MN 2022 Gov Elex Look-Ahead: DFL Incumbent Walz Leads Potential GOP Opponents By Double Digits, Has Plus 8 Net Favorability Rating:

11 months until votes are counted in Minnesota's next election for Governor, DFL incumbent Tim Walz holds a double-digit lead over each of 6 potential Republican challengers, according to SurveyUSA's latest exclusive polling for KSTP-TV Minneapolis, KAAL-TV in Rochester-Mason City-Austin, and WDIO-TV in Duluth.

Walz also has the best name recognition and highest Net Favorability rating of the field. Net Favorability is calculated by subtracting unfavorable ratings from favorable ratings. Candidate names were shown to respondents in random order, ranked here from highest to lowest net favorability: Tim Walz............... Plus 8 . 47% view Walz favorably, 39% unfavorably; 11% view him neutrally. Only 3% have no opinion of Walz. Scott Jensen........... Plus 4 . 16% view Jensen favorably, 12% unfavorably; 25% have a neutral opinion; 48% have no opinion of him. Mike Murphy......... Plus 2 . 10% have a favorable view of Murphy, 8% an unfavorable view; 27% are neutral. 55% have no opinion. Neil Shah............... Minus 1 . 9% view Shah favorably, 10% unfavorably; 25% are neutral. 56% have no opinion. Michelle Benson.... Minus 2 . 12% have a favorable opinion of Benson, 14% an unfavorable opinion; 31% are neutral. 43% have no opinion. Mike Marti............. Minus 3 . 8% favorable, 11% unfavorable; 27% neutral. 55% have no opinion. Paul Gazelka.......... Minus 11 . 11% have a favorable opinion of Gazelka, 22% an unfavorable opinion; 28% are neutral. 38% have no opinion. In head to head matchups against each Republican, Walz leads by between 11 and 17 percentage points. Walz defeats State Senator Paul Gazelka by 13 points today, 47% to 34%. Gazelka, the best-known candidate running to oppose Walz, leads by 24 points in Western Minnesota and by 10 points in the Northeastern part of the state. Walz leads by 29 points in Southern MN and by 20 in the Twin Cities area. Against State Senator Michelle Benson , Walz wins by 12 points, 47% to 35%. Benson leads by 16 in Western Minnesota, ties Walz in the Northeast; Walz leads by 19 in the rest of the state. Former state Senator Scott Jensen also loses to Walz by a 12-point margin, 48% to 36%. While conservative voters unsurprisingly back each Republican candidate by a wide margin, Jensen is the candidate who runs most strongly with conservatives, taking 80% of conservatives' votes. Walz defeats Lexington Mayor Mike Murphy by 11 points, 47% to 36%. Murphy takes 76% of conservative votes – second only to Jensen. Entrepreneur Mike Marti loses to Walz by 13 points, 47% to 34%. Marti has a 16-point advantage in Western Minnesota, but trails elsewhere. Physician Neil Shah falls to Walz by 17 points, 48% to 31%. Shah, the least-known of the Republican candidates, nevertheless leads by 10 points in Western Minnesota.

About the Research / Filtering: SurveyUSA interviewed a representative cross-section of 675 Minnesota adults online 12/02/21 through 12/06/21, using sample provided by Lucid Holdings LLC of New Orleans. Of the adults, 591 were registered to vote. Of the registered voters, 506 were identified by SurveyUSA as being likely to vote in the November 2022 general election and were asked the questions which follow. The pool of adult survey respondents was weighted to US Census targets for gender, age, race, education, and home ownership.

Statement of Methodology: SurveyUSA is an independent, non-partisan, apolitical research company that conducts opinion surveys for media, academic institutions, commercial clients, non-profits, governments, agencies, and elected officials. SurveyUSA opinion research is conducted using a methodology optimized for each particular project. In some cases, this means data is collected 100% by telephone; in some cases, 100% online; and in other cases, a blend of the two. For those projects that are conducted "mixed-mode" (or "multi-mode"): Respondents who have a home (landline) telephone are interviewed by phone, sometimes using live interviewers, other times using the recorded voice of a professional announcer. The youngest male is requested on approximately 30% of calls to home phones, the youngest adult is requested on approximately 70% of calls. This method of intra-household selection reduces the potential for age and gender imbalance in the unweighted sample. Re-attempts are made to busy signals, no-answers, and answering machines. Landline telephone sample is purchased from Aristotle of Washington DC. Respondents who do not use a home telephone are interviewed on an electronic device, which means, for some projects, that call-center employees hand-dial cell phones and interview respondents verbally on the respondent's cell phone, and means, for other projects, that SurveyUSA displays the questions visually on the respondent's phone, tablet, or other device. Sample for respondents who do not use a home telephone is purchased from Aristotle or from one of several other research companies that provide access to cell respondents. Where meaningful, SurveyUSA indicates the percentage of respondents who use a home phone and the percentage who do not, and crosstabs by this distinction. Responses are minimally weighted to U.S. Census or voter file targets for gender, age and race. Target (cell) weighting is used. On questionnaires that ask about political party identification, SurveyUSA may or may not weight to Party ID, depending on client preference. Where necessary, questions and answer choices are rotated to prevent order bias, recency, and latency effects. On some studies, certain populations are over-sampled, so that the number of unweighted respondents exceeds the number of weighted respondents. Each individual SurveyUSA release contains the date(s) on which interviews are conducted and a release date. If interviewing for a particular study is conducted in Spanish, or in any other foreign language, it will be noted on the specific release. If no notation appears, interviews are conducted in English. Where respondents are filtered, such as adults, filtered to registered voters, in turn filtered to likely voters, SurveyUSA describes the filtering on the specific release. On pre-election polls in geographies with early voting, SurveyUSA differentiates between respondents who have already voted and those who are likely to vote but have not yet done so. On research completed prior to 12/31/16, SurveyUSA assigned to each question within the instrument a theoretical margin of sampling error. Effective 01/01/17, SurveyUSA assigns to each question within the instrument a credibility interval, which better reflects the sampling uncertainties associated with gathering some percentage of respondent answers using non-probability sample. Though commonly cited in the presentation of research results, "sampling error" is only one of many types of error that may influence the outcome of an opinion research study. More practical concerns include the way in which questions are worded and ordered, the inability to contact some, the refusal of others to be interviewed, and the difficulty of translating each questionnaire into all possible languages and dialects. Non-sampling errors cannot be quantified. This statement conforms to the principles of disclosure as recommended by the National Council on Public Polls (NCPP). Questions about SurveyUSA research can be addressed to editor@surveyusa.com.
