

Iranian UAVs in Ukraine: A Visual Comparison

This product provides a visual comparison of UAVs used by Russian forces in Ukraine and Iranian UAVs used to attack U.S. and partner interests in the Middle East. Photos of UAV debris and components from Ukraine are consistent with systems showcased at military expos and other venues in the Middle East. This analysis confirms Russia's use of various Iranian lethal UAVs in its war in Ukraine.

Shahed-136 (Geran-2) One-Way Attack UAV Comparison

The Iranian-origin Shahed-136, renamed Geran-2 by the Russians, has a distinctive shape, with a delta-wing body and vertical stabilizers extending above and below the body, as displayed in Iranian press and military expos. Iran used Shahed-136 UAVs in the 2021 attack against the merchant vessel Mercer Street and has also transferred this system to the Huthis in Yemen. The Huthis have not used this system in an attack to date, but have displayed it publicly. The images circulating in open press of UAVs in Ukraine clearly show the features of the Shahed-136's delta-wing body and vertical stabilizers.¹²³

Shahed-136 (Geran-2) Wing Stabilizer

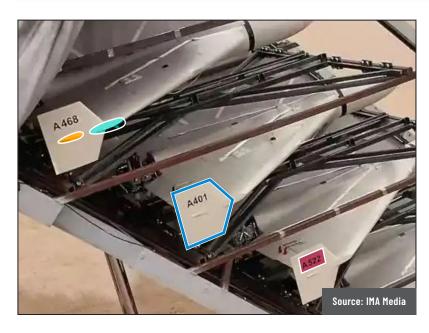

Shahed-136 (Geran-2) wing stabilizers recovered in Ukraine are consistent with the size, shape, and markings of the Shahed-136 wing stabilizers observed or recovered in the Middle East.⁴⁵

Shahed-131 (Geran-1) One-Way Attack UAV Comparison

The Iranian-origin Shahed-131, renamed Geran-1 by the Russians, has a delta-wing body shape similar to the Shahed-136 (Geran-2), but the vertical stabilizers extend only above the body. Recovered components in Ukraine and the Middle East appear to be very similar; some components even fractured in the same manner after impact.⁷⁸

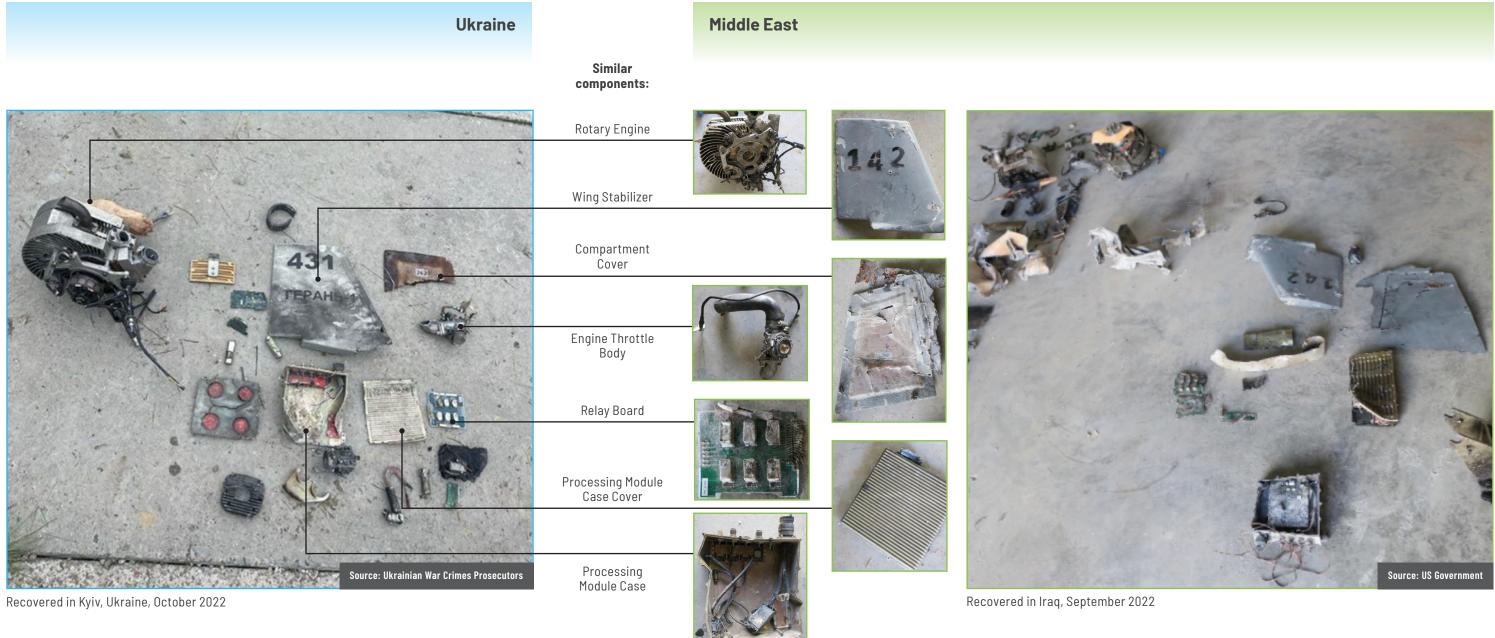

Selected points of comparison: Engine Wing Stabilizer Fuselage Nose Cone Antenna Array

Recovered Shahed-131 (Geran-1) Components

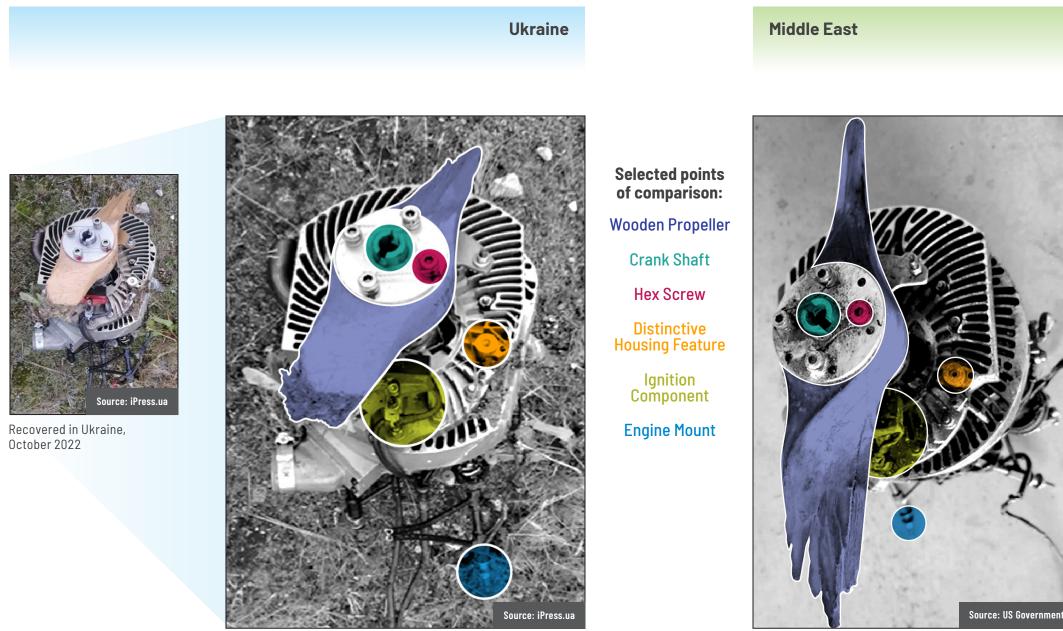

Shahed-131 (Geran-1) UAV components recovered from debris in Ukraine are consistent with Shahed-131 components recovered in Iraq in 2022.9

Recovered Shahed-131 (Geran-1) Engine

This Shahed-131 (Geran-1) engine recovered in Ukraine is consistent with the engine of a Shahed-131 UAV recovered in Iraq. ¹⁰

Recovered in Iraq, September 2022

Mohajer 6 Multirole UAV Comparison

The Iranian-origin Mohajer 6 has been displayed publicly in Iran and Iraq, and can be easily identified by its distinctive tail, as well as the attached surveillance equipment and guided munitions. In October, Ukraine captured a mostly intact Mohajer 6 from the Black Sea, and it appears to be indistinguishable from the Mohajer 6 systems photographed in Iran and Iraq. Components recovered from the wreckage display very similar markings to those observed in Iran. ^{1112 13}
