

## OVERVIEW

The study was conducted for CNN via web on the SSRS Opinion Panel, a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques. SSRS is an independent research company. Surveys were obtained **July 22-24, 2022** with a representative sample of **n=1,002** respondents. The margin of sampling error for total respondents is **+/- 4.0** at the 95% confidence level. The design effect is **1.67**. For results among the **n=802** registered voters, the margin of sampling error is **+/- 4.4**. More information about SSRS can be obtained by visiting [www.ssrs.com](http://www.ssrs.com).

## **EMBARGOED FOR RELEASE: Thursday, July 28 at 2:00 p.m.**

### NOTE ABOUT RESULTS

Unless otherwise noted, results beginning with the August 3-6, 2017 survey and ending with the April 21-26, 2021 survey are from polls conducted by SSRS via telephone only. For more information about other trend data included in this topline, please see the "More on Methodology" section at the end of this document.

Results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from telephone surveys conducted by ORC International. Results before March 31, 2006 are from telephone surveys conducted by Gallup.

Question text noted in parentheses was rotated or randomized. Values less than 0.5 percent are indicated by an asterisk (\*).

### NOTE ABOUT CROSSTABS

Surveys were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum N=125 unweighted cases. Results for subgroups with fewer than N=125 unweighted cases are not displayed and instead are denoted with "**SN**" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

Q15. Earlier this year, the Supreme Court overturned the Roe vs. Wade decision and ruled that women do not have a constitutional right to an abortion. How do you feel about the Court overturning Roe vs. Wade? [RESPONSES ROTATED IN ORDER FOR HALF/IN REVERSE ORDER FOR HALF]

	NET Approve	Strongly approve	Somewhat approve	NET Disapprove	Somewhat disapprove	Strongly disapprove	No opinion
July 22-24, 2022	37%	22%	14%	63%	12%	51%	0%

Politicians are doing enough to ensure abortion access	15%
Politicians aren't doing enough to ensure abortion access	49%
No opinion	0%
No opinion	<b>0%</b>

**MORE ON METHODOLOGY**

A total of n=1,002 adults were surveyed via web on the SSRS Opinion Panel, a nationally representative panel of U.S. adults ages 18 or older recruited using probability-based sampling techniques. Surveys were conducted in English and Spanish.

Results for the full sample have a margin of sampling error of +/- 4.0 percentage points. Results for the sample of 802 registered voters have a margin of sampling error of +/- 4.4 percentage points.

Among the entire sample, **32%** described themselves as Democrats, **30%** described themselves as Republicans, and **38%** described themselves as independents or members of another party.

The entire sample was weighted to reflect national Census figures for gender, race, age, education, region of country, population density, and civic engagement, and Pew Research Center's NPORS figures for religious affiliation and frequency of internet use. The sample was also weighted for self-reported party identification. The benchmark for party identification was taken from CNN's national poll conducted by SSRS via web and phone from June 13-July 13, 2022, which implemented a full probability design via Address-Based Sampling (ABS).

Surveys were conducted among a representative sample of the adult population, age 18 or older, of the United States. Members of demographic groups not shown in the published crosstabs are represented in the results for each question in the poll. Crosstabs on the pages that follow only include results for subgroups with a minimum n=125 unweighted cases. Results for subgroups with fewer than n=125 unweighted cases are not displayed and instead are denoted with "SN" because samples of that size carry larger margins of sampling error and can be too small to be projectable with confidence to their true values in the population.

**NOTE ON TRENDS**

All included trend points were based on surveys conducted using probability-based sampling methods. Some surveys included as trend points in this document were conducted using different methodologies, or with different combinations of sponsors. Unless otherwise noted, results beginning with the August 3-6, 2017 survey and ending with the April 21-26, 2021 survey are from polls conducted by SSRS via telephone only. Here are more details on the methodology behind each CNN poll conducted by SSRS using other methods.

Address-Based Sampling	Probability Panel: Web + Phone	Probability Panel: Web only
August 3-September 7, 2021	November 1-4, 2021	March 25-26, 2019
January 10-February 6, 2022	December 8-12, 2021	September 21-22, 2020
June 13-July 13, 2022	January 13-18, 2022	October 7-11, 2021
	April 28-May 1, 2022	February 23-26, 2022
		May 3-5, 2022
		July 22-24, 2022

Results beginning with the March 31-April 2, 2006 survey and ending with the April 22-25, 2017 survey are from telephone surveys conducted by ORC International. Results before March 31, 2006 are from telephone surveys conducted by Gallup.
