*** Important note regarding ongoing design modifications and late-identified changes to displacement data reported in this and other sections of the DEIS:** TxDOT is continuously evaluating ROW requirements. Shortly before printing this DEIS, changes to the schematic design for this alternative resulted in refinements to the displacements reported in this section: TxDOT has evaluated the ROW requirements north of E. Oltorf Street, which has resulted in access being maintained as to not displace the Whip In. Additionally, based on roadway construction requirements near the CapMetro Redline at Airport Boulevard, it is reasonably foreseeable that displacement of the Nature's Treasures business located at 4103 N. I-35 would be necessary. Following the Public Hearing comment period, additional changes to the design may be implemented based on the continuation of the design process and in response to public and agency comment. In the publication of the combined FEIS and Record of Decision we will adjust and finalize the displacements data and maps in this and other sections of the EIS to reflect these changes regarding Whip In and Nature's Treasures, which could not be made in time for the DEIS publication, and any other changes to displacements that are identified following the public hearing comment period.
