Minutes February (2021)

[Redacted]

[Redacted]

4.7 [Redacted] moved onto the three amber-green applications: projects 5, [Redacted]

4.7.1 On project 5 (*Use of a water treatment technology (CleanTreat) to support integrated pest management and unlock additional site capacity*), queries about SEPA involvement and the choice of medicine for trials had been resolved. The board agreed it had strong commercial relevance and potential to support regulatory innovation, and was therefore fundable. ATu said she was keen for Marine Scotland / Marine Scotland Science to be involved in future discussions with SEPA on this project. **Action: Follow up with Marine Scotland**
