MEMORANDUM FOR A-10 Operations Group Commanders
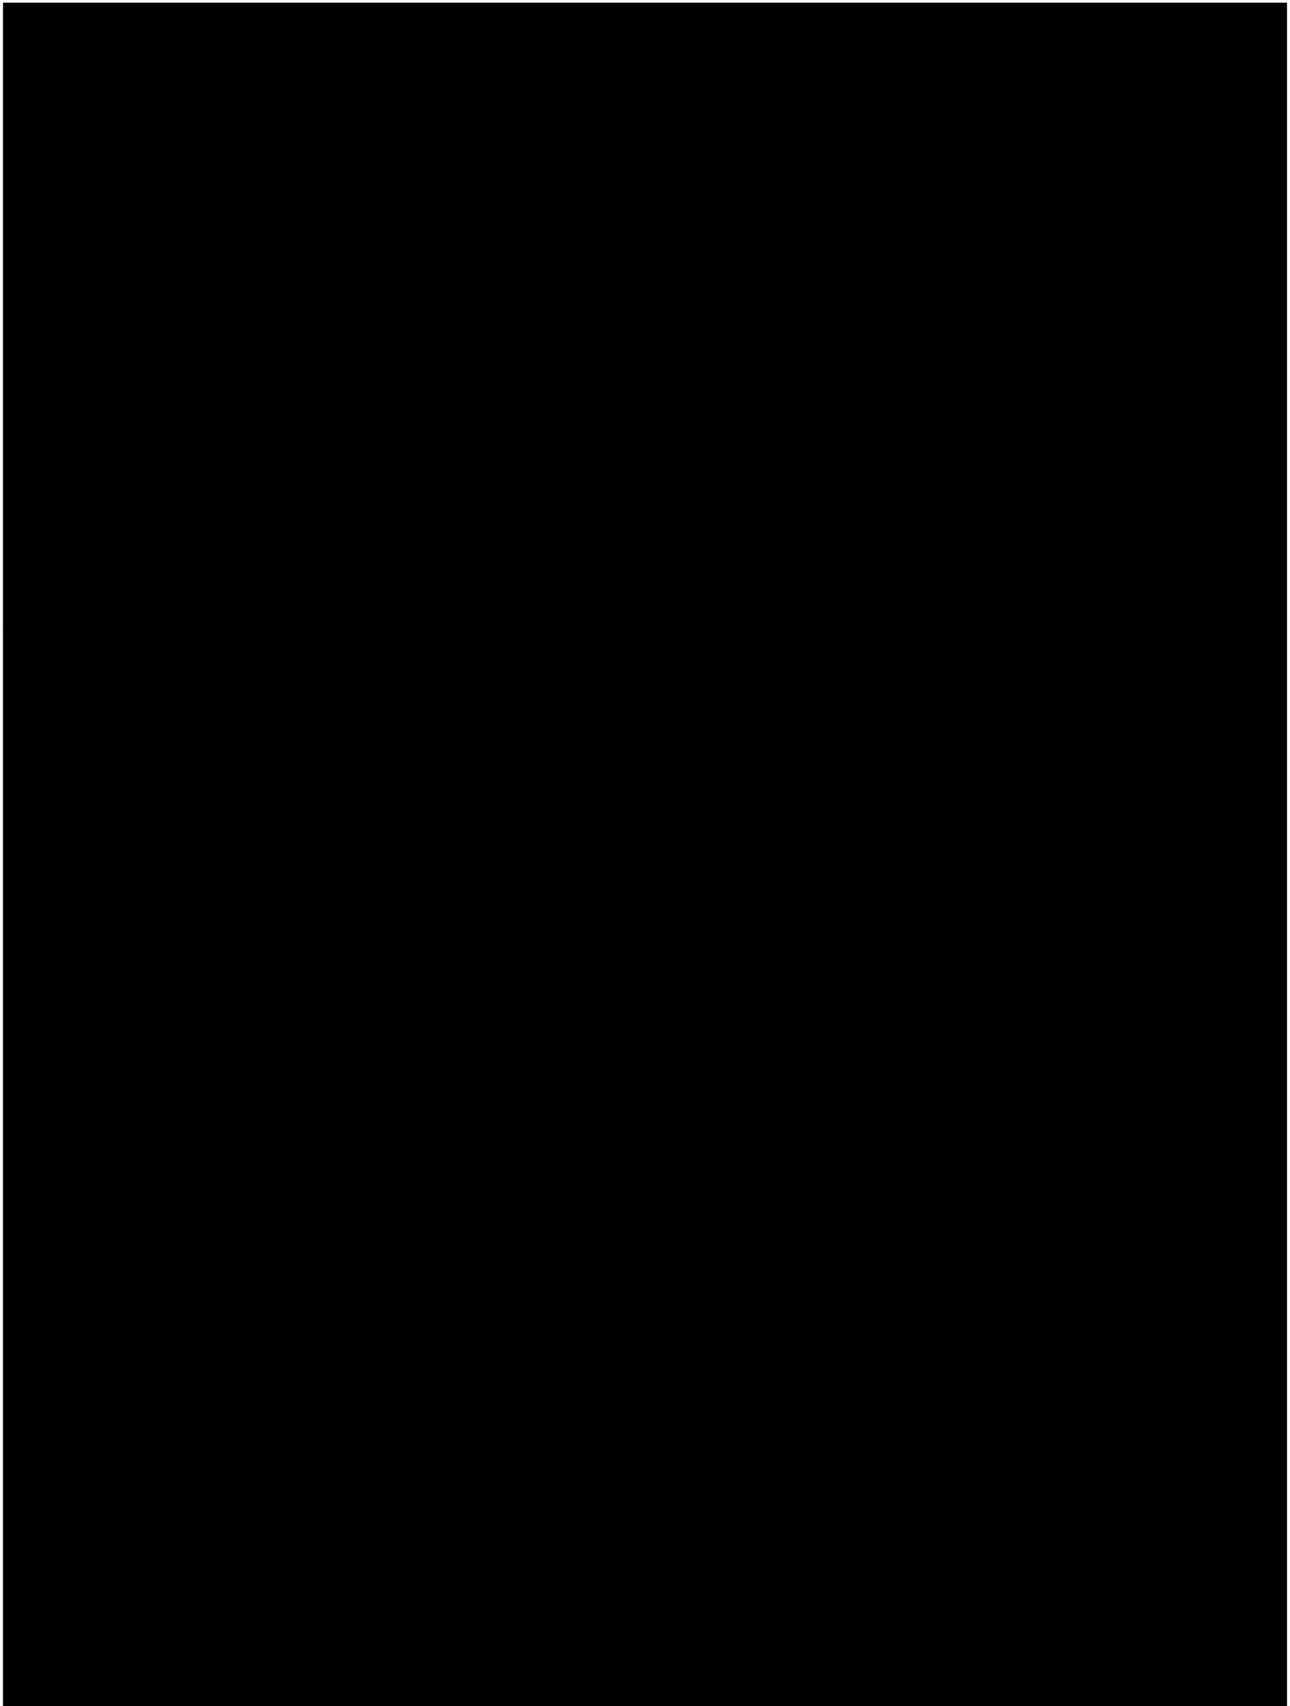

FROM: HQ ACC / A3T

SUBJECT: A-10 Ready Aircrew Program (RAP) Tasking Memorandum, Aviation Schedule 2023, (AS-23), (Effective 01 Oct 22)
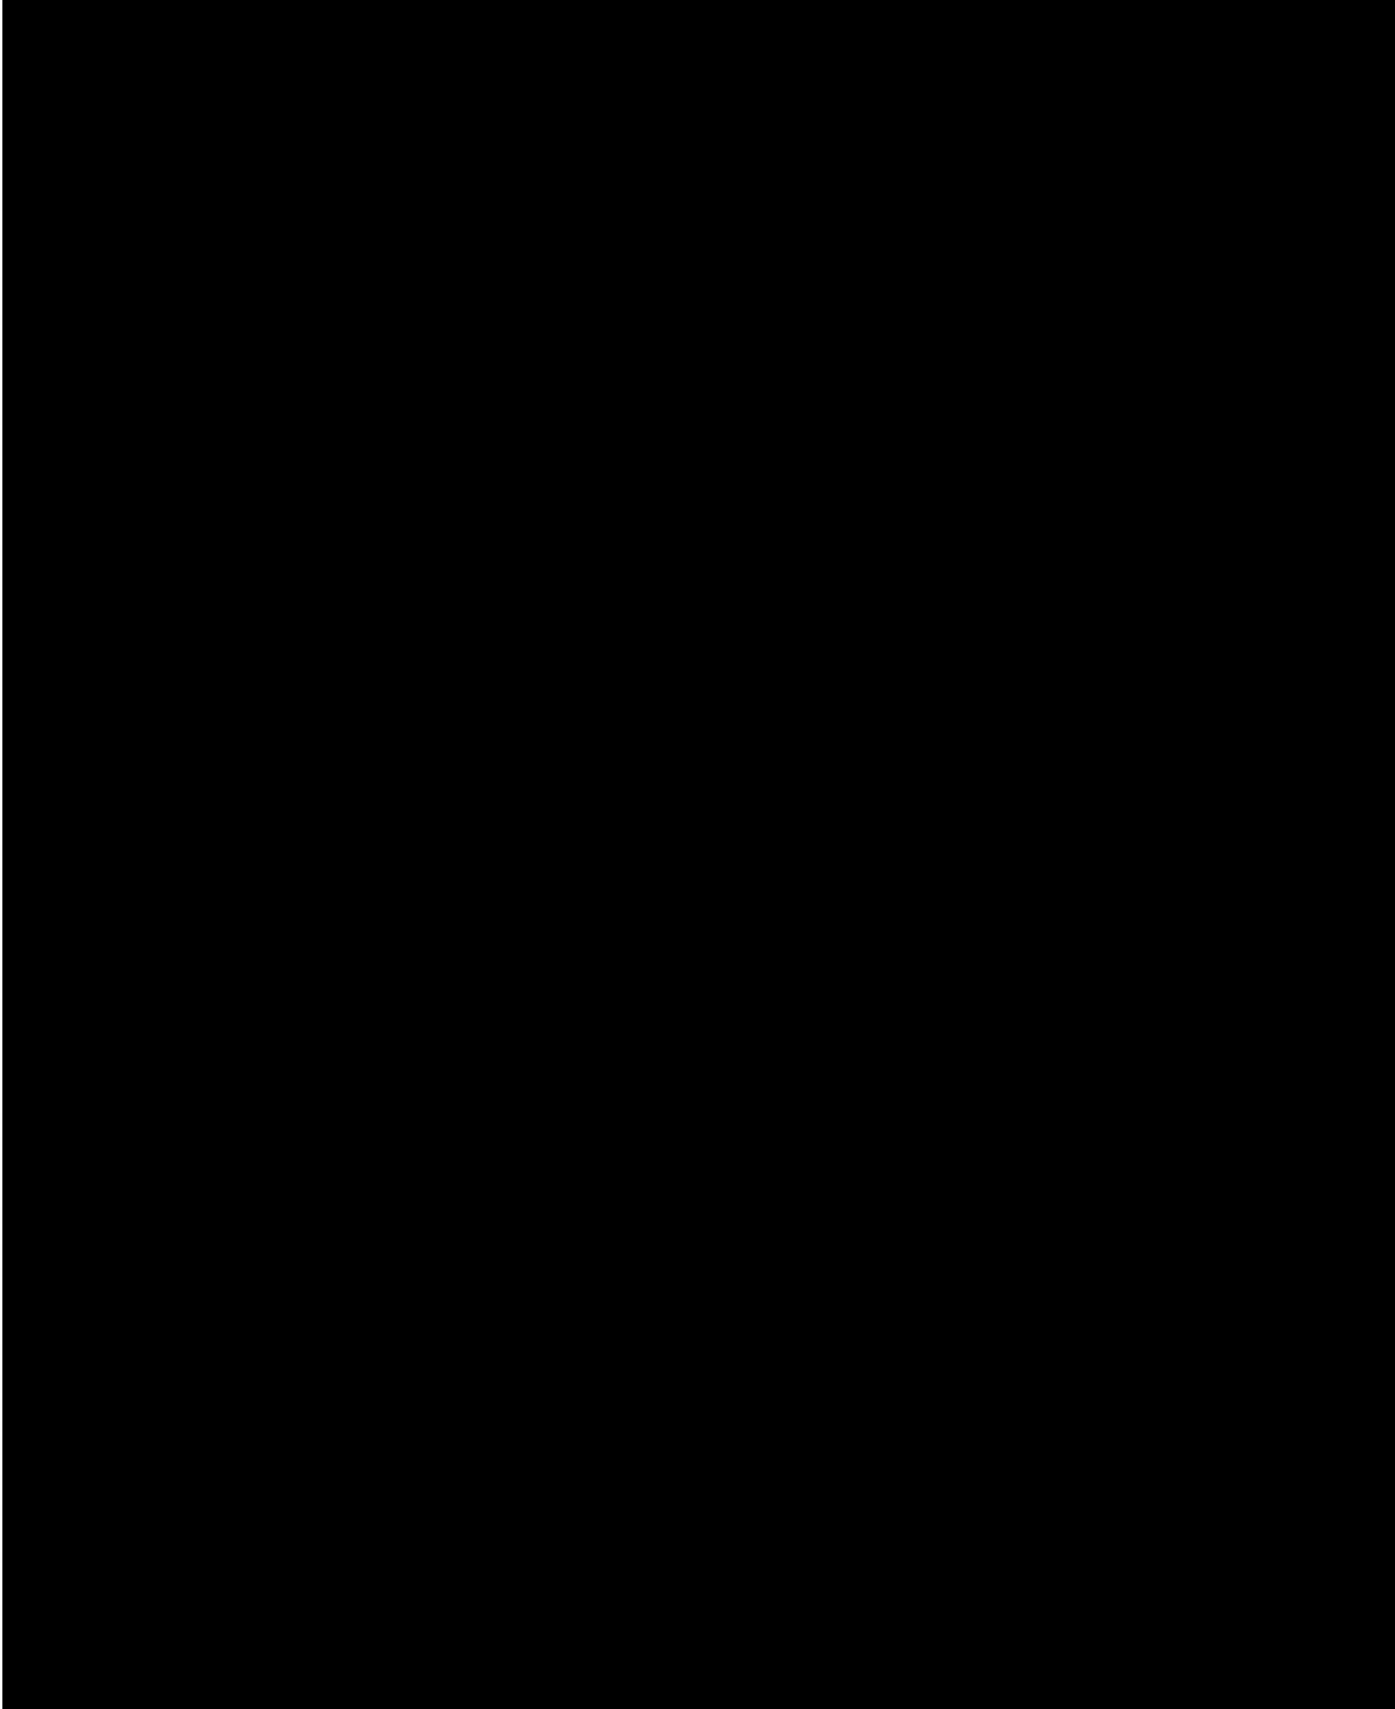

1. Introduction.

This RAP Tasking Memorandum (RTM), in conjunction with AFMAN 11-2A-10C Vol 1, outlines the Air Combat Command (ACC), Pacific Air Forces (PACAF), Air Force Reserve Command (AFRC), and Air National Guard (ANG) RAP continuation training (CT) program for the FY23 training cycle. This guidance is updated annually, or as required, and aligns RAP with the latest Combatant Commander (COCOM) expectations. This RTM has changed significantly and must be thoroughly reviewed.

1a. Use this guidance in conjunction with AFMAN 11-2A-10C Vol 1. This RTM supersedes previous versions and takes precedence when there are discrepancies with AFMAN 11-2A-10C Vol 1.

1b. Questions and recommended changes pertaining to this RAP Tasking Memo should be directed to the FAM or RAP Program Manager listed in para 9c.

Notes:

5. Night missions should include the use of NVDs and should be flown in lights out / covert light conditions to optimize realistic night training to the maximum extent possible.
6. Once a pilot accomplishes the required night missions, additional night missions may count towards day requirements in each mission type.
7. Sorties listed for FAC(A) Day, FAC(A) Night, and CSAR will be added to CC OPTION for pilots not certified in these respective missions. Unit commanders will allocate CC OPTION sorties to other mission types.
8. FAC(A) training will be conducted IAW the current JCAS FAC(A) MOU.
   - A control consists of at least one aircraft attacking a surface target
   - The control begins with a CAS briefing from a FAC(A) and ends with either an actual / simulated weapons release or an abort on a final attack run
   - No more than one control per aircraft can be counted per CAS briefing
9. Pilots executing CAS long of the BCL where pilot reconiassance is the primary means of target identification may log SCAR.
10. AOMSW requires actual Naval C2 Integration or simulated Naval C2 provided by formal exercise sources to be logged as a RAP sortie. See Attachments 1 and 2 of this memo for mission definitions and expectations.
11. Instrument sorties should focus on strange field approaches, cross-country, and ops outside the local area.
