| 71 | <p>22. pg. 380.<br/>#72 question is about a male drafted by military with gender bias. Emphasis does not portray gender fairness, advocacy, and is biased.</p>               | <p>72. It was wartime when the Ricardos found out Mrs. Ricardo was pregnant. Ricky Ricardo was drafted and made out a will, deciding that \$14,000 in a savings account was to be divided between his wife and his child-to-be. Rather strangely, and certainly with gender bias, Ricky stipulated that if the child were a boy, he would get twice the amount of the mother's portion. If it were a girl, the mother would get twice the amount the girl was to receive. We'll never know what Ricky was thinking of, for (as fate would have it) he did not return from the war. Mrs. Ricardo gave birth to twins—a boy and a girl. How was the money divided?</p> |   |   |
| 72 | <p>23. pg. 437, questions regarding women losing \$435, 049 due to pay gap. Source is Time Magazine. Emphasis does not portray gender fairness, advocacy, and is biased.</p> | <p>The Pay Gap. How wide is the chasm between what men and women earn in the workplace? According to a 2015 analysis from the National Women's Law Center, women lose \$435,049 over the course of a career because of the pay gap. The bar graph shows the average earnings in the United States for men and women at ages 22 and 52.</p>  <p>Graphs of Models for the Data</p>                                                                                                                                                                                                   |   |   |
| 73 | <p>24. Pg. 714, #61 mentions anti-semitic joke. Does not portray multicultural fairness and advocacy.</p>                                                                    | <p>Same as #18</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |   |   |

**Attachment(s):** "Tracking Spreadsheet.xlsx", "image001.png"

Updated spreadsheet with Big Ideas and Math Nation's official appeals.

We currently have six appeals. Amber is scheduling the initial calls for Monday. J

Thanks!

**Subject:** IM Appeals-Tracking

Hi Jim,

I have attached the tracking spreadsheet for appeals. Any issues with special topics are pasted on each publishers tab. All standards alignment issues are separate pdf's with reviewer evaluations.

Let me know if you need anything else!

| 11    | <p>1. Appendix B, B.1 exercises, #11 About percentage of individuals living below poverty line in 2016. Content not meaningful to students.</p> | <p><b>11. Demographic Data</b> The list shows the percentages of individuals living below the poverty level in the 50 states in 2016. Use a frequency distribution and <i>Normal Probability Plots</i> (Appendix D.5, <i>Graphing Technology</i>) to determine if the data are normally distributed.</p> <p><b>DATA</b></p> <table border="1"> <tr><td>AK</td><td>10.9</td><td>AL</td><td>16.3</td><td>AR</td><td>16.1</td><td>AZ</td><td>16.6</td></tr> <tr><td>CA</td><td>11.9</td><td>CO</td><td>10.8</td><td>CT</td><td>10.1</td><td>DE</td><td>10.1</td></tr> <tr><td>HI</td><td>11.7</td><td>FL</td><td>12.7</td><td>GA</td><td>12.7</td><td>IA</td><td>12.7</td></tr> <tr><td>IL</td><td>12.5</td><td>IN</td><td>10.4</td><td>KS</td><td>12.7</td><td>KY</td><td>12.7</td></tr> <tr><td>ME</td><td>12.4</td><td>MA</td><td>11.9</td><td>LA</td><td>12.4</td><td>MO</td><td>11.4</td></tr> <tr><td>MS</td><td>20.1</td><td>MD</td><td>11.8</td><td>MT</td><td>11.8</td><td>ND</td><td>10.9</td></tr> <tr><td>NC</td><td>11.5</td><td>NE</td><td>13.0</td><td>NH</td><td>11.6</td><td>NM</td><td>10.9</td></tr> <tr><td>OK</td><td>11.5</td><td>NY</td><td>11.7</td><td>RI</td><td>11.6</td><td>OH</td><td>14.4</td></tr> <tr><td>OR</td><td>11.5</td><td>SC</td><td>14.7</td><td>SD</td><td>11.6</td><td>OK</td><td>14.4</td></tr> <tr><td>VA</td><td>11.3</td><td>VT</td><td>10.3</td><td>WA</td><td>11.3</td><td>WV</td><td>14.3</td></tr> <tr><td>WA</td><td>10.3</td><td>WY</td><td>10.3</td><td>WI</td><td>11.1</td><td>WY</td><td>11.1</td></tr> </table> | AK   | 10.9 | AL   | 16.3 | AR   | 16.1 | AZ | 16.6 | CA | 11.9 | CO | 10.8 | CT | 10.1 | DE | 10.1 | HI | 11.7 | FL | 12.7 | GA | 12.7 | IA | 12.7 | IL | 12.5 | IN | 10.4 | KS | 12.7 | KY | 12.7 | ME | 12.4 | MA | 11.9 | LA | 12.4 | MO | 11.4 | MS | 20.1 | MD | 11.8 | MT | 11.8 | ND | 10.9 | NC | 11.5 | NE | 13.0 | NH | 11.6 | NM | 10.9 | OK | 11.5 | NY | 11.7 | RI | 11.6 | OH | 14.4 | OR | 11.5 | SC | 14.7 | SD | 11.6 | OK | 14.4 | VA | 11.3 | VT | 10.3 | WA | 11.3 | WV | 14.3 | WA | 10.3 | WY | 10.3 | WI | 11.1 | WY | 11.1 |

| 12    | <p>2. Chapter 3 Example 5 is about the spread of a “contagious flu virus” that a student spreads.</p>                                           | <p><b>EXAMPLE 5</b> Spread of a Virus. A student returns from vacation with a contagious flu virus. The spread of the virus is modeled by</p> $y = \frac{1}{1 + 4000e^{-0.0001x}}$ <p>where <math>x</math> is the number of days since the student returned and <math>y</math> is the number of students who have contracted the virus. The spread of the virus is modeled by</p> $y = \frac{1}{1 + 4000e^{-0.0001x}}$ <p>where <math>x</math> is the number of days since the student returned and <math>y</math> is the number of students who have contracted the virus.</p> <p><b>Graphical Solution</b></p> <p>Use the graphing utility to graph the function <math>y = \frac{1}{1 + 4000e^{-0.0001x}}</math> for <math>0 \leq x \leq 50</math>. The graph shows that the number of students who have contracted the virus approaches 1 as <math>x</math> increases.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |      |      |      |      |      |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |

| 21 | Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 2                                           | I found several places where CRT could be said to be present, albeit usually indirectly. (All page numbers are from the teacher version). On page 1, the books says that algebra is a language that describes the world and tells us about things including 'racial bias'. (It also says it will cover 'ethnic diversity in the US', which it uses in a practice problem on page 91, but the example seems relatively harmless). On page 51, the book defines polynomials by the example of an "implicit" racial bias test (called Project Implicit) by which "2 million people have tested their racial prejudice... most groups' average scores fall between 'slight' and 'moderate' bias, but the differences among age groups are intriguing." The exercise problem is on page 61. The numbers come from Project Implicit, a real-world organization whose mission is to educate people that people and institutions unconsciously have implicit racial prejudice. On pages 214-215, problem 103 graphs people who support laws against interracial marriage by decade. However, unrelated to the graphs, the problem goes out of its way to mention the Supreme Court decision on same-sex marriage, making an analogy that opposing the legalization of same-sex marriage is like the opposition to interracial marriage. In another odd example, on page 533 problem 51 asks students to graph "Percentage who don't approve of Marriage |                      |   |

Subject is melancholy and based on something predicted in the 1700s.</p>                 | <p>Thomas Malthus on Population Growth</p> <p>In the late 1700s, the British economist Thomas Malthus presented a report that criticized those who thought that life was going to continue to improve for humans. Malthus put his report together quickly and titled it <i>An Essay on the Principle of Population as it Affects the Human Species</i>. Malthus argued that because the human population tends to increase geometrically (1, 2, 4, 16, and so on) and that food supplies will increase arithmetically (1, 2, 3, 4, and so on), populations will eventually outstrip the food supply. Malthus suggested that there are other checks on population growth (and he considered these natural and a good thing). Nonetheless, he was convinced that poverty is inevitable and will continue.</p> <p>Malthus used historical data to suggest that population growth has been doubling every twenty-five years. Malthus (who lived in the early 18th century) also surmised that the youth of the country along with the vast amount of areas conducive to farming would lead to a birth rate that exceeded most countries in the world.</p> <p>On the other hand, he noted that there are other checks on population growth. On the one hand, he called preventative checks, these are checks that increase the death rate. Positive checks include war, famine, and natural disasters. Malthus believed that fear of famine was a major reason the birth rate may decrease. After all, who would want to have a child knowing the child may suffer from hunger, or worse, starvation?</p>  | <p>equity by generation along with teenage who won't try sum... write 11m not sure this specifically applies to critical race theory, because it involves LGBTQ military servicemembers. | <p>R210 States that most people have slight or moderate bias and this is dependent on age and political identification. Emphasis that racism is embedded in American society.</p>               | <p style="text-align: center;"><b>Adding and Subtracting Polynomials</b></p>  <p>What? Me? Racist? More than 2 million people have tested their racial prejudice using an online version of the Implicit Association Test. Most groups' average scores fall between "slight" and "moderate" bias, but the differences among groups, by age and by political identification, are intriguing.</p> <p>In this section's Exercise Set (Exercises 103 and 104), you will be working with models that measure bias:</p> $S = 0.3x^3 - 2.8x^2 + 6.7x + 30$ $S = -0.03x^3 + 0.2x^2 + 2.3x + 24.$                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |
| <p>Pg. 48 again mentions the implicit association test and says, "most groups' average scores fall between slight and moderate bias. Emphasis that racism is embedded in American society."</p> | <p style="text-align: center;"><b>How We Define Polynomials</b></p> <p>More than 2 million people have tested their racial prejudice using an online version of the Implicit Association Test. Most groups' average scores fall between "slight" and "moderate" bias, but the differences among age groups are intriguing.</p> <p>In this section's Exercise Set (Exercises 91 and 92), you will be working with a model that measures bias:</p> $S = 0.3x^3 - 2.8x^2 + 6.7x + 30.$ <p>In this model, <math>S</math> represents the score on the Implicit Association Test. (Higher scores indicate stronger bias.) The variable <math>x</math> represents age group.</p>  <p style="text-align: center;"><i>Old Dog ... New Chicks</i></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |   |   |
| <p>9. chapter 1 intro uses 2006 <i>An Inconvenient Truth</i> by Al Gore to push that humans cause global warming. Article is 15 yrs old and has been proven inaccurate</p>                      | <p>There is strong scientific consensus that human activities are changing the Earth's climate. Scientists now believe that there is a striking correlation between atmospheric carbon dioxide concentration and global temperature. As both of these variables increase at significant rates, there are warnings of a planetary emergency that threatens to condemn coming generations to a catastrophically diminished future.</p> <p>In this chapter, you'll learn to approach our climate crisis mathematically by creating formulas, called functions, that model data for average global temperature and carbon dioxide concentration over time. Understanding the concept of a function will give you a new perspective on many situations ranging from climate change to using mathematics in a way that is similar to making a movie.</p> <p><small>*Source: Al Gore, <i>An Inconvenient Truth</i>, Rodale, 2006; Time, April 3, 2006; <i>Falling Storm</i>, September 28, 2013</small></p> <div style="border: 1px solid black; padding: 5px; margin-top: 10px;"> <p><b>Here's where you'll find these applications:</b></p> <p>A mathematical model involving global warming is developed in Example 9 in Section 1.4. Using mathematics in a way that is similar to making a movie is discussed in the Blitzzer Bonus on page 225.</p> </div> |   |   |
| <p>Pg. 156 Talks about probability of divorce. Context not relevant or meaningful.</p>                                                                                                          | <p style="text-align: center;"><b>EXERCISES</b> <b>Modeling Atmospheric and Sea Level Temperature</b></p> <p><b>1. DATA</b> The following table shows the average annual temperature in degrees Fahrenheit for the city of San Francisco from 1990 to 2010. The data is modeled by the function <math>T(x) = 0.0001x^3 - 0.0012x^2 + 0.0023x + 54.5</math>, where <math>T(x)</math> is the average annual temperature in degrees Fahrenheit and <math>x</math> is the number of years since 1990.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |   |   |

| <p>Page 337 Pushes vaccine as the only way to stop coronavirus from 2020. Content not relevant or meaningful to students as many have a religious or moral belief against vaccines.</p>  | <p>In 2020, our lives were upended with a sense of uncertainty about the future. The coronavirus, the COVID-19 pandemic, has affected millions of Americans, resulting in the loss of lives and livelihoods. As of this writing, the pandemic is far from under control, with experts predicting that between 70% and 90% of the U.S. population could be infected. Figure 2.12 shows the number of new coronavirus cases for seven selected days in 2020.</p> <p>Source: Center for Disease Control</p>                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |
| <p>15. Pg. R435, ch. 6 intro mentions gender imbalance and sexual abstinence among young adults. Emphasis does not portray gender fairness, advocacy and is biased.</p>                  | <p><b>A</b>s our intellects develop, we learn to reverse the direction of our thinking. Reversibility of thought is found throughout arithmetic and algebra: addition is reversed by subtraction; multiplication is reversed by division; multiplying polynomials is reversed by factoring. In this chapter, we reverse the process of raising a number to an <math>n</math>th power by finding an <math>n</math>th root. Models with roots describe an array of unique applications, including gender imbalance on campus, the percentage of full-time college students with jobs, marriage discrimination, sexual abstinence among young adults, and the pay gap between men's and women's earnings.</p> |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   |
| <p>R1, Ch. 1 intro mentions college gender imbalance and gender divide in salaries for college graduates. Emphasis does not portray gender fairness, gender advocacy, and is biased.</p> | <p><b>Here's where you'll find these applications:</b></p> <ul style="list-style-type: none"> <li>• We revisit the issue of gender imbalance on college campuses in Example 4 of Section 9.5.</li> <li>• The percentage of full-time college students with jobs is modeled in Exercises 95–91.</li> <li>• The pay gap is modeled in the Blitzzer Bonus on pages R466–R467.</li> <li>• A model related to marriage discrimination is developed in Exercises 59–60 of Exercise Set 9.5.</li> <li>• Sexual abstinence among young people is the application for the model in Example 4 of Section 9.5.</li> </ul>                                                                                             | <p><b>Variables, Real Numbers, and Mathematical Models</b></p> <p><b>W</b>hat can algebra possibly tell me about the rising cost of movie ticket prices over the years?</p> <ul style="list-style-type: none"> <li>• how I can stretch or shrink my lifespan?</li> <li>• the widening imbalance between numbers of women and men on college campuses?</li> <li>• the widening imbalance between salaries of male and female college graduates?</li> <li>• the widening imbalance between salaries of male and female college graduates?</li> </ul> <p>In this chapter, you will learn how the special language of algebra describes your world.</p> |   |

 | 40 | <p>R439 – Gender imbalance on US college campuses. Emphasis does not portray gender fairness, gender advocacy, and is biased.</p>                   | <p>Can you see that the percentage of degrees awarded to women is slowing down for the period shown? Based on the shape of the graph of <math>y = \sqrt{x}</math>, square roots can be used to model the data.</p> <p><b>EXAMPLE 4</b><br/>A Matter of Degree: Modeling Gender Imbalance on U.S. College Campuses</p> <p>The mathematical model</p> $P = 2.2\sqrt{T} + 45$ <p>describes the percentage of bachelor's degrees, <math>P</math>, awarded to women in U.S. colleges 7 years after 1975. Use the formula to find the percentage, to the nearest percent, of degrees awarded to women in 2015.</p> |   | <p>7. Page 828, section 12.6. Lesson talks about the relationship between education and prejudice. No source for the data, no explanation of type of prejudice.</p>                           | <p><b>Scatter Plots and Correlation</b></p> <p>Is there a relationship between education and prejudice? With increased education, does a person’s level of prejudice tend to decrease? Notice that we are interested in two quantities—years of education and level of prejudice. For each person in our sample, we will record the number of years of school completed and the score on a test measuring prejudice. Higher scores on this 1-10 test indicate greater prejudice. Using <math>x</math> to represent years of education and <math>y</math> to represent scores on a test measuring prejudice, <b>Table 12.17</b> shows these two quantities for a random sample of ten people.</p> <p><b>TABLE 12.17</b> Recording Two Quantities in a Sample of Ten People</p> <table border="1"> <thead> <tr> <th>Respondent</th> <th>A</th> <th>B</th> <th>C</th> <th>D</th> <th>E</th> <th>F</th> <th>G</th> <th>H</th> <th>I</th> <th>J</th> </tr> </thead> <tbody> <tr> <td>Years of education (<math>x</math>)</td> <td>12</td> <td>5</td> <td>14</td> <td>13</td> <td>8</td> <td>10</td> <td>16</td> <td>11</td> <td>12</td> <td>4</td> </tr> <tr> <td>Score on prejudice test (<math>y</math>)</td> <td>1</td> <td>7</td> <td>2</td> <td>3</td> <td>5</td> <td>4</td> <td>1</td> <td>2</td> <td>3</td> <td>10</td> </tr> </tbody> </table> | Respondent | A  | B  | C | D  | E  | F  | G  | H  | I | J | Years of education ( $x$ ) | 12 | 5 | 14 | 13 | 8 | 10 | 16 | 11 | 12 | 4 | Score on prejudice test ( $y$ ) | 1 | 7 | 2 | 3 | 5 | 4 | 1 | 2 | 3 | 10 |  |  |

| 71 | <p>22. pg. 380.<br/>#72 question is about a male drafted by military with gender bias. Emphasis does not portray gender fairness, advocacy, and is biased.</p>               | <p>72. It was wartime when the Ricardos found out Mrs. Ricardo was pregnant. Ricky Ricardo was drafted and made out a will, deciding that \$14,000 in a savings account was to be divided between his wife and his child-to-be. Rather strangely, and certainly with gender bias, Ricky stipulated that if the child were a boy, he would get twice the amount of the mother's portion. If it were a girl, the mother would get twice the amount the girl was to receive. We'll never know what Ricky was thinking of, for (as fate would have it) he did not return from the war. Mrs. Ricardo gave birth to twins—a boy and a girl. How was the money divided?</p>                                                                            |   |   |
| 72 | <p>23. pg. 437, questions regarding women losing \$435, 049 due to pay gap. Source is Time Magazine. Emphasis does not portray gender fairness, advocacy, and is biased.</p> | <p><b>The Pay Gap.</b> How wide is the chasm between what men and women earn in the workplace? According to a 2015 analysis from the National Women's Law Center, women lose \$435,049 over the course of a career because of the pay gap. The bar graph shows the average earnings in the United States for men and women at ages 22 and 52.</p>  <p>Average Yearly Earnings (thousands of dollars)</p> <p>Age</p> <p>Source: Time, March 14, 2016</p>  <p>Average Yearly Earnings (thousands of dollars)</p> <p>Graph of Models for the Data</p> <p>Years after Age 22</p> |   |   |
| 73 | <p>24. Pg. 714, #61 mentions anti-semitic joke. Does not portray multicultural fairness and advocacy.</p>                                                                    | <p>Same as #18</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |   |   |

Hi again!

It looks like comments for HMH 6-8 and HMH 9-12 are missing. Can you add those in when you get a chance?

Thanks again for these!

Hi Courtney,

Have you had a chance to complete the math correlations review? We are in the final stretch with our expert reviews, and district and guest reviews are likely to begin in January. We will need the correlations in order to do the data analysis for the final report for the Commissioner which we will begin working on soon.

Please let me know if you need anything or if I can help in any way.

Thanks!

| 2 | <p>Their publisher questionnaire refers to MAFS, and its alignment to the MAFS, multiple times. Is that okay?</p> <p>In Algebra 1-A, within all of the units, there are some activities/lessons that only address benchmarks within K-8. Is that okay?</p> <p>In Algebra 1-A, there is a unit on square root, cube root and step functions which are not in the course. Is that okay?</p> <p>In Precalc, there is no mention of systems of equations, comparing different functions or piecewise functions which are in the course. Is that okay?</p> <p>In Algebra 2, there is a unit including arithmetic/geometric series but there are no benchmarks to support those concepts. Is that okay?</p> <p>Their glossary refers to "box and whisker plot", the BEST glossar refers to "box plots". Is that okay?</p> <p>Generally speaking, the correlation document does not always have a benchmark of focus, connecting benchmarks or MTRs aligned to lessons.</p> |
| 3 | <p>The name of course aligned to the B.E.S.T. is "Probability and Statistics"</p> <p>If the books are to be re-aligned to B.E.S.T., should it be a 1st edition rather than a 4th edition, like it currently is listed?</p> <p>Within the B.E.S.T. Standards, we use the language "line plots" and not dotplots, use stem-and-leaf plots and not stemplots"</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 4 | <p>Within the the teacher edition, the lessons address CCSS "shifts" (focus, coherence and rigor) which the B.E.S.T. Standards DO NOT have. Is that okay?</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 5 | <p>The grade 6 correlation document has connecting benchmarks from other grade levels.</p> <p>Lessons throughout all grade levels have students solving problems using specific methods. With the B.E.S.T. Standards, that is not the expectation for the benchmarks or for students.</p> <p>In grade 7, there is a lesson on literal equations which is not an expectation until Algebra 1.</p> <p>Throughout all materials refers to the benchmarks as standards which is incorrect language.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

|    | <p>1</p> <p>Publisher uses the term "benchmark spotlight" and we use "benchmark of focus".</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 10 | <p>Within some courses, have units that specify a specific methods to solve problems</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 11 | <p>Correlations document does not address connecting benchmarks or the Appendices.<br/>Correlations document makes reference to SEL and CRT, is that okay?<br/>Within grade 8, have entire unit on proportional relationship which is grade 7. Within this unit, have lessons on just one aspect of a benchmark clarification (which were entire standards from MAFS).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 12 | <p>Correlations document does not address connecting benchmarks or the Appendices.<br/>Correlations document makes reference to SEL and CRT, is that okay?<br/>Within the Algebra 1 course, have lessons specific to solving quadratic using certain method which is not in line with the B.E.S.T. Standards (same with systems of equations).</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 13 | <p>Within Algebra 1, Unit 0 contains content from elementary and middle grades, and some content from Geometry. Some benchmarks that are listed as "benchmark of focus" are outside of the Algebra 1 course.<br/>Within Algebra 1, Unit 1 contains content from middle grades. Some benchmarks that are listed as "benchmark of focus" are outside of the Algebra 1 course.<br/>Generally speaking within the Algebra 1 course, benchmarks are not properly aligned (some content above and below course level) and no evidence that benchmarks are not taught in isolation. Additionally, many cases in which asking students to solve by certain method which is not consistent with B.E.S.T.<br/>Within the Algebra 2 course, much of the content is not aligned to the B.E.S.T. and is aligned to content from the MAFS. The B.E.S.T. Algebra 2 course does not contain comic sections, probability, distributions, sequences, series or trigonometry.</p> |
| 14 | <p>Within the Geometry course, little evidence of how the benchmarks are not taught in isolation and no evidence of integrated appendices.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 15 | <p>Within the first unit of instruction, includes only benchmarks from the previous grade level.<br/>All lessons within units focusing on one benchmark or one aspect of the benchmark concept; little evidence of benchmarks not taught in isolation.<br/>Within units and lessons, no mention of the MTRs or the EEs in terms of alignment.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

|    | All units/lessons have a STEM Project with science benchmarks. Wondering who is checking the alignment for the science aspect?<br>Seems that certain lessons focus on specific benchmark or aspect of a benchmark.<br>Within grade 6, volume only focuses on fractional edge lengths but students could determine volume using whole numbers and decimals (MAFS focused only on fractional edge lengths).                                                                                                                                                                             |
| 22 | For the 9-12 courses outside of Algebra 1, Geometry and Algebra 2, the editions range from the 2nd to the 14th. Wondering how that can be if the books are truly rewritten and aligned to the B.E.S.T. Standards. Especially since all other courses have B.E.S.T. on their cover and are 1st editions.<br>Also, there are multiple books for the same course. Wondering how that is possible.<br>Within one of the books for Math College Algebra, includes concepts that are not covered within the course (i.e., trig, circles, rectangular coordinates, circular functions, etc.) |
| 23 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |

**Subject:** IM Math Correlations

Hi Courtney,

Have you had a chance to complete the math correlations review? We are in the final stretch with our expert reviews, and district and guest reviews are likely to begin in January. We will need the correlations in order to do the data analysis for the final report for the Commissioner which we will begin working on soon.

Please let me know if you need anything or if I can help in any way.

Thanks!

Amber Baumbach

|    | 1<br>Publisher uses the term "benchmark spotlight" and we use "benchmark of focus".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 10 | Within some courses, have units that specify a specific methods to solve problems                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 11 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 12 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 13 | Within Algebra 1, Unit 0 contains content from elementary and middle grades, and some content from Geometry. Some benchmarks that are listed as "benchmark of focus" are outside of the Algebra 1 course.<br>Within Algebra 1, Unit 1 contains content from middle grades. Some benchmarks that are listed as "benchmark of focus" are outside of the Algebra 1 course.<br>Generally speaking within the Algebra 1 course, benchmarks are not properly aligned (some content above and below course level) and no evidence that benchmarks are not taught in isolation. Additionally, many cases in which asking students to solve by certain method which is not consistent with B.E.S.T.<br>Within the Algebra 2 course, much of the content is not aligned to the B.E.S.T. and is aligned to content from the MAFS. The B.E.S.T. Algebra 2 course does not contain conic sections, probability, distributions, sequences, series or trigonometry.<br>Within the Geometry course, little evidence of how the benchmarks are not taught in isolation and no evidence of integrated appendices. |
| 14 | Within the first unit of instruction, includes only benchmarks from the previous grade level.<br>All lessons within units focusing on one benchmark or one aspect of the benchmark concept; little evidence of benchmarks not taught in isolation.<br>Within units and lessons, no mention of the MTRs or the EEs in terms of alignment.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 15 | All lessons within units focusing on one benchmark or one aspect of the benchmark concept; little evidence of benchmarks not taught in isolation.<br>Within units and lessons, no mention of the MTRs or the EEs in terms of alignment.<br>Within the Algebra 1 course, have lessons specific to solving problems using a certain method (i.e., lesson on solving systems by graphing (which is grade 8), lesson on solving systems by substitution, and lesson on solving by elimination).<br>Within the Algebra 1 course, have lessons specific to solving quadratic equation using certain method.<br>Within the Geometry course, have lessons that specify which type of proof students are to use.                                                                                                                                                                                                                                                                                                                                                                                         |
| 16 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|----|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|    |                                                                                                                                                                                                                                                                                                         |
|    | For the 9-12 courses outside of Algebra 1, Geometry and Algebra 2, the editions range from the 2nd to the 14th. Wondering how that can be if the books are truly rewritten and aligned to the B.E.S.T. Standards. Especially since all other courses have B.E.S.T. on their cover and are 1st editions. |
| 23 | Also, there are multiple books for the same course. Wondering how that is possible.<br>Within one of the books for Math College Algebra, includes concepts that are not covered within the course (i.e., trig, circles, rectangular coordinates, circular functions, etc.)                              |
| 24 |                                                                                                                                                                                                                                                                                                         |

**Attachment(s):** "Cengage-Appeals K-12 Mathematics.xlsx"

Cathy,

No need to respond to this. We did receive what we needed yesterday. It affects us with two problems. We are submitting appeal and will also be taking these two word problems out of the text.

Thanks and have a good weekend!

Carey

**Subject:** Inquiring on non-recommended list and appeal

Good morning Cathy,

I am sure you have been very busy this week. It has ramped up on our end as well with questions from the districts that have chosen our programs. Which leads me to contacting you.

We are a bit confused with the list of the Recommended Titles and Non-Recommended. Both lists include PreCalculus with Limits. There is not a copyright year nor an edition listed. We submitted two PreCalculus with Limits text, one regular and one with the Graphing Approach. Which are really the same books, one just includes calculator functions. Can we get clarity on which title is on the non-recommended list? In addition, will the results from the rubric be shared so we can understand and see evidence of why it was placed on the non-recommended list for Inclusion of Special Topics? Especially when both texts are the same, except for the calculator functions. This will assist with answer (e) on the attachment.

Because of this it appears we will need to go through the appeal process, the attached document (appeal rule) seems a bit confusing on the actual process. Can you provide a process? For example, do we notify you of appeal intent and submit all paperwork to you? If not, who would be the contact?

I apologize for all the questions, we are just trying to move as quickly as we can on this. If needed, we can chat live as well!

Thanks so much in advance for your time!

Carey

| 10    | Bid 448-Precalculus Honors                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                         |      |      |      |      |      |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |    |      |  |  |
| 11    | <p><b>11. Demographics</b> The list shows the percent of individuals living below the poverty level in 2016. Use a frequency distribution and <i>Latent Precision</i> (<i>Survival of the Fittest</i>) to answer the following questions.</p> <p><b>DATA</b></p> <table border="1"> <tr><td>AK</td><td>10.9</td><td>AL</td><td>16.3</td><td>AR</td><td>16.1</td><td>AZ</td><td>16.6</td></tr> <tr><td>CA</td><td>11.0</td><td>CO</td><td>16.8</td><td>CT</td><td>10.1</td><td>DE</td><td>10.1</td></tr> <tr><td>DC</td><td>11.7</td><td>FL</td><td>16.8</td><td>HI</td><td>10.4</td><td>IA</td><td>10.7</td></tr> <tr><td>GA</td><td>11.7</td><td>IL</td><td>16.8</td><td>IN</td><td>12.7</td><td>KS</td><td>12.7</td></tr> <tr><td>HI</td><td>11.7</td><td>MD</td><td>16.8</td><td>LA</td><td>12.7</td><td>KY</td><td>12.7</td></tr> <tr><td>IA</td><td>12.4</td><td>MA</td><td>11.9</td><td>MI</td><td>11.8</td><td>MO</td><td>11.4</td></tr> <tr><td>IL</td><td>12.4</td><td>ME</td><td>11.8</td><td>MT</td><td>11.8</td><td>NC</td><td>11.4</td></tr> <tr><td>MS</td><td>20.1</td><td>NE</td><td>11.8</td><td>ND</td><td>14.4</td><td>ND</td><td>10.9</td></tr> <tr><td>MT</td><td>11.5</td><td>NH</td><td>11.8</td><td>NJ</td><td>15.9</td><td>OH</td><td>15.9</td></tr> <tr><td>NC</td><td>11.5</td><td>OK</td><td>11.8</td><td>NY</td><td>15.9</td><td>OK</td><td>14.4</td></tr> <tr><td>ND</td><td>11.5</td><td>OR</td><td>11.8</td><td>PA</td><td>11.6</td><td>RI</td><td>14.3</td></tr> <tr><td>RI</td><td>11.5</td><td>SC</td><td>11.8</td><td>VA</td><td>11.6</td><td>SC</td><td>14.3</td></tr> <tr><td>SC</td><td>11.5</td><td>TN</td><td>11.8</td><td>VT</td><td>11.7</td><td>VA</td><td>14.3</td></tr> <tr><td>SD</td><td>11.5</td><td>TX</td><td>11.8</td><td>WA</td><td>11.7</td><td>WI</td><td>11.1</td></tr> <tr><td>TX</td><td>11.5</td><td>UT</td><td>11.8</td><td>WV</td><td>10.3</td><td>WV</td><td>11.1</td></tr> <tr><td>UT</td><td>11.5</td><td>VT</td><td>11.8</td><td>WY</td><td>10.3</td><td></td><td></td></tr> </table> <p><b>EXAMPLE 5</b> Spread of a Virus. A student returns from vacation with a contagious flu virus. The spread of the virus is modeled by</p> $y = \frac{1}{1 + 4000e^{-0.0001x}}$ <p>where <math>x</math> is the number of days since the student returned and <math>y</math> is the number of students who have contracted the virus. The spread of the virus is modeled by</p> <p><b>Graphical Solution</b> Use the graphing utility to graph the function <math>y = \frac{1}{1 + 4000e^{-0.0001x}}</math> for <math>0 \leq x \leq 100</math>. The graph shows that the number of students who have contracted the virus approaches 1 as <math>x</math> increases.</p> <p><b>Algebraic Solution</b> Let <math>y = \frac{1}{1 + 4000e^{-0.0001x}}</math>. Then <math>1 + 4000e^{-0.0001x} = \frac{1}{y}</math>. Subtract 1 from both sides to get <math>4000e^{-0.0001x} = \frac{1}{y} - 1</math>. Divide both sides by 4000 to get <math>e^{-0.0001x} = \frac{1 - y}{4000y}</math>. Take the natural logarithm of both sides to get <math>-0.0001x = \ln\left(\frac{1 - y}{4000y}\right)</math>. Divide both sides by -0.0001 to get <math>x = -\frac{\ln\left(\frac{1 - y}{4000y}\right)}{0.0001}</math>.</p> <p><b>Check:</b> When <math>x = 0</math>, <math>y = \frac{1}{1 + 4000e^{-0.0001(0)}} = \frac{1}{1 + 4000} = \frac{1}{4001} \approx 0.00025</math>. When <math>x = 100</math>, <math>y = \frac{1}{1 + 4000e^{-0.0001(100)}} = \frac{1}{1 + 4000e^{-0.04}} \approx \frac{1}{1 + 4000(0.618)} \approx \frac{1}{2472} \approx 0.0004</math>.</p> <p><b>12. Chapter 3</b> Example 5 is about the spread of a “contagious flu virus” that a student spreads.</p> |                                                                         | AK   | 10.9 | AL   | 16.3 | AR   | 16.1 | AZ | 16.6 | CA | 11.0 | CO | 16.8 | CT | 10.1 | DE | 10.1 | DC | 11.7 | FL | 16.8 | HI | 10.4 | IA | 10.7 | GA | 11.7 | IL | 16.8 | IN | 12.7 | KS | 12.7 | HI | 11.7 | MD | 16.8 | LA | 12.7 | KY | 12.7 | IA | 12.4 | MA | 11.9 | MI | 11.8 | MO | 11.4 | IL | 12.4 | ME | 11.8 | MT | 11.8 | NC | 11.4 | MS | 20.1 | NE | 11.8 | ND | 14.4 | ND | 10.9 | MT | 11.5 | NH | 11.8 | NJ | 15.9 | OH | 15.9 | NC | 11.5 | OK | 11.8 | NY | 15.9 | OK | 14.4 | ND | 11.5 | OR | 11.8 | PA | 11.6 | RI | 14.3 | RI | 11.5 | SC | 11.8 | VA | 11.6 | SC | 14.3 | SC | 11.5 | TN | 11.8 | VT | 11.7 | VA | 14.3 | SD | 11.5 | TX | 11.8 | WA | 11.7 | WI | 11.1 | TX | 11.5 | UT | 11.8 | WV | 10.3 | WV | 11.1 | UT | 11.5 | VT | 11.8 | WY | 10.3 |  |  |

Subject: Math alignment scores

Hello, when are the math alignment scores going to be released?

Ethan

Hi Ethan,

I'm sorry, the call is scheduled for Monday. Unfortunately, we don't have everyone on our team available for a call today.

Thanks for understanding,

Amber Baumbach

Hi, any chance we could do it today?  
We only need 15 mins.

Thanks,  
Ethan

Hi Eric, Ashley, and Shawn,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 2:00 PM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Math Nation has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Yes, understandable.

Is there perhaps one person that we can meet with today? I believe we have made all of the requested changes and would like to show them to you (and make our printing deadlines for teachers to have materials by school starting).

We have it laid out well to show off easily.

Thanks!  
Ethan

Hi Eric, Ashley, and Shawn,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 2:00 PM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Math Nation has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Yes, understandable.

Is there perhaps one person that we can meet with today? I believe we have made all of the requested changes and would like to show them to you (and make our printing deadlines for teachers to have materials by school starting).

We have it laid out well to show off easily.

Thanks!  
Ethan

Hi, any chance we could do it today?  
We only need 15 mins.

Thanks,  
Ethan

Hi Eric, Ashley, and Shawn,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 2:00 PM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Math Nation has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 4 - Good Alignment                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | This material far exceeded expectations to incorporate the new BEST Standards. It is obvious that the entire series of materials were organized to fulfill the BEST Standards entirely. These materials would enhance instruction in any classroom they were included in. The only 4 areas the authors should change before considering distribution are: (1) Include more true ELL supports - Offering a 'Spanish' version is not the same thing as offering |

true ELL supports woven throughout each lesson. (2) Add more drawings and models to the lessons which only feature 1 - when you feature only 1- that means you are saying there is only 1 way that lesson can be understood or interpreted. Suggestion: Ask students to come up with fun ways they would illustrate the concept - Don't use adults- We all know what we are used to seeing. (3) Remove the SEL from the 'Math is...Mindset' sections of each lesson. (4) Add more ELA explanation/reasonings and citations to each lesson. Students in 5th grade are asked to cite their evidence or justification for everything to encourage critical thinking in all their other subjects. After these modifications are resolved, this would be an extremely valuable resource to have for both teachers and schools. It encourages creativity and engagement all learners.

| Standard                    | Description                                                                                                                                                                              | Reviewer Rating         | Rating Justification                                                                           |

There was one lesson which used ELA strategies and had students explain their reasoning. There should be more of that - oral is good but writing should be continued to be encouraged to help students process whether or not something is reasonable. Ex. Why do you know that |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |                         |                                                                                                                                                                                   |

| <a href="#">ELA.K12.EE.1.1</a> | Cite evidence to explain and justify reasoning.                                                                                                                                                                                                                                                                                                                                                                                                                           | 3 - Fair Alignment      | Evidence found in the links provided. For it to be BEST Standard appropriate, it should be featured in every lesson in order to encourage cross-curricular practice and learning. |
| <a href="#">ELA.K12.EE.2.1</a> | Read and comprehend grade-level complex texts proficiently.                                                                                                                                                                                                                                                                                                                                                                                                               | 5 - Very Good Alignment | Evidence found in the links provided and throughout the entire text.                                                                                                              |
| <a href="#">ELA.K12.EE.3.1</a> | Make inferences to support comprehension.                                                                                                                                                                                                                                                                                                                                                                                                                                 | 5 - Very Good Alignment | Very good incorporation of this standard. Ignite! had me thinking and wondering too.                                                                                              |

|                                  |                                                                                                                                          |                         |                                                                                                                                                                                             |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">ELA.K12.EE.4.1</a>   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.            | 5 - Very Good Alignment | Evidence found in the links provided and throughout the text.                                                                                                                               |
| <a href="#">ELA.K12.EE.5.1</a>   | Use the accepted rules governing a specific format to create quality work.                                                               | 5 - Very Good Alignment | Evidence found in the links provided and throughout the text.                                                                                                                               |
| <a href="#">ELA.K12.EE.6.1</a>   | Use appropriate voice and tone when speaking or writing.                                                                                 | 5 - Very Good Alignment | Evidence found in the links provided and throughout the text.                                                                                                                               |
| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 5 - Very Good Alignment | Very good incorporation of ELL supports throughout the text and supplements.                                                                                                                |
| <a href="#">ELD.K12.ELL.SI.1</a> | English language learners communicate for social and instructional purposes within the school setting.                                   | 2 - Poor Alignment      | This appears disjointed in relation to the rest of the lesson in regards to ELLs. It needs to be better applied/(more relatable to ELLs) to the lessons in order to have more of an impact. |

| Content                                                                                                                                       | Reviewer Rating         | Rating Justification                  |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 5 - Very Good Alignment | Evidence found in the links provided. |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 5 - Very Good Alignment | Evidence found in the links provided. |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 5 - Very Good Alignment | Evidence found in the links provided. |

|                                                                                                                                                                                                         |                         |                                                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------------|
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.                                                                    | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                                                                                       | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.                                                               | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 5 - Very Good Alignment | No errors found.                                                                                |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 5 - Very Good Alignment | Evidence of objectivity only.                                                                   |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 5 - Very Good Alignment | No mistakes or inconsistencies found in the materials provided.                                 |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 5 - Very Good Alignment | Current research of BEST Standards is provided throughout the materials in a very engaging way. |

|                                                                                                                                                                                                                                                                              |                         |                                                                                                                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                                    | 5 - Very Good Alignment | Current research of BEST Standards is provided throughout the materials in a very engaging way.                                           |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 4 - Good Alignment      | Ideally would like to see a few additional drawings/models as specifically indicated for certain lessons [See Standards comments section] |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | Honorable portrayal of all beings throughout the materials.                                                                               |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |

| Presentation                                                                                                                                                                                                                           | Reviewer Rating         | Rating Justification                                                                                                                                                               |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course. | 5 - Very Good Alignment | Outstanding organization and layout for teachers and students: Be Curious, Ignite, Exit Ticket, Reinforce Understanding, Build Proficiency, and Extend Thinking, and Digital Games |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                                             |

|                                                                                                                                                                                                                                                                     |                         |                                                                                                                                                                  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 5 - Very Good Alignment | Outstanding organization and layout for teachers and students: Be Curious, Ignite, Exit Ticket, Reinforce Understanding, Build Proficiency, and Extend Thinking. |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |

| Learning                                                                                                                                                       | Reviewer Rating         | Rating Justification                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                        | 5 - Very Good Alignment | Evidence found throughout each lesson.                                              |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                         | 5 - Very Good Alignment | Evidence found throughout each lesson.                                              |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                | 5 - Very Good Alignment | Evidence found throughout each lesson of direct goals.                              |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers. | 5 - Very Good Alignment | Evidence found throughout each lesson.                                              |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                   | 5 - Very Good Alignment | Evidence found in each lesson with the: Exit Ticket, Reinforce Understanding, Build |

|                                                                                                                                                                                            |                         |                                                                                                                                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                            |                         | Proficiency, and Extend Thinking.                                                                                                                      |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 5 - Very Good Alignment | Evidence found throughout each lesson; Very engaging as I progressed through the review, I wanted to start solving questions or responding to prompts. |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | ELL Supports need a little more work to become more engaging.                                                                                          |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 4 - Good Alignment      | It is applicable, yet should be increased throughout each lesson to be more beneficial and impactful.                                                  |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)                                  | 5 - Very Good Alignment | Yes, the submission satisfies the LEARNING requirements set forth by all of the new BEST Standards.                                                    |

| Special Topics                                                                                                                                                                     | Reviewer Rating            | Rating Justification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment    | CRT not found in the materials.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment    | Yes, omitted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment    | Yes, omitted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 1 - Very Poor/No Alignment | Social Emotional Learning is solicited - found in the 'Math is...Mindset' sections found in every lesson. Refer to their comment in the 'Standards' section of this review: "The Be Curious activity always includes a Math is... Mindset question that asks students to think about social and emotional learning competencies, including relationship skills and social awareness. Throughout the program, for example: Lesson 3-3 (Volume 1, pp. 71A–74C) Lesson 5-2 (Volume 1, pp. 139A–142C) Lesson 8-3 (Volume 2, pp. 11A–14C) Lesson 11-3 (Volume 2, pp. 137A–140C) Lesson 14-1 (Volume 2, pp. 247A–250C)" |

### Final Recommendation

|                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                             |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                                                                                                                                                                                                         |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 4 - Good Alignment                                                                                                                                                                                                                                          |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | Most of the lessons are aligned to benchmarks and include some nice strategies and structures to engage students in mathematical thinking. It has too much gradual release that prevents students from thinking and creating meaning on their own at times. |

| Standard                    | Description                                                                                                                                                                              | Reviewer Rating    | Rating Justification                                                                                                                                                                                            |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.AR.1.1</a> | Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context. | 4 - Good Alignment | not all of these lessons linked align to the given benchmark, however, the ones that do includemulti-step problems, include interpreting the remainder, focus on understanding what is happening in the problem |
| <a href="#">MA.5.AR.1.2</a> | Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.                                      | 4 - Good Alignment | word problems involving operations with fractions, include models and some equations                                                                                                                            |
| <a href="#">MA.5.AR.1.3</a> | Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                 | 3 - Fair Alignment | uses models to divide whole numbers by unit fractions and unit fractions by whole numbers, but then goes into the "trick" without giving too much explanation                                                   |
| <a href="#">MA.5.AR.2.1</a> | Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.                                  | 4 - Good Alignment | gives practice relating expressions to written words and written words to expressions                                                                                                                           |
| <a href="#">MA.5.AR.2.2</a> | Evaluate multi-step numerical expressions using order of operations.                                                                                                                     | 4 - Good Alignment | gives practice evaluating expressions with parentheses and operations, including a few with fractions and decimals                                                                                              |
| <a href="#">MA.5.AR.2.3</a> | Determine and explain whether an equation involving any of the four operations is true or false.                                                                                         | 2 - Poor Alignment | this lesson tries to incorporate the old comparative relational thinking as more of a strategy to determine                                                                                                     |

|                             |                                                                                                                                                                            |                    |                                                                                                                                                                                                                |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                                            |                    | if equations are true and has students fill in missing terms, instead of just determining whether the equation is true or false by solving the sides                                                           |
| <a href="#">MA.5.AR.2.4</a> | Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position. | 3 - Fair Alignment | many of the linked lessons do not relate to the benchmark, but the one that does gives some practice writing equations with a variable for the unknown and solving for the unknown                             |
| <a href="#">MA.5.AR.3.1</a> | Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.                                                                       | 3 - Fair Alignment | practice writing rules for patterns and determining next terms; does not seem to ask what a specific term in the pattern would be                                                                              |
| <a href="#">MA.5.AR.3.2</a> | Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.                                                                             | 3 - Fair Alignment | input output tables, but no missing terms on the table to fill in the blank like in the B1G-M                                                                                                                  |
| <a href="#">MA.5.DP.1.1</a> | Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.                                                    | 3 - Fair Alignment | No practice with decimals to the hundredths                                                                                                                                                                    |
| <a href="#">MA.5.DP.1.2</a> | Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.                                  | 3 - Fair Alignment | sometimes there is good real-world data to help students understand the real meaning of mean as shown in the clarification and example of the benchmark, but other times it just asks to calculate the mean of |

| <a href="#">ELD.K12.ELL.SI.1</a> | English language learners communicate for social and instructional purposes within the school setting. | 3 - Fair Alignment | SEL is classified as "unsolicited" below |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment | most benchmarks are well aligned to the lessons, but some are lacking with the examples and clarifications in mind                                                                       |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 4 - Good Alignment | most and at the correct level                                                                                                                                                            |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 3 - Fair Alignment | a little too much gradual release that would need to be adapted to allow students to be problem solvers and solve problems in multiple ways instead of just in 1 way shown in the lesson |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 3 - Fair Alignment | some lessons do not have sufficient details, explanations, and examples                                                                                                                  |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                             | 3 - Fair Alignment | some lessons match the level of the benchmarks but not all                                                                                                                               |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.     | 4 - Good Alignment | some times                                                                                                                                                                               |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.      | 3 - Fair Alignment | some times                                                                                                                                                                               |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject. | 4 - Good Alignment | good use of sources                                                                                                                                                                      |

|                                                                                                                                                                                                                                                          |                         |                                                                                        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------|
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                                                                    | 4 - Good Alignment      | good use of sources                                                                    |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                                                                          | 5 - Very Good Alignment | no errors seen                                                                         |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                                                                 | 5 - Very Good Alignment | no bias seen                                                                           |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).                                                  | 4 - Good Alignment      | good strategies and models shown for the most part, but some times there is not enough |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                                                                 | 5 - Very Good Alignment | no issues seen                                                                         |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                                                                           | 5 - Very Good Alignment | no issues seen                                                                         |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                | 3 - Fair Alignment      | some contexts are more relevant than others                                            |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                   | 4 - Good Alignment      | most seem relevant                                                                     |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                    | 3 - Fair Alignment      | some connections are meaningful to students                                            |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                       | 3 - Fair Alignment      | some interdisciplinary connections made                                                |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section). | 5 - Very Good Alignment | no bias seen                                                                           |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and                                                                    | 5 - Very Good Alignment | no issues seen                                                                         |

|                                                                                                         |                    |        |
|---------------------------------------------------------------------------------------------------------|--------------------|--------|
| inhumane treatment. (An exception may be necessary for units covering animal welfare).                  |                    |        |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material? | 4 - Good Alignment | mostly |

| Presentation                                                                                                                                                                                                                                                        | Reviewer Rating    | Rating Justification                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.                              | 4 - Good Alignment | the teacher may need to supplement but will not have to redesign all content                |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                                             | 4 - Good Alignment | seem to align pretty well                                                                   |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 3 - Fair Alignment | some ordering makes sense but others should be readjusted                                   |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment | seem to be decently engaging                                                                |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 3 - Fair Alignment | some times the content is well chunked but other times the content is too much at one point |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 4 - Good Alignment | tools available to help student groups                                                      |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment | pretty good at meeting the presentation requirements                                        |

| Learning | Reviewer Rating | Rating Justification |
|----------|-----------------|----------------------|
|----------|-----------------|----------------------|

|                                                                                                                                                                                            |                         |                                                                                               |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                                                    | 4 - Good Alignment      | allow students to be decently motivated                                                       |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                                                     | 3 - Fair Alignment      | sometimes they are thoroughly taught                                                          |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                                            | 5 - Very Good Alignment | clear statements of information and outcomes available                                        |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.                             | 4 - Good Alignment      | allow for some independency but other times provides too much gradual support                 |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                                               | 4 - Good Alignment      | adaptable to all learners                                                                     |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 4 - Good Alignment      | some engagement during the learning process by incorporating discussions and other techniques |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 4 - Good Alignment      | good organization of content                                                                  |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 4 - Good Alignment      | good strategies used for the most part to help students be successful                         |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | good strategies used for the most part to help students be successful                         |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 3 - Fair Alignment      | decent correlation                                                                            |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment      | good opportunities for assessing                                                              |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 5 - Very Good Alignment | strategies and materials provided to meet the needs of different students                     |

|                                                                                                                                                                        |                    |                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------|
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable? | 4 - Good Alignment | good opportunities for most               |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)              | 4 - Good Alignment | overall pretty good learning requirements |

| Special Topics                                                                                                                                                                     | Reviewer Rating         | Rating Justification                         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | not seen                                     |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | not seen                                     |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | not seen                                     |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 2 - Poor Alignment      | some SEL content and strategies incorporated |

Hi Amber,  
We appreciate the opportunity for this initial meeting on Monday. We are still in need of the Grade 4 Accelerated and the Grade 5 Reviews like the PDF documents we received for grade 1 and grade 8.

Regards,  
Kim

\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\*

Hello Kim,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 9:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time McGraw Hill has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Good morning Kim,

Thanks for following up. Please see the attached evaluations for Grade 4 Accelerated and Grade 5. I have also attached the updated spreadsheet.

Please let me know if you have any questions.

See you soon,  
Lauren

Hello Kim,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 9:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time McGraw Hill has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

Hello Kim,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 9:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time McGraw Hill has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 4 - Good Alignment                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | This material far exceeded expectations to incorporate the new BEST Standards. It is obvious that the entire series of materials were organized to fulfill the BEST Standards entirely. These materials would enhance instruction in any classroom they were included in. The only 4 areas the authors should change before considering distribution are: (1) Include more true ELL supports - Offering a 'Spanish' version is not the same thing as offering |

true ELL supports woven throughout each lesson. (2) Add more drawings and models to the lessons which only feature 1 - when you feature only 1- that means you are saying there is only 1 way that lesson can be understood or interpreted. Suggestion: Ask students to come up with fun ways they would illustrate the concept - Don't use adults- We all know what we are used to seeing. (3) Remove the SEL from the 'Math is...Mindset' sections of each lesson. (4) Add more ELA explanation/reasonings and citations to each lesson. Students in 5th grade are asked to cite their evidence or justification for everything to encourage critical thinking in all their other subjects. After these modifications are resolved, this would be an extremely valuable resource to have for both teachers and schools. It encourages creativity and engagement all learners.

| Standard                    | Description                                                                                                                                                                              | Reviewer Rating         | Rating Justification                                                                           |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.AR.1.1</a> | Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context. | 5 - Very Good Alignment | Evidence found in each link provided                                                           |
| <a href="#">MA.5.AR.1.2</a> | Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.                                      | 5 - Very Good Alignment | Evidence found in each link provided. Visual models present.                                   |
| <a href="#">MA.5.AR.1.3</a> | Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                 | 5 - Very Good Alignment | Evidence found in each link provided. Visual models included.                                  |
| <a href="#">MA.5.AR.2.1</a> | Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.                                  | 5 - Very Good Alignment | Evidence found in each link provided; exponents and additional nesting symbols were not found. |

|                             |                                                                                                                                                                            |                         |                                                                                                                                                                                                               |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.AR.2.2</a> | Evaluate multi-step numerical expressions using order of operations.                                                                                                       | 5 - Very Good Alignment | Evidence found in each link provided. Decimals did not exceed the hundredths place and expressions did not include fractions divided by fractions.                                                            |
| <a href="#">MA.5.AR.2.3</a> | Determine and explain whether an equation involving any of the four operations is true or false.                                                                           | 4 - Good Alignment      | Evidence found in Link #2, Unit 14 p.263.                                                                                                                                                                     |
| <a href="#">MA.5.AR.2.4</a> | Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position. | 3 - Fair Alignment      | Very minimal problems featuring Clarification #2: Problems include the unknown and different operations on either side of the equal sign. Most problems had the variable on the right side of the equal sign. |
| <a href="#">MA.5.AR.3.1</a> | Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.                                                                       | 5 - Very Good Alignment | Evidence found in the links provided.                                                                                                                                                                         |
| <a href="#">MA.5.AR.3.2</a> | Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.                                                                             | 5 - Very Good Alignment | Evidence found in the links provided.                                                                                                                                                                         |
| <a href="#">MA.5.DP.1.1</a> | Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.                                                    | 5 - Very Good Alignment | Evidence found in links provided. Explicitly taught in 13-4.                                                                                                                                                  |
| <a href="#">MA.5.DP.1.2</a> | Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.                                  | 5 - Very Good Alignment | Impressive alignment - Especially 226B 'Mean It' - fulfilling Clarification #1                                                                                                                                |
| <a href="#">MA.5.FR.1.1</a> | Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.                                                                     | 5 - Very Good Alignment | Explicit instruction provided using varying visual representations.                                                                                                                                           |

|                             |                                                                                                                                                                                                                      |                         |                                                                                                                                                                                                  |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.FR.2.1</a> | Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.                                                                              | 3 - Fair Alignment      | Manipulatives, drawings, and other visuals incorporated into instruction. Did not see estimation [Clarification #1].                                                                             |
| <a href="#">MA.5.FR.2.2</a> | Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.                                             | 5 - Very Good Alignment | Evidence found in the links provided.                                                                                                                                                            |
| <a href="#">MA.5.FR.2.3</a> | When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.                                | 3 - Fair Alignment      | Evidence provided - Not explicitly taught and found towards the end of the section titled 'Math Probe' Unit 10 p.91 - Does feature ELA standards requiring students to explain their rationale.  |
| <a href="#">MA.5.FR.2.4</a> | Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                        | 3 - Fair Alignment      | Evidence provided - Not explicitly taught and found towards the end of the section titled 'Math Probe' Unit 11 p.153 - Does feature ELA standards requiring students to explain their rationale. |
| <a href="#">MA.5.GR.1.1</a> | Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.                                 | 5 - Very Good Alignment | Evidence found in links provided.                                                                                                                                                                |
| <a href="#">MA.5.GR.1.2</a> | Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres. | 5 - Very Good Alignment | Evidence found in links provided.                                                                                                                                                                |

|                             |                                                                                                                                                                                                                                                                           |                         |                                                                                                                                                        |

| <a href="#">MA.5.GR.2.1</a> | Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.                                                                                                                                                      | 5 - Very Good Alignment | Evidence found in links provided.                                                                                                                      |
| <a href="#">MA.5.GR.3.1</a> | Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.                                                             | 5 - Very Good Alignment | Evidence found in links provided. Standard explicitly taught.                                                                                          |
| <a href="#">MA.5.GR.3.2</a> | Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.                                                                                                                                                           | 5 - Very Good Alignment | Evidence found in links provided. Standard explicitly taught.                                                                                          |
| <a href="#">MA.5.GR.3.3</a> | Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem. | 5 - Very Good Alignment | Evidence found in links provided. Standard explicitly taught, i.e. fish tank on p.52 Lesson 5.                                                         |
| <a href="#">MA.5.GR.4.1</a> | Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.                                                                                                                                        | 5 - Very Good Alignment | Evidence found in the links provided. Explicit instruction found.                                                                                      |
| <a href="#">MA.5.GR.4.2</a> | Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.                                                                                | 5 - Very Good Alignment | Evidence found in the links provided. Explicit instruction found.                                                                                      |
| <a href="#">MA.5.M.1.1</a>  | Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.                                                                                                                          | 3 - Fair Alignment      | Evidence found in the links provided. Explicit instruction found. More visual models preferred instead of just the fraction bars and a few containers. |
| <a href="#">MA.5.M.2.1</a>  | Solve multi-step real-world problems involving money using decimal notation.                                                                                                                                                                                              | 5 - Very Good Alignment | Evidence found in the links provided. Explicit instruction found. More visual models preferred instead of just the fraction bars.                      |

|                              |                                                                                                                                                                                                                                                |                         |                                                                                                              |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.NSO.1.1</a> | Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.                                                                                  | 5 - Very Good Alignment | Evidence found in the links provided. Explicit instruction found.                                            |
| <a href="#">MA.5.NSO.1.2</a> | Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.                                                                                                                          | 5 - Very Good Alignment | Evidence found in the links provided. Explicit instruction found. Good opening lesson for 3-3 and the scale. |
| <a href="#">MA.5.NSO.1.3</a> | Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations. | 2 - Poor Alignment      | Very minimal decomposition using objects and/or drawings.                                                    |
| <a href="#">MA.5.NSO.1.4</a> | Plot, order and compare multi-digit numbers with decimals up to the thousandths.                                                                                                                                                               | 5 - Very Good Alignment | Very good use of multiple drawings to vary instruction of this standard.                                     |
| <a href="#">MA.5.NSO.1.5</a> | Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.                                                                                                                                    | 5 - Very Good Alignment | Evidence found in links provided.                                                                            |
| <a href="#">MA.5.NSO.2.1</a> | Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.                                                                                                                                               | 5 - Very Good Alignment | Evidence found in links provided. Standard applied in different lessons.                                     |
| <a href="#">MA.5.NSO.2.2</a> | Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.                                                                            | 5 - Very Good Alignment | Evidence found in links provided. Standard applied in different lessons.                                     |
| <a href="#">MA.5.NSO.2.3</a> | Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.                                                                                                           | 5 - Very Good Alignment | Evidence found in links provided. Standard applied in different lessons.                                     |
| <a href="#">MA.5.NSO.2.4</a> | Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.                                                                                                     | 5 - Very Good Alignment | Evidence found in links provided. Standard applied in different lessons. Very good use of models and         |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                         |                                                                                                                                                                                                        |
|--------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                         | drawings to enhance understanding of different learning styles.                                                                                                                                        |
| <a href="#">MA.5.NSO.2.5</a>   | Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.                                                                                                                                                                                                                                                                                                                                                                                                           | 3 - Fair Alignment      | Focus is primarily on using decimal grids for this standard. More model variations would help varying student learning styles.                                                                         |
| <a href="#">MA.K12.MTR.1.1</a> | <p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> <li>Help and support each other when attempting a new method or approach.</li> </ul> | 5 - Very Good Alignment | 'Be Curious' and 'Ignite' fulfill this standard completely.                                                                                                                                            |
| <a href="#">MA.K12.MTR.2.1</a> | <p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> <li>Build understanding through modeling and using manipulatives.</li> <li>Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.</li> </ul>                                                                                                                                | 4 - Good Alignment      | There are some lesson sections that need additional models/drawings added in order to ensure appeal and understanding to all learners. *Mentioned specifically in comments with the non-MTR Standards. |

| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 5 - Very Good Alignment | Very good incorporation of ELL supports throughout the text and supplements.                                                                                                                |
| <a href="#">ELD.K12.ELL.SI.1</a> | English language learners communicate for social and instructional purposes within the school setting.                                   | 2 - Poor Alignment      | This appears disjointed in relation to the rest of the lesson in regards to ELLs. It needs to be better applied/(more relatable to ELLs) to the lessons in order to have more of an impact. |

| Content                                                                                                                                       | Reviewer Rating         | Rating Justification                  |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 5 - Very Good Alignment | Evidence found in the links provided. |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 5 - Very Good Alignment | Evidence found in the links provided. |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 5 - Very Good Alignment | Evidence found in the links provided. |

|                                                                                                                                                                                                         |                         |                                                                                                 |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------------|
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.                                                                    | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                                                                                       | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.                                                               | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 5 - Very Good Alignment | No errors found.                                                                                |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 5 - Very Good Alignment | Evidence of objectivity only.                                                                   |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 5 - Very Good Alignment | Evidence found in the links provided.                                                           |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 5 - Very Good Alignment | No mistakes or inconsistencies found in the materials provided.                                 |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 5 - Very Good Alignment | Current research of BEST Standards is provided throughout the materials in a very engaging way. |

|                                                                                                                                                                                                                                                                              |                         |                                                                                                                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                                    | 5 - Very Good Alignment | Current research of BEST Standards is provided throughout the materials in a very engaging way.                                           |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 4 - Good Alignment      | Ideally would like to see a few additional drawings/models as specifically indicated for certain lessons [See Standards comments section] |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | Honorable portrayal of all beings throughout the materials.                                                                               |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                    |

| Presentation                                                                                                                                                                                                                           | Reviewer Rating         | Rating Justification                                                                                                                                                               |

| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course. | 5 - Very Good Alignment | Outstanding organization and layout for teachers and students: Be Curious, Ignite, Exit Ticket, Reinforce Understanding, Build Proficiency, and Extend Thinking, and Digital Games |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                                             |

|                                                                                                                                                                                                                                                                     |                         |                                                                                                                                                                  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 5 - Very Good Alignment | Outstanding organization and layout for teachers and students: Be Curious, Ignite, Exit Ticket, Reinforce Understanding, Build Proficiency, and Extend Thinking. |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                           |

| Learning                                                                                                                                                       | Reviewer Rating         | Rating Justification                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                        | 5 - Very Good Alignment | Evidence found throughout each lesson.                                              |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                         | 5 - Very Good Alignment | Evidence found throughout each lesson.                                              |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                | 5 - Very Good Alignment | Evidence found throughout each lesson of direct goals.                              |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers. | 5 - Very Good Alignment | Evidence found throughout each lesson.                                              |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                   | 5 - Very Good Alignment | Evidence found in each lesson with the: Exit Ticket, Reinforce Understanding, Build |

|                                                                                                                                                                                            |                         |                                                                                                                                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                            |                         | Proficiency, and Extend Thinking.                                                                                                                      |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 5 - Very Good Alignment | Evidence found throughout each lesson; Very engaging as I progressed through the review, I wanted to start solving questions or responding to prompts. |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | ELL Supports need a little more work to become more engaging.                                                                                          |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 5 - Very Good Alignment | Evidence found throughout each lesson.                                                                                                                 |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 4 - Good Alignment      | It is applicable, yet should be increased throughout each lesson to be more beneficial and impactful.                                                  |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)                                  | 5 - Very Good Alignment | Yes, the submission satisfies the LEARNING requirements set forth by all of the new BEST Standards.                                                    |

| Special Topics                                                                                                                                                                     | Reviewer Rating            | Rating Justification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment    | CRT not found in the materials.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment    | Yes, omitted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment    | Yes, omitted.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 1 - Very Poor/No Alignment | Social Emotional Learning is solicited - found in the 'Math is...Mindset' sections found in every lesson. Refer to their comment in the 'Standards' section of this review: "The Be Curious activity always includes a Math is... Mindset question that asks students to think about social and emotional learning competencies, including relationship skills and social awareness. Throughout the program, for example: Lesson 3-3 (Volume 1, pp. 71A–74C) Lesson 5-2 (Volume 1, pp. 139A–142C) Lesson 8-3 (Volume 2, pp. 11A–14C) Lesson 11-3 (Volume 2, pp. 137A–140C) Lesson 14-1 (Volume 2, pp. 247A–250C)" |

| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                                                                                                                                                                                                         |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 4 - Good Alignment                                                                                                                                                                                                                                          |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | Most of the lessons are aligned to benchmarks and include some nice strategies and structures to engage students in mathematical thinking. It has too much gradual release that prevents students from thinking and creating meaning on their own at times. |

| Standard                    | Description                                                                                                                                                                              | Reviewer Rating    | Rating Justification                                                                                                                                                                                            |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.AR.1.1</a> | Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context. | 4 - Good Alignment | not all of these lessons linked align to the given benchmark, however, the ones that do includemulti-step problems, include interpreting the remainder, focus on understanding what is happening in the problem |
| <a href="#">MA.5.AR.1.2</a> | Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.                                      | 4 - Good Alignment | word problems involving operations with fractions, include models and some equations                                                                                                                            |
| <a href="#">MA.5.AR.1.3</a> | Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                 | 3 - Fair Alignment | uses models to divide whole numbers by unit fractions and unit fractions by whole numbers, but then goes into the "trick" without giving too much explanation                                                   |
| <a href="#">MA.5.AR.2.1</a> | Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.                                  | 4 - Good Alignment | gives practice relating expressions to written words and written words to expressions                                                                                                                           |
| <a href="#">MA.5.AR.2.2</a> | Evaluate multi-step numerical expressions using order of operations.                                                                                                                     | 4 - Good Alignment | gives practice evaluating expressions with parentheses and operations, including a few with fractions and decimals                                                                                              |
| <a href="#">MA.5.AR.2.3</a> | Determine and explain whether an equation involving any of the four operations is true or false.                                                                                         | 2 - Poor Alignment | this lesson tries to incorporate the old comparative relational thinking as more of a strategy to determine                                                                                                     |

|                             |                                                                                                                                                                            |                    |                                                                                                                                                                                                                |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                                            |                    | if equations are true and has students fill in missing terms, instead of just determining whether the equation is true or false by solving the sides                                                           |
| <a href="#">MA.5.AR.2.4</a> | Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position. | 3 - Fair Alignment | many of the linked lessons do not relate to the benchmark, but the one that does gives some practice writing equations with a variable for the unknown and solving for the unknown                             |
| <a href="#">MA.5.AR.3.1</a> | Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.                                                                       | 3 - Fair Alignment | practice writing rules for patterns and determining next terms; does not seem to ask what a specific term in the pattern would be                                                                              |
| <a href="#">MA.5.AR.3.2</a> | Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.                                                                             | 3 - Fair Alignment | input output tables, but no missing terms on the table to fill in the blank like in the B1G-M                                                                                                                  |
| <a href="#">MA.5.DP.1.1</a> | Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.                                                    | 3 - Fair Alignment | No practice with decimals to the hundredths                                                                                                                                                                    |
| <a href="#">MA.5.DP.1.2</a> | Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.                                  | 3 - Fair Alignment | sometimes there is good real-world data to help students understand the real meaning of mean as shown in the clarification and example of the benchmark, but other times it just asks to calculate the mean of |

|                             |                                                                                                                                                                                       |                    |                                                                                                                                                                                                                              |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                                                       |                    | a random list of numbers, bringing no meaning to the calculation                                                                                                                                                             |
| <a href="#">MA.5.FR.1.1</a> | Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.                                                                                | 2 - Poor Alignment | the context problems relate dividing a whole number by a whole number to multiplying a whole number times the reciprocal of the other number, which doesn't bring meaning to the relationship between division and fractions |
| <a href="#">MA.5.FR.2.1</a> | Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.                                               | 4 - Good Alignment | good estimation lesson; good use of visuals to support addition and subtraction of fractions with unlike denominators                                                                                                        |
| <a href="#">MA.5.FR.2.2</a> | Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.              | 4 - Good Alignment | good use of models to support the math                                                                                                                                                                                       |
| <a href="#">MA.5.FR.2.3</a> | When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating. | 3 - Fair Alignment | only taught in one lesson; not really included in the other lessons its mentioned as a connecting benchmark is                                                                                                               |
| <a href="#">MA.5.FR.2.4</a> | Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.                                         | 3 - Fair Alignment | doesn't bridge connections between the models and properties of operations to help students understand what dividing fractions means                                                                                         |

|                             |                                                                                                                                                                                                                                                                           |                    |                                                                                                                                                         |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.GR.1.1</a> | Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.                                                                                      | 2 - Poor Alignment | discusses types of triangles and quadrilaterals, but does not have enough practice with classifying them into categories based on their characteristics |
| <a href="#">MA.5.GR.1.2</a> | Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.                                                      | 2 - Poor Alignment | discusses 3-D figures, but does not give a lot of practice with students classifying based on characteristics                                           |
| <a href="#">MA.5.GR.2.1</a> | Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.                                                                                                                                                      | 4 - Good Alignment | practice with perimeter and area with fractional and decimal side lengths                                                                               |
| <a href="#">MA.5.GR.3.1</a> | Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.                                                             | 4 - Good Alignment | opportunities to explore volume with packing with unit cubes                                                                                            |
| <a href="#">MA.5.GR.3.2</a> | Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.                                                                                                                                                           | 3 - Fair Alignment | some connections between the visual and formula but the visual practice is not necessarily sufficient                                                   |
| <a href="#">MA.5.GR.3.3</a> | Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem. | 4 - Good Alignment | composite figures, real-world problems present                                                                                                          |
| <a href="#">MA.5.GR.4.1</a> | Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.                                                                                                                                        | 3 - Fair Alignment | discusses ordered pairs and their meaning, but does not address that the x-axis and y-axis are just number lines                                        |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                                                                                                                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment | most benchmarks are well aligned to the lessons, but some are lacking with the examples and clarifications in mind                                                                       |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 4 - Good Alignment | most and at the correct level                                                                                                                                                            |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 3 - Fair Alignment | a little too much gradual release that would need to be adapted to allow students to be problem solvers and solve problems in multiple ways instead of just in 1 way shown in the lesson |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 3 - Fair Alignment | some lessons do not have sufficient details, explanations, and examples                                                                                                                  |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                             | 3 - Fair Alignment | some lessons match the level of the benchmarks but not all                                                                                                                               |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.     | 4 - Good Alignment | some times                                                                                                                                                                               |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.      | 3 - Fair Alignment | some times                                                                                                                                                                               |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject. | 4 - Good Alignment | good use of sources                                                                                                                                                                      |

|                                                                                                                                                                                                                                                          |                         |                                                                                        |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------|
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                                                                    | 4 - Good Alignment      | good use of sources                                                                    |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                                                                          | 5 - Very Good Alignment | no errors seen                                                                         |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                                                                 | 5 - Very Good Alignment | no bias seen                                                                           |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).                                                  | 4 - Good Alignment      | good strategies and models shown for the most part, but some times there is not enough |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                                                                 | 5 - Very Good Alignment | no issues seen                                                                         |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                                                                           | 5 - Very Good Alignment | no issues seen                                                                         |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                | 3 - Fair Alignment      | some contexts are more relevant than others                                            |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                   | 4 - Good Alignment      | most seem relevant                                                                     |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                    | 3 - Fair Alignment      | some connections are meaningful to students                                            |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                       | 3 - Fair Alignment      | some interdisciplinary connections made                                                |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section). | 5 - Very Good Alignment | no bias seen                                                                           |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and                                                                    | 5 - Very Good Alignment | no issues seen                                                                         |

|                                                                                                         |                    |        |
|---------------------------------------------------------------------------------------------------------|--------------------|--------|
| inhumane treatment. (An exception may be necessary for units covering animal welfare).                  |                    |        |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material? | 4 - Good Alignment | mostly |

| Presentation                                                                                                                                                                                                                                                        | Reviewer Rating    | Rating Justification                                                                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.                              | 4 - Good Alignment | the teacher may need to supplement but will not have to redesign all content                |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                                             | 4 - Good Alignment | seem to align pretty well                                                                   |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 3 - Fair Alignment | some ordering makes sense but others should be readjusted                                   |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment | seem to be decently engaging                                                                |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 3 - Fair Alignment | some times the content is well chunked but other times the content is too much at one point |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 4 - Good Alignment | tools available to help student groups                                                      |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment | pretty good at meeting the presentation requirements                                        |

| Learning | Reviewer Rating | Rating Justification |
|----------|-----------------|----------------------|
|----------|-----------------|----------------------|

|                                                                                                                                                                                            |                         |                                                                                               |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                                                    | 4 - Good Alignment      | allow students to be decently motivated                                                       |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                                                     | 3 - Fair Alignment      | sometimes they are thoroughly taught                                                          |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                                            | 5 - Very Good Alignment | clear statements of information and outcomes available                                        |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.                             | 4 - Good Alignment      | allow for some independency but other times provides too much gradual support                 |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                                               | 4 - Good Alignment      | adaptable to all learners                                                                     |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 4 - Good Alignment      | some engagement during the learning process by incorporating discussions and other techniques |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 4 - Good Alignment      | good organization of content                                                                  |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 4 - Good Alignment      | good strategies used for the most part to help students be successful                         |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | good strategies used for the most part to help students be successful                         |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 3 - Fair Alignment      | decent correlation                                                                            |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment      | good opportunities for assessing                                                              |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 5 - Very Good Alignment | strategies and materials provided to meet the needs of different students                     |

|                                                                                                                                                                        |                    |                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------|
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable? | 4 - Good Alignment | good opportunities for most               |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)              | 4 - Good Alignment | overall pretty good learning requirements |

| Special Topics                                                                                                                                                                     | Reviewer Rating         | Rating Justification                         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | not seen                                     |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | not seen                                     |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | not seen                                     |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 2 - Poor Alignment      | some SEL content and strategies incorporated |

| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | No                 |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 3 - Fair Alignment |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. |                    |

| Standard                    | Description                                                                                                                                                     | Reviewer Rating    | Rating Justification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.4.AR.1.1</a> | Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context. | 4 - Good Alignment | The standard asks for students to solve real-world problems. Lessons 5.2 problems seem contrived without an opportunity for student to make connections to the situation. Lessons 8-5 and 8-6 have more equations to solve than real-world problems. Also, the lessons seem to be dictating a particular strategy that students need to use to solve the problems. For Lesson 8-7 there are several division problems outside of a context of word problem. And those questions with word problems indicate that there is a remainder which removes the need for students to interpret remainders. |
| <a href="#">MA.4.AR.1.3</a> | Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.                                             | 3 - Fair Alignment | While the one lesson is very aligned, there is only one lesson indicated that provides opportunities for students to solve real world problems of fractions by a whole number and whole numbers by a fraction.                                                                                                                                                                                                                                                                                                                                                                                     |

|                             |                                                                                                                                                                                                                     |                         |                                                                                                                                                                                                                                                                                                                                                                        |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.4.DP.1.1</a> | Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.                                                                                                 | 3 - Fair Alignment      | Lesson 15-1 should address more questions related to most frequent and least frequent occurrences. 15-5 has students using the data, not collecting and representing the data. Same with 15-4. More attention should be given to students collecting and representing the data. Many of the lessons indicated for this standard seem to be more aligned with 4.DP.1.2. |
| <a href="#">MA.4.DP.1.2</a> | Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.                                                            | 5 - Very Good Alignment | The identified lessons address each part of the standard.                                                                                                                                                                                                                                                                                                              |
| <a href="#">MA.4.DP.1.3</a> | Solve real-world problems involving numerical data.                                                                                                                                                                 | 5 - Very Good Alignment | The identified lessons address each part of the standard.                                                                                                                                                                                                                                                                                                              |
| <a href="#">MA.4.FR.1.2</a> | Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals. | 5 - Very Good Alignment | The identified lessons address each part of the standard.                                                                                                                                                                                                                                                                                                              |
| <a href="#">MA.4.FR.2.4</a> | Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.                                                                      | 5 - Very Good Alignment | The identified lessons address each part of the standard.                                                                                                                                                                                                                                                                                                              |
| <a href="#">MA.4.M.1.1</a>  | Select and use appropriate tools to measure attributes of objects.                                                                                                                                                  | 2 - Poor Alignment      | Identified lessons 14-2 and 14-3 do not align with this standard. The standard calls for students to select and use tools to measure                                                                                                                                                                                                                                   |

|                              |                                                                                                                                                                                                                                                   |                         |                                                                                                                                                                |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                              |                                                                                                                                                                                                                                                   |                         | but only one lesson briefly addresses this.                                                                                                                    |
| <a href="#">MA.4.M.1.2</a>   | Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds. | 4 - Good Alignment      | The lessons align with the standard but there are a few instances where students complete patterns without necessarily applying knowledge of converting units. |
| <a href="#">MA.4.M.2.1</a>   | Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.                                                                                                                        | 3 - Fair Alignment      | 15-5 is loosely related to the standard. There is only one identified lesson that seems to align completely with the standard.                                 |
| <a href="#">MA.4.M.2.2</a>   | Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.                                                                                                                                      | 4 - Good Alignment      | There is only one lesson that addresses the standard.                                                                                                          |
| <a href="#">MA.4.NSO.1.1</a> | Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.                                                                                                                         | 4 - Good Alignment      | The identified lessons align good with standard.                                                                                                               |
| <a href="#">MA.4.NSO.1.5</a> | Plot, order and compare decimals up to the hundredths.                                                                                                                                                                                            | 5 - Very Good Alignment | The identified lessons align with standard.                                                                                                                    |
| <a href="#">MA.4.NSO.2.3</a> | Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.                                                                                                                                  | 5 - Very Good Alignment | The identified lessons align with standard.                                                                                                                    |
| <a href="#">MA.4.NSO.2.4</a> | Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.                                                                                         | 5 - Very Good Alignment | The identified lessons align with standard.                                                                                                                    |
| <a href="#">MA.4.NSO.2.6</a> | Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.                                                                                                                        | 5 - Very Good Alignment | The identified lessons align with standard.                                                                                                                    |
| <a href="#">MA.4.NSO.2.7</a> | Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.                                                                                                                                                      | 5 - Very Good Alignment | The identified lessons align with standard.                                                                                                                    |

|                             |                                                                                                                                                                                          |                         |                                                                                                          |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.AR.1.1</a> | Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context. | 5 - Very Good Alignment | The identified lessons align with standard.                                                              |
| <a href="#">MA.5.AR.1.2</a> | Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.                                      | 5 - Very Good Alignment | The identified lessons align with standard.                                                              |
| <a href="#">MA.5.AR.1.3</a> | Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                 | 5 - Very Good Alignment | The identified lessons align with standard.                                                              |
| <a href="#">MA.5.AR.2.1</a> | Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.                                  | 3 - Fair Alignment      | The identified lessons need more real-world contexts and exercises                                       |
| <a href="#">MA.5.AR.2.2</a> | Evaluate multi-step numerical expressions using order of operations.                                                                                                                     | 5 - Very Good Alignment | The identified lessons align with standard.                                                              |
| <a href="#">MA.5.AR.2.3</a> | Determine and explain whether an equation involving any of the four operations is true or false.                                                                                         | 4 - Good Alignment      | The identified lessons align good with standard.                                                         |
| <a href="#">MA.5.AR.2.4</a> | Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position.               | 2 - Poor Alignment      | Most identified lessons do not require students to write equations which is what the standard is asking. |
| <a href="#">MA.5.AR.3.1</a> | Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.                                                                                     | 4 - Good Alignment      | The identified lessons align good with standard.                                                         |
| <a href="#">MA.5.AR.3.2</a> | Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.                                                                                           | 4 - Good Alignment      | The identified lessons align good with standard.                                                         |
| <a href="#">MA.5.DP.1.1</a> | Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.                                                                  | 3 - Fair Alignment      | Most of the identified lessons involve interpreting the data but the standard calls                      |

|                             |                                                                                                                                                                                       |                         |                                                                                                                                                                      |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                                                       |                         | for students to collect and represent the data.                                                                                                                      |
| <a href="#">MA.5.DP.1.2</a> | Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.                                             | 4 - Good Alignment      | The identified lessons align good with standard.                                                                                                                     |
| <a href="#">MA.5.FR.1.1</a> | Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.                                                                                | 2 - Poor Alignment      | Lesson 10-2 involves addition of fractions, not division of two whole numbers as a fraction. Very few of the identified lessons involve what the standard is asking. |
| <a href="#">MA.5.FR.2.1</a> | Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.                                               | 4 - Good Alignment      | The identified lessons align good with standard.                                                                                                                     |
| <a href="#">MA.5.FR.2.2</a> | Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability.              | 5 - Very Good Alignment | The identified lessons align with standard.                                                                                                                          |
| <a href="#">MA.5.FR.2.3</a> | When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating. | 2 - Poor Alignment      | Only one of the identified lessons addresses the standard.                                                                                                           |
| <a href="#">MA.5.FR.2.4</a> | Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.                                         | 4 - Good Alignment      | The identified lessons align good with standard.                                                                                                                     |
| <a href="#">MA.5.GR.1.1</a> | Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.  | 3 - Fair Alignment      | Most of the identified lessons involve three-dimensional shapes which is not part of the standard                                                                    |

|                             |                                                                                                                                                                                                                                                                           |                         |                                                                                       |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------|
| <a href="#">MA.5.GR.1.2</a> | Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres.                                                      | 4 - Good Alignment      | One of the identified lessons is calculating volume which is outside of the standard. |
| <a href="#">MA.5.GR.2.1</a> | Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.                                                                                                                                                      | 4 - Good Alignment      | The identified lessons align good with standard.                                      |
| <a href="#">MA.5.GR.3.1</a> | Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.                                                             | 4 - Good Alignment      | The identified lessons align good with standard.                                      |
| <a href="#">MA.5.GR.3.2</a> | Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.                                                                                                                                                           | 4 - Good Alignment      | The identified lessons align good with standard.                                      |
| <a href="#">MA.5.GR.3.3</a> | Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem. | 4 - Good Alignment      | Only one of the identified lessons requires students to write an equation.            |
| <a href="#">MA.5.GR.4.1</a> | Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.                                                                                                                                        | 5 - Very Good Alignment | The identified lessons align with standard.                                           |
| <a href="#">MA.5.GR.4.2</a> | Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.                                                                                | 5 - Very Good Alignment | The identified lessons align with standard.                                           |
| <a href="#">MA.5.M.1.1</a>  | Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.                                                                                                                          | 5 - Very Good Alignment | The identified lessons align with standard.                                           |
| <a href="#">MA.5.M.2.1</a>  | Solve multi-step real-world problems involving money using decimal notation.                                                                                                                                                                                              | 5 - Very Good Alignment | The identified lessons align with standard.                                           |

|                              |                                                                                                                                                                                                                                                |                         |                                                                     |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------|
| <a href="#">MA.5.NSO.1.1</a> | Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.                                                                                  | 4 - Good Alignment      | The identified lessons align good with standard.                    |
| <a href="#">MA.5.NSO.1.2</a> | Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.                                                                                                                          | 5 - Very Good Alignment | The identified lessons align with standard.                         |
| <a href="#">MA.5.NSO.1.3</a> | Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations. | 4 - Good Alignment      | The identified lessons align good with standard.                    |
| <a href="#">MA.5.NSO.1.4</a> | Plot, order and compare multi-digit numbers with decimals up to the thousandths.                                                                                                                                                               | 2 - Poor Alignment      | Not all components of standard are met with the identified lessons. |
| <a href="#">MA.5.NSO.1.5</a> | Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.                                                                                                                                    | 4 - Good Alignment      | The identified lessons align good with standard.                    |
| <a href="#">MA.5.NSO.2.1</a> | Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.                                                                                                                                               | 4 - Good Alignment      | The identified lessons align good with standard.                    |
| <a href="#">MA.5.NSO.2.2</a> | Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.                                                                            | 3 - Fair Alignment      | Need more problems with remainders and with dividing decimals       |
| <a href="#">MA.5.NSO.2.3</a> | Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.                                                                                                           | 4 - Good Alignment      | The identified lessons align good with standard.                    |
| <a href="#">MA.5.NSO.2.4</a> | Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.                                                                                                     | 5 - Very Good Alignment | The identified lessons align with standard.                         |
| <a href="#">MA.5.NSO.2.5</a> | Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.                                                                                                               | 5 - Very Good Alignment | The identified lessons align with standard.                         |

|                                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                           |                                                                                       |

| <a href="#">ELA.K12.EE.4.1</a>   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.            | 4 - Good Alignment | The identified lessons align good with standard.                                 |
| <a href="#">ELA.K12.EE.5.1</a>   | Use the accepted rules governing a specific format to create quality work.                                                               | 4 - Good Alignment | The identified lessons align good with standard.                                 |
| <a href="#">ELA.K12.EE.6.1</a>   | Use appropriate voice and tone when speaking or writing.                                                                                 | 3 - Fair Alignment | The standard was not evident in much of the text.                                |
| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 3 - Fair Alignment | Little attention was explicitly given to EL learners.                            |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                            |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment | The majority of content was aligned to the standards.           |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 4 - Good Alignment | The majority of content was written to the correct skill level. |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 4 - Good Alignment | The majority of materials were adaptable.                       |

|                                                                                                                                                                                                         |                         |                                                                                           |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------|
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.                                                                    | 4 - Good Alignment      | The majority of materials provide sufficient details.                                     |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                                                                                       | 4 - Good Alignment      | The majority content matches the standards.                                               |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.                                                               | 4 - Good Alignment      | Some of the content could have been improved with improving complexity.                   |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 4 - Good Alignment      | Some of the content would require less time to teach and practice.                        |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 4 - Good Alignment      | There is some research-based information about student thinking missing from the content. |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 4 - Good Alignment      | The primary and secondary sources contribute to the quality.                              |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 5 - Very Good Alignment | I did not see typographical or visual errors.                                             |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 4 - Good Alignment      | Some of the contexts could be considered to be non-objective.                             |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 3 - Fair Alignment      | There is some research-based information about student thinking missing from the content. |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 4 - Good Alignment      | I did not see mistakes and inconsistencies.                                               |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 3 - Fair Alignment      | There is some research-based information about student thinking missing from the content. |

|                                                                                                                                                                                                                                                                              |                         |                                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------|
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                                    | 4 - Good Alignment      | Some contexts could be improved to be more relevant.       |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 4 - Good Alignment      | Some contexts could be improved to be more relevant.       |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 3 - Fair Alignment      | Some contexts could be improved to be more relevant.       |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 3 - Fair Alignment      | Some contexts could be improved to be more relevant.       |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 3 - Fair Alignment      | Some contexts could be improved to be more relevant.       |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | I did not see anything inappropriate.                      |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 4 - Good Alignment      | The majority of the standards are covered in the material. |

| Presentation                                                                                                                                                                                                                           | Reviewer Rating    | Rating Justification                                                                                 |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course. | 3 - Fair Alignment | More resources could be provided to the teacher.                                                     |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                | 4 - Good Alignment | Most of the components of the major tool align.                                                      |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                              | 3 - Fair Alignment | The alignment seems off. Am not sure I agree with covering volume before place value and operations. |

|                                                                                                                                                                                                                                                                     |                    |                                                                              |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------|
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment | Most of the readability is appropriate.                                      |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 3 - Fair Alignment | Some topics needed to be covered more in depth.                              |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 4 - Good Alignment | The colors of some graphics did not take color-blindness into consideration. |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 3 - Fair Alignment | More consideration to sequence and colors of visuals would be better.        |

| Learning                                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                        | 4 - Good Alignment | Many of the student pages could be perceived as unmotivational because the contexts were contrived.                                                                                             |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                         | 3 - Fair Alignment | Many topics should have been covered more in-depth.                                                                                                                                             |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                | 3 - Fair Alignment | As a student I would wonder the purpose behind many of the topics. More engagement needed to make students see the relevance.                                                                   |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers. | 3 - Fair Alignment | Most topics had teachers showing their strategy to solve the problem. To be more independent learners and thinkers, students need to be able to solve problems in ways that make sense to them. |

|                                                                                                                                                                                            |                    |                                                                                                                                                                                                 |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                                               | 3 - Fair Alignment | Most topics had teachers showing their strategy to solve the problem. To be more independent learners and thinkers, students need to be able to solve problems in ways that make sense to them. |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 3 - Fair Alignment | Students could use more partner or group work.                                                                                                                                                  |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 3 - Fair Alignment | The content sequence could be organized better.                                                                                                                                                 |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 3 - Fair Alignment | Several strategies that are successful are missing.                                                                                                                                             |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 3 - Fair Alignment | Several strategies that are successful are missing.                                                                                                                                             |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 3 - Fair Alignment | Several strategies that are successful are missing.                                                                                                                                             |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment | The exit passes seemed appropriate.                                                                                                                                                             |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 3 - Fair Alignment | Some learners would view the amount of problems on a page intimidating.                                                                                                                         |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 3 - Fair Alignment | More ELA applications could be helpful.                                                                                                                                                         |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)                                  | 3 - Fair Alignment | All learners' needs should be taken into consideration. Also, several evidence-based research seems to be excluded from the content.                                                            |

| Special Topics                                                                                                                                                                     | Reviewer Rating         | Rating Justification                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | I did not see evidence that this was violated. |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | I did not see evidence that this was violated. |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | I did not see evidence that this was violated. |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 5 - Very Good Alignment | I did not see evidence that this was violated. |

Final Recommendation

|                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                                                                                                                                                                                                                                                                                                                                                  |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 4 - Good Alignment                                                                                                                                                                                                                                                                                                                                                                                   |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | Presentation and content alignment are sufficient. The student edition is engaging and allows for accelerated learning of the standards and benchmark. Online component is necessary for students understanding. The STEM projects, activity-based and guided practice portions are beneficial for deeper understanding of content. Teacher guided instruction is vital to introduction of material. |

| Standard                    | Description                                                                                                                                                                                                         | Reviewer Rating    | Rating Justification                                                                                                                       |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.4.AR.1.1</a> | Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context.                                                     | 3 - Fair Alignment | STEM career connections videos are presented to bridge real-world application                                                              |
| <a href="#">MA.4.AR.1.3</a> | Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.                                                                                                 | 4 - Good Alignment | Activity-based exploration allows students to deepen understanding on fraction content                                                     |
| <a href="#">MA.4.DP.1.1</a> | Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.                                                                                                 | 4 - Good Alignment | Discussion questions are presented in the book so students can share ideas                                                                 |
| <a href="#">MA.4.DP.1.2</a> | Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.                                                            | 4 - Good Alignment | Numerical data is presented with purpose. Students have the ability to reflect on their understanding at the end of instructional practice |
| <a href="#">MA.4.DP.1.3</a> | Solve real-world problems involving numerical data.                                                                                                                                                                 | 4 - Good Alignment | Question items in the On Your Own section of the SE are tailored to solving real world problems                                            |
| <a href="#">MA.4.FR.1.2</a> | Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals. | 4 - Good Alignment | The Work Together prompt allows students to discuss different strategies. Base Ten Blocks are presented with easy to read attributes       |
| <a href="#">MA.4.FR.2.4</a> | Extend previous understanding of multiplication to explore the multiplication of                                                                                                                                    | 4 - Good Alignment | Manipulatives are listed and encouraged.                                                                                                   |

|                              |                                                                                                                                                                                                                                                   |                    |                                                                                                  |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------|
|                              | a fraction by a whole number or a whole number by a fraction.                                                                                                                                                                                     |                    | Numberless word problem is presented to gauge understanding of solving problems                  |
| <a href="#">MA.4.M.1.1</a>   | Select and use appropriate tools to measure attributes of objects.                                                                                                                                                                                | 4 - Good Alignment | Tools are appropriately pictured and labeled with vocabulary words                               |
| <a href="#">MA.4.M.1.2</a>   | Convert within a single system of measurement using the units: yards, feet, inches; kilometers, meters, centimeters, millimeters; pounds, ounces; kilograms, grams; gallons, quarts, pints, cups; liter, milliliter; and hours, minutes, seconds. | 4 - Good Alignment | Independent work is structured with word problems                                                |
| <a href="#">MA.4.M.2.1</a>   | Solve two-step real-world problems involving distances and intervals of time using any combination of the four operations.                                                                                                                        | 4 - Good Alignment | Few problems are presented. The Extend your thinking item requires a deep level on understanding |
| <a href="#">MA.4.M.2.2</a>   | Solve one- and two-step addition and subtraction real-world problems involving money using decimal notation.                                                                                                                                      | 4 - Good Alignment | Purchasing of items in the real world connect theory to practice                                 |
| <a href="#">MA.4.NSO.1.1</a> | Express how the value of a digit in a multi-digit whole number changes if the digit moves one place to the left or right.                                                                                                                         | 4 - Good Alignment | Online component allows students to make connections across standards                            |
| <a href="#">MA.4.NSO.1.5</a> | Plot, order and compare decimals up to the hundredths.                                                                                                                                                                                            | 4 - Good Alignment | Many questions presented. Allows for adequate student practice                                   |
| <a href="#">MA.4.NSO.2.3</a> | Multiply two whole numbers, each up to two digits, including using a standard algorithm with procedural fluency.                                                                                                                                  | 4 - Good Alignment | standard algorithm is presented in chunkable steps. Adequate practice is sufficient              |
| <a href="#">MA.4.NSO.2.4</a> | Divide a whole number up to four digits by a one-digit whole number with procedural reliability. Represent remainders as fractional parts of the divisor.                                                                                         | 3 - Fair Alignment | Partner practice through guided exploration activity                                             |

|                              |                                                                                                                                                                                          |                    |                                                                                                                                    |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.4.NSO.2.6</a> | Identify the number that is one-tenth more, one-tenth less, one-hundredth more and one-hundredth less than a given number.                                                               | 4 - Good Alignment | Learning progressions are detailed and easy for the teacher to follow.                                                             |
| <a href="#">MA.4.NSO.2.7</a> | Explore the addition and subtraction of multi-digit numbers with decimals to the hundredths.                                                                                             | 4 - Good Alignment | Teacher resources are available and can be applied across standards                                                                |
| <a href="#">MA.5.AR.1.1</a>  | Solve multi-step real-world problems involving any combination of the four operations with whole numbers, including problems in which remainders must be interpreted within the context. | 4 - Good Alignment | Math mindset allows for deeper understanding of benchmark                                                                          |
| <a href="#">MA.5.AR.1.2</a>  | Solve real-world problems involving the addition, subtraction or multiplication of fractions, including mixed numbers and fractions greater than 1.                                      | 4 - Good Alignment | Teaching tip presented in teacher addition panel creates discussion points and transitional questions                              |
| <a href="#">MA.5.AR.1.3</a>  | Solve real-world problems involving division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                 | 4 - Good Alignment | Explore and develop allow students to ask questions about multiple strategies and connect to real-world problems                   |
| <a href="#">MA.5.AR.2.1</a>  | Translate written real-world and mathematical descriptions into numerical expressions and numerical expressions into written mathematical descriptions.                                  | 4 - Good Alignment | Bring it together format creates number sense and creativity in strategies used across benchmarks. Problem solving and connections |
| <a href="#">MA.5.AR.2.2</a>  | Evaluate multi-step numerical expressions using order of operations.                                                                                                                     | 4 - Good Alignment | Using a balance to show model equations allow students to visualize that both sides of an equation must be equal                   |

|                             |                                                                                                                                                                            |                    |                                                                                                                                   |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.AR.2.3</a> | Determine and explain whether an equation involving any of the four operations is true or false.                                                                           | 4 - Good Alignment | Responsible decision-making section connects math concepts and encourages them to evaluate their own understanding of expressions |
| <a href="#">MA.5.AR.2.4</a> | Given a mathematical or real-world context, write an equation involving any of the four operations to determine the unknown whole number with the unknown in any position. | 4 - Good Alignment | Work together section allows students to peer tutor                                                                               |
| <a href="#">MA.5.AR.3.1</a> | Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.                                                                       | 3 - Fair Alignment | The example question is broken into chunkable sections for students to understand separate steps of the problems                  |
| <a href="#">MA.5.AR.3.2</a> | Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.                                                                             | 3 - Fair Alignment | Not enough practice is presented                                                                                                  |
| <a href="#">MA.5.DP.1.1</a> | Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.                                                    | 4 - Good Alignment | Activity-based exploration would be needed                                                                                        |
| <a href="#">MA.5.DP.1.2</a> | Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.                                  | 4 - Good Alignment | The online portal is necessary for student progress and growth                                                                    |
| <a href="#">MA.5.FR.1.1</a> | Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.                                                                     | 3 - Fair Alignment | ot enough practice is presented                                                                                                   |
| <a href="#">MA.5.FR.2.1</a> | Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.                                    | 4 - Good Alignment | The online portal is necessary for student progress and growth                                                                    |
| <a href="#">MA.5.FR.2.2</a> | Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and                                                          | 4 - Good Alignment | Activity-based exploration is necessary for students understanding                                                                |

|                             |                                                                                                                                                                                                                      |                    |                                                                                                                                              |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------------------------------------------------|
|                             | fractions greater than 1, with procedural reliability.                                                                                                                                                               |                    |                                                                                                                                              |
| <a href="#">MA.5.FR.2.3</a> | When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.                                | 3 - Fair Alignment | Fluency Builder should be presented for this lesson                                                                                          |
| <a href="#">MA.5.FR.2.4</a> | Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                        | 3 - Fair Alignment | the Go Online portal is necessary for student understanding and teacher facilitation                                                         |
| <a href="#">MA.5.GR.1.1</a> | Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.                                 | 4 - Good Alignment | Sufficient practice is presented                                                                                                             |
| <a href="#">MA.5.GR.1.2</a> | Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres. | 4 - Good Alignment | the benchmark is covered sufficiently. STEM activity at the beginning of the unit allows for deeper understanding and real-world application |
| <a href="#">MA.5.GR.2.1</a> | Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.                                                                                                 | 4 - Good Alignment | Formulas are presented. Students are able to work together to find area and perimeter                                                        |
| <a href="#">MA.5.GR.3.1</a> | Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.        | 4 - Good Alignment | Application of area and perimeter to volume connection. Students are asked how all of the formulas are related                               |
| <a href="#">MA.5.GR.3.2</a> | Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.                                                                                                      | 4 - Good Alignment | Deeper understanding of single level volume connected to composite figures                                                                   |

|                              |                                                                                                                                                                                                                                                                           |                    |                                                                                         |
|------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------------------------------|
| <a href="#">MA.5.GR.3.3</a>  | Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem. | 4 - Good Alignment | Math Replay videos are necessary to bridge understanding                                |
| <a href="#">MA.5.GR.4.1</a>  | Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.                                                                                                                                        | 4 - Good Alignment | Connect data to tables and graphs                                                       |
| <a href="#">MA.5.GR.4.2</a>  | Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.                                                                                | 4 - Good Alignment | The use of appropriate tools and models to justify understanding of how to model data   |
| <a href="#">MA.5.M.1.1</a>   | Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.                                                                                                                          | 3 - Fair Alignment | Word problems and STEM connection presented                                             |
| <a href="#">MA.5.M.2.1</a>   | Solve multi-step real-world problems involving money using decimal notation.                                                                                                                                                                                              | 4 - Good Alignment | Sufficient fluency practice.                                                            |
| <a href="#">MA.5.NSO.1.1</a> | Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.                                                                                                             | 4 - Good Alignment | Relationship of whole number place value and decimal value to connect across standards. |
| <a href="#">MA.5.NSO.1.2</a> | Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.                                                                                                                                                     | 4 - Good Alignment | Relationship of whole number place value and decimal value to connect across standards. |
| <a href="#">MA.5.NSO.1.3</a> | Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations.                            | 4 - Good Alignment | Relationship of whole number place value and decimal value to connect across standards. |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                         |                                                                                 |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------|
| <a href="#">MA.5.NSO.1.4</a>   | Plot, order and compare multi-digit numbers with decimals up to the thousandths.                                                                                                                                                                                                                                                                                                                                                                            | 4 - Good Alignment      | Discussion questions are built into the introduction questions                  |
| <a href="#">MA.5.NSO.1.5</a>   | Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.                                                                                                                                                                                                                                                                                                                                                 | 5 - Very Good Alignment | Choose a strategy method allows for student creativity                          |
| <a href="#">MA.5.NSO.2.1</a>   | Multiply multi-digit whole numbers including using a standard algorithm with procedural fluency.                                                                                                                                                                                                                                                                                                                                                            | 5 - Very Good Alignment | Key takeaway section aligns with the lesson objective                           |
| <a href="#">MA.5.NSO.2.2</a>   | Divide multi-digit whole numbers, up to five digits by two digits, including using a standard algorithm with procedural fluency. Represent remainders as fractions.                                                                                                                                                                                                                                                                                         | 3 - Fair Alignment      | students are allowed to choose a strategy. Builds fluency and number sense      |
| <a href="#">MA.5.NSO.2.3</a>   | Add and subtract multi-digit numbers with decimals to the thousandths, including using a standard algorithm with procedural fluency.                                                                                                                                                                                                                                                                                                                        | 4 - Good Alignment      | Sufficient fluency practice.                                                    |
| <a href="#">MA.5.NSO.2.4</a>   | Explore the multiplication and division of multi-digit numbers with decimals to the hundredths using estimation, rounding and place value.                                                                                                                                                                                                                                                                                                                  | 4 - Good Alignment      | Common error informs teachers of the ways students may misinterpret the lesson  |
| <a href="#">MA.5.NSO.2.5</a>   | Multiply and divide a multi-digit number with decimals to the tenths by one-tenth and one-hundredth with procedural reliability.                                                                                                                                                                                                                                                                                                                            | 4 - Good Alignment      | activity based and guided exploration allows for differentiation of instruction |
| <a href="#">MA.K12.MTR.1.1</a> | <p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> <li>Analyze the problem in a way that makes sense given the task.</li> <li>Ask questions that will help with solving the task.</li> <li>Build perseverance by modifying methods as needed while solving a challenging task.</li> <li>Stay engaged and maintain a positive mindset when working to solve tasks.</li> </ul> | 3 - Fair Alignment      | Discussion questions are presented in the book so students can share ideas      |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                         |                                                                                                                                  |

| <a href="#">ELA.K12.EE.6.1</a>   | Use appropriate voice and tone when speaking or writing.                                                                                 | 4 - Good Alignment      | Good use of discussion points and student perspective                            |
| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 5 - Very Good Alignment | Language development component for each lesson along with digital teacher center |

| Content                                                                                                                                       | Reviewer Rating         | Rating Justification                                                                                                |
|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment      | All standards are presented. Student practice questions need to be increased to build flency                        |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 5 - Very Good Alignment | high expectations of skills are presented. the content is written at the appropriate rigor for student acceleration |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 4 - Good Alignment      | Teaching resources are adaptable and can be used across the content and useful for supplemental aid                 |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 3 - Fair Alignment      | Only 1 introduction questions is presented and then students are expected to be able to work with the standard      |

|                                                                                                                                                                                                         |                         |                                                                                                                                       |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------|
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                                                                                       | 4 - Good Alignment      | Level of difficulty matches the acceleration content                                                                                  |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.                                                               | 4 - Good Alignment      | Level of difficulty matches the acceleration content in connection to student ability.                                                |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 4 - Good Alignment      | Lessons are broken into appropriate sizes for an acceleration class. Would not be applicable to the pace of a general education class |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 4 - Good Alignment      | sources are acceptable and reflect appropriate material                                                                               |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 4 - Good Alignment      | Sources contribute to the real-world connection, especially STEM connections                                                          |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 5 - Very Good Alignment | Content is presented accurately and appropriately                                                                                     |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 5 - Very Good Alignment | Content is accurate and free of bias                                                                                                  |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 4 - Good Alignment      | Standards and models are accurate and represent material appropriately                                                                |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 5 - Very Good Alignment | content is factual and free of inconsistencies                                                                                        |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 5 - Very Good Alignment | Content is aligned and use up-to-date references                                                                                      |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                               | 5 - Very Good Alignment | Appropriate and relevant.                                                                                                             |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                  | 5 - Very Good Alignment | Appropriate and relevant.                                                                                                             |

|                                                                                                                                                                                                                                                                              |                         |                                                                                       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------|
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 4 - Good Alignment      | Real-life connections are meaningful and allow for deeper connection of the content   |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 4 - Good Alignment      | Allow for a math mindset. Learning progression creates appropriate meaning of content |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 4 - Good Alignment      | Multicultural representation is fair and unbiased                                     |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | Not presented.                                                                        |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 5 - Very Good Alignment | benchmarks and standards are appropriately aligned and covered.                       |

| Presentation                                                                                                                                                                                                                           | Reviewer Rating         | Rating Justification                                                                  |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course. | 4 - Good Alignment      | appropriate presentation of material. teacher would not need to supplement curriculum |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                | 5 - Very Good Alignment | all components are relevant and align                                                 |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                              | 5 - Very Good Alignment | materials allow for a logical presentation. Organized and easy to follow              |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                              | 4 - Good Alignment      | appropriate reading levels. Visuals are engaging and narratives are informative       |

|                                                                                                                                                                                                                                                                     |                         |                                                                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------|
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 4 - Good Alignment      | units are chunked into easy to pace content. easy to perceive for students and teachers                        |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 5 - Very Good Alignment | UDL inclusive. Formatted for multiple learning modes and intelligences. Differentiation would be easy to adopt |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 5 - Very Good Alignment | Content is presented adequately.                                                                               |

| Learning                                                                                                                                                        | Reviewer Rating         | Rating Justification                                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                         | 4 - Good Alignment      | Digital component and math review videos are engaging                                         |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                          | 4 - Good Alignment      | multiple big ideas across standards presented to connect ideas                                |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                 | 5 - Very Good Alignment | Learning objectives are clear and concise                                                     |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.  | 5 - Very Good Alignment | discussion probe questions, math thoughts, and guided learning allow for independent thinkers |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                    | 5 - Very Good Alignment | UDL inclusive. Many different application questions surrounding standards                     |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                          | 5 - Very Good Alignment | Accelerated approach allow for out of the box thinking                                        |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives. | 5 - Very Good Alignment | Extended projects and activities are presented                                                |

|                                                                                                                                                                                            |                         |                                                                             |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------|
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 5 - Very Good Alignment | Teacher materials are resources included with many strategies               |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 5 - Very Good Alignment | resources used to target learning outcomes and student achievement          |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 4 - Good Alignment      | resources and content are aligned for student achievement                   |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 5 - Very Good Alignment | resources and content are aligned for student achievement                   |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 5 - Very Good Alignment | Consideration of diverse learners and multiple modes of learning            |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 5 - Very Good Alignment | Math thinking and reasoning connected to reading and writing learning goals |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)                                  | 5 - Very Good Alignment | Learning requirements are sufficient                                        |

| Special Topics                                                                                                                                                                     | Reviewer Rating    | Rating Justification                                                                       |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 4 - Good Alignment | No presentation of CRT in materials                                                        |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 4 - Good Alignment | Omitted. Not presented in either TE or SE                                                  |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 4 - Good Alignment | No presentation of social justice or CRT                                                   |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 3 - Fair Alignment | Social Awareness topics are listed in the teachers manual. Example pg 521 in TE includes a |

| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 3 - Fair Alignment                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | I don't think this is the best option for the state of Florida to move forward with its new standards. The information provided in the teacher edition almost took away teacher autonomy through the use of a script and had teachers using multiple platforms to find all the resources needed for the lessons. The teacher edition pages simply contained too much information in a manner that wasn't the best presentation mode. Critical components could easily |

be lost to teachers while they are using this curriculum. I wish that the student edition had more prompts for students to engage in discussion, which would further emphasize to the students that math class is not an independent, quiet activity. I also found that this curriculum didn't offer enough opportunities for manipulatives and drawings when it came to the student independent section (labeled "on my own"). There was a heavy emphasis on procedural knowledge.

| Standard                    | Description                                                                                                                                                     | Reviewer Rating         | Rating Justification                                                                                                                                                                                                   |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.4.AR.1.1</a> | Solve real-world problems involving multiplication and division of whole numbers including problems in which remainders must be interpreted within the context. | 5 - Very Good Alignment | Variety of representations of multiplicative comparison. All components of standards addressed.                                                                                                                        |
| <a href="#">MA.4.AR.1.3</a> | Solve real-world problems involving multiplication of a fraction by a whole number or a whole number by a fraction.                                             | 5 - Very Good Alignment | Addresses all components of standards but wish there was more room for student work on the page in the workbook                                                                                                        |
| <a href="#">MA.4.DP.1.1</a> | Collect and represent numerical data, including fractional values, using tables, stem-and-leaf plots or line plots.                                             | 3 - Fair Alignment      | Doesn't allow students to create a table but only allows students to use information provided in tables to order numbers. For the most part opportunities to collect data were not presented.                          |
| <a href="#">MA.4.DP.1.2</a> | Determine the mode, median or range to interpret numerical data including fractional values, represented with tables, stem-and-leaf plots or line plots.        | 3 - Fair Alignment      | Data sets always had only one mode. Clarification of the standard indicated that students need to be exposed to problems with no modes as well as more than one mode. Also, while the tasks themselves are real world, |

|                             |                                                                                                                                                                                                                     |                    |                                                                                                                                                                                                                                                                                                                                |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                                                                                     |                    | they are not necessarily "real world" to the lives of students and connection/understanding of the context cannot be authentically made                                                                                                                                                                                        |
| <a href="#">MA.4.DP.1.3</a> | Solve real-world problems involving numerical data.                                                                                                                                                                 | 4 - Good Alignment | While the tasks themselves are real world, they are not necessarily "real world" to the lives of students and connection/understanding of the context cannot be authentically made                                                                                                                                             |
| <a href="#">MA.4.FR.1.2</a> | Use decimal notation to represent fractions with denominators of 10 or 100, including mixed numbers and fractions greater than 1, and use fractional notation with denominators of 10 or 100 to represent decimals. | 3 - Fair Alignment | 6 of the problems focus on a pictorial representation, but no manipulatives are encouraged. There are also no number lines                                                                                                                                                                                                     |
| <a href="#">MA.4.FR.2.4</a> | Extend previous understanding of multiplication to explore the multiplication of a fraction by a whole number or a whole number by a fraction.                                                                      | 2 - Poor Alignment | The introduction of numberlines is only provided in one problem and is given after the procedure has been introduced. The commutative property is not visited within the unit either.                                                                                                                                          |
| <a href="#">MA.4.M.1.1</a>  | Select and use appropriate tools to measure attributes of objects.                                                                                                                                                  | 2 - Poor Alignment | Attributes did include length, weight, and volume but no fractions or decimals were used with the presentation of length. It was also a procedural based lesson. Time was included, but is not addressed by this standard. Width, Mass, and Temperature were all missing from the textbook but were clarified in the standard. |

|                              |                                                                                                                                                                                                                                                   |                         |                                                                                                                                                                                                                                                                                             |

| <a href="#">MA.5.AR.3.1</a> | Given a numerical pattern, identify and write a rule that can describe the pattern as an expression.                                                                     | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                                    |
| <a href="#">MA.5.AR.3.2</a> | Given a rule for a numerical pattern, use a two-column table to record the inputs and outputs.                                                                           | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                                    |
| <a href="#">MA.5.DP.1.1</a> | Collect and represent numerical data, including fractional and decimal values, using tables, line graphs or line plots.                                                  | 4 - Good Alignment      | Tables were included in the student work, but students didn't collect information to use in tables. All tables were predetermined.                                          |
| <a href="#">MA.5.DP.1.2</a> | Interpret numerical data, with whole-number values, represented with tables or line plots by determining the mean, mode, median or range.                                | 4 - Good Alignment      | The clarification of the standard was not addressed in the student work. No problems include balancing out or equal shares when solving for mean, median, range, or mode.   |
| <a href="#">MA.5.FR.1.1</a> | Given a mathematical or real-world problem, represent the division of two whole numbers as a fraction.                                                                   | 5 - Very Good Alignment | All components of this standard are addressed but are presented in a procedural manner                                                                                      |
| <a href="#">MA.5.FR.2.1</a> | Add and subtract fractions with unlike denominators, including mixed numbers and fractions greater than 1, with procedural reliability.                                  | 4 - Good Alignment      | Addresses all components except properties to add and subtract fractions with unlike denominators                                                                           |
| <a href="#">MA.5.FR.2.2</a> | Extend previous understanding of multiplication to multiply a fraction by a fraction, including mixed numbers and fractions greater than 1, with procedural reliability. | 4 - Good Alignment      | Limited use of manipulatives, drawings, and properties. Typically only included in "Learn" section. These elements were outlined in the clarification section of standard.. |

|                             |                                                                                                                                                                                                                      |                         |                                                                                                                                                                |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.FR.2.3</a> | When multiplying a given number by a fraction less than 1 or a fraction greater than 1, predict and explain the relative size of the product to the given number without calculating.                                | 2 - Poor Alignment      | 12.1 was the only section that explicitly relied on reasonableness and estimation. No decimals included. The remainder of the sections relied on calculations. |
| <a href="#">MA.5.FR.2.4</a> | Extend previous understanding of division to explore the division of a unit fraction by a whole number and a whole number by a unit fraction.                                                                        | 3 - Fair Alignment      | Limited use of manipulatives and drawings. Typically only found in the "learn" section and directions said to use a representation to solve the procedure.     |
| <a href="#">MA.5.GR.1.1</a> | Classify triangles or quadrilaterals into different categories based on shared defining attributes. Explain why a triangle or quadrilateral would or would not belong to a category.                                 | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                       |
| <a href="#">MA.5.GR.1.2</a> | Identify and classify three-dimensional figures into categories based on their defining attributes. Figures are limited to right pyramids, right prisms, right circular cylinders, right circular cones and spheres. | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                       |
| <a href="#">MA.5.GR.2.1</a> | Find the perimeter and area of a rectangle with fractional or decimal side lengths using visual models and formulas.                                                                                                 | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                       |
| <a href="#">MA.5.GR.3.1</a> | Explore volume as an attribute of three-dimensional figures by packing them with unit cubes without gaps. Find the volume of a right rectangular prism with whole-number side lengths by counting unit cubes.        | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                       |
| <a href="#">MA.5.GR.3.2</a> | Find the volume of a right rectangular prism with whole-number side lengths using a visual model and a formula.                                                                                                      | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                       |
| <a href="#">MA.5.GR.3.3</a> | Solve real-world problems involving the volume of right rectangular prisms, including problems with an unknown edge length, with whole-number edge lengths                                                           | 5 - Very Good Alignment | Addresses all components of the standard                                                                                                                       |

|                              |                                                                                                                                                                                                                                                |                         |                                                                                                                               |
|------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------|
|                              | using a visual model or a formula. Write an equation with a variable for the unknown to represent the problem.                                                                                                                                 |                         |                                                                                                                               |
| <a href="#">MA.5.GR.4.1</a>  | Identify the origin and axes in the coordinate system. Plot and label ordered pairs in the first quadrant of the coordinate plane.                                                                                                             | 3 - Fair Alignment      | Doesn't address connection from coordinate plane to number line. Very limited exposure connecting tables to coordinate plane. |
| <a href="#">MA.5.GR.4.2</a>  | Represent mathematical and real-world problems by plotting points in the first quadrant of the coordinate plane and interpret coordinate values of points in the context of the situation.                                                     | 4 - Good Alignment      | Not many real-world connections provided but some are from sections listed.                                                   |
| <a href="#">MA.5.M.1.1</a>   | Solve multi-step real-world problems that involve converting measurement units to equivalent measurements within a single system of measurement.                                                                                               | 5 - Very Good Alignment | Addresses all components of the standard                                                                                      |
| <a href="#">MA.5.M.2.1</a>   | Solve multi-step real-world problems involving money using decimal notation.                                                                                                                                                                   | 5 - Very Good Alignment | Addresses all components of the standard                                                                                      |
| <a href="#">MA.5.NSO.1.1</a> | Express how the value of a digit in a multi-digit number with decimals to the thousandths changes if the digit moves one or more places to the left or right.                                                                                  | 5 - Very Good Alignment | Addresses all components of the standard                                                                                      |
| <a href="#">MA.5.NSO.1.2</a> | Read and write multi-digit numbers with decimals to the thousandths using standard form, word form and expanded form.                                                                                                                          | 5 - Very Good Alignment | Addresses all components of standards but only provides examples of standard form in correct order.                           |
| <a href="#">MA.5.NSO.1.3</a> | Compose and decompose multi-digit numbers with decimals to the thousandths in multiple ways using the values of the digits in each place. Demonstrate the compositions or decompositions using objects, drawings and expressions or equations. | 3 - Fair Alignment      | Opportunities to use objects and drawings to compose and decompose were not included.                                         |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                         |                                                                                                                                                                                                                                                                                                                        |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.5.NSO.1.4</a>   | Plot, order and compare multi-digit numbers with decimals up to the thousandths.                                                                                                                                                                                                                                                                                                                                                                            | 4 - Good Alignment      | Limited use of plotting on a number line (2 problems only).                                                                                                                                                                                                                                                            |
| <a href="#">MA.5.NSO.1.5</a>   | Round multi-digit numbers with decimals to the thousandths to the nearest hundredth, tenth or whole number.                                                                                                                                                                                                                                                                                                                                                 | 4 - Good Alignment      | Limited use of rounding to the thousandths place                                                                                                                                                                                                                                                                       |

Not as many opportunities in the student pages.</p>                                                                                                                                                                                                                                                      |
| <a href="#">MA.K12.MTR.7.1</a> | <p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> <li>• Connect mathematical concepts to everyday experiences.</li> <li>• Use models and methods to understand, represent and solve problems.</li> <li>• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul>   | <p>4 - Good Alignment</p>      | <p>Would have liked access to the STEM videos. Was unable to open to determine if they align. While the aforementioned sections do exist, they are easily overlooked as the amount of information on each page is overwhelming. The activities have to be accessed from a digital source, which could prevent teachers from using them.</p> |
| <a href="#">ELA.K12.EE.1.1</a> | <p>Cite evidence to explain and justify reasoning.</p>                                                                                                                                                                                                                                                                                                                                                                                                                      | <p>4 - Good Alignment</p>      | <p>Would have liked to see some prompts in the student work sections ("On my own")</p>                                                                                                                                                                                                                                                      |
| <a href="#">ELA.K12.EE.2.1</a> | <p>Read and comprehend grade-level complex texts proficiently.</p>                                                                                                                                                                                                                                                                                                                                                                                                          | <p>5 - Very Good Alignment</p> | <p>Words used in word problems are appropriate for this grade level.</p>                                                                                                                                                                                                                                                                    |
| <a href="#">ELA.K12.EE.3.1</a> | <p>Make inferences to support comprehension.</p>                                                                                                                                                                                                                                                                                                                                                                                                                            | <p>4 - Good Alignment</p>      | <p>Ignites are offered once per chapter.</p>                                                                                                                                                                                                                                                                                                |

|                                  |                                                                                                                                          |                         |                                                                                                                                                                                                                                                                                 |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">ELA.K12.EE.4.1</a>   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.            | 3 - Fair Alignment      | I struggled to find the think about it questions that are referenced. Can be easily overlooked. Prompts on student pages, and not just teacher pages, would be very beneficial to get studnets to understand the role and importance of discussion in a matheamatics classroom. |
| <a href="#">ELA.K12.EE.5.1</a>   | Use the accepted rules governing a specific format to create quality work.                                                               | 5 - Very Good Alignment | Addresses all components of this standard                                                                                                                                                                                                                                       |
| <a href="#">ELA.K12.EE.6.1</a>   | Use appropriate voice and tone when speaking or writing.                                                                                 | 4 - Good Alignment      | This is difficult to judge without implementation of the curriculum. It offers students the opportunities to engage in conversation, if the teacher uses the teacher edition and reads all of the components. It could very easily be overlooked though.                        |
| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 4 - Good Alignment      | The teachers edition does provide ELL support in each section.                                                                                                                                                                                                                  |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                          |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 3 - Fair Alignment | Some standards are not addressed to include all the clarification components. |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 3 - Fair Alignment | Some standards are not addressed to include all the clarification components. |

|                                                                                                                                                                                                         |                         |                                                                                                                                                                                                                                                  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                                                                                      | 3 - Fair Alignment      | They can be used for classroom instruction, but the focus is very procedural on majority of the topics.                                                                                                                                          |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.                                                                    | 3 - Fair Alignment      | More opportunities need to exist outside of the first problem of the lesson (learn section) so students see the manipulatives/drawings multiple times and create conceptual understanding of the topic before moving on to procedural knowledge. |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                                                                                       | 4 - Good Alignment      | Addresses this standard in a procedural level of difficulty for most standards.                                                                                                                                                                  |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.                                                               | 5 - Very Good Alignment | Addresses this standard                                                                                                                                                                                                                          |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 4 - Good Alignment      | Each lesson had a timer with recommend amount of time above each section                                                                                                                                                                         |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 5 - Very Good Alignment | Addresses this standard                                                                                                                                                                                                                          |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 5 - Very Good Alignment | Addresses this standard                                                                                                                                                                                                                          |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 5 - Very Good Alignment | Addresses this standard                                                                                                                                                                                                                          |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 5 - Very Good Alignment | Addresses this standard                                                                                                                                                                                                                          |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 4 - Good Alignment      | Does not move through CSA model appropriately. Very procedure based                                                                                                                                                                              |

|                                                                                                                                                                                                                                                                              |                         |                                                                                                                                                            |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                                                                                     | 5 - Very Good Alignment | Addresses this standard                                                                                                                                    |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                                                                                               | 4 - Good Alignment      | Does not move through CSA model appropriately. Very procedure based                                                                                        |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                                    | 4 - Good Alignment      | Has areas for improvement; some standards not fully addressed                                                                                              |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 4 - Good Alignment      | Has room for improvement                                                                                                                                   |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 3 - Fair Alignment      | Not all "real-world" problems are necessarily "real-world" to the lives of the students using the text, therefore reducing the overall meaning to students |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 4 - Good Alignment      | Has STEM connection at beginning of each chapter.                                                                                                          |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 5 - Very Good Alignment | Addresses this standard                                                                                                                                    |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | Addresses this standard                                                                                                                                    |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 3 - Fair Alignment      | Some are well covered and others have a lot of room for improvement to cover the clarifications of the standards.                                          |

| Presentation | Reviewer Rating | Rating Justification |
|--------------|-----------------|----------------------|
|--------------|-----------------|----------------------|

|                                                                                                                                                                                                                                                                     |                         |                                                                                                                                               |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.                              | 3 - Fair Alignment      | Opportunities for manipulatives and drawings are not embedded in the student work sections but are typically only found in the learn section. |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                                             | 5 - Very Good Alignment | Addresses this standard                                                                                                                       |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 3 - Fair Alignment      | The materials are consistent, but the organization is difficult to follow and keep up with                                                    |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment      | The student pages ("On my own") offer few opportunities for engaging in listening and reading is only for word problems to solve.             |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 3 - Fair Alignment      | Moves to procedures very quickly                                                                                                              |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 3 - Fair Alignment      | Did not see UDL questionnaire attached.                                                                                                       |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 3 - Fair Alignment      | Consistent presentation but the teacher edition is difficult to keep up with and follow without overlooking critical information              |

| Learning                                                                                                               | Reviewer Rating    | Rating Justification                                                                              |
|------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                | 3 - Fair Alignment | Student pages ("On my won") don't have many visuals or places for students to maintain motivation |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes. | 4 - Good Alignment | Covers all necessary big ideas                                                                    |

|                                                                                                                                                                                            |                    |                                                                                                                                    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------------------|
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                                            | 3 - Fair Alignment | Not in the student edition but in the teacher edition is better addressed.                                                         |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.                             | 4 - Good Alignment | Addresses the standard but can easily be lost in the way the material is presented.                                                |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                                               | 3 - Fair Alignment | Language development, self-management, english learner scaffolds. No ESE explicitly addressed, but misconception section provided. |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 3 - Fair Alignment | Lack of manipulatives/drawings in student pages ("On my own")                                                                      |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 3 - Fair Alignment | Student pages do not include goals/objectives. Teacher edition only.                                                               |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 3 - Fair Alignment | Moves quickly through conceptual understanding with only 1-2 examples typically in each lesson. Very procedure focused.            |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment | Teacher edition includes a variety of strategies                                                                                   |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 4 - Good Alignment | Evident in exit tickets/teacher edition strategies                                                                                 |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment | Evident in exit tickets/teacher edition strategies                                                                                 |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 3 - Fair Alignment | Did not see UDL attachment. Does consider needs of ELL students.                                                                   |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 3 - Fair Alignment | While they are included in the teacher edition, I think they could be easily overlooked due                                        |

|                                                                                                                                                           |                    |                                                                                                         |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------------------------------------------------|
|                                                                                                                                                           |                    | to the amount of information and the way the information is presented to the user.                      |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.) | 4 - Good Alignment | There are opportunities for improvement. Communicating these goals with students in writing would help. |

| Special Topics                                                                                                                                                                     | Reviewer Rating         | Rating Justification |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | Does not include     |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | Does not include     |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | Does not include     |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 5 - Very Good Alignment | Does not include     |

Good morning Kim,

Thanks for following up. Please see the attached evaluations for Grade 4 Accelerated and Grade 5. I have also attached the updated spreadsheet.

Please let me know if you have any questions.

See you soon,  
Lauren

Hi Amber,  
We appreciate the opportunity for this initial meeting on Monday. We are still in need of the Grade 4 Accelerated and the Grade 5 Reviews like the PDF documents we received for grade 1 and grade 8.

Regards,  
Kim

Hello Kim,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Monday, April 25<sup>th</sup>, at 9:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time McGraw Hill has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Monday.

McGraw Hill - appeal

Hello again team,

Thank you for your hard work with getting these reviewed. Here are two from McGraw Hill that need standards review. Grade One has an additional special topic portion at the bottom that our team will look at.

Please let me know if you have any trouble accessing or have questions.

Thanks!  
Lauren

Hi again,

Just to clarify, it looks like there are only 2 standards that you haven't approved, is that correct? Also, the one that you stated "no comment necessary" does that mean you've approved that one?

Thanks,

**Subject:** FW: McGraw Hill Appeal for Grade 1, 5, and 8

Hello again team,

Thank you for your hard work with getting these reviewed. Here are two from McGraw Hill that need standards review. Grade One has an additional special topic portion at the bottom that our team will look at.

Please let me know if you have any trouble accessing or have questions.

Thanks!  
Lauren

**Subject:** McGraw Hill Appeal for Grade 1, 5, and 8

Good Afternoon,  
Please find the attached appeal spreadsheets from McGraw Hill LLC for the following:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |

We appreciate the opportunity to submit our appeal. The appeal spreadsheet for Reveal Math Grade 4 Accelerated, which is separate from our K-5 series, will be submitted early next week.

Regards,  
Kim

**Attachment(s):** "image002.png", "image005.png", "image006.png", "image007.png"

Got it, thanks, I think I understand.

For MA.1.GR.1.4 do you think that we need to ask the publisher for a link to where that is covered in the textbook in order for you to assess standard coverage? It sounds like the publisher is saying that they have ample practice pages but those may be supplemental, and the link they provided seems to be to supplemental materials. Since we'll need to meet with them to go over the two that you haven't yet approved I think we can ask them for the link then. I'm trying to clarify before sending them feedback so that we are all on the same page.

Thanks!

Good morning Amber,

Yes, there were still 2 benchmarks that needed work from this publisher. The area where I stated "no comment necessary" was not addressing a benchmark, but instead the supplemental resources they have available. In regards to standard/ benchmark alignment I am not sure how to address their comment provided- see below.

*"There are several comments noting "not enough practice" for certain standards in Grade 1, including MA.1.GR.1.4.*

*In all grades, Reveal Math offers additional practice in both print and digital formats outside of the core (print) student edition. Please see sample extra practice pages for Grade 1, Lesson 6-8."*

Hi again,

Just to clarify, it looks like there are only 2 standards that you haven't approved, is that correct? Also, the one that you stated "no comment necessary" does that mean you've approved that one?

Thanks,

Got it, thanks, I think I understand.

For *MA.1.GR.1.4* do you think that we need to ask the publisher for a link to where that is covered in the textbook in order for you to assess standard coverage? It sounds like the publisher is saying that they have ample practice pages but those may be supplemental, and the link they provided seems to be to supplemental materials. Since we'll need to meet with them to go over the two that you haven't yet approved I think we can ask them for the link then. I'm trying to clarify before sending them feedback so that we are all on the same page.

**Attachment(s):** "image001.png", "image002.png", "image003.png", "image004.png"

Good morning Amber,

Yes, there were still 2 benchmarks that needed work from this publisher. The area where I stated "no comment necessary" was not addressing a benchmark, but instead the supplemental resources they have available. In regards to standard/ benchmark alignment I am not sure how to address their comment provided- see below.

*"There are several comments noting "not enough practice" for certain standards in Grade 1, including MA.1.GR.1.4.*

*In all grades, Reveal Math offers additional practice in both print and digital formats outside of the core (print) student edition. Please see sample extra practice pages for Grade 1, Lesson 6-8."*

All the best,

Hi again,

Just to clarify, it looks like there are only 2 standards that you haven't approved, is that correct? Also, the one that you stated "no comment necessary" does that mean you've approved that one?

Thanks,

Hello again team,

Thank you for your hard work with getting these reviewed. Here are two from McGraw Hill that need standards review. Grade One has an additional special topic portion at the bottom that our team will look at.

Please let me know if you have any trouble accessing or have questions.

Thanks!  
Lauren

Hi Kim,

Thanks for sending this and for your team's hard work on making these changes. The document that you provided is helpful to see what changes will be made. However, the department needs to be able to review the changes in the actual materials. When I log in using the credentials that were provided for the review process, I'm still seeing the original materials. Is it possible to update the materials to reflect your changes?  
Please let me know if you have questions.

Thank you,

Hi Kim,

I went through the links that you provided yesterday afternoon and I'm still not seeing the changes as reflected in the document you sent yesterday. For example, for lesson 4-9 this is what I'm seeing:

This looks to be the old version as the "Math Mindset Objective" portion has been changed on the document that you sent. Am I looking in the right place?

Thanks,

Hi Kim,

I went through the links that you provided yesterday afternoon and I'm still not seeing that changes as reflected in the document you sent yesterday. For example, for lesson 4-9 this is what I'm seeing:

This looks to be the old version as the "Math Mindset Objective" portion has been changed on the document that you sent.

Hi Amber,

Thank you for providing this feedback. To respond as quickly as possible, we provided new links to only the touched pages within the reviewer tool rather than the entire reviewer tool.

Can you confirm that the following links to our standards review tool is what you are using for the review of the actual content?

Grade 1 <https://s3.amazonaws.com/e-commerce-prod.mheducation.com/unitas/school/explore/sites/florida/best-links-fl-reveal-math-g1.pdf>

Grade 5 <https://s3.amazonaws.com/e-commerce-prod.mheducation.com/unitas/school/explore/sites/florida/best-links-fl-reveal-math-g5.pdf>

Grade 8 <https://s3.amazonaws.com/e-commerce-prod.mheducation.com/unitas/school/explore/sites/florida/best-links-fl-reveal-math-g8.pdf>

Grade 4 Accelerated <https://s3.amazonaws.com/e-commerce-prod.mheducation.com/unitas/school/explore/sites/florida/best-links-fl-reveal-math-g4-accelerated.pdf>

Regards,  
Kim

Hi Kim,

Thanks for sending this and for your team's hard work on making these changes. The document that you provided is helpful to see what changes will be made. However, the department needs to be able to review the changes in the actual materials. When I log in using the credentials that were provided for the review process, I'm still seeing the original materials. Is it possible to update the materials to reflect your changes?

Please let me know if you have questions.

Thank you,

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

Hi Kim,

Our content specialists have provided additional comments on the spreadsheet. I've set up a meeting for today at 11:00 am to discuss standards for grades 1 and 8. I'm also attaching the spreadsheets. Anything marked in green has been approved, anything marked in red needs additional discussion/edits.

Good morning,

We are wondering what the next part of the appeal process is. Will there be further communication from the Bureau of Standards and Instructional Support?

Regards,  
Kim

Reviewer 2: "Provides suitable instruction to build understanding and allow student practice. Would like to have seen some problems begin with the sum." McGraw Hill updated Lesson 4-8 by changing the placement of the sum (having the sum on the left side of the equation) in Exercises 4 and 6 and further increasing rigor by updating Exercises 8 and 9. | <a href="http://www.nheducation.com/units/school/explore/sites/florida/standards/grade-1/ma-1-ar-1-1/ma-1-ar-1-1-florida-reveal-math-student-edition-gl-lesson-4-8.pdf">http://www.nheducation.com/units/school/explore/sites/florida/standards/grade-1/ma-1-ar-1-1/ma-1-ar-1-1-florida-reveal-math-student-edition-gl-lesson-4-8.pdf</a>                                                                                                                                 |

|    | MA.8.GR.2.2  |                                                                                                                                | <p>Reviewer comment: "Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concepts. Excellent exposure and examples for the students who need enrichment."</p> <p>Lesson 8-5 was updated with revised instruction to help struggling students connect scale factor (learned in Grade 7) to dilation by looking at a non-geometric real world figures.</p> <p>All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every student to achieve mastery.</p>                                                                                                                                                                                                                  | <a href="#">link to 8-5 TIE</a> |
| 16 |              |                                                                                                                                | <p>Reviewer comment: "Some of the problems in the practice for this benchmark are not aligned well or outside the limits/clarifications. There are not enough examples for the struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment. Application problems in section 8.1 practice are not at all connected to the benchmark; Section 8-2 'Build Perseverance' problem is way outside the limits/clarifications for this benchmark."</p> <p>Lesson 8-1 was updated with a revised Apply problem and corresponding practice exercises for stronger alignment to the benchmark.</p> <p>All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital formats. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. Hi Kim,

Our content specialists have provided additional comments on the spreadsheet. I've set up a meeting for today at 11:00 am to discuss standards for grades 1 and 8. I'm also attaching the spreadsheets. Anything marked in green has been approved, anything marked in red needs additional discussion/edits.

**Subject:** RE: McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good morning,

We are wondering what the next part of the appeal process is. Will there be further communication from the Bureau of Standards and Instructional Support?

Regards,

Kim

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every student to achieve mastery. | <a href="#">link to 10-4 TE</a><br><a href="#">link to 8-4 SE</a>                                     |

| 16 | MA.8.GR.2.2  |   | Reviewer comment: "Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concepts. Excellent exposure and examples for the students who need enrichment."<br><br>Lesson 8-5 was updated with revised instruction to help struggling students connect scale factor (learned in Grade 7) to dilation by looking at a non-geometric real world figures.<br><br>All Florida Reveal Math lessons have 12-20 practice exercises in the Student edition as well as 15-20 practice exercises available as Additional Practice in both print-based and digital forms. The digital practice assignments include algorithmic exercises that offer students unlimited practice with a given skill or concept. In addition, all Florida Reveal Math students have access to ALEKS, a research-based, online learning program that provides the individual support required for every student to achieve mastery. | <a href="#">link to 8-5 SE</a>  |
| 17 | MA.8.GR.2.3  |   | Reviewer comment: "Some of the problems in the practice for this benchmark are not aligned well or outside the limits/clarifications. There are not enough examples for the struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment. Application problems in section 8.1 practice are not at all connected to the benchmark; Section 8-2 'Build Perseverance' problem is way outside the limits/clarifications for this benchmark."<br><br>Lesson 8-1 was updated with a revised Apply problem and corresponding practice exercises for stronger alignment to the benchmark.                                                                                                                                                                                                                                                                                                                                 | <a href="#">link to 8-1 SE</a>  |

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

Hi Kim,

Our content specialists have provided additional comments on the spreadsheet. I've set up a meeting for today at 11:00 am to discuss standards for grades 1 and 8. I'm also attaching the spreadsheets. Anything marked in green has been approved, anything marked in red needs additional discussion/edits.

Good morning,

We are wondering what the next part of the appeal process is. Will there be further communication from the Bureau of Standards and Instructional Support?

Regards,  
Kim

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

**Attachment(s):** "McGraw Hill-Appeals K-12 Mathematics.xlsx", "Bid 410-Grade 1.pdf", "Bid 419-Grade 8 Pre-Algebra.pdf", "image002.png", "image001.png"

Good afternoon,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Final Recommendation

|                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                                                                                                                                                                                                                          |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 3 - Fair Alignment                                                                                                                                                                                                                                                           |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | This series does align with BEST standards. It does not provide all standards with adequate practice to show student mastery or success. The lessons are short and would require classroom teachers to supplement. The digital platform is nice and can be navigated easily. |

| Standard                    | Description                                                                                                                                                                                                                                                    | Reviewer Rating         | Rating Justification                           |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------|
| <a href="#">MA.1.AR.1.1</a> | Apply properties of addition to find a sum of three or more whole numbers.                                                                                                                                                                                     | 3 - Fair Alignment      | Rigor is not there for the BEST standards      |
| <a href="#">MA.1.AR.1.2</a> | Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.                                                                                                                                              | 5 - Very Good Alignment | multiple opportunities for practice            |
| <a href="#">MA.1.AR.2.1</a> | Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.                                                                                                                                             | 4 - Good Alignment      | meets BEST standard                            |
| <a href="#">MA.1.AR.2.2</a> | Determine and explain if equations involving addition or subtraction are true or false.                                                                                                                                                                        | 4 - Good Alignment      | multiple opportunities for practice            |
| <a href="#">MA.1.AR.2.3</a> | Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.                                                                                                                     | 4 - Good Alignment      | meets BEST standard                            |
| <a href="#">MA.1.DP.1.1</a> | Collect data into categories and represent the results using tally marks or pictographs.                                                                                                                                                                       | 2 - Poor Alignment      | Not enough instruction - only 1 lesson on each |
| <a href="#">MA.1.DP.1.2</a> | Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories.                                                                                                    | 2 - Poor Alignment      | Not enough instruction - only 1 lesson on each |
| <a href="#">MA.1.FR.1.1</a> | Partition circles and rectangles into two and four equal-sized parts. Name the parts of the whole using appropriate language including halves or fourths.                                                                                                      | 5 - Very Good Alignment | multiple opportunities for practice            |
| <a href="#">MA.1.GR.1.1</a> | Identify, compare and sort two- and three-dimensional figures based on their defining attributes. Figures are limited to circles, semi-circles, triangles, rectangles, squares, trapezoids, hexagons, spheres, cubes, rectangular prisms, cones and cylinders. | 5 - Very Good Alignment | multiple opportunities for practice            |
| <a href="#">MA.1.GR.1.2</a> | Sketch two-dimensional figures when given defining attributes. Figures are limited to triangles, rectangles, squares and hexagons.                                                                                                                             | 3 - Fair Alignment      | not many opportunities for practice            |

|                              |                                                                                                                                                                                                                                              |                         |                                     |
|------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------|
| <a href="#">MA.1.GR.1.3</a>  | Compose and decompose two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares, trapezoids, hexagons, cubes, rectangular prisms, cones and cylinders.                                         | 4 - Good Alignment      | meets BEST standard                 |
| <a href="#">MA.1.GR.1.4</a>  | Given a real-world object, identify parts that are modeled by two- and three-dimensional figures. Figures are limited to semi-circles, triangles, rectangles, squares and hexagons, spheres, cubes, rectangular prisms, cones and cylinders. | 3 - Fair Alignment      | not many opportunities for practice |
| <a href="#">MA.1.M.1.1</a>   | Estimate the length of an object to the nearest inch. Measure the length of an object to the nearest inch or centimeter.                                                                                                                     | 5 - Very Good Alignment | multiple opportunities for practice |
| <a href="#">MA.1.M.1.2</a>   | Compare and order the length of up to three objects using direct and indirect comparison.                                                                                                                                                    | 4 - Good Alignment      | meets BEST standard                 |
| <a href="#">MA.1.M.2.1</a>   | Using analog and digital clocks, tell and write time in hours and half-hours.                                                                                                                                                                | 3 - Fair Alignment      | not many opportunities for practice |
| <a href="#">MA.1.M.2.2</a>   | Identify pennies, nickels, dimes and quarters, and express their values using the ¢ symbol. State how many of each coin equal a dollar.                                                                                                      | 3 - Fair Alignment      | not many opportunities for practice |
| <a href="#">MA.1.M.2.3</a>   | Find the value of combinations of pennies, nickels and dimes up to one dollar, and the value of combinations of one, five and ten dollar bills up to \$100. Use the ¢ and \$ symbols appropriately.                                          | 3 - Fair Alignment      | not many opportunities for practice |
| <a href="#">MA.1.NSO.1.1</a> | Starting at a given number, count forward and backwards within 120 by ones. Skip count by 2s to 20 and by 5s to 100.                                                                                                                         | 5 - Very Good Alignment | multiple opportunities for practice |
| <a href="#">MA.1.NSO.1.2</a> | Read numbers from 0 to 100 written in standard form, expanded form and word form. Write numbers from 0 to 100 using standard form and expanded form.                                                                                         | 5 - Very Good Alignment | multiple opportunities for practice |
| <a href="#">MA.1.NSO.1.3</a> | Compose and decompose two-digit numbers in multiple ways using tens and ones. Demonstrate each composition or                                                                                                                                | 5 - Very Good Alignment | multiple opportunities for practice |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                           |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment | aligns with standards                                                          |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 3 - Fair Alignment | aligns to content but some standards are not at skill level needed for mastery |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 4 - Good Alignment | aligns with standards                                                          |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 4 - Good Alignment | aligns with standards                                                          |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                             | 3 - Fair Alignment | some standards do not have complex or rigorous level                           |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.     | 3 - Fair Alignment | some standards do not match all student abilities                              |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.      | 3 - Fair Alignment | a few standards are not given adequate time or content                         |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject. | 3 - Fair Alignment | this content has never been used before                                        |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.         | 3 - Fair Alignment | this content has never been used before                                        |

|                                                                                                                                                                                                                                                                              |                         |                                                                  |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------|
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                                                                                              | 5 - Very Good Alignment | no errors found                                                  |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                                                                                     | 5 - Very Good Alignment | no contradictions or bias found                                  |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).                                                                      | 5 - Very Good Alignment | content is representative of mathematic theory                   |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                                                                                     | 5 - Very Good Alignment | content is free of mistakes                                      |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                                                                                               | 4 - Good Alignment      | content seems up to date with standards of practice              |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                                    | 4 - Good Alignment      | content is appropriate                                           |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 4 - Good Alignment      | content is appropriate but some standards are not in depth       |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 4 - Good Alignment      | real life connections made                                       |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 4 - Good Alignment      | content would be meaningful to students                          |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 4 - Good Alignment      | variety of diversity represented in portrayal of race and gender |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | materials portrayed with compassion                              |

|                                                                                                         |                    |                                                                              |
|---------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------|
| 21. In general, is the content of the benchmarks and standards for this course covered in the material? | 4 - Good Alignment | the benchmarks are covered but there are some that are not covered in depth. |
|---------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------|

| Presentation                                                                                                                                                                                                                                                        | Reviewer Rating    | Rating Justification                                                                |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.                              | 3 - Fair Alignment | some standards will require teacher to prep other material                          |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                                             | 4 - Good Alignment | components align with curriculum                                                    |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 4 - Good Alignment | organization flows                                                                  |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment | visuals would engage students                                                       |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 3 - Fair Alignment | some standards are not provided with enough content to ensure student understanding |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 3 - Fair Alignment | some standards are not provided with enough content to ensure student understanding |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment | presentation has good visuals                                                       |

| Learning | Reviewer Rating | Rating Justification |
|----------|-----------------|----------------------|
|----------|-----------------|----------------------|

|                                                                                                                                                                                            |                         |                                                                                  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                                                    | 4 - Good Alignment      | materials look as if they would maintain motivation                              |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                                                     | 4 - Good Alignment      | several standards are focused on                                                 |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                                            | 5 - Very Good Alignment | outcomes are listed for all lessons                                              |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.                             | 3 - Fair Alignment      | some standards/content does not have enough resources to be independent thinking |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                                               | 4 - Good Alignment      | various activities planned                                                       |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 4 - Good Alignment      | various activities engage students                                               |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 3 - Fair Alignment      | some standards do not have enough activities                                     |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 4 - Good Alignment      | materials have strategies for targeted outcomes                                  |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | instructional strategies are effective                                           |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 3 - Fair Alignment      | strategies correlate with assessments                                            |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment      | assessments align with standards                                                 |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 4 - Good Alignment      | several strategies and materials shoen                                           |

|                                                                                                                                                                        |                    |                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------|
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable? | 4 - Good Alignment | mathematical thinking standards addressed |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)              | 4 - Good Alignment | assessments and strategies are evident    |

| Special Topics                                                                                                                                                                     | Reviewer Rating         | Rating Justification           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | yes they align                 |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | No CRT materials               |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | no social justice materials    |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 5 - Very Good Alignment | No SEL outside of subject area |

Final Recommendation

|                                                                                                                                                                                                                                    |                                                                      |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------|
| Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?                                                                                              | Yes                                                                  |
| How would you rate the overall usability of the instructional material?                                                                                                                                                            | 4 - Good Alignment                                                   |
| Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool. | The curriculum is generally well aligned to the B.E.S.T. benchmarks. |

| Standard                    | Description                                                                                                                                                 | Reviewer Rating         | Rating Justification                                                                                                                       |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.1.AR.1.1</a> | Apply properties of addition to find a sum of three or more whole numbers.                                                                                  | 4 - Good Alignment      | Provides suitable instruction to build understanding and allow student practice. Would like to have seen some problems begin with the sum. |
| <a href="#">MA.1.AR.1.2</a> | Solve addition and subtraction real-world problems using objects, drawings or equations to represent the problem.                                           | 4 - Good Alignment      | Suitable instruction and practice. There are times where the DOK does not align to student practice.                                       |
| <a href="#">MA.1.AR.2.1</a> | Restate a subtraction problem as a missing addend problem using the relationship between addition and subtraction.                                          | 3 - Fair Alignment      | The concept is taught mostly through fact family practice with little student practice for missing addends.                                |
| <a href="#">MA.1.AR.2.2</a> | Determine and explain if equations involving addition or subtraction are true or false.                                                                     | 5 - Very Good Alignment | Builds good conceptual understanding with adequate student practice.                                                                       |
| <a href="#">MA.1.AR.2.3</a> | Determine the unknown whole number in an addition or subtraction equation, relating three whole numbers, with the unknown in any position.                  | 4 - Good Alignment      | Meets the intent of the standard - would like to see more varied practice.                                                                 |
| <a href="#">MA.1.DP.1.1</a> | Collect data into categories and represent the results using tally marks or pictographs.                                                                    | 5 - Very Good Alignment | Meets intent of standard with good opportunities for student exploration.                                                                  |
| <a href="#">MA.1.DP.1.2</a> | Interpret data represented with tally marks or pictographs by calculating the total number of data points and comparing the totals of different categories. | 5 - Very Good Alignment | Includes error analysis.                                                                                                                   |
| <a href="#">MA.1.FR.1.1</a> | Partition circles and rectangles into two and four equal-sized parts. Name the parts of the                                                                 | 5 - Very Good Alignment | Explicit instruction for each concept with                                                                                                 |

| <a href="#">MA.K12.MTR.6.1</a> | <p>Assess the reasonableness of solutions.</p> <p>Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> <li>• Estimate to discover possible solutions.</li> <li>• Use benchmark quantities to determine if a solution makes sense.</li> <li>• Check calculations when solving problems.</li> <li>• Verify possible solutions by explaining the methods used.</li> <li>• Evaluate results based on the given context.</li> </ul> | 2 - Poor Alignment | Limited opportunities for assessing reasonableness, estimating, or using a benchmark. |
| <a href="#">MA.K12.MTR.7.1</a> | <p>Apply mathematics to real-world contexts.</p> <p>Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> <li>• Connect mathematical concepts to everyday experiences.</li> <li>• Use models and methods to understand, represent and solve problems.</li> <li>• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul>   | 4 - Good Alignment | Good use of real world situations.                                                    |
| <a href="#">ELA.K12.EE.1.1</a> | Cite evidence to explain and justify reasoning.                                                                                                                                                                                                                                                                                                                                                                                                                             | 4 - Good Alignment | Multiple opportunities to justify/explain reasoning.                                  |
| <a href="#">ELA.K12.EE.2.1</a> | Read and comprehend grade-level complex texts proficiently.                                                                                                                                                                                                                                                                                                                                                                                                                 | 4 - Good Alignment | Word problems supported by graphics.                                                  |

|                                  |                                                                                                                                          |                         |                                                                               |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------|
| <a href="#">ELA.K12.EE.3.1</a>   | Make inferences to support comprehension.                                                                                                | 4 - Good Alignment      | Questions are modeled and students are encouraged to ask their own questions. |
| <a href="#">ELA.K12.EE.4.1</a>   | Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.            | 5 - Very Good Alignment | Question prompts posted frequently to encourage reflection/discussion.        |
| <a href="#">ELA.K12.EE.5.1</a>   | Use the accepted rules governing a specific format to create quality work.                                                               | 4 - Good Alignment      | I can statements set the expectations and instruction models criteria.        |
| <a href="#">ELA.K12.EE.6.1</a>   | Use appropriate voice and tone when speaking or writing.                                                                                 | 3 - Fair Alignment      | Difficult to distinguish in a math curriculum.                                |
| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 4 - Good Alignment      | Math terms are explicitly taught and teacher's edition includes ELL supports. |
| <a href="#">ELD.K12.ELL.SI.1</a> | English language learners communicate for social and instructional purposes within the school setting.                                   | 4 - Good Alignment      | Multiple opportunities throughout the lessons to communicate with peers.      |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                                 |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 3 - Fair Alignment | There is questionable horizontal alignment - some concepts appear to be taught in isolation.         |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 4 - Good Alignment | More opportunities for open responses-higher order thinking skills would have increased this rating. |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 4 - Good Alignment | There is an ease of use for teacher implementation/                                                  |

|                                                                                                                                                                                                         |                         |                                                                                                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------|
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.                                                                    | 4 - Good Alignment      | The unit that incorporates money needs additional instruction/supports/student practice.             |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                                                                                       | 3 - Fair Alignment      | More opportunities for open responses-higher order thinking skills would have increased this rating. |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.                                                               | 4 - Good Alignment      | Complexity is scaffolded and differentiated for students.                                            |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 4 - Good Alignment      | The money unit needs additional time as well as attempts to build procedural fluency.                |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 4 - Good Alignment      | Authors hold appropriate credentials and expertise.                                                  |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 4 - Good Alignment      | Authors hold appropriate credentials and expertise.                                                  |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 4 - Good Alignment      | No visual or typographical errors detected (except for incorrect answer previously cited)            |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 4 - Good Alignment      | No bias or contradictions detected                                                                   |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 5 - Very Good Alignment | Instructional strategies align to instructional best practices.                                      |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 4 - Good Alignment      | No mistakes detected.                                                                                |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 4 - Good Alignment      | Instructional strategies align to instructional best practices.                                      |

|                                                                                                                                                                                                                                                                              |                    |                                                                   |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------|
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                                    | 4 - Good Alignment | Real world examples are included.                                 |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 4 - Good Alignment | Content is appropriate to the age level                           |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 4 - Good Alignment | Each lesson includes real life contexts.                          |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 3 - Fair Alignment | The content would benefit from more interdisciplinary connections |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 4 - Good Alignment | Representations appear to be inclusive.                           |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 4 - Good Alignment | Good representation of people                                     |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 4 - Good Alignment | Good coverage                                                     |

| Presentation                                                                                                                                                                                                                           | Reviewer Rating    | Rating Justification                                                           |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course. | 4 - Good Alignment | Differentiation and routines are clearly outlined.                             |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                | 4 - Good Alignment | There is an alignment in the tools                                             |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                              | 4 - Good Alignment | Consistent presentation of content - each unit has items in an expected place. |

|                                                                                                                                                                                                                                                                     |                    |                                                                    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------|
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment | Text is supported by visuals                                       |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 4 - Good Alignment | The unit on money could use additional practice - extended pacing. |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 4 - Good Alignment | Online resources assist this curriculum in meeting UDL.            |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment | The curriculum appears to be well organized and easy to use.       |

| Learning                                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                               |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|----------------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                        | 4 - Good Alignment | Visual presentation and teacher directions on guidance engage learners in a variety of strategies. |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                         | 4 - Good Alignment | Topics consistent with Florida Big Ideas.                                                          |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                | 4 - Good Alignment | Teacher materials show the learning progression of the benchmark.                                  |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers. | 3 - Fair Alignment | Materials could use more independent student practice materials                                    |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                   | 4 - Good Alignment | Differentiation/Common Misconceptions/Differentiation provided.                                    |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                         | 4 - Good Alignment | Hands on and higher order thinking skills embedded.                                                |

|                                                                                                                                                                                            |                         |                                                                        |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------|
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 4 - Good Alignment      | Preteaching and extension are consistent with the presented materials. |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 4 - Good Alignment      | Effective strategies are evident.                                      |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | Best practices are evident.                                            |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 4 - Good Alignment      | Exit tickets/performance tasks included                                |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment      | Rubrics show student mastery and common misunderstandings              |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 3 - Fair Alignment      | UDL is best represented in the online resource.                        |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 5 - Very Good Alignment | EE and MTRs are embedded into every lesson.                            |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)                                  | 4 - Good Alignment      | In general the learning requirements are met or exceeded.              |

| Special Topics                                                                                                              | Reviewer Rating         | Rating Justification |
|-----------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?     | 5 - Very Good Alignment | No evidence of CRT   |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training? | 5 - Very Good Alignment | No evidence of CRT   |

|                                                                                                                                                                                    |                         |                                                           |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------|
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | No evidence of CRT                                        |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 3 - Fair Alignment      | Pieces of the teaching edition include components of SEL. |

**Reviewer's Name:** Cynthia Higgins

**Title:** Florida Reveal Math, Grade 8 Pre-Algebra

**Publisher:** McGraw Hill LLC

**Author:** Cathy L. Seeley , Ed.D; Raj Shah, Ph.D.; Cheryl R. Tobey, M.Ed.; Dinah Zike, M.Ed.; Walter Secada, Ph.D.

**Copyright:** 2023

**Edition:** 1

**Grade Level:** 6-8

**Course:** [Grade Eight Mathematics: Pre-Algebra](#)

**Bid ID:** 419

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

3 - Fair Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

Overall the materials satisfy many of the components required for instructional materials adoption for the State of Florida. What is missing, however, is a glaring lack of examples for the struggling students to feel success with the concepts throughout the materials. There exists nice exposure and examples for the students who need enrichment. The Grade 8 Math course is intense and requires a lot of prior knowledge to be mastered for successful completion and to enable the learner to be completely ready for Algebra 1. With that in mind,

a strong or experienced teacher will be able to supplement the materials with tried and true strategies from their existing teacher toolbox. If a district adopted these materials for Grade 8 Math and an inexperienced or weak teacher was to only use these materials, the struggling students would not have the same opportunity to succeed as the student who needs enrichment or acceleration.

| Standard                    | Description                                                                                                                | Reviewer Rating         | Rating Justification                                                                                                                                                                                                                                                                                     |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.AR.1.1</a> | Apply the Laws of Exponents to generate equivalent algebraic expressions, limited to integer exponents and monomial bases. | 5 - Very Good Alignment | Good layout of how current lesson connects to pre-requisite lessons and future lesson(s). Examples are linked to previous, current, and next lesson. Ample opportunity for practice at each DOK level and especially nice practice problems for the apply level of understanding and comprehension.      |
| <a href="#">MA.8.AR.1.2</a> | Apply properties of operations to multiply two linear expressions with rational coefficients.                              | 4 - Good Alignment      | Nice examples and NON-examples, "Why is ___ not the correct answer?" Not sure that the practice problems will be effective for the students who struggle with fractions and decimals still. Would like to see more whole numbers in this lesson before bombarding the students with fractions, decimals, |

|                             |                                                                                                                                                     |                         |                                                                                                                                                                                                                                                                                                                                          |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                     |                         | and irrational numbers like pi.                                                                                                                                                                                                                                                                                                          |
| <a href="#">MA.8.AR.1.3</a> | Rewrite the sum of two algebraic expressions having a common monomial factor as a common factor multiplied by the sum of two algebraic expressions. | 4 - Good Alignment      | Nice examples and NON-examples, "Why is ___ not the correct answer?" Not sure that the practice problems will be effective for the students who struggle with fractions and decimals still. Would like to see more whole numbers in this lesson before bombarding the students with fractions, decimals, and irrational numbers like pi. |
| <a href="#">MA.8.AR.2.1</a> | Solve multi-step linear equations in one variable, with rational number coefficients. Include equations with variables on both sides.               | 4 - Good Alignment      | Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concept of solving variables on both sides. Excellent exposure and examples for the students who need enrichment.                                                                                          |
| <a href="#">MA.8.AR.2.2</a> | Solve two-step linear inequalities in one variable and represent solutions algebraically and graphically.                                           | 4 - Good Alignment      | Meets standard, but does not provide enough differentiation and scaffolding supports.                                                                                                                                                                                                                                                    |
| <a href="#">MA.8.AR.2.3</a> | Given an equation in the form of $x^2=p$ and $x^3=q$ , where p is a whole number and q is an integer, determine the real solutions.                 | 5 - Very Good Alignment | Relevant real-world examples of the content. Rigor is scaffolded nicely.                                                                                                                                                                                                                                                                 |

|                             |                                                                                                                                                                                                      |                         |                                                                                                                                                                                                               |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.AR.3.1</a> | Determine if a linear relationship is also a proportional relationship.                                                                                                                              | 5 - Very Good Alignment | Relevant real-world examples of the content. Rigor is scaffolded nicely.                                                                                                                                      |
| <a href="#">MA.8.AR.3.2</a> | Given a table, graph or written description of a linear relationship, determine the slope.                                                                                                           | 4 - Good Alignment      | Meets standard, but does not provide enough differentiation and scaffolding supports.                                                                                                                         |
| <a href="#">MA.8.AR.3.3</a> | Given a table, graph or written description of a linear relationship, write an equation in slope-intercept form.                                                                                     | 3 - Fair Alignment      | There are fewer examples and less differentiation ideas shared in this topic. Feels like it is missing more scaffolding and better examples are needed.                                                       |
| <a href="#">MA.8.AR.3.4</a> | Given a mathematical or real-world context, graph a two-variable linear equation from a written description, a table or an equation in slope-intercept form.                                         | 3 - Fair Alignment      | Practice materials do not allow entry point for students who struggle with fractions and decimals.                                                                                                            |
| <a href="#">MA.8.AR.3.5</a> | Given a real-world context, determine and interpret the slope and y-intercept of a two-variable linear equation from a written description, a table, a graph or an equation in slope-intercept form. | 4 - Good Alignment      | Content aligns nicely to the standard, but there are not enough examples for the struggling students to feel success with the concepts. Excellent exposure and examples for the students who need enrichment. |
| <a href="#">MA.8.AR.4.1</a> | Given a system of two linear equations and a specified set of possible solutions, determine which ordered pairs satisfy the system of linear equations.                                              | 4 - Good Alignment      | More practice problems should be included.                                                                                                                                                                    |
| <a href="#">MA.8.AR.4.2</a> | Given a system of two linear equations represented graphically on the same coordinate plane, determine whether there is                                                                              | 2 - Poor Alignment      | Student success for your coverage of this standard depends entirely on whether or                                                                                                                             |

|                             |                                                                                                                              |                         |                                                                                                                                                            |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             | one solution, no solution or infinitely many solutions.                                                                      |                         | not the student can graph lines accurately.                                                                                                                |
| <a href="#">MA.8.AR.4.3</a> | Given a mathematical or real-world context, solve systems of two linear equations by graphing.                               | 5 - Very Good Alignment | Strong scaffolding and nice real-world examples. There is an entry point for all learners and opportunity to build the skills from one lesson to the next. |
| <a href="#">MA.8.DP.1.1</a> | Given a set of real-world bivariate numerical data, construct a scatter plot or a line graph as appropriate for the context. | 4 - Good Alignment      | Nice alignment, but the number of practice problems is not sufficient.                                                                                     |
| <a href="#">MA.8.DP.1.2</a> | Given a scatter plot within a real-world context, describe patterns of association.                                          | 3 - Fair Alignment      | Feels like this standard should have more opportunity to practice, separate from 8.DP.1.1.                                                                 |
| <a href="#">MA.8.DP.1.3</a> | Given a scatter plot with a linear association, informally fit a straight line.                                              | 5 - Very Good Alignment | Meets the benchmark quite well, and does not push the student into writing the equation of the of best fit.                                                |
| <a href="#">MA.8.DP.2.1</a> | Determine the sample space for a repeated experiment.                                                                        | 5 - Very Good Alignment | Nice examples of common types of sample spaces and good amount of easy to more challenging questions.                                                      |
| <a href="#">MA.8.DP.2.2</a> | Find the theoretical probability of an event related to a repeated experiment.                                               | 5 - Very Good Alignment | Nice coverage of the benchmark. Especially like the variety of requiring of fractions, decimals, and percents to express the probabilities.                |

|                             |                                                                                                                                                                                                        |                                   |                                                                                                                                                                                                                         |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.DP.2.3</a> | <p>Solve real-world problems involving probabilities related to single or repeated experiments, including making predictions based on theoretical probability.</p>                                     | <p>1 - Very Poor/No Alignment</p> | <p>Use of the language “relative frequency” is incorrect throughout the lessons aligned to this benchmark. Relative frequency is not part of this benchmark.</p>                                                        |
| <a href="#">MA.8.F.1.1</a>  | <p>Given a set of ordered pairs, a table, a graph or mapping diagram, determine whether the relationship is a function. Identify the domain and range of the relation.</p>                             | <p>4 - Good Alignment</p>         | <p>Nice alignment, but the number of practice problems is not sufficient. More easy problems and scaffolding needed so struggling students can have more success before encountering the more challenging problems.</p> |
| <a href="#">MA.8.F.1.2</a>  | <p>Given a function defined by a graph or an equation, determine whether the function is a linear function. Given an input-output table, determine whether it could represent a linear function.</p>   | <p>3 - Fair Alignment</p>         | <p>Inadequate practice problems are provided. This concept needs lots of practice and reinforcement with more student-friendly real-world problems.</p>                                                                 |
| <a href="#">MA.8.F.1.3</a>  | <p>Analyze a real-world written description or graphical representation of a functional relationship between two quantities and identify where the function is increasing, decreasing or constant.</p> | <p>3 - Fair Alignment</p>         | <p>Inadequate practice problems are provided. More scaffolding is needed. This concept needs lots of practice and reinforcement with more student-friendly real-world problems.</p>                                     |
| <a href="#">MA.8.GR.1.1</a> | <p>Apply the Pythagorean Theorem to solve mathematical and real-world problems involving unknown side lengths in right triangles.</p>                                                                  | <p>4 - Good Alignment</p>         | <p>Nice alignment, but the number of practice problems is not sufficient. More easy problems and scaffolding are needed so struggling students</p>                                                                      |

|                             |                                                                                                                                                                                                                               |                         |                                                                                                                                                                                                                      |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

Most of the real-world problems are</p>                                                                                                                                                                                     |

|                                |                                                                                                                                                                                                                                                                                                                                                      |                         |                                                                                                                                                                                                                                                                                                                                                                                        |
|--------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                | <ul style="list-style-type: none"> <li>• Connect mathematical concepts to everyday experiences.</li> <li>• Use models and methods to understand, represent and solve problems.</li> <li>• Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.</li> </ul> |                         | relevant to the students, however, some are very challenging. More scaffolding for this benchmark could be provided in the form of easier examples in the Apply and Real-Word sections of the materials and student practice.                                                                                                                                                          |
| <a href="#">ELA.K12.EE.1.1</a> | Cite evidence to explain and justify reasoning.                                                                                                                                                                                                                                                                                                      | 5 - Very Good Alignment | The ELA-EE benchmarks are covered well within the materials. There is ample opportunity for students to cite evidence and explain their reasoning and thinking.                                                                                                                                                                                                                        |
| <a href="#">ELA.K12.EE.2.1</a> | Read and comprehend grade-level complex texts proficiently.                                                                                                                                                                                                                                                                                          | 5 - Very Good Alignment | The ELA-EE benchmarks are covered nicely within the materials. Opportunity exists for students to develop into readers and comprehenders of grade-level texts. The Differentiated Resources and Language Development Support provided give plenty of opportunities and ideas for the teacher to stimulate prior knowledge and connect concepts within language as well as mathematics. |

|                                       |                                                                                                                                      |                                |                                                                                                                                                                                                                                                                                                                 |
|---------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p><a href="#">ELA.K12.EE.3.1</a></p> | <p>Make inferences to support comprehension.</p>                                                                                     | <p>5 - Very Good Alignment</p> | <p>The ELA-EE benchmarks are covered nicely within the materials. Inferences are a difficult concept for many students, but the materials give opportunity for the teacher to expose students to recognizing or inferring relationships to improve the understanding of the topics.</p>                         |
| <p><a href="#">ELA.K12.EE.4.1</a></p> | <p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> | <p>5 - Very Good Alignment</p> | <p>The ELA-EE benchmarks are covered well within the materials. This benchmark is entirely dependent on the teacher as manager of a classroom where talking/sharing is encouraged, however, there is ample opportunity for students to engage in mathematical discourse throughout the flow of the lessons.</p> |
| <p><a href="#">ELA.K12.EE.5.1</a></p> | <p>Use the accepted rules governing a specific format to create quality work.</p>                                                    | <p>5 - Very Good Alignment</p> | <p>The ELA-EE benchmarks are covered well within the materials. There is ample opportunity for students to effectively present information that meets specified formats to create quality work, including the use of graphic organizers, Write</p>                                                              |

|                                  |                                                                                                                                          |                         |                                                                                                                                                                                                                                                                                                                                                                                      |
|----------------------------------|------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                                  |                                                                                                                                          |                         | About It! Problems, and critiquing others' work by argument and/or analysis.                                                                                                                                                                                                                                                                                                         |
| <a href="#">ELA.K12.EE.6.1</a>   | Use appropriate voice and tone when speaking or writing.                                                                                 | 5 - Very Good Alignment | The ELA-EE benchmarks are covered well within the materials. There is ample opportunity for students to use appropriate voice and tone when writing or speaking about mathematics. Students are encouraged to write their own problems in nearly every lesson.                                                                                                                       |
| <a href="#">ELD.K12.ELL.MA.1</a> | English language learners communicate information, ideas and concepts necessary for academic success in the content area of Mathematics. | 5 - Very Good Alignment | Excellent coverage of this standard exists in the materials. Differentiated Resources and Language Development Support are presented in detail for each lesson. Scaffolding and Facilitating mathematical discourse are also discussed and provided for each lesson. Use of graphic organizers also provides opportunities for ELL students to organize and process the information. |
| <a href="#">ELD.K12.ELL.SI.1</a> | English language learners communicate for social and instructional purposes within the school setting.                                   | 3 - Fair Alignment      | Coverage of this standard is adequate, but could be improved throughout. It seems that perhaps it was                                                                                                                                                                                                                                                                                |

|  |  |  |                                                                          |
|--|--|--|--------------------------------------------------------------------------|
|  |  |  | forgotten about and could have been targeted in many, many more lessons. |
|--|--|--|--------------------------------------------------------------------------|

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                                                   |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment | A few benchmarks were not covered well or correctly; therefore I cannot justify a rating of 5-Very Good Alignment.     |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 4 - Good Alignment | A few benchmarks were not covered well or correctly; therefore I cannot justify a rating of 5-Very Good Alignment.     |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 4 - Good Alignment | A few benchmarks were not covered well or correctly; therefore I cannot justify a rating of 5-Very Good Alignment.     |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 3 - Fair Alignment | Not enough scaffolding for students who struggle; excellent coverage for students who need acceleration or enrichment. |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                             | 3 - Fair Alignment | Not enough scaffolding for students who struggle; excellent coverage for students who need acceleration or enrichment. |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.     | 3 - Fair Alignment | Not enough scaffolding for students who struggle; excellent coverage for students who need acceleration or enrichment. |

|                                                                                                                                                                                                         |                         |                                                                                                                                          |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------|
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.                                                                | 4 - Good Alignment      | Acceptable timelines for the content.                                                                                                    |
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 4 - Good Alignment      | Nice variety of information throughout the materials with adequate sources cited to reflect expert information.                          |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 4 - Good Alignment      | Nice variety of information throughout the materials with adequate sources cited to reflect expert information.                          |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 4 - Good Alignment      | Content is pleasing to the eye and no typo or visual errors were noted, except as noted for MA.8.DP.2.3.                                 |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 5 - Very Good Alignment | Material is presented objectively and no instances of bias, contradictions or non-inflammatory nature noted.                             |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 5 - Very Good Alignment | Material is representative of mathematics, and includes prevailing theories, concepts, standards, and models used within the discipline. |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 4 - Good Alignment      | Content is accurate, except as noted for MA.8.DP.2.3.                                                                                    |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 5 - Very Good Alignment | Mathematical content is current and provides interesting, factual examples, as well as, excellent alignment to the MTRs.                 |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                               | 5 - Very Good Alignment | Mathematical content is current and provides interesting, factual examples, as well as, excellent alignment to the MTRs.                 |

|                                                                                                                                                                                                                                                                              |                         |                                                                                                                                                                                                                                                    |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                                       | 5 - Very Good Alignment | Mathematical content is current and provides interesting, factual examples, as well as, excellent alignment to the MTRs.                                                                                                                           |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 5 - Very Good Alignment | Mathematical content allows for excellent real-world examples and connections that are engaging and meaningful for the learners.                                                                                                                   |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 5 - Very Good Alignment | Mathematical content allows for excellent real-world examples and connections that are engaging and meaningful for the learners.                                                                                                                   |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 5 - Very Good Alignment | No evidence of biased portrayals of any groups is noted throughout the materials.                                                                                                                                                                  |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | No evidence of portrayals of inhumanity or discompassionate portrayals of people or animals is noted throughout the materials. Absolutely no evidence of hard-core or any other type of pornography or inhumane treatment exists in the materials. |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 4 - Good Alignment      | A few benchmarks were not covered well or correctly; therefore I cannot justify a rating of 5-Very Good Alignment.                                                                                                                                 |

| Presentation                                                                                                         | Reviewer Rating    | Rating Justification                                            |
|----------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the | 3 - Fair Alignment | Throughout the materials, there are not enough examples for the |

|                                                                                                                                                                                                                                                                     |                         |                                                                                                                                                                                                                                                                                                              |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.                                                                                                                                                   |                         | struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment.                                                                                                                                                                                      |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                                             | 5 - Very Good Alignment | Teacher resources and organization of teacher resources within the TE seem well aligned with one another across the content.                                                                                                                                                                                 |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 5 - Very Good Alignment | Teacher resources and organization of teacher resources within the TE seem well aligned with one another across the content.                                                                                                                                                                                 |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment      | Colorful visuals within the Student Edition are engaging and appeal to all ability levels; narratives are grade-level appropriate, however, students who struggle with language or are not on grade-level reading ability will experience difficulty unless provided lots of language/comprehension support. |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 4 - Good Alignment      | Acceptable timelines for the content. Struggling students including ESE, ELL, and others who are not on grade level will experience difficulties with the amount of content per lesson.                                                                                                                      |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 3 - Fair Alignment      | UDL is evident, however, there is simply not enough scaffolding for students who struggle; excellent coverage for students who need acceleration or enrichment.                                                                                                                                              |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment      | With the exception of lack of scaffolding for struggling students, this submission satisfies the presentation requirements rather well. For use in a general education classroom or advanced                                                                                                                 |

|  |  |                                           |
|--|--|-------------------------------------------|
|  |  | learners, the material is nearly perfect. |
|--|--|-------------------------------------------|

| Learning                                                                                                                                                       | Reviewer Rating         | Rating Justification                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                        | 5 - Very Good Alignment | Interesting relevant real-world examples throughout the material will engage and motivate students.                                                                                                                                                                                                                                                                                             |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                         | 5 - Very Good Alignment | The Grade 8 Math course is intense and requires a lot of prior knowledge to be mastered for successful completion and to enable the learner to be completely ready for Algebra 1. With that in mind, the materials cover the Big Ideas thoroughly and with cohesion to the important ideas, concepts, and themes.                                                                               |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                | 4 - Good Alignment      | For an experienced teacher, the amount of explicit instruction is covered nicely in the TE; for the less experienced teacher, however, in-depth training for more explicit instruction will be required.                                                                                                                                                                                        |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers. | 4 - Good Alignment      | Opportunity exists for some students to safely and successfully become more independent learners and thinkers, however, struggling learners or those who are unmotivated, or those with a less experienced teacher, may not take advantage of the opportunities within the materials. In-depth training will be required to make sure that these are highlighted for all teachers and learners. |

|                                                                                                                                                                                                   |                                |                                                                                                                                                                                                                                                                                                                                                                                                                                         |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.</p>                                                               | <p>3 - Fair Alignment</p>      | <p>Throughout the materials, there are not enough examples for the struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment.</p>                                                                                                                                                                                                                                          |
| <p>6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.</p>                                                     | <p>4 - Good Alignment</p>      | <p>Materials are pleasing to the eye and should engage the students mentally. Physical engagement of the content would most likely be directed by the teacher.</p>                                                                                                                                                                                                                                                                      |
| <p>7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.</p>                            | <p>4 - Good Alignment</p>      | <p>Although organization of the materials shows logical extensions of the content, goals, and objectives, throughout the materials, there are not enough examples for the struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment.</p>                                                                                                                                   |
| <p>8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements.</p> | <p>4 - Good Alignment</p>      | <p>Materials offer instructional strategies that when used by an experienced or motivated teacher should aid in successful teaching the learning outcomes required by the curriculum. A weaker or less experienced teacher may not take advantage of the instructional strategies - in-depth training will be required so that all teachers, regardless of their skill level will use the materials to the highest extent possible.</p> |
| <p>9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.</p>                                       | <p>5 - Very Good Alignment</p> | <p>The organization of the materials includes excellent instructional strategies that should be effective in teaching the targeted outcomes.</p>                                                                                                                                                                                                                                                                                        |

|                                                                                                                                                                                                  |                                |                                                                                                                                                                                                                                                                                                                     |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.</p>                                                                    | <p>4 - Good Alignment</p>      | <p>From what was available for me to review, the materials correlate assessment strategies well to the desired learning outcomes. Differentiated instructional ideas and lesson organization provide a variety of formative assessment throughout the lessons.</p>                                                  |
| <p>11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.</p> | <p>4 - Good Alignment</p>      | <p>From what was available for me to review, the materials correlate assessment strategies well to the desired learning outcomes. Differentiated instructional ideas and lesson organization provide a variety of formative assessment throughout the lessons.</p>                                                  |
| <p>12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.</p>                                         | <p>4 - Good Alignment</p>      | <p>Although the materials incorporate strategies, materials, activities, etc., that consider the needs of all students, throughout the materials, there are not enough examples for the struggling students to feel success with the concepts. Nice exposure and examples for the students who need enrichment.</p> |
| <p>13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?</p>                    | <p>5 - Very Good Alignment</p> | <p>The ELA-EE benchmarks are covered well within the materials. The MTRs are also covered well within the materials. See individual ratings for ELA-EE benchmarks and MTRs.</p>                                                                                                                                     |
| <p>14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)</p>                                 | <p>4 - Good Alignment</p>      | <p>In general, these materials satisfy the LEARNING requirements. The lack of examples for the struggling students to feel success with the concepts does not permit</p>                                                                                                                                            |

| Special Topics                                                                                                                                                                     | Reviewer Rating         | Rating Justification                                                                                                        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | No evidence of Critical Race Theory was noted within the instructional materials.                                           |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | No evidence of Culturally Responsive Teaching was noted within the instructional materials.                                 |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | No evidence of Social Justice as it relates to Culturally Responsive Teaching was noted within the instructional materials. |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 5 - Very Good Alignment | No evidence of Social Emotional Learning (SEL) was noted within the instructional materials.                                |

**Reviewer's Name:** Linda Spanjer-Furstenburg

**Title:** Florida Reveal Math, Grade 8 Pre-Algebra

**Publisher:** McGraw Hill LLC

**Author:** Cathy L. Seeley , Ed.D; Raj Shah, Ph.D.; Cheryl R. Tobey, M.Ed.; Dinah Zike, M.Ed.; Walter Secada, Ph.D.

**Copyright:** 2023

**Edition:** 1

**Grade Level:** 6-8

**Course:** [Grade Eight Mathematics: Pre-Algebra](#)

**Bid ID:** 419

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

No

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

|                             |                                                                                                                                                              |                    |                                                               |
|-----------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------------------------|
| <a href="#">MA.8.AR.1.1</a> | Apply the Laws of Exponents to generate equivalent algebraic expressions, limited to integer exponents and monomial bases.                                   | 3 - Fair Alignment | The order the content is being taught is out of order.        |
| <a href="#">MA.8.AR.1.2</a> | Apply properties of operations to multiply two linear expressions with rational coefficients.                                                                | 3 - Fair Alignment | Simple lessons,                                               |
| <a href="#">MA.8.AR.1.3</a> | Rewrite the sum of two algebraic expressions having a common monomial factor as a common factor multiplied by the sum of two algebraic expressions.          | 3 - Fair Alignment | Needs more fluency practice questions                         |
| <a href="#">MA.8.AR.2.1</a> | Solve multi-step linear equations in one variable, with rational number coefficients. Include equations with variables on both sides.                        | 3 - Fair Alignment | Needs more fluency practice questions                         |
| <a href="#">MA.8.AR.2.2</a> | Solve two-step linear inequalities in one variable and represent solutions algebraically and graphically.                                                    | 3 - Fair Alignment | Simple fluency problems, but very rigorous word problems.     |
| <a href="#">MA.8.AR.2.3</a> | Given an equation in the form of $x^2=p$ and $x^3=q$ , where $p$ is a whole number and $q$ is an integer, determine the real solutions.                      | 3 - Fair Alignment | Good digital support.                                         |
| <a href="#">MA.8.AR.3.1</a> | Determine if a linear relationship is also a proportional relationship.                                                                                      | 3 - Fair Alignment | Simple fluency problems, but very rigorous word problems.     |
| <a href="#">MA.8.AR.3.2</a> | Given a table, graph or written description of a linear relationship, determine the slope.                                                                   | 3 - Fair Alignment | Like the learning progressions                                |
| <a href="#">MA.8.AR.3.3</a> | Given a table, graph or written description of a linear relationship, write an equation in slope-intercept form.                                             | 3 - Fair Alignment | Like the warmup activities prior to the start of the lessons. |
| <a href="#">MA.8.AR.3.4</a> | Given a mathematical or real-world context, graph a two-variable linear equation from a written description, a table or an equation in slope-intercept form. | 4 - Good Alignment | Like the language development using the math vocabulary.      |
| <a href="#">MA.8.AR.3.5</a> | Given a real-world context, determine and interpret the slope and y-intercept of a two-variable linear equation from a written                               | 3 - Fair Alignment | Like the online questions, but not too rigorous.              |

|                             |                                                                                                                                                                                 |                    |                                                                                                                          |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------|
|                             | description, a table, a graph or an equation in slope-intercept form.                                                                                                           |                    |                                                                                                                          |
| <a href="#">MA.8.AR.4.1</a> | Given a system of two linear equations and a specified set of possible solutions, determine which ordered pairs satisfy the system of linear equations.                         | 3 - Fair Alignment | Needs more rigorous examples.                                                                                            |
| <a href="#">MA.8.AR.4.2</a> | Given a system of two linear equations represented graphically on the same coordinate plane, determine whether there is one solution, no solution or infinitely many solutions. | 3 - Fair Alignment | Not enough rigorous examples that students need to be able to answer the questions successfully.                         |
| <a href="#">MA.8.AR.4.3</a> | Given a mathematical or real-world context, solve systems of two linear equations by graphing.                                                                                  | 4 - Good Alignment | Good Application questions.                                                                                              |
| <a href="#">MA.8.DP.1.1</a> | Given a set of real-world bivariate numerical data, construct a scatter plot or a line graph as appropriate for the context.                                                    | 4 - Good Alignment | Like the progression model at the beginning of the TE, and then good purposeful questions to allow for student thinking. |
| <a href="#">MA.8.DP.1.2</a> | Given a scatter plot within a real-world context, describe patterns of association.                                                                                             | 3 - Fair Alignment | Good warm-up questions, and rigorous exit ticket to challenge the student in practicing the skill being taught.          |
| <a href="#">MA.8.DP.1.3</a> | Given a scatter plot with a linear association, informally fit a straight line.                                                                                                 | 3 - Fair Alignment | Good warm-up questions, and rigorous exit ticket to challenge the student in practicing the skill being taught.          |
| <a href="#">MA.8.DP.2.1</a> | Determine the sample space for a repeated experiment.                                                                                                                           | 3 - Fair Alignment | Good warm-up questions, and rigorous exit ticket to challenge the student in practicing the skill being taught.          |

|                                  | for academic success in the content area of Mathematics.                                               |                    | that ELL students can utilize to be successful with the skill being taught. .                                     |
| <a href="#">ELD.K12.ELL.SI.1</a> | English language learners communicate for social and instructional purposes within the school setting. | 3 - Fair Alignment | There is a good amount of resources that ELL students can utilize to be successful with the skill being taught. . |

| Content                                                                                                                                       | Reviewer Rating    | Rating Justification                                                                                                                       |
|-----------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 3 - Fair Alignment | Content aligns with the new standards.                                                                                                     |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 4 - Good Alignment | The skill level is correct.                                                                                                                |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 4 - Good Alignment | Very adaptable                                                                                                                             |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 2 - Poor Alignment | There could be more hands on examples prior to the online examples. Not all have computers or technology to use for homework.              |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                             | 4 - Good Alignment | The level of complexity matches the standards complexity.                                                                                  |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.     | 4 - Good Alignment | There's prior knowledge content, current content to prepare for the next lesson.                                                           |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.      | 3 - Fair Alignment | Spread out enough, however, some of the lessons can be combined to teach a concept. It will depend on the type of schedule the school has. |

|                                                                                                                                                                                                                                                          |                    |                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------|
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                                                                            | 3 - Fair Alignment | Fair quality, relatable to students.           |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                                                                    | 3 - Fair Alignment | Fair quality, relatable to students.           |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                                                                          | 3 - Fair Alignment | Didn't see any typographical errors.           |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                                                                 | 3 - Fair Alignment | Content is objectively presented.              |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area).                                                  | 3 - Fair Alignment | Content is objectively presented.              |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                                                                 | 4 - Good Alignment | No mistakes noticed.                           |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                                                                           | 4 - Good Alignment | Up to Date.                                    |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                                | 4 - Good Alignment | Yes                                            |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                                                                   | 3 - Fair Alignment | Appropriate for students at the 8t grade level |
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                    | 4 - Good Alignment | Relatable.                                     |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                       | 2 - Poor Alignment | Relatable.                                     |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section). | 4 - Good Alignment | no unfair biased portrayals.                   |

|                                                                                                                                                                                                                                                                              |                    |                     |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------|
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 4 - Good Alignment | No cruelty noticed. |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 4 - Good Alignment | Yes                 |

| Presentation                                                                                                                                                                                                                                                        | Reviewer Rating    | Rating Justification                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course.                              | 2 - Poor Alignment | Teacher has to prepare material prior to the lesson, depending on the level of students he or she has. |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                                             | 3 - Fair Alignment | Yes                                                                                                    |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                                                           | 3 - Fair Alignment | Even though I feel they could have been combined in some aspects.                                      |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in understanding of the content at a level appropriate to the students' abilities.                                                           | 4 - Good Alignment | Clear and legible.                                                                                     |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 4 - Good Alignment | It's given at a good pace, but it depends on which schedule a teacher follows.                         |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 3 - Fair Alignment | Good differentiation, however, I did not see much of the RTI support.                                  |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment | Clear, concise, but could have been combined depending on the schedule the teacher has.                |

| Learning                                                                                                                                                                                   | Reviewer Rating    | Rating Justification                                                                                                    |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------------------------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                                                    | 3 - Fair Alignment | Relatable, but can still be more motivating.                                                                            |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                                                     | 4 - Good Alignment | Spread out between lessons, but I think they can be combined.                                                           |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                                            | 4 - Good Alignment | Very clear, to the point.                                                                                               |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers.                             | 4 - Good Alignment | Open discussion allows the kids to become independent learners, but more fluency practice problems can be put in place. |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                                               | 4 - Good Alignment | Adaptable                                                                                                               |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                                                     | 4 - Good Alignment | Engaging conversation starters.                                                                                         |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 3 - Fair Alignment | The material is presented in a logical order.                                                                           |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 3 - Fair Alignment | Teacher has to be the one to implement the teaching strategies, this cannot be found in book.                           |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 3 - Fair Alignment | Not too fond of the materials, would have liked a hands on copy to view it                                              |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 4 - Good Alignment | Aligns with progress monitoring.                                                                                        |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 4 - Good Alignment | Aligns with progress monitoring.                                                                                        |

|                                                                                                                                                                        |                    |                                                                        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|------------------------------------------------------------------------|
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                      | 4 - Good Alignment | Good Differentiation                                                   |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable? | 3 - Fair Alignment | Yes                                                                    |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)              | 4 - Good Alignment | Satisfies the learning requirements, but can be a little more rigorous |

| Special Topics                                                                                                                                                                     | Reviewer Rating    | Rating Justification                        |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---------------------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 3 - Fair Alignment | Nothing noticed                             |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 4 - Good Alignment | Yes                                         |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 4 - Good Alignment | Yes                                         |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 4 - Good Alignment | Does not solicit Social Emotional Learning. |

**Reviewer's Name:** Catherine White

**Title:** Florida Reveal Math, Grade 8 Pre-Algebra

**Publisher:** McGraw Hill LLC

**Author:** Cathy L. Seeley , Ed.D; Raj Shah, Ph.D.; Cheryl R. Tobey, M.Ed.; Dinah Zike, M.Ed.; Walter Secada, Ph.D.

**Copyright:** 2023

**Edition:** 1

**Grade Level:** 6-8

**Course:** [Grade Eight Mathematics: Pre-Algebra](#)

**Bid ID:** 419

Final Recommendation

Based on your evaluation scores and the material's alignment to standards, do you recommend this instructional material for adoption?

Yes

How would you rate the overall usability of the instructional material?

4 - Good Alignment

Please provide comments regarding this material that would be beneficial in determining whether it should be adopted for state use, including both strengths and weaknesses and overall effectiveness as a teaching/learning tool.

It is helpful for teachers to have the teacher's edition (TE) and student's edition (SE) have matching page numbers. This makes it easy to compare student work with teacher prompts and question answers. It was not helpful to have two volumes of the SE, whose page numbers started over again at 1 in the second volume. When working online to review the resources, it was difficult to tell which volume of the book I was working in because it does not state it specifically on the pages. It would be helpful if the glossary included page numbers instead of lesson

numbers. Additionally, the SE refers students to foldables that are found in the "module review." However, no page numbers are given to students. Students have to search through their consumable to find the correct page. When searching for specific standards and benchmarks, it was not easy to search for standards within the interactive editions, but the TE includes a table of contents with standards and page numbers. The SE also includes the standards, which was helpful for an educator. The TE includes English Learning Scaffolds for Entering/Emerging, Developing/Expanding, and Bridging learners. The TE text also includes question prompts to build the "language of math." There are multiple references to STEM careers and "Math History Minutes" throughout the student edition; most of which refer to women in math. The learning progression at the start of each module in the TE is helpful for teachers to know what students learned and what they will be learning. It is also useful that the SE gives step-by-step directions for how to solve problems, but at times the scaffolding can be too wordy and difficult to decipher (colors are not used, so it is hard to tell which piece was changed as the problem is worked out). It would be more impactful and easier to follow if the student examples were displayed in some type of flowchart, or top-down table so that the students can easily see the next step, or if colors/bolding were used. Overall the instructional materials are usable and align to the standards, so I would recommend this instructional material for adoption.

| Standard                    | Description                                                                                                                | Reviewer Rating    | Rating Justification                                                                                                                                               |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------|--------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.AR.1.1</a> | Apply the Laws of Exponents to generate equivalent algebraic expressions, limited to integer exponents and monomial bases. | 4 - Good Alignment | Students apply the Laws of Exponents to generate equivalent expressions. However, I did not see the laws of exponents defined within the student or teacher texts. |

|                             |                                                                                                                                                     |                         |                                                                                                                                                      |
|-----------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                     |                         | Teachers are referred to the DOE appendix.                                                                                                           |
| <a href="#">MA.8.AR.1.2</a> | Apply properties of operations to multiply two linear expressions with rational coefficients.                                                       | 4 - Good Alignment      | This benchmark is scaffolded with the distributive property and use of algebra tiles.                                                                |
| <a href="#">MA.8.AR.1.3</a> | Rewrite the sum of two algebraic expressions having a common monomial factor as a common factor multiplied by the sum of two algebraic expressions. | 5 - Very Good Alignment | The text includes worked examples and visuals students. Teachers are provided with common misconceptions and how to assist students with the skills. |
| <a href="#">MA.8.AR.2.1</a> | Solve multi-step linear equations in one variable, with rational number coefficients. Include equations with variables on both sides.               | 5 - Very Good Alignment | Teacher text includes examples and non-examples, as well as explanations for why.                                                                    |
| <a href="#">MA.8.AR.2.2</a> | Solve two-step linear inequalities in one variable and represent solutions algebraically and graphically.                                           | 4 - Good Alignment      | Includes number lines and worked examples. Additional visuals for students would be beneficial.                                                      |
| <a href="#">MA.8.AR.2.3</a> | Given an equation in the form of $x^2=p$ and $x^3=q$ , where $p$ is a whole number and $q$ is an integer, determine the real solutions.             | 4 - Good Alignment      | Students solve equations involving square roots and cube roots. Additional visuals (number lines, for example) would be beneficial for students.     |
| <a href="#">MA.8.AR.3.1</a> | Determine if a linear relationship is also a proportional relationship.                                                                             | 5 - Very Good Alignment | Instruction includes the representation of relationships using tables, graphs, equations and written descriptions.                                   |

|                             |                                                                                                                                                                                                      |                         |                                                                                                                                                                                                                                                                 |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.AR.3.2</a> | Given a table, graph or written description of a linear relationship, determine the slope.                                                                                                           | 5 - Very Good Alignment | Instruction includes making connections of slope to the constant of proportionality and to similar triangles represented on the coordinate plane.                                                                                                               |
| <a href="#">MA.8.AR.3.3</a> | Given a table, graph or written description of a linear relationship, write an equation in slope-intercept form.                                                                                     | 5 - Very Good Alignment | Content is chunked to write an equation in slope intercept form from a line, from graphs, and from verbal descriptions. Visuals are provided.                                                                                                                   |
| <a href="#">MA.8.AR.3.4</a> | Given a mathematical or real-world context, graph a two-variable linear equation from a written description, a table or an equation in slope-intercept form.                                         | 4 - Good Alignment      | The standard calls for real-world context, and although these are included, there are a limited number of examples.                                                                                                                                             |
| <a href="#">MA.8.AR.3.5</a> | Given a real-world context, determine and interpret the slope and y-intercept of a two-variable linear equation from a written description, a table, a graph or an equation in slope-intercept form. | 3 - Fair Alignment      | Many related standards, but a lack of explicit instruction given a real-world context, determine and interpret the slope and y-intercept of a two-variable linear equation from a written description, a table, a graph or an equation in slope-intercept form. |
| <a href="#">MA.8.AR.4.1</a> | Given a system of two linear equations and a specified set of possible solutions, determine which ordered pairs satisfy the system of linear equations.                                              | 4 - Good Alignment      | There are a number of worked examples in Module 6, lesson 6-1, but they are not well-scaffolded before practice is provided.                                                                                                                                    |
| <a href="#">MA.8.AR.4.2</a> | Given a system of two linear equations represented graphically on the same coordinate plane, determine whether there is                                                                              | 4 - Good Alignment      | There is a helpful chart in Lesson 6-3 of the SE, but the examples                                                                                                                                                                                              |

|                             |                                                                                                                              |                         |                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------------|------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             | one solution, no solution or infinitely many solutions.                                                                      |                         | on pages 350 do not intersect at specific points, which may make the examples confusing to students. This may also be purposeful to show that students can answer the question about 1, no, or many solutions without specific points. As it stands, the lesson appears to be low rigor and identification only. This lesson would not take 90 minutes as indicated, without spending a day in the online practice. |
| <a href="#">MA.8.AR.4.3</a> | Given a mathematical or real-world context, solve systems of two linear equations by graphing.                               | 4 - Good Alignment      | Limited real-world examples. Do not see examples of instruction that includes recognizing that parallel lines have the same slope.                                                                                                                                                                                                                                                                                  |
| <a href="#">MA.8.DP.1.1</a> | Given a set of real-world bivariate numerical data, construct a scatter plot or a line graph as appropriate for the context. | 5 - Very Good Alignment | Appropriate scaffolding and visuals.                                                                                                                                                                                                                                                                                                                                                                                |
| <a href="#">MA.8.DP.1.2</a> | Given a scatter plot within a real-world context, describe patterns of association.                                          | 4 - Good Alignment      | Although "strong and weak" association was mentioned in a practice problem, I did not see explicit instruction of what this meant for students.                                                                                                                                                                                                                                                                     |
| <a href="#">MA.8.DP.1.3</a> | Given a scatter plot with a linear association, informally fit a straight line.                                              | 5 - Very Good Alignment | Good explanation of how to assess a line of fit for various sets of data.                                                                                                                                                                                                                                                                                                                                           |

| <a href="#">MA.8.DP.2.1</a> | Determine the sample space for a repeated experiment.                                                                                                                                           | 5 - Very Good Alignment | Determines the sample space for a repeated experiment. Additional examples online.                                                                                                                                                                                 |
| <a href="#">MA.8.DP.2.2</a> | Find the theoretical probability of an event related to a repeated experiment.                                                                                                                  | 5 - Very Good Alignment | Instruction includes representing probability as a fraction, percentage or decimal.                                                                                                                                                                                |
| <a href="#">MA.8.DP.2.3</a> | Solve real-world problems involving probabilities related to single or repeated experiments, including making predictions based on theoretical probability.                                     | 5 - Very Good Alignment | Meets the benchmark and clarifications                                                                                                                                                                                                                             |
| <a href="#">MA.8.F.1.1</a>  | Given a set of ordered pairs, a table, a graph or mapping diagram, determine whether the relationship is a function. Identify the domain and range of the relation.                             | 5 - Very Good Alignment | Instruction includes referring to the input as the independent variable and the output as the dependent variable.                                                                                                                                                  |
| <a href="#">MA.8.F.1.2</a>  | Given a function defined by a graph or an equation, determine whether the function is a linear function. Given an input-output table, determine whether it could represent a linear function.   | 5 - Very Good Alignment | Meets the benchmark language: Given a function defined by a graph or an equation, determine whether the function is a linear function. Given an input-output table, determine whether it could represent a linear function. Includes visuals and student practice. |
| <a href="#">MA.8.F.1.3</a>  | Analyze a real-world written description or graphical representation of a functional relationship between two quantities and identify where the function is increasing, decreasing or constant. | 5 - Very Good Alignment | Meets the benchmark language: Analyze a real-world written description or graphical representation of a functional relationship between two quantities and identify                                                                                                |

|                             |                                                                                                                                                                                                                               |                         |                                                                                                                                                                                                                                |
|-----------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                             |                                                                                                                                                                                                                               |                         | where the function is increasing, decreasing or constant. The online practice will be helpful for additional examples.                                                                                                         |
| <a href="#">MA.8.GR.1.1</a> | Apply the Pythagorean Theorem to solve mathematical and real-world problems involving unknown side lengths in right triangles.                                                                                                | 4 - Good Alignment      | Meets the benchmark language, but students would benefit from additional practice involving unknown side lengths in right triangles.                                                                                           |
| <a href="#">MA.8.GR.1.2</a> | Apply the Pythagorean Theorem to solve mathematical and real-world problems involving the distance between two points in a coordinate plane.                                                                                  | 4 - Good Alignment      | Meets the benchmark language, but student practice is heavily dependent on the online platform                                                                                                                                 |
| <a href="#">MA.8.GR.1.3</a> | Use the Triangle Inequality Theorem to determine if a triangle can be formed from a given set of sides. Use the converse of the Pythagorean Theorem to determine if a right triangle can be formed from a given set of sides. | 5 - Very Good Alignment | Uses the Triangle Inequality Theorem to determine if a triangle can be formed from a given set of sides. Use the converse of the Pythagorean Theorem to determine if a right triangle can be formed from a given set of sides. |
| <a href="#">MA.8.GR.1.4</a> | Solve mathematical problems involving the relationships between supplementary, complementary, vertical or adjacent angles.                                                                                                    | 4 - Good Alignment      | Lots of open-ended questions. No a lot of student practice in the text.                                                                                                                                                        |
| <a href="#">MA.8.GR.1.5</a> | Solve problems involving the relationships of interior and exterior angles of a triangle.                                                                                                                                     | 4 - Good Alignment      | There is video included online. Limited student practice in the text. Students are referred to go online for additional practice.                                                                                              |

|                              |                                                                                                                                                                                                                    |                    |                                                                                                                                                     |
|------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.GR.1.6</a>  | Develop and use formulas for the sums of the interior angles of regular polygons by decomposing them into triangles.                                                                                               | 3 - Fair Alignment | The text does not include many visual examples, which are important for students to understand how to decompose a shape into triangles.             |
| <a href="#">MA.8.GR.2.1</a>  | Given a preimage and image generated by a single transformation, identify the transformation that describes the relationship.                                                                                      | 4 - Good Alignment | Within this benchmark, transformations are limited to reflections, translations or rotations of images.                                             |
| <a href="#">MA.8.GR.2.2</a>  | Given a preimage and image generated by a single dilation, identify the scale factor that describes the relationship.                                                                                              | 4 - Good Alignment | Students would benefit from more visual examples and practice                                                                                       |
| <a href="#">MA.8.GR.2.3</a>  | Describe and apply the effect of a single transformation on two-dimensional figures using coordinates and the coordinate plane.                                                                                    | 4 - Good Alignment | Within this benchmark, transformations are limited to reflections, translations, rotations or dilations of images.                                  |
| <a href="#">MA.8.GR.2.4</a>  | Solve mathematical and real-world problems involving proportional relationships between similar triangles.                                                                                                         | 4 - Good Alignment | Instruction includes real-world problems involving proportional relationships between similar triangles.                                            |
| <a href="#">MA.8.NSO.1.1</a> | Extend previous understanding of rational numbers to define irrational numbers within the real number system. Locate an approximate value of a numerical expression involving irrational numbers on a number line. | 4 - Good Alignment | The SE pages 92 and 93 are busy and not easy to follow. It would be nice if the real number chart was a graphic organizer for students to write in. |
| <a href="#">MA.8.NSO.1.2</a> | Plot, order and compare rational and irrational numbers, represented in various forms.                                                                                                                             | 4 - Good Alignment | The text follows the letter of the standard, but the pages are busy and lacking visuals for students.                                               |

|                              |                                                                                                                                                                                                                                                                                           |                           |                                                                                                                                                                                                                   |
|------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <a href="#">MA.8.NSO.1.3</a> | <p>Extend previous understanding of the Laws of Exponents to include integer exponents. Apply the Laws of Exponents to evaluate numerical expressions and generate equivalent numerical expressions, limited to integer exponents and rational number bases, with procedural fluency.</p> | <p>3 - Fair Alignment</p> | <p>The text starts of with negative exponents without any scaffolding or review of exponents. There is not a lot of explanation, nor a lot of practice for students.</p>                                          |
| <a href="#">MA.8.NSO.1.4</a> | <p>Express numbers in scientific notation to represent and approximate very large or very small quantities. Determine how many times larger or smaller one number is compared to a second number.</p>                                                                                     | <p>3 - Fair Alignment</p> | <p>There are a lot of words on these pages, which may make it difficult for struggling readers to understand. There are single student examples shown, with little student practice.</p>                          |
| <a href="#">MA.8.NSO.1.5</a> | <p>Add, subtract, multiply and divide numbers expressed in scientific notation with procedural fluency.</p>                                                                                                                                                                               | <p>3 - Fair Alignment</p> | <p>There does not appear to be enough practice for a student to build fluency. A teacher may have to search for outside resources to provide students with an appropriate amount of practice</p>                  |
| <a href="#">MA.8.NSO.1.6</a> | <p>Solve real-world problems involving operations with numbers expressed in scientific notation.</p>                                                                                                                                                                                      | <p>4 - Good Alignment</p> | <p>Real world examples are used. Visuals and/or graphics would make the learning more meaningful to students.</p>                                                                                                 |
| <a href="#">MA.8.NSO.1.7</a> | <p>Solve multi-step mathematical and real-world problems involving the order of operations with rational numbers including exponents and radicals.</p>                                                                                                                                    | <p>3 - Fair Alignment</p> | <p>Did not see explicit reference to order of operations. Did not see many examples where students were asked to solve multi-step mathematical and real-world problems involving the order of operations with</p> |

|                                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                         |                                                                                       |

|-----------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------|
| 1. A. Alignment with curriculum: The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes. | 4 - Good Alignment      | The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.               |
| 2. A. Alignment with curriculum: The content is written to the correct skill level of the standards and benchmarks in the course.             | 5 - Very Good Alignment | The content is written to the correct skill level of the standards and benchmarks in the course.                           |
| 3. A. Alignment with curriculum: The materials are adaptable and useful for classroom instruction.                                            | 3 - Fair Alignment      | The teacher has choice in online or print-versions, but I did not see where it could be adapted/customized by the teacher. |
| 4. B. Level of Treatment: The materials provide sufficient details for students to understand the significance of topics and events.          | 4 - Good Alignment      | The materials could benefit from additional visuals for students.                                                          |
| 5. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the standards.                             | 4 - Good Alignment      | The level of complexity appears to match the standards in most areas. Some areas appear to have low rigor.                 |
| 6. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the student abilities and grade level.     | 4 - Good Alignment      | There are supports for the teacher to use for differentiating instruction.                                                 |
| 7. B. Level of Treatment: The level (complexity or difficulty) of the treatment of content matches the time period allowed for teaching.      | 4 - Good Alignment      | In most areas the time allowed matches, but in some areas it does not.                                                     |

|                                                                                                                                                                                                         |                         |                                                                                                                                                                                                                      |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 8. C. Expertise for Content Development: The primary and secondary sources cited in the materials reflect expert information for the subject.                                                           | 4 - Good Alignment      | Outside of the Florida benchmarks, there was not a lot of expert citations. However, common errors were pointed out and explained for teachers.                                                                      |
| 9. C. Expertise for Content Development: The primary and secondary sources contribute to the quality of the content in the materials.                                                                   | 4 - Good Alignment      | Outside of the Florida benchmarks, there was not a lot of expert citations. However, common errors were pointed out and explained for teachers.                                                                      |
| 10. D. Accuracy of Content: The content is presented accurately. (Material should be devoid of typographical or visual errors).                                                                         | 5 - Very Good Alignment | Did not notice any typographical errors.                                                                                                                                                                             |
| 11. D. Accuracy of Content: The content of the material is presented objectively. (Material should be free of bias and contradictions and is noninflammatory in nature).                                | 5 - Very Good Alignment | Did not see bias or contradictions                                                                                                                                                                                   |
| 12. D. Accuracy of Content: The content of the material is representative of the discipline. (Material should include prevailing theories, concepts, standards, and models used with the subject area). | 5 - Very Good Alignment | The content of the material is representative of the discipline.                                                                                                                                                     |
| 13. D. Accuracy of Content: The content of the material is factual accurate. (Materials should be free of mistakes and inconsistencies).                                                                | 5 - Very Good Alignment | The content of the material is factual and accurate.                                                                                                                                                                 |
| 14. E. Currency of Content: The content is up-to-date according to current research and standards of practice.                                                                                          | 5 - Very Good Alignment | The content is up-to-date                                                                                                                                                                                            |
| 15. E. Currency of Content: The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                               | 5 - Very Good Alignment | The content is presented to the curriculum, standards, and benchmarks in an appropriate and relevant context.                                                                                                        |
| 16. E. Currency of Content: The content is presented in an appropriate and relevant context for the intended learners.                                                                                  | 4 - Good Alignment      | For the most part, the content is presented in an appropriate and relevant context for learners. Lower-level readers may have some difficulty in the parts of the book where there are not a lot of visual examples. |

|                                                                                                                                                                                                                                                                              |                         |                                                                              |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------|
| 17. F. Authenticity of Content: The content includes connections to life in a context that is meaningful to students.                                                                                                                                                        | 5 - Very Good Alignment | The examples provided made connections to student lives in a meaningful way. |
| 18. F. Authenticity of Content: The material includes interdisciplinary connections which are intended to make the content meaningful to students.                                                                                                                           | 5 - Very Good Alignment | There were STEM and ELA connections throughout.                              |
| 19. G. Multicultural Representation: The portrayal of gender, ethnicity, age, work situations, cultural, religious, physical, and various social groups are fair and unbiased. (Please explain any unfair or biased portrayals in the comments section).                     | 5 - Very Good Alignment | Did not see unfair or biased portrayals.                                     |
| 20. H. Humanity and Compassion: The materials portray people and animals with compassion, sympathy, and consideration of their needs and values and exclude hard-core pornography and inhumane treatment. (An exception may be necessary for units covering animal welfare). | 5 - Very Good Alignment | Did not see evidence to the contrary.                                        |
| 21. In general, is the content of the benchmarks and standards for this course covered in the material?                                                                                                                                                                      | 4 - Good Alignment      | In general, the content of the benchmarks and standards is covered.          |

| Presentation                                                                                                                                                                                                                           | Reviewer Rating         | Rating Justification                                                                                                                                                         |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1. A. Comprehensiveness of Student and Teacher Resources: the comprehensiveness of the student resources address the targeted learning outcomes without requiring the teacher to prepare additional teaching materials for the course. | 5 - Very Good Alignment | The TE and online practice should not require the teacher to prepare additional teaching materials.                                                                          |
| 2. B. Alignment of Instructional Components: all components of the major tool align with the curriculum and each other.                                                                                                                | 5 - Very Good Alignment | All components of the major tool align with the curriculum and each other                                                                                                    |
| 3. C. Organization of Instructional Materials: the materials are consistent and logical organization of the content for the subject area.                                                                                              | 4 - Good Alignment      | For the most part, the materials are consistent and logical in their organization. In a few instances, the teacher will have to jump back and forth between the two volumes. |
| 4. D. Readability of Instructional Materials: Narrative and visuals engage students in reading or listening as well as in                                                                                                              | 3 - Fair Alignment      | There appears to be a lot of text in the student edition, which                                                                                                              |

|                                                                                                                                                                                                                                                                     |                         |                                                                                                                                                                                   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| understanding of the content at a level appropriate to the students' abilities.                                                                                                                                                                                     |                         | may cause students to disengage.                                                                                                                                                  |
| 5. E. Pacing of Content: The amount of content presented at one time or the pace at which it is presented must be of a size or rate that allows students to perceive and understand it.                                                                             | 4 - Good Alignment      | For the most part, pacing is appropriate.                                                                                                                                         |
| 6. Accessibility: The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. (For assistance refer to the answers on the UDL questionnaire). | 5 - Very Good Alignment | The material contains presentation, navigation, study tool and assistive supports that aid students, including those with disabilities, to access and interact with the material. |
| 7. In general, how well does the submission satisfy PRESENTATION requirements? (The comments should support your responses to the questions in the Presentation section).                                                                                           | 4 - Good Alignment      | In general, the submission satisfies the presentation requirements.                                                                                                               |

| Learning                                                                                                                                                       | Reviewer Rating         | Rating Justification                                                                                                |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------|
| 1. A. Motivational Strategies: Instructional materials include features to maintain learner motivation.                                                        | 3 - Fair Alignment      | The instructional materials may or may not maintain learner motivation. There is a lot of text in the student book. |
| 2. B. Teaching a Few "Big Ideas": Instructional materials thoroughly teach a few important ideas, concepts, or themes.                                         | 4 - Good Alignment      | The materials are chunked into 10 big ideas.                                                                        |
| 3. C. Explicit Instruction: the materials contain clear statements of information and outcomes.                                                                | 5 - Very Good Alignment | The materials contain clear statements of information and outcomes.                                                 |
| 4. D. Guidance and Support: the materials provide guidance and support to help students safely and successfully become more independent learners and thinkers. | 4 - Good Alignment      | They are available, but since they are text-heavy, students may shy away from using them.                           |
| 5. D. Guidance and Support: Guidance and support must be adaptable to developmental differences and various learning styles.                                   | 5 - Very Good Alignment | The teacher's edition provides guidance and support.                                                                |
| 6. E. Active Participation of Students: the materials engage the physical and mental activity of students during the learning process.                         | 3 - Fair Alignment      | The materials attempt to engage students with various question prompts, but these may have the opposite             |

|                                                                                                                                                                                            |                         |                                                                                                                                                  |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
|                                                                                                                                                                                            |                         | outcome for students who do not enjoy reading or writing.                                                                                        |
| 7. E. Active Participation of Students: Rate how well the materials include organized activities that are logical extensions of content, goals, and objectives.                            | 5 - Very Good Alignment | The text is aligned well into logical extensions of content, goals, and objectives.                                                              |
| 8. F. Targeted Instructional Strategies: Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements. | 5 - Very Good Alignment | Instructional materials include the strategies known to be successful for teaching the learning outcomes targeted in the curriculum requirements |
| 9. F. Targeted Instructional Strategies: the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                                       | 4 - Good Alignment      | For the most part, the instructional strategies incorporated in the materials are effective in teaching the targeted outcomes.                   |
| 10. G. Targeted Assessment Strategies: the materials correlate assessment strategies to the desired learning outcomes.                                                                     | 5 - Very Good Alignment | The materials include assessments before, during, and after the lesson.                                                                          |
| 11. G. Targeted Assessment Strategies: the assessment strategies incorporated in the materials are effective in assessing the learners' performance with regard to the targeted outcomes.  | 3 - Fair Alignment      | There are many areas where the text says "see students' explanation." This may not be helpful for a novice teacher.                              |
| 12. Universal Design for Learning: this submission incorporates strategies, materials, activities, etc., that consider the needs of all students.                                          | 4 - Good Alignment      | There are varied strategies, but a lot of times they are the same strategies repeated in each lesson.                                            |
| 13. B.E.S.T. Standards Application: Do you observe the appropriate application of ELA Expectations and/or Mathematical Thinking and Reasoning Standards as applicable?                     | 5 - Very Good Alignment | ELA and MTRs are embedded throughout.                                                                                                            |
| 14. In general, does the submission satisfy LEARNING requirements? (The comments should support your responses to the questions in the Learning section.)                                  | 4 - Good Alignment      | In general, the submission satisfies the learning requirements.                                                                                  |

| Special Topics | Reviewer Rating | Rating Justification |
|----------------|-----------------|----------------------|
|----------------|-----------------|----------------------|

|                                                                                                                                                                                    |                         |                               |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|-------------------------------|
| Do materials align to Rule 6A-1.094124, F.A.C., which prohibits Critical Race Theory (CRT), in instructional materials?                                                            | 5 - Very Good Alignment | No evidence of topic coverage |
| Do instructional materials omit Culturally Responsive Teaching as it relates to CRT, as explained in the reviewer training?                                                        | 5 - Very Good Alignment | No evidence of topic coverage |
| Do instructional materials omit Social Justice as it relates to CRT, as explained in the reviewer training?                                                                        | 5 - Very Good Alignment | No evidence of topic coverage |
| Do instructional materials NOT solicit Social Emotional Learning (SEL), as these are considered extraneous and unsolicited strategies outside the scope of subject-area standards? | 5 - Very Good Alignment | No evidence of topic coverage |

**Attachment(s):** "McGraw Hill-Appeals K-12 Mathematics.xlsx", "image002.png", "image003.png", "image004.png"

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

**Subject:** McGraw Hill Appeal Request for 21-22 Instructional Materials Mathematics List

Good Afternoon,

Please find attached McGraw Hill's written petition for an appeal hearing for the 21-22 Instructional Mathematics List.

Regards,  
Kim

**Attachment(s):** "image002.png", "image003.png", "image004.png"

Hi Lauren,

Thank you so much for sending the documents for our review. We appreciate having this information. I do have a few items for clarification that I broke out by grade.

Grade 4 Accelerated

Grade 4 accelerated has a 4 for alignment on the Excel Spreadsheet and on the Not Recommended List. Row 12 says 3- fair alignment. Can you confirm that our score for Standards is a 4? Is there a grade 4 accelerated PDF that provides the special topics comments?

Grade 8

On row 4 of the excel document, grade 8 says Y to special topics. Row 14 states nothing noticed for special topics. The grade 8 PDF seems to support this on the last page where is says nothing noticed.

Grade 5

On the Not Recommended List posted on the website, Grade 5 has a Y for including Special topics. Is that correct? If so, can you provide the grade 5 information so we can review the findings?

K-5

Overall, the Adoption List posted only lists Reveal Math Grade 3 accelerated. The Not Recommended document has several of our bids submitted in separate categories that seem to meet the requirements. Can you clarify the status of the other bids we submitted below that do not appear on the Adopted List?

Regards,  
Kim

**\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\***

Good afternoon,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment(full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

Hi Kim,

Are these links in the spreadsheets you just sent updated to reflect the most recent changes? We are unable to get into this link for grade 8: <https://we.tl/t-qjCQyJ4ZNf> . We can use the spreadsheet as long as those reflect all the correct changes.

Thanks!

Amber Baumbach

Hi Amber,  
The changes we provided in PDF for grades 1 & 8 last Friday are now live. I attached the excel documents again for convenience. The links did not change.

Regards,  
Kim

Hi Amber,  
Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                              |     |       |
|------------------------------|-----|-------|
| Florida Reveal Math, Grade K | 4.4 | 81.0% |
| Florida Reveal Math, Grade 1 | 4.0 | 81.0% |
| Florida Reveal Math, Grade 2 | 4.4 | 97.1% |
| Florida Reveal Math, Grade 3 | 4.6 | 92.7% |
| Florida Reveal Math, Grade 4 | 4.7 | 92.4% |

|                              |     |       |
|------------------------------|-----|-------|
| Florida Reveal Math, Grade 5 | 4.0 | 62.8% |
|------------------------------|-----|-------|

Regards,  
Kim

\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\*

Yes, all of the special topic edits that were made for grades 1, 5, and 4 accelerated have been approved. I believe that the only grade pending now is grade 8 which is currently in standards review.

Thanks!

**\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\***

Hi Kim,

Are these links in the spreadsheets you just sent updated to reflect the most recent changes? We are unable to get into this link for grade 8: <https://we.tl/t-qjCQyJ4ZNf> . We can use the spreadsheet as long as those reflect all the correct changes.

Thanks!

Hi Amber,  
Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                                     |     |       |
|-------------------------------------|-----|-------|
| <i>Florida Reveal Math, Grade K</i> | 4.4 | 81.0% |
| <i>Florida Reveal Math, Grade 1</i> | 4.0 | 81.0% |
| <i>Florida Reveal Math, Grade 2</i> | 4.4 | 97.1% |
| <i>Florida Reveal Math, Grade 3</i> | 4.6 | 92.7% |
| <i>Florida Reveal Math, Grade 4</i> | 4.7 | 92.4% |
| <i>Florida Reveal Math, Grade 5</i> | 4.0 | 62.8% |

Hi Amber,

The changes we provided in PDF for grades 1 & 8 last Friday are now live. I attached the excel documents again for convenience. The links did not change.

Regards,  
Kim

**Subject:** RE: McGraw Hill Grade 1

Hi Amber,

Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                              |     |       |
|------------------------------|-----|-------|
| Florida Reveal Math, Grade K | 4.4 | 81.0% |
| Florida Reveal Math, Grade 1 | 4.0 | 81.0% |
| Florida Reveal Math, Grade 2 | 4.4 | 97.1% |
| Florida Reveal Math, Grade 3 | 4.6 | 92.7% |
| Florida Reveal Math, Grade 4 | 4.7 | 92.4% |
| Florida Reveal Math, Grade 5 | 4.0 | 62.8% |

Regards,  
Kim

\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\*

Yes, all of the special topic edits that were made for grades 1, 5, and 4 accelerated have been approved. I believe that the only grade pending now is grade 8 which is currently in standards review.

Thanks!

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\*

Hi Kim,

Are these links in the spreadsheets you just sent updated to reflect the most recent changes? We are unable to get into this link for grade 8: <https://we.tl/t-qiCQyJ4ZNf> . We can use the spreadsheet as long as those reflect all the correct changes.

Thanks!

Hi Amber,  
Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                                     |     |       |
|-------------------------------------|-----|-------|
| <i>Florida Reveal Math, Grade K</i> | 4.4 | 81.0% |
| <i>Florida Reveal Math, Grade 1</i> | 4.0 | 81.0% |
| <i>Florida Reveal Math, Grade 2</i> | 4.4 | 97.1% |
| <i>Florida Reveal Math, Grade 3</i> | 4.6 | 92.7% |
| <i>Florida Reveal Math, Grade 4</i> | 4.7 | 92.4% |
| <i>Florida Reveal Math, Grade 5</i> | 4.0 | 62.8% |

Regards,  
Kim

Hi Kim,

Are these links in the spreadsheets you just sent updated to reflect the most recent changes? We are unable to get into this link for grade 8: <https://we.tl/t-qjCQyJ4ZNF> . We can use the spreadsheet as long as those reflect all the correct changes.

Thanks!

Hi Amber,  
Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                              |     |       |
|------------------------------|-----|-------|
| Florida Reveal Math, Grade K | 4.4 | 81.0% |
| Florida Reveal Math, Grade 1 | 4.0 | 81.0% |
| Florida Reveal Math, Grade 2 | 4.4 | 97.1% |
| Florida Reveal Math, Grade 3 | 4.6 | 92.7% |
| Florida Reveal Math, Grade 4 | 4.7 | 92.4% |
| Florida Reveal Math, Grade 5 | 4.0 | 62.8% |

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

Hi Kim,

Grade 5 was only flagged for special topics issues and not standards. Therefore the score will not be changing as there have been no updates to standards.

Thank you,

Hi Amber,  
Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                                     |     |       |
|-------------------------------------|-----|-------|
| <i>Florida Reveal Math, Grade K</i> | 4.4 | 81.0% |
| <i>Florida Reveal Math, Grade 1</i> | 4.0 | 81.0% |
| <i>Florida Reveal Math, Grade 2</i> | 4.4 | 97.1% |
| <i>Florida Reveal Math, Grade 3</i> | 4.6 | 92.7% |
| <i>Florida Reveal Math, Grade 4</i> | 4.7 | 92.4% |
| <i>Florida Reveal Math, Grade 5</i> | 4.0 | 62.8% |

Regards,  
Kim

\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\*

Yes, all of the special topic edits that were made for grades 1, 5, and 4 accelerated have been approved. I believe that the only grade pending now is grade 8 which is currently in standards review.

Thanks!

Hi Amber,

Thank you for confirming.

Quick question: On grade 5, we see that Florida Reveal Math has a 62.8% alignment score. Will this be updated?

|                                     |     |       |
|-------------------------------------|-----|-------|
| <i>Florida Reveal Math, Grade K</i> | 4.4 | 81.0% |
| <i>Florida Reveal Math, Grade 1</i> | 4.0 | 81.0% |
| <i>Florida Reveal Math, Grade 2</i> | 4.4 | 97.1% |
| <i>Florida Reveal Math, Grade 3</i> | 4.6 | 92.7% |
| <i>Florida Reveal Math, Grade 4</i> | 4.7 | 92.4% |
| <i>Florida Reveal Math, Grade 5</i> | 4.0 | 62.8% |

**\*\*\* EXTERNAL EMAIL: If sender is unknown, use caution when opening. \*\*\***

Yes, all of the special topic edits that were made for grades 1, 5, and 4 accelerated have been approved. I believe that the only grade pending now is grade 8 which is currently in standards review.

Thanks!

Hi Kim,

Our content specialists have provided additional comments on the spreadsheet. I've set up a meeting for today at 11:00 am to discuss standards for grades 1 and 8. I'm also attaching the spreadsheets. Anything marked in green has been approved, anything marked in red needs additional discussion/edits.

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                 | Title                        |
|--------|-----------|------------------------|------------------------------|
| 410    | 5012030   | Grade One Mathematics  | Florida Reveal Math, Grade 1 |
| 414    | 5012070   | Grade Five Mathematics | Florida Reveal Math, Grade 5 |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim
