12 Attorneys for Plaintiff
13 FACEBOOK, INC.

14 **UNITED STATES DISTRICT COURT**
15 **NORTHERN DISTRICT OF CALIFORNIA**
16 **OAKLAND/SAN FRANCISCO DIVISION**

17 FACEBOOK, INC., a Delaware
18 corporation,

19 Plaintiff,

20 v.

21 ALEXANDER ALEXANDROVICH
22 SOLONCHENKO, also known as
23 “Solomame,”

24 Defendant.

CASE NO.: 3:21-cv-08230

**COMPLAINT; DEMAND FOR JURY
TRIAL**

1 Plaintiff Facebook, Inc. (“Facebook”) asserts the following:

2 **INTRODUCTION**

3 1. Between January 2018 and September 2019, Defendant Alexander
4 Alexandrovich Solonchenko, also known as “Solomame,” scraped publicly accessible
5 information (Facebook user ID and phone number) for approximately 178 million
6 Facebook users. Solonchenko used a computer program to deliver automated requests
7 to Facebook computers, meanwhile pretending to be multiple Android devices
8 connected to Facebook’s Messenger mobile app.

9 2. Beginning in October 2020, Solonchenko sold data on RaidForums.com
10 (“RaidForums”). RaidForums is an online marketplace used to sell and distribute
11 scraped, stolen, and leaked data. Since 2020, Solonchenko has sold stolen or scraped
12 data from Ukraine's largest commercial bank, Ukraine’s largest private delivery service,
13 and a French data analytics company. In May 2021, Solonchenko also sold the data
14 that he had scraped from Facebook between January 2018 and September 2019, namely,
15 Facebook user IDs and phone numbers.

16 3. Solonchenko’s conduct violated Facebook’s Terms of Service and
17 Platform Terms. Facebook now seeks injunctive and other relief.

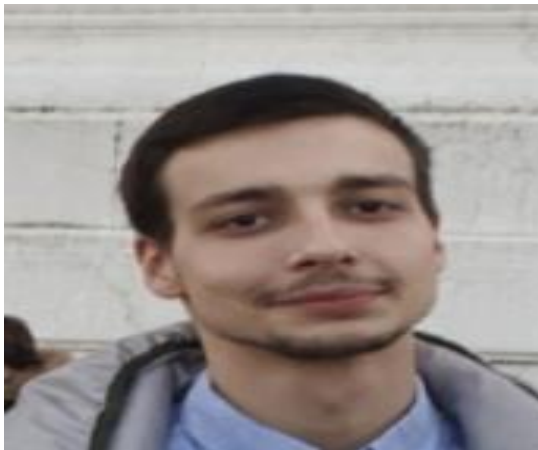

18 **PARTIES**

19 4. Plaintiff Facebook, Inc., is a Delaware corporation with its principal place
20 of business in Menlo Park, San Mateo County, California. Plaintiff owns and operates
21 several products, including Facebook, Instagram, and Messenger.

22 5. Solonchenko resides in Kirovograd, Ukraine. Solonchenko worked as a
23 freelance computer programmer with experience working with several programming
24 languages including Python, PHP, and Xrumer, which is a software used for spamming;
25 automating tasks on Android emulators; and conducting affiliate marketing. Ex. 1.
26 Until in or around June 2019, Solonchenko also sold shoes online under the business
27 name “Drop Top.”
28

1 6. Solonchenko also scraped and sold data to make money. Specifically,
2 since October 2020, Solonchenko used the aliases “solomame” and “barak_obama” on
3 RaidForums to sell scraped and other data. Ex. 2. Defendant sold and distributed data
4 scraped or stolen from different websites and companies, including financial
5 institutions, logistic companies, and analytics companies located in Ukraine and
6 elsewhere. On RaidForums, Solonchenko directed the potential buyers of data to
7 contact him using the messaging service Telegram. Solonchenko used the Telegram
8 accounts @not_a_wolf and @salampopolani. On the employment website
9 [freelancehunt.com](https://www.freelancehunt.com), Solonchenko used the username “Alexander S,” Skype ID
10 “solomame,” and email address aa_solonchenko@mail.ru. Ex. 3. Solonchenko used
11 multiple email addresses, including solomame@icloud.com, weeeble@bk.ru, and
12 grant2.grant2@yandex.ru; and phone number +38099497401. On August 7, 2017,
13 Solonchenko registered the domain name theblackmask.top using the name “Aleksandr
14 A Soloncheko” with email address aa_solonchenko@mail.ru, and phone number
15 +38099497401. Ex. 4. Solonchenko listed his city, state, and country as Kirovograd,
16 Kirovogradskaya, Ukraine. *Id.*

17 **Figure 1: Solonchenko December 2019**

JURISDICTION AND VENUE

1
2 7. The Court has jurisdiction under 28 U.S.C. § 1332 over the cause of action
3 alleged in this Complaint because complete diversity exists and the amount in
4 controversy exceeds \$75,000.

5 8. Solonchenko used and controlled at least one Facebook account and
6 thereby agreed to the Facebook Terms of Service. The Court has personal jurisdiction
7 over Solonchenko because the Facebook Terms of Service contain a forum selection
8 clause that requires this Complaint be brought in the U.S. District Court for the Northern
9 District of California or a state court located in San Mateo County, and that
10 Solonchenko submit to the personal jurisdiction of either of those courts for litigating
11 this matter.

12 9. The Court also has personal jurisdiction over Solonchenko because
13 Solonchenko knowingly directed and targeted his conduct at California, including at
14 Facebook, which has its principal place of business in California, and at Facebook users
15 located in California. Facebook’s claims arise directly from and relate to Solonchenko’s
16 activities described in this Complaint and activities in and directed at California.

17 10. Venue is proper in this District pursuant to 28 U.S.C. § 1391(b) as the
18 threatened and actual harm to Facebook occurred in this District.

19 11. Pursuant to Civil L.R. 3-2(c), this case may be assigned to either the San
20 Francisco or Oakland division because Facebook is located in San Mateo County.

FACTUAL ALLEGATIONS

A. Background on Facebook Products

22 12. Plaintiff owns and operates Facebook, a social networking website and
23 mobile application that enables its users to create their own personal profiles and
24 connect with each other on their personal computers and mobile devices. Plaintiff owns
25 and operates several products in addition to Facebook, including Instagram and
26 Messenger (collectively “Facebook Products”).
27
28

1 13. To access Facebook and view certain user profiles, Facebook requires that
2 each user create a Facebook account. To create a Facebook account, Facebook requires
3 each user to register with a unique username and password.

4 14. Registered users can create user profiles and include information about
5 themselves, including their email address, phone numbers, and date of birth. Registered
6 Facebook users can make connections on Facebook by becoming “Friends” with other
7 Facebook users.

8 15. Facebook provides its users with control over how to customize their
9 profiles and how much personal information to include in their profile. In addition,
10 Facebook’s privacy settings provide users with control over how much profile
11 information is viewable publicly and searchable, to other Facebook users, or to the
12 users’ Friends.

13 16. Facebook Messenger is a messaging app and platform that allows direct
14 messaging, video and voice calls, and the ability to share photos, videos, audio, and
15 files, among other features. A Facebook account is required to use Messenger.
16 Messenger included a feature called “Contact Importer” that allowed a user to upload
17 their contacts from the address book on their mobile devices.

18 17. Between in and around June 2015 and September 2019, Messenger
19 Contact Importer included a functionality that would return a one-to-one list of any
20 Facebook users that matched phone numbers uploaded from the address book on a
21 user’s mobile device (“CI matching function”). The feature allowed users to upload
22 their contacts from mobile devices and identify their friends and others associated with
23 the uploaded phone numbers. The CI matching function was limited by a user’s privacy
24 settings; that is, it only identified a user with a matching phone number if that user’s
25 privacy settings permitted them to be searched for by phone number. If a user’s phone
26 searchability setting was set to “Friends,” only that user’s Facebook “Friends” could
27 find the user through the CI matching function. If on the other hand, a user’s phone
28 searchability setting allowed “everyone” to search for them by phone number, other

1 users could find that user using the CI matching function even if they were not “Friends”
2 with that user on Facebook. Since September 2019, Messenger Contact Importer no
3 longer returns one-to-one lists of matched phone numbers.

4 **B. Facebook’s Terms of Service and the Platform Terms**

5 18. All Facebook users must agree to Facebook’s Terms of Service (available
6 at <https://www.facebook.com/terms.php>) and other rules, including the Platform Terms,
7 that govern access to, and use of, Facebook and the Facebook Platform. Facebook’s
8 Terms of Service also govern the use of Facebook Messenger.

9 19. Section 3.2.1 of the Facebook Terms of Service prohibits users from
10 “do[ing] . . . anything unlawful, misleading, [] or fraudulent” or facilitating or
11 supporting others in doing so.

12 20. Section 3.2.3 of the Facebook Terms of Service prohibits “access[ing] or
13 collect[ing] data from [Facebook] Products using automated means (without our
14 permission) or attempt[ing] to access data you don’t have permission to access.”

15 21. Section 1 of the Platform Terms state that they apply to the use of
16 Facebook’s APIs, code, technology, content, and services that enable the retrieval of
17 data from Facebook computers and Facebook Products.

18 22. Section 12(j) of the Platform Terms defines “Platform Data” as any
19 information, data, or other content a user obtains from Facebook or Facebook Products
20 through the Platform, as defined by section 12(i) of the Platform Terms, whether
21 directly or indirectly.

22 23. Section 3(a)(iv) of the Platform Terms prohibits the sale of Platform Data.

23 24. Section 3(a)(v) of the Platform Terms prohibits “[p]lacing Platform Data
24 on, or otherwise making Platform Data available to, a search engine or directory without
25 [Facebook’s] prior express written consent.”

26 **C. Background on Phone Number Enumeration Scraping**

27 25. Phone lookup or finder features, such as whitepages.com, are programmed
28 to provide available information about the user of a phone number. “Phone number

1 enumeration scraping” was the process of using automation software to (a) manufacture
2 auto-generated lists of phone numbers and (b) upload the lists to websites with phone
3 lookup or finder features, in order to scrape information associated with that phone
4 number.

5 26. Phone number enumeration scraping in the context of Messenger Contact
6 Importer generally involved the following steps:

7 a. A computer program would be used to auto-generate lists of phone
8 numbers. These lists could be curated based on telephone area code and target densely
9 populated areas that have a high number of mobile phone numbers.

10 b. The auto-generated lists of phone numbers were used to create files
11 consistent with phone contacts on various simulated mobile devices (also known as
12 Android or Apple iOS emulators). The emulators were programmed to mimic real
13 mobile devices when connected to Facebook computers in order to use the Messenger
14 Contact Importer function, which was restricted to logged-in authenticated Messenger
15 users.

16 c. The emulators were used to upload the auto-generated phone
17 contacts to Facebook computers through the Messenger Contact Importer feature. If a
18 phone number on the auto-generated list matched a real phone number listed on a user’s
19 account, and if the user’s phone searchability setting allowed “everyone” to search for
20 the user by phone number, that user’s Facebook ID and name were returned and could
21 be scraped.

22 **D. Defendant Agreed to Facebook’s Terms of Service and Platform**
23 **Terms**

24 27. Between January 7, 2015, and October 13, 2021, Solonchenko created and
25 used at least two Facebook accounts, and therefore, agreed to the Facebook Terms of
26 Service.

27
28

1 a. Solonchenko created a Facebook account on January 7, 2015, with
2 the username “Mark Twen,” and phone number +380994097401. The current email
3 address associated with the account is grant2.grant2@yandex.ru.

4 b. Solonchenko created a Facebook account on August 31, 2020, with
5 the username “Drop Top.”

6 28. Between October 12, 2019, and October 13, 2021, Solonchenko created
7 and controlled two Facebook apps and therefore agreed to the Platform Terms. The
8 apps were named “klklkl” and “Mark’s first app.”

9 29. Between February 28, 2019, and July 23, 2019, Solonchenko created and
10 controlled a Facebook Page named “Drop Top.” Solonchenko’s Facebook accounts –
11 “Drop Top” and “Mark Twen” – were administrators of the Drop Top Facebook Page.

12 30. Between January 18, 2015, and October 13, 2021, Solonchenko created or
13 controlled at least five Instagram accounts.

14 a. Solonchenko created an Instagram account on January 18, 2015,
15 using the name “Экий Некий,” username “ekyneky,” and email address
16 grant2.grant2@yandex.ru.

17 b. Solonchenko created an Instagram account on August 29, 2018,
18 using the name “Noname nofame,” username “nnnofame,” and phone number
19 +380994097401.

20 c. Solonchenko created an Instagram account on December 12, 2019,
21 using the name “Mark Twen,” username “grant2.grant2,” and phone number
22 +380994097401.

23 d. Solonchenko created an Instagram account on December 17, 2019,
24 using the name “fetzer woodie,” username “fetserwoodie8803,” and email address
25 aa_solonchenko@mail.ru.

26 e. Solonchenko created an Instagram account on February 28, 2019,
27 using the name “Drop Top,” username “dropoftop,” phone number +3809947401, and
28 email account solomame@icloud.com.

1 **E. Background on RaidForums**

2 31. RaidForums is an online marketplace where users of the forum openly
3 discuss the collection and sale of scraped, stolen, and leaked data. Ex. 5. RaidForums
4 was started in 2015 by a user with the online aliases “Omnipotent,” and “Omni,” who
5 still operates the forum as an administrator. As of August 2, 2021, RaidForums had
6 over 640,000 registered users participating in discussion topics dedicated to gaming,
7 scraped, stolen, and leaked data, and hacking. *Id.* For example, in July 2021, public
8 reports stated that scraped user profile information (name, gender, email, and telephone
9 number) for 700 million LinkedIn users was offered for sale on RaidForums.¹

10 **F. Defendant Used Automated Means to Access and Scrape Data from**
11 **Facebook**

12 32. Beginning no later than January 2018, Solonchenko used automated means
13 to access Facebook computers and to scrape Facebook user IDs and phone numbers
14 without Facebook’s permission, in violation of Facebook’s Terms of Service. Exs. 6
15 and 7. Solonchenko used phone number enumeration scraping of Messenger Contact
16 Importer to scrape the user IDs and phone numbers of approximately 178 million
17 Facebook users. Ex. 7.

18 33. As described below in paragraph 38, on December 1, 2020, Solonchenko
19 created a post on RaidForums in which he claimed that he scraped data from Facebook.
20 Ex. 6. Specifically, Solonchenko wrote, “I collected this database [of Facebook user
21 IDs and phone numbers] during 2018y, it’s unique and nobody sales exact that leak
22 (sic), I collected it by myself scanning [Facebook] day-by-day during a year (sic).” *Id.*

23
24
25
26
27
28 ¹ See <https://www.forbes.com/sites/leemathews/2021/06/29/details-on-700-million-linkedin-users-for-sale-on-notorious-hacking-forum/?sh=10d21a4e34a4>

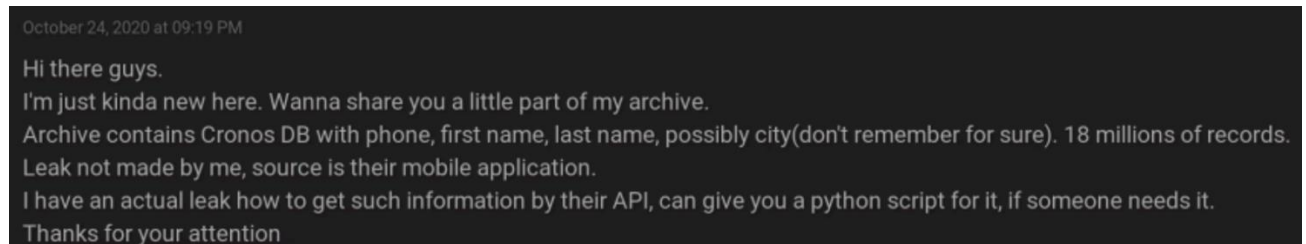

1 **G. Defendant Sold Data Collected from Facebook on RaidForums in**
2 **Violation of Facebook’s Platform Terms**

3 34. On or about October 1, 2020, Solonchenko created an account on
4 RaidForums using the username “Solomame.” On January 18, 2021, Solonchenko
5 changed his username on RaidForums from “Solomame” to “barak_obama.” Ex. 2.

6 35. Since October 1, 2020, Solonchenko has used RaidForums to sell and
7 distribute data obtained from various businesses, including Nova Poshta, which is the
8 largest private delivery company in Ukraine, and PrivatBank, which is the largest
9 commercial financial institution in Ukraine. Solonchenko also used RaidForums to sell
10 data scraped from Facebook in violation of Facebook’s Terms of Service and Platform
11 Terms.

12 36. On October 24, 2020, as shown below in Figure 2, Solonchenko created a
13 post on RaidForums in which he offered to sell a dataset of records of 18 million users
14 or customers of a company called Nova Poshta, which was the largest private delivery
15 company in Ukraine. Ex. 8. According to public reporting from February 2018, two
16 customer datasets (one containing records for 500,000 customers and another
17 containing records for 18 million customers) were leaked from Nova Poshta and were
18 being sold on the internet.² Although Solonchenko denied being the person that scraped
19 the data, stating “leak not made by me,” he offered information about how others could
20 scrape data from Nova Posta through one of its Application Platform Interfaces and
21 offered to provide others with a “python script,” or computer code, to scrape the data.

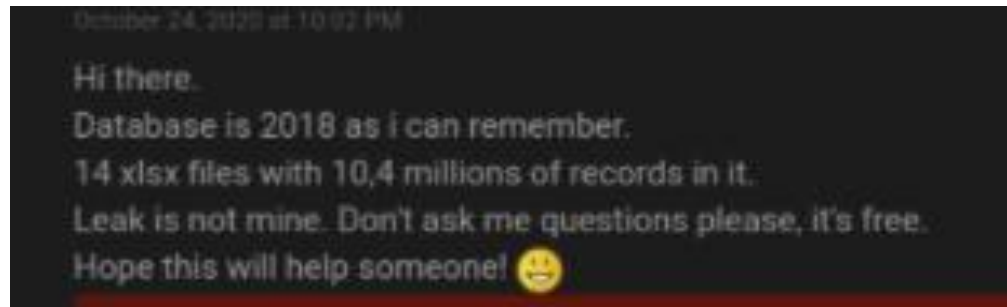

22 **Figure 2: Text of Solonchenko October 24, 2020 RaidForums Post**

23
24
25
26
27
28 ² See <https://www.unian.info/society/2386634-nova-poshta-postal-services-massive-customer-base-put-up-for-sale-in-darknet-media.html>.

1 37. On October 24, 2020, as shown below in Figure 3, Solonchenko created a
2 post on RaidForums in which he offered to sell a dataset of records of over 10 million
3 users or customers of a financial institution in Ukraine called PrivatBank. Ex. 9. As of
4 2021, PrivatBank, which was nationalized in 2016, is the largest commercial bank in
5 Ukraine.³ Solonchenko offered the PrivatBank records for “free” and wrote that he
6 “[h]ope[d] [the records from PrivatBank] will help someone!”

7 **Figure 3: Text of Solonchenko October 24, 2020 RaidForums Post**

14 38. On December 1, 2020, as shown below in Figure 4, Solonchenko created
15 a post on RaidForums in which he wrote that he scraped data from Facebook in 2018
16 and offered to sell the complete dataset or portions of the dataset. Ex. 6. Specifically,
17 Solonchenko wrote, “I collected this database during 2018y, it’s unique and nobody
18 sales exact that leak (sic). I collected it by myself scanning fb day-by-day during a year
19 (sic).” Solonchenko invited those interested in purchasing the Facebook dataset to
20 contact him on Telegram at @not_a_wolf. *Id.* Solonchenko also suggested that
21 “Omni,” the RaidForums’ admin, could serve as the escrow agent to facilitate the sale
22 of the Facebook data. Between December 3, 2020, and January 3, 2021, Solonchenko
23 promoted the sale of this scraped data on RaidForums.

Figure 4: Text of Solonchenko December 1, 2020 RaidForums Post

39. On February 2, 2021, as shown below in Figure 5, Solonchenko created a post on RaidForums in which he offered to sell a dataset of records of 245 million users or customers from a French marketing analytics company called Acuity Data. Ex. 10. More specifically, Solonchenko wrote, “Item: Database of company called Acuity (acuity-data.com now part of liveramp) . . . Every string contains unique phone, totally 245 [million of] mixed landlines/mobiles (sic) phones.”

Figure 5: Text of Solonchenko February 2, 2021 RaidForums Post

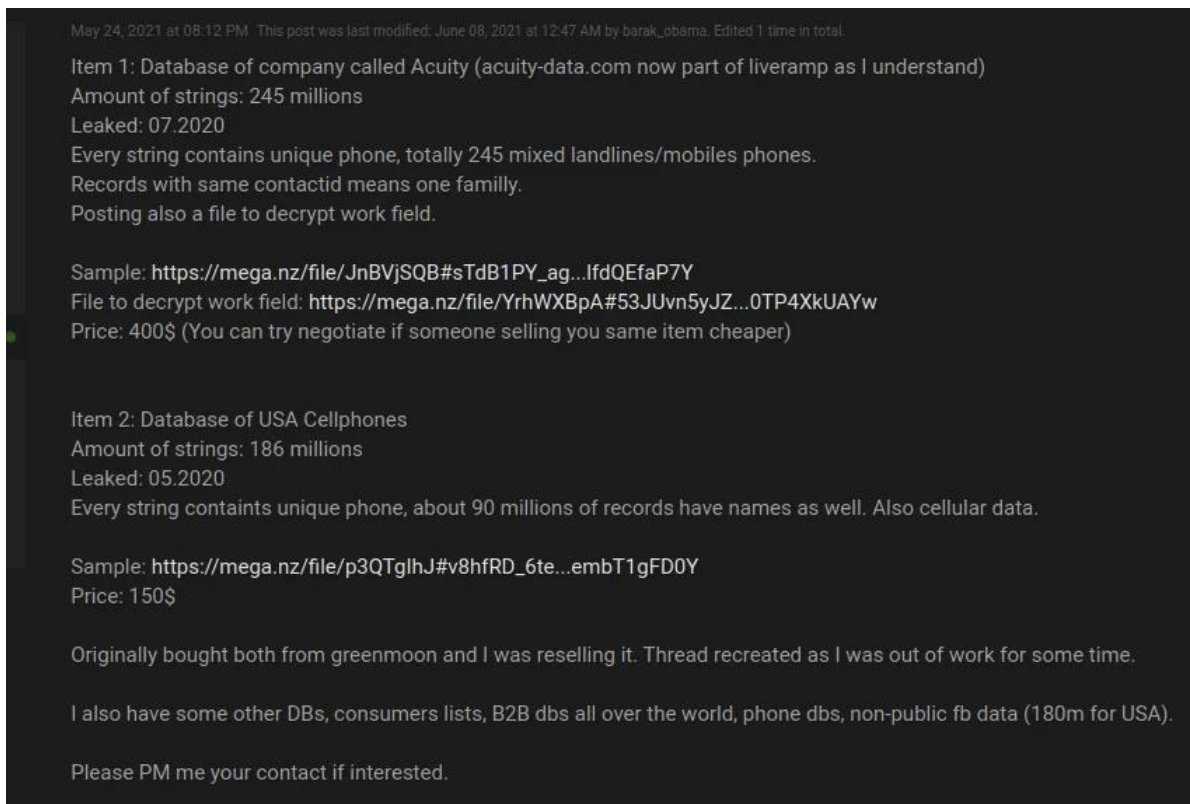

40. On May 24, 2021, as shown below in Figure 6, Solonchenko created a post on RaidForums in which he offered to sell several databases of stolen data. Ex. 7. First, Solonchenko again offered to sell a dataset obtained from Acuity (described in

1 paragraph 39) at a reduced price. Second, Solonchenko offered a database of 186
2 million mobile phone records from an unidentified source.

3 41. Further, Solonchenko offered to sell a dataset of about 180 million
4 Facebook users. More specifically, Solonchenko wrote, “I also have some other DBs,
5 consumers lists (sic), B2B dbs all over the world, phone dbs, [and] non-public fb data
6 (180m for USA).” In fact, the dataset contained publicly accessible phone numbers and
7 Facebook user IDs for approximately 178 million Facebook users, predominantly
8 located in the United States. Solonchenko used phone number enumeration scraping of
9 Messenger Contact Importer to obtain this dataset prior to September 2019.

10 **Figure 6: Text of Solonchenko May 24, 2021 RaidForums Post**

24 **H. Facebook’s Anti-Scraping and Enforcement Efforts**

25 42. Facebook took several measures to limit phone number enumeration
26 scraping. First, Facebook used technical anti-scraping measures to detect and disrupt
27 unauthorized automated requests on its systems. Second, only an authenticated user
28 could use Messenger Contact Importer. In other words, in order to use Messenger

1 Contact Importer a person would first need to create a user account and then login to
2 Messenger using their account password. Third, between February 2018 and December
3 2018, Facebook set limits for the number of contacts that could be uploaded through
4 Messenger Contact Importer and the frequency at which those phone numbers could be
5 submitted. Finally, since September 2019, Messenger Contact Importer no longer
6 returns one-to-one lists of matched phone numbers.

7 43. Further, Facebook has disabled Solonchenko’s Facebook and Instagram
8 accounts and revoked his access to Facebook and Facebook Products.

9 **I. Defendant’s Acts Harmed Facebook**

10 44. Solonchenko’s violations of Facebook’s Terms of Service and the Platform
11 Terms have harmed Facebook.

12 45. Facebook has suffered damages attributable to the efforts and resources it
13 has used to investigate, remediate, and respond to Solonchenko’s conduct as described
14 in this Complaint in an amount to be determined at trial, and in excess of \$75,000.

15 **CAUSE OF ACTION**

16 (Breach of Contract)

17 46. Facebook realleges and incorporates all preceding paragraphs here.

18 47. Between January 2015 and October 21, 2021, Solonchenko created and
19 used multiple Facebook accounts and agreed to Facebook’s Terms of Service.

20 48. Between October 12, 2019, and October 21, 2021, Solonchenko created
21 and controlled two Facebook apps and agreed to the Platform Terms.

22 49. The Facebook Terms of Service and Platform Terms constitute an
23 agreement between Solonchenko and Facebook.

24 50. Facebook has performed all conditions, covenants, and promises required
25 of it in accordance with its agreements with Solonchenko.

26 51. Solonchenko breached section 3.2.3 of the Facebook Terms of Service by
27 using automated means to access and collect data from Facebook, namely Facebook
28 user IDs and phone numbers, without Facebook’s permission.

1 52. Solonchenko breached section 3.2.1 of the Facebook Terms of Service
2 because his conduct was misleading because he used an Android emulator and the
3 phone enumeration scraping technique to communicate with Facebook computers
4 which misrepresented to Facebook who was using Messenger Contact Importer.

5 53. Solonchenko's violation of the Facebook Terms of Service caused
6 Facebook to incur damages in an amount to be determined at trial, and in excess of
7 \$75,000.

8 **PRAYER FOR RELIEF**

9 Facebook seeks judgment awarding the following relief:

10 (a) An injunction restraining Solonchenko from accessing Facebook and
11 Facebook Products;

12 (b) An injunction restraining Solonchenko from selling or distributing data of
13 any kind obtained from Facebook or Facebook Products, or purportedly obtained from
14 Facebook or Facebook Products;

15 (c) Damages in an amount to be determined at trial;

16 (d) Pre-judgment and post-judgment interest; and

17 (e) All other equitable or legal relief the Court deems just and proper.

18 **PLAINTIFF RESPECTFULLY DEMANDS A JURY TRIAL.**

Resume

I do not like long and pathetic resumes, briefly about me:

- I work with Python, Php, Django, bootstrap, HTML5 / css, Zennoposter, Xruener, and also with other highly specialized combines, frameworks and decisions.
- I develop software for automation, parsers, astrotagers, including automating tasks on Android emulators.
- I do mailings, sell my software and develop new ones. I have experience working with: Telegram, WhatsApp. Your need to make a combine from antogener to mailer? Need automation of certain functions - checkers, parsers? All these questions should be redirected to me, since I've been doing this for the last 3 years, merging traffic on my projects.
- I deal with traffic, work with affiliate programs, conduct business activities in practice and can give real work experience.
- I run advertising campaigns in CPA networks, I am a professional in the field of development of hot traffic reception systems, as well as in the generation of the same hot traffic.
- I only go to freelance to check the PM a few times a day, if you need my advice, or you have a project / proposal - please send contacts, on which it is convenient for you to communicate. The rest of the time I do projects and family, so you save your time.
- Development of specific web engines (as an example - the engine for a network of sites of intimate services), bots: Telegram, Viber, WhatsApp.

I am always happy to give a detailed answer to your questions / your problem, if I have experience in this.

Good day.

I am interested in your proposal, I am ready to take it even tomorrow.

On this site - in the first place in their specialty (which can be seen in the rating and opposite my message).

Regarding the promotion in social networks, I have a fairly extensive stock of knowledge, I have been doing it since 2011, from the zismo forum.

Hi there.
I collected this database during 2018y, it's unique and nobody sales exact that leak, I collected it by myself scanning fb day-by-day during a year.
You can buy just some country, part of country, whole database, I will wait for your proposals. I will send you free samples for your request for exact country you need.

Telegram: @not_a_wolf
Deals with middleman (Omni or Jaw) are welcome.

P.s. don't trust anyone saying he have 2019/2020 fb leak, the bug used for this data collection was fixed on the end of 2018.
Only facebook pages data can be updated using parser and it's actually works not for all profile (depends on publicity settings).

List of countries:

```
YEMEN - 2,3 M
URUGUAY - 1,5 M
DE - 11,2 M
UAE - 4 M
TURKEY - 9 M
TUNIS - 1 M
SWITZERLAND - 2 M
SWEDEN - 1,1 M
SPAIN - 10,2 M
SINGAPORE - 3,5 M
RUSSIA - 8,3 M
```

I have data for all other countries, but about 1 million or less.

Here you can download free public sample:

<https://mega.nz/file/pioQSToQ#tgAyU9t8PF...RteP4UApW0>

(Sample made in JSON with base64-encoded locations, you can request ANY formatting of output file you are paying for, request data for only males or any other filter. I will format you need)

Write me on telegram (https://t.me/not_a_wolf) or PM me here on raidforums.

May 24, 2021 at 08:12 PM. This post was last modified: June 08, 2021 at 12:47 AM by barak_obama. Edited 1 time in total.

Item 1: Database of company called Acuity (acuity-data.com now part of liveramp as I understand)

Amount of strings: 245 millions

Leaked: 07.2020

Every string contains unique phone, totally 245 mixed landlines/mobiles phones.

Records with same contactid means one family.

Posting also a file to decrypt work field.

Sample: https://mega.nz/file/JnBVJSQB#sTdB1PY_ag...lfdQEfaP7Y

File to decrypt work field: <https://mega.nz/file/YrhWXBpA#53JUvn5yJZ...0TP4XkUAYw>

Price: 400\$ (You can try negotiate if someone selling you same item cheaper)

Item 2: Database of USA Cellphones

Amount of strings: 186 millions

Leaked: 05.2020

Every string contains unique phone, about 90 millions of records have names as well. Also cellular data.

Sample: https://mega.nz/file/p3QTglhJ#v8hfRD_6te...embT1gFD0Y

Price: 150\$

Originally bought both from greenmoon and I was reselling it. Thread recreated as I was out of work for some time.

I also have some other DBs, consumers lists, B2B dbs all over the world, phone dbs, non-public fb data (180m for USA).

Please PM me your contact if interested.

1 YEAR OF SERVICE

October 24, 2020 at 09:19 PM

#1

Hi there guys.

I'm just kinda new here. Wanna share you a little part of my archive.

Archive contains Cronos DB with phone, first name, last name, possibly city(don't remember for sure). 18 millions of records.

Leak not made by me, source is their mobile application.

I have an actual leak how to get such information by their API, can give you a python script for it, if someone needs it.

Thanks for your attention

1 YEAR OF SERVICE

October 24, 2020 at 11:02 PM

#1

Hi there.

Database is 2018 as i can remember.

14 xlsx files with 10,4 millions of records in it.

Leak is not mine. Don't ask me questions please, it's free.

Hope this will help someone! 😊
