Dear Secretary Bose:

Pursuant to Section 205 of the Federal Power Act,¹ ISO New England Inc. (the “ISO”)² hereby electronically submits to the Federal Energy Regulatory Commission (“Commission”) this resource termination filing for Killingly Energy Center (“Killingly”) - Resource No. 38663/ Project 12280.

Pursuant to Section III.13.3.4.A of the Tariff if, as a result of milestone date revisions, the date by which a resource will have achieved all its critical path schedule milestones is more than two years after the beginning of the Capacity Commitment Period for which the resource first received a Capacity Supply Obligation (“CSO”), then, after consultation with the Project Sponsor, the ISO has the right, through a filing with the Commission, to terminate the resource’s CSO for any future Capacity Commitment Periods.³ The termination also removes the resource’s right to any payments associated with that CSO and the resource’s qualified capacity for participation in the Forward Capacity Market. If the Commission accepts this termination filing, then the ISO will

If the Commission accepts this termination filing, then the ISO will terminate the CSO, draw down the financial assurance that NTE provided for Killingly's CSO, and remove Killingly's qualified capacity. These actions will make Killingly ineligible to participate in the sixteenth Forward Capacity Auction ("FCA"), which will commence on February 7, 2022. The ISO respectfully requests an order accepting termination of Killingly's CSO within 60 days from the date of this filing and providing an effective date of January 3, 2022 for the termination. This will enable the ISO to reflect the termination, as appropriate, in the auction input file for the sixteenth FCA.

In support of the termination of Killingly's CSO, the ISO is submitting with the non-public version of this filing:

Confidential information has also been redacted in the public version of this filing letter. As such, pursuant to the Commission's regulations,⁷ as part of the public version of this filing, the ISO is submitting a form of a Non-Disclosure Agreement, which any participant or intervernor can then submit to the ISO in order to request a copy of the complete, non-public version of this filing.

II. BACKGROUND

Killingly is a proposed combined cycle generator that acquired a 631.955 MW CSO [REDACTED] in the thirteenth FCA, which is associated with the 2022-2023 Capacity Commitment Period. Accordingly, Killingly was required to achieve commercial operation on June 1, 2022 (*i.e.*, the first day of the 2022-2023 Capacity Commitment Period, which is associated with the thirteenth FCA).⁸ Killingly also acquired 631.9555 MW CSOs in the fourteenth and fifteenth FCAs. [REDACTED].⁹ Killingly is currently qualified to participate in the sixteenth FCA as an Existing Generating Capacity Resource.

As part of the qualification process for participation in an FCA, a non-commercial resource must provide a critical path schedule, which must include dates for milestones related

to, among other things, financing, permitting, major equipment orders, and commercial operation.¹⁰ Once a resource acquires a CSO, the ISO is required to monitor that resource's compliance with its critical path schedule until the resource achieves FCM Commercial Operation, loses its CSO pursuant to Section III.13.3.4A of the Tariff, or withdraws from critical path schedule monitoring pursuant to Section III.13.3.6 of the Tariff.¹¹ Killingly provided a critical path schedule when it qualified for participation in the thirteenth FCA. As such, the ISO has been monitoring Killingly's critical path schedule since Killingly obtained a CSO in the thirteenth FCA, which was held in February 2019.

III. REASONS FOR TERMINATION

Pursuant to Section III.13.3.4.A of the Tariff if, as a result of milestone date revisions, the date by which a resource will have achieved all its critical path schedule milestones is more than two years after the beginning of the Capacity Commitment Period for which the resource first received a CSO, then, after consultation with the Project Sponsor, the ISO has the right, through a filing with the Commission, to terminate the resource's CSO for any future Capacity Commitment Periods. The termination also removes the resource's right to any payments associated with that CSO and the resource's qualified capacity for participation in the Forward Capacity Market.

As described above, Killingly first acquired a CSO in the thirteenth FCA, which took place in February 2019 (*i.e.*, over two and a half years ago).
