

OVERVIEW

The study was conducted for CNN via web and telephone on the SSRS Opinion Panel, a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques. SSRS is an independent research company. Surveys were obtained **April 28-May 1, 2022** with a representative sample of **n=1,007** respondents. The margin of sampling error for total respondents is **+/- 3.9** at the 95% confidence level. The design effect is **1.63**. More information about SSRS can be obtained by visiting www.ssrs.com.

EMBARGOED FOR RELEASE: Thursday, May 5 at 5:00 p.m.

NOTE ABOUT RESULTS

Results for the January 10-February 6, 2022 and August 3-September 7, 2021 surveys are from polls conducted via web and phone that implemented a full probability design via Address-Based Sampling (ABS). Results for the January 13-18, 2022, December 8-12, 2021, and November 1-4, 2021 surveys are from polls conducted via web and phone on the SSRS Opinion Panel. Results for the February 23-26, 2022, October 7-11, 2021, March 25-26, 2019, and September 21-22, 2020 surveys are from polls conducted via web on the SSRS Opinion Panel. Unless otherwise noted, results beginning with the August 3-6, 2017 survey and ending with the April 21-26, 2021 survey are from polls conducted by SSRS via telephone only.

Results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from telephone surveys conducted by ORC International. Results before March 31, 2006 are from telephone surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (*).

NOTE ABOUT CROSTABS

Surveys were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

Q19. Thinking about the current situation at the border between the United States and Mexico, do you consider the situation at the border to be a crisis, or not?

	Yes, it is a crisis	No, it is not a crisis	No opinion
April 28-May 1, 2022	68%	32%	*
April 21-26, 2021	78%	19%	3%

MORE ON METHODOLOGY

A total of n=**1,007** adults were surveyed via web and phone on the SSRS Opinion Panel, a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques. Surveys were conducted in English and Spanish.

Among the entire sample, **30%** described themselves as Democrats, **31%** described themselves as Republicans, and **39%** described themselves as independents or members of another party.

The entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, population density, and civic engagement, and Pew Research Center's NPORS figures for religious affiliation and frequency of internet use. The sample was also weighted for self-reported party identification. The benchmark for party identification was taken from CNN's national poll conducted by SSRS via web and phone from January 10-February 6, 2022, which implemented a full probability design via Address-Based Sampling (ABS).

Results for the full sample have a margin of sampling error of +/- 3.9 percentage points.

Surveys were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

TABLE 060
 Question 23

23. As you may know, the Biden administration has proposed ending Title 42 and returning to the procedures for processing migrants seeking asylum in the United States which had been in place before the pandemic. Do you think it is time to end Title 42 and return to pre-pandemic procedures, or do you think it is not the right time to end Title 42?

Question 23/23a Combo Table

23. As you may know, the Biden administration has proposed ending Title 42 and returning to the procedures for processing migrants seeking asylum in the United States which had been in place before the pandemic. Do you think it is time to end Title 42 and return to pre-pandemic procedures, or do you think it is not the right time to end Title 42?

23a. Do you think Title 42 should remain in place more because you think it should be in place indefinitely or more because you think the government needs more time to get ready to end the policy?

Base: Total Respondents
