

## 5 Capitol Protest BTG Response

Determine what US2020 BTG levers we will pull to mitigate Violence & Incitement risk on 1/6 due to DC protests.

### [PHASE 1] Immediate response to V&I risk in DC

US2020 Levers, Previously Rolled Back

	A	B	C	D	E	F	G	
1	ID#	Name	Description	Owner	Criteria to recommend	Status	1PM Notes	
2		V&I: Cluster V&I ignores and drive specialist (PResc) review at the cluster level	Increased our ability to action more similar content in bulk, based on SME review.		Met - recommend to roll out immediately	Execution underway		
3		Use classifiers to demote content starting with a 5% demotion for content that has 5% chance of violating. - English hate speech - Spanish hate speech - Graphic violence - Violence & Incitement	Applied demotion to content deemed likely to violate our Community Standards in the areas of hate speech, graphic violence, and violence & incitement; the demotion's strength is in proportion to how confident we are that content is violating.			Execution underway		
4		V&I: Increase demotion strength cap from 50% to 80%	Increased the max strength of linear probable violating V&I demotion (PE1), allowing us to further downrank higher confidence (50-80% confidence) V&I content.			Execution underway		
5		V&I: Increase strength of p(report) to reduce visibility of V&I posts likely to be reported	Made users less likely to see content we expect them to report to Facebook, addressing subjectively problematic content.			Execution underway	ETA 1:30PM	
6		Turned on mandatory post approval (MPAA) for Civic Groups with 8 violations	Require Admins review and approve posts in civic groups that accumulate four strikes (strikes require admins to have created or approved of the violating content) as well as 57 fast-moving new groups, helping ensure that Admins are properly policing and being held			N/A		- determine how V&I strikes feed into this logic and if it can

**Editorial note:** This image is from a document included in disclosures made to the Securities and Exchange Commission and provided to Congress in redacted form by Facebook whistleblower Frances Haugen's legal counsel. A consortium of 17 US news organizations, including CNN, has reviewed the redacted versions received by Congress. CNN took this screenshot from one of the documents and blurred portions of this image to protect privacy.
