

Subject: FW: Follow-Up Re American Oversight's Pending Requests - CF 153068

Date: Thursday, February 9, 2023 at 1:20:45 PM Eastern Standard Time

From: Smith, Tammy

To: AO Records

EXTERNAL SENDER

Ms. Stoneman:

Thank you again for contacting the Florida Department of Education ("Department") pertaining to your attached public records request. Please note that the Department's Microsoft Outlook program has been experiencing technical difficulties lately. Part of the reason for the delay in getting your request completed was that Outlook merged the .PST file that was responsive to your request with a separate .PST file that was not responsive to your request. This necessitated a manual removal of all emails that incorrectly merged into the .PST file that was generated for your request. The request is now complete and the responsive records will be provided to you by way of a sharefile in a separate email [and you should receive notification of that sharefile within the next hour.](#)

At this time your request is complete and we are closing the file.

Should you have any other questions, please feel free to contact me.

Thanks

Tammy L. Smith
Operations & Management Consultant I
Office of the General Counsel
Florida Department of Education
325 West Gaines Street, Suite 1544
Tallahassee, Florida 32399

STEMscopes

Breaking Down Silos in STEM Education

Hi Richard,

Most real-world problems require interdisciplinary approaches, which is why we need to move away from thinking of subject areas as “only science” or “just math”. And instead, see them for what they really are – part of an integrated whole.

In recent years, the idea of integrated STEM education has steadily been gaining traction, but for most educators, integrating the different disciplines represents a significant shift in teaching practice.

In our latest guide we provide you with resources and techniques for delivering instruction that effectively integrates the different disciplines of STEM. Plus, we provide you with examples of STEM-integrated activities you can start implementing right away.

[Get This Guide](#)

STEMscopes is a comprehensive suite of results-oriented STEM curriculum and professional development solutions used by 6 million students and 600,000 teachers across all 50 states. Created by educators for educators, STEMscopes is highly adaptable, affordable, and supports instruction in any kind of learning environment. STEMscopes was developed by Accelerate Learning Inc. in partnership with Rice University. For information, visit stemscopes.com or call 800-531-0864.

Good afternoon publishers,

We are excited to announce that the 2022-2023 K-12 Social Studies specifications have been posted to our website! They can be found here [Instructional Materials \(fldoe.org\)](https://fldoe.org/instructional-materials) with the supporting documentation sub bulleted beneath. Please reach out if you have any questions regarding next year's adoption. We look forward to working with each of you.

Thank you,

Amber Baumbach

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

-- Amanda

On Thu, Apr 21, 2022 at 10:39 AM Hamilton, Lauren <Lauren.Hamilton@fldoe.org> wrote:

Good morning,

Thank you for speaking with me this morning. As mentioned, attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Ms. Hamilton,

Thank you for the information. Are you able to provide more information on why Accelerate Learning Inc's 4th Grade Accelerated course was not recommended? We have read the information regarding appeals, but we were interested in feedback regarding our fourth grade accelerated course.

Thank you for your time.

Take care,
Diana

Hi Amanda,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Thursday, April 28th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Accelerate has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Thursday.

Accelerate Learning - Appeal

Thu, Apr 28, 2022 10:00 AM - 10:30 AM (EDT)

Please join my meeting from your computer, tablet or smartphone.

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

-- Amanda

On Thu, Apr 21, 2022 at 10:39 AM Hamilton, Lauren <Lauren.Hamilton@fldoe.org> wrote:

Good morning,

Thank you for speaking with me this morning. As mentioned, attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Ms. Hamilton,
Thank you for the information. Are you able to provide more information on why Accelerate Learning Inc's 4th Grade Accelerated course was not recommended? We have read the information regarding appeals, but we were interested in feedback regarding our fourth grade accelerated course.
Thank you for your time.
Take care,
Diana

Subject: BFW SPA 4e Appeal

By UPS and Email
Florida Department of Education
Room 1514 Turlington Building
325 West Gaines Street
Tallahassee, FL 32399

April 21, 2022

To Whom it May Concern:

This letter constitutes a petition filed under Rule 28-106.2015, F.A.C., concerning the omission of our textbook, Statistics and Probability with Applications 4e, by Daren Starnes, Josh Tabor, and Luke Wilcox, from the State of Florida's 2021-2022 K-12 Mathematics Instructional Materials State Adopted list,
<https://www.fldoe.org/core/fileparse.php/5574/urlt/2122MathAdoptedMaterials.pdf>.

Notice of the list was sent to us at the email address adoptions@bfwpub.com by email on April 15, 2022 from Lauren Hamilton, Instructional Materials Specialist at the Florida Department of Education.

Because our textbook is not included on the Instructional Materials State Adopted list, all agencies and districts within the State of Florida would be affected by this decision.

We were recently asked about Additional Question 10.1, which is not part of the textbook and included only in a supplemental bank of questions on our online learning platform. We do not know if this is the FLDOE's sole concern. News reports have published this document (<https://www.fldoe.org/core/fileparse.php/5574/urlt/2122MathInstructMatNotRecList.pdf>), which appears to state that our textbook was rejected because it is said to include one or more of the following "Special Topics:" Critical Race Theory, Culturally Responsive Teaching, Social Justice or Social Emotional Learning. These terms are for the most part not defined, but they are listed as "Special Topics" in this rubric. <https://www.fldoe.org/core/fileparse.php/5574/urlt/CoreQuestionsRubric.pdf>

We dispute that our textbook includes any discussion of such Special Topics and therefore believe that the rejection of the textbook was based on a mistake. We understand that the next step in the process may be a phone call with FLDOE to discuss FLDOE's concerns and we look forward to that. We request that the FLDOE provide us with an opportunity to discuss the rejection with them and an evidentiary proceeding in which we can demonstrate the relevant facts and address any of the FLDOE's concerns.

It is our position that because our textbook was given a subject-specific standards score of 4.6, and does not in fact include any of the Special Topics, it should have been included in the recommended list for state adoption presented to the Commissioner of Education and in the Instructional Materials Adopted List. There should be no issue concerning an Additional question which is not part of the textbook itself and included only in a supplemental bank of questions on our online learning platform. We believe that this rejection is inconsistent with and a violation of applicable law and regulations, including without limitation, the Policies and Procedures Specifications for the Florida Instructional Materials Adoption (<https://www.fldoe.org/core/fileparse.php/5574/urlt/PoliciesandProceduresSpecifications.pdf>). The Policies and Procedures Specifications for the Florida Instructional Materials Adoption specifically state, "The reviewer-recommended bids that retain a ratings average of Good or above, or 90% or above of a Good to Very Good for their subject-specific standards and benchmarks, will remain on the recommended list for state adoption that is presented to the Commissioner of Education for final review." We hereby request that the FLDOE reverse its decision and include our textbook in the list of Adopted Instructional Materials.

The FLDOE's decision will have a material adverse effect on Petitioner's substantial business interests. Indeed, we know that several Florida districts viewed our textbook as being their top choice for their Honors Statistics courses. We were already asked by the Florida School Book Depository to deposit close to 10,000 print copies of the textbook with the Florida depository, and we have done so in anticipation of orders from these districts.

This petition is submitted by BFW Publishers. Please address your responses to BFW Publishers, Attention: Tonya Stoll, 100 American Metro Blvd, Suite 109, Hamilton, NJ 08619 or adoptions@bfwpub.com. Tonya can be reached at 417-343-1398.

We reserve the right to amend this petition.

We look forward to your response.

Respectfully,

Tonya Stoll

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Subject: CareerTech Vision Attendees Contact Info

Greetings,

Would you be interested in purchasing the **Association for Career and Technical Education Conference 2021** attendees contact info?

Attendees:- Career and Technical educators, Administrators/ Supervisor, Researchers, Guidance counsellors, Business/Industry Rep, State or Local Education Agency and much more...

If you're interested on this, i am happy to share with you counts and cost of the list!

I look forward to your response.

Best Regards,

Maria Jones

Marketing Executive.

Subject: CareerTech Vision Attendees Contact Info

Greetings,

Would you be interested in purchasing the **Association for Career and Technical Education Conference 2021** attendees contact info?

Attendees:- Career and Technical educators, Administrators/ Supervisor, Researchers, Guidance counsellors, Business/Industry Rep, State or Local Education Agency and much more...

If you're interested on this, i am happy to share with you counts and cost of the list!

I look forward to your response.

Best Regards,

Cynthia Hougardy
Marketing Executive.

Subject: Cathy, could you be the next BFW Teacher Advocate?

BFW High School

If you are a current adopter of BFW's textbooks, LaunchPad, or SaplingPlus, we invite you to apply to become a BFW Teacher Advocate.

BFW Teacher Advocates:

- Share their personal experiences using BFW products with other educators who may be considering BFW products for their classes.
- Are featured in a special community group dedicated to sharing best practices and teaching tips for BFW materials.
- Conduct presentations (virtual and, in the future, in-person) on BFW course resources.
- Earn extra income.

If you are interested in becoming a BFW Teacher Advocate, please complete [this short application form](#) no later than **12:00 ET on Friday, November 26, 2021**. Those selected to become Teacher Advocates will be notified by Wednesday, December 8, 2021.

If you have any questions about the BFW Teacher Advocate Program, please contact hsmarketing@bfpwpub.com.

Best,

BFW High School Publishers

Subject: Cengage Learning Inc. Meeting Request- Appeal Template and access link
Attachment(s): "image001.png", "FL_prgape08_pgA31.pdf", "FL_prgape08_pg228.pdf", "Updated 5 5 22 Publisher Appeal.Cengage.bid448_Precalculus with Limits AGA 8e c2020 SE corrections in 9781337904285.xlsx"

Good morning Lauren and others!

To ensure you see the full digital experience, the student edition and teacher edition have been updated. On the template, the link takes you to the State Review site we submitted last July. Here you can click into the text *Precalculus with Limits: A Graphing Approach* to see the corrections. I listed the pathway below to save you some time searching. Because this is the State Review site, you will also see the other Precalculus text, which is on the Adopted List.

Attached is the Appeal Template as well as PDFs of the two pages I sent previously as we were waiting on digital platform update.

Open the link. [direct link](#)

Go to the first two titles "Precalculus with Limits: A Graphing Approach". The first is the Teacher's Edition, the second is the Student Edition.

Go to page 228 and page A31. The search for these pages are in bottom right corner.

On page 228, the problem is 'Example 5- Population Growth'. On page A31, the problem is '11. Sales'.

If you are asked for a UN/PW, use the following. username: adoption.review@florida.com password: Learning

Thanks for your time on this and let us know if there are questions or issues accessing the text!

Carey

Good afternoon Lauren!

I want to update your team. Our tech engineers are currently collaborating with VitalSource so the student experience will show the new questions. We do not own the VitalSource platform, but the corrected files have been delivered to them for the update as the corrections will need to flow through and be activated by VitalSource. This is of the highest priority and the hope is to have the link tomorrow.

The corrections will be those seen in the google doc and PDFs I had sent previously.

Thanks!

Carey

Logistic Growth Models

Some populations initially have rapid growth, followed by a declining rate of growth, as illustrated by the graph in Figure 3.29. One model for describing this type of growth pattern is the **logistic curve** given by the function

$$y = \frac{a}{1 + be^{-rx}}$$

where y is the population size and x is the time. An example is a bacteria culture that is initially allowed to grow under ideal conditions and then under less favorable conditions that inhibit growth. A logistic growth curve is also called a **sigmoidal curve**.

Figure 3.29 Logistic Curve

EXAMPLE 5 Population Growth

A conservation organization releases 25 Florida panthers into a game preserve. After 2 years, there are 39 panthers in the preserve. An equation that models the population of panthers in the preserve is given by

$$P = \frac{200}{1 + 7e^{-0.264t}}, \quad t \geq 0$$

where P is the total number of panthers in the preserve after t years.

- How many panthers are in the preserve after 5 years?
- When will the population reach 100?

Algebraic Solution

- After 5 years, the number of panthers in the preserve is

$$P = \frac{200}{1 + 7e^{-0.264(5)}} \approx 70.$$

- To determine when the population reaches 100, substitute 100 for P in the population model and then solve for t .

$$100 = \frac{200}{1 + 7e^{-0.264t}}$$

$$1 + 7e^{-0.264t} = 2$$

$$e^{-0.264t} = \frac{1}{7}$$

$$\ln e^{-0.264t} = \ln \frac{1}{7}$$

$$-0.264t = \ln \frac{1}{7}$$

$$t = -\frac{1}{0.264} \ln \frac{1}{7}$$

$$t \approx 7.4$$

So, after about 7.4 years, the population of panthers in the preserve will reach 100.

Graphical Solution

-

- Use a graphing utility to graph

$$y_1 = \frac{200}{1 + 7e^{-0.264x}} \quad \text{and} \quad y_2 = 100$$

in the same viewing window. Use the *intersect* feature of the graphing utility to find the point of intersection of the graphs, as shown in the figure.

✓ Checkpoint

In Example 5, when will the population reach 135?

B.1 Exercises

See *CalcChat.com* for tutorial help and worked-out solutions to odd-numbered exercises. For instructions on how to use a graphing utility, see Appendix A.

Vocabulary and Concept Check

In Exercises 1–6, fill in the blank.

- _____ are useful for ordering small sets of numbers by hand.
- A _____ uses a portion of a real number line as its horizontal axis, and the bars are not separated by spaces.
- You can use a _____ to construct a histogram.
- The bars in a _____ can be either vertical or horizontal.
- A _____ represents data graphically as points plotted in a rectangular coordinate system.
- _____ show trends over periods of time.

Procedures and Problem Solving

7. **Economics** The line plot shows a sample of average prices of diesel fuel at 25 fuel stations throughout the United States.

- What price occurred with the greatest frequency?
- What is the range of prices?

8. **Environmental Science** The line plot shows the weights (to the nearest hundred pounds) of municipal waste hauled by a garbage truck in 30 trips to a landfill.

- What weight occurred with the greatest frequency?
- What is the range of weights?

Education In Exercises 9 and 10, use the following scores from an algebra class of 30 students. The scores are for two 25-point quizzes.

Quiz #1 20, 15, 14, 20, 16, 19, 10, 21, 24, 15, 15, 14, 15, 21, 19, 15, 20, 18, 18, 22, 18, 16, 18, 19, 21, 19, 16, 20, 14, 12

Quiz #2 22, 22, 23, 22, 21, 24, 22, 19, 21, 23, 23, 25, 24, 22, 22, 23, 23, 23, 22, 24, 23, 22, 24, 21, 24, 16, 21, 16, 14

9. Construct a line plot for each quiz. For each quiz, which score(s) occurred with the greatest frequency?

10. Explain how you can use the line plots to determine which quiz had the greater mean score without calculating the means.

11. **Sales** The numbers of units sold by 48 sales representatives at a company during the past 3 months are listed below. Construct a frequency distribution and histogram for this data set.

107	162	184	170	177	102
145	141	105	193	167	149
195	127	193	191	150	153
164	167	171	163	141	129
109	171	150	138	100	164
147	153	171	163	118	142
107	144	100	132	153	107
124	162	192	134	187	177

12. **Education** The list shows the numbers of operating public school districts in the 50 states in 2017. Use a frequency distribution and a histogram to organize the data. (*Spreadsheet at LarsonPrecalculus.com*) (*Source: National Education Association*)

Subject: DOE portal for district purchases

Good afternoon Cathy!

Over the last couple of weeks we have had several school districts tell us about a DOE portal that they are to report their adoption decisions and what they plan to purchase. This is unfamiliar to our organization so I reached out to FSBD. They could not fully explain it, but did state they provided all the ISBNs for each publisher to the 'developer' so all of them could get uploaded in the system.

The districts that have contacted us stated that our ISBNs were not in the system and they had a deadline to enter them.

I email you in hopes of gaining a bit more knowledge on this portal and if there is anything we can do on our end to ensure our product is loaded.

Thanks for your time!

Carey

Achieve3000 School of the Future Leadership Summit

REGISTER NOW

Join our leadership team for a day of thought leadership and collaboration. We kick off our day with Dr. Shawn Joseph leading an interactive session as he describes the leadership mindset that is needed to effectively spearhead successful literacy initiatives. Drawing on the lessons of his most recent book, *Finding the Joseph Within*, this session will look at the state of literacy in America and provide proven strategies to promote growth and support student success.

Participants will leave with a better understanding of what it takes to be a powerful and effective leader in today's educational environment.

Subject: ESSER Fund and Student Engagement

BFW High School

Hi Cathy,

As you may know, districts are receiving ESSER Funding to execute learning initiatives, and I want to let you know that BFW can help.

BFW is best known for publishing best-in-class AP® textbooks, but equally important to us is equity of access and the support of all students entering advanced courses. We have the tools you need to jump-start learning acceleration for your students, so if you'd like to use ESSER Funding as an opportunity to start or expand your AP®, honors, or elective course, please reach out.

I'd love to work with you to provide solutions that align with your AP® course goals, and I'm available to talk by phone or Zoom. Can we set up a call for next week? There is also a link to my calendar in my signature below, so please feel free to "Schedule Time with Me" when you're free!

Thanks for your time,

Claire

Subject: FADIMA CONFERENCE 2021

Attachment(s): "DRAFT FADIMA AGENDA 2021.docx"

Hello Members! We are excited about the upcoming FADIMA Conference for 2021! In final preparations, please make sure you have registered via our website at www.FADIMA.net and secured your hotel room. The Hotel must be booked by October 25th to confirm the rate and rooms are going fast!!

Attached is the agenda for your records. We look forward to a great conference and seeing everyone soon.

Kristen A Condella

Monroe County School District

[Coordinator of Instructional Materials and Technology Integration](#)

[Virtual School Administrator](#) [AVID District Director](#) [FADIMA President 2021](#)

305-293-1400 x 53408 kristen.condella@keyschools.com

53rd Annual FADIMA Conference

Tuesday, November 16, 2021

Day 0

4:00PM – 6:00PM

Check in Hotel and Registration – FSBD Help

6:00PM – 8:00PM

Reception Sponsored by Curriculum Associates

Wednesday, November 17, 2021

53rd Annual FADIMA Conference

Day 1

8:00AM – 9:00AM – Breakfast- Sponsored by Amplify Learning

Executive Board Members Board Meeting - Sponsored by Safari Montage

FADIMA Members & Vendors

9:00AM – 9:20 AM – Opening Ceremony

The Presentation of Colors and National Anthem – SJCSJ JROTC and School Chorus

Greetings – St Johns County School District Superintendent, Tim Forson

9:20AM – 10:00 AM - Keynote - Jacob Oliva Chancellor of FLDOE

10:00AM – 10:30AM – Vendor Hall Spotlight Break

10:30 – 12:10 – Breakout Sessions

Session 1

10:30AM – 11:15AM

A: Trey Czar – Impact Florida

B: Adoption Process – Math/ELA? Round Table

C: Effectively Leveraging Standards-Aligned Instructional Resources in Your Digital Ecosystem

Session 2

11:25AM – 12:10PM

A: Trey Czar – Impact Florida

B: Adoption Process – Math/ELA? Round Table

C: Effectively Leveraging Standards-Aligned Instructional Resources in Your Digital Ecosystem

12:25PM – 1:00PM – Lunch

1:00 – 1:30 – Rest and Refresh

1:30PM – 2:30PM – Travel to Florida School Book Depository

2:45PM – 4:45PM – FSBD Tour and Presentation

4:45PM – 5:45PM – Travel to St. Augustine

6:30PM – Happy Hour –Sponsored by HMM

Thursday, November 18, 2021

53rd Annual FADIMA Conference

Day 2

8:00AM – 9:00AM – Breakfast- **Sponsored by Savvas**
FADIMA Members & Vendors
Committee Sign-up

9:00AM – 9:45AM – FLDOE Updates
Cathy Seeds

9:45AM – 10:45AM – Updates from our Lobbyist
Jessica Janasiewicz, Governmental Consultant

10:45AM – 12:00PM – Instructional Materials Panel

Moderator: Rob M.; Cathy Seeds, Jessica J.; Trey Czar; CDWG; FSBD

12:00PM – 1:00PM – Lunch – Sponsored by FSBD

*Recognize any retirees/awards

1:10PM – 3:30PM – **Breakout Sessions**

Session 3

1:10PM – 1:55PM

- A: Inquiry and Instructional Materials
- B. Cost Analysis – Introductory Session
- C. Legislation – What is changing, what is exciting!

Session 4

2:00PM – 2:45PM

- A: Small Districts Open Discussion
- B: Medium Districts Open discussion
- C: Large Districts Open Discussion

2:45PM – 3:15PM – Vendor Hall Spotlight Break

THURSDAY SNACK – SPONSORED by EdGems

3:15PM – 4:30PM – **Sponsored Social Activities** – Vendor Game Night

Each sponsoring vendor has an assigned gaming area to “host”

***Remainder of evening explore the city on your own**

Friday, November 19, 2021

Day 3

8:00AM – 9:30AM – Breakfast & Closing Activities – Sponsored by NewsELA

53rd Annual FADIMA Conference

FADIMA Members & Vendors

9:30AM – 12:00 PM – Board and Committee Meetings

To: Mack; Henry
CC: Erin Rock
Subject: Follow-up from last week's meeting with Erin (TSG) and Jerri (Cengage)

Good afternoon, Chancellor Mack:

The Cengage rep I think you may have been referring to when we met last week is Dan Cohen. Does that sound right? He is our Customer Success Manager for the Broward/Miami-Dade area, and he is amazing!

To answer the question you posed regarding a couple of data points for textbook costs/savings, I've listed a few quick examples of where students are saving considerable money by purchasing the Cengage Unlimited subscription instead of buying their books course-by-course. Obviously, the big schools such as MDC, BC, VC, HC and PBSC are where there are big numbers & significant savings across WFD certificate, non-credit and other programs. It's a matter of getting those program directors to pull together data from their instructors as to if they recommend the Cengage Unlimited subscription and how much those materials would have cost if the students had to purchase the items course-by-course. They all use a lot of Cengage.

Cengage is the leader in pre-professional, trades, skills, computing, HVAC, automotive, carpentry, plumbing, health-related fields, cybersecurity, broadband technologies use, criminal justice, health information management, medical billing/coding, early childhood and many other WFD-related programs in addition to our leading presence in the academic courses. Below are 3 contacts that I was able to reach out to & who have a strong handle on textbook affordability as well as savings realized via the Cengage Unlimited subscription model. These just happen to be in the area of business/computing, as they are usually the easiest to catch up with quickly.

St. Johns River State College, BAS Business Program

Program Director Dr. Karen Balcanoff estimates that "each student is saving at least a couple hundred annually...and those going full time could be saving close to \$1,000" annually.

Contacts:

St. Johns River State College
Dr. Karen Balcanoff, Director of Organizational Management
karenbalcanoff@sjrstate.edu

Dr. Summer Garrett
Professor of Organizational Management
summergarrett@sjrstate.edu

Florida Southwestern State College

FSW began utilizing the Cengage Unlimited subscription model 2 years ago when it was released in a large required course, CGS1100 (Computing) which then allowed students free access to any other Cengage textbook in any other course using Cengage. Since then, they have pulled many other courses under the Cengage Unlimited model, saving students hundreds of dollars annually since they don't have to purchase course-by-course any longer.

Contact:
Mary Myers, Dean
School of Business & Technology
mary.myers@fsw.edu
239.489.9405

Seminole State College Business and Information Management

The program has steadily increased their use of the Cengage Unlimited subscription model to include many foundational courses, but also many smaller courses that typically carry high-priced materials. The Program Manager estimates students are saving hundreds of dollars annually, and he loves that all of the technology platforms are included for one set price but that students can get free print rentals also by just paying the \$7.95 shipping cost.

Contact:
Bill Dafnis, Associate Professor and Program Manager, Business Administration
dafnisb@seminolestate.edu

Northwest Florida State College and Florida State College at Jacksonville

These schools used CARES/GEER \$\$ to purchase Cengage Unlimited subscriptions in various programs covered under the GEER initiative. Carpentry, Plumbing and Health-related areas are where I believe they used the subscriptions.

Thank you for your time last week, Chancellor Mack. I enjoyed hearing about your focus and goals, and I look forward to the follow-up meeting that you mentioned you'd like to have.

Best,

Jerri Norris
Sr. Business Development Director, Cengage Higher Education

Hi Lauren,
Have you located the unused check from last year for \$19,000? If not, is there someone in accounting on your team I can reach out to?
Our finance team really needs a status update as to whether the check will be returned to us or deposited and a refund issued.
They are asking for an answer by 3/25 so any insight you can give is appreciated.

Thanks,
Lisa

Subject: RE: 2021-22 Mathematics Adoption-Bid Check

Hi Lauren,
Our accounting team followed up today to check on the status of this.
They said since it's a cashier's check it needs to be returned to McGraw Hill or cashed and a refund check issued (not voided)
They need the check back by 3/25.
Are there any updates to the status?

Thanks
Lisa

Hi Lauren,
Our accounting department is looking for the voided \$19,000 Assessment Fee check from the Math Adoption (we replaced it with a \$16,000 check after we dropped the three honors courses) ? we don't have record of receiving it at our office.

Do you still have it? If so, could you scan a copy of it to me and then return to our office at:
McGraw Hill LLC

Importance: High

Hi Lisa,

Thank you for your responsiveness to this matter. We will pull these three bids from our list on FLIM and on the bid details report. McGraw Hill's new total of bids will be 16. I will need a new assessment fee check for \$16,000 overnighted to our office so that we can route and deposit. I will void the original \$19,000 check and mail back to you. Please let me know what address works best for you. I have pasted our address below if you need it.

Subject: RE: 2021-22 Mathematics Adoption-Bid Details

Hi Lauren,
I checked with our sales team and we would like to remove the three Honors Programs (Bid #425, 426, 427) and this should eliminate any duplicate ISBNs. All other courses have ISBNs unique to each course. Thank you for reaching out. Please let me know if there are other questions or you need more information.

Best,
Lisa

*** EXTERNAL EMAIL: If sender is unknown, use caution when opening. ***

Good afternoon,

Thank you for submitting your bid details for this year's adoption! As I am preparing the bid details report, I see that McGraw Hill has several duplicate ISBN's for different courses. An ISBN can be used only once for the bid submissions. It can be used multiple times within a course, but not within separate bids. Please let me know which ISBN you would like to keep for the courses and I will delete the other one. I have pasted below the pairs that I found to be the same, but please let me know if there are any additional duplicates.

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Hi Tavi,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Course: [Grade One Mathematics](#)

Bid ID: 455

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material presented is organized in a manner that provides easy and predictable usability for teachers and students. The student material provides access at majority of the benchmarks at an appropriate conceptual level for students. Earlier lessons within a concept elicit the use of models/manipulative, or provide visual aids that support learners in access the content. As students progress through out each lesson the complexity of questions increases. Students are also engaged in MTRs through purposefully placed pauses within the

text. A weakness to be aware of is over scaffolding within lessons through provided models or equation set ups. While some scaffolding may be necessary, the primary focus should be the student work and thinking, and not just filling in the blanks in the student work. The teacher material supports the learning through questioning and appropriate instructional strategies. Both resources clearly state the objectives and aligned benchmarks.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	5 - Very Good Alignment	Lessons on SE Pages 369-386 include representations with snap cubes and a ten frame. The numbers provided support doubles and make a ten strategies. All problems presented are within a sum of 20.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Multiple opportunities throughout the student work where students are provided context and must determine the operation through reasoning. For example, in Chapter 10, Lesson 6, students must interpret the context, select add or subtract and then record an number sentence to solve. Scenarios are represented with numbers, pictures and words.

MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	4 - Good Alignment	Missed opportunities for format of $c = a + b$. Student work has no context and context examples of standard. Connections made to other models and strategies.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Problem types vary according to the Situations Involving Operations with Numbers chart. There is a heavier focus on Result and Change unknown in contexts provided. Amble experiences to find missing numbers in any position in pre-written equations.
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	3 - Fair Alignment	Data sets do not include any examples of defining attributes of geometric figures to categorize.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	Problems used the data and scenarios to apply addition and subtraction.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons use grade appropriate terms such as halves and fourths. There are

			various representations and orientations of circles and rectangles partitioned as examples and non examples.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	Multiple opportunities to identify defining attributes, but limited opportunity to identify a figure based on given defining attributes
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	The standard reads "Sketch two-dimensional figures when given defining attributes." There are limited examples of where this is evident. Only a few examples can be seen on page 542, questions 14-16. Here an attribute is given and students are asked to sketch the shape. (Ex. Meg draws a shape with 6 sides.)
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Multiple lessons and examples for 2D and 3D shapes that involve composing, decomposing and identifying the geometric shapes involved. Lessons include examples of the use of 3D solid manipulatives and pattern blocks for students to access the concept.

MA.1.GR.1.4	<p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>3 - Fair Alignment</p>	<p>While there are many examples of real-world objects for stand alone figures (balls, cones, cans, etc), there are only a few real-world examples of items with multiple identifiable geometric figures. One example that does align to the standard is question 9 on page 506. This requires students to identify the geometric figures in an ice cream cone. In most other examples, they are identifying the geometric figures in composed shapes, but they are not real-world objects, but rather just composed by two stacked images.</p>
MA.1.M.1.1	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>5 - Very Good Alignment</p>	<p>Items align to the standard for estimation. Lessons prior to using a ruler use tiles to build understanding of counting units to measure. Rules presented in the text all start at zero.</p>
MA.1.M.1.2	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities for 3 items compared directly and also for indirect comparison.</p>
MA.1.M.2.1	<p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	<p>4 - Good Alignment</p>	<p>Focus on time to the hour then half hour introduced with one-</p>

			handed clock. Lacks connections to partitioning circles in half for half hour.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	2 - Poor Alignment	Resource provides images of both sides of coins. Limited opportunity to simply identify coins by name or value without having to count combinations. No reference seen that related each coin to how many equal a dollar.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	The benchmark reads "Find the value of combinations of pennies, nickels and dimes up to one dollar." The resource has lessons that also include quarters with in collections which is beyond the benchmark. Examples include problem 2 on page 394 where there is a quarter image in a series of nickels and all counting collection questions in Chapter 9 Lesson 3. Sole lesson (Chapter 9 Lesson 6) on counting bills only has examples of collections of like bills.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	Resources focus on counting sequences by 1s, 2, and 5s. Visual resources such as hundreds charts are provided. Attention to

			patterns is not called out within resources.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	2 - Poor Alignment	Majority of work has students representing numbers as tens and ones (Ex. 4 tens + 7 ones) with limited connections to expanded form (ex. 40+7). Students are not presented with word form and asked to relate it to the corresponding expanded or standard form.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Chapter 2 Lesson 6 is the primary connection to this benchmark. It provides opportunities for students to think about the same number in two different ways flexibly. They are not provided any visual aids to assist their thinking in the print. Chapter 2 Lesson 3 connects ones to tens (ex. 30 ones = 3 tens)The remaining referenced lessons and student pages focus on composing and decomposing based solely on the place value of each digit, not in a flexible manner.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Builds connection between plotting on a number line and ordering.

MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	4 - Good Alignment	Facts align to benchmark and fluency requirements.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	The relationship between addition and subtraction is more explicit in Chapter 10 lessons about related facts. Earlier chapters focus on adding and subtracting, but during instruction teachers would have to facilitate learning on efficiency using this relationship.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	Features include base ten clocks and hundred charts.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	4 - Good Alignment	Chapter 6 Lessons 10 and 11 include problems with a two-digit addended greater than 20 and varying representations including models, number lines and place value.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	All example problems have a minuend less than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	5 - Very Good Alignment	Students have opportunities to engage in open ended tasks that provide them time to grapple and preserve individually and collaboratively by responding in their own way and then sharing.

	<ul style="list-style-type: none"> • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	<p>5 - Very Good Alignment</p>	<p>Various lessons include the use of tools such as base ten blocks and number lines, as well as visual models for students to access and represent problems. Lessons are sequences through the progression of concrete, representational then abstract.</p>
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. 	<p>5 - Very Good Alignment</p>	<p>Lessons correlate to the correct level of fluency to the benchmark. Example: Chapter 7 Lesson 3 students use strategies that support automaticity.</p>

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	5 - Very Good Alignment	<p>Lauch tasks such as the one one page 3 provides opportunities for discourse amongst students. There are also embedded discourse questions with the text such as the one one page 273.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>Evidence of connections to patterns in math that hold true. Example pg. 261, students are asked to make connection to known fact to solve new problem.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Missed opportunities for estimating solutions outside of the measurement unit.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Examples are real-world and applicable to students.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students have opportunities to reference the task or their own work to explain and justify their work.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is written at an appropriate level for students to access.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	During embedded three reads, students are asked to make inferences based on the reading.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Active participation stems are embedded that promote students to explaining their thinking through discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students apply skill learned in Unpack and Draw and Model in independent practice of the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Math Talk stems promote formal math language.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most lessons aligned to state standards and the supporting documents. A few standards that were either addressed incorrectly or incomplete were

		MA.1.NSO.1.2 (lacking word form and minimal expanded form), MA.1.NSO.2.5 (no subtraction problems go beyond a minuend of 19), and MA.1.M.2.3 (combinations include quarters).
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Tasks allow students to interact with the math aligned to the benchmark. Students have opportunities to draw models, use tools and write equations throughout the text.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The adaptive practice of Waggle meets students on their personalized path to develop concepts. The TE also provides resources for in the moment lesson shifts with Reteach and Enrich pages.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The material, as seen on pages 67 and 68, provide students time to access on their own and with supports on the page to understand the content.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Lessons are appropriate for a standard teaching block.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No noticed errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No evidence of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Models through the material were representative of common tools, manipulatives, resources and representations that are aligned to the benchmarks including, but not limited to: base ten blocks, snap cubes, counters, ten frames, hundred charts, equations, part/part/whole models, and bar models.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No evidence of errors found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content aligns to benchmarks and other BEST documents.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Relevant context includes scenarios that students may experience at school (example page 213, Unlock the Problem)

		involving crayons. This allows all students to have access regardless of experiences.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The material provides opportunities to connect science and social students through additional tasks provided in the TE. Example on TE page 439
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	The visual and contextual portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material portrays people and animals ethically.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Overall the content of the benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	The resources provide material for instruction and additional practice. The online student adaptive program supports this practice as well with limited additional prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components are aligned with one another.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized in a consistent and easy to follow manner.

4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Narrative and visuals engage students
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is paces and organized in a way that makes it accessible to students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	The aligned print and digital components allow for all students to access the materials.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The material is easy to access and read for both teacher and student. Students are presented with appealing visual pages that also provide adequate work space.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	At the beginning of each lesson, teachers are provided a "Focusing on the Whole Student" section to motivate students to learn. These include topics such as self management as a learner (page 25B) and accessing prior knowledge (page 49B).
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials address the big ideas as aligned with BEST
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The TEs present clear objectives and connections for every unit (example. TE 49B) with correlating I Can statements on student pages (Example SE 49)

<p>4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.</p>	<p>4 - Good Alignment</p>	<p>Lessons are set up in a gradual release format after an open task. Students have examples to reference and problem increase in difficulty throughout lessons.</p>
<p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>	<p>3 - Fair Alignment</p>	<p>The TE materials provide some resources for adaptations based on language support. The Chapter at a Glance (example TE 47A) provides guidance around intervention and enrichment. There is little support during the lesson for adaptation for adaptations due to various needs.</p>
<p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks such as SE page 61 provide opportunities to mentally challenge students while still providing access to tools to solve.</p>
<p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>	<p>4 - Good Alignment</p>	<p>Tasks and activities are aligned to learning objectives. The materials also provide for differentiated centers that align to skills.</p>
<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>Strategies align to the benchmarks taught.</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Through the MTRs, instructional strategies are embedded through out the materials.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Summative assessments align to skills and strategies in the unit. (Example TE 106A)</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>4 - Good Alignment</p>	<p>Example (TE page 243) provides guidance based on learning objectives and student outcomes. There is not the same guidance for the summative assessment, but this</p>

		would be beneficial for teachers to respond to data.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The material has applied the MTRs strategically throughout the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The material incorporates multiple instructional teaching strategies as well as appropriate skills and strategies for students to access the content.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence observed of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Culturally Responsive Teaching as it relates to CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Social justice as it relates to CRT
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence observed of solicitation of SEL

noticed some errors within the materials (grammatical, wrong coins shown, etc) as listed in my justifications. I am only recommending these materials for adoption based on the score average, but would highly recommended editing of the materials.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	4 - Good Alignment	<p>The first four examples were good. They included problem types with addition of three or more whole numbers within 20. The SE p.471-476 was incredibly confusing and unnecessary for this standard. The diagram reminded me of part part whole and it would not be easy for children to discern that they were supposed to add across. There is no where for them to show their work, write an equation, or write a strategy to solve when students are supposed to be identifying facts to practice procedural reliability. There is also an error on problem 11 p.42... it is either grammatical or missing something. The wording was very confusing through the first grade lense.</p>

<p>MA.1.AR.1.2</p>	<p>Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.</p>	<p>4 - Good Alignment</p>	<p>Majority of the problems appear to follow the standard and the clarifications. I am, however, concerned about the placement in the book and the problem difficulty level. It seems that students are adding within 10 in Chapter 4. The textbook has them counting and filling in missing numbers to 120, as well as skip counting in chapter 1. That does not make sequential sense, as students need to explore numbers within 20 before expanding to 120. On SE p.203 there is also a problem where students add three numbers, which is not part of the standard.</p>
<p>MA.1.AR.2.1</p>	<p>Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.</p>	<p>5 - Very Good Alignment</p>	<p>The materials gave good instruction and practice on relating subtraction to addition within 20.</p>
<p>MA.1.AR.2.2</p>	<p>Determine and explain if equations involving addition or subtraction are true or false.</p>	<p>3 - Fair Alignment</p>	<p>Clarification 2 states: "Problem types are limited to an equation with no more than four terms." The Listen and Draw on p.477, #13 on p.480, and #7 on 481 contain 5 terms, which does not align to the standard and clarifications. Also, many problems</p>

			<p>focusing on matching like facts, but do not focus on the meaning of the equal sign. It is mentioned in the instruction, but does not appear the main goal as stated in clarification 1. This is a very challenging topic for first graders, and more practice that did not involve the balancing of equations (also not the standard), would be more appropriate. For example, #1-6 on p.481 does this well.</p>
<p>MA.1.AR.2.3</p>	<p>Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.</p>	<p>5 - Very Good Alignment</p>	<p>There is a lot of great practice that helps students understand missing addends and using related facts to solve. While I understand why #11-13 on p. 462 were included, I found it to be confusing for students. We want them to gain a deeper understanding of how numbers relate, not just a method to plug in numbers without any meaning added to it.</p>
<p>MA.1.DP.1.1</p>	<p>Collect data into categories and represent the results using tally marks or pictographs.</p>	<p>3 - Fair Alignment</p>	<p>Completely skips clarification #1 and does not relate the tally marks to skip counting by 5's. The opportunity is there to create those questions and connections, but it</p>

			<p>was not explicitly stated with the tally marks. I looked in the TE and could also not find any indication that the teacher was supposed to go over skip counting by 5's with tally marks. There is also nothing on defining attributes of geometric shapes as stated in clarification 1. For example students could tally how many shapes had 4 or more sides, as the color of the shapes in the included questions were not defining attributes of a shape. There is some good practice of reading and filling in pictographs and tally charts that do align.</p>
<p>MA.1.DP.1.2</p>	<p>Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.</p>	<p>5 - Very Good Alignment</p>	<p>Great practice for interpreting data and calculating. I would recommend focusing on adding more addition problems.</p>
<p>MA.1.FR.1.1</p>	<p>Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.</p>	<p>4 - Good Alignment</p>	<p>The lessons are good, but they do not relate with each other until the chapter review. After learning halves and fourths, it would be great mixed practice for students to identify which is which. Also, p.569 is confusing because the triangle shown in the question is not the</p>

			type of triangle they will draw. That is very confusing for first graders.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	2 - Poor Alignment	The mark is missed on defining attributes of 3d shapes. Only informal language is used (flat and curved), and is missing critical academic vocabulary as mentioned in the clarifications (edges and faces). Instead of curved not curved, focus on the academic language of these 3d shapes have (or do not have) faces or edges. The 2d shapes had better practice and vocabulary. Also, on p.533 of the SE I saw nothing that described open and closed shapes to students. I can only assume that was what was to be done there? It was not in the directions for the teacher at the bottom either.
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	P.521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape. P.539-544 does a better job, however the problems needs to include more types like #14-16, as students are supposed to draw a figure based

			on the attributes, not draw a figure and then list the attributes.
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	3 - Fair Alignment	Chapter 12 Lesson 5 uses fourths instead of semi-circles as described in the standard and the clarifications. There are some good examples of composing and decomposing 2d and 3d shapes, however it is lacking the much needed vocabulary. It only shows the pictures, but never uses or at least includes words to help students make the connection between the shape and its name. This is a critical foundational skill for young students. I notice a lot of the problems are written for students to be able to independently read, but the expectation for first graders does not include the ability to read every problem. They really need this vocabulary as it is used in the standards.
MA.1.GR.1.4	Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	There were good examples and practice for 2d and 3d shapes.

<p>MA.1.M.1.1</p>	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>2 - Poor Alignment</p>	<p>The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters, which is not part of the standard. There was also a heavy emphasis in using a tile and unit cube to measure instead of a ruler at first. Non standard units of measurement are not covered in this standard. There were some appropriate items like measuring from 0 in inches and centimeters with real world objects, but overall the lessons do not fully match the standard MA.1.M.1.1. accurately.</p>
<p>MA.1.M.1.2</p>	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>2 - Poor Alignment</p>	<p>Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units. Chapter 14 Lesson 5 was okay, but lacked a lot of visuals that students need when comparing lengths. There were a lot of problems where they draw the picture instead of having them select and/or order objects by length or unit of measure. Number 14 on p.622 also has students draw</p>

			4 objects when the clarification explicitly states it will only be up to 3 objects compared.
MA.1.M.2.1	Using analog and digital clocks, tell and write time in hours and half-hours.	2 - Poor Alignment	There is no discussion or use of the vocabulary for digital and analog. The missing minute hand is not a realistic representation of an actual clock. Students need to see where the minute hand is to be considered o'clock. Same with "half past". There is no mention partition of circles in clarification 2.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	1 - Very Poor/No Alignment	The materials focus more on the counting of coins as stated in MA.1.M.2.3 instead of the identification of coins as described in standard MA.1.M.2.2. #2 on SE #394 also has a major error of using a quarter instead of a nickel in the problem. I also find it confusing that they introduce coins that are not typically circulated (the Lewis and Clark nickel) on the first page. While it is important for students to see the different types of coins, the focus of this standard is identification, and there was barely an introduction into the

			original nickel. The materials really lack on explicit identification of coins, which is critical for students that are more used to digital currency than physical currency. There is nothing that discusses how many of each coin makes up a dollar or even how many cents are in a dollar bill. Another critical piece of this standard missed.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	Please read the clarifications for this standard. The materials provided majority of the practice counting groups of coins with quarters or counting groups of just quarters, which is not part of the standard. Please only include pennies, nickels, and dimes. Also, there was a lack of focus on the skip counting strategies to count coins.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	There is a lot of good practice counting by 1s forwards and backwards and skip counting. The problem is, which counting backwards, students are being taught the 100s chart which only goes forward. Having

			<p>them count backwards in the same direction that they are counting on is very confusing. I would recommend you put the largest number at the end (on the right) that they are counting back from (to the left). This also goes with a reading skill or reading in order from left to right. It would make sense to them that backwards is from right to left. Also, the hundreds chart is not helpful if they are only using it within 20. It is helpful to have random holes for them to fill as practice.</p>
<p>MA.1.NSO.1.2</p>	<p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>	<p>3 - Fair Alignment</p>	<p>Most of the examples for expanded form was based on __tens+__ones when it should be the actual number made by the tens plus the ones (for example 70+5). This is all outlined in the clarifications of the standard. Also, word form beyond 19 and multiples of ten (i.e. fifty) are never discussed and the standard states that students must be able to read numbers in word for from 1-100 (not write/spell, just read and identify). The representation with the ten frames and the ten rods/ones were</p>

			great representation. The way expanded form is written just needs to be changed based on the clarification. That is more based on standard MA.1.NSO.1.1.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	This is done well. There is a lot of practice for students to write _tens and _ones. There is some practice to write a number in multiple ways with tens and ones, but not a lot of explicit instruction or guidance in the TE to help students generate ideas.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	4 - Good Alignment	p.122 #1-4, the lines where students complete the sentence is confusing. They need to include a word bank or something so students know what they are doing on that line. There are good comparing problems, problems to arrange numbers in sequential order, and problems for plotting numbers. The problem I have is the lack of visible examples for students available. It is also helpful for students using the materials at home to have examples so that

			parents can better support their students.
MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	5 - Very Good Alignment	This was actually done very well. Choosing problems that causes students to use the communitive property of addition, as well as making a ten to add, really helps with their procedural reliability, which leads to automatic fact fluency.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	p.156 #9-11 is very confusing and does not help with procedural reliability since students have to interpret shapes to find out the numbers. However, there is a lot of good practice that allows students to use the communitive property, related facts, etc in order to problem solve. I would include more word problems to help cover this standard to increase rigor and real world application since the focus is procedural reliability and not automatic recall of those specific facts.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	This followed the standard and clarifications of ten more and ten less. I would suggest more practice for ten more,

			ten less, as skip counting by tens from 0 is technically not what is being called for in the standard.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	3 - Fair Alignment	Examples from p.279-296 were not rigorous enough to cover this standard, as most were two single digit numbers. The SE p.303-308 did a much better job covering this material, however there was not enough practice for this type of standard. There needs to be more opportunities to explore with the various strategies.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	The two digit numbers in the problems did not go beyond 20. The clarification even give the example of 37, showing that it is expected for students to subtract single digits from numbers greater than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	4 - Good Alignment	There are a few activities available for students to work independently or to discuss as a class (i.e. Math on the Spot, Math Talk, "For the Teacher" problems, etc). While these problems are good, there is a bit missing on an engaging class discussion. The

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		teacher could facilitate these discussions with some ideas listed in the TE, but the amount of questions on this MTR is limited.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	This was done very well throughout the HMH materials. Many problems were presented in a variety of ways, allowing for students to practice various strategies. There were problems given that encouraged the use of manipulatives, drawing, etc.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	HMH materials contained a number of tasks that allowed for the practice of mathematical fluency. There were many opportunities for students to practice a variety of strategies to determine the best way (or a different way) to solve a problem.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	4 - Good Alignment	<p>There are a variety of opportunities for students to share and talk with one another about their mathematical thinking and processes. I do believe there could be more rigor within the embedded questions listed in the student text. For example, on p. 569 it just asks a yes or no question and says for students to explain. It needs to go a little deeper into discussing the differences and similarities between student thinking.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>This was done well in the HMH materials. In some of the examples of materials listed, a bit more rigor could be added to connecting relationships. Ideas were kept more isolated on some topics instead of building off of each other.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	The related facts did a great job of showing justification.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	There multiple opportunities for students to apply math problems to real world contexts.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students are allowed to explain evidence in their oral explanations of problems. However, to better incorporate this ELA standard, I would recommend

			addressing this skill during word problems. Also, by allowing students to provide a written response, as in first grade the clarification explains that students will not only do this orally, but will start to write their justifications with support as well.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	Many of the problems in the HMH curriculum are written in student friendly language.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	This was done very well in the shapes unit. While I disagree with some of the vocabulary terms used as described in previous justifications (i.e. saying flat surface instead of faces), the strategies used really help with inferencing. There were also items in the TE that supported this ELA standard as well.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	There are a good opportunities for practicing explaining thinking with students. I would suggest even more opportunities for student sharing and collaboration, but the ones provided followed the ELA standard.

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	There were ample opportunities to practice a variety of strategies in the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Academic language was taught throughout the lessons and students were given opportunities to share using this language, or to justify in more social terms. The Write Math sections also allowed opportunities to practice this ELA skill.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	There is a section for multilingual support in the TE.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	The multilingual section discussed using more social terms to help incorporate new academic skills and language taught.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	As mentioned in standards' comments and justifications, some things aligned well and some did not. It looks as if the writer did not access the clarifications of the standards.

<p>2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.</p>	<p>3 - Fair Alignment</p>	<p>Some items lacked rigor (for example, some of the addition and subtraction problems were too simple) and some were more challenging than the clarifications explained (for example adding quarters for the money unit was not part of the benchmark).</p>
<p>3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.</p>	<p>2 - Poor Alignment</p>	<p>In its current state, the materials would just be very supplemental. The scope and sequence does not seem appropriate, and some of the benchmarks do not follow clarification guidelines. In my own first grade classroom, a lot of the materials would need to be altered to better fit the standards, edited due to errors, have numbers changed due to lack of rigor, or materials omitted due to not aligning with standard clarifications.</p>
<p>4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.</p>	<p>3 - Fair Alignment</p>	<p>Some topics (such as coin identification) are glazed over, while others go into sufficient detail about topics.</p>
<p>5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.</p>	<p>2 - Poor Alignment</p>	<p>No, see previous justifications about not following the clarifications of standards.</p>
<p>6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.</p>	<p>3 - Fair Alignment</p>	<p>See comments above. The materials do not always reflect the clarifications.</p>
<p>7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.</p>	<p>3 - Fair Alignment</p>	<p>Sometimes more time was spent on a simple topic (i.e. adding to 10 or 20) and not enough time was spent on other topics.</p>

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

As a first grade teacher myself that has gone through a rigorous overview of the new Florida BEST Standards, I would not feel like I could utilize these materials cover to cover. The materials, while mostly comprehensive, do not take into account many of the clarifications listed. It appears as though the standards were just read and materials were based solely on that. The materials are student friendly, and the TE is easy to follow and read. I do not agree with the scope and sequence of the materials, as previously mentioned in my justifications. I also

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	The sources reflected expert knowledge of the content.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	While the sources showed expertise in mathematics, there seemed to be a need for more knowledge of foundational primary instruction, as well as the new standards and their clarifications.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	2 - Poor Alignment	There were some major errors as previously described in the justifications. There needs to be some proofing done throughout the materials.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias noted.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Yes, the content was representative of the materials.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	3 - Fair Alignment	There were some errors that need to be addressed, as mentioned in previous justifications.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	2 - Poor Alignment	The clarifications of the new standards needs to be reviewed by the writers.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	I would recommend that the materials' writers review the new standard clarifications to correctly align the materials to the current standards.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Yes, the materials were visually appealing and relevant for students.

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Yes, the word problems and content were meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Yes, there were ELA connections within the materials.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Yes, while not many students were portrayed, the names and few visuals in the materials represented multiple ethnic groups. There was no bias noted.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No issues noted.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	The clarifications of the standards really need to be reviewed by the writers.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	There are a number of good resources available for students and teachers within the consumables and online resources. There are additional materials available to teachers to help learners that need more assistance or intervention.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Yes, it aligns with other components.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	2 - Poor Alignment	I do not agree with the scope and sequence of the materials. It does not make logical sense with the new standards to present numbers 1-120 before

		having students add and subtract within 10. Students really need to explore facts within 20 before moving to numbers beyond 20. Counting to (on and from numbers within) 120 is more challenging to students than adding within 10 and 20. Also, greater than/less than (the words) should be introduced before the symbols, not together. There are many small instances like this throughout the materials where it could be organized better to fit the foundational needs of younger students.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Yes, the materials are visually engaging and easy to understand as a whole.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	This is usually done well. There are a few instances where too much time was spent on less rigorous items and not enough time was spent on more other standards (see previous justifications).
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Captions are available, it is compatible with assistive technology, etc.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall, the presentation is good. The scope and sequence of items really does need to be reviewed to help students learning foundational mathematics.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	The student consumables are laid out to engage young students. There are some online components that can also engage students. I do think more colorful pictures could be used throughout to help students especially with word problems.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Yes, the materials go through the standards based on main ideas and themes. I still recommend the writers review the clarifications to make sure the materials are teaching the correct points of standards and topics.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Yes, the materials are clear and the outcomes are clear as well.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Yes, the TE also gives points for the teacher to cover.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Yes, many of the topics covered present a variety of strategies for students to try. Materials appear to be easily adaptable to meet the needs of struggling learners, as the TE has options for students needing interventions.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	There are multiple opportunities for students to engage mentally, as well as physically with manipulatives.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The activities were good, however some discussions lacked rigor and deeper thinking. See previous justifications for examples.

<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>There are multiple strategies listed that can help young learners grasp foundational concepts (for example using base ten blocks for adding and subtracting, not the standard algorithm).</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>3 - Fair Alignment</p>	<p>Most of the strategies are good, however, some important connections are missing with some standards due to the clarifications of standards not being fully incorporated. For example, in the unit with coins, there was no emphasis on skip counting in order to count coins.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>4 - Good Alignment</p>	<p>The assessments shown in the TEs aligned to what the materials covered. The loss of one point was because of the materials not aligning completely with learning outcomes in regards to the standards.</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>3 - Fair Alignment</p>	<p>As stated above, the assessments are effective with the materials presented, but do not fully align with the standards based on clarifications.</p>
<p>12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.</p>	<p>5 - Very Good Alignment</p>	<p>Yes, the UDL covers materials that consider all students' needs.</p>
<p>13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?</p>	<p>4 - Good Alignment</p>	<p>Yes, the materials cover ELA expectations and majority of the MTRs with either good or very good alignment.</p>
<p>14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)</p>	<p>4 - Good Alignment</p>	<p>Overall the submission does a good job to support learning requirements. Edits to align</p>

		materials to follow instructional standards' clarifications is needed.
--	--	--

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	There was no evidence of CRT in the materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	There was no evidence that Culturally Responsive Teaching was discussed in the materials.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Yes, it omits Social Justice.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	There is no solicitation of SEL.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material presented is organized in a manner that provides easy and predictable usability for teachers and students. The student material provides access at majority of the benchmarks at an appropriate conceptual level for students. Earlier lessons within a concept elicit the use of models/manipulative, or provide visual aids that support learners in access the content. As students progress through out each lesson the complexity of questions increases. Students are also engaged in MTRs through purposefully placed pauses within the

text. A weakness to be aware of is over scaffolding within lessons through provided models or equation set ups. While some scaffolding may be necessary, the primary focus should be the student work and thinking, and not just filling in the blanks in the student work. The teacher material supports the learning through questioning and appropriate instructional strategies. Both resources clearly state the objectives and aligned benchmarks.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	5 - Very Good Alignment	Lessons on SE Pages 369-386 include representations with snap cubes and a ten frame. The numbers provided support doubles and make a ten strategies. All problems presented are within a sum of 20.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Multiple opportunities throughout the student work where students are provided context and must determine the operation through reasoning. For example, in Chapter 10, Lesson 6, students must interpret the context, select add or subtract and then record an number sentence to solve. Scenarios are represented with numbers, pictures and words.

MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	4 - Good Alignment	Missed opportunities for format of $c = a + b$. Student work has no context and context examples of standard. Connections made to other models and strategies.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Problem types vary according to the Situations Involving Operations with Numbers chart. There is a heavier focus on Result and Change unknown in contexts provided. Amble experiences to find missing numbers in any position in pre-written equations.
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	3 - Fair Alignment	Data sets do not include any examples of defining attributes of geometric figures to categorize.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	Problems used the data and scenarios to apply addition and subtraction.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons use grade appropriate terms such as halves and fourths. There are

			various representations and orientations of circles and rectangles partitioned as examples and non examples.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	Multiple opportunities to identify defining attributes, but limited opportunity to identify a figure based on given defining attributes
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	The standard reads "Sketch two-dimensional figures when given defining attributes." There are limited examples of where this is evident. Only a few examples can be seen on page 542, questions 14-16. Here an attribute is given and students are asked to sketch the shape. (Ex. Meg draws a shape with 6 sides.)
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Multiple lessons and examples for 2D and 3D shapes that involve composing, decomposing and identifying the geometric shapes involved. Lessons include examples of the use of 3D solid manipulatives and pattern blocks for students to access the concept.

MA.1.GR.1.4	<p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>3 - Fair Alignment</p>	<p>While there are many examples of real-world objects for stand alone figures (balls, cones, cans, etc), there are only a few real-world examples of items with multiple identifiable geometric figures. One example that does align to the standard is question 9 on page 506. This requires students to identify the geometric figures in an ice cream cone. In most other examples, they are identifying the geometric figures in composed shapes, but they are not real-world objects, but rather just composed by two stacked images.</p>
MA.1.M.1.1	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>5 - Very Good Alignment</p>	<p>Items align to the standard for estimation. Lessons prior to using a ruler use tiles to build understanding of counting units to measure. Rules presented in the text all start at zero.</p>
MA.1.M.1.2	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities for 3 items compared directly and also for indirect comparison.</p>
MA.1.M.2.1	<p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	<p>4 - Good Alignment</p>	<p>Focus on time to the hour then half hour introduced with one-</p>

			handed clock. Lacks connections to partitioning circles in half for half hour.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	2 - Poor Alignment	Resource provides images of both sides of coins. Limited opportunity to simply identify coins by name or value without having to count combinations. No reference seen that related each coin to how many equal a dollar.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	The benchmark reads "Find the value of combinations of pennies, nickels and dimes up to one dollar." The resource has lessons that also include quarters with in collections which is beyond the benchmark. Examples include problem 2 on page 394 where there is a quarter image in a series of nickels and all counting collection questions in Chapter 9 Lesson 3. Sole lesson (Chapter 9 Lesson 6) on counting bills only has examples of collections of like bills.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	Resources focus on counting sequences by 1s, 2, and 5s. Visual resources such as hundreds charts are provided. Attention to

			patterns is not called out within resources.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	2 - Poor Alignment	Majority of work has students representing numbers as tens and ones (Ex. 4 tens + 7 ones) with limited connections to expanded form (ex. 40+7). Students are not presented with word form and asked to relate it to the corresponding expanded or standard form.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Chapter 2 Lesson 6 is the primary connection to this benchmark. It provides opportunities for students to think about the same number in two different ways flexibly. They are not provided any visual aids to assist their thinking in the print. Chapter 2 Lesson 3 connects ones to tens (ex. 30 ones = 3 tens)The remaining referenced lessons and student pages focus on composing and decomposing based solely on the place value of each digit, not in a flexible manner.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Builds connection between plotting on a number line and ordering.

MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	4 - Good Alignment	Facts align to benchmark and fluency requirements.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	The relationship between addition and subtraction is more explicit in Chapter 10 lessons about related facts. Earlier chapters focus on adding and subtracting, but during instruction teachers would have to facilitate learning on efficiency using this relationship.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	Features include base ten clocks and hundred charts.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	4 - Good Alignment	Chapter 6 Lessons 10 and 11 include problems with a two-digit addended greater than 20 and varying representations including models, number lines and place value.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	All example problems have a minuend less than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	5 - Very Good Alignment	Students have opportunities to engage in open ended tasks that provide them time to grapple and preserve individually and collaboratively by responding in their own way and then sharing.

	<ul style="list-style-type: none"> Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Various lessons include the use of tools such as base ten blocks and number lines, as well as visual models for students to access and represent problems. Lessons are sequences through the progression of concrete, representational then abstract.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	Lessons correlate to the correct level of fluency to the benchmark. Example: Chapter 7 Lesson 3 students use strategies that support automaticity.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	5 - Very Good Alignment	<p>Lauch tasks such as the one one page 3 provides opportunities for discourse amongst students. There are also embedded discourse questions with the text such as the one one page 273.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>Evidence of connections to patterns in math that hold true. Example pg. 261, students are asked to make connection to known fact to solve new problem.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Missed opportunities for estimating solutions outside of the measurement unit.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Examples are real-world and applicable to students.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students have opportunities to reference the task or their own work to explain and justify their work.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is written at an appropriate level for students to access.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	During embedded three reads, students are asked to make inferences based on the reading.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Active participation stems are embedded that promote students to explaining their thinking through discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students apply skill learned in Unpack and Draw and Model in independent practice of the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Math Talk stems promote formal math language.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most lessons aligned to state standards and the supporting documents. A few standards that were either addressed incorrectly or incomplete were

		MA.1.NSO.1.2 (lacking word form and minimal expanded form), MA.1.NSO.2.5 (no subtraction problems go beyond a minuend of 19), and MA.1.M.2.3 (combinations include quarters).
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Tasks allow students to interact with the math aligned to the benchmark. Students have opportunities to draw models, use tools and write equations throughout the text.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The adaptive practice of Waggle meets students on their personalized path to develop concepts. The TE also provides resources for in the moment lesson shifts with Reteach and Enrich pages.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The material, as seen on pages 67 and 68, provide students time to access on their own and with supports on the page to understand the content.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Lessons are appropriate for a standard teaching block.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No noticed errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No evidence of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Models through the material were representative of common tools, manipulatives, resources and representations that are aligned to the benchmarks including, but not limited to: base ten blocks, snap cubes, counters, ten frames, hundred charts, equations, part/part/whole models, and bar models.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No evidence of errors found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content aligns to benchmarks and other BEST documents.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Relevant context includes scenarios that students may experience at school (example page 213, Unlock the Problem)

		involving crayons. This allows all students to have access regardless of experiences.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The material provides opportunities to connect science and social students through additional tasks provided in the TE. Example on TE page 439
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	The visual and contextual portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material portrays people and animals ethically.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Overall the content of the benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	The resources provide material for instruction and additional practice. The online student adaptive program supports this practice as well with limited additional prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components are aligned with one another.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized in a consistent and easy to follow manner.

4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Narrative and visuals engage students
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is paces and organized in a way that makes it accessible to students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	The aligned print and digital components allow for all students to access the materials.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The material is easy to access and read for both teacher and student. Students are presented with appealing visual pages that also provide adequate work space.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	At the beginning of each lesson, teachers are provided a "Focusing on the Whole Student" section to motivate students to learn. These include topics such as self management as a learner (page 25B) and accessing prior knowledge (page 49B).
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials address the big ideas as aligned with BEST
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The TEs present clear objectives and connections for every unit (example. TE 49B) with correlating I Can statements on student pages (Example SE 49)

<p>4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.</p>	<p>4 - Good Alignment</p>	<p>Lessons are set up in a gradual release format after an open task. Students have examples to reference and problem increase in difficulty throughout lessons.</p>
<p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>	<p>3 - Fair Alignment</p>	<p>The TE materials provide some resources for adaptations based on language support. The Chapter at a Glance (example TE 47A) provides guidance around intervention and enrichment. There is little support during the lesson for adaptation for adaptations due to various needs.</p>
<p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks such as SE page 61 provide opportunities to mentally challenge students while still providing access to tools to solve.</p>
<p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>	<p>4 - Good Alignment</p>	<p>Tasks and activities are aligned to learning objectives. The materials also provide for differentiated centers that align to skills.</p>
<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>Strategies align to the benchmarks taught.</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Through the MTRs, instructional strategies are embedded through out the materials.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Summative assessments align to skills and strategies in the unit. (Example TE 106A)</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>4 - Good Alignment</p>	<p>Example (TE page 243) provides guidance based on learning objectives and student outcomes. There is not the same guidance for the summative assessment, but this</p>

		would be beneficial for teachers to respond to data.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The material has applied the MTRs strategically throughout the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The material incorporates multiple instructional teaching strategies as well as appropriate skills and strategies for students to access the content.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence observed of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Culturally Responsive Teaching as it relates to CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Social justice as it relates to CRT
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence observed of solicitation of SEL

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

2 - Poor Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The GoMath series does not look like it has been updated to meet our new standards. It looks like the old GoMath lessons. It seems like editors tried to categorize the old lessons to align with the BEST standards. The geometrical reasoning section has portions that, although interesting, are inconsistent with the rest of the text ("connection to reading" and "connection to science"). The teacher edition doesn't offer much in the way of varying lesson ideas, or suggestions on what else to try to help students understand concepts. A few of the lessons do not

align with 5th grade standards. Many of the lessons claim to address all of the MTR's, but that is not accurate; the language of the MTRs should be prevalent throughout the student text. This is not a series that I would want as a resource for engaging my students in the new BEST standards.

Standard	Description	Reviewer Rating	Rating Justification
MA.5.AR.1.1	Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	good opportunities for multi-operations
MA.5.AR.1.2	Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.	5 - Very Good Alignment	multiple opportunities for practice with fraction word problems
MA.5.AR.1.3	Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	models with real-world problems
MA.5.AR.2.1	Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.	5 - Very Good Alignment	no nesting; keeping within parameters given in clarifications
MA.5.AR.2.2	Evaluate multi-step numerical expressions using order of operations.	5 - Very Good Alignment	no nesting, no exponents
MA.5.AR.2.3	Determine and explain whether an equation involving any of the four operations is true or false.	3 - Fair Alignment	limited practice with true or false
MA.5.AR.2.4	Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	plenty of opportunities to analyze word problems

MA.5.AR.3.1	Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.	5 - Very Good Alignment	opportunities for finding patterns with whole numbers, decimals, and fractions
MA.5.AR.3.2	Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.	2 - Poor Alignment	asking student to write a rule for a given graph
MA.5.DP.1.1	Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.	2 - Poor Alignment	decimal values to thousandths should be limited to hundredths
MA.5.DP.1.2	Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.	5 - Very Good Alignment	instruction on balancing point
MA.5.FR.1.1	Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.	4 - Good Alignment	good use of models
MA.5.FR.2.1	Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	use of fraction bars and number lines
MA.5.FR.2.2	Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	use of models
MA.5.FR.2.3	When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.	4 - Good Alignment	models and number lines; missing connection to decimals
MA.5.FR.2.4	Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	models, appropriate word problems - both partitive and quotative

MA.5.GR.1.1	Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.	4 - Good Alignment	lots of practice with triangles and quadrilaterals
MA.5.GR.1.2	Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.	5 - Very Good Alignment	adequate coverage of 3-d figures
MA.5.GR.2.1	Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?
MA.5.GR.3.1	Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.	5 - Very Good Alignment	sufficient practice and good visual models
MA.5.GR.3.2	Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.	5 - Very Good Alignment	gradual move from counting cubes to formula
MA.5.GR.3.3	Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.	5 - Very Good Alignment	abundant use of visuals
MA.5.GR.4.1	Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.	2 - Poor Alignment	asking student to write a rule for a given graph
MA.5.GR.4.2	Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.	5 - Very Good Alignment	graphing data from an experiment
MA.5.M.1.1	Solve multi-step real-world problems that involve converting measurement units to	3 - Fair Alignment	no need for weight conversions? they do

	equivalent measurements within a single system of measurement.		refer to grams; on p. 558, question about converting hL to daL - unnecessary
MA.5.M.2.1	Solve multi-step real-world problems involving money using decimal notation.	4 - Good Alignment	multiple opportunities for working with money
MA.5.NSO.1.1	Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.	2 - Poor Alignment	not enough attention to this standard, only addressed in one lesson
MA.5.NSO.1.2	Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.	2 - Poor Alignment	only one lesson for a concept that requires more attention
MA.5.NSO.1.3	Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.	2 - Poor Alignment	not enough content to support this concept
MA.5.NSO.1.4	Plot, order and compare multi-digit numbers with decimals up to the thousandths.	1 - Very Poor/No Alignment	no evidence of scaled number lines
MA.5.NSO.1.5	Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.	2 - Poor Alignment	limited practice
MA.5.NSO.2.1	Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.	2 - Poor Alignment	limited practice and offering only "the" standard algorithm instruction
MA.5.NSO.2.2	Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.	2 - Poor Alignment	good use of partial quotient initially then it leans into long division standard algorithm for the rest of the division practice

MA.5.NSO.2.3	Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	3 - Fair Alignment	number lines not used
MA.5.NSO.2.4	Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.	3 - Fair Alignment	no instruction in estimation provided for multiplication with decimals but provided better creative strategies besides standard algorithm; instruction provided for estimation with division
MA.5.NSO.2.5	Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.	4 - Good Alignment	many opportunities for practice of the concepts
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	no references to growth mindset norms; each lesson suggests MTR 1.1 is addressed, but I couldn't find any references in the student text; found references to effortful learning in teacher text
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. 	4 - Good Alignment	variety of opportunities to use manipulatives and models for representing thinking

	<ul style="list-style-type: none"> • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	3 - Fair Alignment	occasional references to fluency in students text; teacher edition offers activities to develop fluency
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. 	4 - Good Alignment	"math talk" sections encourage students to have conversations about given math questions

	<ul style="list-style-type: none"> Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 	4 - Good Alignment	"unlock the problem" section decomposes example into manageable parts
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. 	4 - Good Alignment	examples of suggestions to estimate when showing expressions; could encourage estimation with word problems

	<ul style="list-style-type: none"> Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	wide variety of real world situations involving math
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	questions throughout for citing evidence of answer
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	"launch into math" for each unit is interesting and related to real world Florida
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	"launch into math" section good for inferencing
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	"math talk" sections
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	requires quality student work throughout
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	"math talk" sections

ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	students communicating math ideas
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	students given opportunities throughout to work socially together on math ideas

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	2 - Poor Alignment	relying too much on the standard algorithms rather than providing opportunities for developing strategies of other ways of calculating
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	2 - Poor Alignment	some of the lessons address skills from middle school content
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	some of the number sense benchmarks don't have enough opportunities to explore and practice
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	would like to have more practice for some skills that will take longer to develop
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?; Ch. 17, L3 - write a rule for a given graph
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	just a handful lessons that don't apply to 5th grade standards
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	students will require more review of multi-digit multiplication than offered -

		although a standard from 4th grade, students will need more time
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	5E's for each unit
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	reference to 5E's at the beginning of each unit;
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	2 - Poor Alignment	spelling errors: "Identify and Classify Two-Dimensional Figures," "quadrilatera,"
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	free of bias and contradictions
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	good use of visual models; would prefer more number lines and less standard algorithm
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	just a few spelling mistakes; chapter 18 has a table with degrees F listed as 8-1/2 and 11-1/4(these are not reasonable values as we don't read temperatures in fractions and children would not be familiar with temps that cold
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	lip service given to fluency and number routines, but needs more appropriate fluency practice and exit tickets
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	content relevant to age

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	real world problems are connected to children's experiences
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	in the GR and DP sections, there was evidence of connecting to science and to reading; would like to have seen those sections throughout
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	wide variety of names represent many cultures
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	content is appropriate for children
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	mostly covering benchmarks and standards

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	teachers would need to find extra practice for some of the number sense skills
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	2 - Poor Alignment	inconsistent with amount of practice for content; some lessons are not part of standards
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	logical organization
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	other than the wide variety of names in the word problems which may be challenging for some students to read, the

		visuals are interesting and engaging
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	2 - Poor Alignment	some areas not given enough attention or time for practice
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	offer strategies for ELL with each unit; RTI lessons available
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	3 - Fair Alignment	lessons that don't apply to curriculum could be skipped

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	interesting non-fiction info in "launch into math"
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	covers the standards - just a few lessons not belonging to standards
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	clear expectations and mistakes to expect and how to address them
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	examples for each concept
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	reteach and enrich activities
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	students provided a variety of methods for problem solving
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	lessons open with concrete to representational to abstract

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	need for less of a focus on standard algorithm - seems to be prevalent throughout, not allowing for flexibility of strategies
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	need for more examples of flexible strategies - too much emphasis on one way (standard algorithm)
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessments related to benchmarks
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	would like to see more opportunities for formative assessment such as exit tickets
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	evidence of support for ELL and RTI
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	most MTR's evident throughout; would need more for MTR 1.1
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	the content is generally applicable to the grade level benchmarks and support is offered to teachers for facilitating the content

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	not evidence of CRT

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	no evidence of SEL

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

I would not recommend this curriculum due to the absence of specific instructional materials related to ALL BEST standards. While the curriculum presents well and its lessons are aligned to the learning objectives within it, it leaves gaps of standards-based instruction that would need to be supplemented by the teacher. If all standards were addressed, I would consider this curriculum as an option, because the digital component is really well delivered, minus some typographical mistakes.

Standard	Description	Reviewer Rating	Rating Justification
MA.5.AR.1.1	Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	Real-world problems with remainders that must be interpreted
MA.5.AR.1.2	Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.	5 - Very Good Alignment	Mix of fractions, including fractions greater than one. Each lesson contained real-world scenarios.
MA.5.AR.1.3	Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	All division uses unit fractions and calls for justification of real-world scenarios
MA.5.AR.2.1	Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.	5 - Very Good Alignment	Expressions were related to real-world scenarios and called for the translation of descriptions to expressions and expressions to descriptions.
MA.5.AR.2.2	Evaluate multi-step numerical expressions using order of operations.	5 - Very Good Alignment	All examples had multiple steps and required students to justify other's thinking as well and no examples had parentheses that were nested
MA.5.AR.2.3	Determine and explain whether an equation involving any of the four operations is true or false.	3 - Fair Alignment	Examples have questions about true or not true, however, many questions focus on determining which property is being used,

			which is not a clarification in the BEST standard
MA.5.AR.2.4	Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	Scenarios include real-world context and the unknown letter is recognized as a variable. Unknowns and different operations are on either side of the equal sign.
MA.5.AR.3.1	Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.	5 - Very Good Alignment	Scenarios are limited to one of two operations using whole numbers.
MA.5.AR.3.2	Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.	3 - Fair Alignment	Most question met the standard except the question in the explore part of Chapter 17 Lesson 2. The pattern does not match the chart.
MA.5.DP.1.1	Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.	2 - Poor Alignment	Chapter 18, Explore Lesson 1- the table does not match the problem. In addition, fractions with a denominator of 8 are used, which is not within the limits of the BEST standards.
MA.5.DP.1.2	Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.	2 - Poor Alignment	Explanations on how to find mean, mode, and median are aligned; however, there is no mention of range.
MA.5.FR.1.1	Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.	5 - Very Good Alignment	Real-world scenarios used to represent the division of two whole numbers as a fraction.

MA.5.FR.2.1	Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	Examples met all of the benchmark clarifications of the BEST standards.
MA.5.FR.2.2	Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.	2 - Poor Alignment	Examples made use of area model by shading. Mixed numbers were used in comparative lessons only. Students are directed to simplify answers which is not necessary.
MA.5.FR.2.3	When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.	2 - Poor Alignment	Examples in the text call for completing an operation to figure out the relative comparison. The BEST standards state that students should be able to focus on estimation and assessing the reasonableness of answers.
MA.5.FR.2.4	Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.	4 - Good Alignment	Examples met the BEST standards and various question types in Appendix A
MA.5.GR.1.1	Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.	2 - Poor Alignment	Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards.
MA.5.GR.1.2	Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.	2 - Poor Alignment	Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.

MA.5.GR.2.1	Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.	4 - Good Alignment	Questions cover both fractional and decimal side lengths.
MA.5.GR.3.1	Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.	4 - Good Alignment	Materials focus on using and counting unit cubes.
MA.5.GR.3.2	Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.	4 - Good Alignment	Examples focused on the amount of unit cubes in the shape and no questions exceeded two-digit edge lengths.
MA.5.GR.3.3	Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.	4 - Good Alignment	Materials use real-world contexts and composite figures that should be added to solve for volume.
MA.5.GR.4.1	Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.	4 - Good Alignment	Materials fairly instruct how to plot and label points
MA.5.GR.4.2	Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.	5 - Very Good Alignment	Examples use real-world problems and instruct students to interpret the values of point in the context of a situation.
MA.5.M.1.1	Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.	3 - Fair Alignment	Conversion included length, volume, and capacity; however, there were no time conversion present.
MA.5.M.2.1	Solve multi-step real-world problems involving money using decimal notation.	4 - Good Alignment	Materials included multi-step real-world problems involving money and decimal notation.

MA.5.NSO.1.1	Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.	2 - Poor Alignment	While the materials include this standard with examples of decimals to the thousandths, there is inadequate exposure to this connection to whole numbers.
MA.5.NSO.1.2	Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.	4 - Good Alignment	Materials address the standard fully; however, there is limited items on using expanded notation.
MA.5.NSO.1.3	Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.	5 - Very Good Alignment	Materials addressed the standard fully with multiple ways to depict composition and decomposition.
MA.5.NSO.1.4	Plot, order and compare multi-digit numbers with decimals up to the thousandths.	2 - Poor Alignment	Instruction focuses on the use of stacking numbers to compare only. There is no instruction using a scaled number line as indicated in the BEST standards.
MA.5.NSO.1.5	Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.	3 - Fair Alignment	Instruction does meet the standard; however, there is no use of number lines to solidify connections.
MA.5.NSO.2.1	Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.	2 - Poor Alignment	Instruction does not include practice of various algorithms.
MA.5.NSO.2.2	Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.	5 - Very Good Alignment	Multiple representations used.

MA.5.NSO.2.3	Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Meets clarifications of BEST standards
MA.5.NSO.2.4	Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.	5 - Very Good Alignment	Great use of models and pictures.
MA.5.NSO.2.5	Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.	5 - Very Good Alignment	Use of multiple representations
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	4 - Good Alignment	Tasks include analyzing problems in a way that makes sense, asks questions that will help with solving the task, and helps students build perseverance over time.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. 	5 - Very Good Alignment	Tasks include representing problems in multiple ways and build understanding through modeling and using manipulatives.

	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Tasks have students select the most efficient method for themselves to build procedural reliability.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. 	4 - Good Alignment	Tasks have students justifying their answer and making sense of other's work, including error analysis.

	<ul style="list-style-type: none"> Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 	5 - Very Good Alignment	Use of patterns and structure to connect mathematical concepts. Most tasks are decompose into manageable parts.
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	Tasks continually use estimation as a way to assess reasonableness and checking answers.

MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>5 - Very Good Alignment</p>	<p>Tasks a rich with real-world contexts models and methods to understand, represent and solve problems.</p>
ELA.K12.EE.1.1	<p>Cite evidence to explain and justify reasoning.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks are asked to justify answers.</p>
ELA.K12.EE.2.1	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>5 - Very Good Alignment</p>	<p>grade level text appropriate</p>

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	2 - Poor Alignment	Though many standards were aligned, whole chunks of standards were either unaddressed or did not meet the full extent of the standard
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	2 - Poor Alignment	Same as above
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	Though some standards were not fully addressed, the materials themselves were adaptable.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	Though some standards were not fully addressed, the materials that were available did provide sufficient details for students to understand.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Levels of complexity were met through justification, error analysis, and multi-step word problems when called for.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	Some extraneous methods (not in the standards) were too complex for the students abilities at this grade level- specifically in the mean, median, mode, and range chapter
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Levels of treatment meet the time period allowed for teaching

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Sources reflect expert information for the subject
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Primary and secondary sources contribute to the quality of the content
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	3 - Fair Alignment	Most typographical errors were in the digital resources for the student. Those are explained in the Standards section.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Free of bias and contradictions
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content is representative of the discipline.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	A few mistakes noticed in the digital resources where the words and graphics did not match.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	Most content is up-to-date; however, use of the 5E model for every lesson lends itself to a gradual release at times when students should be productively struggling to make sense of problems.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Standards seemed to be interwoven and not necessarily taught in isolation.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	content is appropriate and relevant
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-life scenarios are meaningful and connect to students' lives.

18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Connections made to science.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	No evidence of bias
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No evidence of inhumane actions or beliefs.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	While most standards and benchmarks are covered in the materials, ALL of the them were not.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	In order to meet the full extent of the BEST standards, a teacher would need to prepare additional teaching materials. One example is number lines for plotting, ordering, and comparing decimals.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Components of the curriculum align with each other.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	Logical organization of content. I believe that some content could have been interwoven more.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Narrative and visual engage students

5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Content presented at a pace that allows students to understand
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Supports, interventions, and enrichment were very clear in the Teacher's Edition.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Components of Presentation were good or very good, except for the teacher needing to prep materials for parts of the benchmarks not addressed.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Tasks are relevant to students' everyday lives, which maintains student motivation
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Materials makes use of overarching themes or concepts to teach small chunked material
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Each lesson displayed a clear learning goal.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	The materials lend themselves to successfully becoming more independent in the way that big ideas are chunked into digestible pieces.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Guidance and support is included in the materials for developmental differences and various learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Materials engage the physical and mental activity of students

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Materials include organized activities that are logical extensions the objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	Some strategies were missing from the instructional materials, such as: in multiplication one standard algorithm was addressed instead of a few.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	Most strategies were effective; however some effective strategies were left out (see above and number lines). In addition, a few strategies used seemed confusing (ex: mean, median, mode)
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Assessment strategies did match those of the instructional materials.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	Assessment questions did mirror the instructional materials: however, specific question types like those in the BEST standards were missing.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	UDL strategies evident throughout
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	MTR's can easily be applied to lessons within the curriculum
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	The instructional materials do support learning requirements based on the outcomes set out by this curriculum; however it should be noted that not all of the standards are addressed to their fullest extent.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	Saw no evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evident of CRT of Social Justice
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence of SEL

other materials are available in print format, and many digital materials are downloadable/printable (PDFs can be downloaded for offline use). Core student print materials will also be available via NIMAS files. To see the range of HMH products available from NIMAC, please visit <https://nimac.overdrive.com/ContentInventory>.

Review	Rating	Comments
	3 - Fair Alignment	A great amount of instruction is provided through video. An alternative source of content is not prevalent. Students should be provided multiple options in format.

Reviewer's Name: Mary Moss

Title: HMH Florida's B.E.S.T. Into Math Accelerated 6

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Timothy D. Kanold, PhD; Matthew R. Larson, PhD; Steven J. Leinwand, PhD

Bid ID: 465

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The material's alignment to the standards was not 100%. I liked the teacher guidance, but would like to see more guidance for teachers on implementation of ML routines as it pertains to the task alignment. I would like to see the MTR's addressed more frequently. I liked the student interactive version. Lots of great resources for teachers.

Standard	Description	Reviewer Rating	Rating Justification
MA.6.AR.1.1	Given a mathematical or real-world context, translate written descriptions into algebraic expressions and translate algebraic expressions into written descriptions.	4 - Good Alignment	Variables are not limited to x; Students translating written descriptions into algebraic expressions; Students identifying parts of an algebraic expression.
MA.6.AR.1.2	Translate a real-world written description into an algebraic inequality in the form of  . Represent the inequality on a number line.	4 - Good Alignment	Students translate real-world written description into an algebraic inequality and represent on a number line.
MA.6.AR.1.3	Evaluate algebraic expressions using substitution and order of operations.	4 - Good Alignment	Students evaluate algebraic expressions with integers using substitution and order of operations.
MA.6.AR.1.4	Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	3 - Fair Alignment	Clarification 2: is not represented
MA.6.AR.2.1	Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	2 - Poor Alignment	Pg.281-288 not represented; 311-316 not represented; operations performed with negative rational numbers; Set notation is not used to list numbers.
MA.6.AR.2.2	Write and solve one-step equations in one variable within a mathematical or real-world context using addition and subtraction, where all terms and solutions are integers.	3 - Fair Alignment	Algebra tiles and balances are represented, but no use of Bar diagrams or Number lines.
MA.6.AR.2.3	Write and solve one-step equations in one variable within a mathematical or real-world	3 - Fair Alignment	Algebra tiles and balances used, but no use of bar diagrams.

	context using multiplication and division, where all terms and solutions are integers.		
MA.6.AR.2.4	Determine the unknown decimal or fraction in an equation involving any of the four operations, relating three numbers, with the unknown in any position.	1 - Very Poor/No Alignment	All terms and solutions are not limited to positive rational numbers.
MA.6.AR.3.1	Given a real-world context, write and interpret ratios to show the relative sizes of two quantities using appropriate notation:  , a to b, or a:b where $b \neq 0$.	4 - Good Alignment	Bar models and ratio tables used. No use of number lines.
MA.6.AR.3.2	Given a real-world context, determine a rate for a ratio of quantities with different units. Calculate and interpret the corresponding unit rate.	4 - Good Alignment	Instruction includes using drawings, models and words.
MA.6.AR.3.3	Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.	4 - Good Alignment	Instruction includes using two-column tables.
MA.6.AR.3.4	Apply ratio relationships to solve mathematical and real-world problems involving percentages using the relationship between two quantities.	4 - Good Alignment	Models used to support instruction.
MA.6.AR.3.5	Solve mathematical and real-world problems involving ratios, rates and unit rates, including comparisons, mixtures, ratios of lengths and conversions within the same measurement system.	4 - Good Alignment	PG 351, 359 no alignment; the remainder instruction includes comparisons, mixtures, conversions within the same measurement system.
MA.6.DP.1.1	Recognize and formulate a statistical question that would generate numerical data.	4 - Good Alignment	Instruction includes the understanding of a statistical question and a non-statistical question.
MA.6.DP.1.2	Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.	3 - Fair Alignment	Instruction on Range is missing. Instruction

			includes mean, median, mode.
MA.6.DP.1.3	Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.	3 - Fair Alignment	Instruction does not include vertical representation of box plot. Instruction includes horizontal representation of box plots.
MA.6.DP.1.4	Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.	3 - Fair Alignment	Instruction limited to skewed description. Instruction does not focus on describing data as Normal or Bimodal.
MA.6.DP.1.5	Create box plots and histograms to represent sets of numerical data within real-world contexts.	4 - Good Alignment	601-instruction focuses on histogram; 609-instruction focuses on histogram; instruction focuses on box plots; 643; not aligned.
MA.6.DP.1.6	Given a real-world scenario, determine and describe how changes in data values impact measures of center and variation.	4 - Good Alignment	Instruction includes opportunities for students to collect their own data to create a graphical display.
MA.6.GR.1.1	Extend previous understanding of the coordinate plane to plot rational number ordered pairs in all four quadrants and on both axes. Identify the x- or y-axis as the line of reflection when two ordered pairs have an opposite x- or y-coordinate.	4 - Good Alignment	Instruction builds on previous understanding of coordinate plane, graphing ordered pairs in all four quadrants.
MA.6.GR.1.2	Find distances between ordered pairs, limited to the same x-coordinate or the same y-coordinate, represented on the coordinate plane.	4 - Good Alignment	Instruction focuses on finding distances between ordered pairs, limited to the same x coordinate or the same y coordinate.

MA.6.GR.1.3	Solve mathematical and real-world problems by plotting points on a coordinate plane, including finding the perimeter or area of a rectangle.	4 - Good Alignment	483-No; Instruction includes solving real-world problems, plotting on coordinate plane and finding perimeter and area.
MA.6.GR.2.1	Derive a formula for the area of a right triangle using a rectangle. Apply a formula to find the area of a triangle.	4 - Good Alignment	Instruction meets benchmark..
MA.6.GR.2.2	Solve mathematical and real-world problems involving the area of quadrilaterals and composite figures by decomposing them into triangles or rectangles.	4 - Good Alignment	Instruction meets benchmark.
MA.6.GR.2.3	Solve mathematical and real-world problems involving the volume of right rectangular prisms with positive rational number edge lengths using a visual model and a formula.	4 - Good Alignment	Instruction meets benchmark.
MA.6.GR.2.4	Given a mathematical or real-world context, find the surface area of right rectangular prisms and right rectangular pyramids using the figure's net.	4 - Good Alignment	Instruction meets benchmark language.
MA.6.NSO.1.1	Extend previous understanding of numbers to define rational numbers. Plot, order and compare rational numbers.	4 - Good Alignment	Instruction meets benchmark and clarifications.
MA.6.NSO.1.2	Given a mathematical or real-world context, represent quantities that have opposite direction using rational numbers. Compare them on a number line and explain the meaning of zero within its context.	4 - Good Alignment	Students will compare quantities on a number line and explain the meaning of zero in context.
MA.6.NSO.1.3	Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.	4 - Good Alignment	Students find the absolute value of rational numbers.
MA.6.NSO.1.4	Solve mathematical and real-world problems involving absolute value, including the comparison of absolute value.	4 - Good Alignment	Students solve problems involving absolute value and comparison of absolute value.

MA.6.NSO.2.1	Multiply and divide positive multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	4 - Good Alignment	Students multiply and divide positive multi-digit numbers with decimals to thousandths.
MA.6.NSO.2.2	Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.	3 - Fair Alignment	Instruction limited to multiplication, no division.
MA.6.NSO.2.3	Solve multi-step real-world problems involving any of the four operations with positive multi-digit decimals or positive fractions, including mixed numbers.	4 - Good Alignment	Students solve multi-step with four operations with positive fractions, mixed numbers and positive multi-digit decimals.
MA.6.NSO.3.1	Given a mathematical or real-world context, find the greatest common factor and least common multiple of two whole numbers.	4 - Good Alignment	Students find the GCF and LCM of two whole numbers.
MA.6.NSO.3.2	Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.	2 - Poor Alignment	Does not meet the benchmark
MA.6.NSO.3.3	Evaluate positive rational numbers with natural number exponents.	4 - Good Alignment	Instruction includes evaluating positive rational numbers and integers with natural number exponents.
MA.6.NSO.3.4	Express composite whole numbers as a product of prime factors with natural number exponents.	4 - Good Alignment	Instruction includes expressing composite whole numbers as a product of prime factors with natural number exponents.
MA.6.NSO.3.5	Rewrite positive rational numbers in different but equivalent forms including fractions, terminating decimals and percentages.	4 - Good Alignment	Page 436-442 meet benchmark.

MA.6.NSO.4.1	Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.	4 - Good Alignment	Instruction includes operations with whole numbers to add and subtract integers.
MA.6.NSO.4.2	Apply and extend previous understandings of operations with whole numbers to multiply and divide integers with procedural fluency.	4 - Good Alignment	Instruction includes operations with whole numbers to multiply and divide integers.
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Instruction apply properties of operations to add and subtract linear expressions with rational coefficients.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	4 - Good Alignment	Instruction meets the benchmark.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Instruction includes writing and solving one-step inequalities in one variable within mathematical context algebraically or graphically.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	4 - Good Alignment	Instruction meets benchmark.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Instruction includes how to determine an appropriate measure of center of measure of variation to summarize numerical data.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to	4 - Good Alignment	Instruction meets benchmark.

	make comparisons, interpret results and draw conclusions about the two populations.		
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	3 - Fair Alignment	Instruction partially meets benchmark.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	4 - Good Alignment	Instruction includes applying the formulas to find the areas of trapezoids, parallelograms and rhombi.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	4 - Good Alignment	Instruction includes area of polygons or composite figures by decomposing them into triangles or quadrilaterals.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	2 - Poor Alignment	Instruction does not include whole-number exponents.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Instruction meets benchmark.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Instruction includes solving problems involving any of the

			four operations with rational numbers.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	2 - Poor Alignment	Instruction partially meets benchmark.

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.3.1	Make inferences to support comprehension.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Instruction partially meets benchmark.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Instruction partially meets benchmark.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	43 were level 4 alignment and 10 were level 3 alignment.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	Some of the standards are not fully met in the curriculum.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	The materials are more easily adaptable if using the digital version.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Sufficient details provided for students to understand the significance of topics and events.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	The complexity or difficulty has a fair alignment to the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	The level of treatment of content matches the student abilities and grade level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	The complexity or difficulty of the treatment of the content could be a little rushed for the time period allowed.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The primary and secondary sources cited reflect expert information.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	3 - Fair Alignment	The primary and secondary sources somewhat contribute to the quality of the content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	My review did not encounter any typographical or visual errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Material appeared to be free of bias and contradictions.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Material contained concepts, standards and models used in mathematics.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No inconsistencies or mistakes were discovered during my review.

14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Materials are up-to-date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	The content is presented in appropriate context.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is appropriate and relevant context for intended learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	3 - Fair Alignment	In most situations, content is presented with connections to life in a context that is somewhat meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Materials include interdisciplinary connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Multicultural representations were fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	Materials portrayed people and animals with compassion, sympathy.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	There is good alignment of benchmarks and standards covered in this course.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Many resources for teachers to use to address, supports for students in additional learning and enrichment.

2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	The components align with the curriculum and each other..
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	All materials are consistently and logically organized in the curriculum.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	The visuals engage students in reading as well as listening.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3 - Fair Alignment	The pacing seems to be somewhat fast paced that may not allow all students to understand in the given amount of time.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	There are digital tools to support students to be able to interact with the material, but no feedback after student completes one of the questions.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	There are plenty of presentation materials for this curriculum.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	Materials contain motivational strategies to maintain learner motivation, but they appear to be optional, not necessarily as part of instruction to help with engagement.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	Materials have a fair amount of alignment to teaching a few "Big Ideas".
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Materials contain clear statements of outcomes.

4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Some alignment for guidance and support in materials to help students successfully become independent learners.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	There is fair alignment to support for developmental differences and various learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	The materials engage students with mostly turn and talk collaboration, few opportunities for physical activity.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	Few activities provided .
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	Instructional strategies provided in materials, but appear to be optional.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	The instructional strategies are effective in teaching targeted outcomes.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	3 - Fair Alignment	The materials use few assessment strategies.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	The assessment strategies incorporated in the materials are somewhat effective in assessing learners' performance.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	Only a fair alignment of UDL strategies in this curriculum.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	Only a fair amount of alignment to ELA expectations and MTR standards.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	There is a fair alignment to Learning requirements.
---	--------------------	---

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	Materials did not appear to have any CRT reference.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials did not appear to have any Culturally Responsive Teaching.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials did not appear to have any Social Justice as it relates to CRT.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	Materials did not appear to have any SEL strategies.

Reviewer's Name: Joanna Pitts

Title: HMH Florida's B.E.S.T. Into Math Accelerated 6

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Timothy D. Kanold, PhD; Matthew R. Larson, PhD; Steven J. Leinwand, PhD

Edition: N/A

Grade Level: 6-8

Course: [M/J Grade 6 Accelerated Mathematics](#)

Bid ID: 465

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Strength - Teacher edition book and organized very well. I love the various suggestions for teachers to use for centers, differentiation, group work, prior knowledge check, etc. There are a lot of opportunities for students to practice and teachers to review and assess. The adaptive practice is a great tool to supplement when needed. The material provided makes it easy for teachers to find what they need to teach and easily differentiate lessons when needed without having to find extra materials on

their own. The lessons are not "over loaded" with information, which can cause students to become overwhelmed. The skills are taught by steps and are organized in a way to keep students engaged in the procedures being learned which can help students to understand the procedures better. Weaknesses - I did not find many weaknesses in this material - I would only say more materials for ELL students could be added or at least suggestions to help those students.

Standard	Description	Reviewer Rating	Rating Justification
MA.6.AR.1.1	Given a mathematical or real-world context, translate written descriptions into algebraic expressions and translate algebraic expressions into written descriptions.	4 - Good Alignment	Students are given descriptions and examples of expressions; plenty of practice to write expressions and descriptions
MA.6.AR.1.2	Translate a real-world written description into an algebraic inequality in the form of $\square < \square$. Represent the inequality on a number line.	4 - Good Alignment	Problems are written in various forms, giving students opportunities to see various representations
MA.6.AR.1.3	Evaluate algebraic expressions using substitution and order of operations.	4 - Good Alignment	Lesson follows standards and benchmark clarification
MA.6.AR.1.4	Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	5 - Very Good Alignment	Standard is covered completely; all properties are defined and practiced throughout the lesson.
MA.6.AR.2.1	Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	3 - Fair Alignment	Equations and inequalities are dispersed throughout multiple lessons; the

			skill is connected with other benchmarks easily
MA.6.AR.2.2	Write and solve one-step equations in one variable within a mathematical or real-world context using addition and subtraction, where all terms and solutions are integers.	5 - Very Good Alignment	Benchmark clarifications are followed; various representations of equations are used in multiple lessons. I love how this standard is spread out through multiple lessons and various strategies are used.
MA.6.AR.2.3	Write and solve one-step equations in one variable within a mathematical or real-world context using multiplication and division, where all terms and solutions are integers.	5 - Very Good Alignment	Standard is covered in detail; clarifications are addressed.
MA.6.AR.2.4	Determine the unknown decimal or fraction in an equation involving any of the four operations, relating three numbers, with the unknown in any position.	3 - Fair Alignment	Lessons have more practice with decimals than fractions; only a few fraction addition and subtraction problems found in the lessons.
MA.6.AR.3.1	Given a real-world context, write and interpret ratios to show the relative sizes of two quantities using appropriate notation: □, a to b, or a:b where $b \neq 0$.	4 - Good Alignment	Real world context given; benchmark clarifications are followed.
MA.6.AR.3.2	Given a real-world context, determine a rate for a ratio of quantities with different units. Calculate and interpret the corresponding unit rate.	4 - Good Alignment	Benchmark is covered completely.
MA.6.AR.3.3	Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.	3 - Fair Alignment	Lessons could have more practice with creating tables.

MA.6.AR.3.4	Apply ratio relationships to solve mathematical and real-world problems involving percentages using the relationship between two quantities.	4 - Good Alignment	Lesson instruction follows benchmark clarification
MA.6.AR.3.5	Solve mathematical and real-world problems involving ratios, rates and unit rates, including comparisons, mixtures, ratios of lengths and conversions within the same measurement system.	4 - Good Alignment	Problems given are real world related; various representations are used.
MA.6.DP.1.1	Recognize and formulate a statistical question that would generate numerical data.	4 - Good Alignment	Lesson addresses benchmark accurately.
MA.6.DP.1.2	Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.	4 - Good Alignment	All measures of are covered except for range (range is addressed later in the box plot lesson).
MA.6.DP.1.3	Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.	4 - Good Alignment	Real world problems are used; all parts of box plots are given in examples and practice throughout lessons.
MA.6.DP.1.4	Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.	4 - Good Alignment	Lesson uses both histograms and line plots; all vocabulary is explained and modeled in detail.
MA.6.DP.1.5	Create box plots and histograms to represent sets of numerical data within real-world contexts.	5 - Very Good Alignment	Benchmark is spread out throughout multiple lessons which allow skills to build upon one another.
MA.6.DP.1.6	Given a real-world scenario, determine and describe how changes in data values impact measures of center and variation.	4 - Good Alignment	Module 18 covers all types of measures and diagrams, detailed practice for students to practice description of histograms, box plots, and line plots.

MA.6.GR.1.1	Extend previous understanding of the coordinate plane to plot rational number ordered pairs in all four quadrants and on both axes. Identify the x- or y-axis as the line of reflection when two ordered pairs have an opposite x- or y-coordinate.	4 - Good Alignment	Lesson covers standard appropriately.
MA.6.GR.1.2	Find distances between ordered pairs, limited to the same x-coordinate or the same y-coordinate, represented on the coordinate plane.	4 - Good Alignment	Lesson covers standard; real world problems are given to practice skill
MA.6.GR.1.3	Solve mathematical and real-world problems by plotting points on a coordinate plane, including finding the perimeter or area of a rectangle.	4 - Good Alignment	Benchmark clarifications are covered; instruction and examples are given in detail.
MA.6.GR.2.1	Derive a formula for the area of a right triangle using a rectangle. Apply a formula to find the area of a triangle.	5 - Very Good Alignment	Instruction includes relationship between rectangles and triangles to derive area formula and practice using the formula.
MA.6.GR.2.2	Solve mathematical and real-world problems involving the area of quadrilaterals and composite figures by decomposing them into triangles or rectangles.	4 - Good Alignment	Lesson uses circles, which is a 7th grade standard but this fits in well since this is an advanced course.
MA.6.GR.2.3	Solve mathematical and real-world problems involving the volume of right rectangular prisms with positive rational number edge lengths using a visual model and a formula.	5 - Very Good Alignment	Students first learn how to calculate volume, then next lesson uses this to build onto finding missing dimensions.
MA.6.GR.2.4	Given a mathematical or real-world context, find the surface area of right rectangular prisms and right rectangular pyramids using the figure's net.	4 - Good Alignment	Standard and benchmark clarifications are covered.
MA.6.NSO.1.1	Extend previous understanding of numbers to define rational numbers. Plot, order and compare rational numbers.	4 - Good Alignment	Standard is covered in detail and benchmark

			clarifications are followed.
MA.6.NSO.1.2	Given a mathematical or real-world context, represent quantities that have opposite direction using rational numbers. Compare them on a number line and explain the meaning of zero within its context.	4 - Good Alignment	Benchmark clarification 1 is covered really well throughout the lessons, using different verbal comparison words.
MA.6.NSO.1.3	Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.	3 - Fair Alignment	Absolute values is covered well, but lesson needs various number lines (most of them are horizontal) and more practice with absolute value of rational numbers.
MA.6.NSO.1.4	Solve mathematical and real-world problems involving absolute value, including the comparison of absolute value.	4 - Good Alignment	Real world examples and problems are given.
MA.6.NSO.2.1	Multiply and divide positive multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Lessons build upon one another (multiplication to division), benchmark clarifications are followed.
MA.6.NSO.2.2	Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.	4 - Good Alignment	Lessons use appropriate amount of visual models to connected to standard algorithm, lessons build upon one another to promote understanding of skill.
MA.6.NSO.2.3	Solve multi-step real-world problems involving any of the four operations with positive multi-digit decimals or positive fractions, including mixed numbers.	4 - Good Alignment	Multi step problems are given throughout various lessons to connect skill with other benchmarks as well.

MA.6.NSO.3.1	Given a mathematical or real-world context, find the greatest common factor and least common multiple of two whole numbers.	4 - Good Alignment	Lessons connected GCF and LCM with simplifying fractions.
MA.6.NSO.3.2	Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.	4 - Good Alignment	Benchmark is covered with GCF.
MA.6.NSO.3.3	Evaluate positive rational numbers with natural number exponents.	4 - Good Alignment	Material covers benchmark thoroughly.
MA.6.NSO.3.4	Express composite whole numbers as a product of prime factors with natural number exponents.	4 - Good Alignment	Instruction and material connects prime factorization with other benchmark skills (GCF and distributive property).
MA.6.NSO.3.5	Rewrite positive rational numbers in different but equivalent forms including fractions, terminating decimals and percentages.	4 - Good Alignment	Benchmark is covered.
MA.6.NSO.4.1	Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.	4 - Good Alignment	Benchmark is covered; use of number lines are extensive which is good; more manipulatives and diagrams would be useful for addition and subtraction.
MA.6.NSO.4.2	Apply and extend previous understandings of operations with whole numbers to multiply and divide integers with procedural fluency.	4 - Good Alignment	Good use of models and diagrams in instruction
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Good connections with previously learned skills; benchmark clarifications are addressed.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	3 - Fair Alignment	Benchmark clarification 2 mentions rational

			coefficients; lessons need more practice with fraction coefficients.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Benchmark and clarifications are covered in lessons.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	5 - Very Good Alignment	All types of percent problems are represented throughout various lessons.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	Real world problems are used to solve proportion problems; also link to statistics and probability.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Benchmark clarification includes justification of appropriate measures; more opportunities for this could be added in the lesson.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to make comparisons, interpret results and draw conclusions about the two populations.	5 - Very Good Alignment	All types of representation is given in the lessons for students to compare data.
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Standard is covered well in material.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Standard is covered well in material; different scenarios are given for probability.

MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Instruction includes descriptions found in benchmark clarifications.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Different scenarios are used to practice skill (marbles, rolling die, etc.)
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	4 - Good Alignment	Lesson instructs on experimental and theoretical probability as clarification suggests.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	5 - Very Good Alignment	Lesson instruction relates area of shapes to rectangles and triangles, connecting previous skills with benchmark.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	4 - Good Alignment	Examples given and material used in instruction covers benchmark.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	4 - Good Alignment	Practice problems include exponents, absolute value, and grouping symbols. Practice problems are complex, encouraging students to think above level.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Lessons completely cover standard.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Benchmark is covered in multiple lessons.
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	Tasks throughout lessons encourage students to participate in lesson by explaining

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		or sharing thinking with one another.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	4 - Good Alignment	Most lessons include models and various scenarios for students to think about the problems in multiple ways. Connections are made with previous skills to help students understand the skill.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	4 - Good Alignment	Instruction promotes fluency; students are encouraged to explain methods.

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	4 - Good Alignment	Spark Your Learning section in front of lessons allows students to explain and discuss their thinking with others.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	4 - Good Alignment	Lessons focus on patterns to to solve problems and understand complex problems.

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	4 - Good Alignment	Discussions are encouraged, explanations are encouraged throughout lessons.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	All lessons use real world and relatable problems for students to understand the importance of the skills they are learning.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Every lesson begins with a "Turn and Talk"

			question that encourages students to communicate and justify their answer.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Information and text is on grade level.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Students are encouraged to infer information about each lesson at the beginning, which give them a goal and reason for completed problems presented in the lesson.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Turn and Talk and Learning Mindset sections in the lessons allow for students to reflect on their learning and reasoning; it also encourages them to explain why their discussions are helpful.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Many opportunities given for students to show and explain their steps and work when solving problems
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Variety of questions and discussion topics are given throughout the lessons, which allows students to practice their speaking and writing skills.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary	3 - Fair Alignment	Differentiated options are given throughout teacher edition; more

	for academic success in the content area of Mathematics.		suggestions for ELL learners may be helpful.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Sixth grade, as well as 7th grade standards for advanced courses, are covered well in all lessons.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Text material is appropriate for sixth grade.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Online instruction, textbook material, extra resources are all easily adaptable.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Examples and instruction seems to all be thought out well, Turn and Talk throughout the lessons gives students opportunities to discuss learning together.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Standards are matched in the lessons; students are given complex problems to carry the standards a bit farther when appropriate.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Lessons in text matches complexity for students in advanced courses.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The lessons are thorough and are spaced out in a way that students can understand material in an appropriate timeframe.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The online Adaptive Practice works well with textbook material; students can work at

		their own pace or be assigned extra assignments based on classroom lessons.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Adaptive Practice allows for extra practice; extra materials (such as reteach worksheets) are also available.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	No noticeable errors found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	No bias found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Content is accurate based on standards.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No mistakes found in material or instruction.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Instruction seems up to date with current student learning.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Content matches standards and benchmark
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is appropriate for sixth grade learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content is real world and relatable, giving students and understanding of the importance of what they are learning.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Students are able to make connections with other subject areas within many of the lessons.

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	No bias or unfair information found.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	No inappropriate information found.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Benchmark and standards are clearly covered in the material.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Many suggestions given to support students with extra lessons and activities (some require teachers to make materials, but nothing more than writing problems on index cards or post-its mostly).
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Online practice and activities given in teacher edition match with the main lessons.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Lessons are organized in a way that makes sense to the students.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Lessons are organized and set up in a way that should keep students engaged throughout the lesson.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Lessons are not "overloaded" with information. The instruction is organized well so students can understand content easily.

6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	Students can have access to textbook digitally or in print.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	The textbook seems to be organized well and all information is easy to find and easy to read.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Turn and talk sections allow students to stay engaged. Having discussions with one another can help to motivate them to stay engaged with the instruction.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Modules are organized by Big Ideas, each lesson goes through the concepts that align with the Big Ideas.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Students are encouraged to answer questions either orally or by writing down answers about what they are learning or will be learning about.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	As students work through examples or guided problems, written instruction explains the concept further.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	Teacher edition gives suggestions for activities to support learners who need more instruction.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	Materials engaged students mentally, turn and talk could be considered physical engagement.

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The teacher edition includes many different suggestions to engage students and help those who need more support and extend learning for high achieving learners.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Math problems taught by steps and explained thoroughly
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Instruction is focused on fluency and procedural knowledge.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	End of lessons have test prep
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Students are asked to explain steps in finding answer and show steps; various assessment opportunities are given in the teacher edition
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	Teacher edition provides various differentiated learning suggestions and activities
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	Many opportunities for written and oral communication and group work.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Various learning strategies are used throughout lessons.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	No CRT found in materials
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No CRT found in materials

Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No evidence of CRT found
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	No evidence of this found

A	B	C	D	E												
Bid #	Course	Title	Special Topics (Y/N)	Subject-Specific Standards Score												
1	454	Mathematics-Kindergrarten (Special Topics)	Y (see below)	4.1

Subject: Additional Social Studies Questions

Dear Florida Department of Education:

When will Access Points aligned to the new Civics and Government standards be available? If they will be released before the submission deadline for instructional materials, is there an expectation that publishers must include Access Points for the new CG benchmarks when we submit our programs?

Do you have an estimated date when additional specifications and/or description of the Florida Civic Literacy Examination (FCLE) will be released?

We are very unclear what information is to be provided in the Integrated K-12 Civic Education Correlation document. What items are to be listed and correlated? Is this asking for references to activities/instructional support in teaching-facing materials? Is the expectation that we list the new Civics and Government (CG) benchmarks and correlate teacher-facing materials to them? Do we list other benchmarks that also relate to Rule 6A-1.09411? Or do we list the line items in Rule 6A-1.09411 and correlate to each of those instead?

Also, do we submit an Integrated K-12 Civic Education Correlation with every program, regardless of subject matter, or does it only apply to programs that include the new CG benchmarks and/or other benchmarks that relate to 6A-1.09411?

Thanks very much for your help with this.

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for the appeal template for Algebra 2 with CalcChat® and CalcView® from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached template shows citations in response to the standards scored with below a 3.

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Senior State Adoptions Specialist

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Apologize for additional email.

Just after I hit send, I was notified by my tech team that the other Precalculus text was removed from the link. Initially we had been trying to do this to create less confusion for you, but time in getting this back to you was becoming an issue so I sent as is. Just wanted to follow up because in email below I stated you will see other text.

Thanks again!

Carey

Subject: Cengage Learning Inc. Meeting Request- Appeal Template and access link

Good morning Lauren and others!

To ensure you see the full digital experience, the student edition and teacher edition have been updated. On the template, the link takes you to the State Review site we submitted last July. Here you can click into the text *Precalculus with Limits: A Graphing Approach* to see the corrections. I listed the pathway below to save you some time searching. Because this is the State Review site, you will also see the other Precalculus text, which is on the Adopted List.

Attached is the Appeal Template as well as PDFs of the two pages I sent previously as we were waiting on digital platform update.

Open the link. [direct link](#)

Go to the first two titles "Precalculus with Limits: A Graphing Approach". The first is the Teacher's Edition, the second is the Student Edition.

Go to page 228 and page A31. The search for these pages are in bottom right corner.

On page 228, the problem is 'Example 5- Population Growth'. On page A31, the problem is '11. Sales'.

If you are asked for a UN/PW, use the following. username: adoption.review@florida.com password: Learning

Thanks for your time on this and let us know if there are questions or issues accessing the text!

Carey

Subject: RE: Cengage Learning Inc. Meeting Request

Good afternoon Lauren!

I want to update your team. Our tech engineers are currently collaborating with VitalSource so the student experience will show the new questions. We do not own the VitalSource platform, but the corrected files have been delivered to them for the update as the corrections will need to flow through and be activated by VitalSource. This is of the highest priority and the hope is to have the link tomorrow.

The corrections will be those seen in the google doc and PDFs I had sent previously.

Thanks!

Carey

Logistic Growth Models

Some populations initially have rapid growth, followed by a declining rate of growth, as illustrated by the graph in Figure 3.29. One model for describing this type of growth pattern is the **logistic curve** given by the function

$$y = \frac{a}{1 + be^{-rx}}$$

where y is the population size and x is the time. An example is a bacteria culture that is initially allowed to grow under ideal conditions and then under less favorable conditions that inhibit growth. A logistic growth curve is also called a **sigmoidal curve**.

Figure 3.29 Logistic Curve

EXAMPLE 5 Population Growth

A conservation organization releases 25 Florida panthers into a game preserve. After 2 years, there are 39 panthers in the preserve. An equation that models the population of panthers in the preserve is given by

$$P = \frac{200}{1 + 7e^{-0.264t}}, \quad t \geq 0$$

where P is the total number of panthers in the preserve after t years.

- How many panthers are in the preserve after 5 years?
- When will the population reach 100?

Algebraic Solution

- After 5 years, the number of panthers in the preserve is

$$P = \frac{200}{1 + 7e^{-0.264(5)}} \approx 70.$$

- To determine when the population reaches 100, substitute 100 for P in the population model and then solve for t .

$$100 = \frac{200}{1 + 7e^{-0.264t}}$$

$$1 + 7e^{-0.264t} = 2$$

$$e^{-0.264t} = \frac{1}{7}$$

$$\ln e^{-0.264t} = \ln \frac{1}{7}$$

$$-0.264t = \ln \frac{1}{7}$$

$$t = -\frac{1}{0.264} \ln \frac{1}{7}$$

$$t \approx 7.4$$

So, after about 7.4 years, the population of panthers in the preserve will reach 100.

Graphical Solution

-

Use the *value* feature to estimate that $y \approx 70$ when $x = 5$. So, after 5 years, the number of panthers in the preserve is about 70.

- Use a graphing utility to graph

$$y_1 = \frac{200}{1 + 7e^{-0.264x}} \quad \text{and} \quad y_2 = 100$$

in the same viewing window. Use the *intersect* feature of the graphing utility to find the point of intersection of the graphs, as shown in the figure.

The intersection point occurs near $x \approx 7.4$. So, after about 7.4 years, the population of panthers in the preserve will reach 100.

✓ Checkpoint

In Example 5, when will the population reach 135?

B.1 Exercises

See *CalcChat.com* for tutorial help and worked-out solutions to odd-numbered exercises. For instructions on how to use a graphing utility, see Appendix A.

Vocabulary and Concept Check

In Exercises 1–6, fill in the blank.

- _____ are useful for ordering small sets of numbers by hand.
- A _____ uses a portion of a real number line as its horizontal axis, and the bars are not separated by spaces.
- You can use a _____ to construct a histogram.
- The bars in a _____ can be either vertical or horizontal.
- A _____ represents data graphically as points plotted in a rectangular coordinate system.
- _____ show trends over periods of time.

Procedures and Problem Solving

7. **Economics** The line plot shows a sample of average prices of diesel fuel at 25 fuel stations throughout the United States.

- What price occurred with the greatest frequency?
- What is the range of prices?

8. **Environmental Science** The line plot shows the weights (to the nearest hundred pounds) of municipal waste hauled by a garbage truck in 30 trips to a landfill.

- What weight occurred with the greatest frequency?
- What is the range of weights?

Education In Exercises 9 and 10, use the following scores from an algebra class of 30 students. The scores are for two 25-point quizzes.

Quiz #1 20, 15, 14, 20, 16, 19, 10, 21, 24, 15, 15, 14, 15, 21, 19, 15, 20, 18, 18, 22, 18, 16, 18, 19, 21, 19, 16, 20, 14, 12

Quiz #2 22, 22, 23, 22, 21, 24, 22, 19, 21, 23, 23, 25, 24, 22, 22, 23, 23, 23, 22, 24, 23, 22, 24, 21, 24, 16, 21, 16, 14

9. Construct a line plot for each quiz. For each quiz, which score(s) occurred with the greatest frequency?

10. Explain how you can use the line plots to determine which quiz had the greater mean score without calculating the means.

11. **Sales** The numbers of units sold by 48 sales representatives at a company during the past 3 months are listed below. Construct a frequency distribution and histogram for this data set.

107	162	184	170	177	102
145	141	105	193	167	149
195	127	193	191	150	153
164	167	171	163	141	129
109	171	150	138	100	164
147	153	171	163	118	142
107	144	100	132	153	107
124	162	192	134	187	177

12. **Education** The list shows the numbers of operating public school districts in the 50 states in 2017. Use a frequency distribution and a histogram to organize the data. (*Spreadsheet at LarsonPrecalculus.com*) (*Source: National Education Association*)

Subject: RE: HMH FL Science ISBNs updates

Good afternoon Amber –

The old ISBNs that went on the bid were actually related to an older platform on which the program was never produced. To clarify, at the time we bid our Science program, we developed it for our Ed platform rather than our older Think Central platform. The Think Central ISBNs were put on the bid instead of the Ed ISBNs. However, this wasn't discovered earlier, because the ISBNs involved are for the standalone 5-year online student subscription vs. our Print/Online Student package ISBNs. All of the Districts have so far purchased the package versions vs. the stand-alone. We now, though, have a district who wants to just buy the stand alone subscriptions and thus our discovery of the incorrect ISBNs. Again, we apologize for this error.

If you would like me to update the information in your database, I'm happy to do so. Otherwise, please confirm you will make note of these correct ISBNs. I hope this information answers any questions you had, but please let me know if you need any further clarification.

Thank you,
Tavi

Amber,

We spoke with the publisher (HMH) about the Go Math curriculum. They confirmed there is nothing in the originally printed consumables (workbooks) that was rejected by FDOE. We also asked about the reprinting of Teacher's Editions and when we could expect delivery. Their response is below.

... talked to Kathy with HMH and she said that "they are not planning to reprint the Teacher Editions. They are currently working on a sheet to send out to customers regarding the changes".

How should we proceed? Is FDOE okay with HMH sending a "sheet" to us regarding the changes without making the corrections to the TE's?

Thank you for responding Amber. Please see my other question below

We are only using the consumable workbooks and teacher's editions of the HMH Go Math curriculum. Were there any issues with the consumables, or teacher's editions? The reason I am asking is ... we received the consumables and teacher's editions from HMH about the time FLDOE announced that HMH G to Math was not an approved publisher for math curriculum adoption. If part of the reason for rejecting HMH Go Math included content in the consumable materials and/or teacher's editions, we will need to reorder. If there was nothing wrong with the information in the consumables, we have what we need to begin the next school year.

Cathy and Lauren,

I am forwarding an email sent to me by my elementary principal, which was sent to my principal by a representative from Houghton Mifflin Harcourt. The information received was that FLDOE has now approved HMH's Go Math to be included on the state adopted textbook list. Will you confirm this as true for K-5?

Also, we are only using the consumable workbooks and teacher's editions of the HMH Go Math curriculum. With that being said, were there any issues with the consumables, or were the issues only with the teacher's editions and other materials included in the Go Math curriculum? The reason I am asking is ... we received the consumables from HMH about the time FLDOE announced that HMH Go Math was not an approved publisher for math curriculum adoption. If part of the reason for rejecting HMH Go Math included content in the consumable materials, we will need to reorder. If there was nothing wrong with the information in the consumables, we have what we need to begin the next school year.

I appreciate your help in confirming this for me.

A	B	C	D	E	F
<p>MA.1.GR.1.2</p> <p>Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.</p>	<p>n/a</p>	<p>Reviewer 1 states there are limited examples of sketching 2-D figures.</p>		<p>HMH Response: This is covered on pp.539-540, which has a table where students identify, draw, and give attributes of the shapes. Additionally, on p.521-526, students draw and identify two-dimensional shapes that compose three-dimensional shapes.</p> <p>Reviewer 2 states that "P-521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape."</p> <p>HMH Response: Attributes of 3-D shapes include 2-D shapes, which are included in Lesson 11.5, pp. 521-526. Classifying two- and three-dimensional shapes are found in Lesson 11.1, 11.5, 12.1, and 12.5.</p>	<p>Lesson 12.2 www.hmhco.com/Dimensional</p> <p>Lesson 11.4 https://www.hmhco.com/Dimensional</p>
<p>MA.1.GR.1.3</p> <p>Compose and decompose two- and three- dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.</p>	<p>n/a</p>	<p>Reviewer 2 states Lesson 12.5 uses fourths instead of semi-circles.</p>		<p>HMH Response: The example mentioned uses two quarter circles to make a half circle, which is then composed to make other shapes.</p> <p>Additionally, reviewer 2 writes "There are some good examples of composing and decomposing 2d and 3d shapes . . . it is lacking the much needed vocabulary."</p> <p>HMH Reponse: From a standards perspective, using academic language and vocabulary is not mentioned.</p>	<p>Lesson 12.5 www.hmhco.com/Dimensional</p>
<p>MA.1.GR.1.4</p> <p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>n/a</p>	<p>Reviewer 1 states that "While there are many examples of real- world objects for stand alone figures (balls, cones, cans, etc.), there are only a few real-world examples of items with multiple identifiable geometric figures . . . In most other examples, they are identifying the geometric figures in composed shapes."</p> <p>HMH Response: The composite figures were included; however because of their age appropriateness for Grade 1 students. The approach also meets the standard as it is written.</p>		<p>Reviewer 1 gave us a positive score of 5--a difference of 3 points from Reviewer 2. This reviewer specifically said "Items align to the standard for estimation."</p> <p>Reviewer 2, on the other hand, states that "The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters."</p> <p>HMH Response: The standard is written as follows "Measure the length of an object to the nearest inch <u>or</u> centimeter" so the content as presented meets the standards as they are written.</p> <p>Additionally, reviewer 2 was concerned that non-standard units are used for estimating.</p>	<p>Lesson 11.2 https://www.hmhco.com/Dimensional</p>
<p>MA.1.M.1.1</p> <p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>n/a</p>			<p>HMH Response: The tiles and cubes used for measurement are not non-standard units of measure; the tiles are specified to be 1-inch and the unit cubes are 1 cm; this builds an understanding of the connection between counting and then adding units to measurement. Given how this benchmark and the clarifications, we believe this standard is completely met.</p>	<p>Lessons 14.1 https://www.hmhco.com/Dimensional</p> <p>Lessons 14.2 https://www.hmhco.com/Dimensional</p>

	A	B	C	D	E	F
12	<p>MA.1.M.1.2</p> <p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	n/a	<p>Reviewer 1 gave us a positive score of 5 (a disparity of 3 points with reviewer 2) and stated "Opportunities for 3 items compared directly and also for indirect comparison."</p> <p>Reviewer 2, on the other hand, states that "Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units."</p> <p>HMH Response: Students use comparisons of longer or shorter objects so that they can estimate their lengths. More specifically, in 14.5 students compare objects to order them, as stated by the standard.</p>			<p>Lesson 14.3 https://www.c311-4a93-0</p>
13	<p>MA.1.M.2.1</p> <p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	n/a	<p>Reviewer 2 states that "there is no discussion or use of the vocabulary for digital and analog" within the lessons 15.1-15.4.</p> <p>HMH Response: The benchmark specifies only that students write and tell time and not that they use specified vocabulary. Clocks divided into semicircles is shown in Lesson 15.3.</p>			<p>Lessons 15.1-15.4 https://www.4https://www.b8ed-8b01a</p>
14	<p>MA.1.M.2.2</p> <p>Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.</p>	n/a	<p>Reviewer 1 states that students count but do not simply identify coins--that the resources should "provide images of both sides of coins."</p> <p>HMH Response: Identification of the coin is necessary to count them. This is why both sides of the coin are used throughout this chapter in order to reinforce their ability to identify and count coins.</p>			<p>Lesson 9.1-9.4 https://www.a66d-71cf45</p>
15	<p>MA.1.M.2.3</p> <p>Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.</p>	n/a	<p>Reviewer 1 wrote that the benchmark indicates students should "Find the value of combinations of pennies, nickels and dimes up to one dollar."</p> <p>HMH Response: In the Ready for More on Lesson 9.4, p. 412, the TE guide includes direction on how to guide students to find different ways to make 100 cents. This omission was caught by the internal team and was corrected for implementation.</p>			<p>Lesson 9.3, https://www.a66d-71cf45</p> <p>Lesson 9.4, https://www.4407-a901-d</p>
16	<p>MA.1.NSO.1.2</p> <p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>	n/a	<p>Reviewer 2 stated that "Most of the examples for expanded form was based on ___tens + ___ones when it should be the actual number made by the tens plus the ones (for example 70+5)."</p> <p>HMH Response: There are two places where this is covered in the content --both Lessons 2.5 and 2.9. It shows that students write numbers in 3 forms, ex., 4 tens + 7 ones, 40 + 7, and 47.</p>			<p>Lesson 2.5, https://www.fef0597-808</p>
17	<p>MA.1.NSO.2.4</p> <p>Explore the addition of a two-digit number and a one-digit number with sums to 100.</p>	n/a	<p>Reviewer 2 writes "Examples from p.279-296 were not rigorous enough to cover this standard, as most were two single digit numbers. The SE p.303-308 did a much better job covering this material."</p> <p>HMH Response: As noted by Reviewer 1, there is good coverage in Chapter 6 which include problem with a two-digit addended greater than 20 and varying representations including models, number lines and place value.</p>			<p>Lesson 6.9 https://www.8-1dff-48ec</p>
18

1	COURSE #5012070_HMH Florida's B.E.S.T. Go Math! Grade 5			
2	BID 459			
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	Publisher Correction	
4	<p>MA.5.AR.2.3</p> <p>Determine and explain whether an equation involving any of the four operations is true or false.</p>	n/a	<p>Reviewer 2 stated "many questions focus on determining which property is being used, which is not a clarification in the BEST standard.</p> <p>HMH Response: this standard is not taught in isolation and taught throughout Grade 5 in equations; with properties, without, and in other formats. Examples of usage are 2.1, p.42; 3.3, p.98; 3.5, p. 110; 11.1 p. 379, and 11.2 p.386.</p>	<p>Lesson 2.1, https://www.illustration_of_math.com/revision_of_math</p> <p>Lesson 3.3, https://www.fcpscustom_content.com/</p> <p>Lesson 11.1, https://www.illustration_of_math.com/correlation</p>
5	<p>MA.5.AR.3.2</p> <p>Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.</p>	n/a	<p>Reviewer 1 states that instruction is "asking student to write a rule for a given graph."</p> <p>HMH Response: This is an instructional sequence in which students write the ordered pairs to find the rule. This is an example of using standards together and not in isolation (with 5.DP.1.1).</p> <p>Reviewer 2 stated "Most question met the standard except the question in the explore part of Chapter 17 Lesson 2. The pattern does not match the chart."</p> <p>HMH Response: The pattern and the chart match on the aforementioned example.</p> <p>Reviewer 2 states that the pattern does not match the table in 18.1 Explore, p.631.</p> <p>HMH Response: No table was used in the Explore section.</p> <p>Reviewer 2 also states that fractional measurements of 1/8 are use.</p> <p>HMH Response: All line plots show only halves, thirds or fourths as measures--calculations, within questions may include other fractions.</p>	<p>Lesson 17.2, https://www.illustration_of_math.com/correlation</p> <p>Lesson 18.1, https://www.illustration_of_math.com/rel_Data.pdf</p>
6	<p>MA.5.DP.1.1</p> <p>Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.</p>	n/a	<p>HMH Response: All line plots show only halves, thirds or fourths as measures--calculations, within questions may include other fractions.</p> <p>While Reviewer 1 rated this benchmark coverage a full 3 points higher, noting that the benchmark coverage includes "instruction on balancing point", Reviewer 2 states "Explanations on how to find mean, mode, and median are aligned; however there is no mention of range."</p> <p>HMH Response: In the content, range is explicitly defined and demonstrated in Lesson 18.2, p.635 and Lesson 18.5, p. 655.</p>	<p>Lesson 18.2, https://www.illustration_of_math.com/rel_Data.pdf</p>
7	<p>MA.5.DP.1.2</p> <p>Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.</p>	n/a	<p>While Reviewer 1 rated this benchmark coverage a full 3 points higher, noting that coverage includes a "use of models," Reviewer 2 states that mixed numbers were "used in comparative lessons only. Students are directed to simplify answers which is not necessary."</p> <p>HMH Response: Extensive mixed number multiplication is shown in Lesson 9.4, p.357 which is a comparison lesson; comparison is essential to multiplying mixed numbers for estimating products and assessing reasonableness. Also performed with area models in Lesson 13.2, p. 453. Both are examples of not showing the standards in isolation (with 5.GR.2.1).</p>	<p>Lesson 9.4, https://www.illustration_of_math.com/rel_Data.pdf</p> <p>Lesson 13.2, https://www.illustration_of_math.com/rel_Data.pdf</p>
8	<p>MA.5.FR.2.2</p> <p>Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.</p>	n/a	<p>While Reviewer 1 rated this benchmark coverage a full 3 points higher, noting that coverage includes a "use of models," Reviewer 2 states that mixed numbers were "used in comparative lessons only. Students are directed to simplify answers which is not necessary."</p> <p>HMH Response: Extensive mixed number multiplication is shown in Lesson 9.4, p.357 which is a comparison lesson; comparison is essential to multiplying mixed numbers for estimating products and assessing reasonableness. Also performed with area models in Lesson 13.2, p. 453. Both are examples of not showing the standards in isolation (with 5.GR.2.1).</p>	<p>Lesson 9.4, https://www.illustration_of_math.com/rel_Data.pdf</p> <p>Lesson 13.2, https://www.illustration_of_math.com/rel_Data.pdf</p>

	A	B	C	D
<p>When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.</p> <p>MA.5.FR.2.3</p>	n/a	<p>Reviewer 2 states that "Examples in the text call for completing an operation to figure out the relative comparison. The BEST standards state that students should be able to focus on estimation and assessing the reasonableness of answers."</p> <p>HMH Response: Students learn estimation and assessing the reasonableness of answers by comparing products using the whole number part of the mixed number. In Lessons 10.3 and 10.4, students use models to compare the size of the product to the size of a factor when multiplying fractions. Students then determine that when you find a part of a part, the product will be less than either part. Finally, students understand that when a fraction is multiplied by a number greater than 1, the product will always be greater than the fraction. Building reasoning about the size of a product will help students determine if their solutions are reasonable or help them make reasonable estimates.</p>	<p>Reviewer 1 stated this benchmark coverage 2 points higher, noting "lots of practice with triangles and quadrilaterals."</p> <p>Reviewer 2, on the other hand, states that "Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards."</p> <p>HMH Response: Polygons shown are review material, and are also used in 3D prisms; such as the right pentagonal prism on p.491.</p> <p>Reviewer 1 rated this benchmark coverage a full 3 points higher at a 5, noting that there is "adequate coverage of 3-d figures."</p> <p>Reviewer 2 states "Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres."</p> <p>HMH Response: Pentagonal prism with equal sides and angles that are shown are right prisms, which are included in the benchmarks, p. 491.</p> <p>Reviewer 1 states "Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?"</p> <p>HMH Response: This shows benchmarks NOT taught in isolation and is an example of a problem-solving lessons that demonstrates how to solve benchmarks 5.FR.2.2 and 5.FR.2.3. Examples of fractional and decimal side lengths in Lessons 13.1, p.447-450 and 13.2, p.453-456</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, noting "Questions cover both fractional and decimal side lengths."</p> <p>Reviewer 1 states that in Lesson 17.3, p.591, students write the ordered pairs to find the rule.</p> <p>HMH Response: This is also an example of using standards together and not in isolation. (with 5.GR.4.1 and 5.GR.4.2)</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, notes "Materials fairly instruct how to plot and label points."</p> <p>Reviewer 2 states: Conversion included length, volume, and capacity; however, there were no time conversion present."</p> <p>HMH Response: One simple time conversions is included in 16.3, p.563, but this absence was noted in the errata process and will be corrected on the next printing.</p>	<p>Lessons 10.3 https://www_correlation</p>
<p>Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.</p> <p>MA.5.GR.1.1</p>	n/a	<p>Reviewer 1 stated this benchmark coverage 2 points higher, noting "lots of practice with triangles and quadrilaterals."</p> <p>Reviewer 2, on the other hand, states that "Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards."</p> <p>HMH Response: Polygons shown are review material, and are also used in 3D prisms; such as the right pentagonal prism on p.491.</p> <p>Reviewer 1 rated this benchmark coverage a full 3 points higher at a 5, noting that there is "adequate coverage of 3-d figures."</p> <p>Reviewer 2 states "Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres."</p> <p>HMH Response: Pentagonal prism with equal sides and angles that are shown are right prisms, which are included in the benchmarks, p. 491.</p> <p>Reviewer 1 states "Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?"</p> <p>HMH Response: This shows benchmarks NOT taught in isolation and is an example of a problem-solving lessons that demonstrates how to solve benchmarks 5.FR.2.2 and 5.FR.2.3. (with 5.GR.4.1 and 5.GR.4.2)</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, notes "Materials fairly instruct how to plot and label points."</p> <p>Reviewer 2 states: Conversion included length, volume, and capacity; however, there were no time conversion present."</p> <p>HMH Response: One simple time conversions is included in 16.3, p.563, but this absence was noted in the errata process and will be corrected on the next printing.</p>	<p>Lesson 17.3 https://www_om_correlat</p>	<p>Lesson 17.3 https://www_om_correlat</p>
<p>Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.</p> <p>MA.5.GR.4.1</p>	n/a	<p>Reviewer 1 stated this benchmark coverage 2 points higher, noting "lots of practice with triangles and quadrilaterals."</p> <p>Reviewer 2, on the other hand, states that "Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards."</p> <p>HMH Response: Polygons shown are review material, and are also used in 3D prisms; such as the right pentagonal prism on p.491.</p> <p>Reviewer 1 rated this benchmark coverage a full 3 points higher at a 5, noting that there is "adequate coverage of 3-d figures."</p> <p>Reviewer 2 states "Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres."</p> <p>HMH Response: Pentagonal prism with equal sides and angles that are shown are right prisms, which are included in the benchmarks, p. 491.</p> <p>Reviewer 1 states "Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?"</p> <p>HMH Response: This shows benchmarks NOT taught in isolation and is an example of a problem-solving lessons that demonstrates how to solve benchmarks 5.FR.2.2 and 5.FR.2.3. Examples of fractional and decimal side lengths in Lessons 13.1, p.447-450 and 13.2, p.453-456</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, noting "Questions cover both fractional and decimal side lengths."</p> <p>Reviewer 1 states that in Lesson 17.3, p.591, students write the ordered pairs to find the rule.</p> <p>HMH Response: This is also an example of using standards together and not in isolation. (with 5.GR.4.1 and 5.GR.4.2)</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, notes "Materials fairly instruct how to plot and label points."</p> <p>Reviewer 2 states: Conversion included length, volume, and capacity; however, there were no time conversion present."</p> <p>HMH Response: One simple time conversions is included in 16.3, p.563, but this absence was noted in the errata process and will be corrected on the next printing.</p>	<p>Lesson 16.3 https://www_f?custom_co</p>	<p>Lesson 16.3 https://www_f?custom_co</p>
<p>Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.</p> <p>MA.5.M.1.1</p>	n/a	<p>Reviewer 1 stated this benchmark coverage 2 points higher, noting "lots of practice with triangles and quadrilaterals."</p> <p>Reviewer 2, on the other hand, states that "Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards."</p> <p>HMH Response: Polygons shown are review material, and are also used in 3D prisms; such as the right pentagonal prism on p.491.</p> <p>Reviewer 1 rated this benchmark coverage a full 3 points higher at a 5, noting that there is "adequate coverage of 3-d figures."</p> <p>Reviewer 2 states "Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres."</p> <p>HMH Response: Pentagonal prism with equal sides and angles that are shown are right prisms, which are included in the benchmarks, p. 491.</p> <p>Reviewer 1 states "Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?"</p> <p>HMH Response: This shows benchmarks NOT taught in isolation and is an example of a problem-solving lessons that demonstrates how to solve benchmarks 5.FR.2.2 and 5.FR.2.3. Examples of fractional and decimal side lengths in Lessons 13.1, p.447-450 and 13.2, p.453-456</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, noting "Questions cover both fractional and decimal side lengths."</p> <p>Reviewer 1 states that in Lesson 17.3, p.591, students write the ordered pairs to find the rule.</p> <p>HMH Response: This is also an example of using standards together and not in isolation. (with 5.GR.4.1 and 5.GR.4.2)</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, notes "Materials fairly instruct how to plot and label points."</p> <p>Reviewer 2 states: Conversion included length, volume, and capacity; however, there were no time conversion present."</p> <p>HMH Response: One simple time conversions is included in 16.3, p.563, but this absence was noted in the errata process and will be corrected on the next printing.</p>	<p>Lesson 16.3 https://www_f?custom_co</p>	<p>Lesson 16.3 https://www_f?custom_co</p>

	A	B	C	D
15	<p>MA.5.NSO.1.1</p> <p>Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.</p>	n/a	<p>Reviewer 1 stated that there is "not enough attention to this standard, only addressed in one lesson."</p> <p>HMH Response: More examples exist with other standards, as shown in Lesson 3.1, p. 83, Lesson 5.1, p. 149 and Lesson 7.1 p. 219</p>	<p>Lesson 3.1, https://www.f2?custom_id</p> <p>Lesson 5.1, https://www.f2?custom_id</p> <p>Lesson 7.1, https://www.f2?custom_id</p>
16	<p>MA.5.NSO.1.2</p> <p>Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.</p>	n/a	<p>While Reviewer 2 rated this benchmark coverage 2 points higher, giving it a 4, noting "Materials address the standard fully."</p> <p>HMH Response: There is limited items on using expanded notation," Reviewer 1 stated "only one lesson for a concept that requires more attention." However, there are further examples in Lessons 3.1, 3.2, and 3.3 of using multiple forms of numbers.</p>	<p>Lessons 3.1 https://www.f2?custom_id</p>
17	<p>MA.5.NSO.1.3</p> <p>Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.</p>	n/a	<p>While Reviewer 2 rated this benchmark coverage 3 full points higher with a 5, stating "Materials addressed the standard fully with multiple ways to depict composition and decomposition," Reviewer 1 stated that there is "not enough content to support this concept."</p> <p>HMH Response: Decimal composition and decomposition are covered in Lesson 3.2 and 3.3 with models, by drawing, in place value tables, and by relating it to fractions.</p>	<p>Lesson 3.1, https://www.f2?custom_id</p>
18	<p>MA.5.NSO.1.5</p> <p>Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.</p>	n/a	<p>Reviewer 2 stated that "Instruction does meet the standard."</p> <p>HMH Response: This benchmark is completely covered in Lesson 3.5, p.107 and there is no expectation in the benchmark or clarifications that number lines should be used</p>	<p>Lesson 3.5, https://www.f2?custom_id</p>
19	<p>MA.5.NSO.2.1</p> <p>Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.</p>	n/a	<p>Reviewer 1 states "Instruction does not include practice of various algorithms".</p> <p>HMH Response: Lesson 1.1 covers this standard completely as there is not a need to have various algorithms according to the benchmark. That being said, Lessons 2.5 and 2.6 bar models are used as an instructional method as well.</p>	<p>Lesson 1.1, https://www.f2?custom_id</p> <p>Lessons 2.5 https://www.f2?custom_id</p> <p>Lesson 2.6 https://www.f2?custom_id</p>
20	<p>MA.5.NSO.2.2</p> <p>Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.</p>	n/a	<p>While Reviewer 1 rated this benchmark coverage 3 points higher with a 5, and noted "Multiple representations used," Reviewer 2 stated that "good use of partial quotient initially then it leans into long division standard algorithm for the rest of the division practice."</p> <p>HMH Response: Other methods are used, such as quick pictures, in Lesson 1.2, partial quotients in Lesson 1.3, the standard algorithm in Lesson 2.1, interpreting remainders and writing them as fractions in Lesson 2.2, and adjust quotients in Lesson 2.3.</p>	<p>Lesson 1.1 https://www.f2?custom_id</p> <p>Lesson 2.1 https://www.f2?custom_id</p> <p>Lesson 2.2 https://www.f2?custom_id</p> <p>Lesson 2.3 https://www.f2?custom_id</p>

1	COURSE #1205020_HMH Florida's B.E.S.T. Intro Math Accelerated Grade 6				
2	BID <u>465</u>				
3	Standard Below 3 (if applicable)	Special Topic Concern (if applicable)	Publisher Correction		
4	n/a	n/a	Overall HMH Response: These standards are also found in Grade 6 and 7 of HMH Florida's Best Into Math--both grades which were approved for the adoption list. This program contains the same content as Grade 6 and part of Grade 7. While Reviewer 2 scored the content a 5 and stated, "standard is covered completely; all properties are defined and practiced throughout the lesson." Reviewer 1, on the other hand, stated that Clarification 1 (Associative, Commutative, Distributive applied to generating equivalent algebraic expressions) is "not represented". HMH Response: In the lesson interleaf for Lesson 8.4 on page 261A, the Associative Property of Addition, Associative Property of Multiplication, Commutative Property of Addition, Commutative Property of Multiplication, and Distributive Property are all listed as review vocabulary. These properties are all defined, with examples, in a table on SE page 262. Additionally, tasks 2 and 3 on pages 262-263 of the SE require students to list the property used in each step of simplifying an expression. On Your Own problems 3, 6, 14, 15, and 19 on pages 264-265, More Practice/Homework problems 6 and 7 on page 267, and Florida Test Prep problem 10 require students to justify their work using properties.		Lesson 8.4, p.262 https://www.jmhco.com/FL_SE_M08_Numerical.c5cd-11ec-b2c9-4d07eb4
5	MA.6.AR.1.4 Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	n/a	Reviewer 1 stated that this standard was not represented because set notation was not used. HMH Response: Set notation is not a requirement of the benchmark, shown in the example, or mentioned in the clarification. Integers are used in the language of the benchmark. Equations - On page 284, Task 4 parts E and F use substitution for a single value. Check Understanding problems 2-4 on page 284 use substitution for a single value. On Your Own problems 10-15 on page 285 have students substitute multiple values. On Your Own problems 16-17 on page 286 have students substitute multiple values. More Practice/Homework problems 7-10 on page 287 have students substitute for a single value. Page 285 problem 11 is the only one involving rational numbers and not just integers. Lessons 9.2 and 9.3 have students use what they learned in lesson 9.1 to check their solutions to equations. Inequalities - Lesson 10.1 (pages 322-325 and 327) covers the benchmark for inequalities.		Lesson 8.4, pp. 283 https://www.jmhco.com/FL_SE_M08_Numerical.c5cd-11ec-b2c9-4d07eb4 Lessons 9.2-9.3, pp. 285-287 https://www.jmhco.com/FL_SE_M09_Solve.Prob.11ec-8e6f-ab8d0d29724 Lesson 10.1, pp. 322-327 https://www.jmhco.com/FL_SE_M10_Inequalities.41d7a4ec30a4
6	MA.6.AR.2.1 Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	n/a

10	<p>MA.6.AR.3.3 Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.</p>	n/a	<p>Reviewer 2 stated that "lessons could have more practice with creating tables."</p> <p>HMH Response: Students complete tables in Check Understanding problem 1 on page 362, Four problems in On Your Own on pages 363-364, and three problems in More Practice/Homework on page 365.</p>	<p>Lesson 11.2, pp. 363-364 https://www.hmhco.com/FL_SE_M11_Ratio_and_Problem_1 Lesson 9.2 p. 292 balance</p>	<p>Lesson 11.2, pp. 363-364 https://www.hmhco.com/FL_SE_M11_Ratio_and_Problem_1 Lesson 9.2 p. 292 balance</p>
11	<p>MA.6.DP.1.2 Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.</p>	n/a	<p>Reviewer 1 stated that "range is missing."</p> <p>HMH Response: Range is covered in lesson 19.3 (pages 637-642)</p>	<p>Lesson 19.3, pp. 637-642 https://www.hmhco.com/FL_SE_M19_Variability Lesson 19.3, pp. 637-642</p>	<p>Lesson 19.3, pp. 637-642 https://www.hmhco.com/FL_SE_M19_Variability Lesson 19.3, pp. 637-642</p>

	A	B	C	D	E
12	<p>MA.6.DP.1.3 Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.</p> <p>MA.6.DP.1.4 Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.</p>	n/a	<p>Reviewer 1 stated that "instruction does not include vertical representation of box plot." Instruction includes horizontal representation of box plots.</p> <p>HMH Response: Vertical box plots are not mentioned anywhere in the benchmark, example, or clarification. We fully cover the benchmark and clarification in lessons 19.2 (pages 629-636) and 19.4 (pages 643-648).</p> <p>Reviewer 1 stated that "instruction limited to skewed description . . . and does not focus on describing data as Normal or Bimodal."</p> <p>HMH Response: Instruction does not focus on describing data as Normal or Bimodal. The benchmark does not mention Bimodal or Normal. The clarification (Appendix C) does not contain Bimodal or Normal in the glossary. We fully cover the benchmark in lessons 19.1 (pages 621-628) and 19.4 (pages 643-648).</p>	Lesson 19.1, pp. 621-628 https://www.jmhco.com/FL_SE_M19_Variability111ec-9255-675fd21d9f1	
13	<p>MA.6.NSO.1.3 Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.</p>	n/a	<p>Reviewer 2 stated that "lessons needs various number lines . . . and more practice with absolute value of rational numbers."</p> <p>HMH Response: Lesson 1.3 contains three horizontal number lines (pages 19, 20, and 21) and two vertical number lines (pages 20 and 22). Students explicitly find the absolute value of a number eight times in the tasks on pages 20 and 21 and eight practice problems on pages 22 and 23. Students must find absolute value in the process of solving other problems in the tasks and practice problems. The benchmark and clarifications are fully covered in lesson 1.3.</p>	Lesson 1.3, pp.19-24 https://www.jmhco.com/FL_SE_M01_Rational_886f-039c40bar052	
14	<p>MA.6.NSO.2.2 Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.</p>	n/a	<p>Reviewer 1 stated that "instruction was limited to multiplication, no division."</p> <p>HMH Response: Fraction multiplication is covered in Module 2, lessons 2.1-2.3. Fraction division is covered in Module 3, lessons 3.1-3.3. Lesson 3.4 allows students to practice a mixture of multiplication and division of fractions. Modules 2 and 3 fully cover the benchmark and clarification. (Screenshots of TOC for Modules 2 and 3 provided.)</p>	Lessons 2.1-2.3, pp. 43-48 https://www.jmhco.com/FL_SE_M02_Fraction_9f3b4a237db7	Lessons 3.1-3.4, pp.67-74 https://www.jmhco.com/FL_SE_M03_Fraction_33fe954f0ade
15	<p>MA.6.NSO.3.2 Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.</p>	n/a	<p>While Reviewer 2 rated us a 4 and he noted "benchmark is covered with GCF"; Reviewer 1 stated that the benchmark was not met, with no specific evidence.</p> <p>HMH Response: Lesson 1.4 Task 2 on page 26 covers GCF and reminds students of the Distributive Property. The end of Task 2 has students re-write $24 + 16$ as $8(3) + 8(2) = 8(3 + 2)$. This is also practiced in problems on pages 31-32. The benchmark and clarification are fully covered in lesson 1.4.</p>	Lesson 1.4, p.25-32 https://www.jmhco.com/FL_SE_M01_Rational_886f-039c40bar052	
16	<p>MA.7.AR.1.2 Determine whether two linear expressions are equivalent.</p>	n/a	<p>Reviewer 2 stated that lessons "need more practice with fraction coefficients".</p> <p>HMH Response: This benchmark is covered in Lessons 8.4 and 8.5. Most of the use of rational coefficients is used in Lesson 8.5, when students are more familiar and confident in working with linear expressions.</p> <p>Lesson 8.4: Rational coefficients are used in Task 2 on page 262 (1 fractional), Check Understanding problem 2 on page 263, On Your Own problems 12, 16, 24, and 28 on pages 264-266 (3 fractional), and More Practice/Homework problem 8 (fractional) on page 267.</p> <p>Lesson 8.5: Rational coefficients are used in Task 1 on page 269 (fractional), Task 2 on page 270, Check Understanding problem 4 (fractional) on page 271, On Your Own problems 5, 10, 13, 16, 17, 18, 19, 20, 23, 26, and 30 on pages 272-274 (7 fractional), More Practice/Homework problems 1, 6, and 8 on page 275 (2 fractional), and Florida Test Prep problems 12 and 13 on page 276 (1 fractional).</p>	Lessons 8.4 and 8.5, pp.262-274 https://www.jmhco.com/FL_SE_M08_Numerical_c5cd-11ec-b269-4d076b4

Good morning ladies,

Please see the three attached spreadsheets for standards review from HMM. I spot checked the links and they all seem to take you straight to the standard/material in question.

Please make sure you are logged into HMM's online portal on your browser prior to opening any of the links on the spreadsheet.

Here is the info to log in:

FL Evaluator Account:

<https://www.hmhco.com/ui/login/?connection=91005680>

Teacher Username: FL-DemoTeacher1

Teacher Password: TheBEST1!

If you have any issues with any links, I am happy to assist.

Thank you again for all your hard work in getting these moving!

Thanks,

Lauren

Subject: RE: HMM initial appeal call

Dear Lauren,

Thank you for providing us with appeal template. On behalf of HMM, I am sending you the completed Appeal files for the following:

HMM Florida's B.E.S.T. Go Math! Grade K
HMM Florida's B.E.S.T. Go Math! Grade 1
HMM Florida's B.E.S.T. Go Math! Grade 2
HMM Florida's B.E.S.T. Go Math! Grade 5
HMM Florida's B.E.S.T. Into Math Accelerated Grade 6

Please note that within our documents, there are links to our platform or to a Box folder to demonstrate proof of change or proof of evidence within the content. Please be sure that your team is logged into our Ed platform in order to view the linked material. Below is our generic log-in credentials for your convenience.

Subject: HMH initial appeal call

This message originated from outside your organization

Hi Tavi,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Tuesday, April 26th, at 11:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time HMH has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Tuesday.

HMH - appeal
Tue, Apr 26, 2022 11:00 AM - 11:30 AM (EDT)

Please join my meeting from your computer, tablet or smartphone.
<https://meet.goto.com/547145269>

You can also dial in using your phone.
United States (Toll Free): [1 877 309 2073](tel:18773092073)

	A	B	C	D	E	F
1	COURSE #5012030_HMH Florida's B.E.S.T. Go Math Grade 1					
2	BID 455					
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	Publisher Correction			
4	n/a	n/a	<p>HMH Overall Response: After collecting and analyzing all the scores provided by the reviewers on Grade 1, we believe there was an error in calculations with the scores and that this grade did in fact score a 4. Nonetheless, we have provided responses to any standards where at least one reviewer scored us a 3 or below.</p> <p>Reviewer 1 rates us a 5 here and indicates that " Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends."</p> <p>Reviewer 2s, on the other hand, states that there were too many terms in the equations. They indicated that "The Listen and Draw on p.477, #13 on p.480, and #7 on 481 contain 5 terms, which does not align to the standard and clarifications."</p> <p>HMH Response: There are no more than 3 terms used on one side of an equation. On p. 477; p. 480 and 481 each have only a single equation that shows two terms on one side of the equation and three terms on the other.</p> <p>Additionally, Reviewer 2 wrote that the lesson does "not focus on the meaning of the equal sign."</p> <p>HMH Response: The Math Talk on p. 477 addresses the meaning of the equal sign.</p>			
5	MA.1.AR.2.2 Determine and explain if equations involving addition or subtraction are true or false.	n/a	<p>Reviewer 2 writes that Clarification 1 calls for students to use "tally marks to skip counting by 5's."</p> <p>HMH Response: Clarification 1 states that students should connect tally marks to counting by 5s, but does not state the expectation that students should skip count tally marks.</p>			
6	MA.1.DP.1.1 Collect data into categories and represent the results using tally marks or pictographs.	n/a	<p>Reviewer 2 states that the content contains "informal language" and "is missing critical academic vocabulary as mentioned in the clarifications."</p> <p>HMH Response: the "critical" academic vocabulary is not specifically stated by the FL standards and we use age-appropriate language.</p>			
7	MA.1.GR.1.1 Identify, compare and sort two- and three- dimensional figures based on their defining attributes. Figures are limited to circles, semi- circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	n/a	<p>Lesson 16.3: Lesson 16.4: https://www.4701-822a-4 Lesson 11.1: Lesson 11.5: https://www.Dimensional 12.1: Classif 12.2: Attrib www.hmhc0 Dimensional</p>

4	n/a			
5	<p>pp. 477-481 Equal and Not Equal, focuses on True/False and operations on both sides of the equation.</p> <p>.hnhco.com/content/math/go_math/g1/student/pdf/G1_GoMath_EN_FL_SE_C10_Addition_and_Subtraction_Relationships.pdf?custom_correlation_id=905db34-6ce4-44e1-9b5e-235f2ff145f0</p>			
6	<p>pp. 673-678 Tally Marks</p> <p>pp.679-685 Make Tally Marks</p> <p>.hnhco.com/content/math/go_math/g1/student/pdf/G1_GoMath_EN_FL_SE_C16_Graphing.pdf?custom_correlation_id=f6e6549e-4187-44b3d09850e</p> <p>pp. 497-500 Three Dimensional Shapes</p> <p>pp. 500-503 Two-Dimensional Shapes on Three-Dimensional Shapes</p> <p>.hnhco.com/content/math/go_math/g1/student/pdf/G1_GoMath_EN_FL_SE_C11_Geometry_Three-Solids.pdf?custom_correlation_id=9ab7c363-029b-41e0-9e51-89f9a6384f6b</p> <p>Identify and Sort Two-Dimensional Shapes, 533-536</p> <p>Attributes of Two-Dimensional Shapes, 539-542</p> <p>.hnhco.com/content/math/go_math/g1/student/pdf/G1_GoMath_EN_FL_SE_C12_Geometry_Two-Dimensional Shapes.pdf?custom_correlation_id=c3ed929b-6a32-4bca-bc8c-a9ee272db71f</p>			
7				

A	B	C	D	E	F
<p>MA.1.GR.1.2</p> <p>Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.</p>	<p>n/a</p>	<p>Reviewer 1 states there are limited examples of sketching 2-D figures.</p>		<p>HMH Response: This is covered on pp.539-540, which has a table where students identify, draw, and give attributes of the shapes. Additionally, on p.521-526, students draw and identify two-dimensional shapes that compose three-dimensional shapes.</p> <p>Reviewer 2 states that "P-521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape."</p> <p>HMH Response: Attributes of 3-D shapes include 2-D shapes, which are included in Lesson 11.5, pp. 521-526. Classifying two- and three-dimensional shapes are found in Lesson 11.1, 11.5, 12.1, and 12.5.</p>	<p>Lesson 12.2 www.hmhco.com/Dimensional</p> <p>Lesson 11.4 https://www.hmhco.com/Dimensional</p>
<p>MA.1.GR.1.3</p> <p>Compose and decompose two- and three- dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.</p>	<p>n/a</p>	<p>Reviewer 2 states Lesson 12.5 uses fourths instead of semi-circles.</p>		<p>HMH Response: The example mentioned uses two quarter circles to make a half circle, which is then composed to make other shapes.</p> <p>Additionally, reviewer 2 writes "There are some good examples of composing and decomposing 2d and 3d shapes . . . it is lacking the much needed vocabulary."</p> <p>HMH Reponse: From a standards perspective, using academic language and vocabulary is not mentioned.</p>	<p>Lesson 12.5 www.hmhco.com/Dimensional</p>
<p>MA.1.GR.1.4</p> <p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>n/a</p>	<p>Reviewer 1 states that "While there are many examples of real- world objects for stand alone figures (balls, cones, cans, etc.), there are only a few real-world examples of items with multiple identifiable geometric figures . . . In most other examples, they are identifying the geometric figures in composed shapes."</p> <p>HMH Response: The composite figures were included; however because of their age appropriateness for Grade 1 students. The approach also meets the standard as it is written.</p>		<p>Reviewer 1 gave us a positive score of 5--a difference of 3 points from Reviewer 2. This reviewer specifically said "Items align to the standard for estimation."</p> <p>Reviewer 2, on the other hand, states that "The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters."</p> <p>HMH Response: The standard is written as follows "Measure the length of an object to the nearest inch <u>or</u> centimeter" so the content as presented meets the standards as they are written.</p> <p>Additionally, reviewer 2 was concerned that non-standard units are used for estimating.</p>	<p>Lesson 11.2 https://www.hmhco.com/Dimensional</p>
<p>MA.1.M.1.1</p> <p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>n/a</p>			<p>HMH Response: The tiles and cubes used for measurement are not non-standard units of measure; the tiles are specified to be 1-inch and the unit cubes are 1 cm; this builds an understanding of the connection between counting and then adding units to measurement. Given how this benchmark and the clarifications, we believe this standard is completely met.</p>	<p>Lessons 14.1 https://www.hmhco.com/Dimensional</p> <p>Lessons 14.2 https://www.hmhco.com/Dimensional</p>

	A	B	C	D	E	F
12	<p>MA.1.M.1.2</p> <p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	n/a	<p>Reviewer 1 gave us a positive score of 5 (a disparity of 3 points with reviewer 2) and stated "Opportunities for 3 items compared directly and also for indirect comparison."</p> <p>Reviewer 2, on the other hand, states that "Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units."</p> <p>HMH Response: Students use comparisons of longer or shorter objects so that they can estimate their lengths. More specifically, in 14.5 students compare objects to order them, as stated by the standard.</p>			<p>Lesson 14.3 https://www.c311-4a93-00</p>
13	<p>MA.1.M.2.1</p> <p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	n/a	<p>Reviewer 2 states that "there is no discussion or use of the vocabulary for digital and analog" within the lessons 15.1-15.4.</p> <p>HMH Response: The benchmark specifies only that students write and tell time and not that they use specified vocabulary. Clocks divided into semicircles is shown in Lesson 15.3.</p>			<p>Lessons 15.1-15.4 https://www.illustrativemathematics.org/HS/index.html https://www.illustrativemathematics.org/HS/15.1-15.4</p>
14	<p>MA.1.M.2.2</p> <p>Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.</p>	n/a	<p>Reviewer 1 states that students count but do not simply identify coins--that the resources should "provide images of both sides of coins."</p> <p>HMH Response: Identification of the coin is necessary to count them. This is why both sides of the coin are used throughout this chapter in order to reinforce their ability to identify and count coins.</p>			<p>Lesson 9.1-9.4 https://www.illustrativemathematics.org/HS/index.html https://www.illustrativemathematics.org/HS/9.1-9.4</p>
15	<p>MA.1.M.2.3</p> <p>Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.</p>	n/a	<p>Reviewer 1 wrote that the benchmark indicates students should "Find the value of combinations of pennies, nickels and dimes up to one dollar."</p> <p>HMH Response: In the Ready for More on Lesson 9.4, p. 412, the TE guide includes direction on how to guide students to find different ways to make 100 cents. This omission was caught by the internal team and was corrected for implementation.</p>			<p>Lesson 9.3, 9.4 https://www.illustrativemathematics.org/HS/index.html https://www.illustrativemathematics.org/HS/9.3,9.4</p>
16	<p>MA.1.NSO.1.2</p> <p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>	n/a	<p>Reviewer 2 stated that "Most of the examples for expanded form was based on ___tens + ___ones when it should be the actual number made by the tens plus the ___ones (for example 70+5)."</p> <p>HMH Response: There are two places where this is covered in the content --both Lessons 2.5 and 2.9. It shows that students write numbers in 3 forms, ex., 4 tens + 7 ones, 40 + 7, and 47.</p>			<p>Lesson 2.5, 2.9 https://www.illustrativemathematics.org/HS/index.html https://www.illustrativemathematics.org/HS/2.5,2.9</p>
17	<p>MA.1.NSO.2.4</p> <p>Explore the addition of a two-digit number and a one-digit number with sums to 100.</p>	n/a	<p>Reviewer 2 writes "Examples from p.279-296 were not rigorous enough to cover this standard, as most were two single digit numbers. The SE p.303-308 did a much better job covering this material."</p> <p>HMH Response: As noted by Reviewer 1, there is good coverage in Chapter 6 which include problem with a two-digit addended greater than 20 and varying representations including models, number lines and place value.</p>			<p>Lesson 6.9 https://www.illustrativemathematics.org/HS/index.html https://www.illustrativemathematics.org/HS/6.9</p>
18						

	A	B	C	D
1	COURSE #5012070_HMH Florida's B.E.S.T. Go Math! Grade 5			
2	BID 459			
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	Publisher Correction	
4	<p>MA.5.AR.2.3</p> <p>Determine and explain whether an equation involving any of the four operations is true or false.</p>	n/a	<p>Reviewer 2 stated "many questions focus on determining which property is being used, which is not a clarification in the BEST standard.</p> <p>HMH Response: this standard is not taught in isolation and taught throughout Grade 5 in equations; with properties, without, and in other formats. Examples of usage are 2.1, p.42; 3.3, p.98; 3.5, p. 110; 11.1 p. 379, and 11.2 p.386.</p>	<p>Lesson 2.1, https://www.illustration_of_math.com/revision_of_division_of_numbers.html</p> <p>Lesson 3.3, https://www.fcpscustom.com/f?custom_code=1111</p> <p>Lesson 11.1, https://www.illustration_of_math.com/correlation.html</p>
5	<p>MA.5.AR.3.2</p> <p>Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.</p>	n/a	<p>Reviewer 1 states that instruction is "asking student to write a rule for a given graph."</p> <p>HMH Response: This is an instructional sequence in which students write the ordered pairs to find the rule. This is an example of using standards together and not in isolation (with 5.DP.1.1).</p> <p>Reviewer 2 stated "Most question met the standard except the question in the explore part of Chapter 17 Lesson 2. The pattern does not match the chart."</p> <p>HMH Response: The pattern and the chart match on the aforementioned example.</p> <p>Reviewer 2 states that the pattern does not match the table in 18.1 Explore, p.631.</p> <p>HMH Response: No table was used in the Explore section.</p> <p>Reviewer 2 also states that fractional measurements of 1/8 are use.</p> <p>HMH Response: All line plots show only halves, thirds or fourths as measures--calculations, within questions may include other fractions.</p>	<p>Lesson 17.2, https://www.illustration_of_math.com/correlation.html</p> <p>Lesson 18.1, https://www.illustration_of_math.com/rel_Data.pdf</p>
6	<p>MA.5.DP.1.1</p> <p>Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.</p>	n/a	<p>HMH Response: All line plots show only halves, thirds or fourths as measures--calculations, within questions may include other fractions.</p> <p>While Reviewer 1 rated this benchmark coverage a full 3 points higher, noting that the benchmark coverage includes "instruction on balancing point", Reviewer 2 states "Explanations on how to find mean, mode, and median are aligned; however there is no mention of range."</p> <p>HMH Response: In the content, range is explicitly defined and demonstrated in Lesson18.2, p.635 and Lesson 18.5, p. 655.</p>	<p>Lesson 18.2, https://www.illustration_of_math.com/rel_Data.pdf</p>
7	<p>MA.5.DP.1.2</p> <p>Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.</p>	n/a	<p>While Reviewer 1 rated this benchmark coverage a full 3 points higher, noting that coverage includes a "use of models," Reviewer 2 states that mixed numbers were "used in comparative lessons only. Students are directed to simplify answers which is not necessary."</p> <p>HMH Response: Extensive mixed number multiplication is shown in Lesson 9.4, p.357 which is a comparison lesson; comparison is essential to multiplying mixed numbers for estimating products and assessing reasonableness. Also performed with area models in Lesson 13.2, p. 453. Both are examples of not showing the standards in isolation (with 5.GR.2.1).</p>	<p>Lesson 9.4, https://www.illustration_of_math.com/Mixed_Numbers.html</p> <p>Lesson 13.2, https://www.illustration_of_math.com/angles_with_angles.html</p>
8	<p>MA.5.FR.2.2</p> <p>Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.</p>	n/a

A	B	C	D
<p>MA.5.FR.2.3</p> <p>When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.</p>	n/a	<p>Reviewer 2 states that "Examples in the text call for completing an operation to figure out the relative comparison. The BEST standards state that students should be able to focus on estimation and assessing the reasonableness of answers."</p> <p>HMH Response: Students learn estimation and assessing the reasonableness of answers by comparing products using the whole number part of the mixed number. In Lessons 10.3 and 10.4, students use models to compare the size of the product to the size of a factor when multiplying fractions. Students then determine that when you find a part of a part, the product will be less than either part. Finally, students understand that when a fraction is multiplied by a number greater than 1, the product will always be greater than the fraction. Building reasoning about the size of a product will help students determine if their solutions are reasonable or help them make reasonable estimates.</p>	<p>Lessons 10.3 https://www.illustrativemathematics.org/HS/index.html correlation</p>
<p>MA.5.GR.1.1</p> <p>Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.</p>	n/a	<p>Reviewer 1 stated this benchmark coverage 2 points higher, noting "lots of practice with triangles and quadrilaterals."</p> <p>Reviewer 2, on the other hand, states that "Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards."</p> <p>HMH Response: Polygons shown are review material, and are also used in 3D prisms; such as the right pentagonal prism on p.491.</p> <p>Reviewer 1 rated this benchmark coverage a full 3 points higher at a 5, noting that there is "adequate coverage of 3-d figures."</p>	<p>Lesson 14.4 https://www.illustrativemathematics.org/HS/index.html correlation</p>
<p>MA.5.GR.1.2</p> <p>Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.</p>	n/a	<p>Reviewer 2 states "Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres."</p> <p>HMH Response: Pentagonal prism with equal sides and angles that are shown are right prisms, which are included in the benchmarks, p. 491.</p> <p>Reviewer 1 states "Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?"</p>	<p>Lesson 10.5 https://www.illustrativemathematics.org/HS/index.html correlation</p>
<p>MA.5.GR.2.1</p> <p>Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.</p>	n/a	<p>HMH Response: This shows benchmarks NOT taught in isolation and is an example of a problem-solving lessons that demonstrates how to solve benchmarks 5.FR.2.2 and 5.FR.2.3. Examples of fractional and decimal side lengths in Lessons 13.1, p.447-450 and 13.2, p.453-456</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, noting "Questions cover both fractional and decimal side lengths."</p> <p>Reviewer 1 states that in Lesson 17.3, p.591, students write the ordered pairs to find the rule.</p>	<p>Lesson 13.1 https://www.illustrativemathematics.org/HS/index.html angles_with</p>
<p>MA.5.GR.4.1</p> <p>Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.</p>	n/a	<p>HMH Response: This is also an example of using standards together and not in isolation. (with 5.GR.4.1 and 5.GR.4.2)</p> <p>Reviewer 2 rated this benchmark coverage 2 points higher with a 4, notes "Materials fairly instruct how to plot and label points."</p> <p>Reviewer 2 states: Conversion included length, volume, and capacity; however, there were no time conversion present."</p>	<p>Lesson 17.3 https://www.illustrativemathematics.org/HS/index.html om_correlat</p>
<p>MA.5.M.1.1</p> <p>Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.</p>	n/a	<p>HMH Response: One simple time conversions is included in 16.3, p.563, but this absence was noted in the errata process and will be corrected on the next printing.</p>	<p>Lesson 16.3 https://www.illustrativemathematics.org/HS/index.html f?custom_co</p>

	A	B	C	D
15	<p>MA.5.NSO.1.1</p> <p>Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.</p>	n/a	<p>Reviewer 1 stated that there is "not enough attention to this standard, only addressed in one lesson."</p> <p>HMH Response: More examples exist with other standards, as shown in Lesson 3.1, p. 83, Lesson 5.1, p. 149 and Lesson 7.1 p. 219</p>	<p>Lesson 3.1, https://www.fcusom.com</p> <p>Lesson 5.1, https://www.fcusom.com</p> <p>Lesson 7.1, https://www.fcusom.com</p>
16	<p>MA.5.NSO.1.2</p> <p>Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.</p>	n/a	<p>While Reviewer 2 rated this benchmark coverage 2 points higher, giving it a 4, noting "Materials address the standard fully."</p> <p>HMH Response: There is limited items on using expanded notation," Reviewer 1 stated "only one lesson for a concept that requires more attention." However, there are further examples in Lessons 3.1, 3.2, and 3.3 of using multiple forms of numbers.</p>	<p>Lessons 3.1 https://www.fcusom.com</p>
17	<p>MA.5.NSO.1.3</p> <p>Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.</p>	n/a	<p>While Reviewer 2 rated this benchmark coverage 3 full points higher with a 5, stating "Materials addressed the standard fully with multiple ways to depict composition and decomposition," Reviewer 1 stated that there is "not enough content to support this concept."</p> <p>HMH Response: Decimal composition and decomposition are covered in Lesson 3.2 and 3.3 with models, by drawing, in place value tables, and by relating it to fractions.</p>	<p>Lesson 3.1, https://www.fcusom.com</p>
18	<p>MA.5.NSO.1.5</p> <p>Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.</p>	n/a	<p>Reviewer 2 stated that "Instruction does meet the standard."</p> <p>HMH Response: This benchmark is completely covered in Lesson 3.5, p.107 and there is no expectation in the benchmark or clarifications that number lines should be used</p>	<p>Lesson 3.5, https://www.fcusom.com</p>
19	<p>MA.5.NSO.2.1</p> <p>Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.</p>	n/a	<p>Reviewer 1 states "Instruction does not include practice of various algorithms".</p> <p>HMH Response: Lesson 1.1 covers this standard completely as there is not a need to have various algorithms according to the benchmark. That being said, Lessons 2.5 and 2.6 bar models are used as an instructional method as well.</p>	<p>Lesson 1.1, https://www.fcusom.com</p> <p>Lesson 2.5 https://www.fcusom.com</p> <p>Lesson 2.6 https://www.fcusom.com</p>
20	<p>MA.5.NSO.2.2</p> <p>Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.</p>	n/a	<p>While Reviewer 1 rated this benchmark coverage 3 points higher with a 5, and noted "Multiple representations used," Reviewer 2 stated that "good use of partial quotient initially then it leans into long division standard algorithm for the rest of the division practice."</p> <p>HMH Response: Other methods are used, such as quick pictures, in Lesson 1.2, partial quotients in Lesson 1.3, the standard algorithm in Lesson 2.1, interpreting remainders and writing them as fractions in Lesson 2.2, and adjust quotients in Lesson 2.3.</p>	<p>Lesson 1.1 https://www.fcusom.com</p> <p>Lesson 2.1 https://www.fcusom.com</p> <p>Lesson 2.2 https://www.fcusom.com</p> <p>Lesson 2.3 https://www.fcusom.com</p>

	A	B	C	D	E
1	COURSE #1205020_HMH Florida's B.E.S.T. Intro Math Accelerated Grade 6				
2	BID <u>465</u>				
3	Standard Below 3 (if applicable)	Special Topic Concern (if applicable)	Publisher Correction		
4	n/a	n/a	Overall HMH Response: These standards are also found in Grade 6 and 7 of HMH Florida's Best Into Math--both grades which were approved for the adoption list. This program contains the same content as Grade 6 and part of Grade 7. While Reviewer 2 scored the content a 5 and stated, "standard is covered completely; all properties are defined and practiced throughout the lesson." Reviewer 1, on the other hand, stated that Clarification 1 (Associative, Commutative, Distributive applied to generating equivalent algebraic expressions) is "not represented". HMH Response: In the lesson interleaf for Lesson 8.4 on page 261A, the Associative Property of Addition, Associative Property of Multiplication, Commutative Property of Addition, Commutative Property of Multiplication, and Distributive Property are all listed as review vocabulary. These properties are all defined, with examples, in a table on SE page 262. Additionally, tasks 2 and 3 on pages 262-263 of the SE require students to list the property used in each step of simplifying an expression. On Your Own problems 3, 6, 14, 15, and 19 on pages 264-265, More Practice/Homework problems 6 and 7 on page 267, and Florida Test Prep problem 10 require students to justify their work using properties.		Lesson 8.4, p.262 https://www.jmhco.com/FL_SE_M08_Numerical/c5cd-11ec-b2c9-4d07eb4
5	MA.6.AR.1.4 Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	n/a	Reviewer 1 stated that this standard was not represented because set notation was not used. HMH Response: Set notation is not a requirement of the benchmark, shown in the example, or mentioned in the clarification. Integers are used in the language of the benchmark. Equations - On page 284, Task 4 parts E and F use substitution for a single value. Check Understanding problems 2-4 on page 284 use substitution for a single value. On Your Own problems 10-15 on page 285 have students substitute multiple values. On Your Own problems 16-17 on page 286 have students substitute multiple values. More Practice/Homework problems 7-10 on page 287 have students substitute for a single value. Page 285 problem 11 is the only one involving rational numbers and not just integers. Lessons 9.2 and 9.3 have students use what they learned in lesson 9.1 to check their solutions to equations. Inequalities - Lesson 10.1 (pages 322-325 and 327) covers the benchmark for inequalities.		Lesson 8.4, pp. 283 https://www.jmhco.com/FL_SE_M08_Numerical/c5cd-11ec-b2c9-4d07eb4 Lessons 9.2-9.3, pp. 285-287 https://www.jmhco.com/FL_SE_M09_Solve_Problem/11ec-8e6f-ab8d0d29724 Lesson 10.1, pp. 322-325 https://www.jmhco.com/FL_SE_M10_Inequalities/41d7a4ec30a4
6	MA.6.AR.2.1 Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	n/a

12	<p>MA.6.DP.1.3 Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.</p>	n/a	<p>Reviewer 1 stated that "instruction does not include vertical representation of box plot." Instruction includes horizontal representation of box plots. HMH Response: Vertical box plots are not mentioned anywhere in the benchmark, example, or clarification. We fully cover the benchmark and clarification in lessons 19.2 (pages 629-636) and 19.4 (pages 643-648).</p>	Lesson 19.2, pp. 629-636 https://www.jmhco.com/FL_SE_M19_Variability111ec-9255-675fd21d9f1	
13	<p>MA.6.DP.1.4 Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.</p>	n/a	<p>Reviewer 1 stated that "instruction limited to skewed description . . . and does not focus on describing data as Normal or Bimodal." HMH Response: Instruction does not focus on describing data as Normal or Bimodal. The benchmark does not mention Bimodal or Normal. The clarification (Appendix C) does not contain Bimodal or Normal in the glossary. We fully cover the benchmark in lessons 19.1 (pages 621-628) and 19.4 (pages 643-648).</p>	Lesson 19.1, pp. 621-628 https://www.jmhco.com/FL_SE_M19_Variability111ec-9255-675fd21d9f1	
14	<p>MA.6.NSO.1.3 Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.</p>	n/a	<p>Reviewer 2 stated that "lessons needs various number lines . . . and more practice with absolute value of rational numbers." HMH Response: Lesson 1.3 contains three horizontal number lines (pages 19, 20, and 21) and two vertical number lines (pages 20 and 22). Students explicitly find the absolute value of a number eight times in the tasks on pages 20 and 21 and eight practice problems on pages 22 and 23. Students must find absolute value in the process of solving other problems in the tasks and practice problems. The benchmark and clarifications are fully covered in lesson 1.3.</p>	Lesson 1.3, pp.19-24 https://www.jmhco.com/FL_SE_M01_Rational_18e6f-039c-40bar052	Lessons 2.1-2.3, pp. 43-48 https://www.jmhco.com/FL_SE_M02_Fraction_19f3b4d237db7
15	<p>MA.6.NSO.2.2 Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.</p>	n/a	<p>Reviewer 1 stated that "instruction was limited to multiplication, no division." HMH Response: Fraction multiplication is covered in Module 2, lessons 2.1-2.3. Fraction division is covered in Module 3, lessons 3.1-3.3. Lesson 3.4 allows students to practice a mixture of multiplication and division of fractions. Modules 2 and 3 fully cover the benchmark and clarification. (Screenshots of TOC for Modules 2 and 3 provided.)</p>	Lessons 3.1-3.4, pp.67-74 https://www.jmhco.com/FL_SE_M03_Fraction_133fe954f0ade	
16	<p>MA.6.NSO.3.2 Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.</p>	n/a	<p>While Reviewer 2 rated us a 4 and he noted "benchmark is covered with GCF"; Reviewer 1 stated that the benchmark was not met, with no specific evidence. HMH Response: Lesson 1.4 Task 2 on page 26 covers GCF and reminds students of the Distributive Property. The end of Task 2 has students re-write $24 + 16$ as $8(3) + 8(2) = 8(3 + 2)$. This is also practiced in problems on pages 31-32. The benchmark and clarification are fully covered in lesson 1.4.</p>	Lesson 1.4, p.25-32 https://www.jmhco.com/FL_SE_M01_Rational_18e6f-039c-40bar052	
17	<p>MA.7.AR.1.2 Determine whether two linear expressions are equivalent.</p>	n/a	<p>Reviewer 2 stated that lessons "need more practice with fraction coefficients". HMH Response: This benchmark is covered in Lessons 8.4 and 8.5. Most of the use of rational coefficients is used in Lesson 8.5, when students are more familiar and confident in working with linear expressions. Lesson 8.4: Rational coefficients are used in Task 2 on page 262 (1 fractional), Check Understanding problem 2 on page 263, On Your Own problems 12, 16, 24, and 28 on pages 264-266 (3 fractional), and More Practice/Homework problem 8 (fractional) on page 267. Lesson 8.5: Rational coefficients are used in Task 1 on page 269 (fractional), Task 2 on page 270, Check Understanding problem 4 (fractional) on page 271, On Your Own problems 5, 10, 13, 16, 17, 18, 19, 20, 23, 26, and 30 on pages 272-274 (7 fractional), More Practice/Homework problems 1, 6, and 8 on page 275 (2 fractional), and Florida Test Prep problems 12 and 13 on page 276 (1 fractional).</p>	Lessons 8.4 and 8.5, pp. 262-276 https://www.jmhco.com/FL_SE_M08_Numerical_c5cd-11ec-b2c9-4d07e64	

	A	B	C	D	E
18	<p>MA.7.DP.2.4</p> <p>Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.</p>	n/a	<p>Reviewer 1 states the "instruction partially meets benchmark", but does not provide evidence.</p> <p>HMH Response: This benchmark and the clarifications are fully covered in lesson 21.2. Benchmark: Lesson 21.2 Task 3 on page 702, On Your Own problems 4 and 11 on pages 703-704, More Practice/Homework problem 5 on page 705, and Florida Test Prep problem 9 on page 706 have students conduct an experiment and compare experimental and theoretical probabilities.</p> <p>Clarification 1: Fractions, decimals, and percentages are used throughout lesson 21.1, with several instances, like Task 2 Part E on page 701, where students must write there answer in all three forms.</p> <p>Clarification 2: Task 3 Part C page 702, On Your Own problem 4 page 703, and More Practice/Homework problem 5 on page 705</p> <p>Clarification 3: Coins, die (called a number cube), cards (non-standard deck page 703), marbles, and spinners are all used in lesson 21.2.</p>	<p>Lesson 21.2, pp. 699-706 https://www.jmhco.com/FL_SE_M21_Probability193f214c8caa</p>	
19	<p>MA.7.NSO.2.1</p> <p>Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.</p>	n/a	<p>Reviewer 1 states that "instruction does not include whole-number exponents."</p> <p>HMH Response: This benchmark and clarification are fully covered, not including exponents, in Lessons 6.4 and 6.6. Exponents are taught in Lesson 7.1. Whole-number exponents, in the context of using order of operations, appear in Lesson 8.1 on pages 239-244.</p>	<p>Lesson 6.4, pp.191-198 https://www.jmhco.com/FL_SE_M06_Fluency_W11ec-8810-c1b44a02086</p> <p>Lesson 7.1, pp. 217-222 https://www.jmhco.com/FL_SE_M07_Numerical2bb966416fd7</p> <p>Lesson 8.1, pp. 237-244 https://www.jmhco.com/FL_SE_M08_Numericalc5cd-11ec-b2c9-4d07eb4</p>

Subject: RE: HMH initial appeal call

Dear Lauren,

Thank you for providing us with appeal template. On behalf of HMH, I am sending you the completed Appeal files for the following:

HMH Florida's B.E.S.T. Go Math! Grade K
HMH Florida's B.E.S.T. Go Math! Grade 1
HMH Florida's B.E.S.T. Go Math! Grade 2
HMH Florida's B.E.S.T. Go Math! Grade 5
HMH Florida's B.E.S.T. Into Math Accelerated Grade 6

Please note that within our documents, there are links to our platform or to a Box folder to demonstrate proof of change or proof of evidence within the content. Please be sure that your team is logged into our Ed platform in order to view the linked material. Below is our generic log-in credentials for your convenience.

FL Evaluator Account:

This message originated from outside your organization

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Tuesday, April 26th, at 11:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time HMH has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Tuesday.

HMH - appeal
Tue, Apr 26, 2022 11:00 AM - 11:30 AM (EDT)

Please join my meeting from your computer, tablet or smartphone.

	A	B	C	D	E	F
1	COURSE #5012030_HMH Florida's B.E.S.T. Go Math Grade 1					
2	BID 455					
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	Publisher Correction			
4	n/a	n/a	<p>HMH Overall Response: After collecting and analyzing all the scores provided by the reviewers on Grade 1, we believe there was an error in calculations with the scores and that this grade did in fact score a 4. Nonetheless, we have provided responses to any standards where at least one reviewer scored us a 3 or below.</p> <p>Reviewer 1 rates us a 5 here and indicates that " Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends."</p> <p>Reviewer 2s, on the other hand, states that there were too many terms in the equations. They indicated that "The Listen and Draw on p.477, #13 on p.480, and #7 on 481 contain 5 terms, which does not align to the standard and clarifications."</p> <p>HMH Response: There are no more than 3 terms used on one side of an equation. On p. 477; p. 480 and 481 each have only a single equation that shows two terms on one side of the equation and three terms on the other.</p> <p>Additionally, Reviewer 2 wrote that the lesson does "not focus on the meaning of the equal sign."</p> <p>HMH Response: The Math Talk on p. 477 addresses the meaning of the equal sign.</p>			
5	MA.1.AR.2.2 Determine and explain if equations involving addition or subtraction are true or false.	n/a	<p>Reviewer 2 writes that Clarification 1 calls for students to use "tally marks to skip counting by 5's."</p> <p>HMH Response: Clarification 1 states that students should connect tally marks to counting by 5s, but does not state the expectation that students should skip count tally marks.</p>			
6	MA.1.DP.1.1 Collect data into categories and represent the results using tally marks or pictographs.	n/a	<p>Reviewer 2 states that the content contains "informal language" and "is missing critical academic vocabulary as mentioned in the clarifications."</p> <p>HMH Response: the "critical" academic vocabulary is not specifically stated by the FL standards and we use age-appropriate language.</p>			
7	MA.1.GR.1.1 Identify, compare and sort two- and three- dimensional figures based on their defining attributes. Figures are limited to circles, semi- circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	n/a	<p>Lesson 16.3: Lesson 16.4: https://www.4701-822a-4 Lesson 11.1: Lesson 11.5: https://www.Dimensional 12.1: Classif 12.2: Attrib www.hmhc0 Dimensional</p>

7			

	A	B	C	D	E	F
8	<p>MA.1.GR.1.2</p> <p>Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.</p>	n/a	<p>Reviewer 1 states there are limited examples of sketching 2-D figures.</p>		<p>HMH Response: This is covered on pp.539-540, which has a table where students identify, draw, and give attributes of the shapes. Additionally, on p.521-526, students draw and identify two-dimensional shapes that compose three-dimensional shapes.</p> <p>Reviewer 2 states that "P-521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape."</p> <p>HMH Response: Attributes of 3-D shapes include 2-D shapes, which are included in Lesson 11.5, pp. 521-526. Classifying two- and three-dimensional shapes are found in Lesson 11.1, 11.5, 12.1, and 12.5.</p>	<p>Lesson 12.2 www.hmhco.com/Dimensional</p> <p>Lesson 11.4 https://www.hmhco.com/Dimensional</p>
9	<p>MA.1.GR.1.3</p> <p>Compose and decompose two- and three- dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.</p>	n/a	<p>Reviewer 2 states Lesson 12.5 uses fourths instead of semi-circles.</p>		<p>HMH Response: The example mentioned uses two quarter circles to make a half circle, which is then composed to make other shapes.</p> <p>Additionally, reviewer 2 writes "There are some good examples of composing and decomposing 2d and 3d shapes . . . it is lacking the much needed vocabulary."</p> <p>HMH Reponse: From a standards perspective, using academic language and vocabulary is not mentioned.</p>	<p>Lesson 12.5 www.hmhco.com/Dimensional</p>
10	<p>MA.1.GR.1.4</p> <p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	n/a	<p>Reviewer 1 states that "While there are many examples of real- world objects for stand alone figures (balls, cones, cans, etc.), there are only a few real-world examples of items with multiple identifiable geometric figures . . . In most other examples, they are identifying the geometric figures in composed shapes."</p> <p>HMH Response: The composite figures were included; however because of their age appropriateness for Grade 1 students. The approach also meets the standard as it is written.</p>		<p>Reviewer 1 gave us a positive score of 5--a difference of 3 points from Reviewer 2. This reviewer specifically said "Items align to the standard for estimation."</p> <p>Reviewer 2, on the other hand, states that "The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters."</p> <p>HMH Response: The standard is written as follows "Measure the length of an object to the nearest inch <u>or</u> centimeter" so the content as presented meets the standards as they are written.</p> <p>Additionally, reviewer 2 was concerned that non-standard units are used for estimating.</p>	<p>Lesson 11.2 https://www.hmhco.com/Dimensional</p>
11	<p>MA.1.M.1.1</p> <p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	n/a	<p>Reviewer 1 gave us a positive score of 5--a difference of 3 points from Reviewer 2. This reviewer specifically said "Items align to the standard for estimation."</p> <p>Reviewer 2, on the other hand, states that "The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters."</p> <p>HMH Response: The standard is written as follows "Measure the length of an object to the nearest inch <u>or</u> centimeter" so the content as presented meets the standards as they are written.</p> <p>Additionally, reviewer 2 was concerned that non-standard units are used for estimating.</p>		<p>HMH Response: The tiles and cubes used for measurement are not non-standard units of measure; the tiles are specified to be 1-inch and the unit cubes are 1 cm; this builds an understanding of the connection between counting and then adding units to measurement. Given how this benchmark and the clarifications, we believe this standard is completely met.</p>	<p>Lessons 14.1 https://www.hmhco.com/Dimensional</p> <p>Lessons 14.2 https://www.hmhco.com/Dimensional</p>

	A	B	C	D	E	F
12	<p>MA.1.M.1.2</p> <p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	n/a	<p>Reviewer 1 gave us a positive score of 5 (a disparity of 3 points with reviewer 2) and stated "Opportunities for 3 items compared directly and also for indirect comparison."</p> <p>Reviewer 2, on the other hand, states that "Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units."</p> <p>HMH Response: Students use comparisons of longer or shorter objects so that they can estimate their lengths. More specifically, in 14.5 students compare objects to order them, as stated by the standard.</p>			<p>Lesson 14.3 https://www.c311-4a93-00</p>
13	<p>MA.1.M.2.1</p> <p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	n/a	<p>Reviewer 2 states that "there is no discussion or use of the vocabulary for digital and analog" within the lessons 15.1-15.4.</p> <p>HMH Response: The benchmark specifies only that students write and tell time and not that they use specified vocabulary. Clocks divided into semicircles is shown in Lesson 15.3.</p>			<p>Lessons 15.1-15.4 https://www.4https://www.b8ed-8b01a</p>
14	<p>MA.1.M.2.2</p> <p>Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.</p>	n/a	<p>Reviewer 1 states that students count but do not simply identify coins--that the resources should "provide images of both sides of coins."</p> <p>HMH Response: Identification of the coin is necessary to count them. This is why both sides of the coin are used throughout this chapter in order to reinforce their ability to identify and count coins.</p>			<p>Lesson 9.1-9.4 https://www.a66d-71cf45</p>
15	<p>MA.1.M.2.3</p> <p>Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.</p>	n/a	<p>Reviewer 1 wrote that the benchmark indicates students should "Find the value of combinations of pennies, nickels and dimes up to one dollar."</p> <p>HMH Response: In the Ready for More on Lesson 9.4, p. 412, the TE guide includes direction on how to guide students to find different ways to make 100 cents. This omission was caught by the internal team and was corrected for implementation.</p>			<p>Lesson 9.3, https://www.a66d-71cf45</p> <p>Lesson 9.4, https://www.4407-a901-d</p>
16	<p>MA.1.NSO.1.2</p> <p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>	n/a	<p>Reviewer 2 stated that "Most of the examples for expanded form was based on ___tens + ___ones when it should be the actual number made by the tens plus the ___ones (for example 70+5)."</p> <p>HMH Response: There are two places where this is covered in the content --both Lessons 2.5 and 2.9. It shows that students write numbers in 3 forms, ex., 4 tens + 7 ones, 40 + 7, and 47.</p>			<p>Lesson 2.5, https://www.fef0597-808</p>
17	<p>MA.1.NSO.2.4</p> <p>Explore the addition of a two-digit number and a one-digit number with sums to 100.</p>	n/a	<p>Reviewer 2 writes "Examples from p.279-296 were not rigorous enough to cover this standard, as most were two single digit numbers. The SE p.303-308 did a much better job covering this material."</p> <p>HMH Response: As noted by Reviewer 1, there is good coverage in Chapter 6 which include problem with a two-digit addended greater than 20 and varying representations including models, number lines and place value.</p>			<p>Lesson 6.9 https://www.8-1dff-48ec</p>

2	<u>BID #454</u>						
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	Publisher Correction				
4	n/a	The section "supporting all learners" contains references to peoples/cultures/equity in the TE.	Per the reviewer's note, the section Supporting All Learners was the only concern re: Special Topics because it "contains references to people/cultures/equity in the TE." It is important to note that HMH Florida's B.E.S.T. Go Math! complies with the Addendum to Mathematics Instructional Materials Bid Specifications issued by the Florida Department of Education June 9, 2021 and it does not reference or contain Critical Race Theory or Social Emotional Learning objectives in the Supporting All Learners callouts or elsewhere in the books or the digital experience. Without additional details or evidence to back the concern, the only explicit Supporting all Learners that refers to "cultures" can be found in Lesson 3.5 Supporting all Learners call-out. Our plan is to remove this call-out from the digital program immediately and from the print Teacher's Edition upon reprint.				Below is a link to a m reprint. Lesson 3.5, Pg. 115B https://hmhco.box.com/s/

2	<u>BID 465</u>				
3	Standard Below 3 (if applicable)	Special Topic Concern (if applicable)	Publisher Correction		
4	n/a	n/a	Overall HMH Response: These standards are also found in Grade 6 and 7 of HMH Florida's Best Into Math--both grades which were approved for the adoption list. This program contains the same content as Grade 6 and part of Grade 7. While Reviewer 2 scored the content a 5 and stated, "standard is covered completely; all properties are defined and practiced throughout the lesson." Reviewer 1, on the other hand, stated that Clarification 1 (Associative, Commutative, Distributive applied to generating equivalent algebraic expressions) is "not represented". HMH Response: In the lesson interleaf for Lesson 8.4 on page 261A, the Associative Property of Addition, Associative Property of Multiplication, Commutative Property of Addition, Commutative Property of Multiplication, and Distributive Property are all listed as review vocabulary. These properties are all defined, with examples, in a table on SE page 262. Additionally, tasks 2 and 3 on pages 262-263 of the SE require students to list the property used in each step of simplifying an expression. On Your Own problems 3, 6, 14, 15, and 19 on pages 264-265, More Practice/Homework problems 6 and 7 on page 267, and Florida Test Prep problem 10 require students to justify their work using properties.		Lesson 8.4, p.262 https://www.jmhco.com/FL_SE_M08_Numerical.c5cd-11ec-b2c9-4d07eb4
5	MA.6.AR.1.4 Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	n/a	Reviewer 1 stated that this standard was not represented because set notation was not used. HMH Response: Set notation is not a requirement of the benchmark, shown in the example, or mentioned in the clarification. Integers are used in the language of the benchmark. Equations - On page 284, Task 4 parts E and F use substitution for a single value. Check Understanding problems 2-4 on page 284 use substitution for a single value. On Your Own problems 10-15 on page 285 have students substitute multiple values. On Your Own problems 16-17 on page 286 have students substitute multiple values. More Practice/Homework problems 7-10 on page 287 have students substitute for a single value. Page 285 problem 11 is the only one involving rational numbers and not just integers. Lessons 9.2 and 9.3 have students use what they learned in lesson 9.1 to check their solutions to equations. Inequalities - Lesson 10.1 (pages 322-325 and 327) covers the benchmark for inequalities.		Lesson 8.4, pp. 283 https://www.jmhco.com/FL_SE_M08_Numerical.c5cd-11ec-b2c9-4d07eb4 Lessons 9.2-9.3, pp. 285-287 https://www.jmhco.com/FL_SE_M09_Solve.Prob.11ec-8e6f-ab8d0d29724 Lesson 10.1, pp. 322-327 https://www.jmhco.com/FL_SE_M10_Inequalities.41d7a4ec30a4
6	MA.6.AR.2.1 Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	n/a

11	<p>MA.6.DP.1.2 Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.</p>	n/a	<p>Reviewer 1 stated that "range is missing."</p> <p>HMH Response: Range is covered in lesson 19.3 (pages 637-642)</p>	<p>Lesson 19.3, pp. 637-642 https://www.hmhco.com/FL_SE_M19_Variability Lesson 19.3, pp. 637-642 https://www.hmhco.com/FL_SE_M19_Variability</p>	<p>Lesson 19.3, pp. 637-642 https://www.hmhco.com/FL_SE_M19_Variability Lesson 19.3, pp. 637-642 https://www.hmhco.com/FL_SE_M19_Variability</p>

	A	B	C	D	E
12	<p>MA.6.DP.1.3 Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.</p> <p>MA.6.DP.1.4 Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.</p>	n/a	<p>Reviewer 1 stated that "instruction does not include vertical representation of box plot." Instruction includes horizontal representation of box plots.</p> <p>HMH Response: Vertical box plots are not mentioned anywhere in the benchmark, example, or clarification. We fully cover the benchmark and clarification in lessons 19.2 (pages 629-636) and 19.4 (pages 643-648).</p> <p>Reviewer 1 stated that "instruction limited to skewed description . . . and does not focus on describing data as Normal or Bimodal."</p> <p>HMH Response: Instruction does not focus on describing data as Normal or Bimodal. The benchmark does not mention Bimodal or Normal. The clarification (Appendix C) does not contain Bimodal or Normal in the glossary. We fully cover the benchmark in lessons 19.1 (pages 621-628) and 19.4 (pages 643-648).</p>	<p>Lesson 19.1, pp. 621-628 https://www.jmhco.com/FL_SE_M19_Variability111ec-9255-675fd21d9f1</p>	
13	<p>MA.6.NSO.1.3 Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.</p>	n/a	<p>Reviewer 2 stated that "lessons needs various number lines . . . and more practice with absolute value of rational numbers."</p> <p>HMH Response: Lesson 1.3 contains three horizontal number lines (pages 19, 20, and 21) and two vertical number lines (pages 20 and 22). Students explicitly find the absolute value of a number eight times in the tasks on pages 20 and 21 and eight practice problems on pages 22 and 23. Students must find absolute value in the process of solving other problems in the tasks and practice problems. The benchmark and clarifications are fully covered in lesson 1.3.</p>	<p>Lesson 1.3, pp.19-24 https://www.jmhco.com/FL_SE_M01_Rational_886f-039c40bar052</p>	
14	<p>MA.6.NSO.2.2 Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.</p>	n/a	<p>Reviewer 1 stated that "instruction was limited to multiplication, no division."</p> <p>HMH Response: Fraction multiplication is covered in Module 2, lessons 2.1-2.3. Fraction division is covered in Module 3, lessons 3.1-3.3. Lesson 3.4 allows students to practice a mixture of multiplication and division of fractions. Modules 2 and 3 fully cover the benchmark and clarification. (Screenshots of TOC for Modules 2 and 3 provided.)</p>	<p>Lessons 2.1-2.3, pp. 43-48 https://www.jmhco.com/FL_SE_M02_Fraction_9f3b4a237db7</p> <p>Lessons 3.1-3.4, pp.67-74 https://www.jmhco.com/FL_SE_M03_Fraction_33fe954f0ade</p>	
15	<p>MA.6.NSO.3.2 Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.</p>	n/a	<p>While Reviewer 2 rated us a 4 and he noted "benchmark is covered with GCF"; Reviewer 1 stated that the benchmark was not met, with no specific evidence.</p> <p>HMH Response: Lesson 1.4 Task 2 on page 26 covers GCF and reminds students of the Distributive Property. The end of Task 2 has students re-write $24 + 16$ as $8(3) + 8(2) = 8(3 + 2)$. This is also practiced in problems on pages 31-32. The benchmark and clarification are fully covered in lesson 1.4.</p>	<p>Lesson 1.4, p.25-32 https://www.jmhco.com/FL_SE_M01_Rational_886f-039c40bar052</p>	
16	<p>MA.7.AR.1.2 Determine whether two linear expressions are equivalent.</p>	n/a	<p>Reviewer 2 stated that lessons "need more practice with fraction coefficients".</p> <p>HMH Response: This benchmark is covered in Lessons 8.4 and 8.5. Most of the use of rational coefficients is used in Lesson 8.5, when students are more familiar and confident in working with linear expressions.</p> <p>Lesson 8.4: Rational coefficients are used in Task 2 on page 262 (1 fractional), Check Understanding problem 2 on page 263, On Your Own problems 12, 16, 24, and 28 on pages 264-266 (3 fractional), and More Practice/Homework problem 8 (fractional) on page 267.</p> <p>Lesson 8.5: Rational coefficients are used in Task 1 on page 269 (fractional), Task 2 on page 270, Check Understanding problem 4 (fractional) on page 271, On Your Own problems 5, 10, 13, 16, 17, 18, 19, 20, 23, 26, and 30 on pages 272-274 (7 fractional), More Practice/Homework problems 1, 6, and 8 on page 275 (2 fractional), and Florida Test Prep problems 12 and 13 on page 276 (1 fractional).</p>	<p>Lessons 8.4 and 8.5, pp. https://www.jmhco.com/FL_SE_M08_Numerical_c5cd-11ec-b269-4d076b4</p>	
17					

	A	B	C	D	E
18	<p>MA.7.DP.2.4</p> <p>Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.</p>	n/a	<p>Reviewer 1 states the "instruction partially meets benchmark", but does not provide evidence.</p> <p>HMH Response: This benchmark and the clarifications are fully covered in lesson 21.2. Benchmark: Lesson 21.2 Task 3 on page 702, On Your Own problems 4 and 11 on pages 703-704, More Practice/Homework problem 5 on page 705, and Florida Test Prep problem 9 on page 706 have students conduct an experiment and compare experimental and theoretical probabilities.</p> <p>Clarification 1: Fractions, decimals, and percentages are used throughout lesson 21.1, with several instances, like Task 2 Part E on page 701, where students must write there answer in all three forms.</p> <p>Clarification 2: Task 3 Part C page 702, On Your Own problem 4 page 703, and More Practice/Homework problem 5 on page 705</p> <p>Clarification 3: Coins, die (called a number cube), cards (non-standard deck page 703), marbles, and spinners are all used in lesson 21.2.</p>	<p>Lesson 21.2, pp. 699-706 https://www.jmhco.com/FL_SE_M21_Probability193f214c8caa</p>	
19	<p>MA.7.NSO.2.1</p> <p>Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.</p>	n/a	<p>Reviewer 1 states that "instruction does not include whole-number exponents."</p> <p>HMH Response: This benchmark and clarification are fully covered, not including exponents, in Lessons 6.4 and 6.6. Exponents are taught in Lesson 7.1. Whole-number exponents, in the context of using order of operations, appear in Lesson 8.1 on pages 239-244.</p>	<p>Lesson 6.4, pp.191-198 https://www.jmhco.com/FL_SE_M06_Fluency_W11ec-8810-c1b44a02086</p> <p>Lesson 7.1, pp. 217-222 https://www.jmhco.com/FL_SE_M07_Numerical2bb966416fd7</p> <p>Lesson 8.1, pp. 237-244 https://www.jmhco.com/FL_SE_M08_Numericalc5cd-11ec-b2c9-4d07eb4</p>

Attachment(s): "McGraw Hill Grade 5 Mathematics Appeal.xlsx", "McGraw Hill Grade 1 Mathematics Appeal.xlsx", "image001.png", "image002.png"

Hello again team,

Thank you for your hard work with getting these reviewed. Here are two from McGraw Hill that need standards review. Grade One has an additional special topic portion at the bottom that our team will look at.

Please let me know if you have any trouble accessing or have questions.

Thanks!
Lauren

Subject: McGraw Hill Appeal for Grade 1, 5, and 8

Good Afternoon,
Please find the attached appeal spreadsheets from McGraw Hill LLC for the following:

Bid ID	Course ID	Course	Title
410	5012030	Grade One Mathematics	Florida Reveal Math, Grade 1
414	5012070	Grade Five Mathematics	Florida Reveal Math, Grade 5
419	1205070	Grade Eight Mathematics: Pre-Algebra	Florida Reveal Math, Grade 8 Pre-Algebra

We appreciate the opportunity to submit our appeal. The appeal spreadsheet for Reveal Math Grade 4 Accelerated, which is separate from our K-5 series, will be submitted early next week.

Regards,
Kim

Subject: RE: McGraw Hill - Initial appeal call

***** EXTERNAL EMAIL: If sender is unknown, use caution when opening. *****

Good morning everyone,

Thank you for speaking with us this morning.

Please see the attached appeal template. Please reach out if you have any questions or concerns along the way.

Thanks,

Lauren

	A	B	C
1	COURSE Grade 1 Mathematics		
2	BID 410		
3	Standard Below 3 (if applicable)	Special Topic Concern (if applicable)	Publisher Correction
4	MA.1.AR.1.1		Reviewer 1: "Rigor is not there for the BEST standards." Reviewer 2: "Provides suitable instruction to build understanding and allow student practice. Would like to have seen some problems begin with the sum."
5	MA.1.AR.2.1		Reviewer 1: "meets BEST standard" Reviewer 2: "The concept is taught mostly through fact family practice with little student practice for missing addends."
6			Lessons 5-6 and 5-7 focus on MA.1.AR.2.1 and Lesson 5-8 also uses addition to subtract.
7	MA.1.DP.1.1		For lessons that align to MA.1.DP.1.1, reviewers commented: "Not enough instruction — only 1 lesson on each."
8			Grade 1 features two lessons for MA.1.DP.1.1. Please see linked Student Edition and Teacher Edition pages for Lessons 13-1 and 13-2.
9	MA.1.DP.1.2		For lessons that align to MA.1.DP.1.2, reviewers commented: "Not enough instruction — only 1 lesson on each."
10			Grade 1 features two lessons for MA.1.DP.1.2. Please see linked Student Edition and Teacher Edition pages for Lessons 13-3 and 13-4.
11	MA.1.GR.1.4		There are several comments noting "not enough practice" for certain standards in Grade 1, including MA.1.GR.1.4.
12	MA.1.M.2.2		In all grades, Reveal Math offers additional practice in both print and digital formats outside of the core (print) student edition. Please see sample extra practice pages for Grade 1, Lesson 6-8. Reviewer 1: "Not many opportunities for practice" Reviewer 2: "Cursorry coverage of the benchmark"
13			McGraw Hill updated Lesson 12-8 to deepen coverage of the benchmark including finding the value of multiple pennies, nickels, and dimes - instruction connects skip counting by 5s or 10s to finding the value of a set of nickels or dimes - instruction allows students to determine efficient counting techniques when finding the value of multiple pennies (such as creating groups of 2, 5, or 10 and skip counting) - students use these counting technique to discover how many of each coin are needed to equal \$1 - instruction includes connecting student's previous experience with decomposing by place value to determine how many quarters are needed to equal \$1
14			In addition, McGraw Hill increased the number of practice exercises in the Student Edition. This lesson now includes identifying pennies, nickels, dimes, and quarters and stating the value of each of those coins; stating how many of each coin equals

Hi Cathy and John,

Please see the questions from McGraw Hill below pertaining to the primary source correlation of the social studies specifications. Please let me know your responses to the questions or maybe we can discuss together.

Thanks!

Subject: Question: 2022-2023 K-12 Social Studies Instructional Materials Specifications

Importance: High

Dear Florida Department of Education:

We are seeking additional clarification about requirements in the Florida Instructional Material Specifications for K-12 Social Studies. Our questions concern the requirements for primary sources in the instructional materials. We have looked at the guidance provided in the specifications, as well as the instructions in the primary source correlation spreadsheet, and as a result we have the following questions:

Regarding the Florida Instructional Materials Specifications for K-12 Social Studies Page 23: *Primary source documents that are referenced in the benchmarks and benchmark clarifications must be included and unedited. Please complete the Primary Sources Correlation.*

Question 1: What does "unedited" mean? Does it mean that we must include the entire primary source? Is it acceptable to use excerpts or portions of a primary source, or is using an excerpt considered to be "editing" the primary source? If we are allowed to use excerpts, what constitutes editing? For example, can we use ellipses? Can we insert bracketed clarifications for difficult vocabulary?

Question 2: Can the state provide a list of the items considered to be primary sources in the benchmarks? For example, the history benchmarks reference many treaties and legislative acts in American history, as well as many Supreme Court cases. Treaties, legislation, and supreme court case decisions could all be considered primary sources. Do we need to include the actual text of all of these items in the program? If not, can the department provide additional guidance on which items in the benchmarks are to be considered primary sources? If we do need to include all of these documents in the program, in relation to the previous question above, do we need to include the full text of each of these documents, or can we use excerpts of key portions of the documents?

Question 3: Benchmark SS.912.H.1.5, included in the high school US History program, includes clarifications referencing Victor Hugo's *Les Miserables*, Langston Hughes' poetry, and Pete Seeger's *Bring 'Em Home*. All of these could be considered primary sources. Is it expected that the text of works of literature referenced in the benchmarks have to be included in the program? We are concerned that intellectual property rights involved may restrict our ability to acquire these items, or to quote directly from them, and if we are required to include the entire unedited primary source, it is unlikely we will be able to obtain rights to the entire work cited.

Regarding the Florida Primary Source Correlation spreadsheet, here is the text of two columns on the spreadsheet followed by some questions:

Column 2: *If primary sources are used, please list each benchmark that included a primary source as part of the instructional material. Add a row for each benchmark so that benchmarks are listed individually.*

Column 3: *List every primary source document that aligns to this benchmark.*

Question 4: Our programs include many primary sources that are not listed in the benchmarks or the clarifications. Is the correlation spreadsheet asking that we list all primary sources in our program? Or, per the instructional material specifications, do we only list those primary sources that are specifically mentioned in the benchmarks and clarifications? If we are required to list all primary sources in the program, are we allowed to include primary sources in our program that are not directly aligned to a specific

benchmark, or should we limit the list to those primary sources that directly align to a benchmark?

Thank you for your assistance in clarifying the requirements,

--McGraw Hill

***** EXTERNAL EMAIL: If sender is unknown, use caution when opening. *****

Good afternoon publishers,

We are excited to announce that the 2022-2023 K-12 Social Studies specifications have been posted to our website! They can be found here [Instructional Materials \(fldoe.org\)](http://InstructionalMaterials.fldoe.org) with the supporting documentation sub bulleted beneath. Please reach out if you have any questions regarding next year's adoption. We look forward to working with each of you.

Thank you,

Subject: Quick Call to Confirm Direction of Final Corrections

Hi Cathy,
Thanks for your time this afternoon and for your offer of availability. In discussing how to most efficiently get to approval on the 8 remaining standards across G1 and G5, we thought it could be helpful for 1-2 members of our editorial team to discuss directly with you and Ashley how we might approach the additional corrections before proceeding with the mark-up and sending that over. That way we can ensure we are heading in the right direction prior to marking up the changes and sending those back for official approval.

If that is possible we can be available anytime tomorrow morning that works on your end. If you could let us know by close of business today we would be able to get the meeting details scheduled.

Much appreciated,
Erin

Attachment(s): "Bid 390-Grade Seven.pdf", "Bid 407-Mathematics for Data and Financial Literacy.pdf", "Savvas-Appeal K-12 Mathematics.xlsx", "image001.png"

Good afternoon,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Hi Lauren, Cathy, and James:

For the Florida Math 2021 Adoption, we have received and reviewed the Adopted and Non-Adopted Lists that FLDOE posted recently to its website. We intend to submit an appeal for the following Savvas Learning submissions that were not adopted.

At this time, we would like to request any information you can share as to the reasons for the decision not to adopt our submissions, including any evaluation reports from reviewers. For our submissions that were not approved due to the "inclusion of special topics," can you please provide a definition or description of these "special topics" and a list of any objectionable content found in the submissions.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Mostly aligned to the B.E.S.T Standards for seventh grade. Pages seem to be very busy and leave little room for student thinking. Also, while the instructions can help students who are struggling with independent work, they also limited student thinking and exploration of the topic by providing too much support. On digital versions, the writing was small and difficult to read on some pages and zoom did not work.

Standard	Description	Reviewer Rating	Rating Justification
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Most use $ax + b$ or $b+ax$.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	4 - Good Alignment	Students combine like terms, expand, and use the properties of operations to create and identify equivalent expressions.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Presents one and two step inequalities. They are represented algebraically and graphically. Required forms of inequalities are used.
MA.7.AR.2.2	Write and solve two-step equations in one variable within a mathematical or real-world context, where all terms are rational numbers.	4 - Good Alignment	Presents one and two step equations with real-world context. Required forms of equations are used.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	4 - Good Alignment	Covers all percent examples defined in the clarifications. All presented in real world problems and are relatable to the audience.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	real world problems involving proportional relationships are used- time and money, speed, and recipes
MA.7.AR.3.3	Solve mathematical and real-world problems involving the conversion of units across different measurement systems.	2 - Poor Alignment	Concept related to proportional relationships -only lengths and weight,

			and mass are used. Area, volume and money are left out. A few pages address capacity which is not in the clarifications.
MA.7.AR.4.1	Determine whether two quantities have a proportional relationship by examining a table, graph or written description.	4 - Good Alignment	Problems include tables, graphs, and written descriptions. Constant of proportionality is the focus of instruction.
MA.7.AR.4.2	Determine the constant of proportionality within a mathematical or real-world context given a table, graph or written description of a proportional relationship.	4 - Good Alignment	Real world examples are used throughout different representations of proportional relationships.
MA.7.AR.4.3	Given a mathematical or real-world context, graph proportional relationships from a table, equation or a written description.	4 - Good Alignment	$y=px$ is used and tables, graphs and written descriptions are expected to be translated into an equation in this form.
MA.7.AR.4.4	Given any representation of a proportional relationship, translate the representation to a written description, table or equation.	4 - Good Alignment	Ample opportunities to explore and practice translating proportional representations into written descriptions, tables or equations. Converting units are embedded in this skill.
MA.7.AR.4.5	Solve real-world problems involving proportional relationships.	4 - Good Alignment	Real world problems are used to teach proportional relationships as well as converting units from customary to metric.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize	4 - Good Alignment	Multiple representations of

	numerical data, represented numerically or graphically, taking into consideration the context and any outliers.		measures to allow students to determine the best measure of center or variation.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to make comparisons, interpret results and draw conclusions about the two populations.	4 - Good Alignment	histograms. line plots, box plots and stem and leaf plots are used. Students are asked to use the measures of center or variability to draw conclusions about populations. Measure of center are limited to mean and median. Measures of variability are limited to range and interquartile range.
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Students are presented with real world problems where making predictions about populations is needed. High interest areas used (i.e. social media)
MA.7.DP.1.4	Use proportional reasoning to construct, display and interpret data in circle graphs.	4 - Good Alignment	Real world problems. No more than 6 categories are presented.
MA.7.DP.1.5	Given a real-world numerical or categorical data set, choose and create an appropriate graphical representation.	4 - Good Alignment	All required representations of data are used in instruction.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Simple experiments include the use of fair die, coins, cards, marbles, and spinners

MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Students are expected to determine the likelihood of an event and represent probability as a fraction, decimal, or fraction and are to use P(events) notation.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	p(event) notation used-fractions, decimals, and percents are used to represent the probability. Students also explore fairness.
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	3 - Fair Alignment	students represent probability using a fraction, decimal, and percent and compare the results of experimental probabilities to theoretical probabilities. Students explore fairness. Random variation is slightly addressed.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	4 - Good Alignment	Connects the area of rhombi, parallelograms, and trapezoids to that of rectangles and squares.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	3 - Fair Alignment	Students are expected to find the area of composite figures; however, few real work problems are presented.
MA.7.GR.1.3	Explore the proportional relationship between circumferences and diameters of circles. Apply a formula for the circumference	4 - Good Alignment	Students explore the proportional relationship between

	of a circle to solve mathematical and real-world problems.		circumference and diameter in the explore it. The remaining instruction focuses on solving using the formula. Few problems focus on real world problems.
MA.7.GR.1.4	Explore and apply a formula to find the area of a circle to solve mathematical and real-world problems.	4 - Good Alignment	Students explore the connection between the area of rectangles and circles in the explore it activity. The remaining lessons focus on applying the formula to solve. Real world problems used.
MA.7.GR.1.5	Solve mathematical and real-world problems involving dimensions and areas of geometric figures, including scale drawings and scale factors.	4 - Good Alignment	Instruction includes understanding that scale factor is the Constant of proportionality. Students are expected to find scale factor. Real world problems are used.
MA.7.GR.2.1	Given a mathematical or real-world context, find the surface area of a right circular cylinder using the figure's net.	4 - Good Alignment	Students are to find the area of right circular cylinders using nets and connect it to surface area.
MA.7.GR.2.2	Solve real-world problems involving surface area of right circular cylinders.	4 - Good Alignment	Real world problems are used.
MA.7.GR.2.3	Solve mathematical and real-world problems involving volume of right circular cylinders.	4 - Good Alignment	Formulas are provided. Problems with missing dimensions included. Real world problems included.

MA.7.NSO.1.1	Know and apply the Laws of Exponents to evaluate numerical expressions and generate equivalent numerical expressions, limited to whole-number exponents and rational number bases.	4 - Good Alignment	Provides lots of opportunities to apply the laws of exponents
MA.7.NSO.1.2	Rewrite rational numbers in different but equivalent forms including fractions, mixed numbers, repeating decimals and percentages to solve mathematical and real-world problems.	4 - Good Alignment	Has lots of real world examples and applications of terminating and repeating decimals.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	3 - Fair Alignment	Limited to 6 or fewer steps-includes grouping symbols, whole number exponents, and absolute value
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	provides several opportunities to practice the four operations with integers.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Provides several real world problems with the four operations with integers-most with one operations and a few with two
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	3 - Fair Alignment	Three Act Math in the beginning of the unit could be used to engage students. Subsequent lessons limit Student discussions by giving examples on the student page. Format does not allow for daily authentic engagement of this MTR.

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	3 - Fair Alignment	The book represents the problems in multiple ways but is limited to the examples given by the book and not authentic exploration of strategies using prior knowledge and investigation.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Provides ample/excess problems for students to complete for the development of fluency.

<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>3 - Fair Alignment</p>	<p>Mostly in the explore it at the beginning of the chapter and a few questions throughout require students to engage in this behavior.</p>

	<p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		<p>assessing the reasonableness of solutions, but it is not a part of a daily routine or practice.</p>
<p>MA.K12.MTR.7.1</p>	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>4 - Good Alignment</p>	<p>Real world problems are used throughout, but there are areas where they are lacking.</p>
<p>ELA.K12.EE.1.1</p>	<p>Cite evidence to explain and justify reasoning.</p>	<p>4 - Good Alignment</p>	<p>Students are expected to cite evidence in the Explore It activities and have a few questions in each chapter that requires students to justify using evidence.</p>
<p>ELA.K12.EE.2.1</p>	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>5 - Very Good Alignment</p>	<p>The material is heavy in grade level written mathematical instructions.</p>

ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Using patterns and structure to make inferences about concepts.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Explore It, and Three Act Math
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Students are to follow the Do you Understand routine and the Practice and Problem solving routine.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Few open end questions force students to engage in this. Mostly accomplished by STEM projects.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Students communicate through speaking, writing and written examples
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	Students are engaged in discussions with groups of students a few times each chapter.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Aligns to standards and benchmarks of the grade level and follows clarifications mostly.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Follows the clarifications of each benchmark.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Provides several problems for each benchmark that teachers may use flexibly for student instruction.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Book includes lots of written directions/instruction for topics to supplement teacher instruction.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Meets requirements described in clarifications. Pedagogically sound.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Appropriate to the grade level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	36 lessons-142 days of instruction (Max). Allows time for assessments and review and remediation.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	7 authors-5 professors, 1 STEM, 1 Howard public schools, math reviews-college professors, and 5 Florida reviewers-teachers and district leads. Specific sources are unclear but provided; however, the digital books do not allow them to be zoomed in and the text is blurry.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Program identifies which components were developed by whom and why.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No errors noticed.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	None observed.

12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Appropriate methods for solving were present. Few opportunities for concrete representations in circular cylinders.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	None observed.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Updated to new content and include recent real world connections.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real world connections are directly related to the content.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Heavy stem concentration. Focus on Florida relevant topics as well.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Mostly city topics. Would have liked to see more rural examples.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Heavy STEM connections. Reading/writing connections as well.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	All populations are represented.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Few actual photos of people are included but picture them in positive ways.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Some standards are scarce on the real world problems and conversions do not exactly align but other benchmarks and content align.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Materials present more than enough problems and resources to teach concepts. No additional resources needed.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All component are consistent throughout and align.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Sequence of instruction was designed in a way that the major work of the grade level (proportional relationships) are taught all year and in all concepts.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Pages include ample instructions that are easy to read. Visuals correlate and aid in the understanding of the content.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Gives a minimum and maximum instructional time frame of 126-142 days of instruction which allows for flexibility and review and remediation if needed.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	Digital and paper versions are available. Digital tools are available to highlight and mark text. I was not able to zoom/enlarge digital resources. Pages are filled with content and provide small spaces for students to show thinking.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Good alignment. Pages are a little busy and do not allow room for student thinking. Also, the inability to enlarge the digital resources along with the

		busy pages made it difficult to read content at times.
--	--	--

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Three Act Math, Student discussion questions, suggested reflections, instructions, and visuals as well as the real world connections and STEM projects help maintain motivation.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Content chunked appropriately and sequenced strategically to communicate major concepts of the grade.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Learning Targets in the form of "I can..." statements to inform students of their learning.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Written directions, digital editing tools and QR codes support student thinking.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Written directions, verbal from teacher, QR codes for videos assistance
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	The written directions are great for students who are struggling, but disengage students in thinking critically about problem solving.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	pedagogically appropriate presentation of skills across the school year.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Book used the targeted strategies for each benchmark.

9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	Materials include targeted strategies but do not allow time for students to constructed their own meaning or make connections between them.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Limited use of current item types. (Not sure if this will matter for future testing.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Provides pre-assessments, review, remediation, and final assessments.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	Most seem to be addressed except a functioning digital tool for zoom.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	Provides a guide for the MTRs and the behaviors, but had difficulty determining how they were authentically infused in the instruction.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Scope and sequence and strategies are appropriate.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	None observed.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	None observed.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	None observed.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	None observed.

Reviewer's Name: Joanna Pitts

Title: enVision Florida B.E.S.T. Mathematics Grade 7

Publisher: Savvas Learning Company LLC, formerly known as Pearson K12 Learning LLC.

Author: Berry, et al

Edition: 1

Grade Level: 6-8

Course: [Grade Seven Mathematics](#)

Bid ID: 390

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	3 - Fair Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	Strengths - Concept and Skills review at the end of the topic (could be used as a study tool before topic assessment), procedural fluency at the start of each topic, every lesson has opportunities for oral and written explanations (I like the questions that students have to answer before the Practice and Problem Solving to explain what they have learned). The barcodes within the lessons are great - especially if students (or parents) needed an explanation when at home. Weaknesses - I feel that there needs to be more examples that students work through with the

teacher before have problems to do on their own. Lessons don't seem very engaging to keep the attention of middle school students, although there are many opportunities to complete activities or "change" up the lessons (such as with videos, activities, etc.). More independent practice and problem solving in the lessons would be helpful. There are available worksheets, although it looks like most of them only have up to 5 problems for students to practice. (Teachers may have to pull a few extra problems for students to work on).

Standard	Description	Reviewer Rating	Rating Justification
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Benchmark is covered well throughout lessons, steps are shown clearly.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	4 - Good Alignment	Benchmark clarifications are addressed
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	3 - Fair Alignment	Benchmark is covered, more examples of solving different types of inequalities (relating them back to equations) are needed.
MA.7.AR.2.2	Write and solve two-step equations in one variable within a mathematical or real-world context, where all terms are rational numbers.	4 - Good Alignment	Splitting writing and solving equations into two lessons is a good idea
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	4 - Good Alignment	Real world problems are given to practice percent (also relatable, such as percent of phone battery).

MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	3 - Fair Alignment	Ratios are more tied to percent problems rather than proportion problems (although proportions are used to solve).
MA.7.AR.3.3	Solve mathematical and real-world problems involving the conversion of units across different measurement systems.	4 - Good Alignment	Benchmark is covered well and is connected to previously learned skill.
MA.7.AR.4.1	Determine whether two quantities have a proportional relationship by examining a table, graph or written description.	4 - Good Alignment	All forms of proportional relationships are used (words, graph, table) and finding the rate or constant of proportionality.
MA.7.AR.4.2	Determine the constant of proportionality within a mathematical or real-world context given a table, graph or written description of a proportional relationship.	4 - Good Alignment	Proportions are represented in different ways; real world situations are given.
MA.7.AR.4.3	Given a mathematical or real-world context, graph proportional relationships from a table, equation or a written description.	4 - Good Alignment	Students are given practice problems represented in various ways.
MA.7.AR.4.4	Given any representation of a proportional relationship, translate the representation to a written description, table or equation.	3 - Fair Alignment	Benchmark is covered; it is dispersed throughout ratio and proportion lessons and connected to other ratio and proportion benchmarks.
MA.7.AR.4.5	Solve real-world problems involving proportional relationships.	4 - Good Alignment	Majority of problems given in the lessons are real world context and topics students can relate to.

MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Benchmark clarifications are covered
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to make comparisons, interpret results and draw conclusions about the two populations.	4 - Good Alignment	Examples explain measures really well for students to understand how to interpret data
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Lesson covers steps well; gives students plenty of practice with real world problems
MA.7.DP.1.4	Use proportional reasoning to construct, display and interpret data in circle graphs.	4 - Good Alignment	Benchmark is covered
MA.7.DP.1.5	Given a real-world numerical or categorical data set, choose and create an appropriate graphical representation.	4 - Good Alignment	Benchmark is covered.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Lesson uses various examples for finding sample space and outcome possibilities
MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Various examples are given; probability is presented as a fraction, decimal, and percent
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Lesson instruction follows benchmark clarifications
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	4 - Good Alignment	Instruction does a good job of explaining how to compare experimental and theoretical probability.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	3 - Fair Alignment	Formulas are derived from previously

			learned formulas; there could be some confusion with the trapezoid formula because it is derived from a parallelogram in one part of the lesson, but then decomposed into a rectangle and two triangles in another part of the lesson.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	3 - Fair Alignment	I feel that the lesson needs to start off with less complex figures, then move into more complex as students feel comfortable.
MA.7.GR.1.3	Explore the proportional relationship between circumferences and diameters of circles. Apply a formula for the circumference of a circle to solve mathematical and real-world problems.	4 - Good Alignment	Students can derive formula from a hands on activity and apply the formula to problems.
MA.7.GR.1.4	Explore and apply a formula to find the area of a circle to solve mathematical and real-world problems.	4 - Good Alignment	The lesson covers the benchmark, although I feel that the lesson has "too much" content and students could get overwhelmed. Tying circumference with area should be in a separate lesson.
MA.7.GR.1.5	Solve mathematical and real-world problems involving dimensions and areas of geometric figures, including scale drawings and scale factors.	4 - Good Alignment	Benchmark clarifications are covered - skill is linked to constant of proportionality.
MA.7.GR.2.1	Given a mathematical or real-world context, find the surface area of a right circular cylinder using the figure's net.	4 - Good Alignment	Benchmark is covered well (one suggestion - I would redo the diagram on #13 for

			lesson 8-6. The rectangular section needs to be wider).
MA.7.GR.2.2	Solve real-world problems involving surface area of right circular cylinders.	3 - Fair Alignment	The examples given use real world problems; more practice problems involving real world scenarios should be added.
MA.7.GR.2.3	Solve mathematical and real-world problems involving volume of right circular cylinders.	4 - Good Alignment	Benchmark is covered; students are given mathematical and real world problems to solve.
MA.7.NSO.1.1	Know and apply the Laws of Exponents to evaluate numerical expressions and generate equivalent numerical expressions, limited to whole-number exponents and rational number bases.	3 - Fair Alignment	Instruction focuses on building the laws; I feel that the laws should be spread out more. One law per lesson, using each law to connect to the next one.
MA.7.NSO.1.2	Rewrite rational numbers in different but equivalent forms including fractions, mixed numbers, repeating decimals and percentages to solve mathematical and real-world problems.	4 - Good Alignment	Steps of converting between forms of rational numbers are explained well
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	3 - Fair Alignment	Lesson instruction and practice is covered well, although the skill needs to be extended a little further.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Multiple types of problems involving all four operations are given.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	3 - Fair Alignment	More real world and relatable word problems need to be

			used to cover this benchmark to the fullest extent.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	4 - Good Alignment	Every lesson provides an opportunity for students to give an explanation of what they are learning; the activities allow them to become engaged with the topic.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	4 - Good Alignment	Lessons open with various activities that students can connect to the topic skill.
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	4 - Good Alignment	Students are provided with fluency checks

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		and practice throughout the lessons.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	Every lesson has a "Thinking and Reasoning" question that allows students to communicate with others about their thinking; students are also encouraged to explain their understanding with the "Do You know" section in the lessons.
MA.K12.MTR.5.1	Use patterns and structure to help understand and connect mathematical concepts.	4 - Good Alignment	Plenty of opportunities are given for students to break apart a problem.

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	4 - Good Alignment	There are a lot of questions asking to check for reasonableness in every lesson.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. 	3 - Fair Alignment	Majority of word problems presented should be relatable for students.

	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Every lesson has questions that require students to explain or justify an answer.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is on grade level
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	There are questions throughout the lessons that allow students to make inferences about the skill before they learn through examples.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Students are encouraged to explain their reasoning either in written form or by discussing with a partner.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Students are given examples to follow in order to work out problems appropriately; more guided examples could be beneficial.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	With questions encouraging students to justify answers, they are able to practice speaking and writing skills.

ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	ELL students are given opportunities to express ideas through visuals and illustrations within the material.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	Opportunities to communicate learning are given throughout the lessons

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Lessons mostly align well with intended benchmarks.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	All content is on the appropriate level for the intended audience.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	Material can be easily used in the classroom, although some of the lesson may be overwhelming, but teachers can adjust the lessons easily as needed.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	I feel that the information and examples given provide enough support for students.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Complexity and difficulty are appropriate for grade level.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Complexity and difficulty are appropriate for grade level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	Most of the lessons are spaced out enough to teach in a timely manner.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Extra resources provided match with the primary material.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Extra resources provide extra practice that support the primary material.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	No errors were found within the material.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	No bias or contradictions found in material.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Content presented is accurate for what is being taught.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No mistakes were found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content matches current benchmarks and teaching practices.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Content is appropriate for what is being taught.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is presentable and appropriate for intended grade level.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	3 - Fair Alignment	There are a good amount of relatable situations presented in the content that students can understand.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	There is a lot of problems that are related to science that can help students make connections to other skills in different subjects.

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	No biased or unfair information found.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	No inappropriate material found in the text.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Benchmarks are covered appropriately and completely.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	There is a good amount of material for teachers to use, although I feel that there is a need for more extra practice for students outside of what is in the textbooks.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Leveled worksheets and activities align with the main teaching tool.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	Material seems to connect with from lesson to lesson; content is organized in a way that makes sense.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	3 - Fair Alignment	Some of the problems and activities presented are engaging, but I feel that the introduction to the lesson could be more visually engaging for students in order to help them stay focused on the material.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3 - Fair Alignment	There are some lessons that I saw that may be overwhelming to students (such as laws of exponents) because of the

		amount of information presented at one time.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	I like how each lesson has barcodes for students to scan (either by computer or phone) so that they can see the examples being worked out or get extra support.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	3 - Fair Alignment	Material is presented well, although I think that the information could be organized in a way that is not overwhelming to students.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	Illustrations and relatable problems given can motivate students, although some of the lessons have an overwhelming amount of information in one area.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Lessons teach key ideas one at a time.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Lessons contains "I Can" statements so students can make goals for learning
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Questions presented in lessons encourage learners to have discussions and explain their thinking process
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Leveled suggestions are given in the teacher edition to support various learners
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	The visuals in the lessons can catch the attention of the learners, but I'm not sure how

		well they can maintain engagement (some of the material is visually overwhelming).
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Videos that are embedded in the lessons and activities that are given between lessons help support the skills
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Strategies used are appropriate for intended benchmark
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Benchmarks are taught thoroughly
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	The given test practice in each lesson is accurate for the strategies used in assessments
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	The problems and assessments given in the lesson assess the learning objectives effectively
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	Differentiated leveled instruction is provided, teacher edition lists suggestions for all learners. More support for advanced learners and ELL students are needed.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	The lessons do a really good job of encouraging learners to justify their answers and encourages discussion and participation in the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	The lessons are thorough and encourage learners to take part in what in they are learning by asking them to discuss and justify answers.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	Materials are in alignment
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials do not contain any of this
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No evidence of CRT found
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	Materials do not solicit SEL

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

There are several positives to this text. The concepts are continually reinforced, for example, vocabulary is highlighted and can be opened with a click. Also, examples are real-world oriented, realistic, and relevant. However, the text is too heavily focused on Excel. It would require teachers to prepare material to introduce and expand on the topics. Further, at the end of the course, students might be able to use Excel, but would probably not be able to perform calculations without it. Also, the page numbers

restart with each chapter. This makes it difficult to move fluidly through the text.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	5 - Very Good Alignment	There are numerous examples that satisfy this benchmark from several topics.
MA.912.AR.1.2	Rearrange equations or formulas to isolate a quantity of interest.	2 - Poor Alignment	There are very few examples in which a specific variable is isolated.
MA.912.AR.2.5	Solve and graph mathematical and real-world problems that are modeled with linear functions. Interpret key features and determine constraints in terms of the context.	2 - Poor Alignment	There are numerous linear applications examples which include the graphs, x-intercept, and y-intercept. However, there is no inclusion of domain and range except for the definition in the function section. Also, there is little to no use of lines in standard or point-slope form.
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	There is a chapter on exponential functions which show the graph of applications of financial calculations. However, none of the characteristics are addressed.

MA.912.AR.9.10	Solve and graph mathematical and real-world problems that are modeled with piecewise functions. Interpret key features and determine constraints in terms of the context.	2 - Poor Alignment	There are a couple of piece-wise examples related to financial literacy. However, the calculations are based on using Excel, and not hand calculations. The characteristics of piece-wise functions is not addressed.
MA.912.AR.10.1	Given a mathematical or real-world context, write and solve problems involving arithmetic sequences.	1 - Very Poor/No Alignment	Arithmetic sequences are not explicitly addressed.
MA.912.AR.10.2	Given a mathematical or real-world context, write and solve problems involving geometric sequences.	1 - Very Poor/No Alignment	Geometric sequences are not explicitly addressed.
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is univariate or bivariate and interpret the different components and quantities in the display.	5 - Very Good Alignment	All aspects of this benchmark are addressed.
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	There are numerous real-world models highlighting the slope and y-intercept.
MA.912.DP.3.1	Construct a two-way frequency table summarizing bivariate categorical data. Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.	3 - Fair Alignment	There are a few two-way frequency tables summarizing bivariate categorical data.
MA.912.DP.3.2	Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.	3 - Fair Alignment	There are a few relative frequency examples.
MA.912.DP.3.3	Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint,	3 - Fair Alignment	False positive and false negatives are addressed. However, there are only a couple

	marginal and conditional relative frequencies in terms of a real-world context.		of applicable examples.
MA.912.DP.5.11	Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.	3 - Fair Alignment	There are many diverse data sets graphically represented. However, there is no discussion of misleading graphs.
MA.912.F.1.2	Given a function represented in function notation, evaluate the function for an input in its domain. For a real-world context, interpret the output.	4 - Good Alignment	There are many evaluation examples. However, there is not a lot of use of function notation.
MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	1 - Very Poor/No Alignment	There are no examples of combining functions.
MA.912.FL.1.1	Extend previous knowledge of operations of fractions, percentages and decimals to solve real-world problems involving money and business.	3 - Fair Alignment	There are numerous uses of decimals, percentages, and fractions. However, the specific equations are not presented, only calculated in an Excel spreadsheet.
MA.912.FL.1.2	Extend previous knowledge of ratios and proportional relationships to solve real-world problems involving money and business.	5 - Very Good Alignment	Proportions and ratios are well examined through real world problems.
MA.912.FL.1.3	Solve real-world problems involving weighted averages using spreadsheets and other technology.	5 - Very Good Alignment	Weighted-averages is well covered.
MA.912.FL.2.1	Given assets and liabilities, calculate net worth using spreadsheets and other technology.	2 - Poor Alignment	There is an extensive discussion of liabilities and assets, there are no calculations of net worth.

MA.912.FL.2.2	Solve real-world problems involving profits, costs and revenues using spreadsheets and other technology.	2 - Poor Alignment	There are some examples of optimizing profit, but not calculating profit (max or min).
MA.912.FL.2.4	Given current exchange rates, convert between currencies. Solve real-world problems involving exchange rates.	4 - Good Alignment	There are a number of currency examples, but there is no mention of exchange rates.
MA.912.FL.2.5	Develop budgets that fit within various incomes using spreadsheets and other technology.	1 - Very Poor/No Alignment	There are calculations for components of a budget, but no complete budget outlines.
MA.912.FL.2.6	Given a real-world scenario, complete and calculate federal income tax using spreadsheets and other technology.	1 - Very Poor/No Alignment	There are no calculations of income tax.
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	2 - Poor Alignment	There are numerous interest examples, but no comparisons.
MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	5 - Very Good Alignment	Each of these interest calculations are well covered.
MA.912.FL.3.5	Compare the advantages and disadvantages of using cash versus personal financing options.	4 - Good Alignment	There is a discussion of cash and other types of investments, but not a clear comparison with personal and business impacts.
MA.912.FL.3.6	Calculate the finance charges and total amount due on a bill using various forms of credit using estimation, spreadsheets and other technology.	4 - Good Alignment	There are several examples comparing interest rates.
MA.912.FL.3.7	Compare the advantages and disadvantages of different types of student loans by manipulating a variety of variables and calculating the total cost using spreadsheets and other technology.	1 - Very Poor/No Alignment	There are no comparisons of student loan options.

MA.912.FL.3.8	Calculate using spreadsheets and other technology the total cost of purchasing consumer durables over time given different monthly payments, down payments, financing options and fees.	4 - Good Alignment	There are many comparison examples, but not any that include income tax.
MA.912.FL.3.9	Compare the advantages and disadvantages of different types of mortgage loans by manipulating a variety of variables and calculating fees and total cost using spreadsheets and other technology.	3 - Fair Alignment	There are numerous mortgage examples, but they are not as extensive as the benchmark.
MA.912.FL.3.10	Analyze credit scores qualitatively. Explain how short-term and long-term purchases, including deferred payments, may increase or decrease credit scores. Explain how credit scores influence buying power.	1 - Very Poor/No Alignment	There is no qualitative comparison of credit scores and their impact.
MA.912.FL.3.11	Given a real-world scenario, establish a plan to pay off debt.	1 - Very Poor/No Alignment	Paying off debt is not addressed.
MA.912.FL.4.1	Calculate and compare various options, deductibles and fees for various types of insurance policies using spreadsheets and other technology.	1 - Very Poor/No Alignment	Insurance comparisons does not exist.
MA.912.FL.4.3	Compare the advantages and disadvantages of various retirement savings plans using spreadsheets and other technology.	5 - Very Good Alignment	There are numerous retirement examples.
MA.912.FL.4.4	Collect, organize and interpret data to determine an effective retirement savings plan to meet personal financial goals using spreadsheets and other technology.	3 - Fair Alignment	Retirement plans are addressed however, there are not addressed from the perspective of a business. Also, student research is not addressed.
MA.912.FL.4.5	Compare different ways that portfolios can be diversified in investments.	5 - Very Good Alignment	Students are introduced to numerous investment/retirement options.

MA.912.FL.4.6	<p>Simulate the purchase of a stock portfolio with a set amount of money, and evaluate its worth over time considering gains, losses and selling, taking into account any associated fees.</p>	<p>1 - Very Poor/No Alignment</p>	<p>A stock purchase calculations is not presented.</p>
MA.912.NSO.1.1	<p>Extend previous understanding of the Laws of Exponents to include rational exponents. Apply the Laws of Exponents to evaluate numerical expressions and generate equivalent numerical expressions involving rational exponents.</p>	<p>4 - Good Alignment</p>	<p>The laws of exponents is utilized in numerous examples. However, the basic laws are not presented.</p>
MA.912.NSO.1.2	<p>Generate equivalent algebraic expressions using the properties of exponents.</p>	<p>4 - Good Alignment</p>	<p>There are numerous examples of writing equivalent exponential equations.</p>
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 	<p>1 - Very Poor/No Alignment</p>	<p>The text focuses on using Excel not really on fostering students' skills.</p>
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. 	<p>5 - Very Good Alignment</p>	<p>The text presents data and calculations in different ways.</p>

	<ul style="list-style-type: none"> • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	Calculations are presented in several different ways. Efficiency is encouraged.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. 	3 - Fair Alignment	The vocabulary is very well presented. Potential errors are not addressed.

	<ul style="list-style-type: none"> Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 	5 - Very Good Alignment	Previously covered topics are continuously reinforced.
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. 	3 - Fair Alignment	Estimation is not really addressed, but checking calculations throughout.

	<ul style="list-style-type: none"> Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Most all examples represent real world examples. However, redesigning models is not addressed.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Data and examples are all cited.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	This is written on grade level, but the text can be confusing and difficult to follow.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Based on the section titles, example titles, and notations, inferences can be made.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	This text would encourage discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Quality work is encouraged through the use of Excel. However, hand calculations are not well presented.

ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Appropriate voice is used.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	The communications is sufficient.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Some benchmarks are well addressed while others are missing.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	The skill level is on task, but it is confusing in several places.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	2 - Poor Alignment	There are not sufficient hand-calculated problems. They are mainly Excel based.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	The majority of example represent real world scenarios, but many would required additional in-class discussion.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	The difficulty of problems are on-point.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	The examples are on grade level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	There would be significant need for additional explanation.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	There are many cited information from reliable sources.

9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	There are reliable resources.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	There were not any obvious errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	The information is seemingly unbiased.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	The material topics are present, but could be covered in more depth.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	The material is accurate.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	Most of the data sets are current, but are old enough to be out of date soon.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	Many of the notations do not correspond to the benchmarks.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	3 - Fair Alignment	It is too Excel focused.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Content is interesting to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	2 - Poor Alignment	There are few interdisciplinary connections made.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	There were no biased statements observed.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and	5 - Very Good Alignment	No inappropriate portrayals were made.

inhumane treatment. (An exception may be necessary for units covering animal welfare).		
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	It was too heavy with Excel.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	2 - Poor Alignment	There would need to be significant teacher prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	The text is very aligned to Excel.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The material is well organized.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Material is on grade level, but can be a little confusing.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	The amount of material is appropriate.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Material seem to follow UDL.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The presentation of material is generally good.

Learning	Reviewer Rating	Rating Justification
----------	-----------------	----------------------

1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	The topics are engaging.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	For the required topics covered, the main ideas are well presented.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The goals are clearly stated.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	1 - Very Poor/No Alignment	Students will become dependent upon Excel.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	1 - Very Poor/No Alignment	The text will be useful to those with the desire and ability to learn Excel, but few other options are presented.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Students will be mentally challenged.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	Materials offer many activities.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	2 - Poor Alignment	There are only a few strategies presented.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	Needs additional manual reinforcement.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Example are appropriate.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Assessments are sufficient.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	There are numerous learning methods presented.

13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	The material is lacking in several key areas. For example, explanation of formulas and hand-calculations.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	The text has several good points, however it is lacking in several key features and relies too heavily on Excel.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	There are no observed CRT references made.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	There are no observed CRT references made.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	There are no observed CRT references made.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	There are no observed CRT references made.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	No
How would you rate the overall usability of the instructional material?	3 - Fair Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	What I was able to review, just the instructional materials, there is quite a bit missing. At times the priority seemed more about the use of excel instead of mastering standards/benchmarks. The instructional materials do not include instructional strategies to help guide teachers in presentation, it does not include questions that would help foster conversation that would help in the learning process, and it does not always cover the standard/benchmark. The content is simply presented, no additional practice or depth. The

MathLab resource may help but I think the curriculum needs more to really cover the benchmarks/standard to mastery.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	4 - Good Alignment	Students are given opportunities in most chapters to identify and interpret parts of an expression/equation in terms of money/business.
MA.912.AR.1.2	Rearrange equations or formulas to isolate a quantity of interest.	4 - Good Alignment	Opportunities throughout to rearrange equations.
MA.912.AR.2.5	Solve and graph mathematical and real-world problems that are modeled with linear functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	Students are not asked to graph.
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	Students are not asked to graph.
MA.912.AR.9.10	Solve and graph mathematical and real-world problems that are modeled with piecewise functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	Students are not asked to graph.
MA.912.AR.10.1	Given a mathematical or real-world context, write and solve problems involving arithmetic sequences.	2 - Poor Alignment	Arithmetic sequences not explicitly taught.

MA.912.AR.10.2	Given a mathematical or real-world context, write and solve problems involving geometric sequences.	2 - Poor Alignment	Geometric sequences not explicitly taught.
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is numerical or categorical, whether it is univariate or bivariate and interpret the different components and quantities in the display.	5 - Very Good Alignment	Opportunities in most chapters to work towards this benchmark with chapter 12 explicitly covering this benchmark.
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	4 - Good Alignment	Students are given examples but not asked to fit a linear function to data.
MA.912.DP.3.1	Construct a two-way frequency table summarizing bivariate categorical data. Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.	3 - Fair Alignment	Students learn about two way frequency tables but students are not asked to construct their own.
MA.912.DP.3.2	Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.	3 - Fair Alignment	Students learn about two way frequency tables but students are not asked to construct their own.
MA.912.DP.3.3	Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint, marginal and conditional relative frequencies in terms of a real-world context.	4 - Good Alignment	Students not given segmented bar graphs to interpret.
MA.912.DP.5.11	Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.	5 - Very Good Alignment	Lots of different real data reports for students to evaluate.
MA.912.F.1.2	Given a function represented in function notation, evaluate the function for an input in its domain. For a real-world context, interpret the output.	5 - Very Good Alignment	Students given lots of different opportunities to evaluate real world

			functions given a domain input.
MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	2 - Poor Alignment	Students are not being asked to combine functions.
MA.912.FL.1.1	Extend previous knowledge of operations of fractions, percentages and decimals to solve real-world problems involving money and business.	5 - Very Good Alignment	Students are given several opportunities to perform operations using fractions, decimals and percentages
MA.912.FL.1.2	Extend previous knowledge of ratios and proportional relationships to solve real-world problems involving money and business.	5 - Very Good Alignment	Students are given several opportunities to use ratios and proportions to solve real world problems involving money.
MA.912.FL.1.3	Solve real-world problems involving weighted averages using spreadsheets and other technology.	5 - Very Good Alignment	Benchmark is well covered.
MA.912.FL.2.1	Given assets and liabilities, calculate net worth using spreadsheets and other technology.	2 - Poor Alignment	Students are given opportunities to explore different types of savings/investments but are not taught to find net worth given assets and liabilities. Instead they simply learn about different assets and liabilities.
MA.912.FL.2.2	Solve real-world problems involving profits, costs and revenues using spreadsheets and other technology.	3 - Fair Alignment	Students taught about costs and profits but not revenues.
MA.912.FL.2.4	Given current exchange rates, convert between currencies. Solve real-world problems involving exchange rates.	3 - Fair Alignment	Students given a couple of examples, both using Euros.

MA.912.FL.2.5	Develop budgets that fit within various incomes using spreadsheets and other technology.	2 - Poor Alignment	The parts of the instructional materials listed have students exploring different parts of a budget (credit cards, loans, mortgages) but no mention of a budget.
MA.912.FL.2.6	Given a real-world scenario, complete and calculate federal income tax using spreadsheets and other technology.	1 - Very Poor/No Alignment	No mention of calculating federal income taxes.
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	3 - Fair Alignment	Students are taught different types of interest but not specifically to compare.
MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	5 - Very Good Alignment	Students are taught different types of interest.
MA.912.FL.3.5	Compare the advantages and disadvantages of using cash versus personal financing options.	4 - Good Alignment	Not specifically comparing but looking at the different options.
MA.912.FL.3.6	Calculate the finance charges and total amount due on a bill using various forms of credit using estimation, spreadsheets and other technology.	5 - Very Good Alignment	Students given opportunities to explore credit at different rates using technology.
MA.912.FL.3.7	Compare the advantages and disadvantages of different types of student loans by manipulating a variety of variables and calculating the total cost using spreadsheets and other technology.	2 - Poor Alignment	Students do not explore student loans.
MA.912.FL.3.8	Calculate using spreadsheets and other technology the total cost of purchasing consumer durables over time given different monthly payments, down payments, financing options and fees.	4 - Good Alignment	Students specifically use spreadsheets, not other technology.

MA.912.FL.3.9	Compare the advantages and disadvantages of different types of mortgage loans by manipulating a variety of variables and calculating fees and total cost using spreadsheets and other technology.	5 - Very Good Alignment	Students given opportunities to compare different types of mortgage loans.
MA.912.FL.3.10	Analyze credit scores qualitatively. Explain how short-term and long-term purchases, including deferred payments, may increase or decrease credit scores. Explain how credit scores influence buying power.	2 - Poor Alignment	Minimal mention of credit scores but no exploration of how credit scores affect credit opportunities.
MA.912.FL.3.11	Given a real-world scenario, establish a plan to pay off debt.	3 - Fair Alignment	Students look at payments and amortization for single debt. They are not establishing a plan to pay off debt.
MA.912.FL.4.1	Calculate and compare various options, deductibles and fees for various types of insurance policies using spreadsheets and other technology.	1 - Very Poor/No Alignment	No mention of different types of insurance.
MA.912.FL.4.3	Compare the advantages and disadvantages of various retirement savings plans using spreadsheets and other technology.	4 - Good Alignment	Students given opportunities to simulate retirement options. No comparing advantages or disadvantages.
MA.912.FL.4.4	Collect, organize and interpret data to determine an effective retirement savings plan to meet personal financial goals using spreadsheets and other technology.	5 - Very Good Alignment	Students given opportunities to simulate retirement options.
MA.912.FL.4.5	Compare different ways that portfolios can be diversified in investments.	4 - Good Alignment	Students explore different investments but are not really making comparisons.
MA.912.FL.4.6	Simulate the purchase of a stock portfolio with a set amount of money, and evaluate its worth over time considering gains, losses and selling, taking into account any associated fees.	5 - Very Good Alignment	Students explore different types of investments over time.

MA.912.NSO.1.1	<p>Extend previous understanding of the Laws of Exponents to include rational exponents. Apply the Laws of Exponents to evaluate numerical expressions and generate equivalent numerical expressions involving rational exponents.</p>	<p>5 - Very Good Alignment</p>	<p>Students given opportunities to use properties of exponents to simplify expressions dealing with money.</p>
MA.912.NSO.1.2	<p>Generate equivalent algebraic expressions using the properties of exponents.</p>	<p>5 - Very Good Alignment</p>	<p>Students given opportunities to use properties of exponents to simplify expressions dealing with money.</p>
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 	<p>4 - Good Alignment</p>	<p>Not explicit to have students work together.</p>
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. 	<p>5 - Very Good Alignment</p>	<p>Opportunities throughout curriculum.</p>

	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	Opportunities throughout curriculum.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. 	3 - Fair Alignment	Not explicit but teachers could easily incorporate with the curriculum.

	<ul style="list-style-type: none"> Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 	5 - Very Good Alignment	Opportunities throughout curriculum.
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	Opportunities throughout curriculum.

MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>5 - Very Good Alignment</p>	<p>Opportunities throughout curriculum.</p>
ELA.K12.EE.1.1	<p>Cite evidence to explain and justify reasoning.</p>	<p>3 - Fair Alignment</p>	<p>Curriculum lends itself to citing evidence/justifying reasoning but not explicitly included.</p>
ELA.K12.EE.2.1	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>5 - Very Good Alignment</p>	<p>Curriculum requires reading and understanding real world financial situations.</p>
ELA.K12.EE.3.1	<p>Make inferences to support comprehension.</p>	<p>4 - Good Alignment</p>	<p>Opportunities throughout although not explicit.</p>
ELA.K12.EE.4.1	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p>	<p>3 - Fair Alignment</p>	<p>Collaboration opportunities can be incorporated but curriculum does not explicitly pose questions or direct teacher to have students discuss or collaborate.</p>
ELA.K12.EE.5.1	<p>Use the accepted rules governing a specific format to create quality work.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities throughout.</p>

ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Opportunities throughout
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	No specific adjustments or strategies given for adapting curriculum for ELL students.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	The curriculum mostly aligns with the standards and benchmarks.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	The curriculum mostly aligns with the standards and benchmarks.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The materials are adaptable/useful for classroom instruction. I would like to see the MathLab resources to see if there is more practice/alignment..
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The materials are adaptable/useful for classroom instruction. I would like to see the MathLab resources to see if there is more practice/alignment..
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The level is sufficient.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	The level is sufficient.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The time period is appropriate for the time period allowed for teaching.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The sources cited reflect expert information for the subject. At times the focus seemed to be more on the use of excel then the content being covered.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	The sources cited reflect expert information for the subject. At times the focus seemed to be more on the use of excel then the content being covered.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	Content is presented accurately.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Content is presented objectively.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	The content is representative of the discipline.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	The content is free of mistakes and inconsistencies.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	The content is up-to-date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	3 - Fair Alignment	The content is presented almost fully to the appropriate/relevant context.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	The context is appropriate and relevant for the intended learner.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Content is meaningful.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	There are some interdisciplinary connections.

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Content represented fairly and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Content presented humanely and compassionately.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	The content of the benchmarks and standards for this course are mostly covered in the material.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	The curriculum provided for review is a great start, I do not feel like it is comprehensive without seeing the MathLab resources too.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	3 - Fair Alignment	The curriculum provided for review is a great start, I do not feel like it is comprehensive without seeing the MathLab resources too.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are well organized.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Readability of the materials is appropriate.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Pace is appropriate.

6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	The tools are accessible and include assistive supports.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall the presentation meets some of the presentation requirements.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	2 - Poor Alignment	The materials do not really include features to maintain learner motivation.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Instructional materials teach a few important ideas, concepts, or themes.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	1 - Very Poor/No Alignment	Outcomes not included in the materials.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	1 - Very Poor/No Alignment	The material is simply presented, no guidance included to support students to become more independent learners/thinkers.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	1 - Very Poor/No Alignment	The material is simply presented, no guidance included to support students to become more independent learners/thinkers.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	2 - Poor Alignment	Mental activity and use of excel is included but physical activity not really included.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	2 - Poor Alignment	Material is presented, not much participation opportunities.

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	1 - Very Poor/No Alignment	Instructional strategies not included.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	1 - Very Poor/No Alignment	Instructional strategies not included.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	1 - Very Poor/No Alignment	Assessment and practice opportunities not included in reviewable materials.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	1 - Very Poor/No Alignment	Assessment and practice opportunities not included in reviewable materials.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	1 - Very Poor/No Alignment	Material is simply presented, no incorporation of strategies, materials, activities.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	2 - Poor Alignment	ELA and MTRs could be adapted by the teacher but not explicitly included.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	2 - Poor Alignment	The submission simply presents the material, it does not give strategies or support learning needs of all students.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT not part of materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	CRT not part of materials.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	CRT not part of materials.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No SSEL included.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	4 - Good Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	With the exception of a few standards not addressed in their entirety, I would recommend this instructional material for adoption as it meets the majority of BEST standards needs for this course.

Standard	Description	Reviewer Rating	Rating Justification
----------	-------------	-----------------	----------------------

MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	4 - Good Alignment	aligns appropriately
MA.912.AR.1.2	Rearrange equations or formulas to isolate a quantity of interest.	4 - Good Alignment	aligns appropriately
MA.912.AR.2.5	Solve and graph mathematical and real-world problems that are modeled with linear functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	aligns appropriately
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	aligns appropriately
MA.912.AR.9.10	Solve and graph mathematical and real-world problems that are modeled with piecewise functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	aligns appropriately
MA.912.AR.10.1	Given a mathematical or real-world context, write and solve problems involving arithmetic sequences.	4 - Good Alignment	aligns appropriately
MA.912.AR.10.2	Given a mathematical or real-world context, write and solve problems involving geometric sequences.	4 - Good Alignment	aligns appropriately
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is numerical or categorical, whether it is univariate or bivariate and interpret the different components and quantities in the display.	4 - Good Alignment	aligns appropriately
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	4 - Good Alignment	aligns appropriately

MA.912.DP.3.1	<p>Construct a two-way frequency table summarizing bivariate categorical data. Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.</p>	<p>2 - Poor Alignment</p>	<p>Includes interpretation of joint and marginal frequencies but needs the construction of the two-way frequency table to be addressed. It gives the table and has students interpret. (Includes creating relative frequency tables but not two-way frequency tables)</p>
MA.912.DP.3.2	<p>Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.</p>	<p>4 - Good Alignment</p>	<p>aligns appropriately</p>
MA.912.DP.3.3	<p>Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint, marginal and conditional relative frequencies in terms of a real-world context.</p>	<p>3 - Fair Alignment</p>	<p>Ch 4 p24-27 and ch 11 p10-11 and 21-22 has some interpretation of relative frequencies, but mostly given two-way frequency tables instead of relative frequency tables. I did not see any segmented bar graphs on these pages to interpret.</p>
MA.912.DP.5.11	<p>Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.</p>	<p>4 - Good Alignment</p>	<p>aligns appropriately</p>
MA.912.F.1.2	<p>Given a function represented in function notation, evaluate the function for an input in its domain. For a real-world context, interpret the output.</p>	<p>4 - Good Alignment</p>	<p>aligns appropriately</p>
MA.912.F.3.2	<p>Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and</p>	<p>4 - Good Alignment</p>	<p>aligns appropriately</p>

	polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.		
MA.912.FL.1.1	Extend previous knowledge of operations of fractions, percentages and decimals to solve real-world problems involving money and business.	4 - Good Alignment	aligns appropriately
MA.912.FL.1.2	Extend previous knowledge of ratios and proportional relationships to solve real-world problems involving money and business.	4 - Good Alignment	aligns appropriately
MA.912.FL.1.3	Solve real-world problems involving weighted averages using spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.2.1	Given assets and liabilities, calculate net worth using spreadsheets and other technology.	2 - Poor Alignment	No information about the term liabilities or net worth included in any of these pages. Includes assets and different types but does not mention the terms liabilities or net worth to make the connection.
MA.912.FL.2.2	Solve real-world problems involving profits, costs and revenues using spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.2.4	Given current exchange rates, convert between currencies. Solve real-world problems involving exchange rates.	5 - Very Good Alignment	aligns appropriately
MA.912.FL.2.5	Develop budgets that fit within various incomes using spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.2.6	Given a real-world scenario, complete and calculate federal income tax using spreadsheets and other technology.	1 - Very Poor/No Alignment	p 48 is the only page that mentions federal tax rates but I do not see where students are completing or calculating federal income tax using a

			spreadsheet (the stat crunch on this page is currently empty)
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	4 - Good Alignment	aligns appropriately
MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	4 - Good Alignment	aligns appropriately
MA.912.FL.3.5	Compare the advantages and disadvantages of using cash versus personal financing options.	4 - Good Alignment	aligns appropriately
MA.912.FL.3.6	Calculate the finance charges and total amount due on a bill using various forms of credit using estimation, spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.3.7	Compare the advantages and disadvantages of different types of student loans by manipulating a variety of variables and calculating the total cost using spreadsheets and other technology.	2 - Poor Alignment	Ch 9 p 29-32 focuses on a mortgage and not student loans. Ch 2 p 42 mentions student loans and how much you should owe/when it may be paid off (but does not include different types of student loans and calculating the total cost).
MA.912.FL.3.8	Calculate using spreadsheets and other technology the total cost of purchasing consumer durables over time given different monthly payments, down payments, financing options and fees.	4 - Good Alignment	aligns appropriately
MA.912.FL.3.9	Compare the advantages and disadvantages of different types of mortgage loans by manipulating a variety of variables and calculating fees and total cost using spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.3.10	Analyze credit scores qualitatively. Explain how short-term and long-term purchases,	4 - Good Alignment	aligns appropriately

	including deferred payments, may increase or decrease credit scores. Explain how credit scores influence buying power.		
MA.912.FL.3.11	Given a real-world scenario, establish a plan to pay off debt.	2 - Poor Alignment	Addresses percentages, APR, etc with loans. credit cards, etc. but does not explicitly address establishing a plan to pay off debt.
MA.912.FL.4.1	Calculate and compare various options, deductibles and fees for various types of insurance policies using spreadsheets and other technology.	1 - Very Poor/No Alignment	Does not address insurance policies
MA.912.FL.4.3	Compare the advantages and disadvantages of various retirement savings plans using spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.4.4	Collect, organize and interpret data to determine an effective retirement savings plan to meet personal financial goals using spreadsheets and other technology.	4 - Good Alignment	aligns appropriately
MA.912.FL.4.5	Compare different ways that portfolios can be diversified in investments.	4 - Good Alignment	aligns appropriately
MA.912.FL.4.6	Simulate the purchase of a stock portfolio with a set amount of money, and evaluate its worth over time considering gains, losses and selling, taking into account any associated fees.	4 - Good Alignment	aligns appropriately

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Overall aligns appropriately (a few components missing or not explicit)
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	aligns appropriately
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	aligns appropriately
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	sufficient details provided
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	level is appropriate
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	level is appropriate

7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	level is appropriate
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	source is appropriate
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	contribution is appropriate
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	accurate
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	free of bias
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	aligns appropriately
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	accurate
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	aligns appropriately
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	aligns appropriately
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	aligns appropriately
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	connections appropriate
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	material is meaningful

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	representation is fair
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	appropriate
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	overall, yes

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	aligns appropriately, overall
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	aligns appropriately, overall
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	logically organized
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	aligns appropriately
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	pacing is appropriate
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	aligns appropriately

7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	aligns appropriately
---	--------------------	----------------------

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	aligns appropriately
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	aligns appropriately
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	aligns appropriately
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	support available in text and via interactive links
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	aligns appropriately
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	aligns appropriately
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	aligns appropriately
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	aligns appropriately
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	aligns appropriately
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	aligns appropriately
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in	4 - Good Alignment	aligns appropriately

assessing the learners' performance with regard to the targeted outcomes.		
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	aligns appropriately
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	These standards are addressed appropriately
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	aligns appropriately

Special Topics	Reviewer Rating	Rating Justification

19				
20		Bid 397 - Mathematics for College Algebra		
21	Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	2	I found several places where CRT could be said to be present, albeit usually indirectly. (All page numbers are from the teacher version). On page 1, the books says that algebra is a language that describes the world and tells us about things including 'racial bias'. (It also says it will cover 'ethnic diversity in the US', which it uses in a practice problem on page 91, but the example seems relatively harmless). On page 51, the book defines polynomials by the example of an "implicit" racial bias test (called Project Implicit) by which "2 million people have tested their racial prejudice... most groups' average scores fall between 'slight' and 'moderate' bias, but the differences among age groups are intriguing." The exercise problem is on page 61. The numbers come from Project Implicit, a real-world organization whose mission is to educate people that people and institutions unconsciously have implicit racial prejudice. On pages 214-215, problem 103 graphs people who support laws against interracial marriage by decade. However, unrelated to the graphs, the problem goes out of its way to mention the Supreme Court decision on same-sex marriage, making an analogy that opposing the legalization of same-sex marriage is like the opposition to interracial marriage. In another odd example, on page 533 problem 51 asks students to graph "Percentage who don't approve of Marriage

equity by generation along with teenage who won't by sum. write 1m not sure this specifically applies to critical race theory, because it involves LGBTQ military servicemembers. On page 281, exercises 27-28 ask students to

1. Pg. 933 uses late 1700s report to talk about population growth and food shortages. Subject is melancholy and based on something predicted in the 1700s.

Thomas Malthus on Population Growth

In the late 1700s, the British economist Thomas Malthus presented a report that criticized those who thought that life was going to continue to improve for humans. Malthus put his report together quickly and titled it *An Essay on the Principle of Population as it Affects the Poor*. Malthus argued that because the human population tends to increase geometrically (1, 2, 4, 16, and so on) and that food supplies will increase arithmetically (1, 2, 3, 4, and so on), populations will eventually outstrip the food supply. Malthus suggested that there are other checks on population growth (and he considered these natural and a good thing). Nonetheless, he was convinced that poverty is inevitable and will continue.

Malthus used historical data to suggest that population growth has been doubling every twenty-five years. He also stated that in the 18th Century, Malthus surmised that the youth of the country along with the vast amount of areas conducive to farming would lead to a birth rate that exceeded most countries in the world.

On the other hand, there are two "checks" that control the population growth. One is the natural check, which is that the population will increase the death rate. The second type are called positive checks—these are checks that increase the death rate. Positive checks include war, famine, and natural disasters. Malthus believed that fear of famine was a major reason the birth rate may decrease. After all, who would want to have a child knowing the child may suffer from hunger, or worse, starvation?

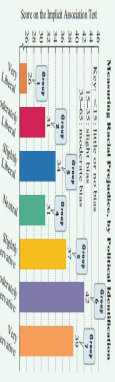

Preface – “Measuring racial prejudice by age (exercise set 2.1)”

New applications include student-loan debt (Exercise Set 1.2), movie rental options (Exercise Set 1.3), impediments to academic performance (Section 2.1), measuring racial prejudice, by age (Exercise Set 2.1),

Page R218, #103 & #104 measuring levels of racial prejudice by age and political identification. This chart shows that people are prejudiced if they are conservative.

104. The bar graph at the top of the next column shows the differences among political identification groups on the Implicit Association Test that measures levels of racial prejudice. Higher scores indicate stronger bias.

Application Exercises

104. The bar graph shows the differences among age groups on the Implicit Association Test that measures levels of racial prejudice. The data can be described by the following polynomial model of degree 3:

$$S = 0.2x^3 - 1.5x^2 + 3.4x + 28$$

In this polynomial model, S represents the score on the Implicit Association Test for age group x . Simplify the expression for the score on the Implicit Association Test for the group in the score displayed by the bar graph?

Shown in a rearranged coordinate system is the graph of the Implicit Association Test, by age group. Identify your solution from part (a) on a point on the graph.

Page 56. Measuring racial prejudice, by age. Emphasis that racism is embedded in American society dependent on age.

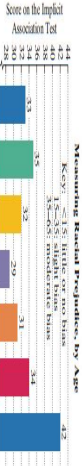

Application Exercises

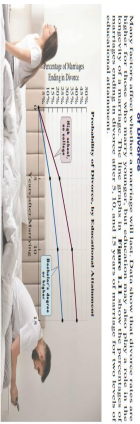

The bar graph shows the differences among age groups on the Implicit Association Test that measures levels of racial prejudice. The data can be described by the following polynomial model of degree 3:

$$S = 0.2x^3 - 1.5x^2 + 3.4x + 28$$

In this polynomial model, S represents the score on the Implicit Association Test for age group x . Simplify the expression for the score on the Implicit Association Test for the group in the score displayed by the bar graph?

Shown in a rearranged coordinate system is the graph of the Implicit Association Test, by age group. Identify your solution from part (a) on a point on the graph.

7. Page 828, section 12.6. Lesson talks about the relationship between education and prejudice. No source for the data, no explanation of type of prejudice.

Scatter Plots and Correlation
Is there a relationship between education and prejudice? With increased education, does a person's level of prejudice tend to decrease? Notice that we are interested in two quantities—years of education and level of prejudice. For each person in our sample, we will record the number of years of school completed and the score on a test measuring prejudice. Higher scores on this 1-to-10 test indicate greater prejudice. Using x to represent years of education and y to represent scores on a test measuring prejudice, **Table 12.17** shows these two quantities for a random sample of ten people.

TABLE 12.17 Recording Two Quantities in a Sample of Ten People

Respondent	A	B	C	D	E	F	G	H	I	J
Years of education (x)	12	5	14	13	8	10	16	11	12	4
Score on prejudice test (y)	1	7	2	3	5	4	1	2	3	10

8. pg. 198 AI Gore/Rush Limbaugh argument

This figure shows the relationship between the level of racial prejudice and the number of years of education completed for a random sample of ten people. Higher scores indicate stronger bias.

11. pg. 793 Chart displaying US median income by race and gender is from 2015 data

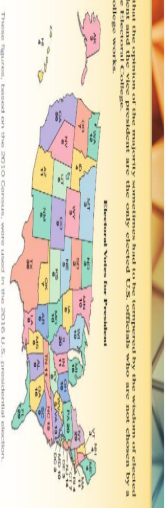

12. pg. 411 lesson talks about how modern emphasis on ideal body shape is “major cause of eating disorders among adolescent women” no factual data given.

TELEVISION, MOVIES, AND MAGAZINES PLACE GREAT EMPHASIS ON PHYSICAL BEAUTY. OUR CULTURE emphasizes physical appearance to such an extent that it is a central factor in the perception and judgment of others. The modern emphasis on thinness as the ideal body shape has been suggested as a major cause of eating disorders among adolescent women.

Subject: Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,
Rachel

RE: FL Bid 390 enVision Florida B.E.S.T. Mathematics Grade 7 (Copyright 2023, the “Product”) submitted for the 2021-2022 Adoption Year: K-12 Mathematics (the “Bid”)

Dear Sir/Madam:

I am Senior Vice President and General Counsel of Savvas Learning Company LLC. In accordance with Rule 28-106.201 of the Florida Administrative Code, Savvas hereby formally requests an appeal of the results of the instructional materials adoption process for the above referenced Bid and the recent inclusion of the enVision Florida B.E.S.T. Mathematics Grade 7 Product on the 2021-2022 Not Recommended List on the FDOE instructional materials website page.

As requested, the attached materials contain a specific rebuttal of the findings from the FDOE that were sent to us on April 21st regarding the Grade 7 Product and its alleged non-conformity to Florida B.E.S.T. standards and/or the prohibition of special topics of concern. Savvas believes it has met all requirements of the Bid as per the attached rebuttal.

We specifically request that the Product be promptly placed on the approved Adoption List for the Bid based on the information we have provided. We would very much appreciate your expedited review of this appeal so that Savvas can serve Florida schools and students with these requested instructional materials. Please let us know any next steps to resolve this matter.

Sincerely,

A handwritten signature in black ink that reads "Young J. Yoo".

Young J. Yoo (“Andy”)
SVP, General Counsel
Savvas Learning Company LLC

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

Publisher Summary:
enVision Florida B.E.S.T. Mathematics, Grade 7 was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

Part 1 - Inconsistency of Reviews

We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T. courses* were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

Savvas Program	Number of 5-Point Ratings for Standards Benchmarks (by both reviewers)	Percentage of 5-Point Ratings for Standards Benchmarks
Grade 7	3	3%
Grade 6	93	85%
Grade 8 Pre-Algebra	85	77%
Accelerated Grade 6	107	75%
Accelerated Grade 7	141	99%

below.

Subject: Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,
Rachel

RE: FL Bid 390 enVision Florida B.E.S.T. Mathematics Grade 7 (Copyright 2023, the “Product”) submitted for the 2021-2022 Adoption Year: K-12 Mathematics (the “Bid”)

Dear Sir/Madam:

I am Senior Vice President and General Counsel of Savvas Learning Company LLC. In accordance with Rule 28-106.201 of the Florida Administrative Code, Savvas hereby formally requests an appeal of the results of the instructional materials adoption process for the above referenced Bid and the recent inclusion of the enVision Florida B.E.S.T. Mathematics Grade 7 Product on the 2021-2022 Not Recommended List on the FDOE instructional materials website page.

As requested, the attached materials contain a specific rebuttal of the findings from the FDOE that were sent to us on April 21st regarding the Grade 7 Product and its alleged non-conformity to Florida B.E.S.T. standards and/or the prohibition of special topics of concern. Savvas believes it has met all requirements of the Bid as per the attached rebuttal.

We specifically request that the Product be promptly placed on the approved Adoption List for the Bid based on the information we have provided. We would very much appreciate your expedited review of this appeal so that Savvas can serve Florida schools and students with these requested instructional materials. Please let us know any next steps to resolve this matter.

Sincerely,

A handwritten signature in cursive script that reads "Young J. Yoo".

Young J. Yoo (“Andy”)
SVP, General Counsel
Savvas Learning Company LLC

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

Publisher Summary:
enVision Florida B.E.S.T. Mathematics, Grade 7 was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

Part 1 - Inconsistency of Reviews
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

Savvas Program	Number of 5-Point Ratings for Standards Benchmarks (by both reviewers)	Percentage of 5-Point Ratings for Standards Benchmarks
Grade 7	3	3%
Grade 6	93	85%
Grade 8 Pre-Algebra	85	77%
Accelerated Grade 6	107	75%
Accelerated Grade 7	141	99%

below. Procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those not warrant the discrepancy in ratings. Examples of these discrepancies are provided

Benchmark	Grade 7 Reviewer 1 (Champion)	Grade 7 Reviewer 2 (Pitts)	Grade 6 Accelerated Reviewer 1	Grade 6 Accelerated Reviewer 2

Clarification 3: Problems include inequalities where the variable may be on either side of the inequality symbol.</p>	<p>Presents one and two step inequalities. They are represented algebraically and graphically. Required forms of inequalities are used.</p>	<p>Benchmark is covered, more examples of solving different types of inequalities (relating them back to equations) are needed.</p>	<p>The highlighted lessons align to the benchmark.</p>	<p>This standard is taught well</p>

inequality symbol. Additional instruction and practice opportunities can be found in the Topic Review (pp. 289–290).

11 As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

<p>MA.7.AR.3.2 Apply previous understanding of ratios to solve real-world problems involving proportions.</p> <p>Example: Scott is mowing lawns to earn money to buy a new gaming system and knows he needs to mow 35 lawns to earn enough money. If he can mow 4 lawns in 3 hours and 45 minutes, how long will it take him to mow 35 lawns? Assume that he can mow each lawn in the same amount of time.</p> <p>Example: Ashley normally runs 10-kilometer races which is about 6.2 miles. She wants to start training for a half-marathon which is 13.1 miles. How many kilometers will she run in the half-marathon? How does that compare to her normal 10K race distance?</p>	4	3	3	5
	<p>real world problems involving proportional relationships are used-time and money, and recipes</p>	<p>Ratios are more tied to percent problems rather than proportion problems (although proportions are used to solve).</p>	<p>The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.</p>	<p>This standard is taught very well</p>

-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).
 The score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

Subject: Fwd: HMH Florida's B.E.S.T. Go Math! K-5: NOW APPROVED
Attachment(s): "image001.gif"

Cathy and Lauren,

I am forwarding an email sent to me by my elementary principal, which was sent to my principal by a representative from Houghton Mifflin Harcourt. The information received was that FLDOE has now approved HMH's Go Math to be included on the state adopted textbook list. Will you confirm this as true for K-5?

Also, we are only using the consumable workbooks and teacher's editions of the HMH Go Math curriculum. With that being said, were there any issues with the consumables, or were the issues only with the teacher's editions and other materials included in the Go Math curriculum? The reason I am asking is ... we received the consumables from HMH about the time FLDOE announced that HMH Go Math was not an approved publisher for math curriculum adoption. If part of the reason for rejecting HMH Go Math included content in the consumable materials, we will need to reorder. If there was nothing wrong with the information in the consumables, we have what we need to begin the next school year.

I appreciate your help in confirming this for me.

Good Afternoon! HMH GO Math is now completely approved by the Florida DOE. They have not confirmed when they will update their website, but you are free to give them a call to confirm. We should have a legal document this afternoon showing resolution to this appeal and full approval. Please let me know if you have any questions or if I can help you in any way.

Sincerely,

Kathy

Hi Lauren,

I just left you a voicemail regarding the ISBNs on Math Nation's materials submitted for adoption. One of our district partners let me know that when they are trying to complete the form that is due 4/1 that the ISBN is not showing results. Please give me a call when you have a moment, 321-446-4556.

Thanks,

Ashley Fieldman

Cc: Ashley Fieldman <ashley@mathnation.com>, "Hamilton, Lauren" <Lauren.Hamilton@fldoe.org>, "Seeds, Cathy" <Cathy.Seeds@fldoe.org>, "Rivers1, Angelia" <Angelia.Rivers1@fldoe.org>, Shawn Wigg <shawn@mathnation.com>

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.
In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular,

where we received a 4.6 score.
However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers – providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,
Ethan

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has "7th grade math" listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

I'm wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and

8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,
Ashley

Subject: Fwd: Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated

Hi Cathy,
Could we have a meeting about this Math Nation 7th Accelerated issue below, please? It's causing enormous disruption with school districts.
We will make ourselves available 24/7.

Thanks very much.
Ethan

Begin forwarded message:

From: Ethan Fieldman <ethan@mathnation.com>
Subject: Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated
Date: April 18, 2022 at 5:33:22 PM EDT
To: "Baumbach, Amber" <Amber.Baumbach@fldoe.org>
Cc: Ashley Fieldman <ashley@mathnation.com>, "Hamilton, Lauren" <Lauren.Hamilton@fldoe.org>, "Seeds, Cathy" <Cathy.Seeds@fldoe.org>, "Rivers1, Angelia" <Angelia.Rivers1@fldoe.org>, Shawn Wigg <shawn@mathnation.com>

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers' providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then weâ€™d like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,
Ethan

Lesson 2-2

Solve Equations Involving Roots

Learn Use Square Roots to Solve Equations

You can solve equations by using inverse operations. Inverse operations undo each other. Squaring and taking a square root are inverse operations.

Square a Number

$$9^2 = \square$$

Take the Square Root

$$\sqrt{81} = \square$$

To solve an equation of the form $x^2 = p$ for x , undo the operation of squaring x by taking the square root of each side.

$$x^2 = p$$

Write the equation.

$$\pm\sqrt{x^2} = \pm\sqrt{p}$$

Take the square root of each side.

$$x = \pm\sqrt{p}$$

Simplify.

There will be two solutions, a positive square root and a negative square root.

B.E.S.T. Standards

MA.8.AR.2.3

MA.8.NSO.1.7

Example 1 Use Square Roots to Solve Equations

Solve $t^2 = 169$.

$$t^2 = 169$$

Write the equation.

$$\pm\sqrt{t^2} = \pm\sqrt{169}$$

Take the square root of each side.

$$t = \pm \square$$

Definition of square root

$$t = 13 \text{ or } -13$$

Simplify.

So, the solutions to the equation are _____ and _____.

Check

Solve $y^2 = 144$.

You can complete **Extra Examples** and **Checks** online.

Talk About It!

Why is the solution to the equation both positive and negative?

Copyright © McGraw Hill

Program: FL RM	Component: SE LSN	PDF Pass
Vendor: SPi-Global	Grade: 8	

Example 2 Use Square Roots to Solve Equations

The aspect ratio of a hang glider allows it to glide through the air. The formula for the aspect ratio R is $R = \frac{s^2}{A}$, where s is the wingspan and A is the area of the wing.

What is the wingspan of a hang glider if its aspect ratio is 4.5 and the area of the wing is 50 square feet?

$$R = \frac{s^2}{A}$$

Write the equation.

$$4.5 = \frac{s^2}{50}$$

Replace R with 4.5 and A with 50.

$$(50)4.5 = \frac{s^2}{50}(50)$$

Multiply each side by 50.

$$\square = s^2$$

Simplify.

$$\sqrt{\square} = s$$

Take the square root of each side.

$$\square = s$$

Definition of square root

So, the wingspan of the hang glider is 15 feet.

Talk About It!

Why is -15 not an answer?

Check

The formula $A \approx 3.14r^2$ can be used to determine the approximate area of a circle where A is the area and r is the radius. If the area of a pizza is approximately 314 square inches, what is the radius?

Show your work here

Learn Use Cube Roots to Solve Equations

To solve an equation of the form $x^3 = p$ for x , undo the operation of cubing x by taking the cube root of each side.

$$\begin{aligned}x^3 &= p && \text{Write the equation.} \\ \sqrt[3]{x^3} &= \sqrt[3]{p} && \text{Take the cube root of each side.} \\ x &= \sqrt[3]{p} && \text{Simplify.}\end{aligned}$$

Example 3 Use Cube Roots to Solve Equations

Solve $h^3 = -64$.

$$\begin{aligned}h^3 &= -64 && \text{Write the equation.} \\ \sqrt[3]{h^3} &= \sqrt[3]{-64} && \text{Take the cube root of each side.} \\ h &= \square && \text{Definition of cube root}\end{aligned}$$

So, the solution to the equation is -4 .

Check

Solve $m^3 = 8$.

Talk About It!

Why is the solution negative?

Example 4 Use Cube Roots to Solve Equations

Dylan has a planter in the shape of a cube that holds 125 cubic inches of potting soil.

Solve the equation $s^3 = 125$ to find the side length s of the container. Check your solution.

To solve an equation of the form $x^3 = p$, take the cube root of each side of the equation.

$$s^3 = 125 \quad \text{Write the equation.}$$

$$\sqrt[3]{s^3} = \sqrt[3]{125} \quad \text{Take the cube root of each side.}$$

$$s = 5 \quad \text{Definition of cube root}$$

So, each side of the container is 5 inches.

Check the solution.

$$s^3 = 125 \quad \text{Write the equation.}$$

$$(5)^3 \stackrel{?}{=} 125 \quad \text{Replace } s \text{ with } 5.$$

$$125 = 125 \quad \text{Simplify. The solution, } 5, \text{ is correct.}$$

Check

A box that is shaped like a cube has a volume of 64 cubic centimeters. Solve $s^3 = 64$ to find the length s of one side of the box.

Practice

Solve each equation. (Example 1)

1. $x^2 = 4$

2. $m^2 = 144$

3. $w^2 = 25$

4. The basin of a water fountain is square-shaped and has an area of 16 square feet. Solve $s^2 = 16$ to find the length s of one side of the basin. (Example 2)

Solve each equation. (Example 3)

5. $k^3 = -1$

6. $d^3 = 27$

7. $g^3 = -125$

8. The mineral *pyrite* can sometimes form into cube-shaped crystals. The cube shown has a volume of 27 cubic inches. Solve $s^3 = 27$ to find the length s of one side of the pyrite. (Example 4)

9. Consider the pattern shown in the table of positive x and x^2 values.

x	x^2
3	9
30	900
300	90,000

Using the pattern, solve the equation $x^2 = 9,000,000$.

11. If $x^2 = 16$, find x^3 .

10. Consider the pattern shown in the table of positive x and x^2 values.

x	x^2
4	16
0.4	0.16
0.04	0.0016

Using the pattern, solve the equation $x^2 = 0.000016$.

12. If $x^3 = 125$, find x^2 .

Apply

13. The height h in feet that a pole vaulter can reach can be estimated using the formula $h = \frac{v^2}{20}$, where v is the velocity of the athlete in feet per second. If the height for a women's pole vault is about 9.8 feet, about how fast was the holder running? How far will the pole vaulter run in 2 seconds?
14. The formula $h = 16t^2$ describes the time t in seconds that it takes for an object to fall from a height of h feet. An object is dropped from a height of 1,600 feet. How many seconds does it take to reach the ground?
15. **ASSESS REASONABLENESS** Deisha says that the equation $x^2 = -25$ is unable to be solved. Do you agree? Why or why not?
16. **BUILD PERSEVERANCE** Solve the equation $5x^2 - 10 = 70$.
17. Determine if the following statement is *true* or *false*. If *false*, give a counterexample. *The cube root of zero is zero.*
18. **BUILD PERSEVERANCE** Solve the equation $x^2 = 1.21$.

Clear All Check Answer

Learn Write and Solve Equations with Variables on Each Side

You can represent many real-world problems using equations.

A music streaming website offers two plans. The first plan costs \$0.99 per song plus an initial fee of \$25. The second plan costs \$1.50 per song plus an initial fee of \$10. For how many songs will the two plans cost the same?

Words
a fee of \$25 plus \$0.99 per song is the same as a fee of \$10 plus \$1.50 per song
Variables
Let s represent the number of songs.
Equation
$25 + 0.99s = 10 + 1.50s$

Talk About It!

What will a solution to the equation represent within the context of the problem?

Copyright © McGraw Hill

You can complete **Extra Examples** and **Checks** online.

Example 1 Write and Solve Equations with Variables on Each Side

Green's Gym charges a one-time application fee of \$50 plus \$30 per session for a personal trainer. Breakout Gym charges an annual fee of \$250 plus \$10 for each session with a trainer.

For how many sessions in the first year is the cost of the two plans the same? Write and solve an equation to represent this problem. Check your solution.

Think About It!

What is the unknown in this problem?

Part A Write an equation to represent the problem.

Let s represent the number of _____. Write an equation that models when the cost of the two plans are equal to each other.

Green's Gym		Breakout Gym
$50 + \square =$	$=$	$\square + 10s$

Part B Solve the equation.

$50 + 30s = 250 + 10s$	Write the equation.
$- 10s = - 10s$	Subtraction Property of Equality
<hr/>	
$50 + \square = \square$	Simplify.
$- 50 = - 50$	Subtraction Property of Equality
<hr/>	
$\square = \square$	Simplify.
$\frac{20s}{20} = \frac{200}{20}$	Division Property of Equality
$s = \square$	Simplify.

So, the cost is the same for 10 personal trainer sessions.

Check the solution.

Green's Gym		Breakout Gym
$50 + 30s = 50 + 30(10)$	Replace s with 10.	$250 + 10s = 250 + 10(10)$
$= 50 + 300$	Multiply.	$= 250 + 100$
$= \square$	Simplify.	$= \square$

Talk About It!

Suppose a customer plans to have a personal training session once a month, for one year. Which gym is more cost effective for them to choose? Explain.

Check

A container has 130 gallons of water and is being filled at a rate of $\frac{1}{4}$ gallon each second. Another container has 200 gallons of water and is draining at a rate of $\frac{1}{3}$ gallon each second.

Part A

Which equation could be used to determine s , the number of seconds, when the two containers have the same amount of water?

- A. $130 + \frac{1}{3}s = 200 - \frac{1}{4}s$ C. $200 + \frac{1}{3}s = 130 - \frac{1}{4}s$
B. $130 + \frac{1}{4}s = 200 - \frac{1}{3}s$ D. $4 + \frac{1}{130}s = 3 - \frac{1}{200}s$

Part B

After how many seconds will the two containers have the same amount of water?

Example 2 Write and Solve Equations with Variables on Each Side

Ryan's Rentals charges \$40 per day plus \$0.25 per mile. Road Trips charges \$25 per day plus \$0.45 per mile.

For what number of miles is the daily cost of renting a car the same? Write and solve an equation to represent this problem. Check your solution.

Part A Write an equation.

Let m represent the number of _____. Write an equation that models when the cost of the two rentals are equal.

Ryan's Rentals		Road Trips		
$40 +$	<input type="text"/>	$=$	<input type="text"/>	$+ 0.45m$

Copyright © McGraw Hill

(continued on next page)

Talk About It!

Which company is more cost effective to use if you plan to drive 50 miles in one day? 150 miles? Explain.

Part B Solve the equation.

$$40 + 0.25m = 25 + 0.45m$$
$$- 0.25m = - 0.25m$$

$$\boxed{} = 25 + \boxed{}$$

$$- 25 = - 25$$

$$\boxed{} = \boxed{}$$

$$\frac{15}{0.20} = \frac{0.20m}{0.20}$$

$$\boxed{} = m$$

Write the equation.

Subtraction Property of Equality

Simplify.

Subtraction Property of Equality

Simplify.

Division Property of Equality

Simplify.

So, the cost is the same for 75 miles in one day.

Check the solution.

Ryan's Rentals

$$40 + 0.25m$$

$$= 40 + (0.25)75$$

$$= 40 + \boxed{}$$

$$= \boxed{}$$

Replace m with 75.

Multiply.

Simplify.

Road Trips

$$25 + 0.45m$$

$$= 25 + (0.45)75$$

$$= 25 + \boxed{}$$

$$= \boxed{}$$

Check

Annie is comparing the cost to ship a package. One shipping company charges \$7 for the first pound and \$0.20 for each additional pound a package weighs. Another shipping company charges \$5 for the first pound and \$0.30 for each additional pound.

Part A

Which equation could be used to determine p , the number of pounds, when the costs for the two shipping companies are the same?

A. $7 + 0.30p = 5 + 0.20p$

C. $7 + 0.20p = 5 + 0.30p$

B. $0.20 + 7p = 0.30 + 5p$

D. $7 + 20p = 5 + 30p$

Part B

For how many pounds is the cost of the two shipping companies the same?

Dilations

Learn Dilations and Scale Factor

B.E.S.T. Standards
MA.8.GR.2.3

A **dilation** is a transformation which is similar to a scale drawing. It uses a **scale factor** to enlarge or reduce a figure proportionally. Scale factor is the ratio of the side lengths of the image to the side lengths of the preimage.

The preimage and the image are the same shape, but not necessarily the same size. If the scale factor is greater than one, the image is enlarged. If the scale factor is between 0 and 1, the image is reduced. If the scale factor is equal to one, the image is the same size as the preimage.

The scale factor of the dilation shown is found using the ratio of a side length of $\triangle A'B'C'$ to a side length of $\triangle ABC$. The notation CB represents the length of the line segment with endpoints C and B .

Copyright © McGraw Hill
Cort.Boritolami/Spores Images/Blend Images

$$\frac{C'B'}{CB} = \frac{4}{2} \text{ or } \square$$

The ratio of $C'B'$ to CB is 4:2, or 2. This means the scale factor used to dilate the figure is 2. Since the scale factor is greater than 1, the image was enlarged.

The map of the United States is a dilation of the actual United States. The map's key gives the scale factor, which represents the ratio of one length on the map to the corresponding length in the actual United States.

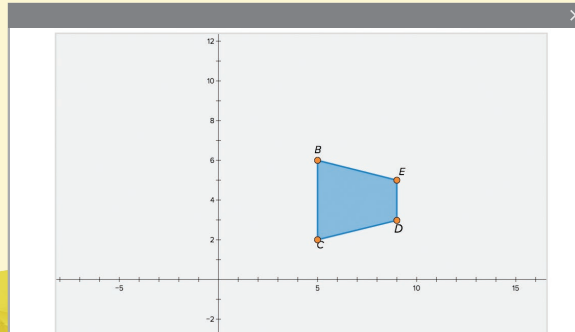

Talk About It!
Is the ratio of $A'B'$ to AB equivalent to the ratio of $C'B'$ to CB ? Explain.

Handwritten notes area with horizontal lines for writing.

Explore Dilate Figures on the Coordinate Plane

INQUIRY How does the scale factor change the size and coordinates of a figure after a dilation relative to the origin?

Learn Dilations on a Coordinate Plane

A dilation is a transformation that enlarges or reduces a figure by a scale factor relative to a center point. That point is called the **center of dilation**.

Talk About It!

On the model, why is $k = 2$?

Words

When the center of dilation in the coordinate plane is the origin, each coordinate of the preimage is multiplied by the scale factor k to find the coordinates of the image.

Model

$$(x, y) \rightarrow (2x, 2y)$$

Variables

$$(x, y) \rightarrow (kx, ky)$$

Copyright © McGraw Hill

(continued on next page)

Program: FL RM	Component: SE LSN	PDF Pass
Vendor: SPi-Global	Grade: 8	

The value for the scale factor k determines whether the dilation is an enlargement, a reduction, or if the dilation does not alter the size.

Enlargement	
Words	Model
A dilation with a scale factor of k will be an image larger than the original if $k > 1$.	
Symbols	
$(x, y) \rightarrow (2x, 2y)$	
Reduction	
Words	Model
A dilation with a scale factor of k will be an image smaller than the original if $0 < k < 1$.	
Symbols	
$(x, y) \rightarrow \left(\frac{1}{2}x, \frac{1}{2}y\right)$	
No Change	
Words	Model
A dilation with a scale factor of k will be an image the same size as the original if $k = 1$.	
Symbols	
$(x, y) \rightarrow (1x, 1y)$	

Copyright © McGraw Hill

Talk About It!

Determine whether each scale factor enlarges, reduces, or keeps a figure the same size. Explain.

$\frac{2}{3}, 6, 1$

You can complete **Extra Examples** and **Checks** online.

Example 1 Graph Dilations

Triangle ABC has vertices $A(-2, 1)$, $B(-4, 5)$, and $C(3, 2)$.

Graph the image of the figure after a dilation with a scale factor of 2.

Think About It!

Is the dilation an enlargement or a reduction?

Step 1 Find the coordinates of the image.

The coordinate notation of the dilation is $(x, y) \rightarrow (2x, 2y)$. Multiply the coordinates of each vertex by 2.

$$A(-2, 1) \rightarrow (2 \cdot -2, 2 \cdot 1) \rightarrow A'(\quad, \quad)$$

$$B(-4, 5) \rightarrow (2 \cdot -4, 2 \cdot 5) \rightarrow B'(\quad, \quad)$$

$$C(3, 2) \rightarrow (2 \cdot 3, 2 \cdot 2) \rightarrow C'(\quad, \quad)$$

Talk About It!

Compare and contrast the image and the preimage.

Step 2 Use the coordinates of $A'B'C'$ to graph the image on the coordinate plane.

Check

Triangle DEF has vertices $D(-2, -1)$, $E(0, 1)$, and $F(1, -3)$. Graph the triangle and its image after a dilation with a scale factor of 3.

Show your work here

Copyright © McGraw Hill

Example 2 Graph Dilations

Triangle JKL has vertices $J(3, 8)$, $K(10, 6)$, and $L(8, 2)$.

Graph the image after a dilation with a scale factor of $\frac{1}{2}$.

Step 1 Find the coordinates of the image.

The coordinate notation of the dilation is $(x, y) \rightarrow (\frac{1}{2}x, \frac{1}{2}y)$.

Multiply the coordinates of each vertex by $\frac{1}{2}$.

$$J(3, 8) \rightarrow \left(\frac{1}{2} \cdot 3, \frac{1}{2} \cdot 8\right) \rightarrow J'\left(\frac{3}{2}, 4\right)$$

$$K(10, 6) \rightarrow \left(\frac{1}{2} \cdot 10, \frac{1}{2} \cdot 6\right) \rightarrow K'(\quad, \quad)$$

$$L(8, 2) \rightarrow \left(\frac{1}{2} \cdot 8, \frac{1}{2} \cdot 2\right) \rightarrow L'(\quad, \quad)$$

Step 2 Use the coordinates of $J'K'L'$ to graph the image on the coordinate plane.

Talk About It!

Compare and contrast the image and the preimage.

Check

Triangle EFG has vertices $E(-6, 9)$, $F(3, 6)$, and $G(-3, 3)$. Graph the triangle and its image after a dilation with a scale factor of $\frac{1}{3}$.

Show your work here

Copyright © McGraw Hill

Think About It!

Which figure is the preimage? How does the image compare in size to the preimage?

Example 3 Describe Dilations

Use coordinate notation to describe the dilation.

Compare the coordinates of the preimage and the image.

$$A(\quad, \quad) \rightarrow A'(\quad, \quad)$$

$$B(\quad, \quad) \rightarrow B'(\quad, \quad)$$

$$C(\quad, \quad) \rightarrow C'(\quad, \quad)$$

The coordinates of the image are half of the coordinates of the preimage. The scale factor is $\frac{1}{2}$. So, the dilation is a reduction and the coordinate notation is $(x, y) \rightarrow (\frac{1}{2}x, \frac{1}{2}y)$.

Check

Use coordinate notation to describe the dilation.

Show your work here

4. Rectangle $PQRS$ has vertices $P(-3, 3)$, $Q(6, 3)$, $R(6, -3)$, and $S(-3, -3)$. Graph the image of the figure after a dilation with a scale factor of $\frac{1}{3}$. (Example 2)

5. Use coordinate notation to describe the dilation. (Example 3)

6. Keisha used a photo that measured 4 inches by 6 inches to make a copy that measured 8 inches by 12 inches. What is the scale factor of the dilation?

Copyright © McGraw Hill

Apply

For Exercises 7 and 8, use the graph of Rectangle $ABCD$.

- Suppose the graph represents the scale drawing for a fence that Tara is building for a new city dog park. Each unit on the graph represents 12 yards. After studying the plans, Tara decides to build a fence that encloses a smaller area. If Tara dilates Rectangle $ABCD$ by a scale factor of 0.75, and fencing costs \$6.39 per yard, how much will she spend on fencing?
- Suppose the graph of Rectangle $ABCD$ shows the scale drawing for a safety fence that Kenny is setting up around a construction area. Each unit on the graph represents 25 feet. After studying the plans, Kenny decides to build a fence that encloses a larger area. If Kenny dilates Rectangle $ABCD$ by a scale factor of 2.5, and fencing costs \$5.25 per foot, how much will he spend on fencing?

- BUILD PERSEVERANCE** The coordinates of two triangles are shown in the table. Is XYZ a dilation of JKL ? Write an argument that can be used to defend your solution.

$\triangle JKL$		$\triangle XYZ$	
J	(a, b)	X	$(3a, 6b)$
K	(c, d)	Y	$(3c, 6d)$
L	(a, d)	Z	$(3a, 6d)$

- FIND THE ERROR** Kelly is finding the coordinates of the image of a polygon with vertices $W(2, 2)$, $X(2, 4)$, $Y(4, 4)$, and $Z(4, 2)$ after a dilation with a scale factor of 3. Describe her error and explain how to correct it.

The coordinates of $W'X'Y'Z'$ are $W'(2, 6)$, $X'(2, 12)$, $Y'(4, 12)$, and $Z'(4, 6)$.

- Determine whether the following statement is *always*, *sometimes*, or *never* true. Write an argument that can be used to defend your solution.

A preimage and its dilated image are the same shape but different sizes.

Similarity and Transformations

Learn Similarity

In a dilation, the scale factor is the ratio of the side lengths of the image to the side lengths of the preimage. When the scale factor is not equal to one, a dilation changes the size of a figure, but does not change the shape of a figure. If the size is changed, the image and the preimage are similar, and *not* congruent. When the scale factor is one, the figures are congruent.

B.E.S.T. Standards
MA.8.GR.2.2

The following are dilations of rectangle $ABCD$.

Scale Factor 0.5	Scale Factor 1.0	Scale Factor 1.5

You can show two figures are **similar** if the second can be obtained from the first by a dilation with a scale factor not equal to one.

Since a dilation does not change the shape of a figure, the image and the preimage are similar.

Parallelogram $E'F'G'H'$ is the dilated image of parallelogram $EFGH$, with a scale factor of 2.

Copyright © McGraw Hill

(continued on next page)

Talk About It!

Compare and contrast using transformations to prove that two triangles are congruent versus using transformations to prove that two triangles are similar.

You can use transformations to determine if $\triangle ABC$ is similar to $\triangle DEF$.

Write ratios comparing the lengths of each side.

$$\frac{DF}{AC} = \frac{10}{5} \text{ or } \frac{2}{1} \quad \frac{EF}{BC} = \frac{8}{4} \text{ or } \frac{2}{1} \quad \frac{DE}{AB} = \frac{6}{3} \text{ or } \frac{2}{1}$$

Because the ratios of the corresponding sides are the same, $\triangle DEF$ is the dilated image of $\triangle ABC$ with a scale factor of 2.

So, the triangles are similar because $\triangle ABC$ can be mapped onto $\triangle DEF$ by using a dilation with a scale factor of 2.

Example 1 Determine Similarity

Are the two figures similar? If so, describe the dilation that maps $\triangle DEF$ onto $\triangle GHI$. If not, explain why they are not similar.

Part A Determine if the two figures are similar.

Step 1 Determine if a dilation occurred by examining the ratios of the side lengths.

$$\frac{GH}{DE} = \frac{8}{4} \text{ or } \square \quad \frac{GI}{DF} = \frac{6}{3} \text{ or } \square$$

$$\frac{HI}{EF} = \frac{10}{5} \text{ or } \square$$

Because the ratios are equal, corresponding sides are proportional. So, a dilation with a scale factor of 2 is a possible transformation that maps $\triangle DEF$ onto $\triangle GHI$.

Example 2 Determine Similarity

Are the two figures similar? If so, describe a dilation that maps rectangle $WXYZ$ onto rectangle $PQRS$. If not, explain why they are not similar.

Write ratios comparing the lengths of each side of the rectangles.

$$\frac{SP}{ZW} = \frac{\square}{\square} \quad \frac{PQ}{WX} = \frac{\square}{\square}$$

$$\frac{QR}{XY} = \frac{\square}{\square} \quad \frac{RS}{YZ} = \frac{\square}{\square}$$

The ratios are not equivalent. So, the two rectangles are not similar because a dilation did not occur.

Check

Are the two figures similar? If so, describe a dilation that maps trapezoid $ABCD$ onto trapezoid $EFGH$. If not, explain why they are not similar.

Part A Determine if the figures are similar.

Part B If the figures are similar, describe a dilation that maps trapezoid $ABCD$ onto trapezoid $EFGH$. If the figures are not similar, explain why they are not similar.

Show your work here

Learn Identify Scale Factor

Similar figures have the same shape, but may have different sizes. The sizes of the two similar figures are related to the scale factor of the dilation.

If the scale factor of the dilation is ...	then the dilated figure is ...
between 0 and 1	smaller than the original
equal to 1	the same size as the original
greater than 1	larger than the original

You can determine the scale factor of a dilation that maps one figure onto a similar figure.

Example 3 Identify Scale Factor

Square $ABCD$ is similar to square $EFGH$. Identify the scale factor of the dilation that maps square $ABCD$ onto square $EFGH$.

Since the figures are similar, a dilation occurred. Find the scale factor of the dilation.

Write the ratios comparing the side lengths.

$$\frac{EF}{AB} = \frac{\square}{\square} \quad \frac{FG}{BC} = \frac{\square}{\square}$$

$$\frac{GH}{CD} = \frac{\square}{\square} \quad \frac{HE}{DA} = \frac{\square}{\square}$$

So, the scale factor of the dilation is $\frac{1}{4}$.

Think About It!

Without calculating, is the scale factor of the dilation *between 0 and 1, equal to 1, or greater than 1?*

Check

Triangle ABC is similar to triangle XYZ . Identify the scale factor of the dilation that maps triangle ABC onto triangle XYZ .

Show your work here

Pause and Reflect

Compare and contrast *congruent figures* and *similar figures*. How are they alike? How are they different?

Record your observations here

Copyright © McGraw Hill

Example 4 Use the Scale Factor

Ken enlarges the photo shown by a scale factor of 2 for his web page. He then enlarges the web page photo by a scale factor of 1.5 to print. The original photo is 2 inches by 3 inches.

Carl Borralami/Spores Images/Blend Images

What are the dimensions of the print photo? Are the enlarged photos similar to the original?

Part A Find the dimensions.

Multiply each dimension of the original photo by 2 to find the dimensions of the web page photo.

$$2 \text{ in.} \times 2 = \underline{\hspace{2cm}} \text{ in.}$$

$$3 \text{ in.} \times 2 = \underline{\hspace{2cm}} \text{ in.}$$

So, the web page photo will be 4 inches by 6 inches.

Multiply the dimensions of that photo by 1.5 to find the dimensions of the print.

$$4 \text{ in.} \times 1.5 = \underline{\hspace{2cm}} \text{ in.}$$

$$6 \text{ in.} \times 1.5 = \underline{\hspace{2cm}} \text{ in.}$$

So, the printed photo will be 6 inches by 9 inches.

Part B Determine similarity.

Each enlargement was the result of a _____.

So, all three photos are similar.

Copyright © McGraw Hill

Talk About It!

Would the dimensions of the print be the same if Ken first dilated the photo by a scale factor of 1.5 and then by a scale factor of 2? Why or why not?

Check

An art show offers different-sized prints of the same painting. The original print measures 24 centimeters by 30 centimeters. A printer enlarges the original by a scale factor of 1.5, and then enlarges the second image by a scale factor of 3.

Part A

What are the dimensions of the largest print?

Part B

Are both of the enlarged prints similar to the original?

Show your work here

Pause and Reflect

How will you study the concepts in today's lesson? Describe some steps you can take.

Record your observations here

Copyright © McGraw Hill

Apply Careers

A designer enlarges an image with a length of 6 centimeters and width of 9 centimeters by a scale factor of 3. The designer decides that the enlarged image is too large and reduces it by a scale factor of 0.5. Will the final image fit into a rectangular space that has an area of 121 square centimeters? Explain your answer.

1. What is the task?

Make sure you understand exactly what question to answer or problem to solve. You may want to read the problem three times. Discuss these questions with a partner.

First Time Describe the context of the problem, in your own words.

Second Time What mathematics do you see in the problem?

Third Time What are you wondering about?

2. How can you approach the task? What strategies can you use?

Record your observations here

3. What is your solution?

Use your strategy to solve the problem.

Show your work here

4. How can you show your solution is reasonable?

Write About It! Write an argument that can be used to defend your solution.

Talk About It!

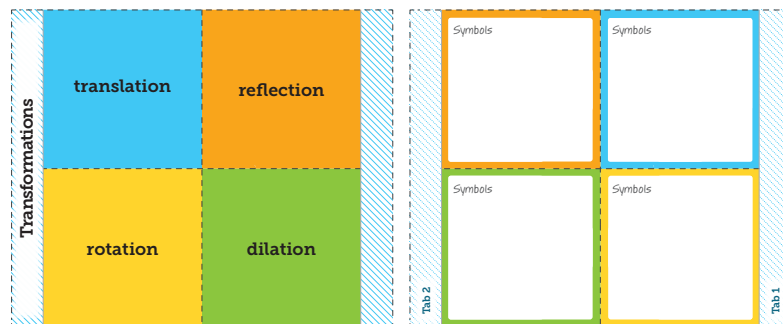

How did the properties of similar figures help you solve the problem?

Check

An artist enlarges a rectangular painting that has a length of 12 inches and width of 16 inches by a scale factor of 2. He then decides to reduce the enlarged image by a scale factor of 0.4. Will the final painting fit into a rectangular frame that has an area of 120 square inches? Write an argument that can be used to defend your solution.

Show your work here

 **Foldables** It's time to update your Foldable, located in the Module Review, based on what you learned in this lesson. If you haven't already assembled your Foldable, you can find the instructions on page FL1.

Copyright © McGraw Hill

Practice

Determine if each pair of figures is similar. If so, describe a dilation that maps one figure onto the other figure. If not, explain why they are not similar. (Examples 1 and 2)

1.

2.

3. Triangle ABC is similar to $\triangle XYZ$. Determine the scale factor of the dilation that maps $\triangle ABC$ onto $\triangle XYZ$. (Example 3)

4. Jenna is creating a mural for her bedroom wall. She would like to copy a picture that is 2 inches by 2.5 inches. She uses a copy machine to enlarge it by a scale factor of 4. Then she projects it on her wall by a scale factor of 12. What are the dimensions of the mural? Are the enlarged pictures similar to the original? (Example 4)

5. Which sequence of transformations can be used to show that two figures are similar but not necessarily congruent?

- A. dilation and rotation
- B. translation and reflection
- C. reflection and rotation
- D. rotation and translation

Copyright © McGraw Hill

Apply

6. A graphic designer enlarges a rectangular image with a length of 3 inches and width of 5 inches by a scale factor of 2. Then he decides that the enlarged image is too large and reduces it by a scale factor of 0.25. Will the final image fit into a rectangular space that has an area of 3.5 square inches? Justify your response.
7. An artist needs to reduce the size of a painting. The original dimensions of the painting are 12 inches by 20 inches. She reduces the painting by a scale factor of $\frac{1}{4}$. She then decides that the reduced image is too small and enlarges it by a scale factor of 2. Will the final image fit in a rectangular space that has an area of 55 square inches? Justify your response.

8. **BUILD PERSEVERANCE** Square $ABCD$ is similar to square $EFGH$ because a dilation with a scale factor of 2, followed by a translation to the right maps square $ABCD$ onto square $EFGH$.

- a. If you perform the translation first and then the dilation, will the squares still map onto one another? Explain.

- b. Describe a sequence of transformations that maps square $ABCD$ onto square $EFGH$, in which the first transformation is a translation.

9. **CREATE** Draw a two-dimensional figure. Then perform a series of two transformations on the figure. Which figures are congruent? Which figures are similar?

10. **FIND THE ERROR** A student concluded that rectangle $ABCD$ is similar to rectangle $EFGH$ because a dilation with a scale factor of 0.5 and a translation maps rectangle $ABCD$ onto rectangle $EFGH$. Find the student's mistake and correct it.

Subject: How can I help with your curriculum?

Hi Cathy,

I hope you are doing well and all settled in for the current school year. Believe it or not, I'm already thinking about 2022 and am curious if there are any courses or subject areas for which you are considering new texts. I'd be happy to send you copies to review or arrange a quick call.

Thanks, looking forward to hearing from you!

Jill

Subject: IM Appeals-Tracking
Attachment(s): "Tracking Spreadsheet.xlsx", "image001.png"

Hi Jim,

I have attached the tracking spreadsheet for appeals. Any issues with special topics are pasted on each publishers tab. All standards alignment issues are separate pdf's with reviewer evaluations.

Let me know if you need anything else!

20		Bid 397 - Mathematics for College Algebra		
21	Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	2	I found several places where CRT could be said to be present, albeit usually indirectly. (All page numbers are from the teacher version). On page 1, the books says that algebra is a language that describes the world and tells us about things including "racial bias." (It also says it will cover "ethnic diversity in the US", which it uses in a practice problem on page 91, but the example seems relatively harmless). On page 51, the book defines polynomials by the example of an "implicit" racial bias test (called Project Implicit) by which "2 million people have tested their racial prejudice... most groups' average scores fall between 'slight' and 'moderate' bias, but the differences among age groups are intriguing." The exercise problem is on page 61. The numbers come from Project Implicit, a real-world organization whose mission is to educate people that people and institutions unconsciously have implicit racial prejudice. On pages 214-215, problem 103 graphs people who support laws against interracial marriage by decade. However, unrelated to the graphs, the problem goes out of its way to mention the Supreme Court decision on same-sex marriage, making an analogy that opposing the legalization of same-sex marriage is like the opposition to interracial marriage. In another odd example, on page 533 problem 51 asks students to graph "Percentage who don't approve of Marriage

25	<p>1. Pg. 933 uses late 1700s report to talk about population growth and food shortages. Subject is melancholy and based on something predicted in the 1700s.</p>	<p>Thomas Malthus on Population Growth</p> <p>In the late 1700s, the British economist Thomas Malthus presented a report that criticized those who thought that life was going to continue to improve for humans. Malthus put his report together quickly and titled it <i>An Essay on the Principle of Population as it Affects the Future State of Europe, Asia, and America</i>. Malthus's <i>Essay</i> was one of the most influential works on the subject of population growth. Malthus argued that because the human population tends to increase geometrically (1, 2, 4, 16, and so on) and that food supplies will increase arithmetically (1, 2, 3, 4, and so on), populations will eventually outstrip the food supply. Malthus suggested that there are other checks on population growth (and he considered these natural and a good thing). Nonetheless, he was convinced that poverty is inevitable and will continue.</p> <p>Malthus used historical data to suggest that population growth has been doubling every twenty-five years. Malthus (who lived in the early 18th century) also surmised that the youth of the country along with the vast amount of areas conducive to farming would lead to a birth rate that exceeded most countries in the world.</p> <p>One of the checks that Malthus called preventive checks are checks that decrease the birth rate. The second type are called positive checks—these are checks that increase the death rate. Positive checks include war, famine, and natural disasters. Malthus believed that fear of famine was a major reason the birth rate may decrease. After all, who would want to have a child knowing the child may suffer from hunger, or worse, starvation?</p>	<p>equity by generation along with teenage who won't try sum... write 111 not sure this specifically applies to critical race theory, because it involves LGBTQ military servicemembers. <p>R210 States that most people have slight or moderate bias and this is dependent on age and political identification. Emphasis that racism is embedded in American society.</p>	<p style="text-align: center;">Adding and Subtracting Polynomials</p>  <p>What? Me? Racist? More than 2 million people have tested their racial prejudice using an online version of the Implicit Association Test. Most groups' average scores fall between "slight" and "moderate" bias, but the differences among groups, by age and by political identification, are intriguing.</p> <p>In this section's Exercise Set (Exercises 103 and 104), you will be working with models that measure bias:</p> $S = 0.3x^3 - 2.8x^2 + 6.7x + 30$ $S = -0.03x^3 + 0.2x^2 + 2.3x + 24.$		
<p>Pg. 48 again mentions the implicit association test and says, "most groups' average scores fall between slight and moderate bias. Emphasis that racism is embedded in American society."</p>	<p style="text-align: center;">How We Define Polynomials</p> <p>More than 2 million people have tested their racial prejudice using an online version of the Implicit Association Test. Most groups' average scores fall between "slight" and "moderate" bias, but the differences among age groups are intriguing.</p> <p>In this section's Exercise Set (Exercises 91 and 92), you will be working with a model that measures bias:</p> $S = 0.3x^3 - 2.8x^2 + 6.7x + 30.$ <p>In this model, S represents the score on the Implicit Association Test. (Higher scores indicate stronger bias.) The variable x represents age group.</p>  <p style="text-align: center;"><i>Old Dog ... New Chicks</i></p>		
<p>9. chapter 1 intro uses 2006 <i>An Inconvenient Truth</i> by Al Gore to push that humans cause global warming. Article is 15 yrs old and has been proven inaccurate</p>	<p>There is strong scientific consensus that human activities are changing the Earth's climate. Scientists now believe that there is a striking correlation between atmospheric carbon dioxide concentration and global temperature. As both of these variables increase at significant rates, there are warnings of a planetary emergency that threatens to condemn coming generations to a catastrophically diminished future.</p> <p>In this chapter, you'll learn to approach our climate crisis mathematically by creating formulas, called functions, that model data for average global temperature and carbon dioxide concentration over time. Understanding the concept of a function will give you a new perspective on many situations ranging from climate change to using mathematics in a way that is similar to making a movie.</p> <p><small>*Source: Al Gore, <i>An Inconvenient Truth</i>, Rodale, 2006; Time, April 3, 2006; <i>Falling Storm</i>, September 28, 2013</small></p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p>Here's where you'll find these applications:</p> <p>A mathematical model involving global warming is developed in Example 9 in Section 1.4. Using mathematics in a way that is similar to making a movie is discussed in the Blitzzer Bonus on page 225.</p> </div>		
<p>Pg. 156 Talks about probability of divorce. Context not relevant or meaningful.</p>	<p style="text-align: center;">EXERCISES Modeling Atmospheric and Sea Level Temperature</p> <p>1. DATA The following table shows the average annual temperature in degrees Fahrenheit for the city of San Francisco from 1990 to 2010. The data is modeled by the function $T(x) = 0.0001x^3 - 0.0012x^2 + 0.0023x + 54.5$, where $T(x)$ is the average annual temperature in degrees Fahrenheit and x is the number of years since 1990.</p>

It was wartime when the Ricardos found out Mrs. Ricardo was pregnant. Ricky Ricardo was drafted and made out a will, deciding that \$14,000 in a savings account was to be divided between his wife and his child-to-be. Rather strangely, and certainly with gender bias, Ricky stipulated that if the child were a boy, he would get twice the amount of the mother's portion. If it were a girl, the mother would get twice the amount the girl was to receive. We'll never know what Ricky was thinking of, for (as fate would have it) he did not return from the war. Mrs. Ricardo gave birth to twins—a boy and a girl. How was the money divided?</p>																																		
72	<p>23. pg. 437, questions regarding women losing \$435, 049 due to pay gap. Source is Time Magazine. Emphasis does not portray gender fairness, advocacy, and is biased.</p>	<p>The Pay Gap. How wide is the chasm between what men and women earn in the workplace? According to a 2015 analysis from the National Women's Law Center, women lose \$435,049 over the course of a career because of the pay gap. The bar graph shows the average earnings in the United States for men and women at ages 22 and 52.</p>  <p>Average Yearly Earnings in the U.S., by Gender and Age</p> <table border="1"> <thead> <tr> <th>Age</th> <th>Men (thousands of dollars)</th> <th>Women (thousands of dollars)</th> </tr> </thead> <tbody> <tr> <td>22</td> <td>27,206</td> <td>22,096</td> </tr> <tr> <td>52</td> <td>66,000</td> <td>41,000</td> </tr> </tbody> </table> <p>Source: Time, March 14, 2016</p>  <p>Graphs of Models for the Data</p> <table border="1"> <thead> <tr> <th>Years after Age 22</th> <th>Men (thousands of dollars)</th> <th>Women (thousands of dollars)</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>27,206</td> <td>22,096</td> </tr> <tr> <td>10</td> <td>32,206</td> <td>27,096</td> </tr> <tr> <td>20</td> <td>37,206</td> <td>32,096</td> </tr> <tr> <td>30</td> <td>42,206</td> <td>37,096</td> </tr> <tr> <td>40</td> <td>47,206</td> <td>42,096</td> </tr> <tr> <td>50</td> <td>52,206</td> <td>47,096</td> </tr> <tr> <td>52</td> <td>66,000</td> <td>41,000</td> </tr> </tbody> </table>	Age	Men (thousands of dollars)	Women (thousands of dollars)	22	27,206	22,096	52	66,000	41,000	Years after Age 22	Men (thousands of dollars)	Women (thousands of dollars)	0	27,206	22,096	10	32,206	27,096	20	37,206	32,096	30	42,206	37,096	40	47,206	42,096	50	52,206	47,096	52	66,000	41,000

Subject: Initial appeal call

Attachment(s): "image001.png"

Hello Kim,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 9:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time McGraw Hill has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

McGraw Hill - appeal

Mon, Apr 25, 2022 9:00 AM - 9:30 AM (EDT)

Please join my meeting from your computer, tablet or smartphone.

<https://meet.goto.com/643528429>

You can also dial in using your phone.

United States (Toll Free): [1 866 899 4679](tel:18668994679)

United States: [+1 \(571\) 317-3116](tel:+15713173116)

Access Code: 643-528-429

Join from a video-conferencing room or system.

Dial in or type: 67.217.95.2 or inroomlink.goto.com

Meeting ID: 643 528 429

Or dial directly: 643528429@67.217.95.2 or 67.217.95.2##643528429

Get the app now and be ready when your first meeting starts: <https://meet.goto.com/install>

Subject: Inquiring on non-recommended list and appeal
Attachment(s): "28-106.201 FAC_47172787v1.DOC"

Good morning Cathy,

I am sure you have been very busy this week. It has ramped up on our end as well with questions from the districts that have chosen our programs. Which leads me to contacting you.

We are a bit confused with the list of the Recommended Titles and Non- Recommended. Both lists include PreCalculus with Limits. There is not a copyright year nor an edition listed. We submitted two PreCalculus with Limits text, one regular and one with the Graphing Approach. Which are really the same books, one just includes calculator functions. Can we get clarity on which title is on the non-recommended list? In addition, will the results from the rubric be shared so we can understand and see evidence of why it was placed on the non-recommended list for Inclusion of Special Topics? Especially when both texts are the same, expect for the calculator functions. This will assist with answer (e) on the attachment.

Because of this it appears we will need to go through the appeal process, the attached document (appeal rule) seems a bit confusing on the actual process. Can you provide a process? For example, do we notify you of appeal intent and submit all paperwork to you? If not, who would be the contact?

I apologize for all the questions, we are just trying to move as quickly as we can on this.
If need be, we can chat live as well!

Thanks so much in advance for your time!

Carey

Carey Evans

Sr. Regional Sales Manager - Southeast/Southwest

National Geographic Learning | Cengage

Cell# 864-415-0110

carey.evans@cengage.com

28-106.201 Initiation of Proceedings.

(1) Unless otherwise provided by statute, and except for agency enforcement and disciplinary actions that shall be initiated under Rule 28-106.2015, F.A.C., initiation of proceedings shall be made by written petition to the agency responsible for rendering final agency action. The term “petition” includes any document that requests an evidentiary proceeding and asserts the existence of a disputed issue of material fact. Each petition shall be legible and on 8 1/2 by 11 inch white paper. Unless printed, the impression shall be on one side of the paper only and lines shall be double-spaced.

(2) All petitions filed under these rules shall contain:

(a) The name and address of each agency affected and each agency’s file or identification number, if known;

(b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner’s representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner’s substantial interests will be affected by the agency determination;

(c) A statement of when and how the petitioner received notice of the agency decision;

(d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;

(e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency’s proposed action;

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency’s proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency’s proposed action.

(3) Upon receipt of a petition involving disputed issues of material fact, the agency shall grant or deny the petition, and if granted shall, unless otherwise provided by law, refer the matter to the Division of Administrative Hearings with a request that an administrative law judge be assigned to conduct the hearing. The request shall be accompanied by a copy of the petition and a copy of the notice of agency action.

Rulemaking Authority 14.202, 120.54(3), (5) FS. Law Implemented 120.54(3) FS. History—New 4-1-97, Amended 9-17-98, 1-15-07, 2-5-13.

Subject: Instructional Material Review

Hi Cathy,

Now that the holiday break is behind us, I'd like to get a sense of where you stand with textbook/product reviews for Fall 2022. Is there [anything I can send you](#), or is there a good time to catch up and talk about your AP®, honors and elective courses?

If we haven't met already, I want to introduce myself as your new BFW representative. As a former English teacher, I'm thrilled to be here and assist in your efforts. Please save my information and reach out at any time.

All my best,

Claire

Subject: Instructional Materials Call for Bids-Social Studies

Attachment(s): "Call for bids-Social Studies.pdf", "image001.png"

Good afternoon publishers,

We are excited to announce our 2022-2023 Social Studies Instructional Materials adoption opens Friday, April 8th! Please see the attached Call for Bids memo. The Intent to bid opens electronically April 8, 2022 in our FLIM system. [Florida Instructional Materials Adoption Portal \(flimadoption.org\)](#) Once Intent is submitted, even before deadline, the electronic system will accept bid details submissions. Meaning, the sooner the Intent to Bid is submitted, the sooner input of the bid details may be submitted.

Please feel free to reach out if you have any questions or concerns regarding the adoption.

Thanks,

Lauren

The Florida Department of Education (FDOE) has announced plans for the 2022-2023 instructional materials adoption and is calling for bids in K-12 Social Studies.

Intent to bid will open Friday, April 8, 2022, and should be submitted no later than 5:00 p.m., Eastern Daylight Time (EDT), Friday, May 13, 2022. Bids must be filed in the Instructional Materials Office of the FDOE no later than 5:00 p.m., EDT, Friday, June 10, 2022. Resulting contracts shall be for a five-year period effective April 1, 2023. FDOE reserves the right to reject any or all bids.

Electronic bid submissions are submitted through the Florida Instructional Materials Adoption Portal at <https://www.flimadoption.org/>. Full bid submissions also require hardcopies be mailed to the Instructional Materials Office by above date.

The bids submitted must be for furnishing the designated materials in accordance with the specifications of FDOE. The bids must state the lowest wholesale price at which the materials will be furnished, effective as of April 1, 2023.

The Florida adoption is limited to instructional materials that meet the definition of a “major tool” and the accompanying “ancillary materials” as follows:

- “Major tool” refers to materials that provide instructional content and student learning activities for each of the Florida Standards that are in the course descriptions; and
- “Ancillary materials” are those items that are designed to work with the major tool and may be priced or free with order.

FDOE requires the digital instructional materials bid for adoption to be interoperable on commonly available mobile and desktop digital devices, using industry standard protocols. Recommended specifications for devices can be accessed at <http://www.fldoe.org/core/fileparse.php/5658/urlt/0097849-device-bandwidthtechspecs.pdf>.

Announcement of the 2022-2023 Instructional Materials Adoption
March 1, 2022

Publishers or manufacturers providing instructional materials as a single bundle must also make the materials available as separate and unbundled items, each priced individually, as required by section 1006.29(2), Florida Statutes. Publishers are encouraged to offer sections of state-adopted materials in digital or electronic versions at reduced rates to school districts and teachers.

Publishers must provide FDOE with access to sample copies of the major tool, in their final form, which includes the Student Edition and the Teacher Edition, in an electronic or digital format, no later than 5:00 p.m., EDT, Friday, July 8, 2022. The materials that must be sampled as part of the 2022-2023 instructional materials adoption are as follows:

- **K-12 Social Studies**
 - Major Tool – Student and Teacher Editions

Publishers will host the samples for each state instructional materials reviewer and subsequent district and public reviewers. The samples will be accessed through links on FDOE's online evaluation system. Samples must be the final versions of all instructional materials included in the publisher's bids.

In the event that new standards are adopted by the State Board of Education within the contract period, publishers are requested to provide a signed Standards Alignment Assurance. Publishers signing this form attest that all bid materials will be updated to reflect any new content standards within nine months of their adoption. Further information regarding this assurance form and all other [policies and procedures](#) may be found on FDOE's [instructional materials webpage](#).

*Please note: Intent to bid opens electronically April 8, 2022. Once the intent to bid is submitted, even before the deadline, the electronic system will accept bid details submissions. This means that the sooner the intent to bid is submitted, the sooner the input of the bid details may be submitted.

MEMORANDUM

TO: Publishers of Instructional Materials

FROM: Cathy Seeds

DATE: March 16, 2022

SUBJECT: **Announcement of the 2022-2023 Instructional Materials Adoption**

Contact Information:

Lauren Hamilton
850-245-0882
Lauren.Hamilton@fldoe.org

The Florida Department of Education (FDOE) has announced plans for the 2022-2023 instructional materials adoption and is calling for bids in K-12 Social Studies.

Intent to bid will open Friday, April 8, 2022, and should be submitted no later than 5:00 p.m., Eastern Daylight Time (EDT), Friday, May 13, 2022. Bids must be filed in the Instructional Materials Office of the FDOE no later than 5:00 p.m., EDT, Friday, June 10, 2022. Resulting contracts shall be for a five-year period effective April 1, 2023. FDOE reserves the right to reject any or all bids.

Electronic bid submissions are submitted through the Florida Instructional Materials Adoption Portal at <https://www.flimadoption.org/>. Full bid submissions also require hardcopies be mailed to the Instructional Materials Office by above date.

The bids submitted must be for furnishing the designated materials in accordance with the specifications of FDOE. The bids must state the lowest wholesale price at which the materials will be furnished, effective as of April 1, 2023.

The Florida adoption is limited to instructional materials that meet the definition of a “major tool” and the accompanying “ancillary materials” as follows:

- “Major tool” refers to materials that provide instructional content and student learning activities for each of the Florida Standards that are in the course descriptions; and
- “Ancillary materials” are those items that are designed to work with the major tool and may be priced or free with order.

FDOE requires the digital instructional materials bid for adoption to be interoperable on commonly available mobile and desktop digital devices, using industry standard protocols. Recommended specifications for devices can be accessed at <http://www.fldoe.org/core/fileparse.php/5658/urlt/0097849-device-bandwidthtechspecs.pdf>.

Announcement of the 2022-2023 Instructional Materials Adoption
March 1, 2022

Publishers or manufacturers providing instructional materials as a single bundle must also make the materials available as separate and unbundled items, each priced individually, as required by section 1006.29(2), Florida Statutes. Publishers are encouraged to offer sections of state-adopted materials in digital or electronic versions at reduced rates to school districts and teachers.

Publishers must provide FDOE with access to sample copies of the major tool, in their final form, which includes the Student Edition and the Teacher Edition, in an electronic or digital format, no later than 5:00 p.m., EDT, Friday, July 8, 2022. The materials that must be sampled as part of the 2022-2023 instructional materials adoption are as follows:

- **K-12 Social Studies**
 - Major Tool – Student and Teacher Editions

Publishers will host the samples for each state instructional materials reviewer and subsequent district and public reviewers. The samples will be accessed through links on FDOE's online evaluation system. Samples must be the final versions of all instructional materials included in the publisher's bids.

In the event that new standards are adopted by the State Board of Education within the contract period, publishers are requested to provide a signed Standards Alignment Assurance. Publishers signing this form attest that all bid materials will be updated to reflect any new content standards within nine months of their adoption. Further information regarding this assurance form and all other [policies and procedures](#) may be found on FDOE's [instructional materials webpage](#).

*Please note: Intent to bid opens electronically April 8, 2022. Once the intent to bid is submitted, even before the deadline, the electronic system will accept bid details submissions. This means that the sooner the intent to bid is submitted, the sooner the input of the bid details may be submitted.

Subject: Integrated Civics Curriculum Correlation

Attachment(s):

"image001.png", "image002.png", "image003.png", "image004.png", "image005.png", "image006.png", "image007.png"

Good afternoon,

In reviewing the Social Studies Specs for the adoption, we saw the below:

*"House Bill 5 required the Florida Department of Education to **develop or approve an integrated civic education curriculum**, which is expressed in Rule 6A-1.09411, F.A.C., "K-12 Civic Education Curriculum." Instructional materials must provide guidance to educators on integrating the content of the "K-12 Civic Education Curriculum" across all other subject areas as part of regular school work in kindergarten through Grade 12. Please complete the Integrated K-12 Civic Education Curriculum Correlation."*

Could you please provide us with, or let us know where to find, the integrated civic education curriculum so that we can complete the correlation for submission?

Thank you,

Lisa

Subject: Last-minute curriculum needs (2022-2023)

Hi Cathy,

As we approach the end of the school year, are there any remaining course areas in which you are still considering texts for 2022-2023? If so, I'd be happy to send you digital or textbook copies and a sneak peek at our teaching materials for your consideration. Here's [our catalog](#).

I'd love to know how your course is going and any issues BFW could potentially help address. Please let me know!

Thanks and hope to hear from you!

Subject: Math adoption state approved list

Attachment(s):

"image001.png", "image002.png", "image003.png", "image004.png", "image005.png", "image006.png", "image007.png", "image008.png"

Good afternoon, Cathy.

I listened to yesterday's board meeting and had hoped to see approval of a list of mathematics textbooks on the agenda. Have math materials been approved yet? If not, do you know when the list of approved instructional materials (textbooks) will be made public?

I appreciate any information you can provide. Thanks.

Judy

Hi Eric, Ashley, and Shawn,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 2:00 PM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Math Nation has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Thank you,

Amber Baumbach

1	COURSE Grade 8 Mathematics		
2	BID 419		
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	Publisher Correction
4	MA.8.AR.3.5		Reviewer comment: "Many related standards, but a lack of explicit instruction for Given a real-world context, determine and interpret the slope and y-intercept of a two-variable linear equation from a written description, a table, a graph or an equation in slope-intercept form."
5	MA.8.DP.1.2		Lesson 4-5 was updated to show the correct benchmark, MA.8.AR.3.3. Lesson 4-7 was updated to include a real world example with a real world icon to provide better Reviewer 1 comment: "Feels like this standard should have more opportunity to practice, separate from MA.8.DP.1.1"
6			Lesson 9-1 covers both MA.8.DP.1.1 and MA.8.DP.1.2, We changed Exercise 5 to provide a scatterplot so that students have more opportunity to practice interpreting scatterplots without having to construct first and then interpret.
7	MA.8.DP.2.3		All <i>Florida Reveal Math</i> lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a Reviewer 1 comment: "Use of the language 'relative frequency' is incorrect throughout the lessons aligned to this benchmark. Relative frequency is not part of this benchmark."
8			We changed all instances of relative frequency to experimental probability.
9	MA.8.GR.2.1		Reviewer comment: "Inadequate practice problems are provided. More scaffolding is needed. This concept needs lots of practice and reinforcement with more student-friendly real-world problems."
10			We adjusted instruction in Example to provide real-world example and adjusted practice.
11	MA.8.GR.2.2		All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every Reviewer comment: "Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concepts. Excellent exposure and examples for the students who need enrichment."
12			We adjusted instruction to help struggling students connect scale factor at Grade 7 to dilation at Grade 8 by looking at a non-geometric real world figure.
13			All <i>Florida Reveal Math</i> lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a

	A	B	C
1	COURSE Grade 1 Mathematics		
2	BID 410		
	Standard Below 3 (if applicable)	Special Topic Concern (if applicable)	Publisher Correction
3	MA.1.AR.1.1		Reviewer 1: "Rigor is not there for the BEST standards." Reviewer 2: "Provides suitable instruction to build understanding and allow student practice. Would like to have seen some problems begin with the sum."
4	MA.1.AR.1.1		
5	MA.1.AR.2.1		Reviewer 1: "meets BEST standard" Reviewer 2: "The concept is taught mostly through fact family practice with little student practice for missing addends."
6			Lessons 5-6 and 5-7 focus on MA.1.AR.2.1 and Lesson 5-8 also uses addition to subtract.
7	MA.1.DP.1.1		For lessons that align to MA.1.DP.1.1, reviewers commented: "Not enough instruction — only 1 lesson on each."
8			Grade 1 features two lessons for MA.1.DP.1.1. Please see linked Student Edition and Teacher Edition pages for Lessons 13-1 and 13-2.
9	MA.1.DP.1.2		For lessons that align to MA.1.DP.1.2, reviewers commented: "Not enough instruction — only 1 lesson on each."
10			Grade 1 features two lessons for MA.1.DP.1.2. Please see linked Student Edition and Teacher Edition pages for Lessons 13-3 and 13-4.
11	MA.1.GR.1.4		There are several comments noting "not enough practice" for certain standards in Grade 1, including MA.1.GR.1.4.
12	MA.1.M.2.2		In all grades, Reveal Math offers additional practice in both print and digital formats outside of the core (print) student edition. Please see sample extra practice pages for Grade 1, Lesson 6-8. Reviewer 1: "Not many opportunities for practice" Reviewer 2: "Cursorry coverage of the benchmark"
13			McGraw Hill updated Lesson 12-8 to deepen coverage of the benchmark including finding the value of multiple pennies, nickels, and dimes - instruction connects skip counting by 5s or 10s to finding the value of a set of nickels or dimes - instruction allows students to determine efficient counting techniques when finding the value of multiple pennies (such as creating groups of 2, 5, or 10 and skip counting) - students use these counting technique to discover how many of each coin are needed to equal \$1 - instruction includes connecting student's previous experience with decomposing by place value to determine how many quarters are needed to equal \$1
14			In addition, McGraw Hill increased the number of practice exercises in the Student Edition. This lesson now includes identifying pennies, nickels, dimes, and quarters and stating the value of each of those coins; stating how many of each coin equals

Subject: McGraw Hill Appeal for Grade 4 Accelerated

Attachment(s): "image001.png", "image003.png", "McGraw Hill Grade 4 Accelerated Mathematics Appeal.xlsx"

Good Morning,

Please find the attached appeal spreadsheet from McGraw Hill LLC for the following:

Bid ID	Course ID	Course	Title
416	5012065	Grade 4 Accelerated Mathematics	Florida Reveal Math, Grade 4 Accelerated

Please let us know next steps in the appeal process for the McGraw Hill programs in grades 1, 5, 8, and 4 accelerated.

Regards,
Kim

Kim Harvey

Subject: RE: McGraw Hill - Initial appeal call

***** EXTERNAL EMAIL: If sender is unknown, use caution when opening. *****

Good morning everyone,

Thank you for speaking with us this morning.

Please see the attached appeal template. Please reach out if you have any questions or concerns along the way.

Thanks,
Lauren

Subject: McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Attachment(s): "image004.png", "Publisher Appeal_McGraw Hill_Grade 1 Mathematics_05-09-22.xlsx", "Publisher Appeal McGraw Hill Grade 5 Mathematics_05-09-22.xlsx", "Publisher Appeal McGraw Hill Grade 8 Mathematics_05-09-22.xlsx", "Publisher Appeal McGraw Hill Grade 4 Accelerated Mathematics_05-09-22.xlsx"

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

Bid ID	Course ID	Course	Title
410	5012030	Grade One Mathematics	Florida Reveal Math, Grade 1
414	5012070	Grade Five Mathematics	Florida Reveal Math, Grade 5
419	1205070	Grade Eight Mathematics: Pre-Algebra	Florida Reveal Math, Grade 8 Pre-Algebra
416	5012065	Grade 4 Accelerated Mathematics	Florida Reveal Math, Grade 4 Accelerated

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,
Kim

	A	B	C
1	COURSE Grade 8 Mathematics BID 419		
2	Publisher Correction		
3	Standard Below 3 (if applicable)	Special Topic Concern (If applicable)	
4	MA.8.AR.3.5		Reviewer comment: "Many related standards, but a lack of explicit instruction for Given a real-world context, determine and interpret the slope and y-intercept of a two-variable linear equation from a written description, a table, a graph or an equation in slope-intercept form."
5			Lesson 4-5 was updated to show the correct benchmark, MA.8.AR.3.3.
6			Lesson 4-7 was updated to include a real world example to provide better alignment to MA.8.AR.3.5.
7	MA.8.DP.1.2		Reviewer 1 comment: "Feels like this standard should have more opportunity to practice, separate from MA.8.DP.1.1"
8			Lesson 9-1 Practice (exercise 5) was updated to include a scatterplot so that students have opportunity to interpret scatterplots without having to construct first and then interpret. All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every student to achieve mastery.
9	MA.8.DP.2.3		Reviewer 1 comment: "Use of the language 'relative frequency' is incorrect throughout the lessons aligned to this benchmark. Relative frequency is not part of this benchmark."
10			Lesson 10-3 was updated to replace all instances of relative frequency to experimental probability.
11			Lesson 10-4 was updated to replace all instances of relative frequency to experimental probability.
12			
13	MA.8.GR.2.1		Reviewer comment: "Inadequate practice problems are provided. More scaffolding is needed. This concept needs lots of practice and reinforcement with more student-friendly real-world problems." Lesson 8-4 was updated to provide real-world example in Example 1. Practice exercises were updated to align to the revised example.
14			All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every student to achieve mastery.
15	MA.8.GR.2.2		Reviewer comment: "Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concepts. Excellent exposure and examples for the students who need enrichment." Lesson 8-5 was updated with revised instruction to help struggling students connect scale factor (learned in Grade 7) to dilation by looking at a non-geometric real world figures.
16			All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every student to

Hi Amber,

Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

Florida Reveal Math, Grade K	4.4	81.0%
Florida Reveal Math, Grade 1	4.0	81.0%
Florida Reveal Math, Grade 2	4.4	97.1%
Florida Reveal Math, Grade 3	4.6	92.7%
Florida Reveal Math, Grade 4	4.7	92.4%
Florida Reveal Math, Grade 5	4.0	62.8%

***** EXTERNAL EMAIL: If sender is unknown, use caution when opening. *****

Yes, all of the special topic edits that were made for grades 1, 5, and 4 accelerated have been approved. I believe that the only grade pending now is grade 8 which is currently in standards review.

Thanks!

Hi Kim,

Our content specialists have provided additional comments on the spreadsheet. I've set up a meeting for today at 11:00 am to discuss standards for grades 1 and 8. I'm also attaching the spreadsheets. Anything marked in green has been approved, anything marked in red needs additional discussion/edits.

Hi Amber,

Thank you for the call this morning and reviewing comments with us.

Attached is the PDF of the grade 1 changes for standard MA.1.M.2.2 that we discussed during our call. As we agreed, we are sending updated PDFs immediately to show our changes.

Regards,

Kim

Identify Values of Coins

Be Curious

Tell me everything you can.

Copyright © McGraw-Hill Education Holly Hildreth/McGraw-Hill Education

Math is... Mindset

What helps you make good decisions?

 B.E.S.T. Standards
MA.1.M.2.2, MA.1.M.2.3, MTR.5.1

Unit 12 • Measurement 157

Learn

What coins does Aya have?

We use these coins in the U.S. Each coin

has a different value. The **¢** sign shows the value.

 <p>front back</p> <p>1 penny = 1¢ 1 cent</p>	 <p>front back</p> <p>1 nickel = 5¢ 5 cents</p>
100 pennies equal 100¢ or \$1.	20 nickels equal 100¢ or \$1.
 <p>front back</p> <p>1 dime = 10¢ 10 cents</p>	 <p>front back</p> <p>1 quarter = 25¢ 25 cents</p>
10 dimes equal 100¢ or \$1.	4 quarters equal 100¢ or \$1.

You can skip count to find the value of set of coins.

Math is... Structure

How can you skip count to determine the value of a set of pennies?

Work Together

How much money? Skip count to find the total value. Write the numbers and ¢ sign.

					
5¢	10¢	_____	_____	_____	_____

On My Own

Name _____

What is the value of the coin?

1.

2.

3.

4.

How many of the same coin equal \$1? Use circles to draw more of the same coin to show \$1. Write how many.

5.

_____ nickels = \$1

6.

_____ quarters = \$1

7. How much money? Skip count to find the total value. Write the numbers and ¢ sign.

8. Joyce has two coins in her pocket. One has a value of 10¢. The other has a value of 5¢. What coins does she have?

9. **Error Analysis** Jay says these three coins have a value of \$1. Do you agree with Jay? Explain.

10. **Extend Your Thinking** How many pennies equal one dime? Explain your thinking.

Reflect

Why is it important to know the values of different coins?

Math is... Mindset

What helped you make good decisions today?

Hi Amber,

Please find the information for grade 8 that we discussed during our call this morning. We updated the excel spreadsheet to include details of the updates. There are PDFs for 5 lessons that reflect these changes. The files were too large to send via email so please use this link from We Transfer to download the PDFs: <https://we.tl/t-qiCQyJ4ZNf> If you have any difficulty, please let me know.

We appreciate your team's partnership in this appeal process.

Have a great weekend!

Regards,
Kim

Subject: McGraw Hill Request for Conditional Approval

Attachment(s): "image001.png"

Good afternoon,

In light of our discussion and McGraw Hill agreeing to make the additional identified changes, we respectfully request that our K-5, Grade 8, and Grade 4 accelerated be conditionally approved and added to the approved list.

We will have these updates made on or before 5/20/22.

Thank you for considering our request.

Regards,
Kim

***** EXTERNAL EMAIL: If sender is unknown, use caution when opening. *****

Hi Kim,

Our content specialist, Courtney, has reviewed your edits for grade 8 and would like to discuss a couple of the remaining standards. Grade 1 has been approved, so we will only be discussing Grade 8. I've attached the spreadsheet with her comments for your review. I've scheduled a call for tomorrow at 10:00 am. Please see below for the meeting link.

Learn Identify Scale Factor

A dilated figure has the same shape as the original figure, but may have different sizes. The sizes of an image and a preimage are determined by the scale factor of the dilation.

If the scale factor of the dilation is ...	then the dilated figure is ...
between 0 and 1	smaller than the original
equal to 1	the same size as the original
greater than 1	larger than the original

You can determine the scale factor of a dilation that maps one figure onto another figure.

Example 1 Identify Scale Factor

Square $ABCD$ was dilated to make to square $EFGH$. Identify the scale factor.

Think About It!

Without calculating, is the scale factor of the dilation *between 0 and 1*, *equal to 1*, or *greater than 1*?

Find the scale factor.

Write the ratios comparing the side lengths.

$$\frac{EF}{AB} = \frac{\square}{\square} \qquad \frac{FG}{BC} = \frac{\square}{\square}$$

$$\frac{GH}{CD} = \frac{\square}{\square} \qquad \frac{HE}{DA} = \frac{\square}{\square}$$

So, the scale factor is 1 : 4.

Check

Triangle ABC was dilated to make to triangle XYZ . Identify the scale factor.

Show your work here

Pause and Reflect

How did your previous knowledge of scale drawings and scale factor help you to understand dilations and scale factor?

Record your observations here

Copyright © McGraw Hill

Learn Similarity

In a dilation, the scale factor is the ratio of the side lengths of the image to the side lengths of the preimage. When the scale factor is not equal to one, a dilation changes the size of a figure, but does not change the shape of a figure. If the size is changed, the image and the preimage are similar, and *not* congruent. When the scale factor is one, the figures are congruent.

The following are dilations of rectangle $ABCD$.

Two figures are **similar** if one can be mapped onto the other using a scale factor not equal to one.

Because a dilation does not change the shape of a figure, the image and the preimage are similar.

Parallelogram $E'F'G'H'$ is the dilated image of parallelogram $EFGH$, with a scale factor of 2.

You can use dilations to show that $\triangle ABC$ is similar to $\triangle DEF$.

Write ratios comparing the lengths of each side.

$$\frac{DF}{AC} = \frac{10}{5} \text{ or } \frac{2}{1} \quad \frac{EF}{BC} = \frac{8}{4} \text{ or } \frac{2}{1} \quad \frac{DE}{AB} = \frac{6}{3} \text{ or } \frac{2}{1}$$

Because the ratios of the corresponding sides are the same, $\triangle DEF$ is the dilated image of $\triangle ABC$ with a scale factor of 2.

The triangles are similar because $\triangle ABC$ can be mapped onto $\triangle DEF$ by dilating with a scale factor of 2.

Pause and Reflect

Compare and contrast *congruent figures* and *similar figures*. How are they alike? How are they different?

Record your observations here

Copyright © McGraw Hill

Example 2 Dilations and Scale Factor

Triangle DEF was dilated to make triangle GHI .

Think About It!

Which figure is the preimage? How does the image compare in size to the preimage?

Determine the scale factor used to dilate $\triangle DEF$. Then describe what the scale factor represents for this dilation.

Part A Determine the scale factor.

Determine the scale factor by finding the ratios of the side lengths.

$$\frac{GH}{DE} = \frac{8}{4} \text{ or } \boxed{}$$

$$\frac{GI}{DF} = \frac{6}{3} \text{ or } \boxed{}$$

$$\frac{HI}{EF} = \frac{10}{5} \text{ or } \boxed{}$$

A dilation with a scale factor of 2 maps $\triangle DEF$ onto $\triangle GHI$.

Part B Describe what the scale factor represents for this dilation.

Triangle GHI is a dilation of triangle DEF because the corresponding side lengths are proportional with a scale factor of $\frac{2}{1}$ or 2 : 1.

The scale factor is greater than 1, so there is no congruence between the triangles. However, by dilating $\triangle DEF$ to make $\triangle GHI$, similarity between the two triangles is preserved.

Example 3 Dilations and Scale Factor

Rectangle $PQRS$ was dilated to make rectangle $WXYZ$.

Determine the scale factor used to dilate rectangle $PQRS$. Then describe what the scale factor represents for this dilation.

Part A Determine the scale factor.

Determine the scale factor by finding the ratios of the side lengths.

$$\frac{SP}{ZW} = \frac{\square}{\square} \qquad \frac{PQ}{WX} = \frac{\square}{\square}$$

$$\frac{QR}{XY} = \frac{\square}{\square} \qquad \frac{RS}{YZ} = \frac{\square}{\square}$$

Rectangle $PQRS$ was dilated by a scale factor of 1 to make rectangle $WXYZ$.

Part B Describe what the scale factor represents for this dilation.

Rectangle $WXYZ$ is a dilation of rectangle $PQRS$ because the corresponding side lengths are proportional with a scale factor of $\frac{1}{1}$ or 1:1.

The scale factor is equal to 1, so there is both congruence and similarity between the rectangles.

Check

Trapezoid $ABCD$ was dilated to make rectangle $EFGH$.

Determine the scale factor used to dilate trapezoid $ABCD$. Then describe what the scale factor represents for this dilation.

Show your work here

Copyright © McGraw Hill

Example 4 Use the Scale Factor

Ken enlarges the photo shown by a scale factor of 2 for his web page. He then enlarges the web page photo by a scale factor of 1.5 to print. The original photo is 2 inches by 3 inches.

Carl Borralami/Spaces Images/Blend Images

What are the dimensions of the print photo?

Multiply each dimension of the original photo by 2 to find the dimensions of the web page photo.

$2 \text{ in.} \times 2 = \underline{\hspace{1cm}} \text{ in.}$

$3 \text{ in.} \times 2 = \underline{\hspace{1cm}} \text{ in.}$

So, the web page photo will be 4 inches by 6 inches.

Multiply the dimensions of that photo by 1.5 to find the dimensions of the print.

$4 \text{ in.} \times 1.5 = \underline{\hspace{1cm}} \text{ in.}$

$6 \text{ in.} \times 1.5 = \underline{\hspace{1cm}} \text{ in.}$

So, the printed photo will be 6 inches by 9 inches.

Copyright © McGraw Hill

 **Talk About It!**
 Would the dimensions of the print be the same if Ken first dilated the photo by a scale factor of 1.5 and then by a scale factor of 2? Why or why not?

Program: FL RM	Component: SE LSN	PDF Pass
Vendor: SPi-Global	Grade: 8	

Check

An art show offers different-sized prints of the same painting. The original print measures 24 centimeters by 30 centimeters. A printer enlarges the original by a scale factor of 1.5, and then enlarges the second image by a scale factor of 3. What are the dimensions of the largest print?

Show your work here

Pause and Reflect

How will you study the concepts in today's lesson? Describe some steps you can take.

Record your observations here

Apply Careers

A designer enlarges an image that is 6 centimeters long and 9 centimeters wide by a scale factor of 3. The designer decides that the enlarged image is too large and reduces it by a scale factor of 0.5. Will the final image fit into a rectangular space that has an area of 121 square centimeters? Explain your answer.

1. What is the task?

Make sure you understand exactly what question to answer or problem to solve. You may want to read the problem three times. Discuss these questions with a partner.

- First Time** Describe the context of the problem, in your own words.
Second Time What mathematics do you see in the problem?
Third Time What are you wondering about?

2. How can you approach the task? What strategies can you use?

Record your observations here

3. What is your solution?

Use your strategy to solve the problem.

Show your work here

4. How can you show your solution is reasonable?

Write About It! Write an argument that can be used to defend your solution.

Talk About It!

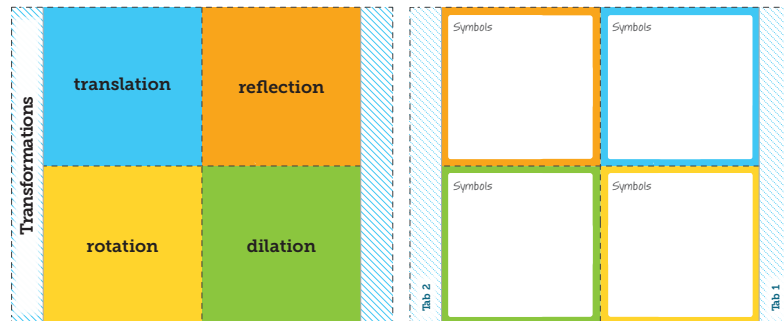

How did the properties of similar figures help you solve the problem?

Check

An artist enlarges a rectangular painting with the dimensions of 12 inches long and 16 inches wide by a scale factor of 2. He then decides to reduce the enlarged image by a scale factor of 0.4. Will the final painting fit into a rectangular frame that has an area of 120 square inches? Write an argument that can be used to defend your solution.

Show your work here

 **Foldables** It's time to update your Foldable, located in the Module Review, based on what you learned in this lesson. If you haven't already assembled your Foldable, you can find the instructions on page FL1.

Practice

Practice • Spiral Review • Extra Practice

1. Triangle ABC was dilated to make $\triangle XYZ$. Determine the scale factor. (Example 1)

2. Rectangle $ABCD$ was dilated to make rectangle $EFGH$. Determine the scale factor. Then describe what the scale factor represents for this dilation. (Examples 2 and 3)

2. Triangle ABC was dilated to make triangle DEF . Determine the scale factor used. Then describe the dilation what the scale factor represents for this dilation. (Examples 2 and 3)

4. Jenna is creating a mural for her bedroom wall. She would like to copy a picture that is 2 inches by 2.5 inches. She uses a copy machine to enlarge it by a scale factor of 4. Then she projects it on her wall by a scale factor of 12. What are the dimensions of the mural? Are the enlarged pictures similar to the original? (Example 4)

5. If triangle ABC is dilated by a scale factor of 2.5, which of the following is true? Select all that apply.
- A. The image is a reduction of the preimage.
 - B. The image is an enlargement of the preimage.
 - C. The preimage and the image are congruent.
 - D. The preimage and the image are similar.
 - E. The preimage and the image are similar and congruent.

Apply

6. A graphic designer enlarges a rectangular image with dimensions 3 inches long and 5 inches wide by a scale factor of 2. Then he decides that the enlarged image is too large and reduces it by a scale factor of 0.25. Will the final image fit into a rectangular space that has an area of 3.5 square inches? Justify your response.
7. An artist needs to reduce the size of a painting. The original dimensions of the painting are 12 inches by 20 inches. She reduces the painting by a scale factor of $\frac{1}{4}$. She then decides that the reduced image is too small and enlarges it by a scale factor of 2. Will the final image fit in a rectangular space that has an area of 55 square inches? Justify your response.

8. **BUILD PERSEVERANCE** Square $ABCD$ is similar to square $EFGH$ because a dilation with a scale factor of 2 followed by a translation to the right maps square $ABCD$ onto square $EFGH$.

- a. If you perform the translation first and then the dilation, will the squares still map onto one another? Explain.

- b. Describe a sequence of transformations that maps square $ABCD$ onto square $EFGH$, in which the first transformation is a translation.

9. **CREATE** Draw a two-dimensional figure. Then perform a series of two transformations on the figure. Which figures are congruent? Which figures are similar?

10. **FIND THE ERROR** A student concluded that rectangle $ABCD$ is similar to rectangle $EFGH$ because a dilation with a scale factor of 0.5 and a translation maps rectangle $ABCD$ onto rectangle $EFGH$. Find the student's mistake and correct it.

INQUIRY How does the scale factor change the size and coordinates of a figure after a dilation relative to the origin?

Learn Dilations on a Coordinate Plane

A dilation is a transformation that enlarges or reduces a figure by a scale factor relative to a center point. That point is called the **center of dilation**.

Words

When the center of dilation in the coordinate plane is the origin, each coordinate of the preimage is multiplied by the scale factor k to find the coordinates of the image.

Model

$$(x, y) \rightarrow (2x, 2y)$$

Variables

$$(x, y) \rightarrow (kx, ky)$$

Copyright © McGraw Hill

Talk About It!

On the model, why is $k = 2$?

(continued on next page)

The value for the scale factor k determine whether the dilation is an enlargement, a reduction, or if the dilation does not alter the size.

Enlargement	
Words	Model
A dilation with a scale factor of k will be an image larger than the original if $k > 1$.	
Symbols	
$(x, y) \rightarrow (2x, 2y)$	
Reduction	
Words	Model
A dilation with a scale factor of k will be an image smaller than the original if $0 < k < 1$.	
Symbols	
$(x, y) \rightarrow (\frac{1}{2}x, \frac{1}{2}y)$	
No Change	
Words	Model
A dilation with a scale factor of k will be an image the same size as the original if $k = 1$.	
Symbols	
$(x, y) \rightarrow (1x, 1y)$	

Talk About It!

Determine whether each scale factor enlarges, reduces, or keeps a figure the same size. Explain.
 $\frac{2}{3}$, 6, 1

Example 1 Graph Dilations

Triangle ABC has vertices $A(-2, 1)$, $B(-4, 5)$, and $C(3, 2)$.

Graph the image of the figure after a dilation with a scale factor of 2.

Step 1 Find the coordinates of the image.

The coordinate notation of the dilation is $(x, y) \rightarrow (2x, 2y)$. Multiply the coordinates of each vertex by 2.

$$A(-2, 1) \rightarrow (2 \cdot -2, 2 \cdot 1) \rightarrow A'(\quad, \quad)$$

$$B(-4, 5) \rightarrow (2 \cdot -4, 2 \cdot 5) \rightarrow B'(\quad, \quad)$$

$$C(3, 2) \rightarrow (2 \cdot 3, 2 \cdot 2) \rightarrow C'(\quad, \quad)$$

Step 2 Use the coordinates of $A'B'C'$ to graph the image on the coordinate plane.

Check

Triangle DEF has vertices $D(-2, -1)$, $E(0, 1)$, and $F(1, -3)$. Graph the triangle and its image after a dilation with a scale factor of 3.

Show your work here

You can complete **Extra Examples** and **Checks** online.

Think About It!

Is the dilation an enlargement or a reduction?

Talk About It!

Compare and contrast the image and the preimage.

Example 2 Graph Dilations

Triangle JKL has vertices $J(3, 8)$, $K(10, 6)$, and $L(8, 2)$.

Graph the image after a dilation with a scale factor of $\frac{1}{2}$.

Step 1 Find the coordinates of the image.

The coordinate notation of the dilation is $(x, y) \rightarrow (\frac{1}{2}x, \frac{1}{2}y)$.

Multiply the coordinates of each vertex by $\frac{1}{2}$.

$$J(3, 8) \rightarrow \left(\frac{1}{2} \cdot 3, \frac{1}{2} \cdot 8\right) \rightarrow J'\left(\frac{3}{2}, 4\right)$$

$$K(10, 6) \rightarrow \left(\frac{1}{2} \cdot 10, \frac{1}{2} \cdot 6\right) \rightarrow K'(\quad, \quad)$$

$$L(8, 2) \rightarrow \left(\frac{1}{2} \cdot 8, \frac{1}{2} \cdot 2\right) \rightarrow L'(\quad, \quad)$$

Step 2 Use the coordinates of $J'K'L'$ to graph the image on the coordinate plane.

Talk About It!

Compare and contrast the image and the preimage.

Check

Triangle EFG has vertices $E(-6, 9)$, $F(3, 6)$, and $G(-3, 3)$. Graph the triangle and its image after a dilation with a scale factor of $\frac{1}{3}$.

Apply Consumer Science

The graph shows the scale drawing for a new fence that Olivia is building on her horse farm. Each unit on the graph represents 8 feet of fencing. After studying the plans, Olivia decides she would like to build a fence that encloses a greater area. If Olivia dilates Rectangle $ABCD$ by a scale factor of 2, and fencing costs \$12.50 per foot, how much will she spend on fencing?

Watch the animation.

1. What is the task?

Make sure you understand exactly what question to answer or problem to solve. You may want to read the problem three times. Discuss these questions with a partner.

First Time Describe the context of the problem, in your own words.

Second Time What mathematics do you see in the problem?

Third Time What are you wondering about?

2. How can you approach the task? What strategies can you use?

3. What is your solution?

Use your strategy to solve the problem.

4. How can you show your solution is reasonable?

Write About It! Write an argument that can be used to defend your solution.

Talk About It!

Compare the perimeters of the preimage and the image. What do you notice? How does this relate to scale factor?

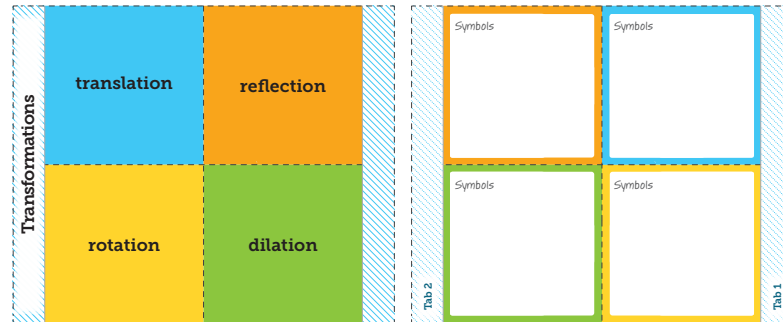

Check

The graph shows the scale drawing for a new fence that Oliver is building in his back yard for his dog. Each unit on the graph represents 10 feet of fencing. After studying the plans, he decides he would like to build a fence that encloses a smaller area. If Oliver dilates Rectangle $ABCD$ by a scale factor of 0.75, and fencing costs \$8.30 per foot, how much will he spend on fencing?

Practice

Practice • Spiral Review • Extra Practice

1. Trapezoid $RAIN$ has vertices $R(-2, 1)$, $A(1, 1)$, $I(0, -1)$, and $N(-1, -1)$. Graph the image of the figure after a dilation with a scale factor of 2. (Example 1)

2. Triangle ABC has vertices $A(2, 1)$, $B(3, 0)$, and $C(1, -2)$. Graph the image of the figure after a dilation with a scale factor of 3. (Example 1)

3. Triangle JKL has vertices $J(-4, -1)$, $K(0, 4)$, and $L(-4, -2)$. Graph the image of the figure after a dilation with a scale factor of 0.5. (Example 2)

4. Rectangle $PQRS$ has vertices $P(-3, 3)$, $Q(6, 3)$, $R(6, -3)$, and $S(-3, -3)$. Graph the image of the figure after a dilation with a scale factor of $\frac{1}{3}$. (Example 2)

5. Use coordinate notation to describe the dilation.

Copyright © McGraw Hill

6. Keisha used a photo that measured 4 inches by 6 inches to make a copy that measured 8 inches by 12 inches. What is the scale factor of the dilation?

Apply

For Exercises 7 and 8, use the graph of Rectangle $ABCD$.

- Suppose the graph represents the scale drawing for a fence that Tara is building for a new city dog park. Each unit on the graph represents 12 yards. After studying the plans, Tara decides to build a fence that encloses a smaller area. If Tara dilates Rectangle $ABCD$ by a scale factor of 0.75, and fencing costs \$6.39 per yard, how much will she spend on fencing?
- Suppose the graph of Rectangle $ABCD$ shows the scale drawing for a safety fence that Kenny is setting up around a construction area. Each unit on the graph represents 25 feet. After studying the plans, Kenny decides to build a fence that encloses a larger area. If Kenny dilates Rectangle $ABCD$ by a scale factor of 2.5, and fencing costs \$5.25 per foot, how much will he spend on fencing?

- BUILD PERSEVERANCE** The coordinates of two triangles are shown in the table. Is XYZ a dilation of JKL ? Write an argument that can be used to defend your solution.

$\triangle JKL$		$\triangle XYZ$	
J	(a, b)	X	$(3a, 6b)$
K	(c, d)	Y	$(3c, 6d)$
L	(a, d)	Z	$(3a, 6d)$

- FIND THE ERROR** Kelly is finding the coordinates of the image of a polygon with vertices $W(2, 2)$, $X(2, 4)$, $Y(4, 4)$, and $Z(4, 2)$ after a dilation with a scale factor of 3. Describe her error and explain how to correct it.

The coordinates of $W'X'Y'Z'$ are $W'(2, 6)$, $X'(2, 12)$, $Y'(4, 12)$, and $Z'(4, 6)$.

- Determine whether the following statement is *always*, *sometimes*, or *never* true. Write an argument that can be used to defend your solution.

A preimage and its dilated image are the same shape but different sizes.

Congruence and Transformations

B.E.S.T. Standards
MA.8.GR.2.1

Explore Congruence and Transformations

INQUIRY What happens to a figure when you translate, reflect, or rotate it?

The sketch shows square $ABCD$. Opposite sides of the square are parallel. Press *Translate*. Do the opposite sides of the square remain parallel?

Experiment with different squares. Drag points A , B , C , and D to change the size and position of the square, then press *Translate*. Make sure to press the *Reset* button before you try another square.

Talk About It!
Do the opposite sides of a square remain parallel after a translation? Explain.

Translate
Reset
 $\overline{AD} \parallel \overline{BC}$
 $\overline{AB} \parallel \overline{DC}$

Learn Congruence and Transformations

Translations, reflections, and rotations preserve the shape and size of a figure.

Watch the video to learn about some properties of translations.

The video shows animation frames using a stack of index cards. A parallelogram is traced on each card.

As you flip through the cards from front to back, the parallelogram appears to move. As the parallelogram moves, the sides of the parallelogram remain the same length. The measures of the angles also remain the same. So, sliding or moving a figure does not change its shape or size.

Program: FL RM	Component: SE LSN	PDF Pass
Vendor: SPi-Global	Grade: 8	

Watch the video to learn about some properties of reflections.

The video shows how to reflect a triangle using tracing paper.

Step 1 Draw $\triangle ABC$ on tracing paper. Draw a dotted line (the line of reflection) on the paper as shown.

Step 2 Fold the paper along the dotted line. Trace the triangle onto the folded portion of the tracing paper. Unfold and label the vertices A' , B' , and C' .

Use a ruler to measure side AB and side $A'B'$. Use a protractor to measure $\angle C$ and $\angle C'$. Did the size of the triangle change after the reflection? _____

The reflection of the figure does not change its shape or size.

Watch the video to learn about some properties of rotations.

The video shows how to rotate a parallelogram using tracing paper.

Step 1 Place a piece of tracing paper over parallelogram $WXYZ$ shown. Copy the parallelogram. Trace points A , B , C , and \overrightarrow{AB} .

Step 2 Place the eraser end of your pencil on point A . Turn the tracing paper to the right until \overrightarrow{AB} passes through point C .

Use a ruler to measure side WX and its corresponding side on the image. Use a protractor to measure $\angle Y$ and its corresponding angle on the image.

The rotation of the figure does not change its shape or size.

You can show two figures are **congruent** if one can be mapped onto the other by a rotation, reflection, or a translation.

Program: FL RM	Component: SE LSN	PDF Pass
Vendor: SPi-Global	Grade: 8	

Learn Identify Transformations

The order in which the vertices of a figure are named determines the figure's orientation. In the reflection shown, the vertices of the preimage are named in a clockwise direction, but the vertices of the image are named in a counterclockwise direction. The orientation has been reversed.

If you have two congruent figures, you can determine the transformation that maps one figure onto the other by analyzing the orientation of the figures.

Translation	Reflection
<ul style="list-style-type: none"> length is the same orientation is the same 	<ul style="list-style-type: none"> length is the same orientation is reversed
Rotation	
<ul style="list-style-type: none"> length is the same orientation is the same 	

Copyright © McGraw Hill

(continued on next page)

The two triangles shown below have the same shape and size. You can use a transformation to map a figure onto a copy of itself to determine if congruence is maintained with a transformation.

Talk About It!

Why do translations, reflections, and rotations preserve congruence?

By measuring the sides of each triangle, you can confirm that both triangles have corresponding side lengths with the same length.

- DE is the same length as GH .
- EF is the same length as HI .
- FD is the same length as IG .

Because the figure appears to be turned, we can check to see if a rotation would map $\triangle DEF$ onto $\triangle GHI$.

So, rotating $\triangle DEF$ clockwise 270° maps it onto $\triangle GHI$. Both triangles are the same shape and size.

Copyright © McGraw Hill

Example 1 Identify Transformations

The Petronas Twin Towers are mirror images with the same shape and size. What transformation maps the first tower onto the other tower? Are the towers still congruent?

Part A Using orientation, determine a possible transformation that maps one tower onto the other.

Is the orientation the same?

The orientation of the tower on the right mirrors the orientation of the tower at the left. Since the towers are mirror images, a reflection could be used to map one tower onto the other.

Trace the towers and fold along the line of reflection. The left tower maps onto the right tower.

Part B Determine if the transformation maintains congruence.

A reflection across a vertical line maps the left tower onto the right tower, maintaining the same shape and size.

Check

Refer to the bookends.

Part A Using orientation, determine a possible transformation that maps one bookend onto the other.

Part B How can you know that the two bookends are the same shape and size?

Show your work here

You can complete **Extra Examples** and **Checks** online.

AMERICAN OVERSIGHT

Think About It!

Do the figures appear congruent? Why or why not?

Example 2 Identify Transformations

Figure $EFGH$ is a translation of Figure $E'F'G'H'$. How does the shape and size of the figures compare after a translation?

Part A How do the shapes compare?

- Both figures are quadrilaterals.
- Both figures have one pair of parallel sides.
- Both figures are a trapezoid.

So, both figures are the same shape.

Part B How do the sizes of the two figures compare?

After a translation to the right, the two figures maintain congruence. Corresponding sides and angles map to each other.

Check

Figure A is a translation of Figure B. How do the shape and size of the figures compare after a translation?

Part A How do the shapes of the two figures compare?

Part B How do the sizes of the two figures compare?

Example 3 Identify Transformations

What transformation maps triangle ABC onto triangle XYZ ?

Part A Using orientation, determine a possible transformation that maps one triangle onto the other.

Are the lengths the same?

Is the orientation the same?

The lengths and orientation are the same, so $\triangle XYZ$ is either a translation or rotation of $\triangle ABC$. Because the figure looks turned, verify this by performing a rotation. Rotate $\triangle ABC$ 180° .

Part B Describe the transformation.

A clockwise rotation of _____ maps $\triangle ABC$ onto $\triangle XYZ$. Because the side lengths did not change after the rotation, the triangles are the same size and shape. The rotation maintains congruence.

Check

What transformation maps parallelogram $KLMN$ to parallelogram $WXYZ$?

Part A Using orientation, determine a possible transformation that maps one parallelogram onto the other.

Part B Describe the transformation.

Think About It!
Compare and contrast $\triangle ABC$ and $\triangle XYZ$. What do you notice?

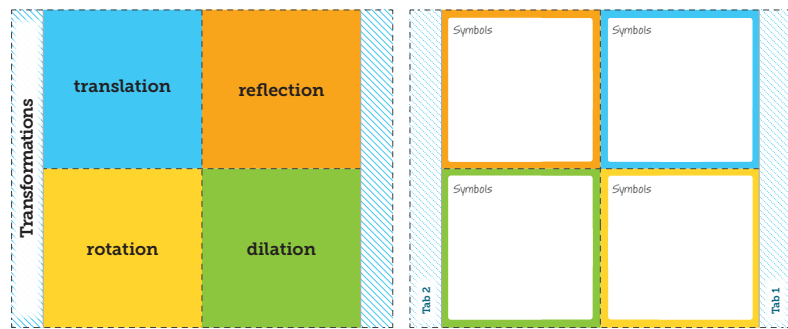

Talk About It!
How does analyzing the orientation of two figures help determine what transformations map one figure onto another?

Pause and Reflect

Where did you encounter struggle in this lesson, and how did you deal with it? Write down any questions you still have.

Record your observations here

Hi Lauren,

On the publisher contact list that was posted on 9.20.21 on the FL site (<https://www.fldoe.org/core/fileparse.php/5574/urlt/2021-22-Publisher-Contact-List.pdf>), please note that McGraw Hill LLC is missing from the list.

Please add our publisher info and re-post ASAP. Please let me know if you need additional information from us.

Thanks
Lisa

Back to School 2021 | Your Partner in Moving Learning Forward

Moving Learning Forward

[New ways to accelerate learning >](#)

Back to school is a time to reconnect with students, colleagues, and classrooms. Savvas Learning Company is here to help you move learning forward. Our innovative solutions are designed to meet students where they are and accelerate learning in positive and personalized ways. You'll find new digital tools and instructional resources to jumpstart student engagement and support you in the new school year.

See all that's new from Savvas:

- **Savvas Realize™ LMS**—enhanced with a refreshed user experience and seamless integrations, including with Canvas
- **MSDA: Savvas Math Screener and Diagnostic Assessments** feature cutting-edge adaptive technology
- **Savvas Essentials™ Foundational Reading**—our new K-2 supplemental program that builds reading skills
- **US History Interactive, World History Interactive, and Experience Physics®**—new programs that make history and physics come alive for high school students
- **D'Nealian® Handwriting**—reimagined with a brand-new print edition and digital learning experiences
- **Savvas One** bundle options updated with many new programs to choose from

Math Musicals for Social Emotional Learning | K-5

Nurture students' love for math through Math Musicals and explore all the faces of Social Emotional Learning. Attend this webinar to find out how to combine music, math, and literature with SEL.

Engaging Tasks for Unengaged Students | 6-12

Boredom is a powerful decelerator to student learning, so engagement is at the core of learning in any setting. This session will focus on learning about the functions and tools to engage students.

Accelerated Learning *Not* Remediation | 6-12

Accelerating student learning requires educators to provide intentional, practical, just-in-time support to students. These tips help you discover where students need support and how to assist them in continuing grade-level work.

Hope to see you there!

Subject: Open Door Webinar Materials

Attachment(s): "2021-09-27 Open Door Webinar Slide Deck.pdf", "Open Door FAQ 9.28.21.pdf"

Thank you to those who were able to attend the implementation webinars relating to the Open Door Grant Program. Materials from the webinars are shared below for reference.

Webinar 1 - Request for Application Review (September 17, 2021)

- [Open Door Webinar Presentation - September 17, 2021](#) (PDF)
- [Open Door Webinar Recording - September 17, 2021](#)

Webinar 2 - Question and Answer (September 27, 2021)

- Open Door Q&A Presentation - September 27, 2021 (attached)
- [Open Door Q&A Recording - September 27, 2021](#)
- Open Door Updated Frequently Asked Questions - September 28, 2021 (attached)

Please visit our [website](#) for up-to-date information on the program.

As a reminder, October 15, 2021, at 5:00 p.m. (EDT) is the deadline to submit a completed application to be considered in the first review period. November 1, 2021, at 5:00p.m. (EDT) is the final deadline to submit a completed application to be considered for an Open Door grant allocation.

Questions regarding the program may be directed to opendoor@fldoe.org.

Open Door Grant Program FAQ Webinar

Monday, September 27, 2021, 1:00 p.m. EDT

Tara Goodman

Vice Chancellor, Division of Career, Technical,
and Adult Education

Carrie Henderson

Executive Vice Chancellor, Division of
Florida Colleges

Webinar Logistics

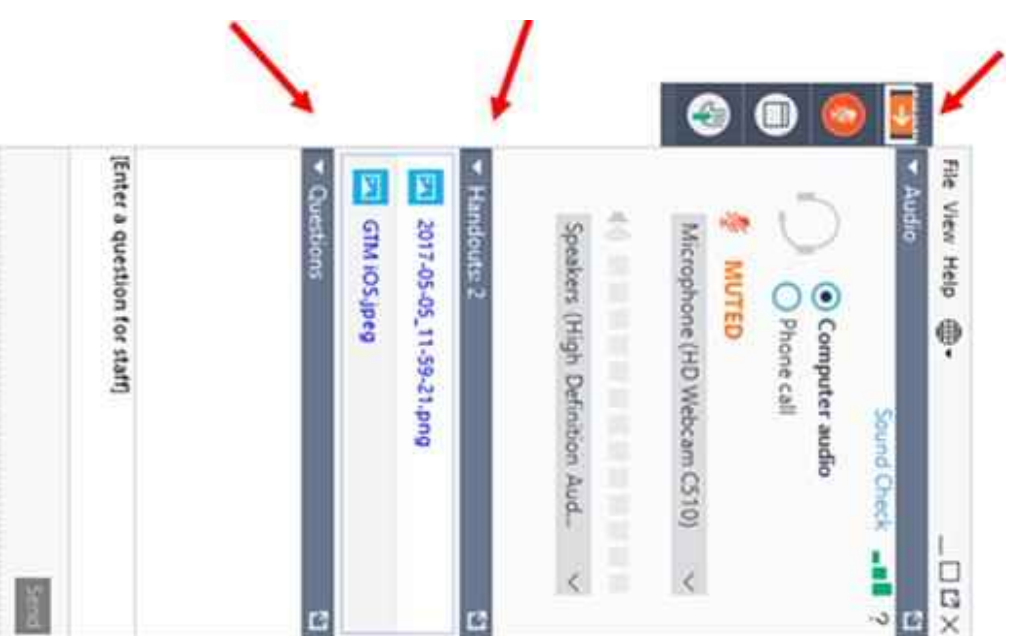

Participants will be on mute for the duration of the webinar.

Materials from today's webinar can be found in the handouts area:

- Today's presentation
- Request for Application (RFA)

How to submit questions:

To submit questions during the webinar, please utilize the Questions function. During the Q&A portion of the webinar, questions will be addressed.

Agenda

- Key Deadlines & Resources
- Frequently Asked Questions & Answers
- Next Steps

Key Deadlines

- **October 15, 2021, at 5:00 p.m. (EDT)** – Deadline to submit completed application to be considered in the first review period.
 - A completed application must be submitted via email to: opendoor@fldoe.org. Of the funds appropriated to the program, 25 percent will be reserved for rural institutions for applications received by this date.
- **November 1, 2021, at 5:00p.m. (EDT)** – Final deadline to submit a completed application to be considered for an Open Door grant allocation.
 - A completed application must be submitted via email to: opendoor@fldoe.org. Agencies that do not submit an application by this date will not be considered.
- Institutions will be notified of approval and allocation amount as soon as possible following conclusion of the second review.

Q. Are agencies required to implement both the Last Dollar and Student Investment approach?

(FAQ #20)

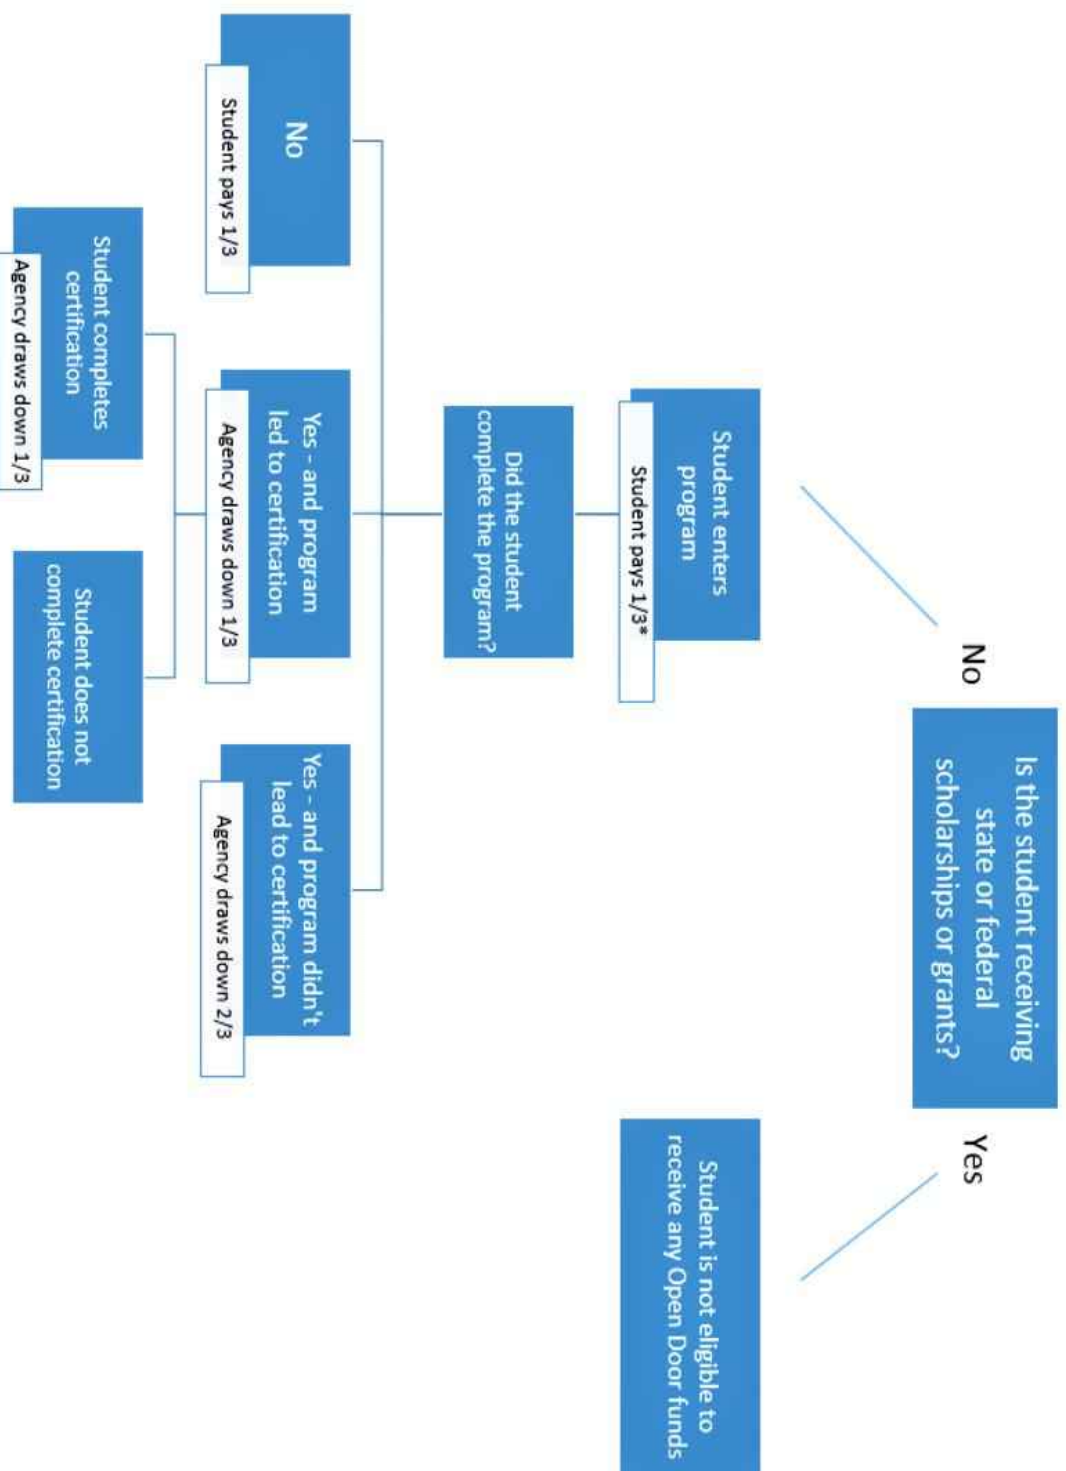

A. No. Agencies are able to implement either, or both, the Student Investment or Last Dollar approach. For each eligible program, agencies must indicate if they plan to use a Student Investment approach, a Last Dollar approach or a Student Investment and Last Dollar approach.

Program-Level: Student Investment and Last Dollar

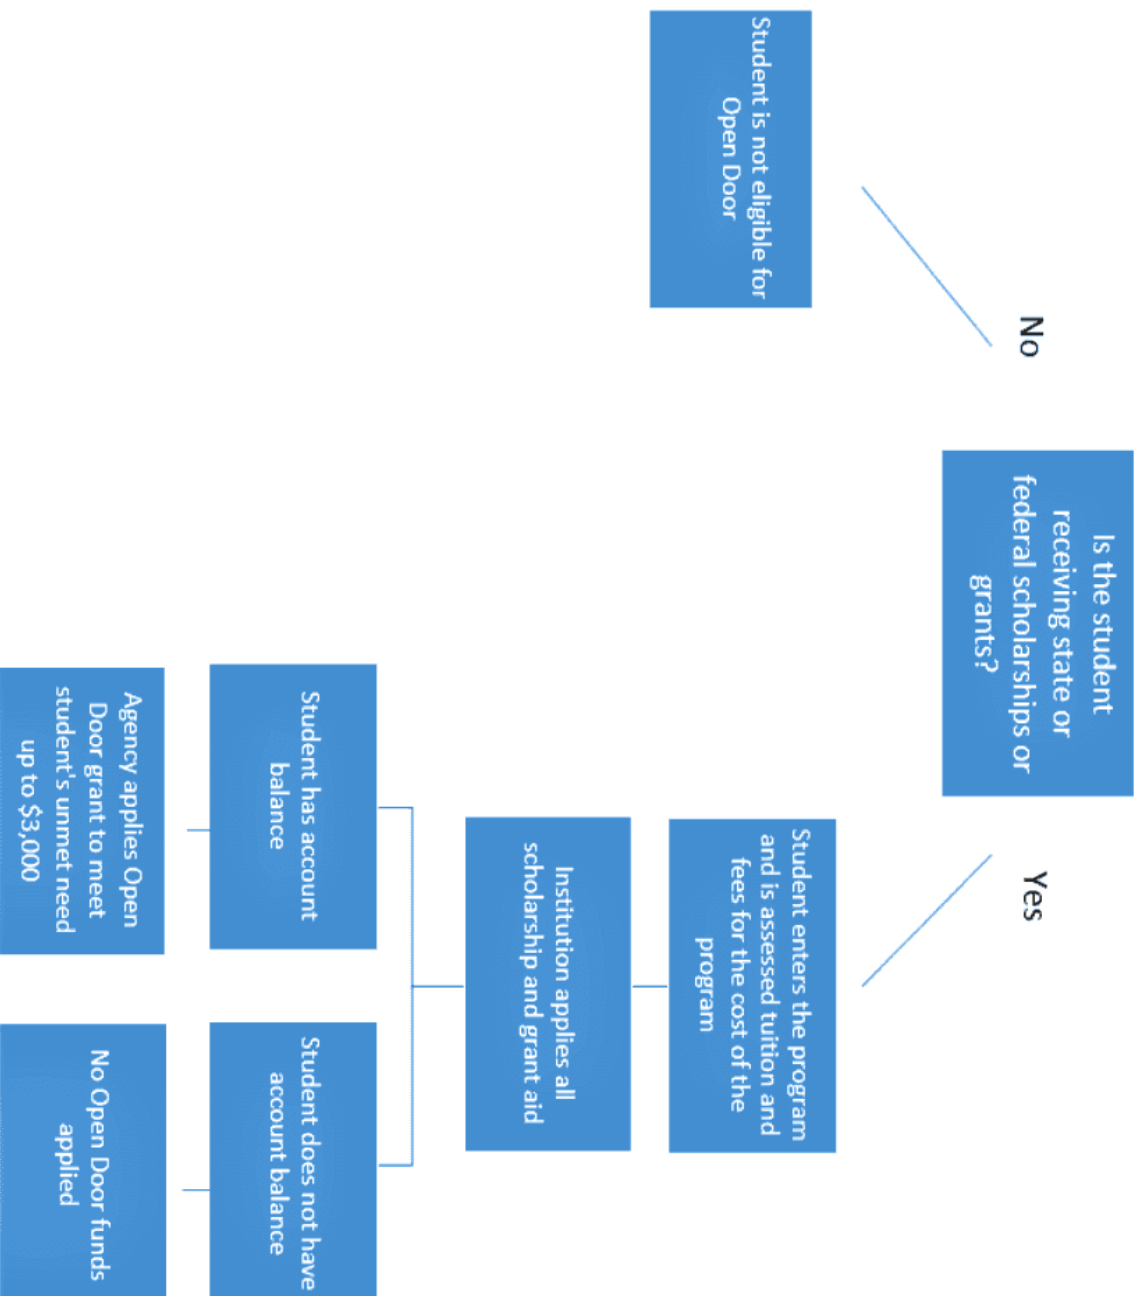

*IET students may use grant funds to cover this cost, if the student signs an agreement that he or she will pay this cost should the student fail to successfully complete the program.

Program-Level: Student Investment Only

*IET students may use grant funds to cover this cost, if the student signs an agreement that he or she will pay this cost should the student fail to successfully complete the program.

Program-Level: Last Dollar Only

Q. An eligible program is one that leads to the attainment of a credential on the Master Credentials List. Are there any approved programs which do not lead to a certification?

(FAQ #63)

A. For 2021-22, the CAPE Industry Certification Funding List and the CAPE Postsecondary Industry Certification Funding List comprise the Master Credentials List.

For 2022-23 and beyond, the Credential Review Committee will publish the Master Credentials List that identifies the programs that meet the framework of quality standards used to identify credentials of value. If the Credential Review Committee adds a program to the Master Credentials List (2022-2023 and beyond) that does not lead to certification, this is when an agency would be able to draw down the additional funds, as indicated in the chart you provided.

Q. For the Last Dollar approach, how should we estimate the unmet need of students for the amount to be allocated?

(FAQ #4)

A. In determining the amount to request, agencies will be asked—for each program linked to a certification on the Master Credentials List—to identify the estimated number of students receiving Open Door dollars and the estimated amount of funds available to those students.

In determining the amount to request, agencies should consider that no student may receive more than \$3,000 per program.

Q. What considerations should be given to grants or scholarships that are not state or federally funded in determining a recipient's award amount under Last Dollar?

(FAQ #23)

A. For a recipient in the Last Dollar approach, the student's grant and scholarship aid from all sources should be first applied towards the recipient's cost of the program.

After all scholarships and grants are applied, Last Dollar funds would then be used for the amount of the unmet need, not to exceed \$3,000.

Q. Our workforce development department cannot accept Pell Grants. Does this mean that all our participants would fall under Student Investment?

(FAQ #54)

A. Students eligible for the Last Dollar approach are those enrolled in eligible programs and who are receiving state or federal financial aid. Rule 6A-20.045, 2(j) defines “state or federal financial aid” as scholarships and grants whose fund sources are the state of Florida or the federal government.

For the purposes of this program, institutional aid that can be sourced to the state of Florida or the federal government and other financial assistance provided under the state of Florida or federal programs for student education and training are considered state or federal aid.

Q. A non-credit, Student Investment recipient does not achieve their industry certification. How should the college handle the outstanding balance?

(FAQ #25)

A. A student who enrolls under Student Investment must pay one-third of the cost of the program and sign an agreement to either complete the program or pay an additional one-third of the cost of the program in the event of non-completion.

In the event of non-completion, agencies may collect on balances for only one-third the cost of the program in accordance with the agreement students signed upon entry.

Agencies are responsible for absorbing the final one-third cost of the program.

Q. If a credit student with state or federal financial aid wishes to enroll in an eligible non-credit program that does not accept financial aid, would that scenario qualify for the Student Investment portion of this grant?

(FAQ #61)

A. Yes, that scenario may qualify under the Student Investment portion of the Open Door Grant, if they meet all eligibility criteria and full-time status in the eligible program.

Q. How would it work to include a non-credit program in the Last Dollar scenario? Non-credit programs do not accept financial aid.

(FAQ #62)

A. While some programs may not be eligible for federal financial aid, the eligibility for Last Dollar can be extended to students in these programs if the student is in receipt of aid that has a state or federal fund source.

For the purposes of the Open Door Grant Program, “State or federal financial aid” means scholarships and grants whose fund sources are the state of Florida or the federal government. Institutional aid that can be sourced to the state of Florida or the federal government and other financial assistance provided under the state of Florida or federal programs for student education and training are considered state or federal aid.

Q. In adding a program to the list based on an Occupational Completion Point (OCP), how do we determine the program cost? Should we include the hours for the entire program or just the hours of the specific OCP(s) eligible for Open Door?

(FAQ #58)

A. Because only Open Door eligible programs should be requested on the Excel Workbook, the cost of attendance would be linked to the cost to complete these OCPs, not the full cost of the career certificate.

Q. My agency offers a program that provides students with the opportunity to earn more than one approved industry certifications for Open Door. How should I complete the Excel Workbook to account for these certifications?

(FAQ #67)

A. For the Excel Workbook, agencies should list the program (column B) with just one of the approved industry certifications (column A). The Department will capture any additional certifications earned through the reporting process, so the data will be included in program outcomes.

Please note agencies should factor in any examination costs for these additional certifications into the total cost of attendance.

Q. My agency would like to request a Career Certificate Program with OCPs that allows a student to earn several certifications throughout the program. However, not all are included in an OCP approved for Open Door. Can all certifications be included in the program cost or just the ones included in the OCP?

(FAQ #59)

A. In deciding the total program cost for an Open Door eligible program OCP, only the certifications included in the OCP should be incorporated into the program cost.

Q. How should agencies confirm and document the FAFSA requirement for a student in continuing education courses who is not financial aid eligible?

(FAQ #60)

A. Rule 6A-20.045(7), F.A.C., specifies that institutions are responsible for developing policies and procedures to implement Open Door, which must include an application process for students.

Additionally, the rule states that institutions are responsible for verifying students have met the eligibility requirements, which include completion of the FAFSA.

Locally, institutions have the authority to determine the process by which they verify that students have met all eligibility requirements.

Q. What if a student recipient does not complete their program within the 12-month requirement?

(FAQ #55)

A. The agency will be responsible for monitoring student progress toward completion.

In doing so, agencies should consider the student’s coursework, ensuring that students are enrolled in a course load that will facilitate completion within 12 months.

Since “full time” enrollment is part of the student’s eligibility, a student enrolled for more than 12 months in the same program would no longer be eligible for the grant. For this reason, it is of utmost importance that institutions monitor student progress.

Q. Is there a timeframe or number of attempts allowed for a Student Investment recipient to earn their certification for the institution to be able draw down 1/3 of the funds?

(FAQ #50)

A. The statute and rule do not define the timeline for student completion of certifications and repeat attempts.

Institutions should establish local policies, giving consideration to the fact that the agency may only draw down the final 1/3 of funds until the student successfully completes the certification.

Q. What are allowable expenses?

(FAQs #35-39)

Allowable Expenses

- Program funds must be used solely for cost of tuition, fees, examination, books and materials to a student enrolled in an eligible program.
- Examination costs can include vouchers for third-party testing vendors.

Unallowable Expenses

- Expenses associated with administrative costs including **indirect costs are unallowable.**
- Expenses associated with equipment purchases are unallowable.
- Additional unallowable expenses may be found in the RFA.

Q. For a Student Investment recipient enrolled in non-credit workforce certification courses, how do we include certification test voucher fees as they are not calculated in tuition?

(FAQ #52)

A. In calculating the total student cost for the program, examination fees should be included. For Open Door funds, cost to the student is not limited to tuition.

Q. Since an institution cannot draw down funds for Student Investment until specific completion points, how can they show they are utilizing the awarded funds?

(FAQ #53)

A. Agencies will be required to submit quarterly reports detailing the eligibility status of each student who received a Student Investment Grant or Last Dollar Grant in the prior three months.

These reports will allow the Department to track anticipated completion points and subsequently, the funds expected to be drawn down for Student Investment.

Q. Since the budget period is through September 30, 2023, should we request funds for the 2022-23 school year as well?

(FAQ #56)

A. The application should reflect the entire award period which ends September 30, 2023.

Q. How will FDOE determine first-come, first serve?

(FAQ #5)

A. Applications will be reviewed in the order in which they are received based on the date a complete application was submitted to the department.

Complete applications include submission of all the required forms on the Application Review Criteria and Checklist. Agencies must have completed the required components in their entirety (e.g., all narrative sections addressed, all workbook tabs filled out, etc.) for the application to be considered complete.

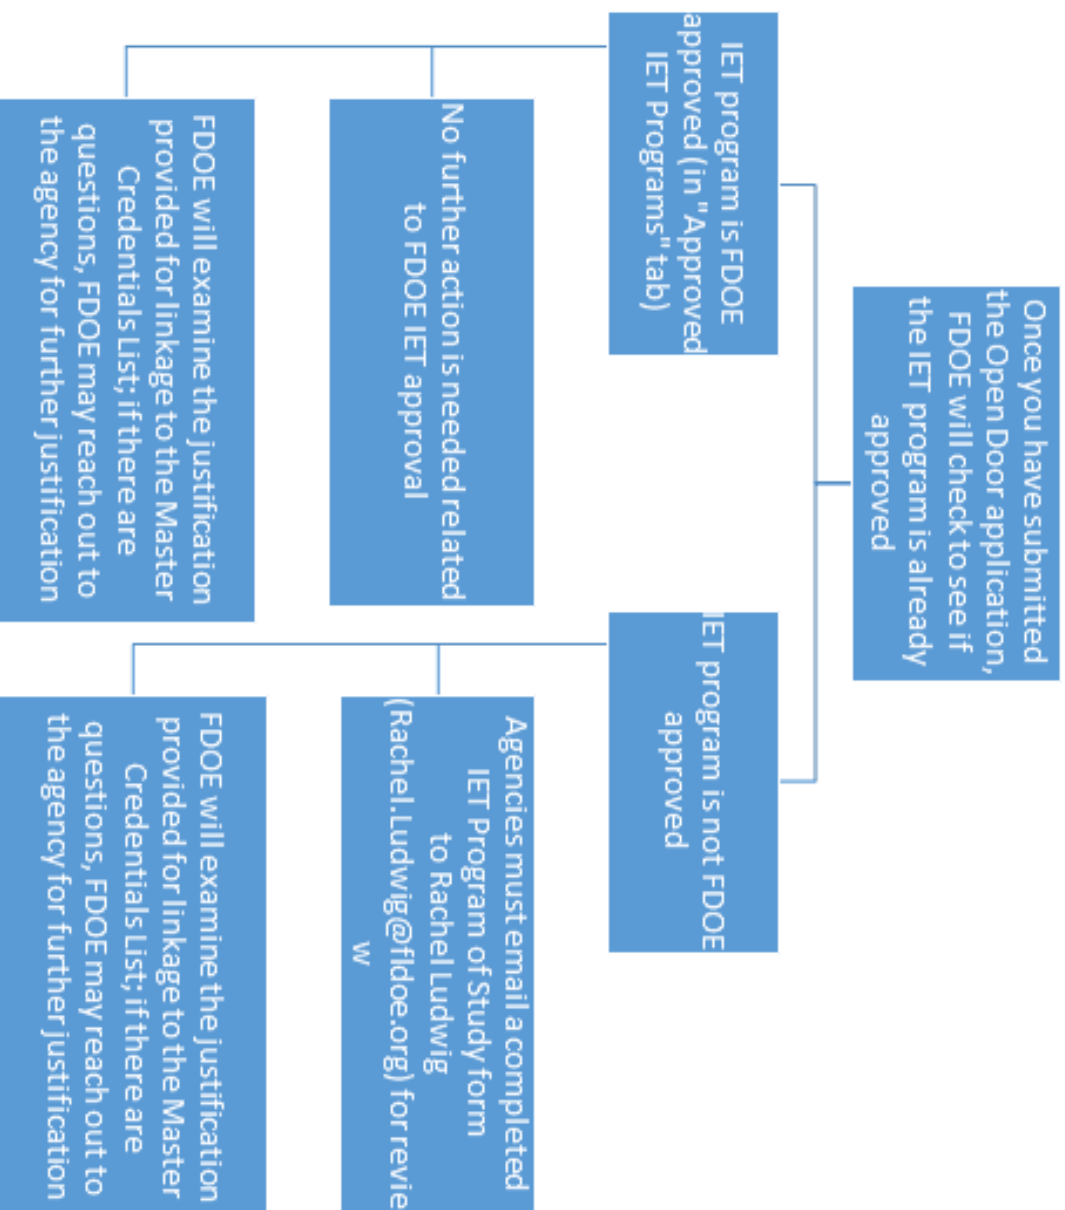

Q. Once an agency has been approved for Open Door, when will the funds be available for use?

(FAQ #57)

A. Awarded funds will be made available as soon as possible. Note that pre-award costs are allowed beginning on July 1, 2021, for students who met the eligibility criteria.

Q. Can you provide additional clarity on the IET approval process once an Open Door application has been submitted?

(FAQ #64)

Q. The Approved IET tab in the Excel workbook includes a linkage to an industry certification that is not being offered as part of my IET program. Is the program eligible for Open Door if it does not lead to the certification tied to my program on the “approved IET programs” tab? (FAQ #65)

A. Eligibility for IET program is based on approval of the overall IET program by the Department and alignment to the Master Credentials List. If the IET Program of Study does not lead to the student’s ability to obtain a credential on the Master Credentials List, then the IET program is not eligible for Open Door.

Your program is not limited to those pre-populated linkages; you may request a different credential of value linkage and provide a justification for that on the B3- IET Programs tab. You may reference the “IET Certifications” tab to identify eligible industry certifications (credentials of value) for which linkages may be made. All submissions for an IET program for Open Door must provide a justification for the linkage.

Q. What if my IET program only leads to completion of a portion of a credential on the Master Credentials List, but not the entire credential? For example, if my IET program results in a student earning the Microsoft Office Specialist credential, but not the Microsoft Office Master which requires the passage of multiple tests in different content areas?

(FAQ #66)

A. An IET program that only leads to a portion of a credential is not eligible for Open Door. In the example provided for Microsoft, the IET program of study would need to include all required exams for the Microsoft Office Master (MICRO017). If a provider would like to revise and expand their current IET program to result in a student earning a credential on the Master Credentials List, they are encouraged to go through the IET approval process explained in the RFA.

Open Door Grant Program, Frequently Asked Questions TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)

During the 2021 Florida Legislative Session, House Bill 1507 created section (s.) 1009.895, Florida Statutes (F.S.), to establish the Open Door Grant Program (Open Door), which will provide funds to support student completion of short-term, high-demand credit and non-credit career and technical education (CTE) programs at career centers and Florida College System (FCS) institutions. On September 15, 2021, the Florida Department of Education (FDOE) released the Request for Application (RFA). These Frequently Asked Questions are intended to supplement the RFA. Visit <https://bit.ly/OpenDoorFL> for more information on the program.

Request for Application (RFA)

1. When will the RFA be available?

The RFA will be available no later than Wednesday, September 15, 2021. All required documents for the RFA submission will be available at www.fldoe.org/academics/career-adult-edu/funding-opportunities/.

2. What are the application deadlines?

For consideration in the first review period, completed applications must be received by close of business (5:00 pm EDT) on October 15, 2021. Beginning on October 16, 2021, all remaining funds will be eligible for any agency demonstrating demand for grants.

For consideration in the second review period, completed applications must be received by close of business (5:00 pm EDT) on November 1, 2021. Agencies that do not submit an application to FDOE by November 1, 2021, will not be considered.

3. What opportunities will be provided for agencies to ask questions?

FDOE is hosting a webinar on Friday, September 17, 2021, at 10:00 a.m. EDT to review the RFA and FAQs. Register at <https://attendee.gotowebinar.com/register/232937452655308304>.

FDOE will host a second webinar for question and answer on Monday, September 27, 2021, at 1:00 p.m. EDT. Register at <https://attendee.gotowebinar.com/register/1967378563358915085>.

Agencies may submit questions at any time by emailing opendoor@fldoe.org.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

For questions received by September 24, 2021, FDOE will post written responses on its Open Door webpage so they are available to all agencies by September 28, 2021.

4. Is there a formula for agencies to determine the amount of funding to request?

No. In determining the amount to request, agencies will be asked—for each program linked to a certification on the Master Credentials List—to identify the estimated number of students receiving Open Door dollars and the estimated amount of funds available to those students. In determining the amount to request, agencies should consider that no student may receive more than \$3,000 per program and no agency may receive more than one-quarter of appropriated funds. Based on the current appropriation, the maximum amount an FCS institution may request and receive is \$5,000,000. The maximum amount a district may request and receive is \$3,750,000.

5. How will FDOE determine first-come, first serve?

Applications will be reviewed in the order in which they are received based on the date a complete application was submitted to the department. Complete applications include submission of all the required forms on the Application Review Criteria and Checklist. Agencies must have completed the required components in their entirety (e.g., all narrative sections addressed, all workbook tabs filled out, etc.) for the application to be considered complete.

6. What if my agency submitted an incomplete application?

If an agency submits an incomplete application, the department will notify the agency of the incomplete portions. The agency will have an opportunity to amend and resubmit their completed application. In these cases, the agency's date to be considered for "first come, first serve" will reset to the date in which a completed application is received. For this reason, it is of utmost importance that complete applications are submitted.

7. How will FDOE prioritize funding for rural institutions?

One-quarter of the funds will be reserved for rural institutions that submit applications by the first review deadline.

8. How does an agency determine if it is classified as "rural?"

The rule defines "rural" as follows:

- Career centers in counties identified in s. 288.0656(1)(e)1. or 2., F.S.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

- Florida College System institutions designated as subtypes 31, 32, 33, 41, 42 and 43 by the National Center for Education Statistics (NCES).

The list of rural agencies may be found under the “Agency Grant Number” tab in the Excel workbook.

9. How will FDOE prioritize Integrated Education and Training (IET) programs?

Once the first review period closes, FDOE will start by reviewing applications submitted by rural agencies. One-quarter of the funds will be reserved for rural agencies that submitted applications by the review deadline.

Once FDOE has made allocation decisions for rural agencies, staff will go back to the non-rural agency applications. The total amount of requested dollars will be recalculated. If there are sufficient funds to fully fund all applications and agencies’ applications were approved by FDOE, the applications will be fully funded.

If there are not sufficient funds to cover all requests, FDOE will:

- Review each agency application for inclusion of IET programs. Funding will be prioritized for these programs.
- Once FDOE has made allocation decisions for IET programs, staff will allocate any remaining funds to agencies using the first-come, first-serve approach based on the date a completed application was submitted to the department.

During the second review period, the rural "set aside" will be lifted. All funds will be eligible for any institution demonstrating demand for grants. In making the allocations, FDOE will follow the same procedure for allocating funds as described above.

Eligible Programs

10. What is considered an “eligible program” for Open Door?

An “eligible program” means integrated education and training (IET) programs and the following short-term workforce education programs that lead to the attainment of credentials on the Master Credentials List under s. 445.004(4), F.S.:

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)**

- Clock-hour career certificate programs less than or equal to nine hundred (900) clock hours;
- For-credit career and technical education programs (college credit certificates and applied technology diplomas) less than or equal to thirty (30) credit hours; or
- Non-credit industry certification preparation less than or equal to the equivalent of nine hundred (900) clock hours or thirty (30) credit hours.

Note: All programs linked to the Master Credentials Lists are eligible for Open Door regardless of the program's Title IV eligibility.

11. What programs are on the 2021-22 Master Credentials List?

For 2021-22, the CAPE Industry Certification Funding List and the CAPE Postsecondary Industry Certification Funding List comprise the Master Credentials List under s. 445.004(4), F.S.

Agencies must link their clock, credit and non-credit Open Door programs to the postsecondary CAPE list, which is available in the "Master Credentials List" tab of the Excel workbook.

- For short-term credit (30 hours or less) and clock programs (900 hours or less), FDOE provided a list of all programs linked to the CAPE Postsecondary Industry Certification Funding List, which is available in the "Approved Clock-Credit Linkages" tab of the Excel workbook.
- If the agency wishes to identify a credit or clock program that is not on the "Approved Clock-Credit Linkages" list, the agency will be required to provide justification explaining how the program trains for the industry certification on the Master Credentials List.
- For short-term non-credit or continuing workforce education courses and programs (equivalent to 30 credit hours/900 clock hours or less), the agency will be required to provide justification explaining how the program trains for the industry certification on the Master Credentials List.

Agencies may link their IET Open Door programs to K-12 or postsecondary certifications on the Master Credentials List, which is available in the "IET Certifications" tab.

- FDOE has provided an approved list of programs in the "Approved IET Programs" tab.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)**

- If an agency wishes to seek approval for an IET program that is not on the list, the agency must complete an IET Program of Study form for review by FDOE.
- For each IET program requested, agencies must also provide a brief justification explaining how the IET program trains for the K-12 or postsecondary industry certification.

For 2022-23 and beyond, the Credential Review Committee will publish the Master Credentials List that indicates courses and programs that meet the framework of quality and are credentials of value.

- 12. Are clock hour programs to be listed as non-credit for this application?**
No. If a program has a state-issued program framework, it is not considered non-credit. Only programs that are offered through fee-based or continuing education opportunities would be classified as non-credit.
- 13. I want to offer a clock hour or credit program that is linked to a certification on “Master Credentials List” tab, but it is not on the “Approved Clock-Credit Linkages” tab. Is this allowable?**
Yes. When submitting the application, agencies may request a program that is not identified on the approved linkage list by providing a brief justification explaining how the program trains for the industry certification on the Master Credentials List.
- 14. I want to offer an IET program that is not listed on the “Approved IET Programs tab.” Is this allowable?**
Yes. If an agency wishes to seek approval for a new IET program that is not found in the “Approved IET Programs” tab of the workbook, the agency may apply for Open Door grants by completing application materials; however, they must receive full program approval prior to using Open Door funds. To obtain approval for a new IET program, agencies must email a completed IET Program of Study form to Rachel Ludwig (Rachel.Ludwig@fldoe.org) for review. Providers will be contacted if IET Program of Study revisions need to be made prior to approval.
- 15. Will instruction that results in an Occupational Completion Point (OCP) be eligible for Open Door?**
Possibly, if the agency provides a justification explaining how the instruction, which must be 900 clock hours or less, results in an OCP that also prepares

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)**

students for an approved industry certification on the Master Credentials List. The department recognizes that numerous clock hour programs exceed the 900-clock hour threshold and embedded in those programs are OCPs associated with learning outcomes which may prepare students for industry certifications on the Master Credentials List. For example, Welding Technology is a 1050 clock hour program. OCP B of that program is generally achieved upon 600 hours of instruction at which point students may be eligible to sit for an industry certification (NCCER, American Welding Society) on the Master Credentials List. These requests should be treated as “Agency-Requested Linkages” in “Tab B1” of the Excel workbook.

16. Can my institution add programs after the initial award period?

Yes. During the award period, agencies may add programs after the initial application if:

- The institution has begun offering an eligible program that it did not offer at the time of application.
- Programs are added to the Master Credentials List that meet the framework of quality and are credentials of value.
- A linkage is added to the Master Credentials List between an industry certification and a program.

17. Do I need FDOE approval before adding programs after the initial award period?

If the non-credit, credit or clock hour program is already approved by FDOE as an approved linkage, the institution does not need FDOE approval to begin applying Open Door funds. Agencies will notify FDOE of the addition of approved programs through the quarterly reports.

If the non-credit, credit or clock hour program is not already approved by FDOE as an approved linkage, the institution does need FDOE approval to begin applying Open Door funds. Agencies should contact the grant manager to seek approval by providing a brief justification explaining how the program trains for the industry certification on the Master Credentials List.

If the IET program is not already approved by FDOE as an approved linkage, the institution does need FDOE approval to begin applying Open Door funds. Agencies should send a completed IET Program of Study form to Rachel Ludwig (rachel.ludwig@fldoe.org) for review. Providers will be contacted if IET Program of Study revisions need to be made prior to approval.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

- 18. Are Open Door funds for new programs or existing programs?**
The funds may be spent on new or existing programs.
- 19. What programs will be on the 2022-23 Master Credentials List?**
For 2022-23 and beyond, the Credential Review Committee will publish the Master Credentials List that indicates courses and programs that meet the framework of quality and are credentials of value.

Award Approach

- 20. Are agencies required to implement both the Last Dollar and Student Investment approach?**

No. Agencies are able to implement either, or both, the Student Investment or Last Dollar approach. For each eligible program, agencies must indicate if they plan to use a Student Investment approach, a Last Dollar approach or a Student Investment and Last Dollar approach.

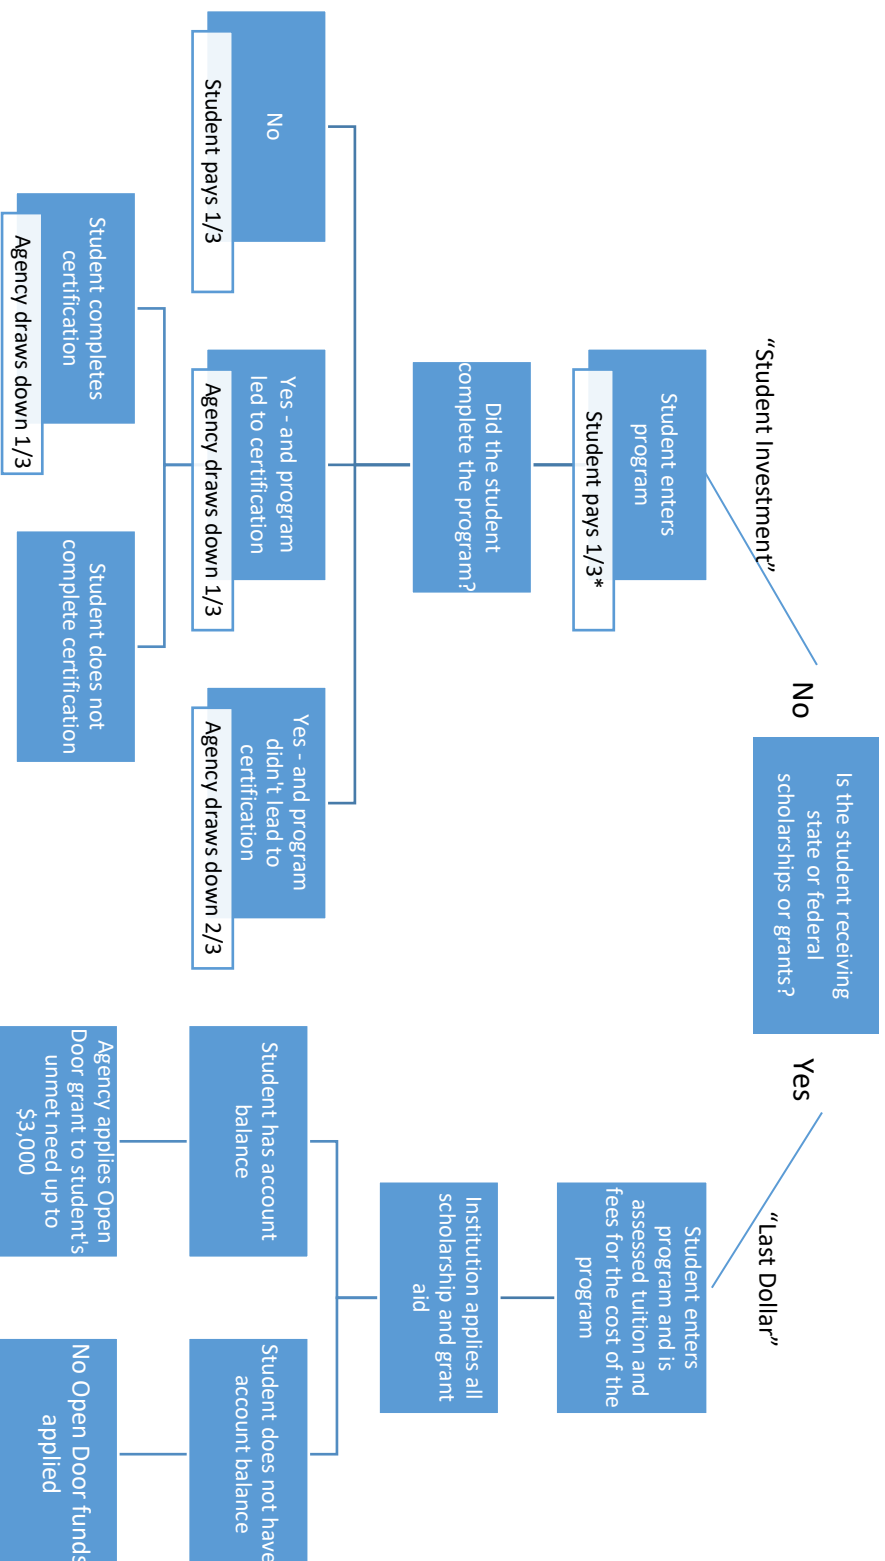

Figure 1 contains the decision tree if the program is offered using both approaches. Last Dollar and Student Investment.

Figure 2 contains the decision tree if the agency opts to only offer the program using the Student Investment approach. This model only applies to students who are not in receipt of state or federal financial aid.

Figure 3 contains the decision tree if the agency opts to only offer the program using the Last Dollar approach. In this model, students who are not in receipt of state or federal financial aid are ineligible for Open Door.

Open Door Grant Program, Frequently Asked Questions

Centers)**

Last Dollar

- 21. Are grants or scholarships funded by the financial aid fee under s. 1009.23(8), F.S., considered “state aid” for purposes of determining eligibility for Last Dollar?**
No. The financial aid fee is not funded by the state of Florida or federal government.
- 22. Are student loans considered “federal aid” for purposes of determining eligibility for Last Dollar?**
No. For the purposes of determining eligibility for the Last Dollar program, “state or federal financial aid” means scholarships and grants whose fund sources are the state of Florida or the federal government.
- 23. What considerations should be given to grants or scholarships that are not state or federally funded in determining a recipient’s award amount under Last Dollar?**
For a recipient in the Last Dollar approach, the student’s grant and scholarship aid from all sources should be first applied towards the recipient’s cost of the program. After all scholarships and grants are applied, Last Dollar funds would then be used for the amount of the unmet need, not to exceed \$3,000.
- 24. Should an agency exclude loans when determining the amount of funding to award a recipient under Last Dollar?**
Yes.

Student Investment

- 25. If an agency is unable to receive the remaining two-thirds of tuition and fees until a student completes their program, will the agency be able to collect on balances for students who withdraw from the program before they earn a degree or certificate?**
A student who enrolls under Student Investment must pay one-third of the cost of the program and sign an agreement to either complete the program or pay an additional one-third of the cost of the program in the event of non-completion. In the event of non-completion, agencies may collect on balances for only one-third the cost of the program in accordance with the agreement students signed upon entry. Agencies are responsible for absorbing the final one-third the cost of the program. This approach is intended to incentivize institutions in promoting student completion.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

- 26. What are the financial obligations for an IET student who used Open Door to cover the student portion and failed to complete the program?**
Students in an approved IET program who had their student portion paid through Open Door are required to sign an agreement indicating they will pay this cost in the event of non-completion, in addition to the one-third required of all Student Investment students.
- 27. Will FDOE provide a template for the agreement required of Student Investment grant recipients?**
No. Agencies are responsible for designing the template, giving consideration to Rule 6A-20.045(4), F.A.C. Specifically, that a student must:
- Pay one-third of the cost of the program. This student portion may be paid by the student, the employer or a private source. For students in IET programs, the student portion may be paid by the Open Door grant if the student signs an agreement that he or she will pay this cost should the student fail to successfully complete the program.
 - Sign an agreement that requires the student to pay an additional one-third of the cost of the program in the event the student does not successfully complete the program.
- 28. What considerations should be given to grants or scholarships that are not state or federally funded under Student Investment?**
For a recipient in the Student Investment approach, aid from non-state or federal sources may be used to fund the one-third of the program cost required by the recipient (“student portion”).

Student Eligibility

- 29. What are the student eligibility requirements for Open Door?**
To be eligible for funding under both the Student Investment Grant and the Last Dollar Grant, a student must:
- Be admitted to and enrolled full-time in an eligible program at an eligible institution;
 - Be a resident of this state as determined under Section 1009.21, F.S.;
 - Be unemployed, underemployed or furloughed;
 - Complete the Free Application for Federal Student Aid (FAFSA) for each academic year in which the grant is sought; and
 - Meet all requirements set by the student’s institution to document compliance with the items above

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

30. How will agencies know a student's employment status?

Agencies are responsible for determining student eligibility for Open Door, which includes establishing procedures for measuring whether applicants are “unemployed,” “underemployed” or “furloughed”. Agencies may wish to incorporate this determination in the student application process for the grant. The following resources may be useful.

- [Section 443.036\(44\), Florida Statutes, Definition of Unemployment](#)
- [Section 443.036\(43\), Florida Statutes, Definition of Temporary Layoff](#)

31. How is “full-time enrollment” defined?

To be eligible for Open Door, students must be enrolled in courses and training such that they will complete the program in 12 months or less.

32. Can a student enrolled in a non-Title IV eligible program qualify for Open Door?

Yes. A student enrolled in a program that is not eligible for federal financial is eligible for Open Door.

32. Do all students, even those in non-Title IV eligible programs, need to complete the FAFSA?

Yes. According to s. 1009.895(4) F.S., a student must complete the FAFSA for each academic year in which the grant is sought, regardless of the program's eligibility for Federal student aid.

33. Would an IET student who is not eligible for federal financial aid yet receives WIOA dollars from CareerSource be eligible for Last Dollar?

Yes. Any student receiving funds tied to federal/state aid sources is eligible for Last Dollar. This includes students who are enrolled under the Get There Faster campaign.

Budget and Finance

34. What is the budget period for the Open Door Grant Program?

The budget period for the Open Door Grant Program is July 1, 2021, through September 30, 2023.

35. What are allowable expenses?

Program funds must be used solely for cost of tuition, fees, examination, books and materials to a student enrolled in an eligible program.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)**

- 36. May funds be used to pay for student industry certification exams?**
Yes. Examination costs can include vouchers for third-party testing vendors.
- 37. May funds be used to cover the cost of marketing, promotions and advertisements to promote the grant program?**
No.
- 38. May funds be used to cover the cost of personnel to administer the grant program?**
No.
- 39. May funds be used to cover indirect or administrative costs?**
No.
- 40. When will agencies be able to draw down funds?**
The department will make funds available to agencies through a federal cash advance. Agencies should draw down funds based on student completion of key milestones as outlined below.

For a recipient in the Last Dollar approach, agencies should draw down state funds in the process of applying Open Door to the students' accounts to cover the difference between the costs the student incurs at the time of enrollment and the total value of all grants and scholarships received by the recipient to attend the institution that semester or term. If the student is enrolled in a program that lasts more than one semester or term, the institution may draw down funds each semester or term. The amount may not exceed \$3,000 per student per program.

For a recipient in the Student Investment approach, agencies may draw down state funds once a student completes their program and earns the associated industry certification, if applicable. The amount may not exceed \$3,000 per student, per program.

Student Portion

- For students in an approved IET program, agencies may draw down 1/3 of the cost of the program when a student enrolls in the program. This is considered the “student portion.” The ability to use Open Door to cover the student portion is limited to IET students.
- For students in credit, clock and non-credit programs leading to a credential on the Master Credentials List, at the time of enrollment, students must pay

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

1/3 the cost of the program. This payment may come from the student, the employer or a private source. No Open Door funds may be drawn down for these students.

State Portion

- For students in a program with an associated industry certification, agencies may draw down:
 - 1/3 of the cost of the program when a student completes the postsecondary credential.
 - 1/3 of the cost of the program when a student completes the third-party industry certification.
- For students in a program with no associated industry certification, agencies may draw down:
 - 2/3 of the cost of the program when a student completes the postsecondary credential.

41. May agencies allow students to pay their portion (1/3 cost of the program) over multiple terms?

No. The student must pay 1/3 the cost of the program at the time of enrollment as the student portion reflects the full cost of the program in accordance with s. 1009.895, F.S.

42. Will agencies be able to defer fees for eligible Open Door recipients?

Yes.

For career centers, the [DOE Information Database Requirements Volume I: Automated Student Information System](#), contains data element 101325 Adult Fee Status which outlines the conditions under which fees may be deferred.

Rule 6A-14.054(10), [F.A.C.](#), provides that FCS institutions may defer fees when the college has a written promise of payment from business, industry, government unit, nonprofit organization, or civic organization.

43. What happens if a student does not complete their program/certification?

For a recipient in the Last Dollar approach, agencies should establish local policies governing financial implications if a student withdrawals from courses, the eligible program, or the institution, or if a student is no longer eligible for the Open Door program.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

For a recipient in the Student Investment approach, statute and rule specify the following: Agencies may adopt local policies to supplement these state requirements governing financial implications if a student withdrawals from courses, the eligible program, or the institution, or if a student is no longer eligible for the Open Door program.

Student Portion

For students in an approved IET program whose student portion was funded through Open Door, institutions must require the student to sign an agreement to pay this cost back in the event the student does not successfully complete the program. In the event of non-completion, the agency may recover one-third the cost of the program by enforcing the student agreement.

State Portion

Agencies must require students to sign an agreement to pay an additional one-third of the cost of the program in the event the student does not successfully complete the program. If the student does not complete the program, the agency will not be eligible to draw down any Open Door funds, as the drawing down of funds is tied to student completion. In the event of non-completion, the agency may recover one-third the cost of the program by enforcing the student agreement.

For programs that lead to industry certifications – If the student completes the program, but does not pass the certification, the agency will not be eligible to draw down Open Door funds for the certification, as the drawing down of funds is tied to student attainment of the certification. In the event of non-completion, the agency may not recover one-third the cost of the program.

44. Can Open Door funds be retroactively applied to students enrolled in the summer or fall semester 2021?

Yes, pre-award costs are allowed beginning on July 1, 2021, for students who met the following eligibility criteria:

- Be admitted to and enrolled full-time in an eligible program at an eligible institution;
- Be a resident of this state as determined under Section 1009.21, F.S.;
- Be unemployed, underemployed or furloughed;
- Complete the Free Application for Federal Student Aid (FAFSA) for each academic year in which the grant is sought; and

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)**

- Meet all requirements set by the student’s institution to document compliance with the items above.

For the student investment approach, the agency would need to ensure the student (or the employer or private source, on the student’s behalf) paid one-third of the cost of the program at the time of enrollment, unless subject to an exception listed in paragraph Rule 6A-20.045(4)(c), F.A.C. Additionally, the agency must require each eligible student to sign an agreement that requires the student to pay an additional one-third of the cost of the program in the event the student does not successfully complete the program.

Get There Faster

45. How does the Open Door Grant Program relate to the Get There Faster WIOA Competitive Grant opportunity?

Both grant opportunities promote strategic partnerships in an effort to ensure all Floridians have access to education and training that lead to career paths for in-demand, middle-to-high wage jobs. The table below shows a side by side of the two opportunities.

	Open Door Grant Program	Get There Faster
Eligible agencies	Career centers FCS institutions	Florida’s 24 local workforce development boards (LWDB)
Funding available	Career centers: \$15 million FCS institutions: \$20 million	Veterans and Military Spouses: Up to \$7 million Low-Income Returning Adult Learners: Up to \$5 million At-Risk Floridians: Up to \$5 million
Eligible students	Eligible applicants must: <ul style="list-style-type: none"> • Be admitted to and enrolled full-time in an eligible program at an eligible institution; • Be a resident of this state as determined under Section 1009.21, F.S.; • Be unemployed, underemployed or furloughed; • Complete the FAFSA for 	Students must be determined eligible for WIOA Adult, Dislocated Worker, or Youth programs. <u>Adult</u> <ul style="list-style-type: none"> • 18 years or older • U.S. citizen or eligible to work in United States • Males registered with selective service • Priority populations include low income, recipients of public

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

Postsecondary institutions and local workforce development boards are encouraged to partner to maximize the education and training available to eligible students.

46. If a student receives funds through Get There Faster, are they also eligible for Open Door? And vice versa?

Students may receive funds from both the Open Door grant and the Get There Faster grant if they meet the eligibility criteria for both grant programs. Whereas eligibility for Open Door is determined by the postsecondary institution, eligibility for Get There Faster is determined by the workforce board. As such, the student would need to complete application documents with both agencies.

47. Can students who receive funds through Get There Faster be eligible for Last Dollar under Open Door?

Yes. Because the Get There Faster fund source is federal, these students would be eligible for Last Dollar.

48. Where can agencies find out more about how to apply for Get There Faster?

Career centers and FCS institutions are encouraged to partner with their local workforce boards in preparing a grant application. More information about the opportunity is available at <https://careersourceflorida.com/wp-content/uploads/2021/08/CSF-Get-There-Faster-Grants.pdf>.

Other

49. Whom should an agency contact with questions about the Open Door Grant Program?

Grants Management: Office of Grants Management, 850-245-0496

Updated 9/15/2021

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

Questions added after 9/15/21:

- 50. Is there a timeframe or number of attempts allowed for a Student Investment recipient to earn their certification for the institution to be able to draw down 1/3 of the funds?**

The statute and rule do not define the timeline for student completion of certifications and repeat attempts. Institutions should establish local policies, giving consideration to the fact that the agency may only draw down the final 1/3 of funds until the student successfully completes the certification.

- 51. Can Open Door funds be used to pay for books, supplies and materials for students enrolled in a pre-apprenticeship program?**

For 2021-22, the CAPE Industry Certification Funding List and the CAPE Postsecondary Industry Certification Funding List comprise the Master Credentials List under Section 445.004(4), F.S. Agencies must link their clock, credit and non-credit Open Door programs to the postsecondary CAPE list, which is available in the "Master Credentials List" tab of the Excel workbook. FDOE would need additional information from the requesting agency regarding the pre-apprenticeship program, including clarity around the delivery of instruction and the linkage to the MCL, prior to making a determination. These agencies may contact opendoor@fldoe.org to provide more information.

- 52. For a Student Investment recipient enrolled in non-credit workforce certification courses, how do we include certification test voucher fees as they are not calculated in tuition?**

In calculating the total student cost for the program, examination fees should be included. For Open Door funds, the cost to the student is not limited to tuition.

- 53. Since an institution cannot draw down funds for Student Investment until specific completion points, how can they show they are utilizing the awarded funds?**

Agencies will be required to submit quarterly reports detailing the eligibility status of each student who received a Student Investment Grant or Last Dollar Grant in the prior three months. These reports will allow the Department to track anticipated completion points and subsequently, the funds expected to be drawn down for upcoming Student Investment.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

- 54. Our workforce development department cannot accept Pell Grants. Does this mean that all of our participants would fall under student investment?**
Students eligible for the Last Dollar approach are those enrolled in eligible programs and who are receiving state or federal financial aid. Rule 6A-20.045, 2(j), F.A.C., defines “state or federal financial aid” as scholarships and grants whose fund sources are the state of Florida or the federal government. For the purposes of this program, institutional aid that can be sourced to the state of Florida or the federal government and other financial assistance provided under the state of Florida or federal programs for student education and training are considered state or federal aid.
- 55. What if a student recipient does not complete their program within the 12-month requirement?**
The agency will be responsible for monitoring student progress toward completion. In doing so, agencies should consider the student’s coursework, ensuring that students are enrolled in a course load that will facilitate completion within 12 months. Since “full time” enrollment is part of the student’s eligibility, a student enrolled for more than 12 months in the same program would no longer be eligible for the grant. For this reason, it is of utmost importance that institutions monitor student progress.
- 56. Since the budget period is through September 30, 2023, should we request funds for the 2022-23 school year as well?**
The application should reflect the entire award period which ends September 30, 2023.
- 57. Once an agency has been approved for Open Door, when will the funds be available for use?**
Awarded funds will be made available as soon as possible. Note that pre-award costs are allowed beginning on July 1, 2021, for students who met the eligibility criteria.
- 58. In adding a program to the list based on an Occupational Completion Point (OCP), how do we determine the program cost? Should we include the hours for the entire program or just the hours of the specific OCP(s) eligible for Open Door?**

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

Because only Open Door eligible programs should be requested on the Excel Workbook, the cost of attendance would be linked to the cost to complete these OCPs, not the full cost of the career certificate.

- 59. My agency would like to request a Career Certificate Program with OCPs that allows a student to earn several certifications throughout the program. However, not all are included in an OCP approved for Open Door. Can all certifications be included in the program cost or just the ones included in the OCP?**

In deciding the total program cost for an Open Door eligible program OCP, only the certifications included in the OCP should be incorporated into the program cost.

- 60. How should agencies confirm and document the FAFSA requirement for a student in continuing education courses who is not financial aid eligible?**

Rule 6A-20.045(7), F.A.C., specifies that institutions are responsible for developing policies and procedures to implement Open Door, which must include an application process for students. Additionally, the rule states that institutions are responsible for verifying students have met the eligibility requirements, which include completion of the FAFSA. Locally, institutions have the authority to determine the process by which they verify that students have met all eligibility requirements.

- 61. If a credit student with state or federal financial aid wishes to enroll in an eligible non-credit program that does not accept financial aid, would that scenario qualify for the Student Investment portion of this grant?**

Yes, that scenario may qualify under the Student Investment portion of the Open Door Grant, if they meet all eligibility criteria and full-time status in the eligible program.

- 62. How would it work to include a non-credit program in the Last Dollar scenario? Non-credit programs do not accept financial aid.**

While some programs may not be eligible for federal financial aid, the eligibility for Last Dollar can be extended to students in these programs if the student is in receipt of aid that has a state or federal fund source. For the purposes of the Open Door Grant Program, "state or federal financial aid" means scholarships and grants whose fund sources are the state of Florida or the federal government. Institutional aid that can be sourced to the state of Florida or the federal government and other financial assistance provided under the state of Florida or federal programs for student education and training are considered state or federal aid.

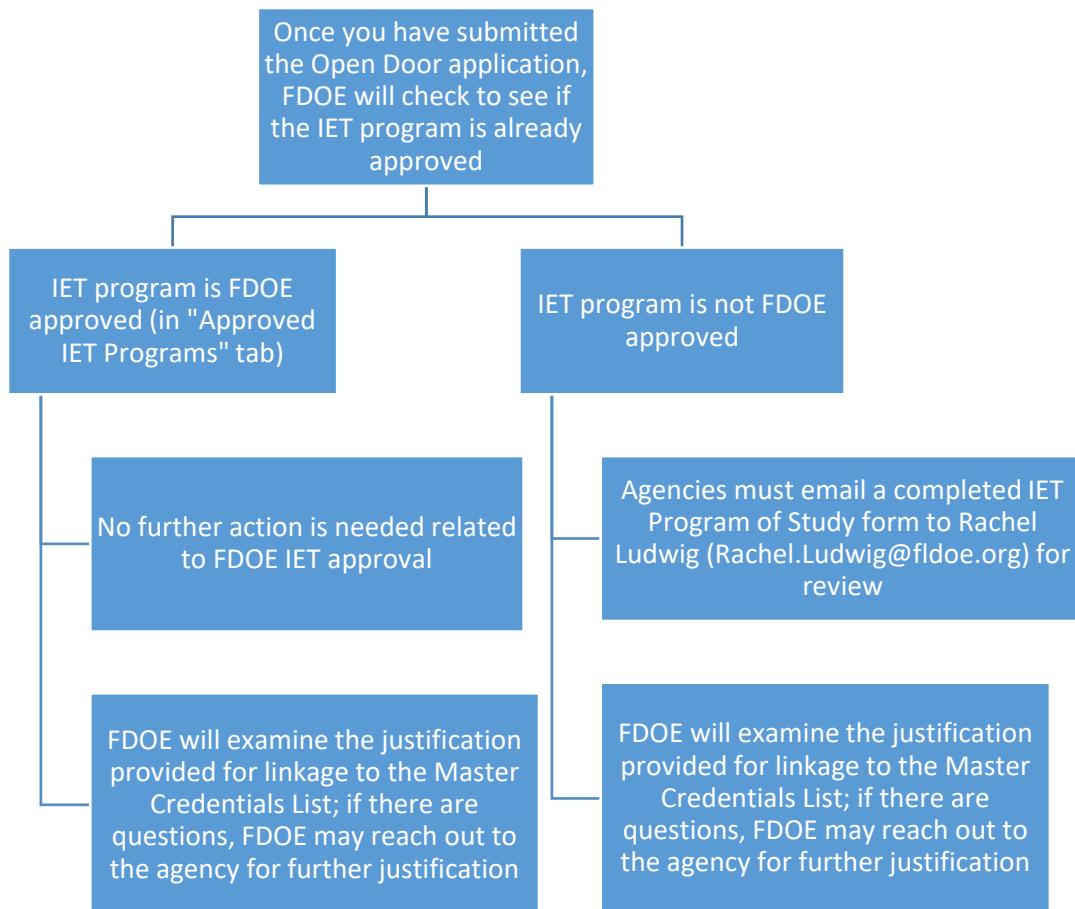

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career Centers)**

- 63. An eligible program is one that leads to the attainment of a credential on the Master Credentials List. Are there any approved programs which do not lead to a certification?**

For 2021-22, the CAPE Industry Certification Funding List and the CAPE Postsecondary Industry Certification Funding List comprise the Master Credentials List. For 2022-23 and beyond, the Credential Review Committee will publish the Master Credentials List that identifies the programs that meet the framework of quality standards used to identify credentials of value. If the Credential Review Committee adds a program to the Master Credentials List (2022-2023 and beyond) that does not lead to certification, this is when an agency would be able to draw down the additional funds.

- 64. Can you provide additional clarity on the IET approval process once an Open Door application has been submitted?**

The figure below shows the process FDOE will undertake when reviewing IET Open Door applications.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

Additional information regarding IET programs, including the Program of Study request form, can be found at <https://www.fldoe.org/academics/career-adult-edu/adult-edu/adult-edu-career-pathways.stml>.

- 65. The Approved IET tab in the Excel workbook includes a linkage to an industry certification that is not being offered as part of my IET program. Is the program eligible for Open Door if it does not lead to the certification tied to my program on the “approved IET programs” tab?**
Eligibility for IET program is based on approval of the overall IET program by the Department and alignment to the Master Credentials List. If the IET program of study does not lead to the student’s ability to obtain a credential on the Master Credentials List, then the IET program is not eligible for open door. Your program is not limited to those pre-populated linkages; you may request a different credential of value linkage and provide a justification for that on the B3- IET Programs tab. You may reference the “IET Certifications” tab to identify eligible industry certifications (credentials of value) for which linkages may be made. All submissions for an IET program for Open Door must provide a justification for the linkage.
- 66. What if my IET program only leads to completion of a portion of a credential on the Master Credentials List, but not the entire credential? For example, if my IET program results in a student earning the Microsoft Office Specialist credential, but not the Microsoft Office Master which requires the passage of multiple tests in different content areas?**
An IET program that only leads to a portion of a credential is not eligible for Open Door. In the example provided for Microsoft, the IET program of study would need to include all required exams for the Microsoft Office Master (MICRO017). If a provider would like to revise and expand their current IET program to result in a student earning a credential on the Master Credentials List, they are encouraged to go through the IET approval process explained in the RFA.
- 67. My agency offers a program that provides students with the opportunity to earn more than one approved industry certification for Open Door. How should I complete the Excel Workbook to account for these certifications?**
For the Excel Workbook, agencies should list the program (column B) with just one of the approved industry certifications (column A). The Department will capture any additional certifications earned through the reporting process, so the data will be included in program outcomes. Please note agencies should factor in any examination costs for these additional certifications into the total cost of attendance.

**Open Door Grant Program, Frequently Asked Questions
TAPS#22A187 (Florida College System institutions) / TAPS#22A188 (Career
Centers)**

- 68. May an industry certification not on the CAPE Postsecondary Funding List be added for an in-demand workforce program?**
Every postsecondary program receiving Open Door funds must be linked to at least one credential on the Master Credentials List, which is the CAPE Postsecondary Industry Certification Funding List for 2021-22. If an agency offers a program which leads to multiple certifications, at least one of the certifications must be on the Master Credentials List.
- 69. Are PSAV programs eligible for Open Door?**
Yes. In the last few years, the department has sunset the term "PSAV" and replaced with the term "career certificates." For every program the agency wishes to apply Open Door funds to, it must lead to a certification on the Master Credentials List, which for credit and clock programs, is a certification on the CAPE Postsecondary List. In the Excel Workbook, the "Approved Clock-Credit Linkages" tab provides some of the already approved programs, with column E providing the program type ("Career Cert"). Additionally, in Tab B1, agencies are able to request another credit-clock program and justification for how it leads to certification on the MCL (columns C and D).
- 70. Is a district eligible to receive Open Door dollars if they have an approved IET program that leads to a credential on the Master Credentials List?**
Section 1009.895(1)(c), F.S., specifies that Open Door funds are available to school districts which offer postsecondary technical career centers under s. 1001.44, F.S.
- 71. Do advanced technical certificate (ATC) programs under 30 credits, qualify as eligible programs?**
Rule 6A-14.030, F.A.C., specifies that ATC programs are designed to stack on top of a student's existing associate or baccalaureate degree. The programs identified for Open Door funds are lower-division certificates. FDOE would need additional information from the requesting agency regarding the ATC program, including clarity around the delivery of instruction and the linkage to the MCL, prior to making a determination. These agencies may contact opendoor@fldoe.org to provide more information.

Subject: Question about NSTA requirements
Attachment(s): "image001.jpg"

Hi Cathy,

I am reaching out to inform you that our company has been in contact with our paper suppliers/vendors. Due to the global shortage of paper, the suppliers have let us know that there is a possibility of not having NSTA weight paper available for printing new textbooks. This in no way affects the binding and most likely the difference in paper weight will not be noticeable. And as mentioned, since this is a global issue, all publishers will be having the same concerns for printing new materials.

We are hopeful that the shortage will not take place at all, but if it does, we wanted to be proactive and reach out to you. State bids include specifications on the quality of print materials. Would a disclaimer from National Geographic Learning/Cengage stating that we will replace, free of charge, any materials that do not hold up to normal wear and tear be an acceptable solution in the event we are unable to obtain NSTA weight paper?

I understand that this is an unusual request, but it is also an unusual circumstance. I am happy to schedule a call and discuss if you need additional information or clarification. Our goal is to do everything possible to provide high quality print materials to your students.

Subject: Quick Call to Confirm Direction of Final Corrections

Hi Cathy,

Thanks for your time this afternoon and for your offer of availability. In discussing how to most efficiently get to approval on the 8 remaining standards across G1 and G5, we thought it could be helpful for 1-2 members of our editorial team to discuss directly with you and Ashley how we might approach the additional corrections before proceeding with the mark-up and sending that over. That way we can ensure we are heading in the right direction prior to marking up the changes and sending those back for official approval.

If that is possible we can be available anytime tomorrow morning that works on your end. If you could let us know by close of business today we would be able to get the meeting details scheduled.

Much appreciated,
Erin

Erin Kinard *(she/her)*

Hi everyone,

As we are going through the changes, we noticed that the stories that had edits were reflected in both the grade 4 accelerated as well as the foundational skills 3-5. Can you please give some insight on why both courses contain the same stories? We just want to clarify that the same product is not being used for both courses. I do see in the spreadsheets that each link takes me to the correct course.

Thanks!
Lauren

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Current:

<https://drive.google.com/file/d/1SWCQjVd3L65Gh-CI5b0UR7HGxh02MeeJ/view?usp=sharing>

Revised:

-- Amanda

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

-- Amanda

On Thu, Apr 21, 2022 at 10:39 AM Hamilton, Lauren <Lauren.Hamilton@fldoe.org> wrote:

Good morning,

Thank you for speaking with me this morning. As mentioned, attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

We looked specifically at content that both courses shared since these were the only two submissions that had issues.

Since there are overlapping standards and benchmarks in those two courses, there are going to be pieces of the lessons that overlap.

The products are different and reflect the standards and expectations of the two courses.

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

Good morning Lauren/Kathy - I understand a meeting with HMH is supposed to be set up for later either later today, or perhaps Tuesday or Wednesday and that FLDOE staff was to reach out to HMH (I think me) to schedule. I just want to make sure that I have not missed anything. HMH is very anxious to schedule the meeting asap.

Thanks,
Tavi

Course: [Grade One Mathematics](#)

Bid ID: 455

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material presented is organized in a manner that provides easy and predictable usability for teachers and students. The student material provides access at majority of the benchmarks at an appropriate conceptual level for students. Earlier lessons within a concept elicit the use of models/manipulative, or provide visual aids that support learners in access the content. As students progress through out each lesson the complexity of questions increases. Students are also engaged in MTRs through purposefully placed pauses within the

text. A weakness to be aware of is over scaffolding within lessons through provided models or equation set ups. While some scaffolding may be necessary, the primary focus should be the student work and thinking, and not just filling in the blanks in the student work. The teacher material supports the learning through questioning and appropriate instructional strategies. Both resources clearly state the objectives and aligned benchmarks.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	5 - Very Good Alignment	Lessons on SE Pages 369-386 include representations with snap cubes and a ten frame. The numbers provided support doubles and make a ten strategies. All problems presented are within a sum of 20.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Multiple opportunities throughout the student work where students are provided context and must determine the operation through reasoning. For example, in Chapter 10, Lesson 6, students must interpret the context, select add or subtract and then record an number sentence to solve. Scenarios are represented with numbers, pictures and words.

MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	4 - Good Alignment	Missed opportunities for format of $c = a + b$. Student work has no context and context examples of standard. Connections made to other models and strategies.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Problem types vary according to the Situations Involving Operations with Numbers chart. There is a heavier focus on Result and Change unknown in contexts provided. Amble experiences to find missing numbers in any position in pre-written equations.
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	3 - Fair Alignment	Data sets do not include any examples of defining attributes of geometric figures to categorize.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	Problems used the data and scenarios to apply addition and subtraction.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons use grade appropriate terms such as halves and fourths. There are

			various representations and orientations of circles and rectangles partitioned as examples and non examples.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	Multiple opportunities to identify defining attributes, but limited opportunity to identify a figure based on given defining attributes
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	The standard reads "Sketch two-dimensional figures when given defining attributes." There are limited examples of where this is evident. Only a few examples can be seen on page 542, questions 14-16. Here an attribute is given and students are asked to sketch the shape. (Ex. Meg draws a shape with 6 sides.)
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Multiple lessons and examples for 2D and 3D shapes that involve composing, decomposing and identifying the geometric shapes involved. Lessons include examples of the use of 3D solid manipulatives and pattern blocks for students to access the concept.

MA.1.GR.1.4	<p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>3 - Fair Alignment</p>	<p>While there are many examples of real-world objects for stand alone figures (balls, cones, cans, etc), there are only a few real-world examples of items with multiple identifiable geometric figures. One example that does align to the standard is question 9 on page 506. This requires students to identify the geometric figures in an ice cream cone. In most other examples, they are identifying the geometric figures in composed shapes, but they are not real-world objects, but rather just composed by two stacked images.</p>
MA.1.M.1.1	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>5 - Very Good Alignment</p>	<p>Items align to the standard for estimation. Lessons prior to using a ruler use tiles to build understanding of counting units to measure. Rules presented in the text all start at zero.</p>
MA.1.M.1.2	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities for 3 items compared directly and also for indirect comparison.</p>
MA.1.M.2.1	<p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	<p>4 - Good Alignment</p>	<p>Focus on time to the hour then half hour introduced with one-</p>

			handed clock. Lacks connections to partitioning circles in half for half hour.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	2 - Poor Alignment	Resource provides images of both sides of coins. Limited opportunity to simply identify coins by name or value without having to count combinations. No reference seen that related each coin to how many equal a dollar.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	The benchmark reads "Find the value of combinations of pennies, nickels and dimes up to one dollar." The resource has lessons that also include quarters with in collections which is beyond the benchmark. Examples include problem 2 on page 394 where there is a quarter image in a series of nickels and all counting collection questions in Chapter 9 Lesson 3. Sole lesson (Chapter 9 Lesson 6) on counting bills only has examples of collections of like bills.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	Resources focus on counting sequences by 1s, 2, and 5s. Visual resources such as hundreds charts are provided. Attention to

			patterns is not called out within resources.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	2 - Poor Alignment	Majority of work has students representing numbers as tens and ones (Ex. 4 tens + 7 ones) with limited connections to expanded form (ex. 40+7). Students are not presented with word form and asked to relate it to the corresponding expanded or standard form.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Chapter 2 Lesson 6 is the primary connection to this benchmark. It provides opportunities for students to think about the same number in two different ways flexibly. They are not provided any visual aids to assist their thinking in the print. Chapter 2 Lesson 3 connects ones to tens (ex. 30 ones = 3 tens)The remaining referenced lessons and student pages focus on composing and decomposing based solely on the place value of each digit, not in a flexible manner.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Builds connection between plotting on a number line and ordering.

MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	4 - Good Alignment	Facts align to benchmark and fluency requirements.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	The relationship between addition and subtraction is more explicit in Chapter 10 lessons about related facts. Earlier chapters focus on adding and subtracting, but during instruction teachers would have to facilitate learning on efficiency using this relationship.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	Features include base ten clocks and hundred charts.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	4 - Good Alignment	Chapter 6 Lessons 10 and 11 include problems with a two-digit addended greater than 20 and varying representations including models, number lines and place value.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	All example problems have a minuend less than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	5 - Very Good Alignment	Students have opportunities to engage in open ended tasks that provide them time to grapple and preserve individually and collaboratively by responding in their own way and then sharing.

	<ul style="list-style-type: none"> Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Various lessons include the use of tools such as base ten blocks and number lines, as well as visual models for students to access and represent problems. Lessons are sequences through the progression of concrete, representational then abstract.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	Lessons correlate to the correct level of fluency to the benchmark. Example: Chapter 7 Lesson 3 students use strategies that support automaticity.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	5 - Very Good Alignment	<p>Lauch tasks such as the one one page 3 provides opportunities for discourse amongst students. There are also embedded discourse questions with the text such as the one one page 273.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>Evidence of connections to patterns in math that hold true. Example pg. 261, students are asked to make connection to known fact to solve new problem.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Missed opportunities for estimating solutions outside of the measurement unit.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Examples are real-world and applicable to students.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students have opportunities to reference the task or their own work to explain and justify their work.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is written at an appropriate level for students to access.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	During embedded three reads, students are asked to make inferences based on the reading.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Active participation stems are embedded that promote students to explaining their thinking through discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students apply skill learned in Unpack and Draw and Model in independent practice of the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Math Talk stems promote formal math language.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most lessons aligned to state standards and the supporting documents. A few standards that were either addressed incorrectly or incomplete were

		MA.1.NSO.1.2 (lacking word form and minimal expanded form), MA.1.NSO.2.5 (no subtraction problems go beyond a minuend of 19), and MA.1.M.2.3 (combinations include quarters).
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Tasks allow students to interact with the math aligned to the benchmark. Students have opportunities to draw models, use tools and write equations throughout the text.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The adaptive practice of Waggle meets students on their personalized path to develop concepts. The TE also provides resources for in the moment lesson shifts with Reteach and Enrich pages.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The material, as seen on pages 67 and 68, provide students time to access on their own and with supports on the page to understand the content.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Lessons are appropriate for a standard teaching block.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No noticed errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No evidence of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Models through the material were representative of common tools, manipulatives, resources and representations that are aligned to the benchmarks including, but not limited to: base ten blocks, snap cubes, counters, ten frames, hundred charts, equations, part/part/whole models, and bar models.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No evidence of errors found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content aligns to benchmarks and other BEST documents.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Relevant context includes scenarios that students may experience at school (example page 213, Unlock the Problem)

		involving crayons. This allows all students to have access regardless of experiences.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The material provides opportunities to connect science and social students through additional tasks provided in the TE. Example on TE page 439
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	The visual and contextual portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material portrays people and animals ethically.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Overall the content of the benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	The resources provide material for instruction and additional practice. The online student adaptive program supports this practice as well with limited additional prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components are aligned with one another.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized in a consistent and easy to follow manner.

4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Narrative and visuals engage students
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is paces and organized in a way that makes it accessible to students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	The aligned print and digital components allow for all students to access the materials.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The material is easy to access and read for both teacher and student. Students are presented with appealing visual pages that also provide adequate work space.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	At the beginning of each lesson, teachers are provided a "Focusing on the Whole Student" section to motivate students to learn. These include topics such as self management as a learner (page 25B) and accessing prior knowledge (page 49B).
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials address the big ideas as aligned with BEST
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The TEs present clear objectives and connections for every unit (example. TE 49B) with correlating I Can statements on student pages (Example SE 49)

<p>4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.</p>	<p>4 - Good Alignment</p>	<p>Lessons are set up in a gradual release format after an open task. Students have examples to reference and problem increase in difficulty throughout lessons.</p>
<p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>	<p>3 - Fair Alignment</p>	<p>The TE materials provide some resources for adaptations based on language support. The Chapter at a Glance (example TE 47A) provides guidance around intervention and enrichment. There is little support during the lesson for adaptation for adaptations due to various needs.</p>
<p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks such as SE page 61 provide opportunities to mentally challenge students while still providing access to tools to solve.</p>
<p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>	<p>4 - Good Alignment</p>	<p>Tasks and activities are aligned to learning objectives. The materials also provide for differentiated centers that align to skills.</p>
<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>Strategies align to the benchmarks taught.</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Through the MTRs, instructional strategies are embedded through out the materials.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Summative assessments align to skills and strategies in the unit. (Example TE 106A)</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>4 - Good Alignment</p>	<p>Example (TE page 243) provides guidance based on learning objectives and student outcomes. There is not the same guidance for the summative assessment, but this</p>

		would be beneficial for teachers to respond to data.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The material has applied the MTRs strategically throughout the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The material incorporates multiple instructional teaching strategies as well as appropriate skills and strategies for students to access the content.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence observed of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Culturally Responsive Teaching as it relates to CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Social justice as it relates to CRT
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence observed of solicitation of SEL

noticed some errors within the materials (grammatical, wrong coins shown, etc) as listed in my justifications. I am only recommending these materials for adoption based on the score average, but would highly recommended editing of the materials.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	4 - Good Alignment	<p>The first four examples were good. They included problem types with addition of three or more whole numbers within 20. The SE p.471-476 was incredibly confusing and unnecessary for this standard. The diagram reminded me of part part whole and it would not be easy for children to discern that they were supposed to add across. There is no where for them to show their work, write an equation, or write a strategy to solve when students are supposed to be identifying facts to practice procedural reliability. There is also an error on problem 11 p.42... it is either grammatical or missing something. The wording was very confusing through the first grade lense.</p>

<p>MA.1.AR.1.2</p>	<p>Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.</p>	<p>4 - Good Alignment</p>	<p>Majority of the problems appear to follow the standard and the clarifications. I am, however, concerned about the placement in the book and the problem difficulty level. It seems that students are adding within 10 in Chapter 4. The textbook has them counting and filling in missing numbers to 120, as well as skip counting in chapter 1. That does not make sequential sense, as students need to explore numbers within 20 before expanding to 120. On SE p.203 there is also a problem where students add three numbers, which is not part of the standard.</p>
<p>MA.1.AR.2.1</p>	<p>Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.</p>	<p>5 - Very Good Alignment</p>	<p>The materials gave good instruction and practice on relating subtraction to addition within 20.</p>
<p>MA.1.AR.2.2</p>	<p>Determine and explain if equations involving addition or subtraction are true or false.</p>	<p>3 - Fair Alignment</p>	<p>Clarification 2 states: "Problem types are limited to an equation with no more than four terms." The Listen and Draw on p.477, #13 on p.480, and #7 on 481 contain 5 terms, which does not align to the standard and clarifications. Also, many problems</p>

			<p>focusing on matching like facts, but do not focus on the meaning of the equal sign. It is mentioned in the instruction, but does not appear the main goal as stated in clarification 1. This is a very challenging topic for first graders, and more practice that did not involve the balancing of equations (also not the standard), would be more appropriate. For example, #1-6 on p.481 does this well.</p>
<p>MA.1.AR.2.3</p>	<p>Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.</p>	<p>5 - Very Good Alignment</p>	<p>There is a lot of great practice that helps students understand missing addends and using related facts to solve. While I understand why #11-13 on p. 462 were included, I found it to be confusing for students. We want them to gain a deeper understanding of how numbers relate, not just a method to plug in numbers without any meaning added to it.</p>
<p>MA.1.DP.1.1</p>	<p>Collect data into categories and represent the results using tally marks or pictographs.</p>	<p>3 - Fair Alignment</p>	<p>Completely skips clarification #1 and does not relate the tally marks to skip counting by 5's. The opportunity is there to create those questions and connections, but it</p>

			<p>was not explicitly stated with the tally marks. I looked in the TE and could also not find any indication that the teacher was supposed to go over skip counting by 5's with tally marks. There is also nothing on defining attributes of geometric shapes as stated in clarification 1. For example students could tally how many shapes had 4 or more sides, as the color of the shapes in the included questions were not defining attributes of a shape. There is some good practice of reading and filling in pictographs and tally charts that do align.</p>
<p>MA.1.DP.1.2</p>	<p>Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.</p>	<p>5 - Very Good Alignment</p>	<p>Great practice for interpreting data and calculating. I would recommend focusing on adding more addition problems.</p>
<p>MA.1.FR.1.1</p>	<p>Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.</p>	<p>4 - Good Alignment</p>	<p>The lessons are good, but they do not relate with each other until the chapter review. After learning halves and fourths, it would be great mixed practice for students to identify which is which. Also, p.569 is confusing because the triangle shown in the question is not the</p>

			type of triangle they will draw. That is very confusing for first graders.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	2 - Poor Alignment	The mark is missed on defining attributes of 3d shapes. Only informal language is used (flat and curved), and is missing critical academic vocabulary as mentioned in the clarifications (edges and faces). Instead of curved not curved, focus on the academic language of these 3d shapes have (or do not have) faces or edges. The 2d shapes had better practice and vocabulary. Also, on p.533 of the SE I saw nothing that described open and closed shapes to students. I can only assume that was what was to be done there? It was not in the directions for the teacher at the bottom either.
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	P.521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape. P.539-544 does a better job, however the problems needs to include more types like #14-16, as students are supposed to draw a figure based

			on the attributes, not draw a figure and then list the attributes.
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	3 - Fair Alignment	Chapter 12 Lesson 5 uses fourths instead of semi-circles as described in the standard and the clarifications. There are some good examples of composing and decomposing 2d and 3d shapes, however it is lacking the much needed vocabulary. It only shows the pictures, but never uses or at least includes words to help students make the connection between the shape and its name. This is a critical foundational skill for young students. I notice a lot of the problems are written for students to be able to independently read, but the expectation for first graders does not include the ability to read every problem. They really need this vocabulary as it is used in the standards.
MA.1.GR.1.4	Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	There were good examples and practice for 2d and 3d shapes.

<p>MA.1.M.1.1</p>	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>2 - Poor Alignment</p>	<p>The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters, which is not part of the standard. There was also a heavy emphasis in using a tile and unit cube to measure instead of a ruler at first. Non standard units of measurement are not covered in this standard. There were some appropriate items like measuring from 0 in inches and centimeters with real world objects, but overall the lessons do not fully match the standard MA.1.M.1.1. accurately.</p>
<p>MA.1.M.1.2</p>	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>2 - Poor Alignment</p>	<p>Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units. Chapter 14 Lesson 5 was okay, but lacked a lot of visuals that students need when comparing lengths. There were a lot of problems where they draw the picture instead of having them select and/or order objects by length or unit of measure. Number 14 on p.622 also has students draw</p>

			4 objects when the clarification explicitly states it will only be up to 3 objects compared.
MA.1.M.2.1	Using analog and digital clocks, tell and write time in hours and half-hours.	2 - Poor Alignment	There is no discussion or use of the vocabulary for digital and analog. The missing minute hand is not a realistic representation of an actual clock. Students need to see where the minute hand is to be considered o'clock. Same with "half past". There is no mention partition of circles in clarification 2.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	1 - Very Poor/No Alignment	The materials focus more on the counting of coins as stated in MA.1.M.2.3 instead of the identification of coins as described in standard MA.1.M.2.2. #2 on SE #394 also has a major error of using a quarter instead of a nickel in the problem. I also find it confusing that they introduce coins that are not typically circulated (the Lewis and Clark nickel) on the first page. While it is important for students to see the different types of coins, the focus of this standard is identification, and there was barely an introduction into the

			original nickel. The materials really lack on explicit identification of coins, which is critical for students that are more used to digital currency than physical currency. There is nothing that discusses how many of each coin makes up a dollar or even how many cents are in a dollar bill. Another critical piece of this standard missed.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	Please read the clarifications for this standard. The materials provided majority of the practice counting groups of coins with quarters or counting groups of just quarters, which is not part of the standard. Please only include pennies, nickels, and dimes. Also, there was a lack of focus on the skip counting strategies to count coins.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	There is a lot of good practice counting by 1s forwards and backwards and skip counting. The problem is, which counting backwards, students are being taught the 100s chart which only goes forward. Having

			<p>them count backwards in the same direction that they are counting on is very confusing. I would recommend you put the largest number at the end (on the right) that they are counting back from (to the left). This also goes with a reading skill or reading in order from left to right. It would make sense to them that backwards is from right to left. Also, the hundreds chart is not helpful if they are only using it within 20. It is helpful to have random holes for them to fill as practice.</p>
<p>MA.1.NSO.1.2</p>	<p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>	<p>3 - Fair Alignment</p>	<p>Most of the examples for expanded form was based on __tens+__ones when it should be the actual number made by the tens plus the ones (for example 70+5). This is all outlined in the clarifications of the standard. Also, word form beyond 19 and multiples of ten (i.e. fifty) are never discussed and the standard states that students must be able to read numbers in word for from 1-100 (not write/spell, just read and identify). The representation with the ten frames and the ten rods/ones were</p>

			<p>great representation. The way expanded form is written just needs to be changed based on the clarification. That is more based on standard MA.1.NSO.1.1.</p>
<p>MA.1.NSO.1.3</p>	<p>Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.</p>	<p>4 - Good Alignment</p>	<p>This is done well. There is a lot of practice for students to write _tens and _ones. There is some practice to write a number in multiple ways with tens and ones, but not a lot of explicit instruction or guidance in the TE to help students generate ideas.</p>
<p>MA.1.NSO.1.4</p>	<p>Plot, order and compare whole numbers up to 100.</p>	<p>4 - Good Alignment</p>	<p>p.122 #1-4, the lines where students complete the sentence is confusing. They need to include a word bank or something so students know what they are doing on that line. There are good comparing problems, problems to arrange numbers in sequential order, and problems for plotting numbers. The problem I have is the lack of visible examples for students available. It is also helpful for students using the materials at home to have examples so that</p>

			parents can better support their students.
MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	5 - Very Good Alignment	This was actually done very well. Choosing problems that causes students to use the communitive property of addition, as well as making a ten to add, really helps with their procedural reliability, which leads to automatic fact fluency.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	p.156 #9-11 is very confusing and does not help with procedural reliability since students have to interpret shapes to find out the numbers. However, there is a lot of good practice that allows students to use the communitive property, related facts, etc in order to problem solve. I would include more word problems to help cover this standard to increase rigor and real world application since the focus is procedural reliability and not automatic recall of those specific facts.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	This followed the standard and clarifications of ten more and ten less. I would suggest more practice for ten more,

			ten less, as skip counting by tens from 0 is technically not what is being called for in the standard.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	3 - Fair Alignment	Examples from p.279-296 were not rigorous enough to cover this standard, as most were two single digit numbers. The SE p.303-308 did a much better job covering this material, however there was not enough practice for this type of standard. There needs to be more opportunities to explore with the various strategies.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	The two digit numbers in the problems did not go beyond 20. The clarification even give the example of 37, showing that it is expected for students to subtract single digits from numbers greater than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	4 - Good Alignment	There are a few activities available for students to work independently or to discuss as a class (i.e. Math on the Spot, Math Talk, "For the Teacher" problems, etc). While these problems are good, there is a bit missing on an engaging class discussion. The

	<ul style="list-style-type: none"> Help and support each other when attempting a new method or approach. 		teacher could facilitate these discussions with some ideas listed in the TE, but the amount of questions on this MTR is limited.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	This was done very well throughout the HMH materials. Many problems were presented in a variety of ways, allowing for students to practice various strategies. There were problems given that encouraged the use of manipulatives, drawing, etc.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	HMH materials contained a number of tasks that allowed for the practice of mathematical fluency. There were many opportunities for students to practice a variety of strategies to determine the best way (or a different way) to solve a problem.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	4 - Good Alignment	<p>There are a variety of opportunities for students to share and talk with one another about their mathematical thinking and processes. I do believe there could be more rigor within the embedded questions listed in the student text. For example, on p. 569 it just asks a yes or no question and says for students to explain. It needs to go a little deeper into discussing the differences and similarities between student thinking.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>This was done well in the HMH materials. In some of the examples of materials listed, a bit more rigor could be added to connecting relationships. Ideas were kept more isolated on some topics instead of building off of each other.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	The related facts did a great job of showing justification.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	There multiple opportunities for students to apply math problems to real world contexts.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students are allowed to explain evidence in their oral explanations of problems. However, to better incorporate this ELA standard, I would recommend

			addressing this skill during word problems. Also, by allowing students to provide a written response, as in first grade the clarification explains that students will not only do this orally, but will start to write their justifications with support as well.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	Many of the problems in the HMH curriculum are written in student friendly language.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	This was done very well in the shapes unit. While I disagree with some of the vocabulary terms used as described in previous justifications (i.e. saying flat surface instead of faces), the strategies used really help with inferencing. There were also items in the TE that supported this ELA standard as well.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	There are a good opportunities for practicing explaining thinking with students. I would suggest even more opportunities for student sharing and collaboration, but the ones provided followed the ELA standard.

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	There were ample opportunities to practice a variety of strategies in the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Academic language was taught throughout the lessons and students were given opportunities to share using this language, or to justify in more social terms. The Write Math sections also allowed opportunities to practice this ELA skill.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	There is a section for multilingual support in the TE.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	The multilingual section discussed using more social terms to help incorporate new academic skills and language taught.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	As mentioned in standards' comments and justifications, some things aligned well and some did not. It looks as if the writer did not access the clarifications of the standards.

<p>2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.</p>	<p>3 - Fair Alignment</p>	<p>Some items lacked rigor (for example, some of the addition and subtraction problems were too simple) and some were more challenging than the clarifications explained (for example adding quarters for the money unit was not part of the benchmark).</p>
<p>3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.</p>	<p>2 - Poor Alignment</p>	<p>In its current state, the materials would just be very supplemental. The scope and sequence does not seem appropriate, and some of the benchmarks do not follow clarification guidelines. In my own first grade classroom, a lot of the materials would need to be altered to better fit the standards, edited due to errors, have numbers changed due to lack of rigor, or materials omitted due to not aligning with standard clarifications.</p>
<p>4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.</p>	<p>3 - Fair Alignment</p>	<p>Some topics (such as coin identification) are glazed over, while others go into sufficient detail about topics.</p>
<p>5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.</p>	<p>2 - Poor Alignment</p>	<p>No, see previous justifications about not following the clarifications of standards.</p>
<p>6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.</p>	<p>3 - Fair Alignment</p>	<p>See comments above. The materials do not always reflect the clarifications.</p>
<p>7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.</p>	<p>3 - Fair Alignment</p>	<p>Sometimes more time was spent on a simple topic (i.e. adding to 10 or 20) and not enough time was spent on other topics.</p>

Final Recommendation

<p>Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?</p>	<p>Yes</p>
<p>How would you rate the overall usability of the instructional material?</p>	<p>3 - Fair Alignment</p>
<p>Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.</p>	<p>As a first grade teacher myself that has gone through a rigorous overview of the new Florida BEST Standards, I would not feel like I could utilize these materials cover to cover. The materials, while mostly comprehensive, do not take into account many of the clarifications listed. It appears as though the standards were just read and materials were based solely on that. The materials are student friendly, and the TE is easy to follow and read. I do not agree with the scope and sequence of the materials, as previously mentioned in my justifications. I also</p>

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	The sources reflected expert knowledge of the content.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	While the sources showed expertise in mathematics, there seemed to be a need for more knowledge of foundational primary instruction, as well as the new standards and their clarifications.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	2 - Poor Alignment	There were some major errors as previously described in the justifications. There needs to be some proofing done throughout the materials.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias noted.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Yes, the content was representative of the materials.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	3 - Fair Alignment	There were some errors that need to be addressed, as mentioned in previous justifications.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	2 - Poor Alignment	The clarifications of the new standards needs to be reviewed by the writers.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	I would recommend that the materials' writers review the new standard clarifications to correctly align the materials to the current standards.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Yes, the materials were visually appealing and relevant for students.

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Yes, the word problems and content were meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Yes, there were ELA connections within the materials.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Yes, while not many students were portrayed, the names and few visuals in the materials represented multiple ethnic groups. There was no bias noted.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No issues noted.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	The clarifications of the standards really need to be reviewed by the writers.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	There are a number of good resources available for students and teachers within the consumables and online resources. There are additional materials available to teachers to help learners that need more assistance or intervention.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Yes, it aligns with other components.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	2 - Poor Alignment	I do not agree with the scope and sequence of the materials. It does not make logical sense with the new standards to present numbers 1-120 before

		having students add and subtract within 10. Students really need to explore facts within 20 before moving to numbers beyond 20. Counting to (on and from numbers within) 120 is more challenging to students than adding within 10 and 20. Also, greater than/less than (the words) should be introduced before the symbols, not together. There are many small instances like this throughout the materials where it could be organized better to fit the foundational needs of younger students.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Yes, the materials are visually engaging and easy to understand as a whole.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	This is usually done well. There are a few instances where too much time was spent on less rigorous items and not enough time was spent on more other standards (see previous justifications).
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Captions are available, it is compatible with assistive technology, etc.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall, the presentation is good. The scope and sequence of items really does need to be reviewed to help students learning foundational mathematics.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	The student consumables are laid out to engage young students. There are some online components that can also engage students. I do think more colorful pictures could be used throughout to help students especially with word problems.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Yes, the materials go through the standards based on main ideas and themes. I still recommend the writers review the clarifications to make sure the materials are teaching the correct points of standards and topics.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Yes, the materials are clear and the outcomes are clear as well.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Yes, the TE also gives points for the teacher to cover.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Yes, many of the topics covered present a variety of strategies for students to try. Materials appear to be easily adaptable to meet the needs of struggling learners, as the TE has options for students needing interventions.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	There are multiple opportunities for students to engage mentally, as well as physically with manipulatives.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The activities were good, however some discussions lacked rigor and deeper thinking. See previous justifications for examples.

<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>There are multiple strategies listed that can help young learners grasp foundational concepts (for example using base ten blocks for adding and subtracting, not the standard algorithm).</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>3 - Fair Alignment</p>	<p>Most of the strategies are good, however, some important connections are missing with some standards due to the clarifications of standards not being fully incorporated. For example, in the unit with coins, there was no emphasis on skip counting in order to count coins.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>4 - Good Alignment</p>	<p>The assessments shown in the TEs aligned to what the materials covered. The loss of one point was because of the materials not aligning completely with learning outcomes in regards to the standards.</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>3 - Fair Alignment</p>	<p>As stated above, the assessments are effective with the materials presented, but do not fully align with the standards based on clarifications.</p>
<p>12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.</p>	<p>5 - Very Good Alignment</p>	<p>Yes, the UDL covers materials that consider all students' needs.</p>
<p>13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?</p>	<p>4 - Good Alignment</p>	<p>Yes, the materials cover ELA expectations and majority of the MTRs with either good or very good alignment.</p>
<p>14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)</p>	<p>4 - Good Alignment</p>	<p>Overall the submission does a good job to support learning requirements. Edits to align</p>

		materials to follow instructional standards' clarifications is needed.
--	--	--

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	There was no evidence of CRT in the materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	There was no evidence that Culturally Responsive Teaching was discussed in the materials.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Yes, it omits Social Justice.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	There is no solicitation of SEL.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material presented is organized in a manner that provides easy and predictable usability for teachers and students. The student material provides access at majority of the benchmarks at an appropriate conceptual level for students. Earlier lessons within a concept elicit the use of models/manipulative, or provide visual aids that support learners in access the content. As students progress through out each lesson the complexity of questions increases. Students are also engaged in MTRs through purposefully placed pauses within the

text. A weakness to be aware of is over scaffolding within lessons through provided models or equation set ups. While some scaffolding may be necessary, the primary focus should be the student work and thinking, and not just filling in the blanks in the student work. The teacher material supports the learning through questioning and appropriate instructional strategies. Both resources clearly state the objectives and aligned benchmarks.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	5 - Very Good Alignment	Lessons on SE Pages 369-386 include representations with snap cubes and a ten frame. The numbers provided support doubles and make a ten strategies. All problems presented are within a sum of 20.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Multiple opportunities throughout the student work where students are provided context and must determine the operation through reasoning. For example, in Chapter 10, Lesson 6, students must interpret the context, select add or subtract and then record an number sentence to solve. Scenarios are represented with numbers, pictures and words.

MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	4 - Good Alignment	Missed opportunities for format of $c = a + b$. Student work has no context and context examples of standard. Connections made to other models and strategies.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Problem types vary according to the Situations Involving Operations with Numbers chart. There is a heavier focus on Result and Change unknown in contexts provided. Ample experiences to find missing numbers in any position in pre-written equations.
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	3 - Fair Alignment	Data sets do not include any examples of defining attributes of geometric figures to categorize.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	Problems used the data and scenarios to apply addition and subtraction.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons use grade appropriate terms such as halves and fourths. There are

			various representations and orientations of circles and rectangles partitioned as examples and non examples.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	Multiple opportunities to identify defining attributes, but limited opportunity to identify a figure based on given defining attributes
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	The standard reads "Sketch two-dimensional figures when given defining attributes." There are limited examples of where this is evident. Only a few examples can be seen on page 542, questions 14-16. Here an attribute is given and students are asked to sketch the shape. (Ex. Meg draws a shape with 6 sides.)
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Multiple lessons and examples for 2D and 3D shapes that involve composing, decomposing and identifying the geometric shapes involved. Lessons include examples of the use of 3D solid manipulatives and pattern blocks for students to access the concept.

<p>MA.1.GR.1.4</p>	<p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>3 - Fair Alignment</p>	<p>While there are many examples of real-world objects for stand alone figures (balls, cones, cans, etc), there are only a few real-world examples of items with multiple identifiable geometric figures. One example that does align to the standard is question 9 on page 506. This requires students to identify the geometric figures in an ice cream cone. In most other examples, they are identifying the geometric figures in composed shapes, but they are not real-world objects, but rather just composed by two stacked images.</p>
<p>MA.1.M.1.1</p>	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>5 - Very Good Alignment</p>	<p>Items align to the standard for estimation. Lessons prior to using a ruler use tiles to build understanding of counting units to measure. Rules presented in the text all start at zero.</p>
<p>MA.1.M.1.2</p>	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities for 3 items compared directly and also for indirect comparison.</p>
<p>MA.1.M.2.1</p>	<p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	<p>4 - Good Alignment</p>	<p>Focus on time to the hour then half hour introduced with one-</p>

			handed clock. Lacks connections to partitioning circles in half for half hour.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	2 - Poor Alignment	Resource provides images of both sides of coins. Limited opportunity to simply identify coins by name or value without having to count combinations. No reference seen that related each coin to how many equal a dollar.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	The benchmark reads "Find the value of combinations of pennies, nickels and dimes up to one dollar." The resource has lessons that also include quarters with in collections which is beyond the benchmark. Examples include problem 2 on page 394 where there is a quarter image in a series of nickels and all counting collection questions in Chapter 9 Lesson 3. Sole lesson (Chapter 9 Lesson 6) on counting bills only has examples of collections of like bills.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	Resources focus on counting sequences by 1s, 2, and 5s. Visual resources such as hundreds charts are provided. Attention to

			patterns is not called out within resources.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	2 - Poor Alignment	Majority of work has students representing numbers as tens and ones (Ex. 4 tens + 7 ones) with limited connections to expanded form (ex. 40+7). Students are not presented with word form and asked to relate it to the corresponding expanded or standard form.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Chapter 2 Lesson 6 is the primary connection to this benchmark. It provides opportunities for students to think about the same number in two different ways flexibly. They are not provided any visual aids to assist their thinking in the print. Chapter 2 Lesson 3 connects ones to tens (ex. 30 ones = 3 tens)The remaining referenced lessons and student pages focus on composing and decomposing based solely on the place value of each digit, not in a flexible manner.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Builds connection between plotting on a number line and ordering.

MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	4 - Good Alignment	Facts align to benchmark and fluency requirements.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	The relationship between addition and subtraction is more explicit in Chapter 10 lessons about related facts. Earlier chapters focus on adding and subtracting, but during instruction teachers would have to facilitate learning on efficiency using this relationship.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	Features include base ten clocks and hundred charts.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	4 - Good Alignment	Chapter 6 Lessons 10 and 11 include problems with a two-digit addended greater than 20 and varying representations including models, number lines and place value.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	All example problems have a minuend less than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	5 - Very Good Alignment	Students have opportunities to engage in open ended tasks that provide them time to grapple and preserve individually and collaboratively by responding in their own way and then sharing.

	<ul style="list-style-type: none"> • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	<p>5 - Very Good Alignment</p>	<p>Various lessons include the use of tools such as base ten blocks and number lines, as well as visual models for students to access and represent problems. Lessons are sequences through the progression of concrete, representational then abstract.</p>
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. 	<p>5 - Very Good Alignment</p>	<p>Lessons correlate to the correct level of fluency to the benchmark. Example: Chapter 7 Lesson 3 students use strategies that support automaticity.</p>

	<ul style="list-style-type: none"> • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	<p>Lauch tasks such as the one one page 3 provides opportunities for discourse amongst students. There are also embedded discourse questions with the text such as the one one page 273.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. 	4 - Good Alignment	<p>Evidence of connections to patterns in math that hold true. Example pg. 261, students are asked to make connection to known fact to solve new problem.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Missed opportunities for estimating solutions outside of the measurement unit.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Examples are real-world and applicable to students.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students have opportunities to reference the task or their own work to explain and justify their work.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is written at an appropriate level for students to access.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	During embedded three reads, students are asked to make inferences based on the reading.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Active participation stems are embedded that promote students to explaining their thinking through discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students apply skill learned in Unpack and Draw and Model in independent practice of the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Math Talk stems promote formal math language.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most lessons aligned to state standards and the supporting documents. A few standards that were either addressed incorrectly or incomplete were

		MA.1.NSO.1.2 (lacking word form and minimal expanded form), MA.1.NSO.2.5 (no subtraction problems go beyond a minuend of 19), and MA.1.M.2.3 (combinations include quarters).
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Tasks allow students to interact with the math aligned to the benchmark. Students have opportunities to draw models, use tools and write equations throughout the text.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The adaptive practice of Waggle meets students on their personalized path to develop concepts. The TE also provides resources for in the moment lesson shifts with Reteach and Enrich pages.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The material, as seen on pages 67 and 68, provide students time to access on their own and with supports on the page to understand the content.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Lessons are appropriate for a standard teaching block.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No noticed errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No evidence of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Models through the material were representative of common tools, manipulatives, resources and representations that are aligned to the benchmarks including, but not limited to: base ten blocks, snap cubes, counters, ten frames, hundred charts, equations, part/part/whole models, and bar models.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No evidence of errors found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content aligns to benchmarks and other BEST documents.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Relevant context includes scenarios that students may experience at school (example page 213, Unlock the Problem)

		involving crayons. This allows all students to have access regardless of experiences.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The material provides opportunities to connect science and social students through additional tasks provided in the TE. Example on TE page 439
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	The visual and contextual portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material portrays people and animals ethically.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Overall the content of the benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	The resources provide material for instruction and additional practice. The online student adaptive program supports this practice as well with limited additional prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components are aligned with one another.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized in a consistent and easy to follow manner.

4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Narrative and visuals engage students
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is paces and organized in a way that makes it accessible to students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	The aligned print and digital components allow for all students to access the materials.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The material is easy to access and read for both teacher and student. Students are presented with appealing visual pages that also provide adequate work space.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	At the beginning of each lesson, teachers are provided a "Focusing on the Whole Student" section to motivate students to learn. These include topics such as self management as a learner (page 25B) and accessing prior knowledge (page 49B).
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials address the big ideas as aligned with BEST
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The TEs present clear objectives and connections for every unit (example. TE 49B) with correlating I Can statements on student pages (Example SE 49)

<p>4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.</p>	<p>4 - Good Alignment</p>	<p>Lessons are set up in a gradual release format after an open task. Students have examples to reference and problem increase in difficulty throughout lessons.</p>
<p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>	<p>3 - Fair Alignment</p>	<p>The TE materials provide some resources for adaptations based on language support. The Chapter at a Glance (example TE 47A) provides guidance around intervention and enrichment. There is little support during the lesson for adaptation for adaptations due to various needs.</p>
<p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks such as SE page 61 provide opportunities to mentally challenge students while still providing access to tools to solve.</p>
<p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>	<p>4 - Good Alignment</p>	<p>Tasks and activities are aligned to learning objectives. The materials also provide for differentiated centers that align to skills.</p>
<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>Strategies align to the benchmarks taught.</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Through the MTRs, instructional strategies are embedded through out the materials.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Summative assessments align to skills and strategies in the unit. (Example TE 106A)</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>4 - Good Alignment</p>	<p>Example (TE page 243) provides guidance based on learning objectives and student outcomes. There is not the same guidance for the summative assessment, but this</p>

		would be beneficial for teachers to respond to data.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The material has applied the MTRs strategically throughout the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The material incorporates multiple instructional teaching strategies as well as appropriate skills and strategies for students to access the content.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence observed of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Culturally Responsive Teaching as it relates to CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Social justice as it relates to CRT
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence observed of solicitation of SEL

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

2 - Poor Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The GoMath series does not look like it has been updated to meet our new standards. It looks like the old GoMath lessons. It seems like editors tried to categorize the old lessons to align with the BEST standards. The geometrical reasoning section has portions that, although interesting, are inconsistent with the rest of the text ("connection to reading" and "connection to science"). The teacher edition doesn't offer much in the way of varying lesson ideas, or suggestions on what else to try to help students understand concepts. A few of the lessons do not

align with 5th grade standards. Many of the lessons claim to address all of the MTR's, but that is not accurate; the language of the MTRs should be prevalent throughout the student text. This is not a series that I would want as a resource for engaging my students in the new BEST standards.

Standard	Description	Reviewer Rating	Rating Justification
MA.5.AR.1.1	Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	good opportunities for multi-operations
MA.5.AR.1.2	Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.	5 - Very Good Alignment	multiple opportunities for practice with fraction word problems
MA.5.AR.1.3	Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	models with real-world problems
MA.5.AR.2.1	Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.	5 - Very Good Alignment	no nesting; keeping within parameters given in clarifications
MA.5.AR.2.2	Evaluate multi-step numerical expressions using order of operations.	5 - Very Good Alignment	no nesting, no exponents
MA.5.AR.2.3	Determine and explain whether an equation involving any of the four operations is true or false.	3 - Fair Alignment	limited practice with true or false
MA.5.AR.2.4	Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	plenty of opportunities to analyze word problems

MA.5.AR.3.1	Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.	5 - Very Good Alignment	opportunities for finding patterns with whole numbers, decimals, and fractions
MA.5.AR.3.2	Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.	2 - Poor Alignment	asking student to write a rule for a given graph
MA.5.DP.1.1	Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.	2 - Poor Alignment	decimal values to thousandths should be limited to hundredths
MA.5.DP.1.2	Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.	5 - Very Good Alignment	instruction on balancing point
MA.5.FR.1.1	Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.	4 - Good Alignment	good use of models
MA.5.FR.2.1	Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	use of fraction bars and number lines
MA.5.FR.2.2	Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	use of models
MA.5.FR.2.3	When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.	4 - Good Alignment	models and number lines; missing connection to decimals
MA.5.FR.2.4	Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	models, appropriate word problems - both partitive and quotative

MA.5.GR.1.1	Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.	4 - Good Alignment	lots of practice with triangles and quadrilaterals
MA.5.GR.1.2	Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.	5 - Very Good Alignment	adequate coverage of 3-d figures
MA.5.GR.2.1	Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?
MA.5.GR.3.1	Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.	5 - Very Good Alignment	sufficient practice and good visual models
MA.5.GR.3.2	Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.	5 - Very Good Alignment	gradual move from counting cubes to formula
MA.5.GR.3.3	Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.	5 - Very Good Alignment	abundant use of visuals
MA.5.GR.4.1	Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.	2 - Poor Alignment	asking student to write a rule for a given graph
MA.5.GR.4.2	Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.	5 - Very Good Alignment	graphing data from an experiment
MA.5.M.1.1	Solve multi-step real-world problems that involve converting measurement units to	3 - Fair Alignment	no need for weight conversions? they do

	equivalent measurements within a single system of measurement.		refer to grams; on p. 558, question about converting hL to daL - unnecessary
MA.5.M.2.1	Solve multi-step real-world problems involving money using decimal notation.	4 - Good Alignment	multiple opportunities for working with money
MA.5.NSO.1.1	Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.	2 - Poor Alignment	not enough attention to this standard, only addressed in one lesson
MA.5.NSO.1.2	Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.	2 - Poor Alignment	only one lesson for a concept that requires more attention
MA.5.NSO.1.3	Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.	2 - Poor Alignment	not enough content to support this concept
MA.5.NSO.1.4	Plot, order and compare multi-digit numbers with decimals up to the thousandths.	1 - Very Poor/No Alignment	no evidence of scaled number lines
MA.5.NSO.1.5	Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.	2 - Poor Alignment	limited practice
MA.5.NSO.2.1	Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.	2 - Poor Alignment	limited practice and offering only "the" standard algorithm instruction
MA.5.NSO.2.2	Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.	2 - Poor Alignment	good use of partial quotient initially then it leans into long division standard algorithm for the rest of the division practice

MA.5.NSO.2.3	Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	3 - Fair Alignment	number lines not used
MA.5.NSO.2.4	Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.	3 - Fair Alignment	no instruction in estimation provided for multiplication with decimals but provided better creative strategies besides standard algorithm; instruction provided for estimation with division
MA.5.NSO.2.5	Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.	4 - Good Alignment	many opportunities for practice of the concepts
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	no references to growth mindset norms; each lesson suggests MTR 1.1 is addressed, but I couldn't find any references in the student text; found references to effortful learning in teacher text
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. 	4 - Good Alignment	variety of opportunities to use manipulatives and models for representing thinking

	<ul style="list-style-type: none"> • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	3 - Fair Alignment	occasional references to fluency in students text; teacher edition offers activities to develop fluency
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. 	4 - Good Alignment	"math talk" sections encourage students to have conversations about given math questions

	<ul style="list-style-type: none"> Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 	4 - Good Alignment	"unlock the problem" section decomposes example into manageable parts
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. 	4 - Good Alignment	examples of suggestions to estimate when showing expressions; could encourage estimation with word problems

	<ul style="list-style-type: none"> Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	wide variety of real world situations involving math
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	questions throughout for citing evidence of answer
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	"launch into math" for each unit is interesting and related to real world Florida
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	"launch into math" section good for inferencing
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	"math talk" sections
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	requires quality student work throughout
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	"math talk" sections

ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	students communicating math ideas
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	students given opportunities throughout to work socially together on math ideas

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	2 - Poor Alignment	relying too much on the standard algorithms rather than providing opportunities for developing strategies of other ways of calculating
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	2 - Poor Alignment	some of the lessons address skills from middle school content
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	some of the number sense benchmarks don't have enough opportunities to explore and practice
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	would like to have more practice for some skills that will take longer to develop
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?; Ch. 17, L3 - write a rule for a given graph
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	just a handful lessons that don't apply to 5th grade standards
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	students will require more review of multi-digit multiplication than offered -

		although a standard from 4th grade, students will need more time
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	5E's for each unit
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	reference to 5E's at the beginning of each unit;
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	2 - Poor Alignment	spelling errors: "Identify and Classify Two-Dimensional Figures," "quadrilatera,"
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	free of bias and contradictions
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	good use of visual models; would prefer more number lines and less standard algorithm
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	just a few spelling mistakes; chapter 18 has a table with degrees F listed as 8-1/2 and 11-1/4(these are not reasonable values as we don't read temperatures in fractions and children would not be familiar with temps that cold
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	lip service given to fluency and number routines, but needs more appropriate fluency practice and exit tickets
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	content relevant to age

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	real world problems are connected to children's experiences
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	in the GR and DP sections, there was evidence of connecting to science and to reading; would like to have seen those sections throughout
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	wide variety of names represent many cultures
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	content is appropriate for children
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	mostly covering benchmarks and standards

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	teachers would need to find extra practice for some of the number sense skills
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	2 - Poor Alignment	inconsistent with amount of practice for content; some lessons are not part of standards
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	logical organization
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	other than the wide variety of names in the word problems which may be challenging for some students to read, the

		visuals are interesting and engaging
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	2 - Poor Alignment	some areas not given enough attention or time for practice
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	offer strategies for ELL with each unit; RTI lessons available
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	3 - Fair Alignment	lessons that don't apply to curriculum could be skipped

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	interesting non-fiction info in "launch into math"
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	covers the standards - just a few lessons not belonging to standards
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	clear expectations and mistakes to expect and how to address them
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	examples for each concept
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	reteach and enrich activities
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	students provided a variety of methods for problem solving
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	lessons open with concrete to representational to abstract

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	need for less of a focus on standard algorithm - seems to be prevalent throughout, not allowing for flexibility of strategies
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	need for more examples of flexible strategies - too much emphasis on one way (standard algorithm)
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessments related to benchmarks
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	would like to see more opportunities for formative assessment such as exit tickets
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	evidence of support for ELL and RTI
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	most MTR's evident throughout; would need more for MTR 1.1
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	the content is generally applicable to the grade level benchmarks and support is offered to teachers for facilitating the content

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	not evidence of CRT

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	no evidence of SEL

Edition: N/A

Grade Level: K-5

Course: [Grade Five Mathematics](#)

Bid ID: 459

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

I would not recommend this curriculum due to the absence of specific instructional materials related to ALL BEST standards. While the curriculum presents well and its lessons are aligned to the learning objectives within it, it leaves gaps of standards-based instruction that would need to be supplemented by the teacher. If all standards were addressed, I would consider this curriculum as an option, because the digital component is really well delivered, minus some typographical mistakes.

Standard	Description	Reviewer Rating	Rating Justification
MA.5.AR.1.1	Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	Real-world problems with remainders that must be interpreted
MA.5.AR.1.2	Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.	5 - Very Good Alignment	Mix of fractions, including fractions greater than one. Each lesson contained real-world scenarios.
MA.5.AR.1.3	Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	All division uses unit fractions and calls for justification of real-world scenarios
MA.5.AR.2.1	Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.	5 - Very Good Alignment	Expressions were related to real-world scenarios and called for the translation of descriptions to expressions and expressions to descriptions.
MA.5.AR.2.2	Evaluate multi-step numerical expressions using order of operations.	5 - Very Good Alignment	All examples had multiple steps and required students to justify other's thinking as well and no examples had parentheses that were nested
MA.5.AR.2.3	Determine and explain whether an equation involving any of the four operations is true or false.	3 - Fair Alignment	Examples have questions about true or not true, however, many questions focus on determining which property is being used,

			which is not a clarification in the BEST standard
MA.5.AR.2.4	Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	Scenarios include real-world context and the unknown letter is recognized as a variable. Unknowns and different operations are on either side of the equal sign.
MA.5.AR.3.1	Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.	5 - Very Good Alignment	Scenarios are limited to one of two operations using whole numbers.
MA.5.AR.3.2	Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.	3 - Fair Alignment	Most question met the standard except the question in the explore part of Chapter 17 Lesson 2. The pattern does not match the chart.
MA.5.DP.1.1	Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.	2 - Poor Alignment	Chapter 18, Explore Lesson 1- the table does not match the problem. In addition, fractions with a denominator of 8 are used, which is not within the limits of the BEST standards.
MA.5.DP.1.2	Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.	2 - Poor Alignment	Explanations on how to find mean, mode, and median are aligned; however, there is no mention of range.
MA.5.FR.1.1	Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.	5 - Very Good Alignment	Real-world scenarios used to represent the division of two whole numbers as a fraction.

MA.5.FR.2.1	Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	Examples met all of the benchmark clarifications of the BEST standards.
MA.5.FR.2.2	Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.	2 - Poor Alignment	Examples made use of area model by shading. Mixed numbers were used in comparative lessons only. Students are directed to simplify answers which is not necessary.
MA.5.FR.2.3	When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.	2 - Poor Alignment	Examples in the text call for completing an operation to figure out the relative comparison. The BEST standards state that students should be able to focus on estimation and assessing the reasonableness of answers.
MA.5.FR.2.4	Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.	4 - Good Alignment	Examples met the BEST standards and various question types in Appendix A
MA.5.GR.1.1	Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.	2 - Poor Alignment	Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards.
MA.5.GR.1.2	Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.	2 - Poor Alignment	Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.

MA.5.GR.2.1	Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.	4 - Good Alignment	Questions cover both fractional and decimal side lengths.
MA.5.GR.3.1	Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.	4 - Good Alignment	Materials focus on using and counting unit cubes.
MA.5.GR.3.2	Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.	4 - Good Alignment	Examples focused on the amount of unit cubes in the shape and no questions exceeded two-digit edge lengths.
MA.5.GR.3.3	Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.	4 - Good Alignment	Materials use real-world contexts and composite figures that should be added to solve for volume.
MA.5.GR.4.1	Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.	4 - Good Alignment	Materials fairly instruct how to plot and label points
MA.5.GR.4.2	Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.	5 - Very Good Alignment	Examples use real-world problems and instruct students to interpret the values of point in the context of a situation.
MA.5.M.1.1	Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.	3 - Fair Alignment	Conversion included length, volume, and capacity; however, there were no time conversion present.
MA.5.M.2.1	Solve multi-step real-world problems involving money using decimal notation.	4 - Good Alignment	Materials included multi-step real-world problems involving money and decimal notation.

MA.5.NSO.1.1	Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.	2 - Poor Alignment	While the materials include this standard with examples of decimals to the thousandths, there is inadequate exposure to this connection to whole numbers.
MA.5.NSO.1.2	Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.	4 - Good Alignment	Materials address the standard fully; however, there is limited items on using expanded notation.
MA.5.NSO.1.3	Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.	5 - Very Good Alignment	Materials addressed the standard fully with multiple ways to depict composition and decomposition.
MA.5.NSO.1.4	Plot, order and compare multi-digit numbers with decimals up to the thousandths.	2 - Poor Alignment	Instruction focuses on the use of stacking numbers to compare only. There is no instruction using a scaled number line as indicated in the BEST standards.
MA.5.NSO.1.5	Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.	3 - Fair Alignment	Instruction does meet the standard; however, there is no use of number lines to solidify connections.
MA.5.NSO.2.1	Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.	2 - Poor Alignment	Instruction does not include practice of various algorithms.
MA.5.NSO.2.2	Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.	5 - Very Good Alignment	Multiple representations used.

MA.5.NSO.2.3	Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Meets clarifications of BEST standards
MA.5.NSO.2.4	Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.	5 - Very Good Alignment	Great use of models and pictures.
MA.5.NSO.2.5	Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.	5 - Very Good Alignment	Use of multiple representations
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	4 - Good Alignment	Tasks include analyzing problems in a way that makes sense, asks questions that will help with solving the task, and helps students build perseverance over time.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. 	5 - Very Good Alignment	Tasks include representing problems in multiple ways and build understanding through modeling and using manipulatives.

	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Tasks have students select the most efficient method for themselves to build procedural reliability.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. 	4 - Good Alignment	Tasks have students justifying their answer and making sense of other's work, including error analysis.

	<ul style="list-style-type: none"> Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	Promotes ELL communication
----------------------------------	--	--------------------	----------------------------

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	2 - Poor Alignment	Though many standards were aligned, whole chunks of standards were either unaddressed or did not meet the full extent of the standard
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	2 - Poor Alignment	Same as above
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	Though some standards were not fully addressed, the materials themselves were adaptable.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	Though some standards were not fully addressed, the materials that were available did provide sufficient details for students to understand.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Levels of complexity were met through justification, error analysis, and multi-step word problems when called for.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	Some extraneous methods (not in the standards) were too complex for the students abilities at this grade level- specifically in the mean, median, mode, and range chapter
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Levels of treatment meet the time period allowed for teaching

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Sources reflect expert information for the subject
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Primary and secondary sources contribute to the quality of the content
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	3 - Fair Alignment	Most typographical errors were in the digital resources for the student. Those are explained in the Standards section.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Free of bias and contradictions
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content is representative of the discipline.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	A few mistakes noticed in the digital resources where the words and graphics did not match.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	Most content is up-to-date; however, use of the 5E model for every lesson lends itself to a gradual release at times when students should be productively struggling to make sense of problems.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Standards seemed to be interwoven and not necessarily taught in isolation.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	content is appropriate and relevant
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-life scenarios are meaningful and connect to students' lives.

18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Connections made to science.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	No evidence of bias
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No evidence of inhumane actions or beliefs.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	While most standards and benchmarks are covered in the materials, ALL of the them were not.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	In order to meet the full extent of the BEST standards, a teacher would need to prepare additional teaching materials. One example is number lines for plotting, ordering, and comparing decimals.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Components of the curriculum align with each other.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	Logical organization of content. I believe that some content could have been interwoven more.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Narrative and visual engage students

5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Content presented at a pace that allows students to understand
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Supports, interventions, and enrichment were very clear in the Teacher's Edition.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Components of Presentation were good or very good, except for the teacher needing to prep materials for parts of the benchmarks not addressed.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Tasks are relevant to students' everyday lives, which maintains student motivation
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Materials makes use of overarching themes or concepts to teach small chunked material
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Each lesson displayed a clear learning goal.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	The materials lend themselves to successfully becoming more independent in the way that big ideas are chunked into digestible pieces.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Guidance and support is included in the materials for developmental differences and various learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Materials engage the physical and mental activity of students

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Materials include organized activities that are logical extensions the objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	Some strategies were missing from the instructional materials, such as: in multiplication one standard algorithm was addressed instead of a few.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	Most strategies were effective; however some effective strategies were left out (see above and number lines). In addition, a few strategies used seemed confusing (ex: mean, median, mode)
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Assessment strategies did match those of the instructional materials.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	Assessment questions did mirror the instructional materials: however, specific question types like those in the BEST standards were missing.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	UDL strategies evident throughout
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	MTR's can easily be applied to lessons within the curriculum
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	The instructional materials do support learning requirements based on the outcomes set out by this curriculum; however it should be noted that not all of the standards are addressed to their fullest extent.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	Saw no evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evident of CRT of Social Justice
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence of SEL

other materials are available in print format, and many digital materials are downloadable/printable (PDFs can be downloaded for offline use). Core student print materials will also be available via NIMAS files. To see the range of HMH products available from NIMAC, please visit <https://nimac.overdrive.com/ContentInventory>.

Review	Rating	Comments
	3 - Fair Alignment	A great amount of instruction is provided through video. An alternative source of content is not prevalent. Students should be provided multiple options in format.

Reviewer's Name: Mary Moss

Title: HMH Florida's B.E.S.T. Into Math Accelerated 6

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Timothy D. Kanold, PhD; Matthew R. Larson, PhD; Steven J. Leinwand, PhD

Grade Level: 6-8

Course: [M/J Grade 6 Accelerated Mathematics](#)

Bid ID: 465

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The material's alignment to the standards was not 100%. I liked the teacher guidance, but would like to see more guidance for teachers on implementation of ML routines as it pertains to the task alignment. I would like to see the MTR's addressed more frequently. I liked the student interactive version. Lots of great resources for teachers.

Standard	Description	Reviewer Rating	Rating Justification
MA.6.AR.1.1	Given a mathematical or real-world context, translate written descriptions into algebraic expressions and translate algebraic expressions into written descriptions.	4 - Good Alignment	Variables are not limited to x; Students translating written descriptions into algebraic expressions; Students identifying parts of an algebraic expression.
MA.6.AR.1.2	Translate a real-world written description into an algebraic inequality in the form of  . Represent the inequality on a number line.	4 - Good Alignment	Students translate real-world written description into an algebraic inequality and represent on a number line.
MA.6.AR.1.3	Evaluate algebraic expressions using substitution and order of operations.	4 - Good Alignment	Students evaluate algebraic expressions with integers using substitution and order of operations.
MA.6.AR.1.4	Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	3 - Fair Alignment	Clarification 2: is not represented
MA.6.AR.2.1	Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	2 - Poor Alignment	Pg.281-288 not represented; 311-316 not represented; operations performed with negative rational numbers; Set notation is not used to list numbers.
MA.6.AR.2.2	Write and solve one-step equations in one variable within a mathematical or real-world context using addition and subtraction, where all terms and solutions are integers.	3 - Fair Alignment	Algebra tiles and balances are represented, but no use of Bar diagrams or Number lines.
MA.6.AR.2.3	Write and solve one-step equations in one variable within a mathematical or real-world	3 - Fair Alignment	Algebra tiles and balances used, but no use of bar diagrams.

	context using multiplication and division, where all terms and solutions are integers.		
MA.6.AR.2.4	Determine the unknown decimal or fraction in an equation involving any of the four operations, relating three numbers, with the unknown in any position.	1 - Very Poor/No Alignment	All terms and solutions are not limited to positive rational numbers.
MA.6.AR.3.1	Given a real-world context, write and interpret ratios to show the relative sizes of two quantities using appropriate notation:  , a to b, or a:b where $b \neq 0$.	4 - Good Alignment	Bar models and ratio tables used. No use of number lines.
MA.6.AR.3.2	Given a real-world context, determine a rate for a ratio of quantities with different units. Calculate and interpret the corresponding unit rate.	4 - Good Alignment	Instruction includes using drawings, models and words.
MA.6.AR.3.3	Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.	4 - Good Alignment	Instruction includes using two-column tables.
MA.6.AR.3.4	Apply ratio relationships to solve mathematical and real-world problems involving percentages using the relationship between two quantities.	4 - Good Alignment	Models used to support instruction.
MA.6.AR.3.5	Solve mathematical and real-world problems involving ratios, rates and unit rates, including comparisons, mixtures, ratios of lengths and conversions within the same measurement system.	4 - Good Alignment	PG 351, 359 no alignment; the remainder instruction includes comparisons, mixtures, conversions within the same measurement system.
MA.6.DP.1.1	Recognize and formulate a statistical question that would generate numerical data.	4 - Good Alignment	Instruction includes the understanding of a statistical question and a non-statistical question.
MA.6.DP.1.2	Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.	3 - Fair Alignment	Instruction on Range is missing. Instruction

			includes mean, median, mode.
MA.6.DP.1.3	Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.	3 - Fair Alignment	Instruction does not include vertical representation of box plot. Instruction includes horizontal representation of box plots.
MA.6.DP.1.4	Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.	3 - Fair Alignment	Instruction limited to skewed description. Instruction does not focus on describing data as Normal or Bimodal.
MA.6.DP.1.5	Create box plots and histograms to represent sets of numerical data within real-world contexts.	4 - Good Alignment	601-instruction focuses on histogram; 609-instruction focuses on histogram; instruction focuses on box plots; 643; not aligned.
MA.6.DP.1.6	Given a real-world scenario, determine and describe how changes in data values impact measures of center and variation.	4 - Good Alignment	Instruction includes opportunities for students to collect their own data to create a graphical display.
MA.6.GR.1.1	Extend previous understanding of the coordinate plane to plot rational number ordered pairs in all four quadrants and on both axes. Identify the x- or y-axis as the line of reflection when two ordered pairs have an opposite x- or y-coordinate.	4 - Good Alignment	Instruction builds on previous understanding of coordinate plane, graphing ordered pairs in all four quadrants.
MA.6.GR.1.2	Find distances between ordered pairs, limited to the same x-coordinate or the same y-coordinate, represented on the coordinate plane.	4 - Good Alignment	Instruction focuses on finding distances between ordered pairs, limited to the same x coordinate or the same y coordinate.

MA.6.GR.1.3	Solve mathematical and real-world problems by plotting points on a coordinate plane, including finding the perimeter or area of a rectangle.	4 - Good Alignment	483-No; Instruction includes solving real-world problems, plotting on coordinate plane and finding perimeter and area.
MA.6.GR.2.1	Derive a formula for the area of a right triangle using a rectangle. Apply a formula to find the area of a triangle.	4 - Good Alignment	Instruction meets benchmark..
MA.6.GR.2.2	Solve mathematical and real-world problems involving the area of quadrilaterals and composite figures by decomposing them into triangles or rectangles.	4 - Good Alignment	Instruction meets benchmark.
MA.6.GR.2.3	Solve mathematical and real-world problems involving the volume of right rectangular prisms with positive rational number edge lengths using a visual model and a formula.	4 - Good Alignment	Instruction meets benchmark.
MA.6.GR.2.4	Given a mathematical or real-world context, find the surface area of right rectangular prisms and right rectangular pyramids using the figure's net.	4 - Good Alignment	Instruction meets benchmark language.
MA.6.NSO.1.1	Extend previous understanding of numbers to define rational numbers. Plot, order and compare rational numbers.	4 - Good Alignment	Instruction meets benchmark and clarifications.
MA.6.NSO.1.2	Given a mathematical or real-world context, represent quantities that have opposite direction using rational numbers. Compare them on a number line and explain the meaning of zero within its context.	4 - Good Alignment	Students will compare quantities on a number line and explain the meaning of zero in context.
MA.6.NSO.1.3	Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.	4 - Good Alignment	Students find the absolute value of rational numbers.
MA.6.NSO.1.4	Solve mathematical and real-world problems involving absolute value, including the comparison of absolute value.	4 - Good Alignment	Students solve problems involving absolute value and comparison of absolute value.

MA.6.NSO.2.1	Multiply and divide positive multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	4 - Good Alignment	Students multiply and divide positive multi-digit numbers with decimals to thousandths.
MA.6.NSO.2.2	Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.	3 - Fair Alignment	Instruction limited to multiplication, no division.
MA.6.NSO.2.3	Solve multi-step real-world problems involving any of the four operations with positive multi-digit decimals or positive fractions, including mixed numbers.	4 - Good Alignment	Students solve multi-step with four operations with positive fractions, mixed numbers and positive multi-digit decimals.
MA.6.NSO.3.1	Given a mathematical or real-world context, find the greatest common factor and least common multiple of two whole numbers.	4 - Good Alignment	Students find the GCF and LCM of two whole numbers.
MA.6.NSO.3.2	Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.	2 - Poor Alignment	Does not meet the benchmark
MA.6.NSO.3.3	Evaluate positive rational numbers with natural number exponents.	4 - Good Alignment	Instruction includes evaluating positive rational numbers and integers with natural number exponents.
MA.6.NSO.3.4	Express composite whole numbers as a product of prime factors with natural number exponents.	4 - Good Alignment	Instruction includes expressing composite whole numbers as a product of prime factors with natural number exponents.
MA.6.NSO.3.5	Rewrite positive rational numbers in different but equivalent forms including fractions, terminating decimals and percentages.	4 - Good Alignment	Page 436-442 meet benchmark.

MA.6.NSO.4.1	Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.	4 - Good Alignment	Instruction includes operations with whole numbers to add and subtract integers.
MA.6.NSO.4.2	Apply and extend previous understandings of operations with whole numbers to multiply and divide integers with procedural fluency.	4 - Good Alignment	Instruction includes operations with whole numbers to multiply and divide integers.
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Instruction apply properties of operations to add and subtract linear expressions with rational coefficients.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	4 - Good Alignment	Instruction meets the benchmark.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Instruction includes writing and solving one-step inequalities in one variable within mathematical context algebraically or graphically.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	4 - Good Alignment	Instruction meets benchmark.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Instruction includes how to determine an appropriate measure of center of measure of variation to summarize numerical data.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to	4 - Good Alignment	Instruction meets benchmark.

	make comparisons, interpret results and draw conclusions about the two populations.		
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	3 - Fair Alignment	Instruction partially meets benchmark.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	4 - Good Alignment	Instruction includes applying the formulas to find the areas of trapezoids, parallelograms and rhombi.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	4 - Good Alignment	Instruction includes area of polygons or composite figures by decomposing them into triangles or quadrilaterals.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	2 - Poor Alignment	Instruction does not include whole-number exponents.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Instruction meets benchmark.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Instruction includes solving problems involving any of the

			four operations with rational numbers.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	2 - Poor Alignment	Instruction partially meets benchmark.

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p>	2 - Poor Alignment	Instruction partially meets benchmark.

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. 	2 - Poor Alignment	Instruction partially meets benchmark.

	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.3.1	Make inferences to support comprehension.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Instruction partially meets benchmark.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Instruction partially meets benchmark.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	43 were level 4 alignment and 10 were level 3 alignment.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	Some of the standards are not fully met in the curriculum.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	The materials are more easily adaptable if using the digital version.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Sufficient details provided for students to understand the significance of topics and events.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	The complexity or difficulty has a fair alignment to the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	The level of treatment of content matches the student abilities and grade level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	The complexity or difficulty of the treatment of the content could be a little rushed for the time period allowed.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The primary and secondary sources cited reflect expert information.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	3 - Fair Alignment	The primary and secondary sources somewhat contribute to the quality of the content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	My review did not encounter any typographical or visual errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Material appeared to be free of bias and contradictions.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Material contained concepts, standards and models used in mathematics.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No inconsistencies or mistakes were discovered during my review.

14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Materials are up-to-date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	The content is presented in appropriate context.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is appropriate and relevant context for intended learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	3 - Fair Alignment	In most situations, content is presented with connections to life in a context that is somewhat meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Materials include interdisciplinary connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Multicultural representations were fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	Materials portrayed people and animals with compassion, sympathy.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	There is good alignment of benchmarks and standards covered in this course.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Many resources for teachers to use to address, supports for students in additional learning and enrichment.

2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	The components align with the curriculum and each other..
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	All materials are consistently and logically organized in the curriculum.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	The visuals engage students in reading as well as listening.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3 - Fair Alignment	The pacing seems to be somewhat fast paced that may not allow all students to understand in the given amount of time.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	There are digital tools to support students to be able to interact with the material, but no feedback after student completes one of the questions.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	There are plenty of presentation materials for this curriculum.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	Materials contain motivational strategies to maintain learner motivation, but they appear to be optional, not necessarily as part of instruction to help with engagement.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	Materials have a fair amount of alignment to teaching a few "Big Ideas".
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Materials contain clear statements of outcomes.

4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Some alignment for guidance and support in materials to help students successfully become independent learners.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	There is fair alignment to support for developmental differences and various learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	The materials engage students with mostly turn and talk collaboration, few opportunities for physical activity.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	Few activities provided .
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	Instructional strategies provided in materials, but appear to be optional.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	The instructional strategies are effective in teaching targeted outcomes.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	3 - Fair Alignment	The materials use few assessment strategies.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	The assessment strategies incorporated in the materials are somewhat effective in assessing learners' performance.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	Only a fair alignment of UDL strategies in this curriculum.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	Only a fair amount of alignment to ELA expectations and MTR standards.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	There is a fair alignment to Learning requirements.
---	--------------------	---

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	Materials did not appear to have any CRT reference.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials did not appear to have any Culturally Responsive Teaching.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials did not appear to have any Social Justice as it relates to CRT.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	Materials did not appear to have any SEL strategies.

Reviewer's Name: Joanna Pitts

Title: HMH Florida's B.E.S.T. Into Math Accelerated 6

Course: [M/J Grade 6 Accelerated Mathematics](#)

Bid ID: 465

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Strength - Teacher edition book and organized very well. I love the various suggestions for teachers to use for centers, differentiation, group work, prior knowledge check, etc. There are a lot of opportunities for students to practice and teachers to review and assess. The adaptive practice is a great tool to supplement when needed. The material provided makes it easy for teachers to find what they need to teach and easily differentiate lessons when needed without having to find extra materials on

their own. The lessons are not "over loaded" with information, which can cause students to become overwhelmed. The skills are taught by steps and are organized in a way to keep students engaged in the procedures being learned which can help students to understand the procedures better. Weaknesses - I did not find many weaknesses in this material - I would only say more materials for ELL students could be added or at least suggestions to help those students.

Standard	Description	Reviewer Rating	Rating Justification
MA.6.AR.1.1	Given a mathematical or real-world context, translate written descriptions into algebraic expressions and translate algebraic expressions into written descriptions.	4 - Good Alignment	Students are given descriptions and examples of expressions; plenty of practice to write expressions and descriptions
MA.6.AR.1.2	Translate a real-world written description into an algebraic inequality in the form of $\square < \square$. Represent the inequality on a number line.	4 - Good Alignment	Problems are written in various forms, giving students opportunities to see various representations
MA.6.AR.1.3	Evaluate algebraic expressions using substitution and order of operations.	4 - Good Alignment	Lesson follows standards and benchmark clarification
MA.6.AR.1.4	Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	5 - Very Good Alignment	Standard is covered completely; all properties are defined and practiced throughout the lesson.
MA.6.AR.2.1	Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	3 - Fair Alignment	Equations and inequalities are dispersed throughout multiple lessons; the

			skill is connected with other benchmarks easily
MA.6.AR.2.2	Write and solve one-step equations in one variable within a mathematical or real-world context using addition and subtraction, where all terms and solutions are integers.	5 - Very Good Alignment	Benchmark clarifications are followed; various representations of equations are used in multiple lessons. I love how this standard is spread out through multiple lessons and various strategies are used.
MA.6.AR.2.3	Write and solve one-step equations in one variable within a mathematical or real-world context using multiplication and division, where all terms and solutions are integers.	5 - Very Good Alignment	Standard is covered in detail; clarifications are addressed.
MA.6.AR.2.4	Determine the unknown decimal or fraction in an equation involving any of the four operations, relating three numbers, with the unknown in any position.	3 - Fair Alignment	Lessons have more practice with decimals than fractions; only a few fraction addition and subtraction problems found in the lessons.
MA.6.AR.3.1	Given a real-world context, write and interpret ratios to show the relative sizes of two quantities using appropriate notation: □, a to b, or a:b where $b \neq 0$.	4 - Good Alignment	Real world context given; benchmark clarifications are followed.
MA.6.AR.3.2	Given a real-world context, determine a rate for a ratio of quantities with different units. Calculate and interpret the corresponding unit rate.	4 - Good Alignment	Benchmark is covered completely.
MA.6.AR.3.3	Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.	3 - Fair Alignment	Lessons could have more practice with creating tables.

MA.6.AR.3.4	Apply ratio relationships to solve mathematical and real-world problems involving percentages using the relationship between two quantities.	4 - Good Alignment	Lesson instruction follows benchmark clarification
MA.6.AR.3.5	Solve mathematical and real-world problems involving ratios, rates and unit rates, including comparisons, mixtures, ratios of lengths and conversions within the same measurement system.	4 - Good Alignment	Problems given are real world related; various representations are used.
MA.6.DP.1.1	Recognize and formulate a statistical question that would generate numerical data.	4 - Good Alignment	Lesson addresses benchmark accurately.
MA.6.DP.1.2	Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.	4 - Good Alignment	All measures of are covered except for range (range is addressed later in the box plot lesson).
MA.6.DP.1.3	Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.	4 - Good Alignment	Real world problems are used; all parts of box plots are given in examples and practice throughout lessons.
MA.6.DP.1.4	Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.	4 - Good Alignment	Lesson uses both histograms and line plots; all vocabulary is explained and modeled in detail.
MA.6.DP.1.5	Create box plots and histograms to represent sets of numerical data within real-world contexts.	5 - Very Good Alignment	Benchmark is spread out throughout multiple lessons which allow skills to build upon one another.
MA.6.DP.1.6	Given a real-world scenario, determine and describe how changes in data values impact measures of center and variation.	4 - Good Alignment	Module 18 covers all types of measures and diagrams, detailed practice for students to practice description of histograms, box plots, and line plots.

MA.6.GR.1.1	Extend previous understanding of the coordinate plane to plot rational number ordered pairs in all four quadrants and on both axes. Identify the x- or y-axis as the line of reflection when two ordered pairs have an opposite x- or y-coordinate.	4 - Good Alignment	Lesson covers standard appropriately.
MA.6.GR.1.2	Find distances between ordered pairs, limited to the same x-coordinate or the same y-coordinate, represented on the coordinate plane.	4 - Good Alignment	Lesson covers standard; real world problems are given to practice skill
MA.6.GR.1.3	Solve mathematical and real-world problems by plotting points on a coordinate plane, including finding the perimeter or area of a rectangle.	4 - Good Alignment	Benchmark clarifications are covered; instruction and examples are given in detail.
MA.6.GR.2.1	Derive a formula for the area of a right triangle using a rectangle. Apply a formula to find the area of a triangle.	5 - Very Good Alignment	Instruction includes relationship between rectangles and triangles to derive area formula and practice using the formula.
MA.6.GR.2.2	Solve mathematical and real-world problems involving the area of quadrilaterals and composite figures by decomposing them into triangles or rectangles.	4 - Good Alignment	Lesson uses circles, which is a 7th grade standard but this fits in well since this is an advanced course.
MA.6.GR.2.3	Solve mathematical and real-world problems involving the volume of right rectangular prisms with positive rational number edge lengths using a visual model and a formula.	5 - Very Good Alignment	Students first learn how to calculate volume, then next lesson uses this to build onto finding missing dimensions.
MA.6.GR.2.4	Given a mathematical or real-world context, find the surface area of right rectangular prisms and right rectangular pyramids using the figure's net.	4 - Good Alignment	Standard and benchmark clarifications are covered.
MA.6.NSO.1.1	Extend previous understanding of numbers to define rational numbers. Plot, order and compare rational numbers.	4 - Good Alignment	Standard is covered in detail and benchmark

			clarifications are followed.
MA.6.NSO.1.2	Given a mathematical or real-world context, represent quantities that have opposite direction using rational numbers. Compare them on a number line and explain the meaning of zero within its context.	4 - Good Alignment	Benchmark clarification 1 is covered really well throughout the lessons, using different verbal comparison words.
MA.6.NSO.1.3	Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.	3 - Fair Alignment	Absolute values is covered well, but lesson needs various number lines (most of them are horizontal) and more practice with absolute value of rational numbers.
MA.6.NSO.1.4	Solve mathematical and real-world problems involving absolute value, including the comparison of absolute value.	4 - Good Alignment	Real world examples and problems are given.
MA.6.NSO.2.1	Multiply and divide positive multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Lessons build upon one another (multiplication to division), benchmark clarifications are followed.
MA.6.NSO.2.2	Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.	4 - Good Alignment	Lessons use appropriate amount of visual models to connected to standard algorithm, lessons build upon one another to promote understanding of skill.
MA.6.NSO.2.3	Solve multi-step real-world problems involving any of the four operations with positive multi-digit decimals or positive fractions, including mixed numbers.	4 - Good Alignment	Multi step problems are given throughout various lessons to connect skill with other benchmarks as well.

MA.6.NSO.3.1	Given a mathematical or real-world context, find the greatest common factor and least common multiple of two whole numbers.	4 - Good Alignment	Lessons connected GCF and LCM with simplifying fractions.
MA.6.NSO.3.2	Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.	4 - Good Alignment	Benchmark is covered with GCF.
MA.6.NSO.3.3	Evaluate positive rational numbers with natural number exponents.	4 - Good Alignment	Material covers benchmark thoroughly.
MA.6.NSO.3.4	Express composite whole numbers as a product of prime factors with natural number exponents.	4 - Good Alignment	Instruction and material connects prime factorization with other benchmark skills (GCF and distributive property).
MA.6.NSO.3.5	Rewrite positive rational numbers in different but equivalent forms including fractions, terminating decimals and percentages.	4 - Good Alignment	Benchmark is covered.
MA.6.NSO.4.1	Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.	4 - Good Alignment	Benchmark is covered; use of number lines are extensive which is good; more manipulatives and diagrams would be useful for addition and subtraction.
MA.6.NSO.4.2	Apply and extend previous understandings of operations with whole numbers to multiply and divide integers with procedural fluency.	4 - Good Alignment	Good use of models and diagrams in instruction
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Good connections with previously learned skills; benchmark clarifications are addressed.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	3 - Fair Alignment	Benchmark clarification 2 mentions rational

			coefficients; lessons need more practice with fraction coefficients.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Benchmark and clarifications are covered in lessons.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	5 - Very Good Alignment	All types of percent problems are represented throughout various lessons.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	Real world problems are used to solve proportion problems; also link to statistics and probability.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Benchmark clarification includes justification of appropriate measures; more opportunities for this could be added in the lesson.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to make comparisons, interpret results and draw conclusions about the two populations.	5 - Very Good Alignment	All types of representation is given in the lessons for students to compare data.
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Standard is covered well in material.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Standard is covered well in material; different scenarios are given for probability.

MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Instruction includes descriptions found in benchmark clarifications.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Different scenarios are used to practice skill (marbles, rolling die, etc.)
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	4 - Good Alignment	Lesson instructs on experimental and theoretical probability as clarification suggests.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	5 - Very Good Alignment	Lesson instruction relates area of shapes to rectangles and triangles, connecting previous skills with benchmark.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	4 - Good Alignment	Examples given and material used in instruction covers benchmark.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	4 - Good Alignment	Practice problems include exponents, absolute value, and grouping symbols. Practice problems are complex, encouraging students to think above level.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Lessons completely cover standard.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Benchmark is covered in multiple lessons.
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	Tasks throughout lessons encourage students to participate in lesson by explaining

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		or sharing thinking with one another.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	4 - Good Alignment	Most lessons include models and various scenarios for students to think about the problems in multiple ways. Connections are made with previous skills to help students understand the skill.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	4 - Good Alignment	Instruction promotes fluency; students are encouraged to explain methods.

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	4 - Good Alignment	Spark Your Learning section in front of lessons allows students to explain and discuss their thinking with others.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	4 - Good Alignment	Lessons focus on patterns to to solve problems and understand complex problems.

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	4 - Good Alignment	Discussions are encouraged, explanations are encouraged throughout lessons.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	All lessons use real world and relatable problems for students to understand the importance of the skills they are learning.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Every lesson begins with a "Turn and Talk"

			question that encourages students to communicate and justify their answer.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Information and text is on grade level.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Students are encouraged to infer information about each lesson at the beginning, which give them a goal and reason for completed problems presented in the lesson.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Turn and Talk and Learning Mindset sections in the lessons allow for students to reflect on their learning and reasoning; it also encourages them to explain why their discussions are helpful.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Many opportunities given for students to show and explain their steps and work when solving problems
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Variety of questions and discussion topics are given throughout the lessons, which allows students to practice their speaking and writing skills.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary	3 - Fair Alignment	Differentiated options are given throughout teacher edition; more

	for academic success in the content area of Mathematics.		suggestions for ELL learners may be helpful.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Sixth grade, as well as 7th grade standards for advanced courses, are covered well in all lessons.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Text material is appropriate for sixth grade.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Online instruction, textbook material, extra resources are all easily adaptable.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Examples and instruction seems to all be thought out well, Turn and Talk throughout the lessons gives students opportunities to discuss learning together.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Standards are matched in the lessons; students are given complex problems to carry the standards a bit farther when appropriate.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Lessons in text matches complexity for students in advanced courses.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The lessons are thorough and are spaced out in a way that students can understand material in an appropriate timeframe.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The online Adaptive Practice works well with textbook material; students can work at

		their own pace or be assigned extra assignments based on classroom lessons.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Adaptive Practice allows for extra practice; extra materials (such as reteach worksheets) are also available.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	No noticeable errors found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	No bias found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Content is accurate based on standards.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No mistakes found in material or instruction.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Instruction seems up to date with current student learning.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Content matches standards and benchmark
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is appropriate for sixth grade learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content is real world and relatable, giving students and understanding of the importance of what they are learning.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Students are able to make connections with other subject areas within many of the lessons.

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	No bias or unfair information found.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	No inappropriate information found.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Benchmark and standards are clearly covered in the material.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Many suggestions given to support students with extra lessons and activities (some require teachers to make materials, but nothing more than writing problems on index cards or post-its mostly).
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Online practice and activities given in teacher edition match with the main lessons.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Lessons are organized in a way that makes sense to the students.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Lessons are organized and set up in a way that should keep students engaged throughout the lesson.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Lessons are not "overloaded" with information. The instruction is organized well so students can understand content easily.

6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	Students can have access to textbook digitally or in print.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	The textbook seems to be organized well and all information is easy to find and easy to read.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Turn and talk sections allow students to stay engaged. Having discussions with one another can help to motivate them to stay engaged with the instruction.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Modules are organized by Big Ideas, each lesson goes through the concepts that align with the Big Ideas.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Students are encouraged to answer questions either orally or by writing down answers about what they are learning or will be learning about.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	As students work through examples or guided problems, written instruction explains the concept further.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	Teacher edition gives suggestions for activities to support learners who need more instruction.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	Materials engaged students mentally, turn and talk could be considered physical engagement.

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The teacher edition includes many different suggestions to engage students and help those who need more support and extend learning for high achieving learners.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Math problems taught by steps and explained thoroughly
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Instruction is focused on fluency and procedural knowledge.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	End of lessons have test prep
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Students are asked to explain steps in finding answer and show steps; various assessment opportunities are given in the teacher edition
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	Teacher edition provides various differentiated learning suggestions and activities
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	Many opportunities for written and oral communication and group work.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Various learning strategies are used throughout lessons.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	No CRT found in materials
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No CRT found in materials

Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No evidence of CRT found
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	No evidence of this found

A	B	C	D	E												
Bid #	Course	Title	Special Topics (Y/N)	Subject-Specific Standards Score												
1	454	Mathematics-Kindergrarten (Special Topics)	Y (see below)	4.1

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

It was wonderful speaking with you this afternoon; thank you so much for reaching out to me. I really appreciate it.

What I am looking for is the evaluation rubric/score for our title, *Precalculus with Limits: A Graphing Approach 8th Edition*. We would like to look at that information in order to make an informed decision regarding an appeal.

I look forward to hopefully having that information by this Friday.

Have a wonderful rest of your day!

Lauren

Is there any chance that we can we get a copy of the evaluation rubric so that we can see where we were deficient?

I searched the website, but was unable to find anything.

Thank you.

Good afternoon Ms. Rivers,

It was great speaking with you today! Per our conversation, I am formally requesting, on behalf of Big Ideas Learning, LLC, the following information:

All supporting documentation including, but not limited to rubrics and reviewers' comments related to the Inclusion of Special Topics that were found in the following courses:

Florida's B.E.S.T Standards for MATH Grade K

Bid ID: 298

Course ID: 5012020

Florida's B.E.S.T Standards for MATH Grade 1

Bid ID: 299

Course ID: 5012030

Florida's B.E.S.T Standards for MATH Grade 4

Bid ID: 302

Course ID: 5012060

The Subject-Specific Standards Scoring rubric and all supporting documentation for the following course:

Florida's B.E.S.T Standards for MATH Algebra 2 with CalcChat® and CalcView®

Bid ID: 311

Course ID: 1200330

Thank you in advance for your time and consideration in this matter. Big Ideas Learning stands ready, willing, and able to resolve all outstanding issues as soon as possible and greatly welcomes your help here. This is a matter of great importance to us.

Best regards,

Emily Winston

Lauren,

The entire GoMath K-5 series for Houghton Mifflin Harcourt is on the non-adopted, and therefore, no grade levels for GoMath k-5 are listed on that site. We need reviews for all grade levels of GoMath K-5, not just the ones where we received lower than a 4.0 score. We have reports for grades 1 and 5. We need them for K, 2, 3, and 4.

Thanks,

Drew Parker

Hi Drew,

I apologize for any miscommunication, previously attached were the evaluations for non-adopted materials, as requested by HMH representatives. All evaluations for the adopted materials may be publicly found on www.flimadoption.org and you may search within the 'Adopted Materials' tab under Course, Company, Title or Subject. All reviewer evaluations will be located within each material.

Please let me know if you have any questions or concerns.

Thanks,
Lauren

Lauren,

Thank you for the email and the documents. I believe that DOE has other documents responsive to my requests. Specifically, I requested all completed evaluations for Houghton Mifflin Harcourt's ("HMH") 2021-2022 Mathematics Instructional Materials. Can you please send me the evaluations/reviewer reports for the Mathematics Instructional Materials submitted by HMH which passed the subject-specific standards score and/or did not include special topics? I'm seeking all evaluations for HMH titles—not just the evaluations for the objectionable HMH titles on the Not Recommended List.

Best regards,

Drew Parker

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Hi Tavi,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon Ms. Rivers,

It was great speaking with you today! Per our conversation, I am formally requesting, on behalf of Big Ideas Learning, LLC, the following information:

All supporting documentation including, but not limited to rubrics and reviewers' comments related to the Inclusion of Special Topics that were found in the following courses:

Florida's B.E.S.T Standards for MATH Grade K
Bid ID: 298
Course ID: 5012020

Florida's B.E.S.T Standards for MATH Grade 1
Bid ID: 299
Course ID: 5012030

Florida's B.E.S.T Standards for MATH Grade 4
Bid ID: 302
Course ID: 5012060

The Subject-Specific Standards Scoring rubric and all supporting documentation for the following course:
Florida's B.E.S.T Standards for MATH Algebra 2 with CalcChat® and CalcView®
Bid ID: 311
Course ID: 1200330

Thank you in advance for your time and consideration in this matter. Big Ideas Learning stands ready, willing, and able to resolve all outstanding issues as soon as possible and greatly welcomes your help here. This is a matter of great importance to us.

Best regards,

Emily Winston

Senior State Adoptions Specialist

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	5 - Very Good Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	Standards and benchmarks are well covered in the instructional materials. Laurie's notes are very helpful and should be used by teachers to help in the implementation of the curriculum. If used as the materials appear to be intended, students will have opportunities to be active learners and have time to reflect on their own learning. Some lessons are heavy on the content and may need to be broken up over more than one class period to give students an opportunity to digest what they are learning.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	5 - Very Good Alignment	All different types of equations and expression opportunities to identify parts.
MA.912.AR.1.3	Add, subtract and multiply polynomial expressions with rational number coefficients.	5 - Very Good Alignment	4.2 in particular does a great job covering this benchmark. The other lessons are partial use of the benchmark.
MA.912.AR.1.5	Divide polynomial expressions using long division, synthetic division or algebraic manipulation.	5 - Very Good Alignment	Great coverage of all parts of the benchmark.
MA.912.AR.1.6	Solve mathematical and real-world problems involving addition, subtraction, multiplication or division of polynomials.	4 - Good Alignment	Lots of mathematical examples but not as many opportunities with real-world.
MA.912.AR.1.8	Rewrite a polynomial expression as a product of polynomials over the real or complex number system.	5 - Very Good Alignment	All parts of benchmark covered well.
MA.912.AR.1.9	Apply previous understanding of rational number operations to add, subtract, multiply and divide rational algebraic expressions.	5 - Very Good Alignment	Multiplying and dividing in one lesson, adding and subtracting in the other. Great coverage of benchmark.
MA.912.AR.3.2	Given a mathematical or real-world context, write and solve one-variable quadratic equations over the real and complex number systems.	5 - Very Good Alignment	All types of solving methods included with both algebraic and real-world examples.
MA.912.AR.3.3	Given a mathematical or real-world context, write and solve one-variable quadratic inequalities over the real number system.	4 - Good Alignment	The benchmark calls for one-variable quadratic inequalities.

	Represent solutions algebraically or graphically.		Instruction is all two-variable inequalities.
MA.912.AR.3.4	Write a quadratic function to represent the relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	5 - Very Good Alignment	2.3 and 2.4 fully cover the benchmark of writing a quadratic given each form.
MA.912.AR.3.8	Solve and graph mathematical and real-world problems that are modeled with quadratic functions. Interpret key features and determine constraints in terms of the context.	5 - Very Good Alignment	Benchmark covered fully throughout linked lessons
MA.912.AR.3.9	Given a mathematical or real-world context, write two-variable quadratic inequalities to represent relationships between quantities from a graph or a written description.	5 - Very Good Alignment	Benchmark fully covered.
MA.912.AR.3.10	Given a mathematical or real-world context, graph the solution set to a two-variable quadratic inequality.	5 - Very Good Alignment	Benchmark fully covered.
MA.912.AR.4.2	Given a mathematical or real-world context, write and solve one-variable absolute value inequalities. Represent solutions algebraically or graphically.	5 - Very Good Alignment	Great progression through what students need to be able to do to get to mastery.
MA.912.AR.4.4	Solve and graph mathematical and real-world problems that are modeled with absolute value functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	Set builder notation not included
MA.912.AR.5.2	Solve one-variable equations involving logarithms or exponential expressions. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.5.4	Write an exponential function to represent a relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	4 - Good Alignment	Alignment is there but explicit examples of everything needed to master the benchmark are needed.

MA.912.AR.5.5	Given an expression or equation representing an exponential function, reveal the constant percent rate of change per unit interval using the properties of exponents. Interpret the constant percent rate of change in terms of a real-world context.	3 - Fair Alignment	I didn't see any interpret the constant percent rate of change in terms of a real-world context.
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	All key features not addressed in instructional materials.
MA.912.AR.5.8	Given a table, equation or written description of a logarithmic function, graph that function and determine its key features.	3 - Fair Alignment	Domain and range not being represented in all ways included in clarification. Asymptotes not being identified with key features.
MA.912.AR.5.9	Solve and graph mathematical and real-world problems that are modeled with logarithmic functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	Domain and range not being represented in all ways included in clarification. Asymptotes not being identified with key features.
MA.912.AR.6.1	Given a mathematical or real-world context, when suitable factorization is possible, solve one-variable polynomial equations of degree 3 or higher over the real and complex number systems.	5 - Very Good Alignment	Great examples.
MA.912.AR.6.5	Sketch a rough graph of a polynomial function of degree 3 or higher using zeros, multiplicity and knowledge of end behavior.	5 - Very Good Alignment	Great examples
MA.912.AR.7.1	Solve one-variable radical equations. Interpret solutions as viable in terms of context and identify any extraneous solutions.	5 - Very Good Alignment	Full coverage of benchmark included.
MA.912.AR.7.2	Given a table, equation or written description of a square root or cube root function, graph that function and determine its key features.	4 - Good Alignment	Relative maximums/minimums

			not covered as key features.
MA.912.AR.7.3	Solve and graph mathematical and real-world problems that are modeled with square root or cube root functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	Relative maximums/minimums not covered as key features.
MA.912.AR.8.1	Write and solve one-variable rational equations. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	5 - Very Good Alignment	Great examples
MA.912.AR.8.2	Given a table, equation or written description of a rational function, graph that function and determine its key features.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.8.3	Solve and graph mathematical and real-world problems that are modeled with rational functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	No set builder notation
MA.912.AR.9.2	Given a mathematical or real-world context, solve a system consisting of a two-variable linear equation and a non-linear equation algebraically or graphically.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.9.3	Given a mathematical or real-world context, solve a system consisting of two-variable linear or non-linear equations algebraically or graphically.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.9.5	Graph the solution set of a system of two-variable inequalities.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.9.7	Given a real-world context, represent constraints as systems of linear and non-linear equations or inequalities. Interpret solutions to problems as viable or non-viable options.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.DP.2.8	Fit a quadratic function to bivariate numerical data that suggests a quadratic association and interpret any intercepts or the vertex of	5 - Very Good Alignment	Full coverage of benchmark

	the model. Use the model to solve real-world problems in terms of the context of the data.		
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.F.1.1	Given an equation or graph that defines a function, determine the function type. Given an input-output table, determine a function type that could represent it.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.F.1.7	Compare key features of two functions each represented algebraically, graphically, in tables or written descriptions.	2 - Poor Alignment	Key features not being compared. Students are finding key features but not comparing two functions.
MA.912.F.1.9	Determine whether a function is even, odd or neither when represented algebraically, graphically or in a table.	5 - Very Good Alignment	All forms provided in instruction to determine odd/even/neither.
MA.912.F.2.2	Identify the effect on the graph of a given function of two or more transformations defined by adding a real number to the x- or y- values or multiplying the x- or y- values by a real number.	5 - Very Good Alignment	Benchmark not specific about limits or requirements of which functions but transformations are covered well.
MA.912.F.2.3	Given the graph or table of $f(x)$ and the graph or table of $f(x)+k$, $kf(x)$, $f(kx)$ and $f(x+k)$, state the type of transformation and find the value of the real number k .	5 - Very Good Alignment	Benchmark not specific about limits or requirements of which functions but transformations are covered well.
MA.912.F.2.5	Given a table, equation or graph that represents a function, create a corresponding table, equation or graph of the transformed function defined by adding a real number to the x- or y-values or multiplying the x- or y-values by a real number.	5 - Very Good Alignment	Benchmark covered well.

MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	4 - Good Alignment	Domain restrictions only given in set builder notation.
MA.912.F.3.4	Represent the composition of two functions algebraically or in a table. Determine the domain and range of the composite function.	5 - Very Good Alignment	Benchmark covered well.
MA.912.F.3.6	Determine whether an inverse function exists by analyzing tables, graphs and equations.	5 - Very Good Alignment	Benchmark covered well.
MA.912.F.3.7	Represent the inverse of a function algebraically, graphically or in a table. Use composition of functions to verify that one function is the inverse of the other.	5 - Very Good Alignment	Benchmark covered well.
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	4 - Good Alignment	APR not mentioned in the instructional information
MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	5 - Very Good Alignment	Benchmark covered well.
MA.912.FL.3.4	Explain the relationship between simple interest and linear growth. Explain the relationship between compound interest and exponential growth and the relationship between continuously compounded interest and exponential growth.	5 - Very Good Alignment	Benchmark covered well.
MA.912.NSO.1.3	Generate equivalent algebraic expressions involving radicals or rational exponents using the properties of exponents.	5 - Very Good Alignment	Great build and explanation to get to mastery of the benchmark.
MA.912.NSO.1.5	Add, subtract, multiply and divide algebraic expressions involving radicals.	5 - Very Good Alignment	Benchmark covered well.
MA.912.NSO.1.6	Given a numerical logarithmic expression, evaluate and generate equivalent numerical	5 - Very Good Alignment	Benchmark covered well.

	expressions using the properties of logarithms or exponents.		
MA.912.NSO.1.7	Given an algebraic logarithmic expression, generate an equivalent algebraic expression using the properties of logarithms or exponents.	5 - Very Good Alignment	Benchmark covered well.
MA.912.NSO.2.1	Extend previous understanding of the real number system to include the complex number system. Add, subtract, multiply and divide complex numbers.	5 - Very Good Alignment	Benchmark covered well.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	Opportunities throughout instructional materials.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. 	5 - Very Good Alignment	Opportunities throughout instructional materials.

	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.

ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	ELL resources throughout curriculum and teacher direction
----------------------------------	--	-------------------------	---

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	Overall the instructional materials are really well done and well aligned to the standards and benchmarks.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	The content is written to the correct skill level required by the standards.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	The instructional materials are very well adaptable and useful for classroom instruction/use.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	Several examples and extra examples given for each topic within every lesson.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The level of treatment of content matches the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	The level of treatment of content matches what students should be able to do at this level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Some lessons have a lot included within them so will likely need to be broken into multiple class periods to cover all material sufficiently.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Reputable experts and resources cited reflect expert information for the subject.

9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Reputable experts and resources cited reflect expert information for the subject.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No typographical or visual errors were found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias or contradictions were found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Materials include prevailing theories, concepts, standards and models used in Algebra 2.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No mistakes or inconsistencies were found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Content is up to date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	The materials are presented in an appropriate and relevant context.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	The materials are presented in an appropriate and relevant context.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Content includes connections to life that should be meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Where appropriate interdisciplinary connections are included that should be meaningful to students.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Materials are presented in a fair and unbiased way.

20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Materials are presented with compassion, sympathy and consideration.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Overall the content of the benchmarks and standards are covered in the materials.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Teacher materials give lots of suggestions and practice. Student materials have lots of opportunities for practice and reflection.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Materials well aligned.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The instructional materials are organized in a consistent and logical manner.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Lots of visuals and appealing examples that are engaging.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Some lessons are heavy on the material but can be covered in a couple days.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Font size adjustable, high contrast settings, text-to-speech tools, videos captioned, refreshable Braille displays, adjustable size, keyboard shortcuts, highlight options.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The presentation of the materials meets/exceeds all requirements.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Opportunities to make predictions, turn and talk, and examples that are relevant should help to maintain learner motivation.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Some lessons have more than a few big ideas, sometimes too many
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Every lesson includes specific goals/outcomes.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	There is a progression of learning/questioning with more complex concepts.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Teachers can adapt examples easily to support learning differences/styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Lessons all include instructional strategies to make students active learners
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	The materials include organized activities that are logical extensions of content, goals, and objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements are included throughout.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements are included throughout.

10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Lesson-by-lesson and chapter self-assessment, test prep,
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	The assessment strategies incorporated in the materials are effective in assessing the learners' performance.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	All student needs considered.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	ELA expectations and MTR standards are represented throughout the instructional materials.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Great examples included, in the TE Laurie's notes and suggestions are great for questions to ask, things to anticipate and instructional strategies to implement.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No CRT included in instructional materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No CRT included in instructional materials.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No CRT included in instructional materials.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	SEL not included in instructional materials.

Reviewer's Name: Lori Metzler

Title: Florida's B.E.S.T. Standards for MATH Algebra 2 with CalcChat® and CalcView®

Publisher: Big Ideas Learning, LLC

Author: Ron Larson and Laurie Boswell

Copyright: 2023

Edition: 1

Grade Level: 9-12

Course: [Algebra 2](#)

Bid ID: 311

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Although the standards could not be found by the listed sections of the textbook, I did see the standards in other places. I am not sure how that happened. Overall, the textbook is well organized, easy to read, and provides a great resource for the Algebra 2 course.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	5 - Very Good Alignment	Aligned well to the standard.
MA.912.AR.1.3	Add, subtract and multiply polynomial expressions with rational number coefficients.	4 - Good Alignment	4.2 does not address this standard
MA.912.AR.1.5	Divide polynomial expressions using long division, synthetic division or algebraic manipulation.	4 - Good Alignment	4.3 & 7.4 do not address this standard.
MA.912.AR.1.6	Solve mathematical and real-world problems involving addition, subtraction, multiplication or division of polynomials.	2 - Poor Alignment	None of those sections address this standard.
MA.912.AR.1.8	Rewrite a polynomial expression as a product of polynomials over the real or complex number system.	3 - Fair Alignment	Many of these sections do not address this standard.
MA.912.AR.1.9	Apply previous understanding of rational number operations to add, subtract, multiply and divide rational algebraic expressions.	2 - Poor Alignment	None of those sections address this standard.
MA.912.AR.3.2	Given a mathematical or real-world context, write and solve one-variable quadratic equations over the real and complex number systems.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.3.3	Given a mathematical or real-world context, write and solve one-variable quadratic inequalities over the real number system. Represent solutions algebraically or graphically.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.3.4	Write a quadratic function to represent the relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	2 - Poor Alignment	Chapter 2 is about Linear Inequalities

MA.912.AR.3.8	Solve and graph mathematical and real-world problems that are modeled with quadratic functions. Interpret key features and determine constraints in terms of the context.	2 - Poor Alignment	Chapter 2 is about Linear Inequalities. Chapter 3 is about Linear Functions.
MA.912.AR.3.9	Given a mathematical or real-world context, write two-variable quadratic inequalities to represent relationships between quantities from a graph or a written description.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.3.10	Given a mathematical or real-world context, graph the solution set to a two-variable quadratic inequality.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.4.2	Given a mathematical or real-world context, write and solve one-variable absolute value inequalities. Represent solutions algebraically or graphically.	1 - Very Poor/No Alignment	There are no inequalities addressed in this section.
MA.912.AR.4.4	Solve and graph mathematical and real-world problems that are modeled with absolute value functions. Interpret key features and determine constraints in terms of the context.	1 - Very Poor/No Alignment	This section addresses literal equations.
MA.912.AR.5.2	Solve one-variable equations involving logarithms or exponential expressions. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	1 - Very Poor/No Alignment	There is no section 6.6 in the textbook.
MA.912.AR.5.4	Write an exponential function to represent a relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	2 - Poor Alignment	6.1 is about Properties of Exponents. There is no section 6.7.
MA.912.AR.5.5	Given an expression or equation representing an exponential function, reveal the constant percent rate of change per unit interval using the properties of exponents. Interpret the constant percent rate of change in terms of a real-world context.	3 - Fair Alignment	The standard is somewhat addressed.
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential	4 - Good Alignment	The standard is addressed.

	functions. Interpret key features and determine constraints in terms of the context.		
MA.912.AR.5.8	Given a table, equation or written description of a logarithmic function, graph that function and determine its key features.	4 - Good Alignment	The standard is addressed.
MA.912.AR.5.9	Solve and graph mathematical and real-world problems that are modeled with logarithmic functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	The standard is addressed.
MA.912.AR.6.1	Given a mathematical or real-world context, when suitable factorization is possible, solve one-variable polynomial equations of degree 3 or higher over the real and complex number systems.	1 - Very Poor/No Alignment	4.5 is about Scatter Plots and Lines of Fit.
MA.912.AR.6.5	Sketch a rough graph of a polynomial function of degree 3 or higher using zeros, multiplicity and knowledge of end behavior.	1 - Very Poor/No Alignment	Chapter 4 is Linear Functions.
MA.912.AR.7.1	Solve one-variable radical equations. Interpret solutions as viable in terms of context and identify any extraneous solutions.	1 - Very Poor/No Alignment	5.5 is Solving Equations by Graphing
MA.912.AR.7.2	Given a table, equation or written description of a square root or cube root function, graph that function and determine its key features.	1 - Very Poor/No Alignment	5.3 & 5.4 are about Solving Systems. There is no section 5.8.
MA.912.AR.7.3	Solve and graph mathematical and real-world problems that are modeled with square root or cube root functions. Interpret key features and determine constraints in terms of the context.	1 - Very Poor/No Alignment	5.3 & 5.4 are about Solving Systems
MA.912.AR.8.1	Write and solve one-variable rational equations. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.AR.8.2	Given a table, equation or written description of a rational function, graph that function and determine its key features.	1 - Very Poor/No Alignment	Standard is not addressed.

MA.912.AR.8.3	Solve and graph mathematical and real-world problems that are modeled with rational functions. Interpret key features and determine constraints in terms of the context.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.AR.9.2	Given a mathematical or real-world context, solve a system consisting of a two-variable linear equation and a non-linear equation algebraically or graphically.	4 - Good Alignment	Standard is addressed.
MA.912.AR.9.3	Given a mathematical or real-world context, solve a system consisting of two-variable linear or non-linear equations algebraically or graphically.	4 - Good Alignment	Standard is addressed.
MA.912.AR.9.5	Graph the solution set of a system of two-variable inequalities.	3 - Fair Alignment	3.7 is about Transformations.
MA.912.AR.9.7	Given a real-world context, represent constraints as systems of linear and non-linear equations or inequalities. Interpret solutions to problems as viable or non-viable options.	2 - Poor Alignment	Standard is not addressed.
MA.912.DP.2.8	Fit a quadratic function to bivariate numerical data that suggests a quadratic association and interpret any intercepts or the vertex of the model. Use the model to solve real-world problems in terms of the context of the data.	1 - Very Poor/No Alignment	2.4 is solving multi-step inequalities
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	1 - Very Poor/No Alignment	There is no 6.7.
MA.912.F.1.1	Given an equation or graph that defines a function, determine the function type. Given an input-output table, determine a function type that could represent it.	4 - Good Alignment	Standard is addressed.
MA.912.F.1.7	Compare key features of two functions each represented algebraically, graphically, in tables or written descriptions.	2 - Poor Alignment	Standard is not addressed.

MA.912.F.1.9	Determine whether a function is even, odd or neither when represented algebraically, graphically or in a table.	4 - Good Alignment	Standard is addressed.
MA.912.F.2.2	Identify the effect on the graph of a given function of two or more transformations defined by adding a real number to the x- or y- values or multiplying the x- or y- values by a real number.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.2.3	Given the graph or table of $f(x)$ and the graph or table of $f(x)+k$, $kf(x)$, $f(kx)$ and $f(x+k)$, state the type of transformation and find the value of the real number k .	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.2.5	Given a table, equation or graph that represents a function, create a corresponding table, equation or graph of the transformed function defined by adding a real number to the x- or y-values or multiplying the x- or y-values by a real number.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	1 - Very Poor/No Alignment	Standard is not addressed. There is no section 6.6.
MA.912.F.3.4	Represent the composition of two functions algebraically or in a table. Determine the domain and range of the composite function.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.3.6	Determine whether an inverse function exists by analyzing tables, graphs and equations.	1 - Very Poor/No Alignment	Standard is not addressed. There is no section 5.8.
MA.912.F.3.7	Represent the inverse of a function algebraically, graphically or in a table. Use composition of functions to verify that one function is the inverse of the other.	2 - Poor Alignment	There is no section 5.8.
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	1 - Very Poor/No Alignment	Standard is not addressed.

MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.FL.3.4	Explain the relationship between simple interest and linear growth. Explain the relationship between compound interest and exponential growth and the relationship between continuously compounded interest and exponential growth.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.NSO.1.3	Generate equivalent algebraic expressions involving radicals or rational exponents using the properties of exponents.	2 - Poor Alignment	Standard is not addressed in that section. It is in 6.1.
MA.912.NSO.1.5	Add, subtract, multiply and divide algebraic expressions involving radicals.	2 - Poor Alignment	Standard is not addressed in that section. It is in 6.2.
MA.912.NSO.1.6	Given a numerical logarithmic expression, evaluate and generate equivalent numerical expressions using the properties of logarithms or exponents.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.NSO.1.7	Given an algebraic logarithmic expression, generate an equivalent algebraic expression using the properties of logarithms or exponents.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.NSO.2.1	Extend previous understanding of the real number system to include the complex number system. Add, subtract, multiply and divide complex numbers.	1 - Very Poor/No Alignment	Standard is not addressed. 3.2 is about functions.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	3 - Fair Alignment	Some evidence of MTR 1.

	<ul style="list-style-type: none"> Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	4 - Good Alignment	Some evidence of MTR 2.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. 	3 - Fair Alignment	Some evidence of MTR 3.

<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples of MTR 4.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples of MTR 5.</p>

MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>1 - Very Poor/No Alignment</p>	<p>No evidence of MTR 6.</p>
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples of MTR 7.</p>
ELA.K12.EE.1.1	<p>Cite evidence to explain and justify reasoning.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>
ELA.K12.EE.2.1	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>
ELA.K12.EE.3.1	<p>Make inferences to support comprehension.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>
ELA.K12.EE.4.1	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Standard is addressed.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Standard is addressed.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Standard is addressed.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Although the listed sections did not correlate to the standards. The standards are present in the resoureces.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Meets the skill level.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Yes
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	Examples are well presented.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	Yes
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Yes
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	yes
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	yes

9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	yes
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	yes
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	yes
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	yes
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	yes
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	yes
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	yes
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	yes
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	yes
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	yes
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	yes
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and	5 - Very Good Alignment	yes

inhumane treatment. (An exception may be necessary for units covering animal welfare).		
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	yes

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	yes
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Textbook is well organized.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	yes
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	yes
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	yes
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	yes
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	Presented well.

Learning	Reviewer Rating	Rating Justification
----------	-----------------	----------------------

1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Some are present.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	yes
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	yes
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	yes
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	yes
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	yes
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	Very well organized
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Notes on the side
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	yes
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	yes
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	yes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	yes

13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The MTRs were very well noted
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	yes

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	The materials align.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	None noted
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	None noted
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	None noted

Attachment(s): "Bid 311-Algebra

2.pdf", "image002.png", "image003.png", "image004.png", "image005.png", "image006.png", "image007.png", "image008.png", "image009.png"

Ms. Hamilton,

Thank you for providing this information! We are in the process of reviewing the documents, but we have a quick initial question regarding the decision for Algebra 2. In the Final Recommendation section, both reviewers on the attached PDF selected "Yes" next to "Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?". One reviewer selected "5-Very Good Alignment" and the other selected "4-Good Alignment" next to "How would you rate the overall usability of the instructional material?". Their final recommendation comments were positive as well, so we are having trouble understanding how our final standards score was a 3.4. Could you provide more clarification on that?

Thank you!

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon Ms. Rivers,

It was great speaking with you today! Per our conversation, I am formally requesting, on behalf of Big Ideas Learning, LLC, the following information:

All supporting documentation including, but not limited to rubrics and reviewers' comments related to the Inclusion of Special Topics that were found in the following courses:

Florida's B.E.S.T Standards for MATH Grade K

Bid ID: 298

Course ID: 5012020

Florida's B.E.S.T Standards for MATH Grade 1

Bid ID: 299

Course ID: 5012030

Florida's B.E.S.T Standards for MATH Grade 4

Bid ID: 302

Course ID: 5012060

The Subject-Specific Standards Scoring rubric and all supporting documentation for the following course:

Florida's B.E.S.T Standards for MATH Algebra 2 with CalcChat® and CalcView®

Bid ID: 311

Course ID: 1200330

Thank you in advance for your time and consideration in this matter. Big Ideas Learning stands ready, willing, and able to resolve all outstanding issues as soon as possible and greatly welcomes your help here. This is a matter of great importance to us.

Best regards,

 **Emily Winston**

Good afternoon Ms. Hamilton,

Are the specifics of the review such as a rubric or reviewers' comments available to publishers so that we may respond appropriately?

Thank you in advance for your time!

Best regards,

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	5 - Very Good Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	Standards and benchmarks are well covered in the instructional materials. Laurie's notes are very helpful and should be used by teachers to help in the implementation of the curriculum. If used as the materials appear to be intended, students will have opportunities to be active learners and have time to reflect on their own learning. Some lessons are heavy on the content and may need to be broken up over more than one class period to give students an opportunity to digest what they are learning.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	5 - Very Good Alignment	All different types of equations and expression opportunities to identify parts.
MA.912.AR.1.3	Add, subtract and multiply polynomial expressions with rational number coefficients.	5 - Very Good Alignment	4.2 in particular does a great job covering this benchmark. The other lessons are partial use of the benchmark.
MA.912.AR.1.5	Divide polynomial expressions using long division, synthetic division or algebraic manipulation.	5 - Very Good Alignment	Great coverage of all parts of the benchmark.
MA.912.AR.1.6	Solve mathematical and real-world problems involving addition, subtraction, multiplication or division of polynomials.	4 - Good Alignment	Lots of mathematical examples but not as many opportunities with real-world.
MA.912.AR.1.8	Rewrite a polynomial expression as a product of polynomials over the real or complex number system.	5 - Very Good Alignment	All parts of benchmark covered well.
MA.912.AR.1.9	Apply previous understanding of rational number operations to add, subtract, multiply and divide rational algebraic expressions.	5 - Very Good Alignment	Multiplying and dividing in one lesson, adding and subtracting in the other. Great coverage of benchmark.
MA.912.AR.3.2	Given a mathematical or real-world context, write and solve one-variable quadratic equations over the real and complex number systems.	5 - Very Good Alignment	All types of solving methods included with both algebraic and real-world examples.
MA.912.AR.3.3	Given a mathematical or real-world context, write and solve one-variable quadratic inequalities over the real number system.	4 - Good Alignment	The benchmark calls for one-variable quadratic inequalities.

	Represent solutions algebraically or graphically.		Instruction is all two-variable inequalities.
MA.912.AR.3.4	Write a quadratic function to represent the relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	5 - Very Good Alignment	2.3 and 2.4 fully cover the benchmark of writing a quadratic given each form.
MA.912.AR.3.8	Solve and graph mathematical and real-world problems that are modeled with quadratic functions. Interpret key features and determine constraints in terms of the context.	5 - Very Good Alignment	Benchmark covered fully throughout linked lessons
MA.912.AR.3.9	Given a mathematical or real-world context, write two-variable quadratic inequalities to represent relationships between quantities from a graph or a written description.	5 - Very Good Alignment	Benchmark fully covered.
MA.912.AR.3.10	Given a mathematical or real-world context, graph the solution set to a two-variable quadratic inequality.	5 - Very Good Alignment	Benchmark fully covered.
MA.912.AR.4.2	Given a mathematical or real-world context, write and solve one-variable absolute value inequalities. Represent solutions algebraically or graphically.	5 - Very Good Alignment	Great progression through what students need to be able to do to get to mastery.
MA.912.AR.4.4	Solve and graph mathematical and real-world problems that are modeled with absolute value functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	Set builder notation not included
MA.912.AR.5.2	Solve one-variable equations involving logarithms or exponential expressions. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.5.4	Write an exponential function to represent a relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	4 - Good Alignment	Alignment is there but explicit examples of everything needed to master the benchmark are needed.

MA.912.AR.5.5	Given an expression or equation representing an exponential function, reveal the constant percent rate of change per unit interval using the properties of exponents. Interpret the constant percent rate of change in terms of a real-world context.	3 - Fair Alignment	I didn't see any interpret the constant percent rate of change in terms of a real-world context.
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	All key features not addressed in instructional materials.
MA.912.AR.5.8	Given a table, equation or written description of a logarithmic function, graph that function and determine its key features.	3 - Fair Alignment	Domain and range not being represented in all ways included in clarification. Asymptotes not being identified with key features.
MA.912.AR.5.9	Solve and graph mathematical and real-world problems that are modeled with logarithmic functions. Interpret key features and determine constraints in terms of the context.	3 - Fair Alignment	Domain and range not being represented in all ways included in clarification. Asymptotes not being identified with key features.
MA.912.AR.6.1	Given a mathematical or real-world context, when suitable factorization is possible, solve one-variable polynomial equations of degree 3 or higher over the real and complex number systems.	5 - Very Good Alignment	Great examples.
MA.912.AR.6.5	Sketch a rough graph of a polynomial function of degree 3 or higher using zeros, multiplicity and knowledge of end behavior.	5 - Very Good Alignment	Great examples
MA.912.AR.7.1	Solve one-variable radical equations. Interpret solutions as viable in terms of context and identify any extraneous solutions.	5 - Very Good Alignment	Full coverage of benchmark included.
MA.912.AR.7.2	Given a table, equation or written description of a square root or cube root function, graph that function and determine its key features.	4 - Good Alignment	Relative maximums/minimums

			not covered as key features.
MA.912.AR.7.3	Solve and graph mathematical and real-world problems that are modeled with square root or cube root functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	Relative maximums/minimums not covered as key features.
MA.912.AR.8.1	Write and solve one-variable rational equations. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	5 - Very Good Alignment	Great examples
MA.912.AR.8.2	Given a table, equation or written description of a rational function, graph that function and determine its key features.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.8.3	Solve and graph mathematical and real-world problems that are modeled with rational functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	No set builder notation
MA.912.AR.9.2	Given a mathematical or real-world context, solve a system consisting of a two-variable linear equation and a non-linear equation algebraically or graphically.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.9.3	Given a mathematical or real-world context, solve a system consisting of two-variable linear or non-linear equations algebraically or graphically.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.9.5	Graph the solution set of a system of two-variable inequalities.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.AR.9.7	Given a real-world context, represent constraints as systems of linear and non-linear equations or inequalities. Interpret solutions to problems as viable or non-viable options.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.DP.2.8	Fit a quadratic function to bivariate numerical data that suggests a quadratic association and interpret any intercepts or the vertex of	5 - Very Good Alignment	Full coverage of benchmark

	the model. Use the model to solve real-world problems in terms of the context of the data.		
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.F.1.1	Given an equation or graph that defines a function, determine the function type. Given an input-output table, determine a function type that could represent it.	5 - Very Good Alignment	Full coverage of benchmark
MA.912.F.1.7	Compare key features of two functions each represented algebraically, graphically, in tables or written descriptions.	2 - Poor Alignment	Key features not being compared. Students are finding key features but not comparing two functions.
MA.912.F.1.9	Determine whether a function is even, odd or neither when represented algebraically, graphically or in a table.	5 - Very Good Alignment	All forms provided in instruction to determine odd/even/neither.
MA.912.F.2.2	Identify the effect on the graph of a given function of two or more transformations defined by adding a real number to the x- or y- values or multiplying the x- or y- values by a real number.	5 - Very Good Alignment	Benchmark not specific about limits or requirements of which functions but transformations are covered well.
MA.912.F.2.3	Given the graph or table of $f(x)$ and the graph or table of $f(x)+k$, $kf(x)$, $f(kx)$ and $f(x+k)$, state the type of transformation and find the value of the real number k .	5 - Very Good Alignment	Benchmark not specific about limits or requirements of which functions but transformations are covered well.
MA.912.F.2.5	Given a table, equation or graph that represents a function, create a corresponding table, equation or graph of the transformed function defined by adding a real number to the x- or y-values or multiplying the x- or y-values by a real number.	5 - Very Good Alignment	Benchmark covered well.

MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	4 - Good Alignment	Domain restrictions only given in set builder notation.
MA.912.F.3.4	Represent the composition of two functions algebraically or in a table. Determine the domain and range of the composite function.	5 - Very Good Alignment	Benchmark covered well.
MA.912.F.3.6	Determine whether an inverse function exists by analyzing tables, graphs and equations.	5 - Very Good Alignment	Benchmark covered well.
MA.912.F.3.7	Represent the inverse of a function algebraically, graphically or in a table. Use composition of functions to verify that one function is the inverse of the other.	5 - Very Good Alignment	Benchmark covered well.
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	4 - Good Alignment	APR not mentioned in the instructional information
MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	5 - Very Good Alignment	Benchmark covered well.
MA.912.FL.3.4	Explain the relationship between simple interest and linear growth. Explain the relationship between compound interest and exponential growth and the relationship between continuously compounded interest and exponential growth.	5 - Very Good Alignment	Benchmark covered well.
MA.912.NSO.1.3	Generate equivalent algebraic expressions involving radicals or rational exponents using the properties of exponents.	5 - Very Good Alignment	Great build and explanation to get to mastery of the benchmark.
MA.912.NSO.1.5	Add, subtract, multiply and divide algebraic expressions involving radicals.	5 - Very Good Alignment	Benchmark covered well.
MA.912.NSO.1.6	Given a numerical logarithmic expression, evaluate and generate equivalent numerical	5 - Very Good Alignment	Benchmark covered well.

	expressions using the properties of logarithms or exponents.		
MA.912.NSO.1.7	Given an algebraic logarithmic expression, generate an equivalent algebraic expression using the properties of logarithms or exponents.	5 - Very Good Alignment	Benchmark covered well.
MA.912.NSO.2.1	Extend previous understanding of the real number system to include the complex number system. Add, subtract, multiply and divide complex numbers.	5 - Very Good Alignment	Benchmark covered well.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	Opportunities throughout instructional materials.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	Overall the instructional materials are really well done and well aligned to the standards and benchmarks.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	The content is written to the correct skill level required by the standards.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	The instructional materials are very well adaptable and useful for classroom instruction/use.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	Several examples and extra examples given for each topic within every lesson.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The level of treatment of content matches the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	The level of treatment of content matches what students should be able to do at this level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Some lessons have a lot included within them so will likely need to be broken into multiple class periods to cover all material sufficiently.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Reputable experts and resources cited reflect expert information for the subject.

9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Reputable experts and resources cited reflect expert information for the subject.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No typographical or visual errors were found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias or contradictions were found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Materials include prevailing theories, concepts, standards and models used in Algebra 2.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No mistakes or inconsistencies were found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Content is up to date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	The materials are presented in an appropriate and relevant context.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	The materials are presented in an appropriate and relevant context.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Content includes connections to life that should be meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Where appropriate interdisciplinary connections are included that should be meaningful to students.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Materials are presented in a fair and unbiased way.

20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Materials are presented with compassion, sympathy and consideration.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Overall the content of the benchmarks and standards are covered in the materials.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Teacher materials give lots of suggestions and practice. Student materials have lots of opportunities for practice and reflection.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Materials well aligned.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The instructional materials are organized in a consistent and logical manner.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Lots of visuals and appealing examples that are engaging.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Some lessons are heavy on the material but can be covered in a couple days.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Font size adjustable, high contrast settings, text-to-speech tools, videos captioned, refreshable Braille displays, adjustable size, keyboard shortcuts, highlight options.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The presentation of the materials meets/exceeds all requirements.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Opportunities to make predictions, turn and talk, and examples that are relevant should help to maintain learner motivation.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Some lessons have more than a few big ideas, sometimes too many
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Every lesson includes specific goals/outcomes.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	There is a progression of learning/questioning with more complex concepts.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Teachers can adapt examples easily to support learning differences/styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Lessons all include instructional strategies to make students active learners
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	The materials include organized activities that are logical extensions of content, goals, and objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements are included throughout.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements are included throughout.

10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Lesson-by-lesson and chapter self-assessment, test prep,
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	The assessment strategies incorporated in the materials are effective in assessing the learners' performance.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	All student needs considered.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	ELA expectations and MTR standards are represented throughout the instructional materials.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Great examples included, in the TE Laurie's notes and suggestions are great for questions to ask, things to anticipate and instructional strategies to implement.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No CRT included in instructional materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No CRT included in instructional materials.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No CRT included in instructional materials.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	SEL not included in instructional materials.

Reviewer's Name: Lori Metzler

Title: Florida's B.E.S.T. Standards for MATH Algebra 2 with CalcChat® and CalcView®

Publisher: Big Ideas Learning, LLC

Author: Ron Larson and Laurie Boswell

Copyright: 2023

Edition: 1

Grade Level: 9-12

Course: [Algebra 2](#)

Bid ID: 311

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Although the standards could not be found by the listed sections of the textbook, I did see the standards in other places. I am not sure how that happened. Overall, the textbook is well organized, easy to read, and provides a great resource for the Algebra 2 course.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	5 - Very Good Alignment	Aligned well to the standard.
MA.912.AR.1.3	Add, subtract and multiply polynomial expressions with rational number coefficients.	4 - Good Alignment	4.2 does not address this standard
MA.912.AR.1.5	Divide polynomial expressions using long division, synthetic division or algebraic manipulation.	4 - Good Alignment	4.3 & 7.4 do not address this standard.
MA.912.AR.1.6	Solve mathematical and real-world problems involving addition, subtraction, multiplication or division of polynomials.	2 - Poor Alignment	None of those sections address this standard.
MA.912.AR.1.8	Rewrite a polynomial expression as a product of polynomials over the real or complex number system.	3 - Fair Alignment	Many of these sections do not address this standard.
MA.912.AR.1.9	Apply previous understanding of rational number operations to add, subtract, multiply and divide rational algebraic expressions.	2 - Poor Alignment	None of those sections address this standard.
MA.912.AR.3.2	Given a mathematical or real-world context, write and solve one-variable quadratic equations over the real and complex number systems.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.3.3	Given a mathematical or real-world context, write and solve one-variable quadratic inequalities over the real number system. Represent solutions algebraically or graphically.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.3.4	Write a quadratic function to represent the relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	2 - Poor Alignment	Chapter 2 is about Linear Inequalities

MA.912.AR.3.8	Solve and graph mathematical and real-world problems that are modeled with quadratic functions. Interpret key features and determine constraints in terms of the context.	2 - Poor Alignment	Chapter 2 is about Linear Inequalities. Chapter 3 is about Linear Functions.
MA.912.AR.3.9	Given a mathematical or real-world context, write two-variable quadratic inequalities to represent relationships between quantities from a graph or a written description.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.3.10	Given a mathematical or real-world context, graph the solution set to a two-variable quadratic inequality.	2 - Poor Alignment	Chapter 3 is about Linear Functions.
MA.912.AR.4.2	Given a mathematical or real-world context, write and solve one-variable absolute value inequalities. Represent solutions algebraically or graphically.	1 - Very Poor/No Alignment	There are no inequalities addressed in this section.
MA.912.AR.4.4	Solve and graph mathematical and real-world problems that are modeled with absolute value functions. Interpret key features and determine constraints in terms of the context.	1 - Very Poor/No Alignment	This section addresses literal equations.
MA.912.AR.5.2	Solve one-variable equations involving logarithms or exponential expressions. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	1 - Very Poor/No Alignment	There is no section 6.6 in the textbook.
MA.912.AR.5.4	Write an exponential function to represent a relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	2 - Poor Alignment	6.1 is about Properties of Exponents. There is no section 6.7.
MA.912.AR.5.5	Given an expression or equation representing an exponential function, reveal the constant percent rate of change per unit interval using the properties of exponents. Interpret the constant percent rate of change in terms of a real-world context.	3 - Fair Alignment	The standard is somewhat addressed.
MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential	4 - Good Alignment	The standard is addressed.

	functions. Interpret key features and determine constraints in terms of the context.		
MA.912.AR.5.8	Given a table, equation or written description of a logarithmic function, graph that function and determine its key features.	4 - Good Alignment	The standard is addressed.
MA.912.AR.5.9	Solve and graph mathematical and real-world problems that are modeled with logarithmic functions. Interpret key features and determine constraints in terms of the context.	4 - Good Alignment	The standard is addressed.
MA.912.AR.6.1	Given a mathematical or real-world context, when suitable factorization is possible, solve one-variable polynomial equations of degree 3 or higher over the real and complex number systems.	1 - Very Poor/No Alignment	4.5 is about Scatter Plots and Lines of Fit.
MA.912.AR.6.5	Sketch a rough graph of a polynomial function of degree 3 or higher using zeros, multiplicity and knowledge of end behavior.	1 - Very Poor/No Alignment	Chapter 4 is Linear Functions.
MA.912.AR.7.1	Solve one-variable radical equations. Interpret solutions as viable in terms of context and identify any extraneous solutions.	1 - Very Poor/No Alignment	5.5 is Solving Equations by Graphing
MA.912.AR.7.2	Given a table, equation or written description of a square root or cube root function, graph that function and determine its key features.	1 - Very Poor/No Alignment	5.3 & 5.4 are about Solving Systems. There is no section 5.8.
MA.912.AR.7.3	Solve and graph mathematical and real-world problems that are modeled with square root or cube root functions. Interpret key features and determine constraints in terms of the context.	1 - Very Poor/No Alignment	5.3 & 5.4 are about Solving Systems
MA.912.AR.8.1	Write and solve one-variable rational equations. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.AR.8.2	Given a table, equation or written description of a rational function, graph that function and determine its key features.	1 - Very Poor/No Alignment	Standard is not addressed.

MA.912.AR.8.3	Solve and graph mathematical and real-world problems that are modeled with rational functions. Interpret key features and determine constraints in terms of the context.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.AR.9.2	Given a mathematical or real-world context, solve a system consisting of a two-variable linear equation and a non-linear equation algebraically or graphically.	4 - Good Alignment	Standard is addressed.
MA.912.AR.9.3	Given a mathematical or real-world context, solve a system consisting of two-variable linear or non-linear equations algebraically or graphically.	4 - Good Alignment	Standard is addressed.
MA.912.AR.9.5	Graph the solution set of a system of two-variable inequalities.	3 - Fair Alignment	3.7 is about Transformations.
MA.912.AR.9.7	Given a real-world context, represent constraints as systems of linear and non-linear equations or inequalities. Interpret solutions to problems as viable or non-viable options.	2 - Poor Alignment	Standard is not addressed.
MA.912.DP.2.8	Fit a quadratic function to bivariate numerical data that suggests a quadratic association and interpret any intercepts or the vertex of the model. Use the model to solve real-world problems in terms of the context of the data.	1 - Very Poor/No Alignment	2.4 is solving multi-step inequalities
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	1 - Very Poor/No Alignment	There is no 6.7.
MA.912.F.1.1	Given an equation or graph that defines a function, determine the function type. Given an input-output table, determine a function type that could represent it.	4 - Good Alignment	Standard is addressed.
MA.912.F.1.7	Compare key features of two functions each represented algebraically, graphically, in tables or written descriptions.	2 - Poor Alignment	Standard is not addressed.

MA.912.F.1.9	Determine whether a function is even, odd or neither when represented algebraically, graphically or in a table.	4 - Good Alignment	Standard is addressed.
MA.912.F.2.2	Identify the effect on the graph of a given function of two or more transformations defined by adding a real number to the x- or y- values or multiplying the x- or y- values by a real number.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.2.3	Given the graph or table of $f(x)$ and the graph or table of $f(x)+k$, $kf(x)$, $f(kx)$ and $f(x+k)$, state the type of transformation and find the value of the real number k .	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.2.5	Given a table, equation or graph that represents a function, create a corresponding table, equation or graph of the transformed function defined by adding a real number to the x- or y-values or multiplying the x- or y-values by a real number.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	1 - Very Poor/No Alignment	Standard is not addressed. There is no section 6.6.
MA.912.F.3.4	Represent the composition of two functions algebraically or in a table. Determine the domain and range of the composite function.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.F.3.6	Determine whether an inverse function exists by analyzing tables, graphs and equations.	1 - Very Poor/No Alignment	Standard is not addressed. There is no section 5.8.
MA.912.F.3.7	Represent the inverse of a function algebraically, graphically or in a table. Use composition of functions to verify that one function is the inverse of the other.	2 - Poor Alignment	There is no section 5.8.
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	1 - Very Poor/No Alignment	Standard is not addressed.

MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.FL.3.4	Explain the relationship between simple interest and linear growth. Explain the relationship between compound interest and exponential growth and the relationship between continuously compounded interest and exponential growth.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.NSO.1.3	Generate equivalent algebraic expressions involving radicals or rational exponents using the properties of exponents.	2 - Poor Alignment	Standard is not addressed in that section. It is in 6.1.
MA.912.NSO.1.5	Add, subtract, multiply and divide algebraic expressions involving radicals.	2 - Poor Alignment	Standard is not addressed in that section. It is in 6.2.
MA.912.NSO.1.6	Given a numerical logarithmic expression, evaluate and generate equivalent numerical expressions using the properties of logarithms or exponents.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.NSO.1.7	Given an algebraic logarithmic expression, generate an equivalent algebraic expression using the properties of logarithms or exponents.	1 - Very Poor/No Alignment	Standard is not addressed.
MA.912.NSO.2.1	Extend previous understanding of the real number system to include the complex number system. Add, subtract, multiply and divide complex numbers.	1 - Very Poor/No Alignment	Standard is not addressed. 3.2 is about functions.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	3 - Fair Alignment	Some evidence of MTR 1.

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	4 - Good Alignment	Some evidence of MTR 2.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	3 - Fair Alignment	Some evidence of MTR 3.

<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples of MTR 4.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples of MTR 5.</p>

MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>1 - Very Poor/No Alignment</p>	<p>No evidence of MTR 6.</p>
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples of MTR 7.</p>
ELA.K12.EE.1.1	<p>Cite evidence to explain and justify reasoning.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>
ELA.K12.EE.2.1	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>
ELA.K12.EE.3.1	<p>Make inferences to support comprehension.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>
ELA.K12.EE.4.1	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p>	<p>4 - Good Alignment</p>	<p>Standard is addressed.</p>

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Standard is addressed.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Standard is addressed.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Standard is addressed.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Although the listed sections did not correlate to the standards. The standards are present in the resoureces.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Meets the skill level.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Yes
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	Examples are well presented.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	Yes
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Yes
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	yes
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	yes

9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	yes
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	yes
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	yes
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	yes
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	yes
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	yes
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	yes
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	yes
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	yes
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	yes
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	yes
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and	5 - Very Good Alignment	yes

inhumane treatment. (An exception may be necessary for units covering animal welfare).		
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	yes

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	yes
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Textbook is well organized.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	yes
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	yes
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	yes
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	yes
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	Presented well.

Learning	Reviewer Rating	Rating Justification
----------	-----------------	----------------------

1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Some are present.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	yes
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	yes
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	yes
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	yes
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	yes
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	Very well organized
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Notes on the side
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	yes
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	yes
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	yes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	yes

13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The MTRs were very well noted
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	yes

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	The materials align.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	None noted
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	None noted
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	None noted

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List
Attachment(s): "image001.png", "image002.png"

Hi Drew,

I apologize for any miscommunication, previously attached were the evaluations for non-adopted materials, as requested by HMH representatives. All evaluations for the adopted materials may be publicly found on www.flimadoption.org and you may search within the 'Adopted Materials' tab under Course, Company, Title or Subject. All reviewer evaluations will be located within each material.

Please let me know if you have any questions or concerns.

Thanks,
Lauren

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Lauren,

Thank you for the email and the documents. I believe that DOE has other documents responsive to my requests. Specifically, I requested all completed evaluations for Houghton Mifflin Harcourt's ("HMH") 2021-2022 Mathematics Instructional Materials. Can you please send me the evaluations/reviewer reports for the Mathematics Instructional Materials submitted by HMH which passed the subject-specific standards score and/or did not include special topics? I'm seeking all evaluations for HMH titles—not just the evaluations for the objectionable HMH titles on the Not Recommended List.

Best regards,
Drew Parker

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Hi Tavi,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

*Mentions culturally responsive teaching but not CRT
AND
culturally responsive teaching is mentioned but not related to critical race theory*

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Current:

<https://drive.google.com/file/d/1SWCQjVd3L65Gh-CI5b0UR7HGxh02MeeJ/view?usp=sharing>

Revised:

<https://drive.google.com/file/d/1wCmsuxrY4iqsm2qAi83kUKzwI3H-JrLr/view?usp=sharing>

Current:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

28-106.201 Initiation of Proceedings.

(1) Unless otherwise provided by statute, and except for agency enforcement and disciplinary actions that shall be initiated under Rule 28-106.2015, F.A.C., initiation of proceedings shall be made by written petition to the agency responsible for rendering final agency action. The term “petition” includes any document that requests an evidentiary proceeding and asserts the existence of a disputed issue of material fact. Each petition shall be legible and on 8 1/2 by 11 inch white paper. Unless printed, the impression shall be on one side of the paper only and lines shall be double-spaced.

(2) All petitions filed under these rules shall contain:

(a) The name and address of each agency affected and each agency’s file or identification number, if known;

**Florida Department of Education, Instructional Materials Department
325 West Gaines St
Room 1514
Tallahassee, FL 32399**

(b) The name, address, any e-mail address, any facsimile number, and telephone number of the petitioner, if the petitioner is not represented by an attorney or a qualified representative; the name, address, and telephone number of the petitioner’s representative, if any, which shall be the address for service purposes during the course of the proceeding; and an explanation of how the petitioner’s substantial interests will be affected by the agency determination;

Amanda McGee - amcgee@acceleratelearning.com - (832) 515-7586

(c) A statement of when and how the petitioner received notice of the agency decision;

On April 15th, a notice was posted to the FLDOE website of recommended textbooks. An email from the FLDOE was received on April 15th at 1:23pm CST from Lauren Hamilton, Instructional Materials Specialist. See Attachment #1.

Document: <https://www.fldoe.org/core/fileparse.php/5574/urlt/2122MathAdoptedMaterials.pdf>

On April 19th, a notice was posted on the FLDOE website of non-recommended textbooks. No direct communication of this list was sent by the FLDOE, we were informed by one of our district partners.

Document: <https://www.fldoe.org/core/fileparse.php/5574/urlt/2122MathInstructMatNotReclList.pdf>

(d) A statement of all disputed issues of material fact. If there are none, the petition must so indicate;

We dispute the status of non-recommended of our Grade 4 Accelerated Mathematics (#5012065) and Foundational Skills in Mathematics 3-5 (#5012015) courses due to the inclusion of special topics.

(e) A concise statement of the ultimate facts alleged, including the specific facts the petitioner contends warrant reversal or modification of the agency's proposed action;

As indicated in Attachment #2, we were found to mention culturally responsive teaching, but not related to critical race theory and received a score of 3 - Fair Alignment. Since these two courses were built by the same people and to the same criteria as our other K-5 courses that were approved, it is improbable to us that these special topics were included in these two submissions and not included in the other K-5 courses.

(f) A statement of the specific rules or statutes the petitioner contends require reversal or modification of the agency's proposed action, including an explanation of how the alleged facts relate to the specific rules or statutes; and

(g) A statement of the relief sought by the petitioner, stating precisely the action petitioner wishes the agency to take with respect to the agency's proposed action.

Contending:1006.283, each district school board shall use the annual allocation only for the purchase of instructional materials that align with state standards and are included on the state-adopted list.

Relief sought is to have the STEMscopes Math approved for both the Grade 4 Accelerated Mathematics (#5012065) and Foundational Skills in Mathematics 3-5 (#5012015) courses.

(3) Upon receipt of a petition involving disputed issues of material fact, the agency shall grant or deny the petition, and if granted shall, unless otherwise provided by law, refer the matter to the Division of Administrative Hearings with a request that an administrative law judge be assigned to conduct the hearing. The request shall be accompanied by a copy of the petition and a copy of the notice of agency action.

Rulemaking Authority 14.202, 120.54(3), (5) FS. Law Implemented 120.54(3) FS. History—New 4-1-97, Amended 9-17-98, 1-15-07, 2-5-13.

Attachment #1: Email from Lauren Hamilton from the FLDOE indicating the scores were released.

Good morning,

Please see the attached Excel containing links to the updated content for our appeal. Each BID is on a separate tab. The PDFs in the Publisher Correction column, show the site yesterday, and the updated site this morning. Both PDFs have date/time stamps.

The "Link to correction in materials" column contains the direct links to the updated content. As a friendly reminder, we have included the URL, username, and password both on the Excel sheet and below. Users must be signed in to see the updated content on the live site.

URL: <https://stemsscopes.com/math/fl/preview> Username: floridadoe Password: mathmath!

We look forward to hearing from you in the near future.

Take care,
Diana

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

4th Grade Accelerated

3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Current:

<https://drive.google.com/file/d/1SWCQjVd3L65Gh-CI5b0UR7HGxh02MeeJ/view?usp=sharing>

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

-- Amanda

We looked specifically at content that both courses shared since these were the only two submissions that had issues.

Since there are overlapping standards and benchmarks in those two courses, there are going to be pieces of the lessons that overlap.

The products are different and reflect the standards and expectations of the two courses.

Hi everyone,

As we are going through the changes, we noticed that the stories that had edits were reflected in both the grade 4 accelerated as well as the foundational skills 3-5. Can you please give some insight on why both courses contain the same stories? We just want to clarify that the same product is not being used for both courses. I do see in the spreadsheets that each link takes me to the correct course.

Thanks!
Lauren

Good morning,

Please see the attached Excel containing links to the updated content for our appeal. Each BID is on a separate tab. The PDFs in the Publisher Correction column, show the site yesterday, and the updated site this morning. Both PDFs have date/time stamps.

The "Link to correction in materials" column contains the direct links to the updated content. As a friendly reminder, we have included the URL, username, and password both on the Excel sheet and below. Users must be signed in to see the updated content on the live site.

URL: <https://stemscopes.com/math/fl/preview> Username: floridadoe Password: mathmath!

We look forward to hearing from you in the near future.

Take care,
Diana

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Current:

<https://drive.google.com/file/d/1SWCQjVd3L65Gh-CI5b0UR7HGxh02MeeJ/view?usp=sharing>

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

Ms. Hamilton,

Thank you for the information. Are you able to provide more information on why Accelerate Learning Inc's 4th Grade Accelerated course was not recommended? We have read the information regarding appeals, but we were interested in feedback regarding our fourth grade accelerated course.

Thank you for your time.

Take care,
Diana

Good afternoon Ms. Rivers,

It was great speaking with you today! Per our conversation, I am formally requesting, on behalf of Big Ideas Learning, LLC, the following information:

All supporting documentation including, but not limited to rubrics and reviewers' comments related to the Inclusion of Special Topics that were found in the following courses:

Florida's B.E.S.T Standards for MATH Grade K

Bid ID: 298

Course ID: 5012020

Florida's B.E.S.T Standards for MATH Grade 1

Bid ID: 299

Course ID: 5012030

Florida's B.E.S.T Standards for MATH Grade 4

Bid ID: 302

Course ID: 5012060

The Subject-Specific Standards Scoring rubric and all supporting documentation for the following course:

Florida's B.E.S.T Standards for MATH Algebra 2 with CalcChat® and CalcView®

Bid ID: 311

Course ID: 1200330

Thank you in advance for your time and consideration in this matter. Big Ideas Learning stands ready, willing, and able to resolve all outstanding issues as soon as possible and greatly welcomes your help here. This is a matter of great importance to us.

Best regards,

Emily Winston

We looked specifically at content that both courses shared since these were the only two submissions that had issues.

Since there are overlapping standards and benchmarks in those two courses, there are going to be pieces of the lessons that overlap.

The products are different and reflect the standards and expectations of the two courses.

-- Amanda

On Fri, Apr 29, 2022 at 1:15 PM Hamilton, Lauren <Lauren.Hamilton@fldoe.org> wrote:

Hi everyone,

As we are going through the changes, we noticed that the stories that had edits were reflected in both the grade 4 accelerated as well as the foundational skills 3-5. Can you please give some insight on why both courses contain the same stories? We just want to clarify that the same product is not being used for both courses. I do see in the spreadsheets that each link takes me to the correct course.

Thanks!

Lauren

Good morning,

Please see the attached Excel containing links to the updated content for our appeal. Each BID is on a separate tab. The PDFs in the Publisher Correction column, show the site yesterday, and the updated site this morning. Both PDFs have date/time stamps.

The "Link to correction in materials" column contains the direct links to the updated content. As a friendly reminder, we have included the URL, username, and password both on the Excel sheet and below. Users must be signed in to see the updated content on the live site.

URL: <https://stemscopes.com/math/fl/preview> Username: floridadoe Password: mathmath!

We look forward to hearing from you in the near future.

Take care,

Diana

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Current:

<https://drive.google.com/file/d/1SWCQjVd3L65Gh-CI5b0UR7HGxh02MeeJ/view?usp=sharing>

Revised:

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

-- Amanda

On Thu, Apr 21, 2022 at 10:39 AM Hamilton, Lauren <Lauren.Hamilton@fldoe.org> wrote:

Good morning,

Thank you for speaking with me this morning. As mentioned, attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Lauren,
The entire GoMath K-5 series for Houghton Mifflin Harcourt is on the non-adopted, and therefore, no grade levels for GoMath k-5 are listed on that site. We need reviews for all grade levels of GoMath K-5, not just the ones where we received lower than a 4.0 score. We have reports for grades 1 and 5. We need them for K, 2, 3, and 4.

Thanks,
Drew Parker
