School districts should adopt **clear student codes of conduct** with clear consequences for specified behavior that limit the involvement of police officers to situations posing immediate safety risks. Although the Legislature revised the state's zero tolerance law, school districts continue to have discretion to define which acts pose a threat and require zero tolerance and which acts do not pose a threat to safety. Likewise, the law is very clear that threat assessment teams can use alternatives to referral to law enforcement and that zero tolerance policies may not be applied to petty acts of misconduct.<sup>90</sup> School districts should develop school-and community-based diversion programs to address disciplinary issues and limit undue student contact with the justice system.

School districts should adopt **effective discipline policies and practices** that teach and reinforce positive behavior. Districts should provide teachers and staff with effective behavior management tools and educate them about when it is appropriate to call the police on their students and when it is not.

Schools should teach students about their rights in police encounters and avoid blurring the lines between law enforcement and school staff when investigating, searching and interrogating students.

# The Expanding Presence of Law Enforcement in Florida Schools

2020

F. Chris Curran, PhD

Associate Professor and Director of the UF Education Policy Research Center

## Abstract

The presence of law enforcement in public schools has been a common security practice in the state of Florida for several decades. Following the tragic 2018 school shooting in Parkland, FL, the state passed a law requiring all public schools to either have law enforcement or other armed personnel present. Drawing on state-wide data for the school years 2014-15 through 2018-19, this report examined the relationship between law enforcement in schools and a number of outcomes including reports of behavioral incidents to the state, incidents reported to law enforcement, school arrests, and exclusionary discipline. This analysis used statistical techniques that controlled for both observable characteristics of districts and schools as well as unobserved characteristics that were fixed over time. Findings suggest that the 2018 Marjory Stoneman Douglas High School Public Safety Act significantly increased the presence of law enforcement in schools, particularly in elementary schools. The presence of law enforcement in schools was related to increases in the number of behavioral incidents reported to the state, the number of such incidents reported to law enforcement, and student arrests. The results suggest a need to reconsider whether law enforcement should be present in schools, and, if they are, how they can be implemented in a way that minimizes unnecessary exposure of students to law enforcement and arrests.

**F. Chris Curran, PhD**, is an Associate Professor of Educational Leadership and Policy and Director of the Education Policy Research Center at the University of Florida. His research focuses on educational equity, with an emphasis on school discipline and safety. He can be reached at [chriscurran@coe.ufl.edu](mailto:chriscurran@coe.ufl.edu). More on the UF Education Policy Research Center can be found at [www.ufedpolicy.org](http://www.ufedpolicy.org)

**Acknowledgements:** This research was funded by the American Civil Liberties Union (ACLU) of Florida. The author acknowledges the helpful assistance of Michelle Morton, Research Coordinator and Policy Counsel for the ACLU of Florida, as well as the excellent research assistance of Elizabeth Gilliam, Jessika Parish, Kelsey Norman, Savanna Williams, and Zeeshan Habib. Thanks to Benjamin Fisher and Aaron Kupchik for useful feedback on earlier drafts of this report. The views expressed in this report are those of the author and do not necessarily reflect those of the funding organization.

# Executive Summary

This research report presents findings from a state-wide analysis of law enforcement in Florida schools. It examines data from a five year period between the 2014-15 and 2018-19 school years, including the years before and after the 2018 passage of the Marjory Stoneman Douglas High School Public Safety Act. The analysis used a number of statistical techniques, including both district and school fixed effects, to account for underlying differences in districts/schools that had greater or fewer law enforcement in schools.

## Key Findings

1. The number of law enforcement in Florida schools nearly doubled, and the number of Florida schools served by law enforcement increased by 40% between 2017-18 and 2018-19 school years.
2. The increase in law enforcement in schools was driven primarily by an increased presence in elementary schools, which had an approximately 56% increase in law enforcement presence between 2017-18 and 2018-19.
3. Between 2017-18 and 2018-19, there were increases statewide in the number of behavioral incidents reported to the state and to law enforcement, particularly for threats/intimidation, drug related incidents, and tobacco related incidents.
4. The presence of law enforcement in schools was related to a greater frequency of school arrests (40-82% more at the school-level). Surprisingly, this relationship was most consistent among white students.
5. The presence of law enforcement in schools predicted greater numbers of behavioral incidents being reported to law enforcement, particularly for less severe infractions and among middle schoolers.
6. There was little consistent evidence that the presence of law enforcement decreased the number of behavioral incidents occurring, indicating that school-based law enforcement were not necessarily making schools safer.
7. The presence of law enforcement was not consistently related to exclusionary school discipline such as suspensions.

## Policy Implications

1. School districts should reconsider whether law enforcement should be present in schools, keeping in mind that state law limits alternatives.
2. The state requirement to have armed personnel in schools should be revisited with an eye toward returning control to local school districts and schools to determine how best to ensure a safe learning environment.
3. School districts and law enforcement agencies should adopt clear policies that restrict the ability to arrest to a limited set of serious infractions and prohibit arrest of young students.
4. If present, law enforcement in schools should be trained in conflict resolution, in ways to reduce implicit bias and disproportionate minority contact, and in alternatives to the use of force or arrest.

## Introduction

The presence of law enforcement in schools has become an increasingly common feature of public schools in America. From 2005 to 2015, the percentage of public schools nationwide with law enforcement present at least part time increased by about 33% such that, as of 2017-18, around half of all public schools had a law enforcement presence (Correa & Diliberti, 2020; Musu-Gillette et al., 2018). Florida's rates of law enforcement presence in schools were similar, with about 48% of schools in FL reporting school-based law enforcement in the 2013-14 school year (Civil Rights Data Collection, 2014).

In the wake of the tragic 2018 mass shooting at Marjory Stoneman Douglas High School in Parkland, Florida, and several others across the nation, many states passed laws that served to further increase the likelihood that schools have law enforcement present. In particular, in Florida, the Marjory Stoneman Douglas High School Public Safety Act (Act), passed in 2018, requires that all public schools host either a law enforcement officer, an armed staff member, or an armed private security guard (Florida Statutes §1006.12 2018). As a result, schools across the state have been actively working to increase the presence of law enforcement in schools.

This trend towards greater use of law enforcement in schools has occurred despite research that finds a generally negative relationship between the presence of law enforcement in schools and student outcomes. For example, prior work has found that the presence of law enforcement is predictive of higher rates of student arrest and greater use of exclusionary discipline like suspensions (Fisher & Hennessy, 2016; Owens, 2017; Weisburst, 2019). This may be because, as qualitative ethnographies have suggested, the presence of law enforcement shifts school culture and practices in ways that result in more punitive environments (Kupchik, 2010; Nolan, 2011).

While such qualitative work and some recent quantitative work point to causal relationships, it is often difficult to disentangle whether the presence of law enforcement in schools is causing these negative outcomes or is merely a reflection of law enforcement being placed in settings where negative experiences like arrests and suspensions are more common (Owens, 2017; Weisburst, 2019). In Florida, recently passed state law requires schools to either have law enforcement or other armed personnel present. This law, which has prompted an expansion of law enforcement in schools, presents a unique opportunity to examine the impacts of law enforcement in schools on student outcomes.

This research report documents the increasing presence of law enforcement in Florida public schools and explores how law enforcement presence relates to a number of student outcomes including the number of behavioral incidents reported to the state, behavioral incidents reported to law enforcement, school arrests, and exclusionary discipline such as suspensions. This report documents substantial increases in the presence of law enforcement in Florida schools, particularly elementary schools. Furthermore, the findings suggest that the presence of law enforcement may be contributing to increased reports of behavioral incidents to law enforcement and increased arrests, particularly of white students. The results do not, however, find consistent evidence that law enforcement in schools result in greater use of exclusionary discipline, a finding that contrasts with some prior research.

## Methodology

The analysis leveraged longitudinal district and school-level data to compare outcomes for districts/schools that had law enforcement to those that did not (or had fewer) between the 2014-15 and 2018-19 school years. The analysis took advantage of the 2018 Act that required schools to adopt one of several school security options (including law enforcement in schools) as a source of plausibly less biased variation in the placement of law enforcement in schools. By comparing frequency of behavioral incidents reported to the state, reports of incidents to law enforcement, school arrests, and discipline before and after the passage of the Act for districts/schools that added law enforcement, this analysis provides insights into the potential effects of law enforcement presence on schools and students.

### Data

This analysis leveraged both district and school-level data on the presence of law enforcement in schools as well as multiple measures of student outcomes. Analyses were conducted separately with the school district as the unit of analysis (district-level) and with the school as the unit of analysis (school-level). While the school-level analysis had the advantage of being able to more accurately link the presence of law enforcement in a school to outcomes in that particular school, data on placement of law enforcement at the school-level were not available for all schools in the state. The district-level analysis, in comparison, covered all districts in the state, for the entire five year span. Both the district and school-level datasets were constructed using publicly available data from the FL Departments of Education (DOE) and Juvenile Justice (DJJ), school districts, and local law enforcement agencies.

**Independent Variables (Law Enforcement Presence in Schools).** The key independent variable in the analysis was the presence of law enforcement in a district or school. For the district-level analysis, data on the presence of law enforcement were drawn from the FL DOE's annual Safe Schools Appropriation Expenditures Report. These publicly available annual reports provide details on the number of schools in each district served by law enforcement as well as the number of law enforcement officers in each district (which can differ given that some schools have multiple officers and some officers cover multiple schools). Both the number of schools served and number of officers are also disaggregated by school level (elementary, middle, high). For the purpose of the district-level analysis, the presence of law enforcement was primarily operationalized as the number of schools served by school-based law enforcement, though in additional analyses included in the appendix, presence of law enforcement was operationalized as the number of school-based law enforcement in the district.

For the school-level analysis, data on the presence of law enforcement in schools were compiled through public records requests to school districts and local law enforcement agencies. Specifically, each school district in the state was asked to indicate which schools were covered by law enforcement for the school years 2014-15 through 2018-19. For school districts that were unresponsive to the public records requests, similar requests were made of the local law enforcement agencies located in the district's county. While not all districts or agencies provided data on the presence of school-based law enforcement, the final school-level dataset included information on 2,245 schools from 56 school districts (approximately 65% of schools in the state representing 84% of the school districts). The full list of school districts for which there was school-level information on law enforcement presence is provided in the

appendix (see Appendix A). For the school-level analysis, the presence of school-based law enforcement was operationalized as a binary indicator for whether a school was served by school-based law enforcement (either full-time or part-time) as well as, in specifications included in appendices, as the number of school-based law enforcement present in a given school.

[Dependent Variables \(Behavioral Incidents, Reports to Law Enforcement, Arrests, and Discipline\)](#). The key dependent variables for this analysis were number of behavioral incidents reported to the state, number of incidents reported to law enforcement, number of arrests at school, and number of exclusionary discipline responses.

The Florida Department of Education reports the number of behavioral incidents occurring in schools at the school-level as part of the annual School Environmental Safety Incident Reporting (SESIR) system. As a part of the SESIR, schools report the number of behavioral incidents overall and within a number of categories. The SESIR includes 26 different infraction types that are categorized into four levels based on severity. Level 1 offenses are the most serious and include aggravated battery, arson, homicide, kidnapping, and sexual battery. Level 2 offenses include burglary, drug sale/distribution, physical attack, robbery, sexual assault, and weapons possession. Level 3 offenses include major disruption on campus, drug use/possession, fighting, hazing, larceny/theft, sexual harassment, other sexual offenses, threat/intimidation, trespassing, vandalism, and other major offenses. Finally, Level 4 includes alcohol, bullying, harassment, and tobacco. Importantly, though organized in levels, all SESIR incidents are considered “serious”. For the purpose of this study, I estimate relationships between law enforcement presence and the overall count of incidents reported to the state as well as counts of incidents aggregated to each of the four levels.

In addition to information on the frequency of particular behavioral incidents reported to the state, the SESIR also includes counts of the number of behavioral incidents that are reported to law enforcement. Incidents are considered reported to law enforcement if an official action was taken by a school-based law enforcement or other law enforcement officer. Such official actions could include assigning a case number, filing a report, conducting an investigation, issuing a civil citation, or making an arrest. Importantly, the category of reported to law enforcement does not necessarily include incidents in which school personnel merely consulted with or notified law enforcement. As with the behavioral incidents, the behavioral incidents reported to law enforcement are also categorized by the same four level system, ranging from severe (Level 1) to less severe (Level 4) infractions. This report used both the overall number of incidents reported to law enforcement as well as the number by level (1-4) as outcomes. For district-level analysis, the number of incidents was aggregated to the district level.

As noted, incidents reported to law enforcement do not necessarily result in arrest. Consequently, the analysis also included school arrests of juveniles as a distinct outcome. District and school arrests were compiled from public data available from the Florida DJJ. The FL DJJ provides data on juvenile arrests occurring both within schools and in the community through the Delinquency in Florida’s Schools Dashboard. For the purpose of this analysis, arrests occurring outside of school, in private schools, or in non K-12 settings were removed as were any arrests that were identified as occurring in an unknown location or school. The arrest data were then aggregated to the district and school levels to provide measures of the number

of juvenile arrests at public schools. Frequency of arrests were calculated both in aggregate and by student race.

The final set of dependent variables in this analysis were number of students who experienced exclusionary discipline practices. School districts report annually to the state the number of students who were subject to out-of-school suspension (OSS), in-school suspension (ISS), and a number of other disciplinary outcomes both in aggregate and by student race/ethnicity. This analysis focused on the number of students who experienced OSS and ISS, both in aggregate and disaggregated by racial/ethnic subgroup.

## Control Variables

The analysis also included a number of observable covariates as control variables. Tables 1 and 2 provide descriptive statistics on each of these control variables for the district-level and school-level analyses respectively. Of this full list of control variables, individual regressions omitted certain variables in order to reduce multi-collinearity and ensure variance inflation factors of less than 10. Specifically, the district-level analysis omitted the proportion of white students, total number of schools in a district, and number of schools by level due to high levels of multi-collinearity. The school-level analysis omitted the proportion of white students. As shown, the school-level dataset, while not including all schools in the state, largely reflected the district averages.

## Methods

This analysis estimated the relationship between law enforcement in schools and the beforementioned outcomes using a regression framework with controls for observable characteristics of districts and schools as well as the use of year as well as district and/or school fixed effects. The fixed effects approach allowed for adjustments for unobserved, time-invariant characteristics of districts and schools as well as temporal trends affecting all districts and schools in the state. Furthermore, by leveraging the change of state law in 2018, this analysis exploited variation induced by the Act that prompted districts and schools to expand the use of law enforcement in schools.

The estimation strategy relied on an ordinary least squares regression model with panel longitudinal data at the school district, and, in other models, school-level. The general specification took the following form:

$$\text{Equation 1. } y_{st} = \beta_0 + \beta_1 \text{LawEnforcement}_{st} + \beta_2 \theta_{st} + \beta_3 \mu_s + \beta_4 \lambda_t + e$$

Where  $y$  represents the outcome of interest (described above and modeled separately for each outcome) for district or school  $s$  at time  $t$ . *LawEnforcement* represents the key independent variable of interest (number of schools served by law enforcement in the district-level models and, for school-level models, whether law enforcement was present in the school).  $\theta$  represents a vector of observable district and school characteristics such as enrollment, racial composition, socio-economic status of students served, and so forth. The  $\mu$  term represents a series of academic year fixed effects. Finally,  $\lambda$  represents a set of either school district or school fixed effects that implicitly control for time-invariant characteristics of districts or schools as well as their surrounding communities. The interest in these models was in estimating  $\beta_1$  which represents the relationship between law enforcement presence in districts or schools and the outcomes of interest after accounting for other factors in the model.

While various specifications and estimation strategies were used and are reported in the sensitivity and robustness analysis section, the primary models reported in this analysis used logged versions of the outcome variable for district-level analysis and employed the use of conditional fixed effects negative binomial regression in the case of the school-level analysis. These approaches were used to address the skewed nature of the outcome variables and to address the count nature of the outcome variables. For the district-level analysis, the results can be interpreted as percentage changes in the outcome given the logged version of the outcome. Similarly, for the school-level analysis, incidence rate ratios (IRR) are reported which can similarly be interpreted in terms of percentage changes in the outcomes.

In addition to this primary model, the analysis also explored potential heterogeneous relationships – such as whether the relationship between law enforcement in schools and outcomes looks different across grade level of schools (elementary, middle, high schools) as well as whether certain outcomes varied based on student race/ethnicity. These subgroup analyses were conducted by modeling versions of Equation 1 that used variants of the dependent variables that were specific to the subgroup (such as the frequency of school arrest of Black students) or restricted observations to those in a particular subgroup (such as estimating the equation separately for elementary, middle, and high schools).

The ideal study would randomly assign law enforcement to schools, allowing for a comparison of outcomes between two groups of schools that were otherwise identical on average. However, given that such random assignment was not logistically or politically feasible, this study attempted to approximate such a comparison through the use of observable control variables, year fixed effects, and district/school fixed effects. The first of these, observable controls, allowed relationships to be adjusted for characteristics of districts and schools such as their size, the racial/ethnic composition of students served, the socio-economic makeup of students served, and the ratios of school personnel to students. Next, the year fixed effects controlled for any time trends that affected all districts/schools in the state equally. For example, if all districts/schools in the state responded to the Parkland tragedy by increasing their use of arrests or increasing their practice of reporting behavioral incidents to the state, these changes would be accounted for by the year fixed effects. Finally, the district and school fixed effects allowed relationships to be adjusted for time-invariant observable and unobservable characteristics of districts/schools, the students they serve, and their surrounding communities. For example, the fixed effects approach controlled for quality of leadership, discipline policies, school climate, curriculum and pedagogical approach as well as characteristics such as community crime to the extent that they remained constant throughout the years of data included in the study. Collectively, these analytic techniques accounted for many potential sources of bias in the estimation of the relationship between law enforcement in schools and outcomes. While they may not entirely remove the possibility of selection bias, they produced estimates that more closely approximated causal estimates of law enforcement's effects on the various outcomes.

## Findings

This section details the findings of the analysis. It begins with a descriptive overview of how the presence of law enforcement in schools in Florida has changed since the 2014-15 school year. It then presents results of the regression models that predict school behavioral incidents as reported to SESIR, the number of behavioral incidents reported to law enforcement,

the number of school arrests, and the frequency of school discipline. Across each, results are presented from both the district-level and school-level analyses.

Overall, the findings of the report show that the presence of law enforcement in schools in Florida are above the national average and have been increasing, particularly in elementary schools, as a result of the 2018 Marjory Stoneman Douglas High School Public Safety Act. The results suggest that this increased presence of law enforcement in schools has resulted in no decreases in reports of behavioral incidents in school and a greater number of reports of such incidents to law enforcement. Furthermore, the evidence suggests that the presence of law enforcement increases juvenile arrests at school. Finally, the results show that the presence of law enforcement in schools does not reduce the frequency of school disciplinary incidents (i.e. suspensions).

## Descriptive Statistics

### The Presence of Law Enforcement in Florida Schools is Increasing

Nationally, the presence of law enforcement in public schools has increased significantly over the last several decades, reflecting an increasing use of law enforcement approaches in school settings. This trend towards placing law enforcement in schools has been particularly evident in Florida. As shown in Figures 1 and 2, during the 2014-15 school year, school districts reported 1,430.31 law enforcement officers serving 2,519 schools (reflecting many law enforcement officers being shared across schools). By the 2018-19 school year, districts would report 3,638.5 law enforcement officers serving 3,235 schools. While some schools continued to share law enforcement, these figures reflect a trend toward schools, particularly elementary schools, having their own dedicated law enforcement officer and for some schools, particularly larger high schools, to have multiple law enforcement officers.

 Source: School district reports to state Safe Schools Appropriation Expenditure Reports

Figure 2. Number of school law enforcement in state of FL from 2014-15 to 2018-19  
 Source: School district reports to state Safe Schools Appropriation Expenditure Reports

Tables 3 and 4 show levels of law enforcement coverage at the district-level and school-level respectively. As is evident, the increasing presence of law enforcement in Florida schools was driven largely by the 2018 passage of the Marjory Stoneman Douglas High School Public Safety Act (represented by the vertical red line in Figures 1 and 2), which required either law enforcement, armed private security, or armed staff in schools. The number of law enforcement reported in schools almost doubled (increased by about 97%) between the 2017-18 and 2018-19 school years, from 1,844.5 to 3,638.5. Similarly, between the same years, the number of schools with law enforcement present increased by about 40% from 2,309 schools to 3,235. The relatively larger increase in the number of law enforcement in schools relative to the number of schools with law enforcement reflects the tendency for elementary schools to move from shared law enforcement to a dedicated officer as well as the trend toward larger schools housing multiple law enforcement officers.

With a few exceptions, the increased presence of law enforcement as a result of the 2018 Act was generally experienced across all districts in the state. Figure 3 shows the number of school-based law enforcement per 1,000 students enrolled by district as well as the change in the number per 1,000 students between the 2017-18 and 2018-19 school years.

Figure 3. Change in ratio of law enforcement in schools per 1,000 students from 2017-18 to 2018-19 school years

Source: School district reports to state Safe Schools Appropriation Expenditure Reports

As is clear from the figure, most districts experienced substantial increases in law enforcement presence. There were eleven districts that decreased the ratio, with only three of these representing substantially sized decreases. It is also worth noting that some districts reported potentially suspect numbers of school-based law enforcement to the state. For example, Santa Rosa County reported substantially more school-based law enforcement than schools, particularly at the elementary school level. In some other cases, such as Duval County, there is evidence that the numbers reported as school-based law enforcement may include individuals acting as school safety assistants – armed individuals trained by the Sheriff’s Office who wear uniforms but lack full arrest powers. For the purpose of the district-level analysis presented here, the data was used as reported by districts; however, the school-level analysis provides more precise identification of sworn law enforcement’s presence.

### Elementary Schools Experienced the Largest Increase in Law Enforcement Presence

The overall upward trend in the presence of law enforcement in Florida schools hides the fact that this increase has been disproportionately felt by the state’s youngest learners. When disaggregating the presence of law enforcement by school level (elementary, middle, or high), it is clear that the increased presence of law enforcement driven by the 2018 Act has been almost exclusively driven by increases in law enforcement in elementary school settings.

Figure 5. Number of school law enforcement in state of FL from 2014-15 to 2018-19 school years by school level

Source: School district reports to state Safe Schools Appropriation Expenditure Reports

As shown in Figures 4 and 5, the largest increases in law enforcement presence have occurred in elementary schools. During the 2014-15 school year, there were 272.75 law enforcement officers in elementary schools in the state of Florida. By the 2018-19 school year, there would be 1,830 law enforcement officers in elementary schools. Between the 2017-18 and 2018-19 school years, the number of law enforcement in elementary schools would increase by

almost 221% or more than triple. Similarly, the number of elementary schools with law enforcement present would increase from 1,164 in 2014-15 to 1,754 in 2018-19. From 2017-18 to 2018-19, the number of elementary schools with law enforcement would increase by 56%. These trends reflect elementary schools in the state without law enforcement adding them and many elementary schools that had previously shared a law enforcement officer with another school moving to have full-time law enforcement coverage.

As will be shown next, these increases in the presence of law enforcement in schools largely trended in the same direction as reports of behavioral incidents, reports of behavioral incidents to law enforcement, school arrests, and student discipline during this time period.

### Behavioral Incidents Reported to the State, Reports to Law Enforcement, School Arrests, and Exclusionary Discipline Increased following the 2018 Act

The goal of the 2018 Act was to increase the safety of schools, both to prevent acts of mass school violence such as the tragedy at Parkland but also to generally improve the overall safety of schools. Descriptively, however, data show that trends in reported behavioral incidents, reports to law enforcement, school arrests, and use of exclusionary discipline tended to increase rather than decrease following the Act's 2018 passage. This section describes trends in these outcomes before turning to analyses that explore whether these trends are linked to the presence of law enforcement in schools.

The number of behavioral incidents reported by school districts to SESIR, the state reporting mechanism, increased dramatically from the 2017-18 to 2018-19 school years. As shown in Figure 6, the number of reported behavioral incidents went from 71,159 in 2017-18 to 84,649 in 2018-19, an almost 19% increase in reported incidents. In raw numbers, this reflects an additional 13,490 behavioral incidents reported in Florida schools.

Source: School district reports to FL DOE

Figure 7. Number of reported behavioral incidents in state of FL from 2014-15 to 2018-19 school years by school level

Source: School district reports to FL DOE

The descriptive statistics suggest that this increase in reported behavioral incidents was largely driven by lower level incidents, categorized by the state as Level 3 and Level 4 incidents. As shown in Figure 7, the largest increase was seen in level 4 incidents, which increased by about 74% between 2017-18 and 2018-19. Within levels, however, the increases in reported behavioral incidents were driven by a handful of specific incident types. Specifically, there were meaningful increases in the district averages in the prevalence of bullying, threats/intimidation, drug related incidents, and tobacco related incidents (see Tables 5 and 6). Notably, in 2018-19, districts on average reported about 267 tobacco related incidents, more than doubling the previous year's average of 123. On a positive note, there were several incident types that showed notable decreases including physical attacks which decreased from a 2017-18 district average of 137 incidents to about 125 incidents in 2018-19.

These trends in reported behavioral incidents were largely mirrored by the trends in behavioral incidents reported to law enforcement. Figure 8 shows the number of behavioral incidents reported to law enforcement by year and Figure 9 shows these disaggregated by level. While only about a third of behavioral incidents reported to the state are reported to law enforcement in any given year, there was nevertheless a notable increase in the number of incidents reported to law enforcement following the 2018 Act. As shown, in 2017-18, there were 23,404 behavioral incidents reported to law enforcement. In the 2018-19 school year, school districts would report 29,275, an approximately 25% increase in the number of behavioral incidents reported to law enforcement. Notably, this percentage change in the number of incidents reported to law enforcement almost exactly matches the percentage change in the number of behavioral incidents reported to the state. In other words, the proportion of behavioral incidents reported to law enforcement appears relatively constant over time, despite increases in both reported behavioral incidents and their reporting to law enforcement.

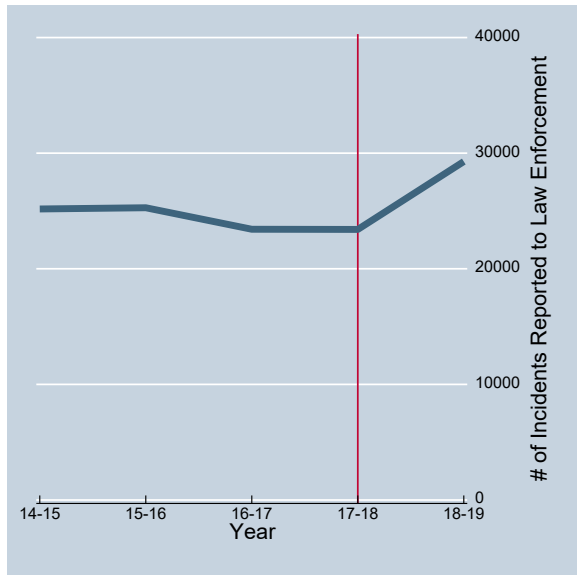

Figure 8. Number of behavioral incidents reported to law enforcement in state of FL from 2014-15 to 2018-19 school years  
 Source: School district reports to FL DOE

Figure 9. Number of behavioral incidents reported to law enforcement in state of FL from 2014-15 to 2018-19 school years by severity level  
 Source: School district reports to FL DOE

Tables 7 and 8 show district-level and school-level averages of incidents reported to law enforcement. As with the incidents themselves, the increase in incidents reported to law enforcement was largely driven by increases in lower level offenses (Level 3 and 4). In particular, the number of Level 3 offenses increased by 21% between 2017-18 and 2018-19 while the number of Level 4 offenses increased by 73%. This means that schools were reporting significantly more Level 3 and 4 offenses to law enforcement following than 2018 Act than before. Specific increases were seen in the reporting of incidents of drug use/possession (district average of 120.19 in 2018-19 compared to 85.64 in 2017-18), tobacco-nicotine (district average of 52.70 in 2018-19 compared to 23.27 in 2017-18), threats/intimidation (district average of 38.54 in 2018-19 compared to 29.04 in 2017-18), and physical attacks (district average of 20.75 in 2018-19 and 12.70 in 2017-18). The last of these was particularly interesting given that the number of physical attacks reported to the state actually decreased between these two school years, suggesting that more of these incidents may be reported to law enforcement even though fewer are occurring.

With more reported behavioral incidents and more reported to law enforcement, it is perhaps little surprise that there were more arrests at school in 2018-19 than in the year prior (see Tables 9 and 10 for district-level and school-level averages, respectively). The frequency of school arrests had actually been decreasing steadily from 2014-15 to 2016-17 (see Figure 10); however, the trend began turning positive through the 2017-18 and 2018-19 school years. While still below the number in 2014-15, there were nearly 8,000 arrests in Florida public schools during the 2018-19 school year. These increases were driven by a leveling out of the number of misdemeanor arrests and an increase in the number of felony arrests in the 2018-19 school year.

Figure 10. Number of public school arrests in state of FL from 2014-15 to 2018-19 school years  
Source: Florida DJJ

Figure 11. Number of public school arrests in state of FL from 2014-15 to 2018-19 school years by race/ethnicity  
Source: Florida DJJ

Interestingly, this recent uptick in school arrests has been largely due to increases in the number of white students being arrested at school (Figure 11). As shown, the number of white students arrested at school increased to 2,863 students in 2018-19 from only 2,393 the year before, an almost 20% increase. The number of arrests of Hispanic students also increased between 2017-18 and 2018-19, growing by about 24%. This contrasts with the number of arrests of Black students which has shown a steady decline over the time period examined. It is important to note, however, that Black students still remain grossly over-represented in school arrests. This is clear given that the number of Black students arrested remains much higher than white students, despite there being fewer Black students enrolled in Florida public schools. In other words, there is clear evidence that racial disparities in school arrests persist in Florida.

Finally, along with increases in school arrests, there were concurrent increases between 2017-18 and 2018-19 in the use of exclusionary discipline practices following several years of declines (see Tables 11 and 12). Figures 12 and 13 show the number of OSS and ISS reported by school districts, both in total and disaggregated by student race/ethnicity. As shown, ISS is slightly more common than OSS, but, combined there were over 343,000 suspensions during the 2018-19 school year. While Black and Hispanic students are over-represented in both OSS and ISS relative to their proportion of students in the state, the trends in suspensions across race/ethnicity were generally consistent over the time period examined.

Source: School district reports to FL DOE

Figure 13. Number of in-school suspensions in state of FL from 2014-15 to 2018-19 school years overall and by race

Source: School district reports to FL DOE

Among other changes in school discipline rates, state data also revealed a significant increase in the number of districts reporting the use of physical restraint on students. Figure 14 shows the number of physical restraints per year. As shown, reports of physical restraints in

2018-19 were over four times as large as those in the prior school year. While it is unclear what accounts for this substantial increase in the reporting of the use of physical restraint, the trend is particularly concerning. It is possible that this increase merely reflects a change in reporting practices among school districts. The next section explores whether these descriptive trends in reported behaviors, reporting to law enforcement, arrests, and discipline are linked to the presence of law enforcement or reflect other, unrelated trends.

## Law Enforcement Presence and Student Outcomes

From the descriptive statistics, it is clear that the increasing presence of law enforcement in schools has been correlated with an increased frequency of a number of undesirable student outcomes including increased reports of behavioral incidents, increased number of incidents reported to law enforcement, increased school arrests, and increased use of exclusionary discipline. An important question, however, is whether these relationships are driven by the presence of law enforcement in schools or by other factors. In other words, are law enforcement in schools causing increases in these outcomes?

Results of the regression analyses with observable controls and fixed effects provide more evidence to answer this question. As described previously, the analytic technique accounts for differences in school contexts that are observable, for time trends that affect all districts/schools in the state, and for fixed characteristics of districts/schools over time. The results presented in this section, then, more closely approximate the effect of law enforcement on each of the outcomes. I begin by discussing the relationship between law enforcement and reported behavioral incidents in schools and then present results for behavioral incidents reported to law enforcement, school arrests, and student discipline. For each outcome, results are presented both from the district-level analysis, which covers all districts in the state, and for the school-level sample, which covers schools in approximately 84% of districts in the state. As will be shown, results are generally consistent between both. Finally, this section concludes with a description of a set of sensitivity and robustness checks.

### Law Enforcement Presence and Reported Behavioral Incidents in Schools

The presence of law enforcement in schools was generally predictive of a greater number of reports of behavioral incidents in schools. At the district-level, the number of schools served by law enforcement was a statistically significant predictor of the number of reported behavioral incidents, both in models without district fixed effects and with their inclusion. As shown in columns 1 and 2 of Panel A of Table 13, each additional school in a district served by a law enforcement officer predicted a .14 to .33 percent increase in the number of reported behavioral incidents in the district. Though this is less than a percentage point, this translates to

Figure 14. Number of physical restraints in state of FL from 2014-15 to 2018-19 school years by level

approximately 1.5 to 3.6 more reported incidents for the average size district for each additional school with an officer present. Furthermore, it suggests that, if the average size district in the state had no schools with officers as compared to all schools with officers, there would be approximately 85 to 200 fewer behavioral incidents reported per year in that district.

At the school-level, results were generally similar, though the positive relationship between law enforcement and reported behavioral incidents became insignificant when school fixed effects were included. As shown in columns 1-2 of Panel B of Table 13, the presence of an officer predicted a 38.5% greater number of reported incidents in models with district fixed effects. In models with school fixed effects, however, the IRR was reduced to 1.024 and was statistically insignificant. This could be a function of the school fixed effect better accounting for underlying characteristics of the schools, or, it may also reflect the fact that the school fixed effects models were driven largely by variation at the elementary school level, given that there were far more elementary schools that went from not having an officer to having an officer than was the case for middle or high schools. Indeed, as shown in Figure 15, the relationship between law enforcement and reported behavioral incidents was largest in middle and high schools, suggesting that the lack of significance in the school fixed effects model may be a function of much of the within-school variation coming from elementary settings.

The increase in reported behavioral incidents as a result of law enforcement in schools appeared to be driven primarily by Level 2 offenses (see columns 3-10 of Table 13). As shown, the relationship between law enforcement and reported behavioral incidents was statistically significant and positive in both the district-level analysis and school-level analysis and across models with varying fixed effects for Level 2 offenses. In contrast, offenses at other levels were not consistently statistically significant, particularly in the fully specified models. The results are clear that the presence of law enforcement in schools was not systematically related to decreases in behavioral incidents and may result in more reports of such incidents, suggesting that schools were not made safer by the presence of law enforcement.

### Law Enforcement Presence and Reports to Law Enforcement

In addition to potentially increasing the number of reported behavioral incidents in schools, the presence of law enforcement positively predicted the number of behavioral incidents that were reported to law enforcement by schools. At the district-level, each additional school with an officer present positively predicted a statistically significant increase in the number of behavioral incidents reported to law enforcement (see columns 1-2 of Panel A of Table 14). The coefficients ranged from 0.0011 in the model with district fixed effects to 0.00312 in the model without district fixed effects, which, relative to the average number of incidents

Figure 15. IRRs and 95% confidence intervals predicting behavioral incidents by level from the school-level analysis

reported, translates to an approximately 0.41 to 1.17 additional incidents reported to law enforcement by a district per year for each additional officer. This suggests that if the average size district in the state had no schools with officers as compared to all schools with officers, there would be between 6-17% fewer incidents reported to law enforcement or between 23 to 65 fewer incidents reported annually by such a district.

Similarly, at the school-level, the presence of a law enforcement officer in a school was a significant predictor of reports of behavioral incidents to law enforcement. As shown in columns 1-2 of Panel B of Table 14, having an officer in a school was related to a higher number of behavioral incidents reported to law enforcement, both in models with district fixed effects and school fixed effects. This positive relationship ranged from a 25.7% increase in incidents in the school fixed effect model to a 64.8% increase in the district fixed effects model which, based on the average number of incidents reported by a school, would equate to 2.12 to 5.35 additional incidents reported to law enforcement per year per school. While this positive relationship was generally significant across grade levels, the relationship was particularly pronounced at the middle school level (see Figure 16). This is consistent with prior research that has found that school disciplinary rates and effects of SROs can be more pronounced for middle schoolers.

Across both district and school-level analyses, the results suggest that the effects of law enforcement in schools on reports of behavioral incidents to law enforcement may be most pronounced among lower level offenses. As shown in columns 3-10 of Table 14 and in Figure 17, the relationship between law enforcement in schools and number of incidents reported to law enforcement tended to be highest for Level 4 offenses (the least serious) and lowest for Level 1 offenses (the most serious offenses). This suggests that the presence of law enforcement may be resulting in more frequent reporting of offenses that may otherwise have been handled by school staff without involving law enforcement.

Figure 16. IRRs and 95% confidence intervals predicting behavioral incidents reported to law enforcement by school-level from the school-level analysis

Figure 17. Coefficients and 95% confidence intervals predicting behavioral incidents reported to law enforcement by severity level from the district-level analysis

## Law Enforcement Presence and School Arrests

Given that law enforcement presence in schools appeared to result in more behavioral incidents being reported to law enforcement, it was also important to examine whether more students were arrested at school as a result. As shown in Table 15, results of models predicting the number of arrests of juveniles at public schools demonstrate that the presence of law enforcement in schools likely increased arrests of students. In the district-level analysis (Panel A of Table 15), the relationship between law enforcement presence and school arrests was consistently positive, though often statistically insignificant. The lack of consistent significance in the district-level models, however, may have been a function of the relatively smaller sample size and lack of ability to link arrests occurring in particular schools with the placement of law enforcement in those schools. Results from the school-level analysis (Panel B of Table 15) show that, with the additional precision afforded in the school-level dataset, these positive relationships held and were statistically significant, both in district and school fixed effects models. As shown, the presence of law enforcement in schools predicted 40 to 82% more arrests, on average. Relative to the average number of arrests (2.55), this suggests that the presence of a law enforcement officer in a school resulted in approximately 1-2 more arrests per school per year. Across the average sized district, the difference in arrests if the district had no law enforcement relative to having law enforcement in all schools would therefore equate to about 55 to 110 fewer arrests per year.

Interestingly, while a positive relationship with arrests was seen across racial/ethnic groups, the impact was most consistent for white students, rather than Black or Hispanic students. As shown, in the district-level analysis, only the coefficient on white students reached statistical significance at the  $p < .05$  level. Similarly, at the school-level, the impact on arrests was statistically significant for white students in both the district fixed effects and school fixed effects models, while, for Black and Hispanic students, the result, though still positive in direction, was statistically insignificant when the school fixed effects were included. Importantly, statistical tests of the difference in the coefficients for white student arrests were no different than those for Black or Hispanic students, suggesting that the impact of law enforcement is not necessarily larger for white students, despite being more consistently statistically significant. While prior research would have suggested larger impacts on racial/ethnic minority students, this finding was consistent with descriptive trends in the state which show increases in school-based arrests of white students between 2017-18 and 2018-19 without a similar increase for Black students. It is also important to note that the rate of school arrests remains higher for Black and Hispanic students, indicating that despite school-based law enforcement increasing arrests of white students, Black and Hispanic students remain

Figure 18. IRRs and 95% confidence intervals predicting school arrests by grade level from the school-level analysis

disproportionately likely to experience an arrest at school relative to their white peers.

The relationship between law enforcement presence and school arrests was generally consistent across grade levels. As shown in Figure 18, the IRR was similar across elementary, middle, and high schools, suggesting that the presence of a law enforcement officer increases the probability of arrest fairly equally across grade levels. Importantly, however, each of these increases was relative to different base line rates of arrest. Given that elementary schools had far fewer school arrests than middle or high schools, the increase in the number of arrests as a result of school-based law enforcement was still more pronounced at higher grade levels.

Finally, an exploratory analysis was conducted examining the relationship between law enforcement presence and school arrests by offense type. Versions of the primary equation were estimated using arrests by offense type as the outcome. In the district-level analysis with district fixed effects, there were positive and at least marginally ( $p < 0.10$ ) significant relationships with assault/battery, burglary, disorderly conduct, and petit/larceny. At the school-level with district fixed effects, a number of offense types were statistically significant (significant ones are shown in Figure 19). When the school fixed effects were added to the school-level analysis, assault/battery and weapons arrests remained positive and statistically significant while felony drug arrests was marginally significant.

### Law Enforcement Presence and Exclusionary Discipline

While law enforcement in schools would be expected to increase the likelihood of reports to law enforcement and arrests, prior research also suggests that their presence may contribute to a greater use of exclusionary discipline practices like suspension. Table 16 presents results of models predicting the use of OSS and ISS from indicators of law enforcement in schools as well as OSS broken out by race. As shown, there were few significant relationships in the district-level analysis and, while estimates were positive and significant in the school-level analysis with district fixed effects, these relationships were not robust to the inclusion of the school fixed effects. As a whole, then, these

Figure 19. IRRs and 95% confidence intervals predicting school arrests by offense type from the school-level analysis

results suggest that, in the Florida context, the presence of law enforcement in schools were not necessarily resulting in increases in the use of exclusionary discipline.

### Sensitivity and Robustness Checks

As discussed previously, for the district-level analysis, the primary analytic approach was to model the logged version of outcomes using an ordinary least squares regression framework with weights for district enrollment to account for differing sizes of districts. This approach was used to account for the skewed distribution of the outcome variables and was suitable given that few districts reported values of zero for the outcome (which would result in an unidentified value when log transformed and therefore drop from the analysis). In contrast, at the school-level, there were many schools that reported no incidents. Consequently, the primary school-level analyses were reported using conditional fixed effects negative binomial regression, an approach suitable for count outcome data that retains observations with values of zero.

In addition to these primary analytic approaches, a series of sensitivity checks were conducted to explore the robustness of the findings to alternative estimation approaches. In particular, versions of the primary equations were estimated that used ordinary least squares regression, used untransformed outcome variables, included or omitted weighting for enrollment, and used Poisson regression (another method appropriate for estimating count outcomes). Additionally, models were estimated that used the number of law enforcement in a district or in a school as the independent variable rather than the number of schools served or the binary indicator of whether a school had law enforcement. The results of these sensitivity analyses are presented in tables in Appendix B. Across these tables, the primary model is shown in the top row and other specifications are shown below. For ease of comparison, statistically significant positive relationships are highlighted in blue and statistically significant negative relationships are highlighted in orange. Statistically insignificant findings have a white background. While the coefficients were expected to be different in size across some models given the different estimation strategies, the sensitivity checks generally show that the primary results are robust to a number of specification choices.

### Limitations

While this report provides the most comprehensive analysis of law enforcement in Florida schools to date, it is important to note several limitations. First, results of this study are limited to reports of law enforcement and outcomes by school districts. As noted earlier, there is some indication that school districts may report school safety assistants and other personnel as law enforcement to the state. While these individuals are not technically sworn law enforcement and generally lack arrest power, they are trained by a Sheriff's department, typically wear uniforms, and are armed. Consequently, it is likely that many students perceive and experience them in ways similar to sworn law enforcement.

Next, this analysis was unable to identify alternative forms of security in schools such as armed school staff, unarmed security guards, or other private security. Given the 2018 Act, any school without law enforcement in 2018-19 was required to have either an armed staff member or other armed security personnel. Consequently, the results of this analysis should be interpreted as comparing the use of law enforcement in schools to a mix of other alternatives that, depending on the year, may include no security personnel, unarmed security personnel, or armed non-law enforcement personnel. It is expected, however, that the impact of such comparisons to other security personnel would diminish relationships estimated in this analysis,

meaning that the true impacts of law enforcement on student outcomes may be larger than those reported here.

Finally, it is worth noting that this study cannot definitively eliminate all sources of selection bias. While the research design accounts for a large number of potential confounding variables, it is nevertheless possible that districts/schools with and without law enforcement varied in unobservable ways that contributed to the observed relationships. That said, the analytic approach used here accounted for a robust set of differences in schools including observable characteristics of the students served, general time trends in the state as a whole, and time-invariant characteristics of the district/schools such as general crime or safety of areas that schools serve. As a result, this analysis provides a very rigorous estimate of law enforcement's relationship with student outcomes.

## Conclusion

In the months following the killing of George Floyd by law enforcement, school districts and local governments across the country have reconsidered the role of law enforcement in their schools, with several large districts choosing to remove law enforcement. These discussions and actions are in distinct contrast to what had previously been a decades long trend toward increasing the number of schools across the nation that have law enforcement present (Correa & Diliberti, 2020; Musu-Gillette et al., 2018). This research report contributes to these ongoing policy discussions over whether law enforcement should be placed in schools.

The findings of this report suggest that, in Florida, the presence of law enforcement in schools is linked to a number of undesirable outcomes for students and schools. Despite being placed in schools largely to improve safety, the results of this analysis suggest that school-based law enforcement have not reduced the frequency of behavioral incidents occurring in schools. In fact, their presence appears to result in more behavioral incidents being reported to the state tracking system.

What is more, the results of this analysis suggest that law enforcement in schools results in greater exposure of students to law enforcement responses. The results consistently showed that, when law enforcement are in schools, a greater number of behavioral incidents are reported to law enforcement. Alarming, there is evidence that law enforcement in schools increases the frequency of lower level incidents being reported to law enforcement.

The results also suggests that this increased reporting of incidents to law enforcement leads to more students experiencing arrest at school. Results of the school-level analysis consistently showed that the presence of law enforcement in schools was related to a greater number of juvenile arrests in public schools. While district-level results were statistically insignificant, they nevertheless followed the same trend. In contrast to what might be suggested by prior research, the potential impact on school arrests appeared to be most consistent for white students, though Black students continue to be disproportionately over-represented among school arrests overall.

Finally, this report found little evidence that the presence of law enforcement in schools decreased the frequency with which schools reported using exclusionary discipline practices like OSS and ISS. This finding is consistent with there being little impact of school-based law

enforcement on student safety, as it suggests that the frequency of incidents resulting in a serious disciplinary response was not decreased.

The findings of this analysis fit within a mixed set of prior evidence on the impacts of school-based law enforcement on school safety and rather consistent prior evidence that law enforcement increases students' exposure to arrest and exclusionary discipline. Some prior work has found that the presence of law enforcement in schools decreases school crime. For example, using national data, Owens found that principals reported 1-2% fewer disruptive criminal incidents at school when the county they were located in had received a federal grant to support the hiring of school-based law enforcement (2016). Similarly, prior studies have found that the presence of law enforcement in schools is related to higher perceptions of safety among students (Raymond, 2010). That said, other prior work has found that law enforcement do not increase school safety. In a national study of schools, Na & Gottfredson found that schools with law enforcement report more crimes involving weapons and drugs than those without (2013). Other emerging work suggests that, law enforcement in schools may increase students' sense of risk, heightening their perceived need of law enforcement to protect them from objectively unlikely to occur threats (Curran, Fisher, Viano, & Kupchik, 2020).

Even for the most serious of incidents, such as mass shootings, the prior evidence suggests the presence of law enforcement does little to prevent or limit the damage done during such an event. For example, a study of all school shootings that have occurred since the Columbine tragedy found that the presence of law enforcement at a school did not predict lower casualties (Livingston, Rossheim, & Hall, 2019). It is worth noting that many of the mass casualty school shootings, including those at Parkland and Columbine, occurred with law enforcement present on campus.

While prior work is somewhat mixed on the impact of school-based law enforcement on safety, prior work is clear that law enforcement in schools increases students' likelihood of interfacing with and experiencing a law enforcement response like arrest. Prior work has shown that law enforcement in schools result in a greater proportion of incidents being reported to law enforcement and in increases in arrests of students (Owens, 2016). This results in what many have termed the "school-to-prison" pipeline.

The findings of this study demonstrate a potentially similar phenomenon in which students are exposed to a higher level of surveillance by law enforcement. By placing law enforcement in schools, student behavior that would have otherwise occurred and been handled by school personnel is more likely to come to the attention of law enforcement. It is likely then that the increases in behavioral incidents reported to the state and those reported to law enforcement observed in this study are a product not of increased misconduct by students but of increased involvement of law enforcement in the response to such misconduct. Such law enforcement involvement, as seen in this study, potentially increases students' risk of arrest at school and involvement in the juvenile justice system.

Finally, while law enforcement presence in schools was not systematically related to increases in exclusionary discipline, it also did not appear to decrease school's use of exclusionary discipline. Prior research has often found law enforcement presence increases exclusionary discipline (Fisher & Hennessy, 2016; Kupchik, 2010). For example, prior studies have found that schools in Texas that received federal grants to support additional law enforcement in schools resulted in greater rates of school discipline, as much as a 6% increase

among middle schoolers, and that these impacts were driven by increases in discipline for lower level offenses and among Black students (Weisburst, 2019). Qualitative work has shown that these increases may be driven by the ways that law enforcement take part in disciplinary activities such as reporting misconduct to school personnel and assisting with interrogations of misbehaving students as well as the ways that school-based law enforcement may contribute to shifts in school climate more broadly that result in a more punitive environment (Curran, Fisher, Viano, & Kupchik, 2019; Kupchik, 2010). Though there are some exceptions to the finding that law enforcement in schools increase exclusionary discipline, including one that uses a similar approach to this analysis with longitudinal school-level data (Na & Gottfredson, 2013), a meta-analytic review has confirmed that, on balance, most studies show that school-based law enforcement are related to higher rates of exclusionary discipline (Fisher & Hennessy, 2016).

Coupled with such prior research, the findings of this study suggest that schools should carefully consider their use of law enforcement in schools, both whether law enforcement should be present in schools at all and, if they are, the roles and interactions that law enforcement engage in with students. While many districts nationwide are considering removing law enforcement from schools, the decision in Florida is complicated by the restrictions of the 2018 Marjory Stoneman Douglas High School Public Safety Act which requires schools to have armed personnel. While schools in other states can decide to not have law enforcement or any armed personnel present, Florida schools that opt not to use school-based law enforcement are then required to either arm school personnel (such as teachers) or hire private armed security. Unfortunately, neither of these alternative solutions are evidence-based and each raises its own set of concerns around student safety and well-being. Consequently, there is a need for the state law to be revisited to return flexibility to local districts to determine whether law enforcement or armed personnel should be in schools. In the meantime, if schools determine that the use of law enforcement is preferable to the alternatives, they should actively take steps to reduce the potentially negative impacts of school-based law enforcement on student outcomes. To this end, the following policy recommendations are offered:

1. School districts should reconsider whether law enforcement should be present in schools, keeping in mind that state law limits alternatives.
2. The state requirement to have armed personnel in schools should be revisited with an eye toward returning control to local school districts and schools to determine how best to ensure a safe learning environment.
3. School districts and law enforcement agencies should adopt clear policies that restrict the ability to arrest to a limited set of serious infractions and prohibit arrest of young students.
4. If present, law enforcement in schools should be trained in age-appropriate conflict resolution, in ways to reduce implicit bias and disproportionate minority contact, and in alternatives to the use of force or arrest.

At the end of the day, all students deserve a safe, supportive, and equitable learning environment. The results of this analysis suggest that the use of law enforcement in schools may be compromising student well-being without increasing the safety of schools. It is important, therefore, for policymakers and educators to actively seek solutions to ensure students are safe from unnecessary exposure to law enforcement and arrest.

# NFL vets: ‘Stand your ground’ expansion meant to scare protesters | Commentary

By ANQUAN BOLDIN AND TAKEO SPIKES GUEST COLUMNIST | NOV 25, 2020 AT 6:00 AM

Gov. Ron DeSantis has drafted legislation to expand Florida’s infamous “stand your ground” law. That’s right — he wants to expand the reach of a law that already gives private citizens a license to kill. And he wants to expand its reach to elevate property over human life.

But let’s be clear — DeSantis’ actions have nothing to do with public safety, protecting life, or even valuing property, and everything to do with trying to scare protesters who oppose his policies by providing his supporters with legal cover to use lethal force.

Under his proposal, Floridians would be able to use deadly force against individuals whom they personally deem to be “looters” or “violent” protesters. But whether a protester is, in fact, “violent” rests in the eye of the beholder, as the proposed legislation fails to adequately define or clarify the circumstances or behaviors that would warrant such a designation. For example, the new legislation would allow the use of force against people who engage in **“criminal mischief” resulting in the “interruption or impairment” of a business**. It is dangerously unclear, though, what qualifies as “criminal mischief” or “interruption or impairment” of a business.

DeSantis claims the proposal is needed to stop what he **calls** “violent and disorderly assemblies,” but the truth is that protests have been **“overwhelmingly peaceful.”** It is clear the real goal here is to deputize people in Florida to use deadly force as they see fit, giving them legal cover to shoot first and ask questions later. This is **terrifying**, especially if you’re Black. That’s because **Florida’s** “stand your ground” law is typically a defense or justification **only made available** to people who kill *Black* people. If the victim is Black, the killer is more likely to be extended the benefit of the doubt that they “stood their ground.” The reverse has **proven** not to be true.

It is unconscionable that a governor would respond to calls for change and progress with a plan that will only increase violence in our state — and increase violence against Black people, in particular.

It is unconscionable, but it is not new. Obstacles to racial equality have come in a variety of shapes and forms, but the underlying message has always been the same: where there is a glimmer of progress, fear-mongering and terror are sure to follow.

Progress rarely comes quickly or easily. All great movements for racial equality in American history have been met with swift and usually dangerous consequences for people of color, especially Black Americans. Remember the poll taxes and literacy tests when Black Americans fought for equal access to the ballot box? The fire hoses and dogs that were unleashed when Black Americans fought for civil rights?

The **racial terror lynchings**? Cross burnings under the cover of night? Church bombings?

As the momentum for racial justice swelled in the months following George Floyd's death, the consensus was clear: Americans possessed a collective will to fight systemic racism in our society. With a **majority of Americans** believing there is a larger, systemic problem of racism and police brutality in this country, we might actually be on the brink of real, sustainable change.

But just as Americans, particularly Black Americans, are demanding an end to police brutality and a basic affirmation that Black lives matter, obstructionists are returning to the drawing board to develop new intimidation tactics to block progress.

Gov. DeSantis' "anti-mob" legislation expanding the state's "stand your ground" law is one such intimidation tactic. It is textbook resistance to progress, harkening back to a time to which none of us should wish to return. If history is any teacher, we should have learned by now that Black Americans are disproportionately targeted and victimized by laws — official and unofficial — that empower private citizens to take the law into their own hands. And that's exactly what DeSantis' proposed legislation does — it endorses vigilante justice and puts a target on the backs of Black people, all under the guise of law and order.

At a time when Floridians, and Americans of all stripes, are asking for an end to state-sanctioned violence, DeSantis seeks to further entrench it with this proposed legislation. The Florida Legislature should reject it out of hand and fail to even advance it out of committee.

Letting private individuals define who is or is not a "looter" or "violent" protester, and then empowering them to use potentially deadly force in response to that perception, is not only terrifying in theory but will be in practice, as well. Just terrifying enough to make us want to stay home and refrain from protests, altogether, no matter how peaceful. And that, my fellow Floridians, seems to be the point.

*Anquan Boldin, a retired NFL wide receiver, is the co-founder of Players Coalition, a group of athletes in all sports working toward social justice and racial equality. Takeo Spikes is a retired NFL linebacker who now works as a TV and radio analyst.*

**Subject:** No HB1! Protect Floridians First Amendment Rights

Kimberly Simon,

HB1 is an unconscionable racist crime against the First Amendment and our CONSTITUTIONAL RIGHT TO PEACEFUL PROTEST.

Please OPPOSE HB1. I can't believe that this legislation even got assigned to a public hearing much less that it has been fast-tracked through the House on party lines. Florida currently faces the worst crises in economy and public health in history and instead of working to find solutions, HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

Floridians do not stand with you on HB1.

Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** On HB1: oppose it!

Elected Representative,

I am a Florida resident contacting you today to urge you to OPPOSE HB1, the Combatting Violence, Disorder, and Looting Law Enforcement Protection Act. There are already laws in place regarding violence, disorder, and looting, which do not infringe on protesters' due process protections and extra protections for Law Enforcement Officers in the state of Florida under FL §112.532.

While the events that took place at the Capitol on January 6, 2021, are abhorrent and a direct attack against democracy, it is also evident due to the circumstances of 2020 that law enforcement is not always capable of discerning civil disobedience. A constitutionally protected act, from rioting and other illegal activity. This bill language was drafted before the Capitol siege and targeted civil rights protesters, many of whom were eventually proven innocent.

Just this summer in Jacksonville, over 70 peaceful civil rights protesters were unlawfully detained. Among these protesters were families, students, pastors, business owners, teachers, medics, and lawyers. All charges were dropped. Four protesters even sued the Jacksonville Sheriff's Office and won a \$100,000 settlement due to their rights being deliberately violated. With this new bill, these innocent people would have had incredible difficulty maintaining their freedom, even in the court of law.

As a concerned citizen, I am asking you not to allow fear and chaos to influence a hasty decision that could jeopardize honest Americans' freedom. We have seen the blatant double standards regarding protesting and treatment amongst groups, and this bill was proposed before this tyrannic event and is only being pushed into legislation in haste and to further suppress our freedoms.

VOTE NO on HB1.

Sincerely,  
Ali Talwar

**To:** Brown, Natalie <Brown.Natalie@flsenate.gov>  
**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

HB 1 is clearly unconstitutional. It invites government infringement on our individual liberties- our first amendment rights- and paves the way for State overreach into local matters.

You each took an oath to uphold and defend the constitution. So with that in mind, it should be very simple for you to vote no on HB 1 and kill it in this committee.

Thank you

Sarah Brummet

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing.

This proposed legislation (HB1) is flawed in several ways: (1) it's unconstitutional as it restricts/chills the exercise of free speech rights under the 1st Amendment to the US Constitution;  
(2) it's also unconstitutional as it tries to ban our right to petition our government for redress from "public spaces" (State property); (3) it's unnecessary as existing laws already adequately cover those who engage in violence (at or near protests); and (4) it's likely to encourage some people (vigilantes) to violently engage with even peaceful protesters (we don't need to extend "stand your ground" doctrine to this arena).

I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deemed responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to

“defund” the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government’s ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It’s time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional." Mr. DeSantis' efforts pre-dates the events of the Capitol, please do not now wrap this in the American Flag and represent you are protecting our safety- in fact, you would making a dangerous move towards totalitarianism.

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

Please know that I am already letting people know that they should not travel in Florida, they should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**To:** Hebel, Meagan <Hebel.Meagan@flsenate.gov>  
**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

Good Day,

I am a Mom/Grandma.

I am a Veteran, Service Connected Disability.

I am a Retired Federal Employee.

I am done being quiet about a number of Issues.

Florida Legislators I am Putting You All On Notice.

Put Lives, all Life, Human, Animal, the Planet Above Profit.

Put Lives, all Life, Human, Animal, the Planet Above Corporate Greed.

Donna May Evans  
aka Crazy Granny.

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed

the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were “much more likely”. On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was “very important”. (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to “defund” the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government’s ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It’s time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**To:** Simon, Kimberly <Simon.Kimberly@flsenate.gov>  
**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

Natalie Brown,

I am writing to you to ask request that you OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am questioning how this legislation got assigned to a public hearing. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Meagan Hebel,

To whom it may concern:

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing, much less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida, HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deemed responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families

in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Sincerely,  
Maya Davis

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**To:** Brown, Natalie <Brown.Natalie@flsenate.gov>  
**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". **Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional." Mr. DeSantis' efforts pre-dates the events of the Capitol, please do not now wrap this in the American Flag and represent you are protecting our safety- in fact, you would making a dangerous move towards totalitarianism.

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

Please know that I am already letting people know that they should not travel in Florida, they should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. **Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

The right to peaceful assembly is fundamental to our country and a right clearly protected by the Constitution. I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Kimberly Simon,

Howdy howdy the below is a form letter that I agree with, but I want y'all to know this bill is such racist crap. The problem isn't protesters. The problem is white supremacists. Take care of them and you won't have BLM protestors to be racist towards.

Anyway here's the form letter, have a nice day.

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing much less that it has been fast-tracked through the House on party lines. Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am disappointed that this legislation has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the the housing crisis, the unemployment crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida, this legislation is presented as smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. Passing this bill is against our constitutional rights of freedom of assembly and speech. To pass this law is Un-American, unconstitutional, and simply racist.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing much less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deemed responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

My name is Kayden Karmazin and I am a resident of Palm Beach Gardens, Florida. I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. What we saw yesterday from the proponents of HB1 is nothing but contempt for their constituents who oppose it. Florida currently faces the worst economic and public health crisis in history but instead of working to find solutions to these problems, HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. **Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

Please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

Natalie Brown,

Howdy howdy the below is a form letter that I agree with, but I want y'all to know this bill is such racist crap. The problem isn't protesters. The problem is white supremacists. Take care of them and you won't have BLM protestors to be racist towards.

Anyway here's the form letter, have a nice day.

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing much less that it has been fast-tracked through the House on party lines. I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines.

This bill is a violation of of Floridian's First Amendment rights to free speech. And it criminalizes people based on their race and politics if they speak out. If it is passed it will be taken to court and the State of FL will have to spend taxpayer's money to defend a case that will lose and the law will be over turned. Do not waist Floridian's time and money on this abuse of the Constitution.

This legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. **Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**To:** Simon, Kimberly <Simon.Kimberly@flsenate.gov>  
**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. **Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Natalie Brown,

The right to peaceful assembly is fundamental to our country and a right clearly protected by the Constitution. I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Natalie Brown,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

Kimberly Simon,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.

**Subject:** Oppose HB1 and Protect Floridian's First Amendment Rights

Meagan Hebel,

I am writing to you to ask you to please OPPOSE HB1 at the House Justice Appropriations meeting when it is scheduled for a hearing. I am outraged that this legislation even got assigned to a public hearing must less that it has been fast-tracked through the House on party lines. Florida currently faces the worst economic and public health crisis in history and instead of working to find solutions HB1 criminalizes free speech, peaceful assembly and dissent through unconstitutional language that is targeted at silencing Black voices demanding basic human rights, equality, and fair treatment by law enforcement.

Instead of addressing the horrendous housing crisis, the broken unemployment system, the failing healthcare system, the disorganized and chaotic education system, AND the rising number of deaths, poverty, job loss and sickness in Florida HB1 repackages legislation put forward by Governor DeSantis as a "response to the violent insurrectionist mobs" that attempted a coup on the nation's Capitol. This language is a smokescreen for the true intent of the bill which is to circumvent the mess that Florida has as a consequence of the pandemic and lack of support for Florida's poverty impacted and oppressed. I am not fooled by this. This is the same legislation it was back in September with the same purpose - to limit the basic civil rights of BLM protestors that is guaranteed to all people under the US Constitution.

I believe that HB1 is being used to distract media and organizers from focusing on the real problem: lack of support for those in need across the state. How dare the Governor and the Florida Legislature waste taxpayer time and money on proposing solutions to a made up problem. Section 870 of the Florida Statute already criminalizes riots, unlawful assemblies, and looting but this legislation would actually make it legal for motorists who strike protestors with their vehicle, even if the incident results in someone's death. It limits people's ability to apply to Florida's already broken unemployment system if they have been convicted under the proposed legislation and allows victims of violent crimes to recover civil damages from a local government that is deems responsible for grossly negligent "policing" during a "riot". Meanwhile, the Florida Legislature is fast-tracking HB7/SB72 to create COVID19 liability immunity for the real victims of negligence by businesses, government agencies, schools, and religious organizations who have caused the spread of COVID19.

The Executive Director of the ACLU of Florida, Micah Kubic, stated that "This (bill) is not an attempt to make our communities safer. This proposed legislation by DeSantis is nothing more than a campaign political stunt. Now, it is being disguised as a response to the failed violent coup at the US Capitol. And, it is just as unconstitutional."

A statewide survey of Florida voters put out after the attack by Donald Trump's supporters on the US Capitol suggested a lack of support for HB1 and Governor DeSantis' push to amp up criminal penalties for "disorderly" protests. Ninety-percent of those asked stated their support for "protecting our constitutional right to free assembly and free speech by legally protesting without fear of criminal charges". Seventy-one percent of Democrats and 74% of Republicans deemed the issue a top priority. Eighty percent of respondents said they were more likely to support a legislator who voted to protect that priority, and 56% were "much more likely". On the other hand, 83% of respondents thought that it was important to strengthen unemployment protections for people who lost their jobs because of COVID-19, 63% said that this was "very important". (1)

Finally, this legislation also creates a preemptive attack on local municipalities that might want to "defund" the police and put their money towards more humanitarian initiatives to provide real solutions to small business and economic crises caused by the pandemic. Instead of restricting local government's ability to find solutions we need legislation that answers the call of the people in the streets. People only protest when they are being abused, oppressed, marginalized or violated. It's time the House Justice Appropriations Subcommittee address the calls of Florida voters and people who cared enough to peacefully assemble. We need to face the issues head on and answer to the humanity and dignity of working class, black, brown, and immigrant families in Florida who are suffering with workable policies that help the state grow and prosper.

If this legislation passes I will be letting people know that they should not travel in Florida, they

should not move to Florida, they should not visit Florida, because our government does not support them and keep them safe. Public health and the economy should be your number one priority. Please OPPOSE HB1 and support legislation that provides real solutions to the real problems Floridians face today.
