Subject: [WADmembers] Cyber Investigation Services : Appin Technologies
Attachments: ATT00001.txt

Dear Everyone,

Its my pleasure to be a part of WAD community with such interesting companies and members. I am [REDACTED] and represent **Appin Technologies** which a specialized global player in ethical hacking and Information Security. I head the **Intelligence and Investigative vertical** and we keep on developing partners which are interested to utilize **cyber spying , email and computer data interception** for investigative and intelligence cases and offer the same to their customers. We provide detectives and investigative companies with scalability of **24*7 cyber operations** at nominal costs and will like to develop a mutually beneficial relationship. Underneath is a write up of our service. I will be interested in your queries on the same.

Appin is an "**Ethical hacking , Cyber Spying & Investigation Specialist**" company. Appin has been providing add on benefits to Detective agencies and private Investigators worldwide by becoming an extended arm and serving with "**Cyber Frauds Investigation**", "**Cyber Spying for Catching Criminals**", "**Internet Monitoring**", "**Computer and Email Monitoring**" and "**Forensics Services**" among other computer & internet based services. We serve as a service provider for **detective and intelligence companies** worldwide. **We are among the largest information security companies in India with over 350 professionals working for us.**

UNIQUENESS It's a unique service with following advantages

- Use Advanced Cyber and Internet Information gathering methods for higher quality of information
- Reduce costs by over 75%
- Increased Efficiency and scalability of investigations
- Prevention from legal hassles of local country

EFIIA – Efficient Fishing on Intelligent Information Architecture

- Open Source Intelligence Gathering on the internet [media reports, social networks(blogs, Facebook, Orkut, LinkedIn local ones), cached internet analysis]
- Information Gathering from network of local sources(Custom Searching in local languages)
- Information Gathering from subscribed and classified information databases
- Social Engineering to gather insider information (Uninformed discussion, chat, message exchange)
- Signal Interception (Networks and IP based Telecommunications)
- Computer Forensics and Cyber Intelligence
- Information extraction(Manually crawling and google hacking), decryption, decoding, correlation and analysis

Besides detective agencies, we also work with corporations & governments to help them **gather information and evidence regarding cyber criminals or criminals which use computer & internet** as a mode of communication. We are CERT – In((Computer Emergency Response Team- India) empanelled company, also empanelled with defense forces as well other major govt/corporate bodies and authorized to provide security related services to Govt and Corporate agencies.

Appin's expertise of extracting information via **Cyber Interception** in enhancing overall output of the detective agency for customers in the field of Litigation Support, Identification of Anonymous bloggers, Brand Defamation,

Assessment & Forensics of vulnerabilities in the network, Global Due Diligence, all investigations related, Business and Competitive Intelligence, , Complex Data Analysis/Relationship Mapping, Market Entry Intelligence, Industry Landscaping and Investigative Research, Political Risk and Threat Assessment., Forensic Analysis, Asset Tracing, Criminal Network Tracking, IP Theft Investigations, Fraud Investigations like Insurance and many more such like investigation/detective tasks.

We look forward to partnering with you all for providing this service to their august clients. Feel free to approach us for a web demonstration , conference call. We will be able to show you demos and live capabilities on our services.

Hoping to hear from you soon.

With Sincere Regards,

Appin Technologies
