Hi Val,

We can provide the structured versions, although I do not have a strong ETA right now. The team is working on this still, thanks!

Hi Travis,

These are not structured files, but rather Excel versions of the PDFs. We'll continue manual proofing, unless you can provide true structured data.

Thank you,

Hi Val, new reports are attached in spreadsheet format. Please let me know if you have any questions.

Thanks,

Thank you Travis.

Could you provide reports in a structured format, specifically the district to precinct to BT relationships? Text or Excel would work. Proofing that kind of list by hand is not efficient.

I noticed our neighborhoods are missing. It makes sense since they are not part of the export. Neighborhoods are part of the ConsolDistBT spreadsheet, attached to this email.

Adding Aaron to the chain for help with proofing.

Thank you,

Subject: [EXTERNAL] Re: Updated Extract Information

Hello Travis,

Do you know when DVS plans to send the ballot type to precinct and district proofing reports? If we are to proceed with this nonstandard data transfer process, I want to make sure the base layer is error free.

Thank you,

Valeri Shilov
IT Manager

Hi Tisa,

Thank you again for sending along updated extracts yesterday. After some discussion with the team, we are requesting that you please resend the updates/additions to the initial DFM report in an excel file that only contains the new information. For example, in the attached DFM you sent us yesterday – if you could just send us an excel file with the *additions* and *changes* to that from the base extract you sent previously, whether that be occupation translations, corrections, or something else, that would be tremendously helpful.

The reason why this would be preferable is because it vastly reduces the amount of work re-import an entire new set of data, as we'll only need to add to the existing project with the new updates where needed. Having to completely re-import means we have to re-generate from the ground up each time a new set of data comes along and that slows the entire process down, which decreases efficiency when we have the project in a great place.

Would getting updates in Excel be possible?

Thanks!
