TAX DOLLARS:
ZERO!

U.S. POSTAL INSPECTION SERVICE DIVISIONS

Analytics Team

- The Analytics Team's mission is to identify and develop intelligence on targets operating on the clear and dark webs for all Inspection Service investigations. Analytics Team specializes in providing actionable intelligence through cryptocurrency tracking, open source intelligence and social media analysis, geospatial mapping and data visualization, and USPS backend and network data exploitation. The team engages in proactive threat hunting targeting intelligence supporting each Inspection Service Program Area as well as threats to USPS executives, employees, infrastructure and facilities. The Analytics Team also provides dedicated support for local and national critical incidents in support of field division operations.

UNIT GOALS

- Attribution on previously unknown individuals
Report turnaround within 7 days of submission
Average 2 reports per week per analyst

CRITICAL INCIDENTS

EXPECTATIONS

- Work/Life Balance
Communication is key
Autonomy and accountability
Taking ownership for your program, your reports
Everyone has a voice, and we truly need your voice
Your development is critical, and so are your goals
