We're a tourist town, and we have a couple of large parks in our city. After doing a drones demonstration for our mayor, he encouraged us to take the drones out to a couple of parks and use them to assist with social distancing. While we were out there, we did a press conference and show-and-tell with the media. But none of the other elected officials were invited to that press conference, and that didn't go over well with them. They had some questions, and we had some back-and-forth with some of them.

We've also received some emails about "Big Brother in the sky" and people wanting to shoot the drones down.

But for the most part, the program has been very successful and well-received. There was a little dust-up at the beginning, but that has completely died down. We haven't heard anything else about our drone program from either community members or the media.

Lieutenant Max Nowinsky: This is our third year of operating a drone program, and we average 4 to 6 missions per month.

Some of the negative feedback we received at the beginning came from people questioning the FAA rules or saying that we flew over people, which we did not do. So some of this may be about educating people.

Even before we purchased drones, we started notifying people with press releases and holding public forums. So I think we did a good job initially. But there may have been some other thing we could've done to inform the public before launching the drones in the park.

Clovis, CA Police Lieutenant Jim Munro:

Drones Have Helped Us Cancel In-Person Police Responses When There's No Need

Our friends in Chula Vista helped us get our drone program going, and it just so happened to coincide with the COVID emergency.

We thought we could put the drone up in the air, respond to calls, and potentially provide our officers with information to keep them safe. We also might be able to cancel the in-person police response in cases where we could see there was no police response needed.

We're about seven weeks into a 90-day pilot. We're flying about four days a week, and we're limited to staying within the visual line-of-sight for now.

We're seeing advantages in our everyday police response, not necessarily our COVID response. But we have been able to cancel some in-person responses, which reduces our officers' contacts with the public.

The PERF Daily COVID-19 Report is part of the Critical Issues in Policing project, supported by the Motorola Solutions Foundation.

PERF also is grateful to the Howard G. Buffett Foundation for supporting PERF's COVID-19 work.

Messerschmitt Me 163 Komet

By The Editor on Jun 05, 2020 06:00 am

The Messerschmitt Me 163 Komet was a German rocket-powered interceptor aircraft. Designed by Alexander Lippisch, it is the only rocket-powered fighter aircraft ever to have been operational and the first piloted aircraft of any type to exceed 1000 km/h (621 mph) in level flight. Its performance and aspects of its design were unprecedented. German test pilot Heini Dittmar in early July 1944 reached 1,130 km/h [...]

FROM THE EDITOR

Greetings!

The big news this week is that the sixth edition of Commercial UAV Expo Americas is going virtual. Just as the news that came out a few weeks ago about Commercial UAV Expo Europe going virtual, I am confident that we will rise to the challenge to deliver a fulfilling and meaningful event to everyone in the industry. We are an industry at the forefront of innovation and we'll be sure to leverage all that virtual technology has to offer. I think Lisa Murray, Group Director at Diversified Communications, organizer of Commercial UAV Expo Americas, said it best in the recent press release:

“So much has happened in the drone space since the last edition of Commercial UAV Expo Americas. People need an update on the latest developments and the impact on their business. While restrictions on travel are in place, restrictions on business are not. We are dedicated to bringing major stakeholders together to continue to move the industry forward during a particularly important time for drone industry expansion.”

Stay tuned for more details. I am already looking forward to FAA Administrator Stephen M. Dickson's keynote!

Danielle Gagne

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to "get back to normal" many companies have defined a new normal that is allowing them to survive and thrive. How exactly

have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what's at stake for any organization clinging to "the way we've always done it," how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

Wednesday May 27, 2020 | 12:00PM - 1:00PM Eastern Time

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

Wednesday June 10, 2020 | 11:00AM - 12:00PM Eastern Time

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday June 24, 2020 | 11:00AM - 12:00PM Eastern Time

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

Subject: DJI AirWorks 2020 - We're Going Virtual!

Categories: Green Category

**Warning:
External
Email**

Hello Vern, today, we have an exciting announcement with regards to AirWorks 2020.

In light of global health concerns, and after careful consideration, we have decided to transform this year's conference into a fully virtual event.

AirWorks has become a leading event where industry experts and seasoned pilots gather to advance the future of commercial drone technology. While we regret not being able to meet face to face, we are extremely excited about the opportunities that gathering online presents.

[More About Virtual AirWorks](#)

With this new all-digital format, AirWorks will deliver high-quality content including keynotes, breakout sessions, panels, and networking opportunities that attendees from the commercial drone ecosystem have come to expect.

The new virtual format will be available at a significantly lowered cost, and will allow attendees from around the globe, who otherwise might not be able to travel

to Los Angeles, to participate and connect with the greater commercial drone community.

Early Bird tickets are priced at \$49 and will be available for a one-month period between June 9 and July 8. Afterwards, tickets will be full price at \$99.

For one day only, on June 8th, starting at 8:00 AM PDT, we are offering a flash sale (limited to the first 500 people) where full-access tickets can be purchased for \$35.

[Visit the AirWorks Website](#)

Additionally, if you have previously received a coupon code from us, as all of last year's AirWorks attendees did for example, it is still valid against this low pricing.

We look forward to sharing more information about AirWorks 2020 soon. Stay tuned for additional details in the weeks ahead!

Warm Regards,

Denise Hibbard from the DJI Enterprise Team

DJI, 201 S. Victory Blvd, Burbank, California 91502

EU Delays UAS Implementing Regulation

By The Editor on Jun 09, 2020 06:51 am

The European Commission has delayed the applicability date of the European Union Unmanned Aircraft Systems Implementing Regulation 2019/947 until 31 December 2020. The EU UAS Regulatory Package – Outline (CAP 1789) will be updated to reflect the new applicability date of this regulation. All UAS types should thus be allowed to continue to operate under [...]

Gas Stations Start Drone Delivery Services in Korea

By The Editor on Jun 09, 2020 06:45 am

GS Caltex said that it has launched drone delivery services at its gas stations on Jeju Island, utilizing them as logistics hubs. According to the South Korean oil refiner, drones will deliver daily necessities to customers living in rural areas after they place orders through the app of its convenience store chain GS25. "Gas stations [...]"

Police Helicopter Collides with Police Drone in Canada

By The Editor on Jun 09, 2020 06:33 am

There was likely a lively debrief after a Royal Canadian Mounted Police (RCMP) AS350 B3 helicopter and an RCMP SkyRanger R60 surveillance drone collided while on a joint mission over a rural area of British Columbia. Although the incident happened in February, it didn't make it to the Civil Aviation Daily Occurrence Reporting System (CADORS), Transport [...]"

US Army Tests Smart Shooter to Down Drones in Syria

By The Editor on Jun 09, 2020 06:06 am

Images of U.S. soldiers in the Syrian desert training with an advanced electronic aiming system on their rifles have offered the first indication that the Israeli-made device was being field tested by the U.S. military. The photos — posted on the Defense Visual Information Distribution Service — showed special operators at the al-Tanf base in [...]"

1,000 Drones Celebrate China HIT's 100th Anniversary

By The Editor on Jun 09, 2020 06:04 am

June 7, 2020 marked the 100th anniversary of Harbin Institute of Technology (HIT) in China. To celebrate the school's century of excellence, 1,000 drones lit up the night sky in a dazzling performance. Harbin Institute of Technology (HIT) was established in 1920 in Harbin, Heilongjiang, China. In 1954, HIT became one of China's first six [...]"

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday, June 24, 2020 | 11:00AM - 12:00PM Eastern Time

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin.

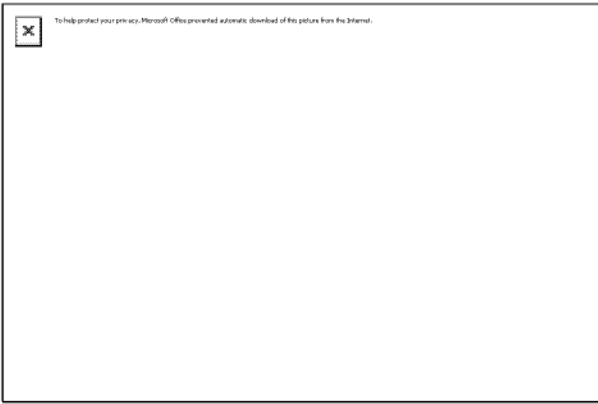

Join us for this free webinar as we discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high quality, consistent data
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

PODCAST PREMIER

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

LISTEN

Dear Vern,

Thank you for your continued commitment to supporting the DRONERESPONDERS Public Safety Alliance – the world's fastest growing 501(c)3 non-profit program supporting public safety UAS.

Today, is the premier of our new *DRONERESPONDERS UAS for Public Safety and Fire Rescue* podcast. I invite you to join me every other week via your favorite podcast network as I interview key figures and leaders within the public safety drone sector.

This week my DRONERESPONDERS podcast guest is Christopher Todd, Executive Director of AIRT (Airborne International Response Team), as we continue Part II of our conversation from the [TAMING DISASTER: Drones for Good](#) podcast that debuted last week. Mark your calendar for June 24 when I will be speaking with the Chula Vista (California) Police Department about their *Drone as a First Responder* program.

Please don't forget that our Spring 2020 Public Safety UAS Survey is still open. If you have not yet completed the survey I ask that you take a few moments to share your thoughts about the present state of public safety UAS. You can access the survey at survey.droneresponders.org

I appreciate your continued support of the DRONERESPONDERS program. Please feel free to contact me with any questions or comments you may have.

Respectfully,

Chief Charles Werner (ret.)
Director, DRONERESPONDERS
charles@droneresponders.org

PUBLIC SAFETY UAS SURVEY CLOSING SOON!

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

START SURVEY

Dear Vern,

Thank you for your continued commitment to the DRONERESPONDERS Public Safety Alliance – the world's fastest-growing 501(c)3 non-profit program supporting public safety UAS.

I am pleased to report that the AIRT-DRONERESPONDERS [Spring 2020 Public Safety UAS Survey](#) has received an outstanding response and will be closing soon. If you have not yet participated in this short survey, I invite you to spend a few minutes to help us better understand the current landscape surround drone operations for public safety and emergency response -- especially considering the many current challenges facing public safety agencies across the U.S. and around the world.

We also launched the [DRONERESPONDERS: UAS for Public Safety and Fire Rescue](#) podcast series earlier this week. If you have not yet had a chance to listen to episode 001, I invite you to do so over the weekend when you have some extra time. For more information on our new podcast series, please visit droneresponders.org/podcasts

Please feel free to contact me if you have any questions or require more information about any of our initiatives. Again, I appreciate your continued support of the DRONERESPONDERS program!

Respectfully,

Chief Charles Werner (ret.)
Director, DRONERESPONDERS
charles@droneresponders.org

Sundance Media Group announces drone training reseller agreement with SYNEX

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

On June 3rd, Sundance Media Group (SMG) announced a partnership with SYNEX, a corporation that provides B2B IT services, to offer certified drone

training to organizations, including government agencies, across the U.S. Recent political events have ignited high demand for sUAS. 'We support 1,500 police departments as of now. Everyone needs drones,' says Zac Davis of Drone-Works, responding to an influx of new business requests over the past week.

Session of the Week

How Drones Are Revolutionizing The Transportation Infrastructure

In this session, Darshan Divakaran and Thomas Wells of NCDOT discuss examples of infrastructure inspections, disaster response, UAS Integration Pilot Program (UAS IPP), best practices, and lessons learned. Drones' aerial perspective and data collecting abilities make them a viable tool, offering benefits that range from on-site safety to remote monitoring.

WiBotic raises \$5.7 million for wireless drone chargers

WiBotic's kits consist of four components: a transmitter, an antenna coil, an onboard charger unit, and a receive antenna coil. The transmitter uses any available power to generate a high-frequency wireless signal, which travels through a coaxial cable to the antenna coil, where it produces electrical and magnetic waves. When a drone comes within range, the transmitter recognizes its charger unit and receiver coil and automatically ramps up to deliver the right amount of energy — through air, water, or other non-conductive materials.

Drones in Agriculture Worth More than \$5 Billion by 2025

The report says that drone in agriculture are expected to grow at a CAGR of 31.1% from 2019 to 2025 to reach \$5.19 billion by 2025. While there are some limiting factors in technology and regulations: “growing population and rising pressure on the global food supply, increase in venture funding for development of agriculture drones, growing e-agriculture or information and communication technologies (ICTs) in agriculture, rising automation in agriculture, growing emphasis on enhancing agriculture efficiency, and rising need for water conservation across the globe,” are contributing to the fast growth of the market, says Meticulous Research

FROM THE EDITOR

Greetings!

This week's newsletter focuses on dive deep into the various aspects and challenges of networked connectivity. From testing the abilities of 5G and developing KPIs for the drone industry to discussing how 5G can enable drone delivery to how we can maintain that connectivity in poor networked areas during critical law enforcement missions, connectivity is an important, multidimensional enabler of drone technology and all ties back into building that regulatory safety case that we often talk about. If you are interested in connectivity, each article and video feature is worth checking out this week.

Be well and stay safe!

The EU Funded 5G!Drones Research Project Is Testing, Validating, and Defining KPIs for the Future of the Drone Industry

By Danielle Gagne

This is part 1 of a multi-part series: As part of the 5G Public and Private Partnership (5G PPP), the 5G!Drones Project is being funded by the European Union's Horizon 2020 Research and Innovation Programme, the biggest EU research and innovation program to date with over €80 billion in funding. The project is made up of a large consortium of businesses located throughout the European Union and Switzerland (which is an affiliated country to the Program), and its members operate throughout the drone and telecom ecosystems. The project is working to test, validate, and define key KPIs for implementing 5G to not only test

and understand the capabilities of 5G, but to also define the business case for adopting this technology and the best process and standards for implementing it.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to any or all of the webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to "get back to normal" many companies have defined a new normal that is allowing them to survive and thrive. How exactly

have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what's at stake for any organization clinging to "the way we've always done it," how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

Wednesday June 24, 2020 | 11:00AM - 12:00PM Eastern Time

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

JUNE 11, 2020

[View in Browser](#)

Good morning. In today's AP Morning Wire:

- › George Floyd's brother pleads to Congress: 'Stop the pain.'
- › Statue toppled of Confederate president in Virginia.
- › Belgium faces bloodstained colonial past in Africa amid protests.
- › India wracked by virus wave; S. Korea battles resurgence.

TAMER FAKAHANY
 DEPUTY DIRECTOR - GLOBAL NEWS COORDINATION, LONDON

The Rundown

WWBT-TV VIA AP

'Stop the pain,' George Floyd's brother pleads to Congress; Confederate statue torn down in Virginia

George Floyd's brother, Philonise, urgently pleaded with Congress to “stop the pain” as lawmakers consider a sweeping law enforcement overhaul after the eruption of nationwide protests following Floyd's death in Minneapolis in police custody.

Choking back tears, he said he wants to make sure that his brother is “more than another face on a T-shirt, more than another name on a list that won’t stop growing,” Lisa Mascaro and Andrew Taylor report.

George Floyd Profile: In the Houston housing project where he grew up, he was respected as a man who spoke from hard, but hardly extraordinary, experience. He had nothing remotely like the stature he has gained in death, embraced as a universal symbol of the need to overhaul policing and held up as a heroic everyman. But the reality of his 46 years on Earth was both much fuller and more complicated. This deeply reported and compelling piece from Luis Andres Henao, Nomaan Merchant, Juan Lozano and Adam Geller is worth your time.

Confederate Statue Toppled: Protesters have torn down a statue of Confederate President Jefferson Davis along Richmond, Virginia’s famed Monument Avenue. The statue in the former capital of the Confederacy was toppled shortly before 11 p.m. Wednesday night. Richmond police were on the scene and videos on social media showed the monument being towed away as a crowd cheered,

Trump Analysis: President Donald Trump is increasingly leaning into many of the personal and policy instincts that helped him draw support from disaffected, largely white, Americans in 2016. Yet he appears to be falling out of step with the growing majority of Americans, including some of his supporters in politics, sports and pop culture, who see Floyd’s death as a searing inflection point in America’s fraught racial history, writes AP Washington Bureau Chief Julie Pace.

Lafayette Park: The Trump administration’s use of smoke bombs and pepper balls to expel civil rights demonstrators from near the White House has added a new chapter to the site’s storied history as a soapbox for social and political unrest. Protesters who attended the June 1 demonstration say the clash with police won't stop them from using the park as a stage to express their dissent, reports Deb Riechmann.

African American Employees: After protests over police brutality erupted across the country, The AP reviewed the diversity reports of some of the biggest companies pledging solidarity with their black employees as well as

the black community. It found that their efforts to recruit, maintain and promote minorities within their own ranks have fallen short, reports Sally Ho from Seattle. The #pulluporshutup campaign on Instagram has also been going viral since consumers began pushing companies to reveal the racial makeup of their corporate workforce.

AP PHOTO/VIRGINIA MAYO

World reckoning: Belgium forced to confront bloody colonial history; Floyd killing finds echoes of abuse in Africa

Few countries have a more bloodsoaked, racist and colonial legacy than Belgium. And few historical figures are more notorious than Leopold II, the king of the Belgians who held Africa's Congo as his personal property and may have been responsible for the deaths of millions of Congolese more than a century ago.

Yet across Belgium, his name is still found on streets and tunnels, and cities are dotted with his statues and busts. Now in the wake of George Floyd's death and global protests over institutionalized racism, a reckoning seems to be at hand, reports Raf Casert from Belgium.

Leopold II is increasingly seen as a stain on the nation where he reigned from 1865 to 1909. Demonstrators want to remove his name and image.

Africa's Police: Floyd's killing has drawn comparisons with police abuses in South Africa and Kenya. Even in the post-apartheid era, South Africans still fall victim to security forces that critics say resort to heavy-handed tactics, leading to hundreds of deaths in recent years. In Kenya, a police watchdog group says 15 people have been killed by officers enforcing a coronavirus curfew in the past three months. Gerald Imray in Cape Town and Tom Odula in Nairobi have this story.

AP PHOTO/MANISH SWARUP

South Korea fighting virus resurgence; India suffering intensive wave in capital and beyond

Once lauded around the world for how it tackled the outbreak, South Korea is now counting dozens of new cases in a resurgence mostly concentrated around the capital where half of the nation's 51 million people live. It's a stark warning for the rest of the world.

But government officials are resisting calls to reimpose stronger social distancing measures out of concern they'll hurt a fragile economy, reports Kim Tong-hyung from Seoul.

The Korea Centers for Disease Control and Prevention is issuing an urgent warning that the transmissions are getting harder to track. The virus is spreading quickly and unpredictably as people increase their activities and practice less social distancing.

India's Intensive Wave: Two and a half months of nationwide lockdown kept numbers of infections relatively low in India. But with restrictions easing in recent weeks, cases have shot up, raising questions about whether authorities have done enough to avert catastrophe.

The country has reported a record of nearly 10,000 new cases with health services in the worst-hit cities of Mumbai, New Delhi and Chennai swamped by the rising infections.

India's tally of positive cases has reached 286,579 so far, the fifth highest in the world, and 8,102 deaths, including 357 in the past 24 hours. Emily Schmall reports from New Delhi, where half of the city's hospital beds are already taken up by COVID-19 patients. One doctor has described the situation in the capital as a "ticking time-bomb."

Global Economy: The world faces the worst global recession in nearly a century and "long-lasting scars," the Organization for Economic Cooperation and Development has warned. In Europe, restrictions to fight the spread of coronavirus portend a bleak summer tourism season even as more nations announce plans to welcome visitors, Angela Charlton, Colleen Barry and Pablo Gorondi report.

Homes for the Disabled: An AP investigation reveals many homes for people with disabilities in the U.S. were ill-equipped to protect highly vulnerable residents from the pandemic. And while nursing homes have come under the spotlight, little attention has gone toward thousands of other facilities for people with disabilities, report Holbrook Mohr, Mitch Weiss and Reese Dunklin.

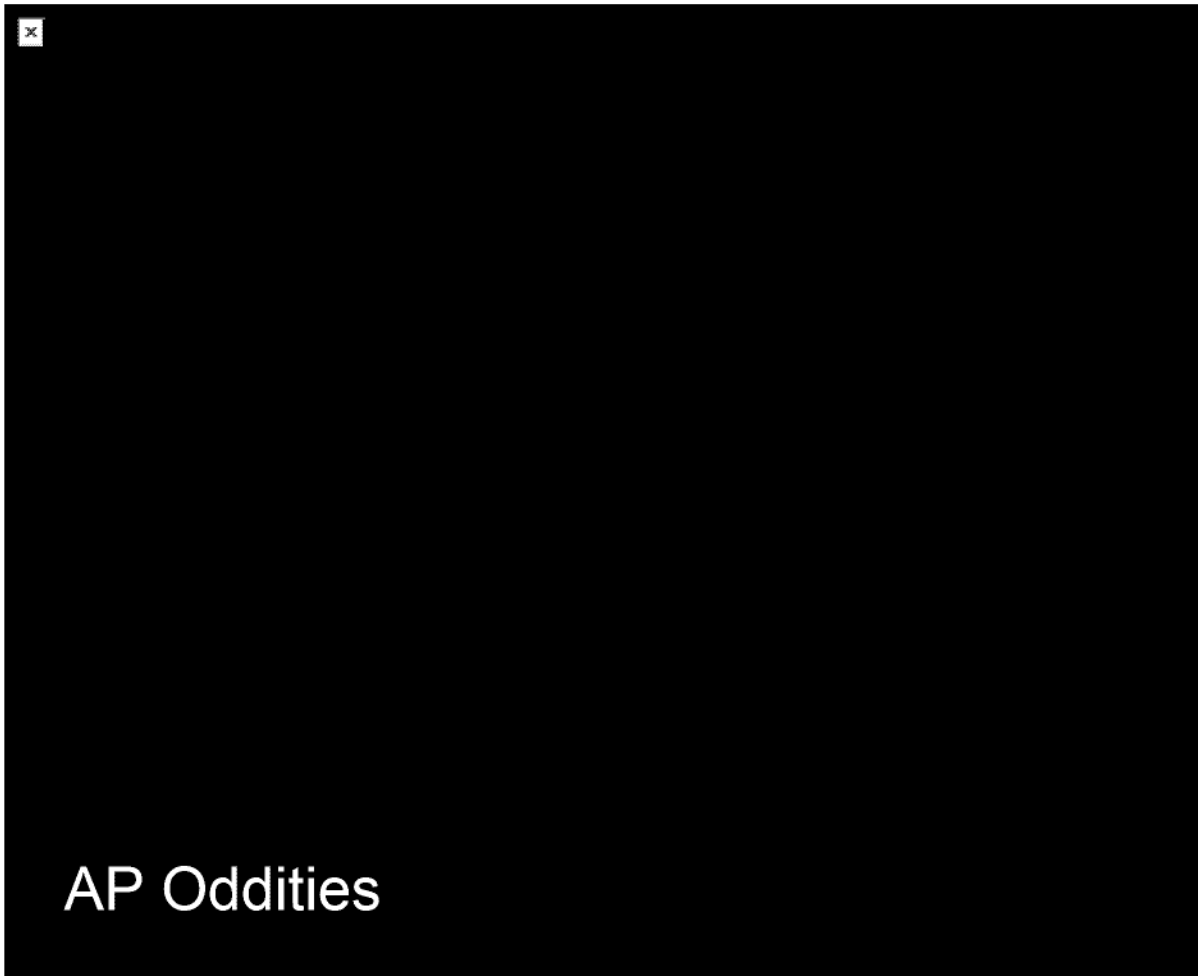

More from AP's Global and U.S. teams:

- **Iran's Iraq Influence:** Iran is struggling to maintain its influence over Iraqi militias since the killing of a top Iranian general and top militia leader in a U.S. drone strike in January. Iran's economy is being hammered by the combination of U.S. sanctions and the coronavirus epidemic. That is

straining the flow of cash to Iraqi militias, report Qassim Abdul-Zahra and Samya Kullab from Baghdad.

- **U.S. Small Cities**: Thousands of smaller cities and counties across the United States that were cut off from direct aid in the \$2 trillion coronavirus relief package are now pleading for a massive cash infusion from the federal government to help stave off financial calamity.
- **UK Deaths**: A scientist whose modeling helped set Britain's virus strategy says the country's death toll could have been cut in half if lockdown had been introduced a week earlier. Britain has the world's second-highest number of confirmed COVID-19 deaths at more than 41,000. Including cases where the coronavirus was suspected but not confirmed, the total is over 50,000.
- **Mexico City**: Mayor Claudia Sheinbaum says the capital will embark on large-scale coronavirus testing as the centerpiece of its plan to reopen its economy. That is diverging from the strategy of President Andres Manuel López Obrador's federal administration, which has shunned widespread testing as a waste of resources.
- **Is it safe to go swimming?**: The AP is answering your Viral Questions [here](#). Submit yours to: FactCheck@ap.org.

Follow all of **AP's Virus Outbreak coverage** [here](#).

Florida city known for mermaids now sleeps with the fishes

Florida Gov. Ron DeSantis signed legislation on Tuesday dissolving the city of Weeki Wachee. The city of only 13 residents was founded in 1966 to help put a mermaid attraction onto maps and road signs, according to the Tampa Bay Times.

Other Top Stories

Bodies found in Idaho are two kids missing since September

Relatives say the bodies of two children uncovered in rural Idaho are a boy and his older sister who have been missing since September. The bodies were discovered on the property of Chad Daybell, who married the children's mother, Lori Vallow Daybell. Both are behind bars. The case drew global attention with its ties to the Daybells' doomsday beliefs and the mysterious deaths of their former spouses.

AP PHOTOS: One year on, tumult of Hong Kong protests echoes

A year has passed since the beginning of anti-government protests in Hong Kong that brought hundreds of thousands of people into the streets of the semi-autonomous Chinese territory. While the demonstrations have all but died out, none of the underlying issues has been resolved, and a deep unease lies over the city as China moves to tighten its grip.

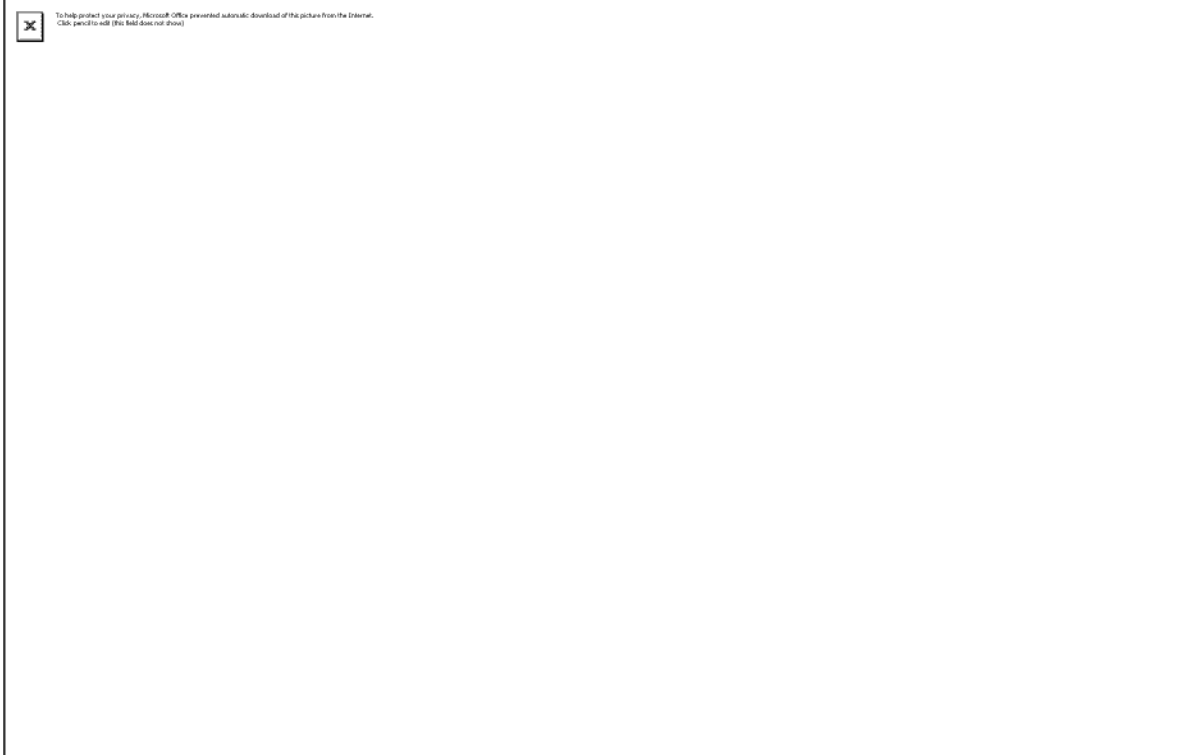

AP Review: Spike Lee's Vietnam pic is the right movie for right now

It's an understatement to say "Da 5 Bloods" feels like the right movie at the right time. Spike Lee's new Vietnam film for Netflix comes as America is facing a national reckoning over racism and police brutality. The AP review says that the film, both heist flick and social drama, highlights like no previous movie has the experience of black soldiers in the Vietnam War.

JK Rowling responds to critics over her transgender comments

"Harry Potter" creator J.K. Rowling says she refuses to "bow down" to criticism of her recent comments about transgender people. Rowling published a post on her blog website in response to the backlash and

expressed her concerns over “new trans activism.” She has been under hefty scrutiny about her thoughts on transgender identity from the LGBTQ community.

Subject: Are you observing drones over large crowds during protests?

Warning:
External
Email

Hello Vern,

We are Aerial Armor and we specialize in drone detection systems. We are contacting you today to understand if you need our support.

- Are you currently observing drones over large crowds during protests?
- Are drones being used to identify police resources, blockades, crowd management during protests?
- Are drones being used to monitor police activity during looting efforts?

As protests continue around the US, we are seeing a significant increase of drone use over large crowds of people and for other nefarious activities. There have been dozens of such events documented in social media and news outlets including arrests for reckless endangerment and confiscation of the drone. As we have drone detection deployments across multiple large cities in the US, we have been working with law enforcement to effectively track down pilots and pilot locations.

As such, we are currently offering a discount for the Aeroscope Mobile system to Law Enforcement agencies for the month of June. This Aeroscope Mobile is the most cost effective and robust system available today for under \$10k. Additionally, we are also offering short-term rental and lease options in the event that capital funds to purchase a system are not available to your department.

Please reach out if you would like more information or want to schedule a demo.

Respectfully,

Josh Strange

Sales and Marketing Manager

As protests continue around the US, we are seeing a significant increase of drone use over large crowds of people and for other nefarious activities. There have been dozens of such events documented in social media and news outlets including arrests for reckless endangerment and confiscation of the drone. As we have drone detection deployments across multiple large cities in the US, we have been working with law enforcement to effectively track down pilots and pilot locations.

As such, we are currently offering a discount for the Aeroscope Mobile system to Law Enforcement agencies for the month of June. This Aeroscope Mobile is the most cost effective and robust system available today for under \$10k. Additionally, we are also offering short-term rental and lease options in the event that capital funds to purchase a system are not available to your department.

Please reach out if you would like more information or want to schedule a demo.

Respectfully,

Josh Strange

Sales and Marketing Manager

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

Wednesday, June 10 | 11:00AM - 12:00PM ET

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. Superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Join us today for this free webinar and learn about the Dual Camera System from MicaSense which features 10 multispectral bands and opens the door for a broader range of use cases.

Top 5 Takeaways:

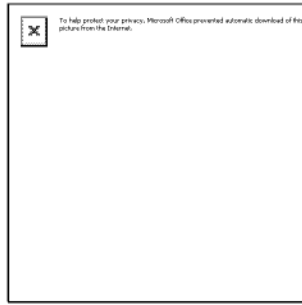

- Learn about the possibilities of mapping over water
- Discover the benefits of drone-based multispectral imaging
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations

Medical Delivery Drones Tested in Munich

By The Editor on Jun 10, 2020 06:58 am

Last week Quantum-Systems GmbH and laboratory Becker & Kollegen tested the transport of samples, by drone, from the mobile corona test station on the Theresienwiese to the Munich laboratory. Timely results may have major influence on chain of infection. Urgent samples must be delivered to the laboratory as quickly as possible. This is the case, for example, when a [...]

GA-ASI Exploits Additive Manufacturing

By The Editor on Jun 10, 2020 06:36 am

General Atomics Aeronautical Systems Inc (GA-ASI) is looking to expand the application of metal and non-metal components created using additive manufacturing (AM) processes across its unmanned aerial vehicle (UAV) product lines to seek further production efficiencies. "GA-ASI is approaching AM holistically and strategically by dedicating team members, facilities, R&D [research and development] funding, software, and [...]

Tracking New Zealand's Flightless Parrot by Drone

By The Editor on Jun 10, 2020 06:33 am

Birdwatching drones are taking to the skies of New Zealand to help

scientists track the endangered kākāpō, which teeters on the brink of extinction. A few hundred years ago they were one of New Zealand's most common birds before being hunted, killed by introduced pests and losing their forest homes to farming. Now there are only 211 [...]

Thermoplastic Components Flight Tested on Bell V-280

Valor

By The Editor on Jun 10, 2020 06:28 am

GKN Aerospace delivered a pair of thermoplastic composite, induction-welded Ruddervators and two compression-moulded Access Panels manufactured from reused thermoplastic waste material to Bell in June 2019. The newly installed components have now flown more than 12 hours on V-280 test flights, including during the recently completed autonomous flight testing. The Bell test pilots were happy [...]

Taiwan's Navy Upgrades Drone Fleet

By The Editor on Jun 10, 2020 06:17 am

The Taiwanese military announced that in response to the January 2019 drone crash and other mechanical failures, its entire fleet of Albatross unmanned aerial vehicles is to be upgraded. To prevent future crashes, the National Chung-Shan Institute of Science and Technology (NCIST) has developed what it is calling the "Albatross Unmanned Aircraft Systems (UAS) Disappearance Source Management [...]

Kirby, Vern,

Good afternoon guys, Dean Attridge from STRAX Intelligence LLC.

I am pleased to announce that I have recently signed an agreement with the UK Drone Manufacturer Evolve Dynamics LLC to represent their products in the US.

I was thinking of your program in relations to its role and feel that you may find the Sky Mantis a very good fit. The Sky Mantis is in service with multiple Public Safety agencies in the UK and was built specifically for this role.

Sky Mantis has a full 1 hour endurance (independently assessed) with its combined Thermal and 30x Zoom camera onboard. It features very high weather resistance (IP55 & 45mph wind), with a Hot droppable Tether system (still with 30 min endurance).

Given the nature of your operations out in Chula Vista it maybe a platform you are interested in ? We are offering the aircraft at a low introductory price for the first 10 units in the US.

Dean

B-DUBS...

STAY IN YOUR LANE!

Sports bar giant, Buffalo Wild Wings has started to look into the idea of delivering food via drone. This comes as they are trying to find new and innovative ways to deliver food amidst this ongoing pandemic.

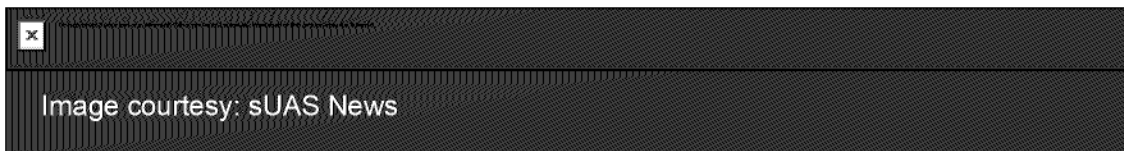

Our question is, “Does adding wings to a multi rotor increase or decrease efficiency?” This (terrible) joke is brought to you by our CEO, Matt Sloane.

B-Dubs have enlisted the help of a relatively new company, Deuce Drones. “30-All Drones” must have been taken. Team members for the

newcomer include one of the founders of Napster and a couple of graduating Aerospace Engineers from MIT, so they've got some interesting talent on their roster. Let's hope the drop system cuts the mustard. Er... bbq sauce. Advantage, condiments. We'll show ourselves out.

THE ANSWER IS, "THIS IS NOT JUST A TOY, BUT A TOOL FOR MANY INDUSTRIES."

WHAT IS A DRONE, ALEX?

So it isn't quite Jeopardy or Wheel of Fortune, but it is a game show hosted by a drone company, so we're getting there. Microdrones is a company that created a surveying software for drones that is used in mining, construction, oil & gas, precision agriculture, and obviously surveying industries. They currently have offices on 6 continents, so we apologize to our readers in Antarctica.

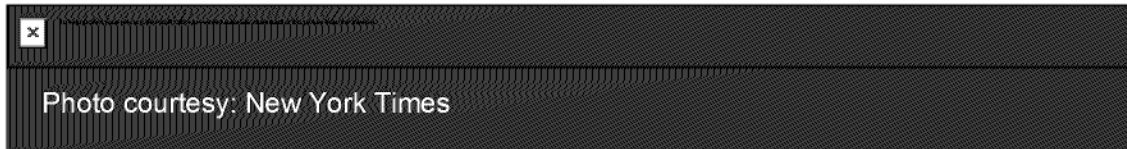

The game show will test 4 teams' knowledge of surveying information and trivia over the course of 3 rounds, and you all can play at home for the chance to win some Microdrones swag. If you're interested, the show airs today at 11am ET. So it's just like all other game shows, you can only watch it if you're home sick for the day!

Our team will consist of Dan Parker, Director of Industrial Services... and that's it. We all wanted to be there, we promise Dan, there's just so much to do around the house, and socks to fold.

BUTTERFLY IN THE SKY,

MY DRONE CAN FLY TWICE AS HIGH!

Kids these days have it so easy. THEY DON'T EVEN HAVE TO GO TO THE LIBRARY ANYMORE. They just walk outside, a drone flies up and drops off the books they need to read for the summer. Unbelievable.

In all seriousness though, the program being run in Christiansburg, Virginia by Wing and the Montgomery County Public School District is really creating a buzz in the drone world. Wing is the drone delivery company within Alphabet, Google's parent company.

The program involves delivering books to students to prevent any more people going out and exposing themselves unnecessarily during the COVID-19 pandemic. The books can't weigh more than 3lbs, but we imagine War and Peace isn't on anyone's summer reading list. The drones Wing is using can fly for 12 miles and reach speeds of almost 70mph. A lot of the citizens of Christiansburg probably don't even realize this program is going on due to Wing already delivering other items in the area. They are all probably used to the sound, and in for a rude awakening if a swarm of bees makes it that way.

Hey STAC Members,

I wanted to share some good news. Skydio teamed up with Chula Vista PD and the San Diego UAS IPP Team to get a "Close Proximity, Low Altitude" BVLOS waiver, allowing CVPD to fly out of site on emergency tactical operations.

We will be putting out a press release and a blog post more broadly (first paragraph and link below), just wanted you all to get the news first:

"Today, we are thrilled to celebrate the Chula Vista Police Department's new Close Proximity, Low Altitude (CPLA) waiver to enable Beyond Visual Line of Sight (BVLOS) missions in emergency situations. This waiver is the result of months of collaboration on patrol drone operations, ground risk reduction, and policy innovation between the CVPD, the San Diego UAS Integration Pilot Program, and Skydio, and will enable CVPD to fly entire new categories of missions to keep their community safe. We are honored to have played a role in advancing the entire field of public safety drones with the help of Skydio's revolutionary autonomy capabilities. In this blog post, I will shed some light on the process of securing the waiver, explain the new permissions, and highlight some of the ways the waiver will improve drone operations in Chula Vista and potentially your community." ([Link to Blog](#))

All the best,
Fritz

New Drone Regulations Facilitate Dubai Sky Dome

By The Editor on Jul 06, 2020 06:45 am

His Highness Sheikh Ahmed bin Saeed Al Maktoum, President of the Dubai Civil Aviation Authority (DCAA), said the issuance of Law No. (4) of 2020 by His Highness Sheikh Mohammed bin Rashid Al Maktoum, Vice President and Prime Minister of the UAE and Ruler of Dubai, regulating the operations of unmanned aerial vehicles (UAV) or [...]

4 Houthi Drones Targeting Saudi Arabia Downed

By The Editor on Jul 06, 2020 06:43 am

The Arab coalition intercepted and destroyed four explosive-laden drones launched by the Houthis in the direction of the Kingdom on Friday. The drones were destroyed in Yemeni airspace, Saudi Press Agency quoted Arab coalition spokesperson Col. Turki Al-Maliki as saying. He added that the coalition has efficient capabilities and is able to address such threats [...]

Arrests in Spain for Smuggling Autopilots to Pakistan

By The Editor on Jul 06, 2020 06:37 am

Police in Alicante, Spain, have detained two people accused of smuggling operations estimated at up to four million euros. The plot was dedicated to the smuggling of dual-use material and technology. Specifically, material that illegally reached Pakistan's military companies. Among that material was technology used for missile guidance. The action of the General Information Police [...]

Shark-Detecting Drones Replace Helicopters in

Australia

By The Editor on Jul 06, 2020 06:33 am

The New South Wales Government has announced its new \$8 million strategy to protect beachgoers from sharks this year, investing in improved drone technology and the continued use of SMART drumlines at high-risk locations. Up to 80 drones will be deployed, equipped with advanced technology that detects the size and species of sharks. Agriculture Minister [...]

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Sharon Rossmark is the CEO of Women And Drones, the premier global platform featuring women who are disrupting, innovating and shaping the future of the drone industry. She is also a FAA Certified Drone Pilot. In 2018, 2019 and 2020 the company was listed as one of the "Top 100 Companies To Watch" in the drone industry.

Kashmir Rose Pandolfi is a drone test pilot at Kashmir Robotics and has Mentored at Teachers Take Flight, Fly for Conservation, and SuperHERo drone workshops at Kashmir Academy. Kashmir is the only test pilot at Kashmir-Robotics with a perfect record of successful test flights.

La'Quata Sumter is the Electrical and Computer Engineering Program Chair/Instructor at Albany Technical College. She is the founder of Focusing On Me, Inc.(501c3) and Focusing On Me Droneworks, LLC. As a STEM/STEAM philanthropist and educator she, wants to find a way to encourage STEM careers and education to the next generation.

Meghan Salter is a National Board Certified Elementary Teacher in Huntington, West Virginia. Meghan has been incorporating drone technology into her curriculum since 2015. In 2019, Meghan was named the Education Honoree for Women to Watch in UAS by Women and Drones. Meghan was also recently named the 2021 Teacher of the Year for Cabell County Schools.

This presentation will cover:

- The importance of introducing younger students to drone technology
- Challenges of integrating drones into elementary schools
- How to keep students engaged in learning concepts when they are not flying
- Perspectives from a nine-year-old drone pilot on what kids can learn from building a drone
- Advice for teachers, parents and students who do not know anything about drones
- ...and much more!

Iran's top security and intelligence commander was killed on Jan. 2 in a drone strike at Baghdad International Airport that President Trump authorized. Maj. Gen. Qassim Suleimani was the architect of nearly every significant operation by Iranian intelligence and military forces over the past two decades, claiming the lives of hundreds of Americans in Iraq.

General Suleimani's killing propelled the U.S. to the precipice of war with Iran and plunged the world into seven days of roiling uncertainty. Online searches for "will there be a draft?" soared.

Earlier this week, Iran issued an arrest warrant for Mr. Trump and 35 others it says were involved in the general's killing. Interpol, an international police organization, said it would not step in. — *Remy*

Doug Mills/The New York Times

2. Less than a week into the new year, John Bolton announced that he would be willing to testify in the Senate impeachment trial of President Trump.

It was a tantalizing prospect. Mr. Bolton, the former national security adviser, above in 2019, was privy to the inner workings of the White House. He was said to be deeply troubled by Mr. Trump's efforts to pressure Ukraine, and had even written a memoir that, when it was finally released months later, divulged, as promised, much of the inside story.

The possibility of his testimony — and of an outcome that wasn't a party-line acquittal — hung over the trial for weeks. But Republicans, who had endured countless hours of damaging testimony during the House investigation, had no interest in changing the rules of the trial to allow new witnesses.

The Senate voted against hearing from Mr. Bolton, and days later voted to acquit Mr. Trump. — *Tom Wright-Piersanti, Briefings editor*

Jordan Gale for The New York Times

3. From the beginning, it was always Joe Biden.

Sure, his chances of winning the Democratic presidential nomination looked shaky after devastating early defeats in Iowa, New Hampshire and Nevada. But his staunch support among Black voters powered a comeback in South Carolina. The one-two-three punch of support from Pete Buttigieg, Amy Klobuchar and Beto O'Rourke led to blowout victories on Super Tuesday, effectively spelling the beginning of the end of the competition.

Still, a primary field more than two dozen strong was nothing if not historic. The most women ever to run for president. The biggest age gap. The most racially diverse field. The first openly gay major presidential candidate.

But after three years of President Trump, Democratic voters proved themselves to be tired of the unprecedented. In 2020, the pragmatic outweighed the possible. — *Lisa Lerer, political reporter*

Tolga Akmen/Agence France-Presse — Getty Images

4. It was the breakup heard around the world.

Prince Harry and Meghan delivered a jarring blow to Britain's royal family when they announced on Jan. 8 that they would "step back" from their official duties. It was an extraordinary retreat by the couple, who had grown increasingly isolated within the House of Windsor since their wedding in 2018.

The couple did not originally have the queen's approval for their plan to become part-time royals, and went rogue to get ahead of a leak. A deal with Buckingham Palace, which included giving up their royal titles, became official on March 31. Above, their last royal appearance.

They now live in Los Angeles with their son, Archie. — *Remy*

Jenna Schoenefeld for The New York Times

5. Kobe Bryant's death in a helicopter crash plunged the N.B.A. — and seemingly much of the world — into a state of mourning that persists among the many fans and fellow athletes who idolized him.

The former Los Angeles Lakers star, 41, and his 13-year-old daughter, Gianna, were among nine people who died in the Jan. 26 accident, which occurred in foggy conditions on a hillside outside of Los Angeles.

Public memorials sprang up overnight, including one in the plaza outside Staples Center, the arena where Bryant had crafted so many singular moments for the Lakers over the course of his 20-year career. — *Scott Cacciola, N.B.A. reporter*

Brittainy Newman/The New York Times

6. A landmark #MeToo victory.

On March 11, Harvey Weinstein, the glorified producer who for years dominated Hollywood, was sentenced to 23 years in prison for sex crimes, effectively putting the 67-year-old behind bars for the rest of his life.

His sentencing capped a sharp downfall for the once-powerful media mogul that started in October 2017 when several women openly accused him of sexual assault and harassment, and fundamentally altered the perception of sex crimes and power dynamics. — *Alisha Haridasani Gupta, gender reporter*

Victor Moriyama for The New York Times

7. It first appeared in The Times on Jan. 6 as a “mysterious, pneumonialike illness” that had sickened a few dozen people in Wuhan, China.

Days later, Chinese researchers identified the source as a coronavirus. Two weeks later, the virus was on the front page of The Times as China scrambled to contain the contagion.

Then, time seemed to accelerate. Once-in-a-generation events began erupting one after the next.

Professional sports leagues around the world suspended seasons. Stocks plunged and a bear market emerged after 11 years in bull territory. The World Health Organization declared the virus a global pandemic. President Trump cut off travel from Europe.

And that was just March 11.

More than 10.9 million people have been sickened worldwide and more than half a million have died. Above, gravediggers in São Paulo, Brazil. In the U.S., the country hit hardest by the virus, a surge in new cases shows that the outbreak is spiraling out of control. And from what we can tell, the virus will most likely be with us for some time. — *Jonathan Wolfe, Briefings writer*

8. A pandemic does strange things to the economy.

The sharp, sudden drop in activity has produced one of the deepest recessions in history, and also perhaps the shortest. Indeed, it may already be over: The upswing in May and June, measured against the depths of March and April, make a range of economic indicators look as if they are soaring.

But compared with a year earlier, those same numbers reveal an economy that remains deep in a hole, with millions of jobs destroyed and billions in sales lost. The damage done will take a long time to repair, and reopenings that have been paused or rolled back may make things worse. — *Jason Karaian, DealBook editor*

9. Everything from work to theater moved online.

Sex work and sex content make an intriguing leading indicator about where both work and entertainment consumption are going.

This year we saw that our unhappy surprise always-at-home culture made opportunities of all kinds, for the kind of professional streaming sex performers pictured above, amateur dancers and entrepreneurs alike.

That will trickle down! Contributing strongly to that? More and more time spent online, the vast majority of that in apps. If you're not watching TikTok and Instagram and listening to podcasts in the ways that we used to watch CBS and read Condé Nast magazines, the world is leaving you behind, sir or madam! (Fair, that may be a good choice.) — *Choire Sicha, Styles editor*

10. Which brings us to the current national unrest.

On Memorial Day, a graphic video captured the police killing of a Black man suspected of using a counterfeit \$20 bill. What followed may be the largest movement in U.S. history.

George Floyd died after a white officer knelt on Mr. Floyd's neck for more than eight minutes, ignoring his pleas of "I can't breathe." The phrase has been a part of scores of deaths in police custody, but this time, national outrage crested over the use of deadly police restraints and the treatment of African-Americans, sparking a deep examination of the country's racist past and present.

It manifested in Black Lives Matter protests around the world, including the one above in New York City, with chants of Mr. Floyd's name along with Breonna Taylor, Ahmaud Arbery, Rayshard Brooks and more; in corporate companies confronting enduring forms of racial discrimination; in the removal of statues and Confederate flags; and in police reform.

"A truly great country does not ignore or excuse its sins. It confronts them and then works to make them right," Nikole Hannah-Jones wrote in *The Times Magazine* in her case for reparations. "If we are to be redeemed, if we are to live up to the magnificent ideals upon which we were founded, we must do what is just."

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police" movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

On Thu, 14 Nov 2019 at 11:25, CB Films Research <research@cb-films.tv> wrote:

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Vern Sallee

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

Elbit Systems Hermes 900 StarLiner

By The Editor on Jul 03, 2020 06:53 am

Elbit Systems has built the Hermes 900 StarLiner—a UAV that is fully compliant with NATO's Standardization Agreement known as STANAG 4671. It can be integrated into NATO members airspace and certified for civilian airspace. The StarLiner was announced in 2018 and, like most complex hi-tech large drones, it must go through rigorous paces to meet the needs [...]

FLIR Gets \$10M US Marines R80D SkyRaider Contract

By The Editor on Jul 03, 2020 06:27 am

FLIR Systems, Inc. announced it has been awarded a \$10 million contract to deliver dozens of its SkyRaider Unmanned Aerial Systems (UAS) to the United States (U.S.) Marine Corps. Developed for U.S. defense and federal government customers, the FLIR R80D SkyRaider is the company's most advanced military UAS. The aircraft's long-range, high-resolution EO/IR imaging sensors [...]

Drone Video of Blue Whale Under Boat off San Diego

By The Editor on Jul 03, 2020 06:18 am

Drone footage recorded on June 19 captured a curious blue whale swimming close to a boat off of the coast of San Diego. Local whale watcher Domenic Biagini, owner of Gone Whale Watching, recorded the video and said the whale decided to check out the boat, unprompted. “We’ve been lucky to see blue whales almost every [...]

Landscape Architects Use Drones to Collect Geospatial Data in the Galápagos

By The Editor on Jul 03, 2020 06:15 am

Accurate geospatial data is needed to plan and design coastal resilience efforts. Landscape architects use elevation representations to understand flooding, storm surges, and sea level rise. But what happens when there is no unified elevation data? Karen M’Closkey, ASLA, an associate professor at the University of Pennsylvania, discovered this was the case for the Galápagos [...]

The Federal Aviation Administration and the Switzerland Federal Office of Civil Aviation Announce Harmonization of Drone Safety Standards

By Juan Plaza

Swiss companies like Involi have been introducing new technologies that allow FOCA to advance the cause of UTM to a point where it's almost ready to be the first country to deploy a workable commercial airspace capable of handling manned and unmanned vehicles in coexistence. Now the FAA will be the beneficiary of all these advances and the tests that made them a workable solution.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to watch any or all of the On-Demand webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging

technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts

how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

On-Demand

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design

- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

The Impact of Regulation and Law on the Drone Industry

Thursday, July 23 | 11:00AM - 12:00PM ET

The drone industry has had to contend with a number of legal and regulatory challenges that have impacted everything from how far, where, and when we can fly to where our equipment can originate from. From regulatory bodies to local, regional, tribal, state, and federal governments, safety, privacy, and security are paramount concerns when it comes to giving the green light for advanced operations like flights over people, night flights, and beyond visual line of sight. How various sectors within the industry have viewed and addressed these concerns have largely defined and will continue to define how we have been able to move forward as an industry. With law and regulations being such an omnipresent aspect of our industry, Commercial UAV News has gathered together a panel of industry leaders for an in-depth discussion on how legal and regulatory requirements have shaped and will continue to shape our industry.

GA-ASI Conducts Japan Coast Guard Validation Flights

By The Editor on Jul 09, 2020 06:58 am

General Atomics Aeronautical Systems, Inc. (GA-ASI) announced that it will partner with Asia Air Survey (AAS) to hold a series of validation flights for the Japan Coast Guard (JCG) featuring GA-ASI's SeaGuardian beginning in mid-September. The purpose of the flights is to validate the wide-area maritime surveillance capabilities of RPAS for carrying out JCG's missions, including [...]

FAA and Switzerland to Harmonise UAS Safety Standards

By The Editor on Jul 09, 2020 06:40 am

The US Federal Aviation Administration (FAA) and the Switzerland Federal Office of Civil Aviation announced that they have reached an agreement in harmonizing domestic and international safety standards for Unmanned Aircraft Systems (UAS). This agreement builds on U.S and Swiss efforts to ensure that the fastest growing and broadest segment of aviation is integrated safely, efficiently [...]

Flight Paths Help Pinpoint Malicious Drone Operators

By The Editor on Jul 09, 2020 06:28 am

Academics from the Ben-Gurion University of the Negev (BGU) have demonstrated a potential means of being able to pinpoint the location of operators. In a research paper, “Can the operator of a drone be located by following the drone’s path?,” published this month, the research team explored how analysis of flight paths may be useful in [...]

NUAIR Validates AVSS Drone Parachute Recovery System

By The Editor on Jul 09, 2020 06:18 am

Following vigorous testing, completed in collaboration with NUAIR, the drone parachute recovery system by Aerial Vehicle Safety Solutions (AVSS) for the DJI M200 series has been validated as compliant with industry standards. The parachute recovery system (PRS-M200) is a safety product for unmanned aircraft systems (UAS) which automatically deploys a parachute if the drone malfunctions [...]

WEBINAR INVITATION

AIRT-DRONERESPONDERS

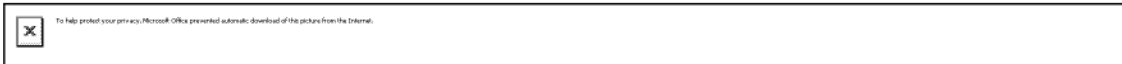

Member's Virtual Briefing

Spring 2020 Public Safety UAS Survey

Data and Key Findings

Monday, July 13

12:00 p.m. Eastern

RSVP Now for the AIRT-DRONERESPONDERS Survey Data Briefing on 7/13!

RSVP

- 1) What is the impact of COVID-19 on public safety UAS program budgets?*

- 2) Will public safety agencies be purchasing drones in 2020?*

- 3) How dependent are public safety UAS programs on grant funding?*

- 4) Is the FAA meeting the needs of public safety drone programs?*

- 5) How concerned are public safety UAS programs about data security and pending U.S. Congressional legislation that may impact their operations?*

Join Christopher Todd, Executive Director of the Airborne International Response Team (AIRT) and Chief Charles Werner (ret.), Director of DRONERESPONDERS, to learn the answers to these questions and much more as they unveil the data and key findings from the AIRT-DRONERESPONDERS Spring 2020 Public Safety UAS Survey in a special virtual briefing on Monday, July 13 at 12:00 p.m. Eastern for registered

DRONERESPONDERS members.

Data and key findings will be presented via Zoom Webinar with Q&A. There is no cost to attend this webinar. [Please register](#) to attend.

5 Things You Need to Know About Surveying with a Drone

Wednesday, July 15, 2020 | 11:00AM - 12:00PM ET

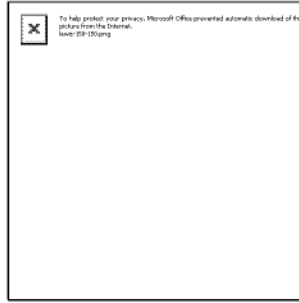

There is a lot of information out there about surveying with a drone but weeding through what this means and what is best for your operations can be a challenge. Commercial UAV News is bringing together a group of surveying experts to get their nuanced and in-depth take on what they think is the most important thing to know about surveying with drones from choosing the right hardware, provider, and software for the job to delivering a high-quality product.

PERSONAL/PRIVACY

I've been contacted by a professional filming company who want to use a drone at a private residence for some filming. Is there any special permit for drone usage? I know they need a filming permit and the property owner's written permission, but didn't know if PD has any specific requirements for drone use. He wants to film this Thursday so I'd appreciate a quick response if you can. Thanks,
Diane

Emesent launches autonomy for Beyond-Line-of-Sight underground drone flight

New beyond-line-of-sight technology will increase safety and efficiency in mining, construction, and disaster response

Brisbane, Australia, 13 July 2020 — Emesent, a drone autonomy company, today announced a major breakthrough in the journey to fully autonomous flight systems, with the launch of Autonomy Level 2 (AL2) for Hovermap, the world’s first plug-and-play payload for industrial drones that provides autonomous beyond line of sight, GPS-denied flight.

Building on Emesent’s cutting-edge Hovermap simultaneous localisation and mapping (SLAM) autonomous flight system, AL2 enables compatible drones to fly beyond communications range and venture beyond line of sight into unmapped areas. The AL2 technology enables companies to rapidly map, navigate, and collect data in challenging inaccessible environments such as mines, civil construction works, telecommunications infrastructure, and disaster response environments.

Andrew Rouse, Chief Technology Officer at PYBAR Mining Services, said: “AL2 is a game changer for us. It takes Hovermap into places that even the most experienced pilots would fear to venture, enabling us to obtain critical data in real time without risking the machine. We’re already seeing great benefits to our workflow and operational efficiency from using the new technology.”

Emesent’s technology builds on a decade of award-winning research by CSIRO’s Robotics and Autonomous Systems group into drone autonomy and 3D LiDAR-based SLAM techniques. Customers around the world have been using Hovermap’s Autonomy Level 1 capability for almost two years, safely mapping challenging GPS-denied areas within line of sight.

Moving to AL2 means the drone can self-navigate and avoid obstacles beyond line of sight, while being operated from take-off to landing from a safe distance. The system processes data on-board in real time to stream a 3D map of the environment back to the operator’s tablet, providing instant and detailed insights into the surrounding area, as well as any potential hazards. The entire mission from take-off to landing is conducted by interacting with the live view 3D map, allowing stopes to be mapped with just a few taps.

AL2 will give industrial customers:

- **Improved safety**, with the ability to fly beyond line of sight keeping workers away from hazardous environments and better data insights informing how to make mines and other environments safer
- **Cost optimisation** as it is quicker to scan environments and the technology requires less skill to operate
- **Reduced downtime**, with the drone able to quickly and easily map inaccessible underground excavations with minimal disruption to production
- **Enhanced visibility** into environments, with real-time point clouds delivered directly to the pilot’s tablet, enabling them to interact with and explore the scan data as they operate the aircraft

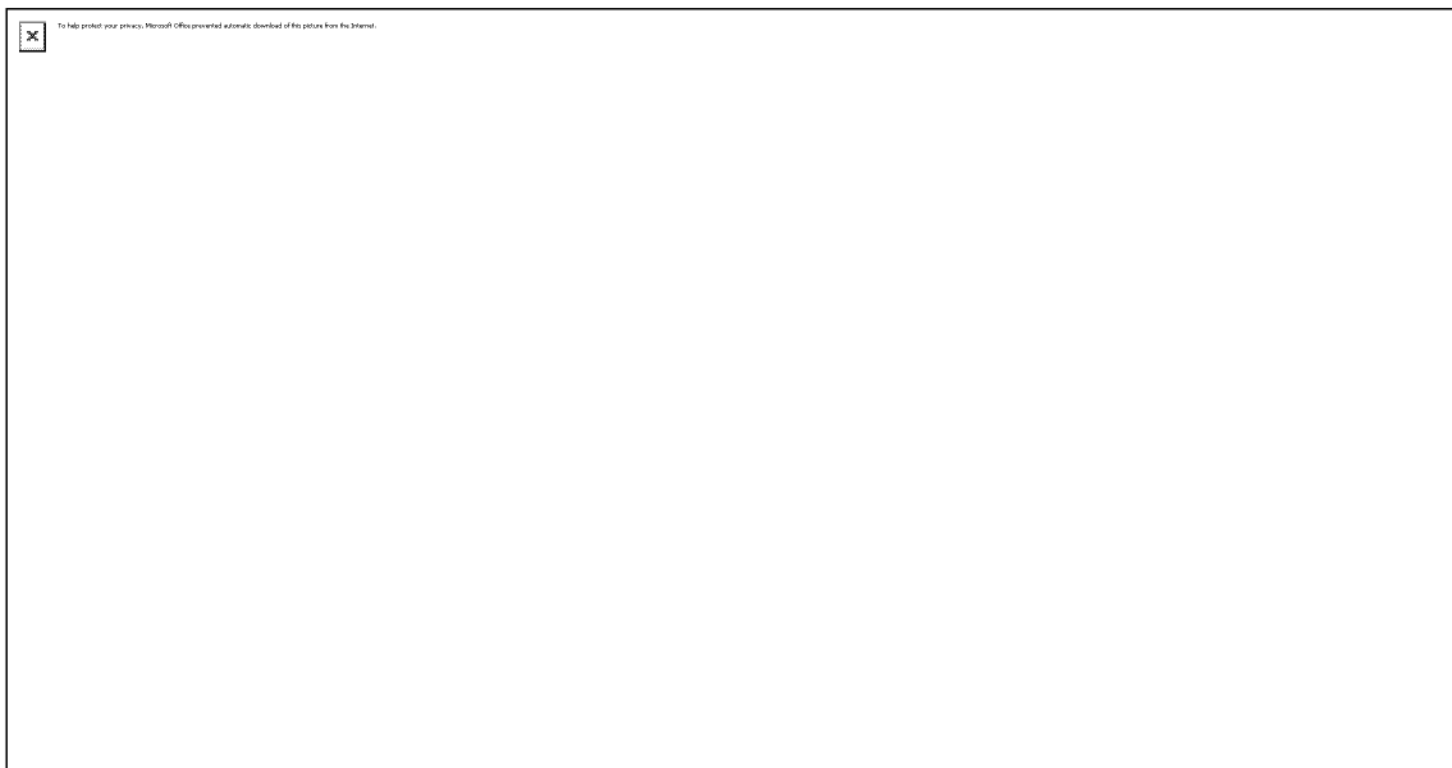

- **Ease of operation** due to its “Tap-to-Fly” and “Guided Exploration” functionalities, and various failsafes, including automatic return to home on low battery and automatic landing at critical battery level

AL2 is currently compatible with a number of DJI Enterprise drones including the new DJI Matrice 300 RTK. Emesent has worked closely with DJI to ensure close compatibility and integration of autonomous functionality such as AL2 with the drone’s flight controls. Further compatibility with other drone models is planned following the launch.

It is the next step towards the vision of fully autonomous drones in challenging GPS-denied environments that will eventually see drone missions executed at the press of a button, without any assistance from an operator.

Dr Stefan Hrabar, CEO and co-founder of Emesent, said: “This is a huge step forward for drone autonomy and a massive benefit to industries like mining, civil construction, and emergency response. With the intelligence to navigate environments without a prior map, customers can use the system to carry out complex missions, secure the safety of personnel, and drive greater efficiency in their operations.”

FIND OUT MORE

An example of a scan showing a slope, with the white line indicating the drone’s flight path.

About Emesent

Emesent is a world-leader in drone autonomy, LiDAR mapping, and data analytics. Founded in 2018, it has since built a reputation for delivering high-quality data capture in the mining, infrastructure, survey and mapping industries. Emesent's flagship product, Hovermap, is a smart mobile scanning unit that combines advanced collision avoidance and autonomous flight technologies to map hazardous and GPS-denied environments. Hovermap can be handheld, drone-or vehicle-mounted to map challenging, inaccessible areas. With a wide range of applications, Hovermap is being used by customers around the world.

NEWS UPDATE

SPECIAL WEBINAR INVITATION PUBLIC SAFETY UAS SURVEY DATA STARTS IN 30-MINUTES!

12:00 p.m. Eastern

JOIN US FOR TODAY'S OFFICIAL DATA RELEASE

REGISTER NOW

AIRT News Update for Monday, July 13, 2020

Good Morning Vern Sallee,

Today, we are releasing the survey data from the [AIRT-DRONERESPONDERS Spring 2020 Public Safety UAS Survey](#). I would like to invite you to join Chief [Charles Werner \(ret.\)](#), Director of [DRONERESPONDERS](#), and me for our complimentary webinar that starts at 12:00 p.m. Eastern Time today to learn how the latest public safety UAS trends and key findings will affect Chula Vista Police Department for the remainder of 2020. [Registration](#) is required for this event.

We also continue our podcast series [TAMING DISASTER: Drones For Good](#) with the release of episode 004 featuring guest [Gemma Alcock](#), of [Lowland Rescue](#) and also [SkyBound Rescuer](#), each located in the United Kingdom. You can tune in and listen via your favorite podcast channel as Gemma and I discuss her research, new projects, and the evolving role of drones in aerial search and rescue operations -- or, you can click on the links at the bottom of this email.

I also invite you join me this week at the [Energy Drone+Robotics Virtual Summer Summit](#) as we connect with representatives from the world's top energy and utility companies to explore how unmanned systems are revolutionizing operations across key business functions. I'll be co-hosting a special breakout session on Wednesday, July 15 at 1:00 p.m. Eastern / 12:00 p.m. Central time to discuss the role of UAS for emergencies and disasters. I hope you can be a part of our conversation!

Finally, you will also want to save the date for another must-attend webinar that is coming up next week. DRONERESPONDERS will be collaborating with [AiRXOS](#), part of GE Aviation, to launch the first webinar episode in the DRONERESPONDERS Technology Series: [A Faster Way to Fly Safe - Compliance When You Need It, presented by AiRXOS](#). It will take place on Thursday, July 23 from 2:00 - 3:00 p.m. Eastern Standard Time. AiRXOS will be debuting ***Air Commander***, an exciting new Public Safety UAS Solution packaged in a mobile platform. To learn more and reserve your spot, please visit the [registration page](#).

As always, thank you for your continued support of AIRT and our many initiatives supporting Drones For Good and the use of UAS by public safety and emergency services agencies around the world. Please stay safe!

Sincerely,

Christopher Todd
Executive Director

WEBINAR INVITATION

AIRT-DRONERESPONDERS

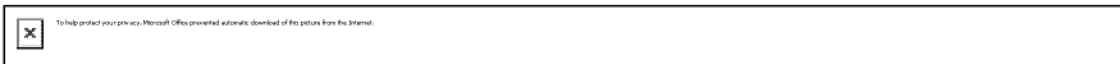

Member's Virtual Briefing

Spring 2020 Public Safety UAS Survey

Data and Key Findings

Monday, July 13

12:00 p.m. Eastern

RSVP for the AIRT-DRONERESPONDERS Survey Data Briefing at Noon Eastern

RSVP

- 1) *What is the impact of COVID-19 on public safety UAS program budgets?*
- 2) *Will public safety agencies be purchasing drones in 2020?*
- 3) *How dependent are public safety UAS programs on grant funding?*
- 4) *Is the FAA meeting the needs of public safety drone programs?*
- 5) *How concerned are public safety UAS programs about data security and pending U.S. Congressional legislation that may impact their operations?*

Join [Christopher Todd](#), Executive Director of the [Airborne International Response Team \(AIRT\)](#) and Chief [Charles Werner](#) (ret.), Director of [DRONERESPONDERS](#), to learn the answers to these questions and much more as they unveil the data and key findings from the AIRT-DRONERESPONDERS Spring 2020 Public Safety UAS Survey in a special virtual briefing on Monday, July 13 at 12:00 p.m. Eastern for registered

DRONERESPONDERS members.

Data and key findings will be presented via Zoom Webinar with Q&A. There is no cost to attend this webinar. [Please register](#) to attend.

RSVP NOW

Europe Creates a €5M Labyrinth to Manage Low-Level Drone Operations

By The Editor on Jul 13, 2020 06:55 am

This June saw the launch of the European LABYRINTH project. The aim of LABYRINTH is to build on the high optimisation potential for the management and supervision processes of unmanned aerial systems to optimise drone traffic, and thus enhance and encourage its use in high-density areas. LABYRINTH will focus on providing a drone traffic service to [...]

Parrot and Hoverseen Offer Drone-in-a-Box Solutions

By The Editor on Jul 13, 2020 06:32 am

Parrot announced that it is partnering with Hoverseen, a French automatic drone solution provider. Through this partnership, enterprises can now use Parrot ANAFI drones as an automated, drone-in-a-box surveillance solution capable of dispatching and charging itself from a lightweight docking and recharging station. Parrot's ANAFI, ANAFI Thermal and new ANAFI USA drones offer an ultra-compact [...]

Russia's Orion Gets Gunship's Navigation System

By The Editor on Jul 13, 2020 06:14 am

The Orion advanced reconnaissance and surveillance drones received the navigation system of the Mi-28NM helicopter that is capable of operating autonomously, the press office of Radio-Electronic Technologies Group (KRET) reported. The strapdown inertial navigation system produced by specialists of the Ramensky Instrument-Making Factory (part of KRET) is designated to determine an object's location, comprehensively process [...]

Good morning, Captain Sallee,

Hope all is well with you and that you and your family are having a nice summer.

Can I trouble you for help (and to contact) Roman C (email below), who has some questions about flight paths and whom to contact?

Thank you very much for all that you and your department does to keep us safe. And congratulations on the recent FAA decision - that is a testament to your excellent management of the drone program.

Sincerely,

Jill Galvez

Hey STAC Members,

The Skydio Team wanted me to forward this on to you all..especially about the pending announcement/release on Monday..have a great weekend:

Hello from the team at Skydio. It's been an amazing week celebrating the new CPLA Waiver in Chula Vista. A few quick updates for you guys:

- 1.
2. **Press on the CPLA.**
3. People are rightly excited about the new waiver! Here is some coverage just
4. from the past few days: [KPBS](#),
5. [CBS8](#),
6. and [NBC](#)
7. San Diego.
- 8.
- 9.
10. **More in our blog.**
11. Fritz wrote a summary of the COA process that I hope you'll find helpful!
12. Here's a [\(link\)](#).
- 13.
- 14.
15. **More updates**
16. **coming.** Stay tuned to Skydio.com on Monday. We've been hearing many of your requests -
17. thermal, longer range, folding arms, a better controller, and more. If you've ever wished Skydio would bring that to market, we think you'll like what we're announcing on Monday.
- 18.

Be safe out there, and thanks for all you do.

The Skydio Team

--

Fritz Reber

Skydio-Head of Public Safety Integration

WEBINAR INVITATION

 To help protect your privacy, Microsoft Office prevented automatic download of the picture from the Internet.

Join our webinar Thursday, July 16th, 2:00pm EST to learn about AiRXOS' Public Safety UAS Solution – a comprehensive UAS solution curated to enable the rapid drone deployment required for emergency response without compromising on safety or compliance!

AiRXOS, part of GE Aviation, introduces their new Public Safety UAS Solution – your single source for all the integrated, connected tools you need for near real-time Situational Awareness (SA), faster, precise location-based advisories, and flight authorization to help get you flying quickly and in compliance with FAA regulations. Fully operational in a mobile platform, AiRXOS' Public Safety Solution is designed with maximum efficiency and safety built-in, eliminating the need for multiple applications, labor-intensive flight authorizations, and limited operational visibility.

The Public Safety Solution also includes:

- Automated airspace alerts and advisories
- Automated regulatory and policy compliance
- Video streaming capability
- Low Altitude Authorization and Notification Capability (LAANC) service
- Agency-wide operational SA
- Authenticated end-users
- Digitized public engagement
- Remote identification (Remote ID)*

**Pending final FAA approval*

As part of their solution, AiRXOS will demonstrate *Air Command*, a mobile application that offers emergency responders a complete, turn-key drone program. See how Air Command provides public safety agencies with automated SGLs, COAs, LAANC, Waivers, and Advisories so you can fly quickly and safely when seconds count.

Subject: FW: County NRP Grant Application

Hi Genevieve,

Regarding Chula Vista Police Foundation's NRP grant application, attached is the requested information:

1. CVPF Resolution – County NRP funding
2. CVPF IRS designation
3. Attorney General Proof of Eligibility
4. Secretary of State Proof of Eligibility

Please let either me or Becky know if you need any other information.

Thanks,

Jonathan Alegre

Chula Vista Police Foundation, Chief Financial Officer

Pakistan to Produce Locust-Countering Drones

By The Editor on Jul 15, 2020 06:45 am

Pakistan's Ministry of Science and Technology and Abn Satuma (Pvt) Ltd have signed a MoU for development of UAVs/drones for agriculture applications. The drones will specifically be used for countering locust attacks. Federal Minister Fawad Chaudhry represented the Ministry of S&T at the signing ceremony. He said this is the first time drone technology will [...]

Importance: High

Good afternoon Timothy,

It was a pleasure chatting with you. I was able to work with the Chief to rearrange her schedule so she is available to participate on the panel on the 21st (0700 PST).

She has a conflict for the briefing call for this Wednesday at 1000 PST but can make it at 1100 PST if that works. I am copying her assistant, Cathy Miller to work out the details with you, including links for both meetings. Let me know if I can be of further assistance.

Best regards,
Vern

Hi Vern,

I apologize for the slow response as I have been on vacation for the last week. Thank you for offering to participate in the panel. We are trying to diversify a bit by having a senior level woman join the panel, which unfortunately right now is entirely composed of men. Do you think Mayor Salas might be available to speak on this topic and more broadly on the challenges facing the Chula Vista community related to COVID? Thank you again for your help, and have a wonderful July 4th holiday.

Best regards,

Timothy

On Jun 24, 2020, at 6:43 PM, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hello Timothy,

On behalf of Chief Kennedy, thank you very much for the kind invitation. The Chief is honored to be invited to participate, however, she is unavailable during the proposed scheduled time and sends her regrets to you and to Jay Merkle. She did, however, say that I could substitute on her behalf as CVPD's drone program manager if that is still of benefit to your panel. I have presented nationally and internationally, alone and with Chief Kennedy and industry leaders on the topic of public safety drones and I could speak authoritatively on the topic. If that works for you and Jay, I'd be happy to participate.

Warm regards,
Vern

Dear Vern,

The FAA and World Economic Forum are cohosting an online event on how drones are being used as part of COVID response in the USA, and we would like to invite Chula Vista Police Chief Roxana Kennedy to join us as a panelist. The session is taking place on July 21 at 10 ET and will be moderated by Jay Merkle, Executive Director, UAS Integration Office at Federal Aviation Administration.

I have attached an overview of the session. I know our audience would love to hear more about the great work that Chula Vista PD has been doing using drones to reach out to vulnerable populations on staying safe during the pandemic. We hope she will be able to join us, and please let us know if you have any questions.

Best wishes,

Timothy

Back to Propeller Heads!

QUADS AND VTOL, THAT'S OUR TEAM

STEP INSIDE THE PARTY, DISRUPT THE WHOLE SCENE

That's one small step for man, and one 980 foot leap for drone-kind. NASA has come out with a "Helicopter" that they intend to send to Mars to just hop around in 2021. Ingenuity is its name, and other world flight is its game.

The aircraft will be sent to Mars onboard a rover where it will be launched on the foreign surface. It will be pretty much autonomous flight, but will be able to send data back to earth via radio waves. Only a few commands will be sent to Ingenuity before each flight and after that, it's up to the engineering. The craft will be able to fly roughly 10-15 feet off the martian surface and remain airborne for about 90 seconds. In comparison, the first manned flight was only 12 seconds long on some sand dune in North Carolina. Take that Wright Brothers!

If only Wilbur and Orville had a \$23 million budget, and the greatest minds in the field working on their airplane, maybe they wouldn't have had to sink to selling popcorn.

SO EASY, A MONKEY CAN DO IT

WELL, APE.

Well, there are no longer any excuses for anyone who says flying a drone is too difficult for them. The POC for this mission is not Bubbles, the famous chimp owned by Michael Jackson but rather a rescued chimp named Sugriva at Myrtle Beach Safari in SC. His brother Vali is running the battery swaps for the mission.

The organization isn't just overflowing with money that they can give a \$1200 drone to the apes to mess around with. The original post by Kody "Tiger Guy" Antle, said they were sending the drone for conservation purposes to Africa, where they would use it to watch over the last remaining 900 mountain gorillas in the Bwindi Impenetrable Forest. Before you do your own research, yes... Kody Antle is Doc Antle's son.; aka the crazy guy from "Tiger King". Wait... That's not specific enough. The one that rides around on an elephant with all the girlfriends.

Back to the original reason we're here. Drones have become so easy to fly recently, that there is effectively no barrier to operating one, other than the price, but even that has started to diminish recently. For the first time, we're seeing more affordable drones come out and it's allowing more people to realize the benefits of flying drones.

Hi All,

We at Skydio are very excited to share a several new product announcements we are making today as part of our expanded strategy for enterprise and public sector:

- 1.
2. [Skydio](#)
3. [X2](#), the new family of drones that combine Skydio's world leading autonomy with a new foldable, easy to transport airframe and the new
4. [Skydio](#)
5. [Enterprise Controller](#). Available starting in
6. Q4 2020
- 7.
8. New
9. software solutions to simplify inspections and situational awareness workflows:
10. [Skydio](#)
11. [Autonomy Enterprise Foundation](#),
12. [Skydio 3D Scan](#),
13. and [Skydio](#)
14. [House Scan](#).
- 15.

Meet Skydio X2. Built for business. Ready for duty.

Skydio X2™ is a new family of products that pairs breakthrough autonomy software with a ruggedized airframe with folding arms for easy “pack and go” transportation, a thermal camera, and up to 35 minutes of flight time. X2 is equipped with six 4K

navigation cameras for 360 degree obstacle avoidance and a dual sensor payload that includes 12MP color and 320x256 LWIR sensors. See full specs [here](#).

Designed, assembled, and supported in the USA, X2 will initially be available in two configurations:

-
- **Skydio**
- **X2D:** Built to meet the Short-Range Reconnaissance (SRR) requirements for the U.S. Army. Ideal for reconnaissance, search and rescue, security patrol missions.
-
-
- **Skydio**
- **X2E:** Optimized for enterprises, first responders, and civilian agencies. Ideal for situational awareness and asset inspection.

Skydio Enterprise Controller: Provides simple, robust and precise control over X2, with a built-in touchscreen, glove-compatible controls, and extended range up to 6.2 kilometers.

Want to learn more about the **new enterprise capabilities**? Reach out to us below:

New AI-skills for situational awareness and inspection automation

You know Skydio as the world-leader in autonomous flight technology. We're augmenting our AI-powered autonomy engine embedded into every drone with a several software solutions that will help automate data gathering for situational awareness and asset inspection use cases:

-
- Skydio
- Autonomy™ Enterprise Foundation:
- enhances Skydio's Core Autonomy system with powerful pilot-assist capabilities that make every flight safer and more efficient for everyone from novice to expert operators. Features include:
- **360 Superzoom**
- situational awareness at 360 degrees with 100x digital zoom, **Precision**
- **Mode** for maximum control while performing detailed inspections in challenging,
- GPS-denied environments, and **180**
- **Vertical View**
- to capture images while the drone looks straight overhead.
-
- Skydio

- 3D Scan™:
- The first of its kind general-purpose digital scan software for inspections
- of complex industrial structures and locations, such as bridges, building facades, energy infrastructure, accident and crime scenes, 3D Scan is powered by a new real-time visual 3D reconstruction layer built on top of Skydio Autonomy.
-
-
- Skydio
- House Scan™: Residential roof-top scanning software to enable fully autonomous capture of precision imagery by home insurance agents. Delivered through
- EagleView.
-

You can learn more about these enterprise autonomy skills [here](#).

Hey STAC Members...I'm sure you saw the news but in case you didn't:

<https://www.skydio.com/pages/skydio-x2>

I know there are a lot of questions around pricing and availability that frankly I can't offer clarity on just yet.

For SALES assistance: There are some of you whose agencies are in a position and need/can buy the X2 right away (as soon as it's available). For those, I want to point you to the sales/enterprise team that can begin that process right away.

https://support.skydio.com/hc/en-us/requests/new?ticket_form_id=360004313713

Of course, in the meantime feel free to continue to reach out to me for more general info, questions, input related to public safety drone operations and how Skydio 2 and X2 can meet your needs.

Best,
Fritz

Session of the Week

Counter-UAS (C-UAS) Solutions – When Drones Are Not Welcome

In the commercial industry, drones are commonplace, but what about when they're not welcomed around an airport, prison, or stadium? This panel discusses current counter-UAS (C-UAS) solutions, including the use of software to detect aerial intrusions, and acoustic technology to pick up an incoming drone into a protected area.

Hello Vern Sallee,

Thank you for registering for the following Webinar:

Topic: The Impact of Regulation and Law on the Drone Industry
 Date: Thursday, July 23, 2020
 Time: 11:00AM-12:00PM Eastern Time
 Event number: 127 420 6462

 To join the online event

1. Go to <https://divcom-events.webex.com/divcom-events/onstage/g.php?MTID=ee89a2239af4525d169d704dac65c58b6>
2. Click "Join Now".

You can view and listen to the webinar through the above link; providing you have speakers on your computer. If you do not have access to speakers, please use the call-in number that will be provided once you login to view the Webinar.

 To join the teleconference only

Call-in toll number (US/Canada): 1-650-479-3208
 Global call-in numbers: <https://divcom-events.webex.com/divcom-events/globalcallin.php?serviceType=EC&ED=605221107&tollFree=1>
 Toll-free calling restrictions https://www.webex.com/pdf/tollfree_restrictions.pdf
 Access code: 127 420 6462

STOP - Make sure you test your connection before joining the Live Webinar!

If you are having issues connecting to WEBEX, please call them at 1-866-229-3239 and quote the WEBEX ID number above. Wireless internet will work ok, but for optimal sound and video quality, we recommend that your internet connection be wired versus wireless.

Test link - <http://www.webex.com/lp/jointest/>

System Requirements – http://support.webex.com/support/system-requirements.html?_nfpb=true&_pageLabel=SystemRequirementsHome

**FROM THE EDITOR**

Greetings!

One of the leading concerns for U.S.-Based drone services (as well as other countries around the globe) has been legislation within the federal and state governments concerning foreign drone technology, particularly technology from China. Over the past several weeks, a number of high-profile companies have focused on providing the enterprise with American-made and/or American-friendly drone options. Companies such as Parrot, Black Swift Technologies, CIRC, and now Skydio are all providing options for those affected by current policies. It is hopeful to see global and U.S.-based companies addressing the concerns and needs of the industry, providing alternative options and much-needed diversity in drone platforms.

These events only goes to point out just how dynamic and forever changing this industry is...as most technological disruptors are. So, as legal and regulatory questions, concerns, and advancements continue to move forward and change, I am looking forward to our next webinar, "The Impact of Regulation and Law on the Drone Industry" being held Thursday, July 23rd 11:00AM - 12:00PM Eastern Time. Industry experts in law and regulations from Skydio, Iris Automation, Airspace Link, and Hidden Level will come together to discuss a variety of legal and regulatory topics impacting our industry. I hope to see you there!

You can register for the free webinar [here](#).

Skydio Launches a New Family of Commercial Drones Designed, Assembled, and Supported in the USA Along with \$100 million in Series C Funding

By João Antunes

Designed, assembled, and supported in the USA, the Skydio X2 features a ruggedized airframe with folding arms for easy “pack and go” transportation, a thermal camera, and up to 35 minutes of flight time. Equipped with six 4k navigation cameras for 360-degree obstacle avoidance, and a dual-sensor payload that includes 12MP color and 320x256 LWIR sensors, the X2 includes Skydio Autonomy and a new enterprise-grade Skydio Enterprise Controller with a built-in touch screen, glove-compatible controls, and a new wireless system to extend range up to 6.2 kilometers.

In addition to the new drone, Skydio also introduced X2 and S2-compatible Enterprise Skills to simplify inspections and situational awareness workflows: Skydio Autonomy Enterprise Foundation, Skydio 3D Scan, and Skydio House Scan.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to watch any or all of the On-Demand webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a

panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

On-Demand

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

Subject: Drone Session with WEF | Chula Vista PD Timeline, information, Toplink Account

Warning: External Email
--

Greetings Chief Kennedy's Team,

Below you'll find important timeline, information, and direct link to the Medicine from the Sky Session as part of the Global Technology Governance Summit with the World Economic Forum. We're excited to have Chief

Kennedy on this panel. There may be one additional panellist from Novant Health Systems – mentioned on today’s call. When that is confirmed we will update the session structure and resend.

Prior to this session, please click the link below to Toplink to create an account. Please let us know the email address for Chief Kennedy so we can create the appropriate account preparation to enable her to create an account. If you have an account already (and are therefore ready for the session), you will be taken to the session landing page and no further action is necessary. If you do not, you will be asked to make a Toplink account.

Please join the session by clicking “**Join online meeting**” on the [TopLink session page](#)

We look forward to what will be an excellent session!

Time	Agenda
15:30-16:00	Production Team Arrives
15.45 – 16.00 (CET) 9.45 – 10.00 (EST) 6.45 – 7.00 (PST)	<p>Speakers arrive for pre-session discussion</p> <ul style="list-style-type: none"> • Session host tests speakers’ audio-visual set up • Moderator and session host review session flow with speakers
15.55 – 16.00 (CET) 09.55 – 10.00 (EST) 6.55 – 7.00 (PST)	<p>Pre-Session arrival of participants</p> <ul style="list-style-type: none"> • Speakers review their notes and finalize prep, muted without video • Participants arriving early will be shown a holding slide
16.00 – 16.15 (CET) 10.00 – 10.15 (EST) 7.00 – 07.15 (PST)	<p>Session begins for all attendees</p> <ul style="list-style-type: none"> • Session is recorded • Speaker videos are turned on and visible to attendees

Please let me know if you have any questions or concerns.

Best,

Harrison Wolf

Dear Cathy,

That is indeed very frustrating and we certainly apologise on our end. @toplinksupport can you please ensure that Cathy Miller is able to register for Captain Roxanna Kennedy ASAP. This is critical as she is our speaker for tomorrow's Medicine from the Sky session. Please see below the error screen that Ms. Miller is getting.

We will be getting back to you very shortly and are very appreciative of your patience!

Best Wishes,
 Courtney

WEBINAR INVITATION

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Join our webinar Thursday, July 23rd, 2:00pm EST to learn about AiRXOS' Public Safety UAS Solution – a comprehensive UAS solution curated to enable the rapid drone deployment required for emergency response without compromising on safety or compliance!

AiRXOS, part of GE Aviation, introduces their new Public Safety UAS Solution – your single source for all the integrated, connected tools you need for near real-time Situational Awareness (SA), faster, precise location-based advisories, and flight authorization to help get you flying quickly and in compliance with FAA regulations. Fully operational in a mobile platform, AiRXOS' Public Safety Solution is designed with maximum efficiency and safety built-in, eliminating the need for multiple applications, labor-intensive flight authorizations, and limited operational visibility.

The Public Safety Solution also includes:

- Automated airspace alerts and advisories
- Automated regulatory and policy compliance
- Video streaming capability

- Low Altitude Authorization and Notification Capability (LAANC) service
- Agency-wide operational SA
- Authenticated end-users
- Digitized public engagement
- Remote identification (Remote ID)*

**Pending final FAA approval*

AiRXOS will also demonstrate a **NEW** mobile application that offers emergency responders a complete, turn-key drone program. See how AiRXOS provides Public Safety agencies with automated SGIs, COAs, LAANC, Waivers, and Advisories so you can fly quickly and safely when seconds count.

Iran Rebuilds Downed US Navy Global Hawk

By The Editor on Jul 20, 2020 06:58 am

Information about the U.S. Navy's RQ-4A Global Hawk shot down by Iran on June 20, 2019, continues to surface a year on. The carcass of the aircraft has been largely pieced together by Iran, in the manner of an air accident investigation. The way it was done, and the reasons, are likely to be very [...]

Drone Irrigation Technology in Africa

By The Editor on Jul 20, 2020 06:38 am

Nathan Zecks Mazvazva, a 25-year-old farmer in Zimbabwe, stands in his sugarcane field, marveling at a recent savings of 60% on irrigation costs. And sugarcane is just part of Mazvazva's property in Zimbabwe. He owns nearly 500 acres, growing green beans to green peppers. Simply put, technology—more specifically, drones—is making his livelihood more cost efficient.

**GUIDE TO
THE UAS
CERTIFICATION
PROCESS**

REGISTER FOR THIS FREE WEBINAR!

Thursday, July 30, 2020

There's no arguing the spike in drone industry growth over the last few years. The drone services market is expected to grow from \$4.4 billion in 2018 to \$63.6 billion by 2025! Drone manufacturers and Unmanned Aerial System (UAS) providers across the globe are developing custom-made and industry-specific solutions for business and customer needs.

Time Is Running Out Don't Miss This FREE 60-Minute Live Webinar

13 17 58 29
DAYS HOURS MINUTES SECONDS

REGISTER TODAY!

If you are interested in **Drone Package Delivery, FAA Drone Type Certification (TC), and/or FAA Drone Production Certification (PC)** – This webinar is for you!

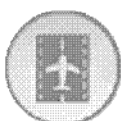

Register Today So You, Your Organization And Team Can...

Gain a fuller understanding of the UAS Part 135 certification and the TC/PC process

Learn the **5** Distinct Phases and **3** Gates in the certification process

Avoid the pitfalls that could prevent or delay organizational excellence

REGISTER TODAY!

Whether you're new to the UAS drone industry or have wealth of experience, this insightful webinar will outline the business and FAA regulatory challenges to help you and your organization fly safely in the national airspace.

Great to hear from both of you! Thanks for the intro Vern.

Capt. Reber,

Good to "meet" you as well. As you said, we have an application in, and my drone guy has a Zoom call scheduled with Guillaume Delepine tomorrow at 1:30pm. I have an email about that I now see that you are cc'ed on. This is exactly why I reached out to Vern, wanted to make sure that we weren't wasting time going in separate directions. I'm happy to see that all paths have come together and we're all on the same page. We look forward to hearing more about your product. I appreciate both of your time!

Stay well everyone,
Brian

Hey Brian,
Nice to meet you. I definitely have your application. Good to know that Vern is in the loop, I'll be reaching out soon, feel free to call anytime to catch up.
Best,

Fritz

Hi Brian,

Great to hear from you! I'm looping you in with Fritz Reber with Skydio. Fritz is a friend and retired CVPD captain. He runs Skydio's public safety program and should be able to help you out. I believe he may still have some to distribute.

Fritz, Captain Hoiberg is an N.A. buddy from North Brunswick Twp Police Department, N.J. and is interested in your public safety program and I believe already has a request in. Would you mind reaching out to him on the process?

Best,
Vern

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Subject: Free Skydio Public Safety Drone program

Good afternoon 270 friends, I hope all is well with each of you during these difficult times.

A friend and former colleague of mine works for Skydio and runs their Public Safety Emergency Response Program. Skydio is giving public safety agencies 100 Skydio 2 public safety drone kits to agencies for use in the COVID crisis. These kits are valued at about \$2,200 so they could add real value to your agency's drone program. Skydio would love to get a drone to at least one agency in each state in support of public safety COVID response strategies and he would be glad to prioritize our friends in 270.

If you are interested in having your agency receive a free drone kit, fill out the application on the Google Form below. There is a portion where you fill in a short narrative on how you plan to use the drone during COVID-19. If you put "NA270" in the narrative, he can do a word search through the applications and will try and prioritize donating a drone to your agency. Also, if you reply to me individually after you have submitted your application, I'll give him a heads up so he looks for it specifically. Of course, with over 200 folks in our class, not everyone can get one, but I hope it can be of use to those who receive them. I'm not sure about our friends with International agencies at this time, but I'm sure it would not hurt if you filled out the request as well.

Warmest regards,
Vern

Vern Sallee
 Patrol Operations Division Captain
 Chula Vista Police Department

Armenia Displays \$150M Worth Azeri Drones Shot Down in Border Clashes

By The Editor on Jul 23, 2020 06:55 am

Armenia's Defense Ministry displayed Israeli-made military drones of Azerbaijan shot down by its anti-aircraft units in last week's heavy fighting on the Armenian-Azerbaijani border. The Armenian military have destroyed or intercepted 13 such unmanned aerial vehicles (UAVs) during the clashes that broke out on July 12 and largely stopped five days later. It says that [...]

FlytBase & Fimas Aero to Provide Turnkey Solutions for Aerial Security Patrols in Saudi Arabia

By The Editor on Jul 23, 2020 06:36 am

FlytBase and Fimas Aero have recently partnered together, to combine FlytBase' cloud-connected solution and Fimas Aero's expertise in helping enterprises adopt drones. With a focus on the Middle East, the partners plan to deploy drone fleets for residential and commercial security, as well as public safety and disaster response. In light of current global events, [...]

QinetiQ Performs UK's First Airborne Manned/Unmanned Team Demonstration

By The Editor on Jul 23, 2020 06:17 am

QinetiQ recently demonstrated that a helicopter and drone can successfully operate as a team whilst airborne. The drone switches between independent and human-controlled reconnaissance according to Helicopter operator's commands. The demonstration took place on 19 June over the army ranges on Salisbury Plain, Wiltshire, in the UK and featured a manned helicopter and a semi-autonomous [...]

Virgin Atlantic Flight within 300 ft of Drone at Gatwick

By The Editor on Jul 23, 2020 06:01 am

A Virgin Atlantic flight with 455 passengers came within 300 ft of hitting a drone just seconds after taking off from Gatwick, a near-miss report reveals. The incident, which happened just days before the UK went into lockdown, came 15 months after the airport was closed for 30 hours and 1,000 flights were cancelled due [...]

Hello Vern Sallee,

Thank you for registering for the following Webinar:

Topic: The Impact of Regulation and Law on the Drone Industry
 Date: Thursday, July 23, 2020
 Time: 11:00AM-12:00PM Eastern Time
 Event number: 127 420 6462

 To join the online event

1. Go to https://divcom-events.webex.com/divcom-events/onstage/g.php?d=1274206462&t=a&EA=vsallee%40chulavistapd.org&ET=SDJTSwAAAARAOzgwYHU4GJmuae_BFbl-syUmARzZ8EDOOLO9aF2w4g2&ETR=SDJTSwAAAATCRzEaxIEKIZ-FDTN3DJMIGTQqdGx3wLfuN2uenpSJSw2&RT=MiMxMQ==&p
2. Click "Join Now".

You can view and listen to the webinar through the above link; providing you have speakers on your computer. If you do not have access to speakers, please use the call-in number that will be provided once you login to view the Webinar.

----- Join the audio conference only -----
 Call-in toll number (US/Canada): 1-650-479-3208 Global call-in numbers: <https://divcom-events.webex.com/divcom-events/globalcallin.php?MTID=eede8bc0c18229880b3d942138693e403> Access code: 127 420 6462

STOP - Make sure you test your connection before joining the Live Webinar!

If you are having issues connecting to WEBEX, please call them at 1-866-229-3239 and quote the WEBEX ID number above. Wireless internet will work ok, but for optimal sound and video quality, we recommend that your internet connection be wired versus wireless.

Syrian Regime Troops Captured a Black Hornet

By The Editor on Jul 22, 2020 06:58 am

A picture has emerged online reportedly showing members of the Syrian Arab Army holding a FLIR Systems Black Hornet 3 drone that they captured in the northeastern corner of the country. Variants of this pocket-sized helicopter drone have seen increasing use, including within the U.S. military, in recent years, as a way to give small [...]

Current State of Tech and Regulations: Enabling BVLOS UAS Flight for Long-Linear Infrastructure Inspection in the Energy Industry

Date: 4:00 pm EDT - Thursday, August 13th, 2020

Length: 45 minutes

[Add to Calendar>>](#)

[Register Now!](#)

For operators in the energy sector, there is an increasing need to fly longer distances and reduce operational costs for infrastructure inspection.

Learn about the latest technology enabling Beyond Visual Line of Sight (BVLOS) drone flight and the regulations that affect it.

Join us for a discussion with Jason Hardy-Smith, VP of Product at [Iris Automation](#), on the drone technology currently being used to

overcome the complex regulatory barriers that come with flying BVLOS.

Attendees will learn what to expect in applying for waivers and how some companies are already flying BVLOS for use cases like power line and pipeline inspections.

Presenter

Jason Hardy-Smith - VP of Product, Iris Automation

Jason Hardy-Smith is a proven Product Management executive with 20 years of experience defining and driving product strategies and roadmaps in technology industries. Jason has owned the end-to-end product lifecycle of successful first-to-market products for companies including Oracle, Blueroads, Brightidea and Isomorphic Software. He has built efficient, scalable, global product organizations from the ground up. In his current role at [Iris Automation](#), Jason oversees the development of technology enabling the safe implementation of BVLOS operations for UAS.

Chief Kennedy –

That sounds great, and completely understandable! We are planning to do these webinars monthly, so we can tentatively aim for an August or September date. I will follow up with you in July to assess the policing environment and see if we can figure out a solid timeframe. If you have any questions in the meantime, please let me know. Thank you, and stay safe!

Best,

Julie Malear

Hi Julie- we are happy to present, but hoping it is much later in summer. There are too many issues Chief's are facing right now to have the time to sit down for a webinar. I hope you understand.

Stay safe,

Roxana

Chief Kennedy and Captain Sallee –

I hope you are both doing well and staying healthy. Since we missed out on the opportunity to see your drone presentation at the IACP Division Midyear back in March, I wanted to touch base with you both to see if you would be interested in presenting this same topic as a webinar in the Midsize Agencies Division summer webinar series? The division is lining up a variety of topics to present as webinars while we are all in this virtual environment, and we think your drone presentation would lend itself well to this opportunity. Please let me know if you have any questions, as I am happy to talk through any and all details or logistics. Thank you, and stay safe!

Best,

Julie Malear

Hello Vern, it's time to set up your Virtual Braindate profile!

AirWorks is partnering with peer learning experts at e180 to help you form meaningful connections and have valuable conversations at AirWorks. Every registered AirWorks attendee will have access to Braindate. This is your opportunity to still meet "face-to-face" despite this year's event being virtual.

Book a braindate or post your own braindate topic to have one-on-one or group discussions (via video chat) with others on topics that matter to you!

Here are just some of the braindate discussions you can join:

- Drone Maintenance Practices in Public Safety
- Analysis of Aerial Data using AI//ML Techniques
- Matrice 300 RTK: Feedback/Experience with the platform, questions and feature requests

How it works:

1. Log into [Braindate at AirWorks](#) using your email address:
vsallee@chulavistapd.org
2. Create your profile.
3. Join braindate topics you find interesting on the topic market. Both one-on-one and group conversations are available.
4. Create your own topics so that others can join you for a braindate.
5. Meet up virtually on the Braindate Platform during Airworks!

Start Sharing Knowledge!

AirWorks Slack Forum Opens Today!

If you've opted in, you should receive an email from Slack by 5:00 PM PDT today inviting you to join the workspace. Don't miss out on the discussion! [Opt-in here](#) to join hundreds of drone industry professionals in the Forum.

The AirWorks Game

The AirWorks Game gives you an opportunity to earn points towards daily giveaways during the virtual event. To play, download the ScanHunt App for iOS or Android and enter the code **5DB58C** to get in on the fun! As a token of our appreciation for reading this far, here's another code to scan for points:

[HINT] We've also hidden two QR codes in Braindate for you. Head over to [Braindate at AirWorks](#) to find them!

We look forward to seeing you virtually in two weeks!

Warm Regards,

Denise Hibbard from the DJI Enterprise Team

DJI, 201 S. Victory Blvd, Burbank, California 91502

GIVEAWAY TIME (AGAIN!)

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Well the time has finally come. Our giveaway with W.S. Darley & Co. for a DJI Inspire 1 v2 starts today! A winner will be selected on September 22nd, so until then it's the Wild West up in here!

To lay down some ground rules, everyone gets one entry, but you have the chance to win some swag with our new referral system. "How do you get these fancy referrals, Mr. Writer man?", you may ask. All you have to do is share this newsletter with friends and tell them to put your name as who referred them when they sign up. Once you've got 5 friends signed up, that's when the goodies start rolling in.

For 5 referrals you get one of our shiny new holographic stickers for your drone, or your case, or your face! We don't judge. A step up with 10

referrals, you get one of our new challenge coins! Look at that subtle coloring. The tasteful thickness. It even has a watermark. BUT, only our most avid sharers will receive a “Propeller Heads” t-shirt! You have to have 15 referrals for one of these bad boys, but you’ll be a part of something bigger than yourself. You’ll immediately feel better than those around you. You’ll be washed over with confidence knowing no one is as up to date on drone news as you.

So when you send it to someone, make sure they drop your name!

[Sign up / Refer a Friend!](#)

SPIDER-DRONE, SPIDER-DRONE!

DOES WHATEVER YOU THINK A SPIDER-DRONE DOES

Image courtesy: Forbes.com

Egads, Batman! A drone that’s capable of attaching itself to a wall and staying perched indefinitely until the pilot wishes to fly away? What will the Joker think of next?

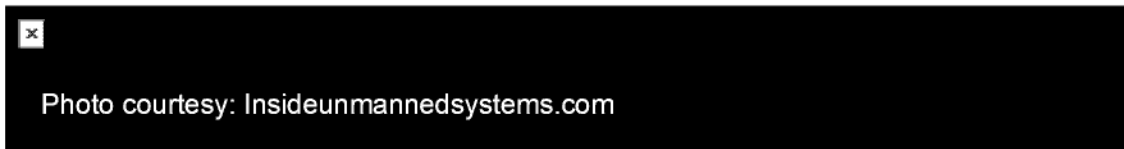

Before anyone asks, yes, there’s a Batman/Spiderman crossover. You think we would just throw references around willy nilly without checking canon? We’re hurt... truly.

This is a really wild concept the Israeli Defense Forces (IDF) has come up with that solves the problem of battery life in some situations. If you can

fly a drone where it needs to be and it just attaches itself, then you can kill the props, and the only thing sucking power is the camera. There is also an option for the drone to stick to the wall and then fly away leaving something attached to the wall. I'm sure they had something more explosive in mind with this idea, but you can leave all kinds of cool stuff behind. Like a Skyfire sticker you won from referring friends to Propeller Heads (meta).

5-MIN CHARGING FOR DRONE BATTERIES

TOO GOOD TO BE TRUE?

Yes, it seems too good to be true. An Israeli company called StoreDot has come up with a way to charge drone batteries in 5 minutes. They need to pair up with Spider-Drone, and come up with a wireless charging pad mounted on a wall. Then the drone could just stick to its charging plate, freeing up valuable desk space. StoreDot, get in touch, we've got plenty more ideas!

It does seem that they've figured this out though. Using FlashBattery technology, they use metalloid nanotechnology alloys with a very high diffusion and low resistance when the lithium ions are introduced.

Digging further on StoreDot's website, something stood out. The design of their batteries is based on "novel nano-structured materials combined with proprietary organic binders and enhanced electrolytes." So these batteries are a healthy alternative to fruits and vegetables? We don't condone eating batteries, but they describe their product in such a tasty

way! What we do condone is referring your friends to sign up for Propeller Heads! (Sorry! It's just too easy to shamelessly self-promote!)

\$100,000.00 DRONE

URNS OUT IT'S A MAVIC 2

Photo courtesy: Corrective Services NSW

You read that right. A \$100,000.00 DJI Mavic. Well, probably like \$1200 for the actual drone...

What then could possibly make a Mavic worth \$100k? A new fancy sensor? Those fancy 5 minute charging batteries? Nope! Just good old-fashioned drugs. It was carrying a payload of 150 buprenorphine tablets, and strips. You see, in New South Wales, Australia, they have cancelled all visits to prisoners due to COVID. So that's left people to get a little more sneaky and creative with their illegal activities.

Long gone are the simple days of smuggling paraphernalia in like flying kites over prisons, or hiding rock hammers in books. **WE'RE LOOKING AT YOU ANDY DUFRESNE!** Or should we say, Randall Stephens? Luckily the drone was captured by staff before it reached its intended destination, and 3 people were charged because of this, so maybe they can start a Part 107 course from the slammer!

Speaking of addictive things, aren't you just loving Propeller Heads recently? Why not share with all your friends and family? We'll make it worth your while!

Amazon Doubles UK Drone Deliveries Team

By The Editor on Aug 11, 2020 06:55 am

Amazon is preparing to roll out a fleet of drones in the UK that rapidly deliver packages during the pandemic after the Government gave the green light to trials for medicine drops earlier this year. Figures compiled by The Telegraph using data from LinkedIn suggest Amazon has almost doubled its Cambridge "Prime Air" team in the past [...]

SpearUAV Ninox Encapsulated Drone System has Instant ISTAR Capabilities

By The Editor on Aug 11, 2020 06:32 am

SpearUAV has unveiled its Ninox family of encapsulated drones. Instantly launched and intuitively operated, the drones provide on-demand and on-the-move intelligence capabilities that create new dimensions on the battlefield. Compared to traditional drones of similar capabilities, Ninox offers both operational affordability and flexibility: the drones can be launched manually or from a grenade launcher by [...]

Taiwan's 'Teng Yun' Drone on Schedule

By The Editor on Aug 11, 2020 06:26 am

The Taiwan military said Friday (Aug. 7) that the development of its domestically made "Teng Yun" (Cloud Rider, 騰雲) drone is right on schedule. Resembling the American MQ-1 Predator, a prototype of the medium-altitude long-endurance (MALE) drone was first exhibited in 2015. An improved model has been in development by the National Chung-Shan Institute of [...]

Logos Technologies Gets \$6.7M US Navy Contract for Infrared Wide-Area Sensor

By The Editor on Aug 11, 2020 06:01 am

Logos Technologies recently received approval to disclose that it has been awarded a \$6.7 million contract from the U.S. Naval Air Systems Command (NAVAIR) to develop, deliver, and perform proof-of-concept flight tests on a wide-area motion imagery (WAMI) sensor. The sensor system will be called Cardcounter and is being developed to integrate onto the Navy and Marine [...]

Captain Sallee,

My name is Jean-Sebastien Valois. I work with a tech startup in Pittsburgh working on automated video annotation and report generation. I have been following the work of your department with drone operations for some time now and was hoping to discuss with you (or someone on your team) a concept of operations where the drone would fly autonomously and where scene information would automatically be collected in a play-by-play manner. For example, descriptions of key scene elements and people's action would be detected and relayed back to the station and verbally announced to the agents at the scene. As I mentioned, I would appreciate any time that you could afford me.

Kindest regards,
 Jean-Sebastien

Subject: RE: helicopter alerts

Hello Adrianna. Yes, the San Diego Police Department was searching for an individual that was suspected of being involved in a shooting somewhere in their city, and was being treated at Scripps Hospital when they walked away. I do not have any more details about the circumstances of the shooting. We were assisting them in looking for the individual. But I don't think they were found.

The PA systems on the helicopters is far stronger than that of the drones, and can cover a much wider area. But to your point, the further away you are from the helicopter, the harder it is to hear and understand. When we have available resources we may try to post on our Twitter feed to help inform members of the public. But we often don't have all the resources to do that. Plus, in this specific circumstance, it was a San Diego PD investigation so we may not have done that.

I'm including Captain Sallee on this email, who runs our drone program and knows more about the PA system. But I appreciate your input with the San Diego Police helicopter's system, and will make sure to discuss it with their staff at the next opportunity.

Hi Captain Collum,

I hope you're doing very well.

We received the email below and the Mayor shared in Ms. Walter's concern that the messaging coming from the helicopter was hard to hear or make out.

Do you know what the circumstance surrounding today's helicopter deployment were? Did we request this? Also, given that people sometimes have a hard time hearing these type of messages, we were wondering if there is any way we can improve with technology like drones?

I apologize if you are not the correct person to address this, but appreciate you pointing me in the right direction.

Thank you!

Sincerely,

Adrianna Hernandez

Chula Vista UAS Team,

Good evening, I hope this email finds you well! My name is Fred Connelly, and I am a business student at the University of Texas at Dallas. I am currently conducting some research on the drone industry, specifically how drones can be used by police departments, and I was looking to talk to some industry professionals on the matter. Seeing as the Chula Vista UAS Team is the defining pioneer for this type of drone use, I thought this would be the perfect place to start.

If anyone in the organization is willing to speak to me for a few minutes this week or next week, I would really appreciate it. I can be reached via email or via my cell phone number, which is listed below. Thank you for your time, and have a great day!

Very Respectfully,

Very Respectfully,

RE: Drone as a First Responder: Providing Proactive Aerial Intelligence to First Responders

Dear William Sallee,

Thank you for submitting a proposal for consideration as a workshop at IACP 2020 and for your patience in this year's extended review process. I regret to inform you that your proposal, *Drone as a First Responder: Providing Proactive Aerial Intelligence to First Responders*, has not been accepted for a workshop at the IACP 2020 Virtual Training Event and Expo. We received an overwhelming response of high quality submissions in response to our call for presentations. Each proposal was diligently reviewed and decisions were very difficult as space in the education program was limited this year.

We greatly appreciate your interest in presenting and the time expended in preparing your proposal. We will be happy to include you in notifications when the Call for Presentations for IACP 2021 becomes available in January.

Respectfully,

Jennifer Stewart, CMP

Hello Vern,

Thank you for taking the time to speak with me today. I sincerely appreciate all the great insights you shared.

Kindly remember to connect me with Sergeant Horst.

Also, please find below the link to our NSF phase 1 award page & info:
https://www.nsf.gov/awardsearch/showAward?AWD_ID=1953070&HistoricalAwards=false

Find below an outline for the letter of support:

Project Title: Advanced Li-S Battery System for Unmanned Air Vehicles

Purpose of letter of support: Thank you for writing a letter in support of our NSF phase 2 application for the development of our advanced Li-S batteries for UAV. The purpose is to highlight why this technology, when successfully developed, is important/beneficial to your operations and your industry. In addition, it is to highlight what you will do if the technology is successfully developed and demonstrated to your satisfaction.

About Valgotech LLC advanced Li-S batteries under development

Valgotech is developing advanced lithium sulfur (Li-S) batteries with the support of the National Science Foundation (NSF), research institutions, and other strategic partners. The new Li-S batteries have higher energy density than lithium ion batteries that will result in lighter weight unmanned air vehicles (UAV), higher payload, longer flight time and higher battery cycle life. In addition, the batteries' cathode is made from sulfur which is low cost, abundant in supply, and environmentally friendly. The successful development of the technology will help the US to attain a leadership position in the growing UAV market and reduce dependence on foreign suppliers.

Please find below an outline for a letter of support:

Official Letterhead

Intro section

I am pleased to write this letter in support of the advanced Li-S batteries under development by Valgotech LLC...

About your organization and drone program.

The importance of the advanced Li-S batteries when successfully developed to you and the industry.

The support you will provide

Test in your vehicle

If satisfied with test results, will add to purchasing cycle ...

(If the new battery system is successfully developed, as a test center, we are willing to test the performance on our systems and if we are satisfied, we will add to our purchasing cycle.)

Name & signature

Sincerely,
David

Jennifer, how is this? Feel free to fix any grammar or spelling or edit it down for space.

Chief of Police Roxana Kennedy is a 28 year veteran of the department. Appointed on December 30, 2016 as the first female chief of the department, she quickly looked toward technology as one facet of improving public safety service delivery. Chief Kennedy's innovation initiative resulted in several technological innovations, one of the most notable being CVPD's Drone as a First Responder (DFR) program.

CVPD's groundbreaking DFR program has been a participant in the FAA's Integration Pilot Program since May 2018. Working closely with the advice and support of the FAA's UAS IPP team, CVPD launched DFR operations in October 2018 and has completed over 3,200 mission in support of emergency operations and first responders. The positive results for the community and officers have been nothing short of dramatic. Since its inception CVPD's DFR program has garnered international acclaim as one of the most robust and best use cases for public safety drones.

In her keynote, Chief Kennedy will discuss how she leads and manages change, especially with regard to technology. Chief Kennedy will be the first to admit she is not a technology or drone expert, but she does understand

community and public engagement. This includes telling the story of your drone program and the positive impact it will have on people. CVPD's program would never have achieved its successes had it not been for early outreach and transparency efforts with the community and the press. Chief Kennedy will discuss this year's theme: "Drones, here for good" and the incredible potential of drones. She will also discuss how this will only be possible by building thoughtful public engagement and support for your program.

Hi Todd, thanks for the info. I am coordinating the presentation details for Chief Kennedy. We are finalizing her keynote speech and she will not have a power point. There will be a 3:02 minute video that she will introduce near the beginning of the speech. Please let me know how I should share the video with you. Also, if there is anything else I need to get to you, please let me know.

As for the title, how does "Leading Through Change" work for you?

Best,
 Vern

Hi Vern,

We trimmed it down and made a few edits. Let me know if you'd like anything changed:

Chula Vista Police Department's drone program has achieved success by placing early emphasis on outreach and transparency efforts with the community and the press. Chief Kennedy discusses her department's efforts to lead and manage change, especially regarding technology. She also addresses this year's theme: "Drones, Here for Good" and the importance of cultivating thoughtful public engagement.

Thank you!

Jennifer, how is this? Feel free to fix any grammar or spelling or edit it down for space.

Chief of Police Roxana Kennedy is a 28 year veteran of the department. Appointed on December 30, 2016 as the first female chief of the department, she quickly looked toward technology as one facet of improving public safety service delivery. Chief Kennedy's innovation initiative resulted in several technological innovations, one of the most notable being CVPD's Drone as a First Responder (DFR) program.

CVPD's groundbreaking DFR program has been a participant in the FAA's Integration Pilot Program since May 2018. Working closely with the advice and support of the FAA's UAS IPP team, CVPD launched DFR operations in October 2018 and has completed over 3,200 mission in support of emergency operations and first responders. The positive results for the community and officers have been nothing short of dramatic. Since its inception CVPD's DFR program has garnered international acclaim as one of the most robust and best use cases for public safety drones.

In her keynote, Chief Kennedy will discuss how she leads and manages change, especially with regard to technology. Chief Kennedy will be the first to admit she is not a technology or drone expert, but she does understand community and public engagement. Hi David, I tried the drop box link but it is closed or won't let me open it. Can you please re-send it?

Hi Todd, thanks for the info. I am coordinating the presentation details for Chief Kennedy. We are finalizing her keynote speech and she will not have a power point. There will be a 3:02 minute video that she will introduce near the beginning of the speech. Please let me know how I should share the video with you. Also, if there is anything else I need to get to you, please let me know.

As for the title, how does "Leading Through Change" work for you?

Best,
Vern

Good morning Dr. Olawale,

It was a pleasure speaking with you about battery technology yesterday. As we discussed, Sgt. Jim Horst is my UAS program supervisor and has the best grasp on issues surrounding battery performance in our program. I will draft a letter of support for advanced battery research.

Jim, Dr. Olawale reached out to me because his company, Valgotech, has a National Science Foundation grant to develop a new type of battery. He would like to hear details about the real world issues we face as customers.

Best,
 Vern

Hello Vern,

Thank you for taking the time to speak with me today. I sincerely appreciate all the great insights you shared.

Kindly remember to connect me with Sergeant Horst.

Also, please find below the link to our NSF phase 1 award page & info:

https://www.nsf.gov/awardsearch/showAward?AWD_ID=1953070&HistoricalAwards=false

Find below an outline for the letter of support:

Project Title: Advanced Li-S Battery System for Unmanned Air Vehicles

Purpose of letter of support: Thank you for writing a letter in support of our NSF phase 2 application for the development of our advanced Li-S batteries for UAV. The purpose is to highlight why this technology, when successfully developed, is important/beneficial to your operations and your industry. In addition, it is to highlight what you will do if the technology is successfully developed and demonstrated to your satisfaction.

About Valgotech LLC advanced Li-S batteries under development

Valgotech is developing advanced lithium sulfur (Li-S) batteries with the support of the National Science Foundation (NSF), research institutions, and other strategic partners. The new Li-S batteries have higher energy density than lithium ion batteries that will result in lighter weight unmanned air vehicles (UAV), higher payload, longer flight time and higher battery cycle life. In addition, the batteries' cathode is made from sulfur which is low cost, abundant in supply, and environmentally friendly. The successful development of the technology will help the US to attain a leadership position in the growing UAV market and reduce dependence on foreign suppliers.

Please find below an outline for a letter of support:

Official Letterhead

Intro section

I am pleased to write this letter in support of the advanced Li-S batteries under development by Valgotech LLC...

About your organization and drone program.

The importance of the advanced Li-S batteries when successfully developed to you and the industry.

The support you will provide

Test in your vehicle

If satisfied with test results, will add to purchasing cycle ...

(If the new battery system is successfully developed, as a test center, we are willing to test the performance on our systems and if we are satisfied, we will add to our purchasing cycle.)

Name & signature

Sincerely,
David

WEBINAR INVITATION

REGISTER

Join DRONERESPONDERS and DJI for this special webinar to discuss the Drone Rescue Map, Public Safety UAS operations, and the DJI Qualified Entities Program (QEP).

Thursday, August 13, 2020
2:00-3:00 p.m. Eastern

Topics will include:

1. The DJI Drone Rescue Map and why it is important for public safety agencies.
2. The need for tracking successful Public Safety sUAS Operations around the world.
3. The DJI Qualified Entities Program (QEP).

ISIS Shows Seizure, Study of Puma in Sinai

By The Editor on Aug 12, 2020 06:40 am

ISIS released photos of a U.S.-made drone the terror group said it captured and dissected in Egypt after the UAV went down in the northeastern part of the country. The pictures came as ISIS has claimed new territory in northern Sinai and Egypt's military forces have clashed with jihadists in the restive region. The drone [...]

Subject: RE: Virtual Backgrounds for Your Symposium Presentation

Jennifer, how is this? Feel free to fix any grammar or spelling or edit it down for space.

Chief of Police Roxana Kennedy is a 28 year veteran of the department. Appointed on December 30, 2016 as the first female chief of the department, she quickly looked toward technology as one facet of improving public safety service delivery. Chief Kennedy's innovation initiative resulted in several technological innovations, one of the most notable being CVPD's Drone as a First Responder (DFR) program.

CVPD's groundbreaking DFR program has been a participant in the FAA's Integration Pilot Program since May 2018. Working closely with the advice and support of the FAA's UAS IPP team, CVPD launched DFR operations in October 2018 and has completed over 3,200 mission in support of emergency operations and first responders. The positive results for the community and officers have been nothing short of dramatic. Since its inception CVPD's DFR program has garnered international acclaim as one of the most robust and best use cases for public safety drones.

In her keynote, Chief Kennedy will discuss how she leads and manages change, especially with regard to technology. Chief Kennedy will be the first to admit she is not a technology or drone expert, but she does understand

community and public engagement. This includes telling the story of your drone program and the positive impact it will have on people. CVPD's program would never have achieved its successes had it not been for early outreach and transparency efforts with the community and the press. Chief Kennedy will discuss this year's theme: "Drones, here for good" and the incredible potential of drones. She will also discuss how this will only be possible by building thoughtful public engagement and support for your program.

Hi Vern,

Please upload directly to AUVSI using these instructions. Do you know after how long into her intro she will need the video to play?

File Format + Upload Link

Your final video needs to be a **.mov** or **.mp4** file, with a maximum resolution of 1920x1080 (FHD) and a minimum resolution of 1280 x 720 (HD).

Please upload your final video and any other media assets that are a part of your video to the following dropbox link, utilizing the following naming convention.

Your Name - Your Presentation Name - Media asset file extension.

<https://www.dropbox.com/request/iD2EXO9TPB0m7HdtB00a>

Finally, send an email to Luke McKibben (luke@lukrativevisual.com), Nicole Mattar (nmattar@auvsi.org) and David Astorga (david.j.astorga@faa.gov) when you have finished uploading your file(s) and confirm the number of files you have uploaded. You will receive a confirmation email when your files have been secured in our local server. The next time you are contacted will be for questions/changes to your presentation as applies or your Green Room report in time for the live show, and/or for a quick pre-show visit.

If you have any questions about video production or the upload process, reach out to Luke McKibben, Technical Producer.

Respectfully,

David Astorga

Hi David, I tried the drop box link but it is closed or won't let me open it. Can you please re-send it?

Hi Todd, thanks for the info. I am coordinating the presentation details for Chief Kennedy. We are finalizing her keynote speech and she will not have a power point. There will be a 3:02 minute video that she will introduce near the beginning of the speech. Please let me know how I should share the video with you. Also, if there is anything else I need to get to you, please let me know.

As for the title, how does "Leading Through Change" work for you?

Best,
Vern

Drones in Public Safety

Drones and unmanned systems have rapidly become crucial tools for fire, rescue, police and more public safety agencies around the world.

With capabilities for search and rescue, surveillance, crash reconstruction, 3D mapping, drones are saving time, money and most importantly, saving lives across the world.

This webinar Series will answer:

- *How are various public safety professionals and agencies utilizing drones today?*
- *What does it take to implement a public safety drone program?*
- *What are some of the future technologies being developed?*
- *And much more!*

September 15-17, 2020
Virtual Event

A Unique Experience & Incredible Value

While the world gets used to conducting business online until it can return to meeting face to face, [Commercial UAV Expo Americas](#) provides an exceptional opportunity with its virtual event this September. Because it will take place virtually, Commercial UAV Expo Americas 2020 will provide more technical content and gather a broader audience to facilitate more business connections than ever before.

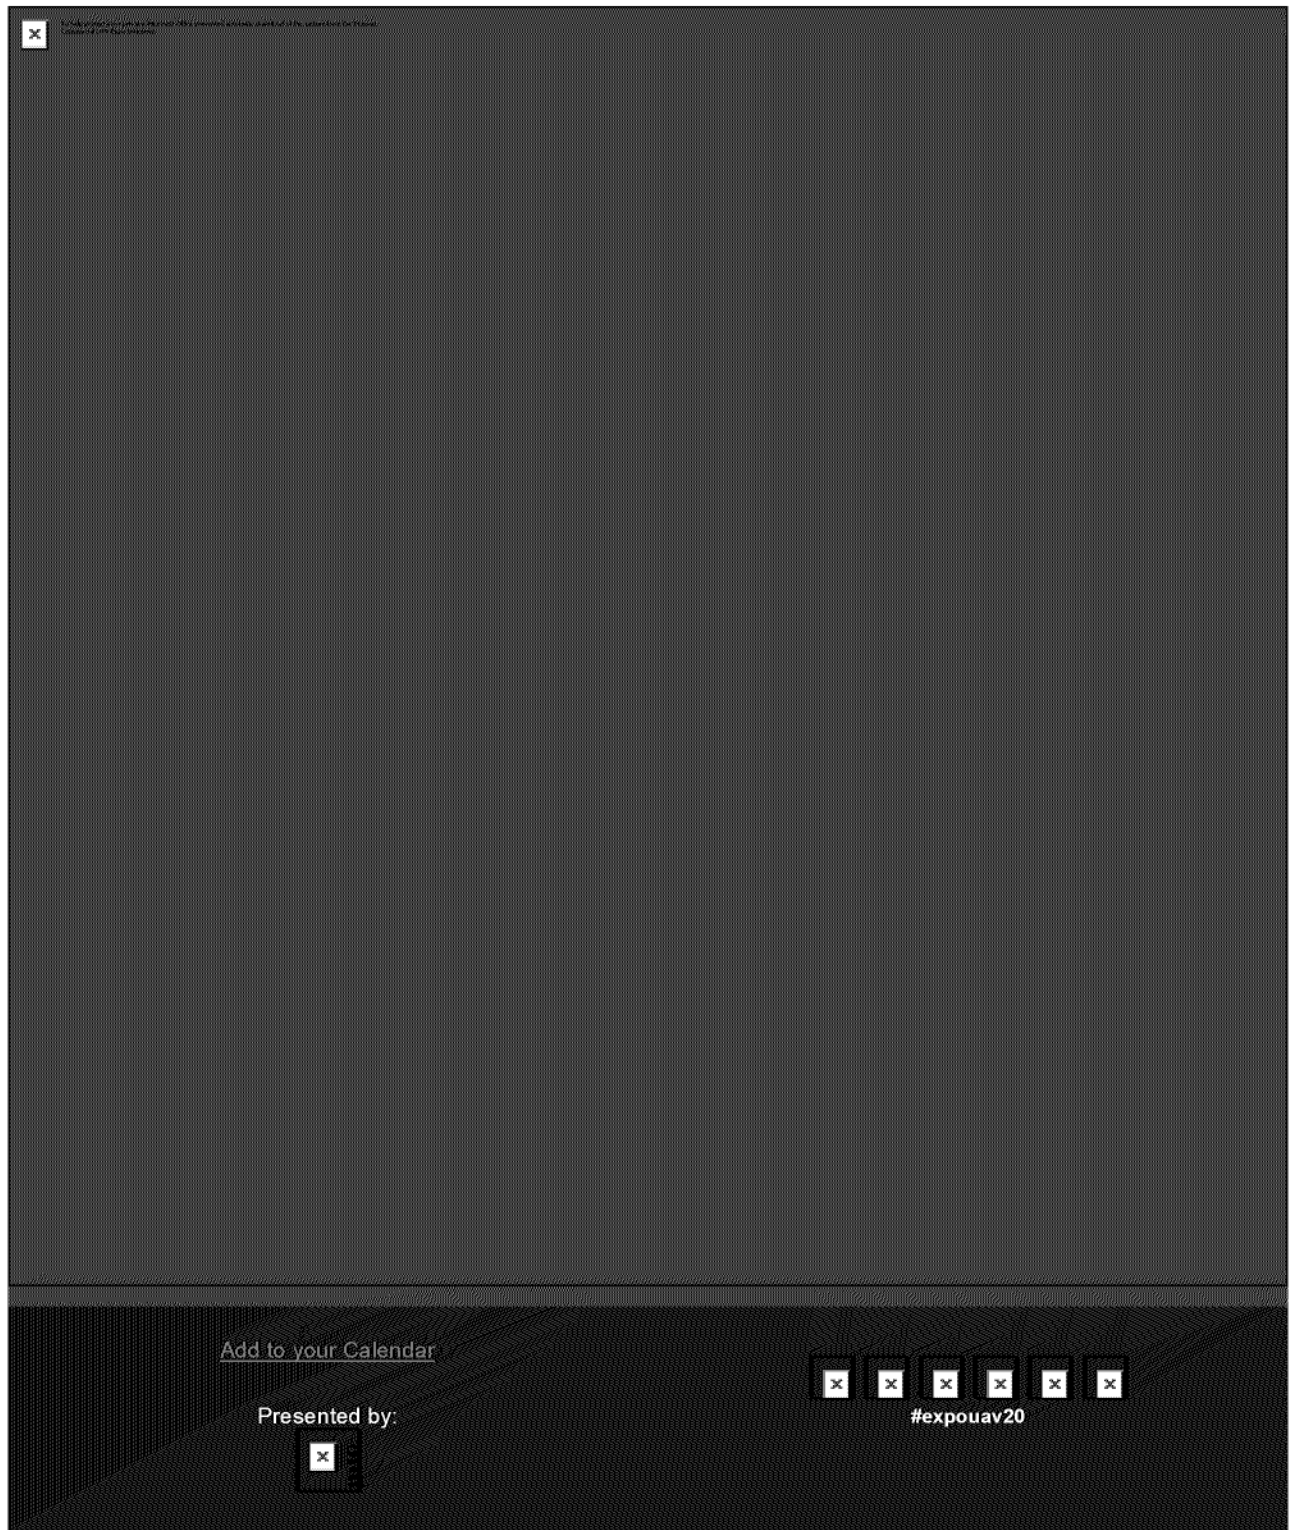

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

What can you expect from Commercial UAV Expo Americas Virtual?

- **More Convenience** – connect with the industry from the comfort of your office or home
- **More Education** – never miss a session with on-demand playback of all content
- **More Networking** – AI-assisted matchmaking helps find the right connections from across the globe
- **More Experts** – gain key insights from experts from the FAA, White House, CISA, Uber, UPS, NASA, Wing & more
- **More Affordable** – an economical virtual conference pass or free exhibit hall pass + no travel costs
- **More Access** – continue to watch recorded content on-demand and network for 30 days

**FROM THE EDITOR**

ings!

Commercial UAV News has covered multiple perspectives from end users, businesses, and more about the legal and regulatory news to affect the commercial drone market. As important as these voices are, the perspectives that have been underrepresented and much needed in these conversations are from leaders in the White House, and government security agencies like the DHS and CISA. This is why I am particularly excited for this year's Commercial UAV Expo America event, taking place September 15th to 17th. With speakers from Steve Dickson, Administrator, FAA; Brian Harrell, Assistant Director, DHS Cybersecurity and Infrastructure Security Agency (CISA); and Michael Kratsios, Chief Technology Officer of the United States, The White House, we will be able to hear from all of these agencies in their own words, and get on the same page collectively. This is a rare opportunity to get in-depth updates, perspectives, and insights from all three agencies shaping our industry today, and I am particularly interested in what they will share.

Registration is now open for our upcoming virtual event and can be accessed [here](#). I hope to see you, there!

Well and stay safe,

Danielle Gagne
 Commercial UAV News Editor

Highlights of 5 Things You Need to Know About Surveying with a Drone Webinar

by Antunes

The ability to perform land surveys, photogrammetry, 3D mapping, topographic surveying, and more, drones have become one of the preferred tools for GIS professionals to do their jobs. Last month, Commercial UAV News held a "5 Things You Need to Know About Surveying with a Drone" webinar with a group of surveying experts to learn what they think about surveying with drones from choosing the right hardware, professional software for the job to delivering a high-quality product. Here are a few highlights of that conversation.

YOUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

Click here to sign up for free to any or all of the webinars below to join live or on-demand:

Scanning and 3D Building Information Modeling for Construction and Facilities Management Projects

On-Demand

This discussion will highlight how LiDAR data and imagery were used to create an accurate building information model that is currently being used for airport design, construction, and integration into their facilities management program. Visualization capabilities and surveying accuracies are some of the highlights of the developed building model and the speakers will explore how their solutions and workflows utilize these efficiencies to create real-world success stories.

Map: Enabling Autonomous LiDAR Mapping in Challenging, Inaccessible Areas

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent, and the drone industry will see and feel them over the next months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many decisions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many more, followed by a live Q&A session with the audience.

Increasing 3D Mapping Productivity, Ease of Use, and Your Bottom Line

Thursday, August 19, 2020 | 11:00AM - 12:00PM Eastern Time

Learn how to vectorize map features quickly and easily to get your work done faster. Whether it's roof and gutter lines from point clouds, or digitizing road infrastructure with stereo photogrammetry, this webinar will give you tips on how to increase the efficiency of your drone mapping workflow and increase your business's bottom line.

Tools to Identify Construction Issues Before They Become Issues

Friday, August 27, 2020 | 2:00PM – 2:30PM Eastern Time

Despite advancements in digital construction technology, workflows targeting cost implication and potential rework in construction are not being widely adopted. Utilizing reality capture, along with other digital construction tools are estimated to reduce rework by 1-3%. Hundreds of millions of dollars are being spent yearly on construction rework that could be reduced and avoided. With today's technology, understanding these workflows to identify issues before they become issues and achieving a zero-rework project can happen; it takes project management innovation and commitment.

Underground & Indoor Mapping with 3D Lidar Mapping

Friday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

LiDAR sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for structural hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Episode 50: The UAS VC Funding Model may be Broken; How do we Avoid a Bubble? With Gokul Srinivasan

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

This week on the InterDrone Podcast, we sat down with Gokul Srinivasan, the Director of Technology at Robots.Expert. Gokul has worked in drones and UAS since 2013, has an education background in robotics (unmanned aerial systems) and artificial intelligence, was listed as one of the top 5 founders in Finland in 2019 (Nordic Startup Awards), and even serves as the Dean at the School of AI in Helsinki, Finland.

We spoke about the size of the drone market, and drone market size predictions, the state of VC funding within drones and UAS, how funding differs from country to country, how he sees open source technology fitting into the future of UAS, and much more.

Bringing Non-Cooperative Drone Traffic into UTM Solutions

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

The drone industry and regulators agree that remote identification, once implemented, will be a key enabler of greater airspace integration — but not the full solution. In addition to terrain, localized weather information and other datasets, providers of unmanned traffic management (UTM) services are working to seamlessly include non-cooperative drone traffic in their airspace awareness picture.

Drone Parachute: See Percepto's Integrated Parachute in Action [VIDEO]

Israel's Percepto claims to be the most deployed autonomous drone-in-a-box solutions, with Fortune 500 customers in more than 10 countries. Part of the way they achieve that level of deployment is through an emphasis on safety – paramount for any system designed to operate without the necessary intervention of human pilots. Percepto has now announced the latest weapon in their arsenal: an integrated drone parachute.

Good morning everyone. The Chief did a final re-work of her speech and would like to introduce the video to play at 2:55. If she can speak along with the video to describe key points, that's great, if not, it is not critical.

Subject: RE: Virtual Backgrounds for Your Symposium Presentation

Jennifer, how is this? Feel free to fix any grammar or spelling or edit it down for space.

Chief of Police Roxana Kennedy is a 28 year veteran of the department. Appointed on December 30, 2016 as the first female chief of the department, she quickly looked toward technology as one facet of improving public safety service delivery. Chief Kennedy's innovation initiative resulted in several technological innovations, one of the most notable being CVPD's Drone as a First Responder (DFR) program.

CVPD's groundbreaking DFR program has been a participant in the FAA's Integration Pilot Program since May 2018. Working closely with the advice and support of the FAA's UAS IPP team, CVPD launched DFR operations in October 2018 and has completed over 3,200 mission in support of emergency operations and first responders. The positive results for the community and officers have been nothing short of dramatic. Since its inception CVPD's DFR program has garnered international acclaim as one of the most robust and best use cases for public safety drones.

In her keynote, Chief Kennedy will discuss how she leads and manages change, especially with regard to technology. Chief Kennedy will be the first to admit she is not a technology or drone expert, but she does understand community and public engagement. This includes telling the story of your drone program and the positive impact it will have on people. CVPD's program would never have achieved its successes had it not been for early outreach and transparency efforts with the community and the press. Chief Kennedy will discuss this year's theme: "Drones, here for good" and the incredible potential of drones. She will also discuss how this will only be possible by building thoughtful public engagement and support for your program.

Subject: RE: Virtual Backgrounds for Your Symposium Presentation

Jennifer, how is this? Feel free to fix any grammar or spelling or edit it down for space.

Chief of Police Roxana Kennedy is a 28 year veteran of the department. Appointed on December 30, 2016 as the first female chief of the department, she quickly looked toward technology as one facet of improving public safety service delivery. Chief Kennedy's innovation initiative resulted in several technological innovations, one of the most notable being CVPD's Drone as a First Responder (DFR) program.

CVPD's groundbreaking DFR program has been a participant in the FAA's Integration Pilot Program since May 2018. Working closely with the advice and support of the FAA's UAS IPP team, CVPD launched DFR operations in October 2018 and has completed over 3,200 mission in support of emergency operations and first responders. The positive results for the community and officers have been nothing short of dramatic. Since its inception CVPD's DFR program has garnered international acclaim as one of the most robust and best use cases for public safety drones.

In her keynote, Chief Kennedy will discuss how she leads and manages change, especially with regard to technology. Chief Kennedy will be the first to admit she is not a technology or drone expert, but she does understand community and public engagement. This includes telling the story of your drone program and the positive impact it will have on people. CVPD's program would never have achieved its successes had it not been for early outreach and transparency efforts with the community and the press. Chief Kennedy will discuss this year's theme: "Drones, here for good" and the incredible potential of drones. She will also discuss how this will only be possible by building thoughtful public engagement and support for your program.

Current State of Tech and Regulations: Enabling BVLOS UAS Flight for Long-Linear Infrastructure Inspection in the Energy Industry

Date: 4:00 pm EDT - Thursday, August 13th, 2020

Length: 45 minutes

[Add to Calendar>>](#)

Register Now!

For operators in the energy sector, there is an increasing need to fly longer distances and reduce operational costs for infrastructure inspection.

Learn about the latest technology enabling Beyond

Visual Line of Sight (BVLOS) drone flight and the regulations that affect it.

Join us for a discussion with Jason Hardy-Smith, VP of Product at [Iris Automation](#), on the drone technology currently being used to overcome the complex regulatory barriers that come with flying BVLOS.

Attendees will learn what to expect in applying for waivers and how some companies are already flying BVLOS for use cases like power line and pipeline inspections.

Presenter

Jason Hardy-Smith - VP of Product, Iris Automation

Jason Hardy-Smith is a proven Product Management executive with 20 years of experience defining and driving product strategies and roadmaps in technology industries. Jason has owned the end-to-end product lifecycle of successful first-to-market products for companies including Oracle, Blueroads, Brightidea and Isomorphic Software. He has built efficient, scalable, global product organizations from the ground up. In his current role at [Iris Automation](#), Jason oversees the development of technology enabling the safe implementation of BVLOS operations for UAS.

InterDrone Public Safety Webinar Series

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Today's Session: *Drone Law and Policy in Public Safety Operations*

Drone use is coming into its own and many of the hurdles just to "get in the air" have been overcome, but the realization of the sheer volume of data that can be collected now looms large. How do agencies analyze the sheer volume of data that is now at their fingertips?

[Register Now!](#)

Tomorrow's Session:

- **Thursday, Aug 20, 4:00 PM EDT - Drones in Emergency Services - [Learn more](#)**

Featured Presenters

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Drones in Public Safety

Drones and unmanned systems have rapidly become crucial tools for fire, rescue, police and more public safety agencies around the world.

With capabilities for search and rescue, surveillance, crash reconstruction, 3D mapping, drones are saving time, money and most importantly, saving lives across the world.

This webinar Series will answer:

- *How are various public safety professionals and agencies utilizing drones today?*
- *What does it take to implement a public safety drone program?*
- *What are some of the future technologies being developed?*
- *And much more!*

Subject: Program information

Warning: External Email
--

I am with the Salt Lake City Police Department and currently assigned to run our drone program. I have a small group of Part 107 certified pilots but nothing further. We are still seeking funding to purchase drones and our City Administration is seeking a "best practice" example. I have just watched the presentation Chief Kennedy made in the FAA UAS symposium and believe that your department program meets what I have been trying to get started here. I have read over your web page. I would like to get more information about the systems you operate and how your flight centers are set up. It may be premature on my part, but if the opportunity presents itself may I come out and see how you operate?

The specifics that I will need may not be available, or at least not until you can verify that mine is a legitimate request. I am interested in initial and operational costs, number of drones you operate as well as the type, how many pilots you have and how they work or are assigned and how you worked with the FAA to set up your flight permissions. I

have spoken with our local FAA representatives and discussed how you are currently operating with them previously and would like to make it work for us here.

Any assistance is greatly appreciated.

Lt. Russell Amott
Salt Lake City Police Department
801-381-8810

TOP NEWS

Nationâ€™s first autonomous vehicle corridor planned for suburban Detroit

The Detroit Bureau (8/17/2020) Eisenstein, Paul A.

The first autonomous vehicle corridor in the U.S. is being planned for the Detroit suburbs, running from the center of the Motor City to Ann Arbor, which is home to the University of Michigan. The project will be developed by a partnership pairing Ford Motor Co., Google parent Alphabet Inc., the State of Michigan and a technology startup called Cavnue.

AutoX opens Shanghai RoboTaxi service to the public

New Atlas (8/17/2020) Ridden, Paul

After teaming up with Alibaba's Amap mobility platform in April to make robo-taxis available to Shanghai ride-hailers, autonomous vehicle tech firm AutoX and Amap have opened their RoboTaxi service up to the public. Only a limited group of users could access the pilot program before.

INDUSTRY NEWS

FIRST iZ, KnackForge partner to create control systems hardware and software for UAS tech

AUVSI (8/18/2020)

A patent-pending UAS that allows drones to be dispatched autonomously by 911 operators called FIRST iZ has announced a partnership with KnackForge to create control systems hardware and software for its FIRST Port drone port, as well as its launch ecosystem. Through this strategic partnership, KnackForge handles the details involved with safely and successfully launching a UAS from a smart hangar, or port, that keeps the UAS charged and ready to fly within seconds of a known need.

K-State Polytechnic campus receives waiver to fly UAS BVLOS in all class G airspace nationwide

AUVSI (8/17/2020)

The FAA has granted Kansas State University Polytechnic Campus's Applied Aviation Research Center a new waiver that permits K-State Polytechnic to fly UAS beyond visual line of sight, in all Class G airspace nationwide. A majority of UAS flights take place in Class G airspace, which will allow K-State Polytechnic and the Applied Aviation Research Center to enhance research, education and training opportunities.

Hello,

My name is Michael Austin and I am a detective with the Sumter Police Department in Sumter, South Carolina. I have been attending a lot of webinars lately and your department has been mention multiple times as a unit with a very respectable drone unit. I am wondering if you have any information that could assist my department with obtaining waivers or COA for our drone program. Currently our drone program is so new that we are actually preforming the

drone operations as a secondary duty and more so on-call type of use. Any information on how to implement the drone into more aspects of law enforcement so that we could work towards having the drone operators be a full time position would be greatly appreciated. Thank you for your time reading this and I look forward to hearing back from you.

Respectfully,

Detective Michael Austin
City of Sumter Police Department

InterDrone Public Safety Webinar Series

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Today's Session: *Data Analysis: Image Analysis At the Pixel Level*

Drone use is coming into its own and many of the hurdles just to "get in the air" have been overcome, but the realization of the sheer volume of data that can be collected now looms large. How do agencies analyze the sheer volume of data that is now at their fingertips?

[Register Now!](#)

Upcoming Sessions:

- **Wednesday, Aug 19**, 12:00 PM EDT - Drone Law and Policy in Public Safety Operations - [Learn more](#)
- **Thursday, Aug 20**, 4:00 PM EDT - Drones in Emergency Services - [Learn more](#)

Drones in Public Safety

Drones and unmanned systems have rapidly become crucial tools for fire, rescue, police and more public safety agencies around the world.

With capabilities for search and rescue, surveillance, crash reconstruction, 3D mapping, drones are saving time, money and most importantly, saving lives across the world.

This webinar Series will answer:

- *How are various public safety professionals and agencies utilizing drones today?*
- *What does it take to implement a public safety drone program?*
- *What are some of the future technologies being developed?*
- *And much more!*

Subject: RE: Chief Kennedy Request

Okay got it. I'm sure we can make the 2:55 time work – Vern will have to drone on a bit.

But that will likely extend the length of the entire timeline by about 3 minutes. (In other words, Vern's introduction will add about 3 minutes to the entire length, since the Chief's speech is already programmed and set at its predetermined length.) Will that be okay?

Captain Phil Collum

Phil,

The video is set up to start automatically so every time we change the roll time it requires additional programming. We really just want to make sure that the video rolls at the right time. If we can keep the video at 2:55 that would be great. If not please let me know as soon as possible.

Thanks for confirming the dual stream capability.

Respectfully,

David

Subject: RE: Chief Kennedy Request

Hi David. Yes, we think this will work. Thank you so much for your flexibility. So, just to make sure I understand correctly, the plan will be:

1. Introduction/set stage (probably done by Captain Vern Sallee);
2. Video plays
3. Introduction of Chief Kennedy (also Captain Sallee)

4. Chief Kennedy keynote

Sound correct? (If so, please note that this would require two streams from us – one for Chief Kennedy and one for Captain Sallee.)

Hi Vern and Phil,

First I want to say thank you, Phil and the Chief for all the effort you are putting into this.

I can definitely look into moving the video to the beginning of the keynote.

I have one tip I can offer, will the Chief feel more comfortable if you set the stage for her and then she continues with her keynote. Maybe we can leave the video where it is and you can open the session, have the video play, do a voiceover and then introduce the chief.

This can be further modified depending on what you think.

This may raise her comfort level and change the feel of the session since someone else will be “live” with her.

Thoughts?

Respectfully,

David

Cc: Phil Collum <pcollum@chulavistapd.org>
Subject: Chief Kennedy Request
Importance: High

Good evening David, we've just spent several hours practicing the live speech with Chief Kennedy with a teleprompter. She is not very comfortable with our original plan to insert the video in the middle of the speech due to a fear of technical glitches. I understand it's too late to do a pre-prepared video at this point but could we simply play the video before her speech? Having gone through her speech and the technical aspects of her presentation, that is her preference at this point.

My colleague, Captain Phil Collum is copied on this email and will be working with Chief Kennedy tomorrow to smooth out the system and get her comfortable. He is available to work with you on technical details. I'm off tomorrow but available by email and phone (619-572-6168) should we need to connect.

Sorry for the late request, a Keynote is a bit different and we are trying to ensure that it goes off without a hitch. Any assistance would be appreciated.

Best,
Vern

**Commercial UAV Expo Americas Virtual
Conference to Feature DRONERESPONDERS
Public Safety UAS Content produced by AIRT**

Digital environment will allow attendees from around the world to engage in targeted educational content to learn how first responders are using sUAS to save lives.

PORTLAND, ME – Public safety and emergency services drone pilots from across the globe will gather virtually to share use cases, best practices, and key learnings at the DRONERESPONDERS Public Safety Summit held in a virtual environment at [Commercial UAV Expo Americas](#) from September 15-17, 2020.

Diversified Communications, the producer of Commercial UAV Expo Americas, will again partner with AIRT, the leading 501(c) non-profit organization supporting Drones For Good, to produce the DRONERESPONDERS Public Safety Summit, a virtual event for first responders and search and rescue personnel operating sUAS.

“We are excited to partner with AIRT to provide DRONERESPONDERS-branded content that supports the use of drones by public safety agencies and emergency services organizations.” said Lisa Murray, Group Director at Diversified Communications. “This year’s virtual production will provide a new opportunity for first responders drones teams to share ideas and outcomes that will benefit the whole community.”

“With the global COVID-19 pandemic, interest in the use of unmanned systems by first responders is increasing at a rapid pace to help promote physical distancing during public safety operations,” said Chief Charles Werner (ret.), Director of DRONERESPONDERS. “The Commercial UAV Expo virtual event provides an ideal forum for helping DRONERESPONDERS to expand awareness and knowledge surrounding sUAS for law enforcement, fire rescue, and other emergency services.”

For 2020, Commercial UAV Expo Virtual will offer special group pricing that allows emergency drones teams to attend as a unit. For just \$65, public safety

professionals can purchase an individual pass which includes individual access to the Public Safety Summit Content as well as access to the Commercial UAV Expo keynotes and AI-powered matchmaking. For groups of 5 and over, the group price per individual is just \$49 for the same access.

According to Murray and Werner, the organizations made it a point to offer the lowest price possible to encourage first responders from all over the globe easy access to critical information and an unparalleled networking opportunity to foster sharing of best practices with each other. They believe this will provide an enhanced learning opportunity for public safety organization to train their personnel without paying the typical costs associated with a team of people travelling to a venue.

“This year public safety agencies will be able to have their entire UAS team attend the DRONERESPONDERS summit virtually – without having to pay the typical travel costs associated with sending personnel out on travel orders,” says Werner. “We expect this to be a game-changer for how public safety UAS teams train moving forward.”

DRONERESPONDERS PUBLIC SAFETY SUMMIT PASS, COST AND REGISTRATION

Cost:

\$65 • single pass

\$49 • bundle of 5 or more passes (price per pass)

Includes access to the Public Safety Summit, Virtual Exhibits and AI-Powered Matchmaking.

To register for DRONERESPONDERS Public Safety:

<https://virtual.expouav.com/page/1554247/register?promo=DRPR>

About AIRT

AIRT® (Airborne International Response Team) is a Miami, Florida-based 501(c)3 non-profit organization that facilitates Drones For Good™ for complex emergencies and major disasters. AIRT is the official home of DRONERESPONDERS, the world's fastest growing non-profit program supporting public safety UAS. Our global remote pilot network is ready to #getup whenever disaster strikes. For more information, visit: <http://airt.ngo> or <http://droneresponders.org>

About Commercial UAV Expo Americas

Commercial UAV Expo Americas, presented by Commercial UAV News, is the leading international trade show and conference for the commercial drone market. Its sixth edition, September 15-17, 2020 will take place virtually. For more information, visit www.expouav.com/.

Commercial UAV Expo Americas and its sister event Commercial UAV Expo Europe are produced by Diversified Communications' technology portfolio which also includes Commercial UAV News, GeoBusiness Show, International Lidar Technology Forum, SPAR 3D Expo & Conference, SPAR 3D.com, AECNext Technology Expo & Conference and AEC Next News. For information on opportunities for vendors at Commercial UAV Expo Americas, contact Katherine Dow, Sales Manager, at kdow@divcom.com or +1.207-842-5497. For attending information, visit www.expouav.com or email info@expouav.com.

נושא: Israel - Chula Vista Police Department Connection

Dear Daniella, As discussed, I wanted to introduce you to Officer Sallee from the Chula Vista Police Department. Officer Sallee is Police Chief Kennedy's second in command, and is the architect behind the Chula Vista drone program. He is happy to answer any questions you and your colleagues may have.

Dear Officer Sallee, Daniella is at the Israel Innovation Authority and wanted to connect you with colleagues in Israel who are interested in designing similar programs for community outreach as the ones described by Chief Kennedy.

Thank you, and I hope this connection proves useful.

Best regards,

Timothy

NUAIR to Conduct Vertiport Automation Analysis

By The Editor on Aug 17, 2020 06:58 am

Oneida County Executive Anthony J. Picente Jr. announced today that the county has been awarded an \$897,000 task order for Advanced Air Mobility development through a NASA contract with its UAS Test Site at Griffiss International Airport. The county's UAS test site in Rome—one of just seven sanctioned by the FAA in the U.S.—will conduct research [...]

Bald Eagle Attacks Shoreline-Mapping Drone – Drops it into Lake Michigan

By The Editor on Aug 17, 2020 06:34 am

An Upper Peninsula bald eagle launched an airborne attack on a drone operated by a Michigan Department of Environment, Great Lakes, and Energy (EGLE) pilot last month, tearing off a propeller and sending the aircraft to the bottom of Lake Michigan. The brazen eagle vs. EGLE onslaught took place near Escanaba in Michigan's Upper Peninsula [...]

Shaping the 'New Normal' in the Commercial Drone Industry

by Tomasz Karpowicz

That drones and the drone industry itself have changed in the midst of the COVID-19 pandemic is an understatement in every sense. Because the entire world is being reshaped before our eyes. When lockdowns first went into effect there was talk about what it would be like to "get back to normal", but the depth and scope of change that we've seen has completely transformed what it will actually mean to do so.

ormal” that we’re dealing with right now is what we have to focus on, not only because doing so provides a path forward, but also because it’s the only choice we have.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

Don't sign up for free to any or all of the webinars below to join live or on-demand:

Scanning and 3D Building Information Modeling for Construction and Facilities Management Projects

On-Demand

This discussion will highlight how LiDAR data and imagery were used to create an accurate building information model that is currently being used for airport design, construction, and integration into their facilities management program. Visualization capabilities and survey-accuracies are some of the highlights of the developed building model and the speakers will explore how their solutions and workflows utilize these efficiencies to create real-world success stories.

Map: Enabling Autonomous LiDAR Mapping in Challenging, Inaccessible Areas

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to unfold. More changes are imminent, and the drone industry will see and feel them over the next months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many decisions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many more, followed by a live Q&A session with the audience.

Increasing 3D Mapping Productivity, Ease of Use, and Your Bottom Line

Thursday, August 19, 2020 | 11:00AM - 12:00PM Eastern Time

Learn how to vectorize map features quickly and easily to get your work done faster. Whether it's roof and gutter lines from point clouds, or digitizing road infrastructure with stereo photogrammetry, this webinar will give you tips on how to increase the efficiency of your drone mapping workflow and increase your business's bottom line.

Tools to Identify Construction Issues Before They Become Issues

Friday, August 27, 2020 | 2:00PM – 2:30PM Eastern Time

Despite advancements in digital construction technology, workflows targeting cost implication and potential rework in construction are not being widely adopted. Utilizing reality capture, along with other digital construction tools are estimated to reduce rework by 1-3%. Hundreds of millions of dollars are being spent yearly on construction rework that could be reduced and avoided. With today's technology, understanding these workflows to identify issues before they become issues and achieving a zero-rework project can happen; it takes project management innovation and commitment.

Underground & Indoor Mapping with 3D Lidar Mapping

Friday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

LiDAR sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for structural hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Hi Vern,

Today, skilled drone pilots are in high demand because they are the only way to keep manual drones from crashing. As a result, **pilot training can consume up to 80% of a drone program's budget**, and 55% of respondents to a recent survey pointed to the risk of crashes as the main pain point holding their program back.

That's where Skydio Autonomy™ comes in, the AI engine that's built into every Skydio drone. Skydio Autonomy™ is the first computer vision based flight autonomy engine that understands the surroundings of the drone and avoids obstacles in real-time, so you can **focus on your mission while your drone focuses on the flying**. This is **particularly true for public safety agencies** who often fly in very difficult environments, under stressful and time sensitive conditions, where lives are at stake.

Click below to hear Skydio CEO Adam Bry and Head of Public policy Brendan Groves discuss the need for autonomy in this *Drones in America* podcast.

India's Digital Sky could make foreign (DJI) drones illegal

 To help protect your privacy, Microsoft Office prevented automatic download of the picture from the Internet.

The Indian government plans to give permission for drone flights through its Digital Sky system allowing drones to fly above 70% of India's landmass. The drones will only be allowed to fly if they follow the country's strict no permission, no take-off rules.

The new rules came into effect back on August 15th and only allow drone pilots to fly if they are granted permission to do so. On the same date, new green and yellow flight zones were also activated which equates to almost 70% of India's landmass.

Drones in Law Enforcement: Essex Police Explains How They've Made it Work (VIDEO)

In the U.K., the Essex Police Department began their drone program in 2016 – after four years, they've seen how effective drones can be. In the video here, and in this DroneLife interview, the Essex Police Department shares how they did it and what they've learned about drones in law enforcement.

U.S. Nears Law Banning Chinese Drones

An amendment to ban U.S. government use of Chinese drones appears almost certain to become law within weeks. Contained within the National Defense Authorization Act (NDAA), the measure bans the purchase of commercial drones made by a "covered foreign entity," including China, by any U.S. government agency. The ban covers both purchases of new drones and flights of drones already in agency fleets, which would need to end within six months.

The ban extends to drone components including drivetrains, cameras, and circuit boards.

InterDrone Public Safety Webinar Series

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Today's Session: *Pandemics and Privacy: Reducing the Stigma of Drone Use to Support the Public Goods*

Privacy rights vis-à-vis so-called government intrusion have evolved significantly over time and all too often in the wake of technological developments.

Analysis of this historic progression is instructive and offers lessons for the drone industry.

The crossroads of technology development and the COVID19 pandemic is indeed an opportunity for the industry – not just to generate business, but to showcase how responsible utilization can improve public health and safety and individual lives without endangering privacy rights and civil liberties.

This session will review 4th Amendment jurisprudence and offer recommendations as to how the industry can use today's unique circumstances to build community trust and enthusiasm for multitudes of drone applications.?

Register Now!

Featured Presenters

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Drones in Public Safety

Drones and unmanned systems have rapidly become crucial tools for fire, rescue, police and more public safety agencies around the world.

With capabilities for search and rescue, surveillance, crash reconstruction, 3D mapping, drones are saving time, money and most importantly, saving lives across the world.

This webinar Series will answer:

- *How are various public safety professionals and agencies utilizing drones today?*
- *What does it take to implement a public safety drone program?*
- *What are some of the future technologies being developed?*
- *And much more!*

Register Now!

Subject: On Behalf of Dr. Parimal Kopardekar: ICAO UTM Framework Webinar

Follow Up Flag: Follow up
Flag Status: Completed

**Warning:
 External
 Email**

Hello Everyone!

On behalf of Dr. Parimal Kopardekar in his role as the International Civil Aviation Organization (ICAO) UAS-AG Chair, we wanted to inform you of an upcoming ICAO Unmanned Aircraft Systems (UAS) Traffic Management (UTM) webinar. It is free, but they are asking for people to register. Please see details below.

ICAO UTM Framework - Core Principles for Global Harmonization
 (Aug 25, 9 EDT) by Mark Wuennenberg (Technical Officer, RPAS, ICAO)

<https://www.icao.int/Meetings/webinar-series/Pages/ICAO-UTM-Framework--Core-Principles-for-Global-Harmonization.aspx>

BRIEF DESCRIPTION:

This webinar will provide an overview of the current ICAO UTM Framework. This framework has been developed by the ICAO UAS Advisory Group and is based on the information and best practices provided by industry, regulators and academia at the last three DRONE ENABLE symposia. The intent of the UTM Framework is to provide States with a framework, guidance material and core capabilities of a "typical" UTM system.

TARGET AUDIENCE:

CAA UAS regulators and inspectors, UAS Operators and other UAS Stakeholders

Feel free to reach out to [Dr. Parimal Kopardekar](#) if you have any questions regarding the event!

Best,
 Anna Cavolowsky

US Drones Collide and Crash Over Idlib, Syria

By The Editor on Aug 20, 2020 06:56 am

The U.S. lost two drones over Syria Tuesday after a mid air collision, a defense official announced. Images of burning aircraft crashing to the ground were posted on Twitter Tuesday. There was speculation that the aircraft were MQ-9 Reapers — a remotely piloted aircraft used predominantly as an armed hunter-killer drone, but also capable of [...]

Indian Fishermen Net a 'Banshee' Target Drone

By The Editor on Aug 20, 2020 06:36 am

A group of fishermen of Talapada, a nondescript village in Balasore district, were in for a pleasant surprise after netting a prized catch, an unmanned aerial vehicle (UAV) flight tested from the Integrated Test Range (ITR), about 20 km from the place. The British-made target drone Banshee was caught by fishermen who had gone fishing [...]

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Hi Vern,

We recently announced the X2E, the first of its kind drone designed to help operators become more effective than ever before. Artificial intelligence takes care of the flying, so your **teams can focus on the safety** of the communities they serve.

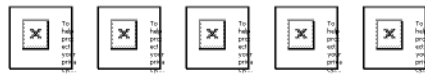

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

From situational awareness and search and rescue, to evidence collection and collision reconstruction, **X2E enables first responders to safely ramp their drone fleets with minimal training**, removing all barriers to enter the drone revolution. **Designed, assembled, and supported in the USA**, X2E provides a higher degree of supply chain security.

You can learn more about X2E below:

 Email**

Hello Vern, we're 24 hours away. What a journey this has been, but we're excited to have you along for it! Here are five ways you can maximize your AirWorks Experience:

1. **Practice tuning in** by watching this [pre-conference session](#).
2. **Join the discussion** in Slack. [Request access here](#), if you're not already in.
3. **[Schedule a braindate](#)** ahead of the event to learn from and connect with fellow attendees.
4. **[Win prizes via the AirWorks Game](#)** using the game code: **5DB58C**
5. **Plan your schedule** with the AirWorks Mobile app for [iOS](#) or [Android](#).

Download the 2020 Guide Book

Having Trouble Tuning In?

We've got you covered! We've posted some [frequently asked questions here](#). For trouble shooting issues, check out our [technology partner's guide on this page](#). If all else fails, reach out to our team via the **#airworks-support** Slack channel or at airworks@dji.com.

Last Reminder For Braindates!

Why get in early? Posting your Braindate topic early will offer other attendees an opportunity to sign up, propose a time, or even get inspired to create their own Braindate!

Virtual braindates are knowledge-sharing conversations that you book with others to have one-on-one or in small groups (via video chat), on the Braindate platform. They're the best way to connect with, learn from, and have terrific conversations with new people—all virtually.

Here are a few topics you can join:

- [What's the latest with FAA Remote ID?](#)
- [Developing a Regional Unmanned Response Team](#)
- [How can we improve gender diversity in the drone industry?](#)

The AirWorks Game

The AirWorks Game gives you an opportunity to earn points towards daily giveaways during the virtual event. To play, download the ScanHunt App for iOS or Android and enter the code **5DB58C!** Here are the great prizes we have in store for you:

- DJI Mavic Air 2 (x 4!) from the AirWorks Team
- FLIR ONE Pro from [FLIR Systems, Inc.](#)
- Part 107 Made Easy Course from [Pilot Institute](#)
- GPC M300 Case from [Go Professional Cases](#)
- Children's Drone Books for ages 5 - 8 (x 3!) from [Women and Drones LLC](#)
- A 2020 Commercial UAV Americas Virtual Full Conference Pass from [Commercial UAV Expo](#)
- A surprise giveaway from DJI

For reading this far, here's another code for you to scan for the AirWorks Game:

From my AirWorks Team and I, thank you. See you (virtually) tomorrow!

Warm Regards,

Denise Hibbard from the DJI Enterprise Team

DJI, 201 S. Victory Blvd, Burbank, California 91502

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Hi Vern,

Whether you are just starting a Public Safety UAS Program or have an existing program that wants to expand into advanced operations, public acceptance is critical.

To help serve this important community, and advance the responsible and effective deployment of drones, Skydio has partnered with DRONERESPONDERS to develop *The Five C's: Principles on the Responsible Use of Drones by Public Safety Agencies*.

The "Five C's" deliver much-needed clarity by focusing on five fundamental concepts that every program should embody:

1. **Community Engagement and Transparency**
2. **Civil Liberties and Privacy Protection**
3. **Common Operating Procedures**
4. **Clear Oversight and Accountability**
5. **Cybersecurity**

Read more about what led to Skydio's involvement in creating The Five C's here.

You can also check out this in-depth discussion with Skydio and industry leaders on how legal and regulatory requirements have shaped and will continue to shape the drone industry.

The world has changed. But the need to learn is stronger than ever.

Leading commercial drone experts will tackle the topics everyone in the industry needs to keep up with— regulatory issues, expanded operations, UTM, security, AAM, detect and avoid, remote ID, drone delivery, machine learning and AI, the pandemic's impact, and [more](#) during [Commercial UAV Expo Americas 2020](#) taking place virtually Sep 15-17. Here are just some of the UAS experts on the roster.

As with the live event, focused breakouts and roundtable discussions will provide a deep dive into specific vertical industries including surveying and mapping, construction, energy and utilities, infrastructure, agriculture and ranching, and public safety and law enforcement.

SEE MORE SPEAKERS

SEE CONFERENCE
AGENDA

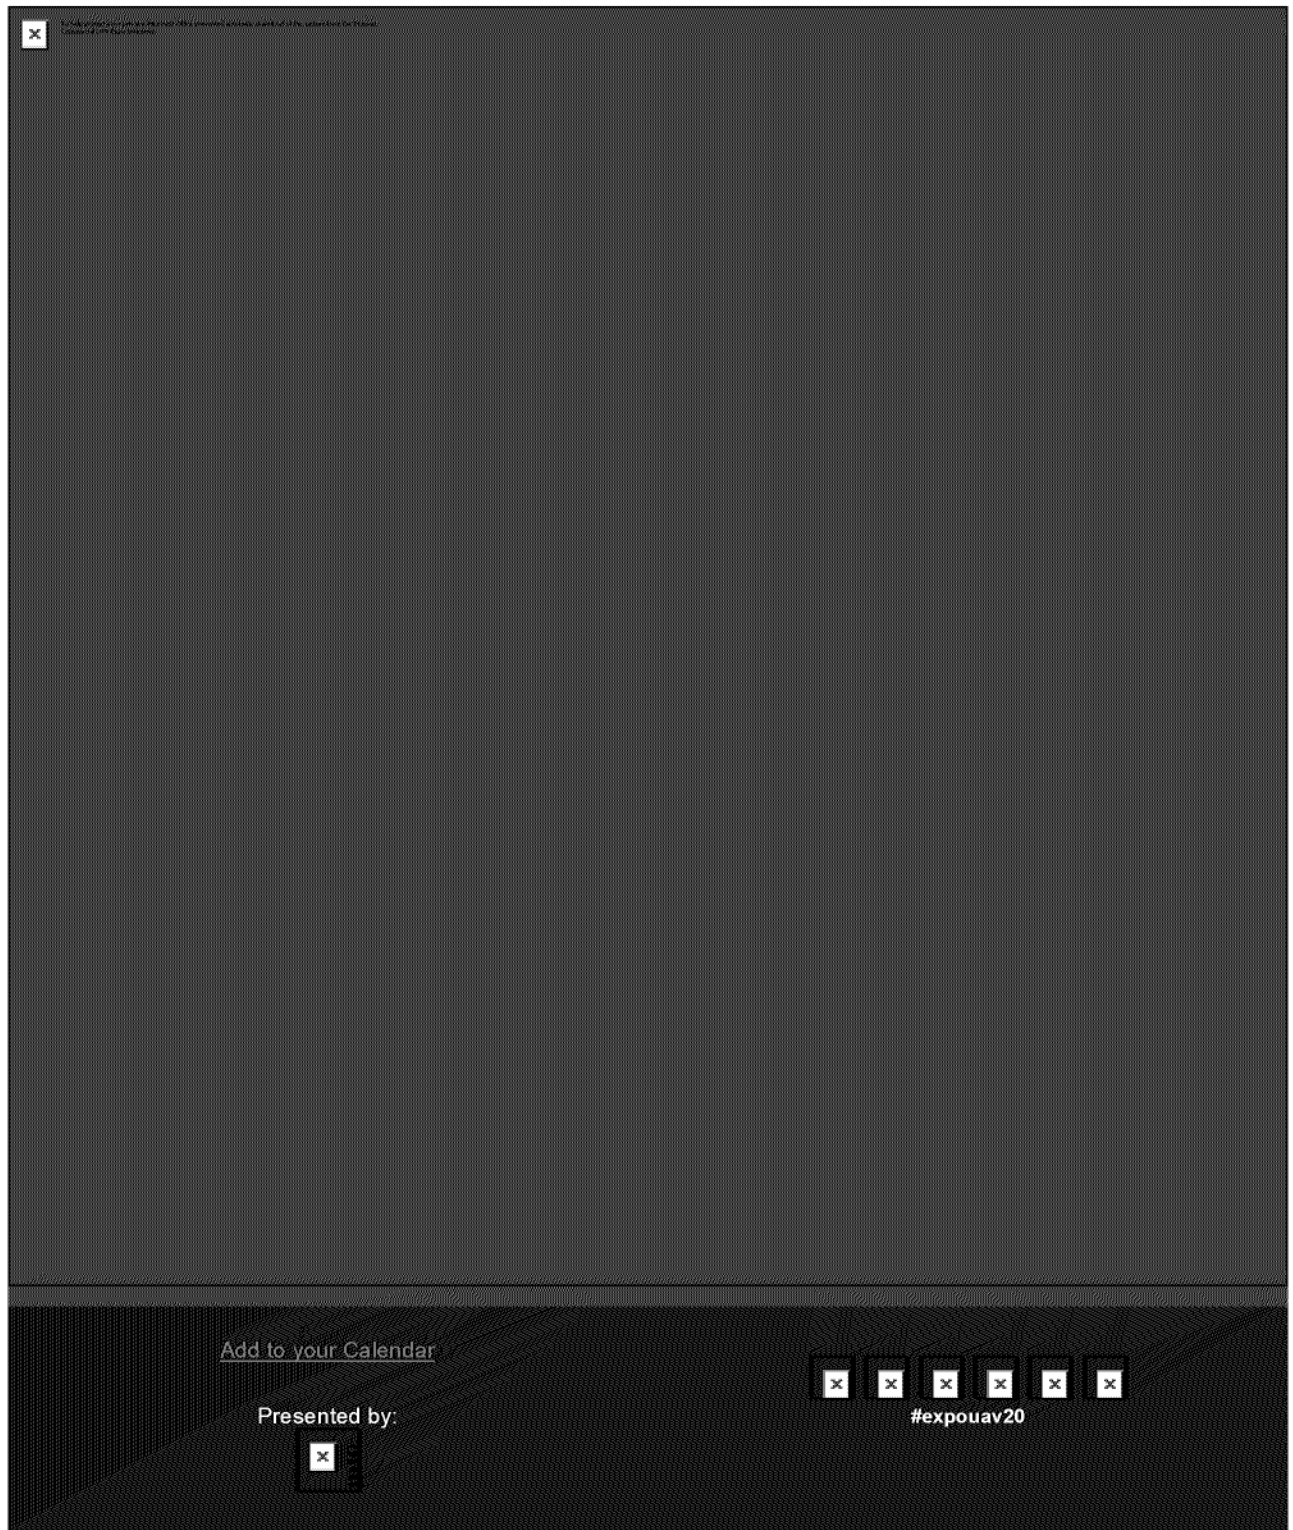

Live conference programming with Q&A and chat, real-time virtual networking, and virtual booths with staffed "Power Hours" will bring the event to life!

Register by September 1 for early-bird pricing and score a Full Conference Pass for just \$295.

In addition to the programming that will be streamed from Sep 15-17, you can watch **ALL** the content on-demand for 30 days after the event.

Last Chance to Get Your AirWorks Ticket!

Hello Vern,

Our 5th annual AirWorks Conference starts in just a couple of days. For \$99, you can join over 800 members of the drone industry as they tune into educational breakout sessions, engage in networking and conversations, and push forward the forefront of the commercial drone ecosystem. Tickets to this virtual event give access to three keynotes from DJI and partners, chances to win prizes, and full access to all presentations for 1 year.

[Reserve My Spot](#)

With 70+ breakouts from over 100 speakers, there is certainly something at AirWorks for you. Click [here](#) for a sneak peek at speaker programming.

Complete This Survey for a Free AirWorks Ticket

The DJI Service team is looking to provide users with a better service experience and would like to hear your thoughts. Feedback is greatly appreciated!

Fill out the survey before **Tuesday, August 25** for a chance to win a free AirWorks Ticket!

*Your responses will be kept confidential and used for internal process improvement only. For more information on how your information will be used, please visit <https://www.dji.com/policy>.

Take the Survey

FAA Speaks Drone Safety in Spanish

By The Editor on Aug 26, 2020 06:38 am

The Federal Aviation Administration has launched a pilot program to translate into Spanish select web content for users of Unmanned Aircraft Systems . The program is expected to reach the nearly 25.6 million people living in the United States with Limited English Proficiency (LEP) and will focus on Spanish, the most widely spoken language in the U.S. other than English. [...]

Spotlight: VP Racing Fuels

VP Racing Fuels leverages specialty fuel technology experience to keep UAVs up and running

VP Racing Fuels, a company that has been fueling champions in virtually every form of motorsport on land, sea, and air with its fuel technology since 1975, has for more than 10 years now been indirectly working with UAVs. Recognizing the immense value that UAVs provide society, especially the military and public safety sector, VP has aligned itself within the UAV industry to make sure that these systems stay in the air so that they can complete their missions safely and efficiently.

A fuel-agnostic, do-it-all engine for power anywhere

Here's a novel idea: Equip a drone with a powerful but compact turbine engine that gives it the same sort of range and flight characteristics turbine-powered aircraft have. Then fly the drone to a remote area or one cut off by disaster, where the same engine can work as a generator that runs off of virtually any local fuel source.

EXCLUSIVE: Natural gas and methane industries pave way to UAV opportunities

The natural gas and methane industries could play a key role in reducing the severity of the COVID-19 reactions which varies notably from region to region around the world, says Aaron Bufton.

TOP NEWS

Grand Rapids to resume autonomous shuttle service

MiBiz (8/24/2020)

After pausing operations due to the COVID-19 pandemic, May Mobility Inc.'s free autonomous shuttle service is set to resume service in Grand Rapids, Michigan on August 31. May Mobility officials and the city have modified shuttle interiors to separate vehicle operators from passengers, while the passenger area is limited to one person or a single group. Riders will be required to wear face coverings.

Speakers tout success of UAS IPP program during Episode II of FAA UAS Symposium AUVSI (8/24/2020)

With the current iteration of the UAS Integration Pilot Program set to conclude in October, speakers during Episode II of the 5th annual FAA UAS Symposium “Remotely Piloted Edition” reflected on the success of the program, and the immense value that it has provided over the last three years.

participate in the study, you have to either have taken our Basic Training or gotten a COA through us! Reply to this email if you would like to take part!

THE FAA'S NEW ENFORCER

THE BALD EAGLE

You know what they say, “don’t send a drone into a territorial raptor’s airspace if you ever want to see that drone again.” Or is that just around the Skyfire virtual water cooler? Anyway, this story has made its rounds in the drone world, but it’s just too absurd for us to not mention.

The drone, a Phantom 4 Pro Advanced, was flying a routine pattern checking for how water levels are affecting the Great Lakes when suddenly it started to spin. While it was a routine flight, and one of many that day, the ending was anything but routine. We speculate that while sipping its morning coffee, the bird was probably just tired of those crazy kids always messing around with those new fangled flying devices, disturbing the beautiful Michigan morning, and decided to take matters into its own claws. Still no word from the FAA on forthcoming enforcement action against the eagle..

SKYBORG

YOU CAN BE MY WINGMAN ANYTIME

x

Photo courtesy: Popular Mechanics

Skyborg was designed for a couple of reasons, but more use cases have come up as it's been developed. Initially the Skyborg was to be a replacement for the Predator and Reaper drones. And now they are saying it could very well be a replacement for the F-16 and other manned military aircraft.

Skyborg started out as an onboard AI to help pilots fly the plane while they were in conflict. It took some of the minor tasks off their minds allowing them greater focus to engage in aerial combat. Kind of like R2D2 in Star Wars. Once it became an aircraft, it was supposed to be a sidekick of sorts, flying alongside a manned aircraft, being used as bait in dog fights, extra payload storage, or emotional support. Just to know someone cares enough to show up... I'm fine, I'm fine.

But now with sub and supersonic models, the Skyborg would be able to replace manned aircraft altogether while being cheaper than a conventional aircraft, and keeping pilots safer. The ultimate benefit would be the Skyborg's inability to make Top Gun references. Unless it becomes self aware...

**NEW RUSSIAN STEALTH DRONE. YOU
KNOW WHAT THAT MEANS??**

DRONE BUILD OFF!!

x

Photo courtesy: Forbes

Well, the two superpowers are at it again. Hopefully things don't escalate in a similar fashion though. Anywaaaay, this Russian drone called the S-70 Okhotnik, or "Hunter" for those of us who aren't fluent in Russian, is being touted as an unprecedented behemoth in the drone world. It's capabilities include the ability to carry 13,000 pounds of bomb ordinance and being able to fly ~3,000 miles (which isn't even far enough to fly across all of Mother Russia). In all honesty this will probably be an impressive drone but we'll have to wait until 2024 to see what it's capable of. And that's a whole year after we'll have the Skyborg! Race already won. USA! USA! USA!

...Huh, there must be some sort of sale going on at Men's Warehouse. There are so many guys with black suits walking around outside.

Hi Vern,

We are thrilled to pass along the FAA's announcement that any public safety agency can apply to conduct the game-changing Tactical Beyond Visual Line of Sight (BVLOS) operations that Skydio pioneered in partnership with the Chula Vista Police Department (CVPD). We were honored to help CVPD blaze this trail, and look forward to helping agencies adopt these new life-saving operations.

To learn more about how to take advantage of the new regulations, and how Skydio can help you integrate these new operations into your drone program, please check out our recent blog.

Importance: High

Good Afternoon Don and Eric,

I would just like to run this by you both. As we have requested a portable launch drone and vehicle for our Stonegarden grant, I just want to confirm that neither the equipment nor the systems the drones are dependent upon are telecommunications that are specifically excluded per the attached memo. I don't think this applies to us, but as the experts on the technology the department uses, I want to clear this through you.

Thanks,
 Bev

Pentagon to Launch Task Force to Investigate UFO Sightings

By The Editor on Aug 25, 2020 06:47 am

The Pentagon is forming a new task force to investigate UFOs that have been observed by US military aircraft, according to two defense officials. Deputy Secretary of Defense David Norquist will help oversee the task force, which is expected to be officially unveiled in the next few days, according to the officials. Previous efforts to look into [...]

FROM THE EDITOR

gs!

In a drone world, there are new developments daily, if not hourly. It can be difficult to stay on top of the announcements, product announcements, and new services out there that can make your workflow faster, safer, or cheaper. Every year at Commercial UAV Expo Americas, we host a product preview of emerging technologies, but with the pandemic, we are getting a head start on this year's festivities by hosting our ever Emerging Tech Showcase webinar on September 2nd from 11:00 AM to 12:30 PM EDT . During these presentations, we'll have live staff to answer audience questions in real time from each of the companies, which includes big names like Skydio, RIEGL, Sabrewing, Auterion, Alynix, MicaSense, NARMA, and Ascent Systems. This is a great opportunity for anyone who has interest in these systems to engage in a conversation with designated experts.

For this free presentation you can register [here](#).

Stay well and be safe,

Danielle Gagne

Tactical Beyond Visual Line of Sight Waivers Will Enable a Critical Use of Drones in Emergency Situations

By Emiah Karpowicz

Public safety advocates have been working with the FAA to create the Tactical Beyond Visual Line of Sight (TBVLOS) waiver process. This is the culmination of over nine months of collaboration with York County Fire and Life Safety, Chula Vista Police Department, San Diego IPD and Police Department, SKYDIO and DRONERESPONDERS. The FAA introduced TBVLOS to allow public safety responders to more effectively use their drones BVLOS in emergency situations to best assess the operational environment.

2021

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

The entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

Now sign up for free to any or all of the webinars below to join live or on-demand:

Scanning and 3D Building Information Modeling for Construction and Facilities Management Projects

On-demand

This discussion will highlight how LiDAR data and imagery were used to create an accurate building information model that is currently being used for airport design, construction, and integration into their facilities management program. Visualization capabilities and surveying accuracies are some of the highlights of the developed building model and the speakers will explore how their solutions and workflows utilize these efficiencies to create real-world success.

Topic: Enabling Autonomous LiDAR Mapping in Challenging, Inaccessible Areas

On-demand

-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning. More changes are imminent, and the drone industry will see and feel them over the next months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many decisions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many more, followed by a live Q&A session with the audience.

Optimizing 3D Mapping Productivity, Ease of Use, and Your Bottom Line

Command

Learn how to vectorize map features quickly and easily to get your work done faster. Whether you're digitizing roof and gutter lines from point clouds, or digitizing road infrastructure with stereo photogrammetry, this webinar will give you tips on how to increase the efficiency of your drone mapping workflow and increase your business's bottom line.

Tools to Identify Construction Issues Before They Become Issues

Command

Despite advancements in digital construction technology, workflows targeting cost implication and potential rework in construction are not being widely adopted. Utilizing reality capture, along with other digital construction tools are estimated to reduce rework by 1-3%. Hundreds of millions of dollars are being spent yearly on construction rework that could be reduced and avoided. With today's technology, understanding these workflows to identify issues before they become issues and achieving a zero-rework project can happen; it takes project management, collaboration and commitment.

Underground & Indoor Mapping with 3D Lidar Mapping

Friday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to capture data that may not have been possible otherwise, especially within linear drifts and for structural hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Select a Lidar System for UAV Operations

Friday, December 1, 2020 | 1:00PM – 2:00PM Eastern Time

Want to hear about the newest 3D solutions? Curious to discover which innovations are changing AEC workflows? Our Emerging Technology Showcases provide attendees with an opportunity to get up to speed around the latest product launches and innovations throughout the year.

From LiDAR and Actionable Data

Friday, January 12, 2021 | 1:00PM – 2:00PM Eastern Time

Drone operators for rapid, efficient point cloud capture, and high-resolution images, during corridor-wide area-mapping projects have redefined expectations related to what it means to quickly capture actionable data. A panel of experts will discuss how airborne lidar has made a measurable difference for stakeholders of all types.

WEBINAR INVITATION

REGISTER

Join DRONERESPONDERS, the FAA, and Skydio for this special webinar to discuss The Five C's and why they are critical for responsible public safety drone operations.

Thursday, July 30
2:00-3:00 p.m. Eastern

The Five C's revolve around five critical pillars:

1. Community Engagement and Transparency
2. Civil Liberties and Privacy Protection
3. Common Operating Procedures
4. Clear Oversight and Accountability
5. Cybersecurity

For more information on The Five C's, please visit:

<http://5Cs.droneresponders.org>

A rectangular button with a dark grey background and white text that reads "REGISTER". The button has a slight 3D effect with a shadow on the right side.

SPEAKERS

Moderator:

CHIEF CHARLES WERNER, (ret.)

Director

DRONERESPONDERS Public Safety Alliance

Speaker:

MICHAEL O'SHEA

Program Manager, UAS Integration Office
Federal Aviation Administration

Speaker:
CHAD KARLEWICZ
Police Commander
Renton Police Department

Speaker:
BRENDAN GROVES
Head of Regulatory and Policy Affairs
Skydio

Subject: What is the value of going virtual?

Categories: Green Category

**Warning:
External
Email**

FROM THE EDITOR

Greetings!

What should we expect of a virtual event? And how have those expectations been met so far? These are the questions everyone at Commercial UAV News and Commercial UAV Expo Americas are asking as they plan their first virtual event. It requires really understanding the value that events and trade shows offer this industry, and then translating that value to a whole new platform to generate positive experiences without digital fatigue.

Working as the Editorial Analyst for Commercial UAV News, I've connected with many of you across the industry since the pandemic hit and almost all of those conversations have been about ways we can come together to convey the value that drones can provide today during and well after this crisis. The upcoming virtual event from September 15 to 17 offers everyone in the industry an opportunity to do just that. Read our featured article, "Defining What a Virtual Event Should Be for the Commercial Drone Industry," and listen to our latest appearance on Randy Goers' Drone Radio Show to find out more.

I am looking forward to sharing more about going virtual in the weeks leading up to the event!

Defining What a Virtual Event Should Be for the Commercial Drone Industry

By Danielle Gagne

For anyone who has attended the myriad of virtual events, webinars, town halls, and fireside chats offered since the pandemic hit, it has probably already become clear that not all digital events are created equally. Depending on your expectations and how you defined the term “virtual event,” this has probably already started to influence your thoughts about it, for better or worse. With mass gatherings still globally restricted, virtual events are where it is at to make connections, get leads, network, and become informed about the latest news, technology, and ideas in the industry. Yet, without knowing what to expect, how do you decide where to spend your time and money? Find out here.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

As the entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help them make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

You can sign up for free to watch any or all of the On-Demand webinars below:

What's the Future of Lidar?

On-Demand

This panel discussion features industry executives from the leading geospatial firms in the US, who will share their thoughts and the future of the lidar industry, broadening applications, areas of opportunity for growth, emerging technology trends, and more. Carla Lauter, Editor for Geo Week News will Moderate the panel discussion.

How Will COVID-19 Impact the Present and Future of the Drone Industry?

On-Demand

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent and

the drone industry will see and feel them over the coming months and years. What has this situation taught us about how drones can be utilized in emergency situations? How do the revised economic prediction for 2020 impact the many predictions that have been made about the future of drone technology? What will the “new normal” in the drone space look like? Join a panel of experts to discuss these topics and many others, followed by a live Q&A session with the audience.

Is the World Ready for Drone Delivery?

On-Demand

Due to regulations and other logistical and philosophical issues, the drone delivery industry has been relatively restricted to how much it can scale. However, due to recent global events, drones are starting to get attention not only within the industry but by the media and the public. Join us on May 13th at 12:00 pm to 1:00 pm ET to talk about what opportunities are beginning to open up, what obstacles are still in place, and other ways the conversation around this industry is changing.

Getting America Back to Work Using Drones

On-Demand

As entire industries work to “get back to normal” many companies have defined a new normal that is allowing them to survive and thrive. How exactly have processes and workflows that utilize drone technology been defined or redefined? What impact is the technology enabling in sectors that range from public safety to agriculture to construction to energy? Join us on May 21st at 4:00 PM ET to hear a panel of industry experts discuss the ramifications that drone technology has had across sectors, what’s at stake for any organization clinging to “the way we’ve always done it,” how innovations in the present will define a path for the future and much more.

The Handheld Scanning Revolution: How SLAM Scanners Can be Leveraged to Enhance Reality Capture Workflows

On-Demand

Handheld Simultaneous Localization and Mapping (SLAM) lidar scanners are broadening the use cases of 3D capture by providing versatile and portable solutions for difficult scanning tasks. SLAM-based handheld scanners have been increasing in use across construction, transportation, and urban planning because they can often go where traditional scanners cannot – and offer the ability to work without a GPS signal. Learn from a panel of experts how handheld SLAM lidar scanners can be added to existing workflows, how the technology has advanced, and how handheld SLAM scanners are being used to creatively solve reality capture challenges.

Making 10 Bands Work for You: Capabilities of "Superspectral" Imaging

On-Demand

Imaging with five multispectral bands is the industry standard for vegetation analysis, yet many drone-imagery applications would benefit from more in-

depth spectral information. The Dual Camera System from MicaSense features 10 multispectral bands and opens the door for a broader range of use cases. Join us for a webinar and learn how superspectral imaging enables aquatic weed detection, drone/satellite comparison analysis, species classification, coastal mapping and more!

Top 5 Takeaways:

- Learn about the possibilities of mapping over water
- See 10-band data examples of species classification, forest stand counts, aquatic weed detection and more
- Learn about the additional 5 bands on the Dual Camera System
- Understand the options for standard drone integrations
- Discover the benefits of drone-based multispectral imaging

No Throw-Away Drone Data Allowed: How the Right Data Provides a Single Source of Truth for Critical Assets in Any Phase

On-Demand

Transparency, among every constituency, is one of the best means to mitigate risks. Establishing a single source of truth for your asset or construction projects enables all necessary stakeholders to reference the same consistent data. The earlier that a project or asset starts collecting high quality, consistent data, more insights you will be able to extract and the richer the data will be into the development of a digital twin. We will discuss how the right data collection and technical know-how can generate the highest quality data to manage your asset, critical infrastructure, or construction project.

Top 5 Takeaways:

- Learn how to reduce time and cost inspecting your assets and critical infrastructure using high, quality consistent data.
- How Eye-bot's, geoXD network enhances the value of high quality, visual data
- Understand the value of drone data for predictive analytics
- Recognize the value of reality model vs. design
- Learn how Shell Polymers uses Eye-bot's data collection and processing methodology to enhance collaboration, improve safety, and decision making

Texas Drone Law Places Severe Restrictions on Aerial Photography, Videography

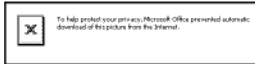

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Under current Texas state law, it is illegal to use a drone to capture an image of private property without the owner's consent, unless you are a law enforcement office, a professor doing research, a surveyor, an employee of an oil and gas or

power company, or someone covered by one of the more than a dozen other exemptions to the law.

To: Vern Sallee
Subject: Channel 12 TV Interview - 7/29

Importance: High

Vern – channel 12 will interview the chief on 7/29. (see thread below)

- They wanted a Spanish speaker if possible w/the chief
- They wanted 3 questions they can ask the chief (gave PD the choice on what to talk about)
- They wanted to see the drone program & discuss it. Pretty much anything which could include 911 calls.

Can you help w/all three? I will send outlook invite so it is on your radar.

To: xhernandez@xewt12.tv
Subject: TV Interview

Good afternoon,

- Yes, I believe you will have Patricia attending, but will she bring a camera person? **Yes, it will be Patricia and a cameraman.**
- Will we need a Spanish speaking officer to translate? **Ideally yes please, but if not available we will subtitle.**
- For comfort, please wear comfortable shoes (small tour) **Thank you!**
- And do you still want us to send three primary questions, or will you be sending us some questions? **Yes please, if you are able to provide at least 3 questions, that would be wonderful.**
- The chief will talk on the 911 program and drones. **Thank you!**
- Please wear masks. **Will do!**

You can park in our parking lot (on 4th Ave & F St) and come to the front counter – just ask for the chief's office. **Thank you!**

<p>Warning: External Email</p>

Good afternoon Cathy,

Hope this email finds you well. Mrs. Alvarez de los Cobos has asked me to assist with the coordination of this interview. 7/29 at 10am would be perfect on our end.

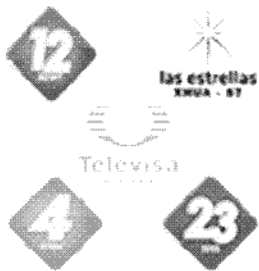

Would it be possible to conduct the interview at our office here in Chula Vista? Our address is: 637 Third Avenue, Suite B-C, Chula Vista, CA 91910. We are following all City of Chula Vista sanitization protocols.

In preparation for the interview:

- Can you provide us with three main questions that you would like for us to ask?
- Your cell number (in case something happens)
- Your complete name and position (as you would like for it to appear on the interview)

Thank you so much!

Good afternoon. Chief Kennedy would be available to speak on the drone and 911 program at our station.

I have 3 dates she is available for a ½ hour interview:

7/22 at 10 am

7/29 at 10 am

7/30 at 10 am

If one of these dates and times are acceptable, please let me know. Also, please let me know if you will have questions and if you will forward them to me so she can be prepared.

Thank you.

Dear Daniella, As discussed, I wanted to introduce you to Officer Sallee from the Chula Vista Police Department. Officer Sallee is Police Chief Kennedy's second in command, and is the architect behind the Chula Vista drone program. He is happy to answer any questions you and your colleagues may have.

Dear Officer Sallee, Daniella is at the Israel Innovation Authority and wanted to connect you with colleagues in Israel who are interested in designing similar programs for community outreach as the ones described by Chief Kennedy.

Thank you, and I hope this connection proves useful.

Best regards,

Timothy

Subject: RE: Thank you for your participation!

Good morning Harrison,

Sorry for the slight delay, Chief Kennedy has had an extremely busy schedule this week and has not had much time to respond to emails.

I helped Chief Kennedy prepare for the session and sat with her throughout, so I have a good idea of how things went from her perspective. I would say that it was very well organized and well run. Chief Kennedy and I have participated in many online podcasts, webinars and seminars as well as co-presenting live dozens of times.

In our subsequent discussions, I feel confident sharing that our takeaway was that you had a well balanced panel with excellent subject matter experts. Your moderator, Jay Merkle was outstanding, as I expected, since I have worked with Jay a few times. Knowing that the moderator is looking to draw out the best in a speaker's "wheelhouse" of expertise is a good feeling. Having the pre-meeting to lay out expectations was excellent.

With regard to taking the conversation forward, CVPD stands ready to participate in any manner that can advance sharing the message of drones for good, especially in the public safety space. Telling the positive stories, teaching other agencies and companies how to do proper outreach while respecting civil rights and privacy rights is key to scaling drones going forward.

That being said, when she has some time, I'm sure she would also love to hear more about drone uses in Africa. Her mission work there is a huge passion and I'm sure she would love to find ways to help even more.

Call on us anytime you may need us.

Warmest regards,
Vern

Dear Chief Kennedy,

I would like to thank you for making the session, 'Medicine from the Sky: Using Drones to Fight Pandemics' such a success. Your passion, knowledge, and experience on this topic brought it to life, and I am sure you inspired many to continue this critical conversation beyond the conversation. Thank you for being flexible in the timing, allowing us to go a little long with such high interest and engaging conversation.

Hearing how drones are used to address the challenges faced by first responders and how you work with the community to drive understanding, acceptance, and cooperation was fascinating and a piece of the conversation that is often missing. It is also particularly relevant to all of our African colleagues who are looking for how their own safety and security teams can use drones in a productive and socially acceptable way. With my family being from Fallbrook, La Jolla, and having worked closely with SDG&E in the past, I really appreciate the work you're leading at a national and local level.

We would love feedback on the experience. Please do email me your input on what you took away from the session and how you suggest we take the conversation forward in the future.

Thank you again for your contribution and take care.

With best wishes,

Harrison Wolf

Sirs,

I verified the information in tomorrow's webinar was largely relayed to our pilots running this trial (Jonathan and Chris). Mo said if there is anything important put out tomorrow that he didn't cover with them he will let us know. As a note, Mo said they will be releasing a more robust fleet management side of the software very soon so we'll keep an eye on that. The next update will also allow us to enter NOTAMS from the software.

Thanks,

Tony

WEBINAR INVITATION

Join our webinar Thursday, July 23rd, 2:00pm EST to learn about AiRXOS' Public Safety UAS Solution – a comprehensive UAS solution curated to

enable the rapid drone deployment required for emergency response
without compromising on safety or compliance!

AiRXOS, part of GE Aviation, introduces their new Public Safety UAS Solution – your single source for all the integrated, connected tools you need for near real-time Situational Awareness (SA), faster, precise location-based advisories, and flight authorization to help get you flying quickly and in compliance with FAA regulations. Fully operational in a mobile platform, AiRXOS' Public Safety Solution is designed with maximum efficiency and safety built-in, eliminating the need for multiple applications, labor-intensive flight authorizations, and limited operational visibility.

The Public Safety Solution also includes:

- Automated airspace alerts and advisories
- Automated regulatory and policy compliance
- Video streaming capability
- Low Altitude Authorization and Notification Capability (LAANC) service
- Agency-wide operational SA
- Authenticated end-users
- Digitized public engagement
- Remote identification (Remote ID)*

**Pending final FAA approval*

AiRXOS will also demonstrate a **NEW** mobile application that offers emergency responders a complete, turn-key drone program. See how AiRXOS provides Public Safety agencies with automated SGIs, COAs, LAANC, Waivers, and Advisories so you can fly quickly and safely when seconds count.

SO MANY GIVEAWAYS!

Since our website giveaway was so popular, we decided to do another one! SKYFIRE DOES A GIVEAWAY, PROPELLER HEADS DOES A GIVEAWAY, EVERYBODY DOES A GIVEAWAY!

The stakes may be a little lower, but still, who's going to complain about free stuff? For real though, if you complain we (probably) won't send it to you...

This giveaway once again has us in cahoots with W.S. Darley & Co. and we've teamed up with them to give away a DJI Inspire 1 v2! Sign up for the giveaway will begin August 11th when the next Propeller Heads comes out. No real need to mark it in your calendars, we'll mention it then too!

DODGE, DUCK, DIP, DIVE AND DRONES

Image courtesy: Knowridge Science Report

For years, robotics and aeronautical engineers have turned to nature for inspiration. The Wright Brothers wing design was modeled from a birds wing, Boston Dynamics have their robotic dog/horse things, and Roomba based their vacuum off of... Hmm... We'll circle back here. A catfish maybe? The point is, why reinvent the wheel? If something is working in nature, just take a note from that and apply it where you can.

A team of scientists based in South Australia, Singapore, China, and Taiwan have come up with what seems to be a lighter than air meets flapping wing hybrid. They're still in the development phase, but their drone weighs just 26 grams. It's not more efficient than a quadcopter purely because of its weight or lack thereof, but it also has wings that provide lift and allow it to glide, which is something quadcopters are typically not designed to do..

It's also much quieter than typical drones which is a definite plus. Some of the plans for this drone include surveillance, but also chasing birds away from airports and acting as pollinators at large farms.

150mph WINDS, SURE!

BUT THEN THERE ARE 'GATORS

Photo courtesy: TimesofIsrael.com

Hurricane season is upon us and an Israeli company, Percepto, has created the first drone to fly in 150mph winds, called the Sparrow. Well, we should qualify that the Sparrow is the first drone to safely fly in 150mph winds. Does a tourist holding on to an umbrella count as a manned drone? Where better could a drone that can survive hurricane level winds be, than the great state of Florida? Florida Power and Light seems to be one of their biggest current customers. The power company intends to have one of these systems at every substation, transmission yard, plant and solar facility. The only price estimates we were able to find were in the range of \$100-250k. So Florida Power and Light customers should be on the lookout for a rate hike once they roll this one out!

Because the drones are capable of autonomous flight, they can fly the drones even in the off season to maintain their infrastructure. The drones launch, land, charge, and can even be assessed for damage from the station or “Box”.

What happens when the drone hits a pterodactyl sized mosquito, or the buzzing aggravates a momma alligator nearby? Winds are one thing, but dinosaurs are a completely different ballpark.

**NO NEW INFO ON ROGUE DRONES,
UNLESS THAT'S WHAT THEY WANT US TO THINK??**

✕

Photo courtesy: Business Insider

In the before time, the latter part of 2019 A.D., a phenomenon known as “Rogue Drones of Colorado” swept through the drone community. Nighttime sightings of a larger “Mothership” surrounded by many smaller drones flying in formation were reported not only by people living in RVs near Area 51, but also by trusted members of these rural communities, including police officers.

Much has happened in the year 2020, making it easy to forget the mysteries of the past, but dedicated investigators never gave up on the search. There still isn’t much known about what type of drones they are, or who was operating the swarm, and no government agency claims to be responsible. The FAA sticks to their story that they are in the dark, the same as us all. But one can’t help but think, someone knows something.

Were we visited by an alien species? What did they want? Did they know there are better places to visit than Colorado? Did they get bad directions from someone at a gas station outside of the Milky Way only to find there was no intelligent life on this planet? We may never find out. But that won’t stop us from searching.

Sent: Thursday, July 09, 2020 2:14 PM
To: xhernandez@xewt12.tv
Subject: TV Interview

Good afternoon,

- Yes, I believe you will have Patricia attending, but will she bring a camera person? **Yes, it will be Patricia and a cameraman.**
- Will we need a Spanish speaking officer to translate? **Ideally yes please, but if not available we will subtitle.**
- For comfort, please wear comfortable shoes (small tour) **Thank you!**
- And do you still want us to send three primary questions, or will you be sending us some questions? **Yes please, if you are able to provide at least 3 questions, that would be wonderful.**
- The chief will talk on the 911 program and drones. **Thank you!**
- Please wear masks. **Will do!**

You can park in our parking lot (on 4th Ave & F St) and come to the front counter – just ask for the chief’s office. Thank you!

Hi Cathy,

Most certainly! We are happy to do the interview at the CV Police Department. Are we still confirmed for 7/29 at 10am? Are there any protocols that you need for us to follow?

Thank you kindly,

Xochitl

Good afternoon, Xochitl,

Unfortunately, Chief Kennedy's calendar is so full, she really cannot come to the Channel 12 newsroom. Our department is also following the city's protocol for COVID-19. Please let me know if this is doable. She thought this would also give the opportunity to see the drone program, etc.

Good afternoon Cathy,

Hope this email finds you well. Mrs. Alvarez de los Cobos has asked me to assist with the coordination of this interview. 7/29 at 10am would be perfect on our end.

Would it be possible to conduct the interview at our office here in Chula Vista? Our address is: 637 Third Avenue, Suite B-C, Chula Vista, CA 91910. We are following all City of Chula Vista sanitization protocols.

In preparation for the interview:

- Can you provide us with three main questions that you would like for us to ask?
- Your cell number (in case something happens)
- Your complete name and position (as you would like for it to appear on the interview)

Thank you so much!

Xochitl

Good afternoon. Chief Kennedy would be available to speak on the drone and 911 program at our station.

I have 3 dates she is available for a ½ hour interview:

7/22 at 10 am

7/29 at 10 am

7/30 at 10 am

If one of these dates and times are acceptable, please let me know. Also, please let me know if you will have questions and if you will forward them to me so she can be prepared.

Thank you.

Schiebel Pacific and Raytheon Australia Team for Army Tender

By The Editor on Jul 28, 2020 06:59 am

Schiebel Pacific and Raytheon Australia have teamed up for the LAND129 Phase 3 Tactical Unmanned Aerial System (TUAS) project for the Australian Army. The tender response was submitted last week. The teaming couples Schiebel's proven and world-class CAMCOPTER S-100 UAS with Raytheon Australia's 20 year pedigree as a trusted, prime systems integrator across multiple domains. [...]

Hi,
Thank you. This is a tremendous help.

Judge Finlay

Susan Marrinan
President@CoronadoDems.com
[Join the Coronado Democratic Club](#)

On Mon, Jul 27, 2020 at 11:01 AM Vern Sallee <vsallee@chulavistapd.org> wrote:

Good morning Judge Finlay,

Thank you very much for reaching out to us about the concerns of those with whom you have discussed our drone program.

The concerns brought to your attention do not reflect our program, which has been carefully crafted to protect privacy and civil rights. It is arguably the most transparent drone program in the world, precisely because we understand and deeply respect the public's concerns over surveillance and police overreach. We have conducted extensive public outreach since January 2016 when we founded the program and we crafted our policy with our community and protecting civil liberties in mind. We have given tours to elected officials, including the entire Chula Vista City Council and Mayor, Dr. Shirley Weber and representatives of Sen. Ben Hueso's office about the benefits of the program. That's just to name a few.

First, our drone program specifically prohibits random surveillance and random patrols by drones. CVPD drones only respond to emergency calls for service and return to base immediately after the call has been resolved. They do not "patrol" or surveil hotspots -they respond to 911 calls and emergencies. We do not use drones to monitor or surveil

protests or demonstrations because we do not want to “chill” free speech. All drone video is treated as evidence and secured with the same retention schedule as our body-worn camera program. The system has rigorous audit trails, and employees must have authorized permission for access on a “need to know” basis to access any video. This is to protect the integrity of any video evidence and to protect the privacy of the public and those we interact with in public.

We have two launch sites for DFR with 4 commercial drones and 7 other drones that officers in the field can deploy during emergency calls. We do not have any “autonomous” small drones and we do not use any of our drones for surveillance purposes. You are correct in that the drone program is an incredible de-escalation tool. For example, a drone can give officers real-time information about a call before they ever get on scene. This provides critical information for them on how to approach with the proper tools, tactics and resources to peacefully resolve the incident with minimal to no use of force. This is especially critical in mental health calls with people in crisis – this gives us time to assess and “slow-down” the call to ensure public safety and get the person help and services. The program has absolutely saved lives and protected officers, the public and even keeps subjects we contact safer.

Below is a link to our webpage which explains our program and has links to our policies. It has a dashboard showing the number of missions and other relevant statistics. Also, I would offer a personal tour of our operations to anyone who has a concern about how we use drones. As I have often said, there is nothing about a police drone program that should be secret, other than protecting the evidence (thus, privacy), as we would in any emergency. Should you wish to organize a visit, you can coordinate with me. If you are not the primary point of contact, anyone interested can email me or call me at 619-691-5218 and I would be more than happy to discuss their concerns.

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Thanks again and stay well!

Warmest regards,

Vern

Hi,

I was in a meeting with some members disturbed over the use of drones. The reference was that "Chula Vista PD expanded two dozen autonomous small drones and some larger ones for surveillance purposes. " From our discussions and what I read in the newspaper it seems to me that the drones can be used to de-escalate situations and to help in certain emergency situations.

Could you send me some public information regarding the use of your drones? By public I mean material I can use in these discussions going forward? Not to reprint but to orally assert?

Thanks,

Judge Finlay

The Next Destination for Commercial Drones

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Precision Agriculture Meets the Real-Time World, the Use of NDVI in Agriculture

This presentation will explain how drone based NDVI can take a 5000 acre field, which is virtually impossible to fully survey on foot, and reduce it to the 500 acres that matter in virtual real-time using aerial NDVI mapping. The high temporal and spatial resolution of NIR UAS surveillance far surpasses the capabilities of other remote sensing techniques when it comes to the real-time management of farms.

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

One of the biggest difficulties that comes with all of the uncertainty of the past few months is that things are constantly changing, making it more challenging to plan ahead. **Everyone is trying to navigate these unprecedented circumstances and adapt to doing business during the uncertainty of the COVID-19 pandemic.** One thing is for certain: this health crisis has reemphasized how important connections and exchanging ideas are for leading this industry forward.

We believe in the power of adapting, as well as gathering together to share and foster connection and education in our community, and we are committed to

being that resource in 2020.

The health and safety of every member of our community and our team are of the utmost importance to us. As we prepare for the December event, taking place at the Hyatt Regency in Dallas, TX, we want to assure you that we are following all guidelines set forth by the CDC, WHO, as well as state and local officials. As we actively work with Hyatt Regency, here are some of the things we are looking to implement in December:

- **Enhanced cleaning measures:** Hyatt Regency has added to its already rigorous cleaning protocols, requiring that surfaces are thoroughly treated with hospital-grade disinfectants and that this cleaning is done with increased frequency. This pledge includes a cleanliness accreditation by the Global Biorisk Advisory Council (GBAC), hotel-level sanitization efforts overseen by a 'Hygiene Manager', and constant oversight and adherence to the guidance of a cross-functional panel of medical and industry experts. *Please click [here](#) for additional details on the Hyatt's cleanliness commitment.*
- **Social distancing protocol:** The CDC and WHO warn about direct, person-to-person contact as the primary way COVID-19 is spread. To help alleviate the risk of transmission in this way, Hyatt Regency will be using signage and floor decals to remind guests to maintain social distancing protocols, in addition to other protocols, to aid in reducing crowding. The staff are wearing PPE at all times, there is a single point of entry to the hotel to ensure the safety and security of all guests, and the Hyatt has spaced out public areas seating furniture to meet CDC social distancing guidelines. *Attendees will all be required to wear masks.*
- **Additional sanitation stations:** Hyatt Regency is installing more hand sanitizing stations across all of its properties.
- **Conference Setup:** There will be modified meeting room set-ups based on social distancing guidelines, doors will be propped open in breakouts for minimal contact, and meeting rooms will be cleaned/disinfected after each meeting ends in high touch point areas

Regulations and standards continue to evolve and develop, and accordingly, we will provide further updates as they become available from the CDC, WHO, state and local officials. InterDrone would like to thank all those working diligently to help us relaunch the conference business and making our world safe again overall.

When you purchase an InterDrone Conference Pass, you can register with confidence: if for any reason the conference cannot take place in December, *you'll be able to defer your registration to 2021 or receive a full refund.*

We look forward to seeing you in Dallas! Please stay tuned for a more detailed health and safety onsite preparedness plan in the months to come. Until then, please visit [our website](#) for more information.

AIRT News Update for Monday, July 27, 2020

Good Morning Vern Sallee,

Today, we continue our podcast series [TAMING DISASTER: Drones For Good](#) with the release of our latest episode (005) featuring guest [Brandon Morris of the Security and Emergency Response Training Center \(SERTC\)](#) located just outside Pueblo, CO. Brandon is a wealth of information about the role of UAS for a wide variety of HAZMAT incidents including train derailments and other transportation accidents. He also has a sneak peek on some new research SERTC has conducted surrounding the use of UAS and related technology for accident reconstruction. I think you'll want to hear what he says! Listen via the links at the bottom of this email.

If you are interested in using drones for mapping disaster scenes then you will want to register for a very special webinar [Applying Drones and Imagery for Disaster Mapping](#) scheduled for tomorrow, July 28 from 2:00 to 3:00 pm Eastern. Join [Tari Martin](#) Director, National and Federal for the [National Alliance for](#)

[Public Safety GIS Foundation](#), [Austin Worcester](#) Senior Program Manager for sUAS at the U.S. Air Force Auxiliary [Civil Air Patrol](#), Chief [Charles Werner](#) (ret.), Director of [DRONERESPONDERS](#), and me as we discuss the role of UAS technology for mapping disaster scenes for damage assessment and more.

AIRT will also be co-producing a full schedule of podcasts, webinars, and virtual conferences over the next 90 days. We will be working with our world-class partners including [Commercial UAV Expo Americas](#), [AUVSI XPONENTIAL](#), the [Energy Drone & Robotics Summit](#), and others to produce high-quality virtual content focused on Drones For Good and Public Safety UAS operations. To view our growing events schedule, please visit: airt.ngo/events

As always, thank you for supporting AIRT and our non-profit initiatives supporting Drones For Good and the use of UAS by public safety and emergency services agencies around the world!

Sincerely,

Christopher Todd
Executive Director

Dear Chula Vista Police UAS Program,

I read about your drone program online and am very interested in working with your team either now or in the future when a position opens. I greatly respect all police work and am very interested in helping to keep our community safe.

I have my FAA series 107 commercial drone certification. I also have many years of digital media experience. I can creatively edit, organize and archive your drone footage.

If your program later decides to deploy underwater drones, I have my PADI Advanced Open Water SCUBA certification as well as my PADI Enriched Air Nitrox certification.

Please take a look at my LinkedIn resume and references:

Experts Identify DJI Security Issue

By The Editor on Jul 24, 2020 06:55 am

Cybersecurity researchers revealed a newfound vulnerability in an app that controls the world's most popular consumer drones, threatening to intensify the growing tensions between China and the United States. In two reports, the researchers contended that an app on Google's Android operating system that powers drones made by China-based Da Jiang Innovations, or DJI, collects [...]

Subject: DJI AirWorks 2020 - Virtual

**Warning:
External
Email**

Hello Vern,

as promised here are the information on the upcoming DJ AirWorks.

We are going to hold our [DJI AirWorks](#) virtual this year. The event will happen August 25-28, 2020. With this new all-digital format, we will continue to focus on high-quality content, including keynotes, breakout sessions, panels, and networking opportunities that attendees from the drone community can attend, learn and enjoy. I would love to see have you as one of the presenters again this year. Expect that everything will be very similar, except no travel to Los Angeles.

Each slot is 30 minutes, including Q&A. My suggestion is a 15-20 min. presentation followed by 15-10 min. of Q&A.

Please let me know your thoughts. I do think the DFR would be a great topic as you are the leader in this deployment methodology.

Speaker Sign-up (after confirming with Romeo)
<https://www.djiairworks.us/2020/page/1468549/speakers>

I'd love to see you be part of the event. Stay safe and let me know if you have any questions.

Thank you,
Romeo

WEBINAR INVITATION

REGISTER

Join DRONERESPONDERS, the FAA, and Skydio for this special webinar to discuss The Five C's and why they are critical for responsible public safety drone operations.

Thursday, July 30
2:00-3:00 p.m. Eastern

The Five C's revolve around five critical pillars:

1. Community Engagement and Transparency
2. Civil Liberties and Privacy Protection
3. Common Operating Procedures
4. Clear Oversight and Accountability
5. Cybersecurity

For more information on The Five C's, please visit:

<http://5Cs.droneresponders.org>

AeroVironment Celebrates 50 Years

By The Editor on Jul 29, 2020 06:59 am

In the 1970s, AeroVironment founder Dr. Paul B. MacCready, Jr. became the first to design and build an aircraft that successfully achieved controlled human-powered flight, giving birth to the company's reputation of achieving the impossible in aerospace engineering. Now, as the company begins its 50th year in business, it's preparing to break yet another barrier by [...]

Swift Engineering HALE UAS Completes First Flight

By The Editor on Jul 29, 2020 06:33 am

In partnership with NASA's Ames Research Center, Swift Engineering's high altitude long endurance (HALE) unmanned aerial system, completed its maiden flight. The only US-made platform in its class, Swift's flight team, performed a full-system check, validating the vehicle's configuration for high-altitude continuous surveillance missions. Through the collaboration with NASA, the successful flight trials took place at New [...]

WEBINAR INVITATION

REGISTER

Join DRONERESPONDERS, the FAA, and Skydio for this special webinar to discuss The Five C's and why they are critical for responsible public safety drone operations.

Thursday, July 30
2:00-3:00 p.m. Eastern

The Five C's revolve around five critical pillars:

1. Community Engagement and Transparency
2. Civil Liberties and Privacy Protection
3. Common Operating Procedures
4. Clear Oversight and Accountability
5. Cybersecurity

For more information on The Five C's, please visit:

To: xhernandez@xewt12.tv

Subject: TV Interview

Good afternoon,

- Yes, I believe you will have Patricia attending, but will she bring a camera person? Yes, it will be Patricia and a cameraman.
- Will we need a Spanish speaking officer to translate? Ideally yes please, but if not available we will subtitle.
- For comfort, please wear comfortable shoes (small tour) Thank you!
- And do you still want us to send three primary questions, or will you be sending us some questions? Yes please, if you are able to provide at least 3 questions, that would be wonderful.
- The chief will talk on the 911 program and drones. Thank you!
- Please wear masks. Will do!

You can park in our parking lot (on 4th Ave & F St) and come to the front counter – just ask for the chief’s office. Thank you!

Good afternoon Cathy,

Hope this email finds you well. Mrs. Alvarez de los Cobos has asked me to assist with the coordination of this interview. 7/29 at 10am would be perfect on our end.

Would it be possible to conduct the interview at our office here in Chula Vista? Our address is: 637 Third Avenue, Suite B-C, Chula Vista, CA 91910. We are following all City of Chula Vista sanitization protocols.

In preparation for the interview:

- Can you provide us with three main questions that you would like for us to ask?
- Your cell number (in case something happens)

- Your complete name and position (as you would like for it to appear on the interview)

Thank you so much!

Xochitl

Current State of Tech and Regulations: Enabling BVLOS UAS Flight for Long-Linear Infrastructure Inspection in the Energy Industry

Date: 4:00 pm EDT - Thursday, August 13th, 2020

Length: 45 minutes

[Add to Calendar>>](#)

[Register Now!](#)

For operators in the energy sector, there is an increasing need to fly longer distances and reduce operational costs for infrastructure inspection.

Learn about the latest technology enabling Beyond Visual Line of Sight (BVLOS) drone flight and the regulations that affect it.

Join us for a discussion with Jason Hardy-Smith, VP of Product at [Iris Automation](#), on the drone technology currently being used to

overcome the complex regulatory barriers that come with flying BVLOS.

Attendees will learn what to expect in applying for waivers and how some companies are already flying BVLOS for use cases like power line and pipeline inspections.

Presenter

Jason Hardy-Smith - VP of Product, Iris Automation

Jason Hardy-Smith is a proven Product Management executive with 20 years of experience defining and driving product strategies and roadmaps in technology industries. Jason has owned the end-to-end product lifecycle of successful first-to-market products for companies including Oracle, Blueroads, Brightidea and Isomorphic Software. He has built efficient, scalable, global product organizations from the ground up. In his current role at [Iris Automation](#), Jason oversees the development of technology enabling the safe implementation of BVLOS operations for UAS.

Roxana Kennedy

Roxana

We have been providing very advanced audio to the Military and police for over 10 years.

This technology does not hurt anyone's hearing yet it cuts right through high noise environments through a specific physics principle verified by audio engineers testing documentation.

Recently we have been able to miniaturize these systems for use on Drones

This is the link to the video of the live Drone Speaker Demonstration on July 15th. at HPV Technologies
 Just click on it and it will play through YouTube.

<https://youtu.be/s-siXt9-Xy8>

Below are comments from people who attended the demo.

Sid Heal. Commander at LA Sherriff's Dept.

"I see lots of potential. IT IS SO CLEAR, under the worst case scenario, even with my hearing impairment !!"

Question: "have you ever heard anybody's sound of speakers sound like ours?"

Sid: answer:

"No,none, I've said that for years."

Sid:

"This is really the worst case scenario for sound, everything here is so energy reflective and (yet) IT WAS CRYSTAL CLEAR !!!....."

Sid:

"If we can intervene (at an incident) at lower levels sooner, we can prevent them from having to use harsher force.
Really, the use of sound as a non lethal option is almost unexplored right now. "

Brian Mueller: Sergeant LA Sherriff's Dept

"That speaker is much more powerful for the conditions we experience.
Very Clear.

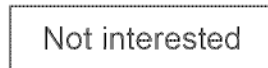

Even when pointed in the opposite direction, we can hear it way down there. "

If interested, please contact me.

This technology is now also in the form of a hands free Vest Mount speaker and a tactical 3 pound Hand Held unit. Clear voice communication can de-escalate volatile situations.

Best Regards

Ray

Thanks so much Don I'm sure when they look up close and are actually able to speak with someone on the subject it eases their concern, you guys know this but everywhere I go people talk about how amazing and important your program is to everyone.. A strong foundation of public trust set the stage, and the continued transparency and access is confirming 🍑 🍑

Cc: Kerry Bigelow; Ed Chew; Tyshar Turner; Nicole KingKade; Don Redmond; Eric Wood; Eric Thunberg; Vern Sallee; Jonathan Alegre
Subject: RE: Hosting Webex Meetings

Thanks Cristina! Nicole Kingkade is included on this email. I'll ask that she coordinate a plan to have each of the below individuals trained in the use of Cisco Webex for public and private meetings when necessary.

- Nicole Kingkade (our training manager, and also coordinates PAL meetings)
- Claudia Bravo (coordinates Measure A COC)
- Eric Thunberg (manages Veterans Commission)
- Vern Sallee (manages period public meetings and forums related to our drone program)
- Jonathan Alegre (manages periodic public meetings)
- Cathy Miller (Chief's secretary, and would often be a "backup" for many of these meetings)
- Our analysis team (who would likely handle public forums or larger community-based meetings), including Joseph Walker, Shermaine Abad, Sharyl Mesina, and Erica Chung.

I appreciate the information about who was invited to the initial training. That is primarily our IT team. It's also helpful for them to know about the system for technical support and "backup". But now that we understand better the intended purpose, I think the above list would be more helpful for the Department and allow more efficient use for meetings while reducing the burden on you and your team.

Captain Phil Collum
 Investigations Division
 Chula Vista Police Department
 315 Fourth Avenue
 Chula Vista, Ca 91910
 (619) 691-5209

Cc: Kerry Bigelow <KBigelow@chulavistaca.gov>; Ed Chew <EChew@chulavistaca.gov>; Tyshar Turner <tturner@chulavistaca.gov>
Subject: RE: Hosting Webex Meetings

Hi Captain,

Getting Webex accounts for the staff listed below is currently no issue. We are in a free trial right now, and if later on the accounts need to be consolidated, I'm sure Ed will make that announcement.

Ed, can you please create accounts for the staff the Captain has indicated?

I did just want to let you know the list of names the Chief previously sent us that we also created Webex accounts for. They were invited to our trainings, but I haven't had a chance to reconcile the attendance logs to see who participated.

Police

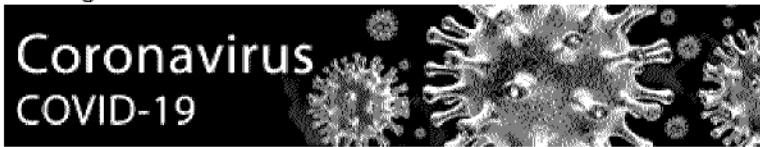

Eric Wood
 Phil Collum
 Don Redmond
 Robert Howard
 Edward Handog

If you'd like to setup any practice sessions, please just let me know and/or include me on the calendar invite.

Thank you,

Cristina Hernandez | City Clerk Analyst | City of Chula Vista
 Office of the City Clerk | (619) 409-5869 | chernandez@chulavistaca.gov

The City has proclaimed a local emergency and in response to Governor Newsom's directive to Stay at Home, the City has suspended operations, except for critical public safety services. The office of the City Clerk is working remotely and is mostly working via email.

Please note that email correspondence with the City of Chula Vista, along with attachments, may be subject to the California Public Records Act, and therefore may be subject to disclosure unless otherwise exempt.

Subject: RE: Hosting Webex Meetings

Hi Cristina. Understanding better the intended purpose of this, I would like to change and expand the Police Department personnel to host WebEx meetings. I can have one of our people coordinate the training, but wanted to first confirm that there are no other issues having the following people involved in hosting?

- Nicole Kingkade (our training manager, and also coordinates PAL meetings)
- Claudia Bravo (coordinates Measure A COC)
- Eric Thunberg (manages Veterans Commission)
- Vern Sallee (manages period public meetings and forums related to our drone program)
- Jonathan Alegre (manages periodic public meetings)
- Cathy Miller (Chief's secretary, and would often be a "backup" for many of these meetings)
- Our analysis team (who would likely handle public forums or larger community-based meetings), including Joseph Walker, Shermaine Abad, Sharyl Mesina, and Erica Chung.

Any issues with this plan?

Subject: Hosting Webex Meetings

Good morning,

You've been selected to assist your department in virtual meetings related to Boards/Commissions and virtual community workshops. Please join us in an introduction meeting which will provide an overview of the common steps you will need to host a virtual meeting using Webex. The majority of you have Webex accounts, or it was recently created by IT.

I will be sending two calendar invites shortly. **You only need to attend one meeting**, we are offering two dates/times for your convenience. Please accept/deny accordingly so we know how many participants to expect at each meeting.

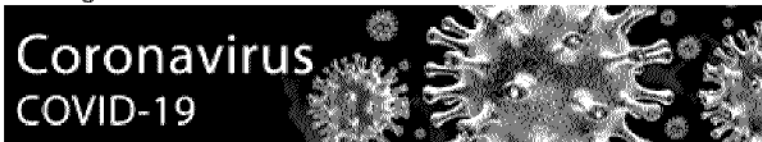

We will be using Webex for this. If you have not attended a Webex meeting before, I am attaching a guide we give our Commissioners that may assist you in knowing the requirements of joining a meeting using Webex; pages 1 and 2 will be helpful.

If you have any questions, please let me know.

Thank you,

Cristina Hernandez | City Clerk Analyst | City of Chula Vista
Office of the City Clerk | (619) 409-5869 | chernandez@chulavistaca.gov

COVID-19 Update

The Chula Vista City Council has **extended the Eviction Moratorium** to August 31. In March, the Council approved the moratorium and has since extended it each month due to the prolonged COVID-19 effects on the economy. The moratorium provides eviction protection for residents and commercial tenants. Please [visit the Housing Division's web page](#) to learn more about the ordinance.

We greatly appreciate our businesses adjusting to the ever-changing public health directives! From dining to personal care services, to art classes and exercising, our Chula Vista businesses have found innovative ways to continue servicing their customers outdoors.

Businesses along Third Avenue interested in **expanding their business operations into the right-of-way**, can [email](#) to process a no-fee permit.

The City of Chula Vista has approved **Operating Standards for eligible businesses to operate outdoors on commercial private property**.

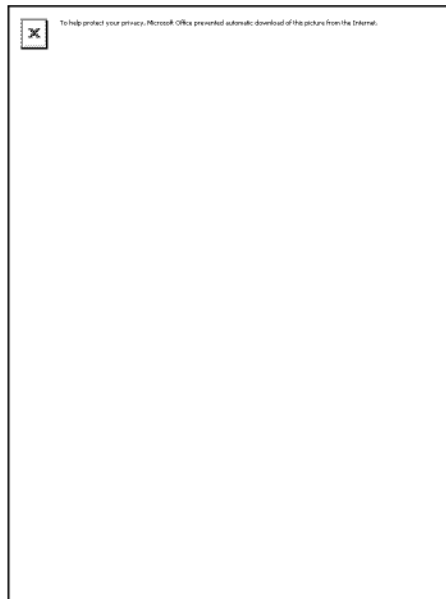

Qualified business types include salons, barber shops, gyms, fitness centers, spas, nail salons, massage and tattoo parlors, restaurants, bars, wineries and breweries that serve alcoholic drinks only as part of meal compliance with the Council of San Diego Order of the Health Officer and Emergency Regulations. Businesses that are interested in expanding outdoors on their private property are asked to:

1. Coordinate with their landlords, property owners and other tenants of the property for access;

2. Maintain ADA accessibility to the businesses;
3. Coordinate with the County Department of Public Health if they are serving food in those outdoor areas; and,
4. Coordinate with the State department of Alcohol Beverage Control if they plan to serve alcohol in those outdoor areas.
5. Fitness businesses (yoga, boot camp, etc.) can hold classes in City parks by requesting a permit (available on a month to month basis) and paying a \$25 fee per hour. For more information, [email Parks and Recreation](#).
6. Outdoor canopies cannot exceed 400 square feet (20'x20') in size in compliance with the [City's operating standards](#).
7. Businesses operating outdoors must have an active City of Chula Vista business license. If you need to obtain a business license before moving outdoors, you can do so quickly and easily [online](#).

Libraries: While City libraries remain closed, books are still available for check out! Place your book on hold and then pick it up at the Civic Center Branch, 365 F Street. [Learn more](#) on the library web page. They also are offering Passport services at this location.

City Hall Offices: Most City offices remain closed with staff working remotely. The Finance Department is open Monday-Friday from 9 a.m. to 5 p.m. and Friday from 9 a.m. to noon. The Police Department front counter is open Monday-Friday from 8 a.m. to 5 p.m. but fingerprint cards and Live Scan appointments are not available at this time.

Sustainability Series

The City's Office of Sustainability kicked off its inaugural Summer Sustainability Series in July, and seven events remain. This interactive web series, scheduled from 4 to 5 p.m., will focus on a variety of local sustainability

programs so that participants can learn how to incorporate sustainable living tips into daily life. The series features local sustainability experts who will share exciting ideas to help community members preserve our natural habitats, conserve finite resources, reduce, reuse, repurpose, recycle and more! Upcoming sessions include:

- August 6: Reduce Waste, Reduce Your Carbon Footprint
- August 13: Create a Lush NatureScape While Conserving Water
- August 20: Clean Energy @ Home
- August 27: Composting 101 & other best practices for gardening at home
- September 10: Going Electric in Chula Vista
- September 17: Food Waste solutions at home

and your everyday life

- September 24: Check it out - Sustainability at the Library!

The free series supports the City's Climate Action Plan and is open to everyone. [Please register](#).

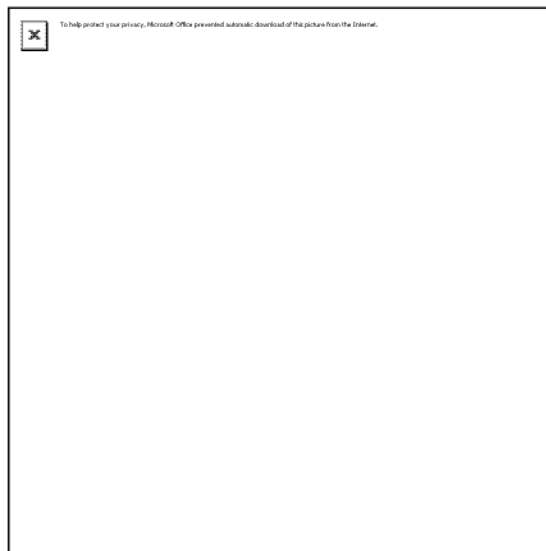

Measure P Paving

One of the most visible and popular uses of Measure P funds, the half-cent, ten-year tax passed by Chula Vista voters in 2016, is street paving. To determine which streets needed to be first addressed, City staff used the Pavement Condition Index (PCI) that ranks conditions of the streets from 0 to 100. The goal was to repair/repave all residential streets with a PCI of 25 or lower. With the Phase II project now wrapping up, the goal has been reached. And the City had enough funds to repair additional streets up to a PCI of 33.

More than 200 City street segments were paved during the last two years for a total of 23 miles or 121,451 linear feet. The paving projects utilized just over \$20 million of Measure P funds.

Street paving will continue throughout the City using Trans Net Funds and SB1 Road Maintenance and Rehabilitation Account funds and regular Gas Tax funds.

A new City-wide Pavement Survey is planned to be conducted early next year.

Recreation Services

Parks and Trails: City parks and trails are open from 7 a.m. to 8 p.m. daily. Park gazebos, picnic areas and playground equipment are not available but all park restrooms, except Lauderbach and Harborside, are now open.

Recreation Centers/City Pools: Soon Parkway Pool will be available for group rentals only. Lap swim, swim lessons, or individual swimming is not available at this time. Please [email](#) Karina Craig for details. All other recreation facilities remain closed at this time.

Food Assistance: Recreation staff continue to make Chula Vista Food Helpline deliveries Monday-Friday from 9 a.m. to 12 p.m. This one-time free food delivery service is available to Chula Vista residents who are home-bound, have compromised immunity, and lack transportation to other food distribution sites or stores. If you meet these requirements, call (619) 476-5340 to sign up. If you have transportation, but are in need of food resources, Recreation staff also are assisting on Tuesdays and Wednesdays at South Bay Community Resources food distribution sites from 2 to 4 p.m. Tuesday distribution takes place at Castle Park Middle School, 160 Quintard Street, and Wednesday at Loma Verde Recreation Center, 1420 Loma Lane. In addition, South Bay Community Services offers food distribution on Thursday from 8:30 to 9:30 a.m. at Castle Park Elementary School at 25 Emerson Street.

Cool Zone: A designated Cool Zone location for the community has been created at 565 Broadway (the old Sears building). Current site hours are Monday-Friday 12 to 5 p.m. The site will be open on Saturday and Sunday

only during heat advisories. Residents can use this officially sanctioned Cool Zone to escape the mid-day summer heat and rest up before going back outside. So if you need a break from the heat, come visit Recreation staff who will be playing movies throughout operating site hours for visitor enjoyment!

Yoga studios, gyms, bootcamps in City Parks: Fitness in the Park Permits are now available to fitness groups and businesses for fitness related activities. For field rental requirements and more information regarding permits, please [email Gil Contreras](#).

Did you know...

...the Chula Vista Police Department (**CVPD**) **drone program** has received groundbreaking FAA approval for close proximity, low altitude beyond visual line of sight operations. The waiver is the first in the nation and allows CVPD to perform life-saving missions, such as urban search and rescue, where an operator can fly beyond line of sight while staying below 50 feet in altitude above nearby obstacles, such as trees or buildings. Current FAA regulations require that drone operators maintain line of sight to their aircraft at all times to alleviate risk. "This special permission enables our drone teams to respond more quickly and efficiently to emergencies while enhancing the safety of the public and our officers," said Lt. Don Redmond. Congratulations CVPD!

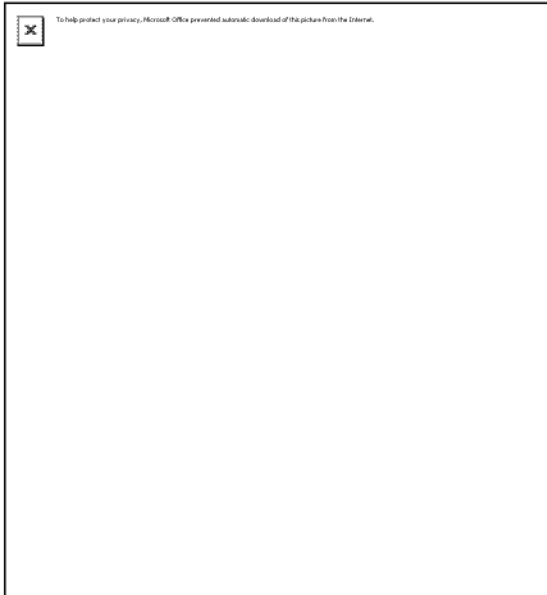

...recently, the **Chula Vista Animal Care Facility** has investigated a number of sick dogs (puppies) that have been purchased via Craigslist, or other online resources. Unfortunately, some of the dogs are so sick they have later died. We recommend you purchase from a shelter, [established rescue organization](#), or reputable breeder that can provide vaccination records and ensures the puppy has been thoroughly examined by a veterinarian. Pet stores can only offer pet adoptions for animals received from a shelter or rescue organization, so that is another place to look. Here are some tips:

- Try to research the person or organization first. For individuals, ask to take a photo of their ID.
- You should be able to meet them at an identifiable address, not on a corner or parking lot. Chula Vista Municipal Code prohibits the sale of animals on public property or on private property open to the public.
- If they are a private individual that has a litter of puppies, you should ask to see the mother.
- The puppy should be alert and friendly.
- You should not remove the puppy from the mother before 2-4 months.
- You should be able to see a vaccination record with the veterinarian's license information.

...good news! **Garage sales** are now allowed! A [free permit](#) is required and can be obtained online. Residents are allowed two garage sales per calendar year. Why is a permit required? This ensures that an unlicensed business is not operating illegally. Senior Volunteer Patrol often stop and visit garage sales to make sure the residents do have a permit. Remember to maintain social distancing and wear your mask! Happy treasure hunting!

...**Mobility Hubs** are places that connect different transportation options and make it easier for people to move from one place (like home) to another (like work, school or shopping). Mobility hubs can include a variety of

features like enhanced transit-waiting areas; shared cars, scooters, and bikes; retail services; WiFi; and much more. Western Chula Vista has been identified as a possible location for a mobility hub. Help shape the future, and tell us what you think. [Take the survey today!](#) (Link available by July 31.) The survey deadline is August 31. Western Chula Vista is the area between Second Avenue to the East and the San Diego Bay to the West, and between C Street to the North and L Street to the South (see light gray area on the map).

...**Jerome's Dream Shop Mattress Store** is now open at the Otay Ranch Town Center near Ulta and Verizon, east of Party City. The showroom is open daily from 10 a.m. to 8 p.m.

...thanks to a grant from the Department of Justice, the Chula Vista Police Department provided **new park signs** to Parks and Recreation which added the no smoking/vaping City ordinance along with other park rules.

.....the **Chula Vista Fire Department opens recruitment** opportunities as needed. Fire Recruit, Emergency Medical

Technician (Non-Safety), and Paramedic (Non-Safety) will soon be open. The recruitment for Fire Recruit, the entry-level position for the sworn fire service, will be open August 24 through September 11, 2020. Applications will only be accepted during this time. Interested candidates should [review the job posting](#) on the website for the prerequisites. The recruitments for Emergency Medical Technician (Non-Safety) and Paramedic (Non-Safety) will open on August 10, 2020. Please [complete an interest card](#) to be notified when the recruitments open. Follow #JoinCVFD on Instagram for additional information.

... a stretch of the **Third Avenue Village** will be closed to vehicle traffic each Sunday in August, and opened for outdoor dining options, business exploration and walking and cycling space, while allowing visitors to maintain safe social distancing during the COVID-19 pandemic.

The street closure begins on Sunday, August 2, on Third Avenue from E Street through Center Street. Temporary barriers and signage will mark the closures. Please note the major cross streets of E Street, Davidson Street, and F Street will be open to vehicle traffic.

Thanks to the Third Avenue Village Association which is coordinating the closure each Sunday in August from 12 to 8 p.m.

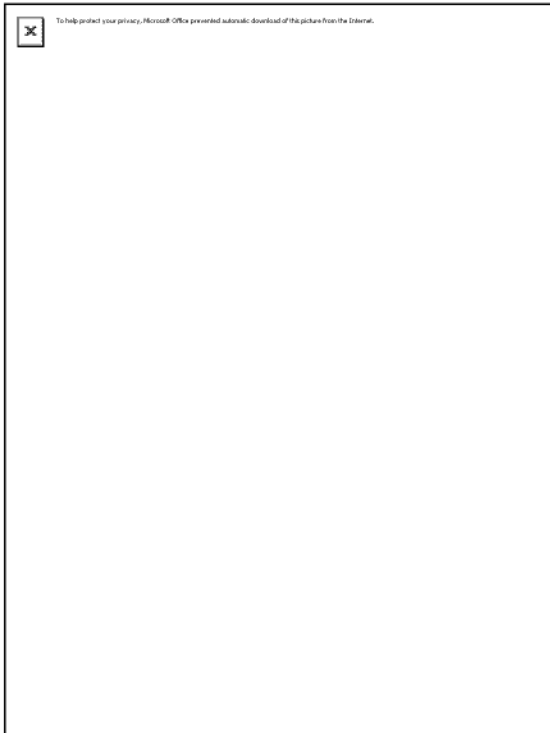

Meetings

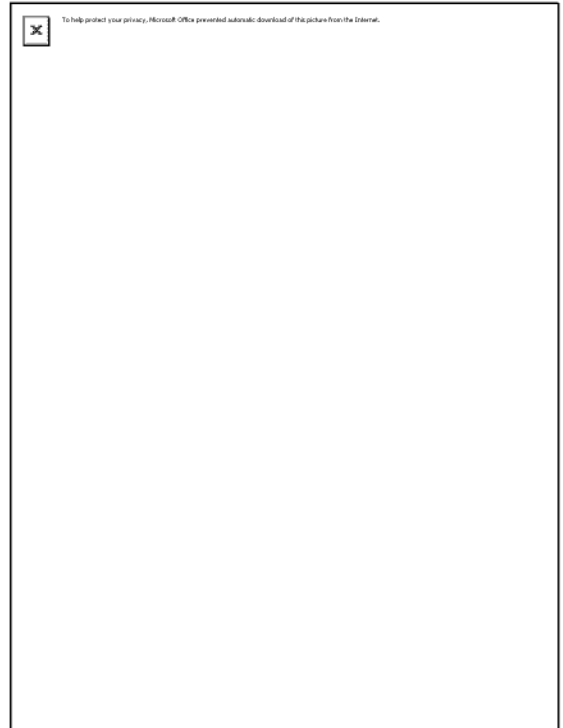

August Council Meetings

City Council meetings will resume virtually on **Tuesdays, August 4 and 18**, at 5 p.m. Residents are invited to provide comments on the agenda. Visit the online eComment portal for the meeting. If you would like to submit a comment by telephone, please contact the [Office of the City Clerk](#) or call (619) 691-5041 for assistance. Members of the public can watch the meeting via livestream. In addition, Chula Vista City Council meetings are video recorded and aired live on AT&T U-verse channel 99 (throughout the County), and on Cox Cable channel 24 (only in Chula Vista). Recorded meetings are also aired on Wednesdays at 7 p.m. (both channels) and are archived on the [City's website](#).

Thank you to all residents and businesses following the public health guidelines. please continue to wear a mask when outside or in a business, maintain 6-foot social distance and like you've heard since childhood...wash your hands! Visit our website for more

information.

FAA UAS Symposium Episode II launches on August 18-19, 2020

It's back! If you missed Episode I of the [5th Annual FAA UAS Symposium](#), we hope you can join us for Episode II, August 18-19.

Episode II will NOT be a repeat of Episode I. If you enjoyed the first Episode, please take this opportunity to continue the conversation during Episode II. If you missed Episode I, welcome! We want to hear from you.

So, what's in it for you? You'll be able to engage with FAA and drone community leaders and insiders during panel discussions, roundtables, how-to sessions and virtual networking to help shape the future of [UAS integration](#). More perks:

- One-on-one access to key decision makers
- No travel costs! Join us from the comfort of your own home!
- Make the most of your Symposium investment: Join or start your own roundtable discussion
- Our virtual FAA UAS Support Center will have the FAA Drone Guy Kevin Morris and other experts ready to answer your questions.
- There will be plenty of time to network and build connections!

Highlights of our packed program:

- UAS Integration Pilot Program (IPP)
- TFRs and assistance for public safety and emergency operations
- Public safety town hall
- Airport security and response plans
- Authorizations and waivers including what you can do with Part 107
- Real world operations
- Accident investigations

Reminder: Government, military and public safety rates are available. Student passes are available with proof of eligibility.

Register today. Follow us on social media for program and speaker updates. We hope you will join us next month!

FROM THE EDITOR

gs!

one industry has been changing and accelerating in new ways since the pandemic, and nowhere is this more apparent than for public safety and emergency response. Because they are public facing, the magnifying glass has always been on them, and their stories reach audiences outside of our industry from finding missing persons to assessing the damage after a hurricane, these stories have a lot of power to do good. But, as we have also seen, it can go the other way as well. With the pandemic, these stories for better and worse have only multiplied. In our [featured video panel](#), I caught up with Christopher Todd, Charles Werner, and Grant Guillot to discuss how core principles can help public safety and emergency response generate positive attention, and how we can take this attention and funnel it into broader public acceptance of the drone industry.

Our conversation covered everything from their most recent survey results, how to engage with people virtually, drone policy, what public safety needs from the drone industry, the Five Cs, and much more. It is well worth watching whether you are in the public safety arena or not.

Well and stay safe,

Danielle Gagne

YOUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

The entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

Don't miss out, sign up for free to any or all of the webinars below:

Scanning and 3D Building Information Modeling for Construction and Facilities Management Projects

Monday, August 11, 2020 | 1:00PM – 2:00PM Eastern Time

This discussion will highlight how LiDAR data and imagery were used to create an accurate building information model that is currently being used for airport design, construction, and integration into their facilities management program. Visualization capabilities and survey-accuracies are some of the highlights of the developed building model and the speakers will explore how their solutions and workflows utilize these efficiencies to create real-world success.

Map: Enabling Autonomous LiDAR Mapping in Challenging, Inaccessible Areas

Wednesday, August 12, 2020 | 11:00AM - 12:00PM Eastern Time

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent, and the drone industry will see and feel them over the next few months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many decisions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many more, followed by a live Q&A session with the audience.

Improving 3D Mapping Productivity, Ease of Use, and Your Bottom Line

Thursday, August 13, 2020 | 11:00AM - 12:00PM Eastern Time

Learn how to vectorize map features quickly and easily to get your work done faster. Whether it's roof and gutter lines from point clouds, or digitizing road infrastructure with stereo

rammetry, this webinar will give you tips on how to increase the efficiency of your drone
g workflow and increase your business's bottom line.

Tools to Identify Construction Issues Before They Become Issues

ay, August 27, 2020 | 2:00PM – 2:30PM Eastern Time

Advancements in digital construction technology, workflows targeting cost implication
potential rework in construction are not being widely adopted. Utilizing reality capture,
with other digital construction tools are estimated to reduce rework by 1-3%. Hundreds of
of dollars are being spent yearly on construction rework that could be reduced and or
ted. With today's technology, understanding these workflows to identify issues before
come issues and achieving a zero-rework project can happen; it takes project
ration and commitment.

Ground & Indoor Mapping with 3D Lidar Mapping

ay, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to
data that may not have been possible otherwise, especially within linear drifts and for
hazard analysis of rock faces. A panel of experts will discuss how new innovations are
ng the approach that can be taken in these underground and indoor environments.

Select a Lidar System for UAV Operations

ay, December 1, 2020 | 1:00PM – 2:00PM Eastern Time

o hear about the newest 3D solutions? Curious to discover which innovations are
ing AEC workflows? Our Emerging Technology Showcases provide attendees with an
ay to get up to speed around the latest product launches and innovations throughout the

Use LiDAR and Actionable Data

ay, January 12, 2021 | 1:00PM – 2:00PM Eastern Time

ers for rapid, efficient point cloud capture, and high-resolution images, during corridor-
de-area-mapping projects have redefined expectations related to what it means to
tly capture actionable data. A panel of experts will discuss how airborne lidar has
d a measurable difference for stakeholders of all types.

Last Chance to Join Florida Power & Light, Entergy, Shell Deer Park, Percepto and AIRT for "Fresh from the Field" Discussions

Hi! - It's your last chance to secure your free pass to emergency planning and disaster response strategies, including *fresh from the field* insight from **Florida Power & Light, Entergy, Shell Deer Park, Percepto and AIRT**.

The multi-session, interactive virtual forum - taking place **THIS THURSDAY** (August 6) - is almost full, so [register here](#) as soon as possible.

The expert speakers who are sharing their insight include:

And here's the full agenda overview:

- **Energy Industry Panel: Disaster Response during COVID-19 - How to Plan in a Pandemic**

- *With Chris Todd, Executive Director, **AIRT**; Jason Goodick, Manager, Aviation UAS Program, **Entergy**; Eric Schwartz, Quality Project Manager, Power Delivery, **Florida Power & Light Company**; John McClain, Chief Drone Pilot, **Shell Deer Park***
- **Autonomous Drones: Disaster Planning & Response for Utilities**
 - *With Dor Abuhasira, Chief Executive Officer, **Percepto***
- **UAVs for Industrial Emergency Response**
 - *With John McClain, Chief Drone Pilot, **Shell Deer Park***

Don't miss out on this opportunity to hear and talk directly with energy asset owners about their current programs to get key intel and prepare for the 2020 hurricane / wildfire season now.

HAPSMobile Successfully Completes Fourth Test Flight

By The Editor on Aug 05, 2020 06:26 am

HAPSMobile Inc., a subsidiary of SoftBank Corp. and minority-owned by AeroVironment, Inc., has announced the fourth successful test flight of its “Sunglider” solar-powered high-altitude platform system (HAPS). The flight took place on July 23, 2020 (PT) at Spaceport America (“SpA”) in New Mexico. With all basic aircraft tests for the unmanned aircraft system (UAS) now [...]

EHang Launches Intelligent Aerial Firefighting Solution

By The Editor on Aug 05, 2020 06:09 am

EHang Holdings Limited has announced the launch of the world's first large-payload intelligent aerial firefighting solution. Based on its flagship product, this new firefighting version of EHang 216, “EHang 216F” is specially designed for high-rise firefighting. With hundreds of thousands of high-rise buildings in China, the company believes the EHang 216F can become essential equipment [...]

Last Chance to Join Florida Power & Light, Entergy, Shell Deer Park, Percepto and AIRT for "Fresh from the Field" Discussions

Hi! - It's your last chance to secure your free pass to emergency planning and disaster response strategies, including *fresh from the field* insight from **Florida Power & Light, Entergy, Shell Deer Park, Percepto and AIRT**.

The multi-session, interactive virtual forum - taking place **THIS THURSDAY** (August 6) - is almost full, so [register here](#) as soon as possible.

The expert speakers who are sharing their insight include:

And here's the full agenda overview:

- **Energy Industry Panel: Disaster Response during COVID-19 - How to Plan in a Pandemic**

- *With Chris Todd, Executive Director, **AIRT**; Jason Goodick, Manager, Aviation UAS Program, **Entergy**; Eric Schwartz, Quality Project Manager, Power Delivery, **Florida Power & Light Company**; John McClain, Chief Drone Pilot, **Shell Deer Park***
- **Autonomous Drones: Disaster Planning & Response for Utilities**
 - *With Dor Abuhasira, Chief Executive Officer, **Percepto***
- **UAVs for Industrial Emergency Response**
 - *With John McClain, Chief Drone Pilot, **Shell Deer Park***

Don't miss out on this opportunity to hear and talk directly with energy asset owners about their current programs to get key intel and prepare for the 2020 hurricane / wildfire season now.

Carnegie Mellon Team Trains Autonomous Drones Using Cross-Modal Simulated Data

By The Editor on Aug 06, 2020 06:03 am

To fly autonomously, drones need to understand what they perceive in the environment and make decisions based on that information. A novel method developed by Carnegie Mellon University researchers allows drones to learn perception and action separately. The two-stage approach overcomes the "simulation-to-

reality gap,” and creates a way to safely deploy drones trained entirely on [...]

AUGUST 06, 2020

[View in Browser](#)

Good morning. In today's AP Morning Wire:

- A burst of terrifying power that ravaged Beirut in a horrific instant.
- Seeking refuge in US, children fleeing danger are expelled.
- N. Korea's escalating virus response raises fear of outbreak.
- Exclusive: Lack of study, oversight of tear gas use at US protests.

TAMER FAKAHANY
 DEPUTY DIRECTOR - GLOBAL NEWS COORDINATION, LONDON

The Rundown

AP PHOTO/HUSSEIN MALLA

A burst of unfathomable power that ravaged Beirut's population and streets; Negligence probed in deadly blast

The single, horrific and terrifying instant hit people across Beirut with the same brutal force: First, they watched a heavy fire down by the Lebanese capital's port sending a pall of smoke into the air.

Then with a stupendous mushroom cloud, a wave of destructive energy suddenly raced across the city at them like a freight train.

In those few seconds around 6 p.m. local time on Tuesday, lives were forever changed: Buildings were ripped apart, streets wrecked, homes gutted and thousands wounded.

At least 135 people died. From the epicenter at the docks' Warehouse 12 to the surrounding streets, Lebanese try to grasp the explosion and its aftermath.

This powerful read by Bassem Mroue and Sarah El Deeb is worthy of your time.

International Help: French President Emmanuel Macron is visiting Lebanon today for a few hours to offer help and solidarity. Paris dispatched two planeloads of specialists, rescue workers and supplies to its former mandate. Other nations are also providing aid. But it's unclear how much support the international community will offer to the notoriously corrupt and dysfunctional government.

The Investigation: The probe into the deadly blast is focused on possible negligence in the storage of tons of a highly explosive fertilizer in a waterfront warehouse, while the government ordered the house arrest of several port officials.

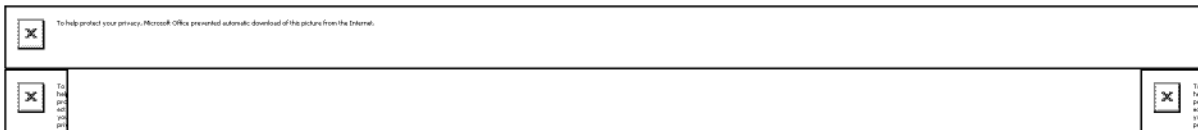

What Next? Later today, AP's Lebanon, Syria and Iraq News Director, Zeina Karam, will have a story from her native Beirut. In it, she assesses how the blast will compound Lebanon's multiple humanitarian emergencies, and how anger is mounting among a shell-shocked population that has now been driven into even more poverty and despair.

But will it be the long-awaited catalyst to dislodge an entrenched political class responsible for decades of mismanagement? You can see that story in a few hours and all other developments [here](#).

A look at some deadly explosions around the world involving ammonium nitrate.

VIDEO: Drone and ground footage shows the sheer devastation wrought upon Beirut.

PHOTOS: Images show shattered, dust-covered city.

AP PHOTO/DAVID J. PHILLIP

Seeking refuge in US, children fleeing danger are expelled; Kim sends aid to N. Korean town under lockdown

More than 2,000 unaccompanied children have been expelled from the United States since March under an emergency declaration enacted by the Trump administration, which has cited the coronavirus in refusing to provide them protections under federal anti-trafficking and asylum laws.

A 12-year-old boy from Honduras says he and his 9-year-old sister were expelled after being told by officers that they were going to a shelter in the U.S. And even though they were processed under a policy citing the virus, they were never tested for COVID-19, the boy says. Nomaan Merchant reports from Houston.

U.S. Testing: It's dropping even as infections remain high and the death toll rises by more than 1,000 a day. It's a worrisome trend that officials attribute largely to Americans getting discouraged over having to wait hours to get a test and days or weeks to find out the results. An AP analysis finds that the number of tests per day slid 3.6% over the past two weeks to 750,000, with the count falling in 22 states. Matthew Perrone, Nicky Forster and Michelle Liu have this story.

- Facebook has deleted a post by President Trump, citing its coronavirus misinformation policy. The post in question featured a link to a Fox News video in which Trump says children are “virtually immune” to the virus.
- The State Department says Russia is using social media, state-funded media and a loose network of proxy websites to amplify conspiracy theories and misinformation, most recently around the coronavirus.

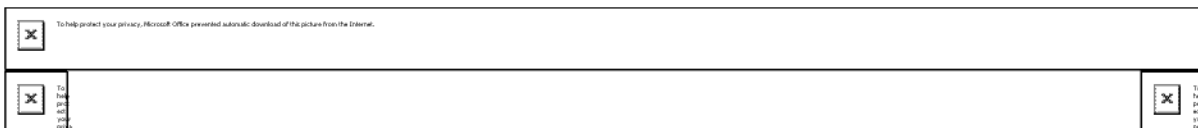

Is it safe for schools to reopen during the pandemic? The AP is answering Viral Questions in this [series](#).

North Korea: Kim Jong Un has directed his government agencies to act immediately to stabilize the livelihoods of residents in the city of Kaesong. The country says it is quarantining thousands of people and shipping food and other aid to a city locked down over coronavirus concerns.

The emergency response and a stream of propaganda glorifying its virus efforts raise concerns that North Korea may be getting more worried about a big outbreak, Hyung-jin Kim reports from Seoul. Pyongyang's longstanding claim to be virus-free is widely doubted.

- New lockdown ratchets up economic pain in Australia's Melbourne, where more than 250,000 people were thrown out of work today. Essential workers need government-issued permits to commute on the city's near-empty streets.
- A governor in central Japan announced a state of emergency due to rising virus cases and asked businesses and people to curb their activities, especially during an upcoming holiday. Aichi prefecture includes the major city of Nagoya and the headquarters of automaker Toyota.
- Officials in Scotland ordered bars, cafes and restaurants in the city of Aberdeen to close in response to a cluster of 54 cases linked to a single bar.
- As France sees an uptick in cases, it's struggling to administer enough tests to keep up with growing demand. One reason: Many testing labs are closed so their staffs can take summer vacation.

Pygmy Hog Lockdown: The world's smallest and rarest pig is under a lockdown, but not because of the coronavirus. Pygmy hogs are under threat by India's first outbreak of African swine fever, a severe viral disease that infects both domestic and wild pigs. Thousands of pigs have already died, and scientists are worried the disease could wipe out the critically endangered species. Fewer than 300 of the small pigs remain in India's northeastern state of Assam, reports Aniruddha Ghosal.

AP PHOTO/MARCIO JOSE SANCHEZ

Lack of study and oversight raises concerns about use of tear gas at racial injustice protests in US

“My face is on fire. My eyes are on fire.” That’s what someone who attended a protest in Charlotte, North Carolina shouted as police unleashed a volley of tear gas at a crowd of people, most of whom marched peacefully.

During America’s nationwide Black Lives Matter protests, federal, state, and local law enforcement agencies have increasingly been using tear gas — traditionally used as a measure of last resort — offensively.

Witnesses and human rights advocates say peaceful protesters, children and pregnant women have sometimes been hit by excessive amounts of tear gas with police failing to provide an escape route, reports Andrew Selsky in this exclusive story.

Law enforcement officials say the gases are effective tools for crowd control and are safe. But despite its widespread use, there are few studies on the health effects of tear gas.

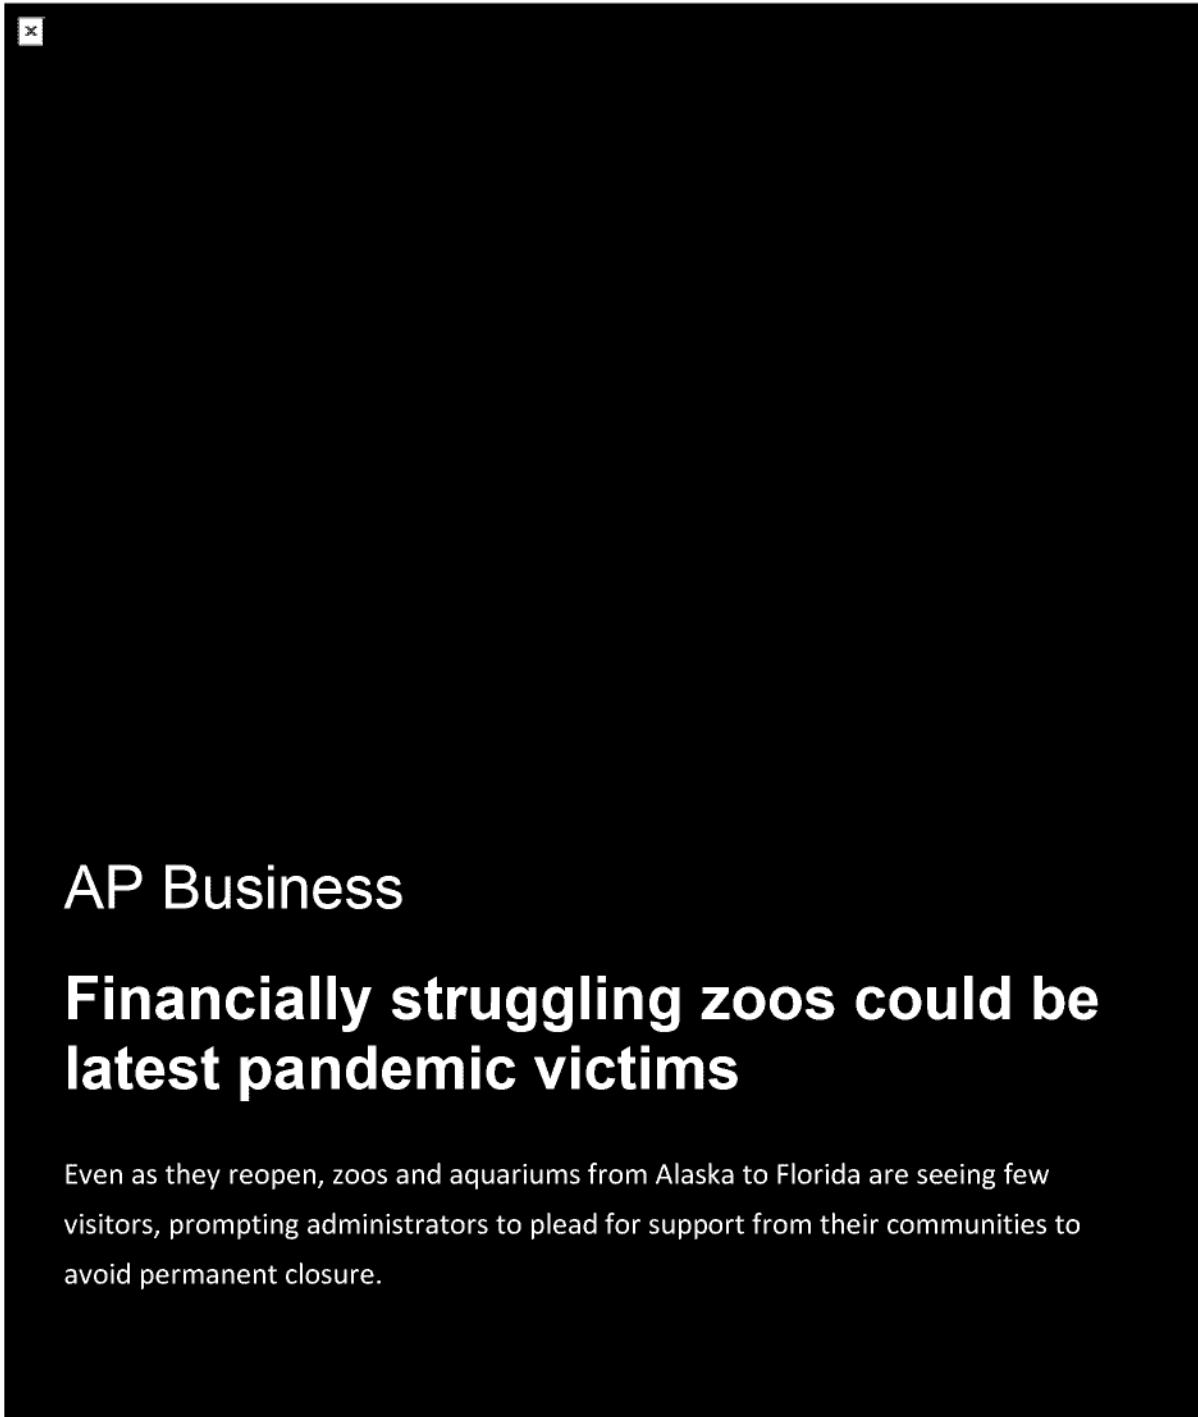

The AP also found that there is no oversight of the use and manufacture of tear gas.

Portland: Clashes outside a U.S. courthouse have largely stopped since Democratic Gov. Kate Brown reached a deal that called for the draw down of federal agents sent by the Trump administration. But police have clashed with protesters in other locations around the city over demands to defund the Portland Police Bureau. Late last night, Portland police declared a riot and said they believe an explosive device had been left outside a precinct. People were ordered to disperse, and some streets were closed, Gillian Flaccus reports.

Seattle: The City Council in a preliminary vote decided unanimously to reduce the police department by up to 100 officers through layoffs and attrition. The move was pushed by demonstrators who have marched in the city against racial injustice.

Minneapolis: A commission says it needs more time to review a City Council amendment to dismantle the Police Department in the wake of George Floyd’s death, ending the possibility of voters deciding the issue in November. The Charter Commission has expressed concern that the process

to change the city's charter was being rushed. The amendment would have replaced the Police Department with a "Department of Community Safety and Violence Prevention" that backers said would take a more "holistic" approach, Amy Forliti reports.

Other Top Stories

No hoopla: Trump, Biden convention plans upended by virus

Democratic challenger Joe Biden has joined President Donald Trump in scrapping plans to accept his party's presidential nomination in a convention extravaganza. Neither campaign has announced an alternative to the Democrats' original plans for Milwaukee and the Republicans' shifting plans spanning Charlotte and Jacksonville. It's a striking demonstration of how the pandemic has upended American life and the 2020 presidential campaign.

Survivors mark 75th anniversary of world's 1st atomic attack

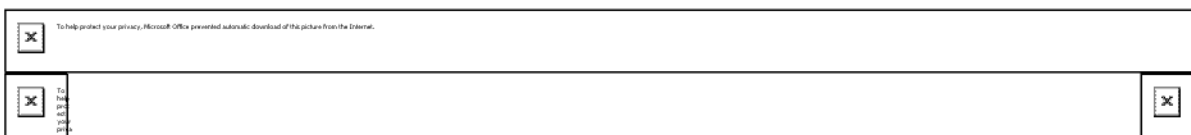

The dwindling witnesses to the world's first atomic bombing marked its 75th anniversary in Hiroshima. The aging survivors expressed the urgency to tell their stories in hopes of reaching younger people. They also noted the Japanese government's refusal to sign a nuclear weapons ban treaty as hypocrisy. The U.S. dropped the world's first atomic bomb on Aug. 6, 1945, destroying Hiroshima and killing 140,000 people.

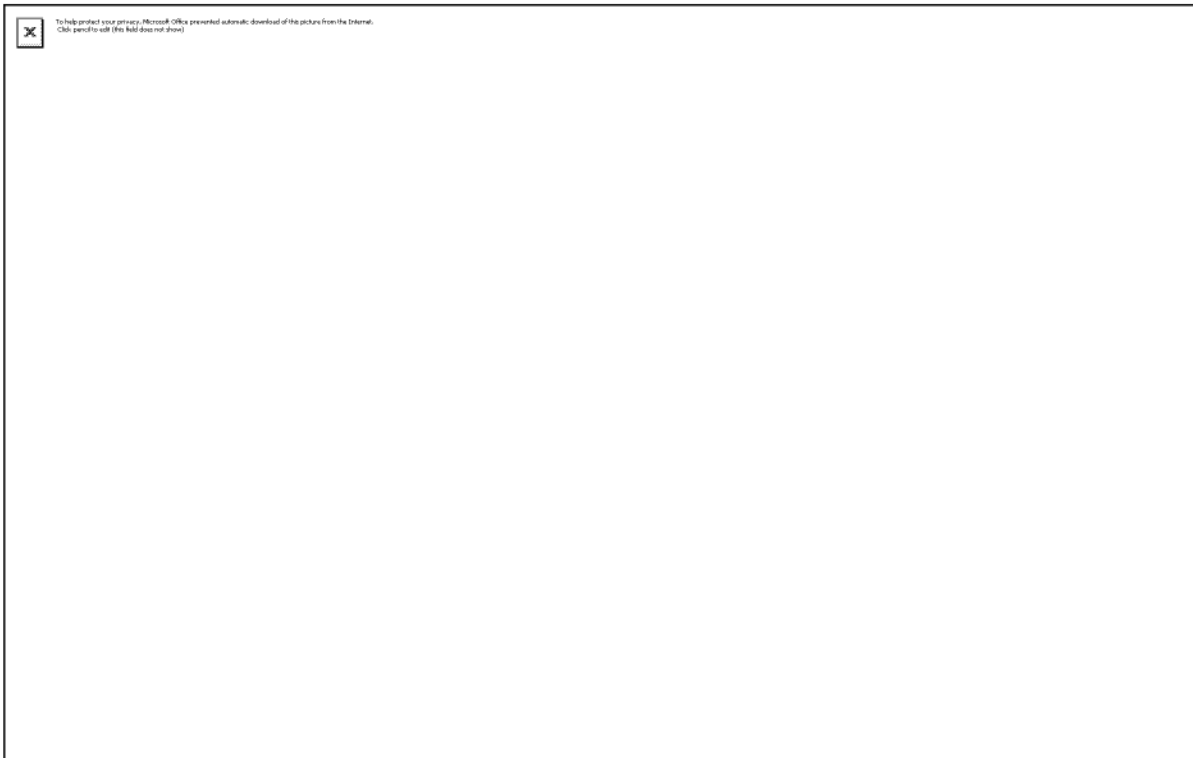

Obama's Medicaid expansion keeps gaining ground under Trump

President Trump is still trying to overturn "Obamacare," but his predecessor's health care law keeps gaining ground in places where it was once unwelcome. Missouri voters this week approved Medicaid expansion, making the conservative state the seventh to do so under Trump. That leaves only a dozen states opposed to using the federal-state health program for covering more low-income adults, mainly people in jobs that don't provide health care.

Grammy-winning producer Detail accused of sexual assault

Grammy Award-winning music producer Detail has been arrested on more than a dozen charges of sexual assault. The producer was arrested and is being held on more than \$6 million bail. He's charged with 15 counts of sexual assault and five counts of assault that authorities say took place between 2010 and 2018. Detail, whose real name is Noel Christopher Fisher, won a Grammy for Beyonce's hit "Drunk in Love."

Join the Public Safety Conversation at the FAA UAS Symposium, Episode II

Does your public safety agency support its mission with a drone program? Do you want to start a drone program? Do you have questions about how to address recreational or commercial drone operations in your local area? Join the conversation with the drone community's leaders and experts at the [5th Annual FAA UAS Symposium](#), Episode II, August 18-19.

Episode II will NOT be a repeat of Episode I. If you enjoyed the first Episode, please take this opportunity to continue the conversation during Episode II. If you missed Episode I, welcome! We want to hear from you.

Highlights of our packed program:

- Public Safety Town Hall: Join the FAA's Mike O'Shea and John Meehan for a discussion about public safety, drones and resources
- Temporary Flight Restrictions (TFRs) and assistance for public safety and emergency operations
- Airport security and response plans
- Authorizations and waivers including what you can do with Part 107
- Real world operations
- Accident investigations
- UAS Integration Pilot Program (IPP)

Engage with FAA and drone community leaders and insiders during panel discussions, roundtables, how-to sessions and virtual networking to help shape the future of [UAS integration](#). More perks:

- One-on-one access to key decision makers
- No travel costs, join us from the comfort of your own home
- Make the most of your Symposium investment: Join or start your own roundtable discussion
- Our virtual FAA UAS Support Center will have the FAA Drone Guy Kevin Morris and other experts ready to answer your questions
- Network and build connections

Reminder: Government, military and public safety rates are available. Student passes are available with proof of eligibility.

Register today. Follow us on social media for program and speaker updates.

InterDrone Public Safety Webinar Series

Join us for a three-day public safety webinar series with public safety industry leaders, to learn more about tactics, strategies, opportunities, regulation, and more.

Together we'll dive into recent innovations and effective public safety drone operations.

Register for one, two, or all three sessions, free!

[Register Now!](#)

Sessions:

- **Large Scale Drone use within Fire Departments - Tuesday, Aug 18, 2:00 PM EDT**
- **Drone Law and Policy in Public Safety Operations - Wednesday, Aug 19, 12:00 PM EDT**

- **Drones in Emergency Services** - *Thursday, Aug 20, 4:00 PM EDT*

Drones in Public Safety

Drones and unmanned systems have rapidly become crucial tools for fire, rescue, police and more public safety agencies around the world.

With capabilities for search and rescue, surveillance, crash reconstruction, 3D mapping, drones are saving time, money and most importantly, saving lives across the world.

This webinar Series will answer:

- *How are various public safety professionals and agencies utilizing drones today?*
- *What does it take to implement a public safety drone program?*
- *What are some of the future technologies being developed?*
- *And much more!*

AIRT News Update for Monday, August 10, 2020

Good Morning Vern Sallee,

As we begin a new week in Summer 2020, I would like to bring you up to date with the latest developments at the [Airborne International Response Team \(AIRT\)](#). Here in Florida we recently dodged a bullet with Hurricane Isaias, but other parts of Puerto Rico, the Dominican Republic, the Bahamas, and the U.S. were not quite as lucky. We are working with various stakeholders to learn how they are using

sUAS to recover from the storm. If you or your organization was involved in a response, please contact me so we can help others learn from your experience.

Today, we continue our podcast series *TAMING DISASTER: Drones For Good* with the release of [episode \(006\)](#) featuring guest [Grant Guillot](#) of the Baton Rouge, Louisiana office of [Adams and Reese, LLP](#). Grant and I discuss the need for generating positive public perception of using Drones For Good by both public safety agencies and the commercial drone industry. Grant and I always seem to have great conversations. You can listen in via the links below.

I also want to invite you to a special [webinar](#) this Thursday, August 13 from 2:00 to 3:00 pm EST to discuss "lives saved by public safety UAS programs," as well as to learn about your public safety organization can benefit from the DJI Qualified Entities Program (QEP) [Romeo Durscher](#), Senior Director for Public Safety Integration, [DJI](#), Chief [Wayne Baker](#) (ret.), Director of Public Safety Integration, [DJI](#), Chief [Charles Werner](#) (ret.), Director of [DRONERESPONDERS](#), and I will discuss these topics, along with the need for sharing success stories from public safety drone operations on a global scale. Please [register now](#) for this webinar.

AIRT is to co-producing a robust schedule of podcasts, webinars, and virtual conferences over the next 90 days. Next week, we are again "Going Remote" as we work with the FAA and AUVSI to help deliver public safety-related programming at the [2020 FAA UAS Symposium \(Remotely Piloted Edition\), Part II](#). This event will have content designed specifically for the public safety and emergency services sectors. Look for the full content schedule to be added this week.

To view our growing AIRT and DRONERESPONDERS events schedule, please visit: [airt.ngo/events](#) As always, thank you for supporting AIRT and our non-profit initiatives supporting Drones For Good and the use of UAS by public safety and emergency services agencies around the world!

Sincerely,

Christopher Todd
Executive Director
Airborne International Response Team (AIRT)

SqwaQ Demonstrates BVLOS UAS Flight Capabilities for Controlled Airspace

By The Editor on Aug 10, 2020 06:59 am

SqwaQ has revealed that it has successfully demonstrated its patented airborne LTE drone communications technology for multiple partners. The technology enables drones, helicopters, air taxis and other connected aircraft to share the same airspace rather than being segregated. This eliminates the need for UTM (Unmanned Traffic Management) restrictions and resolves other obstacles that have been [...]

August 7, 2020

By Sanam Yar and Ian Prasad Philbrick

Good morning. New York’s attorney general is suing to dissolve the N.R.A. And President Trump announced restrictions on TikTok and WeChat. Let’s start with the ways climate change is already making life harder around the world.

A warming world

Miracle, a 1-year-old girl in Obrikom, Nigeria.KC Nwakalor for The New York Times

In the past 60 years, every decade has been hotter than the last, and 2020 is on track to be among the hottest years yet. But the burden of extreme heat is not shared equally — it’s significantly worse for people at the bottom of the socioeconomic ladder.

Extreme heat can exacerbate poor health, ravage crops and make it dangerous to work outside. And in many parts of the world, simple ways to alleviate those effects — like water, or electricity for fans and air-conditioners — are a luxury.

Somini Sengupta, The Times’s international climate reporter, and a team of photographers have a new story that documents how rising temperatures are affecting people across multiple continents.

In Athens, heat waves have increased fivefold over the last century. Diminished rains and longer dry seasons are destroying Guatemala’s farmlands, where Indigenous farmers could see crop yields fall sharply. In Nigeria, hotter nights make it easier for mosquitoes to breed, increasing the risk of mosquito-borne diseases. And in the United States, heat kills older people more than any other extreme weather event, including hurricanes.

By The New York Times | Source: Climate Impact Lab

We spoke with Somini about what she described as “one of the most profound inequities of the modern age.”

“I have seen over the last couple of years the impact of what is truly a global problem,” she said. “We know that high heat and humidity is a dangerous combination for health, agriculture and economies of whole regions — nearly everywhere around the world, heat waves are more frequent and longer lasting than they were 70 years ago.”

What do experts recommend to combat rising temperatures?

“Draw down the combustion of fossil fuels,” Somini said. “The world is capable of getting off coal in many instances, capable of vastly reducing the burning of oil and gas.”

But the world also has to adjust to the extreme heat we’re seeing already, she said. That includes making water, air-conditioners and fans more accessible, and planting trees to bring down temperatures in cities.

“It could also mean adjusting things you might not immediately think of, like labor laws so people don’t have to work for hours under the blistering sun, agricultural changes in farming methods or what is grown in what place to adapt to higher temperatures,” she said.

“In short, it requires doing everything pretty differently.”

In other climate news:

- Government scientists updated their forecast for the remainder of the Atlantic hurricane season, predicting “one of the most active seasons on record.” Climate change appears to be making hurricanes more intense and destructive.

FOUR MORE BIG STORIES

1. How the virus endangers at-risk children

Despite their life-or-death duties, most of California’s child welfare workers are now working from home because of the coronavirus. There have been consequences: Many abused children whom the child welfare agency for Los Angeles County deemed to be living under “high” or “very high” risk of renewed abuse were not visited for months, The Times has found.

Caseworkers, meanwhile, say they have not been provided with the protective gear that would allow them to safely visit homes. “We are in completely uncharted territory, and it concerns me greatly,” said Bobby Cagle, the agency’s director.

In other virus developments:

- The State Department lifted its blanket advisory warning U.S. citizens against traveling abroad, but many countries continue to bar American visitors.
- The number of migrants arrested along the U.S.-Mexico border more than doubled between April and July, after economic hardship made worse by the pandemic drove thousands northward.

2. The challenges of rural police shootings

Protesters outside the sheriff’s office in Sedalia, Mo., this month. Whitney Curtis for The New York Times

People in rural parts of the U.S. are killed in police shootings at about the same rate as in cities. But in many small towns, where residents and officials have abiding support for law enforcement, victims’ families and activists say they have struggled to get justice.

The Times’s Jack Healy reported on a case in Sedalia, Mo., where an unarmed woman, Hannah Fizer, was shot and killed by a sheriff’s deputy during a traffic stop in June. The deputy has not been charged or disciplined, and Fizer’s parents say they have not received any updates about the investigation — the sheriff even declined to tell them the deputy’s name.

3. New York sues the N.R.A.

The New York attorney general, Letitia James, filed a lawsuit Thursday seeking to dissolve the National Rifle Association. She said that years of corruption and misspending had irreparably undermined its ability to operate as a nonprofit, and accused its chief executive, Wayne LaPierre, of raiding N.R.A. funds to bankroll an extravagant lifestyle that included frequent trips to the Bahamas.

The attorney general of Washington, D.C., filed suit against the N.R.A. shortly after, alleging that the gun rights lobby had misused its charitable foundation's funds. In response, the N.R.A. filed its own suit against James's office and called the inquiry "a power grab by a political opportunist."

4. A century after suffrage

Michele Jones Galvin and Joyce Stokes Jones, descendants of Harriet Tubman. Haruka Sakaguchi for The New York Times

One hundred years ago this month, women in America won the right to vote, using tactics of protest and persuasion that would look familiar to activists today. The Times spoke to descendants of Ida B. Wells-Barnett, Elizabeth Cady Stanton and other suffragists about the movement's legacy among Americans of all races, faiths and genders.

Here's what else is happening

- President Trump signed executive orders barring transactions with TikTok and WeChat, two popular Chinese social media networks. The orders, which cited national security concerns, take effect in 45 days.

- The U.S. government sent text messages to cellphones in Russia and Iran yesterday offering up to \$10 million for information about people trying to attack American voting systems.
- The authorities charged 24 pro-democracy advocates in Hong Kong with taking part in a June vigil for victims of the 1989 Tiananmen Square protests.
- A former top Saudi official now living in exile claimed that Crown Prince Mohammed bin Salman sent operatives to Canada to kill him in 2018, shortly after Saudi agents murdered the dissident journalist Jamal Khashoggi.
- Bill Hagerty, Trump’s former ambassador to Japan, won a bitterly divisive Republican Senate primary in Tennessee. The race pitted Trump, who endorsed Hagerty, against prominent conservatives like Ted Cruz and Rand Paul, who endorsed his chief opponent.
- **Lives Lived:** Diana Russell, a leading feminist activist and scholar, was one of the earliest researchers to focus on sexual violence against women. She popularized the term “femicide” to highlight the killing of women “because they are women.” Gloria Steinem said Dr. Russell had “a giant influence” on the women’s movement worldwide. She died at 81.

IDEA OF THE DAY: GET READY FOR ELECTION WEEK

A surge of mail-in voting during the pandemic has turned elections into multiday — and sometimes multiweek — events. On Tuesday, New York certified the winners of two congressional primary races six weeks after the last votes were cast.

The delays aren't surprising; many states lack the infrastructure to quickly process large numbers of mail ballots. But the likelihood that it will take longer than usual to know the outcome of November's presidential election has some political observers worried.

- Trump has tweeted that the country “must” know the results on election night — likely an impossible bar if the vote is close. Delays could give him an opening to undermine public faith in the outcome, writes *The Washington Post's* Amber Phillips.
- The media isn't sufficiently girding the public for delays — or for the misinformation that might flower over days or weeks of counting, our colleague Ben Smith argues.
- If you're worried about delays, plan to obtain a mail ballot and return it early, writes *Business Insider's* Grace Panetta. *Fortune's* Nicole Goodkind has a guide to each state's deadlines around absentee voting.

PLAY, WATCH, EAT, FARM

Not your usual sourdough

Heami Lee for *The New York Times*. Food stylist: Maggie Ruggiero. Prop stylist: Rebecca Bartoshesky.

You've likely seen them all over your social feeds: crusty, rustic-looking sourdough loaves many people have grown fond of baking with all that extra

time at home. But sourdough starters can lend themselves to so much more, as evidenced in this recipe for Honduran pan de coco by the baker Bryan Ford.

Traditionally made with coconut milk and whole-wheat flour, these buns incorporate a sourdough starter to add a delicious depth to the bread's flavors. Tear off a piece and dip it into your coffee for an afternoon treat.

Farming influencers are here

For years, many small farmers have tried to find new ways to make a living beyond selling crops alone. “The sleigh rides, the alpacas, the therapy ponies, the pick-your-own hemp,” writes Ellen Barry, *The Times's* New England bureau chief. “It is a new thing, though, to make farm life into reality TV.”

Enter the “farmer-influencer.” Whether it’s uploading drone footage of sun-dappled farmland (“land porn for wistful cubicle dwellers”) or slow-motion videos of geese, some farmers have found they can earn more by streaming snippets of rural life to a growing online audience.

Watch something ... timely

Mark Hill/HBO, via Associated Press

Our weekly suggestion from Gilbert Cruz, The Times's Culture editor:

Normally I'm not inclined to recommend a movie or TV show if it requires doing some homework beforehand. But HBO's "Watchmen" requires just a little bit of essential pre-reading. (Try this piece to start.) And it's worth it. "Watchmen" was one of my favorite shows of 2019 and, last week, received more Emmy nominations than any other show.

Set in Tulsa, Okla., where the police fight against white supremacists, the series exists in a world in which superheroes (well, one superhero) exist but are largely absent. “Watchmen” has many of the things I like in great TV — superb performances, striking visuals and a comfort with not explaining everything all at once. Our chief TV critic wrote that it was “arguably the show of the season well before the George Floyd protests underlined its relevance.”

Diversions

- In this week’s Modern Love, a woman questions what’s so special about being married.
- With no live crowd noise as a buffer at Major League Baseball, on-field sounds are easy to hear on broadcasts — and it’s not all rated PG.
- The late-night comedy hosts weighed in on the lawsuit to dissolve the N.R.A.

Games

Here’s today’s Mini Crossword, and a clue: Francis is the first one from the Americas (four letters).

China Completes Typhoon Drone Observation Test

By The Editor on Aug 07, 2020 06:28 am

The Chinese official media released a story announcing that China successfully completed its first typhoon observation test using a large high-altitude unmanned aerial vehicle (UAV) on Aug 2. By using the UAV for multiple marine meteorological observation tests, the China Meteorological Administration can more accurately track typhoons and issue forecasts. The first typhoon detection test [...]

**FROM THE EDITOR**

ings!

When Commercial UAV Expo Americas debuted, Lisa Murray and Lee Corkhill saw almost immediately that the drone industry was going to be disruptive and dynamic and that one event once a year wasn't going to be sufficient to keep the industry apprised of everything going on. This kind of ever-evolving industry required constant news coverage, and they developed Commercial UAV News to help keep everyone up to date on the latest news and trends.

The industry continues to be just as dynamic as it was when Commercial UAV News started five years ago, and that makes my job exciting and never dull. Watching the industry mature and grow since I joined this team in September has been an incredible experience.

For example, this past week we saw some key changes in upper-level management of two key players in the industry—Unify welcomed Leon van de Pas as CEO and DroneAnalyst appointed David Benowitz as Head of Operations. Changes like this are signs that the industry is maturing, and developing a sense of what it needs to do in that phase of maturity.

For news, August has some very interesting upcoming webinars. Both Emesent and Carlson Software are hosting webinars on the 12th and 19th of this month from 11 am to 12 pm EST, respectively. You can register for them here.

If you are interested in what else we have in store, you can check out our whole lineup of upcoming events below.

ell and stay safe,

Company Appoints Leon van de Pas as CEO to Lead the Drone Company into Maturity

Michelle Gagne

World accustomed to working with two-dimensional maps, Unifly has been helping drone pilots and the enterprise visualize and operate in three-dimensional space since 2015 with their UTM platform. Led by Marc Kegelaers as CEO, the company grew from a small startup to raise over 10 million euro in VC capital and investments. Now that they have reached a new phase in their lifecycle, and are looking to accelerate growth, they have appointed Leon van de Pas as their new CEO.

LiDAR Scanning and 3D Building Information Modeling for Construction and Facilities Management Projects

Monday, August 11, 2020 | 1:00PM – 2:00PM Eastern Time

This discussion will highlight how LiDAR data and imagery were used to create an accurate building information model that is currently being used for airport design, construction, and integration into their facilities management program. Visualization capabilities and survey-accuracies are some of the highlights of the developed building model and the speakers will explore how their solutions and workflows utilize these efficiencies to create real-world success.

Drone Mapping: Enabling Autonomous LiDAR Mapping in Challenging, Inaccessible Areas

Tuesday, August 12, 2020 | 11:00AM - 12:00PM Eastern Time

COVID-19 has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent, and the drone industry will see and feel them over the next months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many decisions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many more, followed by a live Q&A session with the audience.

Optimizing 3D Mapping Productivity, Ease of Use, and Your Bottom Line

Wednesday, August 19, 2020 | 11:00AM - 12:00PM Eastern Time

Learn how to vectorize map features quickly and easily to get your work done faster. Whether it's extracting roof and gutter lines from point clouds, or digitizing road infrastructure with stereo photogrammetry, this webinar will give you tips on how to increase the efficiency of your drone mapping workflow and increase your business's bottom line.

Tools to Identify Construction Issues Before They Become Issues

Thursday, August 27, 2020 | 2:00PM – 2:30PM Eastern Time

Despite advancements in digital construction technology, workflows targeting cost implication and potential rework in construction are not being widely adopted. Utilizing reality capture, along with other digital construction tools are estimated to reduce rework by 1-3%. Hundreds of millions of dollars are being spent yearly on construction rework that could be reduced and avoided. With today's technology, understanding these workflows to identify issues before they become issues and achieving a zero-rework project can happen; it takes project collaboration and commitment.

Underground & Indoor Mapping with 3D Lidar Mapping

Hi Charles,

Thank you for the report. In section 4, Additional information needed: you are asking for the Motor 4 ESC board and wires attached.

We sent everything we could locate after the incident. Is it possible to get a photo of a motor ESC board and wires so we can know what we need to look for.

Thanks
Jim

Hi,

We currently have a conclusion: Propulsion issue caused the unit to spin out of control and fall. I will send you the preliminary report ASAP. Thanks.

Best,
Charles

Hi Jim,

Sorry for the late reply. We are working on your case right now. I am following up with our internal team to see the cause of the issue. I will let you know if you I get any update. Thanks.

Best,

Charles

Hi Charles,

I was on the DJI website checking on our drone and had a question?

Does the under repair mean the drone is able to be fixed and will be sent back after repair or is the drone so damaged it will be replaced?

Also we are eagerly waiting for the initial report on the cause of the incident.

Thanks,

Sgt. Jim Horst

TOP NEWS

PrecisionHawk awarded two patents for its UTM technologies

AUVSI (8/11/2020)

PrecisionHawk has been awarded two patents for technologies it has developed for UAS traffic management. Known as the "Automated Unmanned Air Traffic Control System,"™ the patents are designed to enable collision avoidance between drones and manned aircraft, which is achieved by transmitting real-time flight data from drones to a UTM server prior to and while in-flight.

Airbus unveils autonomous helicopter

Robotics & Automation News (8/10/2020) Edwards, David

The prototype of Airbus Helicopters'™ VSR700 UAS has performed its first free flight. The VSR700 performed a 10-minute flight at a drone test centre near Aix-en-Provence in the south of France.

INDUSTRY NEWS

AeroVironment introduces enhancement options for its Puma UAS product line

AUVSI (8/11/2020)

AeroVironment has launched two new Puma product line enhancement options that improve and expand the operational capabilities of its family of tactical UAS. AeroVironment worked with front-line users to develop the product enhancement options, which the company says "enable customers to proceed with certainty in ever-changing operational environments."

Yandex selects Ann Arbor, Michigan as next testing location for its self-driving cars

AUVSI (8/6/2020)

Yandex has selected Ann Arbor, Michigan as the third urban testing ground for its self-driving cars. A variety of factors make the city of Ann Arbor an ideal testing place, Yandex says, including the city's™ wealth of research and engineering facilities and many bright young minds, and the state's™ "every progressive and supportive" regulatory environment for the development of self-driving cars.

Brain Corp's manufacturing partners deploy autonomous delivery tugs across the U.S. *AUVSI (8/5/2020)*

Artificial intelligence software technology company Brain Corp has announced that its manufacturing partners are involved in several pilots and initial deployments of autonomous delivery tugs powered by BrainOS, which is Brain Corp's cloud-connected operating system for commercial autonomous robots.

UAS used to remotely inspect runway at Cranfield Airport in England *AUVSI (8/10/2020)*

For the first time, UAS were used to remotely inspect the runway at Cranfield Airport, which is located just outside the village of Cranfield, in Bedfordshire, England. Utilizing "drone-in-a-box"™ technology, the flights' goal was to enable routine inspections using UAS that can be automatically deployed, recovered and recharged without the need for an on-site pilot.

Subject: RE: J Street Park Fly In for Grossmont College Drone Program

Good morning Skip and Paul,

Congrats on having such a robust program and taking initiative gents! I spoke with my drone team sergeant, Jim Horst, about this request. He informed me that the Navy has requested that we do not train at J Street due to the operations they have in the area, so even our drone team doesn't train there. That being said, there are two authorized drone training sites in the eastern portion of CV and we can work on getting you permission to fly there. Jim is working on a number for you. I also have a contact at the Olympic Training Center who may be able to authorize training there, but it would require a hold harmless agreement. I'm not sure we could pull that one off in short notice. Once Jim gives me the contact info at the city for the drone fields, I'll see what I can do. It's certainly not as scenic as J street or Fiesta Island, but it may be the best we can do for now.

Best,
Vern

Officer Sallee

I would say that the initiative taken by Paul in contacting you, shows to the type of students within the Drone Program at Grossmont College.

The "event" at the Fiesta Island, was the 'graduation party' for the students. I was going to assign them each a particular flight/shot that would be combined into a class room video portfolio that would be used to promote their work around the industries and companies I work with.

I certainly know this is last minute, but I was really shocked that the San Diego Park and Recs turned down my application since drones, drone flight are permitted on Fiesta Island.

All the being said, congratulations on the work you are doing in the Industry, and visit my 'talk' on education today at 9:45

Thanks in advance for any help you may be able to provide

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Hello Vern, we hope you've been enjoying DJI AirWorks so far! There's still plenty to come today and tomorrow, so stay tuned!

What's happening today

Last Call for Scheduling Braindates:

We've partnered with peer learning experts at e180 to help you form meaningful connections and have valuable conversations at AirWorks. Every registered AirWorks attendee has access to Braindate. This is your opportunity to still meet "face-to-face" despite this year's event being virtual.

Book a braindate or post your own braindate topic to have one-on-one or group discussions (via video chat) with others on topics that matter to you!

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

How it works:

1. Use your ticketed email address to log into [Braindate at AirWork](#)
2. Create your profile.
3. Join braindate topics you find interesting on the topic market. Both one-on-one and group conversations are available.
4. Create your own topics so that others can join you for a braindate.
5. Meet up virtually on the Braindate Platform during Airworks!

Start Sharing Knowledge!

AirWorks Game:

Some prizes have already been awarded, including a FLIR ONE Pro from [FLIR Systems, Inc.](#), DJI Mavic Air 2, GPC M300 Case from [Go Professional Cases](#) and a set of children's drone books from [Women and Drones!](#)

Here's another code for points towards the [AirWorks Game](#). Game code is:

5DB58C

Warm Regards,

Denise Hibbard from the DJI Enterprise Team

DJI, 201 S. Victory Blvd, Burbank, California 91502

Email

Captain Sallee,

I have been attending Air Works this week, and I took the opportunity to join your presentation this afternoon. So glad that I did, as it was one of the best sessions so far.

When we spoke on the phone about your department's COVID response efforts to reach people in the homeless encampments, you used the phrase, "drone as a first responder." I certainly better understand what that means now. The video of the man brandishing a "gun" and how the drone and camera provided information to the officers before they arrived on the scene was such a compelling case for UAV use by police departments.

In sharing what I learned at Air Works today with my COO Deniz Dogruer, I was reminded about a use case that you and I spoke about—how our drone-deployable robots might be effective in rescue missions in the Glamis Sand Dune area. Squishy Robotics is currently working on a Small Business Technology Transfer (STTR) proposal for the rapid delivery of customizable payloads that would contain medicine or communication equipment during humanitarian aid or disaster response operations.

I am cc'ing Deniz on this email in the hopes that you might have the time to talk to her about this proposed use case. I am certain that your knowledge and advice would help us better craft our proposal narrative.

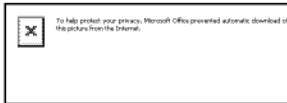

Of course, we will understand if you are too busy with all your responsibilities and can't spare the time right now.

Thank you again for a most informative presentation today.

Yours,

Katie Calvert

Subject: FAA Safety Alert for Drone Pilots in Hurricane Laura's Path

Categories: Green Category

**Warning:
External
Email**

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Safety Alert for Drone Pilots!

The Federal Aviation Administration (FAA) is monitoring Hurricane Laura closely and preparing FAA facilities and equipment in Texas, Louisiana and Arkansas to withstand potential damage so flights can quickly resume after the storm passes. Restoring air carrier service is critical to support disaster relief efforts.

Emergency response flight operations will take place below 500 feet in affected areas. Drone pilots should check NOTAMs and TFRs and avoid flying in areas where drones are prohibited.

Drone pilots must comply with FAA rules and should:

1. Avoid flying in the area unless authorized by the FAA to conduct an active disaster response or recovery mission.
2. Be aware that the FAA might issue a TFR in the affected area. Be sure to check for active TFRs if you plan to fly.
3. Remember that you cannot fly inside a TFR without FAA approval.

Public safety agency emergency operations and response:

- During or after a natural disaster, do not fly your drone in or around emergency response efforts, unless you have special FAA authorization to do so. Emergency responders operate low flying aircraft below 500 feet as part of the storm response ? mostly in low visibility areas. If you fly, emergency response operations can?t.
- To provide emergency relief with expedited approval through the Special Governmental Interest (SGI) process, Part 107 and Public Aircraft Operators must submit an Emergency Operation Request Form (MS Word) with your existing Remote Pilot Certificate or existing Certification of Authorization (COA) ? and send to the FAA's System Operations Support Center (SOSC) at 9-ator-hq-sosc@faa.gov.
- Limited recreational flyers flying under Section 44809 are not eligible for the SGI process.
- Watch our webinar How to Fly Your Drone During an Emergency.

Be aware that you may be subject to significant penalties of \$20,000 or more if you operate a drone and interfere with emergency response operations. Flying a drone without authorization in or near the disaster area may violate federal, state, or local laws and ordinances, even if a TFR is not in place. Allow first responders to save lives and property without interference.

The FAA has hurricane preparedness information and additional resources:

- Hurricane Awareness Digital Toolkit (PDF)
- Temporary Flight Restrictions (TFRs)
- Notices to Airmen (NOTAMs)
- Flight Service Weather Briefs

Follow the FAA on social media for the latest drone and aviation news!

Enterprise Grade Security for Enterprise UAS Operations

Monday, September 14 | 1:00PM - 2:00PM ET

Join Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your drone operations from data attacks, hacks, and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Specifically, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most sensitive data one can collect.

Registrants for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Schiebel and Nordic Unmanned Conduct World's First Full-Scale Offshore UAV Flight for Equinor

By The Editor on Aug 31, 2020 06:59 am

Schiebel, together with partner Nordic Unmanned, successfully demonstrated to Norwegian energy company Equinor the cargo delivery capability of its Unmanned Aerial Vehicle (UAV) CAMCOPTER S-100 to offshore platform Troll A. This is a world's first in terms of full-scale offshore UAV delivery from shore to an active oil and gas installation. The exercise simulated the [...]

Reliable Robotics Makes First Flights of Autonomous Passenger Airplanes Over Populated Regions

By The Editor on Aug 31, 2020 06:56 am

Reliable Robotics announced that it has achieved historic firsts for global commercial aviation by completing successful test flights of remote-piloted passenger airplanes in United States airspace. In the first flight, the pilot pressed a button on a remote user interface and the unmanned four passenger Cessna 172 Skyhawk (C172) automatically taxied, took off, and landed. [...]

Avinor Begins Roll Out of First Nordic UTM

By The Editor on Aug 31, 2020 06:30 am

Avinor Air Navigation Services (ANS) is working with Frequentis and Altitude Angel to implement an unmanned traffic management (UTM) system at 18 airport towers across Norway. The system, which is being tested in a real-world environment at the first two airport towers, before being rolled out nationwide, will support the countries future drone strategy. The [...]

--

FYI if any of you are interested.

I have a Private Educational Social Media Site called Drone Connects.

<http://www.droneconnects.com>

It was designed to teach my students once classes were cancelled back in March because of Covid.

It has grown since then into an interactive site made up of former students, current students, and other members of the drone community.

There is no direct access to the site, its invite only.

The site features a course section, with curriculum that I personally developed.

Every Saturday at 9am I broadcast a 45 Minute Zoom Room TV Show. I call it TV because it is actually broadcast and formatted to run on the Roku TV platform.

In some cases the shows are 100% educational and directed at current students, in other cases just tips and tricks, and in still other cases its news of the week and interviews with people in the drone industry.

So please feel free to join the site and to watch the Zoom TV.

Additionally it would be great to do a Video Interview with any spokesperson for the drone department at your department in the future, would be a big deal for the students.

If you didn't yet here is the Invite Link to my Educational Social Media Site.

Drone Connects: https://www.droneconnects.com/share/BUgB-i5bnFmJeoFU?utm_source=manual

Also at 9am PT Saturday's is my Zoom Room TV Show.

Here is the link to that.

Hey Everyone,

First of all I would so like to thank each and everyone of you for your blistering fast response.

I did not expect it and certainly appreciate it.

That being said, changes to times and locations for the event I was planning to do this Sunday is not possible... students, weekend, tracking them all down...

So, I certainly would love to use your location at least once to provide a different scenario for my students.

Additionally as you noted I would love to explore other opportunities, including having your pilots or students jump right into some of my classes, specifically my night training.

As noted in my past emails, I am working with DJI right now with Airworks.

So how about we connect after the Labor Day Weekend. Maybe so a Zoom Chat and talk about how we can work together in the near future.

Thanks Again

Hello Officer Sallee,

My name is Paul Knabe. I recently received my 107 and graduated from the drone technology program at Grossmont College. We were going to have our last class at Fiesta Island this Sunday. We have been having class there for a couple weeks because of the heat but they required a permit now because our instructor Skip Fredricks was "teaching". Would it be possible if we could use a small section of J St. Park for this Sunday? Would we need a permit to fly? We have about 20 students with only 4-6 flying at a time. We have flight plans, emergency procedures and all our pilots have at least 40 hours of flight.

I watched your presentation on AIRWORKS today and wanted to reach out. I've copied Skip on this email as well. Skip has liability insurance for the class. Skip is also a guest speaker for AIRWORKS and has over 20 years experience in the drone industry. His website is hollywooddrones.com.

I have lived in Chula Vista for over twenty years and I was pleased to find out the UAS program is successful. I work for Border Patrol and understand the importance of transparency. I look forward to your response. If we need to contact someone else, please let us know. Please let me know if you need any support for the program.

Thanks,

Paul Knabe, Owner

Hello Vern, with AirWorks coming to a close on our 4th and final day, we hope you have been enjoying the virtual conference! Today is still jam packed with commercial drone content, so make sure to tune in!

What's happening today

Beating an Ancient Scourge: Using Drones to Fight Malaria Mosquitoes

Tune in today at 10:45AM PDT to hear Dr. Bart Knols and Guido Welter of Anti-Malaria Drones present the findings of their [research using spraying drones to combat mosquitos.](#)

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.
 Training Session

The DJI Slack Forum will stay open for one month after AirWorks

Even after AirWorks is over, you can stay connected with us and other attendees with the DJI Slack Forum. Don't miss out on discussion and networking opportunities with other attendees!

If you haven't joined the DJI Slack Forum yet, this is how you can:

1. Join Via the App

The easiest way to get into the AirWorks Slack Forum is via the AirWorks app. Once you're logged in to your account via the app, you'll see the box called "Connect with Slack" on the *Home* tab.

If this is your first time using the AirWorks Slack Community, please select "Gain access." An email will be sent to your inbox from Slack directly to create your account.

If you've already created an account, click "Log In" to be taken directly to Slack, where you can input your email and password to access Slack via mobile device.

Download the AirWorks App for [iOS](#) or [Android](#).

2. Request Access via Web

You can also request to be added to our Slack Forum via web. To do so, [please click here](#), and fill in the form using the email address attached to your ticket.

You'll receive an email confirmation letting you know if you've been verified, and a team member will send you an invite shortly!

**Note that requests through the web are processed during conference hours and until 6:00 PM Pacific Time.*

We're closing in on the final stretch for the [AirWorks Game](#)! Here's another QR code for you! Game code is: **5DB58C**

Warm Regards,

Denise Hibbard from the DJI Enterprise Team

DJI, 201 S. Victory Blvd, Burbank, California 91502

KVH Introduces P-1775, First Photonic IMU

KVH's P-1775 IMU, the 1st photonic-based IMU, is shipping now. P-1775 IMU has the PIC Inside, for enhanced reliability & repeatability. [Read about KVH's PIC Inside.](#)

TOP NEWS

Amazon's drone delivery fleet hits milestone with FAA clearance

Bloomberg (8/31/2020) Levin, Alan

On Monday, Aug. 31, the FAA designated Amazon Prime Air an "air carrier." This designation allows Amazon to begin its first commercial deliveries in the U.S. under a trial program, using the Prime Air drones that the company unveiled last year.

Eye in the sky: how drone technology is transforming film-making

The Guardian (8/31/2020) Gilbey, Ryan

Drones have been used to help capture scenes during the film-making process, but they could soon become a part of the action that actually takes place in films. An example of this is the role that the technology plays in Ladj Lyâ€™s French drama *Les Misérables*, which takes a look at life in Montfermeil, a commune in the eastern suburbs of Paris, France.

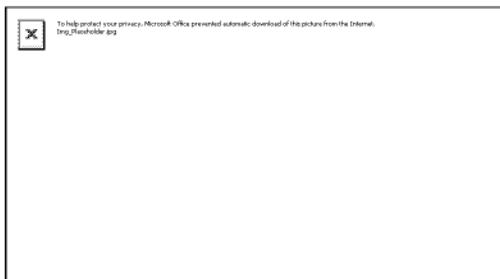

INDUSTRY NEWS

Farmers using technology to inspire the next generation

Fox 13 Salt Lake City (8/31/2020) Stone, Stephanie

Farmers are increasingly embracing new technology such as drones to help with their day to day operations. One farmer is using drones to collect data, and to spray his crops.

Dynamics successfully tests second X-61A Gremlins Air Vehicle

AUVSI (8/31/2020)

Dynamics Inc. has announced that in July, the company successfully tested a second X-61A Gremlins Air Vehicle, as well as the Gremlins airborne recovery system, at Dugway Proving Ground in Utah for the Defense Advanced Research Projects Agency.

Reliable Robotics completes test flights of remote-piloted passenger airplanes *AUVSI (8/27/2020)*

Reliable Robotics, a company that is equipping airplanes with an autonomous capability, has announced that it has completed successful test flights of remote-piloted passenger airplanes in United States airspace, which is considered a historic first for global commercial aviation.

Alion to provide Autonomy and Navigation Technology for U.S. Air Force Institute of Technology *AUVSI (9/1/2020)*

Alion Science and Technology has been awarded a \$20 million task order from the U.S. Air Force Institute of Technology, with a 60-month period of performance to provide Autonomy and Navigation Technology Development.

Hi Vern,

I write to introduce you to Don Roby. A former Captain with the Baltimore County PD with 35 years of service (including years of commanding the aviation unit), Don is a veritable legend in the world of public safety use of aircraft and drones. Don chairs IACP's aviation committee and serves as the training program manager for the Airborne Public Safety Association. We first met years ago on an FAA committee.

Don asked me to connect him with CVPD, and there is no better connection than you, Vern. Vern is the Patrol Operations Captain at CVPD, and the long-time leader of its groundbreaking drone program.

I understand that Don is considering hosting a webinar on Tactical BVLOS operations in October. I'll leave next steps to the two of you. Thanks.

Best,
Brendan

Great! I have sent a calendar invite for Tuesday at 1pm. I'm still trying to confirm exactly who else will be joining and will add them to the invite once I have.

I've set up a zoom meeting (joining details copied below for convenience); however due to new security measures participants must sign in to a zoom account in order to join the meeting or dial in via phone. If this will be an inconvenience at all, I could set up a google meet as an alternative.

Join Zoom Meeting

<https://berkeley.zoom.us/j/92755717305>

NON RESPONSIVE

Truly appreciate your willingness to speak with me. 1pm on Tuesday, Sept. 1st would be great! Others from my team may also be interested in joining the call, if that's alright with you.

What would be the most convenient way for us to connect? I am happy to set up a conference/video call or call you directly, just let me know your preference.

Looking forward to talking in more detail next week.

Thank you,

Deniz

Hello Captain Sallee,

I am very interested in the innovative work you're doing with the Drone as a First Responder program with Chula Vista and have been following your updates on LinkedIn for a while now. We are developing drone-droppable sensors to enable persistent, ground-based remote sensing and envision our platform could complement first responders' drone use. For example, here is a [video](#) of our HazMat sensor robot being deployed during an overturned tanker training scenario conducted with Los Angeles County Fire Department. Working closely with first responders to identify their needs and obtain feedback has been a priority throughout the development of our technology, from idea phase to testing, and are currently collaborating with Southern Manatee Fire & Rescue for testing and feedback to improve our HazMat sensor robot.

As Katie mentioned, we are also working on a proposal for additional research and development funding to further develop the ability to deliver and pick-up small payloads that are customized to carry a variety of medicines, testing kits, smartphones enabling telemedicine, and other medical supplies to individuals living in and/or medical teams working in remote or inaccessible areas that may be difficult to reach quickly because of distance or geographic conditions for humanitarian aid/disaster response.

As a true thought leader in the use of drones in emergency response and your experience with the Drone as a First Responder program, I would appreciate your ideas and thoughts about the potential use of drones to enable the delivery of emergency medical supplies into remote or inaccessible areas. Would it be possible to schedule a quick 20-30 min phone call in the coming days?

Thank you,

Deniz

On Wed, Aug 26, 2020 at 10:59 PM Katie Calvert <katie@squishy-robotics.com> wrote:

Captain Sallee,

I have been attending Air Works this week, and I took the opportunity to join your presentation this afternoon. So glad that I did, as it was one of the best sessions so far.

When we spoke on the phone about your department's COVID response efforts to reach people in the homeless encampments, you used the phrase, "drone as a first responder." I certainly better understand what that means now. The video of the man brandishing a "gun" and how the drone and camera provided information to the officers before they arrived on the scene was such a compelling case for UAV use by police departments.

In sharing what I learned at Air Works today with my COO Deniz Dogruer, I was reminded about a use case that you and I spoke about—how our drone-deployable robots might be effective in rescue missions in the Glamis Sand Dune area. Squishy Robotics is currently working on a Small Business Technology Transfer (STTR) proposal for the rapid delivery of customizable payloads that would contain medicine or communication equipment during humanitarian aid or disaster response operations.

I am cc'ing Deniz on this email in the hopes that you might have the time to talk to her about this proposed use case. I am certain that your knowledge and advice would help us better craft our proposal narrative.

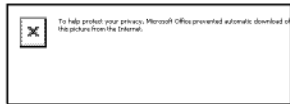

Of course, we will understand if you are too busy with all your responsibilities and can't spare the time right now.

Thank you again for a most informative presentation today.

Yours,

Katie Calvert

FROM THE EDITOR

gs!

It is hard to believe that we are less than 2 weeks away from Commercial UAV Expo Americas, which will start on September 15th with Virtual Flying Demos, more emerging tech showcases, New Product and Company Announcements, and Company Spotlights and will be followed by some of the best content lineup ever including keynote addresses from the FAA and DHS, and the White House and UPS Flight Forward Team and much more. As part of our pre-show amp-up we'll be hosting two webinars on September 14th: "Enterprise Grade Security for Commercial UAS Operations" with Joshua Ziering of Kittyhawk from 1:00 PM to 2:00 PM EDT, and our second Virtual Flying Tech Showcase webinar on September 14th from 3:00 AM to 4:00 PM EDT with big names like DJI, Skydio, Robotics, DroneUp, Alynix, and Ascent Aerosystems giving presentations and answering questions. This is a great opportunity for anyone who has interest in these systems to engage in a conversation with industry-related experts.

If you haven't registered for the event but would like to, you can do so [here](#).

Stay well and be safe,

Danielle Gagne

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

entire world shifts to a new normal in the present while continuing to explore opportunities for the future, it's our goal to provide our communities with resources that can help make sense of both. We're taking that effort to the next level with a series of webinars, all of which will be highlighting topics and issues that will be especially relevant to countless professionals in the coming weeks, months and years.

Don't sign up for free to any or all of the webinars below to join live or on-demand:

Scanning and 3D Building Information Modeling for Construction and Facilities Management Projects

Webinar Demand

This discussion will highlight how LiDAR data and imagery were used to create an accurate 3D building information model that is currently being used for airport design, construction, and integration into their facilities management program. Visualization capabilities and surveying accuracies are some of the highlights of the developed building model and the speakers will explore how their solutions and workflows utilize these efficiencies to create real-world success stories.

Map: Enabling Autonomous LiDAR Mapping in Challenging, Inaccessible Areas

Webinar Demand

The COVID-19 pandemic has already reshaped the ways countless businesses function, but the fallout and ramifications of the pandemic that brought the global economy to a standstill are just beginning to be felt. More changes are imminent, and the drone industry will see and feel them over the next few months and years. What has this situation taught us about how drones can be utilized in emergency situations? How does the revised economic prediction for 2020 impact the many decisions that have been made about the future of drone technology? What will the "new normal" in the drone space look like? Join a panel of experts to discuss these topics and many more, followed by a live Q&A session with the audience.

Increasing 3D Mapping Productivity, Ease of Use, and Your Bottom Line

Webinar Demand

Learn how to vectorize map features quickly and easily to get your work done faster. Whether it's extracting roof and gutter lines from point clouds, or digitizing road infrastructure with stereo photogrammetry, this webinar will give you tips on how to increase the efficiency of your drone mapping workflow and increase your business's bottom line.

Tools to Identify Construction Issues Before They Become Issues

Webinar Demand

Despite the advancements in digital construction technology, workflows targeting cost implications and potential rework in construction are not being widely adopted. Utilizing reality capture, along with other digital construction tools are estimated to reduce rework by 1-3%. Hundreds of millions of dollars are being spent yearly on construction rework that could be reduced and avoided. With today's technology, understanding these workflows to identify issues before they become issues and achieving a zero-rework project can happen; it takes project management, innovation and commitment.

Raise Grade Security for Enterprise UAS Operations

Webinar Demand, September 14, 2020 | 1:00PM - 2:00PM Eastern Time

Join Skyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your drone operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Additionally, you'll learn how to leverage a security posture, risk assessments, data

Amazon wins FAA approval for Prime Air drone delivery fleet

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

The approval will give Amazon broad privileges to "safely and efficiently deliver packages to customers," the agency said. The certification comes under Part 135 of FAA regulations, which gives Amazon the ability to carry property on small drones "beyond the visual line of sight" of the operator. Amazon said it will use the FAA's certification to begin testing customer deliveries.

Hi Vern,

I write to introduce you to Don Roby. A former Captain with the Baltimore County PD with 35 years of service (including years of commanding the aviation unit), Don is a veritable legend in the world of public safety use of aircraft and drones. Don chairs IACP's aviation committee and serves as the training program manager for the Airborne Public Safety Association. We first met years ago on an FAA committee.

Don asked me to connect him with CVPD, and there is no better connection than you, Vern. Vern is the Patrol Operations Captain at CVPD, and the long-time leader of its groundbreaking drone program.

I understand that Don is considering hosting a webinar on Tactical BVLOS operations in October. I'll leave next steps to the two of you. Thanks.

Thanks Brendan, and I hope all is well with you at Skydio!

Good afternoon Don, glad to connect with you. I'm afraid my resume doesn't compare to your experience, but I'm happy to connect and answer any questions you may have about our program. My desk line is 619-691-5218 and my cell is **PERSONAL/PRI**. I look forward to chatting.

Warm regards,
Vern

Hi Vern,

I write to introduce you to Don Roby. A former Captain with the Baltimore County PD with 35 years of service (including years of commanding the aviation unit), Don is a veritable legend in the world of public safety use of aircraft and drones. Don chairs IACP's aviation committee and serves as the training program manager for the Airborne Public Safety Association. We first met years ago on an FAA committee.

Don asked me to connect him with CVPD, and there is no better connection than you, Vern. Vern is the Patrol Operations Captain at CVPD, and the long-time leader of its groundbreaking drone program.

I understand that Don is considering hosting a webinar on Tactical BVLOS operations in October. I'll leave next steps to the two of you. Thanks.

Best,
Brendan

Good morning Vern. Brendan was just being nice to me.... I wanted to touch base with you and ascertain if you would be interested (or someone from your drone unit) in participating in a webinar for our Monday Drone Operators Webinar Series regarding Tactical BLVOS? We have a very active drone community/membership, and they support these webinars. We normally average between 50 to 75 people virtually attending them from all over the world.

I will give you a call today and we can discuss this further.

Thanks, and please stay safe and healthy,

Don

Emerging Tech Showcase

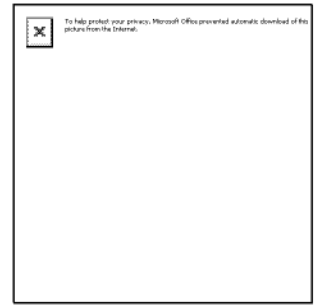

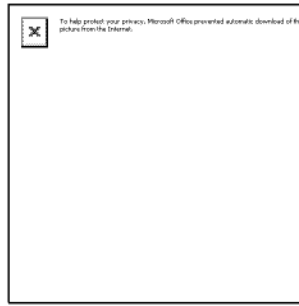

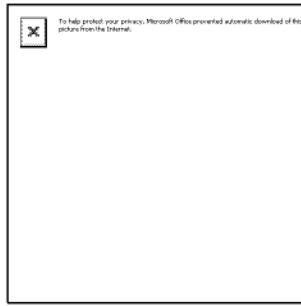

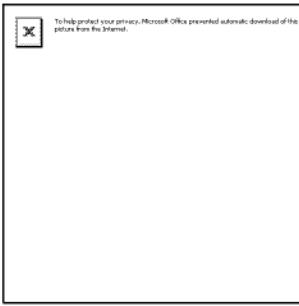

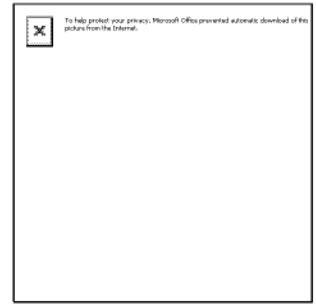

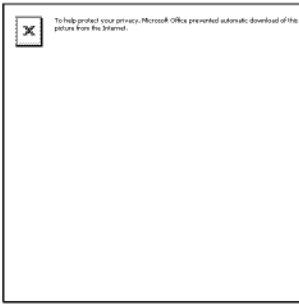

Wednesday, September 2 | 11:00AM - 12:30PM ET

As new products, software, and features are introduced, technology and its capabilities are constantly changing to make work safer, faster, cheaper, and better. By attending our Emerging Tech Showcase you will be able to stay up to date on what is out there and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry.

Join us today and see the latest solutions from Alynix, Ascent, Auterion, MicaSense, Narma, RIEGL, Sabrewing, and Skydio.

Russia's Su-27 Stealth Fighter: Now Remote-Controlled

?

By The Editor on Sep 02, 2020 06:55 am

The combat capabilities of Russia's Su-57 fifth-generation fighter have been compared to the United States Air Force's F-22 Raptor. The Russian aircraft's speed and armament could allow it to respond quickly to potential threats—and if necessary back out just as quickly from fights it cannot win. But now the Su-57 could have another advantage: a remotely piloted [...]

IAI Introduces MultiFlyer – A Fleet of Small Helicopter Non-Military UAVs

By The Editor on Sep 08, 2020 06:54 am

Israel Aerospace Industries has introduced MultiFlyer, a UAV squadron of small unmanned helicopters that can fulfill a large range of non-military tasks. MultiFlyer provides advanced monitoring capabilities for large areas and is based on commercial, off-the-shelf helicopter UAVs from Alpha Unmanned Systems integrated with components from IAI and several Israeli startup companies. The command and [...]

UK CAAi to Draft Drone Regulations for Thailand

By The Editor on Sep 08, 2020 06:48 am

CAA International (CAAi) has been appointed by CAA Thailand (CAAT) to draft new drone regulations. The nine-month project will allow CAAT to safely integrate the operations of Unmanned Aircraft System (UAS) into Thailand's aviation system. UAS experts from the British aviation regulator will start by assessing Thailand's

primary legislation and determine any areas for consideration for UAS [...]

Enterprise Grade Security for Enterprise UAS Operations

Monday, September 14 | 1:00PM - 2:00PM ET

Learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most sensitive data one can collect. Join Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your drone operations from data attacks, hacks, and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program.

Registrants for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

[REGISTER NOW](#)

FEATURED SPEAKER

Josh Ziering

CTO and Founder, Kittyhawk

A recognized visionary leader, Joshua regularly writes about drone-related topics where he eagerly shares his love of aviation and (often-polarizing) opinions on the future of the industry. Josh is oft quoted in news publications and frequently presents at conferences and participates in panel discussions. A self-taught software programmer and serial entrepreneur, Joshua holds a bachelor's degree in poetry from Arizona State University.

To: Shermaine Abad; Don Redmond; Vern Sallee
Cc: Joseph Walker
Subject: RE: Drone response data

Follow Up Flag: Follow up
Flag Status: Completed

Hi Shermaine,

I believe the incident which caused the delay in response time was one of the UAS pilots actually leaving the station to assist with using a drone at an 1180 scene in east Chula Vista.

I believe the concept you list below will work. I am working with the team to make sure they get dispatched and go 1097 on the calls. But this will be a team effort with the UAS program and dispatch.

Thanks
 Jim

From: Shermaine Abad <sabad@chulavistapd.org>
Sent: Wednesday, September 2, 2020 3:27 PM
To: James Horst <JHorst@chulavistapd.org>; Don Redmond <DRedmond@chulavistapd.org>; Vern Sallee <vsallee@chulavistapd.org>
Cc: Joseph Walker <jwalker@chulavistapd.org>
Subject: Drone response data

Good afternoon,

Joseph and I were discussing ways to better represent the response time data regarding UAS. There was a recent priority 1 call where the drone was dispatch to a major injury collision about two hours after the call was created. This brought the average response time up from around 5.5 minutes to 10 minutes.

We understand that there was may be an operational reason for the delayed dispatch and arrival time so we're trying to figure out how to account for those situations. Is it reasonable to exclude from the response time average:

- Priority 1 calls where the drone was NOT dispatched within 5 minutes of the call creation
- Priority 2 calls where the drone was NOT dispatched within 15 minutes of call creation

Thanks in advance for your insight

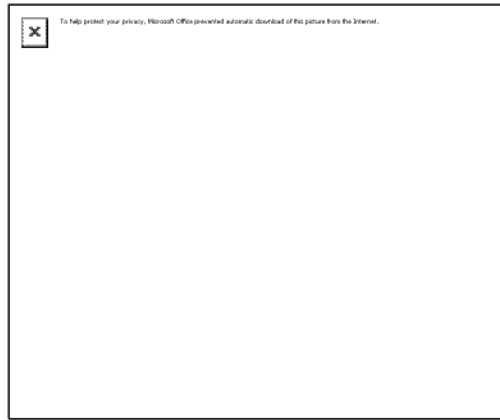

Shermaine Abad

Honeywell Unveils Next-Generation Avionics Lab for UAS and UAM

By The Editor on Sep 04, 2020 06:47 am

A new research and development lab built by Honeywell is demonstrating the company's technological capabilities in both hardware and software for the unmanned aerial systems (UAS) and urban air mobility (UAM) markets. The lab, which resembles a conceptual UAM vehicle flight deck with real hardware, is the first of its kind to demonstrate actual fly-by-wire controls [...]

Commercial UAV Expo Americas

Hi Vern,

Your registration to Commercial UAV Expo Americas was successfully completed!

Now that you are registered for Commercial UAV Expo Americas, you can start networking with other attendees!

You can find all of the event information here:

[Commercial UAV Expo Americas](#)

Take the work out of networking. It's easy to take advantage of personalized matchmaking through our AI-powered networking tool **Commercial UAV Expo Connect** powered by **Grip** and sponsored by **DroneUp**.

And we have some great news: You can start building your network right now!

Follow these easy steps to start connecting:

1. **Go to <https://matchmaking.grip.events/commercialuavexpoconnect/event-login>**
2. **Enter your email**
This **must** be the email with which you registered for the event (the one this registration confirmation email was sent to!).
3. **Enter your Ticket/Registration ID**
This is the number next to your name at the bottom of this email.
4. **Create a password**
You'll use this password to access your account. You can always reset if you forget it.

How can you make connections?

Connections and Meetings are a core element of a successful event experience. We've made this as easy as possible, distilling it down to 5 simple steps to get a calendar full of meetings!

1. **Complete your profile!**
Completing your profile is KEY to unlocking the power of the AI-enabled networking feature. To get the best recommendations of people to meet and increase the chances that people accept your meetings, **completing your profile** is crucial! Add a profile image, fill out your summary and answer the event-specific questions. It won't take more than 2 minutes!
2. **Request a meeting**
Get recommendations and search and scroll through lists to request meetings for a time and date that works for you.
3. **Accept Meetings**
Receive incoming meeting requests via notifications or in your email and accept them to have them synced to your calendar. Note: you will always have the option to "skip" connections that do not seem relevant and no alert is sent to the sender.
4. **Join Meetings**
Virtual meetings can be joined 5 minutes before the scheduled start time. You can join the meeting from your email or from the platform by clicking "Open Virtual Meeting Room."
5. **Rate**
Give anonymous feedback on your meeting with "Good," "Bad," or "Didn't Happen" and give a reason for your rating to qualify post-event follow up.

If you need further assistance, check out this [onboarding video](#) and/or this [comprehensive guide](#).

We look forward to connecting with you online soon!

The Commercial UAV Expo Americas Team

P.S. As always, you can find full event information on the [Commercial UAV Expo Americas](#) event website, including the Agenda, Speakers, Exhibitor List and more.

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Subject: RE: AUVSI XCELLENCE Awards | Congratulations!

Good morning Shannon,
 Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for ***Drone as a First Responder (DFR) Program*** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
 Shannon

Subject: COPS - CPD Grant (DV)

Donte, Lt Peak and Command Staff,

It looks like the awards for the CPD grant have just been announced, and we did not receive funding for the DV program. I just wanted to say that I think Donte's work on the application was outstanding – it's pretty clear to me, based upon the awards, that they were looking to fund other types of programs this year. It looks like La Mesa got \$40K for "Peace with the Police Solutions Summits" and PERF got just under \$80K for "Continuation of Support for the State and Local Unmanned Aircraft System (UAS) Working Group" – those are the ones that seem to me most directly of interest, but here is a link to all of the awards: https://cops.usdoj.gov/pdf/2020AwardDocs/cpd/Award_List.pdf

Keeping my fingers crossed for the COPS Innovation grant for the Drone Program.

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Association for Unmanned Vehicle Systems International | 2700 South Quincy Street, Suite 400, Arlington, VA 22206

Subject: RE: AUVSI XCELLENCE Awards | Congratulations!

Good morning Shannon,
 Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for ***Drone as a First Responder (DFR) Program*** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Donte, Lt Peak and Command Staff,

It looks like the awards for the CPD grant have just been announced, and we did not receive funding for the DV program. I just wanted to say that I think Donte's work on the application was outstanding – it's pretty clear to me, based upon the awards, that they were looking to fund other types of programs this year. It looks like La Mesa got \$40K for "Peace with the Police Solutions Summits" and PERF got just under \$80K for "Continuation of Support for the State and Local Unmanned Aircraft System (UAS) Working Group" – those are the ones that seem to me most directly of interest, but here is a link to all of the awards: https://cops.usdoj.gov/pdf/2020AwardDocs/cpd/Award_List.pdf

Keeping my fingers crossed for the COPS Innovation grant for the Drone Program.

Emerging Tech Showcase II

Monday, September 14 | 3:00PM - 4:00PM ET

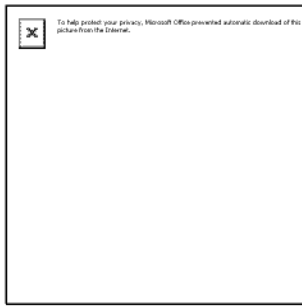

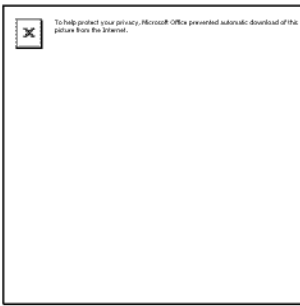

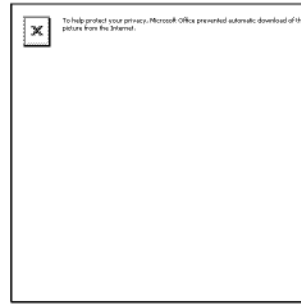

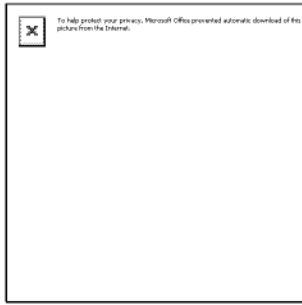

Technology and its capabilities are changing constantly with new hardware, software, and features designed to make work safer, faster, cheaper, and better. Stay up to date on technology in the drone industry and interact with leading companies by attending our Emerging Tech Showcase II.

Similar to the ever-popular “Product Previews” held annually at Commercial UAV Expo Americas, Emerging Tech Showcases provide attendees with a rapid-fire update on the latest changes, upgrades, and new products and services to help your work.

See the latest solutions from Alynix, Ascent, Autel Robotics, DJI, and DroneUp.

General Dynamics Mission Systems Partners with DEDrone

By The Editor on Sep 09, 2020 06:36 am

General Dynamics Missions Systems and DEDrone have announced their strategic counter-drone partnership, providing General Dynamics' global network with access to DEDrone's complete drone detection and defeat technology. As part of this strategic agreement, General Dynamics Mission Systems becomes a value-added reseller for DEDrone's counter-unmanned aerial system (C-UAS) capabilities and has made a significant equity investment [...]

Parrot ANAFI x DroneSense 2020

Join us tomorrow at 1PM CDT for a webinar with Parrot!

We are very excited to support Parrot's ANAFI line of drones, soon to include the brand new ANAFI USA, in the DroneSense Platform. Tomorrow, Wednesday September 9th, experts from Parrot and DroneSense will present a live webinar where they will:

- Share a presentation on the new ANAFI USA from Parrot
- Provide a live demo of the new DroneSense 2020 Platform
- Highlight details about the integration between Parrot ANAFI UAVs and DroneSense 2020

At the end of the webinar, our presenters will answer any questions you may have about both Parrot and DroneSense solutions.

AIRT News Update for Monday, August 10, 2020

Hello Vern,

So what will happen when put DJI's Romeo Durscher, Parrot's Francois-Xavier Charbonnel, and Skydio's Fritz Reber [together in a virtual room](#) along with DRONERESPONDERS Chief Test Pilot Garret Bryl at next week's Commercial UAV Expo?

Find out by listening to [episode 008](#) of my TAMING DISASTER: Drones For Good podcast series when Garret joins Danielle Gagne, Editorial Analyst for Commercial UAV News and me to discuss next week's DRONERESPONDERS Public Safety UAS Summit at Commercial UAV Expo Americas.

Listen to this podcast and discover what Garret has in store for "The Big 3" drone companies representing North America, Europe, and Asia at next week's summit. Hear Danielle's assessment on the current public safety drone market, and how Garret is using a new testing matrix to find out which UAS's are best equipped for law enforcement and fire rescue drone operations. Find out from Danielle how this year's Commercial UAV Expo event will be unlike any other.

The 2020 DRONERESPONDERS Public Safety UAS Summit at Commercial UAV Expo be an incredible virtual event featuring direct discussions about the latest drone tech and software applications for public safety aviation operations. We are going to discuss the [development of public safety drone standards with ANSI, ASTM, and NIST](#). You'll also hear how [law enforcement](#) and [fire rescue](#) agencies across the U.S. are using drones to help save lives and protect property. And don't miss the [virtual roundtable discussions](#) where you can talk directly with public safety drone leaders from top UAS programs around the nation!

Best of all, public safety and emergencies professionals can experience all the virtual action including the virtual exhibit hall and networking opportunities at the [special \\$65 individual conference pass rate](#) through AIRT and DRONERESPONDERS. We also have [special team-based rates](#) that allow your public safety drone unit to cover all the bases as you train together in this unique, virtual environment.

We hope you'll join us next week for the DRONERESPONDERS Public Safety UAS Summit at Commercial UAV Expo from September 15-17!

To view our full schedule of AIRT and DRONERESPONDERS events, please visit: [airt.ngo/events](#) As always, thank you for supporting AIRT and our non-profit initiatives supporting Drones For Good and the use of UAS by public safety and emergency services agencies around the world.

Sincerely,

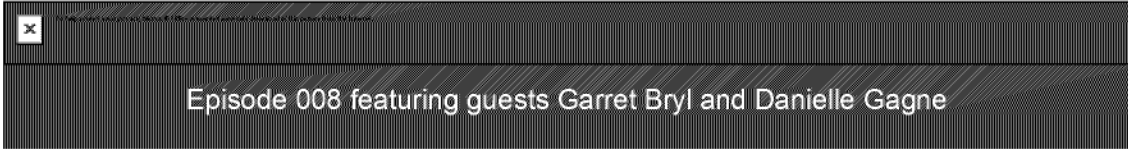

Christopher Todd
Executive Director
Airborne International Response Team (AIRT)

TEL AVIV

MORE LIKE DROPPIN' DAT... WELL YOU'LL SEE

Israel is known for a lot of things. Its beautiful landscape makes you feel like you're in another world, its striking architecture reminds us of the past, and the food. Phenomenal. But there is one familiar aspect that we as Americans would recognize immediately.

Hippies.

That's right, beatniks, bohemians, flower children, gypsies, whatever you know them as. Tel Aviv experienced an activist group who are currently working on legalizing marijuana for recreational use. Surprise, surprise. But these aren't just regular hippies, these are "advanced hippies" (That's a Spongebob reference for anyone over 12). These "advanced hippies" used a drone to drop dime ba... erm.. small packets of an illegal substance to the citizens below. Police have warned people to not use the substance, but the sale of McNuggets saw a spike later that evening...

FASTER THAN A SPEEDING BULLET

IT'S JETPACK GUY!

2020 has been a doozy. We can all agree on that, right? But we like to see the silver lining. Arguably the greatest line ever issued over an American airlines radio happened at the end of August.

American Flight 1997: "Tower, American 1997, we just passed a guy in a jetpack."

I mean... This stuff writes itself. What else do you people want? The Superman wannabe was roughly 3000ft AGL tangoing with the giants of the air like American, Jet Blue, and Skywest. Which means, they not only have a cool jetpack, but the cojones on that guy. It could have been Elon Musk finally trying to live up to the Ironman comparison? The world may never find out. But the FBI is looking into it, so we will probably find out.

NEW BIRD DISCOVERED IN THE AMAZON

URNS OUT IT'S A FIXED WING

Photo courtesy: Wired

Well creating the richest person to ever have existed isn't the only news coming out of Amazon these days. They were just approved by the FAA to start a trial period of drone deliveries through Amazon Air! So we guess having a landing pad will be a selling feature when you go to sell your house in the future.

Amazon has said they will start testing immediately, but they didn't say where. We guess it's because they don't want people stealing their packages off of their doorsteps.

We're still years away from regular deliveries so you still have to buy and wear pants. Bummer, we know. But with all of the biggest names in tech and now another of the world's richest companies stepping into the ring,

things will probably start happening sooner rather than later. Unless you don't have Amazon Prime. Then it might be later.

Good morning Vern,

Nice to hear from you. Thank you for the update, we completely understand that this was indeed short notice, but given the unique opportunity to have Keith here in San Diego, we wanted to see if it might work with you and the team.

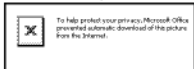

As far as scheduling an initial discussion, we can shoot for the 23 or 24th for a virtual discussion to kick things off.

Don, nice to meet you as well - I will reach out separately with a few options.

Truly looking forward to learning more about the key initiatives underway and exploring how the Birdstop, platform may be leveraged.

Thank you,

Charlotte

Hello Katelyn,

It was fantastic spending time with you earlier today. It was great to learn more about how things have evolved within the IPP program and beyond. Your perspective both locally and across the industry was great to hear. Thank you for taking the time to learn a bit more about Birdstop, our mission and our approach to the market. I will look forward to continuing the discussion from many perspectives.

I thank you kindly for the thoughtful introduction.

Vern, very nice to meet you virtually. I have actually been following CVPD from years back when I was with an open data company, Socrata. You were pioneers back then and we worked with many police departments across the country, directly related to "transparency". Fast forward, I joined Birdstop, earlier this year and am responsible for business development. I so appreciate the opportunity to share more about Birdstop.

As Katelyn mentioned, Keith Miao, our CEO will be in the area on Friday and welcome the opportunity to meet in person if that is feasible. We are exploring using the test site, but either way, it would be a fantastic opportunity to connect given that our F2F meetings are rare under the current circumstances.

Please let me know if there is availability on Friday, September 11, we will plan accordingly!

Katelyn once again, thank you!

Kately, Vern - I will look forward to continuing our discussions.

All the best,

Charlotte

On Wed, Sep 9, 2020 at 1:49 PM Katelyn McCauley <km@sandiegobusiness.org> wrote:

Good afternoon all,

Vern, I'm reaching out to introduce Charlotte with BirdStop! BirdStop is a Bay Area based company; however, Charlotte is an SD local. I won't get too far into BirdStop as a company, I'll save that for Charlotte, but during our conversation it seemed to align with a concept that Chula Vista has been looking for (a docking station with capabilities to plug in with DJI, with data management components built in).

That said, BirdStops CEO, Keith, will be in town on Friday to test and demo their newest product. I've recommended the Chula Vista Test Site as a possible location for testing for their team! If it's feasible- I wanted to make this introduction to kill two birds with one stone- it would be awesome if you or a member of the DFR team could attend to informally meet, see the product they have and determine if it would be of value to CVPD!

Charlotte, Vern and his team are pioneers in the public safety realm. They capitalize on technologies as they become available because they recognize that these platforms can save lives, create more efficient responses, and aid in public trust with the community. As I stated earlier, they truly are world renowned: <https://www.uasnorway.no/drones-as-first-responders-new-superhero-in-the-police/>. However, despite their popularity, CVPD never ceases to try to improve upon their program and vision, and continue to remain open to technologies that can aid them in providing the absolute best service they can to their community. Additionally, CVPD doesn't covet their progress or technology, in fact, they operate entirely opposite of many organizations that like to keep their methods secret. If CVPD comes up with a concept, or utilizes a technology, they share those resources with other public safety organizations.

All, thank you for your time, and safe flying!

Cheers,

Katelyn McCauley

Sign up for free to any or all of the webinars below to join live or on-demand:

Enterprise Grade Security for Enterprise UAS Operations

Monday, September 14, 2020 | 1:00PM - 2:00PM Eastern Time

Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Additionally, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most valuable data one can collect.

Attendees for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Emerging Tech Showcase II

Monday, September 14, 2020 | 3:00PM - 4:00PM Eastern Time

Drone technology and its capabilities are changing constantly with new features, products, and services designed to make work safer, faster, cheaper, and better. Stay up to date on what is new and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Improving Drone Productivity by Smart Edge Data Processing

Monday, October 1, 2020 | 10:00AM - 11:00AM Eastern Time

Processing of sensor data (IMUs, Cameras, ToF, lidars, etc.) in drones significantly consumes battery. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video, point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

Monday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Select a Lidar System for UAV Operations

Monday, December 1, 2020 | 1:00PM – 2:00PM Eastern Time

to hear about the newest 3D solutions? Curious to discover which innovations are
defining AEC workflows? Our Emerging Technology Showcases provide attendees with an
easy way to get up to speed around the latest product launches and innovations throughout the

Emerging Technology Showcase: Airborne LiDAR and Actionable Data

Friday, January 12, 2021 | 1:00PM – 2:00PM Eastern Time

Attendees will learn how leading AEC firms for rapid, efficient point cloud capture, and high-resolution images, during corridor-
wide-area-mapping projects have redefined expectations related to what it means to
efficiently capture actionable data. A panel of experts will discuss how airborne lidar has
made a measurable difference for stakeholders of all types.

However, despite their popularity, CVPD never ceases to try to improve upon their program and vision, and continue to remain open to technologies that can aid them in providing the absolute best service they can to their community. Additionally, CVPD doesn't covet their progress or technology, in fact, they operate entirely opposite of many organizations that like to keep their methods secret. If CVPD comes up with a concept, or utilizes a technology, they share those resources with other public safety organizations.

All, thank you for your time, and safe flying!

Cheers,

Katelyn McCauley

Commercial UAV Expo Americas

Hi Vern,

Commercial UAV Expo Americas Virtual gets underway starting next Tuesday, September 15!

With three days of education, an exhibit hall full of cutting-edge UAS solutions, and thousands of commercial drone professionals to connect with, Commercial UAV Expo Americas 2020 is bringing the commercial drone community together in a new way – to (virtually) connect, learn, and drive the industry forward as we create a new future. Here's what you need to know to be ready for next week:

How to Live Stream Content

- Click on the blue **Log In** button below.
- Prior to the event, you may select sessions you'd like to view and "star" them, which will prompt a log in.
- On the day of the event, you may log in by clicking "Join Broadcast" on any session you would like to view – again prompting a login.
- **BE SURE TO USE THE EMAIL ASSOCIATED WITH YOUR TICKET REGISTRATION TO LOG IN!**
- When a session you're interested in is about to begin or has already started, simply click the "Join Broadcast" or "Join Now" button next to it.

Whether you log in in advance of the event or the day of, a magic link will be sent to your email account to click and confirm it's you.

Note: All live sessions will take place in the US Pacific Time Zone. Conveniently, your local time zone will be noted next to the live streaming time.

Log In

How to Network

It's easy to take advantage of personalized matchmaking through our AI-powered networking tool Commercial UAV Expo Connect powered by Grip and sponsored by DroneUp. Get started now!

- Go to <https://matchmaking.grip.events/commercialuavexpoconnect/event-login>. Enter the email you used to register for the event and the badge/registration ID you received with your registration confirmation email.
- Create a password.
- Complete your profile.
- Review recommendations, request and accept meetings, and start connecting!

Start Networking

Please visit the **HELP page** for additional details and instructions on where to turn if you need assistance. Looking forward to "seeing" you next week!

- The Commercial UAV Expo Americas Team

Donte, Lt Peak and Command Staff,

It looks like the awards for the CPD grant have just been announced, and we did not receive funding for the DV program. I just wanted to say that I think Donte's work on the application was outstanding – it's pretty clear to me, based upon the awards, that they were looking to fund other types of programs this year. It looks like La Mesa got \$40K for "Peace with the Police Solutions Summits" and PERF got just under \$80K for "Continuation of Support for the State and Local Unmanned Aircraft System (UAS) Working Group" – those are the ones that seem to me most directly of interest, but here is a link to all of the awards: https://cops.usdoj.gov/pdf/2020AwardDocs/cpd/Award_List.pdf

Keeping my fingers crossed for the COPS Innovation grant for the Drone Program.

Top Take-Aways

UPS is looking for 100,000 new hires for the 2020 holiday season, as the shipping company anticipates a **gigantic surge in e-commerce sales** due to the coronavirus pandemic, with numerous other retailers hiring tens of thousands of temporary workers for the same reason.

Walmart announced a test of drone store-to-home grocery delivery as competition heats up to find faster, low-cost ways to **get goods “the last mile” to consumers’ doorsteps**.

International scientists are skeptical of Russian Covid-19 vaccine trial. “I found the data presented...a bit puzzling,” wrote an author of the letter. **“We need access to the original data.”** Russia was the first country to approve a coronavirus vaccine.

The Oscars announced new diversity and inclusion rules for Best Picture films. Nominations must meet new standards, including roles onscreen and behind the scenes must be **filled by underrepresented groups, including race, women, LGBTQ and people with disabilities**.

Maserati rolled out its first supercar in 15 years. Developed by the Maserati Innovation Lab over the past two years, the MC20 evolved from the famed MC12, which ceased production in 2010, and **signals the venerable Italian automaker’s return to racing**.

The NFL’s most valuable teams 2020: Four teams are now worth at least \$4 billion each, up from two last year, as the Giants and Rams join exclusive club. How much is your favorite team worth?

Today's Must-Read

Wildfires. Racial inequity. A global pandemic. Widespread civil unrest. Rather than throwing up their hands in despair, these young activists and entrepreneurs, all Forbes Under 30 alumni, are taking action. Here’s how these 20 young innovators, curated by associate editor Alexandra Wilson, are **combating inequality, fighting climate change and battling the virus** in 30 words or less.

A selection:

Sargun Kaur, 28, & Nicole Hardson-Hurley, 25, cofounders, Byteboard

To combat gender and racial bias, Lyft and Dropbox turn to these Stanford and Berkeley-grads' identity-blind software to assess engineering skills of job candidates through real-world projects.

Conall Laverty, 30, founder, Wia

When the pandemic hit, the world suddenly needed millions of ventilators. Ireland-based Laverty collaborated with over 8,000 engineers, doctors and regulators to create open-source 3D-printing schematics.

Shadi Bakour, 28 & Amer Orabi, 29, cofounders, PathWater

First-generation Arab-Americans making cheap, refillable aluminum bottles to replace plastic ones. They have raised \$15 million from celebrities like Kevin Hart and Guy Fieri and sold 60 million so far.

NON RESPONSIVE

Hi Sarah,

Looking forward to the IACP2020 recording session on Monday. Below is a short bio. If you need to edit it down further, feel free to highlight what you see fit (I'm really not very picky). I know in your latest email that I am limited to 10 minutes, which is fine. I'll focus on scoping the mission of a drone program and community concerns. Will there be powerpoints or just webcam presentation? Thanks and looking forward to it!

Best,

Vern

BIO:

Captain Vern Sallee began is a 25 year veteran of the Chula Vista Police Department. In December 2014, he was promoted to captain where he commanded the Support Operations division and subsequently the Investigations division. In May 2018 he was placed in command of the Patrol Operations division and is second in command to the Chief of Police.

Captain Sallee established CVPD's drone program in January 2016 and i. Since October 2018, Captain Sallee has led a significant expansion CVPD's UAS program known as Drone as a First Responder (DFR) as part of the Federal Aviation Administration's UAS Integration Pilot Program (IPP). CVPD's groundbreaking DFR program has been recognized nationally as a revolutionary public safety model which provides real-time video and decision quality data to officers on routine calls for service.

Captain Sallee is a subject matter expert with the Office of Community Oriented Policing (COPS Office) UAS Working group, to help develop guidance for police agencies to effectively use UAS technology to enhance public safety, while also protecting the public from the malicious use of UAS. He has also represented CVPD as a presenter and subject matter expert on police use of drones at the FBIAA national conference, the IACP technology conference, the IACP national conference and numerous other UAS and public safety forums.

Captain Sallee has a Master of Science Degree in Administrative Studies with a criminal justice emphasis from Missouri State University and a bachelor's degree in psychology from San Diego State University. He is a graduate of the Los Angeles Police Department Leadership Program, California P.O.S.T. Command College (Class 53) and the FBI National Academy (Class 270). He has been published in Police Chief Magazine and is a former adjunct community college instructor; having taught police ethics, forensic photography and police community relations.

Vern –

Being a west coast girl myself, I only requested slots that would fall at a reasonable hour for PST. Thank you both for your generosity and expertise in this area. We have been appointed to present on September 14th from 3:30 pm – 5:30 pm EDT, details forthcoming. I will be in touch as soon as I have more information.

Thank you,

NON RESPONSIVE

Sarah

2020 IACP Presentation Proposal

Title of Proposed Presentation (Max 100 characters): Nuts and Bolts: How to Launch Your Drones Program

Submitted by: Sarah Estill

Presenter Name (Name, Agency/Organization, Title, Phone Number, and Email):

Sarah Estill, COPS Office USDOJ, Social Science Analyst, 2023071533

Presentation Description (max 750 characters): Unmanned Aerial Systems (UASs) are a revolutionary resource for law enforcement. UASs enhance the public safety, save money, keep officers safe, improve search and rescue, and ultimately save lives. However, launching a drones program requires the engagement of a multitude of stakeholders, including the federal government. In order to meet the challenges of 21st-century technology in law enforcement, the COPS Office stood up a UAS Working Group specifically for State, Local, Tribal and Territorial departments. This workshop will include information straight from the FAA and the National Institute of Justice and peer departments. Participants will walk away with the most up-to-date information available from the foremost experts in their field. (753)

Learning Objectives (up to three objectives with each max 250 characters):

1. Define and scope the mission of a new UAS program to maximize success
2. Avoid common obstacles to obtaining a COA or Part 107 Waiver
3. Engage with peer subject matter experts and their recommendations for a new UAS program (225)

Methodology (max 1000 characters): Powerpoint and video will be deployed as necessary to enhance information retention.

The Workshop will proceed as follows:

Moderator: Introductions (5 minutes)

FAA and DOJ: Essential information from Federal partners (30 minutes)

Practitioner: Practical lessons (15 minutes)

Practitioner: Practical lessons (15 minutes)

Practitioner: Practical lessons (15 minutes)

Questions from the Audience (10 minutes)

Moderator: Closing (5 min)

Program Length (select only one):

Quick Hits - 20 minutes

60 minutes

90 minutes

Emerging Tech Showcase II

Monday, September 14 | 3:00PM - 4:00PM ET

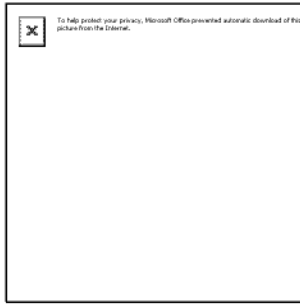

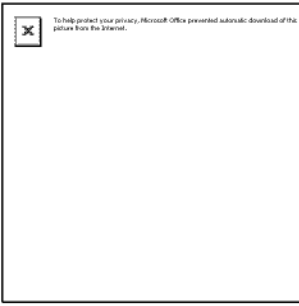

Technology and its capabilities are changing constantly with new hardware, software, and features designed to make work safer, faster, cheaper, and better. Stay up to date on technology in the drone industry and interact with leading companies by attending our Emerging Tech Showcase II.

Similar to the ever-popular "Product Previews" held annually at Commercial UAV Expo Americas, Emerging Tech Showcases provide attendees with a rapid-fire update on the latest changes, upgrades, and new products and services to help your work.

See the latest solutions from Alynix, Ascent, Autel Robotics, DJI, and DroneUp.

Using Manned Aircraft Tools To Aid With Safe sUAS Operations

FAA SAFETY TEAM WEBINAR

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Topic: Darryl M. Anunciado will share tools used by manned aircraft to aid in safe UAS operations.

September 2020 

15

Description: As an UAS remote pilot and a manned aircraft pilot, Darryl M. Anunciado will share first hand tools, apps, and tips for safe UAS operations in the NAS. Tools like foreflight, radios, and other devices for communication that actual pilots use to stay apart from other airplanes. Darryl and others at Action Drones went beyond sUAS and got their pilots license to take more steps

REGISTER

to understand how they can train their clients to make sure they really understand how they to operate their drone safely.

<p>Warning: External Email</p>

Hi Don and Vern,

Thanks so much for accommodating Cade's visit and interview about your use of Skydio drones. We're very excited to be spotlighting Chula Vista's drone program in your article with him. This interview was originally part of our media activities leading up to the launch of the X2 series in July, but timelines have shifted out - we're glad it's on again! I wanted to pass along a backgrounder we shared with Vern a couple months back now ([Link](#)). If you name a few times early next week, we'd be happy to jump on a call and give further context as well.

Thanks again for your support here,
 Guillaume

To: Roxana Kennedy
Subject: DRONERESPONDERS panel talking points

Follow Up Flag: Follow up
Flag Status: Completed

- Drones have made a tremendous difference in how we respond to routine calls and their use makes our officers, citizens and even subjects we contact, safer
- The Drone as a first responder program is the most powerful de-escalation tool I have seen in my career. It gives officers critical information for them to bring the right tools, tactics and resources to each individual call for service. This makes everyone safer and helps us minimize or avoid using force on many critical incidents.
- At this point, we've been using Drones as a First Responder for almost two full years and have flown over 3,400 missions responding to emergency calls for service. From my experience, I can tell you that drones are immensely important to the future of public safety and they are critical lifesaving tools and I can't imagine our operations without them.
- Public support has been critical to our program. We like to say we invested in our community before we ever invested in our first drone. We met with stakeholders, conducted town halls and opened our doors to the press to talk about drones in public safety. We established a website with Frequently Asked Questions and posted our policies as well as a drone dashboard. Transparency is the key to a public safety drone program. Nothing about a police drone program should be secret, except for protecting evidence as we would in any case.
- Police drones should never be used for surveillance or use that term. Police departments and drone companies should avoid surveillance and engage in best practices in the ethical use of drones.
- Questions re DJI drones. It's very simple, we would love to utilize American made drones and systems, but they are just not robust enough for our operations yet. We look forward to continuing to work with manufacturers and service providers on new innovations. In the meantime, we closely monitor the safety and security discussions surrounding Chinese made drones and have appropriate and robust safeguards in place.

The 5 C's make it easier for police using drones to address critical community concerns.

1. Community Engagement and Transparency

- Public service is a public trust. When developing and operating a drone program, it is critical to engage in an ongoing conversation with the community you serve. Effective community engagements consists of two parts: public participation and transparency.

2. Civil Liberties and Privacy Protection

- Every drone program should be predicated on the protection of privacy and the promotion of civil liberties. Agencies should develop safeguards and training procedures that advance those objectives across every element of the program.

3. Common Operating Procedures

- Departments should develop and adopt common operating procedures to guide the use of drones. The Five C's provide a roadmap for the development of operating procedures that account for best practices in the field on topics such as FAA compliance and video management practices designed to protect privacy.

4. Clear Oversight and Accountability

- Agencies need to establish robust oversight measures designed to ensure compliance and accountability, along with clear oversight processes that combine both internal and external measures.

5. Cybersecurity

- Modern drones are more than simple flying machines. Drones have become network-connected devices that should be subject to cybersecurity reviews.

Emerging Tech Showcase II

Monday, September 14 | 3:00PM - 4:00PM ET

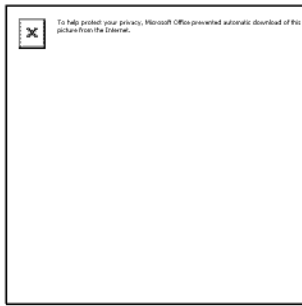

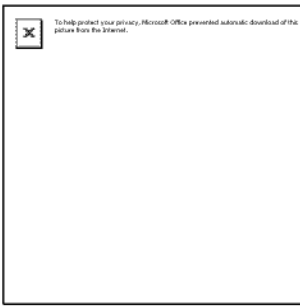

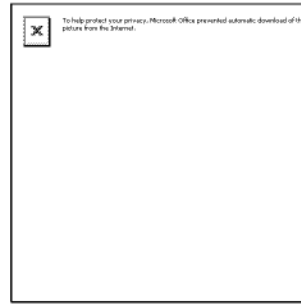

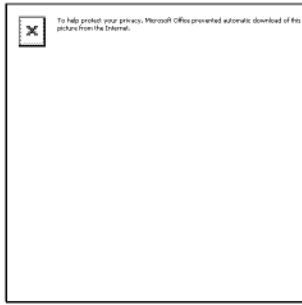

Technology and its capabilities are changing constantly with new hardware, software, and features designed to make work safer, faster, cheaper, and better. Stay up to date on technology in the drone industry and interact with leading companies by attending our Emerging Tech Showcase II.

Similar to the ever-popular "Product Previews" held annually at Commercial UAV Expo Americas, Emerging Tech Showcases provide attendees with a rapid-fire update on the latest changes, upgrades, and new products and services to help your work.

See the latest solutions from Alynix, Ascent, Autel Robotics, DJI, and DroneUp.

STAC Members/ERP Recipients:

I just wanted to thank all those that contributed to the Blog Article (linked below if you haven't seen it) with their use cases. Not all of them made it of course but you all continue to provide great input on how you use drones, and specific feedback on the Skydio 2. Your expertise and experience help us highlight Skydio 2's strengths and are key in our work to develop the next level of solutions for public safety. Please feel free to continue to use the AAR link to provide as much general flight feedback/info as you want, the Product and Engineer Team have access to these and review them regularly.

ARR: <https://docs.google.com/forms/d/e/1FAIpQLSde9UYXMoHMcwIkVJ0B9N51KsWXGrCzEZ9Gh0SV1IpbsJZlJA/viewform>

Thanks again,
Stay Safe,
Fritz

PS I am trying to build a larger Twitter following so my posts get more eyeballs, so feel free to follow me at the social media links below my name. Your stories are important to get out there! Thanks!

Enterprise Grade Security for Enterprise UAS Operations

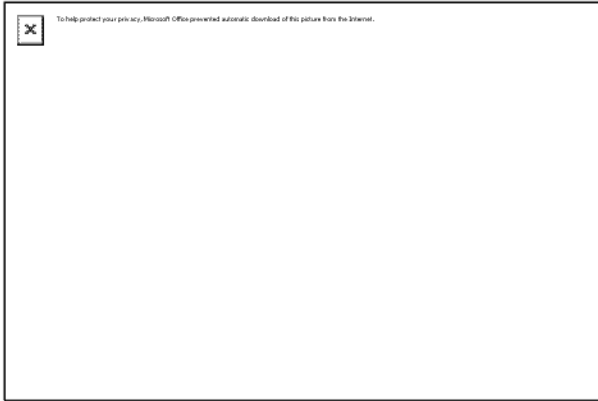

Monday, September 14 | 1:00PM - 2:00PM ET

Learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most sensitive data one can collect. Join Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your drone operations from data attacks, hacks, and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program.

Registrants for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

[REGISTER NOW](#)

FEATURED SPEAKER

Josh Ziering

CTO and Founder, Kittyhawk

A recognized visionary leader, Joshua regularly writes about drone-related topics where he eagerly shares his love of aviation and (often-polarizing) opinions on the future of the industry. Josh is oft quoted in news publications and frequently presents at conferences and participates in panel discussions. A self-taught software programmer and serial entrepreneur, Joshua holds a bachelor's degree in poetry from Arizona State University.

National News

CBS News: Violent crime rate dropped 15% in 2019, Justice Department says

The rate of violent crime fell 15% in 2019 compared to the previous year, reversing a four-year increase, according to data released by the Justice Department on Monday.

The department's Bureau of Justice Statistics said 1.2 million people were victims of violent crime last year, excluding simple assaults, at a rate of 7.3 victims per 1,000 people over the age of 12. That rate is down from 8.6 victims per 1,000 people in 2018. For women, the decrease was even more significant, dropping 27% last year.

Monday's report is based on the National Crime Victimization Survey's (NCVS), which is administered by the Census Bureau and based on a nationally representative sample of U.S. households. The findings include violent incidents reported to police, as well as those that went unreported, which the Bureau of Justice Statistics found constituted more than half of the incidents. The survey's definition of "violent crime" includes rape or sexual assault, robbery and assault, and excludes homicides, since it's based on interviews with victims.

Local News

Buffalo News: [New police unit that pairs officers and social workers to begin next month](#)

Mayor Byron W. Brown said Monday that a new Buffalo police "behavioral health team" would begin next month.

His announcement came months after first announcing the formation of the new police unit that will team police officers trained in crisis intervention with behavioral health clinicians.

Milwaukee Journal Sentinel: ['Please take care of each other': Friends, colleagues hope Milwaukee police officer's suicide will give others courage to seek or offer help](#)

For months as they prepared for the Democratic National Convention, Capt. Derrick Harris and Officer Thomas Kline were nigh inseparable, going from meeting to meeting with each other, so consumed by the work they would eat meals together in cars.

During that time – before the convention was dramatically scaled down because of the coronavirus pandemic – Kline not only threw himself into the work of keeping the monumental event a safe one, but also made it his business to ensure his boss took care of himself.

Kline befriended Harris' wife and obtained their family calendar. He would alert Harris to his children's sports games. He would "snitch" about Harris' less-than-healthy eating habits and explain to him his calorie intake was problematic.

On Monday, friends, family and fellow officers mourned the loss of Kline, a 19-year veteran of the department who killed himself Sept. 1 after calling a television station and speaking of the stress he experienced over the summer. He was 47.

The Journal Sentinel typically does not report on specific cases of suicide, but Kline's family has encouraged local media to tell his story in an effort to bring attention to suicide prevention efforts.

Twin Cities (MN) Pioneer Press: 'Moral courage' training, already planned for St. Paul officers before George Floyd death, takes on more urgency

All St. Paul officers are currently going through training in moral courage — the concept of doing what's right in the face of fears or challenges, especially in the heat of the moment.

The workshops were already planned when George Floyd died in Minneapolis police custody in May, and the case has given more urgency and attention to the duty for officers to intervene. In addition to officer Derek Chauvin, who was seen on video pressing his knee into Floyd's neck and is charged with murder, three other officers who were present are charged with aiding and abetting.

"To me, the core of this training is about understanding your role as a police officer and it's not just cleaning up the mess another officer has created, but having the moral courage to interrupt that mess from occurring to begin with," Chief Todd Axtell said.

After moral courage training, all St. Paul officers will be learning this year about Ethical Policing Is Courageous (EPIC), which is a peer-intervention program developed by New Orleans police.

Dallas Morning News: Dallas police seeing uptick in gun violence among people who know each other

A year ago, Dallas police officials were seeing a clear gang and drug nexus with the uptick in violent crime.

But this year, the increase in shootings and homicides have them puzzled. A majority of the gun violence is among people who know each other well.

At the city's Public Safety Committee meeting Monday, officials speculated whether the uptick is related to the economic crisis and stress from the coronavirus pandemic.

Detroit News: 'I'm not leaving' the job, Detroit police Chief James Craig says

Amid anti-law enforcement sentiment nationwide as activists seek criminal justice reform and repeated calls from local protesters to resign, Detroit police Chief James Craig vowed in a Fox News appearance Monday to stay on the job.

"I've taken a firm stand here in Detroit. I've been supported by Detroiters. But let me just say, Detroiters want them gone. And so I'm not leaving. They have to leave," Craig said during an interview on "The Story with Martha MacCallum," referring to groups denouncing police chiefs across the country.

"And I've said it publicly, both locally and nationally, and I'm going to hold my ground. Because our men and women who serve deserve much better than this."

International News

ZDNet: Police drones are taking to the skies

Police forces in the UK are trialing the use of drones to provide air support to forces on the ground in cases where deploying a helicopter or an aeroplane might be less practical.

The National Police Air Services (NPAS), the police aviation service that assists territorial police forces in England and Wales, is evaluating how drone technology might complement its existing national fleet of helicopters and planes.

Police Executive Appointments

ABC 15 Arizona: Tempe Police Chief Sylvia Moir to resign; will leave role on Oct. 25

Tempe Police Chief Sylvia Moir, the department's first female police chief, is resigning as chief and will leave her role on Oct. 25, the City of Tempe said Tuesday in a news release.

It was not known why Moir is resigning from her position, a role she has held since 2016, but she was apparently in talks with Tempe City Manager Andrew Ching about it for weeks.

Rochester (NY) Democrat & Chronicle: Chief La'Ron Singletary relieved of duty, learns of dismissal via Twitter

Mayor Lovely Warren on Monday released a preliminary report on the city's response to the death of Daniel Prude and promised a raft of upcoming actions.

She also immediately relieved Police Chief La'Ron Singletary of his command in the same peremptory fashion that he announced his upcoming retirement last week, leaving him to learn the news via social media.

Warren also suspended Corporation Counsel Tim Curtin and Communications Director Justin Roj without pay. She did not take any questions.

Later, Mark Simmons, deputy chief of administration, was named acting chief. He served as interim chief before Singletary's appointment. Earlier, he resigned his command post to return to the rank of lieutenant at month's end.

Announcements

PERF: Municipal-Campus Police Collaboration meeting tomorrow, 1:30-3:00 p.m. Eastern

Collaboration between campus police departments and their municipal police partners has always been important, especially around major events and criminal investigations. However, as colleges and universities work to safely reopen their campuses during the COVID-19 pandemic and protests over police reform, inter-agency relationships are more crucial than ever.

To explore the public safety issues facing college towns and campuses today, PERF – in collaboration with the Tempe, AZ and Arizona State University Police Departments – is hosting a 90-minute, facilitated discussion tomorrow from 1:30-3:00 p.m. Eastern. Municipal and campus police leaders from six jurisdictions throughout the country will share some of the challenges they are facing and how they are addressing them.

You can register in advance at [this link](#). You will access the meeting using this same link on the day of the event. There is no cost to register for this virtual meeting.

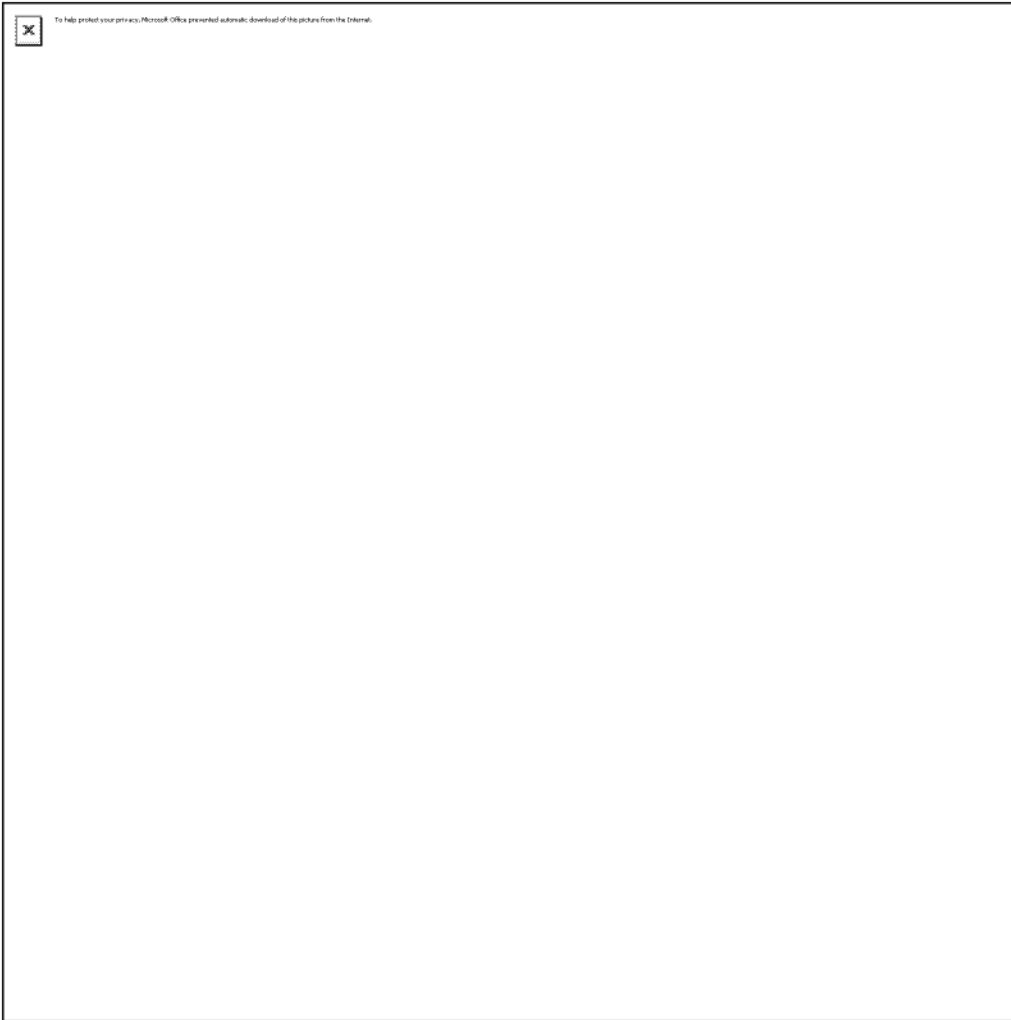

Good News of the Day

NBC 12 (NC): 6 Winston-Salem police officers bravely responded to deadly shooting at sanitation plant

Six officers of the Winston-Salem Police Department are being honored this month for bravely responding to the early morning shooting at a city sanitation plant last December.

The violence erupted at the Joycelyn V. Johnson Municipal Services Building early on a Thursday morning, Dec. 20, 2019, and left two people dead. Two police officers were also injured by gunfire during the ordeal.

Photo of the Day

Riverside County (CA) Sheriff's Department

Today is National Online Learning Day! 📖 📚 Shout-out to all of the parents who have been recently thrown into the role of teacher and to the kids who suddenly can't wait to get back into the classroom! 📝 📄 🍷

If you're looking for an art activity (or something to occupy little brother or sister while class is in session), visit the Riverside Sheriff's Kids section of our website (link in bio) where you'll find coloring pages and a scavenger hunt. Make sure to send your completed pages to rsokids@riversidesheriff.org so we can share your artwork in our stories!

#riversidesheriff #nationalonlinelearningday #rsokids

**Providing Lifesaving, Cost-Saving Information
in Real Time through Rapidly Deployable Mobile Sensor Robots for
Disaster Rescue and Emergency Response.**

Here's our current newsletter with the latest company information.

Share the news in our September newsletter.

Tweet

Share

Share

Tulsa Fire Department Becomes Newest Pilot Partner

The Tulsa Fire Department (TFD) is the newest municipal fire department to sign a pilot partnership agreement with Squishy Robotics. Similar to the agreement signed in June with Southern Manatee Fire and Rescue (SMFR), this pilot partnership with TFD will send several Squishy Robotics drone-droppable sensor robots to Oklahoma for testing and use during operations over the next year. TFD firefighters will provide regular feedback and advice during the pilot partnership that will help advance the efficiency and performance of our robots and software.

Tulsa is Oklahoma's second largest city. The fire department has more than 670 members who are deployed at 30 fire stations throughout the metropolitan area. In June, the department celebrated its 120th anniversary.

"We will be sending three robots to Tulsa in early October," said Squishy Robotics COO Deniz Dogruer. "In addition to getting more feedback and assessment on how best to use our sensor robots during fire and HazMat situations, I expect that we will learn a lot from the Oklahoma team on best practices during disaster responses." Dogruer explained that the Tulsa Fire Department drone program commonly assists in the response to natural disasters (such as hurricanes) in Oklahoma and nearby states.

Gabriel Graveline is a TFD firefighter and paramedic; he is also the robotics team leader for the department's unmanned aircraft systems (UAS) program and the lead pilot for the Oklahoma Task Force 1 Urban Search and Rescue

Team. Graveline shared this video of their recent [deployment during Hurricane Laura](#).

Expect updates from Tulsa as well as Manatee County, Florida as Squishy Robotics works with fire department officers in both municipalities.

Hutchings Delivers Military-Focused Presentation

Squishy Robotics Lead Mechatronics Engineer Douglas Hutchings was invited to give a presentation about Squishy Robotics' commercial products and ongoing work adapting our sensor robots for military needs at the xTech 3 Summit, a large defense-focused event that was held September 9 to 11. The [xTechSearch program](#) is a new approach and process aimed at transforming the way the U.S. Army interacts with non-defense companies and start-ups to better leverage the innovations made by these companies toward military use. The showcase event included speakers from the Army, Department of Defense (DoD), universities, and industry. Due to COVID-19, this year's conference was a virtual event.

Squishy Robotics is an xTechSearch alumnus, having been chosen as one of [last year's semi-finalists](#) with the company's concept of using our rapidly deployable robots for unmanned observation posts during urban military operations.

Hutchings gave an overview of how our rapidly deployable mobile sensor robots operate and updated the attendees on the company's Cooperative Research and Development Agreement (CRADA) with the U.S. Army Combat Capabilities Development Command Soldier Center as well as our research and development work building larger robots as part of a Small Business Innovation Research (SBIR) Phase I grant awarded by the U.S. Army in 2019.

General Atomics Announces New ISR/Strike UAV

By The Editor on Sep 16, 2020 06:59 am

General Atomics Aeronautical Systems Inc (GA-ASI) unveiled an artist's illustration of a new intelligence, surveillance, and reconnaissance (ISR)/strike unmanned aerial vehicle (UAV) on 14 September during the Air Force Association's (AFA's) annual conference. The company did not respond to a request for comment prior to publication. But GA-ASI issued a statement that gave some insight [...]

SRC Demonstrates On-the-Move CUAS Technology at Apollyon Test Event

By The Editor on Sep 16, 2020 06:26 am

SRC Inc., recently demonstrated an on-the-move configuration of the Silent Archer counter-unmanned aircraft system (UAS) technology at the Apollyon test event at Eglin Air Force Base in Florida. SRC integrated systems from our partners Persistent Systems, Copious Imaging, and Defense Research Associates, to demonstrate the only on-the-move counter-UAS solution during the event. The Silent Archer technology detected, tracked, and [...]

Good evening,

??

I attended the UAV expo in Las Vegas last fall and was interested to hear in your DFR program.?? Do you use a drone simulator for your training? If so, which one have you found most effective???

??

Just a little background, I???m retired LEO with 26 years as a traffic accident reconstructionist who now finds himself teaching college.?? We are implementing a part 107 licensing course as part of our CJ curriculum and I would like to integrate it with a

forensic mapping course next year. I've read about the various drone simulation programs around, and was wondering which one you have found to be most realistic for DFR's. If possible, I'd like one that would allow the students to collaborate during training; maybe a search and rescue scenario where they spread out and comb an area for a missing person, something like that.

??

Thanks, and stay safe!

Commercial UAV Expo Americas

Hi Vern,

There is a lot going on today at [Commercial UAV Expo Americas Virtual!](#)

Keynotes

Keynotes kick off at 9:00AM PT. Get updates and insights from the FAA Administrator Steve Dickson and Acting Deputy Assistant Director, CISA Scott Breor.

Virtual Exhibit Hall

The Exhibit Floor is open from 9:00AM -5:00PM PT. Peruse the Virtual Booths during Virtual Exhibit Hall Hours to learn about companies and products, view and download PDFS and videos, and reach out to booth personnel to schedule meetings. Be sure to visit the Exhibit Hall during "Power Hours"! It's during these time blocks that all the live interaction will take place, from one-on-one meetings with staff to product demonstrations and much more. [View the schedule and exhibitor list here.](#)

Keynote Panel

Lisa Ellman, Executive Director of Commercial Drone Alliance, moderates an all-star panel "Drone Delivery in the Era of a Pandemic" with Kevin Wasik with UPS

Flight Forward, Margaret Nagle with Wing, and Conor French with Zipline starting at 10:00AM PT.

Plenary

"Security in the Age of Drones" starts at 11:30AM PT with Lisa Ellman as moderator and panelists Leesa Papier with FAA, Kevin Jinks with US Dept of Justice, Tim Bennett with US Dept of Homeland Security, and Grant Jordan with Skysafe.

DRONERESPONDERS Public Safety Summit

The Public Safety Summit kicks off at 11:30AM PT - check the [event agenda](#) for a schedule of all the programming.

Breakout Sessions

Breakout sessions run all afternoon on topics including Infrastructure, Machine Learning & AI, Women in Drones, Industrial Applications, Utility Inspection and UTM. Check the [event agenda](#) for a schedule of all the programming.

Together APARTy

Last but not least, the Together APARTy Virtual Networking Event and Game of Drones kicks off at 5:00PM PT. This event is only open to ticket holders.

Here's what you need to know to be ready for the day:

How to Live Stream Content

- Click on the blue **Log In** button below.
- Prior to a session, you may select sessions you'd like to view and "star" them, which will prompt a log in.
- When sessions are running, you may log in by clicking "Join Broadcast" on any session you would like to view – again prompting a login.
- **BE SURE TO USE THE EMAIL ASSOCIATED WITH YOUR TICKET REGISTRATION TO LOG IN!**
- When a session you're interested in is about to begin or has already started, simply click the "Join Broadcast" or "Join Now" button next to it.
- **A magic link will be sent to your email account to click and confirm it's you.**

Note: All live sessions will take place in the US Pacific Time Zone. Conveniently, your local time zone will be noted next to the live streaming time.

Log In

How to Network

It's easy to take advantage of personalized matchmaking through our AI-powered networking tool Commercial UAV Expo Connect powered by Grip and sponsored by DroneUp. Get started now!

- Go to <https://matchmaking.grip.events/commercialuavexpoconnect/event-login>. Enter the email you used to register for the event and the badge/registration ID you received with your registration confirmation email.
- Create a password.
- Complete your profile.
- Review recommendations, request and accept meetings, and start connecting!

Start Networking

Please visit the **HELP page** for additional details and instructions on where to turn if you need assistance. Looking forward to "seeing" you next week!

- The Commercial UAV Expo Americas Team

Commercial UAV Expo Americas

Hi Vern,

The **Virtual Exhibit Hall** is open until 5:00PM PT today!

Peruse the Virtual Booths during **Virtual Exhibit Hall Hours** to learn about leading UAS companies and their newest products, view and download PDFs and videos, and reach out to booth personnel to schedule meetings.

Be sure to visit the Exhibit Hall during “**Power Hours**” from 10:00AM – 1:00PM PT & 3:00PM – 5:00 PM PT today!

It's during these time blocks that all the live interaction will take place, when you can meet one-on-one with staff, view product demonstrations and more.

Here are some of today's exhibitor highlights:

Auterion Visit Booth

10:00AM - 11:00AM PT - The Drone Software Platform for Enterprise with Lorenz Meier

Evolve Dynamics Visit Booth

10:00 AM – 1:00 PM PT– Introduction to the Sky Mantis

Yuneec Visit Booth

11:00AM - 11:40AM PT - LAW ENFORCEMENT - Interview with Capt. Tim Martin, Huntington Beach Police on use of thermal sensors for UAVs and law enforcement.

Iris Automation Visit Booth

12:00PM - 12:30PM PT - BVLOS Regulatory Review (FAA) with Trever Linn, Director of Airspace Integration

Target Arm Inc. Visit Booth

12:00PM - 1:00PM PT- Ask Me Anything - Jeff McChesney/CEO & Founder

Doosan Mobility Innovation Visit Booth

12:10PM - 12:50PM PT - Showing Off Partners - Aeronyde

Airspace Link Visit Booth

3:00PM - 4:00PM PT - Q&A with Michael Healander, CEO

View the Virtual Exhibit Hall schedule and exhibitor list here. Click on a logo and then click on the blue box to visit the booth; you'll be prompted to log in. Be sure to use the email associated with your registration.

You can also enter virtual booths through the **Agenda**.

Don't miss out on seeing best-in-class commercial UAS technology from these leading solutions providers:

Advanced Technology Labs, a Yuneec Company, Aerial Response Solutions, Aerospace Arizona Association, Agrowing, AirMap, Airspace Link, Air-Supply Aerial, AIRT – DRONERESPONDERS, AlarisPro, Alynix LLC, BAAM Tech, APD, Applanix Corporation, Ascent AeroSystems, Asociación de Profesionales de Drones – APD, Autel Robotics, Auterion, Avision, DJI, Doosan Mobility Innovation, DroneUp, Evolve Dynamics, FAA, Fruity Chutes, Grepow Inc. DBA Tattu Battery, Hollywood Drones, Intermap Technologies, Inc., Iris Automation, Kittyhawk.io, MicaSense, NARMA Inc., Ofil Ltd, Phase One Industrial, Pix4D, RIEGL USA Inc., Sabrewing Aircraft Company, Sierra-Olympic Technologies, Inc., SimActive, Skydio, Skyline Software Systems, Skyward, A Verizon company, Specialty Coating Systems, Sundance Media Group, Sunhillo, Tallysman, Target Arm Inc, Teleidoscope, Tillamook UAS Test Range, UAVita, Unify Inc., Unmanned Systems Technology Magazine, YellowScan.

Episode 54: Amazon Prime Delivery FAA Approval, DJI Concerns, New FLIR Products with Randall Warnas

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

This week on the InterDrone Podcast we sat down with Randall Warnas, the Global sUAS Segment Leader at FLIR. FLIR designs and develops technology solutions to enhance perception and awareness for drones and other systems. We spoke about Amazon winning FAA regulatory approval for its Prime Air drone delivery fleet through the current Part 135 framework, the Pentagon releasing 5 approved drones for federal government use, and much more.

Amazon and Walmart's emerging delivery drone battle escalates with Zipline deal

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Walmart is partnering with drone delivery unicorn Zipline to make on-demand deliveries of select health and wellness products in the U.S. early next year. It's the second recent delivery drone deal for Walmart at a time when retail rival Amazon has received FAA approval to test its own Prime Air delivery drones. It also follows Walmart's attempt to counter Amazon Prime with its own membership offering, Walmart+, which debuts Tuesday and costs \$98 a year.

North Dakota is Building a Statewide BVLOS Network for Drones

North Dakota and the Northern Plains UAS Test Site (NPUASTS) have been a hot spot for the commercial drone industry since the industry started to grow. With agriculture, military installations, and the oil and gas industry all represented, the state is an ideal place to test new commercial applications. Now, North Dakota is working on building out its commercial drone infrastructure by creating a statewide BVLOS network.

Commercial UAV Expo Americas

Hi Vern,

Today is the third and final day of [Commercial UAV Expo Americas Virtual!](#) We hope you can take advantage of all the valuable education we have in store and that you'll also set aside some time to network with other commercial UAS professionals. Here's what's on the agenda for today:

Keynotes

Keynotes kick off at 9:00AM PT. Get updates and insights from U.S. Chief Technology Officer Michael Kratsios and the UPS Flight Forward Team.

Virtual Exhibit Hall

The Exhibit Floor is open from 9:00AM -5:00PM PT. Peruse the Virtual Booths during Virtual Exhibit Hall Hours to learn about companies and products, view and download PDFs and videos, and reach out to booth personnel to schedule meetings. Be sure to visit the Exhibit Hall during "**Power Hours**"! It's during these time blocks that all the live interaction will take place, from one-on-one meetings with staff to product demonstrations and much more. [View the schedule and exhibitor list here.](#) You can also enter the booths through the [Agenda](#).

Keynote Panel

"Expanded Operations, Regulatory Update & Lessons Learned from IPP" starts at 10:00AM PT. Erik Amend, Executive Office Manager of the FAA UAS Integration Office, will lead this discussion first with a regulatory update and will then engage panelists in candid discussion about their IPP experiences and lessons learned.

Plenary

"Plenary: The Economic Impact of a Pandemic and a Path Forward" starts at 11:30AM PT with Frost & Sullivan's Michael Blades moderating and panelists Matt Dunleavy (SkySkopes), Ian Smith (Ware), Tom Walker (DroneUp) and Grant Guillot (Adams and Reese).

DRONERESPONDERS Public Safety Summit

The Public Safety Summit kicks off at 11:30AM PT - check the [event agenda](#) for a schedule of all the programming.

Breakout Sessions

Breakout sessions run all afternoon on topics including Data Analytics, Utility Inspection & Industrial Applications, Construction, Remote ID, Agriculture and Ranching, Surveying and Mapping, and Advanced Air Mobility. We've also got three "Drone Industry Visionaries" panels in which the industry's thought leaders share their insights and vision. Check the [event agenda](#) for a schedule of all the programming.

Here's what you need to know to be ready for the day:

How to Live Stream Content

- Click on the blue **Log In** button below.
- Prior to a session, you may select sessions you'd like to view and "star" them, which will prompt a log in.
- When sessions are running, you may log in by clicking "Join Broadcast" on any session you would like to view – again prompting a login.
- BE SURE TO USE THE EMAIL ASSOCIATED WITH YOUR TICKET REGISTRATION TO LOG IN!
- When a session you're interested in is about to begin or has already started, simply click the "Join Broadcast" or "Join Now" button next to it.

- **A magic link will be sent to your email account to click and confirm it's you.**

Note: All live sessions will take place in the US Pacific Time Zone. Conveniently, your local time zone will be noted next to the live streaming time.

Log In

How to Network

It's easy to take advantage of personalized matchmaking through our AI-powered networking tool Commercial UAV Expo Connect powered by Grip and sponsored by DroneUp. Get started now!

- Go to <https://matchmaking.grip.events/commercialuavexpoconnect/event-login>. Enter the email you used to register for the event and the badge/registration ID you received with your registration confirmation email.
- Create a password.
- Complete your profile.
- Review recommendations, request and accept meetings, and start connecting!

Start Networking

Please visit the **HELP page** for additional details and instructions on where to turn if you need assistance. Looking forward to "seeing" you next week!

- The Commercial UAV Expo Americas Team

SeaGuardian Conducts Test Flights Over Sea Lanes

By The Editor on Sep 17, 2020 06:55 am

General Atomics Aeronautical Systems, Inc. (GA-ASI) concluded a set of maritime test flights over the sea-lanes off the coast of Southern California on September 11th, using the MQ-9B SeaGuardian Remotely Piloted Aircraft System (RPAS). This was the first MQ-9B configured for surveillance operations over open-water, and served to demonstrate MQ-9B capabilities in the maritime environment. [...]

Turkey's Baykar Successfully Tests Flying Car

By The Editor on Sep 17, 2020 06:45 am

Turkey's first domestically produced flying car, the Baykar Cezeri, has completed its first successful test flight. The 230-kilogram prototype flew around 10 meters during the test, which was carried out under the supervision of the company's chief technology officer, Selçuk Bayraktar. Recent tests were launched on Sept. 11. Cezeri, which has a smart flight system [...]

Flag Status: Completed

Warning: External Email
--

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one fo the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available at: [https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20 On Demand Video Submission Instructions v3 .pdf](https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20%20On%20Demand%20Video%20Submission%20Instructions%20v3.pdf) While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPOENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

CHRISTOPHER TODD CEM, FPEM

GA-ASI at USAF's ABMS On-Ramp Demonstration

By The Editor on Sep 18, 2020 06:50 am

General Atomics Aeronautical Systems, Inc. (GA-ASI) played a central role in U.S. Air Force's (USAF's) Advanced Battle Management System (ABMS) On-ramp demonstration held September 1-3, 2020. The goal of the demonstration was to prove emerging ABMS technologies in support of USNORTHCOM and USSPACECOM homeland defense priorities. GA-ASI flew two of its capital Remotely Piloted Aircraft [...]

The Largest Helicopter Ever Built: The Mil V-12 Story

By The Editor on Sep 18, 2020 06:00 am

The Soviets built some of the largest and most technically advanced helicopters in the world. By 1957, the Mil Mi-6 had already emerged as the largest helicopter ever built, far out-sizing helicopters built in the west. But for the Soviet Union, the need to build a helicopter far larger than even the Mi-6, soon became [...]

Dear Vern,

How are you doing?
I hope everything is going well with you.

I apologize for not contacting you since May.
In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department. Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

Regards,

Yoshi

Yeah, I definitely want to visit Tijuana!

When I was a student(30 years ago),I visited there just for sightseeing, but I've never thought I have a chance to visit there again.

I think you already know about IACP TECHNOLOGY CONFERENCE, it has a UAS session, maybe you are the lead . Just as your reference.

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you .

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
Vern

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don t mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,
Yoshimi Yanai

Good Afternoon Vern,

We all have had our hands full during these crazy times here in CA! Very much appreciate all the work you and your officers do. I am still very much interested in featuring the awesome work your team is doing in an Indiana Drones video. I have also released our first product from ROCK robotic for 3D modeling and mapping. Below is an email I am sending around to all my friends. Figured you both would find this interesting as well.

Let me know what you think next steps are needed for myself to come down and create a video about the BVLOS work you are pioneering.

Harrison

I would like to take this opportunity to share with you our latest [video](#). Over my 5+ years operating a drone service business and working with the top LiDAR manufacturers, I realized a lot of improvements that needed to be made to make my company more profitable and efficient. This is why I created [ROCK robotic](#). We launched our first product, the [R1A](#) in combination with the [ROCK cloud](#) to vastly simplify the use and delivery of products to all of our end customers. Using this system we address the needs of construction customers, power utility, infrastructure, forestry, oil&gas, emergency management, archeology, and agriculture to name a few.

It is my goal to vastly increase the accessibility to LiDAR data and use cases through a vastly cheaper hardware, and a supporting community and transparency to the industry.

A few things we are starting off with is first:

- placing the [price](#) directly on the website for all to see.
- Creating a [community](#) to quickly share information and answer questions about LiDAR/ROCK robotic/Deliverables/ and anything you want to know related to LiDAR. Even if you are not a ROCK customer, I hope you can ask as many questions on the community as possible so we can start sharing more information!

- Easy to use hardware - the R1A is completely controlled from your phone, so no need to bring another device with you to the jobsite
- The Cloud - this is the **biggest** change. The cloud allows you to upload the data directly after flying and all the processing is done for you. I haven't shown you on the videos, but post processing can take 1X-5X the time to do in the office as you spend in the field capturing data. This usually involves several custom software packages and large desktop computers and specialized workforce to do properly.
- Free and Open documentation - all of the documentation for our systems, How-to, and specifications are open and free to see by everyone. We want to make training and operating LiDAR simple and easy. I have been a trainer for the past 3 years and now I can just make it easy for everyone.

With all of our offerings, we want to make the decision of what sensor to use on a project, to not be related to price and complexity, but to say which is the best tool for the job. To get to this destination, we need affordable hardware, simple to operate, and fast and easy delivery of results to our clients.

I hope you check out the latest video, and join me on this trip towards the future. We have a lot more in the works, and I will continue to provide real-world unbiased reviews and reports of **ALL** hardware and software that I review. After all, a rising tide raises all boats!

Check out all our example datasets on the cloud- it's Free to see! --> <https://cloud.rockrobotic.com/>

Latest Video --> <https://youtu.be/z2LJuHI50o8>

ROCK robotic website --> <https://www.rockrobotic.com/>

Community website --> <https://community.rockrobotic.com/>

Docs website --> <https://docs.rockrobotic.com/>

Good afternoon Vern,

Firstly, it is great to follow what you and the officers at Chula Vista are pioneering here in the United States. I am very interested to capture the story of how drones are being used for good, and share the personalized story of the officers working to improve public safety through the use of Drones. This is definitely a trying time for Blue lives but I believe by framing the story correctly this can be an impactful story to share. How can I participate and document the story of your team's work?

Looking forward to hearing from you and any thoughts from the department.

Cheers,

Harrison

Hi Vern,

The manual drones on the market today are hard to fly and easy to crash. As a result, **pilot training can consume up to 80% of a drone program's budget**, and 55% of respondents to a recent survey pointed to the **risk of crashes as the main pain point holding their program back**.

That's where Skydio Autonomy™ comes in, the AI engine that's built into every Skydio drone. Skydio Autonomy™ is the first computer vision based flight autonomy engine that understands the surroundings of the drone and avoids obstacles in real-time, so you can **focus on your mission while your drone focuses on the flying**.

To get started integrating Skydio drones into your first responder fleet, contact a Skydio Expert to evaluate your unique use case.

gs!

Commercial UAV Expo Americas is now on day 3 and though going virtual highlighted just how valuable live events are and how much I look forward to seeing everyone next year live in Las Vegas, there has been some great content, connections, and experiences. Day 2 kicked off with two amazing keynote presentations from Administrator Steve Dickson and Scott Breor from the DHS, and was followed by an amazing panel on Drone Delivery, which featured the highest level players in the field from UPS, Wing, and Zipline and was moderated by Lisa Ellman of the Commercial Drone Alliance, to which we owe an immeasurable amount of gratitude for helping with this year's event. For those of you who weren't able to catch these amazing presentations live, you can [access them on-demand](#) along with the rest of this year's content for 30 days post event.

Another amazing discovery was the impact the networking app had on the ability to facilitate meaningful connections between our attendees and exhibitors. Sponsored by DroneUP, this application uses AI to match you with the right people and businesses according to your preferences, and only gets smarter as you use it, and will also be available for 30 days post event. If you haven't yet, test this out and also visit our exhibitor's virtual booths, who are really stepping up their game with live demonstrations and more during the power hours of the event held from 10 to 1 and 3 to 5 Pacific Time today.

If you haven't registered for the event there is still time to catch the last day and, again, you'll have access for 30 days afterward to all content and virtual booths! You can [register here](#).

Well and be safe,

YOUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

sign up for free to any or all of the webinars below to join live or on-demand:

Enterprise Grade Security for Enterprise UAS Operations

On Demand

Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Additionally, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most valuable data one can collect.

Attendees for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Emerging Tech Showcase II

On Demand

Drone technology and its capabilities are changing constantly with new features, products, and services designed to make work safer, faster, cheaper, and better. Stay up to date on what is new and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Improving Drone Productivity by Smart Edge Data Processing

On Demand, October 1, 2020 | 10:00AM - 11:00AM Eastern Time

Processing of sensor data (IMUs, Cameras, ToF, lidars, etc.) in drones significantly consumes battery. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video, point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

On Demand, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Select a Lidar System for UAV Operations

On Demand, December 1, 2020 | 1:00PM – 2:00PM Eastern Time

Do you hear about the newest 3D solutions? Curious to discover which innovations are changing AEC workflows? Our Emerging Technology Showcases provide attendees with an opportunity to get up to speed around the latest product launches and innovations throughout the industry.

From Raw LiDAR and Actionable Data

On Demand, January 12, 2021 | 1:00PM – 2:00PM Eastern Time

To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

ers for rapid, efficient point cloud capture, and high-resolution images, during corridor-
de-area-mapping projects have redefined expectations related to what it means to
tly capture actionable data. A panel of experts will discuss how airborne lidar has
d a measurable difference for stakeholders of all types.

Hi Yoshi,

We would be honored to have you visit. I'd like to let you know that I'm retiring on October 2nd after 25 years with the department. I'll be going to Axon Air to help with their drone program. If you need to reach me after October 2nd, you can email me at **PERSONAL/PRIVACY** or hit me up on linkedin.

Lt. Don Redmond will be leading the drone program and can make arrangements for your tour. He is copied on this email and will be glad to help.

Safe travels!

Best,
Vern

Dear Vern,

How are you doing?
I hope everything is going well with you.

I apologize for not contacting you since May.
In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department. Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

Regards,

Yoshi

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you .

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
Vern

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

Increasing Drone Productivity by Smart Edge Data Processing

Thursday, October 1 | 10:00AM - 11:00AM ET

Processing of sensor data (IMUs, Camara's, ToF, lidars, etc.) in drones significantly consumes power. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video and 3D point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Top 5 Takeaways:

- **Improving Drone flight time and energy consumption**
- **Smart handling of large amount of drone-sensor data at the EDGE**
- **Improve AI model accuracy and continuously update model in the drone**
- **Process 10X more sensor data at the same processor**
- **Establish real-time transmission in low bandwidth conditions**

How Skydio drones and AI-driven autonomy ensure mission success

Tuesday, September 29th

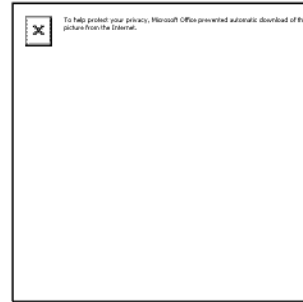

1:00PM EDT

REGISTER NOW

Learn more about the security, sensors, and functionality of Skydio's X2D in Skydio's [upcoming webinar](#), hosted by Chuck McGraw and Guillaume Delepine.

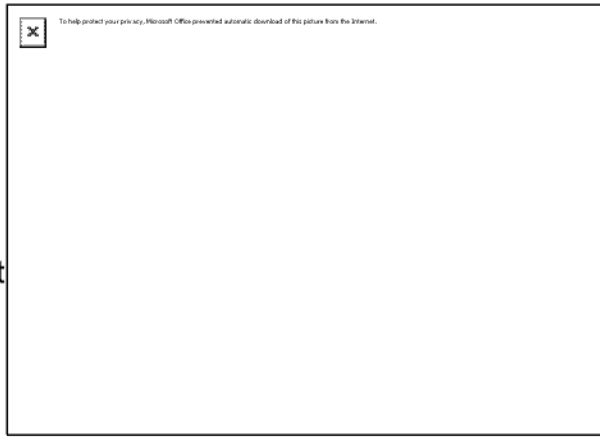

Chuck McGraw, Director of Public Sector Sales, joins Skydio after 20 years as an elite SEAL Team leader, holding the positions of Assault Squadron Operations Chief, Basic Training Command Operations Chief, Master Training Specialist, Senior Program Manager and Assault Team Leader. His twenty-year career included eleven combat deployments.

Guillaume Delepine is Product Marketing Manager at Skydio, the leading U.S. drone manufacturer and world leader in autonomous flight. In his tenure at the company, he previously led Skydio's efforts to serve first responders as Public Safety lead. Then, as Enterprise Strategy Manager, Guillaume contributed to the fundraising, planning, and hiring process that led to Skydio's recent announcements of a \$100M Series C, expanded roadmap, and growing executive team. Guillaume holds a BA from Princeton University, and took leave of the joint MPP/MBA program at Harvard University to join Skydio.

Skydio's next level autonomy has been making waves in the drone industry since the CA-based company introduced their first aircraft in 2018, the culmination of development that began with the founders' graduate work at

MIT. The Skydio Autonomy™ engine and deep learning algorithms that allow Skydio aircraft to avoid obstacles, follow targets, and understand the environment make the recently announced Skydio X2D the ultimate tool for the armed forces and public sector.

Skydio Autonomy means that public sector agencies can get up and running effectively – fast. With 360 degree situational awareness and obstacle avoidance, pilots can focus on their missions without a long learning curve to perfect their flying skills. It's an advance in ease of use that makes the X2D the most effective small UAS yet for broad use in the armed forces.

Designed and assembled in the U.S., the Skydio X2D is listed on the U.S. Department of Defense (DoD) "[Blue sUAS](#)" list – drones approved as "trusted and secure" for use by U.S. government agencies. Skydio X2D was developed with the collaboration of the Defense Innovation Unit of the DoD to meet the specific security and functionality needs of government agencies. Equipped with color and thermal sensors, a ruggedized, foldable airframe, and extended wireless range of up to 10km, the X2D is designed to accommodate a wide variety of missions both in daylight and at night.

FAA Publishes Rule on Type Certification of Certain UAS

By The Editor on Sep 22, 2020 06:52 am

The Federal Aviation Administration has announced its policy for the type certification of certain unmanned aircraft systems as a special class of aircraft. This policy is effective September 18, 2020. In 2012, Congress passed the FAA Modernization and Reform Act of 2012 (Pub. L. 112-95). Section 332 of Public Law 112-95 (codified at 49 U.S.C. [...])

Rooftop Skylight Hatches for Drone Deliveries

By The Editor on Sep 22, 2020 06:50 am

"Smart" delivery hatches built into homes are being developed so that parcels can be delivered by drone. The skylight hatches could be both fitted or designed into the roofs of homes so customers can receive packages even when they are out. Start-up Idu Group hopes the innovation can help cut the time it takes for internet [...]

Aero Med Helicopter in Near Miss with Drone

By The Editor on Sep 22, 2020 06:49 am

A Spectrum Health Aero Med helicopter had a near collision with a drone while landing at Butterworth Hospital. The drone was hovering over the rooftop landing site when the aircraft landed. The device dropped low enough to be captured by an Aero Med crew member. The owner is unknown. Aero Med reported the incident to [...]

TAI Aksungur Flies 28 Hours with Full Ammunition

By The Editor on Sep 22, 2020 06:45 am

Aksungur, a domestically produced medium-altitude, long-endurance unmanned aerial vehicle (UAV) developed by Turkish Aerospace Industries (TAI), completed a 28-hour-long flight last Thursday. It was the first time the aircraft flew with a payload at an altitude of 20,000 feet (6,096 meters). TAI announced the new achievement on Twitter. "Aksungur, the domestic and national product of [...]

Kratos Expands Production Capacity Ready for Air Force Contract

By The Editor on Sep 22, 2020 06:24 am

Kratos Defense, a manufacturer of military tactical and training drones, expanded its footprint in Oklahoma City. The San Diego-based defense contractor increased the size of its operation here by 50%, and now uses over 150,000 square feet at the Will Rogers Business Park. Steve Fendley, president of Kratos' unmanned systems division, said the expansion will [...]

US Air Force Reveals NGAD Aircraft has Flown

By The Editor on Sep 22, 2020 06:00 am

The US Air Force's Next Generation Air Dominance combat aircraft, intended to complement or succeed the F-22 and F-35 in the air superiority role, has already flown, having been rapidly prototyped through modern digital design, Air Force acquisition chief Will Roper revealed. Roper made the revelation at the end of a talk at AFA's virtual [...]

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one of the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitting your on-demand video session are available at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPONENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted

via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics

- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

Hi Vern,

Thank you so much for your arrangement.

Congratulations on your retirement!(My 25th anniversary was last year .)

Although I would like to meet you in person, I think you are spending very busy days before your retirement. So, if Lt. Redmond can arrange for me, I would like to visit him in the middle of October.

I am sorry for bothering you, but please let me know about his schedule.

Regards,

Yoshi

Hi Yoshi,

We would be honored to have you visit. I'd like to let you know that I'm retiring on October 2nd after 25 years with the department. I'll be going to Axon Air to help with their drone program. If you need to reach me after October 2nd, you can email me at **PERSONAL/PRIVACY** or hit me up on linkedin.

Lt. Don Redmond will be leading the drone program and can make arrangements for your tour. He is copied on this email and will be glad to help.

Safe travels!

Best,
Vern

Dear Vern,

How are you doing?
I hope everything is going well with you.

I apologize for not contacting you since May.
In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department. Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

Regards,

Yoshi

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you .

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system.
I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached.
But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don t mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,
Yoshimi Yanai

Representative Metropolitan Police Department Japan Local Government Center

GIVEAWAY IS OVER

Feels like just yesterday this giveaway was born, and now it's got pimples, B.O., and an attitude. Ya know, we're happy for it to be over, come to think of it...

Anyway! The winner of the DJI Inspire 1 v2 is LEON DUPONT from Forsyth County Fire Department!!

Congratulations, Leon! We will be reaching out later today to coordinate the delivery from our friends at W.S. Darley & Co.!

For the non-winners, do not worry. The fun is not over. For the entire

month of October we are discounting our service of preparing and processing COAs! The quotes received in October with discounted rates will be honored through January 31st. Cause, we are good and honest people and we want to be sure you have plenty of time to get those signatures of approval!

Reach out to Kyle Miller (kyle@skyfireconsulting.com) to receive a quote for a Blanket COA, Jurisdictional COA, or the all new Tactical BVLOS COA.

AND IT'S 1... 2... 3

STRIKES YOU'RE OUT!

There's a long-standing argument over what sport has the most obnoxious fans, but has anyone ever stopped to argue which sports fans have the most technologically savvy ways to be obnoxious?

Last week a drone landed in Wrigley field during a baseball game between Chicago and Cleveland. The drone entered the stadium, and landed on the field for a few moments, then took off and hovered before leaving.

There's definitely a level of danger to these people flying their drones into a stadium. If there wasn't a global pandemic, there would be tens of thousands of fans present. Not only does it potentially create cause to come out with stricter laws against drone flights, but for what? A video of some people walking off the field? They didn't even get any good shots.

Next time, we recommend people saving the drone filming for their family Thanksgiving football games. Should be able to get the same footage of people rushing away from the field on their way to the bathroom! *This high brow poop joke brought to you by the writers of Propeller Heads.*

P.S. On a serious note, temporary flight restrictions (TFRs) remain in effect for all stadiums with seating capacities of over 30,000 people before, during, and after professional sports games, even while fans are not in attendance. If you plan on flying near a stadium and find yourself unfamiliar with the previous sentence, please contact us or someone who can help you learn about where you can and cannot fly your drone!

TRYING TO GET DRONE FIRST RESPONDERS? YOU'RE GOING TO HAVE A MANATEE OF A TIME

Picture this. You're riding your bike along a beautiful path in Manatee County, FL. You look to your left for just a brief moment and boom you're barreling through the brush at 30mph, and land finally stopping after bumping into some people doing illegal things in the woods.

Once stopped, you assess your damage, and realize you have a massive cut on your right arm. On top of that, the people you bumped into are white as ghosts. They explain, you landed on the illegal substance they were about to inject, and the full amount is in your body...

Panicked, you call 911. Luckily you live in a county where the trial run for a drone first responder is going on. In minutes a drone flies overhead

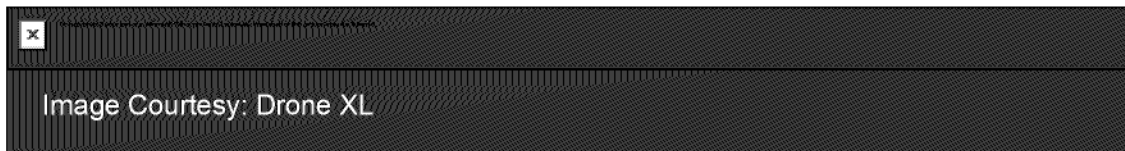

with a tourniquet, AED, and Narcan. You *live*.

For just \$1 dollar a month, you too can join the fight to stop made up accidents from happening in Florida.

Not true, but really, Archer First Response Systems LLC, is doing a trial run in Florida for a drone first responder, and the local government has said yes! This is a big deal, people! The whole \$1 a month thing? That's real too! For the first year anyway. Perks of being a guinea pig... we suppose. Guinea Manatee? Is that a thing?

REAL LIFE DR. DOOLITTLE

TRACKING ENDANGERED ANIMALS FROM THE SKY

Maybe you missed it, but not too long ago we talked about Doc Antle from Tiger King's son trying to create a new breed of Chimps by teaching them to fly drones. The most reckless thing you can do with a drone...

Actually, he was sending the drone to be used for conservation purposes. And that's exactly what ecologists are using them for all around the world. Dr. Debbie Saunders is in a way leading the pack with this. With two decades of experience tracking endangered animals, she founded a company called Wildlife Drones. They use radio signaling to track and observe movement patterns of endangered animals.

Just another example of how drones are changing the world for the better!

Episode 54: Amazon Prime Delivery FAA Approval, DJI Concerns, New FLIR Products with Randall Warnas

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

This week on the InterDrone Podcast we sat down with Randall Warnas, the Global sUAS Segment Leader at FLIR. FLIR designs and develops technology solutions to enhance perception and awareness for drones and other systems. We spoke about Amazon winning FAA regulatory approval for its Prime Air drone delivery fleet through the current Part 135 framework, the Pentagon releasing 5 approved drones for federal government use, and much more.

Amazon and Walmart's emerging delivery drone battle escalates with Zipline deal

 To help protect your privacy, Microsoft Office prevented automatic download of this picture from the Internet.

Walmart is partnering with drone delivery unicorn Zipline to make on-demand deliveries of select health and wellness products in the U.S. early next year. It's the second recent delivery drone deal for Walmart at a time when retail rival Amazon has received FAA approval to test its own Prime Air delivery drones. It also follows Walmart's attempt to counter Amazon Prime with its own membership offering, Walmart+, which debuts Tuesday and costs \$98 a year.

Commercial UAV Expo Americas

Hi Vern,

The **Virtual Exhibit Hall** is open until 5:00PM PT today!

Peruse the Virtual Booths during **Virtual Exhibit Hall Hours** to learn about leading UAS companies and their newest products, view and download PDFs and videos, and reach out to booth personnel to schedule meetings.

Be sure to visit the Exhibit Hall during "**Power Hours**" from 10:00AM – 1:00PM PT & 3:00PM – 5:00 PM PT today!

It's during these time blocks that all the live interaction will take place, when you can meet one-on-one with staff, view product demonstrations and more.

Here are some of today's exhibitor highlights:

Auterion [Visit Booth](#)

10:00AM - 11:00AM PT - The Drone Software Platform for Enterprise with Lorenz Meier

Evolve Dynamics [Visit Booth](#)

10:00 AM – 1:00 PM PT– Introduction to the Sky Mantis

Yuneec [Visit Booth](#)

11:00AM - 11:40AM PT - LAW ENFORCEMENT - Interview with Capt. Tim Martin, Huntington Beach Police on use of thermal sensors for UAVs and law enforcement.

Iris Automation [Visit Booth](#)

12:00PM - 12:30PM PT - BVLOS Regulatory Review (FAA) with Trever Linn, Director of Airspace Integration

Target Arm Inc. [Visit Booth](#)

12:00PM - 1:00PM PT- Ask Me Anything - Jeff McChesney/CEO & Founder

Doosan Mobility Innovation [Visit Booth](#)

12:10PM - 12:50PM PT - Showing Off Partners - Aeronyde

Airspace Link [Visit Booth](#)

3:00PM - 4:00PM PT - Q&A with Michael Healander, CEO

[View the Virtual Exhibit Hall schedule and exhibitor list here.](#) Click on a logo and then click on the blue box to visit the booth; you'll be prompted to log in. Be sure to use the email associated with your registration.

You can also enter virtual booths through the **[Agenda](#)**.

Don't miss out on seeing best-in-class commercial UAS technology from these leading solutions providers:

Advanced Technology Labs, a Yuneec Company, Aerial Response Solutions, Aerospace Arizona Association, Agrowing, AirMap, Airspace Link, Air-Supply Aerial, AIRT – DRONERESPONDERS, AlarisPro, Alynix LLC, BAAM Tech, APD, Applanix Corporation, Ascent AeroSystems, Asociación de Profesionales de Drones – APD, Autel Robotics, Auterion, Avision, DJI, Doosan Mobility Innovation, DroneUp, Evolve Dynamics, FAA, Fruity Chutes, Grepow Inc. DBA Tattu Battery, Hollywood Drones, Intermap Technologies, Inc., Iris Automation, Kittyhawk.io, MicaSense, NARMA Inc., Ofil Ltd, Phase One Industrial, Pix4D, RIEGL USA Inc., Sabrewing Aircraft Company, Sierra-Olympic Technologies, Inc., SimActive, Skydio, Skyline Software Systems, Skyward, A Verizon company, Specialty Coating Systems, Sundance Media Group, Sunhillo, Tallysman, Target Arm Inc,

Teleidoscope, Tillamook UAS Test Range, UAVita, Unify Inc., Unmanned Systems Technology Magazine, YellowScan.

FROM THE EDITOR

gs!

Commercial UAV Expo Americas is now on day 3 and though going virtual highlighted just how valuable live events are and how much I look forward to seeing everyone next year live in Las Vegas, there has been some great content, connections, and experiences. Day 2 kicked off with two amazing keynote presentations from Administrator Steve Dickson and Scott Breor from the DHS, and was followed by an amazing panel on Drone Delivery, which featured the highest level players in the field from UPS, Wing, and Zipline and was moderated by Lisa Ellman of the Commercial Drone Alliance, to which we owe an immeasurable amount of thanks for helping with this year's event. For those of you who weren't able to catch these amazing presentations live, you can access them on-demand along with the rest of this year's content for 30 days post event.

Another amazing discovery was the impact the networking app had on the ability to facilitate meaningful connections between our attendees and exhibitors. Sponsored by DroneUP, this application uses AI to match you with the right people and businesses according to your preferences, and only gets smarter as you use it, and will also be available for 30 days post event. If you haven't yet, test this out and also visit our exhibitor's

booths, who are really stepping up their game with live demonstrations and more during the power hours held from 10 to 1 and 3 to 5 Pacific Time today.

haven't registered for the event there is still time to catch the last day and, again, you'll have access for 30 afterward to all content and virtual booths! You can register [here](#).

ell and be safe,

e Gagne

Administrator Steve Dickson Updates the Drone Community at Commercial Americas 2020

in Plaza

Today, Steve Dickson, the FAA (Federal Aviation Administration) administrator, opened the proceedings of the 2020 Virtual Commercial Americas with a comprehensive update on where his agency stands in terms of regulations for unmanned aerial vehicles (UAVs) and his plans for the future. His remarks were framed by the word "Safety" and the need to keep current levels of safety for the flying public, while making every effort to bring unmanned aircraft to the national airspace (NAS) as soon as practicable.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

Sign up for free to any or all of the webinars below to join live or on-demand:

Enterprise Grade Security for Enterprise UAS Operations

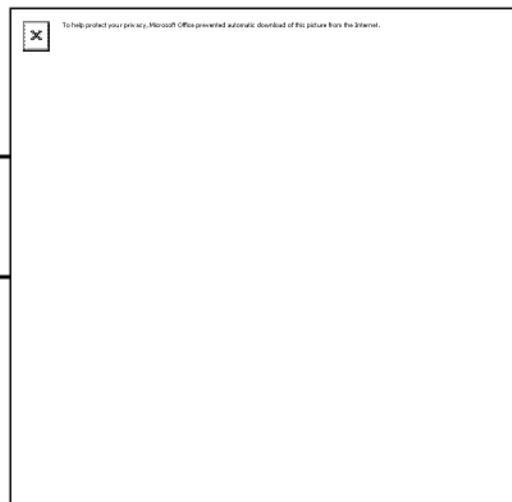

On Demand

Join Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Additionally, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most valuable data one can collect.

Attendees for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Emerging Tech Showcase II

On Demand

Technology and its capabilities are changing constantly with new features, products, and services designed to make work safer, faster, cheaper, and better. Stay up to date on what is new and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Maximizing Drone Productivity by Smart Edge Data Processing

Monday, October 1, 2020 | 10:00AM - 11:00AM Eastern Time

Processing of sensor data (IMUs, Cameras, ToF, lidars, etc.) in drones significantly consumes power. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video, point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

Monday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to capture data that may not have been possible otherwise, especially within linear drifts and for hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Select a Lidar System for UAV Operations

Monday, December 1, 2020 | 1:00PM – 2:00PM Eastern Time

Want to hear about the newest 3D solutions? Curious to discover which innovations are changing AEC workflows? Our Emerging Technology Showcases provide attendees with an opportunity to get up to speed around the latest product launches and innovations throughout the year.

Real-time LiDAR and Actionable Data

Monday, January 12, 2021 | 1:00PM – 2:00PM Eastern Time

Real-time LiDAR sensors for rapid, efficient point cloud capture, and high-resolution images, during corridor-to-area-mapping projects have redefined expectations related to what it means to quickly capture actionable data. A panel of experts will discuss how airborne lidar has made a measurable difference for stakeholders of all types.

KVH Introduces P-1775, First Photonic IMU

KVH's P-1775 IMU, the 1st photonic-based IMU, is shipping now. P-1775 IMU has the PIC Inside, for enhanced reliability & repeatability. [Read about KVH's PIC Inside.](#)

SPOTLIGHT: TELEDYNE OPTECH

Teledyne Optech's CL-360 serves as building block for next gen, best-in-class UAVs

Teledyne Optech's CL-360 is a survey grade 360-degree laser scanner that enables OEM hardware manufacturers and integrators to develop the next generation of best-in-class UAV, mobile, and terrestrial scanning solutions for various surveying applications. Being a survey grade lidar scanner means that the resulting 3D points derived from the CL-360 are suitable for applications such as surveying or inspections.

Drone Imaging Reveals Pre-Hispanic "Great Settlement"™ Beneath Kansas Ranch

Archaeologists using new drone-sensing technology have found evidence of an enormous, horseshoe-shaped trench hidden beneath a Kansas ranch. Douglas Bamforth, an archaeologist at the University of Colorado Boulder, says that drone surveys "can truly transform our ability to locate sites and map important features where huge areas have been plowed and surface traces of houses and ditches are often close to invisible."

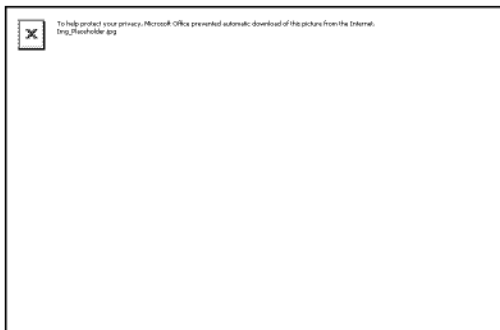

The Incredible Shrinking LiDAR

The term LiDAR comes originally from the mixture of the words light and radar, although it also responds to acronyms such as light detection and ranging or laser imaging, detection, and ranging, or sometimes replaced by the term 3D laser scanning.

MissionGO, Nevada Donor Network use UAS to deliver human organ and tissue *AUVSI (9/22/2020)*

On Sept. 17, UAS solutions provider MissionGO and organ procurement organization Nevada Donor Network completed two successful test flights carrying a human organ and tissue via UAS.

Zoox gains approval to test autonomous vehicles without safety drivers in California

VentureBeat (9/18/2020) Wiggers, Kyle

Amazon-owned Zoox announced last week that it received a driverless testing permit from the California Department of Motor Vehicles. With the new permit, Zoox will be able to test “at least two” autonomous vehicles on streets without a driver behind the wheel within a designated part of Foster City, California.

FAA Type Certification for Unmanned Systems: An Op-Ed by AUVSI President Brian Wynne

Earlier today, an opinion piece written by Brian Wynne, President and CEO of AUVSI, about the FAA's recent rule regarding type certification for certain unmanned aircraft systems was featured on the DroneLife website. Brian praised the FAA and DOT for continuing to provide regulatory guidelines to the unmanned industry, and concluded the article by calling again for an on-time delivery of the remote ID rule.

AUVSI signs letter regarding Canada's imminent addition of plastics to its Toxic Substances List

This week, [AUVSI joined over 60 trade associations in signing a letter addressed to Canadian Minister Mary Ng regarding Canada's imminent addition of plastics to its Toxic Substances List.](#) We believe this step will have damaging ramifications for the unmanned industry, as many AUVSI members are downstream users of plastics. By joining forces with such a broad range of fellow trade associations and manufacturers, we are hopeful that Canadian officials will reconsider this misguided regulation. Please contact [Michael Robbins](#) with any questions.

August 24th, 2020 the Chula Vista Police Foundation had their Inaugural Golf Tournament-

We had 110 golfers, 7 NFL Alumni playing in our event. There were 4 Eagle Sponsors, 9 Birdie Sponsors 10 Holes Sponsors, 6 Businesses sponsored 6 Foursomes, and 8 Specialized Event Sponsors. Incredible turnout considering all the COVID restrictions.

The purpose is to raise money to expand the drone program that the west side of Chula Vista has been using with great success for the past 3 years. The growth and development on the east side of the city has created the need to expand the program which will protect the entire city with this advanced technology. Drones First Responders (DFR), has proven to be a game changer for our officers when responding to 911 calls. DFR provides faster response time, superior de-escalation tool, with eyes on the ground, and providing much needed information to officers. To learn more about this technology, watch the attached video at the top of page and click on the link below to learn more.

<https://tinyurl.com/y5wd3dpd>

We would also like to express enormous gratitude to the office of County Supervisor District 1, Greg Cox for the 35,000.00 grant for the purchase of one drone. With the combined monies received, brought the total to 77,000.00. We only need 273,000.00 to reach our goal!

We couldn't have achieved any of this without the support from All our Sponsors and Incredible Volunteers!

Thank you to our Eagle Sponsors at the 4,000.00 level.

- Chula Vista Auto Park
- Elevation Entertainment
- Energy Communications/Channel 12- produced attached video!
- Brenton Peace

Thank you to our Birdie Sponsors at the 2,500.00 level.

Hi Vern,

Thank you so much for your arrangement.

Congratulations on your retirement!(My 25th anniversary was last year💎💎.)

Although I would like to meet you in person, I think you are spending very busy days before your retirement. So, if Lt. Redmond can arrange for me, I would like to visit him in the middle of October.

I am sorry for bothering you, but please let me know about his schedule.

Regards,

Yoshi

Hi Yoshi,

We would be honored to have you visit. I'd like to let you know that I'm retiring on October 2nd after 25 years with the department. I'll be going to Axon Air to help with their drone program. If you need to reach me after October 2nd, you can email me at **PERSONAL/PRIVACY** or hit me up on linkedin.

Lt. Don Redmond will be leading the drone program and can make arrangements for your tour. He is copied on this email and will be glad to help.

Safe travels!

Best,

Vern

Dear Vern,

How are you doing?

I hope everything is going well with you.

I apologize for not contacting you since May.

In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department. Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

Regards,

Yoshi

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you💎💎💎.

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system.

I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached.

But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

?: RE: From Yoshimi

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Warning: External Email

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

Good morning Yoshimi,

Thank you for reaching out to us about our drone program. We would be happy to give you a tour of our operations and discuss challenges and lessons learned. I am copying Lt. Don Redmond, who manages the program. I am the captain in charge of the patrol division and oversee UAS operations so either of us can help you. Did you have a timeline in mind for your visit and would it just be your or others?

Warm regards,

Vern

Vern Sallee

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,
Yoshimi Yanai

I agree, getting short on time to record before the 28th. I'm likely out of pocket all day Friday up in the LA area.

Hi Vern,

As far as I know, this will just be a panel discussion. Not sure if Tom Madigan is in-pocket this week or deployed out to a fire. Sounds like we better track him down to figure this out ...

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one fo the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPONENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

BIO:

Captain Vern Sallee is a 25 year veteran of the Chula Vista Police Department. In December 2014, he was promoted to captain where he commanded the Support Operations division and subsequently the Investigations division. In May 2018 he was placed in command of the Patrol Operations division and is second in command to the Chief of Police.

Captain Sallee established CVPD's drone program in January 2016 and since October 2018, Captain Sallee has led a significant expansion CVPD's UAS program known as Drone as a First Responder (DFR) as part of the Federal Aviation Administration's UAS Integration Pilot Program (IPP). CVPD's groundbreaking DFR program has been recognized nationally as a revolutionary public safety model which provides real-time video and decision quality data to officers on routine calls for service.

Captain Sallee is a subject matter expert with the Office of Community Oriented Policing (COPS Office) UAS Working group, to help develop guidance for police agencies to effectively use UAS technology to enhance public safety, while also protecting the public from the malicious use of UAS. He has also represented CVPD as a presenter and subject matter expert on police use of drones at the FBIAA national conference, the IACP technology conference, the IACP national conference and numerous other UAS and public safety forums.

Captain Sallee has a Master of Science Degree in Administrative Studies with a criminal justice emphasis from Missouri State University and a bachelor's degree in psychology from San Diego State University. He is a graduate of the Los Angeles Police Department Leadership Program, California P.O.S.T. Command College (Class 53) and the FBI National Academy (Class 270). He has been published in Police Chief Magazine and is a former adjunct community college instructor; having taught police ethics, forensic photography and police community relations.

Hi Chris, any word on a recording timeline? Also, is this a discussion only or are there slides or videos? I'm good with either, but if I need to present content, I'll need to know scope so I have time to prepare. If it's just a discussion, I'm all good.

Thanks,
 Vern

Importance: High

Warning: External Email
--

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one fo the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available

at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPOENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPOENTIAL moderators and speakers are posted via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPOENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPOENTIAL 2020!

Sincerely,

Chris

Fantastic, that's great news! As soon as we receive the award, we'll record a video and send it. Is there any audio, will the chief be permitted to say "thank you" and we are honored to accept or should it simply be us with it waiving? Or we could send one of each an you folks decide on the production end? Thanks again for all the help and support!

Best,
 Vern

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager

Hi Shannon, just curious, is there any chance that we could pre-record our "virtual acceptance" before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I'd hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don't want to seem ungrateful). She's been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,
Vern

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Good morning Shannon,

Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for **Drone as a First Responder (DFR) Program** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Good morning Vern & Lt. Redmond,

Thank you so much, I am very glad you can arrange my tour!
 As for my schedule, I would like to visit you on 14th or 15th of October, if you are available.

Of course I can adjust it, so please let me know when it would be convenient for you.

Regards,

Yoshi

Hi Yoshi,

We would be honored to have you visit. I'd like to let you know that I'm retiring on October 2nd after 25 years with the department. I'll be going to Axon Air to help with their drone program. If you need to reach me after October 2nd, you can email me at **PERSONAL/PRIVACY** or hit me up on linkedin.

Lt. Don Redmond will be leading the drone program and can make arrangements for your tour. He is copied on this email and will be glad to help.

Safe travels!

Best,
Vern

Dear Vern,

How are you doing?
I hope everything is going well with you.

I apologize for not contacting you since May.
In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department.
Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

Regards,

Yoshi

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you .

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Regards,

Yoshi

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,
 Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Regards,

Yoshi

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

FAA Moving Slowly On Drone Certification

The FAA is proposing to certify some unmanned aircraft under Part 21, a category reserved for "aircraft that would be eligible for a standard airworthiness certificate but for which certification standards do not exist due to their unique, novel, or unusual design features." It's a largely procedural move that gives the FAA a slot for which to consider certification applications for a wide range of designs.

Autonomous Industrial Drones Now Fly Anywhere By Themselves, Even Underground

Exyn recently signed a deal with Sandvik Group to provide autonomous drones for mining companies. The idea is to send a drone into a just-blasted area. It's likely

both an active, working mine as well as a brand-new area of the mine, which means it's potentially hazardous for humans, with cave-ins, settling, or other dangers imminent. And since it's brand-new, that also means it's currently unmapped..

Complete the industry's most important survey for a chance to win a Mavic Mini!

This survey from the Drone Analyst has the purpose to collect information about your experiences buying and using drones. Designed for individuals, companies, enterprises, and agencies that have purchased drones, use drone software, offer drone services, or perform drone-based operations, the survey should require less than 10 minutes of your time.

By completing the survey, you'll have an opportunity to:

- Receive a **free summary report** of the research results, a \$95 value
- Enter to win one of two **DJI Mavic Mini** drones, each a \$400 value

Take the Survey

Next Level Drone Safety: M300 RTK Three Propeller Emergency Landing

When you see it for the first time, the new Three Propeller Emergency Landing Mode looks both impressive and also somewhat odd. The mode puts the drone into a rapid spin, where it begins rotating between two and three times per second. That's right, the entire drone spins while flying until it's back on the ground. Read this blog to find out how this feature provides an extra line of safety for your drone operations.

Hi Vern,

Thank you so much for carving out that time for us. Would Google Meets work for you? You won't have to download anything and there's no password, it's been working very well so far.

We understand that there is civil unrest and that the "defund the police" movement is happening and we understand there could be some challenges, we fully take these into account and will be patient with you as you navigate them.

We really believe in this idea, it's not just about new cutting edge technology that is emerging and the most incredible Artificial Intelligence in your drones, but also about how, by using it, as police, you are protecting the public massively.

Malcolm is looking forward to speaking to you both on the vision of the series and we can't wait to speak to your Chief next Wednesday.

Best Wishes,

Suzanne.

On Thu, 18 Jun 2020 at 16:54, Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Suzanne,

I've carved out 20 minutes of the Chief's time on Wednesday, June 24 at 10:00 am Pacific Standard Time. I gave her a brief synopsis of our discussions, but she really will be looking to hear from Malcolm about the vision of the CB films endeavor, proposed logistics, timelines etc. We will certainly ask for your patience because we are not certain we are ready to tackle anything new right now due to the difficult stretch we are in. Civil unrest and the "defund the police" movement have presented some immediate challenges that we are still dealing with. That being said, we are willing to hear preliminary ideas as to if there is a path forward on this project that is mutually beneficial.

Please let us know if you'd like to use Microsoft Teams, Zoom or just teleconference. Also, I'm sure you've heard that, at least in the States, several popular shows like COPS and LivePD have been dropped by their networks. You know more about your business model than we do, but just wanted to make sure you all had a general awareness of the challenges for a police related show right now as we both evaluate the concept.

Best,

Vern

Dear Vern,

I hope you are doing well. I wanted to introduce myself as the new Researcher at CB Films and reopen the line of communication with yourself.

Despite the virus throwing us many hurdles, we are still very excited about the project, particularly the CVPD drone program. I just read your article in March's Police Chief Magazine, which was very informative and I am really keen to move forward and hopefully talk to Kabe Termes and Captain Fritz Reber.

I would love to set up a call with yourself and Malcolm our Managing Director so that you can discuss the proposal in further detail.

Kind regards,

Rachel McCarthy

Researcher

Hi Vern,

Thanks kindly for your prompt response.

Your pioneering use of DFRs is really fascinating and you are clearly deploying drones for a diverse array of operations.

Do you have a dedicated "drone unit" or are there specially trained drone operators in each police department - similar to Arizona DPS? And what frequency are you using drones at CVPD - daily, weekly monthly?

It would be great to schedule a phone call to discuss the project further and to establish what sort of access would be permitted to your operations.

Kind regards

Kirsty

On Thu, Nov 7, 2019 at 5:26 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Hi Kirsty,

My name is Vern Sallee and I'm the patrol operations captain for CVPD and in charge of our drone program. Thank you for reaching out to us about our program, which we refer to as Drone as a First Responder (DFR). We pioneered the concept with our tech partner Cape Aerial Telepresence and have flown over 1,000 missions in support of priority 1 and 2 calls.

We've tried to share a lot of information on our public website:

<https://www.chulavistaca.gov/departments/police-department/programs/uas-drone-program>

Once you've had a chance to check out our program on our website, we can chat and I can fill in the gaps. Any proposed documentary or filming of our program would need to be vetted and approved by my Chief and our City attorney, but I can at least get an idea of what your thoughts or proposal may be. Chula Vista is in the Pacific Time Zone so we'll need to coordinate a time to follow up.

FYI, I've also copied Kabe Termes with Cape and Retired CVPD Captain Fritz Reber, both of whom are experts in the area you are exploring.

Warm regards,

Vern

Subject: Drone Police - Documentary Series

Warning:
External
Email

Dear Sir/Madam,

I am writing to you from CB films, an award-winning production company based in London. We are currently developing a factual series that documents the use of drones/UAVs in modern police operations.

At the moment I am reaching out to different police and enforcement authorities across the states to find out what they are using drones for and how effective it is proving,

I spoke to Trooper Brian Hon of the Arizona Department of Public Security about their use of UAVs and he was incredibly helpful and enthusiastic. He recommended we contact you as he suggested you are using drones for both fire fighting and policing.

Eventually we would like to work alongside a select few departments, with a crew spending some time filming their operations to shine a light on how drones are revolutionising policing - especially by keeping officers out of harms way.

If anyone at Chula Vista PD would be willing to discuss your work with us please let me know and I will schedule a phone call.

Many thanks

Kirsty

US Air Force to Test Weapons Swarming Software in October

By The Editor on Sep 24, 2020 06:55 am

US Air Force researchers in October will test whether a software version of the service's developmental weapons swarm can make its way through a combat mission and reroute itself as conditions change. The demonstration is part of the Air Force Research Laboratory's Golden Horde initiative, a high-profile project to create munition swarms that autonomously work together [...]

Hello All,

Apologies for the delay in reaching out to all of you. We have been fairly committed to dealing with wildland fires in CA (plus COVID-19). It is my honor to be the moderator of this panel and I know time is of the essence. I know we are dealing with some substantial time differences but I'd like to schedule a time (that doesn't turn you sleep schedules upside down) soon. I believe an evening call from California would be a morning call for Mr. Wimsett (or vice versa). Please advise your availability to chat about this important topic. My schedule is flexible all next week and I would make myself available at your convenience. I am really looking forward to better understanding how your agencies have garnered support for your programs and the challenges you have faced (plus the beneficial use cases). I believe with all of your experience we can put together a meaningful panel discussion/presentation. Hope to talk to you all soon.

Sincerely,

Tom Madigan

 Email**

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this

year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one fo the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPOENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still

need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)

- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

All,

We look forward to this Friday's meeting of the State, Local, Tribal, and Territorial UAS Working Group. During this meeting, we will discuss development of the second deliverable – *outreach materials for the community*. Please come prepared to discuss the most effective way to share information about your drone program with members of the community, including:

- The methods of outreach;
- The format of outreach materials;
- The targeted audience; and
- The topic areas covered.

The meeting agenda is attached. **To join the meeting, please click "Join Microsoft Teams Meeting" at the bottom of this email.**

Sincerely,

Lisa

Fantastic, that's great news! As soon as we receive the award, we'll record a video and send it. Is there any audio, will the chief be permitted to say “thank you” and we are honored to accept or should it simply be us with it waiving? Or we could send one of each an you folks decide on the production end? Thanks again for all the help and support!

Best,
Vern

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager

Subject: RE: AUVSI XCELLENCE Awards | Congratulations!

Hi Shannon, just curious, is there any chance that we could pre-record our "virtual acceptance" before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I'd hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don't want to seem ungrateful). She's been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,

Vern

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Subject: RE: AUVSI XCELLENCE Awards | Congratulations!

Good morning Shannon,

Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for ***Drone as a First Responder (DFR) Program*** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Fantastic, that's great news! As soon as we receive the award, we'll record a video and send it. Is there any audio, will the chief be permitted to say “thank you” and we are honored to accept or should it simply be us with it waiving? Or we could send one of each an you folks decide on the production end? Thanks again for all the help and support!

Best,
Vern

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager

Hi Shannon, just curious, is there any chance that we could pre-record our “virtual acceptance” before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I'd hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don't want to seem ungrateful). She's been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,
 Vern

Enterprise Grade Security for Enterprise UAS Operations

On Demand

Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Additionally, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most valuable data one can collect.

Attendees for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Emerging Tech Showcase II

On Demand

Drone technology and its capabilities are changing constantly with new features, products, and services designed to make work safer, faster, cheaper, and better. Stay up to date on what is new and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Improving Drone Productivity by Smart Edge Data Processing

On Demand, October 1, 2020 | 10:00AM - 11:00AM Eastern Time

Processing of sensor data (IMUs, Cameras, ToF, lidars, etc.) in drones significantly consumes battery. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video, point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

On Demand, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Hello All,

Apologies for the delay in reaching out to all of you. We have been fairly committed to dealing with wildland fires in CA (plus COVID-19). It is my honor to be the moderator of this panel and I know time is of the essence. I know we are dealing with some substantial time differences but I'd like to schedule a time (that doesn't turn you sleep schedules upside down) soon. I believe an evening call from California would be a morning call for Mr. Wimsett (or vice versa). Please advise your availability to chat about this important topic. My schedule is flexible all next week and I would make myself available at your convenience. I am really looking forward to better understanding how your agencies have garnered support for your programs and the challenges you have faced (plus the beneficial use cases). I believe with all of your experience we can put together a meaningful panel discussion/presentation. Hope to talk to you all soon.

Sincerely,

Tom Madigan

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one fo the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available at: [https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20 On Demand Video Submission Instructions v3.pdf](https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20%20On%20Demand%20Video%20Submission%20Instructions%20v3.pdf) While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPONENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted

via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

Hi Vern,

Based on the message below, I believe Tom Madigan is coordinating the panel directly with you and Paul based on this statement:

Please advise your availability to chat about this important topic. My schedule is flexible all next week and I would make myself available at your convenience. I am really looking forward to better understanding how your agencies have garnered support for your programs and the challenges you have faced (plus the beneficial use cases). I believe with all of your experience we can put together a meaningful panel discussion/presentation. Hope to talk to you all soon.

Let me know if you need me to jump in.

Thanks,

CHRISTOPHER TODD CEM, FPEM
 Executive Director

Hello All,

Apologies for the delay in reaching out to all of you. We have been fairly committed to dealing with wildland fires in CA (plus COVID-19). It is my honor to be the moderator of this panel and I know time is of the essence. I know we are dealing with some substantial time differences but I'd like to schedule a time (that doesn't turn you sleep schedules upside down) soon. I believe an evening call from California would be a morning call for Mr. Wimsett (or vice versa). Please advise your availability to chat about this important topic. My schedule is flexible all next week and I would make myself available at your convenience. I am really looking forward to better understanding how your agencies have garnered support for your programs and the challenges you have faced (plus the beneficial use cases). I believe with all of your experience we can put together a meaningful panel discussion/presentation. Hope to talk to you all soon.

Sincerely,

Tom Madigan

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one of the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitting your on-demand video session are available at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPONENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted

via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

Increasing Drone Productivity by Smart Edge Data Processing

Thursday, October 1 | 10:00AM - 11:00AM ET

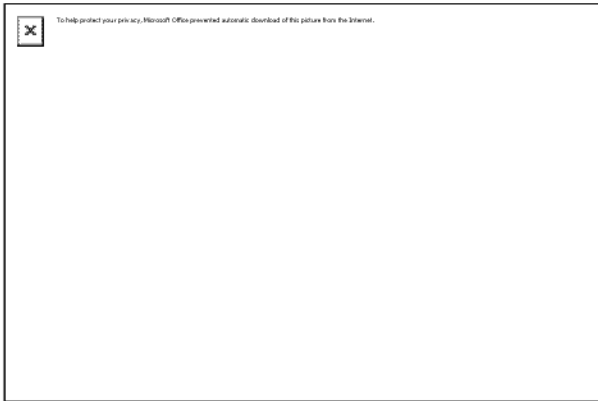

Processing of sensor data (IMUs, Camara's, ToF, lidars, etc.) in drones significantly consumes power. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video and 3D point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Top 5 Takeaways:

- **Improving Drone flight time and energy consumption**
- **Smart handling of large amount of drone-sensor data at the EDGE**
- **Improve AI model accuracy and continuously update model in the drone**
- **Process 10X more sensor data at the same processor**
- **Establish real-time transmission in low bandwidth conditions**

Hi Vern,

Thank you so much for your arrangement.

Congratulations on your retirement!(My 25th anniversary was last year·)

Although I would like to meet you in person, I think you are spending very busy days before your retirement. So, if Lt. Redmond can arrange for me, I would like to visit him in the middle of October.

I am sorry for bothering you, but please let me know about his schedule.

Hi Yoshi,

We would be honored to have you visit. I'd like to let you know that I'm retiring on October 2nd after 25 years with the department. I'll be going to Axon Air to help with their drone program. If you need to reach me after October 2nd, you can email me at **PERSONAL/PRIVACY** or hit me up on linkedin.

Lt. Don Redmond will be leading the drone program and can make arrangements for your tour. He is copied on this email and will be glad to help.

Safe travels!

Best,
Vern

Dear Vern,

How are you doing?
I hope everything is going well with you.

I apologize for not contacting you since May.
In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department.
Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

No problem at all Yoshi, happy to help our international friends. When you visit, we could see if you could visit the Tijuana, Mx Police Department to see their operation as well (they are only 10 miles from us but across the border) . Here are a couple videos produced by my friend Anders Martinsen with UAS Norway on Tijuana PD's program and our program. They should give you a good sense of how impactful DFR can be.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you...

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system. I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached. But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,

Vern

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,
Yoshimi Yanai

Dear Vern,

Congratulations on retirement! 25 years is an incredible accomplishment.

We've just published the article which you can see here: <https://enterprise-insights.dji.com/blog/dji-airworks-2020-breakouts-drone-as-a-first-responder>

I wish you all the best with your new role at Axon Air and hope you'll keep DJI and www.enterprise-insights.dji.com on your radar!

Best,
Toby

Hi Toby, thanks for connecting. Your blog content looks great and is an excellent summary of our program. Here are a few other pictures should you wish to use them for the banner. Thanks for thinking of us! BTW, I'll be retiring on October 2nd after 25 years of service with CVPD. I'll be taking on the Lead Strategist role for Axon Air, so I will continue to be involved in the public safety drone space.

Best regards,
Vern

Dear Vern,

Just following up on this earlier email- have you had a chance to review the article my team has written about your AirWorks presentation?

Best,
 Toby

Subject: AirWorks 2020 blog about your session

Dear Vern,

I hope you had a great time at AirWorks and found it rewarding and interesting. I just watched the recording of your presentation and found it very educational!

My team has written an article about your breakout session that we'd like to eventually publish on our blog enterprise-insights.dji.com.

Here's a link to a draft: https://enterprise-insights.dji.com/blog/dji-airworks-2020-breakouts-drone-as-a-first-responder?hs_preview=qEMXUMck-34898108303. (This is a preview version so it is not published or live, and can only be accessed by this link)

As you can see most of the images in the article are screenshots of your AirWorks presentation. Do you have any other pictures that you would prefer I share in the article? For example, the banner image at the top is a bit bland- I was wondering if you had a better picture you could share?

Also, do you have any feedback on the article, or would you like me to make any changes?

Looking forward to your reply!

Best,
Toby Knisely

Dear Vern,

Congratulations on retirement! 25 years is an incredible accomplishment.

We've just published the article which you can see here: <https://enterprise-insights.dji.com/blog/dji-airworks-2020-breakouts-drone-as-a-first-responder>

I wish you all the best with your new role at Axon Air and hope you'll keep DJI and www.enterprise-insights.dji.com on your radar!

Best,
 Toby

Hi Toby, thanks for connecting. Your blog content looks great and is an excellent summary of our program. Here are a few other pictures should you wish to use them for the banner. Thanks for thinking of us! BTW, I'll be retiring on October 2nd after 25 years of service with CVPD. I'll be taking on the Lead Strategist role for Axon Air, so I will continue to be involved in the public safety drone space.

Best regards,
 Vern

Subject: DEADLINE APPROACHING - Complete IACP 2020 Speaker Tasks

Categories: Green Category

Warning:
External
Email

Dear William Sallee,

Thank you for participating in IACP 2020 as a speaker. Attendees are looking forward to learning from your insight and expertise. Below please find your workshop details, login credentials to access the Speaker Portal, and additional information as you finalize preparations for IACP 2020.

Wednesday, October 21

Session: 5128 - *Nuts and Bolts: How to Launch Your Drone Program*

Type: Simulative Workshop

Time: 1:45 PM - 2:30 PM

Role: Secondary Presenter

Description: Unmanned Aerial Systems (UASs) are a revolutionary resource for law enforcement. UASs enhance the public safety, save money, keep officers safe, improve search and rescue, and ultimately save lives. However, launching a drones program requires the engagement of a multitude of stakeholders, including the federal government. In order to meet the challenges of 21st-century technology in law enforcement, the COPS Office stood up a UAS Working Group specifically for State, Local, Tribal and Territorial departments. This workshop will include information straight from the FAA and the NIJ and peer departments. Participants will walk away with the most up-to-date information available from the foremost experts in their field.

Speaker Portal Website: <https://ww2.aievolution.com/icp2001/>

Username: wsallee

If you have forgotten or need to setup your password, please click the password link and the login screen for assistance.

Important Information:

- **Upload Your Headshot and Bio:** Access the Speaker Portal using the above credentials to provide your headshot and a brief bio no later than September 29. These will be displayed within the mobile app and online event platform. If this information is not uploaded, your bio will be left blank and a blank, nondescript avatar will appear in place of your photo.
- **Workshop Handouts:** You are welcome to upload handouts via the Speaker Portal to share with IACP 2020 attendees. Files should be no larger than 2MB and will only be accepted in Adobe PDF format. A maximum of (5) handouts is permitted per workshop. Handouts must be uploaded no later than Tuesday, September 29 to display in the mobile app and online event platform. As handouts must be approved by IACP staff to be visible online, please allow 1-2 days for your handout to show in the mobile app.

•Speaker Registration: Speaker registration is available via [this link](#) . All speakers associated with a simulative format workshop are required to register as you are expected to be present during your workshop broadcast time for attendee interaction and Q&A. While speakers associated with an on-demand format workshop are not required to register, please note that registering for the event is the only way to gain access to the platform or any content during or after IACP 2020. The early-bird discounted rate has been extended to IACP member speakers. Speakers who are not IACP members may receive complimentary registration for the event. Please complete registration no later than October 2. Speakers may use the main event registration link found on the IACP 2020 website. The registration site will prompt you to answer a question indicating if you are a speaker.

Thank you once again for the value you bring to IACP 2020. We encourage you to work with your workshop submitter/point of contact regarding any questions you may have regarding IACP 2020, yet you are always welcome to email inquiries to IACP2020Speakers@theIACP.org.

Sincerely,

Lena L. Timmons, CMP

Subject: RE: AUVSI XCELLENCE Awards | Congratulations!

Fantastic, that's great news! As soon as we receive the award, we'll record a video and send it. Is there any audio, will the chief be permitted to say "thank you" and we are honored to accept or should it simply be us with it waiving? Or we could send one of each an you folks decide on the production end? Thanks again for all the help and support!

Best,
Vern

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager
Association for Unmanned Vehicle Systems International | 2700 South Quincy Street, Suite 400, Arlington, VA 22206

Hi Shannon, just curious, is there any chance that we could pre-record our "virtual acceptance" before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I'd hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don't want to seem ungrateful). She's been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,
Vern

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Good morning Shannon,

Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
Vern

Vern Sallee

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for **Drone as a First Responder (DFR) Program** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)

- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Skydio X2D™ is the Ultimate Tool for the Armed Forces and Public Sector – Here’s Why.

Organic unit-level ISR:

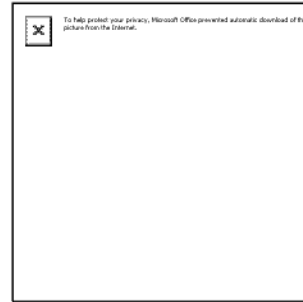

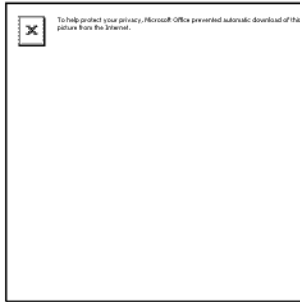

How Skydio drones and AI-driven autonomy ensure mission success

Tuesday, September 29th

1:00PM EDT

REGISTER NOW

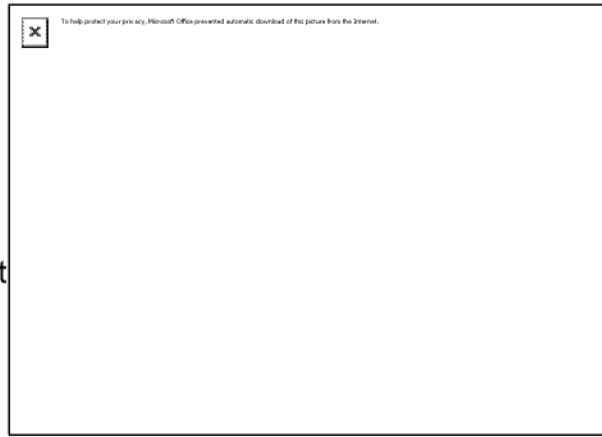

Learn more about the security, sensors, and functionality of Skydio's X2D in Skydio's [upcoming webinar](#), hosted by Chuck McGraw and Guillaume Delepine.

Chuck McGraw, Director of Public Sector Sales, joins Skydio after 20 years as an elite SEAL Team leader, holding the positions of Assault Squadron Operations Chief, Basic Training Command Operations Chief, Master Training Specialist, Senior Program Manager and Assault Team Leader. His twenty-year career included eleven combat deployments.

Guillaume Delepine is Product Marketing Manager at Skydio, the leading U.S. drone manufacturer and world leader in autonomous flight. In his tenure at the company, he previously led Skydio's efforts to serve first responders as Public Safety lead. Then, as Enterprise Strategy Manager, Guillaume contributed to the fundraising, planning, and hiring process that led to Skydio's recent announcements of a \$100M Series C, expanded roadmap, and growing executive team. Guillaume holds a BA from Princeton University, and took leave of the joint MPP/MBA program at Harvard University to join Skydio.

Skydio's next level autonomy has been making waves in the drone industry since the CA-based company introduced their first aircraft in 2018, the culmination of development that began with the founders' graduate work at

MIT. The Skydio Autonomy™ engine and deep learning algorithms that allow Skydio aircraft to avoid obstacles, follow targets, and understand the environment make the recently announced Skydio X2D the ultimate tool for the armed forces and public sector.

Skydio Autonomy means that public sector agencies can get up and running effectively – fast. With 360 degree situational awareness and obstacle avoidance, pilots can focus on their missions without a long learning curve to perfect their flying skills. It's an advance in ease of use that makes the X2D the most effective small UAS yet for broad use in the armed forces.

Designed and assembled in the U.S., the Skydio X2D is listed on the U.S. Department of Defense (DoD) "[Blue sUAS](#)" list – drones approved as "trusted and secure" for use by U.S. government agencies. Skydio X2D was developed with the collaboration of the Defense Innovation Unit of the DoD to meet the specific security and functionality needs of government agencies. Equipped with color and thermal sensors, a ruggedized, foldable airframe, and extended wireless range of up to 10km, the X2D is designed to accommodate a wide variety of missions both in daylight and at night.

Hello All,

Apologies for the delay in reaching out to all of you. We have been fairly committed to dealing with wildland fires in CA (plus COVID-19). It is my honor to be the moderator of this panel and I know time is of the essence. I know we are dealing with some substantial time differences but I'd like to schedule a time (that doesn't turn you sleep schedules upside down) soon. I believe an evening call from California would be a morning call for Mr. Wimsett (or vice versa). Please advise your availability to chat about this important topic. My schedule is flexible all next week and I would make myself available at your convenience. I am really looking forward to better understanding how your agencies have garnered support for your programs and the challenges you have faced (plus the beneficial use cases). I believe with all of your experience we can put together a meaningful panel discussion/presentation. Hope to talk to you all soon.

Sincerely,

Tom Madigan

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one of the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all

participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPOENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted

via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week

of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPONENTIAL 2020!

Sincerely,

Chris

Tom/Vern,

Sorry to press, but we are going to need to expedite this video for it to make it into the event. If we don't have it by Noon eastern on Friday it is highly unlikely that the production team will have enough time to get it prepared and uploaded to the platform.

I sincerely appreciate everything you are both doing to pull this together. Thank you!

Skyward granted waiver to conduct drone inspections near Big Hollow wildfire in Washington AUVSI (9/24/2020)

Skyward, a Verizon company, has been awarded a temporary waiver from the FAA that allows its pilots to fly the Percepto Sparrow drone from their homes to inspect critical communications infrastructure near the Big Hollow wildfire in Washington. The waiver permits operations 24 hours a day, with less than three miles of visibility, and no pilot or observer on site.

TuSimple, TRATON Group partner to develop self-driving trucks AUVSI (9/23/2020)

TuSimple has entered into a global partnership with the TRATON Group to develop self-driving trucks. TRATON and TuSimple have launched a development program to operate the first SAE level 4

autonomous hub-to-hub route between Södertälje to Jönköping in Sweden using TRATON's Scania trucks.

INDUSTRY NEWS

Skydio partners with EagleView for autonomous residential roof inspections via drone
TechCrunch (9/28/2020) Etherington, Darrell

Skydio has announced plans to work with EagleView to deploy automated residential roof inspections using Skydio drones, with service initially provided via EagleView's Assess product. The inspections will first be conducted in the Dallas/Ft. Worth area of Texas.

GA-ASI conducts captive carry Sparrowhawk sUAS flight demonstrations
AUVSI (9/28/2020)

From Sept. 16 to 17, General Atomics Aeronautical Systems Inc. conducted captive carry Sparrowhawk small UAS flight demonstrations. Designed as an airborne launch and recovery demonstrator aircraft tailored to fit GA-ASI platforms, the Sparrowhawk aircraft focuses on Advanced Battle Management System's attritableONE technologies.

Walmart piloting drone delivery of at-home COVID-19 self-collection kits
AUVSI (9/24/2020)

Walmart announced this week that it will pilot drone delivery of at-home COVID-19 self-collection kits, which is a new way to provide additional, and contactless, testing options. Walmart has partnered with an American clinical laboratory called Quest Diagnostics and drone services provider

DroneUp to launch trial deliveries of collection kits in North Las Vegas and Cheektowaga, New York.

AUVSI encourages USDOT to hold fast to intended Dec. 2020 release of rulemaking on Remote ID for UAS

AUVSI Advocacy

This week, AUVSI joined with the Consumer Technology Association (CTA) and the U.S. Chamberâ€™s Technology Engagement Center (C_TEC) to encourage the U.S. Department of Transportation (DOT) to hold fast to the intended December 2020 release of the rulemaking on Remote Identification (ID) for unmanned aerial systems (UAS). The industry groups called on U.S. DOT Secretary Elaine Chao and Federal Aviation Administration (FAA) Administrator Steve Dickson to continue with a timely rulemaking process, given the ruleâ€™s critical step in future UAS regulation and broader industry growth. The letter went on to note that the rule should be performance based, stating, â€œGiven our broad scope of stakeholders across many sectors of our economy, we understand the importance of allowing UAS technology to evolve and grow, and not to have growth hindered by prescriptive regulatory requirements. As such, we also urge the Department to support a final rule that sets performance requirements, rather than specifying particular solutions for Remote ID compliance.â€ To view the letter, please [click here](#).

DroneUp and partners successfully test autonomous drone delivery
AUVSI (9/29/2020)

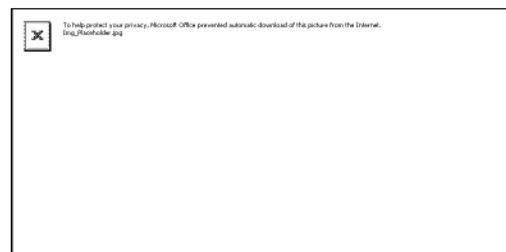

In partnership with North Atlantic Treaty Organization Allied Command Transformation, Joint Force Development Directorate, Operational Experimentation branch, DroneUp conducted an experiment on Sept. 21 in Lawrenceville, Virginia that was designed to determine if autonomous delivery of a specified payload to identified recipients under field conditions could be proven viable. For the operational experiment, DroneUp provided a patent-pending technology delivery solution and experiment execution.

AirMap awarded contract to provide UTM service to USAF's Agility Prime program AUVSI (9/23/2020)

AirMap has been awarded a contract to provide UAS traffic management services to the United States Air Force's Agility Prime program. In preparation for scaling of advanced air mobility operations, the USAF will use AirMap's UTM platform to support testing of electric vertical takeoff and landing aircraft.

AIRBORNE UNMANNED

The September 30 edition of Airborne Unmanned

The FAA has made it easier for drone pilots to quickly and safely access controlled airspace by adding 133 air traffic facilities to the Low Altitude Authorization and Notification Capability system. The Drone Racing League has announced their 2020 DRL Allianz World Championship Season and their first-ever Drone Racing League Simulator on Xbox. All this and more in the September 30 edition of Airborne Unmanned.

Importance: High

Warning:
External
Email

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one fo the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitted your on-demand video session are available at: [https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20 On Demand Video Submission Instructions v3 .pdf](https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20%20On%20Demand%20Video%20Submission%20Instructions%20v3.pdf) While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or**

earlier. This will allow the AUVSI XPOENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPOENTIAL moderators and speakers are posted via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPOENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT** -- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI XPOENTIAL 2020!

Sincerely,

Chris

Hi Yoshi,

We would be honored to have you visit. I'd like to let you know that I'm retiring on October 2nd after 25 years with the department. I'll be going to Axon Air to help with their drone program. If you need to reach me after October 2nd, you can email me at vernsallee@me.com or hit me up on linkedin.

Lt. Don Redmond will be leading the drone program and can make arrangements for your tour. He is copied on this email and will be glad to help.

Safe travels!

Best,

Vern

Dear Vern,

How are you doing?

I hope everything is going well with you.

I apologize for not contacting you since May.

In the mean time, I have been in contact with the FAA and have done some research on law enforcements that have drone systems.

As you know, residents in New York and New Jersey State had not been allowed to travel to California without a 14-days quarantine, but yesterday, it was cancelled by the State of the New York.

If you are available, I should like to visit you and see the advanced UAS system of the Chula Vista Police Department.

Would you arrange it for me?

May I thank you for all your help in anticipation of visiting Chula Vista.

Please let me know your current situation.

Hi Vern,

I truly appreciate your quick reply. I am sorry for letting you spend your precious time but your information is very helpful to me.

In recent years, the usefulness of drones has been recognized, and last year the Japanese government decided to deploy drones at the fire department headquarters in each prefecture.

As for PD, so far, we are mostly using drones to search for missing people in the event of disaster or to capture illegally flying drones at security sites.

To deploy them for 911 calls is very challenging for us, but I want to survey some successful practical examples for the near future.

Anyway, thank you so much again, and I really looking forward to meeting you

Sincerely, Stay healthy,

Yoshi

Hi Vern,

Thank you so much for giving me useful document regarding your UAS system.

I read thoroughly it, and I understand you had lots of challenges getting this system started. Especially about community outreach, I think it was very difficult for you to have resident's agreement and explain to them the necessity of drone programs.

I am very sorry to disturb your busy job, but please let me ask you some questions this time as attached.

But if you don't want to answer some of questions, please do not hesitate to reject them.

And I attached my background as your reference.

Have a good weekend and holiday!

Good morning Yoshi,

Thank you for touching base and I am glad you are well. We continue operations from two sites (2,365 missions as of today) and believe we are close to FAA approval to expand to the entire city (52 square miles).

Since we last communicated, two other interesting articles have been published that you may find interesting. One is my article on DFR in Police Chief Magazine which gives a fairly in-depth overview. The other is a document on police drones published by the Police Executive Research Forum this week. It discusses best practices on establishing police drone programs as recommended by a broad group of police professionals with expertise in the area. See the attachment for my article and the link below for the PERF guide book.

<https://www.policeforum.org/assets/Drones.pdf>

Hopefully things will return to a more normal state soon and you will be able to visit. We will be glad to show you our program. Stay well!

Warm regards,

Vern

Dear Vern,

How are you doing?

I suppose you and your colleagues are working very hard in front line, I hope you are staying healthy and everything is doing well.

The situation of NY is getting better, but it seems that it will take a while to lift the curfew.

As for me, I have been forced to be Pause at home since middle of March.

I know your county and municipality are also in difficult time, but I believe we can regain peaceful days in the near future.

I'd like to visit you soon, but I'm very sorry that I can not schedule for now.

Please let me keep in touch!

Thank you so much Vern & Don,

All right, I'll let you know when I have a specific date.

And there is one thing I have to tell you, my English skill is not fluent, but I really want to build a good relationship with you in the future. So, please let me know if my meaning is not clear.

Have a good weekend!

Yoshimi

Good afternoon Captain Vern and Lt. Don,

I appreciate your quick reply and thank you very much for accepting my request.

Let me introduce myself in more details. I have been a police officer for more than 25 years in Tokyo. In the meantime, I belonged to the Uniform Division, Investigative Division and Crime Prevention Division, and my main role in Tokyo was to create measures to prevent crimes. I know the main division to use the UAS system is the Patrol Division, but I am eager to know how it is handled and find out how it can be used for crime prevention for residents.

I would like to make a plan to visit you alone in May or June if you are available around this time. Would it suit you?

And I want you ask you some questions by e-mail before visiting you if you don't mind. Is it possible?

Warm regards,

Yoshimi

Good morning Yoshimi,

Thank you for reaching out to us about our drone program. We would be happy to give you a tour of our operations and discuss challenges and lessons learned. I am copying Lt. Don Redmond, who manages the program. I am the captain in charge of the patrol division and oversee UAS operations so either of us can help you. Did you have a timeline in mind for your visit and would it just be your or others?

Warm regards,

Vern

To Whom It May Concern:

How do you do?

My name is Yoshimi Yanai. I am a police officer of the Tokyo Metropolitan Police Department in Japan. I have been assigned to Japan Local Government Center in New York since last April.

I attended the last International Association of Chiefs of Police in Chicago, and I fortunately could take your Unmanned Aerial System (UAS) session which was held by your department. By listening to your lecture, I am very interested in it, and I have noticed the positive impact of using a drone on police operations.

I suppose that you overcame lots of difficulties to start your UAS system. I already read your website regarding the system, but if possible, I would like to visit your department and meet someone who is in charge of it.

I would appreciate it if you could help me set up an opportunity to learn more about your system.

If you have any questions or require more information, please do not hesitate to contact me.

Sincerely,

Yoshimi Yanai

BIO:

Captain Vern Sallee is a 25 year veteran of the Chula Vista Police Department. In December 2014, he was promoted to captain where he commanded the Support Operations division and subsequently the Investigations division. In May 2018 he was placed in command of the Patrol Operations division and is second in command to the Chief of Police.

Captain Sallee established CVPD's drone program in January 2016 and since October 2018, Captain Sallee has led a significant expansion CVPD's UAS program known as Drone as a First Responder (DFR) as part of the Federal Aviation Administration's UAS Integration Pilot Program (IPP). CVPD's groundbreaking DFR program has been recognized nationally as a revolutionary public safety model which provides real-time video and decision quality data to officers on routine calls for service.

Captain Sallee is a subject matter expert with the Office of Community Oriented Policing (COPS Office) UAS Working group, to help develop guidance for police agencies to effectively use UAS technology to enhance public safety, while also protecting the public from the malicious use of UAS. He has also represented CVPD as a presenter and subject matter expert on police use of drones at the FBIAA national conference, the IACP technology conference, the IACP national conference and numerous other UAS and public safety forums.

Captain Sallee has a Master of Science Degree in Administrative Studies with a criminal justice emphasis from Missouri State University and a bachelor's degree in psychology from San Diego State University. He is a graduate of the Los Angeles Police Department Leadership Program, California P.O.S.T. Command College (Class 53) and the FBI National Academy (Class 270). He has been published in Police Chief Magazine and is a former adjunct community college instructor; having taught police ethics, forensic photography and police community relations.

Importance: High

**Warning:
External
Email**

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one of the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitting your on-demand video session are available at: https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20_On_Demand_Video_Submission_Instructions_v3.pdf While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPOENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPOENTIAL moderators and speakers are posted via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPOENTIAL and are working furiously to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT -**
- <https://us02web.zoom.us/j/83823968516>
 - Add to your calendar with this [Calendar Invitation](#)

- **Wednesday: 9/23 – 11:00am – 12:00pm EDT -**
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AUVERSI XPONENTIAL 2020!

Sincerely,

Chris

Fantastic, that's great news! As soon as we receive the award, we'll record a video and send it. Is there any audio, will the chief be permitted to say "thank you" and we are honored to accept or should it simply be us with it waiving? Or we could send one of each an you folks decide on the production end? Thanks again for all the help and support!

Best,
 Vern

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager

Hi Shannon, just curious, is there any chance that we could pre-record our “virtual acceptance” before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I’d hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don’t want to seem ungrateful). She’s been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,
Vern

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that’s quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we’ll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Good morning Shannon,

Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for **Drone as a First Responder (DFR) Program** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager
Association for Unmanned Vehicle Systems International | 2700 South Quincy Street, Suite 400, Arlington, VA 22206

Subject: RE: AUVSI XCELLENCE Awards | Congratulations!

Good morning Shannon,
 Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue

Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
Vern

Vern Sallee

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for **Drone as a First Responder (DFR) Program** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)

- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Inspection at Scale - How to Build a Mission-Critical Drone Inspection Program

Wednesday October 14 | 11:00AM - 12:00PM ET

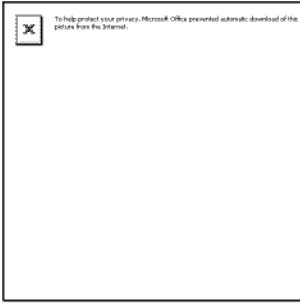

Making the jump from dabbling in drones to running a full-fledged drone program is a challenge. Managing large drone and pilot fleets across geographies, time zones, and even use cases can easily overwhelm program managers and stunt program growth. Join our webinar to learn best practices and pitfalls from drone industry veterans who can set you on the right path to scale the impact of your drone program.

In this webinar, we'll discuss:

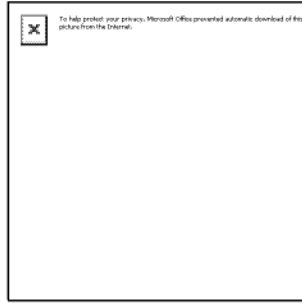

- Best practices and lessons learned from building large programs
- The factors that prevent many nascent drone programs from scaling
- How Skydio Autonomy makes it easier than ever to grow your program

Subject: Counter UAS/UAV Operations

Warning: External Email
--

Good morning Captain,

I hope all is well with you and you are having a great week thus far.

The reason for my email is counter UAV/UAS operations. As the program lead for CVPD you understand the importance of drones and what they can do. But what about what they can do against Law Enforcement agencies?

During these times of civil unrest, protestors are using drones to spy on departments deployments in their "back lots". Several agencies in the LA area have reached out for a solutions to this problem.

Shore Solutions has partnered with a LA based company to provide counter UAV/UAS solutions. The Drone Killer is a system that interrupts the GPS signal for a drone which makes the drone perform a controlled landing.

This system has been used by police departments for protests as well as special events where large crowds are gathered, similar to a concert at the amphitheater, to provide counter drone operations. This system has also been tested by Air Force Security Forces that are charged with the protection of the nations most valuable asset, its nuclear missile fields.

Please let me know if you would be interested in a demo of the Drone Killer. I can bring a unit by and show you its 1100 meter effective range.

Thank you for your time and I look forward to speaking with you!

Hello All,

Apologies for the delay in reaching out to all of you. We have been fairly committed to dealing with wildland fires in CA (plus COVID-19). It is my honor to be the moderator of this panel and I know time is of the

essence. I know we are dealing with some substantial time differences but I'd like to schedule a time (that doesn't turn you sleep schedules upside down) soon. I believe an evening call from California would be a morning call for Mr. Wimsett (or vice versa). Please advise your availability to chat about this important topic. My schedule is flexible all next week and I would make myself available at your convenience. I am really looking forward to better understanding how your agencies have garnered support for your programs and the challenges you have faced (plus the beneficial use cases). I believe with all of your experience we can put together a meaningful panel discussion/presentation. Hope to talk to you all soon.

Sincerely,

Tom Madigan

Greetings,

Thank you for agreeing to support the DRONERESPONDERS Global Public Safety UAS Summit at AUVSI's XPONENTIAL by appearing as a speaker for our 2020 virtual program! We are extremely excited for this year's event, which will allow us to showcase thought leaders and unmanned systems subject matter experts from around the world.

The session we have you slated for is:

TITLE: Winning Hearts and Minds to Support Law Enforcement Drone Operations

SYNOPSIS: *Garnering community support for public safety drone programs is one of the most challenging tasks facing law enforcement. Learn how these agencies have won hearts and minds.*

MODERATOR: Thomas Madigan, Commander, Alameda County Sheriff's Office, California (United States)

SPEAKER: Paul Wimsett, Chief Remote Pilot, Western Australia Police Force (Australia)

SPEAKER: Vern Sallee, Captain, Chula Vista Police Department, California (United States)

Your session will be a 45-minute recorded session available on demand throughout the entire conference. This will allow you to assemble virtually at a date/time that is mutually agreeable to all participants to record your session. There will be no need for a question and answer session since conference attendees will be viewing this session at various times in the on demand format.

Instructions for submitting your on-demand video session are available

at: [https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20 On Demand Video Submission Instructions v3.pdf](https://www.xponential.org/xponential2020/CUSTOM/pdfs/XPO20%20On%20Demand%20Video%20Submission%20Instructions%20v3.pdf) While the stated deadline for submitting content of Friday, September 11 is no longer feasible at this time, **we do ask that you act promptly to coordinate your session with a target upload date of Monday, September 28 or earlier.** This will allow the AUVSI XPONENTIAL production team enough time to review the video and troubleshoot any outstanding issues.

Additional tips and guidelines for AUVSI XPONENTIAL moderators and speakers are posted

via: <https://www.xponential.org/xponential2020/public/Content.aspx?ID=3333#materials>

Finally, The AUVSI production team is inviting you to join them virtually to help further prepare for this event. They will be holding three virtual sessions as follows for moderators and speakers who wish to learn more about the production elements behind this year's event:

We are getting very excited about XPONENTIAL and are working furiously

to ensure the virtual event is engaging and runs smoothly. In preparation for the event, we would like to offer you the opportunity to meet with our Production team to review some important elements:

- Overall best practices for pre-recorded and live presentations
- List of what you will receive prior to the event
- Day-of process/logistics
- Live Q&A with AUVSI staff and the Production team
- *On 9/22 and 9/23 – we hope to walk you through the event platform to help you get familiar with engagement opportunities and navigating the event from the attendee perspective.

During the event, our teams will ensure logistics are handled and you can focus solely on your content. That said, we want to ensure you are comfortable with the logistics and are ready to present during the first week of October and these sessions will ensure you are equipped with necessary information and comfortable with the process. You will still need to finalize your presentation, time your remarks prior to the event, and coordinate with other panelists (if applicable) to ensure you are comfortable with content flow.

Please join us for one of the following PREP sessions:

- **Tuesday: 9/22 – 1:00pm – 2:00pm EDT** -
- <https://us02web.zoom.us/j/83823968516>

- Add to your calendar with this [Calendar Invitation](#)
- **Wednesday: 9/23 – 11:00am – 12:00pm EDT -**
- <https://us02web.zoom.us/j/89957706356>
 - Add to your calendar with this [Calendar Invitation](#)

Sorry for the information dump — I realize I just bombarded you with a ton of copy. However, it seems better to have this all in one email rather than spread out across multiple messages that you have to refer back to. Consider this your main reference document at this point.

Please contact Shannon, Jenny (copied) or myself with any question you may have. Again, thank you for your support of the DRONERESPONDERS Global Public Safety UAS Summit at AU VSI X P O N E N T I A L 2020!

Sincerely,

Chris

Subject: Counter UAS/UAV Operations

<p>Warning: External Email</p>

Good morning Captain,

I hope all is well with you and you are having a great week thus far.

The reason for my email is counter UAV/UAS operations. As the program lead for CVPD you understand the importance of drones and what they can do. But what about what they can do against Law Enforcement agencies?

During these times of civil unrest, protestors are using drones to spy on departments deployments in their "back lots". Several agencies in the LA area have reached out for a solutions to this problem.

Shore Solutions has partnered with a LA based company to provide counter UAV/UAS solutions. The Drone Killer is a system that interrupts the GPS signal for a drone which makes the drone perform a controlled landing.

This system has been used by police departments for protests as well as special events where large crowds are gathered, similar to a concert at the amphitheater, to provide counter drone operations. This system has also been tested by Air Force Security Forces that are charged with the protection of the nations most valuable asset, its nuclear missile fields.

Please let me know if you would be interested in a demo of the Drone Killer. I can bring a unit by and show you its 1100 meter effective range.

Thank you for your time and I look forward to speaking with you!

Good morning Sergio,

I also wanted to reach out as the current Patrol Operations Captain and drone manager. I am retiring tomorrow and going to work for Axon on their drone services. By all means feel free to give me a call next week and I can also give you advice. I built the DFR program and our overall drone program so I'll be able to give you advice... the guys here are pretty busy running the program and we get a lot of requests for advice. I promise I won't be fixated on my new employer. I'm not a sales person, I'll be their lead drone strategist so my job is to help build the public safety sector. My cell is **PERSONAL/PRI** feel free to call any weekday 0800-1700 PST.

Best regards,
Vern

Good Morning,

My name is Sergio Lerma Jr. I am an Officer for the University of Texas Rio Grande Valley. My co-worker, Officer Guadalupe Casanova, and I are working on integrating a Drone Program into our department. This is

something we decided to do ourselves as we've seen how beneficial this can be to a police department. This past June we both attended and passed a Part 107 course that we paid for ourselves. Officer Casanova purchased an EVO II and I a Mavic air 2 to teach ourselves how to fly. We submitted for a Daylight Operations Waiver, which we were both approved for. We have already signed up for a night training course that we will be taking soon.

We are working on a presentation to show our administration how a drone program can benefit our department. There is still a lot we are learning and I'm asking if there is any insight you can provide? Would you be able to share your programs policy or a standard operation procedure? We want to get this presentation right and any help would be appreciated. Thank you for your time.

Respectfully,

Sergio Lerma Jr

Increasing Drone Productivity by Smart Edge Data Processing

Thursday, October 1 | 10:00AM - 11:00AM ET

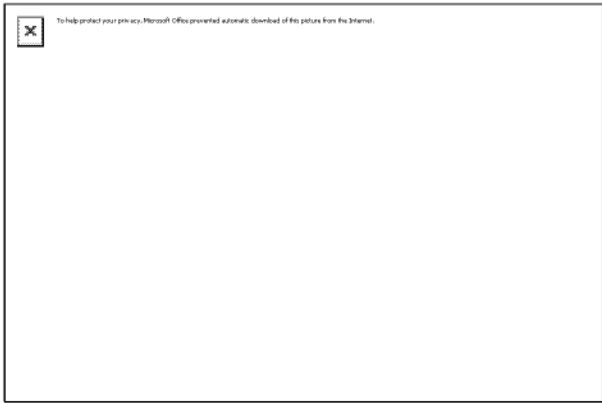

Processing of sensor data (IMUs, Camara's, ToF, lidars, etc.) in drones significantly consumes power. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video and 3D point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Top 5 Takeaways:

- **Improving Drone flight time and energy consumption**
- **Smart handling of large amount of drone-sensor data at the EDGE**
- **Improve AI model accuracy and continuously update model in the drone**
- **Process 10X more sensor data at the same processor**
- **Establish real-time transmission in low bandwidth conditions**

Dear Captain Sallee,

On behalf of Airavat Solutions and US Drone Fest, I am honored to invite you to be a keynote speaker at the **AZDroneFest and Education Expo**, to be held **October 22-24, 2020 (session will be pre-recorded according to your convenience)**. This all-virtual event is a comprehensive and affordable drone education program perfect for recreational, commercial and public safety drone pilots – and not just those in Arizona. This unique event will celebrate many facets of the drone industry, capped off with a special screening of aerial cinematography. This event will also help with Part 107 training and drone program assistance for those who cannot afford to pay or travel for national conferences.

Please find attached an official invitation letter. Your reply confirming your participation would be appreciated by October 11, 2020. You can find more information about the event on our Summit website: www.azdronefest.com

Thanks,

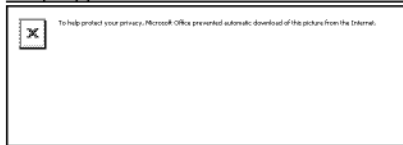

Darshan Divakaran

Good afternoon Ms. Sallee,

Thank you for your response!

Just wanted to clarify that the Aviation Committee Meeting will be a virtual meeting hosted via the IACP 2020 Virtual Training Event and Expo virtual platform. Unless the complimentary registration is given to Lt. Don Redmond, he will have to be registered to attend the meeting. My apologies for any confusion but let me know how you would like to proceed or if you have any questions!

Also, congratulations on your retirement! I will be on a lookout for any opportunities that come up that could use your expertise and experience.

Best,

Jackie Yin

Subject: RE: IACP 2020: Leadership Awards Update

Good afternoon Jackie,

Thank you again for this prestigious award from IACP, we are truly excited and honored to accept the award!

First, the proof of the physical award and the mailing address to Chief Kennedy are correct.

Second, Chief Kennedy will accept the complimentary registration. Her email is rkennedy@chulavistapd.org

Third, I'll be retiring October 2nd and Lt. Don Redmond will be taking over the drone program. Lt. Redmond would be our representative to attend the Aviation Committee. Thank you very much for the invitation!

Finally, I'll be working for Axon in retirement, but would be glad to assist IACP in any manner regarding drones as a subject matter expert if I am allowed to do so. My personal email is **PERSONAL/PRIVACY** if you need to reach me after Oct 2nd.

Warm regards,

Vern

Good afternoon,

As the IACP 2020 Virtual Training Event and Expo approaches, we have important updates regarding logistics for the IACP Leadership Award.

Virtual Ceremony: The 2020 IACP Leadership Award Virtual Ceremony will take place during the General Session on Friday, October 23, 2020, from 11:00 a.m. – 12:00 p.m. EDT.

Physical Award: We have attached your award proof to this email. Please review and confirm your award information and shipping address is listed correctly.

Registration: IACP will provide one complimentary registration for you or your designee to attend the IACP 2020 Virtual Training Event & Expo and virtual ceremony. Please provide us with the name and email address for the individual who is to receive the complimentary registration by October 1. Any additional people interested in attending will be required to register. For more information, visit www.theIACPconference.org.

Committee Meeting: Award winners are invited to attend the Aviation Committee annual meeting held on October 19, 2020 at 11:00 a.m. EDT. Please let me know if you are interested in attending the meeting by September 30, 2020.

We are here to assist you throughout the coming weeks. Feel free to reach out to me if you have questions or need anything throughout this process. I look forward to working with you.

Best regards,

Jackie Yin

Stay up to date on what is new and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Improving Drone Productivity by Smart Edge Data Processing

Command

Processing of sensor data (IMUs, Cameras, ToF, lidars, etc.) in drones significantly consumes battery. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video, point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

Friday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Vern,

I will try and call you this afternoon (I have been assigned baby duty). Are you interested in both the panel and keynote ? I am totally fine with that. The panel is going to discuss how to build a successful drone program, about your programs, best practices and other advice.

The keynote can be focused on public safety, possibly IPP initiatives you led, technology guidance to agencies, etc.

You have a wealth of knowledge so having you on both the panel and keynote will be amazing.

Thanks,

Darshan Divakaran

Hi Darshan,

Thank you very much! Give me a call at **PERSONAL/PRI** this afternoon if you want and we can discuss the keynote and the panel. I'll need to clear both through my new boss and employer but it should not be a problem. If I can't do one or both, I'll link you in with Captain Don Redmond. If I'm on the panel, I can assure you that I will be product agnostic and just discuss the benefits to public safety.

Best,

Vern

Hi Verne,

Great timing. I was just wrapping up my work for the night.

Firstly congratulations on completing 25 years of service. Also congratulations on the new role with Axon. It's indeed a great opportunity with a good company. With the years of experience in public safety and the amazing initiatives under your belt, you are absolutely an asset for Axon.

The invitation still stands strong as it is. I would like to have you as keynote speaker for the event. Possibly this also great timing because I was trying to reach Axon via Brandy Shaffer and have received no response. I was hoping to get Axon as a sponsor for the event. What's the best email to send you the sponsorship details ?

Also what's the best email to reach you moving forward?

Do you recommend anyone from CVPD or Axon to be on a panel for public safety drone programs?

Thanks,

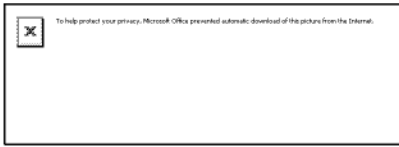

Darshan Divakaran

"Education, Training and Outreach on Emerging Technologies"

On Thu, Oct 1, 2020 at 12:08 AM Vern Sallee <vsallee@chulavistapd.org> wrote:

Good evening Darshan,

It is quite an honor to be invited to be the keynote for AZDronefest 2020. I would be glad to assist under two caveats. First I'm retiring from CVPD effective October 2 after 25 years of service. I'll no longer be a sworn peace officer at the time of the keynote you have requested. Second, I will be the Axon Air Lead Strategist effective oct 5th and I will need permission from Axon to participate. I don't think this will be a problem as my new job is to expand the public safety drone space, most specifically for Axon, but also overall general public safety drone promotion. I think I can assure you that the presentation will be drone agnostic and not an Axon commercial.

Two things, if you want a current sworn officer as an expert in the drone space I can work on a CVPD person. Second, if you still want me with 25 years sworn experience as CVPD's former drone leader then I can seek permission from Axon (a premier AZ public safety company based in Scottsdale) For permission, as I start with them on oct 5 Please let me know your preference and I'll do my best to assist.

Best,

Vern

Dear Captain Sallee,

On behalf of [Airavat Solutions](#) and US Drone Fest, I am honored to invite you to be a keynote speaker at the **AZDroneFest and Education Expo**, to be held **October 22-24, 2020 (session will be pre-recorded according to your convenience)**. This all-virtual event is a comprehensive and affordable drone education program perfect for recreational, commercial and public safety drone pilots – and not just those in Arizona. This unique event will celebrate many facets of the drone industry, capped off with a special screening of aerial cinematography. This event will also help with Part 107 training and drone program assistance for those who cannot afford to pay or travel for national conferences.

Please find attached an official invitation letter. Your reply confirming your participation would be appreciated by October 11, 2020. You can find more information about the event on our Summit website: www.azdronefest.com

Thanks,

Darshan Divakaran

Enterprise Grade Security for Enterprise UAS Operations

On Demand

Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Practically, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most valuable data one can collect.

Attendees for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Emerging Tech Showcase II

On Demand

Drone technology and its capabilities are changing constantly with new features, products, and services designed to make work safer, faster, cheaper, and better. Stay up to date on what is new and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Improving Drone Productivity by Smart Edge Data Processing

On Demand

Processing of sensor data (IMUs, Cameras, ToF, lidars, etc.) in drones significantly consumes battery. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video, point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

On Demand, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

Sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

Hi Vern,

Nice to e-meet you and Don. Congratulations on the retirement tomorrow! Don, I think the biggest topic we need to copy is how to keep the IPP going in San Diego with the funding constraints. Let me know if there's an opportunity or if there has been a discussion internally about making this happen. I know LEs have constrained budgets and these days it could be even worse. Right now, we're concerned the work Katelyn has done in the IPP will fall by the wayside if there's no funding mechanism to cover the costs of management.

On Tue, Sep 22, 2020 at 3:19 PM Vern Sallee <vsallee@chulavistapd.org> wrote:

Thanks Katelyn, nice to meet you Wes.

Wes, while I have led the drone program at CVPD for several years, I am retiring on October 2nd after 25 years with CVPD. I'll be working with Axon Air as their lead strategist to help them develop their drone services, so we may still cross paths on the private side. In the meantime, Lt. Don Redmond will be leading CVPD's drone strategies and can work with you on exploring opportunities. He is copied on this email. Once I retire, if you need to reach me, you can call me at **PERSONAL/PR** or my private email, **PERSONAL/PRIVACY**

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager

Subject: RE: AU VSI XCELLENCE Awards | Congratulations!

Hi Shannon, just curious, is there any chance that we could pre-record our “virtual acceptance” before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I'd hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don't want to seem ungrateful). She's been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,

Vern

Good morning Shannon,

Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AU VSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for ***Drone as a First Responder (DFR) Program*** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Hello Vern!

I wanted to check in and see if you had received the award and had a chance to record the video. I will be OOO next week (for my wedding), so am trying to have as much in place before I go.

Thank you so much!

Shannon Whitney | Education Manager

Fantastic, that's great news! As soon as we receive the award, we'll record a video and send it. Is there any audio, will the chief be permitted to say "thank you" and we are honored to accept or should it simply be us with it waiving? Or we could send one of each and you folks decide on the production end? Thanks again for all the help and support!

Best,
Vern

Good Afternoon Vern,

Apologies for the delay – I forwarded your question to the production team and we just connected on the answer!

In short – YES – a pre-recorded video would be just fine! The production team explained that there should be no issue placing that in, and it will appear as if it is live 😊. So, all we need you to do is to record a video of Chief Kennedy (and anyone else who wants to be on screen) waving and holding the award. Awards were set to ship out today, so you should have them by early next week. Once in hand, just use that and record then send me the video file (I will get it to the production team). I'd recommend recording about 30 seconds to make sure there is more than enough.

I hope that makes sense and let me know if you have any additional questions!

Best,

Shannon Whitney | Education Manager

Hi Shannon, just curious, is there any chance that we could pre-record our "virtual acceptance" before hand for you to program into the time slot? Since it is such a quick acceptance with no real interaction, I'd hate to drag the chief in at 6 am in the morning for a ten second wave to the camera (but we also don't want to seem ungrateful). She's been under high demand and stress and I like to find relief points for her when we can. It would be a cinch for us to record it and send it to you for playback if your program allows that. Just a thought, please let me know what works.

Best,
 Vern

Thank you, Vern – and congratulations again!

The Humanitarian and Public Safety winners will be featured at XPO on Thursday, Oct. 8 from 9:00-9:20AM EDT. I know that's quite early for you over in CA, but we would love to have Chief Kennedy if available! To give full context, there will not be any acceptance speeches (sadly not enough time), but just an on screen, excited appearance! Just let us know and we'll make note (and provide access information a little closer to the event).

Thank you,

Shannon Whitney | Education Manager

Good morning Shannon,
 Thank you very much for this great news! We are humbled and honored to receive such a prestigious award! Of course, we will keep the news confidential until AUVSI makes its announcement.

You can send the award to the following address:

Chula Vista Police Department
Attn: Captain Vern Sallee
315 Fourth Avenue
Chula Vista, CA 91910

Chief Roxana Kennedy and the CVPD drone team would love to participate in the award ceremony if possible. Do you have a time frame for the award presentation on October 8th? The Chief's schedule fills up fast and we would like to reserve a time if possible.

The check can be made out to:

Chula Vista Police Foundation
315 Fourth Avenue
Chula Vista, CA 91910

Attached are high quality badge images for your use. We generally prefer the use of the full color badge when possible. Thank you again for this fantastic recognition, we are truly honored!

Warm regards,
 Vern

Vern Sallee

Vern,

We know it's been a while since we reached out with news regarding your AUVSI XCELLENCE Awards submission and we appreciate your patience as we continue to navigate through these unprecedented times.

I am writing today with good news and to confidentially congratulate **Chula Vista Police Department** for ***Drone as a First Responder (DFR) Program*** winning in the **Public Safety** category of the 2020 AUVSI XCELLENCE Awards!

As a winner, Chula Vista Police Department will receive a \$5,000 cash donation and your winning status will be officially announced as we get a little closer to AUVSI XPONENTIAL 2020. There will also be a ceremony during the XPONENTIAL Keynote on Thursday, October 8. While we hope you are as excited as we are, we kindly ask you to refrain from sharing this news until we coordinate a time to make the announcement.

Please send us the following information by Thursday, September 10, 5:00 PM ET:

- Shipping address to which your award should be sent (no P.O. boxes please)
- Would your team like to participate in the 2020 AUVSI XCELLENCE Awards ceremony by appearing with your trophy and check when your organization is announced?
- Company logo in a high-resolution format (.eps, .ai)
- The organization name to which the \$5,000 donation check should be made payable
- The organization's address that should appear on the check

Please also join us in thanking DJI for their generous sponsorship of the Humanitarian and Public Safety category in the AUVSI XCELLENCE Awards!

Congratulations again on being a winner in the 2020 AUVSI XCELLENCE Awards! Please let us know if you have any questions!

Best,
Shannon

Hi Vern,

Congratulations on the new job at Axon! You have done some amazing things at CVPD and I am sure you will bring that expertise to do great things at Axon Air.

And if there is anything we can support with please let me know.

Best,

Danielle

FROM THE EDITOR

Greetings!

Thank you all who signed up to learn about smart edge data processing from Teraki and how it can increase drone productivity. The amount of data your drone collects is potentially massive, the ability to transfer only the data you need with low latency can make all the difference. For those of you who missed the event today, materials should be available on-demand within the next few business days. Also, be sure to catch our next webinar on October 14th at 11:00 AM EDT with Skydio: "Inspection at Scale - How to Build a Mission-Critical Drone Inspection Program".

Today's newsletter features a number of exciting drone releases that are set to shake things up in the drone hardware sector of our industry, especially in America. Check out [Auterion](#), [Teal](#), and [Skyward's](#) new partnership with [Parrot](#) below.

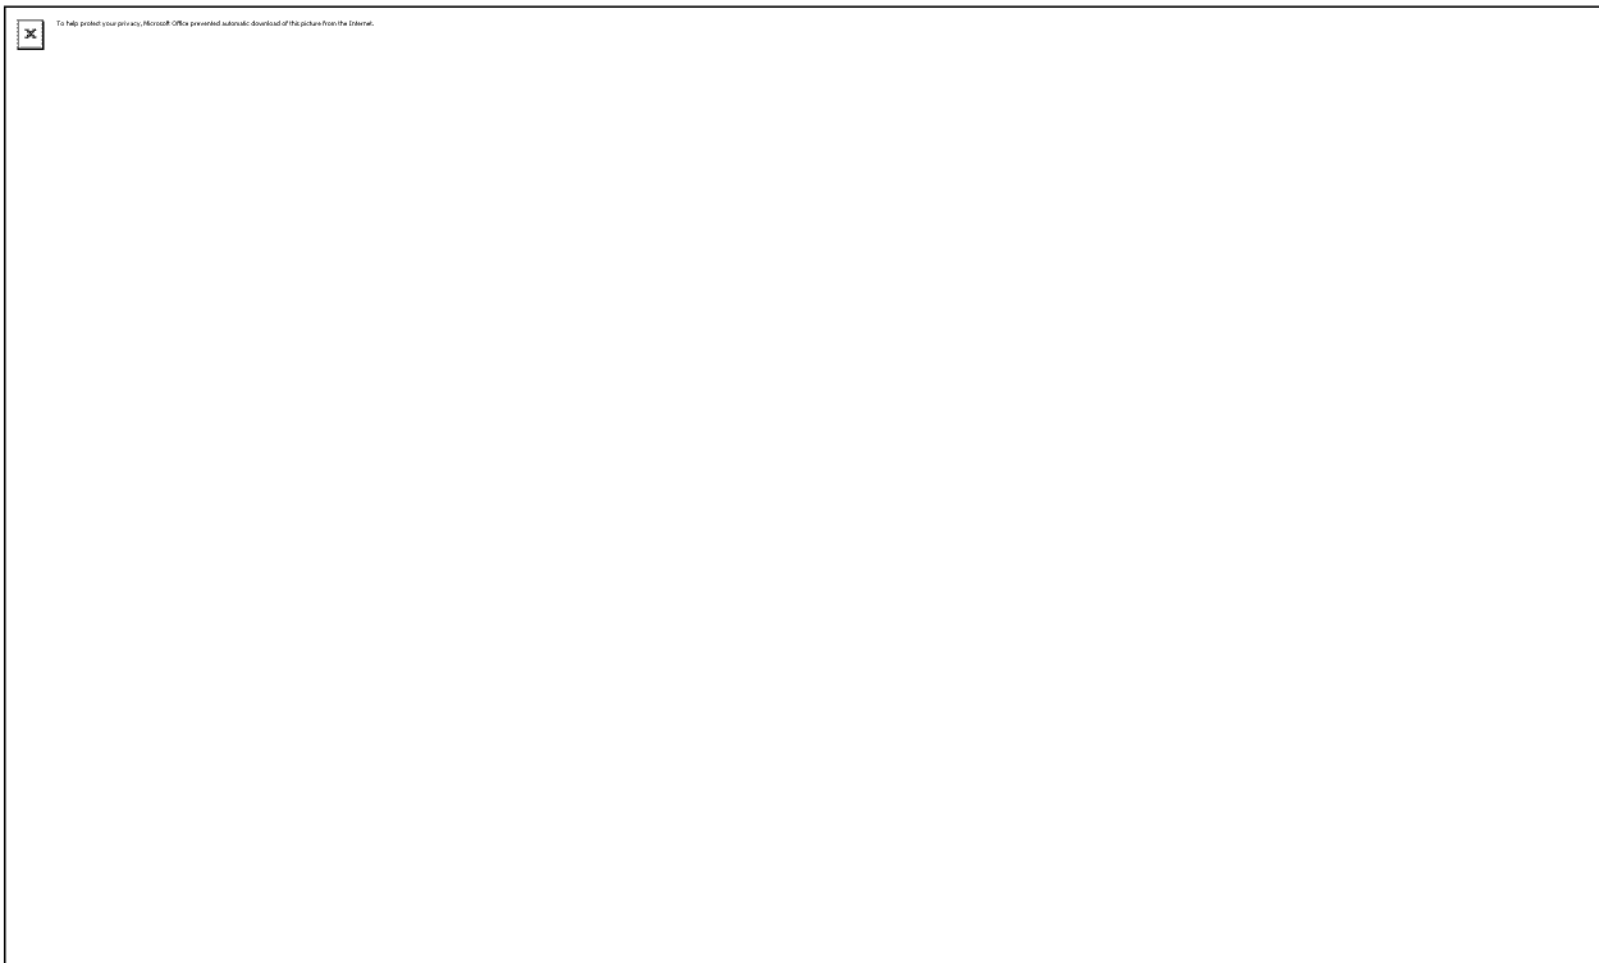

Be well and stay safe!

Danielle Gagne

FEATURED STORY

Auterion Brings Its Open Source Platform to the Next Level with the Astro: A Versatile Enterprise Drone Platform Built by Freefly

By Danielle Gagne

With the announcement of the release of the Astro, Auterion is demonstrating what their open-source platform can do for the commercial enterprise when in partnership with top performing drone manufacturers and payload providers. By joining forces with Freefly Systems that has been developing drone hardware systems for the industry for the last decade, Auterion is set to enable the enterprise in new ways.

OUR DIGITAL DOORS ARE OPEN: JOIN US FOR A FREE WEBINAR

You can sign up for free to any or all of the webinars below to join live or on-demand:

Enterprise Grade Security for Enterprise UAS Operations

On-Demand

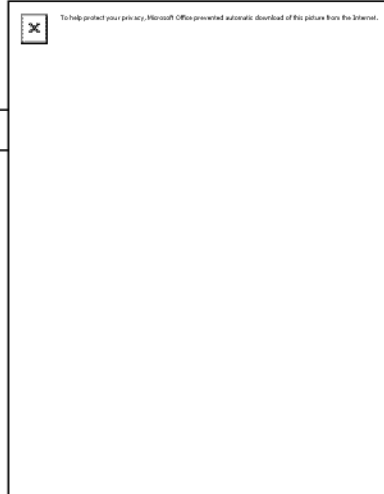

Join Kittyhawk CTO and Founder Josh Ziering for a comprehensive guide to securing your drone operations from data attacks, hacks and gaps. This talk will provide critical information and practical steps anyone can take to reduce the risk profile of their drone program. Specifically, you'll learn how to leverage a security posture, risk assessments, data classification, and encryption to form a security moat around your drone data - often the most sensitive data one can collect.

Registrants for this webinar will also receive a free copy of a new Kittyhawk security whitepaper.

Emerging Tech Showcase II

On-Demand

Technology and its capabilities are changing constantly with new features, products, and software designed to make work safer, faster, cheaper, and better. Stay up to date on what is out there and interact with leading companies about the latest changes, upgrades, and new products and services available within the drone industry by attending our Emerging Tech Showcase.

Increasing Drone Productivity by Smart Edge Data Processing

On-Demand

Processing of sensor data (IMUs, Camera's, ToF, lidars, etc.) in drones significantly consumes power. This directly shortens the flight range or duration. In this webinar, Teraki will discuss how to extend a drone's flight time & range by making processing of Data (time series, video and 3D point clouds) very efficient whilst increasing the machine learning accuracy. We will talk about smart ROI and TOI selection and cover 3D point cloud sensors such as ToF and lidar. For drones operated by video-driven remote control, Teraki will show how to lower video transmission latency – that works seamlessly in low-bandwidth situations.

Top 5 Takeaways:

- Improving Drone flight time and energy consumption
- Smart handling of large amount of drone-sensor data at the EDGE
- Improve AI model accuracy and continuously update model in the drone
- Process 10X more sensor data at the same processor
- Establish real-time transmission in low bandwidth conditions

Underground & Indoor Mapping with 3D Lidar Mapping

Tuesday, October 6, 2020 | 1:00PM – 2:00PM Eastern Time

The sensors in the underground survey system payloads do indeed provide the opportunity to collect data that may not have been possible otherwise, especially within linear drifts and for remote hazard analysis of rock faces. A panel of experts will discuss how new innovations are changing the approach that can be taken in these underground and indoor environments.

How to Select a Lidar System for UAV Operations

Tuesday, December 1, 2020 | 1:00PM – 2:00PM Eastern Time

Want to hear about the newest 3D solutions? Curious to discover which innovations are redefining AEC workflows? Our Emerging Technology Showcases provide attendees with an easy way to get up to speed around the latest product launches and innovations throughout the space

Airborne LiDAR and Actionable Data

Tuesday, January 12, 2021 | 1:00PM – 2:00PM Eastern Time

Scanners for rapid, efficient point cloud capture, and high-resolution images, during corridor- and wide-area-mapping projects have redefined expectations related to what it means to efficiently capture actionable data. A panel of experts will discuss how airborne lidar has created a measurable difference for stakeholders of all types.

Vern,

I will try and call you this afternoon (I have been assigned baby duty). Are you interested in both the panel and keynote ? I am totally fine with that. The panel is going to discuss how to build a successful drone program, about your programs, best practices and other advice.

The keynote can be focused on public safety, possibly IPP initiatives you led, technology guidance to agencies, etc.

You have a wealth of knowledge so having you on both the panel and keynote will be amazing.

Thanks,

Darshan Divakaran

Hi Verne,

Great timing. I was just wrapping up my work for the night.

Firstly congratulations on completing 25 years of service. Also congratulations on the new role with Axon. It's indeed a great opportunity with a good company. With the years of experience in public safety and the amazing initiatives under your belt, you are absolutely an asset for Axon.

The invitation still stands strong as it is. I would like to have you as keynote speaker for the event. Possibly this also great timing because I was trying to reach Axon via Brandy Shaffer and have received no response. I was hoping to get Axon as a sponsor for the event. What's the best email to send you the sponsorship details ?

Also what's the best email to reach you moving forward?

Do you recommend anyone from CVPD or Axon to be on a panel for public safety drone programs?

Thanks,

Darshan Divakaran

"Education, Training and Outreach on Emerging Technologies"

On Thu, Oct 1, 2020 at 12:08 AM Vern Sallee <vsallee@chulavistapd.org> wrote:

Good evening Darshan,

It is quite an honor to be invited to be the keynote for AZDronefest 2020. I would be glad to assist under two caveats. First I'm retiring from CVPD effective October 2 after 25 years of service. I'll no longer be a sworn peace officer at the time of the keynote you have requested. Second, I will be the Axon Air Lead Strategist effective oct 5th and I will need permission from Axon to participate. I don't think this will be a problem as my new job is to expand the public safety drone space, most specifically for Axon, but also overall general public safety drone promotion. I think I can assure you that the presentation will be drone agnostic and not an Axon commercial.

Two things, if you want a current sworn officer as an expert in the drone space I can work on a CVPD person. Second, if you still want me with 25 years sworn experience as CVPD's former drone leader then I can seek permission from Axon (a premier AZ public safety company based in Scottsdale) For permission, as I start with them on oct 5 Please let me know your preference and I'll do my best to assist.

Best,

Vern

Dear Captain Sallee,

On behalf of [Airavat Solutions](#) and US Drone Fest, I am honored to invite you to be a keynote speaker at the **[AZDroneFestand Education Expo](#)**, to be held **October 22-24, 2020 (session will be pre-recorded according to your convenience)**. This all-virtual event is a comprehensive and affordable drone education program perfect for recreational, commercial and public safety drone pilots – and not just those in Arizona. This unique event will celebrate many facets of the drone industry, capped off with a special screening of aerial cinematography. This event will also help with Part 107 training and drone program assistance for those who cannot afford to pay or travel for national conferences.

Please find attached an official invitation letter. Your reply confirming your participation would be appreciated by October 11, 2020. You can find more information about the event on our Summit website: www.azdronefest.com

Thanks,
