sharon Rossmark is the CEO of Women And Drones, the premier global platform featuring women who are disrupting, innovating and shaping the future of the drone industry. She is also a FAA Certified Drone Pilot. In 2018, 2019 and 2020 the company was listed as one of the "Top 100 Companies To Watch" in the drone industry.

Kashmir Rose Pandolfi is a drone test pilot at Kashmir Robotics and has Mentored at Teachers Take Flight, Fly for Conservation, and SuperHERo drone workshops at Kashmir Academy. Kashmir is the only test pilot at Kashmir-Robotics with a perfect record of successful test flights.

La'Quata Sumter is the Electrical and Computer Engineering Program Chair/Instructor at Albany Technical College. She is the founder of Focusing On Me, Inc.(501c3) and Focusing On Me Droneworks, LLC. As a STEM/STEAM philanthropist and educator she, wants to find a way to encourage STEM careers and education to the next generation.

Meghan Salter is a National Board Certified Elementary Teacher in Huntington, West Virginia. Meghan has been incorporating drone technology into her curriculum since 2015. In 2019, Meghan was named the Education Honoree for Women to Watch in UAS by Women and Drones. Meghan was also recently named the 2021 Teacher of the Year for Cabell County Schools.

This presentation will cover:

- The importance of introducing younger students to drone technology
- Challenges of integrating drones into elementary schools
- How to keep students engaged in learning concepts when they are not flying
- Perspectives from a nine-year-old drone pilot on what kids can learn from building a drone
- Advice for teachers, parents and students who do not know anything about drones
- ...and much more!

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police" movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

Dear Vern,

I hope you are doing well. I wanted to introduce myself as the new Researcher at CB Films and reopen the line of communication with yourself.

Despite the virus throwing us many hurdles, we are still very excited about the project, particularly the CVPD drone program. I just read your article in March's Police Chief Magazine, which was very informative and I am really keen to move forward and hopefully talk to Kabe Termes and Captain Fritz Reber.

I would love to set up a call with yourself and Malcolm our Managing Director so that you can discuss the proposal in further detail.

Kind regards,

Rachel McCarthy

Researcher

Email: Research@cb-films.tv

On Thu, 14 Nov 2019 at 11:25, CB Films Research <research@cb-films.tv> wrote:

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

Moroccan Apaches to Get Video from MQ-1 Predator

By The Editor on Jul 02, 2020 06:18 am

The multi-billion dollar Moroccan deal for AH-64 Apaches also includes acquisition of manned-unmanned teaming kits (MUTKs) that will enable the gunship to collaborate with surveillance drones. While Boeing only announced it scored a contract to provide 24 attack helicopters, the U.S. Defense Security Cooperation Agency (DSCA) last November green-lit a \$4.25 billion Moroccan deal that [...]

Drones Spray Locusts' Swarms in Agra, India

By The Editor on Jul 02, 2020 06:07 am

Drones were being used to spray insecticides on locusts' swarms as they reached Agra on June 30. Administration is on alert and warning has been given in the residential areas. People have been asked to follow guidelines issued by the government on locust attack. Agricultural Department, Assistant Director SN Singh, said, "Since 4 am the [...]"

Updates On COVID-19

While we all are grappling with the definition of "new normal" during the COVID-19 pandemic, the City wants to remind its residents that several restrictions are still in place. In late June, the Governor announced that face coverings are required at all indoor locations in California and outdoors when social distancing is not feasible. When dining and drinking, customers may remove their masks but need to have them on when entering or exiting any location. There are exceptions to the mask requirement including children ages two and under and persons with medical, mental, or developmental disabilities. For the full list of exemptions, please [visit the CDC website](#).

Because of the continued surge in cases in San Diego County, officials are pausing on any further openings. Effective July 1, San Diego County is closing all bars, wineries and breweries who do not have a food license. Also as of June 30, all restaurants and bars must close their dining areas at 10 p.m., however, take-out is still available after 10 p.m. All businesses must comply with face coverings and social distancing requirements. No gatherings with those outside of your household are allowed including at private residences. [Visit our Coronavirus page](#) for the latest updates.

As we continue to see an increase in outbreaks and spread of the virus, please remember we are still in the midst of a serious health situation. Do your part by wearing your face covering, maintaining social distancing and washing your hands!

Parks and Trails: Chula Vista parks and trails are open daily from 7 a.m. to 8 p.m. Some park restrooms are open but playground equipment remains closed, Please note, while some people have removed caution tape on playground equipment, the playgrounds and equipment are closed. Parents are advised to not allow children to play on the equipment - even if the caution tape is down. We will advise when the equipment is open for play. As a reminder, face coverings are required when in the parks/trails as well as maintaining social distancing. No gazebos or picnic tables are open. Park visitors are to visit parks/trails only with members of your household (10 or less) and no social gatherings are allowed.

Libraries: While City libraries are closed, you can still get books! A new pick up service for books placed on hold is available only at the Civic Center Branch Library, Monday-Friday. Please follow City and State social distancing and safety procedures when picking up your item(s). Library Takeout hours are: Monday, Wednesday and Friday from 10 a.m. to 1 p.m.; Tuesday and Thursday from 1 to 4 p.m. To order Library Takeout:

1. Place your hold online or over the phone: [Online](#) using your library account. Over the phone by calling (619) 691-5069, press 9, then press 1;
2. Staff will call you when your hold is ready for pick up at the Civic Center Branch Library located at 365 F Street.
3. When you arrive, call or text the number posted outside the library and your item(s) will be placed on the Library Takeout table for you to approach once staff has left the area.

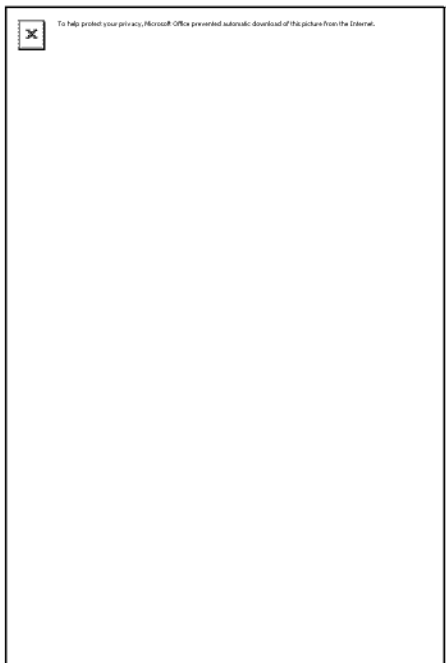

All libraries are accepting book drop-off but no donations at this time. In addition, the Civic Center Branch Library is offering limited passport services by appointment only.

Recreation Centers/City Pools: Remain closed at this time.

City Hall Offices: Most City offices remain closed with staff working remotely. The Finance Department is open Monday-Friday, from 9 a.m. to 5 p.m. and Friday from 9 a.m. to noon. The CVPD front counter is open Monday-Friday from 8 a.m. to 5 p.m. Fingerprint cards and Live Scan appointments are not available at this time and social distancing is in place for all visitors.

County Task Force: Mayor Mary Casillas Salas and Councilmember Steve Padilla have been appointed to the COVID-19 Taskforce for Equitable Recovery. Consisting of county leaders, the group will discuss ideas for addressing those who have been most impacted by the pandemic in our community. A report from SANDAG (San Diego Association of Governments) found compared to whites, Blacks and Hispanics in the county are four times as likely to live in areas that have been impacted by COVID-19 and unemployment. Data from county health officials show Hispanics and Latinos make up two thirds of positive cases and have the highest percentage of COVID-19 deaths.

Stay safe and stay healthy! We WILL get through this together.

If I can do it, so can you!
Please wear your mask.
 (No, pets do not need to wear one!)

Thanks for wearing your mask! Your mask protects me and my mask protects you.

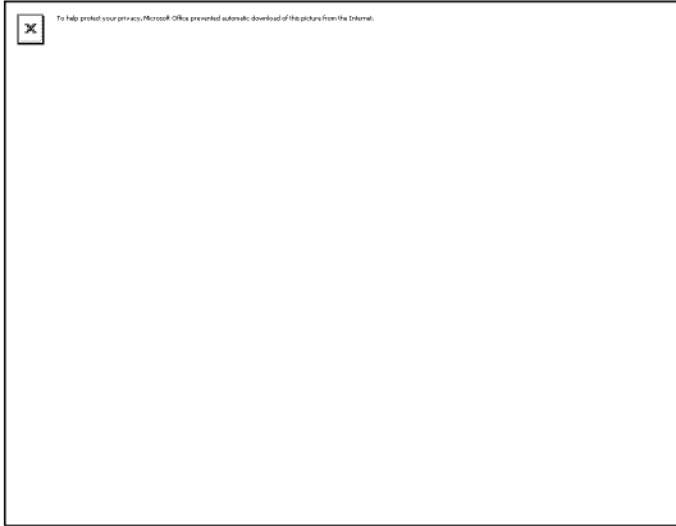

New City Manager

The Chula Vista City Council has unanimously selected Maria V. Kachadoorian as the next City Manager. Kachadoorian is the first woman and first Latina to serve as City Manager of San Diego County's second largest City.

"Maria has the knowledge, skills and vision we need to move the City forward during these unprecedented times," said Chula Vista Mayor Mary Casillas Salas. "She brings to this critical position strong leadership skills, municipal

finance acumen, and a passionate commitment to foster positive relationships with employees, residents, as well as with elected, business and community leaders."

Kachadoorian has worked at the City for 22 years. She started in the Finance Department, advanced to Finance Director, before becoming Deputy then Assistant City Manager. Her strong finance background helped lead the City through the Great Recession and she will be instrumental in implementing innovative strategies to mitigate the financial, economic and community impacts to the City and residents from the COVID-19 pandemic. As City Manager, she will oversee and maintain a balanced budget, advance the Chula Vista Bayfront development, launch Ambulance Transport Services, and foster initiatives that better connect the City's diverse communities.

Kachadoorian is a long-time resident of South County and lives in Chula Vista. She was born in Tijuana and

immigrated to the United States as an infant. She earned a Bachelor of Science Degree with an emphasis in Accounting and a Master's Degree in Public Administration from San Diego State University. She also is a Certified Public Accountant. As a Chula Vista Rotarian, she has volunteered on many projects benefiting the Chula Vista community. Congratulations!

CVPD Rolls Out Live911

Once again, the Chula Vista Police Department (CVPD) is breaking ground on important and innovative technology that will benefit anyone who makes an emergency 9-1-1 call in our City. In addition to their successful Drone as a First Responder (DFR) program, now all CVPD patrol officers have access to *Live911* allowing officers to live-stream 9-1-1 calls directly to their vehicles at the same time as the calls are received by Police Dispatch. Normal procedure for a 9-1-1 call is for a dispatch call-taker to receive the 9-1-1 call, enter it into the Computer Aided Dispatch (CAD), and then a police dispatcher notifies officers over the police radio of the incident. With *Live911*, which does not replace Dispatch, officers can hear what is happening in real time and see the exact location of the caller. The increased information provides the officers the ability to create a better response plan, consider a de-escalation approach, and improve response times by eliminating dispatching delays.

CVPD is the first agency in the country to test the program thanks to the initiative of former CVPD Captain Fritz Reber and Chief Roxana Kennedy. Partnering with HigherGround, a dispatch call-logger company, CVPD developed and tested *Live911* for several months and provided feedback for improvements. HigherGround used the feedback to strengthen the software program. As a pilot program and partner, there is no charge to CVPD. In exchange for developing the software with HigherGround, CVPD will never have to pay for this innovative technology. CVPD once again shows the benefit in public/private partnerships.

Agent Shaun Myers, who along with Agent Tom Craft, tested the program, said *Live911* is definitely a benefit to responding officers. Agent Myers gave an example of when he heard a call to Dispatch of someone not breathing and unresponsive at a fast-food

restaurant. Since he was only a block away, Officer Myers quickly arrived at the location to render first aid while the reporting party was still on the phone with Dispatch. "Live911 gives us that much more time - from 45 seconds to a minute - which is quite a bit when trying to save someone's life," said Myers. Agent Craft provided another example of a victim following a suspect in her vehicle after a crime had occurred. Agent Craft was quickly able to catch up to the suspect because he heard in "real-time" the vehicles' locations without the inherent dispatching delays.

Live911 is accessed in patrol cars via special software on the Mobile Data Computer. When *Live911* is activated in the vehicle, officers can view a map and set a distance radius from their vehicle of the 9-1-1 call area that they want to monitor. The radius moves as the patrol vehicle moves. The software allows officers to adjust the map lighting from day to night for better visual viewing and zoom in on a satellite map of the caller location. Lt. Don Redmond, who assisted in the development of the software, said the Chula Vista Police Department receives over 100,000 9-1-1 calls a year. "Using *Live911* allows officers to hear information directly from the caller. With this increased information, officers are better prepared upon arrival. Potential benefits of *Live911* include improved response times, increased situational awareness for responding officers, and enhanced de-escalation skills. *Live911* provides officers with another tool to better serve the community."

The Chula Vista Police Department is proud to be part of such leading-edge efforts in community policing.

Coyote Concerns

We have heard from many residents that there is an increase of coyote sightings in Chula Vista. The following, from the Humane Society of the United States, can be helpful:

Generally, coyotes are reclusive animals and avoid human interaction. In some cases, however, they can adapt to urban and suburban environments. The presence of food, even in the form of compost or trash, can lure coyotes and create the impression that these places are bountiful feeding areas. Without the lure of food, a coyote's visit will be brief and rare.

Coyotes are naturally self-reliant and opportunistic hunters. They hunt for food. Coyotes that are fed can lose their fear of humans. People should not tolerate or entice these bold coyotes; these are wild animals and should be given a clear message to stay away. The most effective way to prevent coyotes is to eliminate wildlife feeding.

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Coyotes are omnivores that will eat anything edible. They primarily feed on small rodents and rabbits. In some cases, they may attack and kill small pets. Free-roaming pets, especially cats or small dogs, may also attract coyotes into the neighborhood. The best way to minimize risk to pets is never to leave them outside unattended.

Dogs should always be kept on a leash in public areas. Never let your dog interact or play with a coyote. Keep pet food and water indoors to avoid attracting coyotes.

If you see a coyote, you should exhibit caution, as that coyote may have become habituated to humans. If you are approached by a coyote, you should yell, wave your arms, and/or throw something at the coyote. Do not run away. Hazing can help maintain coyotes' fear of humans and deter them from neighborhood spaces such as parks, backyards, and playgrounds.

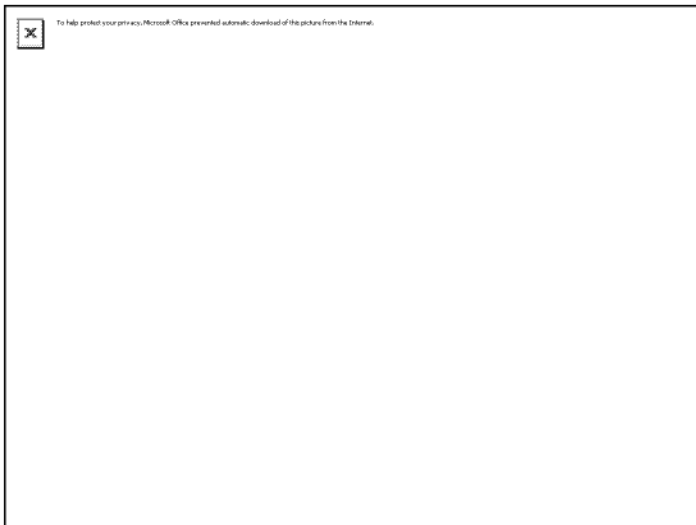

On the other hand, avoid any conflicts that do not exist. If a coyote is staying away from humans and pets, people should not seek out opportunities to haze or otherwise aggravate them. Embracing communal respect with wildlife is key.

When a coyote fails to exhibit fear of humans or acts aggressively, immediately contact both California Fish and Wildlife at (858) 467-4201 and San Diego County Wildlife Services at 1-800-486-0010. It is helpful to report wildlife incidents so the [State Wildlife Officer](#) who can track locations/trends. Only licensed trappers can trap wildlife in California. For emergencies that involve immediate threat to human life, please dial 9-1-1.

Did you know...

...reminder that **private use of fireworks in San Diego County is against the law**. All types of fireworks are illegal, including firecrackers, sparklers, bottle rockets, M-80's, roman candles, cherry bombs, snappers and poppers. Also, be aware that transporting fireworks from another state or into the United States from Mexico carries a penalty of fines, and/or imprisonment. For more information, contact the Chula Vista Fire Department at (619) 691-5029 or [email](#). To report unauthorized use of fireworks, call the Chula Vista Police Department dispatch non-emergency line at (619) 691-5151.

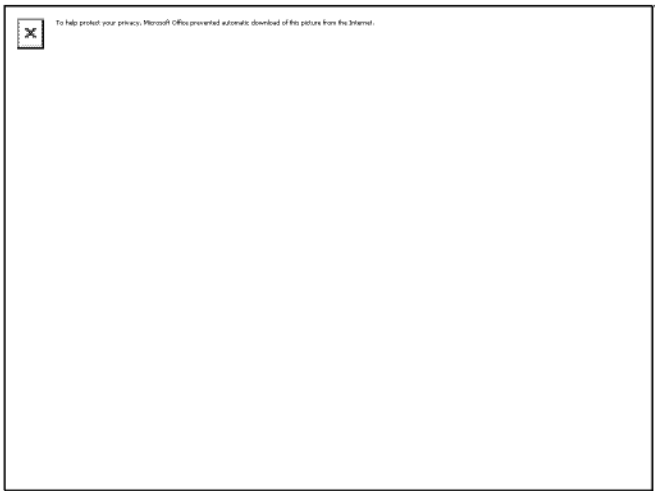

...looking for some family fun this weekend? The **Living Coast Discovery Center** in Chula Vista opens Friday, July 3, with limited availability. At this time, it will be open Friday-Sunday, 10 a.m. to 4 p.m. [Learn more](#) on their website. Don't forget your face covering!

...**MTS Rapid buses** are now traveling in the dedicated transit guideway between Heritage Road and Medical Center Drive/Brandywine Avenue. Drivers, pedestrians, and bicyclists should use the designated lanes and sidewalks on East Palomar Street. Violators may be fined and/or receive a citation if cited by law enforcement. For the safety of motorists, pedestrians, and commuters alike, we kindly ask for your cooperation. Stay safe, stay out.

...the **City Council approved the fiscal year 2020-21 \$403.9 million budget** which includes a \$206.7 million operating budget and \$22 million Capital Improvement Program. [The budget](#) also includes \$20 million in Measure A and \$20 million in Measure P funding. The Council will be updated on financial impacts from the COVID-19 pandemic in July and consider options for updating the budget to reflect new revenue projections. Look for opportunities for public input on a revised budget in July.

...Chula Vista is the first city in the county to adopt a **Digital Equity and Inclusion Plan** which lays out a series of actions the City will take to ensure every Chula Vista resident has affordable access to high-speed internet, as well as the skills and devices needed to use it. Approximately 11.4 percent of Chula Vista residents do not have a broadband internet subscription and approximately 4.7 percent do not have a device they can use to connect to the internet. Groups most impacted are disabled residents, the homeless and housing insecure, job seekers, low-income residents, migrants and refugees, residents who do not speak English, seniors, and students. [The plan](#) lays out a series of goals, objectives and strategic actions the City will take to bridge the gap.

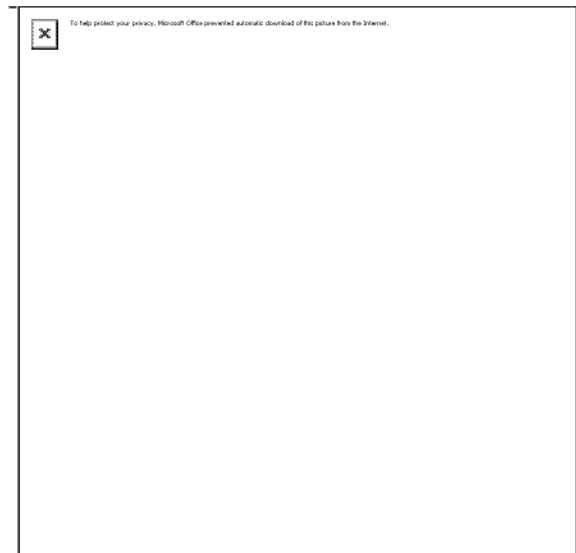

Station 5

...great progress is happening at the **two new fire station locations** funded by Measure P. **Station 5**, under construction at 341 Orange Avenue, is set to open in February 2021. Currently located at 391 Oxford Street, the new station will include eight bunk rooms, three apparatus bays, a traffic-controlled exit onto Orange Avenue, and is designed to complement the adjacent South Branch Library.

Station 9, under construction at 100 Moss Street, is due to open in April 2021. The station is currently at 266 East Oneida Street and will be relocated and expanded to include eight bunk rooms, four apparatus bays and a traffic signal-controlled exit onto Naples Street.

...our Recreation staff have been providing free food delivery service and assisting at local food distribution sites during COVID-19. They continue to provide **Chula Vista Food Helpline** deliveries Monday-Friday from 9 a.m. to noon. This one-time, free food delivery service is available to Chula Vista residents who are home-bound, have a compromised immunity, and lack transportation to other food distribution sites or stores. If you meet these requirements, call (619) 476-5340 to sign up.

...want to be involved with your City? Why not consider applying for one of the **volunteer positions on Boards and Commissions**. To be eligible, applicants must be at least 18 years old and registered to vote in Chula Vista elections. Current vacancies include: Civil Service Commission, Cultural Arts Commission, Growth Management Oversight Commission, Healthy Chula Vista Advisory Commission, Historic Preservation Commission, International Friendship Commission, Mobilehome Rent Review Commission, Parks and Recreation Commission, and the Redistricting Commission. Beginning July 1, the following Boards and Commissions will have one or more vacancies: Charter Review Commission, Civil Service Commission, and the Sustainability Commission. For more information regarding deadlines and specific seat qualifications for any Boards and Commissions, [please visit the webpage](#). Questions? Please contact [Leah Larrarte](#) or call (619) 476-2300.

Station 9

...**counting for the 2020 Census** continues through August. Chula Vista currently has had 70 percent of our residents respond to the Census. Help us reach 100 percent! Funds are used for schools, roads, healthcare, affordable housing and more. Now more than ever federal dollars are very important to help our City rebound from the COVID-19 pandemic. Please do your part and [fill out the Census](#).

...the **City has a robust social media program** and we hope you are following us! Facebook, Instagram and Twitter [@thinkchulavista](#). In addition, several City departments have social media platforms. Check them out! Recreation on Facebook and Instagram [@cvrec](#); Chula Vista Library on Facebook and Instagram [@chulavistalibrary](#) and Twitter [@ChulaVistaLib](#); Chula Vista Police Department on Facebook, Instagram and Twitter [@chulavistapd](#); Chula Vista Fire Department on Facebook [@chulavistafiredepartment-offical](#) and

Instagram @chulavistafiredepartment; Cultural Arts on Facebook @culturalartscv, Twitter @ChulaVistaArts and Instagram @cv_arts; Animal Care Facility on Facebook @cvanimalcare and Instagram @cvacf; CLEAN on Facebook, Twitter and Instagram @chulavistaclean.

...July is **Parks and Recreation Month!** Stop by and enjoy one of the more than 60 parks in Chula Vista (like beautiful Mountain Hawk Park pictured here). Although parks are not available for picnics or gatherings at this time due to COVID-19, you can walk, run, or take a nap on the grass while getting some fresh air! Please wear a mask when entering/exiting and within six feet of others not from your household.

Events

No Fire Works; No Block Parties

Due to the global COVID-19 pandemic, the City of Chula Vista will not be hosting the Chula Vista Fourth Fest fireworks show this year. In addition, the annual Firefighters Pancake Breakfast is cancelled and no **July 4th** block parties are being permitted. Have a safe Fourth of July at home!

July Council Meetings

City Council meetings will resume virtually on **Tuesdays, July 14, 21, and 28** (July 7 meeting cancelled by code) at 5 p.m.

Residents are invited to provide comments on the agenda. Visit the online eComment portal for the meeting. If you have difficulty or would like to submit a comment by telephone, please contact the [Office of the City Clerk](#) or call (619) 691-5041 for assistance. Members of the public can watch the meeting via livestream. In addition, Chula Vista City Council meetings are video recorded and aired live on AT&T U-verse channel 99 (throughout the County), and on Cox Cable channel 24 (only in Chula Vista). Recorded meetings are also aired on Wednesdays at 7 p.m. (both channels) and are archived on the [City's website](#).

Loma Verde Recreation Center Virtual Meeting

The Loma Verde Recreation Center, located at 1420 Loma Lane, is among the busiest recreation centers in the southwestern area of the City and is in the poorest condition, beyond its useful life and in great need of replacement. The Center was built in the 1970s and over the last 40 plus years, it has been remodeled and repaired as needed to suit individual needs but with a lack of comprehensive vision.

With funding allocated through Measure P, the City has been working with EC Construction and JKA to develop a design concept for a portion of the Center to include a new multi-purpose room/gymnasium, dance room, game room and aquatic changing rooms. The work that has been done to date will be presented during a virtual meeting in **mid-July**. Participants will have an opportunity to ask questions and provide feedback on the design concepts. Check the [City's website](#) soon under "News" for the exact date and time for the virtual meeting. Stay tuned for how you can participate.

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police" movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

Hi Vern,

Lovely to meet you and speak to you yesterday,

I know you're inundated and didn't want to intrude too much, but wondered if you'd heard anything from the Chief's assistant?

I'm happy to get in contact too if that's easier for you?

If you know her/his email address I'm happy to chase,

Best Wishes,

Suzanne

Hi Vern,

How are you? I just want to introduce myself, my name is Suzanne and I'm helping out on the development of CB Films' factual series that documents the use of drones/UAVs in modern police operations, it's a really exciting project and I'm thrilled to be involved.

I understand it's been a really tough time at present, with the ongoing pandemic and rioting in the U.S. and across the world, including the UK, that being said I hope it's okay for me to contact you and see how we can further the conversation about securing access and moving this amazing project onto a commission as everyone here at CB Films is incredibly passionate to tell the story of your work.

Best Wishes,

Suzanne

Dear Vern,

Thank you so much for your time on Wednesday. Malcolm said you were most helpful and we are raring to go on this project.

We look forward to hearing from you soon.

Kind regards,

Rachel

Dear Vern,

I hope you are well, I wanted to follow up my email. Are we able to arrange a call this week?

Kind regards,

Rachel

Dear Vern,

I hope you are doing well. I wanted to introduce myself as the new Researcher at CB Films and reopen the line of communication with yourself.

Despite the virus throwing us many hurdles, we are still very excited about the project, particularly the CVPD drone program. I just read your article in March's Police Chief Magazine, which was very informative and I am really keen to move forward and hopefully talk to Kabe Termes and Captain Fritz Reber.

I would love to set up a call with yourself and Malcolm our Managing Director so that you can discuss the proposal in further detail.

Kind regards,

Rachel McCarthy

Researcher

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Vern Sallee

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

START SURVEY

Dear Vern,

Thank you for your continued commitment to supporting the DRONERESPONDERS Public Safety Alliance – the world's fastest growing 501(c)3 non-profit program supporting public safety UAS.

2020 has already proved to be a much different year than we had originally envisioned. We are working with our various partners including AIRT, AUVSI, Commercial UAV Expo Americas, and the Energy Drone + Robotics Coalition to ensure that our planned DRONERESPONDERS events for 2020 are conducted smartly and safely. We'll have more news on that for you in the next few weeks. We'll also be introducing a few new projects which I hope you will find valuable.

In the meantime, I would like to ask you to take a few minutes to complete our [Spring 2020 Public Safety UAS Survey](#) which we are officially opening today. This short survey is designed to help DRONERESPONDERS better understand the emerging public safety UAS landscape, especially in the wake of the COVID-19 pandemic which has wreaked such havoc upon the world. Please help us by completing this survey and sharing it with our brothers and sisters in the public safety UAS community.

I appreciate your support and willingness to be a part of the DRONERESPONDERS program. Please contact me with any questions or concerns by responding to this message. I look forward to maintaining communications with you, and hopefully seeing you in person at one of our events later this year.

Respectfully,

Chief Charles Werner (ret.)
Director, DRONERESPONDERS
charles@droneresponders.org

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

Wednesday, June 10 | 11:00AM - 12:00PM ET

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

Warning: External Email

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Regards,

Yoshi

?: RE: From Yoshimi

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,

Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Regards,

Yoshi

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

Comments

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

Captain Sallee,

It was a pleasure to talk to you. Thank you so much for calling me back and for all the information that you shared with me this morning.

Thank you for your offer to think about possible use cases for your department. I or our CEO Deniz Dogruer (who is copied on this email) would be delighted to speak with you after you have had the time to think about how Squishy Robotics might help the citizens of Chula Vista.

I am intrigued by your idea of possible first aid/rescue missions to the Imperial Sand Dunes Recreation Area. Thanks to Google and YouTube, I have now seen the Glamis Sand Dune area (via a drone-shot movie) and I now understand and can visualize what you mean about reaching someone who has had a motorcycle or dune buggy accident out there.

Have a great rest of your week.

Yours,

Katie Calvert

Subject: Introduction

Follow Up Flag: Follow up
Flag Status: Completed

Good morning Joe,

Per our conversation, this is an electronic introduction to Chris Church, a Senior Forensic Specialist with Interpol, and an expert in drones and drone threats globally. Chris is from England but works in Singapore so there will be some time differences from DC.

I met Chris in Norway last year where he presented along with other global drone experts and I was impressed with his depth of drone security knowledge on a global level. Chris is interested in the work of the COPS office and UAS working group and better understanding the work being done in the public safety drone space in the states. He also wants to ensure that there is some level of consensus, or at least no conflict, in recommendations between Interpol and reports coming out of the COPS office if at all possible. In any event, another expert in your rolodex is probably a good thing.

Chris, Joe Heaps is an official with the USDOJ Office of Community Oriented Policing Services (COPS). He has been one of my primary contacts on drone issues with at the U.S. Federal government level and has a great "lay of the land" on how to get things accomplished. He is the best contact I have to link your expertise at Interpol with top level drone policy being developed for state, local, tribal and territorial agencies in the states. I hope this intro is mutually beneficial.

Best,
Vern

Good morning Mr. Mcphail,

Thank you for contacting the Chula Vista Police Department with your comment and concern about CVPD's drone program. I am the Captain in charge of the Patrol Division as well as the Department's drone program. CVPD, along with thousands of police departments and government agencies use drones to improve public safety in a Constitutionally responsible manner every day. I'll be glad to chat and find out more about your specific concerns about our program and explain the privacy safeguards we have in place for our community. Also, if you live in Chula Vista or Southern California, I'll personally give you a tour of our operations should you wish to visit. I can be reached at 619-691-5218 or at this email address.

Respectfully,
 Vern

On-demand webinars – now available on your time!

COVID-19 has already reshaped the ways countless businesses function, and its impact will continue to be felt in the coming months and years.

How has the pandemic impacted the commercial drone industry, and what's on the horizon?

As part of our "Digital Doors are Open" webinar series, we've gathered experts to help answer these questions. The goal: to help you navigate the crisis and prepare for the future.

The following webinars are available for you on your own time.

Getting America Back to Work Using Drones

Recorded: May 21, 2020

As entire industries work to "get back to normal" many companies have defined a new normal that is allowing them to survive and thrive. Listen to a panel of industry experts discuss the ramifications that drone technology has had across sectors, what's at stake for any organization clinging to "the way we've always done it," how innovations in the present will define a path for the future and much more.

Sponsored by

LEARN MORE & VIEW

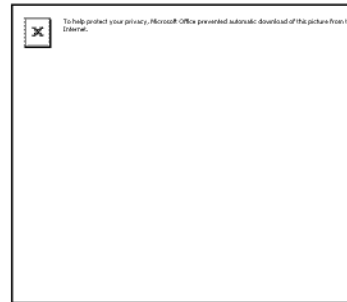

Is the World Ready for Drone Delivery?

Recorded: May 13, 2020

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public.

Hey Lt. Redmond,

Thanks for the reply. I was mainly curious because we were contacted by a company called FD1 Drone/Moss AI Analytics. They have some technology that can be used to count crowds and are trying to sell to law enforcement agencies as a "hot-spot detection solution."

<https://www.fly-drone.com/covid19>

Have you guys been in touch with them at all? Would this be something that would even be useful for your agency?

Matt

Hi Lt. Peak,

I wanted to check in and see if you have any updates on the use of your drone program. I saw that my colleague Cassie Carlisle featured some of CVPD's outreach working, using drones to notify homeless residents about COVID-19.

Have you done any similar operations recently? Have drones been used by the department for any other type of COVID-19 outreach or enforcement?

Thank you,

Matt Boone

Warning: External Email

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Regards,

Yoshi

?: RE: From Yoshimi

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don t mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

Subject: The Drone Delivery "Loophole": Heavy-Lift Cargo Drones

Follow Up Flag: Follow up
Flag Status: Completed

Categories: Green Category

Warning:
External
Email

**FROM THE EDITOR**

Greetings!

During our webinar "Is the World Ready for Drone Delivery?" we asked each panelist whether they thought drone delivery would be ready to deploy in the near future. Many of the panlists spoke about the future of last mile delivery carried out by small UAS, but Ed De Reyes, Chairman and CEO of Sabrewing Aircraft Company, Inc., had a different answer; he stated that when it comes to heavy-lift cargo drone delivery, it is not only ready but is already being implemented. His contributions to the discussion on this larger class of drone added another layer to the drone delivery conversation that has often been overlooked. We spoke with Reyes in a [follow up interview](#) to discuss his insights on heavy-lift cargo drones further, how they can provide value to businesses, and about Sabrewing's latest contribution to the heavy-lift cargo drone industry: the Rhaegal-A and Rhaegal-B drones.

In other news, we are starting to see an influx of new technology equipped with remote ID capabilities that are enabling better integration with UTM systems throughout Europe—and hopefully, eventually, the US. This week we report on two different remote ID equipped devices—Involi's KIVU drone tracker and Altitude Angel's Scout. By improving situational awareness, safety measures, and security, while also tightening up communication with UTMs, these devices are an important addition to the industry for opening up regulations and advanced operations. Although both systems offer networked remote ID, they have their own unique characteristics and are worth checking out individually to find out which might suit your business' needs.

Be well and stay safe!

Bridging Manned and Unmanned Aviation with Cargo Drone Delivery

By Jeremiah Karpowicz

Ed De Reyes is the Chairman and CEO of Sabrewing Aircraft Company, Inc. His company manufactures unmanned heavy-lift commercial cargo air vehicles that are designed to transform the way the world ships air-cargo. During the webinar, he discussed how this class of drones can fit safely into the national airspace and whether or not all of the possibilities associated with heavy-lift cargo UAVs have been fully considered. That discussion took place right after the world saw for itself what those possibilities might look during the Agility Prime Launch event when De Reyes introduced the world to the Rhaegal-A and Rhaegal-B.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to

open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

Wednesday June 10, 2020 | 11:00AM - 12:00PM Eastern Time

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations

- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday June 24, 2020 | 11:00AM - 12:00PM Eastern Time

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

Yeah, I definitely want to visit Tijuana!

When I was a student(30 years ago),I visited there just for sightseeing, but I've never thought I have a chance to visit there again.

I think you already know about IACP TECHNOLOGY CONFERENCE, it has a UAS session, maybe you are the lead🔍🔍🔍.
 Just as your reference.

https://www.theiacp.org/tech-conference?utm_source=Informz&utm_medium=email&utm_campaign=Informz%20Email

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you💎💎💎.

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
 Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

--

Hello Cpt Sallee,

Thank you for the opportunity of going to your facility three weeks ago.

I just spoke with Sgt Briley and he mentioned that he was submitting the reports of his findings of the different products he evaluated to you so you could make a decision on what is the best lighting solution for your team.

I just replied to him on the email below.

We are a smaller niche lighting solution company, although much smaller than some of the other lighting brands, our products are unique and provide solutions to Military, LE and Fire markets that others don't because of the benefits and quality of our products.

As mentioned below, we would love the opportunity of shipping a couple of lights to your team, so they can fully evaluate our products like they have done with the Streamlight.

More specifically, while others sell products, we focus on complete solutions to solve problems. These solutions integrate drones, scanners, software,...

We work with many strategic partners, as probably Tim Martin from Huntington Beach has shared and David Paul from Oceanside PD.

Thank you so much, and please let me know how we can help your team.

Have a great weekend!

Best regards,

Maria Cugini

Vice President

To: Gary Briles <GBriles@chulavistapd.org>

Subject: RE: Quotes

Hello Sgt Briles,

Thank you so much for your email and for talking to me today.

What were your thoughts on P4 drone lighting system? Could you share some feedback on how the kit performed? Would love to hear it.

In regards to our conversation on the Nomads Scene Light, please let me know if you need any additional information on them so you can make the proper evaluation. I can arrange to send you a couple of them so you have the opportunity of evaluating for as long as you need them, as you did with some of our competitors lights, vs just seeing them work for one hour, and us doing the demonstrations. You can then compare them side by side. I think this will allow you to make a better comparison if you have them and use them yourself.

The Nomad features and product life far outweigh the price difference. They are waterproof, durable, easy to deploy, and you can walk in front of them without blocking the light. If your life depends on the tools you use, you probably want the best. We simply ask that you try ours like you are trying Streamlight so you can perform the most informed decision.

I am glad you had a chance to speak with Tim Martin from Huntington PD and David Paul from Oceanside PD.

We will be honored to be able to work with Chula Vista PD; be it on the drone side or traffic or even Swat. If you think our products perform to what your team needs, please let me know what you need from us. Performance and reliability far outlast any pricing difference.

Thank you so much and I look forward in hearing from you.

Best regards,

Maria Cugini

Thank you, Capt. Sallee. I had follow-up questions. Deadline got pushed back a bit, so I'm looking to hear back by noon tomorrow. I'm at 858-837-1923.

2. Does the Chula Vista Police Department deploy drones at protests and/or demonstrations? If so, please provide dates, locations and the names of the protests/demonstration in which aerial support was provided.

CVPD has not deployed drones for the recent protests or demonstrations.

So drones weren't deployed at the recent protests. Has CVPD ever deployed drones at protests or demonstrations? And does the department plan to deploy drones at future protests or demonstrations? Why or why not?

Best,

Jared

Hi Capt. Sallee,

Hope you are staying safe.

Reaching out because I am writing an article for Voice of San Diego about whether local police departments are deploying drones for Covid-19, as well as whether police drones have been flown during recent protests. Seeking a 15-minute phone interview to discuss these questions:

1. Recently I've read that some law enforcement agencies are deploying drones for Covid-19, including to enforce social distancing rules. Is the Chula Vista Police Department doing this or does it have plans to?

CVPD has not used drones for any Covid-19 enforcement, to include social distancing. We did use speaker equipped drones on two homeless outreach efforts related to Covid-19. See attached press release and the following news story from April: <https://www.nbcsandiego.com/news/coronavirus/a-voice-from-a-drone-offers-help-from-above/2312654/>

2. Does the Chula Vista Police Department deploy drones at protests and/or demonstrations? If so, please provide dates, locations and the names of the protests/demonstration in which aerial support was provided.

CVPD has not deployed drones for the recent protests or demonstrations.

3. In case not covered by my prior question, did the Chula Vista Police Department deploy a drone(s) at the protests calling for racial justice on May 30, May 31 and today, June 1? If so, why? And what safeguards are put in place to protect protestors' identities?

CVPD did not deploy drones for those protests. As for protection of identities, CVPD drones do not use facial recognition technology and any video captured is treated as evidence in the same manner that footage from crewed police helicopters has been for decades.

4. If department drones have been flown over a protest and footage was captured, how long is it stored?

CVPD has not flown over the recent protests and has no related footage. Video storage policy is outlined in policy 448 Portable Audio/Video Recorders (see second link below).

5. Please send the department's unnamed aerial vehicle, or drone, policy.

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program/legal-documents>

Deadline to hear back is 6 p.m. on Wednesday. I'm at 858-837-1923.

Thank you,

Jared

Hi Jared,

Thanks for touching base. We're doing well, but pretty busy with the local protests and Covid-related issues. Unfortunately, I can't spare time for a chat but will answer what I can below. See my answers in RED.

Stay well,
 Vern

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

Wednesday, June 10 | 11:00AM - 12:00PM ET

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. Superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Register for this webinar and learn about the Dual Camera System from MicaSense which features 10 multispectral bands and opens the door for a broader range of use cases.

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- Discover the benefits of drone-based multispectral imaging
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations

Hi Shannon,

My apologies for the late response. Unfortunately, we've been impacted by the civil unrest the last week and I'm just catching up on emails.

Thank you very much for including CVPD's DFR program as a finalist for the AUVSI XCELLENCE Award. We are truly honored to be considered among such esteemed entrants.

I can confirm that the name of our organization and program are correct. Also, we can confirm that we intend to send representatives, Likely myself and Chief Roxana Kennedy to the ceremony. Of course, we are in some unprecedented times between the Covid emergency and the current issues of civil unrest so I would likely give final confirmation closer to the date of the conference.

Thank you again for your consideration and we hope to see you in Dallas in October!

Warm regards,
 Vern

Dear AUVSI XCELLENCE Awards Entrant,

Please allow me to be the very first to congratulate you on being a Finalist in the AUVSI XCELLENCE Awards program!

We received more than 165 quality entries and it is quite an accomplishment to be selected as a finalist by our panel of judges! Below is the complete list of finalists!

To aid with the announcement planned for Monday, June 1, and next steps, please provide the following information by Friday, June 29:

1. Confirm the listing of your company and submission name below is correct.

A few minor adjustments may have been made to optimize formatting but if you have any edits, please let us know.

If we do not hear from you, the information listed below will be used in the press release, on the website, etc.

2. Will you be attending the Awards Ceremony taking place at AUVSI XPONENTIAL 2020?

Winners will be announced at one of two ceremonies at [AUVSI XPONENTIAL 2020](#), taking place October 5 – 8 in Dallas, TX.

Winners in the **Technology Innovation** categories will be announced at an Awards Ceremony on:

Tuesday, October 6
 4:00 PM – 4:45 PM
 Leaning Lab Theater

Winners in the **Humanitarian & Public Safety** categories will be announced during the Thursday Keynote:

Thursday, October 8
 9:00 AM - 10:30 AM
 Ballroom A

In a separate email, I will be sending you a few tools you can use to promote your finalist status!

Congratulations again on your achievement. We look forward to hearing from all of you and meeting you in Dallas!

Best,
 Shannon

Northrop Radioplane RP-71 Falconer – the First Reconnaissance Drone

By The Editor on Jun 03, 2020 06:31 am

The history of drones goes back to the 1930s when the Radioplane Company developed a series of radio-controlled model airplanes that served as aerial targets for anti-aircraft gunnery training by the U.S. Army Air Corps. These were far from toy planes and were actually small piston-powered aircraft that featured metal fuselage and wooden wings. The [...]

US Army Uses Metaferrites for Low-Profile Antenna

By The Editor on Jun 03, 2020 06:17 am

US Army scientists developed a first-of-its kind antenna that could change how ground vehicles and airborne systems communicate, transmit and receive radio frequency communications. The Army matured a manufacturing process using a special class of engineered materials known as metaferrites to make an ultra-thin wideband antenna. The antenna conforms to curved surfaces, making it ideal [...]

THEY CAN TAKE OUR LANDS...

BUT THEY CAN NEVER TAKE OUR DRONES!

History and movie buffs throughout the years have talked and learned about William Wallace. He's become sort of a symbol for fighting oppressive governments and just an overall badass guy who stood his ground against unbelievable odds. Very Spartan-esque.

Because of the time when Wallace was around, not a lot of specifics were known about him. We do know he probably wore a dress... er, we mean kilt, and had a sweet Scottish accent. Why didn't Sean Connery play him in the movie? Maybe because ole' Sean couldn't grow that sweet mane that Mel Gibson could...

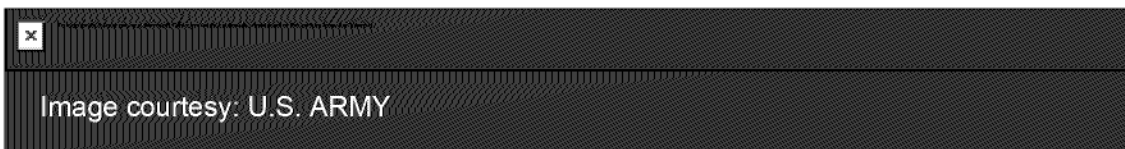

Anyway, there has been, over the years, a lot of discussion of a secret fort that Wallace used to annoy the English on one specific occasion in Dumfriesshire, which is close to the Scottish and English border of today. The fortress was lost in time, until archaeologists using clues from a journal written in the 1800s, discovered an area that could have been the location of the stronghold.

Using drones to map the area that is suspected, you can clearly make out a flat area with two massive ridges on either side and a ditch on the third to make it a perfect place from which to defend. Chances are this is really where Wallace planned his attack on the English to aid in the fight for freedom of his people.

We like to keep it light in PropellerHeads, but we always take the opportunity to acknowledge the vast benefits of drones. Beyond public safety, they are hearty tools for education, healthcare, and....well, we won't bore you with the extensive list. After-all, we humans didn't become the top of the food chain by not using the tools at our disposal.

BEST WAY TO LAUNCH A DRONE?

FROM A BLACK HAWK OF COURSE!

The Army seems to want to get all they can out of their Black Hawk helicopters, and at almost \$6 million a pop, wouldn't you? They developed and recently tested a new tube launched drone for

reconnaissance.

The drone is fired from the moving Black Hawk, opens its wings and gets moving as quickly as possible. As you might imagine, it's imperative the drone starts flying by its lonesome so the helicopter can't catch up to it and the unthinkable happens... the two collide. Which as we said, is a \$6 million+ accident and puts our American soldiers at risk.

Once the drone gets moving, it can either be controlled by a person OR follow a predetermined flight plan on its own. The idea is to take the risk of losing human life out of the equation and instead let the drone take one for the team. Tube launched drones have been a thing for a while now. They were popularized by the movie Angel Has Fallen with Morgan Freeman and Gerard Butler. We won't ruin it if you haven't seen it. But take our advice, the movie might as well end after the drone scene.

The Army have even started a drone school to start training new recruits from the get-go on how to fly these bad boys! That's the initiative we like to see!

AND NOW,

A WORD FROM MR. SLOANE

Photo courtesy: Viking UAS

Our fearless leader, well except for his fear of snakes, was interviewed by UAV Coach earlier last month about our recent majority stake purchase of Viking UAS.

The article was a follow up to a previous article wondering just what might happen if Chinese drones were to be banned from American public safety departments. Is there an American company up to the snuff to handle that burden? The short answer is no. And even if someone could handle the sheer volume that DJI can, that would never be Skyfire or Viking. (Too much spotlight, not enough goofing around for our liking!)

UAV Coach asked Matt if he thought we were capable of filling the gap if something drastic did happen suddenly, to which Matt replied, he simply wasn't interested in taking on DJI or replacing them. Viking's focus is instead on drones built on spec for individual public safety agencies.

The article also interviews our good friend Fritz Reber, head of Skydio's Public Safety Integration. He spoke about specific application drones, like the Skydio 2, and how Skydio also wasn't interested in taking over DJI's territory. Skydio rather prefers creating drones that're useful in situations where all other drones just don't stand a chance.

Both companies share the common goal of trying to create a drone that fills a niche or better helps public safety do their jobs safely.

We actually spoke with Fritz on Facebook Live last week, check out the link in the next section to learn more!

We exist to keep you safe

Hi Vern,

Safety is the #1 factor for most decisions our customers face. It outweighs cost, features, and even customer service. Without products that make safety a top priority, you cannot serve your community the way you need.

This is the number one reason we exist. To keep you safe. To design and provide tools that improve your safety, efficiency, and reputation with every purchase. Our sole mission is to put the best lighting technology in your hands that performs in the most formidable conditions.

With the ever increasing demands of the fire, law enforcement, industrial, forensics, and drone industries, FoxFury products stand strong against the challenges you face every day. Our lighting and technology solutions are second to none, and we invite you to learn more about all of the industries we serve by watching the video below.

[Visit our website](#) for more information and [contact us](#) to learn more about how our lighting solutions can help you be your best, every time.

All the best,

The FoxFury Family

FoxFury Lighting Solutions, 3528 Seagate Way, Suite 100, Oceanside, CA 92056, 760-945-4231

Hi Vern,
 Of course, completely understandable.

I'll follow up on Monday and touch base there. Hope you all stay safe and take care.

Speak soon,
 Ava

On Mon, 1 Jun 2020 at 18:51, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Ava, thanks for reaching out. Would you mind following up with us next Monday? Sadly, our region is impacted by civil unrest right now and it is our top priority. My intent is to bring Chief Kennedy into this conversation, but none us can spare the time right now as we are dealing with very dynamic events. I'm hoping after this week or the week after, we can chat.

Stay well,

Vern

EU Wastes Another €1.6M on Bubbles for Drones

By The Editor on Jun 02, 2020 06:59 am

We were surprised to discover this bizarre Spanish language press release buried on the website of a university in the tip of Spain. (See Google translation below). The Universitat Politècnica de València (UPV) is leading Bubbles, a European research project whose main objective is to ensure the safe integration of drones in airspace. Professor Juan [...]

Securing Our Skies Against Chinese Technology Act

By The Editor on Jun 02, 2020 06:55 am

If a proposed U.S. Senate bill passes, public safety agencies wouldn't be able to use federal dollars to purchase drones made in China. The bill, titled "Securing Our Skies Against Chinese Technology Act of 2020," would also prohibit state and local public safety organizations from receiving future funding unless they certify that they're not using a [...]

Email HI Capt. Sallee,

Hope you are staying safe.

Reaching out because I am writing an article for Voice of San Diego about whether local police departments are deploying drones for Covid-19, as well as whether police drones have been flown during recent protests. Seeking a 15-minute phone interview to discuss these questions:

1. Recently I've read that some law enforcement agencies are deploying drones for Covid-19, including to enforce social distancing rules. Is the Chula Vista Police Department doing this or does it have plans to?
2. Does the Chula Vista Police Department deploy drones at protests and/or demonstrations? If so, please provide dates, locations and the names of the protests/demonstration in which aerial support was provided.
3. In case not covered by my prior question, did the Chula Vista Police Department deploy a drone(s) at the protests calling for racial justice on May 30, May 31 and today, June 1? If so, why? And what safeguards are put in place to protect protestors' identities?
4. If department drones have been flown over a protest and footage was captured, how long is it stored?
5. Please send the department's unnamed aerial vehicle, or drone, policy.

Deadline to hear back is 6 p.m. on Wednesday. I'm at 858-837-1923.

Thank you,

Jared

Subject: PERF Daily COVID-19 Report: Using Drones for COVID-Related Purposes

Warning:
External
Email

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

June 5, 2020

PERF's COVID-19 coronavirus resources, including past editions of the Daily COVID-19 Report, are available at <https://www.policeforum.org/coronavirus>.

For today's COVID-19 Report, we asked police departments with drone programs whether they have found drones to be useful for COVID-19-related tasks.

Key Takeaways

-- **Drones can help police communicate with people in hard-to-reach locations.** This can be useful for communicating with homeless persons about COVID-19 risks and protective measures.

-- **Drones also can help to determine whether an in-person response is needed for certain calls for service.**

-- **But drones sometimes trigger concerns and opposition in the community.** So agencies should be sure to do public education, demonstrations, and trust-building activities. Err on the side of doing more work than seems necessary to build community support in advance, especially when using drones for COVID-related purposes that may be different from the original purposes, such as search and rescue.

-- **Be transparent about how drones are used and what data is retained.**

For more information about the police use of drones, see PERF's new publication: *Drones: A Report on the Use of Drones by Public Safety Agencies—and a Wake-Up Call about the Threat of Malicious Drone Attacks*

Westport, CT Police Chief Foti Koskinas:

We Should Have Done More to Prepare the Community About Using Drones for COVID Response

We've been running our drone program for about four years. We have long used it for search and rescue. We've located several missing children and elderly people. We have a waterfront and will launch the drone over the water, as long as we can see it. We've even been testing dropping life preservers from a drone.

We have a lot of support from our community, and we assumed that we could just roll out COVID-related announcements via drone as part of our day-to-day operations. We didn't get early buy-in from the community, but we should have done so, because it is seen as very different from normal drone operations.

We had the drones prepared with PA systems. The software would be able to detect when people were within six feet apart and not social distancing. There was not a lot of opposition to that.

But in addition to social distancing, the software was able to detect body temperature, respirations, cough patterns, and even blood pressure. This was going to be a pilot program, not something that was going into effect permanently. We were clear that we wouldn't set policy until we saw what the capabilities were. And we would go to policy experts, not set the policy in-house.

But we didn't do a good enough job of telling our community what we were going to do.

We were never going to use drones to identify individuals and pull them out of a crowd of people. It was about creating a system that

would let us know if we had a crowd of people and if we were heading towards a pandemic.

We were one of the first communities in Connecticut to see COVID cases, and it spread very quickly. So the mayor and I saw this as a tool to save lives down the road. But we didn't do enough testing or have enough answers about what could be done. We didn't have the buy-in, and we ended up suspending our use of drones for purposes of addressing social distancing and monitoring people's vital signs.

A lot of our community was supportive, but we suspended it because it created too much division in our community. It was not a good time to create community division on something that was only a pilot program.

Chula Vista, CA Police Captain Vern Sallee:

Drones Help Us Reach Homeless Persons in Remote Camps, So We Can Give Them COVID PPE

Since the coronavirus emergency, we have had concerns about our homeless community. Governor Newsom has noted that the homeless community is especially susceptible to the virus, because they may lack proper sanitation as well as housing.

Chula Vista has large urban canyons that are difficult to access. Our traditional outreach would be to send our homeless teams on foot, trying to go camp-to-camp. That would often be a one- or two-day endeavor to reach just a handful of homeless people there.

At the advent of the COVID outbreak, we came up with the concept of staging services and partnering with the county health department, nurse clinicians with the psychological emergency response team, and homeless outreach providers. We staged these in areas near the urban canyons as a "one-stop shop."

We used our drones to fly into the urban canyons, identify the location of camps and people, and communicate with them to inform them about the virus and invite them to the area we staged.

The first time we did that, we identified about 26 camps; we could actually see about 17 people; and 3 people came out and received

services. We covered eight square miles, which would typically take us two full days to cover without the drones.

The second time, we were even more successful. We had 12 people come out for services. We educated them about the virus, gave them masks and hand sanitizer, and connected them to services. We were able to connect 2 homeless veterans with services and shelter.

The drone allows us to cover a large area in a short amount of time, which allowed us to give our homeless outreach team more time on the street for face-to-face interactions with homeless persons.

Building community support for our drone program has been a continuous effort. When we started our drone program in 2016, our first step was to do outreach to the community, civil rights groups, and privacy groups to understand their concerns and address them in our policy and operating procedure. Our community is well aware of what we will and won't do with our drones, because we're as transparent as possible. Nothing about a police drone program should be secret, except protecting video evidence for court.

DAYTONA BEACH, FL

Police Chief Craig Capri:

We Use Drones to Find Missing Persons, and to Disperse Crowds During the COVID Pandemic

Our parks are closed due to COVID, and we had some guests in the parks who put officers at risk. We used our drones to go in there with a speaker and disperse the crowd. We got a great response and had no issue.

We've had our drone program for 3 or 4 years now, and we've received great feedback from the community. We started it when we had Alzheimer's patients leaving assisted living facilities and disappearing. Without drones, it would often require a massive search to find them, with helicopters and people on foot. We decided to start using drones, and we've had great public support. We also use them for search and rescue and SWAT callouts for barricaded subjects.

Sergeant Tim Ehrenkauf: As the chief said, we flew over the park with a prerecorded message saying that the park was currently closed due to COVID-19. People would just leave the park with no issues. We held a press conference before we started doing that to try to get public buy-in, which we did.

You can hear the loudspeaker drones clearly from about 200 feet. People can see that it's a drone "speaking," but it's not close enough that they could throw something at it.

ELIZABETH, NJ

Police Director Earl Graves:

Rollout of Our Drone Program Was Smooth

We've been using drones to play a recorded message from the mayor to socially distance. When you do something new, there are always naysayers, but complaints and objections about drones have come from other parts of the country. Other than that, the rollout has been smooth.

Deputy Chief Giacomo Sacca: We've had our drone program for approximately four years, and we were primarily using it for search and rescue, mapping, and suspect searches. With the pandemic, we've looked for a way to use it as a force multiplier as we've changed officers' schedules.

Our city has large parks, a river trail, and a marina area. Many of these areas aren't accessible by vehicle, so officers have to go in by foot.

We have to keep our drones in the line of sight, and if our operators see a group who aren't where they belong, they can fly over and play a prerecorded message. They can also talk through it to give other commands.

Most people comply. I'd say we have a 95% success rate, where it comes out, we play the message, and they leave.

We knew there might be some public backlash, so we released our policy. We also try to show it at public events. We deploy it to most of

our birthday parades and our graduation parade. Our negative feedback has come from out of state.

We don't save any video the drones record except evidence. Everything else is automatically purged from our systems.

SAVANNAH, GA

Police Chief Roy Minter:

Be Sure to Include Local Elected Officials in Establishing Drones
