Sorry about this but I have to ask this question of you directly:

Do you agree that you were in error in having identified two deficiencies that were the basis for citations totaling \$1,500 against ProHealth Care Regency New Berlin? Was there in your view subsequent information provided that justifies the dismissal of these citations?

I was hoping that records I requested regarding internal communications on this matter might shed light on this without my having to put this uncomfortable question to you directly. But the released records provide not a clue so I do have to ask.

If you could please respond by mid-day Monday, that would be great. Please have a good weekend.
