

Letter to our community who we care for and genuinely care about.

Your local healthcare team cares immensely about the health and safety of our patients. We believe it is important to show where we stand on the COVID-19 crisis in our community. It is difficult for anyone to wade through the vast amount of data on COVID-19 and to know which sources to believe. As your trusted experts, we wholeheartedly support the following:

- We welcome an open and honest discussion about the risks & benefits of the COVID 19 vaccines.
- In general, the benefits of the vaccine far outweigh the risks of acquiring and spreading SARs CoV-2.
- Immunization protects you from severe illness, hospitalization, and death.
- Getting vaccinated is the best way to reduce the chances of spread to others.

Our ethical obligation is to provide the best care based on scientific data from reliable sources. We do not take our responsibility lightly and have committed our careers to benefit the health and wellbeing of others.

We can significantly reduce the impact of this pandemic if we work together to learn the facts and act accordingly. We sincerely appreciate the bravery and courage of our neighbors, friends, and community who have practiced social distancing, masking, and obtained their COVID-19 vaccine. With your help, we can avoid further harm to our loved ones.

Talk to your health care provider and discuss what is right for you.
