

## Green Power to the People – City Light is the Nation's Greenest Utility

October 9, 2013 by thomeses

Seattle City Light is The Nation's Greenest Utility and we can back up that claim.

With the nation's longest running conservation program, we have helped save Seattle City Light customers \$806 million on their bills since 1977. We are also environmental stewards to Mother Nature, which is why we study, protect and enhance the wildlife impacted by our business. We are a forward thinking utility and offer ways for our customers to support alternative and clean forms of electrical production.

Visit [NationsGreenest.org](http://NationsGreenest.org) to learn more about what Seattle City Light does to make the environment green and your wallet even greener.

Replying to @SeattleFire  
7000 Block of Airport Way S: All buildings in immediate area have been evacuated and we are restricting access to the area for a 1/2 mile radius. @PSETalk and @SEACityLight are working on securing the leak and shutting down power to the area.
