Your Personal Rate of Return: Your Personal Rate of Return measures the investment performance of your account. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. Reviewing Your Personal Rate of Return is important to help ensure you're on track to achieving your financial goals.

The performance of your investments is tracked since they have been held in the current account, but no earlier than Jan 1, 2009. This also includes investments you owned during this time period but have since sold. Certain events, including a transfer of an investment between accounts, share class conversion, or change in an investment's identification code (CUSIP) caused by a corporate action, will impact the time frame over which the investment's rate of return is calculated.

Information used to calculate performance may have been obtained from third parties and Edward Jones cannot guarantee the accuracy of such information.

*Your Rate of Return for each individual asset above is as of April 24, 2020. Returns greater than 12 months are annualized.

Your Rate of Return in the Asset Details section above measures the investment performance of each of your individual assets. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. *Your Rate of Return for each individual asset above is as of May 29, 2020. Returns greater than 12 months are annualized.

Your Rate of Return in the Asset Details section above measures the investment performance of each of your individual assets. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. Reviewing your Rate of Return is important to help ensure you're on track to achieving your financial goals.

The performance of your investments is tracked since they have been held in the current account, but no earlier than Jan. 1, 2009. Certain events, including a transfer of an investment between accounts, share class conversion, or change in an investment's identification code (CUSIP) caused by a corporate action, will impact the time frame over which the investment's rate of return is calculated.

Information used to calculate performance may have been obtained from third parties and Edward Jones cannot guarantee the accuracy of such information.

Keep Performance in Perspective

When you look at your account on a short-term basis, it's easy to get caught up in day-to-day movements. But it's likely you aren't saving for tomorrow or even for the next day - you're saving for long-term financial goals. That's why it's important to maintain a proper perspective. While you can't control market volatility, you can control what you do to keep your investment strategy on track. You and your financial advisor can partner together to make adjustments as needed, so you can stay invested tomorrow and beyond.

Rules of the Road: Stick with Quality

Of all the factors to consider when investing, one of the most important is also one of the most overlooked. If you've received tips on today's "hot" investments, especially if they've already performed well, the best advice we can offer is: ignore them. If it sounds too good to be true, it probably is. See our 10 Rules of the Road at edwardjones.com/investingrules.

Your Personal Rate of Return: Your Personal Rate of Return measures the investment performance of your account. It incorporates the timing of your additions and withdrawals and reflects commissions and fees paid. Reviewing Your Personal Rate of Return is important to help ensure you're on track to achieving your financial goals.

The performance of your investments is tracked since they have been held in the current account, but no earlier than Jan. 1, 2009. This also includes investments you owned during this time period but have since sold. Certain events, including a transfer of an investment between accounts, share class conversion, or change in an investment's identification code (CUSIP) caused by a corporate action, will impact the time frame over which the investment's rate of return is calculated.

Rate of Return information on account statements uses the dollar-weighted calculation. Time-weighted Rate of Return numbers for Advisory Solutions Fund and UMA accounts can be found on your Quarterly Performance Report through Online Account Access. If you are not an Online Access user, visit edwardjones.com/access to sign up.

Information used to calculate performance may have been obtained from third parties and Edward Jones cannot guarantee the accuracy of such information.
