Happy Presidents Day!

Let me know if you are getting the below from CDC, it says it goes out to the SHOs and I've been told that you all are getting what the SHOs do... It is both a daily and a weekly. I'm happy to forward both or either.

I will also be forwarding the NACCHO weekly digest that we mentioned in the Friday email, but for some reason I didn't get it Friday... So stay tuned!

Happy Presidents Day!

Let me know if you are getting the below from CDC, it says it goes out to the SHOs and I've been told that you all are getting what the SHOs do... It is both a daily and a weekly. I'm happy to forward both or either.

I will also be forwarding the NACCHO weekly digest that we mentioned in the Friday email, but for some reason I didn't get it Friday... So stay tuned!

Saturday (2/22/2020)

-Film shoot on Twin Peaks Blvd. between Burnett & Christmas Tree Point Road

-Chyi Yu @ Bill Graham, 8:00pm to 12:00am

-Oprah @ Chase Center, 8:00am to 4:30pm

Sunday (2/23/2020)

- Warriors vs Pelicans @ Chase Center, 5:30pm to 9:00pm

Monday (2/24/2020)

- RSA Data Security Conference @ Moscone Center, 7:00am to 7:00pm

Critical Branch Updates:

CCSF Transportation Branch:

- SFMTA Muni Alert messages: <https://www.sfmta.com>

CCSF Infrastructure Branch:

- Nothing significant to report.

CCSF Public Safety Branch:

- Nothing significant to report.

CCSF Health and Human Services Branch:

- The San Francisco Department of Public Health continues to coordinate with partner agencies to monitor the COVID-19 (novel coronavirus-2019) situation.

CCSF Community Branch:

- Nothing significant to report.

Domestic and International News:

Cruise Ship Evacuees Landing At Travis Air Force Base Test Positive For Coronavirus

Americans landing at Fairfield's Travis Air Force Base Sunday night tested positive for the coronavirus after being quarantined onboard a cruise ship for weeks amid the outbreak, the U.S. State Department said. The first of two chartered flights carrying about 300 Americans landed sometime after 11:20 p.m. and the second landed at Lackland Air Force Base in San Antonio, Texas shortly afterward. The 14 passengers who tested positive for coronavirus will be taken to an "an appropriate location," likely

a nearby medical facility, for continued isolation and care, the State Department officials said in a statement. The announcement nearly doubles the number of confirmed coronavirus victims in the United States to 29 with 18 being treated in Northern California, according to figures from the Centers for Disease Control and Prevention. “These individuals were moved in the most expeditious and safe manner to a specialized containment area on the evacuation aircraft to isolate them in accordance with standard protocols,” officials said. ” After consultation with HHS officials, including experts from the HHS Office of the Assistant Secretary for Preparedness and Response, the State Department made the decision to allow the 14 individuals, who were in isolation, separated from other passengers, and continued to be asymptomatic, to remain on the aircraft to complete the evacuation process.” The other arriving passengers will undergo another 14 day quarantine at Travis AFB and at Lackland Air Force Base in San Antonio. In a Sunday press release, San Luis Obispo County health officers said they had been advised by state and federal authorities to prepare for the possibility that passengers who test positive for coronavirus, but longer require hospitalization, to housed at Camp Roberts for the remainder of a two-week quarantine. “We understand that a federal team will provide the staffing, food, and medical care at Camp Roberts,” said County of San Luis Obispo Health Officer Dr. Penny Borenstein in statement. “The County of San Luis Obispo Public Health Department is working to ensure that we protect the health and well-being of San Luis Obispo County residents.”

WHO Says It Hasn't Advised About Altering Olympics Due to Virus

The World Health Organization said Friday that it hasn't advised the International Olympic Committee about whether it should change plans for the Games in Tokyo this summer because of the epidemic caused by a new coronavirus. “We have not offered advice to the IOC for the Olympics one way or the other, and neither would we,” Michael Ryan, the WHO's executive director of health emergencies, said at a news conference. “It is not the role of WHO to call off or not call off any event.” An IOC official had suggested that the WHO had told Olympic organizers that there is no need to consider changing plans for the Games in Tokyo this summer because of the outbreak of novel coronavirus. “Certainly the advice that we're received externally from the WHO is that there's no case for any contingency plans for canceling the

Games or moving the Games,” John Coates, the head of an IOC inspection team for the 2020 Games, said during a visit to Tokyo. The reason for the contradictory accounts wasn’t immediately clear. Dr. Ryan said Friday that the WHO regularly offers technical advice and risk assessments to organizers of large-scale events like the Olympics, as well as countries hosting them. But he said there have been no specific discussions or decisions involving such events in the coming months. The Games are due to open on July 24 and are expected to bring hundreds of thousands of fans and athletes from around the world to the Japanese capital. Japan has reported more than 250 cases of infection with the virus, most of which are among people from a cruise ship docked near Tokyo. On Thursday, Japan reported its first human death attributed to the virus, which is believed to have originated in Wuhan, in central China. On Friday, Japanese and IOC officials said they were monitoring developments around the outbreak but weren’t thinking of alterations to plans for the Olympics.

SFDPH DOC nCoV Situation Status Report (02/16/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 71,325 cases / 1,775 Deaths (*John Hopkins CSSE, link below*)

US: 15 Cases / 0 Deaths

CA: 8 Cases (*see CDPH report below*)/ **0 Deaths**

SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- SFDPH continues to track and follow up with return travelers from China by phone and/or community outreach if needed. Children under 19 years of age (and their respective family members) and other populations who frequent congregate spaces are being prioritized for follow up.
- SFDPH communications team will outreach to Chinese and Spanish language TV starting Monday, 2/17/20. They will give them the opportunity to speak with Lisa Winston, Epidemiologist, to discuss COVID-19. They will also provide them with a tour of isolation rooms.
- SFDPH DOC will be activating the Community Branch that will focus on taking a broader look to outreach to the community.
- SFDPH continues to provide clinical consultation to clinicians and patient follow-up
- SFDEM reported that there are 166 passengers from the Diamond Princess cruise ship that are on an inbound flight to Travis Air Force Base in California that will be arriving tonight.
- [https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel- %20%20%20coronavirus/](https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/)

CDC-

- Public Health Laboratories are awaiting COVID-19 test replacement kits from the CDC to begin local testing. The replacement will provide a more effective diagnostic test component.
- The Department of Health and Human Services (HHS) is supporting the Department of State-led mission to repatriate U.S. citizens who want to return to the United States from Japan, currently aboard the Diamond Princess cruise ship. There are approximately 400 U.S. citizens onboard the Diamond Princess cruise ship. Americans returned by flights chartered by the State Department will be subject to a 14-day, federal quarantine and be housed at two existing federal quarantine sites for repatriated travelers:

- Travis Air Force Base in California
- Joint Base San Antonio-Lackland in Texas

Those passengers returning from Japan will be housed separately from individuals already in quarantine from previous Wuhan repatriation flights.

- CDC reported U.S. testing data: 15 positive PUIs; 347 negative PUIs; 81 Pending PUIs

<https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- No new countries reported cases of COVID-19 in the past 24 hours.
- WHO provided early investigation master protocols or master forms for countries to use to assess the epidemiology and clinical characteristics of COVID-19 cases in different settings
- <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/technical-guidance/early->

[investigations](#)

CDPH (California Department of Public Health)-

- 9 Public Health Laboratories in CA are awaiting COVID-19 test replacements from the CDC to begin local testing- CDPH, Sacramento, Contra Costa, San Francisco, Santa Clara, Tulare, Los Angeles, Orange and San Diego Counties.

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 71,325 confirmed cases globally
- 70,545 confirmed cases in China
- 1,770 deaths in mainland China + 5 additional deaths (Taiwan, Philippines, Hong Kong, Japan and France)
- 780 confirmed cases outside of mainland China across 28 countries.

National (U.S.) data:

- 15 total confirmed cases in the U.S.
- PUIs in 42 states and territories.

CCSF Community Branch:

- Nothing significant to report.

Domestic and International News:

Evacuees from quarantined cruise ship to head to Travis Air Force Base

Nearly 400 Americans aboard a quarantined cruise ship in Japan will be given the opportunity to be flown Sunday to air bases in California and Texas, where they will continue to be under quarantine for two weeks as a precaution against the COVID-19 virus. The U.S. Embassy in Japan announced that citizens aboard the ship Diamond Princess who are not exhibiting coronavirus symptoms will be flown to Travis Air Force Base in Fairfield, with some passengers continuing to Lackland Air Force Base in Texas. Citizens with virus symptoms will not be permitted to board the aircraft, and those who “choose not to return on this charter flight” will be “unable to return to the United States for a period of time,” the embassy said in a letter to passengers. The

ship has been docked at Yokohama, southwest of Tokyo, since Feb. 3 after a passenger who disembarked in Hong Kong last month tested positive for the virus. Nearly 300 passengers have tested positive for the virus. “We recognize this has been a stressful experience and we remain dedicated to providing all the support we can and seeing you safely and expeditiously reunited with family and friends in the United States,” the embassy announcement said. The additional two weeks of quarantine that evacuated passengers would face in the U.S. raised concerns, as Japanese authorities had announced that the ship’s quarantine would end on Wednesday and that healthy persons would be allowed to leave at that time.

<https://www.sfchronicle.com/bayarea/article/Evacuees-from-quarantined-cruise-ship-to-head-to-15059065.php>

Fake flyers and face-mask fear: California fights coronavirus discrimination

A flyer in Los Angeles’ Carson area, with a fake seal of the World Health Organization, tells residents to avoid Asian-American businesses because of a coronavirus outbreak. A Los Angeles middle schooler is beaten and hospitalized after students say he is as an Asian-American with coronavirus. And over 14,000 people sign a petition urging schools in the Alhambra area to close over coronavirus risks, even though there is only one case of the virus in Los Angeles County, with its population of 10.1 million. These are some of the hoaxes, assaults and rumors Los Angeles authorities spoke out against on Thursday to stamp out anti-Asian bigotry bubbling to the surface in California, where over half of the 15 U.S. coronavirus cases are located. Bullying and assaults of Asian-Americans are being reported from New York to New Mexico, sparked by unfounded fears that they are somehow linked to a virus that originated in China. With by far the largest Asian-American population of any U.S. state, officials in California are aggressively trying to get ahead of such hate crimes before they spread. “We’re not going to stand for hate,” Los Angeles County Supervisor Hilda Solis told reporters, flanked by law enforcement officials. She urged residents to report crimes to a special 211 number. Existing prejudice against Asians has combined with media images from China to create fears that Asian-Americans are more likely to be virus carriers. The discrimination could get worse given chances the virus may spread in U.S. communities in the weeks and months ahead, said Robin Toma, head of the Los Angeles County Human Relations Commission. Face masks commonly worn by Asians to protect against germs or prevent their spread have become a flashpoint, with wearers insulted or attacked out of fears they have

the virus, he said at the news conference. “We need you to step up and speak out when you see it happening to others,” he said.

SFDPH DOC nCoV Situation Status Report (02/15/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 69,063 cases / 1,666 Deaths (*John Hopkins CSSE, link below*)

US: 15 Cases / 0 Deaths

CA: 8 Cases (*see CDPH report below*) **0 Deaths**

SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- SFDPH continues to track and follow up with return travelers from China by phone and/or community outreach if needed. Children under 19 years of age (and their respective family members) and other populations who frequent congregate spaces are being prioritized for follow up.
- SFDPH continues to expand community presence, messaging, and outreach to SF residents and the Chinese community. Three events were held in the Chinese community to present information on COVID-19. The SFDPH communications team is compiling all of the questions and answers from these events into a FAQ document that will be distributed.
- SFDPH DOC will be activating the Community Branch that will focus on taking a broader look to outreach to the community.
- SFDPH continues to provide clinical consultation to clinicians and patient follow-up
- SFDPH DOC containment branch engaged with SF Unified School District (SFUSD) to discuss COVID-19 in school settings and will be developing a FAQ sheet for SFUSD.
- DEM and DPH are working to streamline communication and notifications. SFDPH has designated a Health Liaison to work with EOC.
- SFDPH DOC Housing Unit is developing housing guidelines for PUIs.
- <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- Public Health Laboratories are awaiting COVID-19 test replacement kits from the CDC to begin local testing. The replacement will provide a more effective diagnostic test component.
- The Department of Health and Human Services (HHS) is supporting the Department of State-led mission to repatriate U.S. citizens who want to return to the United States from Japan, currently aboard the Diamond Princess cruise ship. There are approximately 400 U.S. citizens onboard the Diamond Princess cruise ship. Americans returned by flights chartered by the State Department will be subject to a 14-day, federal quarantine and be housed at two existing federal quarantine sites for repatriated travelers:
 - Travis Air Force Base in California
 - Joint Base San Antonio-Lackland in TexasThose passengers returning from Japan will be housed separately from individuals already in quarantine from previous Wuhan repatriation flights.
- CDC reported U.S. testing data: 15 positive PUIs; 347 negative PUIs; 81 Pending PUIs
<https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- Egypt reported its first confirmed case of COVID-19. This is the second country in the WHO EMRO region to confirm a case, and the first reported case from the African continent.

CDPH (California Department of Public Health)-

- 9 Public Health Laboratories in CA are awaiting COVID-19 test replacements from the CDC to begin local testing- CDPH, Sacramento, Contra Costa, San Francisco, Santa Clara, Tulare, Los Angeles, Orange and San Diego Counties.
- CDPH released their guidance for schools and universities-file:///C:/Users/kristina%20leonoudakis/Downloads/Coronavirus+Colleges+Guidance+2_11_20.cleaned.pdf

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 69, 071 confirmed cases globally
- 68, 386 confirmed cases in China
- 1,662 deaths in China + 4 additional deaths (Philippines, Hong Kong, Japan and France)
- 685 confirmed cases outside of China across 28 countries.

National (U.S.) data:

- 15 total confirmed cases in the U.S.
- PUIs in 42 states and territories.

Subject: Quick Update on Diamond Princess Repatriation (Travis AFB)

Afternoon Everyone,

Quick follow-up on the reports of individuals being repatriated from the cruise ship arriving at Travis AFB this weekend.

DEM is reaching out to CalOES for details and I would anticipate an update being provided in their daily COVID-19 Situation Report.

Here is the [CDC Statement on Diamond Princess Repatriation](#) and it indicates that Americans returned by flights chartered by the State Department will be subject to a 14-day, federal quarantine. It also states:

Those passengers returning from Japan will be housed separately from individuals already in quarantine from previous Wuhan repatriation flights. All travelers from Japan will be screened before boarding the State Department-chartered aircraft to prevent symptomatic travelers from departing Japan. These planes will be met by a team of U.S. Government personnel deployed there to assess the health of the passengers. The passengers will be screened before leaving the ship and monitored and evaluated by medical and public health personnel every step of the way, including before takeoff, during the flight, and after arrival. U.S. Government staff will conduct risk assessments to ensure the health of each traveler, including temperature checks and observation for respiratory symptoms.

Travelers will be monitored during the flight to Travis Air Force Base where all travelers will be screened again. Any passengers taken onward to Joint Base San Antonio-Lackland will be monitored during that flight as well and screened upon arrival in Texas.

The US Embassy in Japan also has information about this on their [website](#), and according to the follow-up email sent to passengers, **if they want to take the charter flights, the Embassy must receive confirmation no later than 10:00 AM February 16 (Yokohama, Japan is 17 hours ahead of us, so it's ~5:15am Sunday right now)**. So we should know sometime today (if the CDC shares that info) the number of individuals coming to Travis AFB.

Please reach out to the Watch or myself if you have any questions.

Thanks,
Lisa

CCSF Community Branch:

- Nothing significant to report.

Domestic and International News:

Passenger on United Airlines flight from SF to London exhibited COVID-19 symptoms

SAN FRANCISCO (KGO) -- One passenger on United Airlines flight 901 traveling from San Francisco to London Heathrow exhibited symptoms consistent with COVID-19, a source at United Airlines tells ABC News. UA Flight 901 arrived in London around 9 am GMT. All 251 passengers, 13 crew members and the individual who exhibited symptoms deplaned the Boeing 777, United Airlines said. United Airlines released a statement saying, "The safety of our customers and employees is our top priority and we are working closely with Public Health England regarding this individual case. Our crews are trained and ready to respond to anyone on board the aircraft who may become ill in flight and we continue to follow additional precautions recommended by the Public Health England. The aircraft has undergone a deep clean, which includes cleaning all surface areas and overhead bins." The airline suspended all flights from Beijing, Chengdu, Shanghai and Hong Kong until April 24 amid the novel coronavirus outbreak. The condition of the person who exhibited symptoms of the virus is unknown.

Coronavirus testing to begin at labs in SF

Public health authorities plan to start widespread surveillance for the new coronavirus in five U.S. cities, including San Francisco, by tapping into an existing network of labs that already test for influenza and other common viruses. The Centers for Disease Control and Prevention did not say when the labs would begin testing for the new virus, which causes a respiratory illness called COVID-19 that has sickened more than 67,000 people worldwide. So far, 15 cases have been reported in the United States, including eight in California. The CDC said Friday that the risk of infection from the new virus remains low for the general public. But infectious disease experts said it makes sense to begin more large-scale surveillance for the virus soon, both to track down individual cases that may be missed by other screening efforts, and to identify potential clusters of cases right away. "It's a perfectly rational, inexpensive, quick way to see if, first, we have a problem now — and most people assume we do not," said Dr. Art Reingold, an infectious disease expert at UC Berkeley. "And second, if we do start having a problem, we'll pick it up faster this way." In a news conference Friday, CDC officials said testing for coronavirus would start in San Francisco, Los Angeles, Seattle, Chicago and New York City, using state- or city-run laboratories that are part of the national influenza surveillance network. Results from that network are published weekly in the CDC's FluView report.

US border agents to pursue migrants in 'sanctuary' cities

WASHINGTON (AP) — Federal agents who patrol the U.S. border will deploy to "sanctuary" cities across the country where local jurisdictions are hindering stepped up immigration enforcement, officials said Friday. The deployment of Customs and Border Patrol agents, some with tactical training, to the interior of the country is unusual and represents another escalation in the confrontation between the Trump administration and the local jurisdictions that have set up roadblocks to immigration enforcement. Acting Immigration and Customs Enforcement Director Matthew Albence said additional forces are needed because people without legal authorization to be in the country are being released from local jails in sanctuary cities and counties before his agents can take them into custody. ICE then has to make "at large arrests" of these immigrants who have been released, Albence said in a statement announcing the move. "This effort requires a significant amount of additional time and resources," he said. "When sanctuary cities release these criminals back to the street, it increases the occurrence of preventable crimes, and more importantly, preventable victims." The acting director did not disclose when or where the agents would be deployed but an official, speaking on condition of anonymity to disclose details not provided in the statement, said they would include major sanctuary cities such as San Francisco, New York, Chicago, Atlanta, Boston and Detroit.

The City & County of San Francisco (CCSF) Department of Emergency Management's Duty Officer Program compiles and disseminates this product in order to maintain situational awareness among public safety partners.

Situation Report - Situation Report - Update - COVID-19 (#11)

Department of Emergency Management
Division of Emergency Services

02-14-2020 - 17:25:04

Change Since Last Situation Report:

Situation Update:

- **International data:**
 - 64,461 confirmed cases; 63,866 cases in mainland China; 1,381 deaths in mainland China; 3 deaths outside mainland China
 - 595 confirmed cases outside of China across 28 countries/regions. (total includes 218 cases on the Diamond Princess cruise ship docked at Yokohama, Japan)
- **National (U.S.) data:**
 - 15 total confirmed cases in the USA
 - **There are no confirmed cases in San Francisco.**
 - The risk of COVID-19 in California remains low.
 - There are no recommendations to cancel events.
- **Source:**
 - <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>
 - *NOTE: Information may vary as events and reporting are rapidly evolving.*
- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is never too late to get the flu vaccine.**

SFDPH Activities:

- San Francisco Department of Public Health (DPH) collaborated with other Bay Area counties to finalize a policy regarding SF residents who returned from travel to China before 02/03/20 (before Federal Quarantine Orders were issued). <https://www.sfdcp.org/wp-content/uploads/2020/02/Interim-Guidance-on-Monitoring-and-Movement-for-San-Franciscans-and-Travel-Before-Feb-3rd-SFDPH-FINAL-02.07.2020.pdf>
- A comprehensive and extensive plan has been developed with multiple DPH and City & County of San Francisco (CCSF) interagency partners to provide guidance, consultation, and instruction to healthcare providers, hospitals, outpatient healthcare facilities, and field teams to prepare them for potential COVID-

19 patients, as DPH starts follow up with returned travelers from mainland China.

- DPH continues to monitor return travelers from China, with a goal of contact within 72 hours. Line lists of returning travelers have been coming in and a system has been established by Epidemiology and Surveillance Branch to manage and track follow up with these travelers by phone and/or community outreach if needed. Children under 19 years of age (and their respective family members) and other populations who frequent congregate spaces are being prioritized for follow up.
- Approximately 15 SF clinic staff members have been trained to perform respirator fit tests, resulting in approximately 50 staff members being fitted.
- DPH Public Health Labs received the COVID-19 test reagents from the U.S. Centers for Disease Control & Prevention (CDC) on Friday 02/07/20 and have been working to make testing possible within SF. Awaiting CDC approval to move forward.
- DPH Medical/Health trained staff are conducting site visits to major SF hospitals (Kaiser, CPMC, ZSFG) to assess preparedness for potential COVID-19 patients and provide recommendations and support through collaboration.
- The 2 San Benito County cases were transferred out of a SF hospital on 2/11/2020, via dedicated EMS transport.
- DPH Occupational Safety & Health (OSH) developed guidance for clinics regarding environmental and infection control requirements and requirements to wear N95 respirators.
- DPH to distribute CDC guidance on the re-use of N95 respirators to SF healthcare facilities and hospitals during Operational Period #4.
- The City Attorney's Office (CAO) has adopted modified isolation & home quarantine orders.
- DEM has identified the need for a DPH liaison to the City & County of San Francisco's Emergency Operations Center (CCSF EOC). The liaison is expected to be the lead for Health and Human Services (HHS) Branch, be the primary point for HHS working groups, be primary point of contact for EOC personnel if they have DPH questions, to raise and resolve any key issues with other Operations Section representatives, to provide briefs to EOC on DPH planning meetings, to provide any additional updates in WebEOC, to provide list of operational period objectives for Emergency Action Plan (EAP) (essentially distill from DPH Incident Action Plan), to submit any resource requests to EOC Logistics, and to participate in Incident Management Team (IMT) and Citywide EOC briefs.

Public Information:

- SFDPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public information about COVID-19 (Novel Coronavirus) with www.sf72.org and www.sfdph.org as the online resource for public health and safety information.
- Public information objectives remain as:
 1. Rumor Control
 2. Engagement with the Chinese and Asian Pacific Islander community
 3. Keeping Public Information up-to-date
- The majority of media inquiries are regarding CDC's announcement that San Francisco is one of five public health agencies are becoming labs throughout the US (LA/SF/Seattle and NYC) to conduct COVID-19 testing.
- SFDPH and SFDEM PIOs have prepared a press release announcement (also translated) should a SF resident test positive for COVID-19.
- San Francisco Department of Public Health (DPH) continues to expand community presence, messaging,

and outreach to SF residents and the Chinese community, three of which occurred yesterday, February 13th:

- Joint outreach meeting with SFUSD held at Gordon Lau Elementary for parents of students.
- Supervisor Peskin hosted Dim Sum event with Chinatown leaders at New Asia.
- NICOS Chinese Health Coalition Disaster Preparedness Committee Meeting at First Chinese Baptist Church.
- Additional community outreach requests include the Richmond Senior Center and District 9 public meeting in the Portofino neighborhood.
- SFDPH engaged with SF Unified School District (SFUSD) to discuss COVID-19 in school settings and to start development of a FAQ sheet for SFUSD.
- DEM, DPH, and the San Francisco Human Rights Commission (HRC) have developed and disseminated anti-discrimination messaging.

CDC Response:

- CDC has been uploading the entire genome of the viruses from reported cases in the United States to GenBank as sequencing was completed.
- CDC has grown the COVID-19 virus in cell culture, which is necessary for further studies, including for additional genetic characterization. The cell-grown virus was sent to NIH's BEI Resources Repository for use by the broad scientific community.

Resources:

- Department of Public Health (SFDPH): <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/>

- World Health Organization (WHO): <https://www.who.int/emergencies/diseases/novel-coronavirus-2019>
- For operational coordination and information sharing, visit WebEOC (<https://sfvem.org>) under Incident Name: **2020-01-21 2019 Covid-19** (*formerly 2020-01-21 2019-nCoV*). Note - WebEOC is password protected.

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States.

Hi all,

Here's the latest CDC EpiX report on COVID-19. Of concern:

1. Japanese case in HI with **no** China travel history confirmed with SARS-CoV-2
2. Additional surveillance using CDC FluView Surveillance from 5 PHL's – SF, LA, NY, Seattle, Chicago to **test Flu negatives** for SARS-CoV-2 to determine if in community.

Thanks,
Sheilah

Subject: CoV Call Center summary- Feb 14, 2020

Call Center nurses are now assisting with follow-up of travelers on quarantine list- approximately 30 travelers called (3 lists).

Total calls today- 11

Fever, respiratory symptoms in some combination with travel to Asia in past 14 days: 3 (includes possible confirmed case evacuated from cruise ship in Japan)

CDC called: 1 (multiple times on above patient- no information)

PUI: 0

Follow up call to check on PUI patients: 2 (improved)

Fever, respiratory symptoms without travel (e.g. exposure to someone who traveled to China): 1

No symptoms but worried: 1

Technical Questions:

- Specimen collection: 0
- PPE: 0
- Employee returning from China: 0
- HW returning from China: 0
- Other:
 - Kaiser- needs lab results on PUI with negative results (UCSF HW)- 1

- GO Medical/Dignity- questions about PUI criteria: "we dont have any staff fit-tested"- 1
- SFGH interpreter- concerned because there is an asymptomatic traveler in quarantine and family are going in and out without wearing PPE (interpreter asked to contact SFGH Infection Control)- 1
- SFFD (2 FYI calls about picking up diabetic patient who traveled from China with leg pain- no URI symptoms)- 1
- UCSF- patient returned from CHina >14 days ago, asymptomatic, scheduled for elective hernia repair- OK to proceed? (yes) - 1
- St Francis - would like general info about PUI screening criteria - 1

Janice K. Louie, MD, MPH

Please note if I am e-mailing you about 2019 n-Coronavirus, it is because I am on temporary assignment to assist with the SFDPH 2019 nCoV Activation

FYSA – You need to register!

State and Local Leaders,

Please join us for a national briefing call **Friday, February 14 at 1:45 p.m. Eastern Time** on the President’s Coronavirus Task Force (**Please register, see link below**). The national briefing call will include updates from the U.S. Department of Health & Human Services and Centers for Disease Control & Prevention (CDC) along with our Federal partners at U.S. Department of Homeland Security, U.S. Department of Transportation, and the State Department. This national briefing call will provide an update from the Federal government and our ongoing partnership with State and local jurisdictions.

Additional Information

- You can find more information and resources at the CDC website here: <https://www.cdc.gov/coronavirus/>.
- ICYMI – USA Today: Our Coronavirus Response Is Protecting Americans (see full Op-Ed below)

Briefing Call Details

Date: Friday, February 14

Time: 1:45 p.m. Eastern Time

Call-In Information: [LINK](#) (*Participants will receive instructions on accessing the conference after RSVPing to the link*)

Thanks,

Darcie Johnston, Director
Office of Intergovernmental Affairs
U.S. Department of Health and Human Services

ICYMI - Our Coronavirus Response Is Protecting Americans

USA Today

By Secretary of State Mike Pompeo and HHS Secretary Alex Azar

February 11, 2020

Link to op-ed [here](#).

The first duty of the federal government is to keep our citizens safe. Since the United States first became aware on Dec. 30 of what has become known as the novel coronavirus, America’s public health officials have closely monitored the situation, worked to understand the virus and taken steps to limit Americans’ exposure to it.

Our task force is ensuring that our whole of government, layered, public health plan has the resources necessary to protect Americans. We've treated the sick, and traced back their travel history and contacts to minimize the spread of the virus. We've worked swiftly to screen and safely receive American travelers returning from China, and bar foreign travelers who have recently visited the epicenter of the outbreak.

Consistent with the World Health Organization International Health Regulations, our travel restrictions were intentionally devised to complement the Chinese government's policy of isolating approximately 50 million of its own citizens in Hubei province. Other nations, such as Italy and South Korea, have taken similar measures.

Our efforts in China

Thus far, the United States has only had 12 confirmed cases of the virus. We were saddened to hear last week that one American, a 60-year-old woman in Wuhan, China, has died. But we're undeterred in our vigilance to protect our people. And we're mobilizing resources around the world to help other nations fight the disease, too. This is American altruism at its finest.

Let's start with our efforts focused on the country where the virus first appeared — China. In the words of President Donald Trump, "We're offering them tremendous help." During the first week of January, the Centers for Disease Control and Prevention made an offer of assistance in order to understand the disease and help bolster response efforts.

The Department of Health and Human Services subsequently provided to the WHO a list of world-class medical professionals ready to deploy their skills in China and learn from China's efforts to combat this new coronavirus. In the last week of January, Secretary Azar personally extended an offer of help to Health Minister Ma Xiaowei; Secretary Pompeo did the same with Chinese State Councilor Yang Jiechi. We hope the mission will commence immediately, whether bilaterally or under the auspices of the WHO.

We've also facilitated the delivery of vast amounts of medical supplies to the Chinese people. Just last week, the State Department helped transport 17.8 tons of relief supplies to Hubei. And more assistance will continue to be offered — the United States is prepared to spend up to \$100 million in existing State and U.S. Agency for International Development funds to assist China and other impacted countries to contain and combat the virus.

While State managed the logistics, the donations themselves were provided by Samaritan's Purse, Boeing, Intermountain Healthcare and The Church of Jesus Christ of Latter-day Saints, and coordinated by a nongovernmental organization called Project HOPE. Time and again, when diseases and disasters strike, the American people have stepped up to help citizens of other countries without being asked. Our robust charitable giving and enthusiastic civil society groups are channeling the American people's concern for their fellow man.

Cooperation with other nations

Then there are America's actions to help the citizens of other countries, beyond China. CDC staff based in more than 60 countries are working closely with ministries of health and other health partners, often in conjunction with their colleagues at the State Department and other federal agencies.

For instance, the United States has made coronavirus test kits available to 191 qualified laboratories around the world; so far, labs from 36 countries have put in orders. We've deployed staff to train health professionals in 15 hospitals in Vietnam. In Kenya, health experts at the U.S. Embassy in Nairobi, as part of our Infectious Diseases Task Force, engaged the government early on to recommend best practices in airport screening and public health.

Our quick and effective reaction abroad is facilitated by partnerships that America has carefully nurtured over decades — long before the latest outbreak.

We believe our actions will slow the transmission of the virus to and within the United States and other countries, solidify our ties of friendship with our allies and partners, and help save lives by giving us more time to refine preparedness measures and better understand the virus.

We all hope that our concerted efforts will control the virus and cause it to subside. But the world doesn't need to wait for that day to see how America remains a force for good throughout the globe.

Subject: CAHAN Disease Notification – CDC Change in PUI Definition
Date: Thursday, February 13, 2020 7:33:53 PM

CDC has made changes to their guidance for evaluation of “Persons Under Investigation (PUI)” for Coronavirus Disease 2019. CDC’s definition of a PUI has an added footnote. Persons who may be infected with 2019 novel coronavirus should be immediately discussed with the local public health department. The new CDC guidance provides for consideration of testing persons who do not meet the PUI definition in two circumstances:

- For severely ill individuals, testing can be considered when exposure history is equivocal and another etiology has not been identified.
- For persons with travel to China within 14 days, testing can be considered at the discretion of public health officials for all persons with illnesses with fever and lower respiratory symptoms, whether or not they are hospitalized.

<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>

The California Department of Public Health has been informed that after consultation and agreement with the FDA, the CDC is manufacturing a replacement component of the test kit to better ensure quality control. The California Department of Public Health remains poised to start testing for 2019 novel coronavirus upon receiving those materials.

Situation Report - Situation Report - Update - COVID-19 (#10)

Department of Emergency Management
Division of Emergency Services

02-13-2020 - 17:24:41

Change Since Last Situation Report:

Situation Update:

- **International data:**
 - 60,364 confirmed cases; 59,826 cases in mainland China; 1,368 deaths in mainland China
 - 523 confirmed cases outside of China across 27 countries/regions. *(total includes 175 cases on the Diamond Princess cruise ship docked at Yokohama, Japan)*
- **National (U.S.) data:**
 - 15 total confirmed cases in the USA (**2 new cases confirmed- 1 in San Diego, CA and 1 in San Antonio, TX.**)
 - There are no confirmed cases in San Francisco
 - The risk of COVID-19 in California remains low.
- **There are no recommendations to cancel events.**
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>
 - *NOTE: Information may vary as events and reporting are rapidly evolving.*
- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is never too late to get the flu vaccine.**

SFDPH Activities:

- SFDPH objectives have expanded to support an infrastructure for contacting return travelers from China who require follow up.
- CDPH and SFDPH are discussing collaboration on a CDC surveillance project that looks at community transmission of COVID-19.
- SFDPH outpatient clinics are conducting travel screening with their patients in clinic to broaden the ability to identify people needing follow up.
- Dr. Naveena Bobba is now Incident Commander for SFDPH DOC, Dr. Tomas Aragon continues working in his role as Health Officer for CCSF.
- Hospital readiness site visit scheduled for 02/14/2020 with CMPC Van Ness campus
- SFDPH will implement a process to notify K-12 schools of students who are in federal self-quarantine, with the primary goal to offer support to impacted students and families, not just quarantine/exclusion

notification.

- DPH continue to work to control inventory of PPE and explore alternatives to N-95 respirators which are on allocation, including purchasing industrial respirators.

Public Information:

- The World Health Organization (WHO) has renamed Novel Coronavirus to COVID-19 and has asked others to refer to the virus in this manner. Public information will work to introduce this term in future materials.
- SFDPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public information about COVID-19 (Novel Coronavirus).
- Public Information Objectives:
 1. Rumor Control
 2. Engagement with the Chinese and Asian Pacific Islander community
 3. Keeping Public Information up-to-date
- DPH and DEM continue to finalize announcement plans should a San Francisco resident contract COVID-19. The Office of Civic Engagement and Immigrant Affairs (OCEIA) has conducted translation of these materials in all threshold languages.
- The following community outreach events were conducted on Thursday February 13 in Chinatown:
 - 8:45 a.m. – Joint outreach meeting with SFUSD held at Gordon Lau Elementary for parents of students.
 - 11:00 a.m. – Supervisor Peskin hosted a Dim Sum event with Chinatown leaders at New Asia. DPH and DEM were also present.
 - 3:00 p.m. – SFDPH presented the City’s current plan that addresses the COVID-19 response and prevent the spread of the disease at the NICOS Chinese Health Coalition Disaster Preparedness Committee Meeting at First Chinese Baptist Church.
- DPH, San Francisco International Airport (SFO) and DEM conducted a conference call with Moscone Center Staff at the request of the City Administrator’s Office. The purpose of the meeting was to provide guidance to convention and meeting planners having events at the Moscone Center.
- DPH and DEM Public Information Officers (PIOs) continue to respond to media inquiries and prioritize Chinese language media.
- 311 has received 400 inquires on COVID-19 since January 27, 2020.
- Updated factsheets remain available at www.sfdph.org and www.sf72.org.

CDC Response:

- Enhanced screening continues at 11 U.S. airports. 32,434 screenings has been conducted at these airports as of 2/10/20.
- Public Health Laboratories are awaiting COVID-19 test replacement kits from the CDC to begin local testing. The replacement will provide a more effective diagnostic test component.

WHO Response:

- WHO published key considerations for repatriation and quarantine of travelers in relation to COVID-19
- WHO prepared a list of Q&A on infection prevention and control for health care workers caring for patients with suspected or confirmed COVID-19

- CDC Respirator Supply Strategy Guidelines: (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/respirator-supply-strategies.html>)
- World Health Organization (WHO): <https://www.who.int/emergencies/diseases/novel-coronavirus-2019>
- For operational coordination and information sharing, visit WebEOC (<https://sfvem.org>) under Incident Name: 2020-01-21 2019 nCoV. Note - WebEOC is password protected.

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States.

Subject: Please Register - COVID 19- National Call, Feb. 14th

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

State and Local Leaders,

Please join us for a national briefing call TOMORROW, Friday, February 14 at 1:45 p.m. Eastern Time on the President's Coronavirus Task Force (Please register, see link below). The national briefing call will include updates from the U.S. Department of Health & Human Services and Centers for Disease Control & Prevention (CDC) along with our Federal partners at U.S. Department of Homeland Security, U.S. Department of Transportation, and the State Department. This national briefing call will provide an update from the Federal government and our ongoing partnership with State and local jurisdictions.

Additional Information

* You can find more information and resources at the CDC website here: <https://www.cdc.gov/coronavirus/> <https://urldefense.proofpoint.com/v2/url?u=https-3A___www.cdc.gov__coronavirus_&d=DwMFAG&c=Lrta7ed3egkbwePCNW4ROg&r=0PyiXS2LGGOUi6N7FevK7WVfES6YpHloaP5kj830ZmM&m=gOYTP9sPZ9VHgrfXk2KXa2_ar65AHKtPS8uB00EmJw&s=0zAq2u6iAmKoYsdOjcr2pdDJV4Qv2a72AstrUYNIgTE&e=>>

ICYMI - Our Coronavirus Response Is Protecting Americans

USA Today

By Secretary of State Mike Pompeo and HHS Secretary Alex Azar

February 11, 2020

Link to op-ed here <https://urldefense.proofpoint.com/v2/url?u=https-3A___www.usatoday.com_story_opinion_2020_02_11_pompeo-2Dazar-2Dcoronavirus-2Dresponse-2Dcdc-2Ddwho-2Dprotects-2Damericans-2Dcolumn_4712857002_&d=DwMFAG&c=Lrta7ed3egkbwePCNW4ROg&r=0PyiXS2LGGOUi6N7FevK7WVfES6YpHloaP5kj830ZmM&m=gOYTP9sPZ9VHgrfXk2KXa2_ar65AHKtPS8uB00EmJw&s=3dfu4xeyFY_1mByVQKtemRXUA9NXQR2g1rj1mBzWslg&e=>>

The first duty of the federal government is to keep our citizens safe. Since the United States first became aware on Dec. 30 of what has become known as the novel coronavirus, America's public health officials have closely monitored the situation, worked to understand the virus and taken steps to limit Americans' exposure to it.

Our task force is ensuring that our whole of government, layered, public health plan has the resources necessary to protect Americans. We've treated the sick, and traced back their travel history and contacts to minimize the spread of the virus. We've worked swiftly to screen and safely receive American travelers returning from China, and bar foreign travelers who have recently visited the epicenter of the outbreak.

Consistent with the World Health Organization International Health Regulations, our travel restrictions were intentionally devised to complement the Chinese government's policy of isolating approximately 50 million of its own citizens in Hubei province. Other nations, such as Italy and South Korea, have taken similar measures.

Our efforts in China

Thus far, the United States has only had 12 confirmed cases of the virus. We were saddened to hear last week that one American, a 60-year-old woman in Wuhan, China, has died. But we're undeterred in our vigilance to protect our people. And we're mobilizing resources around the world to help other nations fight the disease, too. This is American altruism at its finest.

Let's start with our efforts focused on the country where the virus first appeared — China. In the words of President Donald Trump, "We're offering them tremendous help." During the first week of January, the Centers for Disease Control and Prevention made an offer of assistance in order to understand the disease and help bolster response efforts.

The Department of Health and Human Services subsequently provided to the WHO a list of world-class medical professionals ready to deploy their skills in China and learn from China's efforts to combat this new coronavirus. In the last week of January, Secretary Azar personally extended an offer of help to Health Minister Ma Xiaowei; Secretary Pompeo did the same with Chinese State Councilor Yang Jiechi. We hope the mission will commence immediately, whether bilaterally or under the auspices of the WHO.

We've also facilitated the delivery of vast amounts of medical supplies to the Chinese people. Just last week, the State Department helped transport 17.8 tons of relief supplies to Hubei. And more assistance will continue to be offered — the United States is prepared to spend up to \$100 million in existing State and U.S. Agency for International Development funds to assist China and other impacted countries to contain and combat the virus.

While State managed the logistics, the donations themselves were provided by Samaritan's Purse, Boeing, Intermountain Healthcare and The Church of Jesus Christ of Latter-day Saints, and coordinated by a nongovernmental organization called Project HOPE. Time and again, when diseases and disasters strike, the American people have stepped up to help citizens of other countries without being asked. Our robust charitable giving and enthusiastic civil society groups are channeling the American people's concern for their fellow man.

Cooperation with other nations

Then there are America's actions to help the citizens of other countries, beyond China. CDC staff based in more than 60 countries are working closely with ministries of health and other health partners, often in conjunction with their colleagues at the State Department and other federal agencies.

For instance, the United States has made coronavirus test kits available to 191 qualified laboratories around the world; so far, labs from 36 countries have put in orders. We've deployed staff to train health professionals in 15 hospitals in Vietnam. In Kenya, health experts at the U.S. Embassy in Nairobi, as part of our Infectious Diseases Task Force, engaged the government early on to recommend best practices in airport screening and public health.

Our quick and effective reaction abroad is facilitated by partnerships that America has carefully nurtured over decades — long before the latest outbreak.

We believe our actions will slow the transmission of the virus to and within the United States and other countries, solidify our ties of friendship with our allies and partners, and help save lives by giving us more time to refine preparedness measures and better understand the virus.

We all hope that our concerted efforts will control the virus and cause it to subside. But the world doesn't need to wait for that day to see how America remains a force for good throughout the globe.

Subject: SFDPH DOC COVID-19 Situation Status Report (02/13/20)
Date: Thursday, February 13, 2020 2:04:33 PM

SFDPH DOC nCoV Situation Status Report (02/13/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 60,363 cases / 1,370 Deaths (*John Hopkins CSSE, link below*)

US: 15 Cases / 0 Deaths

CA: 8 Cases (*see CDPH report below*) / 0 Deaths

SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- SFDPH DOC welcomes new Incident Commander Dr. Naveena Bobba.
- SFDPH objectives have expanded to support an infrastructure for contacting and interviewing return travelers from China who require follow up.
- CDPH and SFDPH are discussing collaboration on a CDC surveillance project looking at community transmission of COVID-19.
- Guidance in development for “Home Health Care” workers.
- SFDPH outpatient clinics are conducting travel screening with all patients in clinic, to broaden the ability to identify possible PUIs or people needing follow up, including asymptomatic patients with potential for COVID-19 infection.
- SFDPH Supply Unit continues to address nationwide N95 respirator shortage. Plan to order industrial respirator masks as an option.
- <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

CDC-

- Public Health Laboratories are awaiting COVID-19 test replacement kits from the CDC to begin local testing. The replacement will provide a more effective diagnostic test component.
- CDC reported U.S. testing data: 15 positive PUIs; 347 negative PUIs; 66 Pending PUIs
<https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- WHO published key considerations for repatriation and quarantine of travelers in relation to COVID-19- file:///C:/Users/kristina%20leonoudakis/Downloads/Repatriation_Quarantine_nCoV-key-considerations_HQ-final11Feb.cleaned.pdf
- WHO prepared a list of Q&A on infection prevention and control for health care workers caring for patients with suspected or confirmed 2019- nCoV <https://www.who.int/news-room/q-a-detail/q-a-on-infection-prevention-and-control-for-health-care-workers-caring-for-patients-with-suspected-or-confirmed-2019-ncov>
- The UN activated a Crisis Management Team (CMT) to be led by WHO. The CMT includes WHO, OCHA, IMO (International Maritime Organization), UNICEF, ICAO, WFP, FAO, the World Bank and departments of the UN Secretariat. The CMT will focus on the health response as well as the wider social, economic and developmental implications of the outbreak. <https://www.who.int/health-topics/coronavirus>

CDPH (California Department of Public Health)-

- **CDPH reported 1 newly confirmed case in San Diego.**
- The 2 most recent cases in California (both in San Diego County) are individuals in the repatriation population and it is unknown if they are California (CA) residents.
- CDPH reported CA testing data: • 139 persons tested • Eight confirmed cases • 111 negative results • 20 pending results
- CDPH return traveler data- 4,763 return travelers with arrival from China on or after 02/03/20 from approximately 43 local health departments. This does not include persons from repatriation flights in federal quarantine.
- CDPH stated the recent surge in number of confirmed cases is related to adoption of a new diagnosis classification. Hubei Province is now including clinically diagnosed cases into the number of confirmed cases.
- 9 Public Health Laboratories in CA are awaiting COVID-19 test replacements from the CDC to begin local testing- CDPH, Sacramento, Contra Costa, San Francisco, Santa Clara, Tulare, Los Angeles, Orange and San Diego Counties.
- CDPH released their guidance for schools and universities- file:///C:/Users/kristina%20leonoudakis/Downloads/Coronavirus+Colleges+Guidance+2_11_20.cleaned.pdf

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 60,363 confirmed cases globally
- 59,826 confirmed cases in China
- 1,368 deaths in China + 2 additional deaths (Philippines and Hong Kong)
- 474 confirmed cases outside of China across 27 countries.

National (U.S.) data:

- 15 total confirmed cases in the U.S.
- **2 new cases confirmed- 1 in San Diego, CA and 1 in San Antonio, TX.**
- PUIs in 41 states and territories. <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>

NOTE: Information may vary as events and reporting are rapidly evolving.

Domestic and International News:

A Change In How 1 Chinese Province Reports Coronavirus Adds Thousands Of Cases

China's Hubei province expanded its criteria for identifying new coronavirus infections on Thursday, causing a dramatic spike in reported cases at the epicenter of the disease, as Beijing moved to purge provincial party officials amid criticism of their handling of the epidemic. Hubei, where the majority of the world's infections have been concentrated, added a new category of "clinical cases" to its reporting. Now, patients will be included who exhibit all the symptoms of COVID-19, the disease caused by the coronavirus — including fever, cough and shortness of breath — but have either not been tested or tested negative for the virus itself. The change, likely a response to the scarcity of test kits and questions about their reliability, caused a ninefold increase in new reported cases in the province. Hubei province reported 14,840 new cases Thursday, compared to 1,638 new cases the day before. Hubei also reported 242 new deaths, more than double the 94 reported on Wednesday.

CDC Confirms Second Coronavirus Case in San Diego County

A second patient with a confirmed case of coronavirus, or COVID-19, is being treated at UC San Diego Medical Center, a Centers for Disease Control and Prevention spokesperson said Wednesday. It's the second confirmed case in the county since the deadly outbreak began. The first case was confirmed by the CDC on Monday. Both patients were among the 232 Americans evacuated from Wuhan, China, last week and flown to Marine Corps Air Station Miramar to complete a 14-day federal quarantine. The patients had no physical contact with each other while in quarantine and there is no indication the virus is spreading person-to-person within the quarantine facility, according to Dr. Chris Braden, the on-site CDC lead at MCAS Miramar. The patients arrived at the base on separate planes -- the first landed Feb. 5 and the second on Feb. 7 -- and were housed in separate facilities, the CDC said.

Over 9,000 SF customers lose power after underground equipment failure

An underground equipment failure caused more than 9,000 customers to be without power in San Francisco, according to multiple reports. Pacific Gas and Electric reported that the outage began at 7:52 p.m., impacting an area of the city ranging from the Haight-Ashbury in the west to San Francisco City Hall and the Civic Center to the east. According to The Chronicle, the blackout hit the War Memorial Opera House during a San Francisco Ballet performance. Ballet officials were forced to cancel the performance because of the outage, which was caused by a "small fire" in an underground vault near Laguna and Hayes streets. Power was restored to most customers by 10 p.m.

Hi Mary and Kim:

Thank you for the thoughtful and productive meeting yesterday afternoon. I think that SFUSD is doing a great job informing students and staff; and keeping everyone safe.

This webinar next week that Tomas is highlighting is great. It supports the documents and discussion we shared about pandemic preparedness for schools. I've attached an additional two resources and more are listed here: https://rems.ed.gov/Resources_Hazards_Threats_Biological_Hazards.aspx There seems to be more of an emphasis of school emergency preparedness for infectious disease from 2005-2012, so I'm not sure how much SFUSD, other Bay Area school districts, CaDoE have been updating their "continuity of learning" plans. **I'm personally very interested in what CaDoE, school districts, schools, and teachers have developed for "continuity of learning" plans for 14 days.** This would be used for a variety of circumstances, including mandatory isolation/quarantine and voluntary isolation/quarantine/exclusion through the different phases.

Again, I appreciate the strong protocols that SFUSD health has developed for students with acute illnesses. This provides a policy standard for us to add an element during this emerging epidemic, and we can adjust the response accordingly.

Thanks again.

February 12, 2020

Fundamentals of Emergency Planning for Schools with REMS TA Center

Emergency planning is critical for all, but especially for at-risk populations, as they depend on others planning for them and helping to keep them safe. Schools are a primary example; our youth spend most of their time during the year within the custody of schools and school personnel. Developing a high-quality school emergency operations plan is critical to keep youth safe. To learn more, please join us on **February 19 at 1 p.m. ET** for a webinar with the Readiness and Emergency Management for Schools (REMS) Technical Assistance (TA) Center's Project Director and Deputy Project Director, and the U.S. Department of Education's Project Administrator. They will share information on the fundamentals of emergency planning for schools and resources available to support comprehensive planning efforts. February 12, 2020

Fundamentals of Emergency Planning for Schools with REMS TA Center

Emergency planning is critical for all, but especially for at-risk populations, as they depend on others planning for them and helping to keep them safe. Schools are a primary example; our youth spend most of their time during the year within the custody of schools and school personnel. Developing a high-quality school emergency operations plan is critical to keep youth safe. To learn more, please join us on **February 19 at 1 p.m. ET** for a webinar with the Readiness and Emergency Management for Schools (REMS) Technical Assistance (TA) Center's Project Director and Deputy Project Director, and the U.S. Department of Education's Project Administrator. They will share information on the fundamentals of emergency planning for schools and resources available to support comprehensive planning efforts. Click [here](#) to learn more about this webinar, including

Situation Report - Update - COVID-19 (#9)

Department of Emergency Management
Division of Emergency Services

02-12-2020 - 17:56:44

Change Since Last Situation Report:

Situation Update:

- **International data:**
 - 45,210 confirmed cases; 44,687 cases in mainland China; 1,116 deaths in mainland China
 - 523 confirmed cases outside of China across 27 countries/regions. *(total includes 175 cases on the Diamond Princess cruise ship docked at Yokohama, Japan)*
- **National (U.S.) data:**
 - 13 total confirmed cases in the USA *(7 confirmed cases in California)*
 - There are no confirmed cases in San Francisco.
 - The risk of COVID-19 in California remains low.
- **There are no recommendations to cancel events.**
- <https://gisanddata.maps.arcgis.com/apps/opsdashboard/index.html#/bda7594740fd40299423467b48e9ecf6>
 - *NOTE: Information may vary as events and reporting are rapidly evolving.*
- **We are in flu season. The San Francisco Department of Public Health (DPH) recommends that persons with symptoms stay home from work, school and social gatherings. Practice hand-washing precautions. It is never too late to get the flu vaccine.**

SFDPH Activities:

- San Francisco Department of Public Health (DPH) engaged with San Francisco Unified School District (SFUSD) recently to discuss COVID-19 in school settings and to start development of a SFUSD FAQ sheet.
- DPH is collaborating with the NICOS Chinese Health Coalition to support the Chinese Community.
- DPH continues to monitor return travelers from China, with a goal of contact within 72 hours and is prioritizing outreach to families of school age children who have traveled from China.
- DPH is working with CDPH and CDC to develop process to contact travelers who provided incorrect or insufficient locating information
- DPH is focusing in on 2 major areas of work: community outreach and preparation of appropriate housing for a variety of Persons Under Investigation (PUI) patients (i.e. high risk vs. medium risk PUI cases).
- DPH Medical and Health trained staff are conducting site visits to major San Francisco hospitals (Kaiser, CPMC, ZSFG) to assess preparedness for potential COVID-19 patients and provide recommendations and support through collaboration.
- DPH Department leadership are strategizing around Persons Under Investigation (PUI) and return traveler access to N95 masks, to ensure equity to all.
- DPH DOC is preparing to rotate in new DOC staff and leadership, including new Incident Commander (IC) Dr. Naveena Bobba. Current IC (Tomas Aragon) will continue his involvement in the activation as Health Officer.
- DPH plans to distribute CDC guidance on the re-use of N95 respirators to SF healthcare facilities and hospitals this week.
- SFDPH is prepared to start COVID-19 testing, in line with CDC testing guidelines. Awaiting CDC approval to move forward.
- Operations continues to identify needs for additional staff and Plans and Logistics Sections are working on these requests
- SFDPH Public Health Lab has completed initial quality procedures to start COVID-19 testing, in line with CDC testing guidelines. CDC is working through some identified problems in the kits they have provided during this pre-testing work. Local testing is on hold until these issues can be resolved.

- <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20%20coronavirus/>

Public Information:

- The World Health Organization (WHO) has renamed Novel Coronavirus to COVID-19 and has asked others to refer to the virus in this manner. Public information will work to introduce this term in future materials.
- DPH and the San Francisco Department of Emergency Management (DEM) continue to operate the Joint Information Center to develop and disseminate accurate, timely, relevant and accessible public information about COVID-19 (Novel Coronavirus).
- Public Information Objectives:

<!--[if !supportLists]-->1) <!--[endif]-->Rumor Control

<!--[if !supportLists]-->2) <!--[endif]-->Engagement with the Chinese and Asian Pacific Islander community

<!--[if !supportLists]-->3) <!--[endif]-->Keeping Public Information up-to-date.

- DPH and DEM continue to finalize announcement plans should a San Francisco resident contract COVID-19. The Office of Civic Engagement and Immigrant Affairs (OCEIA) translated these materials in all threshold languages.
- The following community outreach events are planned on Thursday February 13th in Chinatown:
 - 8:45 a.m. – Joint outreach meeting with SFUSD at Gordon Lau Elementary for parents of students.
 - 11:00 a.m. - Supervisor Peskin hosting a Dim Sum event with Chinatown leaders at New Asia. DPH and DEM will also be present.
 - 3:00 p.m. – First Chinese Baptist Church with the NICOS Chinese Health Coalition Disaster Preparedness Council Meeting.
- DPH, San Francisco International Airport (SFO) and DEM conducted a conference call with Moscone Center Staff at the request of the City Administrator's Office. The purpose of the meeting was to provide guidance to convention and meeting planners having events at the Moscone Center.
- DPH and DEM Public Information Officers (PIOs) continue to respond to media inquiries and prioritize Chinese language media.
- 311 has received 400 inquiries on COVID-19 since January 27, 2020.
- Updated factsheets remain available at www.sfdph.org and www.sf72.org.

CDC Response:

- Under the Health and Human Services (HHS) Public Health Emergency, enhanced screening continues at 11 designated airports. CDC reports it has conducted 32,434 screenings at these airports as of 2/10/20.
- CDC released their guidance for EMS providers and re-use of N95 respirators.
- CDC reported U.S. testing data: 13 positive PUIs; 347 negative PUIs; 60 Pending PUIs <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO Response:

- An international mission is being prepared to determine characteristics of the COVID-19 virus and China's public health response in containment of the virus. A group of international experts, with a range of specializations, will work with Chinese counterparts on increasing understanding of the outbreak to guide global response efforts.
- Chinese and external expert groups are working to identify the animal source of COVID-19. Identifying the animal source will help prevent future outbreaks and provide critical information on the initial spread of the disease and how these viruses jump from animals to humans.

CDPH Response:

- California Department of Public Health (CDPH) released their guidance for childcare and pre-school settings: https://www.cdph.ca.gov/Programs/CID/DCDC/CDPH%20Document%20Library/Coronavirus%20daycare%202_7_20%20Final.pdf

Resources:

- For operational coordination and information sharing, visit WebEOC (<https://sfvem.org>) under Incident Name: 2020-01-21 2019 nCoV. Note - WebEOC is password protected.

Situation Summary:

- CDC is closely monitoring an outbreak of respiratory illness caused by COVID-19 that was first detected in Wuhan City, Hubei Province, China and which continues to expand.
- Chinese health officials have reported thousands of infections with COVID-19 in China, with the virus reportedly spreading from person-to-person in many parts of that country.
- Infections with COVID-19, most of them associated with travel from Wuhan, also are being reported in a growing number of international locations, including the United States.

Subject: CDC Returning Traveler Discussion for F11 Jurisdictions

When: Wednesday, February 12, 2020 3:00 PM-4:00 PM.

Where: Bridgeline: 1(888)455-7719 Passcode: 5108469 or Bldg. 21 3rd Floor 3025B

CDC Returning Traveler Discussion for F11 Jurisdictions

CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a call from 3 p.m. to 4 p.m. EST for the duration of this week, to discuss plans for returning travelers **within the eleven funneling jurisdictions**, status reports and concerns. Feel free to include your state epidemiologist, preparedness director, state/city emergency management official, and other core team members.

Bridgeline: 1(888)455-7719

Date: Wednesday, February 12, 2020 3:52:58 PM

SFDPH DOC nCoV Situation Status Report (02/12/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths
Worldwide: 45,206 cases / 1,118 Deaths (John Hopkins CSSE, link below)
US: 13 Cases / 0 Deaths
CA: 7 Cases (1 Federal Quarantine case, state of origin TBD) / 0 Deaths
SF: 0 Cases

Updates and Response:

SFDPH

Summary of actions

- SFDPH engaged with SF Unified School District (SFUSD) recently to discuss COVID-19 in school settings and to start development of a FAQ sheet for SFUSD.
- Community outreach and relationship building is occurring with SFUSD and the NICOS Chinese Health Coalition.
- SFDPH continues to monitor return travelers from China, with a goal of contact within 72 hours. DPH is working to identify challenges and collaborating with partner agencies to remove barriers.
- DPH is focusing in on 2 major areas of work: community outreach and preparation of appropriate housing for a variety of PUI patients (i.e. high risk vs. medium risk PUI cases).
- DPH Medical/Health trained staff are conducting site visits to major SF hospitals (Kaiser, CPMC, ZSFG) to assess preparedness for potential COVID-19 patients and provide recommendations and support through collaboration.
- Department leadership are strategizing around PUI/return traveler access to N95 masks, to ensure equity to all.
- DPH DOC is preparing to rotate in new DOC staff and leadership, including new Incident Commander (IC) Dr. Naveena Bobba. Current IC (Tomas Aragon) will continue his involvement in the activation as Health Officer.
- DPH plans to distribute CDC guidance on the re-use of N95 respirators to SF healthcare facilities and hospitals this week.
- SFDPH is prepared to start COVID-19 testing, in line with CDC testing guidelines. Awaiting CDC approval to move forward. <https://www.sfdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-%20%20coronavirus/>

CDC-

- Under the Health and Human Services (HHS) Public Health Emergency, enhanced screening continues at 11 designated airports. CDC reports it has conducted 32,434 screenings at these airports as of 2/10/20.
- CDC released their guidance for EMS providers and re: re-use of N95 respirators.
- CDC reported U.S. testing data: 13 positive PUIs; 347 negative PUIs; 60 Pending PUIs <https://www.cdc.gov/coronavirus/2019-ncov/hcp/index.html>

WHO (World Health Organization)-

- An international mission is being prepared to determine characteristics of the COVID-19 virus and China's public health response in containment of the virus. A group of international experts, with a range of specializations, will work with Chinese counterparts on increasing understanding of the outbreak to guide global response efforts.
- Chinese and external expert groups are working to identify the animal source of COVID-19. Identifying the animal source will help prevent future outbreaks and provide critical information on the initial spread of the disease and how these viruses jump from animals to humans.

CDPH (California Department of Public Health)-

- CDPH released their guidance for childcare and pre-school settings: file:///C:/Users/kristina%20leonoudakis/Downloads/Coronavirus%20daycare%20_7_20%20Final.cleaned.pdfhttps://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 45,206 confirmed cases globally
- 44,687 confirmed cases in China
- 1,116 deaths in China + 2 additional deaths (Philippines and Hong Kong)
- 474 confirmed cases outside of China across 27 countries.

National (U.S.) data:

- No changes to National data- 13 total confirmed cases in the U.S.
- PUIs in 37 states and territories

I hope CDC will provide further clarification.

Does this mean that even when we perform local testing that CDC wants a call to assign a PUI number, or only for now until local testing is available?

Janice K. Louie, MD, MPH

Please note if I am e-mailing you about 2019 n-Coronavirus, it is because I am on temporary assignment to assist with the SFDPH 2019 nCoV Activation

Emergency Preparedness & Response

Coronavirus Disease (COVID-19)

Sent to State Epidemiologists, Deputy State Epidemiologists, CLUE, Infectious Disease Points of Contact and the CSTE Executive Board:

Good afternoon,

Some public health laboratories have begun the verification process for the COVID-19 rRT-PCR assay. However, the existing PUI process for contacting CDC for assignment of the PUI ID (also known as nCoV ID) remains unchanged at this time. Jurisdictions should continue to immediately contact CDC about all PUIs through the EOC watch desk at 770-488-7100. During this contact with CDC, jurisdictions will receive the PUI ID, in addition to instructions for specimen shipping and submission of the PUI form. Further guidance will be forthcoming when modifications to this process are warranted.

Additionally, the CDC PUI information has been updated with a footnote, which allows some flexibility for public health departments to consider in the COVID-19 response and testing decision making process as supported in the EUA: <https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>. The footnote is included below for reference.

The criteria are intended to serve as guidance for evaluation. Patients should be evaluated and discussed with public health departments on a case-by-case basis. For severely ill individuals, testing can be considered when exposure history is equivocal (e.g., uncertain travel or exposure, or no known exposure) and another etiology has not been identified.

Thank you,

--

Subject: CSTE COVID-19 Response | PUI Process & Criteria Update

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Sent to State Epidemiologists, Deputy State Epidemiologists, CLUE, Infectious Disease Points of Contact and the CSTE Executive Board:

Good afternoon,

Some public health laboratories have begun the verification process for the COVID-19 rRT-PCR assay. However, the existing PUI process for contacting CDC for assignment of the PUI ID (also known as nCoV ID) remains unchanged at this time. Jurisdictions should continue to immediately contact CDC about all PUIs through the EOC watch desk at 770-488-7100. During this contact with CDC, jurisdictions will receive the PUI ID, in addition to instructions for specimen shipping and submission of the PUI form. Further guidance will be forthcoming when modifications to this process are warranted.

Additionally, the CDC PUI information has been updated with a footnote, which allows some flexibility for public health departments to consider in the COVID-19 response and testing decision making process as supported in the EUA: <https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>. The footnote is included below for reference.

The criteria are intended to serve as guidance for evaluation. Patients should be evaluated and

discussed with public health departments on a case-by-case basis. For severely ill individuals, testing can be considered when exposure history is equivocal (e.g., uncertain travel or exposure, or no known exposure) and another etiology has not been identified.

Thank you,

--

Hi Amie, Julie, Tomas, et al.,

I'm looking through emails/documents now to prepare for 1pm "Notifications" meeting.

Does anyone have an agenda or other questions that need to be addressed?

Here are my questions:

1. Notifications of schools (and also childcare, and workplaces?) of people being quarantined?
 - a. Considerations: Privacy, public safety, continuity of operations/learning
 - b. Options:
 - i. Emphasize exclusion in LHD initial contact
 - ii. "Request" that they contact school, childcare, workplace
 - iii. Contact schools and workplaces?
2. Public health response for childcare, school, and university guidance:
 - a. CDPH Guidance: *In the unusual event that an [infant, child, student or staff member] is identified who:*
 - *has symptoms of respiratory illness, such as fever and cough, AND*
 - *traveled from mainland China in the prior 14 days,**Please take the following steps:*
 - *separate the individual from others as much as possible and make arrangements for the individual to go home, and*
 - *contact your local health department immediately.*
 - b. **Issues & questions:**
 - c. Applicability to those who returned January 29 - February 2nd? Applicability to children of returning travelers?
 - d. Non-specificity of respiratory illness
 - e. Risk assessment by school and childcare staff
 - f. Who answers call from "local health department"
 - g. Initial assessment and management of case
 - h. Initial assessment and management of contacts in classroom

Subject: notifications

Hi Tomas,

We've identified a returning traveler from China who attends an SFUSD school. They have been staying home as instructed for the 14 day monitoring period.

Question - do you want us to build in a procedure to notify SFUSD (and local private schools) when we identify a student that attends the school? Should we notify for all students, or only students for whom we have concerns that they are not complying?

Considerations:

- Ensuring public safety
- Minimizing stigma
- This information may be helpful in ensuring absences are excused.

Please let us know your thoughts.

Thanks,

Julie

Hi Mary and Kim:

Thank you for the thoughtful and productive meeting yesterday afternoon. I think that SFUSD is doing a great job informing students and staff; and keeping everyone safe.

This webinar next week that Tomas is highlighting is great. It supports the documents and discussion we shared about pandemic preparedness for schools. I've attached an additional two resources and more are listed here: https://rems.ed.gov/Resources_Hazards_Threats_Biological_Hazards.aspx There seems to be more of an emphasis of school emergency preparedness for infectious disease from 2005-2012, so I'm not sure how much SFUSD, other Bay Area school districts, CaDoE have been updating their "continuity of learning" plans. **I'm personally very interested in what CaDoE, school districts, schools, and teachers have developed for "continuity of learning" plans for 14 days.** This would be used for a variety of circumstances, including mandatory isolation/quarantine and voluntary isolation/quarantine/exclusion through the different phases.

Again, I appreciate the strong protocols that SFUSD health has developed for students with acute illnesses. This provides a policy standard for us to add an element during this emerging epidemic, and we can adjust the response accordingly.

Thanks again.

Yours,
curtis

February 12, 2020

Fundamentals of Emergency Planning for Schools with REMS TA Center

Emergency planning is critical for all, but especially for at-risk populations, as they depend on others planning for them and helping to keep them safe. Schools are a primary example; our youth spend most of their time during the year within the custody of schools and school personnel. Developing a high-quality school emergency operations plan is critical to keep youth safe. To learn more, please join us on **February 19 at 1 p.m. ET** for a webinar with the Readiness and Emergency Management for Schools (REMS) Technical Assistance (TA) Center's Project Director and Deputy Project Director, and the U.S. Department of Education's Project Administrator. They will share information on the fundamentals of emergency planning for schools and resources available to support comprehensive planning efforts.

Dear Colleagues,

Attached you will find the latest travel cards or T-HANs that CDC quarantine stations around the nation are providing returning travelers. If the airports in your jurisdictions have developed or are providing additional communication resources, please send copies to CDC for our situational awareness. CDC would like to be aware of the airport communication resources that F11 jurisdictions are providing.

At your earliest convenience, please send copies of these airport communication resources to preparedness@cdc.gov.

Thank you.

Domestic and International News:

Rising seas already overwhelm the Bay Area. Time is running out for California to act

FOSTER CITY, Calif. — When Jeff Moneda first started working for Foster City, where trails wind along the town’s scenic lagoons and the nicest homes perch along its picturesque canals, he received an email from federal emergency officials that jolted him into action. “The first thing in my inbox was a letter from FEMA that said, ‘You need to raise your levee or we’re going to place the entire city in a flood zone,’” said Moneda, the city manager. “Talk about stress.” For a city of 34,000 that was built on filled-in marshland along San Francisco Bay, the future hinges on the strength of an eight-mile-long levee that for decades has held back the rising sea. But with every tide and storm, the water keeps trying to move back and reclaim the town. Flood maps, even in more moderate scenarios, show much of the city inundated if nothing is done. The fate of Foster City and the rest of the Bay Area was front and center last week as

state lawmakers grappled with the many threats California must confront as the ocean pushes farther inland. A special committee of state lawmakers gathered — for the second time in two months after years without meeting — to reignite a much-needed discussion on how to better prepare communities up and down the coast from devastating loss. Homes are flooding and critical roads and infrastructure are already mere feet from toppling into the sea, they said, but cities up and down the coast have been paralyzed by the difficult choices ahead. More than \$150 billion in property could be at risk of flooding by 2100 — the economic damage far more destructive than from the state's worst earthquakes and wildfires.

Letter Bombs Explode in ABN Amro, Ricoh Offices in Netherlands, No Injuries

AMSTERDAM — Two letter bombs exploded in the Netherlands on Wednesday, one at an ABN Amro bank mail-sorting office in Amsterdam and the other 225 km (140 miles away) in a mail room of Japanese electronics group Ricoh, police said. Police reported no injuries and said they were investigating whether the blasts were linked to a string of letter bombs intercepted in the country since early January. Dutch news agency ANP said the sender of the letters had demanded payments in bitcoin. Dutch police declined to provide details, but confirmed that extortion was among the motives under investigation. An employee in the Amsterdam sorting office heard a hissing sound as they were about to open a letter, city police said. "The employee threw the letter away and there was a small explosion," they said on Twitter.

Paradise Opens Full-Service Resource Center to Assist Camp Fire Survivors

The Town of Paradise has opened the doors of its Building Resiliency Center (BRC) to address the needs of residents of Butte County impacted by the devastating Camp Fire of November 2018. The BRC, or "Brick" as it's been nicknamed, hosts representatives from different State, Federal and local agencies under one roof making it easier and faster for residents to get help with multiple issues and concerns. It is, essentially, a one-stop-shop for residents, investors, or new property owners contemplating building or already intending to rebuild in Paradise and the surrounding area. The BRC provides residents with the opportunity to talk face-to-face with experts to get questions answered on the spot. Specifically, representatives from the Town of Paradise, Butte County, Cal OES, the State Licensing Board, PG&E and several other agencies are available during various days of the week to answer questions and to process permits and forms. In addition, resources are available to assist with financing and grant applications as well as representatives of the Housing Advocacy Center. Rebuild Advocates are also offering their services free-of-charge to assist with rebuilding, insurance and finances.
