

OVERVIEW

The study was conducted for CNN via web on the SSRS Opinion Panel, a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques. SSRS is an independent research company. Surveys were obtained **February 23-26, 2022** with a representative sample of **n=1,002** respondents. The margin of sampling error for total respondents is +/- **4.2** at the 95% confidence level. The design effect is **1.86**. More information about SSRS can be obtained by visiting www.ssrs.com.

EMBARGOED FOR RELEASE: Tuesday, March 8 at Midnight

NOTE ABOUT RESULTS

Results for the January 10-February 6, 2022 and August 3-September 7, 2021 surveys are from polls conducted via web and phone that implemented a full probability design via Address-Based Sampling (ABS). Results for the January 13-18, 2022, December 8-12, 2021, and November 1-4, 2021 surveys are from polls conducted via web and phone on the SSRS Opinion Panel. Results for the October 7-11, 2021, March 25-26, 2019, and September 21-22, 2020 surveys are from polls conducted via web on the SSRS Opinion Panel. Unless otherwise noted, results beginning with the August 3-6, 2017 survey and ending with the April 21-26, 2021 survey are from polls conducted by SSRS via telephone only.

Results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from telephone surveys conducted by ORC International. Results before March 31, 2006 are from telephone surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSSTABS

Surveys were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

Q1. Thinking back on the last two years, overall, would you say the coronavirus pandemic has caused:

	NET Major/ Minor changes	Major changes to your life	Minor changes to your life	No real changes to your life	No opinion
February 23-26, 2022	92%	47%	44%	8%	1%

(Respondents who say the coronavirus pandemic has caused changes to their lives, N=928)

Q2. Would you say those changes have been: [RESPONSES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]

	NET Positive	Nearly all positive	Mostly positive	NET Negative	Mostly negative	Nearly all negative	No opinion
February 23-26, 2022	27%	3%	23%	73%	54%	19%	*

Q1. Thinking back on the last two years, overall, would you say the coronavirus pandemic has caused:

Q2. Would you say those changes have been:

Q1/Q2 COMBO TABLE

	NET Pandemic caused positive changes	NET Pandemic caused negative changes	Pandemic caused changes, No opinion	Pandemic caused no real changes/No opinion
February 23-26, 2022	24%	67%	*	8%

(Respondents who have any children under age 18, N=287)

CCARECOST. Is the cost of paid childcare in your area: **[RESPONSES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]**

	NET Expensive	Very expensive	Somewhat expensive	NET Not expensive	Not too expensive	Not at all expensive	No opinion

ELDERCARE. Some people need ongoing living assistance as they get older. This assistance can be a help with things like keeping house, cooking, bathing, getting around, paying bills, remembering to take medicine, or just having someone check in to see that everything is okay. This can happen at your own home, in a family member's home, in a nursing home, or in a senior community. And, it can be provided by family members, a friend, a volunteer, or a health care professional.

Are you currently providing ongoing living assistance on a regular basis to a family member or close friend or not?

	Yes	No	No opinion
February 23-26, 2022	19%	81%	0%

AP-NORC TRENDS FOR COMPARISON

2018 Mar. 13-Apr. 5	16%	84%	0%	*

MORE ON METHODOLOGY

A total of n=**1,002** adults were surveyed via web on the SSRS Opinion Panel, a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques. Surveys were conducted in English.

Among the entire sample, **30%** described themselves as Democrats, **33%** described themselves as Republicans, and **37%** described themselves as independents or members of another party.

The entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, population density, and civic engagement, and Pew Research Center's NPORS figures for religious affiliation and frequency of internet use. The sample was also weighted for self-reported party identification. The benchmark for party identification was taken from CNN's national poll conducted by SSRS via web and phone from January 10-February 6, 2022, which implemented a full probability design via Address-Based Sampling (ABS).

Results for the full sample have a margin of sampling error of +/- 4.2 percentage points.

Surveys were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.
