

Hearing the Call to Action on Behalf of Ukraine, the APFC Board of Trustees has issued a statement regarding APFC's Russian Holdings that can be found on <https://apfc.org/>.

#### APFC Summary of Russian Holdings:

As of December 31, 2021 APFC's exposure to Russian securities totals to \$219 million which accounts for 0.3% of Alaska Permanent Fund's \$82 billion assets under management.

**Fixed Income:** \$63 million in Russian and Ukrainian governments bonds in the Fixed Income portfolio. Less than \$10 million of that under internal management.

**Public Equities:** \$153 million in publicly traded Russian stocks, traded on the Moscow Stock Exchange. All public stocks held in APFC's name are in externally managed accounts.

**Private Equity:** \$2.7 million represents Private Equity stakes in portfolio companies held by funds in which APFC is one of many investors. APFC does not maintain control of the investments in these portfolio companies.

**Current Situation:** The valuation of APFC's Russian holdings is speculative given inconsistent market pricing, the continued closure of the Moscow stock exchange and illiquidity due to applicable regulatory sanctions. From a financial standpoint, the harm to the Fund has occurred and effectively, the market has divested itself of Russian assets.

- APFC has directed its external and internal managers of public assets not to make any purchases of Russian securities.
- APFC is examining what further steps should be taken regarding the portfolio's existing Russian holdings.

See Appendix for a detailed list of the portfolio's Russian stock and bond holdings. The OFAC list is also included, and listed stock holdings have been highlighted.
