

CNN 2022 SOTU Reaction Poll (Poll 3)

The study was conducted for CNN via text message using the SSRS Text Message Panel. SSRS is an independent research company. Surveys were conducted on **March 1, 2022** among a sample of **544** respondents. The margin of sampling error for total respondents is ± 5.5 at the 95% confidence level. The design effect is **1.71**.

Survey respondents were recruited via the SSRS Opinion Panel, a nationally representative panel of U.S. adults age 18 or older recruited using probability-based sampling techniques, from February 22-26, 2022. In those surveys, respondents indicated they planned to watch the President's State of the Union speech and were willing to be re-surveyed by text message after the speech. More information about SSRS can be obtained by visiting www.ssrs.com.

FOR IMMEDIATE RELEASE

NOTE ABOUT RESULTS

Unless otherwise noted, results beginning with the August 3-6, 2017 survey and ending with the April 21-26, 2021 survey are from polls conducted by SSRS via telephone only. Results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from telephone surveys conducted by ORC International. Results before March 31, 2006 are from telephone surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*). Text message respondents were required to answer each question.

NOTE ABOUT CROSSTABS

Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

MORE ON METHODOLOGY

A total of **544** adults nationwide were surveyed via text message. Surveys were conducted in English and Spanish. Surveys were conducted March 1, 2022. Among the entire sample, **41%** described themselves as Democrats, **31%** described themselves as Republicans, and **28%** described themselves as independents or members of another party.

Results for the full sample have a margin of sampling error of +/- **5.5** percentage points.

Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
