Subject: Request for nCoV notification contacts
Date: Wednesday, February 5, 2020 2:38:26 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

CACDC Members: please see important message from our CDPH partners regarding novel coronavirus (nCOV). This is going to other statewide groups, but only one response per LHD is necessary -Matt

Dear colleagues,

We would like to compile a list of individuals in each local health jurisdiction (LHJ) who should receive novel coronavirus (nCoV) notifications from CDPH. Examples of notifications include nCoV laboratory results, returning traveler lists, flight contact notifications, and interjurisdiction transfers.

Please send the following information to novelvirus@cdph.ca.gov with the subject: 'Novel coronavirus notification contacts for [enter your local health jurisdiction]'

Name(s):

Email address(s):

Phone number(s) to call after-hours:

Thank you!

Lauren Stockman, MPH

Epidemiologist Supervisor

California Department of Public Health

Immunization Branch

850 Marina Bay Parkway

Building P, 2nd Floor

Richmond, CA 94804

Phone: 510-620-3848

Email: Lauren.Stockman@cdph.ca.gov

Subject: REQUEST FOR AN EXTENSTION TO SUBMIT THE DOCUMENTS FOR INFECTIOUS DISEASE PREVENTION AND CONTROL LOCAL INFRASTRUCTURE FUNDS
Date: Wednesday, February 5, 2020 1:54:54 PM

Hello Taylor St. Mary and Bill Rhinehart,

I am writing on behalf of the San Francisco Department of Public Health to request an extension on submitting the required documents for the Infectious Disease Prevention and Control infrastructure funds. We request this extension due to our local activation of the Novel Coronavirus. Please let me know if you have any questions.

Best
Israel

Israel Nieves-Rivera
PHD Policy Director
Population Health Division
San Francisco Department of Public Health
25 Van Ness Avenue, 8th Floor, Room 4, SF, CA 94102 | 628 206-7687

REACH -for- Results, Equity, and Accountability with Cultural Humility

Subject: SFDPH DOC Novel Corona Virus 2019 (nCoV-2019)- Sit Stat 02/04/20
Date: Tuesday, February 4, 2020 1:40:56 PM

SFDPH DOC nCoV Situation Status report #10 (02/04/20)

Status: Yellow
Outlook: Worsening
Need: None

of Cases/Deaths

Worldwide: 20,704 cases/427 Deaths (*John Hopkins CSSE, link below*)

US: 11 Cases/0 Deaths

CA: 6 Cases/0 Deaths

Updates and Response:

SFDPH

Summary of actions

- DPH outreach to the Chinese community remains a top priority. Round table meeting held today with Chinese Community stakeholders, including 50 different organizations, family associations, merchants, and community leaders.
- SFDPH Department Operation Center (DOC) continues to expand to accommodate operational, logistical, and administrative needs.
- DPH Supply Unit is actively locating and securing adequate Personal Protective Equipment (PPE) for staff; PPE is in high demand at this time from commercial suppliers, which may impact availability and/or order turnaround time.
- Collaboration at the regional level to coordinate messaging and guidance to pre-hospital providers (aligning with Health Officers' strategies), as well as 911 dispatch screening parameters and standards.
- DPH Primary Care personnel are bringing PPE training and guidance to outpatient clinics.
- CCSF Departments outside of DPH have been working together to accommodate space, time, and staff for the DOC. Resources are being identified and made available to support the nCoV-2019 activation response
- DPH is engaging with hospital partners to coordinate placement of PUI cases and confirmed cases, develop standard protocols for transport and relocation across the city, region and the State.
- CCSF Laboratories are preparing to receive and test specimen (if needed) 7 days a week.
- 2 San Benito confirmed cases continue to be hospitalized in in San Francisco. The SF community is not at risk as proper transport and isolation techniques are being followed.

SFDPH Page: <https://www.sfcdcp.org/infectious-diseases-a-to-z/coronavirus-2019-novel-coronavirus/>

CDC

- CDC reports of number of PUIs in the U.S. - 11 positive, 167 negative, and 82 pending tests. 36 states with PUIs (unchanged from 02/03/20).
- CDC reported that nCoV-2019 is not spreading in the U.S. community at this time.
- CDC Infection Control Guidance for 2019-nCoV revised 02/03/20.
- CDC plans to release guidance on quarantine of medium and high-risk travelers returning to the U.S. from

affected areas, as related to the Federal Quarantine Orders that went into effect over the weekend. Interim guidance can be found here: <https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>

CDC nCoV page:

<https://www.cdc.gov/coronavirus/2019-ncov/index.html>

WHO (World Health Organization)-

- WHO stated that no new countries reported cases of 2019-nCoV since 02/03/20.
- WHO developed a protocol for the investigation of early cases: [https://www.who.int/publications-detail/the-first-few-x-iffx-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-\(2019-ncov\)-infection](https://www.who.int/publications-detail/the-first-few-x-iffx-cases-and-contact-investigation-protocol-for-2019-novel-coronavirus-(2019-ncov)-infection)
- WHO prepared a disease commodity package that includes an essential list of biomedical equipment, medicines and supplies necessary to care for patients with 2019-nCoV: [https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-\(ncov\)](https://www.who.int/publications-detail/disease-commodity-package---novel-coronavirus-(ncov))

WHO nCoV-2019 page: <https://www.who.int/emergencies/diseases/novel-coronavirus-2019>

CDPH (California Department of Public Health)-

- Confirmed 6 cases in California: Santa Clara County (2), San Benito (2), Los Angeles (1), Orange County (1).
- As of 1800 hours on February 3, 2020 there have been 79 persons in California tested for 2019- nCoV. Six test results were positive, 50 test results were negative, and the remaining 23 results are pending.
- Currently coordinating with Federal authorities around quarantine orders for returning travelers from Hubei Province, coming through FO or LAX.

CDPH nCoV page:

<https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/nCOV2019.aspx>

Johns Hopkins Data Dashboard (real time updates, data sources- WHO, CDC, NHC, and DXY.)

International data:

- 20,704 confirmed cases (99% of all confirmed cases globally) and 427 deaths in China (an increase of 66 cases since yesterday). 2.1% of confirmed cases in China have resulted in death.
- 2 additional deaths in the Philippines and Hong Kong.
- 212 confirmed cases outside of China (an increase of 29 cases since yesterday) across 27 countries.

National (U.S.) data:

- 11 confirmed cases in the U.S. (Seattle, Chicago - 2, Tempe, LA County, Orange County, Santa Clara County -2, San Benito County -2, Boston).

- 167 negative PUIs; 82 Pending PUIs; 6.2% of PUIs have come back positive. PUIs in 36 states.

“No Reason for Alarm” Is a Foolishly Over-Reassuring Message about the Novel Coronavirus Spreading from Wuhan, China
<http://www.psandman.com/articles/Corona1.htm>

We’ve been corresponding for years and when I saw this post I emailed him last night. Here is his response, which he said I could share (he mentions his wife. Jody Lanard is also a risk communication expert):

Lovely to hear from you, Kathy. I thought I might. Lots of former colleagues, clients, friends, media contacts, etc. have been reaching out.

With some reluctance, Jody and I have been reaching back.

There will be more on the website in the days to come, I think. I sent my webmaster one thing today (yesterday here in Australia – but I’m keeping my thinking on NYC time), but she obviously didn’t post it. I have two more things I’ve written but won’t post till they’re published or it’s clear they won’t be. And Jody and I have a long list of additional things we want to write/say if and when we get to them.

In spite of all that, most of what we have to say is a recycling of things we have said before. If I were going to recommend two old articles to Dr. Angell or anyone, they would be [“Fear Is Spreading Faster than SARS”: And So It Should!](#) and [Containment as Signal: Swine Flu Risk Miscommunication](#). Sadly, we may end up having need as well for [What to Say When a Pandemic Looks Imminent](#):

[Messaging for WHO Phases Four and Five](#), though that was written with H5N1 in mind, and the imminent coronavirus pandemic looks like it will be orders of magnitude less severe. Some of what I wrote about stigma also seems on target, especially [Coping with Ebola stigma](#).

(It's kind of neat that the four links I thought of first as relevant to this coronavirus were from SARS, swine flu, bird flu, and Ebola.)

I'd be grateful for your thinking on what risk communication problems you're seeing this time around.

Below a broader summary I sent yesterday to a shipmate. I'd appreciate your feedback on anything I should change next time some friend asks me what I think is going on. Here it is:

In a teeny-tiny nutshell:

1. The experts we respect pretty much all think the coronavirus will almost certainly go pandemic. That means it will infect a lot of people in a lot of places over a relatively short period. It's not impossible that it will burn itself out. It's not impossible that a developed country like the U.S. can manage to keep it from spreading. But both are long shots.

2. I think most of the experts are signaling that they think this pandemic will be mild. Jody thinks they're signaling that it won't be horrendously severe. Either way, they have weaker grounds for hypotheses about severity than about infectiousness. They really don't know. Still, they're sounding significantly less worried about likely severity than they sounded a few days ago.

3. Even a pandemic that isn't severe can kill a lot of people, just because it's infecting so many. And even a pandemic that isn't severe can cause disruptions of all sorts: hospital overcrowding, supply chain problems, absenteeism, etc. The less severe it is, obviously, the less disruption. And the slower it moves, the less disruption.

4. The things that make sense to try to stop or slow an emerging infectious disease (isolating patients, tracing and monitoring contacts, restricting travel, etc.) no longer make sense once it's clear they have failed and the pandemic has arrived. This doesn't necessarily mean governments won't keep doing them.

All the best.

And the slower it moves, the less disruption.
4. The things that make sense to try to stop or slow an emerging infectious disease (isolating patients, tracing and monitoring contacts, restricting travel, etc.) no longer make sense once it's clear they have failed and the pandemic has arrived. This doesn't necessarily mean governments won't keep doing them.

All the best.

Hi All,

The purpose of this call is to figure out coordination primarily for the San Benito and San Francisco efforts in case and contact tracking.

For your information, I've attached the packet of information with the case and contact investigation materials.

Thanks,

Olivia

Dear Thomas,

I received your request to plan for coronavirus and desire to have a program flex to the regulations to create an isolation room. Please work with Diana Marana at the SF District Office on submitting a program flex request so the team there can make sure you have that immediately set up.

I've copied her on this email so the two of you can connect.

Thank you
Heidi

Dear Sonia, We think we need a **waiver from CDPH Licensing and Certification** to re-purpose

some of our SNF isolation rooms for nCoV.

Who is the person w authority to answer:

- do we need waiver?
- if not, how to we get it asap?

This would be a huge help in re-purposing our assets for our shared nCoV containment goals.

Thanks for your consideration.

With gratitude,

Tomas

Subject: RE: Use of isolation rooms at ZSFGH and Laguna Honda

Adrian,

Thank you so much for talking today. A few quick notes from our conversation to get others up to speed (please correct or add if needed). I've added Janice and Tiffany from our Operations Section, and Kelly who has been helping us think through placement.

- Any person who is diagnosed with novel Coronavirus (nCoV) **and** meets usual criteria for acute hospital admission could be taken at ZSFG (no change)
- We discussed that for now, CDC guidance has been to admit all cases for isolation and also serial specimen collection, even if they do not meet usual clinical criteria for admission to an acute bed. Adrian will check on this, but feels given CDC guidance

and the national and international public health emergency declarations, admitting an asymptomatic case should be possible if coordinated through the Administrator on Duty (AOD).

- For LHH, there are two issues (we clarified that we are NOT currently considering placing cases at LHH, only possibly persons under investigation (PUIs) while awaiting test results.
 - Most of their isolation rooms are licensed as a SNF. PUIs would not meet SNF licensing requirements for admission, so the CDPH Licensing and Certification district office would have to grant a waiver. Adrian is checking on possible procedures for how this could be done. Adrian agreed that **It would be helpful to have our CDPH CD and HO colleagues also talk to the L&C to reiterate the need for this flexibility, Tomas could you ask Sonia Angell about this?**
 - LHH is almost full and don't have bed capacity for isolation rooms. Adrian is also going to check on this. I let Adrian know that Kelly had said she was available to help problem solve to free up beds, if needed – thank you, Kelly. I'm also happy to get on a call to explain how we are envisioning this process potentially working, and get feedback from the LHH team to further refine this.
- In parallel, we are working to add nursing staff and capability to our ICS Operations team to collect specimens in people's homes (for those who can be separated from others in their home and do not need ongoing medical care). We are reaching out to hospital and clinical partners to explore all options, but will certainly work to use these other options and reserve beds as much as possible!

Subject: Use of isolation rooms at ZSFGH and Laguna Honda
Importance: High

Hi All,

Naveena asked Tomas and I to follow-up with Adrian Smith (Director of Regulator Affairs at ZSFGH & Chief Quality Officer at Laguna Honda) to discuss the process for getting waivers to use licensed beds for anything other than approved use. He indicated that when we know we need the rooms (either at ZSFGH or LHH) we need to page him at (415) 327-1820. He will then contact the District Administrator at the State to get a waiver - usually get answer the same day. We discussed the need to prioritize rooms for sick patients that cannot be isolated at home or other settings.

He indicated that ZSFGH respiratory isolation room availability is slim because they are normally always in use. However, there is often rooms available at Laguna Honda.

PUIs would not meet SNF licensing requirements for admission, so the CDPH Licensing and Certification district office would have to grant a waiver. Adrian is checking on possible procedures for how this could be done. Adrian agreed that **It would be helpful to have our CDPH CD and HO**

colleagues also talk to the L&C to reiterate the need for this flexibility, Tomas could you ask Sonia Angell about this?

- LHH is almost full and don't have bed capacity for isolation rooms. Adrian is also going to check on this. I let Adrian know that Kelly had said she was available to help problem solve to free up beds, if needed – thank you, Kelly. I'm also happy to get on a call to explain how we are envisioning this process potentially working, and get feedback from the LHH team to further refine this.
- In parallel, we are working to add nursing staff and capability to our ICS Operations team to collect specimens in people's homes (for those who can be separated from others in their home and do not need ongoing medical care). We are reaching out to hospital and clinical partners to explore all options, but will certainly work to use these other options and reserve beds as much as possible!

Subject: RE: Use of isolation rooms at ZSFGH and Laguna Honda

Thank you – but we will need the permission immediately once we identify a person who needs this care.

Adrian, really appreciate your help and I'll reach out to you today to discuss. If we can proceed with placing someone, and then retroactively get the waiver that would likely be OK. If not, we will need to ask the state for advance permission.

Subject: Use of isolation rooms at ZSFGH and Laguna Honda
Importance: High

Hi All,

Naveena asked Tomas and I to follow-up with Adrian Smith (Director of Regulator Affairs at ZSFGH & Chief Quality Officer at Laguna Honda) to discuss the process for getting waivers to use licensed beds for anything other than approved use. He indicated that when know we need the rooms (either at ZSFGH or LHH) we need to page him at (415) 327-1820. He will

then contact the District Administrator at the State to get a waiver - usually get answer the same day. We discussed the need to prioritize rooms for sick patients that cannot be isolated at home or other settings.

He indicated that ZSFGH respiratory isolation room availability is slim because they are normally always in use. However, there is often rooms available at Laguna Honda.

Adrian's contact number is below:

Adrian Smith, RN, MSN
ZSFGH Director of Regulatory Affairs
Laguna Honda Chief Quality Officer
Phone #: (628) 206-6449
Pager #: (415) 327-1820

** Our office has moved. Please note new address & phone #.*

Thanks,

Nothing hugely earth-shattering in the message. Basic ATD standard (8 CCR 5199) compliance, including:

- the selection and provision of personal protective equipment (PPE),
 - training of staff on the selected PPE including proper donning and doffing technique, and
 - medical qualification for respirator use and respirator fit testing,
- are all moving forward.

Complicated by a fast-evolving case definition its going to take a bit time, but sooner, rather than later, basic training to all front-line staff who may have initial (incoming) patient contact, not just providers, will be needed on what steps are needed when a suspect patient presents. Contents might include where (which room) etc the patient should be placed, who should be notified, and some general risk communication and hazard mitigation steps (close door to patient room, post sign, etc) specific to each facility will be needed. OSH staff who were in the PPE “train the trainer” session this afternoon indicate that clinic staff present voiced some concern about “not knowing what’s going on”, a common problem when you move further away from the DOC.

Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Oakland— Cal/OSHA is issuing guidance on protecting health care workers from exposure to 2019 Novel Coronavirus (2019-nCoV). The [guidance](#) covers the safety requirements when providing care for suspected or confirmed patients of the respiratory disease or when handling pathogens in laboratory settings in California.

“It is vital that employers take the necessary steps to protect workers in health care settings where they may be at risk of exposure to 2019 Novel Coronavirus,” said Cal/OSHA Chief Doug Parker. “Cal/OSHA will provide guidance and resources on how to protect workers from this airborne infectious disease.”

The risk for infection is higher in health care settings such as hospitals and clinical laboratories. The [U.S. Centers for Disease Control and Prevention](#) (CDC) is providing updates and closely monitoring suspected cases of 2019-nCoV infection and transmission.

2019-nCoV is an airborne infectious disease covered by Cal/OSHA’s Aerosol Transmissible Diseases (ATD) standard, which requires employers to protect workers from diseases and pathogens transmitted by aerosols and droplets.

The ATD standard requires employers to have an ATD Exposure Control Plan with procedures to identify 2019-n-CoV cases or suspected cases as soon as possible and protect employees from infection.

The [ATD standard](#) further requires employers to provide training on the:

- Signs and symptoms of 2019-nCoV.
- Modes of transmission of the disease and source control procedures.
- Tasks and activities that may expose the employee to 2019-nCoV.
- Use and limitations of methods to prevent or reduce exposure to the disease including decontamination and disinfection procedures.
- Selection of personal protective equipment, its uses and limitations, and the types, proper use, location, removal, handling, cleaning, decontamination and disposal of protective equipment.
- Proper use of respirators.
- Available vaccines, when they become available.
- Employer's plan if an exposure incident occurs and surge plan, if applicable.

Employers must use feasible engineering and work practice controls to minimize employee exposure to 2019-nCoV. Examples of engineering controls include airborne infection isolation rooms or areas, exhaust ventilation, air filtration and air disinfection. Work practice controls include procedures for safely moving patients through the operation or facility, handwashing, personal protective equipment donning and doffing procedures, the use of anterooms, and cleaning and disinfecting contaminated surfaces, protective equipment, articles and linens.

Visit Cal/OSHA's [webpage](#) for further interim guidance on 2019-nCoV exposure in health care settings. In order to help employers comply with the ATD standard, Cal/OSHA has posted several [publications](#) including [The California Workplace Guide to Aerosol Transmissible Diseases](#) and fillable [ATD model exposure control](#) and [laboratory biosafety plans](#).

Several occupational safety and health standards, including Cal/OSHA's [Bloodborne Pathogens Standard](#) adopted in 1992 and the [ATD Standard](#) adopted in 2009, address worker protections when exposure to infectious diseases including coronavirus may occur in health care settings. The standards apply to hospital workers and emergency medical services, as well as workers in biological laboratories, decontamination workers, public health workers, or public safety employees who may be exposed to infectious disease hazards.

Cal/OSHA reminds all employers and workers that any suspected cases of 2019-nCoV must be promptly reported to the local public health department.

The [California Department of Public Health](#) has updated information on 2019-nCoV and reporting requirements. The Centers for Disease Control and Prevention has also posted specific [information for health care workers](#) and [laboratory settings](#).

The California Division of Occupational Safety and Health, or Cal/OSHA, is the division

within the Department of Industrial Relations (DIR) that helps protect California's workers from health and safety hazards on the job in almost every workplace. [Cal/OSHA's Consultation Services Branch](#) provides free and voluntary assistance to employers to improve their safety and health programs. Employers should call (800) 963-9424 for assistance from Cal/OSHA Consultation Services.

Employees with work-related questions or complaints may contact DIR's Call Center in English or Spanish at 844-LABOR-DIR (844-522-6734).

Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Oakland— Cal/OSHA is issuing guidance on protecting health care workers from exposure to 2019 Novel Coronavirus (2019-nCoV). The [guidance](#) covers the safety requirements when providing care for suspected or confirmed patients of the respiratory disease or when handling pathogens in laboratory settings in California.

“It is vital that employers take the necessary steps to protect workers in health care settings where they may be at risk of exposure to 2019 Novel Coronavirus,” said Cal/OSHA Chief Doug Parker. “Cal/OSHA will provide guidance and resources on how to protect workers from this airborne infectious disease.”

The risk for infection is higher in health care settings such as hospitals and clinical laboratories. The [U.S. Centers for Disease Control and Prevention](#) (CDC) is providing updates and closely monitoring suspected cases of 2019-nCoV infection and transmission.

2019-nCoV is an airborne infectious disease covered by Cal/OSHA’s Aerosol Transmissible Diseases (ATD) standard, which requires employers to protect workers from diseases and pathogens transmitted by aerosols and droplets.

The ATD standard requires employers to have an ATD Exposure Control Plan with procedures to identify 2019-n-CoV cases or suspected cases as soon as

possible and protect employees from infection.

The [ATD standard](#) further requires employers to provide training on the:

- Signs and symptoms of 2019-nCoV.
- Modes of transmission of the disease and source control procedures.
- Tasks and activities that may expose the employee to 2019-nCoV.
- Use and limitations of methods to prevent or reduce exposure to the disease including decontamination and disinfection procedures.
- Selection of personal protective equipment, its uses and limitations, and the types, proper use, location, removal, handling, cleaning, decontamination and disposal of protective equipment.
- Proper use of respirators.
- Available vaccines, when they become available.
- Employer's plan if an exposure incident occurs and surge plan, if applicable.

Employers must use feasible engineering and work practice controls to minimize employee exposure to 2019-nCoV. Examples of engineering controls include airborne infection isolation rooms or areas, exhaust ventilation, air filtration and air disinfection. Work practice controls include procedures for safely moving patients through the operation or facility, handwashing, personal protective equipment donning and doffing procedures, the use of anterooms, and cleaning and disinfecting contaminated surfaces, protective equipment, articles and linens.

Visit Cal/OSHA's [webpage](#) for further interim guidance on 2019-nCoV exposure in health care settings. In order to help employers comply with the ATD standard, Cal/OSHA has posted several [publications](#) including [The California Workplace Guide to Aerosol Transmissible Diseases](#) and fillable [ATD model exposure control](#) and [laboratory biosafety plans](#).

Several occupational safety and health standards, including Cal/OSHA's [Bloodborne Pathogens Standard](#) adopted in 1992 and the [ATD Standard](#) adopted in 2009, address worker protections when exposure to infectious diseases including coronavirus may occur in health care settings. The standards apply to hospital workers and emergency medical services, as well as workers in biological laboratories, decontamination workers, public health workers, or public safety employees who may be exposed to infectious disease hazards.

Cal/OSHA reminds all employers and workers that any suspected cases of 2019-nCoV must be promptly reported to the local public health department.

The [California Department of Public Health](#) has updated information on 2019-nCoV and reporting requirements. The Centers for Disease Control and Prevention has also posted specific [information for health care workers](#) and [laboratory settings](#).

The California Division of Occupational Safety and Health, or Cal/OSHA, is the division within the Department of Industrial Relations (DIR) that helps protect California's workers from health and safety hazards on the job in almost every workplace. [Cal/OSHA's Consultation Services Branch](#) provides free and voluntary assistance to employers to improve their safety and health programs. Employers should call (800) 963-9424 for assistance from Cal/OSHA Consultation Services.

NEWS RELEASE

Release Number: 2020-08

February 3, 2020

Cal/OSHA Issues Guidance on Requirements to Protect Health Care Workers from 2019 Novel Coronavirus

Oakland— Cal/OSHA is issuing guidance on protecting health care workers from exposure to 2019 Novel Coronavirus (2019-nCoV). The [guidance](#) covers the safety requirements when providing care for suspected or confirmed patients of the respiratory disease or when handling pathogens in laboratory settings in California.

“It is vital that employers take the necessary steps to protect workers in health care settings where they may be at risk of exposure to 2019 Novel Coronavirus,” said Cal/OSHA Chief Doug Parker. “Cal/OSHA will provide guidance and resources on how to protect workers from this airborne infectious disease.”

The risk for infection is higher in health care settings such as hospitals and clinical laboratories. The [U.S. Centers for Disease Control and Prevention](#) (CDC) is providing updates and closely monitoring suspected cases of 2019-nCoV infection and transmission.

2019-nCoV is an airborne infectious disease covered by Cal/OSHA’s Aerosol Transmissible Diseases (ATD) standard, which requires employers to protect workers from diseases and pathogens transmitted by aerosols and droplets.

The ATD standard requires employers to have an ATD Exposure Control Plan with procedures to identify 2019-n-CoV cases or suspected cases as soon as possible and protect employees from infection.

The [ATD standard](#) further requires employers to provide training on the:

- Signs and symptoms of 2019-nCoV.
- Modes of transmission of the disease and source control procedures.
- Tasks and activities that may expose the employee to 2019-nCoV.
- Use and limitations of methods to prevent or reduce exposure to the disease including decontamination and disinfection procedures.
- Selection of personal protective equipment, its uses and limitations, and the types, proper use, location, removal, handling, cleaning, decontamination and disposal of protective equipment.
- Proper use of respirators.
- Available vaccines, when they become available.

- Employer's plan if an exposure incident occurs and surge plan, if applicable.

Employers must use feasible engineering and work practice controls to minimize employee exposure to 2019-nCoV. Examples of engineering controls include airborne infection isolation rooms or areas, exhaust ventilation, air filtration and air disinfection. Work practice controls include procedures for safely moving patients through the operation or facility, handwashing, personal protective equipment donning and doffing procedures, the use of anterooms, and cleaning and disinfecting contaminated surfaces, protective equipment, articles and linens.

Visit Cal/OSHA's [webpage](#) for further interim guidance on 2019-nCoV exposure in health care settings. In order to help employers comply with the ATD standard, Cal/OSHA has posted several [publications](#) including [The California Workplace Guide to Aerosol Transmissible Diseases](#) and fillable [ATD model exposure control](#) and [laboratory biosafety plans](#).

Several occupational safety and health standards, including Cal/OSHA's [Bloodborne Pathogens Standard](#) adopted in 1992 and the [ATD Standard](#) adopted in 2009, address worker protections when exposure to infectious diseases including coronavirus may occur in health care settings. The standards apply to hospital workers and emergency medical services, as well as workers in biological laboratories, decontamination workers, public health workers, or public safety employees who may be exposed to infectious disease hazards.

Cal/OSHA reminds all employers and workers that any suspected cases of 2019-nCoV must be promptly reported to the local public health department.

The [California Department of Public Health](#) has updated information on 2019-nCoV and reporting requirements. The Centers for Disease Control and Prevention has also posted specific [information for health care workers](#) and [laboratory settings](#).

The California Division of Occupational Safety and Health, or Cal/OSHA, is the division within the Department of Industrial Relations (DIR) that helps protect California's workers from health and safety hazards on the job in almost every workplace. [Cal/OSHA's Consultation Services Branch](#) provides free and voluntary assistance to employers to improve their safety and health programs. Employers should call (800) 963-9424 for assistance from Cal/OSHA Consultation Services.

Employees with work-related questions or complaints may contact DIR's Call Center in English or Spanish at 844-LABOR-DIR (844-522-6734).

Good afternoon,

For tonight's call I am providing a link to the recently released CDC Movement and Monitoring guidance. I am also attaching a draft guidance related to schools as we would like to get your input on this draft.

Link to CDC Monitoring and Movement guidance is below

<https://www.cdc.gov/coronavirus/2019-ncov/php/risk-assessment.html>

Thank you.

Subject: Novel Coronavirus - Local Jurisdiction Call - CCLHO and CHEAC

Good afternoon,

CDPH is hearing from many of you that it would be helpful to have a local call to update you on novel coronavirus response activities, particularly expectations around monitoring travelers returning from

China. On a noon call, CDC indicated that their monitoring guidance would be available in two hours and we will send this to all of you when we receive it. To make a call most productive, we will schedule our state and local call at 6 pm tonight.

Don't hesitate to reach out to us if you have a specific question before then.

Thanks.

[Register to Attend](#)

Please join us for an engaging conversation with Dr. Art Reingold, infectious disease expert and professor at the UC Berkeley School of Public Health and Erin Allday, veteran health reporter at *The San Francisco Chronicle*. They will discuss what's new about the coronavirus, why these outbreaks are so difficult to predict and prepare for, how the media has been covering this issue, and how we, in the public health community, can best respond. There will also be time for audience Q&A.

Art Reingold, MD, is the Division Head of Epidemiology and Biostatistics at Berkeley Public Health. Professor Reingold has worked for over forty years on the prevention and control of infectious diseases both at the national level, including eight years at the US Centers for Disease Control and Prevention, as well as with numerous developing countries around the world. He has directed the CDC-funded California Emerging Infections Program since 1994.

Erin Allday is a health reporter at *The San Francisco Chronicle* who writes about infectious diseases, stem cells, neuroscience and consumer health topics. She's been on the health beat since 2006 (minus a nine-month stint covering Mayor Gavin Newsom). Before joining *The Chronicle*, Erin worked at newspapers all over the Bay Area and covered business and technology, city government, and education. She was part of a reporting team that won a Polk Award for regional reporting in 2005, for a series of stories on outsourcing jobs from Santa Rosa to Penang, Malaysia. Erin started her journalism career at the *Daily Californian* student newspaper and many years later still calls Berkeley her home.

This talk is part of the UC Berkeley School of Public Health's Dean's Speaker Series. The event is co-sponsored by the UC Berkeley Goldman School of Public Policy and the Henry Wheeler Center for Emerging & Neglected Diseases.

Light reception to follow

[Register to Attend](#)

Please join us for an engaging conversation with Dr. Art Reingold, infectious disease expert and professor at the UC Berkeley School of Public Health and Erin Allday, veteran health reporter at *The San Francisco Chronicle*. They will discuss what's new about the coronavirus, why these outbreaks are so difficult to predict and prepare for, how the media has been covering this issue, and how we, in the public health community, can best respond. There will also be time for audience Q&A.

Art Reingold, MD, is the Division Head of Epidemiology and Biostatistics at Berkeley Public Health. Professor Reingold has worked for over forty years on the prevention and control of infectious diseases both at the national level, including eight

years at the US Centers for Disease Control and Prevention, as well as with numerous developing countries around the world. He has directed the CDC-funded California Emerging Infections Program since 1994.

Erin Allday is a health reporter at *The San Francisco Chronicle* who writes about infectious diseases, stem cells, neuroscience and consumer health topics. She's been on the health beat since 2006 (minus a nine-month stint covering Mayor Gavin Newsom). Before joining *The Chronicle*, Erin worked at newspapers all over the Bay Area and covered business and technology, city government, and education. She was part of a reporting team that won a Polk Award for regional reporting in 2005, for a series of stories on outsourcing jobs from Santa Rosa to Penang, Malaysia. Erin started her journalism career at the *Daily Californian* student newspaper and many years later still calls Berkeley her home.

This talk is part of the UC Berkeley School of Public Health's Dean's Speaker Series. The event is co-sponsored by the UC Berkeley Goldman School of Public Policy and the Henry Wheeler Center for Emerging & Neglected Diseases.

Subject: All State Update Call - 2019 nCoV

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

CDC's 2019 Novel Coronavirus (2019-nCoV) response team will host a series of national calls beginning next week, from 3 p.m. to 4 p.m. EST on Tuesday, January 21, to provide state and local partners with the latest information on the novel coronavirus outbreak and U.S. preparedness efforts.

Invited participants include state, local, and territorial preparedness directors, state epidemiologists, state health officials, public health laboratory directors, and nongovernmental partners. Participant information can be found below.

Participant Information

Bridgeline: 1(800)-857-6697

Participant Passcode: 1324420

Please note, this update call is being held on a Tuesday, in lieu of the Martin Luther King Jr. federal holiday. Future calls will be held on Mondays.

For your convenience, call series dates are provided below.

- * Monday, January 27
- * Monday, February 3
- * Monday, February 10
- * Monday, February 24
- * Monday, March 2

Importance: High

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Good morning,

As you are all aware, last night San Benito requested transfer of their 2 confirmed Novel Coronavirus patients, due to worsening symptoms.

I sent a Flash Report out, around 2345, detailing the process, from the RDMHS side. (I am re-attaching to this thread, for efficiency.)

Attached, please find Resource Request # XBE20200202001, for the Highly Infectious Disease Team and ambulance, from Contra Costa County.

To my knowledge, the team arrived in San Benito and picked up the patients without incident. They left San Benito around 0430, and transported to SF without incident. I have not heard that they have arrived back in Contra Costa, yet.

If you have any questions, please contact me.

Very respectfully,

Aram

Correction: In the Recommendations for Reporting, Testing, and Specimen Collection section, the link for the 2019-nCoV PUI case investigation form has been corrected.

The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of respiratory illness caused by a novel coronavirus (2019-nCoV) that was initially detected in Wuhan City, Hubei Province, China in December 2019.

This CDC Health Alert Network (HAN) Update provides a situational update and interim guidance to state and local health departments that supersedes guidance in CDC's HAN 426 distributed on January 17, 2020. It also adds

- guidance for clinicians caring for patients with 2019-nCoV (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html>),
- and for public health officials on the evaluation and testing of patients under investigation (PUIs) for 2019-nCoV (<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>), and
- updated infection prevention and control guidance specific to 2019-nCoV (<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/infection-control.html>).

The entire CDC HAN is attached and available at the following link:
<https://emergency.cdc.gov/han/HAN00427.asp>

Because of the mix-up with the time of the last CDC call, I wanted to be sure you all had this information. Thanks, Kathy

CDC Hosting National Calls to Discuss Novel Coronavirus Response

The CDC's 2019 Novel Coronavirus (2019-nCoV) Response Team will host a series of national calls to provide state and local partners with the latest information on the novel coronavirus outbreak in China and preparedness efforts in the United States. Next week's call will be held from **11:00 AM – 12:00 PM PST on Monday, February 3, 2020**. Invited participants include state, local, and territorial preparedness directors, state epidemiologists, state health officials, public health laboratory directors, and nongovernmental partners. Participant information is provided below.

Participant Information

Bridge line: 1(800)-857-6697

Participant Passcode: 1324420

Future national calls will be held on Mondays, with upcoming calls scheduled for:

Monday, February 10

Tuesday, February 18 (moved due to President's Day federal holiday)

Monday, February 24

Monday, March 2

Subject: CDC Novel Coronavirus Call Monday, Feb 3 at 11:00am
Date: Saturday, February 1, 2020 6:50:34 PM

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Because of the mix-up with the time of the last CDC call, I wanted to be sure you all had this information. Thanks, Kathy

CDC Hosting National Calls to Discuss Novel Coronavirus Response

The CDC's 2019 Novel Coronavirus (2019-nCoV) Response Team will host a series of national calls to provide state and local partners with the latest information on the novel coronavirus outbreak in China and preparedness efforts in the United States. Next week's call will be held from **11:00 AM – 12:00 PM PST on Monday, February 3, 2020**. Invited participants include state, local, and territorial preparedness directors, state epidemiologists, state health officials, public health laboratory directors, and nongovernmental partners. Participant information is provided below.

Participant Information

Bridge line: 1(800)-857-6697

Participant Passcode: 1324420

Future national calls will be held on Mondays, with upcoming calls scheduled for:

Monday, February 10

Tuesday, February 18 (moved due to President's Day federal holiday)

Monday, February 24

Monday, March 2

Subject: CAHAN Disease Notification – CDC HAN 427: (CORRECTED LINK) Update and Interim Guidance on Outbreak of 2019 Novel Coronavirus (2019-nCoV)
Date: Saturday, February 1, 2020 10:41:58 AM
Attachments: [2019-nCoV-identify-assess-flowchart-2020-02-01-508.pdf](#)
[CDC+HAN+427+Update+2019-nCoV+02+01+2020.pdf](#)

Correction: In the Recommendations for Reporting, Testing, and Specimen Collection section, the link for the 2019-nCoV PUI case investigation form has been corrected.

The Centers for Disease Control and Prevention (CDC) continues to closely monitor an outbreak of respiratory illness caused by a novel coronavirus (2019-nCoV) that was initially detected in Wuhan City, Hubei Province, China in December 2019.

This CDC Health Alert Network (HAN) Update provides a situational update and interim guidance to state and local health departments that supersedes guidance in CDC's HAN 426 distributed on January 17, 2020. It also adds

- guidance for clinicians caring for patients with 2019-nCoV (<https://www.cdc.gov/coronavirus/2019-ncov/hcp/clinical-guidance-management-patients.html>),
- and for public health officials on the evaluation and testing of patients under investigation (PUIs) for 2019-nCoV (<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/clinical-criteria.html>), and
- updated infection prevention and control guidance specific to 2019-nCoV (<https://www.cdc.gov/coronavirus/2019-nCoV/hcp/infection-control.html>).

The entire CDC HAN is attached and available at the following link:

<https://emergency.cdc.gov/han/HAN00427.asp>

Subject: Airport Screening and Quarantine Operations Call with CDC

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

Issues Raised by Local Partners so far:

* Will there be an emergency proclamation in the state to enable reimbursement or will these costs be reimbursed outside of the Stafford Act?

Response from CalOES and CHHS was that they are unaware of any planned state emergency declaration but would be pushing the federal government hard to reimburse these costs.

* Who is issuing the quarantine order? This has implications for either the federal or local government entity. Only federal law enforcement can enforce a federal quarantine. US Marshall would have to enforce. What will happen to folks who do not comply?

* We are assuming that we aren't going back in time to find folks who traveled from Wuhan/Hubei in the last 14 days; is this accurate?

* Exactly what are the required protocols for quarantining or self-quarantining? This is a daunting task with dozens of people for 14 days. This active monitoring will far exceed what was done for ebola (small numbers).

* San Mateo commented that only 2% of those coming into SFO will stay in their county, and that they have no intent to keep these travelers in their county, there is no way to operationalize this and he will let passengers go to their desired destination.

* Federal government should be partnering directly with local jurisdictions and providing information and answers to their questions directly.

* There is no way to be operational so quickly, Sunday by 2 pm in California.

* There are a lot of resources needed: phones, thermometers, masks, capacity to feed people, housing that keeps folks isolated (and apart from each other) for 14 days, staff to follow up daily with everyone, testing and care arrangements for folks who become symptomatic (yet not sick enough for hospital care), and managing close contacts of any folks who become symptomatic.

* Staffing needs will be large, even Los Angeles, the largest county health department in the country says they are unable to operationalize this for a large number of travelers. Quarantining a large number of people will mean they are located at various sites and what is the expectation if someone becomes symptomatic?

* Everyone believes that CDC has the best intent, but the fact is there would need to be hundred of people to conduct this type of operation, and this seems to fly in the face of everything we have been doing.

* San Francisco said that their plan for travelers coming into their county, which is small in geographic area, would be to self-quarantine at their destination site, what they believe is a practical compromise.

* Concerns were raised about following airport emergency plans. Given that a public health emergency has been declared, planes should arrive in an isolated area. This will be a logistical nightmare – people will have vehicles at the airport and family members waiting to pick them up.

* How will we transport folks from the airport to quarantine housing and then to medical care/testing as needed? Probably not a great idea to keep people all together.

* Can we have guidance for schools and universities who are asking if they should be excluding students who traveled to the Hubei province in the last 14 days, and perhaps exclude those who traveled to China in the last 14 days?

* Is there a new case definition for novel corona virus if a negative test no longer rules out novel coronavirus? Seems impossible that the definition would be someone who has traveled to Hubei (or China) and has a fever and respiratory symptoms. Can we rule out folks who test positive for a different respiratory illness? And what is the implication for identifying and active monitoring of close contacts? Are we recommending that close contacts self-quarantine for 14 days since we can never rule out a case just because their test is negative? That would be problematic for health care workers.

* How will notification be managed between jurisdictions if the folks who are ordered to self-quarantine take themselves to another county (where they live); LHD's currently manage these exchanges but if the feds are issuing orders, we wonder how this works?

* How can we manage the potential for the health care system to be inundated with worried well? The implications that folks who have traveled to China in the last 14 days may be carrying the virus even if they aren't sick will increase calls to providers for testing and increase visits.

* How are we to communicate what it means for the federal government to declare a public health emergency? We are flooded with calls asking if this means we should be telling folks to cancel public events, especially lunar new year events which attract large numbers of Chinese residents.

Three Confirmed Cases of Novel Coronavirus in California

SACRAMENTO – The California Department of Public Health has been informed that one person in Santa Clara County has tested positive for novel coronavirus 2019. This information is confirmed by the Santa Clara County Public Health Department and the U. S. Centers for Disease Control and Prevention laboratory.

Currently, the California Department of Public Health confirms a total of three cases of novel

coronavirus in California: one individual in Santa Clara County, one individual in Los Angeles County and one individual in Orange County have tested positive for novel coronavirus 2019.

“It is understandable that some Californians may be nervous about potential spread of novel coronavirus, but the risk to the general public in California remains low,” said Dr. Sonia Angell, California Public Health Department Director and State Health Officer. “The Department of Public Health has been closely tracking this virus and we are actively engaged with our local health departments, the CDC and local governments to make sure Californians remain safe and healthy.”

At this time, no other persons infected with novel coronavirus (nCoV 2019) have been identified in California. Currently, the immediate health risk from novel coronavirus 2019 to the general public is low.

It is very important for people who have recently traveled and who become ill to notify their health care provider of their travel history. Those who have recently traveled to China or who have had contact with a person with possible novel coronavirus infection should contact their local health department or health care provider.

The Department of Public Health has been prepared and is continuing with the following actions:

- Providing information about the outbreak and how to report suspect cases to local health departments and health care providers in California.
- Coordinating with CDC personnel who are doing screening of travelers from China at SFO and LAX.
- Assuring that health care providers know how to safely manage persons with possible novel coronavirus 2019 infection.
- Supporting hospitals and local public health laboratories for collection and shipment of specimens for testing at CDC for novel coronavirus 2019.
- Activating the Department of Public Health’s Emergency Operations Center to coordinate response efforts across the state.

The novel coronavirus 2019 outbreak in China continues to evolve and California is prepared for more cases that may arise. The California Department of Public Health considers this a very important public health event; we are closely monitoring the situation and providing updates to partners across the state to support their preparedness efforts.

As with any virus, especially during the flu season, the Health Department reminds you there are a number of steps you can take to protect your health and those around you:

- Washing hands with soap and water.
- Avoiding touching eyes, nose or mouth with unwashed hands.
- Avoiding close contact with people who are sick are all ways to reduce the risk of infection with a number of different viruses.
- Staying away from work, school or other people if you become sick with respiratory symptoms like fever and cough.

The California Department of Public Health will not be providing additional information about the patient beyond what is being shared by the Santa Clara County Public Health Department. For more information about nCov-2019, please visit the [CDPH website](#).

2019 - 2020 Influenza Season - United States

The Centers for Disease Control and Prevention estimates that more than 15 million people in the U.S. have gotten sick with flu. More than 150,000 Americans have been hospitalized, and more than 8,000 people have died from their infection. And, this isn't even a particularly bad flu year (so far).

- Flu shots are still best way to protect yourself and loved ones. And it is not too late to get one.
- Handwashing continues to be one of the best strategies for avoiding infections. Many diseases and conditions are spread by not washing hands with soap and clean, running water. CDC has a great new section on handwashing ([Clean Hands Save Lives](#))
- Social distancing - i.e. stay home if you are sick. Keep your children home from school and activities if they are sick. We get it, it's difficult, and employer policies don't always support real life. Think of your co-workers and their families the way you want them to think about you and yours.

Read more about the 2019 Novel Coronavirus outbreak and surveillance below. While this international outbreak is concerning and rapidly changing, we want to make sure our communities are reminded about the existing risks that influenza presents right now in the United States and the simple steps that can assist with avoiding many respiratory illnesses as outlined above.

Our Mission

The California Immunization Coalition is a public-private partnership dedicated to

2019 Novel Coronavirus (2019-nCov)

This is an emerging, rapidly evolving situation and CDC will provide updated information as it becomes available, in addition to updated guidance.

CDC is closely monitoring the outbreak of 2019 Novel Coronavirus (2019-nCoV), a respiratory illness caused by a novel (new) coronavirus first identified in Wuhan, Hubei Province, China. Visit these CDC's web pages for the most current information.

CIC Summit Abstract Deadline Fast Approaching!

There is still time! CIC is accepting abstracts through the weekend for our 2020 Summit on June 8 and 9, 2020 in Sacramento, CA. This is a great opportunity to highlight what your organization has been doing and share with others in the field. The deadline for submitting an abstract is Monday February 3, 2020. For more information about the Summit click [here](#). To submit an abstract go [here](#).

Thank you to Wilbert (Bill) Mason, MD

Congratulations and Thank you for your Leadership

The Board and Staff of CIC want to thank Dr. Bill Mason for his years of dedication and leadership to the California Immunization Coalition. He recently completed his two year term and has handed the gavel to our new President Randy Bergen.

Bill has been a thoughtful and involved President, offering his over 35 years of expertise and experience in pediatric infectious diseases and healthcare to the Coalition as a content expert, advocate, and media spokesperson. Bill joined the Board in 2008 and served as Co-Chair of the Emerging Issues Committee for several years before taking role of Vice-President and President.

Many thanks to Dr. Mason for his commitment to California and public health.

achieving and maintaining full immunization protection for all Californians to promote health and prevent serious illness.

Meet CIC's New President and Vice President!

The California Immunization Coalition (CIC) welcomes Randy Bergen, MD, as CIC President

Randy Bergen is a Senior Physician with The Permanente Medical Group (TPMG) at the Walnut Creek Medical Center. He has been a member of a variety of professional associations including the California Medical Association and American Academy of Pediatrics, has chaired various Kaiser Committees, and is a clinical site investigator for the Northern California Kaiser Permanente Vaccine Safety Study Center and the clinical lead for the Northern California Kaiser Permanente

Influenza Vaccine Program.

Dr. Bergen has been involved in CIC for over 11 years (previously serving on the Adult IZ Coalition prior to our merger) as a Board member, Advisory Council, committee chair, Treasurer and Vice President. He is a tremendous spokesperson for the Coalition, for children and for public health. Many thanks to Dr. Bergen for taking on this important role!

The California Immunization Coalition welcomes Jasjit Singh, MD, as CIC Vice President

Jasjit Singh is Assistant Director of the Pediatric Infectious Diseases Division at Children's Hospital of Orange County (CHOC), where she also serves as Medical Epidemiologist and the Faculty Advisor for the Pediatric Residency Program.

Her main interests are in the prevention of infection and vaccines, international health, and primary immunodeficiency conditions in children. She is active in clinical research, has a passion for teaching medical students and residents, and gives frequent lectures at CHOC and in the community on a variety of infectious disease topics.

Dr. Singh is active in a variety of organizations and partnerships. Since 2013, she has served as the Chair of the Orange County Immunization Coalition and is a frequent presenter at their educational meetings. She is also a member of a variety of public health and research-related organizations including the Society for Healthcare Epidemiology of America, the American Academy of Pediatrics, and the Infectious Diseases Society of America.

CIC Board Planning For 2020 and Beyond

Coalition Board members met in Sacramento earlier this month to discuss priorities, goals and objectives for our work over the next two years.

CIC is grateful to these public health leaders who represent a range of professions, organizations, backgrounds and interests. Priority goals which support the Coalition's mission of ensuring that all

Californians have access to lifesaving vaccines, include: addressing issues around access to vaccinations, education and advocacy for strong vaccine policies, registry promotion, and providing educational opportunities on latest recommendation and information on vaccines and immunization.

To learn more about our wonderful Board members, go to [About Us - Board of Directors](#). Our next Booster will feature profiles on our newest Board members, Eric Ball, MD, Pamela Kahn, MPH, RN and Sallie Negin, RN.

AB 1965 - Coverage of Preventive Services

Assemblymember Cecilia Aguiar-Curry (D-Winters) has introduced Assembly Bill 1965, to require that the State Family Planning, Access, Care, and Treatment (Family PACT) Program cover the costs of the human papillomavirus (HPV) vaccine.

AB 1965 would require that the Family PACT program include the HPV vaccine within its covered health services.

The California Family PACT Program provides comprehensive family planning services to approximately 1.1 million low-income residents through a network of over 2,200 public and private providers. Services provided include comprehensive education, assistance, and health services related to family planning for both men and women.

For more information or to follow the progress of this legislation, go to leginfo.legislature.ca.gov.

Help us spread the word. Not the Flu.

In order to help spread awareness about influenza and how easy it is passed from person to person, we launched a great campaign called "FluDropped." It uses the AirDrop feature on an iPhone to spread the message about the flu vaccination in the same way the flu is spread: through the air and by proximity.

You can still help us by joining us in spreading this "epidemic" of awareness. You can download the [FluDropped image](#) and pass it forward to remind your friends, family and co-workers that flu season is here. [Learn more here.](#)

Watch how it works: <https://youtu.be/oybEptVzux0>

Register Today for 2020 CIC Summit

Be sure to mark your calendar, make your travel plans, and register today to be a part of the great work we do to create a healthier future. The 2020 California Immunization Coalition Summit to be held at the Sheraton Grand Hotel in Sacramento, California.

The theme of this year's Summit is *A Healthier Future Is In Sight 2020* and will focus on utilizing our public health successes to engage with new partners, grow our Coalition network, educate, and support our communities to make our collective vision for immunizations a reality for all Californians. For over 13 years, the CIC Summit has brought together partners and colleagues from throughout California and beyond to share ideas, highlight successes, and identify partnerships.

Visit the [CIC website for Summit details](#). We will update it with speaker and workshop information as it becomes available.

[Click on the link below to register.](#)
[Get more information](#)

Register Now!

*Note: The annual meeting for California's local health department immunization coordinators will take place on Monday, June 8. Information and agenda for that meeting will be emailed separately to immunization coordinators.

Registration fees will be applied towards Summit materials and any meals provided during the event. For bulk registration or purchase orders, please contact Kamrynn Saylor at ksaylor@immunizeca.org

Help Promote New Prenatal HEDIS Measures

As in the U.S., California has significant disparities, with lower vaccination rates among low-income women. Infants born to women with Medi-Cal coverage have more than twice the risk of pertussis than those who are privately insured. CIC is delighted about a new HEDIS measurement. It assesses maternal Tdap and influenza vaccination levels.

CIC believes this new measure is important and should be used by everyone. We developed a letter with steps our partners can take to adopt the new measure in their organizations.

The letter includes:

- Steps for health plans (commercial and Medi-Cal)
- Steps for local immunization coalitions and health departments
- Steps for medical groups, healthcare facilities and health systems
- Everyone

View and download the letter [here](#). Everyone has a role to play in promoting this effort. Please share this information widely in your network and with your provider community.

Preteen Vaccine Week 2020 March 1-7, 2020!

PVW is an annual California observance. First started in 1999 to create awareness about the Hepatitis B vaccination school law requirement, the observance has evolved to promote the concept of preteen doctor visits and draw attention to the importance of immunizations for preteens.

The goals of PVW 2020 are to distribute information and materials through multiple avenues such as schools, providers, and the media to raise awareness about HPV, Tdap, meningococcal, and varicella vaccines for boys and girls, as well as to promote the preteen doctor visit. Each day has a theme:

Monday:
General Awareness / PVW
Tuesday:
Meningococcal Vaccination (MenACWY)
Wednesday:
HPV Vaccination (International HPV Awareness Day)
Thursday:
Chickenpox Vaccination
Friday:
Pertussis Vaccination (Tdap)

For more great ideas, download the [Preteen Vaccine Week 2020 Campaign Kit](#).

Contact Jane.Pezua@cdph.ca.gov for information.

CIC Redesigned Website

CIC is pleased to announce the official launch of our updated website at ImmunizeCA.org. We think you'll agree it is a nice refresh with updated images, updated information and easier navigation tools.

This refresh will help us get information out to you and we hope it

will help inspire you to promote our work even more. Thank you for the suggestions, feedback and comments so far. Check it out [here!](#)

Nominate Your Immunization Champion

Do you know someone whose work in immunization deserves special recognition? Consider nominating that person or group for a CIC Immunization Champion Award.

Each year CIC presents two very special awards, one typically to a community member and the other to a provider. Awards are presented at the annual CIC Summit luncheon.

Nomination forms and details will be posted on the CIC website with Summit updates soon.

We also want to encourage you to keep an eye out for other opportunities to thank and acknowledge the many IZ Champions in our midst! The ones that spring to mind are the [National Foundation for Infectious Diseases Immunization Champion](#), the [CDC Immunization Champion](#) and the [National Adult Immunization Summit Awards](#). Contact the specific pages linked here or Catherine Martin for more info.

NEW Prenatal Immunization Information CIC Website

CIC recently launched a new [prenatal immunization page](#). The page includes links to the latest resources, including an order form for prenatal care providers (courtesy of CDPH's Genetic Disease Screening Program) wishing to receive free CDPH materials such the prenatal brochure, "[Immunizations for a Healthy Pregnancy](#)" and the flyer "[Expecting? Protect Yourself and your baby against flu and whooping cough.](#)"

Please share these great resources with prenatal care providers and those working closely with pregnant women.

Subject: HHS/CDC Conference Call

This message is from outside the City email system. Do not open links or attachments from untrusted sources.

State and Local Leaders,

Please join the U.S. Department of Health & Human Services (HHS) and Centers for Disease Control & Prevention (CDC) for a briefing call THIS EVENING (Friday, January 31) at 6:00 p.m. Eastern Time. The briefing call will overview the President's Coronavirus Task Force update from this afternoon and the further partnership with state and local governments. Joining from the CDC will be Deputy Director for Infectious Disease Dr. Jay Butler.

Briefing Call

* Date: TODAY -- Friday, January 31, 2020

* Time: 6:00 p.m. Eastern Time

* Call-In Information: [CLICK HERE](https://urldefense.proofpoint.com/v2/url?u=https-3A__protect2_fireeye_com_url-3Fk-3D3ed262f5-2D62876be6-2D3ed253ca-2D0cc47adb5650-2D38068a1fd98f63b9-26u-3Dhttps-3A__ems9_intellor_com_-3Fdo-3Dregister-26t-3D1-26p-3D901199&d=DwMFAg&c=Lr0a7ed3egkbwePCNW4ROg&r=TN5mBC9Zn7duXffV-W5W6JBpO3wuCDX5pmbhUjSE2Xk&m=GDrtPdsKojInRqSdFOlh0Zakz86nwhuXydSTTmaNBrM&s=Nh1EW9GkbrB5cz_RoFN2v8dIV95iTuGrwKHGkg9YCEY&e=>) <https://urldefense.proofpoint.com/v2/url?u=https-3A__protect2_fireeye_com_url-3Fk-3D3ed262f5-2D62876be6-2D3ed253ca-2D0cc47adb5650-2D38068a1fd98f63b9-26u-3Dhttps-3A__ems9_intellor_com_-3Fdo-3Dregister-26t-3D1-26p-3D901199&d=DwMFAg&c=Lr0a7ed3egkbwePCNW4ROg&r=TN5mBC9Zn7duXffV-W5W6JBpO3wuCDX5pmbhUjSE2Xk&m=GDrtPdsKojInRqSdFOlh0Zakz86nwhuXydSTTmaNBrM&s=Nh1EW9GkbrB5cz_RoFN2v8dIV95iTuGrwKHGkg9YCEY&e=>>
(Participants will receive instructions on accessing the conference after RSVPing to the link below)
