I apologize for any miscommunication, previously attached were the evaluations for non-adopted materials, as requested by HMH representatives. All evaluations for the adopted materials may be publicly found on www.flimadoption.org and you may search within the 'Adopted Materials' tab under Course, Company, Title or Subject. All reviewer evaluations will be located within each material.

Please let me know if you have any questions or concerns.

Thanks,
Lauren

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Lauren,
Thank you for the email and the documents. I believe that DOE has other documents responsive to my requests. Specifically, I requested all completed evaluations for Houghton Mifflin Harcourt's ("HMH") 2021-2022 Mathematics Instructional Materials. Can you please send me the evaluations/reviewer reports for the Mathematics Instructional Materials submitted by HMH which passed the subject-specific standards score and/or did not include special topics? I'm seeking all evaluations for HMH titles—not just the evaluations for the objectionable HMH titles on the Not Recommended List.

Best regards,
Drew Parker

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Hi Tavi,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Title: HMH Florida's B.E.S.T. Go Math!

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Thomasenia Lott Adams, PhD; Matthew R. Larson, PhD

Copyright: 2023

Edition: N/A

Grade Level: K-5

Course: [Grade Kindergarten Mathematics](#)

Bid ID: 454

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

H.M.H Go Math includes all the essential elements required for benchmark preparation, implementation, and assessment. There is ample student practice for students and professional development for teachers. The curriculum provides support for all learners and is visually appealing. The major downfall is the measurement unit and horizontal alignment. The measurement unit would require additional teacher preparation for instruction and assessment. Additionally, the application of horizontal alignment is not clearly evident.

Standard	Description	Reviewer Rating	Rating Justification
MA.K.AR.1.1	For any number from 1 to 9, find the number that makes 10 when added to the given number.	3 - Fair Alignment	The concept is thoroughly modeled but missing opportunities for open ended exploration.
MA.K.AR.1.2	Given a number from 0 to 10, find the different ways it can be represented as the sum of two numbers.	4 - Good Alignment	Meets the benchmark expectations and provides ample student practice.
MA.K.AR.1.3	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Meets the benchmark expectation with plenty of student practice. Also includes problems that begin with the sum.
MA.K.AR.2.1	Explain why addition or subtraction equations are true using objects or drawings.	4 - Good Alignment	Ample practice problems with appropriate visuals and includes problems that begin with the difference.
MA.K.DP.1.1	Collect and sort objects into categories and compare the categories by counting the objects in each category. Report the results verbally, with a written numeral or with drawings.	3 - Fair Alignment	Meets the expectation of the benchmark. However, some student practice is difficult and them to draw their own shapes based on given attributes which could prove difficult for K students. requires
MA.K.GR.1.1	Identify two- and three-dimensional figures regardless of their size or orientation. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Content is thoroughly explained and provides ample student practice.

MA.K.GR.1.2	Compare two-dimensional figures based on their similarities, differences and positions. Sort two-dimensional figures based on their similarities and differences. Figures are limited to circles, triangles, rectangles and squares.	5 - Very Good Alignment	Benchmark is well represented through pictures and student practice.
MA.K.GR.1.3	Compare three-dimensional figures based on their similarities, differences and positions. Sort three-dimensional figures based on their similarities and differences. Figures are limited to spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Benchmark is well represented through pictures and student practice.
MA.K.GR.1.4	Find real-world objects that can be modeled by a given two- or three-dimensional figure. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	4 - Good Alignment	Meets benchmark expectations-could use more vocabulary development practice.
MA.K.GR.1.5	Combine two-dimensional figures to form a given composite figure. Figures used to form a composite shape are limited to triangles, rectangles and squares.	4 - Good Alignment	Meets benchmark expectations- could use more real world examples
MA.K.M.1.1	Identify the attributes of a single object that can be measured such as length, volume or weight.	2 - Poor Alignment	Only addresses volume.
MA.K.M.1.2	Directly compare two objects that have an attribute which can be measured in common. Express the comparison using language to describe the difference.	2 - Poor Alignment	Very little instructional examples or student practice.
MA.K.M.1.3	Express the length of an object, up to 20 units long, as a whole number of lengths by laying non-standard objects end to end with no gaps or overlaps.	2 - Poor Alignment	Limited student practice and cubes
MA.K.NSO.1.1	Given a group of up to 20 objects, count the number of objects in that group and represent the number of objects with a written numeral. State the number of objects in a rearrangement of that group without recounting.	5 - Very Good Alignment	Multiple representations in various forms

MA.K.NSO.1.2	Given a number from 0 to 20, count out that many objects.	5 - Very Good Alignment	Multiple representations in various forms
MA.K.NSO.1.3	Identify positions of objects within a sequence using the words “first,” “second,” “third,” “fourth” or “fifth.”	3 - Fair Alignment	Illustrates first well. More visuals and practice could be incorporated to teach 2nd -5th.
MA.K.NSO.1.4	Compare the number of objects from 0 to 20 in two groups using the terms less than, equal to or greater than.	3 - Fair Alignment	Instructs the benchmark but includes minimal student practice for comparing.
MA.K.NSO.2.1	Recite the number names to 100 by ones and by tens. Starting at a given number, count forward within 100 and backward within 20.	4 - Good Alignment	Meets the benchmark expectations with ample student practice. Could use additional practice for students to begin counting at points other than 1.
MA.K.NSO.2.2	Represent whole numbers from 10 to 20, using a unit of ten and a group of ones, with objects, drawings and expressions or equations.	4 - Good Alignment	Concept is well modeled.
MA.K.NSO.2.3	Locate, order and compare numbers from 0 to 20 using the number line and terms less than, equal to or greater than.	4 - Good Alignment	Multiple opportunities to compare numbers with numberlines present for student reference.
MA.K.NSO.3.1	Explore addition of two whole numbers from 0 to 10, and related subtraction facts.	4 - Good Alignment	Meets benchmark expectations.
MA.K.NSO.3.2	Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.	4 - Good Alignment	Meets benchmark expectations.
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	Mindset is directly addressed in the TE.

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	3 - Fair Alignment	Evidence not found directly in the student edition. But there is evidence in teacher edition.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	3 - Fair Alignment	Fluency development is rudimentary. Would like to see incorporation of dot cards, number recognition/fluency games.

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	4 - Good Alignment	Evidence exists in TE with share and show opportunities.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	3 - Fair Alignment	Models logical progression and provides students opportunities to draw own conclusions, but does not explicitly instruct patterns/connections.

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Checks are dependent on adult assistance. Little evidence to promote student self checks.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Real world exploration/models are used.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	2 - Poor Alignment	Opportunities exist to cite models in

			discussion, but it is superficial practice.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	Could use more vocabulary development practice.
ELA.K12.EE.3.1	Make inferences to support comprehension.	2 - Poor Alignment	Need additional assistance in TE to help teachers see opportunities for making inferences.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	2 - Poor Alignment	Need additional assistance in TE to help teachers see opportunities for collaboration.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	2 - Poor Alignment	Would be rated higher if there were opportunities for student self assessment/quality work checks were included within each lesson instead of an appendix.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Provides opportunities for student speaking but provides little guidance on how teachers can make this happen.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Basic assistance provided for Multilingual students.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	2 - Poor Alignment	Most supports focus on provided visuals for learning.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Topics are aligned, but is less aligned to MTRs and EEs.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Topics and skills are appropriate for K.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Materials are appropriate for classroom instruction.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Content and practice is sufficient.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	Additional open ended practice would increase this rating.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Content is appropriate of K.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	150 days provides time for instruction and practice.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Expertise is verified.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Expertise contributes to the content. Research excerpts provided in the TE.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No typographical or visual error detected.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Content is free of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include	4 - Good Alignment	Math best practices are represented.

prevailing theories, concepts, standards, and models used with the subject area).		
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Content does not appear to have mistakes or inconsistencies.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Best practices are up to date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Content is relevant and appropriate.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	K students would be engaged with the content.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content is broad enough to appeal to a wide audience.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	3 - Fair Alignment	Limited interdisciplinary content is presented.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	There are limited opportunities for multicultural representation. However, the representations are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Material is appropriate for K.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Benchmarks are accurately covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of	4 - Good Alignment	All pieces are present (ELL/differentiation/remediation/enrichment/student

the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.		hands on practice) but all elements could use additional practices. Many items repeated throughout the TE.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Tools align well through SE, TE and online supports.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	There is a clear system of organization that logically advances student understanding.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Materials are all able to be accessed by K. Could increase vocabulary development to better advance student literacy in math.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	There are multiple opportunities for students to practice given benchmarks with the exception of the measurement unit.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	Content is presented through multiple modalities and at times offers student choice in response to understanding.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Presentation is appealing to K students and logically organized for teacher delivery.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Content includes opportunities for self expression and scaffolded levels of practice to encourage success.

2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	The measurement unit is thin and does not explore the benchmarks in depth.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Content includes benchmarks and student "I can" statements.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	TE includes multiple opportunities for concept development, differentiation support, and common student misconceptions.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Support provided for differentiation, language development, and ELL support.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Each lesson includes hands on student practice.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The 5E's lesson structure support active student participation. Although some connection to the 5 Es is superficial.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Best practices are evident in differentiation, scaffolding, common misconceptions are provided in TE.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Differentiation, scaffolding, common misconceptions are connected to the student skill being practiced.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Differentiation, scaffolding, common misconceptions are provided in TE.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Formative and summative assessments are provided.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	Submissions are mainly focused on paper/pencil or interview

		responses. But does include iTools as an option.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	It is most evident in TE instead of SE and requires the teacher to be diligent in implementing this application.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	The learner is appropriately scaffolded with opportunities for enrichment/intervention.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT not evident in SE or TE.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	CRT not evident in SE or TE.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	CRT not evident in SE or TE.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	3 - Fair Alignment	The section "supporting all learners" contains references to peoples/cultures/equity in the TE.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material is mostly aligned with the B.E.S.T Math Standards. The material was visually engaging and connections to real-life found throughout the lessons. The lessons are very basic and allow for students to understand the foundations of these various mathematical concepts. The three stages of fluency included in every lesson will help children develop automaticity while learning concepts. The data driven instruction suggestions for interventions will help teachers address the varied learning levels in their classrooms.

The language routines will encourage students to develop mathematical accountable talk. The lesson checks are also a great tool for teachers to use to determine level of understanding after a lesson. More informal checks for understanding throughout the lesson would be great. These would allow the teachers to gauge learning so the lesson check isn't the first determination of understanding. This is more of an instructional delivery and planning concern than it is a material concern. Based on what I've viewed, this material is an effective teaching/learning tool.

Standard	Description	Reviewer Rating	Rating Justification
MA.K.AR.1.1	For any number from 1 to 9, find the number that makes 10 when added to the given number.	4 - Good Alignment	making combinations of numbers and counting through 9
MA.K.AR.1.2	Given a number from 0 to 10, find the different ways it can be represented as the sum of two numbers.	4 - Good Alignment	count and tell how many, quantities gradually increase to 20, within standard
MA.K.AR.1.3	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	4 - Good Alignment	real world situations to represent the problems, listening comprehension also needed
MA.K.AR.2.1	Explain why addition or subtraction equations are true using objects or drawings.	4 - Good Alignment	objects and drawings used to model addition or subtraction equations, allows for practice of this skill
MA.K.DP.1.1	Collect and sort objects into categories and compare the categories by counting the objects in each category. Report the results verbally, with a written numeral or with drawings.	5 - Very Good Alignment	all tasks align with standard, allows for sorting into different categories, and writing results with numerals or drawings. Included

			the categories of curved and not curved, basis for understanding attributes of 2-D figures. Numerous practice activities to build a solid understanding
MA.K.GR.1.1	Identify two- and three-dimensional figures regardless of their size or orientation. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	additional shapes on page 674 that allow students to identify triangles and non-triangles,
MA.K.GR.1.2	Compare two-dimensional figures based on their similarities, differences and positions. Sort two-dimensional figures based on their similarities and differences. Figures are limited to circles, triangles, rectangles and squares.	4 - Good Alignment	aligned and also incorporates location/position words
MA.K.GR.1.3	Compare three-dimensional figures based on their similarities, differences and positions. Sort three-dimensional figures based on their similarities and differences. Figures are limited to spheres, cubes, cones and cylinders.	5 - Very Good Alignment	within limits of standards, variety of context for practice
MA.K.GR.1.4	Find real-world objects that can be modeled by a given two- or three-dimensional figure. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Real-world connection to 3-D objects present.
MA.K.GR.1.5	Combine two-dimensional figures to form a given composite figure. Figures used to form a composite shape are limited to triangles, rectangles and squares.	5 - Very Good Alignment	All shapes used throughout are within the benchmark.
MA.K.M.1.1	Identify the attributes of a single object that can be measured such as length, volume or weight.	5 - Very Good Alignment	hands on practice for measurable attributes

MA.K.M.1.2	Directly compare two objects that have an attribute which can be measured in common. Express the comparison using language to describe the difference.	5 - Very Good Alignment	allows for comparison using standard and non-standard units of measure
MA.K.M.1.3	Express the length of an object, up to 20 units long, as a whole number of lengths by laying non-standard objects end to end with no gaps or overlaps.	5 - Very Good Alignment	allows for students to count and write amounts, practicing two skills at once
MA.K.NSO.1.1	Given a group of up to 20 objects, count the number of objects in that group and represent the number of objects with a written numeral. State the number of objects in a rearrangement of that group without recounting.	5 - Very Good Alignment	counting and writing, incorporates problem solving
MA.K.NSO.1.2	Given a number from 0 to 20, count out that many objects.	4 - Good Alignment	Practice of counting out objects to 20, amount slowly increases.
MA.K.NSO.1.3	Identify positions of objects within a sequence using the words "first," "second," "third," "fourth" or "fifth."	4 - Good Alignment	ordinal numbers allowing for sequence practice
MA.K.NSO.1.4	Compare the number of objects from 0 to 20 in two groups using the terms less than, equal to or greater than.	4 - Good Alignment	real-world examples for comparing numbers
MA.K.NSO.2.1	Recite the number names to 100 by ones and by tens. Starting at a given number, count forward within 100 and backward within 20.	4 - Good Alignment	could've included more practice on missing numbers in a sequence as they count to 100
MA.K.NSO.2.2	Represent whole numbers from 10 to 20, using a unit of ten and a group of ones, with objects, drawings and expressions or equations.	4 - Good Alignment	Numbers represented tens and ones (units isn't present such as 1 ten and 2 ones)
MA.K.NSO.2.3	Locate, order and compare numbers from 0 to 20 using the number line and terms less than, equal to or greater than.	4 - Good Alignment	Use of number line throughout allows students to learn order of numbers differently

MA.K.NSO.3.1	<p>Explore addition of two whole numbers from 0 to 10, and related subtraction facts.</p>	<p>5 - Very Good Alignment</p>	<p>Students are exploring these operations not mastering them, the practice provided gives context to these operations so young children can fully understand them</p>
MA.K.NSO.3.2	<p>Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.</p>	<p>3 - Fair Alignment</p>	<p>Practice with equal sign at the beginning and end of the equations, this standard calls for using related facts with procedural reliability; however, there isn't much of this present. All of this practice requires them to add or subtract but not make the connection between the fact family.</p>
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 	<p>5 - Very Good Alignment</p>	<p>Encourages engagement will working the problems and perseverance</p>
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p>	<p>3 - Fair Alignment</p>	<p>Not much evidence of representing problems in multiple ways. Most of the activities</p>

	<p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		<p>require them to count and write the quantity, but that doesn't mean the students are representing in multiple ways. An example of this would be if the teacher told the students to draw 7 ladybugs then write the number.</p>
<p>MA.K12.MTR.3.1</p>	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	<p>5 - Very Good Alignment</p>	<p>Choice in how to solve the problems</p>
<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p>	<p>4 - Good Alignment</p>	<p>Encourages discussion of content, helps to build mathematical conversation</p>

	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>Different ways to make a number can help students see patterns, more practice needed</p>
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. 	<p>3 - Fair Alignment</p>	<p>These tasks are focusing on exploring addition and subtraction but providing practice with start unknown and change unknown. They really aren't requiring students to</p>

	<ul style="list-style-type: none"> • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		determine reasonableness.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	models used, real world connection
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Students have to justify reasoning, builds math vocabulary
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	I don't see the connection to understanding grade level complex text proficiently.
ELA.K12.EE.3.1	Make inferences to support comprehension.	3 - Fair Alignment	Don't see the connection to making inferences within these tasks
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	More of an instructional delivery issue

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	Allows for quality work to be created
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Tasks appropriate, but this cannot be determined by this material
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Connection needed to be successful is present
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	Can't be determined by the material, but opportunities are present

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Only minor issues identified, overall alignment to the grade level standards present
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Content written to correct skill levels.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Delivery of instruction will be more impactful to close the minor deficiencies found in this material
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	Significant details for students to understand the topics
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Complexity matches the standards
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Content matches the ability of kindergarten students

7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Cannot be determined by this material
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Primary and secondary sources reflect expert information
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	High level of quality in this material
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No visual or typographical errors found
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No biases or contradictions found
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content represents the discipline and includes real-world connections
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Material is factually accurate
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Up to date material
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Practice tasks throughout are relevant and appropriate for kindergarten.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Appropriate for intended learners
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Most practice includes real-life connections so students can construct meaning.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Connection between math and life will be made meaningful to students

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Multicultural representation throughout
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	People and animals are represented with humanity and compassion
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	The benchmarks are covered by this material

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Teacher won't have to prepare additional material; however, the teacher will need to understand the content to deliver it effectively.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components aligned with curriculum and each other
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Material is organized very well
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Material is easy to read, understand, and deliver
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Pacing seem appropriate, but this cannot be fully determined by any material
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Presentation, navigation, and tools are easy to use

7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	Visually engaging, easy to understand and follow, numerous opportunities for practice at appropriate points in the activities.
---	-------------------------	--

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Highly engaging format
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	important concepts focused on
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Easy to understand the benchmarks and horizontal alignment addressed in each lesson.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	guidance and support for students provided
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	This is very good alignment but will still require teachers to have an understanding of how to scaffold learning for students who need additional support.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	active participation encouraged
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	material organized in logical format
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	instructional strategies will be successful
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	strategies are effective in teaching outcomes, this is a delivery concern

10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	assessment strategies and desired outcomes correlated
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	learner's performance can be assessed with regards to targeted outcomes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	needs of all learners considered
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	There was an attempt, but evidence did not align with all practices being present in material.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	learning requirements satisfied with this material

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	non present
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	non present
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	non present
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	non present

Reviewer's Name: Emily Hancock

Title: HMH Florida's B.E.S.T. Go Math!

Publisher: Houghton Mifflin Harcourt

Course: [Grade Two Mathematics](#)

Bid ID: 456

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	No
How would you rate the overall usability of the instructional material?	3 - Fair Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	The materials presented do address all of the benchmarks, There is sufficient student practice and most topics move from concrete to abstract practice for students. The content is lacking in embedding the MRT's into the benchmarks. It also has limited horizontal alignment and some topics are only lightly covered. Finally, the incorporation of the critical thinking skills to promote advanced thinking is sparse.

Standard	Description	Reviewer Rating	Rating Justification
MA.2.AR.1.1	Solve one- and two-step addition and subtraction real-world problems.	4 - Good Alignment	Meets the benchmark. Focuses heavily on bar models, but does allow for open exploration.
MA.2.AR.2.1	Determine and explain whether equations involving addition and subtraction are true or false.	4 - Good Alignment	Meets benchmark. Provides a lot of practice. Would have like to see some additional conceptual understanding built into the initial practice.
MA.2.AR.2.2	Determine the unknown whole number in an addition or subtraction equation, relating three or four whole numbers, with the unknown in any position.	4 - Good Alignment	Taught with MA.2.AR.2.1 & A.R.1.1-Multiple opportunities for students to practice. Would have liked to see several visual representations including and varied practice.
MA.2.AR.3.1	Represent an even number using two equal groups or two equal addends. Represent an odd number using two equal groups with one left over or two equal addends plus 1.	4 - Good Alignment	Meets the benchmark. Good visual representations. Would have liked to see student checks for understanding include more variety including select all/open ended questions/correct incorrect answers.
MA.2.AR.3.2	Use repeated addition to find the total number of objects in a collection of equal groups. Represent the total number of objects using rectangular arrays and equations.	3 - Fair Alignment	Abstract seems to precede concrete representation in the instruction.

MA.2.DP.1.1	Collect, categorize and represent data using tally marks, tables, pictographs or bar graphs. Use appropriate titles, labels and units.	4 - Good Alignment	Meets benchmark. Missed opportunities to align this benchmark with others.
MA.2.DP.1.2	Interpret data represented with tally marks, tables, pictographs or bar graphs including solving addition and subtraction problems.	4 - Good Alignment	Meets expectation of the benchmark
MA.2.FR.1.1	Partition circles and rectangles into two, three or four equal-sized parts. Name the parts using appropriate language, and describe the whole as two halves, three thirds or four fourths.	5 - Very Good Alignment	Benchmark expectation is met with ample student practice.
MA.2.FR.1.2	Partition rectangles into two, three or four equal-sized parts in two different ways showing that equal-sized parts of the same whole may have different shapes.	5 - Very Good Alignment	Benchmark expectation is met with ample student practice.
MA.2.GR.1.1	Identify and draw two-dimensional figures based on their defining attributes. Figures are limited to triangles, rectangles, squares, pentagons, hexagons and octagons.	4 - Good Alignment	Meets benchmark with guided student practice.
MA.2.GR.1.2	Categorize two-dimensional figures based on the number and length of sides, number of vertices, whether they are closed or not and whether the edges are curved or straight.	4 - Good Alignment	Meets benchmark with guided student practice.
MA.2.GR.1.3	Identify line(s) of symmetry for a two-dimensional figure.	4 - Good Alignment	Meets benchmark standard - missed opportunity to align to GR 1.2/1.3
MA.2.GR.2.1	Explore perimeter as an attribute of a figure by placing unit segments along the boundary without gaps or overlaps. Find perimeters of rectangles by counting unit segments.	4 - Good Alignment	Meets benchmark standard - missed opportunity to align to GR 1.2/1.3
MA.2.GR.2.2	Find the perimeter of a polygon with whole-number side lengths. Polygons are limited to triangles, rectangles, squares and pentagons.	3 - Fair Alignment	Could use additional student practice.
MA.2.M.1.1	Estimate and measure the length of an object to the nearest inch, foot, yard, centimeter or	4 - Good Alignment	Meets benchmark. Would have like to see

	meter by selecting and using an appropriate tool.		more integration with A.R. benchmarks.
MA.2.M.1.2	Measure the lengths of two objects using the same unit and determine the difference between their measurements.	4 - Good Alignment	Meets benchmark expectations.
MA.2.M.1.3	Solve one- and two-step real-world measurement problems involving addition and subtraction of lengths given in the same units.	2 - Poor Alignment	Missing two step problem practice.
MA.2.M.2.1	Using analog and digital clocks, tell and write time to the nearest five minutes using a.m. and p.m. appropriately. Express portions of an hour using the fractional terms half an hour, half past, quarter of an hour, quarter after and quarter til.	4 - Good Alignment	Meets benchmark expectations. Could use more practice.
MA.2.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving either dollar bills within \$100 or coins within 100¢ using \$ and ¢ symbols appropriately.	4 - Good Alignment	Meets benchmark expectations but could use more practice identifying appropriate use of dollar and cent signs.
MA.2.NSO.1.1	Read and write numbers from 0 to 1,000 using standard form, expanded form and word form.	4 - Good Alignment	Meets benchmark could use more student practice in writing in expanded form.
MA.2.NSO.1.2	Compose and decompose three-digit numbers in multiple ways using hundreds, tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Meets benchmark using traditional modeling methods.
MA.2.NSO.1.3	Plot, order and compare whole numbers up to 1,000.	5 - Very Good Alignment	Good alignment to the benchmark and allows for open ended student practice.
MA.2.NSO.1.4	Round whole numbers from 0 to 100 to the nearest 10.	3 - Fair Alignment	instructs according to the benchmark, but includes very little student practice.

MA.2.NSO.2.1	Recall addition facts with sums to 20 and related subtraction facts with automaticity.	4 - Good Alignment	Includes explicit instruction of strategies for procedural fluency
MA.2.NSO.2.2	Identify the number that is ten more, ten less, one hundred more and one hundred less than a given three-digit number.	3 - Fair Alignment	Instructs according to the benchmark but has limited modeling and student practice.
MA.2.NSO.2.3	Add two whole numbers with sums up to 100 with procedural reliability. Subtract a whole number from a whole number, each no larger than 100, with procedural reliability.	4 - Good Alignment	Includes explicit instruction of strategies for procedural fluency
MA.2.NSO.2.4	Explore the addition of two whole numbers with sums up to 1,000. Explore the subtraction of a whole number from a whole number, each no larger than 1,000.	4 - Good Alignment	Meets benchmark expectation with a heavy reliance on base ten blocks.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	This benchmark must be inferred from the TE and SE.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p>	4 - Good Alignment	Appropriate use of modeling and hands on practice.

	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Strategies are explicitly taught and spiraled throughout the curriculum.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. 	2 - Poor Alignment	TE is lacking in opportunities to promote mathematical discussion

	<ul style="list-style-type: none"> • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	2 - Poor Alignment	TE is lacking in opportunities to promote mathematical discussion
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. 	3 - Fair Alignment	TE is lacking in opportunities to promote mathematical discussion

	<ul style="list-style-type: none"> Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Multiple opportunities for real world application
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	TE is lacking in opportunities to promote mathematical discussion
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Word problems are appropriate for 2nd grade students.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Strategies are taught to teach word problem comprehension.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	TE is lacking in opportunities to promote mathematical discussion
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	2 - Poor Alignment	Would benefit from rubrics for student self assessments.

ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Language and speaking included in TE but is sparse.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Multilingual support provided in TE.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	Would benefit from more guided questions/question stems for ELLs.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Overall, the benchmarks are covered. However, the MRTs are sparse and horizontal alignment is lacking.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	The content is consistent with 2nd grade expectations.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	There is an ease of use.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	Sections include appropriate amounts of modeling/student practice. However, some topics are lightly covered.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Complexity is appropriate except for 2 step word problems.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Difficulty is appropriate for 2nd grade students.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Most of content matches appropriate time period, but

		some topics could use additional time. ie. rounding.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Experts are qualified.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Experts are qualified.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	No typographical errors found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Instructional best practices are evident.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No erros found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Best practices are evident.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	All content is appropriate.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content matches 2nd grade interest levels.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Real world connections are evident.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	3 - Fair Alignment	Interdisciplinary connections are shown in the TE, but are sparse.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and	3 - Fair Alignment	Multiculturalism is relegate to names in story problems.

various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).		
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No violations of this criteria.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	Overall, the benchmarks are covered. However, the MRTs are sparse and horizontal alignment is lacking.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	Includes PD/guided questions/extension activities, but they are generic and sometimes repetitive.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	TE and SE are appropriately aligned.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	Presentation of material is expected and consistent.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Writing and illustrations support each other.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Pacing is appropriate in most instances. Some topics need additional time.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	UDL appears limited to technology pieces of the program.

7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	In general meets expectations but could use additional UDL and teacher PD supports.
---	--------------------	---

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Appropriate amounts of book work/hands on practice is included.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	Content focuses on benchmarks, but does not provide enough practice or horizontal alignment for some topics (rounding/two step word problems).
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	I can student statements and vertical alignment included in TE.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Significant student practice is included, but needs to include additional higher order thinking skills including error analysis and open ended responses.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	2 - Poor Alignment	TE guidance and support is generic and repetitive.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Student practice and hands on practice included to get from concrete to abstract work.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Student practice and hands on practice included to get from concrete to abstract work.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Best practices used in instructional methods.

9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Best practices used in instructional methods.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Lesson and unit checks included in the curriculum.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	Spiral reviews included as well as chapter/unit assessments. Could be enhanced through additional performance tasks/discussion checklists/open ended responses.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	2 - Poor Alignment	Student submissions are generally limited to paper/pencil "expected" responses of drawings or numbers.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	2 - Poor Alignment	Does not include a comprehensive resource/check of MTRs.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	Instruction and teacher support is sufficient. However, curriculum is limited on UDL principles and MTR application.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No CRT present
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No CRT present
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No social justice present
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	3 - Fair Alignment	Attempts at multicultural teaching is evident. Ex. - types

		of housing for different groups of people.

Edition: N/A

Grade Level: K-5

Course: [Grade Two Mathematics](#)

Bid ID: 456

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	5 - Very Good Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	Overall the material is appropriate. The biggest issues are the lack of resources for Access Points students and the limited assessment. The exit ticket is included in the student workbook, but on the homework pages. Not all resources are easy to locate.

Standard	Description	Reviewer Rating	Rating Justification
MA.2.AR.1.1	Solve one- and two-step addition and subtraction real-world problems.	5 - Very Good Alignment	full alignment to the standard
MA.2.AR.2.1	Determine and explain whether equations involving addition and subtraction are true or false.	5 - Very Good Alignment	full alignment to the standard
MA.2.AR.2.2	Determine the unknown whole number in an addition or subtraction equation, relating three or four whole numbers, with the unknown in any position.	5 - Very Good Alignment	full alignment to the standard
MA.2.AR.3.1	Represent an even number using two equal groups or two equal addends. Represent an odd number using two equal groups with one left over or two equal addends plus 1.	5 - Very Good Alignment	full alignment to the standard, visual and practice of what odd and even means.
MA.2.AR.3.2	Use repeated addition to find the total number of objects in a collection of equal groups. Represent the total number of objects using rectangular arrays and equations.	5 - Very Good Alignment	full alignment to the benchmark, practice from equal groups to arrays
MA.2.DP.1.1	Collect, categorize and represent data using tally marks, tables, pictographs or bar graphs. Use appropriate titles, labels and units.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.DP.1.2	Interpret data represented with tally marks, tables, pictographs or bar graphs including solving addition and subtraction problems.	5 - Very Good Alignment	full alignment to the benchmark, practice with different types of data displays
MA.2.FR.1.1	Partition circles and rectangles into two, three or four equal-sized parts. Name the parts using appropriate language, and describe the whole as two halves, three thirds or four fourths.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.FR.1.2	Partition rectangles into two, three or four equal-sized parts in two different ways showing that equal-sized parts of the same whole may have different shapes.	5 - Very Good Alignment	full alignment to the benchmark

MA.2.GR.1.1	Identify and draw two-dimensional figures based on their defining attributes. Figures are limited to triangles, rectangles, squares, pentagons, hexagons and octagons.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.GR.1.2	Categorize two-dimensional figures based on the number and length of sides, number of vertices, whether they are closed or not and whether the edges are curved or straight.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.GR.1.3	Identify line(s) of symmetry for a two-dimensional figure.	4 - Good Alignment	full alignment, but opportunities for students to practice hands-on can be added
MA.2.GR.2.1	Explore perimeter as an attribute of a figure by placing unit segments along the boundary without gaps or overlaps. Find perimeters of rectangles by counting unit segments.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.GR.2.2	Find the perimeter of a polygon with whole-number side lengths. Polygons are limited to triangles, rectangles, squares and pentagons.	5 - Very Good Alignment	full alignment
MA.2.M.1.1	Estimate and measure the length of an object to the nearest inch, foot, yard, centimeter or meter by selecting and using an appropriate tool.	5 - Very Good Alignment	full alignment and numerous opportunities to practice
MA.2.M.1.2	Measure the lengths of two objects using the same unit and determine the difference between their measurements.	5 - Very Good Alignment	aligned
MA.2.M.1.3	Solve one- and two-step real-world measurement problems involving addition and subtraction of lengths given in the same units.	4 - Good Alignment	aligned, but more practice on solving one step then into two steps
MA.2.M.2.1	Using analog and digital clocks, tell and write time to the nearest five minutes using a.m. and p.m. appropriately. Express portions of an hour using the fractional terms half an hour, half past, quarter of an hour, quarter after and quarter til.	5 - Very Good Alignment	full alignment

MA.2.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving either dollar bills within \$100 or coins within 100¢ using \$ and ¢ symbols appropriately.	5 - Very Good Alignment	full alignment, both sides of the coins used in practice problems
MA.2.NSO.1.1	Read and write numbers from 0 to 1,000 using standard form, expanded form and word form.	5 - Very Good Alignment	full alignment
MA.2.NSO.1.2	Compose and decompose three-digit numbers in multiple ways using hundreds, tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	5 - Very Good Alignment	full alignment
MA.2.NSO.1.3	Plot, order and compare whole numbers up to 1,000.	5 - Very Good Alignment	full alignment
MA.2.NSO.1.4	Round whole numbers from 0 to 100 to the nearest 10.	5 - Very Good Alignment	full alignment, but more practice of identifying the entire range of numbers that will round to a particular 10
MA.2.NSO.2.1	Recall addition facts with sums to 20 and related subtraction facts with automaticity.	4 - Good Alignment	fluency included but not integrated throughout
MA.2.NSO.2.2	Identify the number that is ten more, ten less, one hundred more and one hundred less than a given three-digit number.	4 - Good Alignment	aligned
MA.2.NSO.2.3	Add two whole numbers with sums up to 100 with procedural reliability. Subtract a whole number from a whole number, each no larger than 100, with procedural reliability.	5 - Very Good Alignment	aligned
MA.2.NSO.2.4	Explore the addition of two whole numbers with sums up to 1,000. Explore the subtraction of a whole number from a whole number, each no larger than 1,000.	5 - Very Good Alignment	fully aligned
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	5 - Very Good Alignment	aligned and opportunities present

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	aligned and opportunities present
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	5 - Very Good Alignment	aligned ad opportunities present

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	opportunities throughout for academic discourse
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	5 - Very Good Alignment	opportunities throughout

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	opportunities throughout
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Real-world connections and applications throughout

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	aligned
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	aligned
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	aligned
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	opportunities throughout
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	aligned
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	aligned
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	aligned
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	ELL support provided, more languages needed

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	full alignment
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	full alignment

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Adaptable for classroom instruction, supplemental items will still be needed
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	aligned
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	aligned
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	matches grade level ability
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	adequate amount of time to teach
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	aligned
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	aligned
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	accurate content and not errors notice
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	content accurate and free of bias
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	aligned
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	content factual and free of mistakes and inconsistencies
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	up to date content

15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	presented in an appropriate manner
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	relevant content
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	life connections
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	content is meaningful for students
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	multicultural representation
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	living things portrayed with compassion
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	content of benchmarks covered in material

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	resources comprehensive
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	all components aligned
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	materials consistent
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in	5 - Very Good Alignment	readability appropriate

understanding of the content at a level appropriate to the students' abilities.		
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	pacing appropriate
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	material allows for all to access content
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	material presented in an organized manner

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	some motivational strategies present
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	aligned
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	explicit instruction statements and outcomes present
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	materials provide guidance
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	support adaptable
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	active participation included
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	logical extensions present

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	targeted instructional strategies present
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	targeted instructional strategies effective for targeted outcomes
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessment strategies lacking
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	good alignment
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	the needs of most learners considered, not access points
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	appropriate application
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	learning requirements satisfied

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	none found
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	none found
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	none found
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	none found

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Standard

Rating

Rating Justification

MA.2.AR.1.1	Solve one- and two-step addition and subtraction real-world problems.	5 - Very Good Alignment	Students practice many multi-step word problems that are relevant.
MA.2.AR.2.1	Determine and explain whether equations involving addition and subtraction are true or false.	3 - Fair Alignment	Students are solving these problems, but do not have the area to explain why they are true or false.
MA.2.AR.2.2	Determine the unknown whole number in an addition or subtraction equation, relating three or four whole numbers, with the unknown in any position.	5 - Very Good Alignment	Word problems and equations are used to find the unknown in any position.
MA.2.AR.3.1	Represent an even number using two equal groups or two equal addends. Represent an odd number using two equal groups with one left over or two equal addends plus 1.	5 - Very Good Alignment	Students practice this benchmark with manipulatives, pictures, etc.
MA.2.AR.3.2	Use repeated addition to find the total number of objects in a collection of equal groups. Represent the total number of objects using rectangular arrays and equations.	5 - Very Good Alignment	Students use pictures and equations to practice this benchmark.
MA.2.DP.1.1	Collect, categorize and represent data using tally marks, tables, pictographs or bar graphs. Use appropriate titles, labels and units.	5 - Very Good Alignment	Students represent data using all the correct types of charts and graphs.
MA.2.DP.1.2	Interpret data represented with tally marks, tables, pictographs or bar graphs including solving addition and subtraction problems.	5 - Very Good Alignment	Students use addition and subtraction while interpreting data.
MA.2.FR.1.1	Partition circles and rectangles into two, three or four equal-sized parts. Name the parts using appropriate language, and describe the whole as two halves, three thirds or four fourths.	5 - Very Good Alignment	The curriculum using the correct terms to identify the portions.
MA.2.FR.1.2	Partition rectangles into two, three or four equal-sized parts in two different ways showing that equal-sized parts of the same whole may have different shapes.	5 - Very Good Alignment	Students portion rectangles during the fractions section.

MA.2.GR.1.1	Identify and draw two-dimensional figures based on their defining attributes. Figures are limited to triangles, rectangles, squares, pentagons, hexagons and octagons.	5 - Very Good Alignment	The curriculum covers the correct shapes that match the benchmark.
MA.2.GR.1.2	Categorize two-dimensional figures based on the number and length of sides, number of vertices, whether they are closed or not and whether the edges are curved or straight.	5 - Very Good Alignment	The attributes match the benchmark.
MA.2.GR.1.3	Identify line(s) of symmetry for a two-dimensional figure.	5 - Very Good Alignment	Students determine symmetry in many shapes.
MA.2.GR.2.1	Explore perimeter as an attribute of a figure by placing unit segments along the boundary without gaps or overlaps. Find perimeters of rectangles by counting unit segments.	5 - Very Good Alignment	Unit segments include cubes and a ruler.
MA.2.GR.2.2	Find the perimeter of a polygon with whole-number side lengths. Polygons are limited to triangles, rectangles, squares and pentagons.	5 - Very Good Alignment	The curriculum using the correct shapes to measure perimeter.
MA.2.M.1.1	Estimate and measure the length of an object to the nearest inch, foot, yard, centimeter or meter by selecting and using an appropriate tool.	5 - Very Good Alignment	Student measure using all of the units using, meter stick, cubes and a ruler.
MA.2.M.1.2	Measure the lengths of two objects using the same unit and determine the difference between their measurements.	5 - Very Good Alignment	Students use tools to measure and determine the differences in length.
MA.2.M.1.3	Solve one- and two-step real-world measurement problems involving addition and subtraction of lengths given in the same units.	5 - Very Good Alignment	Students use real world tools to measure objects.
MA.2.M.2.1	Using analog and digital clocks, tell and write time to the nearest five minutes using a.m. and p.m. appropriately. Express portions of an hour using the fractional terms half an hour, half past, quarter of an hour, quarter after and quarter til.	5 - Very Good Alignment	Student tell time in many ways using both types of clocks. Lesson 12.4 teaches students am and pm.

MA.2.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving either dollar bills within \$100 or coins within 100¢ using \$ and ¢ symbols appropriately.	5 - Very Good Alignment	Students solve real world problems using money. Some of the problems have them use more than one step.
MA.2.NSO.1.1	Read and write numbers from 0 to 1,000 using standard form, expanded form and word form.	5 - Very Good Alignment	Students represent a number in expanded form, word form and standard form. They use many methods to understand the concept.
MA.2.NSO.1.2	Compose and decompose three-digit numbers in multiple ways using hundreds, tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	5 - Very Good Alignment	Place value includes three digit numbers. Students represent it in many ways.
MA.2.NSO.1.3	Plot, order and compare whole numbers up to 1,000.	5 - Very Good Alignment	Student use the number line to plot, order and compare numbers.
MA.2.NSO.1.4	Round whole numbers from 0 to 100 to the nearest 10.	5 - Very Good Alignment	Number lines are used to help students with this concept.
MA.2.NSO.2.1	Recall addition facts with sums to 20 and related subtraction facts with automaticity.	5 - Very Good Alignment	Many lessons and methods help students practice this benchmark.
MA.2.NSO.2.2	Identify the number that is ten more, ten less, one hundred more and one hundred less than a given three-digit number.	5 - Very Good Alignment	Models and place value charts are used in the lesson.
MA.2.NSO.2.3	Add two whole numbers with sums up to 100 with procedural reliability. Subtract a whole number from a whole number, each no larger than 100, with procedural reliability.	5 - Very Good Alignment	Students solve these problems using real-world conceptions and equations.
MA.2.NSO.2.4	Explore the addition of two whole numbers with sums up to 1,000. Explore the	5 - Very Good Alignment	Many methods are used for students to

	subtraction of a whole number from a whole number, each no larger than 1,000.		explore this benchmark.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	There are areas to explain their thinking.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Students use many different manipulatives throughout the curriculum.
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	5 - Very Good Alignment	Students build fluency of concepts throughout the topics.

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>4 - Good Alignment</p>	<p>Math Talks are included in the lessons. This is an opportunity for students to have discussions.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p>	<p>5 - Very Good Alignment</p>	<p>Many areas involve students understanding a pattern.</p>

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	4 - Good Alignment	The explore section involves this MTR.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. 	4 - Good Alignment	The Problem of the Day, word problems and measurement lessons connect to real-world concepts.

	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	In independent practice and assessments, students need to explain their reasoning.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	The word problems and concepts allow for comprehension of grade level text.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	When estimating, students need to make inferences.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Throughout the lesson, students must listen to the directions and teaching.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Some of the space allows for students to create quality work.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Math talks help students practice this concept.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Math talks helps ELL students communicate with peers and teachers.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	Math talks helps ELL students communicate with peers and teachers.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	The curriculum aligns with the state's benchmarks.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	The skill level matches second grade learners.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	The materials are adaptable for every classroom. Students learn through multiple methods.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	The I can statements help students understand the significance.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The complexity matches the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	The complexity is aligned to the grade level, especially when students learn and use 3-digit numbers.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The pacing and flow is organized correctly.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	The information was portrayed in an expert manner.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	The sources align to the quality of the materials.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	All the links connected to the correct material needed for the benchmark.

11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	There was no notice of bias or contradictions.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	It matches the discipline.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	All of the material is factual.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	The content matches our new standards.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	The material is relevant to the benchmarks.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Most of the content is relevant to second graders.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Most of the content is connect to 2nd graders life and is meaningful.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Most of the content is meaningful and creates connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	The material is fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material was appropriate and portrays animals and people in the correct way.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	The benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	All of the activities and materials are provided through the curriculum.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	The topics and methods align to both.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The curriculum is organized in a way for students to learn concrete to abstract.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Visuals of the manipulatives are helpful to students. For example, there are visuals of place value cubes to help students learn 2-Digit and 3-Digit numbers.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	The pace is acceptable for the grade level and school year.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	ELL supports and common misconceptions are explained in each lesson.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The presentation requirements are great.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Different teaching styles are given as options.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The big ideas are thoroughly taught using different methods.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Outcomes are clear to the teacher and students through

		the standards written on each lesson and the I can statements for students.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Students are taught many methods and ways of solving problems to later choose which one works for them.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	"Ready for more" has students using different learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	There is some activities that involve movement and learning through the kinesthetic style.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	The materials are well organized.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	The lessons build from concrete to abstract.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	The methods teach to the targeted outcome.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	The students need to explain their thinking when completing the assessments.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	The assessments are aligned to the learning outcomes.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	The lessons adhere to all learning styles and provide ELL accommodations and remediation lessons.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The lessons align to all the benchmarks.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The learning requirements are met.
---	-------------------------	------------------------------------

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	The material prohibits CRT in all the instructional materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	It omits this way of teaching.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	It omits this subject.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	The SEL standards are not a focus in the curriculum.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The overall usability would be fairly easy for the average teacher to use. However, this would only garner average learning by the students. Using this textbook you would need a knowledgeable teacher to implement above and beyond what is written in the student and teacher editions to meet the Mathematical Thinking and Reasoning standards. A teacher could simply have students open to a Lesson/page in the book and read through the opening problem, solutions, and examples but this wouldn't mean the deep conversations and

explorations into the math are happening. The problems could be used for this, and some notes suggesting this are in the TE, but it will be up to how teachers use this product in their classrooms ultimately that will determine student success with the B.E.S.T. standards for mathematics.

Standard	Description	Reviewer Rating	Rating Justification
MA.3.AR.1.1	Apply the distributive property to multiply a one-digit number and two-digit number. Apply properties of multiplication to find a product of one-digit whole numbers.	5 - Very Good Alignment	From the evidence shared, meets the standard
MA.3.AR.1.2	Solve one- and two-step real-world problems involving any of four operations with whole numbers.	3 - Fair Alignment	In most of the lessons, the title of the lesson gives away the operation. Students should be using the context of the problem to determine the operation.
MA.3.AR.2.1	Restate a division problem as a missing factor problem using the relationship between multiplication and division.	4 - Good Alignment	From the two examples provided, seems aligned.
MA.3.AR.2.2	Determine and explain whether an equation involving multiplication or division is true or false.	2 - Poor Alignment	There is only one lesson given as an example, and in the lesson there are only a few practice problems relating this standard.
MA.3.AR.2.3	Determine the unknown whole number in a multiplication or division equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Only one lesson truly matched this standard, but the others listed could be considered as applying the standard in different situations

MA.3.AR.3.1	Determine and explain whether a whole number from 1 to 1,000 is even or odd.	4 - Good Alignment	This could have been met better by not talking about divisibility rules
MA.3.AR.3.2	Determine whether a whole number from 1 to 144 is a multiple of a given one-digit number.	4 - Good Alignment	Only one specific example was given, it seems to meet the standard, but not much practice with the standard
MA.3.AR.3.3	Identify, create and extend numerical patterns.	4 - Good Alignment	From the examples listed, seems to meet the standard
MA.3.DP.1.1	Collect and represent numerical and categorical data with whole-number values using tables, scaled pictographs, scaled bar graphs or line plots. Use appropriate titles, labels and units.	4 - Good Alignment	There are a lot of uses of tally charts, which is a 1st grade standard. All of the tally charts could have easily been tables
MA.3.DP.1.2	Interpret data with whole-number values represented with tables, scaled pictographs, circle graphs, scaled bar graphs or line plots by solving one- and two-step problems.	4 - Good Alignment	There are a lot of uses of tally charts, which is a 1st grade standard. All of the tally charts could have easily been tables
MA.3.FR.1.2	Represent and interpret fractions, including fractions greater than one, in the form of $\frac{\square}{n}$ as the result of adding the unit fraction $\frac{1}{n}$ to itself m times.	3 - Fair Alignment	No examples of fractions greater than one, too much use of "parts out of" terminology vs. talking about groups of unit fractions
MA.3.FR.1.3	Read and write fractions, including fractions greater than one, using standard form, numeral-word form and word form.	3 - Fair Alignment	From the examples shared, fair alignment, needs more models of fractions greater than one on a number line, and no examples of mixed numbers

MA.3.FR.2.1	Plot, order and compare fractional numbers with the same numerator or the same denominator.	3 - Fair Alignment	Should be more emphasis on using number lines and plotting fractions to order and compare according to the benchmark
MA.3.FR.2.2	Identify equivalent fractions and explain why they are equivalent.	4 - Good Alignment	Only two lessons, but seem aligned to benchmark
MA.3.GR.1.1	Describe and draw points, lines, line segments, rays, intersecting lines, perpendicular lines and parallel lines. Identify these in two-dimensional figures.	2 - Poor Alignment	The term right angle is used quite often, the benchmark calls for the terms square angle or square corner. Also more emphasis on lines, points, line segments, etc. in abstract pictures vs. with shapes. Box on page 741 is confusing, because it is 3D it skews the view of the angle.
MA.3.GR.1.2	Identify and draw quadrilaterals based on their defining attributes. Quadrilaterals include parallelograms, rhombi, rectangles, squares and trapezoids.	3 - Fair Alignment	Lesson 2 uses right angles and "less than" and "more than" right angles to classify shapes, this is 4th grade. Venn diagrams are not specifically mentioned until 5th grade standards.
MA.3.GR.1.3	Draw line(s) of symmetry in a two-dimensional figure and identify line-symmetric two-dimensional figures.	5 - Very Good Alignment	Examples meet the benchmark.
MA.3.GR.2.1	Explore area as an attribute of a two-dimensional figure by covering the figure with unit squares without gaps or overlaps. Find areas of rectangles by counting unit squares.	4 - Good Alignment	Defines area as the number of squares "inside" a figure rather than "covering" the figure. Lessons 3 & 4

			should be GR.2.2 as multiplication is used. GR.2.1 should be a connecting benchmark for Lessons 3 &4.
MA.3.GR.2.2	Find the area of a rectangle with whole-number side lengths using a visual model and a multiplication formula.	4 - Good Alignment	The GR.2.2 should be a connecting benchmark with Lessons 1, 2, & 5.
MA.3.GR.2.3	Solve mathematical and real-world problems involving the perimeter and area of rectangles with whole-number side lengths using a visual model and a formula.	4 - Good Alignment	Students should be encouraged to find their own formulas for perimeter, not given one.
MA.3.GR.2.4	Solve mathematical and real-world problems involving the perimeter and area of composite figures composed of non-overlapping rectangles with whole-number side lengths.	5 - Very Good Alignment	Examples shown meet the benchmark
MA.3.M.1.1	Select and use appropriate tools to measure the length of an object, the volume of liquid within a beaker and temperature.	2 - Poor Alignment	Line plots with fractions are no longer in 3rd grade.
MA.3.M.1.2	Solve real-world problems involving any of the four operations with whole-number lengths, masses, weights, temperatures or liquid volumes.	4 - Good Alignment	Problem solving involving measurement units should be whole numbers not fractions, there are a few word problems involving fractions.
MA.3.M.2.1	Using analog and digital clocks tell and write time to the nearest minute using a.m. and p.m. appropriately.	3 - Fair Alignment	The lesson on am/pm is a 2nd grade benchmark.
MA.3.M.2.2	Solve one- and two-step real-world problems involving elapsed time.	5 - Very Good Alignment	Examples given meet the benchmark.
MA.3.NSO.1.1	Read and write numbers from 0 to 10,000 using standard form, expanded form and word form.	5 - Very Good Alignment	Example given meets the benchmark

MA.3.NSO.1.2	Compose and decompose four-digit numbers in multiple ways using thousands, hundreds, tens and ones. Demonstrate each composition or decomposition using objects, drawings and expressions or equations.	5 - Very Good Alignment	Example given meets the benchmark
MA.3.NSO.1.3	Plot, order and compare whole numbers up to 10,000.	5 - Very Good Alignment	Examples given meets the benchmark
MA.3.NSO.1.4	Round whole numbers from 0 to 1,000 to the nearest 10 or 100.	4 - Good Alignment	Students should develop their own methods for rounding rather than be given a procedure such as on page 46. Rounding is an example of estimation, not the only way to estimate, students should not be told to round to certain place values when estimating sums and differences.
MA.3.NSO.2.1	Add and subtract multi-digit whole numbers including using a standard algorithm with procedural fluency.	4 - Good Alignment	The lessons show many different strategies for addition and subtraction, however they are all part of different lessons rather than comparing and contrasting the strategies and determining when one might be most efficient.
MA.3.NSO.2.2	Explore multiplication of two whole numbers with products from 0 to 144, and related division facts.	4 - Good Alignment	Only two lessons involving division models.
MA.3.NSO.2.3	Multiply a one-digit whole number by a multiple of 10, up to 90, or a multiple of 100, up to 900, with procedural reliability.	5 - Very Good Alignment	Examples meet the benchmark

MA.3.NSO.2.4	Multiply two whole numbers from 0 to 12 and divide using related facts with procedural reliability.	5 - Very Good Alignment	Examples meet the benchmark
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	3 - Fair Alignment	If used as the book shows, most of the thinking is done for the students in the examples. A teacher could use the problems without the book to engage in MTR.1.1
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	3 - Fair Alignment	The examples show different models or strategies, but there is not a lot of questions asking students to compare or find what is the same about them
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	3 - Fair Alignment	There are opportunities for

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		<p>students to demonstrate fluency, however they could just copy what is shown in the examples in the book. The teacher will need to talk to or ask the students to demonstrate their understanding.</p>
<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>3 - Fair Alignment</p>	<p>The opportunity is provided in the book, however it will be up to the teacher to facilitate these discussions.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p>	<p>3 - Fair Alignment</p>	<p>Most of these examples use patterns within the lesson, however they do not connect to prior times when students may use certain strategies,</p>

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		<p>such as connecting equal groups of single digit factors to future work with equal groups of 2- or 3-digit factors.</p>
<p>MA.K12.MTR.6.1</p>	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>4 - Good Alignment</p>	<p>There are decent opportunities for students to assess the methods from the book. The teacher will need to ensure students are also assessing each others' work.</p>

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	There seem to be an adequate amount of opportunities to meet this standard
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	The examples seem to meet the standard
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	The examples seem to meet the standard
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	The examples seem to meet the standard
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard

ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard
MA.3.FR.1.1	Represent and interpret unit fractions in the form $\frac{1}{n}$ as the quantity formed by one part when a whole is partitioned into n equal parts.	3 - Fair Alignment	Did not see many examples of fractions greater than one until the set fractions lesson, could use more examples of fractions on a number line when introducing fractions and unit fractions

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Mostly the lessons aligned with the standards for the grade level
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	There were a few lessons that seemed to align with different grade level, such as tally marks, fractions on line plots, use of Venn Diagrams, etc.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The problems in the lessons could be used for classroom use pretty much as is.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Most of the content seems aligned with the level
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Most of the content seems aligned with the level
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Most of the content seems aligned with the level

7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	The time period for teaching in a lesson and for the year should be possible
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	There are multiple examples of cited materials
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	The cited resources support content knowledge
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	I did not see any mistakes
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	I did not see any examples of this
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	I did not see anything that stood out
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	I did not see any mistakes
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Everything seemed up to date
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Everything seemed up to date
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	I do not know if children this age would be interested in all of the real-world examples, but they are standard for similar types of textbooks.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	I do not know if children this age would be interested in all of the real-world examples, but they are standard for similar types of textbooks.

18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	I do not know if children this age would be interested in all of the real-world examples, but they are standard for similar types of textbooks.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	I did not see any unfair or biased portrayals
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	I did not see any examples of this
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	In general, yes

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	With some adjustment the teacher could easily use what is in the book alone
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Seems pretty simple to choose materials to use
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The TE is simple to understand and the flow is simple
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Typical compared to other textbooks
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Seems to allow enough time for most standards, some such as rounding could use more time.

6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	There are suggested resources the teacher could utilize
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall, it is similar to pretty much all K-5 math textbooks available

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	Average for a textbook
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Follows the standards
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Clear instruction for the teachers
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Most of this work will need to be done by the teacher, but there are opportunities
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	There are many ways to adapt the resources in the teacher edition, it will be up to the teacher to do this
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	A teacher could adapt this to make it more engaging, but as it is, it is no more engaging than any other textbook
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	There are options for the teacher in the teacher edition
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Seem to be aligned to what the standards call for

9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Seem to be aligned to what the standards call for
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Many opportunities for varied assessment
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	The textbook clearly aligns outcomes with the assessment opportunities
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	There are suggestions in the teacher edition, onus would be on the teacher to make these adjustments
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	Again, it will be up to the teacher. As written I don't see the MTR's being met without interjection from the teacher
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	I would say this is an average textbook, nothing really stands out for the positive or the negative

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	Did not see any examples
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Did not see any examples
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Did not see any examples
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	Did not see any examples

Reviewer's Name: Stephanie Sharrer

Title: HMH Florida's B.E.S.T. Go Math!

Publisher: Houghton Mifflin Harcourt

Grade Level: K-5

Course: [Grade Three Mathematics](#)

Bid ID: 457

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Alignment to the benchmarks and the information provided in the benchmarks and clarifications is sometimes lacking, either not going far enough or going too far into the next grade level or content that is not necessary for the grade level. It follows a gradual release model and provides a lot of scaffolding for the average student.

Standard	Description	Reviewer Rating	Rating Justification
MA.3.AR.1.1	Apply the distributive property to multiply a one-digit number and two-digit number. Apply properties of multiplication to find a product of one-digit whole numbers.	3 - Fair Alignment	Distributive property for 1-digit by 2-digit numbers was not a focus of these lessons and there were no arrays in the multiply by 11 or 12 lesson to help students make sense of the purpose of the property and its usefulness
MA.3.AR.1.2	Solve one- and two-step real-world problems involving any of four operations with whole numbers.	3 - Fair Alignment	Provides 1 and 2 step word problems but does not provide different types of word problems according to the situations appendix in the BEST standards; mainly shows quotative division and not partitive division
MA.3.AR.2.1	Restate a division problem as a missing factor problem using the relationship between multiplication and division.	4 - Good Alignment	Hits the majority of the standard; very few problems extend to factors beyond 9
MA.3.AR.2.2	Determine and explain whether an equation involving multiplication or division is true or false.	3 - Fair Alignment	Hits the standard but only allows for minimal practice
MA.3.AR.2.3	Determine the unknown whole number in a multiplication or division equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	The unknowns in the equations are included in different spots, but none were seen as quotient = ___ divided by dividend
MA.3.AR.3.1	Determine and explain whether a whole number from 1 to 1,000 is even or odd.	2 - Poor Alignment	Only addresses even and odd when referring to patterns in addition or

			multiplication table, not identifying whether numbers by themselves are odd or even
MA.3.AR.3.2	Determine whether a whole number from 1 to 144 is a multiple of a given one-digit number.	4 - Good Alignment	Shows different ways of finding multiples and provides some word problem applications
MA.3.AR.3.3	Identify, create and extend numerical patterns.	4 - Good Alignment	Provides opportunities with patterns with different operations
MA.3.DP.1.1	Collect and represent numerical and categorical data with whole-number values using tables, scaled pictographs, scaled bar graphs or line plots. Use appropriate titles, labels and units.	4 - Good Alignment	Variety of graphs (some horizontal and others vertical); includes some scaled options
MA.3.DP.1.2	Interpret data with whole-number values represented with tables, scaled pictographs, circle graphs, scaled bar graphs or line plots by solving one- and two-step problems.	3 - Fair Alignment	Asks one and two step questions with different types of graphs; no circle graphs
MA.3.FR.1.2	Represent and interpret fractions, including fractions greater than one, in the form of $\frac{\square}{n}$ as the result of adding the unit fraction $\frac{1}{n}$ to itself m times.	4 - Good Alignment	Has students write fractions as a sum of unit fractions; provides models to support
MA.3.FR.1.3	Read and write fractions, including fractions greater than one, using standard form, numeral-word form and word form.	5 - Very Good Alignment	good practice naming and understanding fractions using different representations to bring meaning to what a fraction is
MA.3.FR.2.1	Plot, order and compare fractional numbers with the same numerator or the same denominator.	3 - Fair Alignment	minimal practice plotting fractions on a number line and using

			the number line to compare and order fractions
MA.3.FR.2.2	Identify equivalent fractions and explain why they are equivalent.	2 - Poor Alignment	many problems are asking students to generate equivalent fractions and are not focused on determining whether fractions are equivalent or not; number lines are not used in this process
MA.3.GR.1.1	Describe and draw points, lines, line segments, rays, intersecting lines, perpendicular lines and parallel lines. Identify these in two-dimensional figures.	2 - Poor Alignment	right angle is not a part of the benchmark and neither is naming these in a figure, just identifying them and describing them
MA.3.GR.1.2	Identify and draw quadrilaterals based on their defining attributes. Quadrilaterals include parallelograms, rhombi, rectangles, squares and trapezoids.	2 - Poor Alignment	right angle is not a part of the benchmark and neither is naming these in a figure, just identifying them and describing them; the intent of the benchmark is not venn diagrams of shapes
MA.3.GR.1.3	Draw line(s) of symmetry in a two-dimensional figure and identify line-symmetric two-dimensional figures.	3 - Fair Alignment	good practice identifying and drawing lines of symmetry, but goes beyond the scope of the benchmark by making students draw figures with lines of symmetry
MA.3.GR.2.1	Explore area as an attribute of a two-dimensional figure by covering the figure with unit squares without gaps or overlaps. Find areas of rectangles by counting unit squares.	3 - Fair Alignment	The first 2 lessons are decently aligned; focus more on area of irregular shapes than on area of rectangles;

			the last 2 lessons linked relate more to 3.GR.2.2
MA.3.GR.2.2	Find the area of a rectangle with whole-number side lengths using a visual model and a multiplication formula.	3 - Fair Alignment	gives students the opportunity to make sense of the area formula and use it to find the area of rectangles; goes beyond the clarifications of up to 12 x 12 rectangles
MA.3.GR.2.3	Solve mathematical and real-world problems involving the perimeter and area of rectangles with whole-number side lengths using a visual model and a formula.	2 - Poor Alignment	the intent of the benchmark is not to find missing side lengths; the problems go outside the clarification of up to 12 x 12 rectangles
MA.3.GR.2.4	Solve mathematical and real-world problems involving the perimeter and area of composite figures composed of non-overlapping rectangles with whole-number side lengths.	3 - Fair Alignment	some shapes are rectangles and ask students to make them composite shapes; many composite shapes have more than 2 parts, so there is not much practice for composite shapes made of 2 rectangles
MA.3.M.1.1	Select and use appropriate tools to measure the length of an object, the volume of liquid within a beaker and temperature.	2 - Poor Alignment	goes beyond the extent of the benchmark; fractions of cups, cups, pints, quarts, and gallons, weight of objects; does not have students measure to the nearest centimeter
MA.3.M.1.2	Solve real-world problems involving any of the four operations with whole-number	2 - Poor Alignment	goes beyond extent of benchmark; how many

	lengths, masses, weights, temperatures or liquid volumes.		1/2 cups are in 4 cups (dividing a whole number by a fraction); requires conversions to solve
MA.3.M.2.1	Using analog and digital clocks tell and write time to the nearest minute using a.m. and p.m. appropriately.	3 - Fair Alignment	students can tell and write time from an analog and a digital clock; they are expected to describe the time in words which seems to be beyond the extent of the benchmark; no practice on having a clock show a given time as shown in the B1G-M document
MA.3.M.2.2	Solve one- and two-step real-world problems involving elapsed time.	3 - Fair Alignment	not many opportunities to cross an hour when calculating elapsed time, but gives practice solving different types of time interval problems
MA.3.NSO.1.1	Read and write numbers from 0 to 10,000 using standard form, expanded form and word form.	4 - Good Alignment	practice with forms of numbers to 10,000
MA.3.NSO.1.2	Compose and decompose four-digit numbers in multiple ways using thousands, hundreds, tens and ones. Demonstrate each composition or decomposition using objects, drawings and expressions or equations.	3 - Fair Alignment	not too much practice writing expressions and equations for the decompositions
MA.3.NSO.1.3	Plot, order and compare whole numbers up to 10,000.	4 - Good Alignment	good practice plotting numbers; not as much practice using number lines to compare numbers
MA.3.NSO.1.4	Round whole numbers from 0 to 1,000 to the nearest 10 or 100.	4 - Good Alignment	shows rounding on a number line and has

			students practice rounding to estimate sums and differences
MA.3.NSO.2.1	Add and subtract multi-digit whole numbers including using a standard algorithm with procedural fluency.	3 - Fair Alignment	provides opportunities to add and subtract; does not relate strategies to bring meaning to the work
MA.3.NSO.2.2	Explore multiplication of two whole numbers with products from 0 to 144, and related division facts.	3 - Fair Alignment	includes different representations of multiplication (many more than are required by the benchmark), but gives practice for each modeling
MA.3.NSO.2.3	Multiply a one-digit whole number by a multiple of 10, up to 90, or a multiple of 100, up to 900, with procedural reliability.	5 - Very Good Alignment	good practice and visuals for multiplying by multiples of 10 or 100
MA.3.NSO.2.4	Multiply two whole numbers from 0 to 12 and divide using related facts with procedural reliability.	4 - Good Alignment	good practice using efficient strategies to multiply
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	3 - Fair Alignment	has some opportunities

MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	<p>3 - Fair Alignment</p>	<p>allows for multiple ways to solve problems, but doesn't always encourage building the connections between the strategies</p>
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	<p>2 - Poor Alignment</p>	<p>does not build on the different levels of fluency as discussed in the BEST standards</p>
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p>	<p>3 - Fair Alignment</p>	<p>has some opportunities</p>

	<p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>2 - Poor Alignment</p>	<p>does not focus on building connections to previously learned materials and relating current content to past information</p>
<p>MA.K12.MTR.6.1</p>	<p>Assess the reasonableness of solutions.</p>	<p>2 - Poor Alignment</p>	<p>reasonableness is not highlighted very much; could have easily used lessons on estimate</p>

	<p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		<p>sums and differences to show how rounding helps you assess the reasonableness</p>
<p>MA.K12.MTR.7.1</p>	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>3 - Fair Alignment</p>	<p>some problems relate to student interests where as others do not</p>
<p>ELA.K12.EE.1.1</p>	<p>Cite evidence to explain and justify reasoning.</p>	<p>2 - Poor Alignment</p>	<p>does not ask students to support with evidence</p>
<p>ELA.K12.EE.2.1</p>	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>3 - Fair Alignment</p>	<p>has some opportunities</p>
<p>ELA.K12.EE.3.1</p>	<p>Make inferences to support comprehension.</p>	<p>2 - Poor Alignment</p>	<p>has minimal opportunities</p>
<p>ELA.K12.EE.4.1</p>	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p>	<p>3 - Fair Alignment</p>	<p>has some opportunities</p>

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	has some opportunities
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	2 - Poor Alignment	has minimal opportunities
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	has some opportunities
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	has some opportunities
MA.3.FR.1.1	Represent and interpret unit fractions in the form $\frac{1}{n}$ as the quantity formed by one part when a whole is partitioned into n equal parts.	4 - Good Alignment	allows students to interpret the meaning of a unit fraction

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	depends on the benchmark; some are aligned well and others do not hit the intent of the benchmark and clarifications
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	depends on the benchmark; some are aligned well and others do not hit the intent of the benchmark and clarifications
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	can be implemented in the classroom with some changes necessary
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	some lessons provide sufficient details, but others need more
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	some benchmarks are better aligned to the intent of the

		benchmark and the instructional items in the B1G-M than others
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	the level of the lesson sometimes meets the student abilities and grade levels but sometimes do not match
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	some lessons need additional time for the difficulty of the benchmark
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	good information on content for teachers
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	good use of additional sources
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	no errors noticed
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	no bias seen
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	none seen
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	no issues in facts seen
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	decently up to date but lacks some of the current research on math fluency and not using the gradual release process
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	3 - Fair Alignment	some contexts are more relevant than others; some are outdated

16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	3 - Fair Alignment	some contexts are more relevant than others; some are outdated
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	3 - Fair Alignment	some contexts are more relevant than others; some are outdated
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	3 - Fair Alignment	at times brings in additional content areas
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	seems fair and unbiased
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	no issues seen
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	some times; there are discrepancies

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	some benchmarks are well taught and provide enough resources, while others would require quite a bit of additional teaching materials
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	3 - Fair Alignment	some issues with alignment
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	3 - Fair Alignment	at times the order does not make sense but for the most part seems reasonable for the course
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in	4 - Good Alignment	seem mostly engaging for a textbook

understanding of the content at a level appropriate to the students' abilities.		
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3 - Fair Alignment	some lessons are better chunked than others so some are more manageable at one time than others
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	seems to be easily used
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	3 - Fair Alignment	decent presentation

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	some elements will motivate and engage learners, but most appear as just a "boring workbook page"
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	some ideas are taught well and thoroughly but not all
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	clear statements of information and outcomes present
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	sometimes there is too much scaffolding that does not allow for students to be problem solvers
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	has options for reteach, enrichment, ESE, and ESOL
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	some elements will motivate and engage learners, but most appear as just a "boring workbook page"

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	some good activities to extend the content
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	some strategies that are effective but mostly older teaching styles
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	2 - Poor Alignment	too much scaffolding and gradual release instead of allowing students to persevere in problem solving
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	correlation seen
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	some assessment opportunities
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	considers many groups of students
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	some MTRs are integrated better than others
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	standard

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no CRT seen
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no CRT seen
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no CRT seen

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	none seen

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Standard	Description	Reviewer Rating	Rating Justification
----------	-------------	-----------------	----------------------

MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	4 - Good Alignment	good balance of remainder interpretation
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	5 - Very Good Alignment	fraction types are accurate as per benchmark
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	good use of real world problems
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	4 - Good Alignment	practice with true/false & explanations
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	good use of models
MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	4 - Good Alignment	0 and 1 not prime or composite - need better clarification of that
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	5 - Very Good Alignment	presented in a variety of ways
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Are they asked to collect any data?
MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	5 - Very Good Alignment	includes all types of data representation in benchmark
MA.4.DP.1.3	Solve real-world problems involving numerical data.	5 - Very Good Alignment	real world problems are realistic

MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	5 - Very Good Alignment	good use of models and real world examples
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	5 - Very Good Alignment	correct use of fraction types and denominators
MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	5 - Very Good Alignment	includes different types of models as well as how the numerator and denominator are affected
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than one, with different numerators and different denominators.	5 - Very Good Alignment	great number line use
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	5 - Very Good Alignment	objects, drawings, and equations included on one example to compare and reach all types of learners
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	4 - Good Alignment	little word form
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	4 - Good Alignment	lacking visual models
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	begins with unit fractions to extend previous understanding

MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	reflex angle illustrations are misleading
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	5 - Very Good Alignment	protractor use
MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	4 - Good Alignment	need more practice with unknown angle measure
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	4 - Good Alignment	missing practice with variable for missing side
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	5 - Very Good Alignment	real world examples - a chapter for each
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	5 - Very Good Alignment	temp in separate chapter
MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	5 - Very Good Alignment	time in separate chapter
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	4 - Good Alignment	no items with fractions
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	5 - Very Good Alignment	well done
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	4 - Good Alignment	begins with models

MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	5 - Very Good Alignment	stays within limits
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	5 - Very Good Alignment	includes number lines - stays within limits
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	5 - Very Good Alignment	stays within parameters set in benchmark
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	5 - Very Good Alignment	number line use
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	includes product first
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	taught multiple strategies
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	different strategies shared
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	multiple strategies
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	rounding in more than one lesson
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	5 - Very Good Alignment	ample practice
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	5 - Very Good Alignment	follows benchmark
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	many methods modeled

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	many types of models included throughout
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	4 - Good Alignment	not explicit, but implied use

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	In MathTalk
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	5 - Very Good Alignment	In MathTalk

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	In MathTalk
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	consistent real world applications and examples

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	many opportunities to explain
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	grade level text
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	some opportunity for this in launches
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	a lot of suggestions to discuss in teacher sections
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	clear instructions in teacher sections
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Launch Into sections
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Strategies for Multilingual Learners
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	SEL section

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	see alignment above
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	see alignment above
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	good balance of practice and instruction with spiral review and problem solving

4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	mostly
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	including most of the BIG M clarifications and instructional item types
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	test is on grade level
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Overall pacing is fair - considering progress monitoring and not FSA next year
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	yes
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	yes
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	I did not come across any
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	no bias found
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	great use of models
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	none found
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	MTRs included

15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	much is relevant, ie. manatees
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	yes
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	many consistent real world connections throughout
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	opportunities to read and write - various content areas incorporated
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	consistent use
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	appropriate
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	majority very good alignment

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Thorough teacher PD and side information in TE
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	yes within my scope
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	in order of BEST Standards
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in	5 - Very Good Alignment	relevant and colorful

understanding of the content at a level appropriate to the students' abilities.		
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	I believe the rate is fair
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	Waggle
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	presentation with Waggle component is well done

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	real world connections, good spacing, colorful, nice photos
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Launch sections
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	BEST benchmarks and MTRs clearly notated with clear I Can statements per lesson
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	decent scaffolding
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	many strategies and models with good teacher support
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	more mental than physical
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	sufficient and aligned practice, spiral, and assessments

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	many strategies taught but not assessed - students can choose strategy
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	many strategies taught but not assessed - students can choose strategy
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	lesson checks, reviews, performance assessments, and summatives with various item types also included in practice items
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	aligned well to instruction and practice
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	ELL included, but enrich activities are not very rigorous, some tier 2/3 activities, but may be more in Waggle
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	MTRs clearly stated and good use of text
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	most learning requirements are very good

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no CRT seen
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	yes
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	none seen

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	includes SEL in teacher parts

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The curriculum is very easy to use and provides ample professional development and support content for teachers. The curriculum provides ample resources for teachers to teach the standards as well as assess the standards. And, additional practice is provided for those students who need reteaching. One recommendation would to include content that could be used during an intervention block to support prerequisite skills prior to students learning the grade level standard. Content for proactive teachers is not present, only reactive content.

Although visuals and concrete representations are included in many lessons, additional practice scaffolding the use manipulatives and linking them to procedures could be included. Additionally, teachers would benefit from multiple activities to support content specific vocabulary rather than just the one page for each chapter.

Standard	Description	Reviewer Rating	Rating Justification
MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	Aligns to the standard.
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	4 - Good Alignment	Ch. 5 Lesson 1 doesn't involve addition and subtraction of fractions. Otherwise, the other lessons provide adequate problems involving the content of the standard with some variety in the problems.
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	Problems provided with visuals understand the concept within the standard.
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	4 - Good Alignment	Only 6 practice problems provided.
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	Lesson content aligns to stanard.

MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	4 - Good Alignment	Although multiples are not mentioned in the BEST standard, they are included in this lesson grouped with this standard. MAFS.4.OA.2.4 included multiples in the standard, however this content includes multiples. Although NSO.2.1 is also referenced, I don't see the term multiples included in any of the BEST standards.
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	4 - Good Alignment	The standard is aligned, however additional practice should be provided.
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	5 - Very Good Alignment	Content matched the standard and provided ample practice.
MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	5 - Very Good Alignment	Content matched the standard and provided ample practice.
MA.4.DP.1.3	Solve real-world problems involving numerical data.	5 - Very Good Alignment	Content matched the standard and provided ample practice.
MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	5 - Very Good Alignment	Skill demonstrated pg. 517-522
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	5 - Very Good Alignment	Content aligns well.

MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	5 - Very Good Alignment	Content aligns well.
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than one, with different numerators and different denominators.	5 - Very Good Alignment	Content aligns well.
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	5 - Very Good Alignment	Content aligns well.
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	5 - Very Good Alignment	Content aligned. Clarification #1 included in instruction.
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	5 - Very Good Alignment	Few practice problems, but aligned.
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	Content aligned.
MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	Few "real-world pictures" (pg. 589-594, 595-600) as stated in the benchmark clarifications.
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	5 - Very Good Alignment	Content aligned and ample practice provided.

MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	5 - Very Good Alignment	Content aligned and ample practice provided.
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	5 - Very Good Alignment	Aligns to standard. Ample practice provided.
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	5 - Very Good Alignment	Aligns to standard. Ample practice provided.
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	3 - Fair Alignment	Attributes not clearly defined in given lessons.
MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	5 - Very Good Alignment	Aligns the to standard stays within the benchmark clarifications.
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	3 - Fair Alignment	Problems involving distance were not included. Problems did not include fractions.
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	2 - Poor Alignment	Pg. 573-578. The standard states addition/subtraction problems. However, lesson 6 involves multiplication and division. The NSO standard also listed doesn't not include multiplication/division.
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	5 - Very Good Alignment	Content aligned

MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	5 - Very Good Alignment	Content aligned
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	5 - Very Good Alignment	Content aligned
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	5 - Very Good Alignment	Content aligned
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	5 - Very Good Alignment	Content aligned
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	Content aligned.
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	5 - Very Good Alignment	Content aligned.
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	5 - Very Good Alignment	Content aligned.

<p>MA.K12.MTR.1.1</p>	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	<p>5 - Very Good Alignment</p>	<p>Content includes practice in multiple places. MTR 1.1 listed beside discussion questions.</p>
<p>MA.K12.MTR.2.1</p>	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	<p>5 - Very Good Alignment</p>	<p>Content includes practice in multiple places.</p>
<p>MA.K12.MTR.3.1</p>	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p>	<p>5 - Very Good Alignment</p>	<p>Content includes practice in multiple places.</p>

	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. 	5 - Very Good Alignment	Content includes practice in multiple places.

	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	5 - Very Good Alignment	Content includes practice in multiple places.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Content includes practice in multiple places.

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Ample opportunities provided.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	Grade level text included not only in word problems, but also in the "Launch Into" sections.
ELA.K12.EE.3.1	Make inferences to support comprehension.	2 - Poor Alignment	Not a skill embedded in a strong way.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Variety of situations not present.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Format evident within textbook content.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	1 - Very Poor/No Alignment	Explicit teaching of skill not evident.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	ELL strategies included throughout content.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	ELL strategies include instructional purposes.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most of the standards are aligned well.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Skills don't appear to go beyond the extent of the standard.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	The materials are very adaptable for classroom instruction.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Additional teacher support beyond the text is needed, but most pages provide enough information.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The complexity appears to match that of the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Most of the content matches the standards, and therefore matches grade level student abilities.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	The time frame provided in the instructional model will only work in ideal situations. Additional time will be needed for transition, set up, lesson adjustments as needed, etc.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	3 - Fair Alignment	Professional learning references published 10+ years ago, with some references published in the 90's. Use more updated references.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Sources contribute to the quality of the content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	An error was found and submitted to the appropriate contact.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias or contradictions found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content is accurate.

13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	All content is factual and accurate.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content is taught in a progression that makes sense including a focus on the concepts being taught.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	The content teaches the grade-level standards, is appropriate and relevant.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Context is appropriate for 9/10 year old students.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content includes connections to Florida life such as Manatee and the Sunshine Skyway Bridge.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	A variety of disciplines are found within the text.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Multicultural representation can be found throughout the student textbook.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No inappropriate content found.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	In general, most of the content of the standards for this course are covered. A note was added for MA.4.M.2.2.

Presentation	Reviewer Rating	Rating Justification
--------------	-----------------	----------------------

1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	If purchasing all the resources provided in this curriculum, the teacher should not need to prepare additional teaching materials.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components appear to be aligned.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Easy to follow organization.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	The content readability was appropriate for 4th grade students.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Pacing may be a bit fast for ELL or ESE students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	Student textbook does not seem to have an audio component except for the interactive lesson. And, the audio that reads the pages in the interactive lesson sounds like a robot. The students are not able to access the audio for each component in the digital materials since they are in pdf format.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall good alignment.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Topics are presented in an interesting way, typically with manipulatives or visuals.

2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Concepts are grouped together in a way that makes sense.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Chapters and lessons clearly state the goals and expectations for each lesson.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Teacher resources questioned students in a way that allowed for students to think independently without fear of saying something "wrong".
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Lesson content includes support to ELL's or struggling students. Concepts are taught using various strategies including concrete and visual representations. Content is easily adapted to meet the needs of a variety of learners.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	The materials engage the mental activity of students. Some of the activities involve physical activity, but not much.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	The activities included in the materials are organized in a logical way.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Practices for effective mathematics teaching can be found within the content. Lesson opening activity is often too guided (looking for very specific answers and strategies) to allow for students to develop their own ideas.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	The strategies incorporated focus on the concept and links the concept to the procedure.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Strong correlation

11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Yes. Assessment items provide information regarding student understanding of the targeted outcomes, and provide remediation based on the assessment results.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	Incorporate additional practice providing concrete and visual representations.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	MTR.1.1 and MTR.2.1 could be strengthened in the content.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Overall good alignment.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No content of CRT found.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No content of CRT found.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Nothing found relating to social justice and CRT.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	SEL strategies not found.

Hi Drew,

Thank you for clarifying. I have attached reviewer evaluations for HMH's grades K,2,3, and 4. Please let me know if there is anything else we can do to assist.

Thanks,
Lauren

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Lauren,

The entire GoMath K-5 series for Houghton Mifflin Harcourt is on the non-adopted, and therefore, no grade levels for GoMath k-5 are listed on that site. We need reviews for all grade levels of GoMath K-5, not just the ones where we received lower than a 4.0 score. We have reports for grades 1 and 5. We need them for K, 2, 3, and 4.

Thanks,
Drew Parker

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Hi Drew,

I apologize for any miscommunication, previously attached were the evaluations for non-adopted materials, as requested by HMH representatives. All evaluations for the adopted materials may be publicly found on www.flimadoption.org and you may search within the 'Adopted Materials' tab under Course, Company, Title or Subject. All reviewer evaluations will be located within each material.

Please let me know if you have any questions or concerns.

Thanks,
Lauren

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Lauren,

Thank you for the email and the documents. I believe that DOE has other documents responsive to my requests. Specifically, I requested all completed evaluations for Houghton Mifflin Harcourt's ("HMH") 2021-2022 Mathematics Instructional Materials. Can you please send me the evaluations/reviewer reports for the Mathematics Instructional Materials submitted by HMH which passed the subject-specific standards score and/or did not include special topics? I'm seeking all evaluations for HMH titles—not just the evaluations for the objectionable HMH titles on the Not Recommended List.

Best regards,
Drew Parker

Subject: RE: 21-22 Instructional Materials Mathematics State Adopted List

Hi Tavi,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	4 - Good Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	H.M.H Go Math includes all the essential elements required for benchmark preparation, implementation, and assessment. There is ample student practice for students and professional development for teachers. The curriculum provides support for all learners and is visually appealing. The major downfall is the measurement unit and horizontal alignment. The measurement unit would require additional teacher preparation for instruction and assessment. Additionally, the application of horizontal alignment is not clearly evident.

Standard	Description	Reviewer Rating	Rating Justification
MA.K.AR.1.1	For any number from 1 to 9, find the number that makes 10 when added to the given number.	3 - Fair Alignment	The concept is thoroughly modeled but missing opportunities for open ended exploration.
MA.K.AR.1.2	Given a number from 0 to 10, find the different ways it can be represented as the sum of two numbers.	4 - Good Alignment	Meets the benchmark expectations and provides ample student practice.
MA.K.AR.1.3	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Meets the benchmark expectation with plenty of student practice. Also includes problems that begin with the sum.
MA.K.AR.2.1	Explain why addition or subtraction equations are true using objects or drawings.	4 - Good Alignment	Ample practice problems with appropriate visuals and includes problems that begin with the difference.
MA.K.DP.1.1	Collect and sort objects into categories and compare the categories by counting the objects in each category. Report the results verbally, with a written numeral or with drawings.	3 - Fair Alignment	Meets the expectation of the benchmark. However, some student practice is difficult and them to draw their own shapes based on given attributes which could prove difficult for K students. requires
MA.K.GR.1.1	Identify two- and three-dimensional figures regardless of their size or orientation. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Content is thoroughly explained and provides ample student practice.

MA.K.GR.1.2	Compare two-dimensional figures based on their similarities, differences and positions. Sort two-dimensional figures based on their similarities and differences. Figures are limited to circles, triangles, rectangles and squares.	5 - Very Good Alignment	Benchmark is well represented through pictures and student practice.
MA.K.GR.1.3	Compare three-dimensional figures based on their similarities, differences and positions. Sort three-dimensional figures based on their similarities and differences. Figures are limited to spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Benchmark is well represented through pictures and student practice.
MA.K.GR.1.4	Find real-world objects that can be modeled by a given two- or three-dimensional figure. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	4 - Good Alignment	Meets benchmark expectations-could use more vocabulary development practice.
MA.K.GR.1.5	Combine two-dimensional figures to form a given composite figure. Figures used to form a composite shape are limited to triangles, rectangles and squares.	4 - Good Alignment	Meets benchmark expectations- could use more real world examples
MA.K.M.1.1	Identify the attributes of a single object that can be measured such as length, volume or weight.	2 - Poor Alignment	Only addresses volume.
MA.K.M.1.2	Directly compare two objects that have an attribute which can be measured in common. Express the comparison using language to describe the difference.	2 - Poor Alignment	Very little instructional examples or student practice.
MA.K.M.1.3	Express the length of an object, up to 20 units long, as a whole number of lengths by laying non-standard objects end to end with no gaps or overlaps.	2 - Poor Alignment	Limited student practice and cubes
MA.K.NSO.1.1	Given a group of up to 20 objects, count the number of objects in that group and represent the number of objects with a written numeral. State the number of objects in a rearrangement of that group without recounting.	5 - Very Good Alignment	Multiple representations in various forms

MA.K.NSO.1.2	Given a number from 0 to 20, count out that many objects.	5 - Very Good Alignment	Multiple representations in various forms
MA.K.NSO.1.3	Identify positions of objects within a sequence using the words “first,” “second,” “third,” “fourth” or “fifth.”	3 - Fair Alignment	Illustrates first well. More visuals and practice could be incorporated to teach 2nd -5th.
MA.K.NSO.1.4	Compare the number of objects from 0 to 20 in two groups using the terms less than, equal to or greater than.	3 - Fair Alignment	Instructs the benchmark but includes minimal student practice for comparing.
MA.K.NSO.2.1	Recite the number names to 100 by ones and by tens. Starting at a given number, count forward within 100 and backward within 20.	4 - Good Alignment	Meets the benchmark expectations with ample student practice. Could use additional practice for students to begin counting at points other than 1.
MA.K.NSO.2.2	Represent whole numbers from 10 to 20, using a unit of ten and a group of ones, with objects, drawings and expressions or equations.	4 - Good Alignment	Concept is well modeled.
MA.K.NSO.2.3	Locate, order and compare numbers from 0 to 20 using the number line and terms less than, equal to or greater than.	4 - Good Alignment	Multiple opportunities to compare numbers with numberlines present for student reference.
MA.K.NSO.3.1	Explore addition of two whole numbers from 0 to 10, and related subtraction facts.	4 - Good Alignment	Meets benchmark expectations.
MA.K.NSO.3.2	Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.	4 - Good Alignment	Meets benchmark expectations.
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	Mindset is directly addressed in the TE.

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	3 - Fair Alignment	Evidence not found directly in the student edition. But there is evidence in teacher edition.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	3 - Fair Alignment	Fluency development is rudimentary. Would like to see incorporation of dot cards, number recognition/fluency games.

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	4 - Good Alignment	Evidence exists in TE with share and show opportunities.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	3 - Fair Alignment	Models logical progression and provides students opportunities to draw own conclusions, but does not explicitly instruct patterns/connections.

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Checks are dependent on adult assistance. Little evidence to promote student self checks.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Real world exploration/models are used.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	2 - Poor Alignment	Opportunities exist to cite models in

			discussion, but it is superficial practice.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	Could use more vocabulary development practice.
ELA.K12.EE.3.1	Make inferences to support comprehension.	2 - Poor Alignment	Need additional assistance in TE to help teachers see opportunities for making inferences.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	2 - Poor Alignment	Need additional assistance in TE to help teachers see opportunities for collaboration.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	2 - Poor Alignment	Would be rated higher if there were opportunities for student self assessment/quality work checks were included within each lesson instead of an appendix.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Provides opportunities for student speaking but provides little guidance on how teachers can make this happen.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Basic assistance provided for Multilingual students.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	2 - Poor Alignment	Most supports focus on provided visuals for learning.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Topics are aligned, but is less aligned to MTRs and EEs.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Topics and skills are appropriate for K.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Materials are appropriate for classroom instruction.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Content and practice is sufficient.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	Additional open ended practice would increase this rating.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Content is appropriate of K.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	150 days provides time for instruction and practice.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Expertise is verified.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Expertise contributes to the content. Research excerpts provided in the TE.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No typographical or visual error detected.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Content is free of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include	4 - Good Alignment	Math best practices are represented.

prevailing theories, concepts, standards, and models used with the subject area).		
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Content does not appear to have mistakes or inconsistencies.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Best practices are up to date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Content is relevant and appropriate.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	K students would be engaged with the content.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content is broad enough to appeal to a wide audience.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	3 - Fair Alignment	Limited interdisciplinary content is presented.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	There are limited opportunities for multicultural representation. However, the representations are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Material is appropriate for K.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Benchmarks are accurately covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of	4 - Good Alignment	All pieces are present (ELL/differentiation/remediation/enrichment/student

the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.		hands on practice) but all elements could use additional practices. Many items repeated throughout the TE.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Tools align well through SE, TE and online supports.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	There is a clear system of organization that logically advances student understanding.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Materials are all able to be accessed by K. Could increase vocabulary development to better advance student literacy in math.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	There are multiple opportunities for students to practice given benchmarks with the exception of the measurement unit.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	Content is presented through multiple modalities and at times offers student choice in response to understanding.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Presentation is appealing to K students and logically organized for teacher delivery.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Content includes opportunities for self expression and scaffolded levels of practice to encourage success.

2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	The measurement unit is thin and does not explore the benchmarks in depth.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Content includes benchmarks and student "I can" statements.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	TE includes multiple opportunities for concept development, differentiation support, and common student misconceptions.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Support provided for differentiation, language development, and ELL support.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Each lesson includes hands on student practice.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The 5E's lesson structure support active student participation. Although some connection to the 5 Es is superficial.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Best practices are evident in differentiation, scaffolding, common misconceptions are provided in TE.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Differentiation, scaffolding, common misconceptions are connected to the student skill being practiced.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Differentiation, scaffolding, common misconceptions are provided in TE.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Formative and summative assessments are provided.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	Submissions are mainly focused on paper/pencil or interview

		responses. But does include iTools as an option.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	It is most evident in TE instead of SE and requires the teacher to be diligent in implementing this application.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	The learner is appropriately scaffolded with opportunities for enrichment/intervention.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT not evident in SE or TE.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	CRT not evident in SE or TE.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	CRT not evident in SE or TE.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	3 - Fair Alignment	The section "supporting all learners" contains references to peoples/cultures/equity in the TE.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material is mostly aligned with the B.E.S.T Math Standards. The material was visually engaging and connections to real-life found throughout the lessons. The lessons are very basic and allow for students to understand the foundations of these various mathematical concepts. The three stages of fluency included in every lesson will help children develop automaticity while learning concepts. The data driven instruction suggestions for interventions will help teachers address the varied learning levels in their classrooms.

The language routines will encourage students to develop mathematical accountable talk. The lesson checks are also a great tool for teachers to use to determine level of understanding after a lesson. More informal checks for understanding throughout the lesson would be great. These would allow the teachers to gauge learning so the lesson check isn't the first determination of understanding. This is more of an instructional delivery and planning concern than it is a material concern. Based on what I've viewed, this material is an effective teaching/learning tool.

Standard	Description	Reviewer Rating	Rating Justification
MA.K.AR.1.1	For any number from 1 to 9, find the number that makes 10 when added to the given number.	4 - Good Alignment	making combinations of numbers and counting through 9
MA.K.AR.1.2	Given a number from 0 to 10, find the different ways it can be represented as the sum of two numbers.	4 - Good Alignment	count and tell how many, quantities gradually increase to 20, within standard
MA.K.AR.1.3	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	4 - Good Alignment	real world situations to represent the problems, listening comprehension also needed
MA.K.AR.2.1	Explain why addition or subtraction equations are true using objects or drawings.	4 - Good Alignment	objects and drawings used to model addition or subtraction equations, allows for practice of this skill
MA.K.DP.1.1	Collect and sort objects into categories and compare the categories by counting the objects in each category. Report the results verbally, with a written numeral or with drawings.	5 - Very Good Alignment	all tasks align with standard, allows for sorting into different categories, and writing results with numerals or drawings. Included

			the categories of curved and not curved, basis for understanding attributes of 2-D figures. Numerous practice activities to build a solid understanding
MA.K.GR.1.1	Identify two- and three-dimensional figures regardless of their size or orientation. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	additional shapes on page 674 that allow students to identify triangles and non-triangles,
MA.K.GR.1.2	Compare two-dimensional figures based on their similarities, differences and positions. Sort two-dimensional figures based on their similarities and differences. Figures are limited to circles, triangles, rectangles and squares.	4 - Good Alignment	aligned and also incorporates location/position words
MA.K.GR.1.3	Compare three-dimensional figures based on their similarities, differences and positions. Sort three-dimensional figures based on their similarities and differences. Figures are limited to spheres, cubes, cones and cylinders.	5 - Very Good Alignment	within limits of standards, variety of context for practice
MA.K.GR.1.4	Find real-world objects that can be modeled by a given two- or three-dimensional figure. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Real-world connection to 3-D objects present.
MA.K.GR.1.5	Combine two-dimensional figures to form a given composite figure. Figures used to form a composite shape are limited to triangles, rectangles and squares.	5 - Very Good Alignment	All shapes used throughout are within the benchmark.
MA.K.M.1.1	Identify the attributes of a single object that can be measured such as length, volume or weight.	5 - Very Good Alignment	hands on practice for measurable attributes

MA.K.M.1.2	Directly compare two objects that have an attribute which can be measured in common. Express the comparison using language to describe the difference.	5 - Very Good Alignment	allows for comparison using standard and non-standard units of measure
MA.K.M.1.3	Express the length of an object, up to 20 units long, as a whole number of lengths by laying non-standard objects end to end with no gaps or overlaps.	5 - Very Good Alignment	allows for students to count and write amounts, practicing two skills at once
MA.K.NSO.1.1	Given a group of up to 20 objects, count the number of objects in that group and represent the number of objects with a written numeral. State the number of objects in a rearrangement of that group without recounting.	5 - Very Good Alignment	counting and writing, incorporates problem solving
MA.K.NSO.1.2	Given a number from 0 to 20, count out that many objects.	4 - Good Alignment	Practice of counting out objects to 20, amount slowly increases.
MA.K.NSO.1.3	Identify positions of objects within a sequence using the words "first," "second," "third," "fourth" or "fifth."	4 - Good Alignment	ordinal numbers allowing for sequence practice
MA.K.NSO.1.4	Compare the number of objects from 0 to 20 in two groups using the terms less than, equal to or greater than.	4 - Good Alignment	real-world examples for comparing numbers
MA.K.NSO.2.1	Recite the number names to 100 by ones and by tens. Starting at a given number, count forward within 100 and backward within 20.	4 - Good Alignment	could've included more practice on missing numbers in a sequence as they count to 100
MA.K.NSO.2.2	Represent whole numbers from 10 to 20, using a unit of ten and a group of ones, with objects, drawings and expressions or equations.	4 - Good Alignment	Numbers represented tens and ones (units isn't present such as 1 ten and 2 ones)
MA.K.NSO.2.3	Locate, order and compare numbers from 0 to 20 using the number line and terms less than, equal to or greater than.	4 - Good Alignment	Use of number line throughout allows students to learn order of numbers differently

MA.K.NSO.3.1	<p>Explore addition of two whole numbers from 0 to 10, and related subtraction facts.</p>	<p>5 - Very Good Alignment</p>	<p>Students are exploring these operations not mastering them, the practice provided gives context to these operations so young children can fully understand them</p>
MA.K.NSO.3.2	<p>Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.</p>	<p>3 - Fair Alignment</p>	<p>Practice with equal sign at the beginning and end of the equations, this standard calls for using related facts with procedural reliability; however, there isn't much of this present. All of this practice requires them to add or subtract but not make the connection between the fact family.</p>
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 	<p>5 - Very Good Alignment</p>	<p>Encourages engagement will working the problems and perseverance</p>
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p>	<p>3 - Fair Alignment</p>	<p>Not much evidence of representing problems in multiple ways. Most of the activities</p>

	<p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		<p>require them to count and write the quantity, but that doesn't mean the students are representing in multiple ways. An example of this would be if the teacher told the students to draw 7 ladybugs then write the number.</p>
<p>MA.K12.MTR.3.1</p>	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	<p>5 - Very Good Alignment</p>	<p>Choice in how to solve the problems</p>
<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p>	<p>4 - Good Alignment</p>	<p>Encourages discussion of content, helps to build mathematical conversation</p>

	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>Different ways to make a number can help students see patterns, more practice needed</p>
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. 	<p>3 - Fair Alignment</p>	<p>These tasks are focusing on exploring addition and subtraction but providing practice with start unknown and change unknown. They really aren't requiring students to</p>

	<ul style="list-style-type: none"> • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		determine reasonableness.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	models used, real world connection
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Students have to justify reasoning, builds math vocabulary
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	I don't see the connection to understanding grade level complex text proficiently.
ELA.K12.EE.3.1	Make inferences to support comprehension.	3 - Fair Alignment	Don't see the connection to making inferences within these tasks
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	More of an instructional delivery issue

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	Allows for quality work to be created
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Tasks appropriate, but this cannot be determined by this material
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Connection needed to be successful is present
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	Can't be determined by the material, but opportunities are present

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Only minor issues identified, overall alignment to the grade level standards present
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Content written to correct skill levels.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Delivery of instruction will be more impactful to close the minor deficiencies found in this material
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	Significant details for students to understand the topics
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Complexity matches the standards
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Content matches the ability of kindergarten students

7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Cannot be determined by this material
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Primary and secondary sources reflect expert information
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	High level of quality in this material
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No visual or typographical errors found
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No biases or contradictions found
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content represents the discipline and includes real-world connections
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Material is factually accurate
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Up to date material
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Practice tasks throughout are relevant and appropriate for kindergarten.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Appropriate for intended learners
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Most practice includes real-life connections so students can construct meaning.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Connection between math and life will be made meaningful to students

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Multicultural representation throughout
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	People and animals are represented with humanity and compassion
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	The benchmarks are covered by this material

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Teacher won't have to prepare additional material; however, the teacher will need to understand the content to deliver it effectively.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components aligned with curriculum and each other
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Material is organized very well
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Material is easy to read, understand, and deliver
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Pacing seem appropriate, but this cannot be fully determined by any material
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Presentation, navigation, and tools are easy to use

7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	Visually engaging, easy to understand and follow, numerous opportunities for practice at appropriate points in the activities.
---	-------------------------	--

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Highly engaging format
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	important concepts focused on
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Easy to understand the benchmarks and horizontal alignment addressed in each lesson.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	guidance and support for students provided
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	This is very good alignment but will still require teachers to have an understanding of how to scaffold learning for students who need additional support.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	active participation encouraged
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	material organized in logical format
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	instructional strategies will be successful
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	strategies are effective in teaching outcomes, this is a delivery concern

10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	assessment strategies and desired outcomes correlated
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	learner's performance can be assessed with regards to targeted outcomes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	needs of all learners considered
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	There was an attempt, but evidence did not align with all practices being present in material.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	learning requirements satisfied with this material

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	non present
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	non present
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	non present
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	non present

Reviewer's Name: Emily Hancock

Title: HMH Florida's B.E.S.T. Go Math!

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Thomasenia Lott Adams, PhD; Matthew R. Larson, PhD

Copyright: 2023

Edition: N/A

Grade Level: K-5

Course: [Grade Two Mathematics](#)

Bid ID: 456

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	No
How would you rate the overall usability of the instructional material?	3 - Fair Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	The materials presented do address all of the benchmarks, There is sufficient student practice and most topics move from concrete to abstract practice for students. The content is lacking in embedding the MRT's into the benchmarks. It also has limited horizontal alignment and some topics are only lightly covered. Finally, the incorporation of the critical thinking skills to promote advanced thinking is sparse.

Standard	Description	Reviewer Rating	Rating Justification
MA.2.AR.1.1	Solve one- and two-step addition and subtraction real-world problems.	4 - Good Alignment	Meets the benchmark. Focuses heavily on bar models, but does allow for open exploration.
MA.2.AR.2.1	Determine and explain whether equations involving addition and subtraction are true or false.	4 - Good Alignment	Meets benchmark. Provides a lot of practice. Would have like to see some additional conceptual understanding built into the initial practice.
MA.2.AR.2.2	Determine the unknown whole number in an addition or subtraction equation, relating three or four whole numbers, with the unknown in any position.	4 - Good Alignment	Taught with MA.2.AR.2.1 & A.R.1.1-Multiple opportunities for students to practice. Would have liked to see several visual representations including and varied practice.
MA.2.AR.3.1	Represent an even number using two equal groups or two equal addends. Represent an odd number using two equal groups with one left over or two equal addends plus 1.	4 - Good Alignment	Meets the benchmark. Good visual representations. Would have liked to see student checks for understanding include more variety including select all/open ended questions/correct incorrect answers.
MA.2.AR.3.2	Use repeated addition to find the total number of objects in a collection of equal groups. Represent the total number of objects using rectangular arrays and equations.	3 - Fair Alignment	Abstract seems to precede concrete representation in the instruction.

MA.2.DP.1.1	Collect, categorize and represent data using tally marks, tables, pictographs or bar graphs. Use appropriate titles, labels and units.	4 - Good Alignment	Meets benchmark. Missed opportunities to align this benchmark with others.
MA.2.DP.1.2	Interpret data represented with tally marks, tables, pictographs or bar graphs including solving addition and subtraction problems.	4 - Good Alignment	Meets expectation of the benchmark
MA.2.FR.1.1	Partition circles and rectangles into two, three or four equal-sized parts. Name the parts using appropriate language, and describe the whole as two halves, three thirds or four fourths.	5 - Very Good Alignment	Benchmark expectation is met with ample student practice.
MA.2.FR.1.2	Partition rectangles into two, three or four equal-sized parts in two different ways showing that equal-sized parts of the same whole may have different shapes.	5 - Very Good Alignment	Benchmark expectation is met with ample student practice.
MA.2.GR.1.1	Identify and draw two-dimensional figures based on their defining attributes. Figures are limited to triangles, rectangles, squares, pentagons, hexagons and octagons.	4 - Good Alignment	Meets benchmark with guided student practice.
MA.2.GR.1.2	Categorize two-dimensional figures based on the number and length of sides, number of vertices, whether they are closed or not and whether the edges are curved or straight.	4 - Good Alignment	Meets benchmark with guided student practice.
MA.2.GR.1.3	Identify line(s) of symmetry for a two-dimensional figure.	4 - Good Alignment	Meets benchmark standard - missed opportunity to align to GR 1.2/1.3
MA.2.GR.2.1	Explore perimeter as an attribute of a figure by placing unit segments along the boundary without gaps or overlaps. Find perimeters of rectangles by counting unit segments.	4 - Good Alignment	Meets benchmark standard - missed opportunity to align to GR 1.2/1.3
MA.2.GR.2.2	Find the perimeter of a polygon with whole-number side lengths. Polygons are limited to triangles, rectangles, squares and pentagons.	3 - Fair Alignment	Could use additional student practice.
MA.2.M.1.1	Estimate and measure the length of an object to the nearest inch, foot, yard, centimeter or	4 - Good Alignment	Meets benchmark. Would have like to see

	meter by selecting and using an appropriate tool.		more integration with A.R. benchmarks.
MA.2.M.1.2	Measure the lengths of two objects using the same unit and determine the difference between their measurements.	4 - Good Alignment	Meets benchmark expectations.
MA.2.M.1.3	Solve one- and two-step real-world measurement problems involving addition and subtraction of lengths given in the same units.	2 - Poor Alignment	Missing two step problem practice.
MA.2.M.2.1	Using analog and digital clocks, tell and write time to the nearest five minutes using a.m. and p.m. appropriately. Express portions of an hour using the fractional terms half an hour, half past, quarter of an hour, quarter after and quarter til.	4 - Good Alignment	Meets benchmark expectations. Could use more practice.
MA.2.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving either dollar bills within \$100 or coins within 100¢ using \$ and ¢ symbols appropriately.	4 - Good Alignment	Meets benchmark expectations but could use more practice identifying appropriate use of dollar and cent signs.
MA.2.NSO.1.1	Read and write numbers from 0 to 1,000 using standard form, expanded form and word form.	4 - Good Alignment	Meets benchmark could use more student practice in writing in expanded form.
MA.2.NSO.1.2	Compose and decompose three-digit numbers in multiple ways using hundreds, tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Meets benchmark using traditional modeling methods.
MA.2.NSO.1.3	Plot, order and compare whole numbers up to 1,000.	5 - Very Good Alignment	Good alignment to the benchmark and allows for open ended student practice.
MA.2.NSO.1.4	Round whole numbers from 0 to 100 to the nearest 10.	3 - Fair Alignment	instructs according to the benchmark, but includes very little student practice.

MA.2.NSO.2.1	Recall addition facts with sums to 20 and related subtraction facts with automaticity.	4 - Good Alignment	Includes explicit instruction of strategies for procedural fluency
MA.2.NSO.2.2	Identify the number that is ten more, ten less, one hundred more and one hundred less than a given three-digit number.	3 - Fair Alignment	Instructs according to the benchmark but has limited modeling and student practice.
MA.2.NSO.2.3	Add two whole numbers with sums up to 100 with procedural reliability. Subtract a whole number from a whole number, each no larger than 100, with procedural reliability.	4 - Good Alignment	Includes explicit instruction of strategies for procedural fluency
MA.2.NSO.2.4	Explore the addition of two whole numbers with sums up to 1,000. Explore the subtraction of a whole number from a whole number, each no larger than 1,000.	4 - Good Alignment	Meets benchmark expectation with a heavy reliance on base ten blocks.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	This benchmark must be inferred from the TE and SE.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p>	4 - Good Alignment	Appropriate use of modeling and hands on practice.

	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Strategies are explicitly taught and spiraled throughout the curriculum.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. 	2 - Poor Alignment	TE is lacking in opportunities to promote mathematical discussion

	<ul style="list-style-type: none"> • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	2 - Poor Alignment	TE is lacking in opportunities to promote mathematical discussion
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. 	3 - Fair Alignment	TE is lacking in opportunities to promote mathematical discussion

	<ul style="list-style-type: none"> Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Multiple opportunities for real world application
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	TE is lacking in opportunities to promote mathematical discussion
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Word problems are appropriate for 2nd grade students.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Strategies are taught to teach word problem comprehension.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	TE is lacking in opportunities to promote mathematical discussion
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	2 - Poor Alignment	Would benefit from rubrics for student self assessments.

ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Language and speaking included in TE but is sparse.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Multilingual support provided in TE.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	Would benefit from more guided questions/question stems for ELLs.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Overall, the benchmarks are covered. However, the MRTs are sparse and horizontal alignment is lacking.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	The content is consistent with 2nd grade expectations.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	There is an ease of use.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	Sections include appropriate amounts of modeling/student practice. However, some topics are lightly covered.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Complexity is appropriate except for 2 step word problems.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Difficulty is appropriate for 2nd grade students.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Most of content matches appropriate time period, but

		some topics could use additional time. ie. rounding.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Experts are qualified.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Experts are qualified.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	No typographical errors found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Instructional best practices are evident.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No erros found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Best practices are evident.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	All content is appropriate.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content matches 2nd grade interest levels.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Real world connections are evident.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	3 - Fair Alignment	Interdisciplinary connections are shown in the TE, but are sparse.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and	3 - Fair Alignment	Multiculturalism is relegate to names in story problems.

various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).		
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No violations of this criteria.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	Overall, the benchmarks are covered. However, the MRTs are sparse and horizontal alignment is lacking.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	Includes PD/guided questions/extension activities, but they are generic and sometimes repetitive.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	TE and SE are appropriately aligned.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	Presentation of material is expected and consistent.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Writing and illustrations support each other.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Pacing is appropriate in most instances. Some topics need additional time.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	UDL appears limited to technology pieces of the program.

7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	In general meets expectations but could use additional UDL and teacher PD supports.
---	--------------------	---

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Appropriate amounts of book work/hands on practice is included.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	Content focuses on benchmarks, but does not provide enough practice or horizontal alignment for some topics (rounding/two step word problems).
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	I can student statements and vertical alignment included in TE.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Significant student practice is included, but needs to include additional higher order thinking skills including error analysis and open ended responses.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	2 - Poor Alignment	TE guidance and support is generic and repetitive.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Student practice and hands on practice included to get from concrete to abstract work.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Student practice and hands on practice included to get from concrete to abstract work.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Best practices used in instructional methods.

9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Best practices used in instructional methods.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Lesson and unit checks included in the curriculum.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	Spiral reviews included as well as chapter/unit assessments. Could be enhanced through additional performance tasks/discussion checklists/open ended responses.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	2 - Poor Alignment	Student submissions are generally limited to paper/pencil "expected" responses of drawings or numbers.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	2 - Poor Alignment	Does not include a comprehensive resource/check of MTRs.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	Instruction and teacher support is sufficient. However, curriculum is limited on UDL principles and MTR application.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No CRT present
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No CRT present
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No social justice present
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	3 - Fair Alignment	Attempts at multicultural teaching is evident. Ex. - types

		of housing for different groups of people.

Title: HMH Florida's B.E.S.T. Go Math!

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Thomasenia Lott Adams, PhD; Matthew R. Larson, PhD

Copyright: 2023

Edition: N/A

Grade Level: K-5

Course: [Grade Two Mathematics](#)

Bid ID: 456

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall the material is appropriate. The biggest issues are the lack of resources for Access Points students and the limited assessment. The exit ticket is included in the student workbook, but on the homework pages. Not all resources are easy to locate.

Standard	Description	Reviewer Rating	Rating Justification
MA.2.AR.1.1	Solve one- and two-step addition and subtraction real-world problems.	5 - Very Good Alignment	full alignment to the standard
MA.2.AR.2.1	Determine and explain whether equations involving addition and subtraction are true or false.	5 - Very Good Alignment	full alignment to the standard
MA.2.AR.2.2	Determine the unknown whole number in an addition or subtraction equation, relating three or four whole numbers, with the unknown in any position.	5 - Very Good Alignment	full alignment to the standard
MA.2.AR.3.1	Represent an even number using two equal groups or two equal addends. Represent an odd number using two equal groups with one left over or two equal addends plus 1.	5 - Very Good Alignment	full alignment to the standard, visual and practice of what odd and even means.
MA.2.AR.3.2	Use repeated addition to find the total number of objects in a collection of equal groups. Represent the total number of objects using rectangular arrays and equations.	5 - Very Good Alignment	full alignment to the benchmark, practice from equal groups to arrays
MA.2.DP.1.1	Collect, categorize and represent data using tally marks, tables, pictographs or bar graphs. Use appropriate titles, labels and units.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.DP.1.2	Interpret data represented with tally marks, tables, pictographs or bar graphs including solving addition and subtraction problems.	5 - Very Good Alignment	full alignment to the benchmark, practice with different types of data displays
MA.2.FR.1.1	Partition circles and rectangles into two, three or four equal-sized parts. Name the parts using appropriate language, and describe the whole as two halves, three thirds or four fourths.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.FR.1.2	Partition rectangles into two, three or four equal-sized parts in two different ways showing that equal-sized parts of the same whole may have different shapes.	5 - Very Good Alignment	full alignment to the benchmark

MA.2.GR.1.1	Identify and draw two-dimensional figures based on their defining attributes. Figures are limited to triangles, rectangles, squares, pentagons, hexagons and octagons.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.GR.1.2	Categorize two-dimensional figures based on the number and length of sides, number of vertices, whether they are closed or not and whether the edges are curved or straight.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.GR.1.3	Identify line(s) of symmetry for a two-dimensional figure.	4 - Good Alignment	full alignment, but opportunities for students to practice hands-on can be added
MA.2.GR.2.1	Explore perimeter as an attribute of a figure by placing unit segments along the boundary without gaps or overlaps. Find perimeters of rectangles by counting unit segments.	5 - Very Good Alignment	full alignment to the benchmark
MA.2.GR.2.2	Find the perimeter of a polygon with whole-number side lengths. Polygons are limited to triangles, rectangles, squares and pentagons.	5 - Very Good Alignment	full alignment
MA.2.M.1.1	Estimate and measure the length of an object to the nearest inch, foot, yard, centimeter or meter by selecting and using an appropriate tool.	5 - Very Good Alignment	full alignment and numerous opportunities to practice
MA.2.M.1.2	Measure the lengths of two objects using the same unit and determine the difference between their measurements.	5 - Very Good Alignment	aligned
MA.2.M.1.3	Solve one- and two-step real-world measurement problems involving addition and subtraction of lengths given in the same units.	4 - Good Alignment	aligned, but more practice on solving one step then into two steps
MA.2.M.2.1	Using analog and digital clocks, tell and write time to the nearest five minutes using a.m. and p.m. appropriately. Express portions of an hour using the fractional terms half an hour, half past, quarter of an hour, quarter after and quarter til.	5 - Very Good Alignment	full alignment

MA.2.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving either dollar bills within \$100 or coins within 100¢ using \$ and ¢ symbols appropriately.	5 - Very Good Alignment	full alignment, both sides of the coins used in practice problems
MA.2.NSO.1.1	Read and write numbers from 0 to 1,000 using standard form, expanded form and word form.	5 - Very Good Alignment	full alignment
MA.2.NSO.1.2	Compose and decompose three-digit numbers in multiple ways using hundreds, tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	5 - Very Good Alignment	full alignment
MA.2.NSO.1.3	Plot, order and compare whole numbers up to 1,000.	5 - Very Good Alignment	full alignment
MA.2.NSO.1.4	Round whole numbers from 0 to 100 to the nearest 10.	5 - Very Good Alignment	full alignment, but more practice of identifying the entire range of numbers that will round to a particular 10
MA.2.NSO.2.1	Recall addition facts with sums to 20 and related subtraction facts with automaticity.	4 - Good Alignment	fluency included but not integrated throughout
MA.2.NSO.2.2	Identify the number that is ten more, ten less, one hundred more and one hundred less than a given three-digit number.	4 - Good Alignment	aligned
MA.2.NSO.2.3	Add two whole numbers with sums up to 100 with procedural reliability. Subtract a whole number from a whole number, each no larger than 100, with procedural reliability.	5 - Very Good Alignment	aligned
MA.2.NSO.2.4	Explore the addition of two whole numbers with sums up to 1,000. Explore the subtraction of a whole number from a whole number, each no larger than 1,000.	5 - Very Good Alignment	fully aligned
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	5 - Very Good Alignment	aligned and opportunities present

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	aligned and opportunities present
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	5 - Very Good Alignment	aligned ad opportunities present

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	opportunities throughout for academic discourse
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	5 - Very Good Alignment	opportunities throughout

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	opportunities throughout
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Real-world connections and applications throughout

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	aligned
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	aligned
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	aligned
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	opportunities throughout
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	aligned
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	aligned
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	aligned
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	ELL support provided, more languages needed

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	full alignment
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	full alignment

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Adaptable for classroom instruction, supplemental items will still be needed
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	aligned
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	aligned
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	matches grade level ability
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	adequate amount of time to teach
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	aligned
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	aligned
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	accurate content and not errors notice
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	content accurate and free of bias
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	aligned
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	content factual and free of mistakes and inconsistencies
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	up to date content

15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	presented in an appropriate manner
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	relevant content
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	life connections
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	content is meaningful for students
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	multicultural representation
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	living things portrayed with compassion
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	content of benchmarks covered in material

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	resources comprehensive
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	all components aligned
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	materials consistent
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in	5 - Very Good Alignment	readability appropriate

understanding of the content at a level appropriate to the students' abilities.		
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	pacing appropriate
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	material allows for all to access content
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	material presented in an organized manner

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	some motivational strategies present
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	aligned
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	explicit instruction statements and outcomes present
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	materials provide guidance
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	support adaptable
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	active participation included
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	logical extensions present

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	targeted instructional strategies present
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	targeted instructional strategies effective for targeted outcomes
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessment strategies lacking
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	good alignment
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	the needs of most learners considered, not access points
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	appropriate application
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	learning requirements satisfied

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	none found
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	none found
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	none found
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	none found

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	Yes
How would you rate the overall usability of the instructional material?	5 - Very Good Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	

Standard	Description	Reviewer Rating	Rating Justification
----------	-------------	-----------------	----------------------

MA.2.AR.1.1	Solve one- and two-step addition and subtraction real-world problems.	5 - Very Good Alignment	Students practice many multi-step word problems that are relevant.
MA.2.AR.2.1	Determine and explain whether equations involving addition and subtraction are true or false.	3 - Fair Alignment	Students are solving these problems, but do not have the area to explain why they are true or false.
MA.2.AR.2.2	Determine the unknown whole number in an addition or subtraction equation, relating three or four whole numbers, with the unknown in any position.	5 - Very Good Alignment	Word problems and equations are used to find the unknown in any position.
MA.2.AR.3.1	Represent an even number using two equal groups or two equal addends. Represent an odd number using two equal groups with one left over or two equal addends plus 1.	5 - Very Good Alignment	Students practice this benchmark with manipulatives, pictures, etc.
MA.2.AR.3.2	Use repeated addition to find the total number of objects in a collection of equal groups. Represent the total number of objects using rectangular arrays and equations.	5 - Very Good Alignment	Students use pictures and equations to practice this benchmark.
MA.2.DP.1.1	Collect, categorize and represent data using tally marks, tables, pictographs or bar graphs. Use appropriate titles, labels and units.	5 - Very Good Alignment	Students represent data using all the correct types of charts and graphs.
MA.2.DP.1.2	Interpret data represented with tally marks, tables, pictographs or bar graphs including solving addition and subtraction problems.	5 - Very Good Alignment	Students use addition and subtraction while interpreting data.
MA.2.FR.1.1	Partition circles and rectangles into two, three or four equal-sized parts. Name the parts using appropriate language, and describe the whole as two halves, three thirds or four fourths.	5 - Very Good Alignment	The curriculum using the correct terms to identify the portions.
MA.2.FR.1.2	Partition rectangles into two, three or four equal-sized parts in two different ways showing that equal-sized parts of the same whole may have different shapes.	5 - Very Good Alignment	Students portion rectangles during the fractions section.

MA.2.GR.1.1	Identify and draw two-dimensional figures based on their defining attributes. Figures are limited to triangles, rectangles, squares, pentagons, hexagons and octagons.	5 - Very Good Alignment	The curriculum covers the correct shapes that match the benchmark.
MA.2.GR.1.2	Categorize two-dimensional figures based on the number and length of sides, number of vertices, whether they are closed or not and whether the edges are curved or straight.	5 - Very Good Alignment	The attributes match the benchmark.
MA.2.GR.1.3	Identify line(s) of symmetry for a two-dimensional figure.	5 - Very Good Alignment	Students determine symmetry in many shapes.
MA.2.GR.2.1	Explore perimeter as an attribute of a figure by placing unit segments along the boundary without gaps or overlaps. Find perimeters of rectangles by counting unit segments.	5 - Very Good Alignment	Unit segments include cubes and a ruler.
MA.2.GR.2.2	Find the perimeter of a polygon with whole-number side lengths. Polygons are limited to triangles, rectangles, squares and pentagons.	5 - Very Good Alignment	The curriculum using the correct shapes to measure perimeter.
MA.2.M.1.1	Estimate and measure the length of an object to the nearest inch, foot, yard, centimeter or meter by selecting and using an appropriate tool.	5 - Very Good Alignment	Student measure using all of the units using, meter stick, cubes and a ruler.
MA.2.M.1.2	Measure the lengths of two objects using the same unit and determine the difference between their measurements.	5 - Very Good Alignment	Students use tools to measure and determine the differences in length.
MA.2.M.1.3	Solve one- and two-step real-world measurement problems involving addition and subtraction of lengths given in the same units.	5 - Very Good Alignment	Students use real world tools to measure objects.
MA.2.M.2.1	Using analog and digital clocks, tell and write time to the nearest five minutes using a.m. and p.m. appropriately. Express portions of an hour using the fractional terms half an hour, half past, quarter of an hour, quarter after and quarter til.	5 - Very Good Alignment	Student tell time in many ways using both types of clocks. Lesson 12.4 teaches students am and pm.

MA.2.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving either dollar bills within \$100 or coins within 100¢ using \$ and ¢ symbols appropriately.	5 - Very Good Alignment	Students solve real world problems using money. Some of the problems have them use more than one step.
MA.2.NSO.1.1	Read and write numbers from 0 to 1,000 using standard form, expanded form and word form.	5 - Very Good Alignment	Students represent a number in expanded form, word form and standard form. They use many methods to understand the concept.
MA.2.NSO.1.2	Compose and decompose three-digit numbers in multiple ways using hundreds, tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	5 - Very Good Alignment	Place value includes three digit numbers. Students represent it in many ways.
MA.2.NSO.1.3	Plot, order and compare whole numbers up to 1,000.	5 - Very Good Alignment	Student use the number line to plot, order and compare numbers.
MA.2.NSO.1.4	Round whole numbers from 0 to 100 to the nearest 10.	5 - Very Good Alignment	Number lines are used to help students with this concept.
MA.2.NSO.2.1	Recall addition facts with sums to 20 and related subtraction facts with automaticity.	5 - Very Good Alignment	Many lessons and methods help students practice this benchmark.
MA.2.NSO.2.2	Identify the number that is ten more, ten less, one hundred more and one hundred less than a given three-digit number.	5 - Very Good Alignment	Models and place value charts are used in the lesson.
MA.2.NSO.2.3	Add two whole numbers with sums up to 100 with procedural reliability. Subtract a whole number from a whole number, each no larger than 100, with procedural reliability.	5 - Very Good Alignment	Students solve these problems using real-world conceptions and equations.
MA.2.NSO.2.4	Explore the addition of two whole numbers with sums up to 1,000. Explore the	5 - Very Good Alignment	Many methods are used for students to

	subtraction of a whole number from a whole number, each no larger than 1,000.		explore this benchmark.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	There are areas to explain their thinking.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Students use many different manipulatives throughout the curriculum.
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	5 - Very Good Alignment	Students build fluency of concepts throughout the topics.

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>4 - Good Alignment</p>	<p>Math Talks are included in the lessons. This is an opportunity for students to have discussions.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p>	<p>5 - Very Good Alignment</p>	<p>Many areas involve students understanding a pattern.</p>

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	4 - Good Alignment	The explore section involves this MTR.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. 	4 - Good Alignment	The Problem of the Day, word problems and measurement lessons connect to real-world concepts.

	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	In independent practice and assessments, students need to explain their reasoning.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	The word problems and concepts allow for comprehension of grade level text.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	When estimating, students need to make inferences.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Throughout the lesson, students must listen to the directions and teaching.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Some of the space allows for students to create quality work.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Math talks help students practice this concept.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Math talks helps ELL students communicate with peers and teachers.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	Math talks helps ELL students communicate with peers and teachers.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	The curriculum aligns with the state's benchmarks.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	The skill level matches second grade learners.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	The materials are adaptable for every classroom. Students learn through multiple methods.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	The I can statements help students understand the significance.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The complexity matches the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	The complexity is aligned to the grade level, especially when students learn and use 3-digit numbers.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The pacing and flow is organized correctly.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	The information was portrayed in an expert manner.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	The sources align to the quality of the materials.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	All the links connected to the correct material needed for the benchmark.

11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	There was no notice of bias or contradictions.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	It matches the discipline.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	All of the material is factual.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	The content matches our new standards.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	The material is relevant to the benchmarks.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Most of the content is relevant to second graders.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Most of the content is connect to 2nd graders life and is meaningful.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Most of the content is meaningful and creates connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	The material is fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material was appropriate and portrays animals and people in the correct way.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	The benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	All of the activities and materials are provided through the curriculum.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	The topics and methods align to both.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The curriculum is organized in a way for students to learn concrete to abstract.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Visuals of the manipulatives are helpful to students. For example, there are visuals of place value cubes to help students learn 2-Digit and 3-Digit numbers.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	The pace is acceptable for the grade level and school year.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	ELL supports and common misconceptions are explained in each lesson.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The presentation requirements are great.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Different teaching styles are given as options.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The big ideas are thoroughly taught using different methods.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Outcomes are clear to the teacher and students through

		the standards written on each lesson and the I can statements for students.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Students are taught many methods and ways of solving problems to later choose which one works for them.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	"Ready for more" has students using different learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	There is some activities that involve movement and learning through the kinesthetic style.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	The materials are well organized.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	The lessons build from concrete to abstract.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	The methods teach to the targeted outcome.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	The students need to explain their thinking when completing the assessments.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	The assessments are aligned to the learning outcomes.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	The lessons adhere to all learning styles and provide ELL accommodations and remediation lessons.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The lessons align to all the benchmarks.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The learning requirements are met.
---	-------------------------	------------------------------------

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	The material prohibits CRT in all the instructional materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	It omits this way of teaching.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	It omits this subject.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	The SEL standards are not a focus in the curriculum.

Copyright: 2023

Edition: N/A

Grade Level: K-5

Course: [Grade Three Mathematics](#)

Bid ID: 457

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The overall usability would be fairly easy for the average teacher to use. However, this would only garner average learning by the students. Using this textbook you would need a knowledgeable teacher to implement above and beyond what is written in the student and teacher editions to meet the Mathematical Thinking and Reasoning standards. A teacher could simply have students open to a Lesson/page in the book and read through the opening problem, solutions, and examples but this wouldn't mean the deep conversations and

explorations into the math are happening. The problems could be used for this, and some notes suggesting this are in the TE, but it will be up to how teachers use this product in their classrooms ultimately that will determine student success with the B.E.S.T. standards for mathematics.

Standard	Description	Reviewer Rating	Rating Justification
MA.3.AR.1.1	Apply the distributive property to multiply a one-digit number and two-digit number. Apply properties of multiplication to find a product of one-digit whole numbers.	5 - Very Good Alignment	From the evidence shared, meets the standard
MA.3.AR.1.2	Solve one- and two-step real-world problems involving any of four operations with whole numbers.	3 - Fair Alignment	In most of the lessons, the title of the lesson gives away the operation. Students should be using the context of the problem to determine the operation.
MA.3.AR.2.1	Restate a division problem as a missing factor problem using the relationship between multiplication and division.	4 - Good Alignment	From the two examples provided, seems aligned.
MA.3.AR.2.2	Determine and explain whether an equation involving multiplication or division is true or false.	2 - Poor Alignment	There is only one lesson given as an example, and in the lesson there are only a few practice problems relating this standard.
MA.3.AR.2.3	Determine the unknown whole number in a multiplication or division equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Only one lesson truly matched this standard, but the others listed could be considered as applying the standard in different situations

MA.3.AR.3.1	Determine and explain whether a whole number from 1 to 1,000 is even or odd.	4 - Good Alignment	This could have been met better by not talking about divisibility rules
MA.3.AR.3.2	Determine whether a whole number from 1 to 144 is a multiple of a given one-digit number.	4 - Good Alignment	Only one specific example was given, it seems to meet the standard, but not much practice with the standard
MA.3.AR.3.3	Identify, create and extend numerical patterns.	4 - Good Alignment	From the examples listed, seems to meet the standard
MA.3.DP.1.1	Collect and represent numerical and categorical data with whole-number values using tables, scaled pictographs, scaled bar graphs or line plots. Use appropriate titles, labels and units.	4 - Good Alignment	There are a lot of uses of tally charts, which is a 1st grade standard. All of the tally charts could have easily been tables
MA.3.DP.1.2	Interpret data with whole-number values represented with tables, scaled pictographs, circle graphs, scaled bar graphs or line plots by solving one- and two-step problems.	4 - Good Alignment	There are a lot of uses of tally charts, which is a 1st grade standard. All of the tally charts could have easily been tables
MA.3.FR.1.2	Represent and interpret fractions, including fractions greater than one, in the form of $\frac{\square}{n}$ as the result of adding the unit fraction $\frac{1}{n}$ to itself m times.	3 - Fair Alignment	No examples of fractions greater than one, too much use of "parts out of" terminology vs. talking about groups of unit fractions
MA.3.FR.1.3	Read and write fractions, including fractions greater than one, using standard form, numeral-word form and word form.	3 - Fair Alignment	From the examples shared, fair alignment, needs more models of fractions greater than one on a number line, and no examples of mixed numbers

MA.3.FR.2.1	Plot, order and compare fractional numbers with the same numerator or the same denominator.	3 - Fair Alignment	Should be more emphasis on using number lines and plotting fractions to order and compare according to the benchmark
MA.3.FR.2.2	Identify equivalent fractions and explain why they are equivalent.	4 - Good Alignment	Only two lessons, but seem aligned to benchmark
MA.3.GR.1.1	Describe and draw points, lines, line segments, rays, intersecting lines, perpendicular lines and parallel lines. Identify these in two-dimensional figures.	2 - Poor Alignment	The term right angle is used quite often, the benchmark calls for the terms square angle or square corner. Also more emphasis on lines, points, line segments, etc. in abstract pictures vs. with shapes. Box on page 741 is confusing, because it is 3D it skews the view of the angle.
MA.3.GR.1.2	Identify and draw quadrilaterals based on their defining attributes. Quadrilaterals include parallelograms, rhombi, rectangles, squares and trapezoids.	3 - Fair Alignment	Lesson 2 uses right angles and "less than" and "more than" right angles to classify shapes, this is 4th grade. Venn diagrams are not specifically mentioned until 5th grade standards.
MA.3.GR.1.3	Draw line(s) of symmetry in a two-dimensional figure and identify line-symmetric two-dimensional figures.	5 - Very Good Alignment	Examples meet the benchmark.
MA.3.GR.2.1	Explore area as an attribute of a two-dimensional figure by covering the figure with unit squares without gaps or overlaps. Find areas of rectangles by counting unit squares.	4 - Good Alignment	Defines area as the number of squares "inside" a figure rather than "covering" the figure. Lessons 3 & 4

			should be GR.2.2 as multiplication is used. GR.2.1 should be a connecting benchmark for Lessons 3 &4.
MA.3.GR.2.2	Find the area of a rectangle with whole-number side lengths using a visual model and a multiplication formula.	4 - Good Alignment	The GR.2.2 should be a connecting benchmark with Lessons 1, 2, & 5.
MA.3.GR.2.3	Solve mathematical and real-world problems involving the perimeter and area of rectangles with whole-number side lengths using a visual model and a formula.	4 - Good Alignment	Students should be encouraged to find their own formulas for perimeter, not given one.
MA.3.GR.2.4	Solve mathematical and real-world problems involving the perimeter and area of composite figures composed of non-overlapping rectangles with whole-number side lengths.	5 - Very Good Alignment	Examples shown meet the benchmark
MA.3.M.1.1	Select and use appropriate tools to measure the length of an object, the volume of liquid within a beaker and temperature.	2 - Poor Alignment	Line plots with fractions are no longer in 3rd grade.
MA.3.M.1.2	Solve real-world problems involving any of the four operations with whole-number lengths, masses, weights, temperatures or liquid volumes.	4 - Good Alignment	Problem solving involving measurement units should be whole numbers not fractions, there are a few word problems involving fractions.
MA.3.M.2.1	Using analog and digital clocks tell and write time to the nearest minute using a.m. and p.m. appropriately.	3 - Fair Alignment	The lesson on am/pm is a 2nd grade benchmark.
MA.3.M.2.2	Solve one- and two-step real-world problems involving elapsed time.	5 - Very Good Alignment	Examples given meet the benchmark.
MA.3.NSO.1.1	Read and write numbers from 0 to 10,000 using standard form, expanded form and word form.	5 - Very Good Alignment	Example given meets the benchmark

MA.3.NSO.1.2	Compose and decompose four-digit numbers in multiple ways using thousands, hundreds, tens and ones. Demonstrate each composition or decomposition using objects, drawings and expressions or equations.	5 - Very Good Alignment	Example given meets the benchmark
MA.3.NSO.1.3	Plot, order and compare whole numbers up to 10,000.	5 - Very Good Alignment	Examples given meets the benchmark
MA.3.NSO.1.4	Round whole numbers from 0 to 1,000 to the nearest 10 or 100.	4 - Good Alignment	Students should develop their own methods for rounding rather than be given a procedure such as on page 46. Rounding is an example of estimation, not the only way to estimate, students should not be told to round to certain place values when estimating sums and differences.
MA.3.NSO.2.1	Add and subtract multi-digit whole numbers including using a standard algorithm with procedural fluency.	4 - Good Alignment	The lessons show many different strategies for addition and subtraction, however they are all part of different lessons rather than comparing and contrasting the strategies and determining when one might be most efficient.
MA.3.NSO.2.2	Explore multiplication of two whole numbers with products from 0 to 144, and related division facts.	4 - Good Alignment	Only two lessons involving division models.
MA.3.NSO.2.3	Multiply a one-digit whole number by a multiple of 10, up to 90, or a multiple of 100, up to 900, with procedural reliability.	5 - Very Good Alignment	Examples meet the benchmark

MA.3.NSO.2.4	<p>Multiply two whole numbers from 0 to 12 and divide using related facts with procedural reliability.</p>	<p>5 - Very Good Alignment</p>	<p>Examples meet the benchmark</p>
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 	<p>3 - Fair Alignment</p>	<p>If used as the book shows, most of the thinking is done for the students in the examples. A teacher could use the problems without the book to engage in MTR.1.1</p>
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	<p>3 - Fair Alignment</p>	<p>The examples show different models or strategies, but there is not a lot of questions asking students to compare or find what is the same about them</p>
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p>	<p>3 - Fair Alignment</p>	<p>There are opportunities for</p>

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		<p>students to demonstrate fluency, however they could just copy what is shown in the examples in the book. The teacher will need to talk to or ask the students to demonstrate their understanding.</p>
<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>3 - Fair Alignment</p>	<p>The opportunity is provided in the book, however it will be up to the teacher to facilitate these discussions.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p>	<p>3 - Fair Alignment</p>	<p>Most of these examples use patterns within the lesson, however they do not connect to prior times when students may use certain strategies,</p>

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		<p>such as connecting equal groups of single digit factors to future work with equal groups of 2- or 3-digit factors.</p>
<p>MA.K12.MTR.6.1</p>	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>4 - Good Alignment</p>	<p>There are decent opportunities for students to assess the methods from the book. The teacher will need to ensure students are also assessing each others' work.</p>
<p>MA.K12.MTR.7.1</p>	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. 	<p>5 - Very Good Alignment</p>	<p>The examples demonstrate the standard</p>

	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	There seem to be an adequate amount of opportunities to meet this standard
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	The examples seem to meet the standard
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	The examples seem to meet the standard
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	The examples seem to meet the standard
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard

ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	There are opportunities, but it will depend on how the teacher engages the students in this standard
MA.3.FR.1.1	Represent and interpret unit fractions in the form $\frac{1}{n}$ as the quantity formed by one part when a whole is partitioned into n equal parts.	3 - Fair Alignment	Did not see many examples of fractions greater than one until the set fractions lesson, could use more examples of fractions on a number line when introducing fractions and unit fractions

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Mostly the lessons aligned with the standards for the grade level
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	There were a few lessons that seemed to align with different grade level, such as tally marks, fractions on line plots, use of Venn Diagrams, etc.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The problems in the lessons could be used for classroom use pretty much as is.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Most of the content seems aligned with the level
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Most of the content seems aligned with the level
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Most of the content seems aligned with the level

7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	The time period for teaching in a lesson and for the year should be possible
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	There are multiple examples of cited materials
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	The cited resources support content knowledge
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	I did not see any mistakes
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	I did not see any examples of this
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	I did not see anything that stood out
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	I did not see any mistakes
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Everything seemed up to date
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Everything seemed up to date
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	I do not know if children this age would be interested in all of the real-world examples, but they are standard for similar types of textbooks.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	I do not know if children this age would be interested in all of the real-world examples, but they are standard for similar types of textbooks.

18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	I do not know if children this age would be interested in all of the real-world examples, but they are standard for similar types of textbooks.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	I did not see any unfair or biased portrayals
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	I did not see any examples of this
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	In general, yes

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	With some adjustment the teacher could easily use what is in the book alone
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Seems pretty simple to choose materials to use
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	The TE is simple to understand and the flow is simple
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Typical compared to other textbooks
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Seems to allow enough time for most standards, some such as rounding could use more time.

6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	There are suggested resources the teacher could utilize
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall, it is similar to pretty much all K-5 math textbooks available

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	Average for a textbook
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Follows the standards
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Clear instruction for the teachers
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Most of this work will need to be done by the teacher, but there are opportunities
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	There are many ways to adapt the resources in the teacher edition, it will be up to the teacher to do this
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	A teacher could adapt this to make it more engaging, but as it is, it is no more engaging than any other textbook
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	There are options for the teacher in the teacher edition
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Seem to be aligned to what the standards call for

9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Seem to be aligned to what the standards call for
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Many opportunities for varied assessment
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	The textbook clearly aligns outcomes with the assessment opportunities
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	There are suggestions in the teacher edition, onus would be on the teacher to make these adjustments
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	Again, it will be up to the teacher. As written I don't see the MTR's being met without interjection from the teacher
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	I would say this is an average textbook, nothing really stands out for the positive or the negative

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	Did not see any examples
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Did not see any examples
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Did not see any examples
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	Did not see any examples

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?	No
How would you rate the overall usability of the instructional material?	3 - Fair Alignment
Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.	Alignment to the benchmarks and the information provided in the benchmarks and clarifications is sometimes lacking, either not going far enough or going too far into the next grade level or content that is not necessary for the grade level. It follows a gradual release model and provides a lot of scaffolding for the average student.

Standard	Description	Reviewer Rating	Rating Justification
MA.3.AR.1.1	Apply the distributive property to multiply a one-digit number and two-digit number. Apply properties of multiplication to find a product of one-digit whole numbers.	3 - Fair Alignment	Distributive property for 1-digit by 2-digit numbers was not a focus of these lessons and there were no arrays in the multiply by 11 or 12 lesson to help students make sense of the purpose of the property and its usefulness
MA.3.AR.1.2	Solve one- and two-step real-world problems involving any of four operations with whole numbers.	3 - Fair Alignment	Provides 1 and 2 step word problems but does not provide different types of word problems according to the situations appendix in the BEST standards; mainly shows quotative division and not partitive division
MA.3.AR.2.1	Restate a division problem as a missing factor problem using the relationship between multiplication and division.	4 - Good Alignment	Hits the majority of the standard; very few problems extend to factors beyond 9
MA.3.AR.2.2	Determine and explain whether an equation involving multiplication or division is true or false.	3 - Fair Alignment	Hits the standard but only allows for minimal practice
MA.3.AR.2.3	Determine the unknown whole number in a multiplication or division equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	The unknowns in the equations are included in different spots, but none were seen as quotient = ___ divided by dividend
MA.3.AR.3.1	Determine and explain whether a whole number from 1 to 1,000 is even or odd.	2 - Poor Alignment	Only addresses even and odd when referring to patterns in addition or

			multiplication table, not identifying whether numbers by themselves are odd or even
MA.3.AR.3.2	Determine whether a whole number from 1 to 144 is a multiple of a given one-digit number.	4 - Good Alignment	Shows different ways of finding multiples and provides some word problem applications
MA.3.AR.3.3	Identify, create and extend numerical patterns.	4 - Good Alignment	Provides opportunities with patterns with different operations
MA.3.DP.1.1	Collect and represent numerical and categorical data with whole-number values using tables, scaled pictographs, scaled bar graphs or line plots. Use appropriate titles, labels and units.	4 - Good Alignment	Variety of graphs (some horizontal and others vertical); includes some scaled options
MA.3.DP.1.2	Interpret data with whole-number values represented with tables, scaled pictographs, circle graphs, scaled bar graphs or line plots by solving one- and two-step problems.	3 - Fair Alignment	Asks one and two step questions with different types of graphs; no circle graphs
MA.3.FR.1.2	Represent and interpret fractions, including fractions greater than one, in the form of $\frac{\square}{n}$ as the result of adding the unit fraction $\frac{1}{n}$ to itself m times.	4 - Good Alignment	Has students write fractions as a sum of unit fractions; provides models to support
MA.3.FR.1.3	Read and write fractions, including fractions greater than one, using standard form, numeral-word form and word form.	5 - Very Good Alignment	good practice naming and understanding fractions using different representations to bring meaning to what a fraction is
MA.3.FR.2.1	Plot, order and compare fractional numbers with the same numerator or the same denominator.	3 - Fair Alignment	minimal practice plotting fractions on a number line and using

			the number line to compare and order fractions
MA.3.FR.2.2	Identify equivalent fractions and explain why they are equivalent.	2 - Poor Alignment	many problems are asking students to generate equivalent fractions and are not focused on determining whether fractions are equivalent or not; number lines are not used in this process
MA.3.GR.1.1	Describe and draw points, lines, line segments, rays, intersecting lines, perpendicular lines and parallel lines. Identify these in two-dimensional figures.	2 - Poor Alignment	right angle is not a part of the benchmark and neither is naming these in a figure, just identifying them and describing them
MA.3.GR.1.2	Identify and draw quadrilaterals based on their defining attributes. Quadrilaterals include parallelograms, rhombi, rectangles, squares and trapezoids.	2 - Poor Alignment	right angle is not a part of the benchmark and neither is naming these in a figure, just identifying them and describing them; the intent of the benchmark is not venn diagrams of shapes
MA.3.GR.1.3	Draw line(s) of symmetry in a two-dimensional figure and identify line-symmetric two-dimensional figures.	3 - Fair Alignment	good practice identifying and drawing lines of symmetry, but goes beyond the scope of the benchmark by making students draw figures with lines of symmetry
MA.3.GR.2.1	Explore area as an attribute of a two-dimensional figure by covering the figure with unit squares without gaps or overlaps. Find areas of rectangles by counting unit squares.	3 - Fair Alignment	The first 2 lessons are decently aligned; focus more on area of irregular shapes than on area of rectangles;

			the last 2 lessons linked relate more to 3.GR.2.2
MA.3.GR.2.2	Find the area of a rectangle with whole-number side lengths using a visual model and a multiplication formula.	3 - Fair Alignment	gives students the opportunity to make sense of the area formula and use it to find the area of rectangles; goes beyond the clarifications of up to 12 x 12 rectangles
MA.3.GR.2.3	Solve mathematical and real-world problems involving the perimeter and area of rectangles with whole-number side lengths using a visual model and a formula.	2 - Poor Alignment	the intent of the benchmark is not to find missing side lengths; the problems go outside the clarification of up to 12 x 12 rectangles
MA.3.GR.2.4	Solve mathematical and real-world problems involving the perimeter and area of composite figures composed of non-overlapping rectangles with whole-number side lengths.	3 - Fair Alignment	some shapes are rectangles and ask students to make them composite shapes; many composite shapes have more than 2 parts, so there is not much practice for composite shapes made of 2 rectangles
MA.3.M.1.1	Select and use appropriate tools to measure the length of an object, the volume of liquid within a beaker and temperature.	2 - Poor Alignment	goes beyond the extent of the benchmark; fractions of cups, cups, pints, quarts, and gallons, weight of objects; does not have students measure to the nearest centimeter
MA.3.M.1.2	Solve real-world problems involving any of the four operations with whole-number	2 - Poor Alignment	goes beyond extent of benchmark; how many

	lengths, masses, weights, temperatures or liquid volumes.		1/2 cups are in 4 cups (dividing a whole number by a fraction); requires conversions to solve
MA.3.M.2.1	Using analog and digital clocks tell and write time to the nearest minute using a.m. and p.m. appropriately.	3 - Fair Alignment	students can tell and write time from an analog and a digital clock; they are expected to describe the time in words which seems to be beyond the extent of the benchmark; no practice on having a clock show a given time as shown in the B1G-M document
MA.3.M.2.2	Solve one- and two-step real-world problems involving elapsed time.	3 - Fair Alignment	not many opportunities to cross an hour when calculating elapsed time, but gives practice solving different types of time interval problems
MA.3.NSO.1.1	Read and write numbers from 0 to 10,000 using standard form, expanded form and word form.	4 - Good Alignment	practice with forms of numbers to 10,000
MA.3.NSO.1.2	Compose and decompose four-digit numbers in multiple ways using thousands, hundreds, tens and ones. Demonstrate each composition or decomposition using objects, drawings and expressions or equations.	3 - Fair Alignment	not too much practice writing expressions and equations for the decompositions
MA.3.NSO.1.3	Plot, order and compare whole numbers up to 10,000.	4 - Good Alignment	good practice plotting numbers; not as much practice using number lines to compare numbers
MA.3.NSO.1.4	Round whole numbers from 0 to 1,000 to the nearest 10 or 100.	4 - Good Alignment	shows rounding on a number line and has

			students practice rounding to estimate sums and differences
MA.3.NSO.2.1	Add and subtract multi-digit whole numbers including using a standard algorithm with procedural fluency.	3 - Fair Alignment	provides opportunities to add and subtract; does not relate strategies to bring meaning to the work
MA.3.NSO.2.2	Explore multiplication of two whole numbers with products from 0 to 144, and related division facts.	3 - Fair Alignment	includes different representations of multiplication (many more than are required by the benchmark), but gives practice for each modeling
MA.3.NSO.2.3	Multiply a one-digit whole number by a multiple of 10, up to 90, or a multiple of 100, up to 900, with procedural reliability.	5 - Very Good Alignment	good practice and visuals for multiplying by multiples of 10 or 100
MA.3.NSO.2.4	Multiply two whole numbers from 0 to 12 and divide using related facts with procedural reliability.	4 - Good Alignment	good practice using efficient strategies to multiply
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	3 - Fair Alignment	has some opportunities

MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	<p>3 - Fair Alignment</p>	<p>allows for multiple ways to solve problems, but doesn't always encourage building the connections between the strategies</p>
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	<p>2 - Poor Alignment</p>	<p>does not build on the different levels of fluency as discussed in the BEST standards</p>
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p>	<p>3 - Fair Alignment</p>	<p>has some opportunities</p>

	<p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	2 - Poor Alignment	does not focus on building connections to previously learned materials and relating current content to past information
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p>	2 - Poor Alignment	reasonableness is not highlighted very much; could have easily used lessons on estimate

	<p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		<p>sums and differences to show how rounding helps you assess the reasonableness</p>
<p>MA.K12.MTR.7.1</p>	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>3 - Fair Alignment</p>	<p>some problems relate to student interests where as others do not</p>
<p>ELA.K12.EE.1.1</p>	<p>Cite evidence to explain and justify reasoning.</p>	<p>2 - Poor Alignment</p>	<p>does not ask students to support with evidence</p>
<p>ELA.K12.EE.2.1</p>	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>3 - Fair Alignment</p>	<p>has some opportunities</p>
<p>ELA.K12.EE.3.1</p>	<p>Make inferences to support comprehension.</p>	<p>2 - Poor Alignment</p>	<p>has minimal opportunities</p>
<p>ELA.K12.EE.4.1</p>	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p>	<p>3 - Fair Alignment</p>	<p>has some opportunities</p>

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	has some opportunities
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	2 - Poor Alignment	has minimal opportunities
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	has some opportunities
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	has some opportunities
MA.3.FR.1.1	Represent and interpret unit fractions in the form $\frac{1}{n}$ as the quantity formed by one part when a whole is partitioned into n equal parts.	4 - Good Alignment	allows students to interpret the meaning of a unit fraction

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	depends on the benchmark; some are aligned well and others do not hit the intent of the benchmark and clarifications
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	depends on the benchmark; some are aligned well and others do not hit the intent of the benchmark and clarifications
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	can be implemented in the classroom with some changes necessary
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	some lessons provide sufficient details, but others need more
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	some benchmarks are better aligned to the intent of the

		benchmark and the instructional items in the B1G-M than others
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	the level of the lesson sometimes meets the student abilities and grade levels but sometimes do not match
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	some lessons need additional time for the difficulty of the benchmark
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	good information on content for teachers
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	good use of additional sources
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	no errors noticed
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	no bias seen
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	none seen
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	no issues in facts seen
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	decently up to date but lacks some of the current research on math fluency and not using the gradual release process
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	3 - Fair Alignment	some contexts are more relevant than others; some are outdated

16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	3 - Fair Alignment	some contexts are more relevant than others; some are outdated
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	3 - Fair Alignment	some contexts are more relevant than others; some are outdated
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	3 - Fair Alignment	at times brings in additional content areas
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	seems fair and unbiased
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	no issues seen
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	some times; there are discrepancies

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	some benchmarks are well taught and provide enough resources, while others would require quite a bit of additional teaching materials
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	3 - Fair Alignment	some issues with alignment
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	3 - Fair Alignment	at times the order does not make sense but for the most part seems reasonable for the course
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in	4 - Good Alignment	seem mostly engaging for a textbook

understanding of the content at a level appropriate to the students' abilities.		
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3 - Fair Alignment	some lessons are better chunked than others so some are more manageable at one time than others
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	seems to be easily used
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	3 - Fair Alignment	decent presentation

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	some elements will motivate and engage learners, but most appear as just a "boring workbook page"
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	some ideas are taught well and thoroughly but not all
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	clear statements of information and outcomes present
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	sometimes there is too much scaffolding that does not allow for students to be problem solvers
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	has options for reteach, enrichment, ESE, and ESOL
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	some elements will motivate and engage learners, but most appear as just a "boring workbook page"

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	some good activities to extend the content
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	some strategies that are effective but mostly older teaching styles
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	2 - Poor Alignment	too much scaffolding and gradual release instead of allowing students to persevere in problem solving
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	correlation seen
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	some assessment opportunities
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	considers many groups of students
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	some MTRs are integrated better than others
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	standard

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no CRT seen
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no CRT seen
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no CRT seen

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	none seen

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Standard	Description	Reviewer Rating	Rating Justification
----------	-------------	-----------------	----------------------

MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	4 - Good Alignment	good balance of remainder interpretation
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	5 - Very Good Alignment	fraction types are accurate as per benchmark
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	good use of real world problems
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	4 - Good Alignment	practice with true/false & explanations
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	good use of models
MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	4 - Good Alignment	0 and 1 not prime or composite - need better clarification of that
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	5 - Very Good Alignment	presented in a variety of ways
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Are they asked to collect any data?
MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	5 - Very Good Alignment	includes all types of data representation in benchmark
MA.4.DP.1.3	Solve real-world problems involving numerical data.	5 - Very Good Alignment	real world problems are realistic

MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	5 - Very Good Alignment	good use of models and real world examples
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	5 - Very Good Alignment	correct use of fraction types and denominators
MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	5 - Very Good Alignment	includes different types of models as well as how the numerator and denominator are affected
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than one, with different numerators and different denominators.	5 - Very Good Alignment	great number line use
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	5 - Very Good Alignment	objects, drawings, and equations included on one example to compare and reach all types of learners
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	4 - Good Alignment	little word form
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	4 - Good Alignment	lacking visual models
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	begins with unit fractions to extend previous understanding

MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	reflex angle illustrations are misleading
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	5 - Very Good Alignment	protractor use
MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	4 - Good Alignment	need more practice with unknown angle measure
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	4 - Good Alignment	missing practice with variable for missing side
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	5 - Very Good Alignment	real world examples - a chapter for each
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	5 - Very Good Alignment	temp in separate chapter
MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	5 - Very Good Alignment	time in separate chapter
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	4 - Good Alignment	no items with fractions
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	5 - Very Good Alignment	well done
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	4 - Good Alignment	begins with models

MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	5 - Very Good Alignment	stays within limits
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	5 - Very Good Alignment	includes number lines - stays within limits
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	5 - Very Good Alignment	stays within parameters set in benchmark
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	5 - Very Good Alignment	number line use
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	includes product first
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	taught multiple strategies
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	different strategies shared
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	multiple strategies
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	rounding in more than one lesson
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	5 - Very Good Alignment	ample practice
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	5 - Very Good Alignment	follows benchmark
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	many methods modeled

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	many types of models included throughout
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	4 - Good Alignment	not explicit, but implied use

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	consistent real world applications and examples

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	many opportunities to explain
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	grade level text
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	some opportunity for this in launches
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	a lot of suggestions to discuss in teacher sections
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	clear instructions in teacher sections
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Launch Into sections
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Strategies for Multilingual Learners
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	SEL section

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	see alignment above
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	see alignment above
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	good balance of practice and instruction with spiral review and problem solving

4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	mostly
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	including most of the BIG M clarifications and instructional item types
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	test is on grade level
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Overall pacing is fair - considering progress monitoring and not FSA next year
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	yes
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	yes
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	I did not come across any
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	no bias found
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	great use of models
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	none found
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	MTRs included

15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	much is relevant, ie. manatees
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	yes
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	many consistent real world connections throughout
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	opportunities to read and write - various content areas incorporated
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	consistent use
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	appropriate
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	majority very good alignment

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Thorough teacher PD and side information in TE
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	yes within my scope
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	in order of BEST Standards
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in	5 - Very Good Alignment	relevant and colorful

understanding of the content at a level appropriate to the students' abilities.		
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	I believe the rate is fair
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	Waggle
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	presentation with Waggle component is well done

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	real world connections, good spacing, colorful, nice photos
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Launch sections
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	BEST benchmarks and MTRs clearly notated with clear I Can statements per lesson
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	decent scaffolding
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	many strategies and models with good teacher support
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	more mental than physical
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	sufficient and aligned practice, spiral, and assessments

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	many strategies taught but not assessed - students can choose strategy
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	many strategies taught but not assessed - students can choose strategy
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	lesson checks, reviews, performance assessments, and summatives with various item types also included in practice items
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	aligned well to instruction and practice
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	ELL included, but enrich activities are not very rigorous, some tier 2/3 activities, but may be more in Waggle
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	MTRs clearly stated and good use of text
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	most learning requirements are very good

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no CRT seen
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	yes
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	none seen

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	includes SEL in teacher parts

Grade Level: K-5

Course: [Grade Four Mathematics](#)

Bid ID: 458

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The curriculum is very easy to use and provides ample professional development and support content for teachers. The curriculum provides ample resources for teachers to teach the standards as well as assess the standards. And, additional practice is provided for those students who need reteaching. One recommendation would to include content that could be used during an intervention block to support prerequisite skills prior to students learning the grade level standard. Content for proactive teachers is not present, only reactive content.

Although visuals and concrete representations are included in many lessons, additional practice scaffolding the use manipulatives and linking them to procedures could be included. Additionally, teachers would benefit from multiple activities to support content specific vocabulary rather than just the one page for each chapter.

Standard	Description	Reviewer Rating	Rating Justification
MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	Aligns to the standard.
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	4 - Good Alignment	Ch. 5 Lesson 1 doesn't involve addition and subtraction of fractions. Otherwise, the other lessons provide adequate problems involving the content of the standard with some variety in the problems.
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	Problems provided with visuals understand the concept within the standard.
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	4 - Good Alignment	Only 6 practice problems provided.
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	Lesson content aligns to stanard.

MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	4 - Good Alignment	Although multiples are not mentioned in the BEST standard, they are included in this lesson grouped with this standard. MAFS.4.OA.2.4 included multiples in the standard, however this content includes multiples. Although NSO.2.1 is also referenced, I don't see the term multiples included in any of the BEST standards.
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	4 - Good Alignment	The standard is aligned, however additional practice should be provided.
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	5 - Very Good Alignment	Content matched the standard and provided ample practice.
MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	5 - Very Good Alignment	Content matched the standard and provided ample practice.
MA.4.DP.1.3	Solve real-world problems involving numerical data.	5 - Very Good Alignment	Content matched the standard and provided ample practice.
MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	5 - Very Good Alignment	Skill demonstrated pg. 517-522
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	5 - Very Good Alignment	Content aligns well.

MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	5 - Very Good Alignment	Content aligns well.
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than one, with different numerators and different denominators.	5 - Very Good Alignment	Content aligns well.
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	5 - Very Good Alignment	Content aligns well.
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	5 - Very Good Alignment	Content aligned. Clarification #1 included in instruction.
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	5 - Very Good Alignment	Few practice problems, but aligned.
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	Content aligned.
MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	Few "real-world pictures" (pg. 589-594, 595-600) as stated in the benchmark clarifications.
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	5 - Very Good Alignment	Content aligned and ample practice provided.

MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	5 - Very Good Alignment	Content aligned and ample practice provided.
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	5 - Very Good Alignment	Aligns to standard. Ample practice provided.
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	5 - Very Good Alignment	Aligns to standard. Ample practice provided.
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	3 - Fair Alignment	Attributes not clearly defined in given lessons.
MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	5 - Very Good Alignment	Aligns the to standard stays within the benchmark clarifications.
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	3 - Fair Alignment	Problems involving distance were not included. Problems did not include fractions.
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	2 - Poor Alignment	Pg. 573-578. The standard states addition/subtraction problems. However, lesson 6 involves multiplication and division. The NSO standard also listed doesn't not include multiplication/division.
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	5 - Very Good Alignment	Content aligned

MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	5 - Very Good Alignment	Content aligned
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	5 - Very Good Alignment	Content aligned
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	5 - Very Good Alignment	Content aligned
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	5 - Very Good Alignment	Content aligned
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	Content aligned. Ample practice.
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	Content aligned.
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	5 - Very Good Alignment	Content aligned.
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	5 - Very Good Alignment	Content aligned.

ELA.K12.EE.3.1	Make inferences to support comprehension.	2 - Poor Alignment	Not a skill embedded in a strong way.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Variety of situations not present.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Format evident within textbook content.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	1 - Very Poor/No Alignment	Explicit teaching of skill not evident.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	ELL strategies included throughout content.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	ELL strategies include instructional purposes.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most of the standards are aligned well.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Skills don't appear to go beyond the extent of the standard.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	The materials are very adaptable for classroom instruction.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Additional teacher support beyond the text is needed, but most pages provide enough information.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The complexity appears to match that of the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Most of the content matches the standards, and therefore matches grade level student abilities.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	The time frame provided in the instructional model will only work in ideal situations. Additional time will be needed for transition, set up, lesson adjustments as needed, etc.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	3 - Fair Alignment	Professional learning references published 10+ years ago, with some references published in the 90's. Use more updated references.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Sources contribute to the quality of the content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	An error was found and submitted to the appropriate contact.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias or contradictions found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content is accurate.

13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	All content is factual and accurate.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content is taught in a progression that makes sense including a focus on the concepts being taught.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	The content teaches the grade-level standards, is appropriate and relevant.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Context is appropriate for 9/10 year old students.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content includes connections to Florida life such as Manatee and the Sunshine Skyway Bridge.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	A variety of disciplines are found within the text.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Multicultural representation can be found throughout the student textbook.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No inappropriate content found.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	In general, most of the content of the standards for this course are covered. A note was added for MA.4.M.2.2.

Presentation	Reviewer Rating	Rating Justification
--------------	-----------------	----------------------

1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	If purchasing all the resources provided in this curriculum, the teacher should not need to prepare additional teaching materials.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components appear to be aligned.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Easy to follow organization.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	The content readability was appropriate for 4th grade students.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Pacing may be a bit fast for ELL or ESE students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	Student textbook does not seem to have an audio component except for the interactive lesson. And, the audio that reads the pages in the interactive lesson sounds like a robot. The students are not able to access the audio for each component in the digital materials since they are in pdf format.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall good alignment.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Topics are presented in an interesting way, typically with manipulatives or visuals.

2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Concepts are grouped together in a way that makes sense.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Chapters and lessons clearly state the goals and expectations for each lesson.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Teacher resources questioned students in a way that allowed for students to think independently without fear of saying something "wrong".
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Lesson content includes support to ELL's or struggling students. Concepts are taught using various strategies including concrete and visual representations. Content is easily adapted to meet the needs of a variety of learners.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	The materials engage the mental activity of students. Some of the activities involve physical activity, but not much.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	The activities included in the materials are organized in a logical way.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Practices for effective mathematics teaching can be found within the content. Lesson opening activity is often too guided (looking for very specific answers and strategies) to allow for students to develop their own ideas.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	The strategies incorporated focus on the concept and links the concept to the procedure.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Strong correlation

11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Yes. Assessment items provide information regarding student understanding of the targeted outcomes, and provide remediation based on the assessment results.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	Incorporate additional practice providing concrete and visual representations.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	MTR.1.1 and MTR.2.1 could be strengthened in the content.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Overall good alignment.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No content of CRT found.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No content of CRT found.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Nothing found relating to social justice and CRT.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	SEL strategies not found.

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

It was wonderful speaking with you this afternoon; thank you so much for reaching out to me. I really appreciate it.

What I am looking for is the evaluation rubric/score for our title, *Precalculus with Limits: A Graphing Approach 8th Edition*. We would like to look at that information in order to make an informed decision regarding an appeal.

I look forward to hopefully having that information by this Friday.

Have a wonderful rest of your day!

Lauren

Is there any chance that we can we get a copy of the evaluation rubric so that we can see where we were deficient?

I searched the website, but was unable to find anything.

Thank you.

Ms. Hamilton,

Thank you for the information. Are you able to provide more information on why Accelerate Learning Inc's 4th Grade Accelerated course was not recommended? We have read the information regarding appeals, but we were interested

in feedback regarding our fourth grade accelerated course.
Thank you for your time.
Take care,
Diana

Lauren,

Thank you for the email and the documents. I believe that DOE has other documents responsive to my requests. Specifically, I requested all completed evaluations for Houghton Mifflin Harcourt's ("HMH") 2021-2022 Mathematics Instructional Materials. Can you please send me the evaluations/reviewer reports for the Mathematics Instructional Materials submitted by HMH which passed the subject-specific standards score and/or did not include special topics? I'm seeking all evaluations for HMH titles—not just the evaluations for the objectionable HMH titles on the Not Recommended List.

Best regards,
Drew Parker

Subject: Re: 21-22 Instructional Materials Mathematics State Adopted List

I wanted to send this in preparation for our conversation tomorrow. My team spent yesterday and today going through the two courses that were found to have issues. In lieu of having specific examples and/or the exact thing that reviewers were trained to look for we have found three examples that are present in both courses not recommended where we highlight different cultures. The specifics of what we will share tomorrow can be found below. We look forward to our call.

-- Amanda

Review Appeal Specifics:

Repeals for the following products:

- 4th Grade Accelerated
- 3-5 Foundational

In the reviews where we were given 3's, we were not given specific examples. Only that our curriculum:

Mentions culturally responsive teaching but not CRT

AND

culturally responsive teaching is mentioned but not related to critical race theory

Response:

We have swept the curriculum and found three examples that we believe could have been flagged as we are talking about other cultures.

Next Steps:

We will replace these sections with the following:

Current:

On Fri, Apr 22, 2022 at 1:55 PM Amanda McGee - Accelerate Learning <amcgee@acceleratelearning.com> wrote:

Thank you so much for sending this so quickly! I have a few follow-up questions.

1 - Is there a way for us to get examples of what it looks like one reviewer found? We worked really hard (as I think is evidenced by being the only K-5 approved product) to follow the guidance we were given from the DOE every step of the way so it surprises me that someone found that we specifically mentioned culturally relevant teaching. Specific examples or even just pointing us to where they found it (scope/lesson) would be helpful. If we need to file an appeal to get all of that information then we will certainly understand and will do that.

2 - In regards to the proprietary materials, can you give me any more information on what is being requested? Of course, our content is our intellectual property, and we would not be ok with the whole program being given to someone.

Thanks for all the work and most likely extra hours you all have been putting in the last week!

Good morning,

Please see the attached Excel containing links to the updated content for our appeal. Each BID is on a separate tab. The PDFs in the Publisher Correction column, show the site yesterday, and the updated site this morning. Both PDFs have date/time stamps.

The "Link to correction in materials" column contains the direct links to the updated content. As a friendly reminder, we have included the URL, username, and password both on the Excel sheet and below. Users must be signed in to see the updated content on the live site.

URL: <https://stemscopes.com/math/fl/preview> Username: floridadoe Password: mathmath!

We look forward to hearing from you in the near future.

Take care,

Diana

Hi Lauren,

Thank you for publishing the list of math materials that have been approved and rejected. We understand this was a difficult process and one that ended up becoming unexpectedly controversial as well.

We know you worked hard on this review process, but we have to admit that we were dismayed to see the rejection of our submission for Algebra IB Course number 1200380. We believe there may be a misunderstanding about the way that item's coverage of standards was understood by the review committee. And therefore, we kindly request a copy of the review committee's notes for that submission in order to understand their rationale for the rejection.

We would also like to find out about the appeal process steps. Please advise.

Thanks,

Mark

Hi Tavi,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material presented is organized in a manner that provides easy and predictable usability for teachers and students. The student material provides access at majority of the benchmarks at an appropriate conceptual level for students. Earlier lessons within a concept elicit the use of models/manipulative, or provide visual aids that support learners in access the content. As students progress through out each lesson the complexity of questions increases. Students are also engaged in MTRs through purposefully placed pauses within the

text. A weakness to be aware of is over scaffolding within lessons through provided models or equation set ups. While some scaffolding may be necessary, the primary focus should be the student work and thinking, and not just filling in the blanks in the student work. The teacher material supports the learning through questioning and appropriate instructional strategies. Both resources clearly state the objectives and aligned benchmarks.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	5 - Very Good Alignment	Lessons on SE Pages 369-386 include representations with snap cubes and a ten frame. The numbers provided support doubles and make a ten strategies. All problems presented are within a sum of 20.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Multiple opportunities throughout the student work where students are provided context and must determine the operation through reasoning. For example, in Chapter 10, Lesson 6, students must interpret the context, select add or subtract and then record an number sentence to solve. Scenarios are represented with numbers, pictures and words.

MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	4 - Good Alignment	Missed opportunities for format of $c = a + b$. Student work has no context and context examples of standard. Connections made to other models and strategies.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Problem types vary according to the Situations Involving Operations with Numbers chart. There is a heavier focus on Result and Change unknown in contexts provided. Amble experiences to find missing numbers in any position in pre-written equations.
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	3 - Fair Alignment	Data sets do not include any examples of defining attributes of geometric figures to categorize.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	Problems used the data and scenarios to apply addition and subtraction.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons use grade appropriate terms such as halves and fourths. There are

			various representations and orientations of circles and rectangles partitioned as examples and non examples.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	Multiple opportunities to identify defining attributes, but limited opportunity to identify a figure based on given defining attributes
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	The standard reads "Sketch two-dimensional figures when given defining attributes." There are limited examples of where this is evident. Only a few examples can be seen on page 542, questions 14-16. Here an attribute is given and students are asked to sketch the shape. (Ex. Meg draws a shape with 6 sides.)
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Multiple lessons and examples for 2D and 3D shapes that involve composing, decomposing and identifying the geometric shapes involved. Lessons include examples of the use of 3D solid manipulatives and pattern blocks for students to access the concept.

MA.1.GR.1.4	<p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>3 - Fair Alignment</p>	<p>While there are many examples of real-world objects for stand alone figures (balls, cones, cans, etc), there are only a few real-world examples of items with multiple identifiable geometric figures. One example that does align to the standard is question 9 on page 506. This requires students to identify the geometric figures in an ice cream cone. In most other examples, they are identifying the geometric figures in composed shapes, but they are not real-world objects, but rather just composed by two stacked images.</p>
MA.1.M.1.1	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>5 - Very Good Alignment</p>	<p>Items align to the standard for estimation. Lessons prior to using a ruler use tiles to build understanding of counting units to measure. Rules presented in the text all start at zero.</p>
MA.1.M.1.2	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities for 3 items compared directly and also for indirect comparison.</p>
MA.1.M.2.1	<p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	<p>4 - Good Alignment</p>	<p>Focus on time to the hour then half hour introduced with one-</p>

			handed clock. Lacks connections to partitioning circles in half for half hour.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	2 - Poor Alignment	Resource provides images of both sides of coins. Limited opportunity to simply identify coins by name or value without having to count combinations. No reference seen that related each coin to how many equal a dollar.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	The benchmark reads "Find the value of combinations of pennies, nickels and dimes up to one dollar." The resource has lessons that also include quarters with in collections which is beyond the benchmark. Examples include problem 2 on page 394 where there is a quarter image in a series of nickels and all counting collection questions in Chapter 9 Lesson 3. Sole lesson (Chapter 9 Lesson 6) on counting bills only has examples of collections of like bills.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	Resources focus on counting sequences by 1s, 2, and 5s. Visual resources such as hundreds charts are provided. Attention to

			patterns is not called out within resources.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	2 - Poor Alignment	Majority of work has students representing numbers as tens and ones (Ex. 4 tens + 7 ones) with limited connections to expanded form (ex. 40+7). Students are not presented with word form and asked to relate it to the corresponding expanded or standard form.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Chapter 2 Lesson 6 is the primary connection to this benchmark. It provides opportunities for students to think about the same number in two different ways flexibly. They are not provided any visual aids to assist their thinking in the print. Chapter 2 Lesson 3 connects ones to tens (ex. 30 ones = 3 tens)The remaining referenced lessons and student pages focus on composing and decomposing based solely on the place value of each digit, not in a flexible manner.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Builds connection between plotting on a number line and ordering.

MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	4 - Good Alignment	Facts align to benchmark and fluency requirements.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	The relationship between addition and subtraction is more explicit in Chapter 10 lessons about related facts. Earlier chapters focus on adding and subtracting, but during instruction teachers would have to facilitate learning on efficiency using this relationship.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	Features include base ten clocks and hundred charts.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	4 - Good Alignment	Chapter 6 Lessons 10 and 11 include problems with a two-digit addended greater than 20 and varying representations including models, number lines and place value.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	All example problems have a minuend less than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	5 - Very Good Alignment	Students have opportunities to engage in open ended tasks that provide them time to grapple and preserve individually and collaboratively by responding in their own way and then sharing.

	<ul style="list-style-type: none"> Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Various lessons include the use of tools such as base ten blocks and number lines, as well as visual models for students to access and represent problems. Lessons are sequenced through the progression of concrete, representational then abstract.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	Lessons correlate to the correct level of fluency to the benchmark. Example: Chapter 7 Lesson 3 students use strategies that support automaticity.

	<ul style="list-style-type: none"> • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	<p>Lauch tasks such as the one one page 3 provides opportunities for discourse amongst students. There are also embedded discourse questions with the text such as the one one page 273.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. 	4 - Good Alignment	<p>Evidence of connections to patterns in math that hold true. Example pg. 261, students are asked to make connection to known fact to solve new problem.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Missed opportunities for estimating solutions outside of the measurement unit.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Examples are real-world and applicable to students.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students have opportunities to reference the task or their own work to explain and justify their work.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is written at an appropriate level for students to access.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	During embedded three reads, students are asked to make inferences based on the reading.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Active participation stems are embedded that promote students to explaining their thinking through discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students apply skill learned in Unpack and Draw and Model in independent practice of the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Math Talk stems promote formal math language.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most lessons aligned to state standards and the supporting documents. A few standards that were either addressed incorrectly or incomplete were

		MA.1.NSO.1.2 (lacking word form and minimal expanded form), MA.1.NSO.2.5 (no subtraction problems go beyond a minuend of 19), and MA.1.M.2.3 (combinations include quarters).
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Tasks allow students to interact with the math aligned to the benchmark. Students have opportunities to draw models, use tools and write equations throughout the text.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The adaptive practice of Waggle meets students on their personalized path to develop concepts. The TE also provides resources for in the moment lesson shifts with Reteach and Enrich pages.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The material, as seen on pages 67 and 68, provide students time to access on their own and with supports on the page to understand the content.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Lessons are appropriate for a standard teaching block.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No noticed errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No evidence of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Models through the material were representative of common tools, manipulatives, resources and representations that are aligned to the benchmarks including, but not limited to: base ten blocks, snap cubes, counters, ten frames, hundred charts, equations, part/part/whole models, and bar models.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No evidence of errors found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content aligns to benchmarks and other BEST documents.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Relevant context includes scenarios that students may experience at school (example page 213, Unlock the Problem)

		involving crayons. This allows all students to have access regardless of experiences.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The material provides opportunities to connect science and social students through additional tasks provided in the TE. Example on TE page 439
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	The visual and contextual portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material portrays people and animals ethically.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Overall the content of the benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	The resources provide material for instruction and additional practice. The online student adaptive program supports this practice as well with limited additional prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components are aligned with one another.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized in a consistent and easy to follow manner.

4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Narrative and visuals engage students
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is paces and organized in a way that makes it accessible to students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	The aligned print and digital components allow for all students to access the materials.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The material is easy to access and read for both teacher and student. Students are presented with appealing visual pages that also provide adequate work space.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	At the beginning of each lesson, teachers are provided a "Focusing on the Whole Student" section to motivate students to learn. These include topics such as self management as a learner (page 25B) and accessing prior knowledge (page 49B).
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials address the big ideas as aligned with BEST
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The TEs present clear objectives and connections for every unit (example. TE 49B) with correlating I Can statements on student pages (Example SE 49)

<p>4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.</p>	<p>4 - Good Alignment</p>	<p>Lessons are set up in a gradual release format after an open task. Students have examples to reference and problem increase in difficulty throughout lessons.</p>
<p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>	<p>3 - Fair Alignment</p>	<p>The TE materials provide some resources for adaptations based on language support. The Chapter at a Glance (example TE 47A) provides guidance around intervention and enrichment. There is little support during the lesson for adaptation for adaptations due to various needs.</p>
<p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks such as SE page 61 provide opportunities to mentally challenge students while still providing access to tools to solve.</p>
<p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>	<p>4 - Good Alignment</p>	<p>Tasks and activities are aligned to learning objectives. The materials also provide for differentiated centers that align to skills.</p>
<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>Strategies align to the benchmarks taught.</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Through the MTRs, instructional strategies are embedded through out the materials.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Summative assessments align to skills and strategies in the unit. (Example TE 106A)</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>4 - Good Alignment</p>	<p>Example (TE page 243) provides guidance based on learning objectives and student outcomes. There is not the same guidance for the summative assessment, but this</p>

		would be beneficial for teachers to respond to data.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The material has applied the MTRs strategically throughout the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The material incorporates multiple instructional teaching strategies as well as appropriate skills and strategies for students to access the content.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence observed of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Culturally Responsive Teaching as it relates to CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Social justice as it relates to CRT
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence observed of solicitation of SEL

noticed some errors within the materials (grammatical, wrong coins shown, etc) as listed in my justifications. I am only recommending these materials for adoption based on the score average, but would highly recommended editing of the materials.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	4 - Good Alignment	<p>The first four examples were good. They included problem types with addition of three or more whole numbers within 20. The SE p.471-476 was incredibly confusing and unnecessary for this standard. The diagram reminded me of part part whole and it would not be easy for children to discern that they were supposed to add across. There is no where for them to show their work, write an equation, or write a strategy to solve when students are supposed to be identifying facts to practice procedural reliability. There is also an error on problem 11 p.42... it is either grammatical or missing something. The wording was very confusing through the first grade lense.</p>

<p>MA.1.AR.1.2</p>	<p>Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.</p>	<p>4 - Good Alignment</p>	<p>Majority of the problems appear to follow the standard and the clarifications. I am, however, concerned about the placement in the book and the problem difficulty level. It seems that students are adding within 10 in Chapter 4. The textbook has them counting and filling in missing numbers to 120, as well as skip counting in chapter 1. That does not make sequential sense, as students need to explore numbers within 20 before expanding to 120. On SE p.203 there is also a problem where students add three numbers, which is not part of the standard.</p>
<p>MA.1.AR.2.1</p>	<p>Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.</p>	<p>5 - Very Good Alignment</p>	<p>The materials gave good instruction and practice on relating subtraction to addition within 20.</p>
<p>MA.1.AR.2.2</p>	<p>Determine and explain if equations involving addition or subtraction are true or false.</p>	<p>3 - Fair Alignment</p>	<p>Clarification 2 states: "Problem types are limited to an equation with no more than four terms." The Listen and Draw on p.477, #13 on p.480, and #7 on 481 contain 5 terms, which does not align to the standard and clarifications. Also, many problems</p>

			<p>focusing on matching like facts, but do not focus on the meaning of the equal sign. It is mentioned in the instruction, but does not appear the main goal as stated in clarification 1. This is a very challenging topic for first graders, and more practice that did not involve the balancing of equations (also not the standard), would be more appropriate. For example, #1-6 on p.481 does this well.</p>
<p>MA.1.AR.2.3</p>	<p>Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.</p>	<p>5 - Very Good Alignment</p>	<p>There is a lot of great practice that helps students understand missing addends and using related facts to solve. While I understand why #11-13 on p. 462 were included, I found it to be confusing for students. We want them to gain a deeper understanding of how numbers relate, not just a method to plug in numbers without any meaning added to it.</p>
<p>MA.1.DP.1.1</p>	<p>Collect data into categories and represent the results using tally marks or pictographs.</p>	<p>3 - Fair Alignment</p>	<p>Completely skips clarification #1 and does not relate the tally marks to skip counting by 5's. The opportunity is there to create those questions and connections, but it</p>

			<p>was not explicitly stated with the tally marks. I looked in the TE and could also not find any indication that the teacher was supposed to go over skip counting by 5's with tally marks. There is also nothing on defining attributes of geometric shapes as stated in clarification 1. For example students could tally how many shapes had 4 or more sides, as the color of the shapes in the included questions were not defining attributes of a shape. There is some good practice of reading and filling in pictographs and tally charts that do align.</p>
<p>MA.1.DP.1.2</p>	<p>Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.</p>	<p>5 - Very Good Alignment</p>	<p>Great practice for interpreting data and calculating. I would recommend focusing on adding more addition problems.</p>
<p>MA.1.FR.1.1</p>	<p>Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.</p>	<p>4 - Good Alignment</p>	<p>The lessons are good, but they do not relate with each other until the chapter review. After learning halves and fourths, it would be great mixed practice for students to identify which is which. Also, p.569 is confusing because the triangle shown in the question is not the</p>

			type of triangle they will draw. That is very confusing for first graders.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	2 - Poor Alignment	The mark is missed on defining attributes of 3d shapes. Only informal language is used (flat and curved), and is missing critical academic vocabulary as mentioned in the clarifications (edges and faces). Instead of curved not curved, focus on the academic language of these 3d shapes have (or do not have) faces or edges. The 2d shapes had better practice and vocabulary. Also, on p.533 of the SE I saw nothing that described open and closed shapes to students. I can only assume that was what was to be done there? It was not in the directions for the teacher at the bottom either.
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	P.521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape. P.539-544 does a better job, however the problems needs to include more types like #14-16, as students are supposed to draw a figure based

			on the attributes, not draw a figure and then list the attributes.
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	3 - Fair Alignment	Chapter 12 Lesson 5 uses fourths instead of semi-circles as described in the standard and the clarifications. There are some good examples of composing and decomposing 2d and 3d shapes, however it is lacking the much needed vocabulary. It only shows the pictures, but never uses or at least includes words to help students make the connection between the shape and its name. This is a critical foundational skill for young students. I notice a lot of the problems are written for students to be able to independently read, but the expectation for first graders does not include the ability to read every problem. They really need this vocabulary as it is used in the standards.
MA.1.GR.1.4	Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	There were good examples and practice for 2d and 3d shapes.

<p>MA.1.M.1.1</p>	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>2 - Poor Alignment</p>	<p>The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters, which is not part of the standard. There was also a heavy emphasis in using a tile and unit cube to measure instead of a ruler at first. Non standard units of measurement are not covered in this standard. There were some appropriate items like measuring from 0 in inches and centimeters with real world objects, but overall the lessons do not fully match the standard MA.1.M.1.1. accurately.</p>
<p>MA.1.M.1.2</p>	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>2 - Poor Alignment</p>	<p>Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units. Chapter 14 Lesson 5 was okay, but lacked a lot of visuals that students need when comparing lengths. There were a lot of problems where they draw the picture instead of having them select and/or order objects by length or unit of measure. Number 14 on p.622 also has students draw</p>

			4 objects when the clarification explicitly states it will only be up to 3 objects compared.
MA.1.M.2.1	Using analog and digital clocks, tell and write time in hours and half-hours.	2 - Poor Alignment	There is no discussion or use of the vocabulary for digital and analog. The missing minute hand is not a realistic representation of an actual clock. Students need to see where the minute hand is to be considered o'clock. Same with "half past". There is no mention partition of circles in clarification 2.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	1 - Very Poor/No Alignment	The materials focus more on the counting of coins as stated in MA.1.M.2.3 instead of the identification of coins as described in standard MA.1.M.2.2. #2 on SE #394 also has a major error of using a quarter instead of a nickel in the problem. I also find it confusing that they introduce coins that are not typically circulated (the Lewis and Clark nickel) on the first page. While it is important for students to see the different types of coins, the focus of this standard is identification, and there was barely an introduction into the

			original nickel. The materials really lack on explicit identification of coins, which is critical for students that are more used to digital currency than physical currency. There is nothing that discusses how many of each coin makes up a dollar or even how many cents are in a dollar bill. Another critical piece of this standard missed.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	Please read the clarifications for this standard. The materials provided majority of the practice counting groups of coins with quarters or counting groups of just quarters, which is not part of the standard. Please only include pennies, nickels, and dimes. Also, there was a lack of focus on the skip counting strategies to count coins.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	There is a lot of good practice counting by 1s forwards and backwards and skip counting. The problem is, which counting backwards, students are being taught the 100s chart which only goes forward. Having

			<p>them count backwards in the same direction that they are counting on is very confusing. I would recommend you put the largest number at the end (on the right) that they are counting back from (to the left). This also goes with a reading skill or reading in order from left to right. It would make sense to them that backwards is from right to left. Also, the hundreds chart is not helpful if they are only using it within 20. It is helpful to have random holes for them to fill as practice.</p>
<p>MA.1.NSO.1.2</p>	<p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>	<p>3 - Fair Alignment</p>	<p>Most of the examples for expanded form was based on __tens+__ones when it should be the actual number made by the tens plus the ones (for example 70+5). This is all outlined in the clarifications of the standard. Also, word form beyond 19 and multiples of ten (i.e. fifty) are never discussed and the standard states that students must be able to read numbers in word for from 1-100 (not write/spell, just read and identify). The representation with the ten frames and the ten rods/ones were</p>

			great representation. The way expanded form is written just needs to be changed based on the clarification. That is more based on standard MA.1.NSO.1.1.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	This is done well. There is a lot of practice for students to write _tens and _ones. There is some practice to write a number in multiple ways with tens and ones, but not a lot of explicit instruction or guidance in the TE to help students generate ideas.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	4 - Good Alignment	p.122 #1-4, the lines where students complete the sentence is confusing. They need to include a word bank or something so students know what they are doing on that line. There are good comparing problems, problems to arrange numbers in sequential order, and problems for plotting numbers. The problem I have is the lack of visible examples for students available. It is also helpful for students using the materials at home to have examples so that

			parents can better support their students.
MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	5 - Very Good Alignment	This was actually done very well. Choosing problems that causes students to use the communitive property of addition, as well as making a ten to add, really helps with their procedural reliability, which leads to automatic fact fluency.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	p.156 #9-11 is very confusing and does not help with procedural reliability since students have to interpret shapes to find out the numbers. However, there is a lot of good practice that allows students to use the communitive property, related facts, etc in order to problem solve. I would include more word problems to help cover this standard to increase rigor and real world application since the focus is procedural reliability and not automatic recall of those specific facts.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	This followed the standard and clarifications of ten more and ten less. I would suggest more practice for ten more,

			ten less, as skip counting by tens from 0 is technically not what is being called for in the standard.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	3 - Fair Alignment	Examples from p.279-296 were not rigorous enough to cover this standard, as most were two single digit numbers. The SE p.303-308 did a much better job covering this material, however there was not enough practice for this type of standard. There needs to be more opportunities to explore with the various strategies.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	The two digit numbers in the problems did not go beyond 20. The clarification even give the example of 37, showing that it is expected for students to subtract single digits from numbers greater than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	4 - Good Alignment	There are a few activities available for students to work independently or to discuss as a class (i.e. Math on the Spot, Math Talk, "For the Teacher" problems, etc). While these problems are good, there is a bit missing on an engaging class discussion. The

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		teacher could facilitate these discussions with some ideas listed in the TE, but the amount of questions on this MTR is limited.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	This was done very well throughout the HMH materials. Many problems were presented in a variety of ways, allowing for students to practice various strategies. There were problems given that encouraged the use of manipulatives, drawing, etc.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	HMH materials contained a number of tasks that allowed for the practice of mathematical fluency. There were many opportunities for students to practice a variety of strategies to determine the best way (or a different way) to solve a problem.

	<ul style="list-style-type: none"> • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	4 - Good Alignment	<p>There are a variety of opportunities for students to share and talk with one another about their mathematical thinking and processes. I do believe there could be more rigor within the embedded questions listed in the student text. For example, on p. 569 it just asks a yes or no question and says for students to explain. It needs to go a little deeper into discussing the differences and similarities between student thinking.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. 	4 - Good Alignment	<p>This was done well in the HMH materials. In some of the examples of materials listed, a bit more rigor could be added to connecting relationships. Ideas were kept more isolated on some topics instead of building off of each other.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	5 - Very Good Alignment	The related facts did a great job of showing justification.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	There multiple opportunities for students to apply math problems to real world contexts.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students are allowed to explain evidence in their oral explanations of problems. However, to better incorporate this ELA standard, I would recommend

			addressing this skill during word problems. Also, by allowing students to provide a written response, as in first grade the clarification explains that students will not only do this orally, but will start to write their justifications with support as well.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	Many of the problems in the HMH curriculum are written in student friendly language.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	This was done very well in the shapes unit. While I disagree with some of the vocabulary terms used as described in previous justifications (i.e. saying flat surface instead of faces), the strategies used really help with inferencing. There were also items in the TE that supported this ELA standard as well.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	There are a good opportunities for practicing explaining thinking with students. I would suggest even more opportunities for student sharing and collaboration, but the ones provided followed the ELA standard.

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	There were ample opportunities to practice a variety of strategies in the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Academic language was taught throughout the lessons and students were given opportunities to share using this language, or to justify in more social terms. The Write Math sections also allowed opportunities to practice this ELA skill.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	There is a section for multilingual support in the TE.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	The multilingual section discussed using more social terms to help incorporate new academic skills and language taught.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	As mentioned in standards' comments and justifications, some things aligned well and some did not. It looks as if the writer did not access the clarifications of the standards.

<p>2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.</p>	<p>3 - Fair Alignment</p>	<p>Some items lacked rigor (for example, some of the addition and subtraction problems were too simple) and some were more challenging than the clarifications explained (for example adding quarters for the money unit was not part of the benchmark).</p>
<p>3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.</p>	<p>2 - Poor Alignment</p>	<p>In its current state, the materials would just be very supplemental. The scope and sequence does not seem appropriate, and some of the benchmarks do not follow clarification guidelines. In my own first grade classroom, a lot of the materials would need to be altered to better fit the standards, edited due to errors, have numbers changed due to lack of rigor, or materials omitted due to not aligning with standard clarifications.</p>
<p>4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.</p>	<p>3 - Fair Alignment</p>	<p>Some topics (such as coin identification) are glazed over, while others go into sufficient detail about topics.</p>
<p>5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.</p>	<p>2 - Poor Alignment</p>	<p>No, see previous justifications about not following the clarifications of standards.</p>
<p>6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.</p>	<p>3 - Fair Alignment</p>	<p>See comments above. The materials do not always reflect the clarifications.</p>
<p>7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.</p>	<p>3 - Fair Alignment</p>	<p>Sometimes more time was spent on a simple topic (i.e. adding to 10 or 20) and not enough time was spent on other topics.</p>

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

As a first grade teacher myself that has gone through a rigorous overview of the new Florida BEST Standards, I would not feel like I could utilize these materials cover to cover. The materials, while mostly comprehensive, do not take into account many of the clarifications listed. It appears as though the standards were just read and materials were based solely on that. The materials are student friendly, and the TE is easy to follow and read. I do not agree with the scope and sequence of the materials, as previously mentioned in my justifications. I also

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	The sources reflected expert knowledge of the content.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	While the sources showed expertise in mathematics, there seemed to be a need for more knowledge of foundational primary instruction, as well as the new standards and their clarifications.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	2 - Poor Alignment	There were some major errors as previously described in the justifications. There needs to be some proofing done throughout the materials.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias noted.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Yes, the content was representative of the materials.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	3 - Fair Alignment	There were some errors that need to be addressed, as mentioned in previous justifications.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	2 - Poor Alignment	The clarifications of the new standards needs to be reviewed by the writers.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	I would recommend that the materials' writers review the new standard clarifications to correctly align the materials to the current standards.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Yes, the materials were visually appealing and relevant for students.

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Yes, the word problems and content were meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Yes, there were ELA connections within the materials.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Yes, while not many students were portrayed, the names and few visuals in the materials represented multiple ethnic groups. There was no bias noted.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No issues noted.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	The clarifications of the standards really need to be reviewed by the writers.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	There are a number of good resources available for students and teachers within the consumables and online resources. There are additional materials available to teachers to help learners that need more assistance or intervention.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Yes, it aligns with other components.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	2 - Poor Alignment	I do not agree with the scope and sequence of the materials. It does not make logical sense with the new standards to present numbers 1-120 before

		having students add and subtract within 10. Students really need to explore facts within 20 before moving to numbers beyond 20. Counting to (on and from numbers within) 120 is more challenging to students than adding within 10 and 20. Also, greater than/less than (the words) should be introduced before the symbols, not together. There are many small instances like this throughout the materials where it could be organized better to fit the foundational needs of younger students.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Yes, the materials are visually engaging and easy to understand as a whole.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	This is usually done well. There are a few instances where too much time was spent on less rigorous items and not enough time was spent on more other standards (see previous justifications).
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Captions are available, it is compatible with assistive technology, etc.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Overall, the presentation is good. The scope and sequence of items really does need to be reviewed to help students learning foundational mathematics.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	The student consumables are laid out to engage young students. There are some online components that can also engage students. I do think more colorful pictures could be used throughout to help students especially with word problems.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Yes, the materials go through the standards based on main ideas and themes. I still recommend the writers review the clarifications to make sure the materials are teaching the correct points of standards and topics.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Yes, the materials are clear and the outcomes are clear as well.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Yes, the TE also gives points for the teacher to cover.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Yes, many of the topics covered present a variety of strategies for students to try. Materials appear to be easily adaptable to meet the needs of struggling learners, as the TE has options for students needing interventions.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	There are multiple opportunities for students to engage mentally, as well as physically with manipulatives.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The activities were good, however some discussions lacked rigor and deeper thinking. See previous justifications for examples.

<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>There are multiple strategies listed that can help young learners grasp foundational concepts (for example using base ten blocks for adding and subtracting, not the standard algorithm).</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>3 - Fair Alignment</p>	<p>Most of the strategies are good, however, some important connections are missing with some standards due to the clarifications of standards not being fully incorporated. For example, in the unit with coins, there was no emphasis on skip counting in order to count coins.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>4 - Good Alignment</p>	<p>The assessments shown in the TEs aligned to what the materials covered. The loss of one point was because of the materials not aligning completely with learning outcomes in regards to the standards.</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>3 - Fair Alignment</p>	<p>As stated above, the assessments are effective with the materials presented, but do not fully align with the standards based on clarifications.</p>
<p>12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.</p>	<p>5 - Very Good Alignment</p>	<p>Yes, the UDL covers materials that consider all students' needs.</p>
<p>13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?</p>	<p>4 - Good Alignment</p>	<p>Yes, the materials cover ELA expectations and majority of the MTRs with either good or very good alignment.</p>
<p>14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)</p>	<p>4 - Good Alignment</p>	<p>Overall the submission does a good job to support learning requirements. Edits to align</p>

		materials to follow instructional standards' clarifications is needed.
--	--	--

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	There was no evidence of CRT in the materials.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	There was no evidence that Culturally Responsive Teaching was discussed in the materials.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Yes, it omits Social Justice.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	There is no solicitation of SEL.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall, the material presented is organized in a manner that provides easy and predictable usability for teachers and students. The student material provides access at majority of the benchmarks at an appropriate conceptual level for students. Earlier lessons within a concept elicit the use of models/manipulative, or provide visual aids that support learners in access the content. As students progress through out each lesson the complexity of questions increases. Students are also engaged in MTRs through purposefully placed pauses within the

text. A weakness to be aware of is over scaffolding within lessons through provided models or equation set ups. While some scaffolding may be necessary, the primary focus should be the student work and thinking, and not just filling in the blanks in the student work. The teacher material supports the learning through questioning and appropriate instructional strategies. Both resources clearly state the objectives and aligned benchmarks.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	5 - Very Good Alignment	Lessons on SE Pages 369-386 include representations with snap cubes and a ten frame. The numbers provided support doubles and make a ten strategies. All problems presented are within a sum of 20.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Multiple opportunities throughout the student work where students are provided context and must determine the operation through reasoning. For example, in Chapter 10, Lesson 6, students must interpret the context, select add or subtract and then record an number sentence to solve. Scenarios are represented with numbers, pictures and words.

MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	4 - Good Alignment	Missed opportunities for format of $c = a + b$. Student work has no context and context examples of standard. Connections made to other models and strategies.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	Problem types vary according to the Situations Involving Operations with Numbers chart. There is a heavier focus on Result and Change unknown in contexts provided. Ample experiences to find missing numbers in any position in pre-written equations.
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	3 - Fair Alignment	Data sets do not include any examples of defining attributes of geometric figures to categorize.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	Problems used the data and scenarios to apply addition and subtraction.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons use grade appropriate terms such as halves and fourths. There are

			various representations and orientations of circles and rectangles partitioned as examples and non examples.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	Multiple opportunities to identify defining attributes, but limited opportunity to identify a figure based on given defining attributes
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	2 - Poor Alignment	The standard reads "Sketch two-dimensional figures when given defining attributes." There are limited examples of where this is evident. Only a few examples can be seen on page 542, questions 14-16. Here an attribute is given and students are asked to sketch the shape. (Ex. Meg draws a shape with 6 sides.)
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Multiple lessons and examples for 2D and 3D shapes that involve composing, decomposing and identifying the geometric shapes involved. Lessons include examples of the use of 3D solid manipulatives and pattern blocks for students to access the concept.

MA.1.GR.1.4	<p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p>	<p>3 - Fair Alignment</p>	<p>While there are many examples of real-world objects for stand alone figures (balls, cones, cans, etc), there are only a few real-world examples of items with multiple identifiable geometric figures. One example that does align to the standard is question 9 on page 506. This requires students to identify the geometric figures in an ice cream cone. In most other examples, they are identifying the geometric figures in composed shapes, but they are not real-world objects, but rather just composed by two stacked images.</p>
MA.1.M.1.1	<p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>	<p>5 - Very Good Alignment</p>	<p>Items align to the standard for estimation. Lessons prior to using a ruler use tiles to build understanding of counting units to measure. Rules presented in the text all start at zero.</p>
MA.1.M.1.2	<p>Compare and order the length of up to three objects using direct and indirect comparison.</p>	<p>5 - Very Good Alignment</p>	<p>Opportunities for 3 items compared directly and also for indirect comparison.</p>
MA.1.M.2.1	<p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>	<p>4 - Good Alignment</p>	<p>Focus on time to the hour then half hour introduced with one-</p>

			handed clock. Lacks connections to partitioning circles in half for half hour.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	2 - Poor Alignment	Resource provides images of both sides of coins. Limited opportunity to simply identify coins by name or value without having to count combinations. No reference seen that related each coin to how many equal a dollar.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	2 - Poor Alignment	The benchmark reads "Find the value of combinations of pennies, nickels and dimes up to one dollar." The resource has lessons that also include quarters with in collections which is beyond the benchmark. Examples include problem 2 on page 394 where there is a quarter image in a series of nickels and all counting collection questions in Chapter 9 Lesson 3. Sole lesson (Chapter 9 Lesson 6) on counting bills only has examples of collections of like bills.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	Resources focus on counting sequences by 1s, 2, and 5s. Visual resources such as hundreds charts are provided. Attention to

			patterns is not called out within resources.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	2 - Poor Alignment	Majority of work has students representing numbers as tens and ones (Ex. 4 tens + 7 ones) with limited connections to expanded form (ex. 40+7). Students are not presented with word form and asked to relate it to the corresponding expanded or standard form.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	4 - Good Alignment	Chapter 2 Lesson 6 is the primary connection to this benchmark. It provides opportunities for students to think about the same number in two different ways flexibly. They are not provided any visual aids to assist their thinking in the print. Chapter 2 Lesson 3 connects ones to tens (ex. 30 ones = 3 tens)The remaining referenced lessons and student pages focus on composing and decomposing based solely on the place value of each digit, not in a flexible manner.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Builds connection between plotting on a number line and ordering.

MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	4 - Good Alignment	Facts align to benchmark and fluency requirements.
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	4 - Good Alignment	The relationship between addition and subtraction is more explicit in Chapter 10 lessons about related facts. Earlier chapters focus on adding and subtracting, but during instruction teachers would have to facilitate learning on efficiency using this relationship.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	Features include base ten clocks and hundred charts.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	4 - Good Alignment	Chapter 6 Lessons 10 and 11 include problems with a two-digit addended greater than 20 and varying representations including models, number lines and place value.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	2 - Poor Alignment	All example problems have a minuend less than 20.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	5 - Very Good Alignment	Students have opportunities to engage in open ended tasks that provide them time to grapple and preserve individually and collaboratively by responding in their own way and then sharing.

	<ul style="list-style-type: none"> • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Various lessons include the use of tools such as base ten blocks and number lines, as well as visual models for students to access and represent problems. Lessons are sequences through the progression of concrete, representational then abstract.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. 	5 - Very Good Alignment	Lessons correlate to the correct level of fluency to the benchmark. Example: Chapter 7 Lesson 3 students use strategies that support automaticity.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	5 - Very Good Alignment	<p>Lauch tasks such as the one one page 3 provides opportunities for discourse amongst students. There are also embedded discourse questions with the text such as the one one page 273.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>Evidence of connections to patterns in math that hold true. Example pg. 261, students are asked to make connection to known fact to solve new problem.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	3 - Fair Alignment	Missed opportunities for estimating solutions outside of the measurement unit.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Examples are real-world and applicable to students.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Students have opportunities to reference the task or their own work to explain and justify their work.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Text is written at an appropriate level for students to access.
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	During embedded three reads, students are asked to make inferences based on the reading.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Active participation stems are embedded that promote students to explaining their thinking through discussion.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students apply skill learned in Unpack and Draw and Model in independent practice of the materials.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Math Talk stems promote formal math language.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	TE supports ELL with multilingual entry points and mini "in the moment" tasks

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Most lessons aligned to state standards and the supporting documents. A few standards that were either addressed incorrectly or incomplete were

		MA.1.NSO.1.2 (lacking word form and minimal expanded form), MA.1.NSO.2.5 (no subtraction problems go beyond a minuend of 19), and MA.1.M.2.3 (combinations include quarters).
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Tasks allow students to interact with the math aligned to the benchmark. Students have opportunities to draw models, use tools and write equations throughout the text.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The adaptive practice of Waggle meets students on their personalized path to develop concepts. The TE also provides resources for in the moment lesson shifts with Reteach and Enrich pages.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The material, as seen on pages 67 and 68, provide students time to access on their own and with supports on the page to understand the content.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	At times there is too much support such as problems 1-4 on page 184 which can cause students to "fill in the blank" vs understand the content.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Lessons are appropriate for a standard teaching block.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Content aligns to benchmarks and other BEST documents.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No noticed errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No evidence of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Models through the material were representative of common tools, manipulatives, resources and representations that are aligned to the benchmarks including, but not limited to: base ten blocks, snap cubes, counters, ten frames, hundred charts, equations, part/part/whole models, and bar models.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	No evidence of errors found.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Content aligns to benchmarks and other BEST documents.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world problems that drive the lessons are appropriate and relevant throughout. .
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Relevant context includes scenarios that students may experience at school (example page 213, Unlock the Problem)

		involving crayons. This allows all students to have access regardless of experiences.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The material provides opportunities to connect science and social students through additional tasks provided in the TE. Example on TE page 439
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	The visual and contextual portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	The material portrays people and animals ethically.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Overall the content of the benchmarks are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	The resources provide material for instruction and additional practice. The online student adaptive program supports this practice as well with limited additional prep.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components are aligned with one another.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized in a consistent and easy to follow manner.

4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Narrative and visuals engage students
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is paces and organized in a way that makes it accessible to students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	The aligned print and digital components allow for all students to access the materials.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	The material is easy to access and read for both teacher and student. Students are presented with appealing visual pages that also provide adequate work space.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	At the beginning of each lesson, teachers are provided a "Focusing on the Whole Student" section to motivate students to learn. These include topics such as self management as a learner (page 25B) and accessing prior knowledge (page 49B).
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials address the big ideas as aligned with BEST
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The TEs present clear objectives and connections for every unit (example. TE 49B) with correlating I Can statements on student pages (Example SE 49)

<p>4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.</p>	<p>4 - Good Alignment</p>	<p>Lessons are set up in a gradual release format after an open task. Students have examples to reference and problem increase in difficulty throughout lessons.</p>
<p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>	<p>3 - Fair Alignment</p>	<p>The TE materials provide some resources for adaptations based on language support. The Chapter at a Glance (example TE 47A) provides guidance around intervention and enrichment. There is little support during the lesson for adaptation for adaptations due to various needs.</p>
<p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>	<p>5 - Very Good Alignment</p>	<p>Tasks such as SE page 61 provide opportunities to mentally challenge students while still providing access to tools to solve.</p>
<p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>	<p>4 - Good Alignment</p>	<p>Tasks and activities are aligned to learning objectives. The materials also provide for differentiated centers that align to skills.</p>
<p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p>	<p>5 - Very Good Alignment</p>	<p>Strategies align to the benchmarks taught.</p>
<p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Through the MTRs, instructional strategies are embedded through out the materials.</p>
<p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>	<p>5 - Very Good Alignment</p>	<p>Summative assessments align to skills and strategies in the unit. (Example TE 106A)</p>
<p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p>	<p>4 - Good Alignment</p>	<p>Example (TE page 243) provides guidance based on learning objectives and student outcomes. There is not the same guidance for the summative assessment, but this</p>

		would be beneficial for teachers to respond to data.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The material has applied the MTRs strategically throughout the lessons.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The material incorporates multiple instructional teaching strategies as well as appropriate skills and strategies for students to access the content.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence observed of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Culturally Responsive Teaching as it relates to CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence observed of Social justice as it relates to CRT
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence observed of solicitation of SEL

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

2 - Poor Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The GoMath series does not look like it has been updated to meet our new standards. It looks like the old GoMath lessons. It seems like editors tried to categorize the old lessons to align with the BEST standards. The geometrical reasoning section has portions that, although interesting, are inconsistent with the rest of the text ("connection to reading" and "connection to science"). The teacher edition doesn't offer much in the way of varying lesson ideas, or suggestions on what else to try to help students understand concepts. A few of the lessons do not

align with 5th grade standards. Many of the lessons claim to address all of the MTR's, but that is not accurate; the language of the MTRs should be prevalent throughout the student text. This is not a series that I would want as a resource for engaging my students in the new BEST standards.

Standard	Description	Reviewer Rating	Rating Justification
MA.5.AR.1.1	Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	good opportunities for multi-operations
MA.5.AR.1.2	Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.	5 - Very Good Alignment	multiple opportunities for practice with fraction word problems
MA.5.AR.1.3	Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	models with real-world problems
MA.5.AR.2.1	Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.	5 - Very Good Alignment	no nesting; keeping within parameters given in clarifications
MA.5.AR.2.2	Evaluate multi-step numerical expressions using order of operations.	5 - Very Good Alignment	no nesting, no exponents
MA.5.AR.2.3	Determine and explain whether an equation involving any of the four operations is true or false.	3 - Fair Alignment	limited practice with true or false
MA.5.AR.2.4	Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	plenty of opportunities to analyze word problems

MA.5.AR.3.1	Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.	5 - Very Good Alignment	opportunities for finding patterns with whole numbers, decimals, and fractions
MA.5.AR.3.2	Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.	2 - Poor Alignment	asking student to write a rule for a given graph
MA.5.DP.1.1	Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.	2 - Poor Alignment	decimal values to thousandths should be limited to hundredths
MA.5.DP.1.2	Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.	5 - Very Good Alignment	instruction on balancing point
MA.5.FR.1.1	Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.	4 - Good Alignment	good use of models
MA.5.FR.2.1	Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	use of fraction bars and number lines
MA.5.FR.2.2	Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	use of models
MA.5.FR.2.3	When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.	4 - Good Alignment	models and number lines; missing connection to decimals
MA.5.FR.2.4	Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	models, appropriate word problems - both partitive and quotative

MA.5.GR.1.1	Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.	4 - Good Alignment	lots of practice with triangles and quadrilaterals
MA.5.GR.1.2	Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.	5 - Very Good Alignment	adequate coverage of 3-d figures
MA.5.GR.2.1	Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?
MA.5.GR.3.1	Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.	5 - Very Good Alignment	sufficient practice and good visual models
MA.5.GR.3.2	Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.	5 - Very Good Alignment	gradual move from counting cubes to formula
MA.5.GR.3.3	Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.	5 - Very Good Alignment	abundant use of visuals
MA.5.GR.4.1	Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.	2 - Poor Alignment	asking student to write a rule for a given graph
MA.5.GR.4.2	Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.	5 - Very Good Alignment	graphing data from an experiment
MA.5.M.1.1	Solve multi-step real-world problems that involve converting measurement units to	3 - Fair Alignment	no need for weight conversions? they do

	equivalent measurements within a single system of measurement.		refer to grams; on p. 558, question about converting hL to daL - unnecessary
MA.5.M.2.1	Solve multi-step real-world problems involving money using decimal notation.	4 - Good Alignment	multiple opportunities for working with money
MA.5.NSO.1.1	Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.	2 - Poor Alignment	not enough attention to this standard, only addressed in one lesson
MA.5.NSO.1.2	Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.	2 - Poor Alignment	only one lesson for a concept that requires more attention
MA.5.NSO.1.3	Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.	2 - Poor Alignment	not enough content to support this concept
MA.5.NSO.1.4	Plot, order and compare multi-digit numbers with decimals up to the thousandths.	1 - Very Poor/No Alignment	no evidence of scaled number lines
MA.5.NSO.1.5	Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.	2 - Poor Alignment	limited practice
MA.5.NSO.2.1	Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.	2 - Poor Alignment	limited practice and offering only "the" standard algorithm instruction
MA.5.NSO.2.2	Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.	2 - Poor Alignment	good use of partial quotient initially then it leans into long division standard algorithm for the rest of the division practice

MA.5.NSO.2.3	Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	3 - Fair Alignment	number lines not used
MA.5.NSO.2.4	Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.	3 - Fair Alignment	no instruction in estimation provided for multiplication with decimals but provided better creative strategies besides standard algorithm; instruction provided for estimation with division
MA.5.NSO.2.5	Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.	4 - Good Alignment	many opportunities for practice of the concepts
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	no references to growth mindset norms; each lesson suggests MTR 1.1 is addressed, but I couldn't find any references in the student text; found references to effortful learning in teacher text
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. 	4 - Good Alignment	variety of opportunities to use manipulatives and models for representing thinking

	<ul style="list-style-type: none"> • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	3 - Fair Alignment	occasional references to fluency in students text; teacher edition offers activities to develop fluency
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. 	4 - Good Alignment	"math talk" sections encourage students to have conversations about given math questions

	<ul style="list-style-type: none"> Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 	4 - Good Alignment	"unlock the problem" section decomposes example into manageable parts
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. 	4 - Good Alignment	examples of suggestions to estimate when showing expressions; could encourage estimation with word problems

	<ul style="list-style-type: none"> Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	wide variety of real world situations involving math
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	questions throughout for citing evidence of answer
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	"launch into math" for each unit is interesting and related to real world Florida
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	"launch into math" section good for inferencing
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	"math talk" sections
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	requires quality student work throughout
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	"math talk" sections

ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	students communicating math ideas
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	students given opportunities throughout to work socially together on math ideas

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	2 - Poor Alignment	relying too much on the standard algorithms rather than providing opportunities for developing strategies of other ways of calculating
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	2 - Poor Alignment	some of the lessons address skills from middle school content
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	some of the number sense benchmarks don't have enough opportunities to explore and practice
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	would like to have more practice for some skills that will take longer to develop
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?; Ch. 17, L3 - write a rule for a given graph
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	just a handful lessons that don't apply to 5th grade standards
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	students will require more review of multi-digit multiplication than offered -

		although a standard from 4th grade, students will need more time
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	5E's for each unit
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	reference to 5E's at the beginning of each unit;
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	2 - Poor Alignment	spelling errors: "Identify and Classify Two-Dimensional Figures," "quadrilatera,"
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	free of bias and contradictions
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	good use of visual models; would prefer more number lines and less standard algorithm
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	just a few spelling mistakes; chapter 18 has a table with degrees F listed as 8-1/2 and 11-1/4(these are not reasonable values as we don't read temperatures in fractions and children would not be familiar with temps that cold
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	lip service given to fluency and number routines, but needs more appropriate fluency practice and exit tickets
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	2 - Poor Alignment	Chapter 10, Lesson 5 is not in 5th grade standards; perhaps middle school?
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	content relevant to age

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	real world problems are connected to children's experiences
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	in the GR and DP sections, there was evidence of connecting to science and to reading; would like to have seen those sections throughout
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	wide variety of names represent many cultures
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	content is appropriate for children
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	mostly covering benchmarks and standards

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	teachers would need to find extra practice for some of the number sense skills
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	2 - Poor Alignment	inconsistent with amount of practice for content; some lessons are not part of standards
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	logical organization
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	other than the wide variety of names in the word problems which may be challenging for some students to read, the

		visuals are interesting and engaging
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	2 - Poor Alignment	some areas not given enough attention or time for practice
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	offer strategies for ELL with each unit; RTI lessons available
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	3 - Fair Alignment	lessons that don't apply to curriculum could be skipped

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	interesting non-fiction info in "launch into math"
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	covers the standards - just a few lessons not belonging to standards
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	clear expectations and mistakes to expect and how to address them
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	examples for each concept
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	reteach and enrich activities
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	students provided a variety of methods for problem solving
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	lessons open with concrete to representational to abstract

8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	need for less of a focus on standard algorithm - seems to be prevalent throughout, not allowing for flexibility of strategies
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	need for more examples of flexible strategies - too much emphasis on one way (standard algorithm)
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessments related to benchmarks
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	would like to see more opportunities for formative assessment such as exit tickets
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	evidence of support for ELL and RTI
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	most MTR's evident throughout; would need more for MTR 1.1
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	the content is generally applicable to the grade level benchmarks and support is offered to teachers for facilitating the content

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	no evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	no evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	not evidence of CRT

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	no evidence of SEL

Edition: N/A

Grade Level: K-5

Course: [Grade Five Mathematics](#)

Bid ID: 459

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

I would not recommend this curriculum due to the absence of specific instructional materials related to ALL BEST standards. While the curriculum presents well and its lessons are aligned to the learning objectives within it, it leaves gaps of standards-based instruction that would need to be supplemented by the teacher. If all standards were addressed, I would consider this curriculum as an option, because the digital component is really well delivered, minus some typographical mistakes.

Standard	Description	Reviewer Rating	Rating Justification
MA.5.AR.1.1	Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	Real-world problems with remainders that must be interpreted
MA.5.AR.1.2	Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.	5 - Very Good Alignment	Mix of fractions, including fractions greater than one. Each lesson contained real-world scenarios.
MA.5.AR.1.3	Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.	5 - Very Good Alignment	All division uses unit fractions and calls for justification of real-world scenarios
MA.5.AR.2.1	Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.	5 - Very Good Alignment	Expressions were related to real-world scenarios and called for the translation of descriptions to expressions and expressions to descriptions.
MA.5.AR.2.2	Evaluate multi-step numerical expressions using order of operations.	5 - Very Good Alignment	All examples had multiple steps and required students to justify other's thinking as well and no examples had parentheses that were nested
MA.5.AR.2.3	Determine and explain whether an equation involving any of the four operations is true or false.	3 - Fair Alignment	Examples have questions about true or not true, however, many questions focus on determining which property is being used,

			which is not a clarification in the BEST standard
MA.5.AR.2.4	Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.	5 - Very Good Alignment	Scenarios include real-world context and the unknown letter is recognized as a variable. Unknowns and different operations are on either side of the equal sign.
MA.5.AR.3.1	Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.	5 - Very Good Alignment	Scenarios are limited to one of two operations using whole numbers.
MA.5.AR.3.2	Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.	3 - Fair Alignment	Most question met the standard except the question in the explore part of Chapter 17 Lesson 2. The pattern does not match the chart.
MA.5.DP.1.1	Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.	2 - Poor Alignment	Chapter 18, Explore Lesson 1- the table does not match the problem. In addition, fractions with a denominator of 8 are used, which is not within the limits of the BEST standards.
MA.5.DP.1.2	Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.	2 - Poor Alignment	Explanations on how to find mean, mode, and median are aligned; however, there is no mention of range.
MA.5.FR.1.1	Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.	5 - Very Good Alignment	Real-world scenarios used to represent the division of two whole numbers as a fraction.

MA.5.FR.2.1	Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.	5 - Very Good Alignment	Examples met all of the benchmark clarifications of the BEST standards.
MA.5.FR.2.2	Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.	2 - Poor Alignment	Examples made use of area model by shading. Mixed numbers were used in comparative lessons only. Students are directed to simplify answers which is not necessary.
MA.5.FR.2.3	When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.	2 - Poor Alignment	Examples in the text call for completing an operation to figure out the relative comparison. The BEST standards state that students should be able to focus on estimation and assessing the reasonableness of answers.
MA.5.FR.2.4	Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.	4 - Good Alignment	Examples met the BEST standards and various question types in Appendix A
MA.5.GR.1.1	Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.	2 - Poor Alignment	Examples classify more than what is necessary. Addresses various polygons not addressed in the BEST standards.
MA.5.GR.1.2	Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.	2 - Poor Alignment	Extraneous material in lesson. Examples should be limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.

MA.5.GR.2.1	Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.	4 - Good Alignment	Questions cover both fractional and decimal side lengths.
MA.5.GR.3.1	Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.	4 - Good Alignment	Materials focus on using and counting unit cubes.
MA.5.GR.3.2	Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.	4 - Good Alignment	Examples focused on the amount of unit cubes in the shape and no questions exceeded two-digit edge lengths.
MA.5.GR.3.3	Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.	4 - Good Alignment	Materials use real-world contexts and composite figures that should be added to solve for volume.
MA.5.GR.4.1	Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.	4 - Good Alignment	Materials fairly instruct how to plot and label points
MA.5.GR.4.2	Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.	5 - Very Good Alignment	Examples use real-world problems and instruct students to interpret the values of point in the context of a situation.
MA.5.M.1.1	Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.	3 - Fair Alignment	Conversion included length, volume, and capacity; however, there were no time conversion present.
MA.5.M.2.1	Solve multi-step real-world problems involving money using decimal notation.	4 - Good Alignment	Materials included multi-step real-world problems involving money and decimal notation.

MA.5.NSO.1.1	Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.	2 - Poor Alignment	While the materials include this standard with examples of decimals to the thousandths, there is inadequate exposure to this connection to whole numbers.
MA.5.NSO.1.2	Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.	4 - Good Alignment	Materials address the standard fully; however, there is limited items on using expanded notation.
MA.5.NSO.1.3	Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.	5 - Very Good Alignment	Materials addressed the standard fully with multiple ways to depict composition and decomposition.
MA.5.NSO.1.4	Plot, order and compare multi-digit numbers with decimals up to the thousandths.	2 - Poor Alignment	Instruction focuses on the use of stacking numbers to compare only. There is no instruction using a scaled number line as indicated in the BEST standards.
MA.5.NSO.1.5	Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.	3 - Fair Alignment	Instruction does meet the standard; however, there is no use of number lines to solidify connections.
MA.5.NSO.2.1	Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.	2 - Poor Alignment	Instruction does not include practice of various algorithms.
MA.5.NSO.2.2	Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.	5 - Very Good Alignment	Multiple representations used.

MA.5.NSO.2.3	Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Meets clarifications of BEST standards
MA.5.NSO.2.4	Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.	5 - Very Good Alignment	Great use of models and pictures.
MA.5.NSO.2.5	Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.	5 - Very Good Alignment	Use of multiple representations
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	4 - Good Alignment	Tasks include analyzing problems in a way that makes sense, asks questions that will help with solving the task, and helps students build perseverance over time.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. 	5 - Very Good Alignment	Tasks include representing problems in multiple ways and build understanding through modeling and using manipulatives.

	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Tasks have students select the most efficient method for themselves to build procedural reliability.
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. 	4 - Good Alignment	Tasks have students justifying their answer and making sense of other's work, including error analysis.

	<ul style="list-style-type: none"> Construct possible arguments based on evidence. 		
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	Promotes ELL communication
----------------------------------	--	--------------------	----------------------------

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	2 - Poor Alignment	Though many standards were aligned, whole chunks of standards were either unaddressed or did not meet the full extent of the standard
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	2 - Poor Alignment	Same as above
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	Though some standards were not fully addressed, the materials themselves were adaptable.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3 - Fair Alignment	Though some standards were not fully addressed, the materials that were available did provide sufficient details for students to understand.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Levels of complexity were met through justification, error analysis, and multi-step word problems when called for.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	Some extraneous methods (not in the standards) were too complex for the students abilities at this grade level- specifically in the mean, median, mode, and range chapter
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Levels of treatment meet the time period allowed for teaching

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Sources reflect expert information for the subject
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Primary and secondary sources contribute to the quality of the content
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	3 - Fair Alignment	Most typographical errors were in the digital resources for the student. Those are explained in the Standards section.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Free of bias and contradictions
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content is representative of the discipline.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	A few mistakes noticed in the digital resources where the words and graphics did not match.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	3 - Fair Alignment	Most content is up-to-date; however, use of the 5E model for every lesson lends itself to a gradual release at times when students should be productively struggling to make sense of problems.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Standards seemed to be interwoven and not necessarily taught in isolation.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	content is appropriate and relevant
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-life scenarios are meaningful and connect to students' lives.

18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Connections made to science.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	No evidence of bias
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	No evidence of inhumane actions or beliefs.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	While most standards and benchmarks are covered in the materials, ALL of the them were not.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	In order to meet the full extent of the BEST standards, a teacher would need to prepare additional teaching materials. One example is number lines for plotting, ordering, and comparing decimals.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Components of the curriculum align with each other.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	Logical organization of content. I believe that some content could have been interwoven more.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Narrative and visual engage students

5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Content presented at a pace that allows students to understand
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Supports, interventions, and enrichment were very clear in the Teacher's Edition.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Components of Presentation were good or very good, except for the teacher needing to prep materials for parts of the benchmarks not addressed.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Tasks are relevant to students' everyday lives, which maintains student motivation
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Materials makes use of overarching themes or concepts to teach small chunked material
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Each lesson displayed a clear learning goal.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	The materials lend themselves to successfully becoming more independent in the way that big ideas are chunked into digestible pieces.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Guidance and support is included in the materials for developmental differences and various learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Materials engage the physical and mental activity of students

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Materials include organized activities that are logical extensions the objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	Some strategies were missing from the instructional materials, such as: in multiplication one standard algorithm was addressed instead of a few.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	3 - Fair Alignment	Most strategies were effective; however some effective strategies were left out (see above and number lines). In addition, a few strategies used seemed confusing (ex: mean, median, mode)
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	Assessment strategies did match those of the instructional materials.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	Assessment questions did mirror the instructional materials: however, specific question types like those in the BEST standards were missing.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	UDL strategies evident throughout
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	MTR's can easily be applied to lessons within the curriculum
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	The instructional materials do support learning requirements based on the outcomes set out by this curriculum; however it should be noted that not all of the standards are addressed to their fullest extent.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	Saw no evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evident of CRT of Social Justice
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence of SEL

other materials are available in print format, and many digital materials are downloadable/printable (PDFs can be downloaded for offline use). Core student print materials will also be available via NIMAS files. To see the range of HMH products available from NIMAC, please visit <https://nimac.overdrive.com/ContentInventory>.

Review	Rating	Comments
	3 - Fair Alignment	A great amount of instruction is provided through video. An alternative source of content is not prevalent. Students should be provided multiple options in format.

Reviewer's Name: Mary Moss

Title: HMH Florida's B.E.S.T. Into Math Accelerated 6

Publisher: Houghton Mifflin Harcourt

Author: Edward B. Burger, PhD; Juli K. Dixon, PhD; Timothy D. Kanold, PhD; Matthew R. Larson, PhD; Steven J. Leinwand, PhD

Grade Level: 6-8

Course: [M/J Grade 6 Accelerated Mathematics](#)

Bid ID: 465

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The material's alignment to the standards was not 100%. I liked the teacher guidance, but would like to see more guidance for teachers on implementation of ML routines as it pertains to the task alignment. I would like to see the MTR's addressed more frequently. I liked the student interactive version. Lots of great resources for teachers.

Standard	Description	Reviewer Rating	Rating Justification
MA.6.AR.1.1	Given a mathematical or real-world context, translate written descriptions into algebraic expressions and translate algebraic expressions into written descriptions.	4 - Good Alignment	Variables are not limited to x; Students translating written descriptions into algebraic expressions; Students identifying parts of an algebraic expression.
MA.6.AR.1.2	Translate a real-world written description into an algebraic inequality in the form of  . Represent the inequality on a number line.	4 - Good Alignment	Students translate real-world written description into an algebraic inequality and represent on a number line.
MA.6.AR.1.3	Evaluate algebraic expressions using substitution and order of operations.	4 - Good Alignment	Students evaluate algebraic expressions with integers using substitution and order of operations.
MA.6.AR.1.4	Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	3 - Fair Alignment	Clarification 2: is not represented
MA.6.AR.2.1	Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	2 - Poor Alignment	Pg.281-288 not represented; 311-316 not represented; operations performed with negative rational numbers; Set notation is not used to list numbers.
MA.6.AR.2.2	Write and solve one-step equations in one variable within a mathematical or real-world context using addition and subtraction, where all terms and solutions are integers.	3 - Fair Alignment	Algebra tiles and balances are represented, but no use of Bar diagrams or Number lines.
MA.6.AR.2.3	Write and solve one-step equations in one variable within a mathematical or real-world	3 - Fair Alignment	Algebra tiles and balances used, but no use of bar diagrams.

	context using multiplication and division, where all terms and solutions are integers.		
MA.6.AR.2.4	Determine the unknown decimal or fraction in an equation involving any of the four operations, relating three numbers, with the unknown in any position.	1 - Very Poor/No Alignment	All terms and solutions are not limited to positive rational numbers.
MA.6.AR.3.1	Given a real-world context, write and interpret ratios to show the relative sizes of two quantities using appropriate notation:  , a to b, or a:b where $b \neq 0$.	4 - Good Alignment	Bar models and ratio tables used. No use of number lines.
MA.6.AR.3.2	Given a real-world context, determine a rate for a ratio of quantities with different units. Calculate and interpret the corresponding unit rate.	4 - Good Alignment	Instruction includes using drawings, models and words.
MA.6.AR.3.3	Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.	4 - Good Alignment	Instruction includes using two-column tables.
MA.6.AR.3.4	Apply ratio relationships to solve mathematical and real-world problems involving percentages using the relationship between two quantities.	4 - Good Alignment	Models used to support instruction.
MA.6.AR.3.5	Solve mathematical and real-world problems involving ratios, rates and unit rates, including comparisons, mixtures, ratios of lengths and conversions within the same measurement system.	4 - Good Alignment	PG 351, 359 no alignment; the remainder instruction includes comparisons, mixtures, conversions within the same measurement system.
MA.6.DP.1.1	Recognize and formulate a statistical question that would generate numerical data.	4 - Good Alignment	Instruction includes the understanding of a statistical question and a non-statistical question.
MA.6.DP.1.2	Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.	3 - Fair Alignment	Instruction on Range is missing. Instruction

			includes mean, median, mode.
MA.6.DP.1.3	Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.	3 - Fair Alignment	Instruction does not include vertical representation of box plot. Instruction includes horizontal representation of box plots.
MA.6.DP.1.4	Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.	3 - Fair Alignment	Instruction limited to skewed description. Instruction does not focus on describing data as Normal or Bimodal.
MA.6.DP.1.5	Create box plots and histograms to represent sets of numerical data within real-world contexts.	4 - Good Alignment	601-instruction focuses on histogram; 609-instruction focuses on histogram; instruction focuses on box plots; 643; not aligned.
MA.6.DP.1.6	Given a real-world scenario, determine and describe how changes in data values impact measures of center and variation.	4 - Good Alignment	Instruction includes opportunities for students to collect their own data to create a graphical display.
MA.6.GR.1.1	Extend previous understanding of the coordinate plane to plot rational number ordered pairs in all four quadrants and on both axes. Identify the x- or y-axis as the line of reflection when two ordered pairs have an opposite x- or y-coordinate.	4 - Good Alignment	Instruction builds on previous understanding of coordinate plane, graphing ordered pairs in all four quadrants.
MA.6.GR.1.2	Find distances between ordered pairs, limited to the same x-coordinate or the same y-coordinate, represented on the coordinate plane.	4 - Good Alignment	Instruction focuses on finding distances between ordered pairs, limited to the same x coordinate or the same y coordinate.

MA.6.GR.1.3	Solve mathematical and real-world problems by plotting points on a coordinate plane, including finding the perimeter or area of a rectangle.	4 - Good Alignment	483-No; Instruction includes solving real-world problems, plotting on coordinate plane and finding perimeter and area.
MA.6.GR.2.1	Derive a formula for the area of a right triangle using a rectangle. Apply a formula to find the area of a triangle.	4 - Good Alignment	Instruction meets benchmark..
MA.6.GR.2.2	Solve mathematical and real-world problems involving the area of quadrilaterals and composite figures by decomposing them into triangles or rectangles.	4 - Good Alignment	Instruction meets benchmark.
MA.6.GR.2.3	Solve mathematical and real-world problems involving the volume of right rectangular prisms with positive rational number edge lengths using a visual model and a formula.	4 - Good Alignment	Instruction meets benchmark.
MA.6.GR.2.4	Given a mathematical or real-world context, find the surface area of right rectangular prisms and right rectangular pyramids using the figure's net.	4 - Good Alignment	Instruction meets benchmark language.
MA.6.NSO.1.1	Extend previous understanding of numbers to define rational numbers. Plot, order and compare rational numbers.	4 - Good Alignment	Instruction meets benchmark and clarifications.
MA.6.NSO.1.2	Given a mathematical or real-world context, represent quantities that have opposite direction using rational numbers. Compare them on a number line and explain the meaning of zero within its context.	4 - Good Alignment	Students will compare quantities on a number line and explain the meaning of zero in context.
MA.6.NSO.1.3	Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.	4 - Good Alignment	Students find the absolute value of rational numbers.
MA.6.NSO.1.4	Solve mathematical and real-world problems involving absolute value, including the comparison of absolute value.	4 - Good Alignment	Students solve problems involving absolute value and comparison of absolute value.

MA.6.NSO.2.1	Multiply and divide positive multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	4 - Good Alignment	Students multiply and divide positive multi-digit numbers with decimals to thousandths.
MA.6.NSO.2.2	Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.	3 - Fair Alignment	Instruction limited to multiplication, no division.
MA.6.NSO.2.3	Solve multi-step real-world problems involving any of the four operations with positive multi-digit decimals or positive fractions, including mixed numbers.	4 - Good Alignment	Students solve multi-step with four operations with positive fractions, mixed numbers and positive multi-digit decimals.
MA.6.NSO.3.1	Given a mathematical or real-world context, find the greatest common factor and least common multiple of two whole numbers.	4 - Good Alignment	Students find the GCF and LCM of two whole numbers.
MA.6.NSO.3.2	Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.	2 - Poor Alignment	Does not meet the benchmark
MA.6.NSO.3.3	Evaluate positive rational numbers with natural number exponents.	4 - Good Alignment	Instruction includes evaluating positive rational numbers and integers with natural number exponents.
MA.6.NSO.3.4	Express composite whole numbers as a product of prime factors with natural number exponents.	4 - Good Alignment	Instruction includes expressing composite whole numbers as a product of prime factors with natural number exponents.
MA.6.NSO.3.5	Rewrite positive rational numbers in different but equivalent forms including fractions, terminating decimals and percentages.	4 - Good Alignment	Page 436-442 meet benchmark.

MA.6.NSO.4.1	Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.	4 - Good Alignment	Instruction includes operations with whole numbers to add and subtract integers.
MA.6.NSO.4.2	Apply and extend previous understandings of operations with whole numbers to multiply and divide integers with procedural fluency.	4 - Good Alignment	Instruction includes operations with whole numbers to multiply and divide integers.
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Instruction apply properties of operations to add and subtract linear expressions with rational coefficients.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	4 - Good Alignment	Instruction meets the benchmark.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Instruction includes writing and solving one-step inequalities in one variable within mathematical context algebraically or graphically.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	4 - Good Alignment	Instruction meets benchmark.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Instruction includes how to determine an appropriate measure of center of measure of variation to summarize numerical data.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to	4 - Good Alignment	Instruction meets benchmark.

	make comparisons, interpret results and draw conclusions about the two populations.		
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Instruction meets benchmark.
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	3 - Fair Alignment	Instruction partially meets benchmark.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	4 - Good Alignment	Instruction includes applying the formulas to find the areas of trapezoids, parallelograms and rhombi.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	4 - Good Alignment	Instruction includes area of polygons or composite figures by decomposing them into triangles or quadrilaterals.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	2 - Poor Alignment	Instruction does not include whole-number exponents.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Instruction meets benchmark.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Instruction includes solving problems involving any of the

			four operations with rational numbers.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.3.1	Complete tasks with mathematical fluency.	2 - Poor Alignment	Instruction partially meets benchmark.

	<p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p>	2 - Poor Alignment	Instruction partially meets benchmark.

	<p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	2 - Poor Alignment	Instruction partially meets benchmark.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. 	2 - Poor Alignment	Instruction partially meets benchmark.

	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.3.1	Make inferences to support comprehension.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Instruction partially meets benchmark.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	3 - Fair Alignment	Instruction partially meets benchmark.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	3 - Fair Alignment	Instruction partially meets benchmark.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	43 were level 4 alignment and 10 were level 3 alignment.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3 - Fair Alignment	Some of the standards are not fully met in the curriculum.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	The materials are more easily adaptable if using the digital version.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Sufficient details provided for students to understand the significance of topics and events.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	The complexity or difficulty has a fair alignment to the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	The level of treatment of content matches the student abilities and grade level.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3 - Fair Alignment	The complexity or difficulty of the treatment of the content could be a little rushed for the time period allowed.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The primary and secondary sources cited reflect expert information.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	3 - Fair Alignment	The primary and secondary sources somewhat contribute to the quality of the content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	My review did not encounter any typographical or visual errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Material appeared to be free of bias and contradictions.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Material contained concepts, standards and models used in mathematics.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No inconsistencies or mistakes were discovered during my review.

14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Materials are up-to-date.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	The content is presented in appropriate context.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is appropriate and relevant context for intended learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	3 - Fair Alignment	In most situations, content is presented with connections to life in a context that is somewhat meaningful to students.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Materials include interdisciplinary connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Multicultural representations were fair and unbiased.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	Materials portrayed people and animals with compassion, sympathy.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	There is good alignment of benchmarks and standards covered in this course.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Many resources for teachers to use to address, supports for students in additional learning and enrichment.

2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	The components align with the curriculum and each other..
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	All materials are consistently and logically organized in the curriculum.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	The visuals engage students in reading as well as listening.
5. E. Pacing of Content:The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3 - Fair Alignment	The pacing seems to be somewhat fast paced that may not allow all students to understand in the given amount of time.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	There are digital tools to support students to be able to interact with the material, but no feedback after student completes one of the questions.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	There are plenty of presentation materials for this curriculum.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	Materials contain motivational strategies to maintain learner motivation, but they appear to be optional, not necessarily as part of instruction to help with engagement.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	3 - Fair Alignment	Materials have a fair amount of alignment to teaching a few "Big Ideas".
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Materials contain clear statements of outcomes.

4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	3 - Fair Alignment	Some alignment for guidance and support in materials to help students successfully become independent learners.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	There is fair alignment to support for developmental differences and various learning styles.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	The materials engage students with mostly turn and talk collaboration, few opportunities for physical activity.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	Few activities provided .
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	3 - Fair Alignment	Instructional strategies provided in materials, but appear to be optional.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	The instructional strategies are effective in teaching targeted outcomes.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	3 - Fair Alignment	The materials use few assessment strategies.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	3 - Fair Alignment	The assessment strategies incorporated in the materials are somewhat effective in assessing learners' performance.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	3 - Fair Alignment	Only a fair alignment of UDL strategies in this curriculum.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	Only a fair amount of alignment to ELA expectations and MTR standards.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3 - Fair Alignment	There is a fair alignment to Learning requirements.
---	--------------------	---

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	Materials did not appear to have any CRT reference.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials did not appear to have any Culturally Responsive Teaching.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Materials did not appear to have any Social Justice as it relates to CRT.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	Materials did not appear to have any SEL strategies.

Reviewer's Name: Joanna Pitts

Title: HMH Florida's B.E.S.T. Into Math Accelerated 6

Publisher: Houghton Mifflin Harcourt

Grade Level: 6-8

Course: [M/J Grade 6 Accelerated Mathematics](#)

Bid ID: 465

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Strength - Teacher edition book and organized very well. I love the various suggestions for teachers to use for centers, differentiation, group work, prior knowledge check, etc. There are a lot of opportunities for students to practice and teachers to review and assess. The adaptive practice is a great tool to supplement when needed. The material provided makes it easy for teachers to find what they need to teach and easily differentiate lessons when needed without having to find extra materials on

their own. The lessons are not "over loaded" with information, which can cause students to become overwhelmed. The skills are taught by steps and are organized in a way to keep students engaged in the procedures being learned which can help students to understand the procedures better. Weaknesses - I did not find many weaknesses in this material - I would only say more materials for ELL students could be added or at least suggestions to help those students.

Standard	Description	Reviewer Rating	Rating Justification
MA.6.AR.1.1	Given a mathematical or real-world context, translate written descriptions into algebraic expressions and translate algebraic expressions into written descriptions.	4 - Good Alignment	Students are given descriptions and examples of expressions; plenty of practice to write expressions and descriptions
MA.6.AR.1.2	Translate a real-world written description into an algebraic inequality in the form of $\square < \square$. Represent the inequality on a number line.	4 - Good Alignment	Problems are written in various forms, giving students opportunities to see various representations
MA.6.AR.1.3	Evaluate algebraic expressions using substitution and order of operations.	4 - Good Alignment	Lesson follows standards and benchmark clarification
MA.6.AR.1.4	Apply the properties of operations to generate equivalent algebraic expressions with integer coefficients.	5 - Very Good Alignment	Standard is covered completely; all properties are defined and practiced throughout the lesson.
MA.6.AR.2.1	Given an equation or inequality and a specified set of integer values, determine which values make the equation or inequality true or false.	3 - Fair Alignment	Equations and inequalities are dispersed throughout multiple lessons; the

			skill is connected with other benchmarks easily
MA.6.AR.2.2	Write and solve one-step equations in one variable within a mathematical or real-world context using addition and subtraction, where all terms and solutions are integers.	5 - Very Good Alignment	Benchmark clarifications are followed; various representations of equations are used in multiple lessons. I love how this standard is spread out through multiple lessons and various strategies are used.
MA.6.AR.2.3	Write and solve one-step equations in one variable within a mathematical or real-world context using multiplication and division, where all terms and solutions are integers.	5 - Very Good Alignment	Standard is covered in detail; clarifications are addressed.
MA.6.AR.2.4	Determine the unknown decimal or fraction in an equation involving any of the four operations, relating three numbers, with the unknown in any position.	3 - Fair Alignment	Lessons have more practice with decimals than fractions; only a few fraction addition and subtraction problems found in the lessons.
MA.6.AR.3.1	Given a real-world context, write and interpret ratios to show the relative sizes of two quantities using appropriate notation: □, a to b, or a:b where $b \neq 0$.	4 - Good Alignment	Real world context given; benchmark clarifications are followed.
MA.6.AR.3.2	Given a real-world context, determine a rate for a ratio of quantities with different units. Calculate and interpret the corresponding unit rate.	4 - Good Alignment	Benchmark is covered completely.
MA.6.AR.3.3	Extend previous understanding of fractions and numerical patterns to generate or complete a two- or three-column table to display equivalent part-to-part ratios and part-to-part-to-whole ratios.	3 - Fair Alignment	Lessons could have more practice with creating tables.

MA.6.AR.3.4	Apply ratio relationships to solve mathematical and real-world problems involving percentages using the relationship between two quantities.	4 - Good Alignment	Lesson instruction follows benchmark clarification
MA.6.AR.3.5	Solve mathematical and real-world problems involving ratios, rates and unit rates, including comparisons, mixtures, ratios of lengths and conversions within the same measurement system.	4 - Good Alignment	Problems given are real world related; various representations are used.
MA.6.DP.1.1	Recognize and formulate a statistical question that would generate numerical data.	4 - Good Alignment	Lesson addresses benchmark accurately.
MA.6.DP.1.2	Given a numerical data set within a real-world context, find and interpret mean, median, mode and range.	4 - Good Alignment	All measures of are covered except for range (range is addressed later in the box plot lesson).
MA.6.DP.1.3	Given a box plot within a real-world context, determine the minimum, the lower quartile, the median, the upper quartile and the maximum. Use this summary of the data to describe the spread and distribution of the data.	4 - Good Alignment	Real world problems are used; all parts of box plots are given in examples and practice throughout lessons.
MA.6.DP.1.4	Given a histogram or line plot within a real-world context, qualitatively describe and interpret the spread and distribution of the data, including any symmetry, skewness, gaps, clusters, outliers and the range.	4 - Good Alignment	Lesson uses both histograms and line plots; all vocabulary is explained and modeled in detail.
MA.6.DP.1.5	Create box plots and histograms to represent sets of numerical data within real-world contexts.	5 - Very Good Alignment	Benchmark is spread out throughout multiple lessons which allow skills to build upon one another.
MA.6.DP.1.6	Given a real-world scenario, determine and describe how changes in data values impact measures of center and variation.	4 - Good Alignment	Module 18 covers all types of measures and diagrams, detailed practice for students to practice description of histograms, box plots, and line plots.

MA.6.GR.1.1	Extend previous understanding of the coordinate plane to plot rational number ordered pairs in all four quadrants and on both axes. Identify the x- or y-axis as the line of reflection when two ordered pairs have an opposite x- or y-coordinate.	4 - Good Alignment	Lesson covers standard appropriately.
MA.6.GR.1.2	Find distances between ordered pairs, limited to the same x-coordinate or the same y-coordinate, represented on the coordinate plane.	4 - Good Alignment	Lesson covers standard; real world problems are given to practice skill
MA.6.GR.1.3	Solve mathematical and real-world problems by plotting points on a coordinate plane, including finding the perimeter or area of a rectangle.	4 - Good Alignment	Benchmark clarifications are covered; instruction and examples are given in detail.
MA.6.GR.2.1	Derive a formula for the area of a right triangle using a rectangle. Apply a formula to find the area of a triangle.	5 - Very Good Alignment	Instruction includes relationship between rectangles and triangles to derive area formula and practice using the formula.
MA.6.GR.2.2	Solve mathematical and real-world problems involving the area of quadrilaterals and composite figures by decomposing them into triangles or rectangles.	4 - Good Alignment	Lesson uses circles, which is a 7th grade standard but this fits in well since this is an advanced course.
MA.6.GR.2.3	Solve mathematical and real-world problems involving the volume of right rectangular prisms with positive rational number edge lengths using a visual model and a formula.	5 - Very Good Alignment	Students first learn how to calculate volume, then next lesson uses this to build onto finding missing dimensions.
MA.6.GR.2.4	Given a mathematical or real-world context, find the surface area of right rectangular prisms and right rectangular pyramids using the figure's net.	4 - Good Alignment	Standard and benchmark clarifications are covered.
MA.6.NSO.1.1	Extend previous understanding of numbers to define rational numbers. Plot, order and compare rational numbers.	4 - Good Alignment	Standard is covered in detail and benchmark

			clarifications are followed.
MA.6.NSO.1.2	Given a mathematical or real-world context, represent quantities that have opposite direction using rational numbers. Compare them on a number line and explain the meaning of zero within its context.	4 - Good Alignment	Benchmark clarification 1 is covered really well throughout the lessons, using different verbal comparison words.
MA.6.NSO.1.3	Given a mathematical or real-world context, interpret the absolute value of a number as the distance from zero on a number line. Find the absolute value of rational numbers.	3 - Fair Alignment	Absolute values is covered well, but lesson needs various number lines (most of them are horizontal) and more practice with absolute value of rational numbers.
MA.6.NSO.1.4	Solve mathematical and real-world problems involving absolute value, including the comparison of absolute value.	4 - Good Alignment	Real world examples and problems are given.
MA.6.NSO.2.1	Multiply and divide positive multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Lessons build upon one another (multiplication to division), benchmark clarifications are followed.
MA.6.NSO.2.2	Extend previous understanding of multiplication and division to compute products and quotients of positive fractions by positive fractions, including mixed numbers, with procedural fluency.	4 - Good Alignment	Lessons use appropriate amount of visual models to connected to standard algorithm, lessons build upon one another to promote understanding of skill.
MA.6.NSO.2.3	Solve multi-step real-world problems involving any of the four operations with positive multi-digit decimals or positive fractions, including mixed numbers.	4 - Good Alignment	Multi step problems are given throughout various lessons to connect skill with other benchmarks as well.

MA.6.NSO.3.1	Given a mathematical or real-world context, find the greatest common factor and least common multiple of two whole numbers.	4 - Good Alignment	Lessons connected GCF and LCM with simplifying fractions.
MA.6.NSO.3.2	Rewrite the sum of two composite whole numbers having a common factor, as a common factor multiplied by the sum of two whole numbers.	4 - Good Alignment	Benchmark is covered with GCF.
MA.6.NSO.3.3	Evaluate positive rational numbers with natural number exponents.	4 - Good Alignment	Material covers benchmark thoroughly.
MA.6.NSO.3.4	Express composite whole numbers as a product of prime factors with natural number exponents.	4 - Good Alignment	Instruction and material connects prime factorization with other benchmark skills (GCF and distributive property).
MA.6.NSO.3.5	Rewrite positive rational numbers in different but equivalent forms including fractions, terminating decimals and percentages.	4 - Good Alignment	Benchmark is covered.
MA.6.NSO.4.1	Apply and extend previous understandings of operations with whole numbers to add and subtract integers with procedural fluency.	4 - Good Alignment	Benchmark is covered; use of number lines are extensive which is good; more manipulatives and diagrams would be useful for addition and subtraction.
MA.6.NSO.4.2	Apply and extend previous understandings of operations with whole numbers to multiply and divide integers with procedural fluency.	4 - Good Alignment	Good use of models and diagrams in instruction
MA.7.AR.1.1	Apply properties of operations to add and subtract linear expressions with rational coefficients.	4 - Good Alignment	Good connections with previously learned skills; benchmark clarifications are addressed.
MA.7.AR.1.2	Determine whether two linear expressions are equivalent.	3 - Fair Alignment	Benchmark clarification 2 mentions rational

			coefficients; lessons need more practice with fraction coefficients.
MA.7.AR.2.1	Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.	4 - Good Alignment	Benchmark and clarifications are covered in lessons.
MA.7.AR.3.1	Apply previous understanding of percentages and ratios to solve multi-step real-world percent problems.	5 - Very Good Alignment	All types of percent problems are represented throughout various lessons.
MA.7.AR.3.2	Apply previous understanding of ratios to solve real-world problems involving proportions.	4 - Good Alignment	Real world problems are used to solve proportion problems; also link to statistics and probability.
MA.7.DP.1.1	Determine an appropriate measure of center or measure of variation to summarize numerical data, represented numerically or graphically, taking into consideration the context and any outliers.	4 - Good Alignment	Benchmark clarification includes justification of appropriate measures; more opportunities for this could be added in the lesson.
MA.7.DP.1.2	Given two numerical or graphical representations of data, use the measure(s) of center and measure(s) of variability to make comparisons, interpret results and draw conclusions about the two populations.	5 - Very Good Alignment	All types of representation is given in the lessons for students to compare data.
MA.7.DP.1.3	Given categorical data from a random sample, use proportional relationships to make predictions about a population.	4 - Good Alignment	Standard is covered well in material.
MA.7.DP.2.1	Determine the sample space for a simple experiment.	4 - Good Alignment	Standard is covered well in material; different scenarios are given for probability.

MA.7.DP.2.2	Given the probability of a chance event, interpret the likelihood of it occurring. Compare the probabilities of chance events.	4 - Good Alignment	Instruction includes descriptions found in benchmark clarifications.
MA.7.DP.2.3	Find the theoretical probability of an event related to a simple experiment.	4 - Good Alignment	Different scenarios are used to practice skill (marbles, rolling die, etc.)
MA.7.DP.2.4	Use a simulation of a simple experiment to find experimental probabilities and compare them to theoretical probabilities.	4 - Good Alignment	Lesson instructs on experimental and theoretical probability as clarification suggests.
MA.7.GR.1.1	Apply formulas to find the areas of trapezoids, parallelograms and rhombi.	5 - Very Good Alignment	Lesson instruction relates area of shapes to rectangles and triangles, connecting previous skills with benchmark.
MA.7.GR.1.2	Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals.	4 - Good Alignment	Examples given and material used in instruction covers benchmark.
MA.7.NSO.2.1	Solve mathematical problems using multi-step order of operations with rational numbers including grouping symbols, whole-number exponents and absolute value.	4 - Good Alignment	Practice problems include exponents, absolute value, and grouping symbols. Practice problems are complex, encouraging students to think above level.
MA.7.NSO.2.2	Add, subtract, multiply and divide rational numbers with procedural fluency.	4 - Good Alignment	Lessons completely cover standard.
MA.7.NSO.2.3	Solve real-world problems involving any of the four operations with rational numbers.	4 - Good Alignment	Benchmark is covered in multiple lessons.
MA.K12.MTR.1.1	Mathematicians who participate in effortful learning both individually and with others:	4 - Good Alignment	Tasks throughout lessons encourage students to participate in lesson by explaining

	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		or sharing thinking with one another.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	4 - Good Alignment	Most lessons include models and various scenarios for students to think about the problems in multiple ways. Connections are made with previous skills to help students understand the skill.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. 	4 - Good Alignment	Instruction promotes fluency; students are encouraged to explain methods.

	<ul style="list-style-type: none"> • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	4 - Good Alignment	Spark Your Learning section in front of lessons allows students to explain and discuss their thinking with others.
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. 	4 - Good Alignment	Lessons focus on patterns to to solve problems and understand complex problems.

	<ul style="list-style-type: none"> Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	4 - Good Alignment	Discussions are encouraged, explanations are encouraged throughout lessons.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	All lessons use real world and relatable problems for students to understand the importance of the skills they are learning.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	Every lesson begins with a "Turn and Talk"

			question that encourages students to communicate and justify their answer.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Information and text is on grade level.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Students are encouraged to infer information about each lesson at the beginning, which give them a goal and reason for completed problems presented in the lesson.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	Turn and Talk and Learning Mindset sections in the lessons allow for students to reflect on their learning and reasoning; it also encourages them to explain why their discussions are helpful.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Many opportunities given for students to show and explain their steps and work when solving problems
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Variety of questions and discussion topics are given throughout the lessons, which allows students to practice their speaking and writing skills.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary	3 - Fair Alignment	Differentiated options are given throughout teacher edition; more

	for academic success in the content area of Mathematics.		suggestions for ELL learners may be helpful.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Sixth grade, as well as 7th grade standards for advanced courses, are covered well in all lessons.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Text material is appropriate for sixth grade.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Online instruction, textbook material, extra resources are all easily adaptable.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Examples and instruction seems to all be thought out well, Turn and Talk throughout the lessons gives students opportunities to discuss learning together.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Standards are matched in the lessons; students are given complex problems to carry the standards a bit farther when appropriate.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Lessons in text matches complexity for students in advanced courses.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The lessons are thorough and are spaced out in a way that students can understand material in an appropriate timeframe.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	The online Adaptive Practice works well with textbook material; students can work at

		their own pace or be assigned extra assignments based on classroom lessons.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Adaptive Practice allows for extra practice; extra materials (such as reteach worksheets) are also available.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	No noticeable errors found.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	No bias found.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Content is accurate based on standards.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	No mistakes found in material or instruction.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	Instruction seems up to date with current student learning.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	Content matches standards and benchmark
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	Content is appropriate for sixth grade learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	Content is real world and relatable, giving students and understanding of the importance of what they are learning.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Students are able to make connections with other subject areas within many of the lessons.

19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	No bias or unfair information found.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	No inappropriate information found.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	Benchmark and standards are clearly covered in the material.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Many suggestions given to support students with extra lessons and activities (some require teachers to make materials, but nothing more than writing problems on index cards or post-its mostly).
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Online practice and activities given in teacher edition match with the main lessons.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Lessons are organized in a way that makes sense to the students.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Lessons are organized and set up in a way that should keep students engaged throughout the lesson.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Lessons are not "overloaded" with information. The instruction is organized well so students can understand content easily.

6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	3 - Fair Alignment	Students can have access to textbook digitally or in print.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	The textbook seems to be organized well and all information is easy to find and easy to read.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Turn and talk sections allow students to stay engaged. Having discussions with one another can help to motivate them to stay engaged with the instruction.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Modules are organized by Big Ideas, each lesson goes through the concepts that align with the Big Ideas.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	Students are encouraged to answer questions either orally or by writing down answers about what they are learning or will be learning about.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	As students work through examples or guided problems, written instruction explains the concept further.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	3 - Fair Alignment	Teacher edition gives suggestions for activities to support learners who need more instruction.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	3 - Fair Alignment	Materials engaged students mentally, turn and talk could be considered physical engagement.

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The teacher edition includes many different suggestions to engage students and help those who need more support and extend learning for high achieving learners.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Math problems taught by steps and explained thoroughly
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4 - Good Alignment	Instruction is focused on fluency and procedural knowledge.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	End of lessons have test prep
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	Students are asked to explain steps in finding answer and show steps; various assessment opportunities are given in the teacher edition
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	Teacher edition provides various differentiated learning suggestions and activities
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	Many opportunities for written and oral communication and group work.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Various learning strategies are used throughout lessons.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	No CRT found in materials
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No CRT found in materials

Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	No evidence of CRT found
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	No evidence of this found

A	B	C	D	E												
Bid #	Course	Title	Special Topics (Y/N)	Subject-Specific Standards Score

Subject: Appeal for Statistics and Probability Through Applications

Hi Lauren, Angelia, Cathy and Amber:

We are having a hard time putting together our appeal to the state without information as to why our title *Statistics and Probability Through Applications* was rejected for the Honors Statistics and Probability course. From where we sit we are almost perfectly aligned, have no questionable coverage and the title is not based on Common Core so we're not only puzzled by the decision but having a hard time putting together an appeal. How can this information be made available to us so we can best address the state in a timely manner?

Thank you for the help and have a good evening!

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Hi Lauren,

My colleague Tonya sent along the appeal document via email earlier today and via UPS set to arrive tomorrow.

We look forward to speaking with you and coming to a resolution to allow SPA to be accepted to the approved list. Is this something you will arrange at your end?

Thank you!

Lauren,

I have attached the spreadsheet for our appeal as well as the document with access instructions for SaplingPlus. Please let me know if you need anything else.

I know that you all are working around the clock - do you have any idea of the timeline for a response from the State?

We all appreciate your guidance through this process.

Best,

Claire Thompson

Hello,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 11:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time BFW has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

4		CRT not in instructional materials- Look at Additional Questions 10.1 Response Bias in Activities and Due Dates	We have responded to the concern by changing the context of the Additional Question in the optional Sapling Plus program about Response Bias in Activities in section 10.1. This change has been made to our national bank of Sapling questions. The new context of Question ID: 3141896 now addresses response bias by looking at an experiment designed to determine if the breed of dog being walked by the interviewer can influence how people respond to the survey question: "Do you like dogs?"	See attached document for access to our digital platform- Sapling Plus

37										

Can an interviewer influence how people respond to the survey question, "Do you like dogs?" carried out an experiment. As each person approached, Jason flipped a coin. If it landed on heads, he asked the person if they like dogs. If the coin landed on tails, Jason picked up a clipboard and asked the person if they like dogs. Of the 50 people that Jason surveyed while holding his puppy, 35 said "Yes," while 11 of the 40 people that Jason surveyed while holding his puppy said "Yes." Let p_1 = the true proportion of people like the ones in this study when Jason is holding his puppy and p_2 = the true proportion of people like the ones in this study when Jason is holding a clipboard.

Construct and interpret a 90% confidence interval for the difference in the proportion of people like dogs when Jason is holding his puppy or a clipboard.

- (0.299, 0.601)
- We are 90% confident that the interval from 0.299 to 0.601 captures $p_1 - p_2$ = the true difference in the proportion of people like dogs when Jason is holding his puppy and p_2 = the true proportion of people like the ones in this study who would say they like dogs when Jason is holding a clipboard.
- (0.270, 0.630)
- We are 90% confident that the interval from 0.270 to 0.630 captures $p_1 - p_2$ = the true difference in the proportion of people like dogs when Jason is holding his puppy and p_2 = the true proportion of people like the ones in this study who would say they like dogs when Jason is holding a clipboard.

Lauren,

I have attached the spreadsheet for our appeal as well as the document with access instructions for SaplingPlus. Please let me know if you need anything else.

I know that you all are working around the clock - do you have any idea of the timeline for a response from the State?

We all appreciate your guidance through this process.

Best,

Claire Thompson

Hello,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 11:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time BFW has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Edition: 4th

Grade Level: 9-12

Course: [Probability and Statistics Honors](#)

Bid ID: 408

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Most of the standards were rated at a 4 or 5. Only a few standards did I rate low based on not being included in the materials. The book includes activities, applets, calculator notes, examples and homework problems.

Standard

Description

Reviewer
Rating

Rating Justification

MA.912.DP.1.1	Given a set of data, select an appropriate method to represent the data, depending on whether it is numerical or categorical data and on whether it is univariate or bivariate.	5 - Very Good Alignment	Lots of examples, plenty of questions in assignments, applet
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is numerical or categorical, whether it is univariate or bivariate and interpret the different components and quantities in the display.	5 - Very Good Alignment	Lots of examples, plenty of questions in assignments
MA.912.DP.1.3	Explain the difference between correlation and causation in the contexts of both numerical and categorical data.	4 - Good Alignment	Examples and questions for homework are provided
MA.912.DP.1.4	Estimate a population total, mean or percentage using data from a sample survey; develop a margin of error through the use of simulation.	4 - Good Alignment	Examples, questions for homework, and applet are provided
MA.912.DP.1.5	Interpret the margin of error of a mean or percentage from a data set. Interpret the confidence level corresponding to the margin of error.	5 - Very Good Alignment	Examples, questions for homework, and applet (simulation) are provided
MA.912.DP.2.1	For two or more sets of numerical univariate data, calculate and compare the appropriate measures of center and measures of variability, accounting for possible effects of outliers. Interpret any notable features of the shape of the data distribution.	5 - Very Good Alignment	Simulation example (pennies activity), examples, questions for homework, warning provided, graphing calculator directions provided, about using statistical software for interquartile range, and applet are provided
MA.912.DP.2.2	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate.	4 - Good Alignment	Applet, examples, teaching tips and homework provided

MA.912.DP.2.3	Estimate population percentages from data that has been fit to the normal distribution.	4 - Good Alignment	Examples and homework problems provided
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	4 - Good Alignment	Great tips on using the graphing calculator (didn't see any directions for the Nspire), applet example, examples and homework provided
MA.912.DP.2.5	Given a scatter plot that represents bivariate numerical data, assess the fit of a given linear function by plotting and analyzing residuals.	4 - Good Alignment	Everyday statistics note will be helpful, Bellringer is weak, Stats medic activity provided, examples and homework provided
MA.912.DP.2.6	Given a scatter plot with a line of fit and residuals, determine the strength and direction of the correlation. Interpret strength and direction within a real-world context.	4 - Good Alignment	Guess the correlation applet is great, instead of giving the data for the candy activity maybe it could be included in the book as a lab, examples and homework provided
MA.912.DP.2.7	Compute the correlation coefficient of a linear model using technology. Interpret the strength and direction of the correlation coefficient.	3 - Fair Alignment	Applet for calculating the correlation coefficient but I didn't see graphing calculator instructions. Examples and homework provided
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	1 - Very Poor/No Alignment	According to the standard students are to use logs to straighten the data. I didn't see any examples of this.
MA.912.DP.3.1	Construct a two-way frequency table summarizing bivariate categorical data.	2 - Poor Alignment	The standard calls for interpretation of joint

	Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.		and marginal frequencies. I could not find either. There is problems on creating a two-way table.
MA.912.DP.3.2	Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.	4 - Good Alignment	Good examples and homework problems
MA.912.DP.3.3	Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint, marginal and conditional relative frequencies in terms of a real-world context.	3 - Fair Alignment	Conditional frequencies are taught but not joint or marginal.
MA.912.DP.3.4	Given a relative frequency table, construct and interpret a segmented bar graph.	4 - Good Alignment	Examples, applet and homework included
MA.912.DP.3.5	Solve real-world problems involving univariate and bivariate categorical data.	4 - Good Alignment	All parts of the standard are met except the circle graph in clarification 3.
MA.912.DP.4.1	Describe events as subsets of a sample space using characteristics, or categories, of the outcomes, or as unions, intersections or complements of other events.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.2	Determine if events A and B are independent by calculating the product of their probabilities.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.3	Calculate the conditional probability of two events and interpret the result in terms of its context.	5 - Very Good Alignment	Examples, online activity (Mr Gallas) and homework are provided
MA.912.DP.4.4	Interpret the independence of two events using conditional probability.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.5	Given a two-way table containing data from a population, interpret the joint and marginal relative frequencies as empirical probabilities	3 - Fair Alignment	Vocabulary is missing (joint and marginal frequencies)

	and the conditional relative frequencies as empirical conditional probabilities. Use those probabilities to determine whether characteristics in the population are approximately independent.		
MA.912.DP.4.6	Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.7	Apply the addition rule for probability, taking into consideration whether the events are mutually exclusive, and interpret the result in terms of the model and its context.	4 - Good Alignment	Examples, online activity and homework are provided
MA.912.DP.4.8	Apply the general multiplication rule for probability, taking into consideration whether the events are independent, and interpret the result in terms of the context.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.9	Apply the addition and multiplication rules for counting to solve mathematical and real-world problems, including problems involving probability.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.10	Given a mathematical or real-world situation, calculate the appropriate permutation or combination.	5 - Very Good Alignment	Examples, applet, graphing calculator instructions and homework are provided
MA.912.DP.5.1	Distinguish between a population parameter and a sample statistic.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.2	Explain how random sampling produces data that is representative of a population.	5 - Very Good Alignment	Examples, lab type activity (Federalist papers) and homework are provided
MA.912.DP.5.3	Compare and contrast sampling methods.	5 - Very Good Alignment	Examples, applet (sunflowers) and homework are provided

MA.912.DP.5.4	Generate multiple samples or simulated samples of the same size to measure the variation in estimates or predictions.	5 - Very Good Alignment	Examples, lab type activity (spinner) and homework are provided
MA.912.DP.5.5	Determine if a specific model is consistent within a given process by analyzing the data distribution from a data-generating process.	4 - Good Alignment	Examples, applet and homework are provided
MA.912.DP.5.6	Determine the appropriate design, survey, experiment or observational study, based on the purpose. Articulate the types of questions appropriate for each type of design.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.7	Compare and contrast surveys, experiments and observational studies.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.8	Draw inferences about two populations using data and statistical analysis from two random samples.	5 - Very Good Alignment	Examples, applet, graphing calculator instructions and homework are provided
MA.912.DP.5.9	Compare two treatments using data from an experiment in which the treatments are assigned randomly.	5 - Very Good Alignment	Examples, applet, graphing calculator instructions and homework are provided
MA.912.DP.5.10	Determine whether differences between parameters are significant using simulations.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.11	Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.6.1	Define a random variable for a quantity of interest by assigning a numerical value to each individual outcome in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.	4 - Good Alignment	Examples, good example in everyday stats and homework are provided

MA.912.DP.6.2	Develop a probability distribution for a discrete random variable using theoretical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.6.3	Develop a probability distribution for a discrete random variable using empirical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	3 - Fair Alignment	Not enough practice with this standard
MA.912.DP.6.4	Given a binomial distribution, calculate and interpret the expected value. Solve real-world problems involving binomial distributions.	5 - Very Good Alignment	Examples, activity (pop quiz) and homework are provided
MA.912.DP.6.5	Solve real-world problems involving geometric distributions.	1 - Very Poor/No Alignment	Not included in the book only activities on statmedic.
MA.912.DP.6.7	Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values and standard deviations. Evaluate and compare strategies on the basis of the calculated expected values and standard deviations.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.6.8	Apply probabilities to make fair decisions, such as drawing from lots or using a random number generator.	5 - Very Good Alignment	Examples, applet and homework are provided
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	5 - Very Good Alignment	Lots of applets and activities provided

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Lots of examples, applets and activities provided
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Lots of examples and homework are provided

<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples, applets and activities provided</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>Lots of examples, applets and activities provided</p>
<p>MA.K12.MTR.6.1</p>	<p>Assess the reasonableness of solutions.</p>	<p>4 - Good Alignment</p>	<p>Lots of questions and activities provided</p>

	<p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Lots of examples, applets and activities provided
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Lots of examples, applets and activities provided
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	The book is very clear with directions and examples.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Lots of inferences are made throughout the book.

ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Lots of examples, applets and activities provided
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Direction and problems are clear.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Direction and problems are clear.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	The glossary includes both English and Spanish words.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	The majority of the standards I rated a 4 or 5.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	The majority of the standards I rated a 4 or 5.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The majority of the standards I rated a 4 or 5.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Lots of examples, applets, activities and homework.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	The questions and examples are on the level of the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	The questions and examples are on the level of the grade level and students abilities
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The book will allow for the standards to be finished for school year.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Great examples and sources provided.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Great examples and sources provided.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	The content is accurate.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Content seems to be free of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	The content provides examples from everyday life.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	The content uses a lot of real life data.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	The content uses a lot of real life data.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	The content is appropriate and relevant based on the examples and homework.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	The questions are at an appropriate level for high school students.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	The content uses a lot of real life data.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The content uses a lot of real life data that are appropriate to other subjects.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Names and examples represent all cultures

20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	There is no hard-core porn. Examples are appropriate.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	The benchmarks and standards are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Lots of examples, calculator notes, activities and applets.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Lots of examples, calculator notes, activities and applets.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	The material is in a logical order.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Videos and examples are appropriate.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	The pacing is appropriate.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	The students can highlight in the book, have the text read and enlarge the print. The print on the applets can not be adjusted. Video instructions are provided.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Lots of resources provided.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Lots of real life examples, pictures and graphs.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	All the big ideas are thoroughly covered.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	All directions and examples are clear.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Written instructions, video instructions and video explanations are provided.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Written instructions, video instructions and video explanations are provided.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Applet and activities are provided.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Activities are real life and help the students make connections.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Applet, activities, graphing calculator activities and homework are provided.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Applet, activities, graphing calculator activities, examples and homework are provided.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessment is appropriate
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	assessment is appropriate

12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	The students can highlight in the book, have the text read and enlarge the print. The print on the applets can not be adjusted. Video instructions are provided.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	There is appropriate applications with the BEST standards.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Yes, this book is satisfactory.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	This textbook doesn't really include any of these topics (Holocaust, slavery, the Civil War and Reconstruction, the civil rights movement and the contributions of women, African American and Hispanic people to our country)
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	This textbook does omit CRT.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	This textbook does omit social justice.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	This course doesn't include extraneous strategies.

Reviewer's Name: Virginia Snyder

Title: Statistics and Probability with Applications

Publisher: Bedford, Freeman and Worth Publishing Group

Author: Daren Starnes

Copyright: 2021

Edition: 4th

Grade Level: 9-12

Course: [Probability and Statistics Honors](#)

Bid ID: 408

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Looking only at the major tool (print/online student text), it is possible for an instructor to cover all required benchmarks and clarifications. With the addition of all other resources, this is made even easier. The teacher edition includes tips for making the math real with further real-world connections (even though there are already a large amount in the major tool). There are pre designed homework and assessments that the instructor can use or adapt to fit the needs of their students.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.DP.1.1	Given a set of data, select an appropriate method to represent the data, depending on whether it is numerical or categorical data and on whether it is univariate or bivariate.	5 - Very Good Alignment	Although all clarifications are met, vocabulary stops just short of "univariate" and "bivariate". This is easily supplemented by instructors.
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is numerical or categorical, whether it is univariate or bivariate and interpret the different components and quantities in the display.	5 - Very Good Alignment	Although all clarifications are met, vocabulary stops just short of "univariate" and "bivariate". This is easily supplemented by instructors.
MA.912.DP.1.3	Explain the difference between correlation and causation in the contexts of both numerical and categorical data.	5 - Very Good Alignment	Emphasis that correlation does not equal causation
MA.912.DP.1.4	Estimate a population total, mean or percentage using data from a sample survey; develop a margin of error through the use of simulation.	5 - Very Good Alignment	Tech corner: use of real-world data
MA.912.DP.1.5	Interpret the margin of error of a mean or percentage from a data set. Interpret the confidence level corresponding to the margin of error.	5 - Very Good Alignment	Examples and blueprint for interpretation statements
MA.912.DP.2.1	For two or more sets of numerical univariate data, calculate and compare the appropriate measures of center and measures of variability, accounting for possible effects of outliers. Interpret any notable features of the shape of the data distribution.	5 - Very Good Alignment	Includes use of technology and spreadsheets
MA.912.DP.2.2	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages.	5 - Very Good Alignment	Clear examples and connections with appropriateness and binomial distributions

	Recognize that there are data sets for which such a procedure is not appropriate.		
MA.912.DP.2.3	Estimate population percentages from data that has been fit to the normal distribution.	5 - Very Good Alignment	Inclusion of Tech-Corner and TI-83/84 tutorial
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	Use of real-world, technology, and TI-83/84
MA.912.DP.2.5	Given a scatter plot that represents bivariate numerical data, assess the fit of a given linear function by plotting and analyzing residuals.	5 - Very Good Alignment	Use of formulas, technology (Tech Corner) and TI-83/84
MA.912.DP.2.6	Given a scatter plot with a line of fit and residuals, determine the strength and direction of the correlation. Interpret strength and direction within a real-world context.	5 - Very Good Alignment	Clarifications met
MA.912.DP.2.7	Compute the correlation coefficient of a linear model using technology. Interpret the strength and direction of the correlation coefficient.	5 - Very Good Alignment	Tech Corner and TI-83/84 tutorial
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	Exponential regression is not found within the major tool, but can be access through the Extra Lesson with ease. Materials do include use of technology
MA.912.DP.3.1	Construct a two-way frequency table summarizing bivariate categorical data. Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.	4 - Good Alignment	Tables are given and interpreted, but not explicitly left open for students to complete within the major tool. This is easily supplemented with other provided materials.

MA.912.DP.3.2	Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.	4 - Good Alignment	Tables are given and interpreted, but not explicitly left open for students to complete within the major tool. This is easily supplemented with other provided materials.
MA.912.DP.3.3	Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint, marginal and conditional relative frequencies in terms of a real-world context.	5 - Very Good Alignment	Clarifications met
MA.912.DP.3.4	Given a relative frequency table, construct and interpret a segmented bar graph.	5 - Very Good Alignment	Instructions and detailed practice included
MA.912.DP.3.5	Solve real-world problems involving univariate and bivariate categorical data.	5 - Very Good Alignment	All clarifications met, however explicit use of the terms "univariate" and "bivariate" do not occur
MA.912.DP.4.1	Describe events as subsets of a sample space using characteristics, or categories, of the outcomes, or as unions, intersections or complements of other events.	5 - Very Good Alignment	All items met
MA.912.DP.4.2	Determine if events A and B are independent by calculating the product of their probabilities.	5 - Very Good Alignment	Defined and opportunities for student practice
MA.912.DP.4.3	Calculate the conditional probability of two events and interpret the result in terms of its context.	5 - Very Good Alignment	Real-world practice and applications included
MA.912.DP.4.4	Interpret the independence of two events using conditional probability.	5 - Very Good Alignment	Use of real-world data and applications
MA.912.DP.4.5	Given a two-way table containing data from a population, interpret the joint and marginal relative frequencies as empirical probabilities	5 - Very Good Alignment	Use of real-world data and applications

	and the conditional relative frequencies as empirical conditional probabilities. Use those probabilities to determine whether characteristics in the population are approximately independent.		
MA.912.DP.4.6	Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations.	5 - Very Good Alignment	Real-world data and applications used
MA.912.DP.4.7	Apply the addition rule for probability, taking into consideration whether the events are mutually exclusive, and interpret the result in terms of the model and its context.	5 - Very Good Alignment	Defined with use of real-world data
MA.912.DP.4.8	Apply the general multiplication rule for probability, taking into consideration whether the events are independent, and interpret the result in terms of the context.	5 - Very Good Alignment	Real-world examples
MA.912.DP.4.9	Apply the addition and multiplication rules for counting to solve mathematical and real-world problems, including problems involving probability.	5 - Very Good Alignment	Real-world problems included
MA.912.DP.4.10	Given a mathematical or real-world situation, calculate the appropriate permutation or combination.	5 - Very Good Alignment	Use of real-world data, technology
MA.912.DP.5.1	Distinguish between a population parameter and a sample statistic.	5 - Very Good Alignment	Defined and examples of determining each
MA.912.DP.5.2	Explain how random sampling produces data that is representative of a population.	5 - Very Good Alignment	Definition and determination
MA.912.DP.5.3	Compare and contrast sampling methods.	5 - Very Good Alignment	Compare/contrast, stratified, and cluster sampling no included in the major tool, but can be accessed within the other materials
MA.912.DP.5.4	Generate multiple samples or simulated samples of the same size to measure the variation in estimates or predictions.	5 - Very Good Alignment	Examples and use of real-world data

MA.912.DP.5.5	Determine if a specific model is consistent within a given process by analyzing the data distribution from a data-generating process.	5 - Very Good Alignment	Use of technology
MA.912.DP.5.6	Determine the appropriate design, survey, experiment or observational study, based on the purpose. Articulate the types of questions appropriate for each type of design.	5 - Very Good Alignment	Defined and examples of real-world data utilized
MA.912.DP.5.7	Compare and contrast surveys, experiments and observational studies.	5 - Very Good Alignment	Clarifications met
MA.912.DP.5.8	Draw inferences about two populations using data and statistical analysis from two random samples.	5 - Very Good Alignment	Use of technology and real-world data
MA.912.DP.5.9	Compare two treatments using data from an experiment in which the treatments are assigned randomly.	5 - Very Good Alignment	Clarification met
MA.912.DP.5.10	Determine whether differences between parameters are significant using simulations.	5 - Very Good Alignment	Use of technology included
MA.912.DP.5.11	Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.	5 - Very Good Alignment	Used throughout major tool
MA.912.DP.6.1	Define a random variable for a quantity of interest by assigning a numerical value to each individual outcome in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.	5 - Very Good Alignment	Includes use of real-world data
MA.912.DP.6.2	Develop a probability distribution for a discrete random variable using theoretical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	5 - Very Good Alignment	Multiple examples and real-world data included

MA.912.DP.6.3	Develop a probability distribution for a discrete random variable using empirical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	5 - Very Good Alignment	Use of real-world data included
MA.912.DP.6.4	Given a binomial distribution, calculate and interpret the expected value. Solve real-world problems involving binomial distributions.	5 - Very Good Alignment	Clarifications met
MA.912.DP.6.5	Solve real-world problems involving geometric distributions.	5 - Very Good Alignment	Clarification met
MA.912.DP.6.7	Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values and standard deviations. Evaluate and compare strategies on the basis of the calculated expected values and standard deviations.	5 - Very Good Alignment	Clarifications met
MA.912.DP.6.8	Apply probabilities to make fair decisions, such as drawing from lots or using a random number generator.	5 - Very Good Alignment	Use of real-world data
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	Major tool appears to be designed for student engagement, walking students through each calculation and process
MA.K12.MTR.2.1	Demonstrate understanding by representing problems in multiple ways.	5 - Very Good Alignment	Activities designed for students to make connections between the mathematics

	<p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		performed and the concepts and representations of real-world data
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	Multiple opportunities provided for students to be successful in performing calculations through different methods
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p>	5 - Very Good Alignment	Students are encouraged to work with others and are taught how to communicate about the data and

	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		information they are interpreting
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	5 - Very Good Alignment	When new concepts are introduced, students are led through the step-by-step planning process for determining different information about the data
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. 	5 - Very Good Alignment	Students continuously asked to interpret the reasonableness of their solutions

	<ul style="list-style-type: none"> • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Almost all examples and questions within the major tool and other resources include real-world data and citations
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Introduced as part of the statistical problem solving process
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	Throughout the major tool, students are asked to comprehend processes and interpret solutions
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	Context clues used throughout of each example and question
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Supported through frequent use of vocabulary and having students interpret their findings

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	Supported through frequent use of vocabulary and having students interpret their findings
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Supported through frequent use of vocabulary and having students interpret their findings
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Spanish glossary included as part of major tool. Spanish Flashcards also included with additional student resources

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	All benchmarks and clarifications are met
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Meets the honors curriculum requirements
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Easily taught with only the major tools, all other resources add to the ease of instruction and student mastery
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	In depth explanations clarify concepts for students
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	All clarifications are met

6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Honors curriculum
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Suggested pacing guide provided to aid instructors in planning for full coverage of the course
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	All data is cited, and many resources are directly accessible
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Students can easily make real-world connections with all of the data and examples provided
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	Upon looking through the online text, there do not seem to be any typographical or visual errors
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Data presented is free of bias and contradictions and is noninflammatory in nature.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Easily adaptable to teaching AP Statistics with some supplementary material needed
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Link to errata on publisher website
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	All data is cited and up-to-date, with many sources dated 2020
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	All curriculum, standards, and benchmark requirements are met
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world data makes topics relevant to students

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-world data the is relevant to students is included. (Driving, grades, heights, music, etc.)
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Reference to the use of the skills students are learning are made to show students the real-world applications
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Portrayal of multicultural groups is fair and unbiased
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Humanity and compassion portrayed through the use of data in the major tool
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Content of benchmarks and standards are met

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	All benchmarks are covered by the major tool and provided additional resources
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Components of the major tool align to the curriculum on CPALMS and the additional resources
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Material is presented in a logical order for mastery of the content
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Visual representations of data grabs students attention and audio is available on the online student text

5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Pacing guide included to aid in planning of content coverage
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Students can resize text in the online textbook, as well as a screen reader. Alternate videos and examples are also available for students.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	There are many resources available for student to be successful; including video tutorials and extra practice examples.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Real-world, relevant examples provided with data citations
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	"Big Ideas" covered in Probability and Statistics are met in the instructional materials
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Learning Objectives listed at the beginning of each section in the major tool
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Sections progress through a gradual release with examples and student practice, reviews, and practice tests complete with multiple choice and free response questions
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Resources are easily adaptable for student differentiation
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Activities are designed with student engagement in mind.

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	Editable assignments and assessments are included for instructional use
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	All MTRs covered
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Strategies are included in the Instructor Resources to aid in accomplishing targeted outcomes
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Strategies are included in the Instructor Resources to aid in accomplishing targeted outcomes
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Strategies are included in the Instructor Resources to aid in accomplishing targeted outcomes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	Size, color, background in the online text are all adjustable; videos are captioned; text-to-speech tools;
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	MTRs are incorporated throughout the tools and resources
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Materials have adequate supports to satisfy the LEARNING requirements

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence of CRT is found in the materials
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT is found in the materials

Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT is found in the materials
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence of SEL is found in the materials

Title: Statistics and Probability with Applications

Publisher: Bedford, Freeman and Worth Publishing Group

Author: Daren Starnes

Copyright: 2021

Edition: 4th

Grade Level: 9-12

Course: [Probability & Statistics with Applications Honors](#)

Bid ID: 408

Prohibited Topic	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT not in instructional materials - Look at Additional Questions 10.1 Response Bias in Activities and Due Dates

Does the appearance of the interviewer influence how people respond to a survey question? Ken (white, with blond hair) and Hassan (darker, with Middle Eastern features) conducted an experiment to address this question. They took turns (in a random order) walking up to people on the main street of a small town, identifying themselves as students from a local high school, and asking them, "Do you support President Obama's decision to launch airstrikes in Iraq?" Of the 50 people Hassan spoke to, 11 said "Yes," while 21 of the 44 people Ken spoke to said "Yes." Let p_1 = the true proportion of people like the ones in this study who would say they support President Obama's decision when asked by Hassan and p_2 = the true proportion of people like the ones in this study who say they support President Obama's decision when asked by Ken.

Construct and interpret a 90% confidence interval for the difference in the proportion of people like these who would say they support President Obama's decision when asked by Hassan versus when asked by Ken.

Hello,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 11:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time BFW has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Most of the standards were rated at a 4 or 5. Only a few standards did I rate low based on not being included in the materials. The book includes activities, applets, calculator notes, examples and homework problems.

Standard	Description	Reviewer Rating	Rating Justification
----------	-------------	-----------------	----------------------

MA.912.DP.1.1	Given a set of data, select an appropriate method to represent the data, depending on whether it is numerical or categorical data and on whether it is univariate or bivariate.	5 - Very Good Alignment	Lots of examples, plenty of questions in assignments, applet
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is numerical or categorical, whether it is univariate or bivariate and interpret the different components and quantities in the display.	5 - Very Good Alignment	Lots of examples, plenty of questions in assignments
MA.912.DP.1.3	Explain the difference between correlation and causation in the contexts of both numerical and categorical data.	4 - Good Alignment	Examples and questions for homework are provided
MA.912.DP.1.4	Estimate a population total, mean or percentage using data from a sample survey; develop a margin of error through the use of simulation.	4 - Good Alignment	Examples, questions for homework, and applet are provided
MA.912.DP.1.5	Interpret the margin of error of a mean or percentage from a data set. Interpret the confidence level corresponding to the margin of error.	5 - Very Good Alignment	Examples, questions for homework, and applet (simulation) are provided
MA.912.DP.2.1	For two or more sets of numerical univariate data, calculate and compare the appropriate measures of center and measures of variability, accounting for possible effects of outliers. Interpret any notable features of the shape of the data distribution.	5 - Very Good Alignment	Simulation example (pennies activity), examples, questions for homework, warning provided, graphing calculator directions provided, about using statistical software for interquartile range, and applet are provided
MA.912.DP.2.2	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate.	4 - Good Alignment	Applet, examples, teaching tips and homework provided

MA.912.DP.2.3	Estimate population percentages from data that has been fit to the normal distribution.	4 - Good Alignment	Examples and homework problems provided
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	4 - Good Alignment	Great tips on using the graphing calculator (didn't see any directions for the Nspire), applet example, examples and homework provided
MA.912.DP.2.5	Given a scatter plot that represents bivariate numerical data, assess the fit of a given linear function by plotting and analyzing residuals.	4 - Good Alignment	Everyday statistics note will be helpful, Bellringer is weak, Stats medic activity provided, examples and homework provided
MA.912.DP.2.6	Given a scatter plot with a line of fit and residuals, determine the strength and direction of the correlation. Interpret strength and direction within a real-world context.	4 - Good Alignment	Guess the correlation applet is great, instead of giving the data for the candy activity maybe it could be included in the book as a lab, examples and homework provided
MA.912.DP.2.7	Compute the correlation coefficient of a linear model using technology. Interpret the strength and direction of the correlation coefficient.	3 - Fair Alignment	Applet for calculating the correlation coefficient but I didn't see graphing calculator instructions. Examples and homework provided
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	1 - Very Poor/No Alignment	According to the standard students are to use logs to straighten the data. I didn't see any examples of this.
MA.912.DP.3.1	Construct a two-way frequency table summarizing bivariate categorical data.	2 - Poor Alignment	The standard calls for interpretation of joint

	Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.		and marginal frequencies. I could not find either. There is problems on creating a two-way table.
MA.912.DP.3.2	Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.	4 - Good Alignment	Good examples and homework problems
MA.912.DP.3.3	Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint, marginal and conditional relative frequencies in terms of a real-world context.	3 - Fair Alignment	Conditional frequencies are taught but not joint or marginal.
MA.912.DP.3.4	Given a relative frequency table, construct and interpret a segmented bar graph.	4 - Good Alignment	Examples, applet and homework included
MA.912.DP.3.5	Solve real-world problems involving univariate and bivariate categorical data.	4 - Good Alignment	All parts of the standard are met except the circle graph in clarification 3.
MA.912.DP.4.1	Describe events as subsets of a sample space using characteristics, or categories, of the outcomes, or as unions, intersections or complements of other events.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.2	Determine if events A and B are independent by calculating the product of their probabilities.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.3	Calculate the conditional probability of two events and interpret the result in terms of its context.	5 - Very Good Alignment	Examples, online activity (Mr Gallas) and homework are provided
MA.912.DP.4.4	Interpret the independence of two events using conditional probability.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.5	Given a two-way table containing data from a population, interpret the joint and marginal relative frequencies as empirical probabilities	3 - Fair Alignment	Vocabulary is missing (joint and marginal frequencies)

	and the conditional relative frequencies as empirical conditional probabilities. Use those probabilities to determine whether characteristics in the population are approximately independent.		
MA.912.DP.4.6	Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.7	Apply the addition rule for probability, taking into consideration whether the events are mutually exclusive, and interpret the result in terms of the model and its context.	4 - Good Alignment	Examples, online activity and homework are provided
MA.912.DP.4.8	Apply the general multiplication rule for probability, taking into consideration whether the events are independent, and interpret the result in terms of the context.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.9	Apply the addition and multiplication rules for counting to solve mathematical and real-world problems, including problems involving probability.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.4.10	Given a mathematical or real-world situation, calculate the appropriate permutation or combination.	5 - Very Good Alignment	Examples, applet, graphing calculator instructions and homework are provided
MA.912.DP.5.1	Distinguish between a population parameter and a sample statistic.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.2	Explain how random sampling produces data that is representative of a population.	5 - Very Good Alignment	Examples, lab type activity (Federalist papers) and homework are provided
MA.912.DP.5.3	Compare and contrast sampling methods.	5 - Very Good Alignment	Examples, applet (sunflowers) and homework are provided

MA.912.DP.5.4	Generate multiple samples or simulated samples of the same size to measure the variation in estimates or predictions.	5 - Very Good Alignment	Examples, lab type activity (spinner) and homework are provided
MA.912.DP.5.5	Determine if a specific model is consistent within a given process by analyzing the data distribution from a data-generating process.	4 - Good Alignment	Examples, applet and homework are provided
MA.912.DP.5.6	Determine the appropriate design, survey, experiment or observational study, based on the purpose. Articulate the types of questions appropriate for each type of design.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.7	Compare and contrast surveys, experiments and observational studies.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.8	Draw inferences about two populations using data and statistical analysis from two random samples.	5 - Very Good Alignment	Examples, applet, graphing calculator instructions and homework are provided
MA.912.DP.5.9	Compare two treatments using data from an experiment in which the treatments are assigned randomly.	5 - Very Good Alignment	Examples, applet, graphing calculator instructions and homework are provided
MA.912.DP.5.10	Determine whether differences between parameters are significant using simulations.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.5.11	Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.6.1	Define a random variable for a quantity of interest by assigning a numerical value to each individual outcome in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.	4 - Good Alignment	Examples, good example in everyday stats and homework are provided

MA.912.DP.6.2	Develop a probability distribution for a discrete random variable using theoretical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.6.3	Develop a probability distribution for a discrete random variable using empirical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	3 - Fair Alignment	Not enough practice with this standard
MA.912.DP.6.4	Given a binomial distribution, calculate and interpret the expected value. Solve real-world problems involving binomial distributions.	5 - Very Good Alignment	Examples, activity (pop quiz) and homework are provided
MA.912.DP.6.5	Solve real-world problems involving geometric distributions.	1 - Very Poor/No Alignment	Not included in the book only activities on statmedic.
MA.912.DP.6.7	Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values and standard deviations. Evaluate and compare strategies on the basis of the calculated expected values and standard deviations.	4 - Good Alignment	Examples and homework are provided
MA.912.DP.6.8	Apply probabilities to make fair decisions, such as drawing from lots or using a random number generator.	5 - Very Good Alignment	Examples, applet and homework are provided
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	5 - Very Good Alignment	Lots of applets and activities provided

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Lots of examples, applets and activities provided
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	4 - Good Alignment	Lots of examples and homework are provided

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Lots of examples, applets and activities provided
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	The book is very clear with directions and examples.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Lots of inferences are made throughout the book.

ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Lots of examples, applets and activities provided
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Direction and problems are clear.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	Direction and problems are clear.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	The glossary includes both English and Spanish words.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	The majority of the standards I rated a 4 or 5.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	The majority of the standards I rated a 4 or 5.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	The majority of the standards I rated a 4 or 5.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Lots of examples, applets, activities and homework.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	The questions and examples are on the level of the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	The questions and examples are on the level of the grade level and students abilities
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The book will allow for the standards to be finished for school year.

8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Great examples and sources provided.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Great examples and sources provided.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	The content is accurate.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	Content seems to be free of bias.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	The content provides examples from everyday life.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	The content uses a lot of real life data.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4 - Good Alignment	The content uses a lot of real life data.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	The content is appropriate and relevant based on the examples and homework.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	The questions are at an appropriate level for high school students.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4 - Good Alignment	The content uses a lot of real life data.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	The content uses a lot of real life data that are appropriate to other subjects.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Names and examples represent all cultures

20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	There is no hard-core porn. Examples are appropriate.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	The benchmarks and standards are covered.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Lots of examples, calculator notes, activities and applets.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Lots of examples, calculator notes, activities and applets.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	4 - Good Alignment	The material is in a logical order.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Videos and examples are appropriate.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	The pacing is appropriate.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	The students can highlight in the book, have the text read and enlarge the print. The print on the applets can not be adjusted. Video instructions are provided.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Lots of resources provided.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Lots of real life examples, pictures and graphs.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	All the big ideas are thoroughly covered.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4 - Good Alignment	All directions and examples are clear.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Written instructions, video instructions and video explanations are provided.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	Written instructions, video instructions and video explanations are provided.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Applet and activities are provided.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Activities are real life and help the students make connections.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Applet, activities, graphing calculator activities and homework are provided.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Applet, activities, graphing calculator activities, examples and homework are provided.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4 - Good Alignment	assessment is appropriate
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4 - Good Alignment	assessment is appropriate

12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	The students can highlight in the book, have the text read and enlarge the print. The print on the applets can not be adjusted. Video instructions are provided.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	There is appropriate applications with the BEST standards.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Yes, this book is satisfactory.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	This textbook doesn't really include any of these topics (Holocaust, slavery, the Civil War and Reconstruction, the civil rights movement and the contributions of women, African American and Hispanic people to our country)
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	This textbook does omit CRT.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	This textbook does omit social justice.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	This course doesn't include extraneous strategies.

Reviewer's Name: Virginia Snyder

Title: Statistics and Probability with Applications

Publisher: Bedford, Freeman and Worth Publishing Group

Author: Daren Starnes

Copyright: 2021

Edition: 4th

Grade Level: 9-12

Course: [Probability and Statistics Honors](#)

Bid ID: 408

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Looking only at the major tool (print/online student text), it is possible for an instructor to cover all required benchmarks and clarifications. With the addition of all other resources, this is made even easier. The teacher edition includes tips for making the math real with further real-world connections (even though there are already a large amount in the major tool). There are pre designed homework and assessments that the instructor can use or adapt to fit the needs of their students.

Standard	Description	Reviewer Rating	Rating Justification
MA.912.DP.1.1	Given a set of data, select an appropriate method to represent the data, depending on whether it is numerical or categorical data and on whether it is univariate or bivariate.	5 - Very Good Alignment	Although all clarifications are met, vocabulary stops just short of "univariate" and "bivariate". This is easily supplemented by instructors.
MA.912.DP.1.2	Interpret data distributions represented in various ways. State whether the data is numerical or categorical, whether it is univariate or bivariate and interpret the different components and quantities in the display.	5 - Very Good Alignment	Although all clarifications are met, vocabulary stops just short of "univariate" and "bivariate". This is easily supplemented by instructors.
MA.912.DP.1.3	Explain the difference between correlation and causation in the contexts of both numerical and categorical data.	5 - Very Good Alignment	Emphasis that correlation does not equal causation
MA.912.DP.1.4	Estimate a population total, mean or percentage using data from a sample survey; develop a margin of error through the use of simulation.	5 - Very Good Alignment	Tech corner: use of real-world data
MA.912.DP.1.5	Interpret the margin of error of a mean or percentage from a data set. Interpret the confidence level corresponding to the margin of error.	5 - Very Good Alignment	Examples and blueprint for interpretation statements
MA.912.DP.2.1	For two or more sets of numerical univariate data, calculate and compare the appropriate measures of center and measures of variability, accounting for possible effects of outliers. Interpret any notable features of the shape of the data distribution.	5 - Very Good Alignment	Includes use of technology and spreadsheets
MA.912.DP.2.2	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages.	5 - Very Good Alignment	Clear examples and connections with appropriateness and binomial distributions

	Recognize that there are data sets for which such a procedure is not appropriate.		
MA.912.DP.2.3	Estimate population percentages from data that has been fit to the normal distribution.	5 - Very Good Alignment	Inclusion of Tech-Corner and TI-83/84 tutorial
MA.912.DP.2.4	Fit a linear function to bivariate numerical data that suggests a linear association and interpret the slope and y-intercept of the model. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	Use of real-world, technology, and TI-83/84
MA.912.DP.2.5	Given a scatter plot that represents bivariate numerical data, assess the fit of a given linear function by plotting and analyzing residuals.	5 - Very Good Alignment	Use of formulas, technology (Tech Corner) and TI-83/84
MA.912.DP.2.6	Given a scatter plot with a line of fit and residuals, determine the strength and direction of the correlation. Interpret strength and direction within a real-world context.	5 - Very Good Alignment	Clarifications met
MA.912.DP.2.7	Compute the correlation coefficient of a linear model using technology. Interpret the strength and direction of the correlation coefficient.	5 - Very Good Alignment	Tech Corner and TI-83/84 tutorial
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	5 - Very Good Alignment	Exponential regression is not found within the major tool, but can be access through the Extra Lesson with ease. Materials do include use of technology
MA.912.DP.3.1	Construct a two-way frequency table summarizing bivariate categorical data. Interpret joint and marginal frequencies and determine possible associations in terms of a real-world context.	4 - Good Alignment	Tables are given and interpreted, but not explicitly left open for students to complete within the major tool. This is easily supplemented with other provided materials.

MA.912.DP.3.2	Given marginal and conditional relative frequencies, construct a two-way relative frequency table summarizing categorical bivariate data.	4 - Good Alignment	Tables are given and interpreted, but not explicitly left open for students to complete within the major tool. This is easily supplemented with other provided materials.
MA.912.DP.3.3	Given a two-way relative frequency table or segmented bar graph summarizing categorical bivariate data, interpret joint, marginal and conditional relative frequencies in terms of a real-world context.	5 - Very Good Alignment	Clarifications met
MA.912.DP.3.4	Given a relative frequency table, construct and interpret a segmented bar graph.	5 - Very Good Alignment	Instructions and detailed practice included
MA.912.DP.3.5	Solve real-world problems involving univariate and bivariate categorical data.	5 - Very Good Alignment	All clarifications met, however explicit use of the terms "univariate" and "bivariate" do not occur
MA.912.DP.4.1	Describe events as subsets of a sample space using characteristics, or categories, of the outcomes, or as unions, intersections or complements of other events.	5 - Very Good Alignment	All items met
MA.912.DP.4.2	Determine if events A and B are independent by calculating the product of their probabilities.	5 - Very Good Alignment	Defined and opportunities for student practice
MA.912.DP.4.3	Calculate the conditional probability of two events and interpret the result in terms of its context.	5 - Very Good Alignment	Real-world practice and applications included
MA.912.DP.4.4	Interpret the independence of two events using conditional probability.	5 - Very Good Alignment	Use of real-world data and applications
MA.912.DP.4.5	Given a two-way table containing data from a population, interpret the joint and marginal relative frequencies as empirical probabilities	5 - Very Good Alignment	Use of real-world data and applications

	and the conditional relative frequencies as empirical conditional probabilities. Use those probabilities to determine whether characteristics in the population are approximately independent.		
MA.912.DP.4.6	Recognize and explain the concepts of conditional probability and independence in everyday language and everyday situations.	5 - Very Good Alignment	Real-world data and applications used
MA.912.DP.4.7	Apply the addition rule for probability, taking into consideration whether the events are mutually exclusive, and interpret the result in terms of the model and its context.	5 - Very Good Alignment	Defined with use of real-world data
MA.912.DP.4.8	Apply the general multiplication rule for probability, taking into consideration whether the events are independent, and interpret the result in terms of the context.	5 - Very Good Alignment	Real-world examples
MA.912.DP.4.9	Apply the addition and multiplication rules for counting to solve mathematical and real-world problems, including problems involving probability.	5 - Very Good Alignment	Real-world problems included
MA.912.DP.4.10	Given a mathematical or real-world situation, calculate the appropriate permutation or combination.	5 - Very Good Alignment	Use of real-world data, technology
MA.912.DP.5.1	Distinguish between a population parameter and a sample statistic.	5 - Very Good Alignment	Defined and examples of determining each
MA.912.DP.5.2	Explain how random sampling produces data that is representative of a population.	5 - Very Good Alignment	Definition and determination
MA.912.DP.5.3	Compare and contrast sampling methods.	5 - Very Good Alignment	Compare/contrast, stratified, and cluster sampling no included in the major tool, but can be accessed within the other materials
MA.912.DP.5.4	Generate multiple samples or simulated samples of the same size to measure the variation in estimates or predictions.	5 - Very Good Alignment	Examples and use of real-world data

MA.912.DP.5.5	Determine if a specific model is consistent within a given process by analyzing the data distribution from a data-generating process.	5 - Very Good Alignment	Use of technology
MA.912.DP.5.6	Determine the appropriate design, survey, experiment or observational study, based on the purpose. Articulate the types of questions appropriate for each type of design.	5 - Very Good Alignment	Defined and examples of real-world data utilized
MA.912.DP.5.7	Compare and contrast surveys, experiments and observational studies.	5 - Very Good Alignment	Clarifications met
MA.912.DP.5.8	Draw inferences about two populations using data and statistical analysis from two random samples.	5 - Very Good Alignment	Use of technology and real-world data
MA.912.DP.5.9	Compare two treatments using data from an experiment in which the treatments are assigned randomly.	5 - Very Good Alignment	Clarification met
MA.912.DP.5.10	Determine whether differences between parameters are significant using simulations.	5 - Very Good Alignment	Use of technology included
MA.912.DP.5.11	Evaluate reports based on data from diverse media, print and digital resources by interpreting graphs and tables; evaluating data-based arguments; determining whether a valid sampling method was used; or interpreting provided statistics.	5 - Very Good Alignment	Used throughout major tool
MA.912.DP.6.1	Define a random variable for a quantity of interest by assigning a numerical value to each individual outcome in a sample space; graph the corresponding probability distribution using the same graphical displays as for data distributions.	5 - Very Good Alignment	Includes use of real-world data
MA.912.DP.6.2	Develop a probability distribution for a discrete random variable using theoretical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	5 - Very Good Alignment	Multiple examples and real-world data included

MA.912.DP.6.3	Develop a probability distribution for a discrete random variable using empirical probabilities. Find the expected value and interpret it as the mean of the discrete distribution.	5 - Very Good Alignment	Use of real-world data included
MA.912.DP.6.4	Given a binomial distribution, calculate and interpret the expected value. Solve real-world problems involving binomial distributions.	5 - Very Good Alignment	Clarifications met
MA.912.DP.6.5	Solve real-world problems involving geometric distributions.	5 - Very Good Alignment	Clarification met
MA.912.DP.6.7	Weigh the possible outcomes of a decision by assigning probabilities to payoff values and finding expected values and standard deviations. Evaluate and compare strategies on the basis of the calculated expected values and standard deviations.	5 - Very Good Alignment	Clarifications met
MA.912.DP.6.8	Apply probabilities to make fair decisions, such as drawing from lots or using a random number generator.	5 - Very Good Alignment	Use of real-world data
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	Major tool appears to be designed for student engagement, walking students through each calculation and process
MA.K12.MTR.2.1	Demonstrate understanding by representing problems in multiple ways.	5 - Very Good Alignment	Activities designed for students to make connections between the mathematics

	<p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 		performed and the concepts and representations of real-world data
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	Multiple opportunities provided for students to be successful in performing calculations through different methods
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p>	5 - Very Good Alignment	Students are encouraged to work with others and are taught how to communicate about the data and

	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 		information they are interpreting
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	5 - Very Good Alignment	When new concepts are introduced, students are led through the step-by-step planning process for determining different information about the data
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. 	5 - Very Good Alignment	Students continuously asked to interpret the reasonableness of their solutions

	<ul style="list-style-type: none"> • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 		
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	Almost all examples and questions within the major tool and other resources include real-world data and citations
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	Introduced as part of the statistical problem solving process
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	Throughout the major tool, students are asked to comprehend processes and interpret solutions
ELA.K12.EE.3.1	Make inferences to support comprehension.	5 - Very Good Alignment	Context clues used throughout of each example and question
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Supported through frequent use of vocabulary and having students interpret their findings

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	Supported through frequent use of vocabulary and having students interpret their findings
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Supported through frequent use of vocabulary and having students interpret their findings
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Spanish glossary included as part of major tool. Spanish Flashcards also included with additional student resources

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	All benchmarks and clarifications are met
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Meets the honors curriculum requirements
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Easily taught with only the major tools, all other resources add to the ease of instruction and student mastery
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	In depth explanations clarify concepts for students
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	All clarifications are met

6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Honors curriculum
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	Suggested pacing guide provided to aid instructors in planning for full coverage of the course
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	All data is cited, and many resources are directly accessible
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Students can easily make real-world connections with all of the data and examples provided
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	Upon looking through the online text, there do not seem to be any typographical or visual errors
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Data presented is free of bias and contradictions and is noninflammatory in nature.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Easily adaptable to teaching AP Statistics with some supplementary material needed
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Link to errata on publisher website
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	All data is cited and up-to-date, with many sources dated 2020
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	All curriculum, standards, and benchmark requirements are met
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Real-world data makes topics relevant to students

17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-world data the is relevant to students is included. (Driving, grades, heights, music, etc.)
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Reference to the use of the skills students are learning are made to show students the real-world applications
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Portrayal of multicultural groups is fair and unbiased
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Humanity and compassion portrayed through the use of data in the major tool
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Content of benchmarks and standards are met

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	All benchmarks are covered by the major tool and provided additional resources
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Components of the major tool align to the curriculum on CPALMS and the additional resources
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Material is presented in a logical order for mastery of the content
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Visual representations of data grabs students attention and audio is available on the online student text

5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Pacing guide included to aid in planning of content coverage
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	Students can resize text in the online textbook, as well as a screen reader. Alternate videos and examples are also available for students.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	There are many resources available for student to be successful; including video tutorials and extra practice examples.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Real-world, relevant examples provided with data citations
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	"Big Ideas" covered in Probability and Statistics are met in the instructional materials
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Learning Objectives listed at the beginning of each section in the major tool
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Sections progress through a gradual release with examples and student practice, reviews, and practice tests complete with multiple choice and free response questions
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Resources are easily adaptable for student differentiation
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Activities are designed with student engagement in mind.

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	Editable assignments and assessments are included for instructional use
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	All MTRs covered
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Strategies are included in the Instructor Resources to aid in accomplishing targeted outcomes
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Strategies are included in the Instructor Resources to aid in accomplishing targeted outcomes
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Strategies are included in the Instructor Resources to aid in accomplishing targeted outcomes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	Size, color, background in the online text are all adjustable; videos are captioned; text-to-speech tools;
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	MTRs are incorporated throughout the tools and resources
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Materials have adequate supports to satisfy the LEARNING requirements

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence of CRT is found in the materials
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT is found in the materials

Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT is found in the materials
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence of SEL is found in the materials

Reviewer's Name: Bryan Johnston

Title: Statistics and Probability with Applications

Publisher: Bedford, Freeman and Worth Publishing Group

Author: Daren Starnes

Copyright: 2021

Edition: 4th

Grade Level: 9-12

Course: [Probability & Statistics with Applications Honors](#)

Bid ID: 408

Prohibited Topic	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT not in instructional materials - Look at Additional Questions 10.1 Response Bias in Activities and Due Dates

Does the appearance of the interviewer influence how people respond to a survey question? Ken (white, with blond hair) and Hassan (darker, with Middle Eastern features) conducted an experiment to address this question. They took turns (in a random order) walking up to people on the main street of a small town, identifying themselves as students from a local high school, and asking them, "Do you support President Obama's decision to launch airstrikes in Iraq?" Of the 50 people Hassan spoke to, 11 said "Yes," while 21 of the 44 people Ken spoke to said "Yes." Let p_1 = the true proportion of people like the ones in this study who would say they support President Obama's decision when asked by Hassan and p_2 = the true proportion of people like the ones in this study who say they support President Obama's decision when asked by Ken.

Construct and interpret a 90% confidence interval for the difference in the proportion of people like these who would say they support President Obama's decision when asked by Hassan versus when asked by Ken.

Hi Lauren,

I hope you have had a great week. I wanted to touch base with you to see if there was any idea of a timeline for hearing back about our appeal.

I appreciate your time!

Best,

Claire Thompson

Lauren,

I have attached the spreadsheet for our appeal as well as the document with access instructions for SaplingPlus. Please let me know if you need anything else.

I know that you all are working around the clock - do you have any idea of the timeline for a response from the State?

We all appreciate your guidance through this process.

Best,

Claire Thompson

Hi Claire,

We are pleased to announce that BFW's probability and statistics course is now adopted and added to our recommended list!

The documents should reflect on our website shortly.

Thanks,
Lauren

Lauren,

I have attached the spreadsheet for our appeal as well as the document with access instructions for SaplingPlus. Please let me know if you need anything else.

I know that you all are working around the clock - do you have any idea of the timeline for a response from the State?

We all appreciate your guidance through this process.

Best,

Claire Thompson

Hi Emily,

Thank you for sending this in so quickly. It looks like we may have to be added to the sharepoint for access to the materials. Will you please add our team or send a different form of access?

Thank you!
Lauren

Subject: RE: Big Ideas - initial appeal call

Good afternoon,

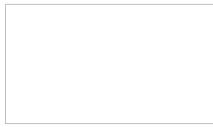

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us

with this opportunity and we look forward to a continued partnership with the FL DOE.

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Edition: 1

Grade Level: 9-12

Course: [Algebra 2](#)

Bid ID: 311

Final Recommendation

<p>Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?</p>	
<p>How would you rate the overall usability of the instructional material?</p>	<p>Material is a run of the mill math textbook, but lacks some of the components within B.E.S.T. Teacher will need to do some planning in order to teach content through lens of the MTRs.</p>
<p>Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.</p>	<p>Some sections within materials is not aligned to B.E.S.T. (e.g., section 4.8 writing polynomial and fitting polynomial; section 7.1 variation). Some sections are below course while others above. Little to no evidence of benchmarks not taught in isolation. Content is broken into function types but never opportunity to make connections between functions or various representations.</p>

	<p>Heavy focus on “simplified form” throughout which is not a major focus within B.E.S.T.</p> <p>Would like more “Explore it” tasks for instruction rather than procedural examples.</p> <p>Majority of the examples use “nice” numbers and mathematics is sometimes not a “nice” subject, especially when based on data and modeling it.</p>
--	---

Standard	Description	Reviewer Rating	Rating Justification
MA.912.AR.1.1	Identify and interpret parts of an equation or expression that represent a quantity in terms of a mathematical or real-world context, including viewing one or more of its parts as a single entity.	4	Embedded throughout
MA.912.AR.1.3	Add, subtract and multiply polynomial expressions with rational number coefficients.	3	Material covered has students using specific methods which is not an expectation of B.E.S.T. Majority of examples have integer number coefficients and not rational number coefficients.
MA.912.AR.1.5	Divide polynomial expressions using long division, synthetic division or algebraic manipulation.	3	Material covered has students using specific methods which is not an expectation of B.E.S.T.
MA.912.AR.1.6	Solve mathematical and real-world problems involving addition, subtraction,	3	Material covered has students using specific methods

	multiplication or division of polynomials.		which is not an expectation of B.E.S.T. Majority of examples have integer number coefficients and not rational number coefficients.
MA.912.AR.1.8	Rewrite a polynomial expression as a product of polynomials over the real or complex number system.	4	Embedded throughout
MA.912.AR.1.9	Apply previous understanding of rational number operations to add, subtract, multiply and divide rational algebraic expressions.	4	Evident
MA.912.AR.3.2	Given a mathematical or real-world context, write and solve one-variable quadratic equations over the real and complex number systems.	3	Material covered within Sections 3.1 and 3.3 is content from Alg 1. Additionally within B.E.S.T. no expectation for solve using specific method.
MA.912.AR.3.3	Given a mathematical or real-world context, write and solve one-variable quadratic inequalities over the real number system. Represent solutions algebraically or graphically.	4	Evident
MA.912.AR.3.4	Write a quadratic function to represent the relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	4	Evident
MA.912.AR.3.8	Solve and graph mathematical and real-world problems that are modeled with quadratic functions. Interpret key features and determine constraints in terms of the context.	4	Only explicitly evident in few lessons

MA.912.AR.3.9	Given a mathematical or real-world context, write two-variable quadratic inequalities to represent relationships between quantities from a graph or a written description.	4	Only explicitly evident in few lessons
MA.912.AR.3.10	Given a mathematical or real-world context, graph the solution set to a two-variable quadratic inequality.	4	Only explicitly evident in few lessons
MA.912.AR.4.2	Given a mathematical or real-world context, write and solve one-variable absolute value inequalities. Represent solutions algebraically or graphically.	4	Only explicitly evident in few lessons
MA.912.AR.4.4	Solve and graph mathematical and real-world problems that are modeled with absolute value functions. Interpret key features and determine constraints in terms of the context.	4	Only explicitly evident in few lessons
MA.912.AR.5.2	Solve one-variable equations involving logarithms or exponential expressions. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	4	Evident
MA.912.AR.5.4	Write an exponential function to represent a relationship between two quantities from a graph, a written description or a table of values within a mathematical or real-world context.	4	Evident
MA.912.AR.5.5	Given an expression or equation representing an exponential function, reveal the constant percent rate of change per unit interval using the properties of exponents. Interpret the constant percent rate of change in terms of a real-world context.	4	Evident

MA.912.AR.5.7	Solve and graph mathematical and real-world problems that are modeled with exponential functions. Interpret key features and determine constraints in terms of the context.	4	Only explicitly evident in few lessons
MA.912.AR.5.8	Given a table, equation or written description of a logarithmic function, graph that function and determine its key features.	4	Evident
MA.912.AR.5.9	Solve and graph mathematical and real-world problems that are modeled with logarithmic functions. Interpret key features and determine constraints in terms of the context.	4	Only explicitly evident in few lessons
MA.912.AR.6.1	Given a mathematical or real-world context, when suitable factorization is possible, solve one-variable polynomial equations of degree 3 or higher over the real and complex number systems.	4	Evident
MA.912.AR.6.5	Sketch a rough graph of a polynomial function of degree 3 or higher using zeros, multiplicity and knowledge of end behavior.	4	Materials goes beyond this benchmark
MA.912.AR.7.1	Solve one-variable radical equations. Interpret solutions as viable in terms of context and identify any extraneous solutions.	4	Evident
MA.912.AR.7.2	Given a table, equation or written description of a square root or cube root function, graph that function and determine its key features.	4	Evident
MA.912.AR.7.3	Solve and graph mathematical and real-world problems that are modeled with square root or cube root functions. Interpret key	4	Only explicitly evident in few lessons

	features and determine constraints in terms of the context.		
MA.912.AR.8.1	Write and solve one-variable rational equations. Interpret solutions as viable in terms of the context and identify any extraneous solutions.	4	Evident
MA.912.AR.8.2	Given a table, equation or written description of a rational function, graph that function and determine its key features.	3	Materials has this split into three sections which may cause misconceptions on three different ways of graphing and analyzing. Never opportunity to bring together.
MA.912.AR.8.3	Solve and graph mathematical and real-world problems that are modeled with rational functions. Interpret key features and determine constraints in terms of the context.	3	Materials has this split into three sections which may cause misconceptions on three different ways of graphing and analyzing. Never opportunity to bring together.
MA.912.AR.9.2	Given a mathematical or real-world context, solve a system consisting of a two-variable linear equation and a non-linear equation algebraically or graphically.	4	Only explicitly evident in few lessons
MA.912.AR.9.3	Given a mathematical or real-world context, solve a system consisting of two-variable linear or non-linear equations algebraically or graphically.	4	Only explicitly evident in few lessons
MA.912.AR.9.5	Graph the solution set of a system of two-variable inequalities.	4	Only explicitly evident in few lessons
MA.912.AR.9.7	Given a real-world context, represent constraints as systems	4	Only explicitly evident in few lessons

	of linear and non-linear equations or inequalities. Interpret solutions to problems as viable or non-viable options.		
MA.912.DP.2.8	Fit a quadratic function to bivariate numerical data that suggests a quadratic association and interpret any intercepts or the vertex of the model. Use the model to solve real-world problems in terms of the context of the data.	4	Only explicitly evident in few lessons
MA.912.DP.2.9	Fit an exponential function to bivariate numerical data that suggests an exponential association. Use the model to solve real-world problems in terms of the context of the data.	4	Only explicitly evident in few lessons
MA.912.F.1.1	Given an equation or graph that defines a function, determine the function type. Given an input-output table, determine a function type that could represent it.	3	Only have 4 parent functions (some of which focus in Alg1) represented within chapter 1 and doesn't represent all functions within the course
MA.912.F.1.7	Compare key features of two functions each represented algebraically, graphically, in tables or written descriptions.	2	Little to no evidence of comparison of different functions within the course.
MA.912.F.1.9	Determine whether a function is even, odd or neither when represented algebraically, graphically or in a table.	3	Evidence in one chapter but not throughout materials.
MA.912.F.2.2	Identify the effect on the graph of a given function of two or more transformations defined by adding a real number to the x- or y- values or multiplying the x- or y- values by a real number.	4	Evident
MA.912.F.2.3	Given the graph or table of $f(x)$ and the graph or table of $f(x)+k$, $kf(x)$, $f(kx)$ and $f(x+k)$,	4	Evident

	state the type of transformation and find the value of the real number k .		
MA.912.F.2.5	Given a table, equation or graph that represents a function, create a corresponding table, equation or graph of the transformed function defined by adding a real number to the x - or y -values or multiplying the x - or y -values by a real number.	4	Evident
MA.912.F.3.2	Given a mathematical or real-world context, combine two or more functions, limited to linear, quadratic, exponential and polynomial, using arithmetic operations. When appropriate, include domain restrictions for the new function.	4	Only explicitly evident in few lessons
MA.912.F.3.4	Represent the composition of two functions algebraically or in a table. Determine the domain and range of the composite function.	4	Only explicitly evident in few lessons
MA.912.F.3.6	Determine whether an inverse function exists by analyzing tables, graphs and equations.	4	Only explicitly evident in few lessons
MA.912.F.3.7	Represent the inverse of a function algebraically, graphically or in a table. Use composition of functions to verify that one function is the inverse of the other.	4	Only explicitly evident in few lessons
MA.912.FL.3.1	Compare simple, compound and continuously compounded interest over time.	4	Only explicitly evident in few lessons
MA.912.FL.3.2	Solve real-world problems involving simple, compound and continuously compounded interest.	4	Only explicitly evident in few lessons

MA.912.FL.3.4	Explain the relationship between simple interest and linear growth. Explain the relationship between compound interest and exponential growth and the relationship between continuously compounded interest and exponential growth.	4	Only explicitly evident in few lessons
MA.912.NSO.1.3	Generate equivalent algebraic expressions involving radicals or rational exponents using the properties of exponents.	4	Only explicitly evident in few lessons
MA.912.NSO.1.5	Add, subtract, multiply and divide algebraic expressions involving radicals.	4	Only explicitly evident in few lessons
MA.912.NSO.1.6	Given a numerical logarithmic expression, evaluate and generate equivalent numerical expressions using the properties of logarithms or exponents.	4	Only explicitly evident in few lessons
MA.912.NSO.1.7	Given an algebraic logarithmic expression, generate an equivalent algebraic expression using the properties of logarithms or exponents.	4	Only explicitly evident in few lessons
MA.912.NSO.2.1	Extend previous understanding of the real number system to include the complex number system. Add, subtract, multiply and divide complex numbers.	4	Evident
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as 	5	Embedded throughout (although seen more in instruction rather than curriculum)

	<p>needed while solving a challenging task.</p> <ul style="list-style-type: none"> • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 		
<p>MA.K12.MTR.2.1</p>	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	3	<p>Little evidence of how representation relate to one another. Many lessons focus just on algebraic representation or just on graphical representation.</p>
<p>MA.K12.MTR.3.1</p>	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p>	3	<p>Many places where students directed to use specific method or strategy rather than allowing students to choose, and justify</p>

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3	Specific questions that address this but not embedded within lessons.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5	Embedded throughout
ELA.K12.EE.3.1	Make inferences to support comprehension.	5	Embedded throughout
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5	Embedded throughout (although seen more in instruction rather than curriculum)

ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5	Embedded throughout (although seen more in instruction rather than curriculum)
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5	Embedded throughout (although seen more in instruction rather than curriculum)
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5	Embedded throughout

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3	Some sections within materials is not aligned to B.E.S.T. (e.g., section 4.8 writing polynomial and fitting polynomial; section 7.1 variation). Some sections are below course while others above. Little to no evidence of benchmarks not taught in isolation. Content is broken into function types but never opportunity to make connections between functions or various representations. Heavy focus on "simplified form" throughout which is not a major focus within B.E.S.T. Would like more "Explore it" tasks for instruction rather than procedural examples.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	3	Much of content uses "nice" numbers, which is not seen often within mathematics.

3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3	Evident
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	3	Evident
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3	Evident
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3	Evident
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	3	Evident
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4	Evident
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4	Evident
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4	Evident
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4	Evident
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4	Evident

13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4	Evident
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	4	Evident
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4	Evident
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4	Evident
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	4	Evident
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4	Evident
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4	Evident
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4	Evident
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3	See comments in beginning of section

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3	Teacher will need additional work in order to align mathematical content to aspects of the B.E.S.T. Standards, including teaching through lens of MTRs.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4	All submitted components seems to be consistent.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	2	The order in which content is presented in materials is not the order in which I would instruct, but not all classrooms could have same order. Teacher would need additional time to pace out school year.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4	All content appropriate for high school.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	3	Teacher will need adjust some pacing of content depending on their students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4	Materials seems to provide support for all learners.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4	Materials present content with accessibility but teacher will need to adjust instruction for alignment and pacing.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4	Evident
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4	Evident
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	4	Evident
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4	Evident
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4	Evidence of differentiation
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4	Evident
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4	Evident
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4	Evident
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	4	Evident
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	4	Evident

11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	4	Evident
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4	Evident
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3	MTRs are not appropriately embedded throughout
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	3	See comments above

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4	None evident
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4	None evident
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4	None evident
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4	None evident

Hi Emily,

Thank you for sending this in so quickly. It looks like we may have to be added to the sharepoint for access to the materials. Will you please add our team or send a different form of access?

Thank you!
Lauren

Subject: RE: Big Ideas - initial appeal call

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Best regards,

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

 **Emily Winston**

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Best regards,

Emily Winston

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

It is! We went ahead and had them fill out the standards correlations as well.

Thanks for checking,
Lauren

Good morning PJ,

Please see the attached correlations for the Algebra 2 course for Big Idea's. Please have your team review the links and return back. All links should be working, but please let me know if you have any trouble accessing.

Thank you for helping with this and the quick turnaround!

Let me know if you have any questions along the way,
Lauren

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for the appeal template for Algebra 2 with CalcChat® and CalcView® from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached template shows citations in response to the standards scored with below a 3.

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

 **Emily Winston**

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Big Ideas - appeal
Mon, Apr 25, 2022 10:00 AM - 10:30 AM (EDT)

Please join my meeting from your computer, tablet or smartphone.

Title: Florida's B.E.S.T. Standards for MATH Grade 4

Publisher: Big Ideas Learning, LLC

Author: Ron Larson and Laurie Boswell

Copyright: 2023

Edition: 1

Grade Level: K-5

Course: [Grade Four Mathematics](#)

Bid ID: 302

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall impression is materials are easy to use, meet most standards with a fair alignment. Some requirements are only in the TE which can be overlooked by a teacher when in the moment of teaching. Videos have SEL components. Cross curricular activities, although seem to be fun, would not be worthy of attempting in a time- strapped classroom.

Standard	Description	Reviewer Rating	Rating Justification
MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	3 - Fair Alignment	The standard is across lessons, but it does not coincide with the other standards in the lessons.
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	4 - Good Alignment	Meets benchmark with good amount of practice.
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	Meets benchmark and clarifications with ample practice.
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	2 - Poor Alignment	Insufficient practice and coverage of the standard.
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	2 - Poor Alignment	Insufficient practice and coverage of the standard.
MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	5 - Very Good Alignment	Uses concrete examples with rectangles, meets benchmark with clarification regarding divisibility rules.
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	4 - Good Alignment	Uses real world examples. One problem in the TE states the pattern is, "add a zero each time." Mathematically it should be multiply by 10 each time.
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Ample practice with both stem and leaf plots and line plots.

MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	3 - Fair Alignment	Vocabulary development is lacking.
MA.4.DP.1.3	Solve real-world problems involving numerical data.	2 - Poor Alignment	Insufficient practice with, "Data involving decimals are limited to hundredths."
MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	2 - Poor Alignment	Does not make sufficient use of manipulatives, models, or number lines. There is only one set of number lines at the beginning of 9.3.
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	2 - Poor Alignment	Does not make sufficient use of manipulatives, models, or number lines.
MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	3 - Fair Alignment	Does not include sufficient use of manipulatives or visual models in instruction.
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than one, with different numerators and different denominators.	3 - Fair Alignment	Does not use enough examples of fractions greater than one.
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	3 - Fair Alignment	Uses mostly equations for student practice. Students need guidance on how to draw the example or model.
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	3 - Fair Alignment	Ample practice, but lacks enough examples of HOW to

			regroup fractions for subtracting.
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	2 - Poor Alignment	Does not make sufficient use of manipulatives, models, or number lines.
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	4 - Good Alignment	Does well aligning multiplication of fractions with repeated addition. TE does have answers simplified, which is not what the standard requires.
MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	Meets benchmark with clarifications. Vocabulary introduction needs more depth.
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	5 - Very Good Alignment	Meets benchmark
MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	5 - Very Good Alignment	Meets benchmark. Uses real world examples.
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	4 - Good Alignment	Perimeter and area are initially taught in isolation, but are brought together later.
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	4 - Good Alignment	Meets the benchmark.
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	4 - Good Alignment	Meets the benchmark.

MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	4 - Good Alignment	Meets the benchmark. Separates each type of measurement. Teaches customary and metric separately. Uses the word "capacity" instead of "volume."
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	4 - Good Alignment	Meets the benchmark. Combines customary and metric questions in the final lesson.
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	4 - Good Alignment	Meets the benchmark.
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	4 - Good Alignment	Taught as part of three different units, which is good spiral review.
MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	4 - Good Alignment	Meets the benchmark.
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	4 - Good Alignment	Meets the benchmark with clarifications.
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	4 - Good Alignment	Meets the benchmark. Rounding is used to estimate products.
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	3 - Fair Alignment	Does not meet the clarification, "Within the benchmark, the expectation is to explain the reasoning for the comparison."
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	Ample practice throughout numerous lessons.
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	Teaches multiplication with multiple

			strategies and procedures.
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Teaches area model, distributive and associative properties, partial products, as well as the traditional standard algorithm, however the traditional algorithm is not taught in a step by step. Rather it says to multiply the three in the ones by the 3digit top number, then the 4 in the tens by the 3 digit top number.
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	Uses models and different methods, includes remainder as a fraction of divisor.
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	Includes estimation as a natural part of problem solving.
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	4 - Good Alignment	Meets benchmark
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	5 - Very Good Alignment	Includes word problems and money.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	3 - Fair Alignment	Lessons include "Solving the Model Real Life Example," but in the TE, which can be easily overlooked.

	<ul style="list-style-type: none"> Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	4 - Good Alignment	The company states that 4 pages are dedicated to this standard, but throughout the book models are used. Manipulatives could be used more.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. 	4 - Good Alignment	Students are provided with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	3 - Fair Alignment	<p>There are no opportunities for planned partner work. Allows for a "turn and talk" on occasion. Most discussion is in the TE as a side note, which can be easily overlooked.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>Allows for problem solving strategies that include analyzing the problem and planning for problem solving.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	4 - Good Alignment	Includes estimation as a natural part of problem solving.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Problems include real-world scenarios and uses models.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	Teacher edition includes opportunities for students to explain and justify orally. Student edition does not.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Word problems are appropriate. Avoids unusual ethnic names by saying, "you" in most word problems.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Includes cross curricular paragraphs throughout.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	2 - Poor Alignment	The student edition does not allow for collaboration. The TE has spots for it, that can be easily overlooked by a teacher worried about pacing.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Not included in SE.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	2 - Poor Alignment	The suggestions are not viable. Things like, "invite a car mechanic to come in," or "perform a puppet show." There is not enough time in the day. The standard needs to be embedded in daily lessons.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Support in the TE throughout.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	"problem Solving for All Learners" is included throughout the TE.

Content	Reviewer Rating	Rating Justification
---------	-----------------	----------------------

1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Many standards score a 2 or 3. Average overall is 3.59.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Lessons allow for supporting learners and extended thinking.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Lessons allow for supporting learners and extended thinking.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Lessons use real-world examples to impart the significance of topics.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	Complexity meets standards and clarifications most of the time.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	Complexity meets standards and clarifications most of the time.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Meets expectations.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Meets expectations.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Meets expectations. Includes real-world sources to support lessons.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	Minor errors. I observed two errors in the TE.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Meets expectations.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content includes accepted ways to solve multiplication and division as well as using many other prevailing theories.

13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Meets expectations.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Meets expectations.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Content is relevant and appropriate.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Content is relevant and appropriate for learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-world examples make content meaningful.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Lessons have cross-curricular connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Very few names or images of human beings are included. Most examples use photographs or illustrations of animals or things in nature.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Meets expectations.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	Many standards score a 2 or 3. Average overall is 3.59.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Ample practice included.

2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Meets expectations.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	An overview the sequencing indicates content is being taught in a logical organization.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Readability is good. Visuals are engaging, not distracting.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is presented in reasonable chunks.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	TE contains Learner Support, Scaffolding, information for emergent learners.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Presentation is user-friendly, and meets expectations for teachers and students.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Text uses familiar characters, and lessons are neat without too much to be visually confusing to students.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Lessons are chunked so that standards are met over multiple lessons.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Student lesson includes a learning target and "I can" statements. TE includes "Where are we in our learning" opportunities for evaluation and reflection as well as rubrics for formative assessment.

4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	TE includes "Where are we in our learning" opportunities for evaluation and reflection as well as rubrics for formative assessment.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	TE contains Learner Support, Scaffolding, information for emergent learners.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Meets expectations.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	TE includes cross curricular activities that would be time consuming and hard to fit within prescribed lesson times.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Uses multiple strategies and models.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Uses multiple strategies and models.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Assessments correlate with desired learning outcomes.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Assessment materials are effective in assessing the learners' performance with regard to the targeted outcomes.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	UDL is incorporated in the TE via scaffolding, ELL notes, and "Problem Solving for All Learners" segments.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	MTRs and ELA are rated as fair to good.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Instructional strategies and support satisfy the LEARNING requirements.
---	--------------------	---

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT is not taught.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Instructional materials omit Culturally Responsive Teaching as it relates to CRT.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	CRT is not taught.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	1 - Very Poor/No Alignment	Lesson videos include SEL lessons within the content lesson.

Reviewer's Name: Felisha Nicholson

Title: Florida's B.E.S.T. Standards for MATH Grade 4

Publisher: Big Ideas Learning, LLC

Author: Ron Larson and Laurie Boswell

Copyright: 2023

Edition: 1

Grade Level: K-5

Course: [Grade Four Mathematics](#)

Bid ID: 302

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

This curriculum embeds a lot of aligned standards practice, student-friendly work pages, teacher supportive resources, and so much more. I thoroughly enjoyed reviewing the materials within this curriculum. After reviewing the questionnaire, I could see that they used a lot of educational research (John Hattie, Nancy Frey, etc.) when creating these resources. The layout of the lessons were easy to follow and the TEs housed a lot of resources that will set up the teachers and students with success.

Standard	Description	Reviewer Rating	Rating Justification
MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	There's a lot of content within the lessons that address the identified standard.
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	5 - Very Good Alignment	These lessons incorporate a variation of ways to practice skills. Love the layout of the fraction lessons.
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	4 - Good Alignment	Same as above.
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	4 - Good Alignment	Doesn't limit students to specific strategies. Gives them brief practice with a model and number line, then takes them right into practice. Students are able to choose whichever strategy is best for them.
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	4 - Good Alignment	Ample practice.
MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	4 - Good Alignment	Same as above.
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	3 - Fair Alignment	I wish there was more content for this lesson strand. In fourth grade. In our district,

			we have found that students struggle with creating patterns based upon a given rule.
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Ample practice.
MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Great alignment and ample practice with mean, median and mode within lesson content. The pages are colorful and easy to follow.
MA.4.DP.1.3	Solve real-world problems involving numerical data.	4 - Good Alignment	lots of stem and leaf plot practice
MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	4 - Good Alignment	includes ample practice for modeling fractions and mixed numbers, and generating fractional equivalences with 10s and 100s as denominators.
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	5 - Very Good Alignment	There's a great deal of practice with fractions and decimals, and relating the two. The students are using tables, models, and number lines.
MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	4 - Good Alignment	ample practice with this standard!
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than	4 - Good Alignment	same as above

	one, with different numerators and different denominators.		
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	5 - Very Good Alignment	lots of practice!
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	5 - Very Good Alignment	same as above!
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	4 - Good Alignment	Being that the students will receive quite a bit of practice with generating equivalent fractions with denominators of 10s and 100s, I believe that one lesson of this will suffice. It should be simple enough at this point once they've grasped how to generate the equivalent fractions.
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	There's quite a bit of practice for this standard evident within these lessons.
MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	There's sufficient practice.
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	4 - Good Alignment	These lessons definitely overlap with the lessons for GR.1.1 including a great deal of practice with this standard's content

			and continuation of the previous.
MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	4 - Good Alignment	Lesson 12.6 ties in all of the previous skills for the lessons and shows students the applicable reasoning with real world exploration.
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	4 - Good Alignment	Love that there's lots of practice with unknown sides! Students notoriously struggle with finding unknown sides.
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	4 - Good Alignment	Another concept that can be difficult for students, but these lesson pages are easy to follow and help the students to see the connections of area and perimeter.
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	5 - Very Good Alignment	Lots of practice with appropriate tools of measure and when it would be reasonable to use them!
MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	5 - Very Good Alignment	I was really looking into these lessons because I wanted to make sure that students had ample practice with conversions and using various operations to assist them with converting. Over the course of this chapter/unit, students will receive various practice with

			conversions and converting the multiple units within this standard.
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	5 - Very Good Alignment	same as above
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	4 - Good Alignment	The introduction to this lesson shows a table with money, and the students use the table to answer a variety of questions. It then goes on to give them a plethora of multi-step problems using money and seeing the relevance of that to decimals.
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	4 - Good Alignment	In the earlier units, the students are modeling ways to show numbers using drawings, but as they progress to the latter units, they identify values and relate numbers using the base ten system using tables.
MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	4 - Good Alignment	The students are modeling numbers using place value by drawing quick pictures and other strategies.
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	4 - Good Alignment	There's sufficient practice for this standard!
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	4 - Good Alignment	This standard is incorporated in multiple lessons. The

			students are rounding numbers.
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	4 - Good Alignment	There's sufficient practice for this standard.
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	Love the automaticity component within the lessons...lots of computation practice! Students are also encouraged to using grid paper (already within the lessons) to generate factor pairs. So, they are seeing some representational along with the abstract.
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	There's an extensive amount of practice over the course of the 2 units (chapters 2 and 3).
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	same as above
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	same as above
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	same as above
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	4 - Good Alignment	Sufficient practice with standard!
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	4 - Good Alignment	same as above

<p>MA.K12.MTR.1.1</p>	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	<p>5 - Very Good Alignment</p>	<p>Each TE has a table just for the MTRs. Within those tables are identified pages where there is evidence of each MTR. This is incorporated within each TE unit.</p>
<p>MA.K12.MTR.2.1</p>	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	<p>5 - Very Good Alignment</p>	<p>same as above</p>
<p>MA.K12.MTR.3.1</p>	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p>	<p>5 - Very Good Alignment</p>	<p>same as above</p>

	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	same as above
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. 	5 - Very Good Alignment	same as above

	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	5 - Very Good Alignment	same as above
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	same as above

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	the curriculum has checkpoints incorporated within the lessons as well to encourage quality work
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Lots of ELL support!
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	I feel as though this curriculum did a wonderful job with alignment.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Yes! I also feel that there was quite a bit of overlap, which is good. It keeps the students thinking about how skills correlate and build.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Very fluid and easy to follow.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	I believe that the tasteful amount of variation of strategies and models will help students make the connections that they need.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	sufficient evidence of CRA and problem solving
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	I think that there's enough variation for students to find what works for them and excel...there's lot of modifications that can be made for the leveled abilities within the classroom
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Yes! There's a tasteful amount of material within the lessons and could be done within a given math time.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Yes
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Yes

10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	From what I reviewed, there seemed to be content presented accurately.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Yes
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Yes! (variation of models, problem types, and additional resources)
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	From what I reviewed, there seemed to be content presented accurately.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Yes!
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Yes
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Yes!
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Yes
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Yes
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	There were no evident biases from what I reviewed. Content was presented fairly.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	Yes. There was no inhumane treatment evident.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Yes!

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	I agree! Everything was comprehensive and addressed desired outcomes.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Yes, all components reviewed showed alignment.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Everything is logically sequences and extremely easy to follow!
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	The graphics are very engaging and everything presented is in digestible chunks!
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Yes, everything was presented in digestible chunks and in an easy to follow manner.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	There are a plethora of resources that provide auditory functions, ELL support, and differentiated tasks pointed out within the TE.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	I think it checks off the boxes!

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Yes. From the student-friendly print and graphics, multiple strategies, and easy to follow structure, the students will feel motivated.

2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials thoroughly show this!
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Yes, all lesson pages (even in the SE) have lesson goals and standards on them.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Yes, it gradually takes the students through CRA/UDL strategies and encourages students to explore and engage in their thinking.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	In the TEs, there are differentiation modifications and resources for teachers to use with students. There are differentiated tasks.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	There's evidence of CRA within the unit lessons, and so the students are learning strategies in a way that math should be learned. There was rarely, if any, times where there was abstract without concrete or representative.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	I believe that the curriculum did a very good job of this! All of the lessons obtain goals and standards on each of the pages and progresses the students through the content in a way that will help them get to those goals/objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	The strategies presented within the lessons are reasonable and will aid the students in reaching the outcomes of the lesson targets.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Yes!

10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Yes, there are a lot of formative assessment opportunities within the lessons, as well as, supportive resources that assess the desired learning outcome
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	There are a lot of assessment tools and support that come with the curriculum.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	Yes! Lots of variation!
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	I like that it includes these laid out for the teachers within the TE. It points out where in the lessons there is evidence of this. They are embedded within the curriculum.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Yes, the curriculum satisfies the requirements for learning the benchmark standards. The way the content is laid out and presented, it sets the students and teachers up for success.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	There was no CRT evident.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Yes
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Yes
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	There was no SEL solicited.

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution

for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and

allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

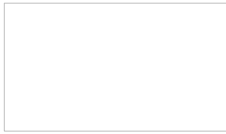

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Senior State Adoptions Specialist

Good morning,

Thank you for speaking with us this morning! I have attached the appeal template as well as the reviews for 298, 299, and 302 for your convenience.

Please reach out if you have any questions or concerns along the way,
Lauren

Hi Ms. Baumbach,

Thank you for scheduling the meeting. Joining on Monday will be myself and Bob Onsi. To help facilitate the conversation, we thought we would share the attached document. We look forward to speaking with you as well.

Best regards,

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Final Recommendation

<p>Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?</p>	<p>Yes</p>
<p>How would you rate the overall usability of the instructional material?</p>	<p>5 - Very Good Alignment</p>
<p>Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.</p>	<p>This curriculum provides many resources that will be very useful to teachers. The digital platform will be very helpful in alleviating some extraneous hard copy materials that may go to waste. That said, having some materials only provided in digital format could result in teachers having to prepare extra things for the students. The student book is bright, colorful, and includes images that are interesting to Kindergarten students. The lessons in the teacher edition provide clear objectives and include math discussion provoking questions to help the</p>

Kindergarten students begin to use academic language. The chapters begin with vocabulary introduction, which is so important for our younger students who may not know some of the academic language used in math. This curriculum utilizes many ideas and tools that are current.

Standard	Description	Reviewer Rating	Rating Justification
MA.K.AR.1.1	For any number from 1 to 9, find the number that makes 10 when added to the given number.	1 - Very Poor/No Alignment	The standard is for making 10, the lesson just addresses addition in general. It's not related to making 10.
MA.K.AR.1.2	Given a number from 0 to 10, find the different ways it can be represented as the sum of two numbers.	4 - Good Alignment	The lessons in Chapter 5 and 6.4 address finding sums up to 10 using a variety of methods. Only the final lesson addresses using a written equation.
MA.K.AR.1.3	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	4 - Good Alignment	The lessons in Chapter 6 and 7 ask the students to solve real-world addition problems using drawings, equations, and a variety of manipulatives. There are also lessons on using a number line to count on and add using a ten frame.
MA.K.AR.2.1	Explain why addition or subtraction equations are true using objects or drawings.	4 - Good Alignment	The lessons in Chapters 6, 7, and 8 have students explaining why addition and

			subtraction equations are true. I like that it is stressed in the notes repeatedly to clarify that the equal sign does not mean "the answer," but rather shows that both sides of the equation are indeed equal.
MA.K.DP.1.1	Collect and sort objects into categories and compare the categories by counting the objects in each category. Report the results verbally, with a written numeral or with drawings.	4 - Good Alignment	The lessons provide students with an opportunity to sort objects, count, and record how many. Students also have the opportunity to consider which category of objects has more.
MA.K.GR.1.1	Identify two- and three-dimensional figures regardless of their size or orientation. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	The lessons provide students with an opportunity to explore a variety of 2D and 3D shapes. The shapes are varied in color, size, and orientation. There are real life examples included as well. Appropriate math vocabulary is included.
MA.K.GR.1.2	Compare two-dimensional figures based on their similarities, differences and positions. Sort two-dimensional figures based on their similarities and differences. Figures are limited to circles, triangles, rectangles and squares.	3 - Fair Alignment	The lessons teach the attributes of the shapes and mostly have the students identifying the shape taught in the lesson. By default, they are comparing circles to squares, etc.
MA.K.GR.1.3	Compare three-dimensional figures based on their similarities, differences and positions.	4 - Good Alignment	The lesson teaches the attributes of the 3D

	Sort three-dimensional figures based on their similarities and differences. Figures are limited to spheres, cubes, cones and cylinders.		shapes. Throughout the lesson, students are asked to compare the shapes and discuss how they are similar and different.
MA.K.GR.1.4	Find real-world objects that can be modeled by a given two- or three-dimensional figure. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	There are a good amount of opportunities for students to find and discuss real world 2D and 3D shapes throughout Chapters 11 and 12.
MA.K.GR.1.5	Combine two-dimensional figures to form a given composite figure. Figures used to form a composite shape are limited to triangles, rectangles and squares.	3 - Fair Alignment	Lesson 11.6 gives students an opportunity to create composite shapes out of squares, triangles, and rectangles. Some of the composite shapes that are made in the lesson are a rhombus and hexagon, which may be slightly confusing for students.
MA.K.M.1.1	Identify the attributes of a single object that can be measured such as length, volume or weight.	5 - Very Good Alignment	The lessons at the beginning of Chapter 13 thoroughly explain height, length, weight, and volume. Students learn the vocabulary needed to compare the measurements later.
MA.K.M.1.2	Directly compare two objects that have an attribute which can be measured in common. Express the comparison using language to describe the difference.	5 - Very Good Alignment	Throughout Chapter 13, students are provided with opportunities to compare the measurement of objects using appropriate math

			vocabulary (taller/shorter instead of "bigger/smaller").
MA.K.M.1.3	Express the length of an object, up to 20 units long, as a whole number of lengths by laying non-standard objects end to end with no gaps or overlaps.	5 - Very Good Alignment	Lesson 13.4 allows students to measure objects using color tiles. The lesson provides non-examples of measuring and demonstrates why it is important to measure accurately.
MA.K.NSO.1.1	Given a group of up to 20 objects, count the number of objects in that group and represent the number of objects with a written numeral. State the number of objects in a rearrangement of that group without recounting.	5 - Very Good Alignment	Students have an opportunity to count a variety of real world objects as well as mathematical sets (such as 5 frames). The objects are in a variety of configurations (line, array, scattered, etc.). Students also have the opportunity to write the number that tells how many after counting the sets. Counting strategies build as the chapters progress ending with students using 2 10 frames to count the teen numbers.
MA.K.NSO.1.2	Given a number from 0 to 20, count out that many objects.	4 - Good Alignment	Students create sets using drawings and ten frames.
MA.K.NSO.1.3	Identify positions of objects within a sequence using the words "first," "second," "third," "fourth" or "fifth."	5 - Very Good Alignment	The lesson begins with students practicing ordinal numbers by lining up. There is an ample amount of practice identifying

			objects by their ordinal number.
MA.K.NSO.1.4	Compare the number of objects from 0 to 20 in two groups using the terms less than, equal to or greater than.	5 - Very Good Alignment	Students learn to compare sets by using a variety of tools (ten frames, counters, drawings, etc.). Students also write the numbers to tell how many to help with comparison of numerals.
MA.K.NSO.2.1	Recite the number names to 100 by ones and by tens. Starting at a given number, count forward within 100 and backward within 20.	5 - Very Good Alignment	The lessons have the students counting by ones to a variety of benchmark numbers (20, 30, 50, 100). There is a lesson that addresses counting backwards within 20. And a lesson teaching counting to 100 by tens. The lessons also provide students real world situations to count in.
MA.K.NSO.2.2	Represent whole numbers from 10 to 20, using a unit of ten and a group of ones, with objects, drawings and expressions or equations.	5 - Very Good Alignment	The lessons in Chapter 8 allow students to identify a group of ten and some ones. The practice problems show a variety of arrangements (array, circular, etc.). Students also have the opportunity to write addition equations for teen numbers as $10 + \text{some ones} = \text{teen number}$.
MA.K.NSO.2.3	Locate, order and compare numbers from 0 to 20 using the number line and terms less than, equal to or greater than.	5 - Very Good Alignment	The lessons provide an opportunity for students to locate

			numbers on a number line to 10 and then to 20. Students also compare the numbers plotted on the number line using appropriate vocabulary.
MA.K.NSO.3.1	Explore addition of two whole numbers from 0 to 10, and related subtraction facts.	5 - Very Good Alignment	Students are provided a variety of addition and subtraction situations. The lessons allow students to record the addition/subtraction in a variety of ways (equation, number line, picture, etc.)
MA.K.NSO.3.2	Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.	5 - Very Good Alignment	The lessons in Chapters 6 and 7 provide students with an opportunity to use a variety of addition/subtraction strategies that they have learned. Students are encouraged to find a strategy that works best for them.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	5 - Very Good Alignment	The students are asked to work collaboratively with classmates to check their work, particularly when new concepts are introduced. There are prompting questions to allow students to think deeper about their work.

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Students are asked to show a different way to find or represent their answer.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	Students are provided with opportunities to choose the best method, double check their work, and think about why they choose to solve a problem a particular way.

<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>5 - Very Good Alignment</p>	<p>Appropriate math vocabulary is included throughout the chapters. Students are asked to explain their thinking, clarify vocabulary.</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>4 - Good Alignment</p>	<p>Students are frequently asked to think about how the math problems are structured. They can look for generalities that can be applied to other like problems.</p>

MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>5 - Very Good Alignment</p>	<p>Students are asked to think about if their answer makes sense. Students are encouraged to use benchmark numbers and explain how using these can help them be more efficient with their calculations.</p>
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>5 - Very Good Alignment</p>	<p>Throughout the chapters, students are provided with a number of opportunities to apply their math to real world situations. They are asked to consider how knowing a certain concept would help in a real life situation.</p>
ELA.K12.EE.1.1	<p>Cite evidence to explain and justify reasoning.</p>	<p>5 - Very Good Alignment</p>	<p>Students are asked to justify their answers in many exercises throughout the curriculum.</p>
ELA.K12.EE.2.1	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>4 - Good Alignment</p>	<p>Chapters/lessons have grade level math readers that are incorporated into the lessons. Students use the math stories to</p>

			develop solutions to problems.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	There are questions embedded in the lessons asking students to make inferences using what they already know about math.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	There are opportunities embedded into the lessons that allow students to have authentic math conversations with their peers in which they must listen to what their peer says and engage in conversation.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	Students have opportunities to create work aligning with set rules/formats.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	There are opportunities for students to share their knowledge using newly acquired math vocabulary.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Lessons have ELL support built into them. The support allows students to learn and use the appropriate math vocabulary. The support also provides teacher support as to the expectation for a variety of ELL levels.

ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	Lessons have opportunities for ELL learners to communicate in an instructional environment through discussion and producing writing/drawings.
----------------------------------	--	--------------------	---

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	The curriculum aligns with the Kindergarten Math BEST standards.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	The skill level in the curriculum is appropriate for Kindergarten students.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	3 - Fair Alignment	The materials are really great. However, in practice I can see the student book being an issue. It is challenging for Kindergarteners to locate pages in a workbook using page numbers. It appears this is one large student workbook which would provide a challenge in the classroom.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	The lessons provide ample opportunity for students to practice the skill taught.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	The complexity is appropriate and aligns with the standards.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	The curriculum is written in a way that will engage Kindergarten students. Using animals, things in nature, and pictures of children are ideal.

7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	I think each lesson has a good variety of activities that teachers would be able to select from. I don't every single activity in each lesson could be taught in the time typically provided for math instruction.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	The curriculum has been well researched.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	The research conducted for the curriculum supports the content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	I did not notice any accuracy errors.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	There is no bias in the material.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	The curriculum incorporates many math tools that are prevalent in Kindergarten math- such as ten frames, rekenreks, number lines, etc.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	I did not notice any factual errors.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Current research is evident throughout the curriculum.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	4 - Good Alignment	The content is presented appropriately and is relative to the standards taught.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	4 - Good Alignment	The content is appropriate for Kindergarten learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	I really like the "Model Real Life" activities. I think students

		will enjoy those and they will be meaningful.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	I really appreciate the inclusion of literacy throughout the curriculum! Many favorite "math" storybooks are included throughout.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	I felt the illustrations of children throughout the curriculum represented multicultural aspects that are age appropriate for Kindergarteners.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Living things are portrayed appropriately in the curriculum.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	4 - Good Alignment	The content overall aligns with the benchmarks and standards for Kindergarten math.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	2 - Poor Alignment	There seems to be many digital resources available, which is great. But some of these will require extra preparation for teachers. For example, the counting books in the Instructional Resources would need to be copied for students to use.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	The chapters in the SE align with the each other.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	3 - Fair Alignment	There are many resources available in this curriculum! I think they are all great. But I did

		have a hard time locating some of them. It wasn't clear where to find Instructional Resources. I knew they were located in the digital resources, but I had to dig around a bit to find the file.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	The examples provided in instruction and practice are Kindergarten appropriate.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Overall, I think the pacing is appropriate for Kindergarteners. The section on counting to 100 was a little fast and was a later chapter. I think a Kindergarten teacher would naturally begin teaching this early on, but this isn't a skill students learn in a few days!
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	There are appropriate assistive supports included throughout the curriculum for all learners.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	The presentation of the material is well done overall.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	The inclusion of student self checks is motivational for learners. It will also allow teachers to see how students view their learning.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The Kindergarten math big ideas are thoroughly taught-- number sense is covered well!

3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	The Learning Target and Rigor section in each lesson clearly details the expectation for each lesson.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	The questions provided throughout the curriculum prompt our Kindergarten learners to think mathematically.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	The lessons provide opportunities for differentiation.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	The prompting and guiding questions are helpful to young Kindergarten students who are beginning their math journey.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	The chapters have lessons that build upon one another. The chapters also build on each other.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	The learning target for each lesson is clearly defined.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	The strategies provided in the lessons align with the learning targets generally. I also like that a variety of strategies are offered to students so they can begin crafting their independent reasoning.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	The curriculum assessments align with desired learning outcomes.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	The assessment strategies are appropriate for Kindergarten learners and effectively assess their performance.

12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	The curriculum provides ELL support, support of different learning modalities, and differentiates instruction for a variety of learners.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	The EE and MTR standards are embedded quite well in this curriculum.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	The curriculum aligns well with the learning requirements.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	I did not see any evidence of Critical Race Theory.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	I did not see any evidence of Culturally Responsive Teaching in the curriculum.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	I did not see any evidence of Social Justice in the curriculum.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	3 - Fair Alignment	The introductory pages say that the Math Musicals incorporate SEL. These are extra activities and not part of the core program, as far as I can tell. The Math Musicals could also be used without asking the SEL discussion questions.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Material is aligned to B.E.S.T. standards. Content is engaging with multiple opportunities for assessment. In addition, the curriculum provides multiple opportunities for students to encounter and practice content. Laurie's corner is very beneficial and provides opportunities for teachers to support student learning and mastery of the standards.

Standard	Description	Reviewer Rating	Rating Justification
MA.K.AR.1.1	For any number from 1 to 9, find the number that makes 10 when added to the given number.	5 - Very Good Alignment	Content is fully aligned to standard
MA.K.AR.1.2	Given a number from 0 to 10, find the different ways it can be represented as the sum of two numbers.	5 - Very Good Alignment	Content is fully aligned to standard
MA.K.AR.1.3	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Content is fully aligned to standard and connects to the NSO standards
MA.K.AR.2.1	Explain why addition or subtraction equations are true using objects or drawings.	5 - Very Good Alignment	Content is fully aligned to standard and connects to the NSO standards
MA.K.DP.1.1	Collect and sort objects into categories and compare the categories by counting the objects in each category. Report the results verbally, with a written numeral or with drawings.	5 - Very Good Alignment	Content is fully aligned to standard and extended as students learn GR1.2
MA.K.GR.1.1	Identify two- and three-dimensional figures regardless of their size or orientation. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Content is fully aligned to standard. Teaching strategies are provided to ensure mastery of standard
MA.K.GR.1.2	Compare two-dimensional figures based on their similarities, differences and positions. Sort two-dimensional figures based on their similarities and differences. Figures are limited to circles, triangles, rectangles and squares.	5 - Very Good Alignment	Content is fully aligned to standard and development of correct vocabulary
MA.K.GR.1.3	Compare three-dimensional figures based on their similarities, differences and positions. Sort three-dimensional figures based on their similarities and differences. Figures are limited to spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Content is fully aligned to standard and development to explain attributes of each

MA.K.GR.1.4	Find real-world objects that can be modeled by a given two- or three-dimensional figure. Figures are limited to circles, triangles, rectangles, squares, spheres, cubes, cones and cylinders.	5 - Very Good Alignment	Content is fully aligned to standard
MA.K.GR.1.5	Combine two-dimensional figures to form a given composite figure. Figures used to form a composite shape are limited to triangles, rectangles and squares.	5 - Very Good Alignment	Excellent hands on exploration to move towards mastery
MA.K.M.1.1	Identify the attributes of a single object that can be measured such as length, volume or weight.	5 - Very Good Alignment	Laurie's notes give explicit directions to teachers to support mastery
MA.K.M.1.2	Directly compare two objects that have an attribute which can be measured in common. Express the comparison using language to describe the difference.	5 - Very Good Alignment	Good connections to real life examples
MA.K.M.1.3	Express the length of an object, up to 20 units long, as a whole number of lengths by laying non-standard objects end to end with no gaps or overlaps.	5 - Very Good Alignment	Content is fully aligned to standard
MA.K.NSO.1.1	Given a group of up to 20 objects, count the number of objects in that group and represent the number of objects with a written numeral. State the number of objects in a rearrangement of that group without recounting.	5 - Very Good Alignment	Standard addressed with rigor and plenty of opportunity to develop conceptual understanding
MA.K.NSO.1.2	Given a number from 0 to 20, count out that many objects.	5 - Very Good Alignment	Standard addressed with rigor and plenty of opportunities for conceptual understanding
MA.K.NSO.1.3	Identify positions of objects within a sequence using the words "first," "second," "third," "fourth" or "fifth."	5 - Very Good Alignment	Standard addressed with rigor and plenty of opportunities for conceptual understanding

MA.K.NSO.1.4	Compare the number of objects from 0 to 20 in two groups using the terms less than, equal to or greater than.	5 - Very Good Alignment	Standard addressed with rigor and plenty of opportunities for conceptual understanding
MA.K.NSO.2.1	Recite the number names to 100 by ones and by tens. Starting at a given number, count forward within 100 and backward within 20.	5 - Very Good Alignment	Standard addressed with rigor and plenty of opportunities for conceptual understanding
MA.K.NSO.2.2	Represent whole numbers from 10 to 20, using a unit of ten and a group of ones, with objects, drawings and expressions or equations.	5 - Very Good Alignment	Standard addressed with rigor and plenty of opportunities for conceptual understanding
MA.K.NSO.2.3	Locate, order and compare numbers from 0 to 20 using the number line and terms less than, equal to or greater than.	4 - Good Alignment	Vertical number lines are not in the material
MA.K.NSO.3.1	Explore addition of two whole numbers from 0 to 10, and related subtraction facts.	5 - Very Good Alignment	Plenty of opportunity for conceptual understanding of addition
MA.K.NSO.3.2	Add two one-digit whole numbers with sums from 0 to 10 and subtract using related facts with procedural reliability.	5 - Very Good Alignment	Excellent teaching strategies and how to teach standard to mastery
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. 	5 - Very Good Alignment	Every lesson explains an MTR standard

	<ul style="list-style-type: none"> • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	5 - Very Good Alignment	Every lesson explains an MTR standard
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	Every lesson explains an MTR standard

<p>MA.K12.MTR.4.1</p>	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	<p>5 - Very Good Alignment</p>	<p>Every lesson explains an MTR standard</p>
<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>Every lesson explains an MTR standard</p>

MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>5 - Very Good Alignment</p>	<p>Every lesson explains an MTR standard</p>
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	<p>5 - Very Good Alignment</p>	<p>Every lesson explains an MTR standard</p>
ELA.K12.EE.1.1	<p>Cite evidence to explain and justify reasoning.</p>	<p>5 - Very Good Alignment</p>	<p>TE has notes to show correlation to this standard</p>
ELA.K12.EE.2.1	<p>Read and comprehend grade-level complex texts proficiently.</p>	<p>5 - Very Good Alignment</p>	<p>TE has notes to show correlation to this standard</p>
ELA.K12.EE.3.1	<p>Make inferences to support comprehension.</p>	<p>5 - Very Good Alignment</p>	<p>TE has notes to show correlation to this standard and students are asked to make</p>

			inferences throughout each standard development
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	Every lesson gives suggestions on how to collaborate as students learn standard
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	TE has notes to show correlation to this standard
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	Teacher is given strategies to develop this standard
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Each lesson provides ELL strategies
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	Each lesson provides ELL strategies and teacher is provided strategies to elicit communication among learners

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	Fully aligns to state standards
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Fully written to skill level of course
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Extremely adaptable materials with suggestions for a variety of materials to use to teach the standards and benchmarks

4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Sufficient materials provided
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	Complexity matches standard and provides extensions for each
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	Appropriate for grade level
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Sufficient time to teach each standard and benchmark
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Every lesson incorporates research
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Contributes to quality of content
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	No errors were noted
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	No bias was noted
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Laurie's corner sufficiently supports
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Factually accurate
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Current and up to date material present
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Appropriate and relevant

16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Appropriate and relevant
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Each lesson makes connections to life in a meaningful way
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Many opportunities for interdisciplinary connections
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	No bias evident
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Humanity and compassion are evident throughout
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Fully aligned benchmarks and standards

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	Comprehensive and a plethora of strategies and how to teach are evident
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Full alignment
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	consistent and logical order evident
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Very engaging to students

5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	Good pacing
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	evident
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	material presentation is in logical order with engagement strategies embedded throughout

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Many opportunities for students to engage in the content to maintain motivation. Opportunities and suggestions for teacher to elicit engagement as well.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	Very good alignment
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Teacher is provided verbiage to elicit positive outcomes for learners
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	Many opportunities suggested for teachers to ensure this occurs.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	various learning styles are addressed
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	very adaptable to many learning styles

7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	logical goals and objectives
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Many opportunities and suggested verbiage for teacher to ensure targeted learning outcomes.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	effective teaching strategies are evident
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	assessment strategies are correlated
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	effective assessment of learner performance with targeted outcomes
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	very good alignment
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	evident throughout the material
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Effective teaching strategies for multiple learners with adequate assessment to monitor and assess progress is evident.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	No evidence of CRT
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	No evidence of CRT

Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	No evidence of SEL

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

The strengths of this program are in its visual appeal and UDL, increasing student engagement and motivation. The resources include clear, grade-level explanations of mathematical concepts and skills, as well as a variety of research-based instructional strategies. The program materials, both print and digital, support the teaching of the BEST standards for all learner types. It does meet the benchmark standards appropriately, however the complexity level in some areas could be increased.

Standard	Description	Reviewer Rating	Rating Justification
MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	4 - Good Alignment	While it does align to the specific standard, it only provides one way to solve with direct instruction being only one lesson. Multiple strategies and references back to the standard would be more beneficial.
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	All elements of this standard are aligned throughout multiple lessons with different problem solving strategies and real-life examples.
MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	5 - Very Good Alignment	Standard is not only appropriately aligned, but also shows progression throughout multiple lessons.
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	Standard appropriately aligned and also mentioned in other areas outside of publisher's mentions.
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	5 - Very Good Alignment	Standard is aligned and given multiple strategies and contexts for understanding. This skill is especially difficult for 1st graders and is integrated into multiple lessons here.

MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	4 - Good Alignment	Standard aligns. I wish these standards were integrated more into other lessons as it provides a great visual for other standards and skills.
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	4 - Good Alignment	Standard aligns. I wish these standards were integrated more into other lessons as it provides a great visual for other standards and skills.
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	4 - Good Alignment	Only one lesson aligns with the standard directly.
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.GR.1.4	Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	Lessons align with the standard fully.

MA.1.M.1.1	Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.M.1.2	Compare and order the length of up to three objects using direct and indirect comparison.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.M.2.1	Using analog and digital clocks, tell and write time in hours and half-hours.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	3 - Fair Alignment	Standard is addressed, could be more explicitly taught with more opportunities for response or practice. Specifically beyond one lesson.
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	5 - Very Good Alignment	Lessons align with the standard fully.

MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	4 - Good Alignment	This standard is aligned to this lesson but could be expanded on throughout the curriculum.
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	5 - Very Good Alignment	Lessons align with the standard fully.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	This MTR is integrated throughout multiple lessons and builds throughout the curriculum.
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. 	5 - Very Good Alignment	This MTR is integrated throughout multiple lessons and builds throughout the curriculum.

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	This standard may also be addressed in other areas, as well as through teacher.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	This standard may also be addressed in other areas, as well as through teacher.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	More support for teachers in how to implement this standard correctly would be beneficial.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	5 - Very Good Alignment	This standard may also be addressed in other areas, as well as through teacher.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	5 - Very Good Alignment	This standard may also be addressed in other areas, as well as through teacher.

ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	5 - Very Good Alignment	This standard may also be addressed in other areas, as well as through teacher.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	ELL support provided both digitally and printed.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	5 - Very Good Alignment	ELL support provided both digitally and printed.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	4 - Good Alignment	Overall the content aligns with the state's standards and benchmarks. There are some standards/benchmarks that are addressed in limited ways. While they may not need direct instruction for multiple lessons, they could be integrated into more vs. a few review problems in extra practice.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Some skills simplify some of the benchmarks and could be taught in a variety of ways (vs. maybe one strategy) to meet the needs of all learners.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Both print and digital materials seem to be adaptable and useful for classroom instruction.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Again, some skills could be taught in more ways than one in order to promote more engagement and problem solving skills.

5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	Some content simplifies some of the benchmark skills.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	Some content simplifies and almost limits some of the student abilities.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	5 - Very Good Alignment	The content provided matched the time period allowed for teaching. There is also movement in this category based on district level needs.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	5 - Very Good Alignment	Yes, the sources cited in the materials seem to reflect expert information/research for the math subject area including input from math educators.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	5 - Very Good Alignment	Yes, the sources cited in the materials seem to reflect expert information/research for the quality of math content.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	There were no visible or blatant errors in material.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	The content and materials are presented objectively and appropriately.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	4 - Good Alignment	Overall, materials reflect theories and standards appropriately. They could expand more on some concepts and increase the variety of models/way skills are taught.
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Yes, content is accurate and consistent throughout materials.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Content reflects up-to-date research and newest standards.

15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Content is relevant to the curriculum and standards.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Content is both appropriate and relevant for learner.s.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	The content does go between animals that are mostly cartoon looking to real life applications. For example, an accurate representation of modes of transportation.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	5 - Very Good Alignment	Material does incorporate meaningful content for specific age/grade level students.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	5 - Very Good Alignment	Multiple examples of various communities are prevalent throughout all materials.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Animals are very much highlighted in this curriculum. All materials portray living things appropriately, considering needs values.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Yes, overall the content of the benchmarks and standards is covered throughout the material.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	3 - Fair Alignment	While the content and materials do address the standards and benchmarks, there are some skills that may require additional teacher preparation in order to meet the needs of all learners. There are concepts that students may

		need to see a variety of ways (which are not always provided) to problem solve before mastery.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	All components of the major tool align with the curriculum and each other.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Materials are organized and consistent.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	Visually, materials are extremely appealing to students and math their appropriate age/grade level. Content consistently targets student interest.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	The content is appropriate in it's pacing and consistent throughout in order to keep learning routine for students.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	It seems like the digital platform may be slightly more adaptable for UDL. There are resources to meet Blind, DHH, ELL, etc. student learning needs.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	Overall, the curriculum is well presented visually, with inclusivity, freedom of bias and engagement in the forefront.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	The only reason for the "4" vs. "5" rating is that the curriculum is SO consistent that it provides routine, yet at the same time could be less engaging for some students who find it repetitive.

		It could still maintain it's consistency by varying some lessons (i.e. one a week) to change structure and increase motivation.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Again, instructional materials do leave some skills to not be thoroughly taught in a variety of ways.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	All materials contain clear goals/learning outcomes.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Various material resources help support students and aid teachers to encourage more independent learning. Many teachers will use the extra practice pages as homework, so incorporating more of these for additional classroom practice would be beneficial.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	5 - Very Good Alignment	Support can be adapted to developmental differences and varying learning styles appropriately.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	Materials engage activity of students during the learning process with their variety of print and digital resources.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	4 - Good Alignment	Increased hands-on activities outlined in the physical workbook would be beneficial for enrichment and extension of content and learning targets.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	4 - Good Alignment	Instructional materials do include some strategies known to be successful for teaching the learning outcomes, but could give teachers a wider variety of implementation strategies.

9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Yes, they are effective in teaching the targeted outcomes.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Materials and assessments are aligned and reflect the learning outcomes appropriately.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Assessment strategies incorporated in the materials are effective in assessing learners and their understanding.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	UDL is considered in resources and materials.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	4 - Good Alignment	Overall, the appropriate application of Mathematical Thinking and Reasoning Standards is relevant. The curriculum could approach some benchmarks at a more in-depth level creating high problem solving opportunities for learners.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	While it does meet learning requirements and benchmark standards at an effective level, it could be more "highly effective". Some skills are left to be taught in isolation and could be expanded on and incorporated into other areas.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	Yes, the materials are unbiased and do not encompass CRT.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Yes

Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Yes
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	5 - Very Good Alignment	Yes

Reviewer's Name: Melinda Robinson

Title: Florida's B.E.S.T. Standards for MATH Grade 1

Publisher: Big Ideas Learning, LLC

Author: Ron Larson and Laurie Boswell

Copyright: 2023

Edition: 1

Grade Level: K-5

Course: [Grade One Mathematics](#)

Bid ID: 299

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Materials appropriate address the BEST standards including attention to clarifications, and are presented in appropriate progression and in an engaging way.

Standard

Description

Reviewer
Rating

Rating Justification

MA.1.AR.1.1	Apply properties of addition to find a sum of three or more whole numbers.	4 - Good Alignment	few question with three addends and less with more than three
MA.1.AR.1.2	Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.	5 - Very Good Alignment	Model Real Life labelled questions consistently present but many other examples mixture of objects, drawings and equations
MA.1.AR.2.1	Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.	5 - Very Good Alignment	builds across chapters to reach clarification limit
MA.1.AR.2.2	Determine and explain if equations involving addition or subtraction are true or false.	5 - Very Good Alignment	focus is on equal sign and stays within limits of other clarifications
MA.1.AR.2.3	Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.	4 - Good Alignment	even in higher chapters few representations of $c=a+b$
MA.1.DP.1.1	Collect data into categories and represent the results using tally marks or pictographs.	4 - Good Alignment	only basic geometric shapes used and only once referencing attributes, hexagons, sphere, cubes, rectangular prisms could be used
MA.1.DP.1.2	Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.	5 - Very Good Alignment	good representation of both
MA.1.FR.1.1	Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.	5 - Very Good Alignment	uses appropriate language equal and unequal shares and quarters beyond the halves and fourths
MA.1.GR.1.1	Identify, compare and sort two- and three-dimensional figures based on their defining	4 - Good Alignment	addresses benchmark clarifications , has

	attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders.		identifying and sorting questions but comparing is lacking
MA.1.GR.1.2	Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.	5 - Very Good Alignment	opportunities to trace to build to sketch
MA.1.GR.1.3	Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.	5 - Very Good Alignment	composing and decomposing both addressed 2D and #D addressed separately
MA.1.GR.1.4	Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.	4 - Good Alignment	real world objects for 3D seem limited to mostly illustrations with blocks
MA.1.M.1.1	Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.	5 - Very Good Alignment	estimation questions presented in a variety of ways
MA.1.M.1.2	Compare and order the length of up to three objects using direct and indirect comparison.	5 - Very Good Alignment	mixture of comparisons using word descriptions and illustrations
MA.1.M.2.1	Using analog and digital clocks, tell and write time in hours and half-hours.	3 - Fair Alignment	students not asked to o'clock or half past on their own, only one page illustrating partition of circle as a half with blue background
MA.1.M.2.2	Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.	5 - Very Good Alignment	coins equalling a dollar represented in various ways,
MA.1.M.2.3	Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten	5 - Very Good Alignment	examples of counting on mixed with place value representations connecting to base ten

	dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.		blocks and the way the money is presented always grouped in place value order
MA.1.NSO.1.1	Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.	4 - Good Alignment	clarification 3 counting sequences and visual charts used but other than counting by tens no reference or emphasis on base 10 place value
MA.1.NSO.1.2	Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.	5 - Very Good Alignment	additional usage of base ten blocks to represent numbers
MA.1.NSO.1.3	Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or decomposition with objects, drawings and expressions or equations.	3 - Fair Alignment	expressions and equations lacking blank tens and blank ones is blank, could be additionally represented as blank+blank =blank linking to equations even the reverse is present blank is blank tens and blank ones which is blank=blank+blank lost opportunity
MA.1.NSO.1.4	Plot, order and compare whole numbers up to 100.	5 - Very Good Alignment	all aspects of clarifications present
MA.1.NSO.2.1	Recall addition facts with sums to 10 and related subtraction facts with automaticity.	5 - Very Good Alignment	various strategies build towards fluency
MA.1.NSO.2.2	Add two whole numbers with sums from 0 to 20, and subtract using related facts with procedural reliability.	5 - Very Good Alignment	clarifications addressed and various strategies represented and built upon

MA.1.NSO.2.3	Identify the number that is one more, one less, ten more and ten less than a given two-digit number.	5 - Very Good Alignment	addressed
MA.1.NSO.2.4	Explore the addition of a two-digit number and a one-digit number with sums to 100.	5 - Very Good Alignment	strategies addressing clarifications are evident
MA.1.NSO.2.5	Explore subtraction of a one-digit number from a two-digit number.	5 - Very Good Alignment	clarifications met and strategies are varied
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	5 - Very Good Alignment	text supplies prompts such as analyze, ask a question, keep going, help your partner and many self reflective type idea prompts from character thought bubbles
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. 	5 - Very Good Alignment	prompts such as another way and make connections as well as the structure of the lessons build on understanding and representation

	<ul style="list-style-type: none"> Express connections between concepts and representations. Choose a representation based on the given context or purpose. 		
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. 	5 - Very Good Alignment	all stages of fluency represented and ample prompts for discussion
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	5 - Very Good Alignment	prompts throughout lesson such as justify, you be the teacher, construct an argument

<p>MA.K12.MTR.5.1</p>	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 	<p>5 - Very Good Alignment</p>	<p>prompts throughout such as make a plan, structure, use another concept</p>
<p>MA.K12.MTR.6.1</p>	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	<p>5 - Very Good Alignment</p>	<p>dig deeper questions, along with prompts of check your work and is it reasonable</p>
<p>MA.K12.MTR.7.1</p>	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p>	<p>5 - Very Good Alignment</p>	<p>multiple references to everyday life, real life,</p>

	<ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 		
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	5 - Very Good Alignment	prompts for teacher and questions prompting students
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	5 - Very Good Alignment	multiple real life questions; math musicals texts
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	dig in questions and closure statements may support this
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	supports collaboration ask your partner
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	across curriculum, model real life questions provide various formats to follow
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	as previous stated
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	multiple opportunities to collaborate and share
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	multiple opportunities to collaborate and share

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	benchmarks identified and meet clarifications
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	benchmark clarifications met
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	various methods offered
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	objective learning targets identified and students self assess
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	5 - Very Good Alignment	clarifications met
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	5 - Very Good Alignment	progression through strategies address learning conceptually, procedurally and application
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	pacing seems to be appropriate
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	expertise represented and referenced
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	represented well
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	none noted
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	4 - Good Alignment	none noted
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include	5 - Very Good Alignment	build through acceptable strategies to support concepts

prevailing theories, concepts, standards, and models used with the subject area).		
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	non noted
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	high impact learning strategies are noted and addressed
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	vertical progression; real life models
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	vertical progression; real life models
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	multiple real life models applications etc
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	references and applications noted cross curricular
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	non noted
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	non noted
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	benchmarks and clarifications addressed

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	seem to be easily accessible in text and digital

2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	all aspect viewed malign
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	material presented in a way to build the learners conceptual understanding and skill level
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	5 - Very Good Alignment	visuals and prompts support student engagement
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	4 - Good Alignment	pacing seems to be appropriate based on level of understanding required
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	differentiation noted in Lauries notes, ELL and
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	overall great representation

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	3 - Fair Alignment	engaging but not necessarily motivating other than the link to real life
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	thoroughly addresses best standards
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	TE gives multiple explanations, prompts etc.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	prompts in student edition to justify reasoning share with a partner, choose a different method

5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	differentiation addressed
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	5 - Very Good Alignment	presented in an engaging format
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	limited extensions other than possibly math musicals
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	strategies provided help guide to learning goals
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	strategies build to objectives
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	progression through learning monitored and assessed
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	student self monitoring to summative assessments and all progression during
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	4 - Good Alignment	differentiation noted
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	MTRs extremely evident with EE overlaps
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	BEST standards and clarifications addressed strategies built upon, conceptual understanding, procedural, and application all present

Special Topics	Reviewer Rating	Rating Justification
----------------	-----------------	----------------------

Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	non noted
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	non noted
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	non noted
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	2 - Poor Alignment	social emotional learning addressed in Math musicals but seem to be appropriately directed

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall impression is materials are easy to use, meet most standards with a fair alignment. Some requirements are only in the TE which can be overlooked by a teacher when in the moment of teaching. Videos have SEL components. Cross curricular activities, although seem to be fun, would not be worthy of attempting in a time- strapped classroom.

Standard	Description	Reviewer Rating	Rating Justification
MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	3 - Fair Alignment	The standard is across lessons, but it does not coincide with the other standards in the lessons.
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	4 - Good Alignment	Meets benchmark with good amount of practice.
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	Meets benchmark and clarifications with ample practice.
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	2 - Poor Alignment	Insufficient practice and coverage of the standard.
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	2 - Poor Alignment	Insufficient practice and coverage of the standard.
MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	5 - Very Good Alignment	Uses concrete examples with rectangles, meets benchmark with clarification regarding divisibility rules.
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	4 - Good Alignment	Uses real world examples. One problem in the TE states the pattern is, "add a zero each time." Mathematically it should be multiply by 10 each time.
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Ample practice with both stem and leaf plots and line plots.

MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	3 - Fair Alignment	Vocabulary development is lacking.
MA.4.DP.1.3	Solve real-world problems involving numerical data.	2 - Poor Alignment	Insufficient practice with, "Data involving decimals are limited to hundredths."
MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	2 - Poor Alignment	Does not make sufficient use of manipulatives, models, or number lines. There is only one set of number lines at the beginning of 9.3.
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	2 - Poor Alignment	Does not make sufficient use of manipulatives, models, or number lines.
MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	3 - Fair Alignment	Does not include sufficient use of manipulatives or visual models in instruction.
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than one, with different numerators and different denominators.	3 - Fair Alignment	Does not use enough examples of fractions greater than one.
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	3 - Fair Alignment	Uses mostly equations for student practice. Students need guidance on how to draw the example or model.
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	3 - Fair Alignment	Ample practice, but lacks enough examples of HOW to

			regroup fractions for subtracting.
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	2 - Poor Alignment	Does not make sufficient use of manipulatives, models, or number lines.
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	4 - Good Alignment	Does well aligning multiplication of fractions with repeated addition. TE does have answers simplified, which is not what the standard requires.
MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	Meets benchmark with clarifications. Vocabulary introduction needs more depth.
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	5 - Very Good Alignment	Meets benchmark
MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	5 - Very Good Alignment	Meets benchmark. Uses real world examples.
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	4 - Good Alignment	Perimeter and area are initially taught in isolation, but are brought together later.
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	4 - Good Alignment	Meets the benchmark.
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	4 - Good Alignment	Meets the benchmark.

MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	4 - Good Alignment	Meets the benchmark. Separates each type of measurement. Teaches customary and metric separately. Uses the word "capacity" instead of "volume."
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	4 - Good Alignment	Meets the benchmark. Combines customary and metric questions in the final lesson.
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	4 - Good Alignment	Meets the benchmark.
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	4 - Good Alignment	Taught as part of three different units, which is good spiral review.
MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	4 - Good Alignment	Meets the benchmark.
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	4 - Good Alignment	Meets the benchmark with clarifications.
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	4 - Good Alignment	Meets the benchmark. Rounding is used to estimate products.
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	3 - Fair Alignment	Does not meet the clarification, "Within the benchmark, the expectation is to explain the reasoning for the comparison."
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	Ample practice throughout numerous lessons.
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	Teaches multiplication with multiple

			strategies and procedures.
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	Teaches area model, distributive and associative properties, partial products, as well as the traditional standard algorithm, however the traditional algorithm is not taught in a step by step. Rather it says to multiply the three in the ones by the 3digit top number, then the 4 in the tens by the 3 digit top number.
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	Uses models and different methods, includes remainder as a fraction of divisor.
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	Includes estimation as a natural part of problem solving.
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	4 - Good Alignment	Meets benchmark
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	5 - Very Good Alignment	Includes word problems and money.
MA.K12.MTR.1.1	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. 	3 - Fair Alignment	Lessons include "Solving the Model Real Life Example," but in the TE, which can be easily overlooked.

	<ul style="list-style-type: none"> • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. 		
MA.K12.MTR.2.1	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. 	4 - Good Alignment	The company states that 4 pages are dedicated to this standard, but throughout the book models are used. Manipulatives could be used more.
MA.K12.MTR.3.1	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. 	4 - Good Alignment	Students are provided with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.

	<ul style="list-style-type: none"> Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. 	3 - Fair Alignment	<p>There are no opportunities for planned partner work. Allows for a "turn and talk" on occasion. Most discussion is in the TE as a side note, which can be easily overlooked.</p>
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. 	4 - Good Alignment	<p>Allows for problem solving strategies that include analyzing the problem and planning for problem solving.</p>

	<ul style="list-style-type: none"> Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. 	4 - Good Alignment	Includes estimation as a natural part of problem solving.
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	4 - Good Alignment	Problems include real-world scenarios and uses models.
ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	3 - Fair Alignment	Teacher edition includes opportunities for students to explain and justify orally. Student edition does not.

ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	Word problems are appropriate. Avoids unusual ethnic names by saying, "you" in most word problems.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	Includes cross curricular paragraphs throughout.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	2 - Poor Alignment	The student edition does not allow for collaboration. The TE has spots for it, that can be easily overlooked by a teacher worried about pacing.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	3 - Fair Alignment	Not included in SE.
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	2 - Poor Alignment	The suggestions are not viable. Things like, "invite a car mechanic to come in," or "perform a puppet show." There is not enough time in the day. The standard needs to be embedded in daily lessons.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	4 - Good Alignment	Support in the TE throughout.
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	3 - Fair Alignment	"problem Solving for All Learners" is included throughout the TE.

Content	Reviewer Rating	Rating Justification
---------	-----------------	----------------------

1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	3 - Fair Alignment	Many standards score a 2 or 3. Average overall is 3.59.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	4 - Good Alignment	Lessons allow for supporting learners and extended thinking.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	4 - Good Alignment	Lessons allow for supporting learners and extended thinking.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	4 - Good Alignment	Lessons use real-world examples to impart the significance of topics.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	3 - Fair Alignment	Complexity meets standards and clarifications most of the time.
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	3 - Fair Alignment	Complexity meets standards and clarifications most of the time.
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Meets expectations.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Meets expectations.
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Meets expectations. Includes real-world sources to support lessons.
10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	4 - Good Alignment	Minor errors. I observed two errors in the TE.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Meets expectations.
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Content includes accepted ways to solve multiplication and division as well as using many other prevailing theories.

13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	5 - Very Good Alignment	Meets expectations.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Meets expectations.
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Content is relevant and appropriate.
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Content is relevant and appropriate for learners.
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Real-world examples make content meaningful.
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Lessons have cross-curricular connections.
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	Very few names or images of human beings are included. Most examples use photographs or illustrations of animals or things in nature.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	5 - Very Good Alignment	Meets expectations.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	3 - Fair Alignment	Many standards score a 2 or 3. Average overall is 3.59.

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	4 - Good Alignment	Ample practice included.

2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	4 - Good Alignment	Meets expectations.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	An overview the sequencing indicates content is being taught in a logical organization.
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	Readability is good. Visuals are engaging, not distracting.
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Content is presented in reasonable chunks.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	5 - Very Good Alignment	TE contains Learner Support, Scaffolding, information for emergent learners.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	4 - Good Alignment	Presentation is user-friendly, and meets expectations for teachers and students.

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	4 - Good Alignment	Text uses familiar characters, and lessons are neat without too much to be visually confusing to students.
2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	4 - Good Alignment	Lessons are chunked so that standards are met over multiple lessons.
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Student lesson includes a learning target and "I can" statements. TE includes "Where are we in our learning" opportunities for evaluation and reflection as well as rubrics for formative assessment.

4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	5 - Very Good Alignment	TE includes "Where are we in our learning" opportunities for evaluation and reflection as well as rubrics for formative assessment.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	TE contains Learner Support, Scaffolding, information for emergent learners.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	Meets expectations.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	3 - Fair Alignment	TE includes cross curricular activities that would be time consuming and hard to fit within prescribed lesson times.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	Uses multiple strategies and models.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Uses multiple strategies and models.
10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Assessments correlate with desired learning outcomes.
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	Assessment materials are effective in assessing the learners' performance with regard to the targeted outcomes.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	UDL is incorporated in the TE via scaffolding, ELL notes, and "Problem Solving for All Learners" segments.
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	3 - Fair Alignment	MTRs and ELA are rated as fair to good.

14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	4 - Good Alignment	Instructional strategies and support satisfy the LEARNING requirements.
---	--------------------	---

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	5 - Very Good Alignment	CRT is not taught.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	Instructional materials omit Culturally Responsive Teaching as it relates to CRT.
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	5 - Very Good Alignment	CRT is not taught.
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	1 - Very Poor/No Alignment	Lesson videos include SEL lessons within the content lesson.

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

5 - Very Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

This curriculum embeds a lot of aligned standards practice, student-friendly work pages, teacher supportive resources, and so much more. I thoroughly enjoyed reviewing the materials within this curriculum. After reviewing the questionnaire, I could see that they used a lot of educational research (John Hattie, Nancy Frey, etc.) when creating these resources. The layout of the lessons were easy to follow and the TEs housed a lot of resources that will set up the teachers and students with success.

Standard	Description	Reviewer Rating	Rating Justification
MA.4.AR.1.1	Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.	5 - Very Good Alignment	There's a lot of content within the lessons that address the identified standard.
MA.4.AR.1.2	Solve real-world problems involving addition and subtraction of fractions with like denominators, including mixed numbers and fractions greater than one.	5 - Very Good Alignment	These lessons incorporate a variation of ways to practice skills. Love the layout of the fraction lessons.
MA.4.AR.1.3	Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.	4 - Good Alignment	Same as above.
MA.4.AR.2.1	Determine and explain whether an equation involving any of the four operations with whole numbers is true or false.	4 - Good Alignment	Doesn't limit students to specific strategies. Gives them brief practice with a model and number line, then takes them right into practice. Students are able to choose whichever strategy is best for them.
MA.4.AR.2.2	Given a mathematical or real-world context, write an equation involving multiplication or division to determine the unknown whole number with the unknown in any position.	4 - Good Alignment	Ample practice.
MA.4.AR.3.1	Determine factor pairs for a whole number from 0 to 144. Determine whether a whole number from 0 to 144 is prime, composite or neither.	4 - Good Alignment	Same as above.
MA.4.AR.3.2	Generate, describe and extend a numerical pattern that follows a given rule.	3 - Fair Alignment	I wish there was more content for this lesson strand. In fourth grade. In our district,

			we have found that students struggle with creating patterns based upon a given rule.
MA.4.DP.1.1	Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Ample practice.
MA.4.DP.1.2	Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.	4 - Good Alignment	Great alignment and ample practice with mean, median and mode within lesson content. The pages are colorful and easy to follow.
MA.4.DP.1.3	Solve real-world problems involving numerical data.	4 - Good Alignment	lots of stem and leaf plot practice
MA.4.FR.1.1	Model and express a fraction, including mixed numbers and fractions greater than one, with the denominator 10 as an equivalent fraction with the denominator 100.	4 - Good Alignment	includes ample practice for modeling fractions and mixed numbers, and generating fractional equivalences with 10s and 100s as denominators.
MA.4.FR.1.2	Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals.	5 - Very Good Alignment	There's a great deal of practice with fractions and decimals, and relating the two. The students are using tables, models, and number lines.
MA.4.FR.1.3	Identify and generate equivalent fractions, including fractions greater than one. Describe how the numerator and denominator are affected when the equivalent fraction is created.	4 - Good Alignment	ample practice with this standard!
MA.4.FR.1.4	Plot, order and compare fractions, including mixed numbers and fractions greater than	4 - Good Alignment	same as above

	one, with different numerators and different denominators.		
MA.4.FR.2.1	Decompose a fraction, including mixed numbers and fractions greater than one, into a sum of fractions with the same denominator in multiple ways. Demonstrate each decomposition with objects, drawings and equations.	5 - Very Good Alignment	lots of practice!
MA.4.FR.2.2	Add and subtract fractions with like denominators, including mixed numbers and fractions greater than one, with procedural reliability.	5 - Very Good Alignment	same as above!
MA.4.FR.2.3	Explore the addition of a fraction with denominator of 10 to a fraction with denominator of 100 using equivalent fractions.	4 - Good Alignment	Being that the students will receive quite a bit of practice with generating equivalent fractions with denominators of 10s and 100s, I believe that one lesson of this will suffice. It should be simple enough at this point once they've grasped how to generate the equivalent fractions.
MA.4.FR.2.4	Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.	5 - Very Good Alignment	There's quite a bit of practice for this standard evident within these lessons.
MA.4.GR.1.1	Informally explore angles as an attribute of two-dimensional figures. Identify and classify angles as acute, right, obtuse, straight or reflex.	4 - Good Alignment	There's sufficient practice.
MA.4.GR.1.2	Estimate angle measures. Using a protractor, measure angles in whole-number degrees and draw angles of specified measure in whole-number degrees. Demonstrate that angle measure is additive.	4 - Good Alignment	These lessons definitely overlap with the lessons for GR.1.1 including a great deal of practice with this standard's content

			and continuation of the previous.
MA.4.GR.1.3	Solve real-world and mathematical problems involving unknown whole-number angle measures. Write an equation to represent the unknown.	4 - Good Alignment	Lesson 12.6 ties in all of the previous skills for the lessons and shows students the applicable reasoning with real world exploration.
MA.4.GR.2.1	Solve perimeter and area mathematical and real-world problems, including problems with unknown sides, for rectangles with whole-number side lengths.	4 - Good Alignment	Love that there's lots of practice with unknown sides! Students notoriously struggle with finding unknown sides.
MA.4.GR.2.2	Solve problems involving rectangles with the same perimeter and different areas or with the same area and different perimeters.	4 - Good Alignment	Another concept that can be difficult for students, but these lesson pages are easy to follow and help the students to see the connections of area and perimeter.
MA.4.M.1.1	Select and use appropriate tools to measure attributes of objects.	5 - Very Good Alignment	Lots of practice with appropriate tools of measure and when it would be reasonable to use them!
MA.4.M.1.2	Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds.	5 - Very Good Alignment	I was really looking into these lessons because I wanted to make sure that students had ample practice with conversions and using various operations to assist them with converting. Over the course of this chapter/unit, students will receive various practice with

			conversions and converting the multiple units within this standard.
MA.4.M.2.1	Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.	5 - Very Good Alignment	same as above
MA.4.M.2.2	Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.	4 - Good Alignment	The introduction to this lesson shows a table with money, and the students use the table to answer a variety of questions. It then goes on to give them a plethora of multi-step problems using money and seeing the relevance of that to decimals.
MA.4.NSO.1.1	Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.	4 - Good Alignment	In the earlier units, the students are modeling ways to show numbers using drawings, but as they progress to the latter units, they identify values and relate numbers using the base ten system using tables.
MA.4.NSO.1.2	Read and write multi-digit whole numbers from 0 to 1,000,000 using standard form, expanded form and word form.	4 - Good Alignment	The students are modeling numbers using place value by drawing quick pictures and other strategies.
MA.4.NSO.1.3	Plot, order and compare multi-digit whole numbers up to 1,000,000.	4 - Good Alignment	There's sufficient practice for this standard!
MA.4.NSO.1.4	Round whole numbers from 0 to 10,000 to the nearest 10, 100 or 1,000.	4 - Good Alignment	This standard is incorporated in multiple lessons. The

			students are rounding numbers.
MA.4.NSO.1.5	Plot, order and compare decimals up to the hundredths.	4 - Good Alignment	There's sufficient practice for this standard.
MA.4.NSO.2.1	Recall multiplication facts with factors up to 12 and related division facts with automaticity.	5 - Very Good Alignment	Love the automaticity component within the lessons...lots of computation practice! Students are also encouraged to using grid paper (already within the lessons) to generate factor pairs. So, they are seeing some representational along with the abstract.
MA.4.NSO.2.2	Multiply two whole numbers, up to three digits by up to two digits, with procedural reliability.	5 - Very Good Alignment	There's an extensive amount of practice over the course of the 2 units (chapters 2 and 3).
MA.4.NSO.2.3	Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.	5 - Very Good Alignment	same as above
MA.4.NSO.2.4	Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.	5 - Very Good Alignment	same as above
MA.4.NSO.2.5	Explore the multiplication and division of multi-digit whole numbers using estimation, rounding and place value.	5 - Very Good Alignment	same as above
MA.4.NSO.2.6	Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.	4 - Good Alignment	Sufficient practice with standard!
MA.4.NSO.2.7	Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.	4 - Good Alignment	same as above

<p>MA.K12.MTR.1.1</p>	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. 	<p>5 - Very Good Alignment</p>	<p>Each TE has a table just for the MTRs. Within those tables are identified pages where there is evidence of each MTR. This is incorporated within each TE unit.</p>
<p>MA.K12.MTR.2.1</p>	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. 	<p>5 - Very Good Alignment</p>	<p>same as above</p>
<p>MA.K12.MTR.3.1</p>	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p>	<p>5 - Very Good Alignment</p>	<p>same as above</p>

	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. 		
MA.K12.MTR.4.1	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. 	5 - Very Good Alignment	same as above
MA.K12.MTR.5.1	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. 	5 - Very Good Alignment	same as above

	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. 		
MA.K12.MTR.6.1	<p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. 	5 - Very Good Alignment	same as above
MA.K12.MTR.7.1	<p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. 	5 - Very Good Alignment	same as above

ELA.K12.EE.1.1	Cite evidence to explain and justify reasoning.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.2.1	Read and comprehend grade-level complex texts proficiently.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.3.1	Make inferences to support comprehension.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.4.1	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELA.K12.EE.5.1	Use the accepted rules governing a specific format to create quality work.	4 - Good Alignment	the curriculum has checkpoints incorporated within the lessons as well to encourage quality work
ELA.K12.EE.6.1	Use appropriate voice and tone when speaking or writing.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.
ELD.K12.ELL.MA.1	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics.	5 - Very Good Alignment	Lots of ELL support!
ELD.K12.ELL.SI.1	English language learners communicate for social and instructional purposes within the school setting.	4 - Good Alignment	After reviewing the pages noted from the publisher, I can verify that this is evident within the materials.

Content	Reviewer Rating	Rating Justification
1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.	5 - Very Good Alignment	I feel as though this curriculum did a wonderful job with alignment.
2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.	5 - Very Good Alignment	Yes! I also feel that there was quite a bit of overlap, which is good. It keeps the students thinking about how skills correlate and build.
3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.	5 - Very Good Alignment	Very fluid and easy to follow.
4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.	5 - Very Good Alignment	I believe that the tasteful amount of variation of strategies and models will help students make the connections that they need.
5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.	4 - Good Alignment	sufficient evidence of CRA and problem solving
6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.	4 - Good Alignment	I think that there's enough variation for students to find what works for them and excel...there's lot of modifications that can be made for the leveled abilities within the classroom
7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.	4 - Good Alignment	Yes! There's a tasteful amount of material within the lessons and could be done within a given math time.
8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.	4 - Good Alignment	Yes
9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.	4 - Good Alignment	Yes

10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).	5 - Very Good Alignment	From what I reviewed, there seemed to be content presented accurately.
11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).	5 - Very Good Alignment	Yes
12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).	5 - Very Good Alignment	Yes! (variation of models, problem types, and additional resources)
13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).	4 - Good Alignment	From what I reviewed, there seemed to be content presented accurately.
14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.	5 - Very Good Alignment	Yes!
15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.	5 - Very Good Alignment	Yes
16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.	5 - Very Good Alignment	Yes!
17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.	5 - Very Good Alignment	Yes
18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.	4 - Good Alignment	Yes
19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).	4 - Good Alignment	There were no evident biases from what I reviewed. Content was presented fairly.
20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare).	4 - Good Alignment	Yes. There was no inhumane treatment evident.
21. In general, is the content of the benchmarks and standards for this course covered in the material?	5 - Very Good Alignment	Yes!

Presentation	Reviewer Rating	Rating Justification
1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.	5 - Very Good Alignment	I agree! Everything was comprehensive and addressed desired outcomes.
2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.	5 - Very Good Alignment	Yes, all components reviewed showed alignment.
3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.	5 - Very Good Alignment	Everything is logically sequences and extremely easy to follow!
4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.	4 - Good Alignment	The graphics are very engaging and everything presented is in digestible chunks!
5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.	5 - Very Good Alignment	Yes, everything was presented in digestible chunks and in an easy to follow manner.
6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire).	4 - Good Alignment	There are a plethora of resources that provide auditory functions, ELL support, and differentiated tasks pointed out within the TE.
7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).	5 - Very Good Alignment	I think it checks off the boxes!

Learning	Reviewer Rating	Rating Justification
1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.	5 - Very Good Alignment	Yes. From the student-friendly print and graphics, multiple strategies, and easy to follow structure, the students will feel motivated.

2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.	5 - Very Good Alignment	The materials thoroughly show this!
3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.	5 - Very Good Alignment	Yes, all lesson pages (even in the SE) have lesson goals and standards on them.
4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.	4 - Good Alignment	Yes, it gradually takes the students through CRA/UDL strategies and encourages students to explore and engage in their thinking.
5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.	4 - Good Alignment	In the TEs, there are differentiation modifications and resources for teachers to use with students. There are differentiated tasks.
6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.	4 - Good Alignment	There's evidence of CRA within the unit lessons, and so the students are learning strategies in a way that math should be learned. There was rarely, if any, times where there was abstract without concrete or representative.
7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.	5 - Very Good Alignment	I believe that the curriculum did a very good job of this! All of the lessons obtain goals and standards on each of the pages and progresses the students through the content in a way that will help them get to those goals/objectives.
8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.	5 - Very Good Alignment	The strategies presented within the lessons are reasonable and will aid the students in reaching the outcomes of the lesson targets.
9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.	5 - Very Good Alignment	Yes!

10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.	5 - Very Good Alignment	Yes, there are a lot of formative assessment opportunities within the lessons, as well as, supportive resources that assess the desired learning outcome
11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.	5 - Very Good Alignment	There are a lot of assessment tools and support that come with the curriculum.
12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.	5 - Very Good Alignment	Yes! Lots of variation!
13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?	5 - Very Good Alignment	I like that it includes these laid out for the teachers within the TE. It points out where in the lessons there is evidence of this. They are embedded within the curriculum.
14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)	5 - Very Good Alignment	Yes, the curriculum satisfies the requirements for learning the benchmark standards. The way the content is laid out and presented, it sets the students and teachers up for success.

Special Topics	Reviewer Rating	Rating Justification
Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?	4 - Good Alignment	There was no CRT evident.
Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Yes
Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?	4 - Good Alignment	Yes
Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards?	4 - Good Alignment	There was no SEL solicited.

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Big Ideas - appeal
Mon, Apr 25, 2022 10:00 AM - 10:30 AM (EDT)

Please join my meeting from your computer, tablet or smartphone.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Senior State Adoptions Specialist

K-5 Series:

- Rejection Reason
 - Grade K, Grade 1, Grade 4 due to Inclusion of Special Topics
 - Grade K – 1 Instance Identified
 - Grade 1 – 1 Instance Identified
 - Grade 4 – 1 Instance Identified
- BIL Analysis
 - Based on the evidence provided, we believe that all 3 instances of Special Topics relate to an erroneously included reference to Social and Emotional Learning (SEL) within the marketing front matter of the Teaching Editions (TE)
 - This reference did not occur within the instructional materials section of the TE
 - This reference did not occur within the Student Edition (SE)
- BIL Proposal
 - To ensure compliance and consistency, and to reduce potential confusion by Teachers, BIL will remove all marketing front matter from all K-5 Teaching Editions and will resubmit these materials in PDF form by the end of the day Monday April 25th (example of before & revised TE to be shared via Zoom during the meeting)
 - For existing inventory, this will be physically removed from the TEs due to supply chain concerns.
 - For future reprints, this content will not be included.
 - BIL requests that these revised submissions be reviewed as quickly as possible and, if in line with the example discussed, that the BIL K-5 series be added to the Adoption List.

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Best regards,

Emily Winston

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended

List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for appeal templates for Grades K, 1, and 4 from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached templates show our proposed solution for the removal of the included special topic (SEL).

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Subject: Big Ideas - initial appeal call

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Subject: RE: Big Ideas - initial appeal call

Hi PJ,

Please complete the word document from Friday. The excel spreadsheet is from Big Ideas and can be used to check the standards correlations on the word doc.

Let me know if you have any other questions,
Lauren

Good afternoon,

Thank you again for taking the time to speak with us this morning. Please see attached for the appeal template for Algebra 2 with CalcChat® and CalcView® from Big Ideas Learning, LLC. In response to the state's "Not Recommended List" pictured below, the attached template shows citations in response to the standards scored with below a 3.

Please let us know if you have any questions or if there is anything else we can provide you with at this time. Again, thank you for providing us with this opportunity and we look forward to a continued partnership with the FL DOE.

Hi Emily,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Big Ideas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Subject: Big Ideas Learning - FL 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

On behalf of Big Ideas Learning, LLC, we first would like to thank the staff of the FL DOE for creating this multi-step adoption process and allowing us to work with your team. We sincerely appreciate your diligence, time, and dedication to this matter, and we look forward to partnering with you.

Big Ideas Learning, LLC would like to appeal the decision of the FL DOE to not list our Florida's B.E.S.T Standards for Math K-5 (Bid IDs 298-303) and Algebra 2 with CalcChat® and CalcView® (Bid ID 311) titles on the state's approved Instructional Materials Adoption List.

At this time, we do not want to pursue a DOAH hearing and would like to work directly with DOE staff to remediate our issue. We are requesting a meeting as soon as possible regarding the materials mentioned above. If it would be helpful to DOE staff, we are happy to meet after non-traditional work hours during the week or over the weekend.

Please let us know what date and time would work best for DOE staff and we will be glad to set up the meeting.

Best regards,

Emily Winston

Apologize for additional email.

Just after I hit send, I was notified by my tech team that the other Precalculus text was removed from the link. Initially we had been trying to do this to create less confusion for you, but time in getting this back to you was becoming an issue so I sent as is. Just wanted to follow up because in email below I stated you will see other text.

Thanks again!

Carey

Subject: Cengage Learning Inc. Meeting Request- Appeal Template and access link

Good morning Lauren and others!

To ensure you see the full digital experience, the student edition and teacher edition have been updated. On the template, the link takes you to the State Review site we submitted last July. Here you can click into the text *Precalculus with Limits: A Graphing Approach* to see the corrections. I listed the pathway below to save you some time searching. Because this is the State Review site, you will also see the other Precalculus text, which is on the Adopted List.

Attached is the Appeal Template as well as PDFs of the two pages I sent previously as we were waiting on digital platform update.

Open the link. [direct link](#)

Go to the first two titles "Precalculus with Limits: A Graphing Approach". The first is the Teacher's Edition, the second is the Student Edition.

Go to page 228 and page A31. The search for these pages are in bottom right corner.

On page 228, the problem is 'Example 5- Population Growth'. On page A31, the problem is '11. Sales'.

If you are asked for a UN/PW, use the following. username: adoption.review@florida.com password: Learning

Thanks for your time on this and let us know if there are questions or issues accessing the text!

Carey

Apologize for additional email.

Just after I hit send, I was notified by my tech team that the other Precalculus text was removed from the link. Initially we had been trying to do this to create less confusion for you, but time in getting this back to you was becoming an issue so I sent as is.

Just wanted to follow up because in email below I stated you will see other text.

Thanks again!

Carey

Subject: Cengage Learning Inc. Meeting Request- Appeal Template and access link

Good morning Lauren and others!

To ensure you see the full digital experience, the student edition and teacher edition have been updated. On the template, the link takes you to the State Review site we submitted last July. Here you can click into the text *Precalculus with Limits: A Graphing Approach* to see the corrections. I listed the pathway below to save you some time searching. Because this is the State Review site, you will also see the other Precalculus text, which is on the Adopted List.

Attached is the Appeal Template as well as PDFs of the two pages I sent previously as we were waiting on digital platform update.

Open the link. [direct link](#)

Go to the first two titles "Precalculus with Limits: A Graphing Approach". The first is the Teacher's Edition, the second is the Student Edition.

Go to page 228 and page A31. The search for these pages are in bottom right corner.

On page 228, the problem is 'Example 5- Population Growth'. On page A31, the problem is '11. Sales'.

If you are asked for a UN/PW, use the following. username: adoption.review@florida.com password: Learning

Thanks for your time on this and let us know if there are questions or issues accessing the text!

Carey

Subject: Cengage Learning Inc. Meeting Request- Appeal Template and access link

Good morning Lauren and others!

To ensure you see the full digital experience, the student edition and teacher edition have been updated. On the template, the link takes you to the State Review site we submitted last July. Here you can click into the text *Precalculus with Limits: A Graphing Approach* to see the corrections. I listed the pathway below to save you some time searching. Because this is the State Review site, you will also see the other Precalculus text, which is on the Adopted List.

Attached is the Appeal Template as well as PDFs of the two pages I sent previously as we were waiting on digital platform update.

Open the link. [direct link](#)

Go to the first two titles "Precalculus with Limits: A Graphing Approach". The first is the Teacher's Edition, the second is the Student Edition.

Go to page 228 and page A31. The search for these pages are in bottom right corner.

On page 228, the problem is 'Example 5- Population Growth'. On page A31, the problem is '11. Sales'.

If you are asked for a UN/PW, use the following. username: adoption.review@florida.com password: Learning

Thanks for your time on this and let us know if there are questions or issues accessing the text!

Carey

Apologize for additional email.

Just after I hit send, I was notified by my tech team that the other Precalculus text was removed from the link. Initially we had been trying to do this to create less confusion for you, but time in getting this back to you was becoming an issue so I sent as is. Just wanted to follow up because in email below I stated you will see other text.

Thanks again!

Carey

Good morning Lauren and others!

To ensure you see the full digital experience, the student edition and teacher edition have been updated. On the template, the link takes you to the State Review site we submitted last July. Here you can click into the text *Precalculus with Limits: A Graphing Approach* to see the corrections. I listed the pathway below to save you some time searching. Because this is the State Review site, you will also see the other Precalculus text, which is on the Adopted List. Attached is the Appeal Template as well as PDFs of the two pages I sent previously as we were waiting on digital platform update.

Open the link. [direct link](#)

Go to the first two titles "Precalculus with Limits: A Graphing Approach". The first is the Teacher's Edition, the second is the Student Edition.

Go to page 228 and page A31. The search for these pages are in bottom right corner.

On page 228, the problem is 'Example 5- Population Growth'. On page A31, the problem is '11. Sales'.

If you are asked for a UN/PW, use the following. username: adoption.review@florida.com password: Learning

Thanks for your time on this and let us know if there are questions or issues accessing the text!

Hi Beverly,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Wednesday, April 27th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Cengage has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

Hi Beverly,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Wednesday, April 27th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Cengage has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

Logistic Growth Models

Some populations initially have rapid growth, followed by a declining rate of growth, as illustrated by the graph in Figure 3.29. One model for describing this type of growth pattern is the **logistic curve** given by the function

$$y = \frac{a}{1 + be^{-rx}}$$

where y is the population size and x is the time. An example is a bacteria culture that is initially allowed to grow under ideal conditions and then under less favorable conditions that inhibit growth. A logistic growth curve is also called a **sigmoidal curve**.

Figure 3.29 Logistic Curve

EXAMPLE 5 Population Growth

A conservation organization releases 25 Florida panthers into a game preserve. After 2 years, there are 39 panthers in the preserve. An equation that models the population of panthers in the preserve is given by

$$P = \frac{200}{1 + 7e^{-0.264t}}, \quad t \geq 0$$

where P is the total number of panthers in the preserve after t years.

- How many panthers are in the preserve after 5 years?
- When will the population reach 100?

Algebraic Solution

- After 5 years, the number of panthers in the preserve is

$$P = \frac{200}{1 + 7e^{-0.264(5)}} \approx 70.$$

- To determine when the population reaches 100, substitute 100 for P in the population model and then solve for t .

$$100 = \frac{200}{1 + 7e^{-0.264t}}$$

$$1 + 7e^{-0.264t} = 2$$

$$e^{-0.264t} = \frac{1}{7}$$

$$\ln e^{-0.264t} = \ln \frac{1}{7}$$

$$-0.264t = \ln \frac{1}{7}$$

$$t = -\frac{1}{0.264} \ln \frac{1}{7}$$

$$t \approx 7.4$$

So, after about 7.4 years, the population of panthers in the preserve will reach 100.

Graphical Solution

- Use the *value* feature to estimate that $y \approx 70$ when $x = 5$. So, after 5 years, the number of panthers in the preserve is about 70.

- Use a graphing utility to graph

$$y_1 = \frac{200}{1 + 7e^{-0.264x}} \quad \text{and} \quad y_2 = 100$$

in the same viewing window. Use the *intersect* feature of the graphing utility to find the point of intersection of the graphs, as shown in the figure.

The intersection point occurs near $x \approx 7.4$. So, after about 7.4 years, the population of panthers in the preserve will reach 100.

✓ Checkpoint

In Example 5, when will the population reach 135?

B.1 Exercises

See *CalcChat.com* for tutorial help and worked-out solutions to odd-numbered exercises. For instructions on how to use a graphing utility, see Appendix A.

Vocabulary and Concept Check

In Exercises 1–6, fill in the blank.

- _____ are useful for ordering small sets of numbers by hand.
- A _____ uses a portion of a real number line as its horizontal axis, and the bars are not separated by spaces.
- You can use a _____ to construct a histogram.
- The bars in a _____ can be either vertical or horizontal.
- A _____ represents data graphically as points plotted in a rectangular coordinate system.
- _____ show trends over periods of time.

Procedures and Problem Solving

7. **Economics** The line plot shows a sample of average prices of diesel fuel at 25 fuel stations throughout the United States.

- What price occurred with the greatest frequency?
- What is the range of prices?

8. **Environmental Science** The line plot shows the weights (to the nearest hundred pounds) of municipal waste hauled by a garbage truck in 30 trips to a landfill.

- What weight occurred with the greatest frequency?
- What is the range of weights?

Education In Exercises 9 and 10, use the following scores from an algebra class of 30 students. The scores are for two 25-point quizzes.

Quiz #1 20, 15, 14, 20, 16, 19, 10, 21, 24, 15, 15, 14, 15, 21, 19, 15, 20, 18, 18, 22, 18, 16, 18, 19, 21, 19, 16, 20, 14, 12

Quiz #2 22, 22, 23, 22, 21, 24, 22, 19, 21, 23, 23, 25, 24, 22, 22, 23, 23, 23, 22, 24, 23, 22, 24, 21, 24, 16, 21, 16, 14

9. Construct a line plot for each quiz. For each quiz, which score(s) occurred with the greatest frequency?

10. Explain how you can use the line plots to determine which quiz had the greater mean score without calculating the means.

11. **Sales** The numbers of units sold by 48 sales representatives at a company during the past 3 months are listed below. Construct a frequency distribution and histogram for this data set.

107	162	184	170	177	102
145	141	105	193	167	149
195	127	193	191	150	153
164	167	171	163	141	129
109	171	150	138	100	164
147	153	171	163	118	142
107	144	100	132	153	107
124	162	192	134	187	177

12. **Education** The list shows the numbers of operating public school districts in the 50 states in 2017. Use a frequency distribution and a histogram to organize the data. (*Spreadsheet at LarsonPrecalculus.com*) (*Source: National Education Association*)

Subject: [EXTERNAL] RE: Cengage Learning Inc. Meeting Request

Hi Beverly,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Wednesday, April 27th, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Cengage has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

Good afternoon Lauren!

I want to update your team. Our tech engineers are currently collaborating with VitalSource so the student experience will show the new questions. We do not own the VitalSource platform, but the corrected files have been delivered to them for the update as the corrections will need to flow through and be activated by VitalSource. This is of the highest priority and the hope is to have the link tomorrow.

The corrections will be those seen in the google doc and PDFs I had sent previously.

Thanks!

carey

Hi Carey,

We will need the links for our review, but please add the pdf's as well so we can take a look.

Thanks,
Lauren

Hi Evette,

Apologies for the delay on bid #408. Unfortunately the publisher took down their log in info and I had to contact them to get it back into the system. I've attached the log in credentials for BFW #408. Please let me know if there is anything else your team needs to get this bid completed. Thanks to you and the UDL team for all of your hard work, we appreciate you all!

Subject: Complete: UDL Reviews

Good morning, Cathy and Amber,

Thank you again for including our team for the completion of the UDL reviews. The progress we have seen from many of the publishers due to our feedback has been promising. We worked diligently and completed all required bids except for bid 408, which did not provide the required login protocols to review its content.

Upon further review, we noticed some discrepancies with the accessibility features for many of the publishers. Some of the publishers provided additional interactive features that integrated well with the refreshable braille system to appease the requirements, but it was only for certain chapters and not the entire publication. This is a great start, but it's not helpful for students who need the entire book to be accessible.

As a result of this discrepancy, we felt it was advantageous to include our partners from the Florida Instructional Materials Center for the Visually Impaired (FIMC-VI) - to further solidify the publishers progress on quality refreshable braille integration.

FIMC-VI tested 9 of the available Bids from various publishers. The sample interactive chapters (not the actual bid items) from Savvas included in bids 393 and 406 had the most accessible platform and content regarding braille displays. However, the MathML displayed only as Nemeth and was not available to be viewed in Unified English Braille (UEB). This was tested with Job Access With Speech (JAWS), VoiceOver, and two different braille displays (Chameleon 20 and Focus 40). Since 2016, UEB and Nemeth are two of the official braille codes in the United States.

In Florida, it is an IEP team decision as to which code(s) are used for math and science. It is critical that math and science content can be displayed in UEB on a refreshable braille display in addition to Nemeth. Additionally, even when displayed in Nemeth code, the symbols were not always correct or complete.

Another factor is that there needs to be a way for braille transcribers to create tactile graphic

supplements to accompany math and science materials. Some of the other publishers had a platform and PDFs that could be accessed for UDL review, but many of the PDFs had accessibility issues such as improper tagging of headings, links, the table of contents, etc. Which made them difficult to access with a screen reader and braille display. Some had accessible platforms, but the student content could not be tested, just the educator on the backend.

It's important FIMC-VI have access to all student content to ensure accessibility with a screen reader and braille display. Math has traditionally been a difficult subject to create in an accessible format, especially in a braille format. However, in the last couple of years, publishers have gotten better at creating accessible content and the technology has improved to display math content.

PS/RtI TLC and FIMIC-VI look forward to seeing future improvements and to continue to be a part of the UDL Review team. In doing so, **would it be possible to have advanced knowledge of the upcoming bid review subject area for next year at an earlier date?** This will provide early notification for the VI team to test out the braille functionality and ensure our ability to include students in the review process.

Our hope is to increase fidelity and push the publishers to continue the great work while increasing access for all students. Other than the refreshable braille integration, we also found that publishers depended too much on outsourcing accessibility functionality. Many relied on the built-in features in iOS and Microsoft to check off their accessibility requirements - without understanding that many students are not equipped to access features if it is not already built into their published platforms. However, I believe with our targeted feedback; we stand to give publishers the opportunities for UDL integration to break down barriers.

We look forward to working with you in the future.

Best,
Evette Idehen

Sapling

<https://hs.saplinglearning.com/ibiscms/login/>

Instructions:

- 1) Go to the link above and enter in credentials
- 2) When you log in, you will see textbook titles listed. Click on the book title(s) you are reviewing to view that specific course page.
- 3) The left menu links to lists of all your activities, forums, resources and all housekeeping tools (grade book and course management)
- 4) The student edition ebook can be found on the right side -- click on the book's cover. The teacher ebook is in the center -- click on "Annotated Teacher's Edition" to see the full teacher's edition.
- 5) In the center, click on the word "student resources" with the link icon next to it to see the student resources. Click on "teacher's resources" -- this is where you can review the teacher materials that are part of the teacher package.
- 6) Scroll down and you will see pre-made homework. Click on any to see the problems. Click on the green box that says "student preview". You may need to also click on "clear attempts and launch" if another box pops up.
- 7) To learn more about accessing Sapling please read these instructions:

Subject: RE: DOE portal for district purchases
Attachment(s): "image001.png"

Hello,

Districts are required to report the materials used in their district to the department annually. We have recently rolled out an online system for this reporting (in previous years it was just done by email). As the system continues to grow, more ISBNs will be included. Districts do have the option to enter an ISBN not already pre-loaded in the system, so this district will be able to add you. This also means that you will show up for other districts and in the coming years.

Please do not worry. Any district that continues to have any issues inputting materials should email the department and we will be sure to add anything needed.

Thank you for your patience as we continue to grow this new system!

Subject: DOE portal for district purchases

Good afternoon Cathy!

Over the last couple of weeks we have had several school districts tell us about a DOE portal that they are to report their adoption decisions and what they plan to purchase. This is unfamiliar to our organization so I reached out to FSBD. They could not fully explain it, but did state they provided all the ISBNs for each publisher to the 'developer' so all of them could get uploaded in the system.

The districts that have contacted us stated that our ISBNs were not in the system and they had a deadline to enter them. I email you in hopes of gaining a bit more knowledge on this portal and if there is anything we can do on our end to ensure our product is loaded.

Thanks for your time!

Carey

Hi Amber

Thanks for getting back to me. Yes we have been able to enter the IM7 standards on all our bids except for Bid #604 Florida Magruders. When I clicked on the IM7 tab I received an error. See screenshot below. All the other tabs on this bid seem to be working.

**Thank you**

Subject: Re: FL Soc St - IM7 Question - Error on Portal

Hi Amber

Thanks for getting back to me. Yes we have been able to enter the IM7 standards on all our bids except for Bid #604 Florida Magruders. When I clicked on the IM7 tab I received an error. See screenshot below. All the other tabs on this bid seem to be working.

Hi Patti,

Can you please tell me a little bit more about this error? Have you successfully been able to upload other bids? Is it that you are unable to upload the standards alignment info for this bid? I can send this to our tech person, I just wanted to collect a little more information from you. We haven't had anyone else mention this error yet so I'm trying to figure out where it is coming from.

Thanks!

Hi Amber and Cathy,

The submission due date is fast approaching. Can you please help with my email below? We are still receiving the error message on the one bid entry. Its Bid #604.

Thanks for your assistance.

Thank you

Good morning,

These are the forms that need to be completed and submitted as part of the final bid submission. There will be a place in the online portal to upload. Explanation of the requirement is addressed in the Specifications.

Thanks Cathy for the quick reply!

Just so Grace and I are clear for our colleagues, if we submit for grades 6-8 and 9-12 core, we will have 7 text. So for each text we will complete/submit each form? 21 total, correct?

Thank!

Carey

Hi Cathy,

Hope 2022 is off to a great start for you.

We noticed on the state website the attached spreadsheets with newly released adoption requirements. Are these for Civics only or are these examples of what will be required for every grade level? We want to make sure we are on top of everything! Your help is appreciated.

Hi Cathy,  
Hope 2022 is off to a great start for you.  
We noticed on the state website the attached spreadsheets with newly released adoption requirements. Are these for Civics only or are these examples of what will be required for every grade level? We want to make sure we are on top of everything! Your help is appreciated.

Good morning,

These are the forms that need to be completed and submitted as part of the final bid submission. There will be a place in the online portal to upload. Explanation of the requirement is addressed in the Specifications.

**Subject:** RE: Florida Adoption Specification Spreadsheets

Oh, so sorry for last question. I know our editorial group will ask. Each sheet has one requirement, is this an example or will each sheet have more requirements once official Call is out? or is this the only requirement?

Thanks!

Thanks Cathy for the quick reply!

Just so Grace and I are clear for our colleagues, if we submit for grades 6-8 and 9-12 core, we will have 7 text. So for each text we will complete/submit each form? 21 total, correct?

Thank!

Carey

Yes. Each material/course is reviewed separately by individual reviewers and will need its own alignment to the requested information.

Thanks Cathy for the quick reply!

Just so Grace and I are clear for our colleagues, if we submit for grades 6-8 and 9-12 core, we will have 7 text. So for each text we will complete/submit each form? 21 total, correct?

Thank!

Carey

Hi Cathy,

Hope 2022 is off to a great start for you.

We noticed on the state website the attached spreadsheets with newly released adoption requirements. Are these for Civics only or are these examples of what will be required for every grade level? We want to make sure we are on top of everything! Your help is appreciated.

Hi LaKeesha,

I believe that Gavin or Cassie were in contact with this law firm and directed them to our website for all of the alignment scores. I believe that they were also working with IT to pull all of the emails from the other request that you emailed about:

We respectfully request all emails sent to, received from, cc:ed, or bcc:ed, between FLDOE (from February 1, 2022 until the present date) and any of the following email domains:

- [@savvas.com](mailto:@savvas.com)
- [@mheducation.com](mailto:@mheducation.com)
- [@mathnation.com](mailto:@mathnation.com)
- [@larsontexts.com](mailto:@larsontexts.com)
- [@cengage.com](mailto:@cengage.com)

This request includes a pre-authorization to incur costs, which will be reimbursed by the requestor, up to \$250, without any further written authorization necessary, and please contact the requestor immediately at [glanza@losey.law](mailto:glanza@losey.law) if prepayment is needed of costs up to \$250, and kindly include your preferred payment instructions. Records may be sent electronically via email to [glanza@losey.law](mailto:glanza@losey.law), paper copies are not needed.

If this isn't true, please let me know.

Thanks,

**From:** Norris, Jerri <jerri.norris@cengage.com>  
**Sent:** Tuesday, February 15, 2022 11:48 AM EST  
**To:** Mack; Henry  
**Subject:** Re: Follow-up from last week's meeting with Erin (TSG) and Jerri (Cengage)

Hi Chancellor Mack, good morning. I wanted to see if you might have time for our 2<sup>nd</sup> meeting sometime in early March to position for fall on textbook savings in WFD programs.

As we talked about in our Jan 10<sup>th</sup> meeting, no state tracking of textbook costs in WFD programs is occurring, and those costs can be quite high - over \$1000 in some cases. Also, there is very little if any OER available for WFD certificate programs. Here are a few examples of where the Cengage Unlimited subscription has provided significant savings for students:

### **St. Johns River State College, BAS Business Program**

Program Director Dr. Karen Balcanoff estimates that "each student is saving at least a couple hundred annually...and those going full time could be saving close to \$1,000" annually.

Contacts:

St. Johns River State College  
Dr. Karen Balcanoff, Director of Organizational Management  
[karenbalcanoff@sjrstate.edu](mailto:karenbalcanoff@sjrstate.edu)

Dr. Summer Garrett  
Professor of Organizational Management  
[summergarrett@sjrstate.edu](mailto:summergarrett@sjrstate.edu)

### **Florida Southwestern State College**

FSW began utilizing the Cengage Unlimited subscription model 2 years ago when it was released in a large required course, CGS1100 (Computing) which then allowed students free access to any other Cengage textbook in any other course using Cengage. Since then, they have pulled many other courses under the Cengage Unlimited model, saving students hundreds of dollars annually since they don't have to purchase course-by-course any longer.

Contact:  
Mary Myers, Dean  
School of Business & Technology  
[mary.myers@fsw.edu](mailto:mary.myers@fsw.edu)  
239.489.9405

### **Seminole State College Business and Information Management**

The program has steadily increased their use of the Cengage Unlimited subscription model to include many foundational courses, but also many smaller courses that typically carry high-priced materials. The Program Manager estimates students are saving hundreds of dollars annually, and he loves that all of the technology platforms are included for one set price but that students can get free print rentals also by just paying the \$7.95 shipping cost.

Contact:  
Bill Dafnis, Associate Professor and Program Manager, Business Administration  
[dafnisb@seminolestate.edu](mailto:dafnisb@seminolestate.edu)

### **Northwest Florida State College and Florida State College at Jacksonville**

These schools used CARES/GEER \$\$ to purchase Cengage Unlimited subscriptions in various programs covered under the GEER initiative. Carpentry, Plumbing and Health-related areas are where I believe they used the subscriptions.

**Subject:** Follow-up from last week's meeting with Erin (TSG) and Jerri (Cengage)

Good afternoon, Chancellor Mack:

The Cengage rep I think you may have been referring to when we met last week is Dan Cohen. Does that sound right? He is our Customer Success Manager for the Broward/Miami-Dade area, and he is amazing!

To answer the question you posed regarding a couple of data points for textbook costs/savings, I've listed a few quick examples of where students are saving considerable money by purchasing the Cengage Unlimited subscription instead of buying their books course-by-course. Obviously, the big schools such as MDC, BC, VC, HC and PBSC are where there are big numbers & significant savings across WFD certificate, non-credit and other programs. It's a matter of getting those program directors to pull together data from their instructors as to if they recommend the Cengage Unlimited subscription and how much those materials would have cost if the students had to purchase the items course-by-course. They all use a lot of Cengage.

Cengage is the leader in pre-professional, trades, skills, computing, HVAC, automotive, carpentry, plumbing, health-related fields, cybersecurity, broadband technologies use, criminal justice, health information management, medical billing/coding, early childhood and many other WFD-related programs in addition to our leading presence in the academic courses. Below are 3 contacts that I was able to reach out to & who have a strong handle on textbook affordability as well as savings realized via the Cengage Unlimited subscription model. These just happen to be in the area of business/computing, as they are usually the easiest to catch up with quickly.

#### **St. Johns River State College, BAS Business Program**

Program Director Dr. Karen Balcanoff estimates that "each student is saving at least a couple hundred annually...and those going full time could be saving close to \$1,000" annually.

Contacts:

St. Johns River State College

Thank you!

We are initiating a review right now, but notice an inconsistency with the previously posted matrix.

The attached feedback documents indicate inclusion of special topics in grade 2 while the matrix posted earlier this week indicates "Y" for inclusion of special topics in grade 1. Can we please get a quick clarification on this so we can direct our time and attention to the correct grade band?

Thank you.

Rachel

Good afternoon,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

**\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\***

Hi Kim,

Our content specialist, Courtney, has reviewed your edits for grade 8 and would like to discuss a couple of the remaining standards. Grade 1 has been approved, so we will only be discussing Grade 8. I've attached the spreadsheet with her comments for your review. I've scheduled a call for tomorrow at 10:00 am. Please see below for the meeting link.

McGraw Hill

Thu, May 19, 2022 10:00 AM - 10:30 AM (EDT)

**Please join my meeting from your computer, tablet or smartphone.**

Hi Kim,

It looks like we still need the PDF of lesson 8-4 to complete the review.

Thanks!

| 6  | Wondering: Lesson 4-5 has reference to Access points but 4-7 does not. Should both lessons reference AP? Additionally, these were not officially adopted until March so have these been updated to reflect any changes?                                                                            |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 7  | Alignment is fine; having to construct a scatter plot and then interpret it should be part of instruction as benchmarks are not taught in isolation.                                                                                                                                               |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 8  | What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade level.                                                                               |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 9  | What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade                                                                                      |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 10 | What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade                                                                                      |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 11 | What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade                                                                                      |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 12 | Lesson should include more examples on having students identify the transformation and should include more examples where not on the coordinate plane. Should there be AP referenced here like other lessons?                                                                                      | Lesson 8-4 was revised to focus on reflections, translations, and rotations not on the coordinate grid. The revisions include updates to instruction, examples, and exercises. | No expectation for students to determine congruence between figures as that is HS Geometry.                                                                   |   |  |
| 13 | Lesson should include more examples of dilations not on the coordinate plane. What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade level. | The TE for lesson 8-4 will be updated and placed in the flipbook.                                                                                                              | Alignment is fine to MA.8.GR.2.3 as long as there is another lesson with other transformations on the coordinate plane.                                       |   |  |
| 14 | Materials need to include examples of dilations not on the coordinate plane. What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade level.  | This benchmark alignment for this lesson was updated to MA.8.GR.2.2 since the content focuses on dilations on the coordinate grid.                                             |                                                                                                                                                               |   |  |
| 15 |                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                |                                                                                                                                                               |   |  |
| 16 |                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                |                                                                                                                                                               |   |  |

|    | A           | B | C                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | D                               |

| 17 | MA.8.GR.2.2 |   | 20' practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a Reviewer comment: "Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concepts. Excellent exposure and examples for the students who need enrichment."                                                                                                                                                                                                                                                                                                                                                                     | See revised 8-6 SE              |
| 18 |             |   | Lesson 8-5 was updated with revised instruction to help struggling students connect scale factor (learned in Grade 7) to dilation by looking at a non-geometric real world figures.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                 |
| 19 |             |   | All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a Reviewer comment: "Some of the problems in the practice for this benchmark are not aligned well or outside the limits/clarifications. There are not enough examples for the struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment. Application problems in section 8.1 practice are not at all connected to the benchmark;" Section 8-2 'Build Perseverance' problem is way outside the limits/clarifications for this benchmark." | <a href="#">link to 8-1 SE</a>  |
| 20 |             |   | Lesson 8-1 was updated with a revised Apply problem and corresponding practice exercises for stronger alignment to the benchmark.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |                                 |
| 21 |             |   | All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital formats. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALJKS, a <del>research-based, real-world, contextualized, individualized, and adaptive</del> benchmark-based, real-world, contextualized, individualized, and adaptive benchmark-based, real-world, contextualized, individualized, and adaptive                                                                                                                                                             | <a href="#">link to 8-1 TTE</a> |
| 22 |             |   | Lesson 8-2 was updated with a revised Build Perseverance exercise for a stronger alignment to the benchmark and clarifications.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <a href="#">link to 8-2 SE</a>  |
| 23 |             |   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | <a href="#">link to 8-2 TTE</a> |
| 24 |             |   | Reviewer comment: "Did not see explicit reference to order of operations. Did not see many examples where students were asked to solve multi-step mathematical and real-world problems involving the order of operations with rational numbers including exponents and radicals."                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | <a href="#">link to 2-1 SE</a>  |
| 25 |             |   | Lesson 2-1 was updated with two revised examples: one that includes instruction for order of operations and a second that provides instruction on solving multi-step real-world problems involving the order of operations.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | <a href="#">link to 2-1 TTE</a> |

Hi Kim,

Our content specialist, Courtney, has reviewed your edits for grade 8 and would like to discuss a couple of the remaining standards. Grade 1 has been approved, so we will only be discussing Grade 8. I've attached the spreadsheet with her comments for your review. I've scheduled a call for tomorrow at 10:00 am. Please see below for the meeting link.

McGraw Hill  
Thu, May 19, 2022 10:00 AM - 10:30 AM (EDT)

**Please join my meeting from your computer, tablet or smartphone.**

<https://meet.goto.com/127887461>

**You can also dial in using your phone.**

United States (Toll Free): [1 877 309 2073](tel:18773092073)

United States: [+1 \(646\) 749-3129](tel:+16467493129)

**Access Code:** 127-887-461

**Join from a video-conferencing room or system.**

Dial in or type: 67.217.95.2 or inroomlink.goto.com

Meeting ID: 127 887 461

Or dial directly: 127887461@67.217.95.2 or 67.217.95.2##127887461

In all of BEST resources, refers to horizontal alignment within same grade                                                                                      |                                                                                                                                                                                                      |                                                                                                                                                              |   |
| 11 | What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade                                                                                      |                                                                                                                                                                                                      |                                                                                                                                                              |   |
| 12 | Lesson should include more examples on having students identify the transformation and should include more examples where not on the coordinate plane. Should there be AP referenced here like other lessons?                                                                                      | Lesson 8-4 was revised to focus on reflections, translations, and rotations not on the coordinate grid. The revisions include updates to instruction, examples, and exercises.                       | No expectation for students to determine congruence between figures as that is HS Geometry.                                                                  |   |
| 13 | Lesson should include more examples of dilations not on the coordinate plane. What is intent of "connecting benchmark"? In this case, since it refers to grade 7 benchmark, it would seem as vertical alignment. In all of BEST resources, refers to horizontal alignment within same grade level. | The TE for lesson 8-4 will be updated and placed in the flipbook. This benchmark alignment for this lesson was updated to MA.8.GR.2.2 since the content focuses on dilations on the coordinate grid. | Alignment is fine to MA.8.GR.2.3 as long as there is another lesson with other transformations on the coordinate plane.                                      |   |
| 14 |                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                      |                                                                                                                                                              |   |

Hi Amber,

Thank you for bringing this to my attention. The PDF for lesson 8-4 is attached.

Regards,

Kim

Hi Kim,

It looks like we still need the PDF of lesson 8-4 to complete the review.

Thanks!

Watch the video to learn about some properties of reflections.

The video shows how to reflect a triangle using tracing paper.

**Step 1** Draw  $\triangle ABC$  on tracing paper. Draw a dotted line (the line of reflection) on the paper as shown.

**Step 2** Fold the paper along the dotted line. Trace the triangle onto the folded portion of the tracing paper. Unfold and label the vertices  $A'$ ,  $B'$ , and  $C'$ .

Use a ruler to measure side  $AB$  and side  $A'B'$ . Use a protractor to measure  $\angle C$  and  $\angle C'$ . Did the size of the triangle change after the reflection? \_\_\_\_\_

So, the reflection of the figure does not change its shape or size.

Watch the video to learn about some properties of rotations.

The video shows how to rotate a parallelogram using tracing paper.

**Step 1** Place a piece of tracing paper over parallelogram  $WXYZ$  shown. Copy the parallelogram. Trace points  $A$ ,  $B$ ,  $C$ , and  $\overrightarrow{AB}$ .

**Step 2** Place the eraser end of your pencil on point  $A$ . Turn the tracing paper to the right until  $\overrightarrow{AB}$  passes through point  $C$ .

Use a ruler to measure side  $WX$  and its corresponding side on the image. Use a protractor to measure  $\angle Y$  and its corresponding angle on the image. Did the size of the parallelogram change after the rotation? \_\_\_\_\_

So, the rotation of the figure does not change its shape or size.

You can show two figures are **congruent** if the second can be obtained from the first by a rotation, reflection, or a translation.

## Learn Identify Transformations

The order in which the vertices of a figure are named determines the figure's orientation. In the reflection shown, the vertices of the preimage are named in a clockwise direction, but the vertices of the image are named in a counterclockwise direction. The orientation has been reversed.

If you have two congruent figures, you can determine the transformation that maps one figure onto the other by analyzing the orientation of the figures.

| Translation                                                                                           | Reflection                                                                                            |
|-------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>length is the same</li> <li>orientation is the same</li> </ul> | <ul style="list-style-type: none"> <li>length is the same</li> <li>orientation is reversed</li> </ul> |
|                                                                                                       |                                                                                                       |
| Rotation                                                                                              |                                                                                                       |
| <ul style="list-style-type: none"> <li>length is the same</li> <li>orientation is the same</li> </ul> |                                                                                                       |
|                                                                                                       |                                                                                                       |

(continued on next page)

You can use transformations to determine if  $\triangle DEF$  is congruent to  $\triangle GHI$ .

**Talk About It!**

Why do translations, reflections, and rotations preserve congruence?

First, determine if the lengths are the same. By using a ruler to measure the sides of each triangle, we can determine that  $DE$  is the same length as  $GH$ ,  $EF$  is the same length as  $HI$ , and  $FD$  is the same length as  $IG$ .

The triangles are named in alphabetical order. To determine orientation, make sure that the vertices are labeled in the same direction. Because  $\triangle DEF$  and  $\triangle GHI$  are both labeled in a clockwise direction, the orientation is the same.

The orientation is the same, so the transformation is either a translation or a rotation.

Because the figure appears to be turned, we can check to see if a rotation was used.

So, the triangles are congruent because  $\triangle DEF$  can be mapped onto  $\triangle GHI$  using a clockwise rotation so of  $270^\circ$ .

Copyright © McGraw Hill

**Think About It!**

Do the trapezoids appear congruent? Why or why not?

### Example 2 Determine Congruence

Are the two figures congruent? If so, describe which transformation maps trapezoid  $EFGH$  onto trapezoid  $IJKL$ . If not, explain why they are not congruent.

**Part A** Determine if the two figures are congruent by using transformations.

Are the lengths the same?

Is the orientation the same?

Because the lengths are not the same, the figures are not congruent. You can verify this by performing a transformation. The figure appears to be translated. Translate trapezoid  $EFGH$  up and to the right so that point  $H$  is mapped onto point  $L$ .

**Part B** Describe the transformation.

After a translation up and to the right, trapezoid  $E'F'G'H'$  does not match  $IJKL$  exactly. So, no transformation maps trapezoid  $EFGH$  onto  $IJKL$  and the two figures are not congruent.

### Check

Are the two figures congruent? If so, describe a sequence of transformations that maps Figure A onto Figure B. If not, explain why they are not congruent.

**Part A** Determine if the figures are congruent.

**Part B** If the figures are congruent, describe a transformation that maps Figure A onto Figure B. If the figures are not congruent, explain why they are not congruent.

## Apply

7. Triangle  $G'HJ'$  is congruent to triangle  $G'HJ$ . What is a possible sequence of transformations that could have been used to create  $\triangle G'HJ'$  from  $\triangle G'HJ$ ?

8. **BUILD PERSEVERANCE** In some cases, a sequence of transformations is the same as a single transformation. Triangle  $ABC$  is reflected across a vertical line, and then reflected across a horizontal line. Is there a single transformation that would map  $\triangle ABC$  onto  $\triangle A''B''C''$ ? Write an argument that can be used to defend your solution.

9. A student concluded that trapezoid  $ABCD$  is congruent to trapezoid  $EFGH$  because a reflection across a vertical line followed by a translation down maps trapezoid  $ABCD$  onto trapezoid  $EFGH$ . Find the student's mistake and correct it.

10. **CREATE** Design a logo for a club at your school, using translations, reflections, and/or rotations. Then explain to a classmate how your logo uses congruent figures.

Hi Tavi,

In preparation for today's meeting I'm sharing the spreadsheets that we will be discussing. Please note that the focus of the meeting will be on standards alignment with our math content specialists.

We are looking forward to working with you.

Thank you,

Amber Baumbach

**This message originated from outside your organization**

Hi Tavi,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Tuesday, April 26<sup>th</sup>, at 11:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time HMH has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Tuesday.

| 4 | n/a                                                                                                                                                                                                                                                                             | n/a                                      | <p><b>HMH Overall Response:</b> After collecting and analyzing all the scores provided by the reviewers on Grade 1, we believe there was an error in calculations with the scores and that this grade did in fact score a 4. Nonetheless, we have provided responses to any standards where at least one reviewer scored us a 3 or below.</p> <p>Reviewer 1 rates us a 5 here and indicates that " Items focus on true and false. There is a mix of operations being related on both sides of the question as well as opportunities for multiple addends.</p> <p>Reviewer 2s, on the other hand, states that there were too many terms in the equations. They indicated that "The Listen and Draw on p.477, #13 on p.480, and #7 on 481 contain 5 terms, which does not align to the standard and clarifications."</p> <p>HMH Response: There are no more than 3 terms used on one side of an equation. On p. 477; p. 480 and 481 each have only a single equation that shows two terms on one side of the equation and three terms on the other.</p> <p>Additionally, Reviewer 2 wrote that the lesson does "not focus on the meaning of the equal sign."</p> <p>HMH Response: The Math Talk on p. 477 addresses the meaning of the equal sign.</p> |   |   |   | Lesson 10.8<br><a href="https://www.relation_id="></a>                                                                                                                                   |
| 5 | MA.1.AR.2.2<br>Determine and explain if equations involving addition or subtraction are true or false.                                                                                                                                                                          | n/a                                      | <p>Reviewer 2 writes that Clarification 1 calls for students to use "tally marks to skip counting by 5's."</p> <p>HMH Response: Clarification 1 states that students should connect tally marks to counting by 5s, but does not state the expectation that students should skip count tally marks.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |   |   |   | Lesson 16.3.<br>Lesson 16.4.<br><a href="https://www.4701-822a-a">https://www.4701-822a-a</a>                                                                                            |

| 8  | <p>MA.1.GR.1.2</p> <p>Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.</p>                                                                                                           | n/a | <p>Reviewer 1 states there are limited examples of sketching 2-D figures.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |   | <p>HMH Response: This is covered on pp.539-540, which has a table where students identify, draw, and give attributes of the shapes. Additionally, on p.521-526, students draw and identify two-dimensional shapes that compose three-dimensional shapes.</p> <p>Reviewer 2 states that "P-521-526 do not align with the standard at all. It is only 2d shapes based on their attributes, not the attributes of a 3D shape."</p> <p>HMH Response: Attributes of 3-D shapes include 2-D shapes, which are included in Lesson 11.5, pp. 521-526. Classifying two- and three-dimensional shapes are found in Lesson 11.1, 11.5, 12.1, and 12.5.</p>                              | <p>Lesson 12.2<br/> <a href="http://www.hmhco.com/Dimensional">www.hmhco.com/Dimensional</a></p> <p>Lesson 11.4<br/> <a href="https://www.hmhco.com/Dimensional">https://www.hmhco.com/Dimensional</a></p>            |
| 9  | <p>MA.1.GR.1.3</p> <p>Compose and decompose two- and three- dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.</p>                                        | n/a | <p>Reviewer 2 states Lesson 12.5 uses fourths instead of semi-circles.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   | <p>HMH Response: The example mentioned uses two quarter circles to make a half circle, which is then composed to make other shapes.</p> <p>Additionally, reviewer 2 writes "There are some good examples of composing and decomposing 2d and 3d shapes . . . it is lacking the much needed vocabulary."</p> <p>HMH Reponse: From a standards perspective, using academic language and vocabulary is not mentioned.</p>                                                                                                                                                                                                                                                       | <p>Lesson 12.5<br/> <a href="http://www.hmhco.com/Dimensional">www.hmhco.com/Dimensional</a></p>                                                                                                                      |
| 10 | <p>MA.1.GR.1.4</p> <p>Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders.</p> | n/a | <p>Reviewer 1 states that "While there are many examples of real- world objects for stand alone figures (balls, cones, cans, etc.), there are only a few real-world examples of items with multiple identifiable geometric figures . . . In most other examples, they are identifying the geometric figures in composed shapes."</p> <p>HMH Response: The composite figures were included; however because of their age appropriateness for Grade 1 students. The approach also meets the standard as it is written.</p>                                                                                                                                                     |   | <p>Reviewer 1 gave us a positive score of 5--a difference of 3 points from Reviewer 2. This reviewer specifically said "Items align to the standard for estimation."</p> <p>Reviewer 2, on the other hand, states that "The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters."</p> <p>HMH Response: The standard is written as follows "Measure the length of an object to the nearest inch <u>or</u> centimeter" so the content as presented meets the standards as they are written.</p> <p>Additionally, reviewer 2 was concerned that non-standard units are used for estimating.</p> | <p>Lesson 11.2<br/> <a href="https://www.hmhco.com/Dimensional">https://www.hmhco.com/Dimensional</a></p>                                                                                                             |
| 11 | <p>MA.1.M.1.1</p> <p>Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.</p>                                                                                                                      | n/a | <p>Reviewer 1 gave us a positive score of 5--a difference of 3 points from Reviewer 2. This reviewer specifically said "Items align to the standard for estimation."</p> <p>Reviewer 2, on the other hand, states that "The clarifications were clear that students would be estimating with inches. Chapter 14 Lesson 3 focuses on estimating with centimeters."</p> <p>HMH Response: The standard is written as follows "Measure the length of an object to the nearest inch <u>or</u> centimeter" so the content as presented meets the standards as they are written.</p> <p>Additionally, reviewer 2 was concerned that non-standard units are used for estimating.</p> |   | <p>HMH Response: The tiles and cubes used for measurement are not non-standard units of measure; the tiles are specified to be 1-inch and the unit cubes are 1 cm; this builds an understanding of the connection between counting and then adding units to measurement. Given how this benchmark and the clarifications, we believe this standard is completely met.</p>                                                                                                                                                                                                                                                                                                    | <p>Lessons 14.1<br/> <a href="https://www.hmhco.com/Dimensional">https://www.hmhco.com/Dimensional</a></p> <p>Lessons 14.2<br/> <a href="https://www.hmhco.com/Dimensional">https://www.hmhco.com/Dimensional</a></p> |

| 12 | <p>MA.1.M.1.2</p> <p>Compare and order the length of up to three objects using direct and indirect comparison.</p>                                                                                                           | n/a | <p>Reviewer 1 gave us a positive score of 5 (a disparity of 3 points with reviewer 2) and stated "Opportunities for 3 items compared directly and also for indirect comparison."</p> <p>Reviewer 2, on the other hand, states that "Chapter 14 Lesson 3 does not align as it discusses estimating measurement instead of comparing objects in specific units."</p> <p>HMH Response: Students use comparisons of longer or shorter objects so that they can estimate their lengths. More specifically, in 14.5 students compare objects to order them, as stated by the standard.</p> |   |   | <p>Lesson 14.3<br/> <a href="https://www.c311-4a93-8">https://www.c311-4a93-8</a></p>                                                                                       |
| 13 | <p>MA.1.M.2.1</p> <p>Using analog and digital clocks, tell and write time in hours and half-hours.</p>                                                                                                                       | n/a | <p>Reviewer 2 states that "there is no discussion or use of the vocabulary for digital and analog" within the lessons 15.1-15.4.</p> <p>HMH Response: The benchmark specifies only that students write and tell time and not that they use specified vocabulary. Clocks divided into semicircles is shown in Lesson 15.3.</p>                                                                                                                                                                                                                                                        |   |   | <p>Lessons 15.1-15.4<br/> <a href="https://www.4https://www.b8ed-8b01a">https://www.4https://www.b8ed-8b01a</a></p>                                                         |
| 14 | <p>MA.1.M.2.2</p> <p>Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.</p>                                                             | n/a | <p>Reviewer 1 states that students count but do not simply identify coins--that the resources should "provide images of both sides of coins."</p> <p>HMH Response: Identification of the coin is necessary to count them. This is why both sides of the coin are used throughout this chapter in order to reinforce their ability to identify and count coins.</p>                                                                                                                                                                                                                   |   |   | <p>Lesson 9.1-9.4<br/> <a href="https://www.a66d-71cf45">https://www.a66d-71cf45</a></p>                                                                                    |
| 15 | <p>MA.1.M.2.3</p> <p>Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.</p> | n/a | <p>Reviewer 1 wrote that the benchmark indicates students should "Find the value of combinations of pennies, nickels and dimes up to one dollar."</p> <p>HMH Response: In the Ready for More on Lesson 9.4, p. 412, the TE guide includes direction on how to guide students to find different ways to make 100 cents. This omission was caught by the internal team and was corrected for implementation.</p>                                                                                                                                                                       |   |   | <p>Lesson 9.3,<br/> <a href="https://www.a66d-71cf45">https://www.a66d-71cf45</a></p> <p>Lesson 9.4,<br/> <a href="https://www.4407-a901-d">https://www.4407-a901-d</a></p> |
| 16 | <p>MA.1.NSO.1.2</p> <p>Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.</p>                                              | n/a | <p>Reviewer 2 stated that "Most of the examples for expanded form was based on ___tens + ___ones when it should be the actual number made by the tens plus the ones (for example 70+5)."</p> <p>HMH Response: There are two places where this is covered in the content --both Lessons 2.5 and 2.9. It shows that students write numbers in 3 forms, ex., 4 tens + 7 ones, 40 + 7, and 47.</p>                                                                                                                                                                                       |   |   | <p>Lesson 2.5,<br/> <a href="https://www.fef0597-808">https://www.fef0597-808</a></p>                                                                                       |
