

VENTURA COUNTY FIRE DEPARTMENT LIVE FUEL MOISTURE 2022 ALL FUEL BEDS - CHAMISE

Fuels/Fire Discussion

A slight increase of 3% in the live fuel moistures...with this next storm approaching we can obviously expect that number to continually rise through the winter and into spring. Even as the fuel moistures rise, wind can supersede the higher fuel moistures as we've seen in the past such as the Jesunita fire. Live fuel moistures on that infamous day were 134%. Stay safe!
