CDCHAN-0428

Update and Interim Guidance on Outbreak of Coronavirus Disease 2019 (COVID-19)

Summary

The Centers for Disease Control and Prevention (CDC) continues to closely monitor and respond to the COVID-19 outbreak caused by the novel coronavirus, SARS-CoV-2.

This CDC Health Alert Network (HAN) Update provides updated guidance on evaluating and testing persons under investigation (PUIs) for COVID-19. It supersedes guidance provided in CDC's HAN 427 distributed on February 1, 2020. The outbreak that began in Wuhan, Hubei Province, has now spread throughout China and to 46 other countries and territories, including the United States. As of February 27, 2020, there were 78,497 reported cases in China and 3,797 cases in locations outside China. In addition to sustained transmission in China, there is evidence of community spread in several additional countries. CDC has updated travel guidance to reflect this information (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_travelers_index.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=5wQ4u1pyd3huRECgL9FIF26fQM1Gr18RKwn_cdfZhm&e=).

To date, there has been limited spread of COVID-19 in the United States. As of February 26, 2020, there were a total of 61 cases within the United States, 46 of these were among repatriated persons from high-risk settings. The other 15 cases were diagnosed in the United States; 12 were persons with a history of recent travel in China and 2 were persons in close household contact with a COVID-19 patient (i.e. person-to-person spread). One patient with COVID-19 who had no travel history or links to other known cases was reported on February 26, 2020, in California. The California Department of Public Health, local health departments, clinicians, and CDC are working together to investigate this case and are identifying contacts with whom this individual interacted.

CDC, state and local health departments, other federal agencies, and other partners have been implementing measures to slow and contain transmission of COVID-19 in the United States. These measures include assessing, monitoring, and caring for travelers arriving from areas with substantial COVID-19 transmission and identifying cases and contacts of cases in the United States.

Recognizing persons at risk for COVID-19 is a critical component of identifying cases and preventing further transmission. With expanding spread of COVID-19, additional areas of geographic risk are being identified and PUI criteria are being updated to reflect this spread. To prepare for possible additional person-to-person spread of COVID-19 in the United States, CDC continues to recommend that clinicians and state and local health departments consider COVID-19 in patients with severe respiratory illness even in the absence of travel history to affected areas or known exposure to another case.

Criteria to Guide Evaluation and Testing of Patients Under Investigation (PUI) for COVID-19 Local or state health departments, in consultation with clinicians, should determine whether a patient is a PUI for COVID-19. The CDC clinical criteria for COVID-19 PUIs have been developed based on available information about this novel virus, as well as what is known about Severe Acute Respiratory Syndrome (SARS) (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_sars_clinical_guidance.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=Ybw1Zg47KVi_h3WTKNfX3r2GeXQz0qbQYPAD-cRvDM&e=) and Middle East Respiratory Syndrome (MERS) (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_mers_interim-2Dguidance.html-23evaluation&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-GVbfkNc1PGbbhBsMs&m=S8k8yUBbHy3h3b4HQ3JDV9oeW0poABR6H0M3ajghlIE&s=xnTIEF3HGjcvZj-WiNTuoHQC4OQErVICpHRHPR7K7o&e=). These criteria are subject to change as additional information becomes available.

Clinical Features

Epidemiologic Risk

Fever¹ or signs/symptoms of lower respiratory illness (e.g., cough or shortness of breath) AND Any person, including healthcare personnel², who has had close contact³ with a laboratory-confirmed⁴ COVID-19 patient within 14 days of symptom onset

Fever¹ and signs/symptoms of a lower respiratory illness (e.g., cough or shortness of breath) requiring hospitalization AND A history of travel from affected geographic areas⁵, within 14 days of symptom onset

Fever¹ with severe acute lower respiratory illness (e.g., pneumonia, ARDS (acute respiratory distress syndrome) requiring hospitalization and without an alternative explanatory diagnosis (e.g., influenza).⁶ AND No identified source of exposure

These criteria are intended to serve as guidance for evaluation. In consultation with public health departments, patients should be evaluated on a case-by-case basis to determine the need for testing. Testing may be considered for deceased persons who would otherwise meet the PUI criteria.

¹Fever may be subjective or confirmed.

² For healthcare personnel, testing may be considered if there has been exposure to a person with suspected COVID-19 without laboratory confirmation. Because of their often extensive and close contact with vulnerable patients in healthcare settings, even mild signs and symptoms (e.g., sore throat) of COVID-19 should be evaluated among potentially exposed healthcare personnel. Additional information is available in CDC's Interim U.S. Guidance for Risk Assessment and Public Health Management of Healthcare Personnel with Potential Exposure in a Healthcare Setting to Patients with Coronavirus Disease 2019 (COVID-19) (https://urldefense.proofpoint.com/v2/url?u=https-3A__www.cdc.gov_coronavirus_2019-2Dncov_hcp_guidance-2Drisk-2Dassessment-2Dhcp.html&d=DwIFaQ&c=Lr0a7ed3egkbwePCNW4ROg&r=SvuDBz10ITbEa2fPd_cZyWQFA-

Subject: help with language in light of new case

Hi team,

So much happening. I'd like to draw your attention to one particular question (among many).

In terms of the xenophobia and discrimination theme, we have been saying: **This virus is not about race, ethnicity or culture. The risk of getting COVID-19 is based on travel history, and contacts with people who are sick.**

In light of the new California case having no travel history and no known contacts with travelers or people who are sick, how would we modify our statement? I realize we don't have all the answers right now, but the Mayor and Carmen Chu are submitting an op-ed **tomorrow** about discrimination, and I am helping them update this language. How about:

Risk for the novel coronavirus is based on travel history, contacts and exposure to the virus.

Is that safe to say? Note that this is not a clinical piece, but we still want to be accurate.

Thank you,

Rachael

CDC Confirms Possible First Instance of COVID-19 Community Transmission in California

SACRAMENTO – The U.S. Centers for Disease Control and Prevention today confirmed a possible first case of person-to-person transmission of COVID-19 in California in the general public. The individual is a resident of Solano County and is receiving medical care in Sacramento County. The individual had no known exposure to the virus through travel or close contact with a known infected individual.

California has a strong health care system and public health infrastructure. California has prepared for the potential spread of diseases, such as H1N1, in the past and is prepared and actively responding to the potential community spread of COVID-19. Contact tracing in this case has already begun.

The health risk from novel coronavirus to the general public remains low at this time. While COVID-19 has a high transmission rate, it has a low mortality rate. From the international data we have, of those who have tested positive for COVID-19, approximately 80 percent do not exhibit symptoms that would require hospitalization. There have been no confirmed deaths related to COVID-19 in the United States to date. California is carefully assessing the situation as it evolves.

“Keeping Californians safe and healthy is our number one priority,” said Dr. Sonia Angell, Director of the California Department of Public Health and State Public Health Officer. “This has been an evolving situation, which California has been monitoring and responding to since COVID-19 cases first emerged in China last year. This is a new virus, and while we are still learning about it, there is a lot we already know. We have been anticipating the potential for such a case in the U.S., and given our close familial, social and business relationships with China, it is not unexpected that the first case in the U.S. would be in California. That’s why California has been working closely with federal and local partners, including health care providers and hospitals, since the outbreak was first reported in China -- and we are already responding.”

As in any public health emergency, the Department of Public Health's Emergency Operations Center has been actively coordinating response efforts across the state and preparing for possible community transmission. California continues to prepare and respond in coordination with federal and local partners.

This would be the first known instance of person-to-person transmission in the general public in the United States. Previously known instances of person-to-person transmission in the United States include one instance in Chicago, Illinois, and one in San Benito County, California. Both cases were after close, prolonged interaction with a family member who returned from Wuhan, China and had tested positive for COVID-19, the disease caused by novel coronavirus. As of today, including this case, California has had 7 travel-related cases, one close contact case, and now one community transmission.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory

Updates and Response:

SFDPH

Summary of actions

- Mayor London Breed declared a local emergency 02/25/20, allowing CCSF to access additional resources to prepare for potential COVID-19 cases in SF.
- SFDPH DOC expanded community outreach and mitigation efforts, working closely with the CCSF

Emergency Operations Center (EOC) in anticipation of increased inquiries due to the declaration of a local emergency.

- SFDPH is focusing on providing a comprehensive picture of past and current preparation and mitigation efforts, forward leaning departmental objectives, and the data and information being used to guide the work.
- SFDPH and the EOC are collaborating to create a process for routing briefing and other informational requests (from media and non-media sources) to the appropriate channels.
- SFDPH drafted guidelines for housing plans for confirmed COVID-19 cases, potential COVID-19 cases, and medium risk individuals who live in congregate living situations including Single Room Occupancies (SROs).
- SFDPH completed a preparedness consultation site visit to Chinese Hospital 02/25/20 and UCSF Mission Bay today 02/26/20.
- SF Public Health Laboratory is strengthening their safety measures for lab personnel, including enhanced Personal Protective Equipment (PPE) requirements.
- SF Public Health Laboratory is still awaiting delivery of CDC testing kits. CDC reported they will have a ship date for the testing kits by the end of this week.
- SFDPH is updating their COVID-19 Fact Sheet to include the most recent updates and align messaging and information across DPH and CCSF sites.
- SFDPH Public Information Office recently completed a COVID-19 prevention focused informational poster, which will soon be displayed on BART Trains.
- SFDPH CDCP information: <https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC updated their travel advisory to include South Korea. <https://wwwnc.cdc.gov/travel/notices/warning/coronavirus-south-korea>
- CDC reports that to date 445 people have been tested in the U.S.
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)-

- WHO stated that 4 new countries (Algeria, Austria, Croatia, and Switzerland) reported cases of COVID-19 in the past 24 hours. (as of 02/26/20)
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)-

- CDPH reported new cases of COVID-19 in CA in the 24 hours. Number of confirmed cases in CA remains at 10.
- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 81,322 confirmed cases globally.
- 78,064 confirmed cases in mainland China; 3,258 confirmed cases outside of mainland China, in 46 countries.
- 2,719 deaths in mainland China + 51 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy,

Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)

- Confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 59 confirmed cases currently in the U.S. (42 from Diamond Princess cruise ship, from unassigned locations) cases in 5 states.
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

NOTE: Information may vary as events and reporting are rapidly evolving.

Subject: RE: Framework for Congregate Living Settings
Date: Tuesday, February 25, 2020 4:17:40 PM
Attachments: [DRAFT Congregate Living Settings Framework 25Feb2020 rn edits.docx](#)

Some quick suggested edits/additions. I didn't go ahead and make the changes b/c I'm not sure where others stand on all this. I think what we want to say is that for everyone from confirmed case to PUI to symptomatic medium risk to asymptomatic medium risk, we would consider removing them from their congregate living situation – with priority given to those on the “left” end of that spectrum (confirmed case > PUI > symptomatic medium risk > asymptomatic medium risk). I think we still want to review each individual on a case by case basis as we have nuance and texture to their specific situation (ie lives in SRO but has own kitchen and with minimal disruptions we could arrange their own bathroom). I think that's unlikely, but there may be things we can do that allow ppl to remain at home and the community more assured. And then of course there's always the option to re-locate the person if the infxn control needs can't be met and/or community is really up in arms about the potential risk of exposure.

Rita Nguyen, MD

Subject: Framework for Congregate Living Settings
Importance: High

First pass at structure and content ... very interested in your feedback.

Note: CDC defines “congregate settings” in their risk-assessment document as **Congregate settings** are public places where close contact with others may occur. Congregate settings include settings such as shopping centers, movie theaters, stadiums, workplaces, schools and other classroom settings. Therefore to be clear this document refers to Congregate Living Settings. (thanks to Rita for picking up that nuance).

Thanks, David

Subject: SFDPH DOC COVID-19 Situation Status Report (02/25/2020)

SFDPH DOC COVID-19 Situation Status Report (02/25/2020)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths (dated 02/25/20)

Worldwide: 80,350 Cases / 2,705 Deaths (*John Hopkins CSSE, link below*)

US: 53 Cases (see notes below) / **0 Deaths** ([CDC](#))

CA: 10 Cases / 0 Deaths ([CDPH](#))

SF: 0 Cases

<https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

Updates and Response:

CCSE

- The Mayor has declared a local emergency due to COVID-19. Although there are still zero confirmed cases in San Francisco residents, the global picture is changing rapidly. Given the high volume of travel between SF and mainland China, and the spread of the virus in other countries, there is a growing likelihood that San Francisco will see cases eventually. The declaration of a local emergency will mobilize city resources, accelerate emergency planning, streamline staffing, coordinate agencies across the city, allow for future

reimbursement by the state and federal governments and raise awareness throughout San Francisco about how everyone can prepare in the event that COVID-19 (novel coronavirus) appears in San Francisco.

SFDPH

Summary of actions

- SFDPH DOC Call Center has attempted contact to all return travelers from China in need of follow-up.
- SFDPH is maintaining global, national, and local situational awareness as South Korea, Japan, and Italy have reported significant increases in the number of confirmed COVID-19 cases.
- SFDPH is preparing to update stakeholder messaging in anticipation of new CDC guidance.
- SFDPH is working closely with the Department of Emergency Management's (DEM) Emergency Operations Center (EOC) on community outreach, care and shelter for potential COVID-19 cases.
- SFDPH, the Mayor, DEM, and Chinese Community leaders provided updates to the public on SF's preparedness efforts.
- SFDPH completed preparedness consultation site visits to 5 major SF hospitals, with plans to visit 2 additional sites. DPH will hold a tabletop exercise and discussion with SF hospital partners on preparing for COVID-19 cases.
- SFDPH CDCP information: <https://www.sfcddp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- CDC is operationalizing its pandemic preparedness and response plans, including measures to [prepare communities](#) to respond to local transmission of COVID-19. There is an abundance of [pandemic guidance](#) developed and adapted for a COVID-19 pandemic.
- CDC updated travel guidance on 02/23/20 recommending travelers avoid all nonessential travel to the People's Republic of China (this does not include Hong Kong, Macau, or the island of Taiwan). <https://www.ncdc.gov/travel/destinations/traveler/none/china#travel-notice>
- No changes in number of U.S. confirmed cases reported since 02/24/20.
- <https://www.cdc.gov/coronavirus/2019-ncov/cases-in-us.html>

WHO (World Health Organization)-

- WHO has an online course titled "Infection Prevention and Control for COVID-19." The course provides information on how facilities can prepare to respond to emerging respiratory viruses such as COVID-19. <https://openwho.org/courses/COVID-19-IPC-FN>
- The WHO-China joint mission concluded on 02/24/20 and released findings about the transmissibility and severity of COVID-19, and the impact of the measures taken. https://www.fmprc.gov.cn/mfa_eng/topics_665678/kjgzbdffyq/t1749176.shtml
- WHO and European Centre for Disease Prevention and Control (ECDC) mission arrived in Italy on 02/24/20 to support Italian authorities on the COVID-19 situation.
- WHO stated that 4 new countries (Afghanistan, Bahrain, Iraq, and Oman) reported confirmed cases of COVID-19 in the past 24 hours (as of 02/25/20).
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/situation-reports>

CDPH (California Department of Public Health)-

CDPH lab in Richmond, CA is currently testing potential (PUI) cases quarantined at Travis Air Force Base. This lab is not providing testing for local jurisdictions at this time.

- <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data-

- 80,350 confirmed cases globally
- 77,660 confirmed cases in mainland China (96.7% of all confirmed cases globally).
- 2,660 deaths in mainland China + 45 additional deaths (Afghanistan, Bahrain, Iraq, Oman, Iran, Italy, Philippines, Hong Kong, Taiwan, Japan, France, South Korea, Diamond Princess Cruise)
- 2,747 confirmed cases outside of China across 36 countries/regions (includes regions of Hong Kong and Taiwan, outside of mainland China)

National (U.S.) data:

- 53 confirmed cases currently in the U.S. (36 from Diamond Princess cruise ship, from unassigned locations) cases in 7 states.
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

NOTE: Information may vary as events and reporting are rapidly evolving.

Hi all,

Thank you very much for the call today. UCSF looked at the 8 patients that the employee cared for during his 2/13/2020 ED shift. Of those, 5 were admitted from the ED and of those, all but one have already been discharged. They looked through the medical records of all 5 hospitalized patients and found no evidence for hospital-onset fever or any signs or symptoms suggestive of new respiratory infections.

The specimens collected today have been picked up by World Courier for delivery tomorrow 2/22/20.

Tracking no : 114287446

Anything that can be done to expedite the repeat testing, and ensure the testing is done in the original lab, would be much appreciated. Please let me know if there are additional questions or comments. Adding UCSF to this email correspondence.

Thanks,
Julie

Subject: RE: San Francisco/CDPH/CDC COVID-19 call

Hi Julie,

I'm from the COVID-19 Healthcare Infection Control Team. We'd like to have a call today to discuss some initial actions that can be taken while we await the results of the repeat testing. This is mainly to help plan for the possibility that an investigation of the healthcare facilities where the PUI worked is needed. We can see how our discussion goes and decide whether it would be helpful to have additional calls over the next couple of days. I will defer to others from CDC to see if they can answer your questions about the indeterminate result of the OP specimen.

Thanks,
Alice

Subject: RE: San Francisco/CDPH/CDC COVID-19 call

Dear colleagues,

Can you provide more information about the purpose of these daily calls? This individual seems unlikely to be a true positive given no clear exposure, the NP swab that was tested initially was negative, and there was a problem with specimen labeling for the OP specimen only which appeared to lead to a delay in testing - can CDC provide additional information about the OP specimen with the indeterminate result? Was there in fact a delay in testing b/c of issues with specimen labeling? What is the status of the repeat testing of the indeterminate specimen?

We have collected specimens on this individual and will be sending them to CDC today. The patient remains in home isolation.

Thanks,
Julie

Hi, all—

We'd like to have daily check-ins for the next 4-5 days to discuss the SF healthcare worker with (currently) inconclusive COVID-19 lab results. Please forward this invitation as needed to appropriate persons in your organizations (county, state). Our hope is that these meetings will not all need to be an hour long, but I'm scheduling them as such for now. Please see call in information below.

Thanks,

Ginny Bowen
Deputy Team Lead, Case-Tracking Team
Epidemiology Task Force
CDC COVID-19 Response

Subject: Regional Coordination call - cruise ship passengers under quarantine at Travis AFB
When: Friday, February 21, 2020 2:00 PM-4:30 PM.
Where: 408-418-9388; 965 988 785

This is a planning/coordination call for Public Health, Healthcare and EMS partners around the region in the event additional PUIs are identified among returning cruise ship passengers currently under quarantine at Travis AFB. We will also have CDC and CDPH on the call to answer any questions people may have. Please email SolanoEpi@SolanoCounty.com <mailto:SolanoEpi@SolanoCounty.com> if you want people added to the distribution list.

Phone Number: 408-418-9388

Passcode: 965 988 785

Thanks.

CDC has made changes to their guidance for evaluation of "Persons Under Investigation (PUI)" for Coronavirus Disease 2019. CDC's definition of a PUI has an added footnote. Persons who may be infected with 2019 novel coronavirus should be immediately discussed with the local public health department. The new CDC guidance provides for consideration of testing persons who do not meet the PUI definition in two circumstances:

- For severely ill individuals, testing can be considered when exposure history is equivocal and another etiology has not been identified.
- For persons with travel to China within 14 days, testing can be considered at the discretion of public health officials for all persons with illnesses with fever and lower respiratory symptoms, whether or not they are hospitalized.

<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>

The California Department of Public Health has been informed that after consultation and agreement with the FDA, the CDC is manufacturing a replacement component of the test kit to better ensure quality control. The California Department of Public Health

remains poised to start testing for 2019 novel coronavirus upon receiving those materials.

Subject: CAHAN Disease Notification – CDC Interim Guidance for 2019-nCoV: EMS Systems, 911 PSAPs, Cleaning Recommendations Related to People While Quarantined in Non-Home Residential Settings, and Airport Ground Transport of People Subject to Mandatory Quarantine

The Centers for Disease Control has released four guidance documents regarding the 2019 Novel Coronavirus (2019-nCoV):

Interim Guidance for Emergency Medical Services (EMS) Systems: Care and transport by EMS presents unique challenges because of the nature of the setting, enclosed space during transport, frequent need for rapid medical decision-making, interventions with limited information, and a varying range of patient acuity and jurisdictional healthcare resources. Please see the attached assessment flowchart.

911 Public Safety Answering Points (PSAPs) for 2019-nCoV in the United States: Municipalities and local EMS authorities should coordinate with state and local public health, PSAPs, and other emergency call centers to determine need for modified caller queries about 2019-nCoV. The full interim guidance can be found here: <https://www.cdc.gov/coronavirus/2019-ncov/hcp/guidance-for-ems.html>

Interim Cleaning Recommendations Related to People with Exposures to 2019 Novel Coronavirus Under Observation While Quarantined in Non-Home Residential Settings: This guidance is intended to address recommended cleaning and disinfection practices for non-home residential quarantine locations, as well as associated worker protection practices according to expected job tasks. Please see attached interim recommendations.

Interim Guidance Related to the Airport Ground Transport of People Subject to Mandatory Quarantine for 2019 Novel Coronavirus Exposure: is intended to address recommended worker protection practices for drivers of ground transport passenger vehicles and those workers who perform routine cleaning of the vehicles. Please see attached interim guidance attached.

This article summarizes persons tested for 2019 novel coronavirus in the United States through January 31, 2020. Of 210 persons tested, 178 were identified in health care settings. This finding underscores the importance of health care provider awareness of 2019 novel coronavirus, taking travel histories in persons with possible infectious disease, and effective communication between health care providers and public health departments.

Updated version including 4th document...

Dear colleagues

Please find attached notes from the Local Health Officer 2019-nCoV Conference Call held yesterday 2/5/2020 for review. During this call we reviewed CDC plans for returning travelers and shared a draft one page document and excel sheet for feedback. Additionally, please find attached a draft CDC document for care instructions for returning travelers. Finally, this is the link for the cards given to returning travelers by CDC:
<https://www.cdc.gov/coronavirus/2019-ncov/travelers/communication-resources.html>

Thank you for your partnership.

Subject: SFDPH DOC Novel Corona Virus 2019 (nCoV-2019)- Sit Stat 02/04/20

SFDPH DOC nCoV Situation Status report #10 (02/04/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 20,704 cases/427 Deaths (*John Hopkins CSSE, link below*)

US: 11 Cases/0 Deaths

CA: 6 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- DPH outreach to the Chinese community remains a top priority. Round table meeting held today with Chinese Community stakeholders, including 50 different organizations, family associations, merchants, and community leaders.
- SFDPH Department Operation Center (DOC) continues to expand to accommodate operational, logistical, and administrative needs.
- DPH Supply Unit is actively locating and securing adequate Personal Protective Equipment (PPE) for staff; PPE is in high demand at this time from commercial suppliers, which may impact availability and/or order turnaround time.
- Collaboration at the regional level to coordinate messaging and guidance to pre-hospital providers (aligning with Health Officers' strategies), as well as 911 dispatch screening parameters and standards.
- DPH Primary Care personnel are bringing PPE training and guidance to outpatient clinics.
- CCSF Departments outside of DPH have been working together to accommodate space, time, and staff for the DOC. Resources are being identified and made available to support the nCoV-2019 activation response
- DPH is engaging with hospital partners to coordinate placement of PUI cases and confirmed cases, develop standard protocols for transport and relocation across the city, region and the State.
- CCSF Laboratories are preparing to receive and test specimen (if needed) 7 days a week.
- 2 San Benito confirmed cases continue to be hospitalized in in San Francisco. The SF community is not at risk as proper transport and isolation techniques are being followed.

SFDPH Page: <https://www.sfcddcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/>

CDC

- CDC reports of number of PUIs in the U.S. - 11 positive, 167 negative, and 82 pending tests. 36 states with PUIs (unchanged from 02/03/20).
- CDC reported that nCoV-2019 is not spreading in the U.S. community at this time.
- CDC Infection Control Guidance for 2019-nCoV revised 02/03/20.
- CDC plans to release guidance on quarantine of medium and high-risk travelers returning to the U.S. from affected areas, as related to the Federal Quarantine Orders that went into effect over the weekend. Interim guidance can be found here: <https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>

CDC nCoV page:

<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

WHO (World Health Organization)-

- WHO stated that no new countries reported cases of 2019-nCoV since 02/03/20.
- WHO developed a protocol for the investigation of early cases: [https://www.who.int/publications-detail/the-first-few-x-\(ffx\)-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-\(2019-ncov\)-infection](https://www.who.int/publications-detail/the-first-few-x-(ffx)-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-(2019-ncov)-infection)

- WHO prepared a disease commodity package that includes an essential list of biomedical equipment, medicines and supplies necessary to care for patients with 2019-nCoV: [https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-\(ncov\)](https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-(ncov))

WHO nCoV-2019 page: <https://www.who.int/emergencies/diseases/novel-coronavirus-2019>

CDPH (California Department of Public Health)-

- Confirmed 6 cases in California: Santa Clara County (2), San Benito (2), Los Angeles (1), Orange County (1).
- As of 1800 hours on February 3, 2020 there have been 79 persons in California tested for 2019- nCoV. Six test results were positive, 50 test results were negative, and the remaining 23 results are pending.
- Currently coordinating with Federal authorities around quarantine orders for returning travelers from Hubei Province, coming through FO or LAX.

CDPH nCoV page:

<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 20,704 confirmed cases (99% of all confirmed cases globally) and 427 deaths in China (an increase of 66 cases since yesterday). 2.1% of confirmed cases in China have resulted in death.
- 2 additional deaths in the Philippines and Hong Kong.
- 212 confirmed cases outside of China (an increase of 29 cases since yesterday) across 27 countries.

National (U.S.) data:

- 11 confirmed cases in the U.S. (Seattle, Chicago - 2, Tempe, LA County, Orange County, Santa Clara County -2, San Benito County -2, Boston).
- 167 negative PUIs; 82 Pending PUIs; 6.2% of PUIs have come back positive. PUIs in 36 states.

<https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

NOTE: Information may vary as events and reporting are rapidly evolving.

Subject: SFDPH DOC Novel Corona Virus 2019 (nCoV-2019)- Sit Stat 02/04/20

SFDPH DOC nCoV Situation Status report #10 (02/04/20)

Status: Yellow

Outlook: Worsening

Need: None

of Cases/Deaths

Worldwide: 20,704 cases/427 Deaths (*John Hopkins CSSE, link below*)

US: 11 Cases/0 Deaths

CA: 6 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- DPH outreach to the Chinese community remains a top priority. Round table meeting held today with Chinese Community stakeholders, including 50 different organizations, family associations, merchants, and community leaders.
- SFDPH Department Operation Center (DOC) continues to expand to accommodate operational, logistical, and administrative needs.
- DPH Supply Unit is actively locating and securing adequate Personal Protective Equipment (PPE) for staff; PPE is in high demand at this time from commercial suppliers, which may impact availability and/or order turnaround time.
- Collaboration at the regional level to coordinate messaging and guidance to pre-hospital providers (aligning with Health Officers' strategies), as well as 911 dispatch screening parameters and standards.
- DPH Primary Care personnel are bringing PPE training and guidance to outpatient clinics.
- CCSF Departments outside of DPH have been working together to accommodate space, time, and staff for the DOC. Resources are being identified and made available to support the nCoV-2019 activation response
- DPH is engaging with hospital partners to coordinate placement of PUI cases and confirmed cases, develop standard protocols for transport and relocation across the city, region and the State.
- CCSF Laboratories are preparing to receive and test specimen (if needed) 7 days a week.
- 2 San Benito confirmed cases continue to be hospitalized in in San Francisco. The SF community is not at risk as proper transport and isolation techniques are being followed.

SFDPH Page: <https://www.sfcddp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/>

CDC

- CDC reports of number of PUIs in the U.S. - 11 positive, 167 negative, and 82 pending tests. 36 states with PUIs (unchanged from 02/03/20).
- CDC reported that nCoV-2019 is not spreading in the U.S. community at this time.
- CDC Infection Control Guidance for 2019-nCoV revised 02/03/20.
- CDC plans to release guidance on quarantine of medium and high-risk travelers returning to the U.S. from affected areas, as related to the Federal Quarantine Orders that went into effect over the weekend. Interim guidance can be found here: <https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>
CDC nCoV page:
<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

WHO (World Health Organization)-

- WHO stated that no new countries reported cases of 2019-nCoV since 02/03/20.
- WHO developed a protocol for the investigation of early cases: [https://www.who.int/publications-detail/the-first-few-x-\(ffx\)-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-\(2019-ncov\)-infection](https://www.who.int/publications-detail/the-first-few-x-(ffx)-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-(2019-ncov)-infection)
- WHO prepared a disease commodity package that includes an essential list of biomedical equipment,

Subject: Fw: Airport Screening and Quarantine Operations Call with CDC

Gabby, I will be on 9am call.

We can discuss at 11am DOC call.

The federal quarantine plan was announced without understanding the operational details of implementing.

The summary of the federal plan is here:

<https://www.hhs.gov/about/leadership/secretary/speeches/2020-speeches/secretary-azar-delivers-remarks-on-declaration-of-public-health-emergency-2019-novel-coronavirus.html>

<<https://www.hhs.gov/about/leadership/secretary/speeches/2020-speeches/secretary-azar-delivers-remarks-on-declaration-of-public-health-emergency-2019-novel-coronavirus.html>>

Secretary Azar Delivers Remarks on Declaration of Public Health Emergency for 2019 Novel Coronavirus | HHS.gov

<<https://www.hhs.gov/about/leadership/secretary/speeches/2020-speeches/secretary-azar-delivers-remarks-on-declaration-of-public-health-emergency-2019-novel-coronavirus.html>>

These prudent and targeted actions will decrease the pressure on public health officials screening incoming travelers, expedite the processing of U.S. citizens returning from China, and ensure resources are focused on the health and safety of the American people
www.hhs.gov

Thanks,

Tomas

p.s. plz excuse typos

Subject: Airport Screening and Quarantine Operations Call with CDC

When: Saturday, February 1, 2020 9:00 AM-10:00 AM.

Where: 877-336-1829 passcode 1194597

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Issues Raised by Local Partners so far:

* Will there be an emergency proclamation in the state to enable reimbursement or will these costs be reimbursed outside of the Stafford Act?

Response from CalOES and CHHS was that they are unaware of any planned state emergency declaration but would be pushing the federal government hard to reimburse these costs.

* Who is issuing the quarantine order? This has implications for either the federal or local government entity. Only federal law enforcement can enforce a federal quarantine. US Marshall would have to enforce. What will happen to folks who do not comply?

* We are assuming that we aren't going back in time to find folks who traveled from Wuhan/Hubei in the last 14 days; is this accurate?

* Exactly what are the required protocols for quarantining or self-quarantining? This is a daunting task with dozens of people for 14 days. This active monitoring will far exceed what was done for ebola (small numbers).

* San Mateo commented that only 2% of those coming into SFO will stay in their county, and that they have no intent to keep these travelers in their

county, there is no way to operationalize this and he will let passengers go to their desired destination.

* Federal government should be partnering directly with local jurisdictions and providing information and answers to their questions directly.

* There is no way to be operational so quickly, Sunday by 2 pm in California.

* There are a lot of resources needed: phones, thermometers, masks, capacity to feed people, housing that keeps folks isolated (and apart from each other) for 14 days, staff to follow up daily with everyone, testing and care arrangements for folks who become symptomatic (yet not sick enough for hospital care), and managing close contacts of any folks who become symptomatic.

* Staffing needs will be large, even Los Angeles, the largest county health department in the country says they are unable to operationalize this for a large number of travelers. Quarantining a large number of people will mean they are located at various sites and what is the expectation if someone becomes symptomatic?

* Everyone believes that CDC has the best intent, but the fact is there would need to be hundred of people to conduct this type of operation, and this seems to fly in the face of everything we have been doing.

* San Francisco said that their plan for travelers coming into their county, which is small in geographic area, would be to self-quarantine at their destination site, what they believe is a practical compromise.

* Concerns were raised about following airport emergency plans. Given that a public health emergency has been declared, planes should arrive in an isolated area. This will be a logistical nightmare – people will have vehicles at the airport and family members waiting to pick them up.

* How will we transport folks from the airport to quarantine housing and then to medical care/testing as needed? Probably not a great idea to keep people all together.

* Can we have guidance for schools and universities who are asking if they should be excluding students who traveled to the Hubei province in the last 14 days, and perhaps exclude those who traveled to China in the last 14 days?

* Is there a new case definition for novel corona virus if a negative test no longer rules out novel coronavirus? Seems impossible that the definition would be someone who has traveled to Hubei (or China) and has a fever and respiratory symptoms. Can we rule out folks who test positive for a different respiratory illness? And what is the implication for identifying and active monitoring of close contacts? Are we recommending that close contacts self-quarantine for 14 days since we can never rule out a case just because their test is negative? That would be problematic for health care workers.

* How will notification be managed between jurisdictions if the folks who are ordered to self-quarantine take themselves to another county (where they live); LHD's currently manage these exchanges but if the feds are issuing orders, we wonder how this works?

* How can we manage the potential for the health care system to be inundated with worried well? The implications that folks who have traveled to China in the last 14 days may be carrying the virus even if they aren't sick will increase calls to providers for testing and increase visits.

* How are we to communicate what it means for the federal government to declare a public health emergency? We are flooded with calls asking if this means we should be telling folks to cancel public events, especially lunar new year events which attract large numbers of Chinese residents.

Subject: SFDPH DOC Activation for Novel Coronavirus 2019 (nCoV-2019)
Date: Tuesday, January 21, 2020 3:54:31 PM

Dear SFDPH Colleagues and Partners:

The San Francisco Department of Public Health (DPH) has activated the Department Operations Center (DOC) and Communicable Disease Response Plan, in response to the recent outbreak of the 2019 Novel Coronavirus (2019-nCoV) in Wuhan City, Hubei Province, China that began in December 2019. SFDPH is currently monitoring the situation closely and coordinating efforts with the Centers for Disease Control and Prevention (CDC), the State, San Francisco International Airport (SFO), regional public health jurisdictions, and local CCSF Departments. Multiple countries, including the United States, are actively screening incoming travelers from Wuhan City, which includes SFO Airport.

The CDC is monitoring the outbreak and may adjust response activities as the outbreak investigation progresses. As we continue to gather more information, if the SFDPH DOC needs to activate at a higher level, you will receive another alert, which will include additional concrete steps to take.

The situation remains fluid and additional 2019-nCoV information is constantly being updated regarding any risks to the population. For the latest information regarding this evolving incident please check the following sources:

- CDC information: <https://www.cdc.gov/coronavirus/2019-nCoV/summary.html>
- Additional Coronavirus information is available at: <https://www.cdc.gov/coronavirus/2019-ncov/index.html> or by calling 800-CDC- INFO | (800-232-4636) | TTY: (888) 232-6348
- California Department of Public Health: <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx#>
- Information specific to SFO: <https://www.flysfo.com/passengers-arriving-wuhan-china-are-being-screened-novel-coronavirus>
- An event has been created in WebEOC - "2020-01-21 2019 nCoV." Please log in for SFDPH DOC information and updates: <https://sfvem.org/eoc7/>

Sincerely,

Public Health Emergency Preparedness & Response (PHEPR) Branch
