Hi Amber,  
Thank you for the call this morning and reviewing comments with us.

Attached is the PDF of the grade 1 changes for standard MA.1.M.2.2 that we discussed during our call. As we agreed, we are sending updated PDFs immediately to show our changes.

Regards,  
Kim

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

Hi Amber,

Please find the information for grade 8 that we discussed during our call this morning. We updated the excel spreadsheet to include details of the updates. There are PDFs for 5 lessons that reflect these changes. The files were too large to send via email so please use this link from We Transfer to download the PDFs: <https://we.tl/t-giCQyJ4ZNF> If you have any difficulty, please let me know.

We appreciate your team's partnership in this appeal process.

Have a great weekend!

**Subject:** McGraw Hill Appeal Grades 1, 5, 8 and 4 Accelerated

Good Afternoon,

Thank you for the feedback on our appeal spreadsheets. Based on this feedback, we have updated the links in the attached documents for the following McGraw Hill programs:

| Bid ID | Course ID | Course                               | Title                                    |
|--------|-----------|--------------------------------------|------------------------------------------|
| 410    | 5012030   | Grade One Mathematics                | Florida Reveal Math, Grade 1             |
| 414    | 5012070   | Grade Five Mathematics               | Florida Reveal Math, Grade 5             |
| 419    | 1205070   | Grade Eight Mathematics: Pre-Algebra | Florida Reveal Math, Grade 8 Pre-Algebra |
| 416    | 5012065   | Grade 4 Accelerated Mathematics      | Florida Reveal Math, Grade 4 Accelerated |

Please let us know if there are any other items we need to provide regarding our appeal.

Regards,  
Kim

Amber,

Here are my answers to the questions, but don't send them until verified by Cathy.

Question 1: What does "unedited" mean? Does it mean that we must include the entire primary source? Is it acceptable to use excerpts or portions of a primary source, or is using an excerpt considered to be "editing" the primary source? If we are allowed to use excerpts, what constitutes editing? For example, can we use ellipses? Can we insert bracketed clarifications for difficult vocabulary? **Unedited means the exact wording of the primary source document cannot be changed. You can use excerpts, but they must remain true to the original wording and context. Bracketed clarification for difficult vocabulary is permissible as long as the author's intended meaning is not compromised.**

Question 2: Can the state provide a list of the items considered to be primary sources in the benchmarks? For example, the history benchmarks reference many treaties and legislative acts in American history, as well as many Supreme Court cases. Treaties, legislation, and supreme court case decisions could all be considered primary sources. Do we need to include the actual text of all of these items in the program? If not, can the department provide additional guidance on which items in the benchmarks are to be considered primary sources? If we do need to include all of these documents in the program, in relation to the previous question above, do we need to include the full text of each of these documents, or can we use excerpts of key portions of the documents? **The primary source documentation is specifically referring to the revised civics and government standards and their adopted clarifications. There are four priorities for civics and government in Florida's K-12 schools, the first one has to do with primary source documents and should provide clarification as to what primary source documents must be included.**

- **Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root foundation of American exceptionalism.**

Question 3: Benchmark SS.912.H.1.5, included in the high school US History program, includes clarifications referencing Victor Hugo's *Les Miserables*, Langston Hughes' poetry, and Pete Seeger's *Bring 'Em Home*. All of these could be considered primary sources. Is it expected that the text of works of literature referenced in the benchmarks have to be included in the program? We are concerned that intellectual property rights involved may restrict our ability to acquire these items, or to quote directly from them, and if we are required to include the entire unedited primary source, it is unlikely we will be able to obtain rights to the entire work cited. **See above two answers.**

**Regarding the Florida Primary Source Correlation spreadsheet, here is the text of two columns on the spreadsheet followed by some questions**

Column 2: *If primary sources are used, please list each benchmark that included a primary source as part of the instructional material. Add a row for each benchmark so that benchmarks are listed individually.*

Column 3: *List every primary source document that aligns to this benchmark.*

Question 4: Our programs include many primary sources that are not listed in the benchmarks or the clarifications. Is the correlation spreadsheet asking that we list all primary sources in our program? Or, per the instructional material specifications, do we only list those primary sources that are specifically mentioned in the benchmarks and clarifications? If we are required to list all primary sources in the program, are we allowed to include primary sources in our program that are not directly aligned to a specific benchmark, or should we limit the list to those primary sources that directly align to a benchmark? **Only primary source documents listed in the benchmark or clarification are required to be listed on the spreadsheet. You may provide additional primary sources if you like, but they are not required.**

Thanks  
John

**From:** Tullos, Lisa <[lisa.tullos@mheducation.com](mailto:lisa.tullos@mheducation.com)>  
**Sent:** Wednesday, January 19, 2022 11:07 AM  
**To:** Baumbach, Amber <[Amber.Baumbach@fldoe.org](mailto:Amber.Baumbach@fldoe.org)>; Hamilton, Lauren <[Lauren.Hamilton@fldoe.org](mailto:Lauren.Hamilton@fldoe.org)>  
**Subject:** Question: 2022-2023 K-12 Social Studies Instructional Materials Specifications  
**Importance:** High

Dear Florida Department of Education:

We are seeking additional clarification about requirements in the Florida Instructional Material Specifications for K-12 Social Studies. Our questions concern the requirements for primary sources in the instructional materials. We have looked at the guidance provided in the specifications, as well as the instructions in the primary source correlation spreadsheet, and as a result we have the following questions:

**Regarding the Florida Instructional Materials Specifications for K-12 Social Studies Page 23:** "Primary source documents that are referenced in the benchmarks and benchmark clarifications must be included and unedited. Please complete the Primary Sources Correlation."

**Question 1:** What does "unedited" mean? Does it mean that we must include the entire primary source? Is it acceptable to use excerpts or portions of a primary source, or is using an excerpt considered to be "editing" the primary source? If we are allowed to use excerpts, what constitutes editing? For example, can we use ellipses? Can we insert bracketed clarifications for difficult vocabulary?

**Question 2:** Can the state provide a list of the items considered to be primary sources in the benchmarks? For example, the history benchmarks reference many treaties and legislative acts in American history, as well as many Supreme Court cases. Treaties, legislation, and supreme court case decisions could all be considered primary sources. Do we need to include the actual text of all of these items in the program? If not, can the department provide additional guidance on which items in the benchmarks are to be considered primary sources? If we do need to include all of these documents in the program, in relation to the previous question above, do we need to include the full text of each of these documents, or can we use excerpts of key portions of the documents?

**Question 3:** Benchmark SS.912.H.1.5, included in the high school US History program, includes clarifications referencing Victor Hugo's *Les Miserables*, Langston Hughes' poetry, and Pete Seeger's *Bring 'Em Home*. All of these could be considered primary sources. Is it expected that the text of works of literature referenced in the benchmarks have to be included in the program? We are concerned that intellectual property rights involved may restrict our ability to acquire these items, or to quote directly from them, and if we are required to include the entire unedited primary source, it is unlikely we will be able to obtain rights to the entire work cited.

**Regarding the Florida Primary Source Correlation spreadsheet, here is the text of two columns on the spreadsheet followed by some questions:**

Column 2: *If primary sources are used, please list each benchmark that included a primary source as part of the instructional material. Add a row for each benchmark so that benchmarks are listed individually.*

Column 3: *List every primary source document that aligns to this benchmark.*

**Question 4:** Our programs include many primary sources that are not listed in the benchmarks or the clarifications. Is the correlation spreadsheet asking that we list all primary sources in our program? Or, per the instructional material specifications, do we only list those primary sources that are specifically mentioned in the benchmarks and clarifications? If we are required to list all primary sources in the program, are we allowed to include primary sources in our program that are not directly aligned to a specific benchmark, or should we limit the list to those primary sources that directly align to a benchmark?

Thank you for your assistance in clarifying the requirements,

--McGraw Hill

There are fur priorities for civics and government in Florida's K-12 schools, the first one has to do with primary source documents and should provide clarification as to what primary source documents must be included.**

- **Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root foundation of American exceptionalism.**

Question 3: Benchmark SS.912.H.1.5, included in the high school US History program, includes clarifications referencing Victor Hugo's *Les Miserables*, Langston Hughes' poetry, and Pete Seeger's *Bring 'Em Home*. All of these could be considered primary sources. Is it expected that the text of works of literature referenced in the benchmarks have to be included in the program? We are concerned that intellectual property rights involved may restrict our ability to acquire these items, or to quote directly from them, and if we are required to include the entire unedited primary source, it is unlikely we will be able to obtain rights to the entire work cited. **See above two answers.**

**Regarding the Florida Primary Source Correlation spreadsheet, here is the text of two columns on the spreadsheet followed by some questions**

Column 2: *If primary sources are used, please list each benchmark that included a primary source as part of the instructional material. Add a row for each benchmark so that benchmarks are listed individually.*

Column 3: *List every primary source document that aligns to this benchmark.*

Question 4: Our programs include many primary sources that are not listed in the benchmarks or the clarifications. Is the correlation spreadsheet asking that we list all primary sources in our program? Or, per the instructional material specifications, do we only list those primary sources that are specifically mentioned in the benchmarks and clarifications? If we are required to list all primary sources in the program, are we allowed to include primary sources in our program that are not directly aligned to a specific benchmark, or should we limit the list to those primary sources that directly align to a benchmark? Only primary source documents listed in the benchmark or clarification are required however,

Subject: Question: 2022-2023 K-12 Social Studies Instructional Materials Specifications

Importance: High

Dear Florida Department of Education:

We are seeking additional clarification about requirements in the Florida Instructional Material Specifications for K-12 Social Studies. Our questions concern the requirements for primary sources in the instructional materials. We have looked at the guidance provided in the specifications, as well as the instructions in the primary source correlation spreadsheet, and as a result we have the following questions:

**Regarding the Florida Instructional Materials Specifications for K-12 Social Studies Page 23:** "Primary source documents that are referenced

in the benchmarks and benchmark clarifications must be included and unedited. Please complete the Primary Sources Correlation."

**Question 1:** What does "unedited" mean? Does it mean that we must include the entire primary source? Is it acceptable to use excerpts or portions of a primary source, or is using an excerpt considered to be "editing" the primary source? If we are allowed to use excerpts, what constitutes editing? For example, can we use ellipses? Can we insert bracketed clarifications for difficult vocabulary?

**Question 2:** Can the state provide a list of the items considered to be primary sources in the benchmarks? For example, the history benchmarks reference many treaties and legislative acts in American history, as well as many Supreme Court cases. Treaties, legislation, and supreme court case decisions could all be considered primary sources. Do we need to include the actual text of all of these items in the program? If not, can the department provide additional guidance on which items in the benchmarks are to be considered primary sources? If we do need to include all of these documents in the program, in relation to the previous question above, do we need to include the full text of each of these documents, or can we use excerpts of key portions of the documents?

**Question 3:** Benchmark SS.912.H.1.5, included in the high school US History program, includes clarifications referencing Victor Hugo's *Les Miserables*, Langston Hughes' poetry, and Pete Seeger's *Bring 'Em Home*. All of these could be considered primary sources. Is it expected that the text of works of literature referenced in the benchmarks have to be included in the program? We are concerned that intellectual property rights involved may restrict our ability to acquire these items, or to quote directly from them, and if we are required to include the entire unedited primary source, it is unlikely we will be able to obtain rights to the entire work cited.

**Regarding the Florida Primary Source Correlation spreadsheet, here is the text of two columns on the spreadsheet followed by some questions:**

Column 2: *If primary sources are used, please list each benchmark that included a primary source as part of the instructional material. Add a row for each benchmark so that benchmarks are listed individually.*

Column 3: *List every primary source document that aligns to this benchmark.*

**Question 4:** Our programs include many primary sources that are not listed in the benchmarks or the clarifications. Is the correlation spreadsheet asking that we list all primary sources in our program? Or, per the instructional material specifications, do we only list those primary sources that are specifically mentioned in the benchmarks and clarifications? If we are required to list all primary sources in the program, are we allowed to include primary sources in our program that are not directly aligned to a specific benchmark, or should we limit the list to those primary sources that directly align to a benchmark?

Thank you for your assistance in clarifying the requirements,

**To:** Baumbach, Amber <Amber.Baumbach@fldoe.org>; Seeds, Cathy <Cathy.Seeds@fldoe.org>  
**Subject:** RE: Question: 2022-2023 K-12 Social Studies Instructional Materials Specifications

Amber,

Here are my answers to the questions, but don't send them until verified by Cathy.

Question 1: What does "unedited" mean? Does it mean that we must include the entire primary source? Is it acceptable to use excerpts or portions of a primary source, or is using an excerpt considered to be "editing" the primary source? If we are allowed to use excerpts, what constitutes editing? For example, can we use ellipses? Can we insert bracketed clarifications for difficult vocabulary? **Unedited means the exact wording of the primary source document cannot be changed. You can use excerpts, but they must remain true to the original wording and context. Bracketed clarification for difficult vocabulary is permissible as long as the author's intended meaning is not compromised.**

Question 2: Can the state provide a list of the items considered to be primary sources in the benchmarks? For example, the history benchmarks reference many treaties and legislative acts in American history, as well as many Supreme Court cases. Treaties, legislation, and supreme court case decisions could all be considered primary sources. Do we need to include the actual text of all of these items in the program? If not, can the department provide additional guidance on which items in the benchmarks are to be considered primary sources? If we do need to include all of these documents in the program, in relation to the previous question above, do we need to include the full text of each of these documents, or can we use excerpts of key portions of the documents? **The primary source documentation is specifically referring to the revised civics and government standards and their adopted clarifications. There are four priorities for civics and government in Florida's K-12 schools, the first one has to do with primary source documents and should provide clarification as to what primary source documents must be included.**

- **Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root foundation of American exceptionalism.**

Question 3: Benchmark SS.912.H.1.5, included in the high school US History program, includes clarifications referencing Victor Hugo's *Les Miserables*, Langston Hughes' poetry, and Pete Seeger's *Bring 'Em Home*. All of these could be considered primary sources. Is it expected that the text of works of literature referenced in the benchmarks have to be included in the program? We are concerned that intellectual property rights involved may restrict our ability to acquire these items, or to quote directly from them, and if we are required to include the entire unedited primary source, it is unlikely we will be able to obtain rights to the entire work cited. **See above two answers.**

**Regarding the Florida Primary Source Correlation spreadsheet, here is the text of two columns on the spreadsheet followed by some questions**

Column 2: *If primary sources are used, please list each benchmark that included a primary source as part of the instructional material. Add a row for each benchmark so that benchmarks are listed individually.*

Column 3: *List every primary source document that aligns to this benchmark.*

Question 4: Our programs include many primary sources that are not listed in the benchmarks or the clarifications. Is the correlation spreadsheet asking that we list all primary sources in our program? Or, per the instructional material specifications, do we only list those primary sources that are specifically mentioned in the benchmarks and clarifications? If we are required to list all primary sources in the program, are we allowed to include primary sources in our program that are not directly aligned to a specific benchmark, or should we limit the list to those primary sources that directly align to a benchmark? **Only primary source documents listed in the benchmark or clarification are required to be listed on the spreadsheet. You may provide additional primary sources if you like, but they are not required.**

Thanks  
John

Mr. Buelow,

The revised Civics and Government and the new Holocaust Education standards were approved by the State Board of Education (SBOE) in July and will be fully implemented in the 2023-2024 to align with state educational materials adoption cycle. The course drafts, with new/revised standards, are posted on CPALM as "2023 and Beyond" in anticipation of SBOE approval in October. I hope this answers your questions, but please reach out if further clarification is needed.

Mr. Duebel,

While I have made a note to follow up with you after October 21st as to my previous email, a few new questions have surfaced for which we are hopeful that we may be able to get your guidance at this time.

The Savvas Learning Company development team is currently working on tagging the content for our new/forthcoming Florida programs that are in development. From what my team can find, Social Studies Standards are still the Next Generation Sunshine State Standards. [Here is a link](#) that the team found but the team did not see the new standards in CPALMs.

1. **Are the Next Generation Sunshine State Standards for Social Studies changing, or will they remain the same? This question is posed with respect to the need for materials and alignment for the next adoption.**
2. **Is there a way to confirm that the approved standards linked above are final?**
3. **If these are not the final standards, how can we get copies of or a link to the final standards?** That is critical to our current development work for our programs.

Thank you for any guidance you can provide.

Sincerely,

**Brad Buelow, M.Ed.,**

**Subject:** Questions regarding new standards for Social Studies courses

Mr. Duebel,

On behalf for Savvas Learning Company (formerly known as Pearson K12 US Learning) and in regards to the forthcoming FL social studies textbook adoption, I am reaching out to you in hopes that you may be able to assist us with information that will help us continue in our efforts to create outstanding Social Studies programs for Florida students and educators. I appreciate any guidance you can provide by either directly answering these questions and/or guiding me to others who can answer these questions.

1. What is the expectation with respect to the Holocaust standards as to how they will be implemented by course description? In other words, in which course(s) are the newly approved 6-8 and 9-12 Holocaust standards going to be required? Our curriculum team needs to know which Holocaust standards will be aligned to which specific courses within the 6-8 and 9-12 grade bands.
2. The current Social Studies Access Points are from 2008.
  - a. Are the social studies Access Points going to be revised or rewritten before the adoption?
  - b. Will publishers be asked to correlate to them?
3. When will the CPALMS COURSE listings and standards for "2022 and Beyond" reflect all the newly approved standards (Civics & Government and Holocaust Education)? As extensions of this question/topic, we would like to ask the following questions:
  - a. Should we assume that in the Course CPALMS lists, that the Civics standards will all be replaced with the newly approved Civics-Government Standards in courses for grades 6-8 and 9-12?
  - b. Should we assume that they will NOT be added to any other course standards that do not currently have Civics standards?
4. With respect to Middle Grades Financial Literacy Standards, there is a strand of financial literacy standards for grades 6-8 listed in the social studies standards. Will these Financial Literacy standards be required in any social studies course(s) in grades 6-8 other than the standalone middle grades financial literacy course?
5. Are the Character Education standards within Health Education for grades 6-8 and 9-12 going to be added to any Social Studies courses for grades 6-12?

On behalf of Savvas Learning Company as an educational publishing company who takes very seriously and aims to meet the needs of Florida's students and educators, I sincerely thank you for your time, consideration, and feedback on the questions above.

Thank you,

**Attachment(s):** "~WRD000.jpg", "image001.jpg", "image002.png"

Brad,

All revised courses were approved by the State Board of Education (SBOE) last week. You can find the courses with the new descriptions and standards on CPALMS now. They will be listed as 2023 – Beyond.

There is at least 1 Holocaust education standard in every middle grades social studies class, there are four 9-12 Holocaust education elective courses (1 semester and full year regular and honors) that contain all the HE standards, and the new HE standards will be added to other courses where appropriate. The M/J financial literacy standards are only found in the financial literacy course. At this time no Character Ed

I will have to defer to someone else regarding Access Points because I'm not sure about the answer.

**Subject:** Questions regarding new standards for Social Studies courses

Mr. Duebel,

On behalf for Savvas Learning Company (formerly known as Pearson K12 US Learning) and in regards to the forthcoming FL social studies textbook adoption, I am reaching out to you in hopes that you may be able to assist us with information that will help us continue in our efforts to create outstanding Social Studies programs for Florida students and educators. I appreciate any guidance you can provide by either directly answering these questions and/or guiding me to others who can answer these questions.

1. What is the expectation with respect to the Holocaust standards as to how they will be implemented by course description? In other words, in which course(s) are the newly approved 6-8 and 9-12 Holocaust standards going to be required? Our curriculum team needs to know which Holocaust standards will be aligned to which specific courses within the 6-8 and 9-12 grade bands.
2. The current Social Studies Access Points are from 2008.
  - a. Are the social studies Access Points going to be revised or rewritten before the adoption?
  - b. Will publishers be asked to correlate to them?
3. When will the CPALMS COURSE listings and standards for "2022 and Beyond" reflect all the newly approved standards (Civics & Government and Holocaust Education)? As extensions of this question/topic, we would like to ask the following questions:
  - a. Should we assume that in the Course CPALMS lists, that the Civics standards will all be replaced with the newly approved Civics-Government Standards in courses for grades 6-8 and 9-12?
  - b. Should we assume that they will NOT be added to any other course standards that do not currently have Civics standards?
4. With respect to Middle Grades Financial Literacy Standards, there is a strand of financial literacy standards for grades 6-8 listed in the social studies standards. Will these Financial Literacy standards be required in any social studies course(s) in grades 6-8 other than the standalone middle grades financial literacy course?
5. Are the Character Education standards within Health Education for grades 6-8 and 9-12 going to be added to any Social Studies courses for grades 6-12?

On behalf of Savvas Learning Company as an educational publishing company who takes very seriously and aims to meet the needs of Florida's students and educators, I sincerely thank you for your time, consideration, and feedback on the questions above.

Thank you,

Mr. Buelow,

The revised Civics and Government and the new Holocaust Education standards were approved by the State Board of Education (SBOE) in July and will be fully implemented in the 2023-2024 to align with state educational materials adoption cycle. The course drafts, with new/revised standards, are posted on CPALM as "2023 and Beyond" in anticipation of SBOE approval in October. I hope this answers your questions, but please reach out if further clarification is needed.

Mr. Duebel,

While I have made a note to follow up with you after October 21st as to my previous email, a few new questions have surfaced for which we are hopeful that we may be able to get your guidance at this time.

The Savvas Learning Company development team is currently working on tagging the content for our new/forthcoming Florida programs that are in development. From what my team can find, Social Studies Standards are still the Next Generation Sunshine State Standards. [Here is a link](#) that the team found but the team did not see the new standards in CPALMs.

1. **Are the Next Generation Sunshine State Standards for Social Studies changing, or will they remain the same? This question is posed with respect to the need for materials and alignment for the next adoption.**
2. **Is there a way to confirm that the approved standards linked above are final?**
3. **If these are not the final standards, how can we get copies of or a link to the final standards?** That is critical to our current development work for our programs.

Thank you for any guidance you can provide.

Sincerely,

**Attachment(s):** "image002.png", "image001.jpg"

Brad,

All revised courses were approved by the State Board of Education (SBOE) last week.

- You can find the courses with the new descriptions and standards on CPALMS now.
  - They will be listed as 2023 – Beyond.
- There is at least 1 Holocaust education standard in every middle grades social studies class, there are four 9-12 Holocaust education elective courses (1 semester and full year regular and honors) that contain all the HE standards, and the new HE standards will be added to other courses where appropriate. The M/J financial literacy standards are only found in the financial literacy course.
- I do not believe character education standards have been added to social studies courses, but Mike can confirm.
- I will have to defer to someone else regarding Access Points because I'm not sure about the answer.

Hope this helps.

**Subject:** Quick Call to Confirm Direction of Final Corrections

Hi Cathy,

Thanks for your time this afternoon and for your offer of availability. In discussing how to most efficiently get to approval on the 8 remaining standards across G1 and G5, we thought it could be helpful for 1-2 members of our editorial team to discuss directly with you and Ashley how we might approach the additional corrections before proceeding with the mark-up and sending that over. That way we can ensure we are heading in the right direction prior to marking up the changes and sending those back for official approval.

If that is possible we can be available anytime tomorrow morning that works on your end. If you could let us know by close of business today we would be able to get the meeting details scheduled.

Much appreciated,  
Erin

Hi, thank you for the call just now.

As we emailed about on April 18th (below), we appeal the decision of DOE on 7th accelerated, Geometry, and Algebra 2 Honors.

At this time, we would like to work through the process with you all and not go through DOAH.

As you can see in the Google Doc below, we have shown the updates that we have made to 7th Accelerated, Geometry, and Algebra 2 Honors. These changes address all comments provided by DOE. These updates can also be seen in [FLIMadoption.org](https://www.flmadoption.org) portal using the links that we had submitted last summer. The Google Doc is simply screenshots before the changes and after the changes, compiled to make it quicker and simpler for you to review and approve.

Please let me know if there is anything else we need to do, or can do, to expedite this process. Thanks again for your assistance.

Best,  
Ethan

Hi,

I'm following up on the email communication from April 18th. I'm writing on behalf of Study Edge and the Math Nation curricula in the math adoption process.

I'd prefer not to go through the DOAH process right now, and instead work with DOE on resubmitting our instructional materials.

Would you please have someone reach out to discuss your requested changes? We are available evenings and all weekend, so any time at all is fine for the call.

We would like to discuss 3 of our courses (i.e, the ones on the Not Recommended list)

7th Accelerated  
Geometry  
Algebra 2 Honors

Again, we are available essentially 24/7 so please let us know as soon as possible as to when we can discuss these 3 courses and the desired changes. Just let us know what works best for you.

Regards,  
Ethan

On Apr 18, 2022, at 5:33 PM, Ethan Fieldman <[ethan@mathnation.com](mailto:ethan@mathnation.com)> wrote:

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.  
In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.  
However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school.  
We're also concerned that due to this issue, some districts may switch to other providers' providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has 7<sup>th</sup> grade math listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

Iâ€™m wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,  
Ashley

Hi, thank you for the quick response, we appreciate it.

1) We are also on Grade 6 Accelerated list, correct?

2) How would it be possible for Math Nation to be on the Geometry Honors list with a score of 100% aligned, and approved for all the other reasons, but not on the (regular) Geometry list, when our regular Geometry course submitted is an exact subset of our Geometry Honors course submitted?

3) Is there somewhere we can review the reasons why werenâ€™t included for each course, so that we can update our material accordingly (if necessary)? We donâ€™t see it on the [FLIMadoption.org](http://FLIMadoption.org) site.

Thanks,  
Ethan

Hi, thank you for the call just now.

As we emailed about on April 18th (below), we appeal the decision of DOE on 7th accelerated, Geometry, and Algebra 2 Honors.

At this time, we would like to work through the process with you all and not go through DOAH.

As you can see in the Google Doc below, we have shown the updates that we have made to 7th Accelerated, Geometry, and Algebra 2 Honors. These changes address all comments provided by DOE. These updates can also be seen in [FLIMadoption.org](http://FLIMadoption.org) portal using the links that we had submitted last summer. The Google Doc is simply screenshots before the changes and after the changes, compiled to make it quicker and simpler for you to review and approve.

Please let me know if there is anything else we need to do, or can do, to expedite this process. Thanks again for your assistance.

Best,  
Ethan

Google Doc of before and after changes: <https://docs.google.com/document/d/1HmBibQi8IrVXr19Y-LpBcJViAdz7-fXm3HFfzPFoIyO/edit>

Hi,

Iâ€™m following up on the email communication from April 18th. Iâ€™m writing on behalf of

Study Edge and the Math Nation curricula in the math adoption process.

Iâ€™d prefer not to go through the DOAH process right now, and instead work with DOE on resubmitting our instructional materials.

Would you please have someone reach out to discuss your requested changes? We are available evenings and all weekend, so any time at all is fine for the call.

We would like to discuss 3 of our courses (i.e, the ones on the Not Recommended list)

7th Accelerated

Geometry

Algebra 2 Honors

Again, we are available essentially 24/7 so please let us know as soon as possible as to when we can discuss these 3 courses and the desired changes. Just let us know what works best for you.

Regards,

Ethan

On Apr 18, 2022, at 5:33 PM, Ethan Fieldman <[ethan@mathnation.com](mailto:ethan@mathnation.com)> wrote:

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the stateâ€™s recommended list for that course. As the â€™Not Recommendedâ€™ PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standardsâ€™ and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nationâ€™s 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Floridaâ€™s new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, weâ€™re very concerned that depending on how long the appeals process takes,

Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers or providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has 7th grade math listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

I'm wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

**Attachment(s):** "Math Nation-Appeals K-12 Mathematics.xlsx", "image001.png"

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

**Subject:** Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score.

And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, weâ€™re very concerned that depending on how long the appeals process takes, Floridaâ€™s teachers and students will not have their materials in time for the start of school. Weâ€™re also concerned that due to this issue, some districts may switch to other providers â€” providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then weâ€™d like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Hi Ashley,

Thanks for reaching out. We did receive all evidence for the non-adopted materials and are in the review stages. We will reach out with next steps soon.

Thanks,

Lauren

Good morning,

I just wanted to check in and see if someone was able to review our before and after google doc of our changes so that we can move forward with those in our materials and move from the not-recommended list to the recommended list. Please let us know how we can be of assistance.

Thanks,

**Ashley Fieldman**

Hi, thank you for the call just now.

As we emailed about on April 18th (below), we appeal the decision of DOE on 7th accelerated, Geometry, and Algebra 2 Honors.

At this time, we would like to work through the process with you all and not go through DOAH.

As you can see in the Google Doc below, we have shown the updates that we have made to 7th Accelerated, Geometry, and Algebra 2 Honors. These changes address all comments provided by DOE. These updates can also be seen in [FLIMadoption.org](http://FLIMadoption.org) portal using the links that we had submitted last summer. The Google Doc is simply screenshots before the changes and after the changes, compiled to make it quicker and simpler for you to review and approve.

Please let me know if there is anything else we need to do, or can do, to expedite this process. Thanks again for your

FL-DOE-22-0431-A-003018

assistance.

Best,  
Ethan

Hi,

I'm following up on the email communication from April 18th. I'm writing on behalf of Study Edge and the Math Nation curricula in the math adoption process.

I'd prefer not to go through the DOAH process right now, and instead work with DOE on resubmitting our instructional materials.

Would you please have someone reach out to discuss your requested changes? We are available evenings and all weekend, so any time at all is fine for the call.

We would like to discuss 3 of our courses (i.e, the ones on the Not Recommended list)  
7th Accelerated  
Geometry  
Algebra 2 Honors

Again, we are available essentially 24/7 so please let us know as soon as possible as to when we can discuss these 3 courses and the desired changes. Just let us know what works best for you.

Regards,  
Ethan

On Apr 18, 2022, at 5:33 PM, Ethan Fieldman <[ethan@mathnation.com](mailto:ethan@mathnation.com)> wrote:

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the Not Recommended PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content

benchmarks)

b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)

c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school.

We're also concerned that due to this issue, some districts may switch to other providers' providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has 7<sup>th</sup> grade math listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for

accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

Iâ€™m wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Hi, thank you for the quick response, we appreciate it.

1) We are also on Grade 6 Accelerated list, correct?

2) How would it be possible for Math Nation to be on the Geometry Honors list with a score of 100% aligned, and approved for all the other reasons, but not on the (regular) Geometry list, when our regular Geometry course submitted is an exact subset of our Geometry Honors course submitted?

3) Is there somewhere we can review the reasons why werenâ€™t included for each course, so that we can update our material accordingly (if necessary)? We donâ€™t see it on the [FLIMadoption.org](http://FLIMadoption.org) site.

Thanks,  
Ethan

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a

clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.  
In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.  
However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers' providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. **Attachment(s):** "PastedGraphic-14.png", "PastedGraphic-15.png", "PastedGraphic-16.png"

Cathy, thanks so much for the phone call today.

Here are the graphs and I said I would send about the wildly inconsistent data related to Math Nation's 7th accelerated standards-alignment score.

Remember that (a) Math Nation is the only Florida-based option, (b) Math Nation is the only publisher that wrote specifically and only for the B.E.S.T. standards (not several other states at the same time, or rearrangement or 'hole plugging' of a national Common Core or old MAFS curriculum), and (c) Math Nation is the only program co-developed by the University of Florida (or any other Florida university).

**Most importantly, Math Nation is the best-aligned publisher based on DOE's scores** This means that the districts who are going to switch away from Math Nation to another publisher for middle school (or for all of middle/high school) because of this 7th Accelerated mistake are going to end up with a worse-aligned curriculum. This would certainly be a bad outcome for the students and teachers, the Department, and the state overall. I'm sure that is not the intention of the commissioner or anyone involved in authoring or implementing these highly anticipated new standards.

As we talked about on the call, it seems wildly improbable that the Math Nation 7th Accelerated was awarded an average score of 3.4 by two or three qualified reviewers, and we think the DOE should investigate the wildly inconsistent data (and soon).

- 1) 97% of the individual benchmark ratings from reviewers of all Math Nation materials were either a 4 or a 5 for each benchmark in each of the courses.
- 2) 96% of the benchmark ratings from reviews from those who looked at the benchmarks included within 7A were either a 4 or a 5.
- 3) 87% of the reviewers of our materials gave an overall average rating between 4.6-5 out of 5 and none of the reviewers across all courses gave an overall average rating less than 3.98. No one came anywhere close to a 3.4.

Also, please see the charts below.

For background:

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.  
In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.  
However, we were awarded a 3.4 in 7th Accelerated. Given the abundance of data, it seems that a typo or clerical error must have occurred.

Again, thank you for the call about the discrepancy in the scoring data.

Regards,  
Ethan

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the Not Recommended PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)

c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.  
In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.  
However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has 7<sup>th</sup> grade math listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons

were also approved for alignment.

Iâ€™m wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,

Hi, thank you for the call just now.

As we emailed about on April 18th (below), we appeal the decision of DOE on 7th accelerated, Geometry, and Algebra 2 Honors.

At this time, we would like to work through the process with you all and not go through DOAH.

As you can see in the Google Doc below, we have shown the updates that we have made to 7th Accelerated, Geometry, and Algebra 2 Honors. These changes address all comments provided by DOE. These updates can also be seen in [FLIMadoption.org](https://www.flmadoption.org) portal using the links that we had submitted last summer. The Google Doc is simply screenshots before the changes and after the changes, compiled to make it quicker and simpler for you to review and approve.

Please let me know if there is anything else we need to do, or can do, to expedite this process. Thanks again for your assistance.

Best,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has 7th grade math<sup>™</sup> listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

I'm wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,  
Ashley

Hi, thank you for the quick response, we appreciate it.

1) We are also on Grade 6 Accelerated list, correct?

2) How would it be possible for Math Nation to be on the Geometry Honors list with a score of 100% aligned, and approved for all the other reasons, but not on the (regular) Geometry list, when our regular Geometry course submitted is an exact subset of our Geometry Honors course submitted?

3) Is there somewhere we can review the reasons why weren't included for each course, so that we can update our material accordingly (if necessary)? We don't see it on the [FLIMadoption.org](http://FLIMadoption.org) site.

Thanks,  
Ethan

Hi,

I'm following up on the email communication from April 18th. I'm writing on behalf of Study Edge and the Math Nation curricula in the math adoption process.

I'd prefer not to go through the DOAH process right now, and instead work with DOE on resubmitting our instructional materials.

Would you please have someone reach out to discuss your requested changes? We are available evenings and all weekend, so any time at all is fine for the call.

We would like to discuss 3 of our courses (i.e, the ones on the Not Recommended list)  
7th Accelerated  
Geometry  
Algebra 2 Honors

Again, we are available essentially 24/7 so please let us know as soon as possible as to when we can discuss these 3 courses and the desired changes. Just let us know what works best for you.

Regards,  
Ethan

On Apr 18, 2022, at 5:33 PM, Ethan Fieldman <[ethan@mathnation.com](mailto:ethan@mathnation.com)> wrote:

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards, and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)

c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers' providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment. In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score. However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers or providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,

Ethan

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has 7<sup>th</sup> grade math™ listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7<sup>th</sup> grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8<sup>th</sup> grade benchmarks.

Our 8<sup>th</sup> grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7<sup>th</sup> accelerated product. Our 7<sup>th</sup> grade lessons were also approved for alignment.

I'm wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7<sup>th</sup> accelerated course only uses content from 2 other approved courses (7<sup>th</sup> and 8<sup>th</sup>), and there are no benchmarks in the 7<sup>th</sup> accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,

Hi, thank you for the quick response, we appreciate it.

1) We are also on Grade 6 Accelerated list, correct?

2) How would it be possible for Math Nation to be on the Geometry Honors list with a score of 100% aligned, and approved for all the other reasons, but not on the (regular) Geometry list, when our regular Geometry course submitted is an exact subset of our Geometry Honors course submitted?

3) Is there somewhere we can review the reasons why weren't included for each course, so that we can update our material accordingly (if necessary)? We don't see it on the [FLIMadoption.org](http://FLIMadoption.org) site.

Thanks,  
Ethan

**Subject:** Re: Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated

Hi,

I'm following up on the email communication from April 18th. I'm writing on behalf of Study Edge and the Math Nation curricula in the math adoption process.

I'd prefer not to go through the DOAH process right now, and instead work with DOE on resubmitting our instructional materials.

Would you please have someone reach out to discuss your requested changes? We are available evenings and all weekend, so any time at all is fine for the call.

We would like to discuss 3 of our courses (i.e, the ones on the Not Recommended list)

7th Accelerated

Geometry

Algebra 2 Honors

Again, we are available essentially 24/7 so please let us know as soon as possible as to when we can discuss these 3 courses and the desired changes. Just let us know what works best for you.

Regards,  
Ethan

On Apr 18, 2022, at 5:33 PM, Ethan Fieldman <ethan@mathnation.com> wrote:

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, weâ€™re very concerned that depending on how long the appeals process takes, Floridaâ€™s teachers and students will not have their materials in time for the start of school. Weâ€™re also concerned that due to this issue, some districts may switch to other providers â€” providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then weâ€™d like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

**Subject:** Re: Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated

Hi, thank you for the call just now.

As we emailed about on April 18th (below), we appeal the decision of DOE on 7th accelerated, Geometry, and Algebra 2 Honors.

At this time, we would like to work through the process with you all and not go through DOAH.

As you can see in the Google Doc below, we have shown the updates that we have made to 7th Accelerated, Geometry, and Algebra 2 Honors. These changes address all comments provided by DOE. These updates can also be seen in [FLIMadoption.org](https://FLIMadoption.org) portal using the links that we had submitted last summer. The Google Doc is simply screenshots before the changes and after the changes, compiled to make it quicker and simpler for you to review and approve.

Please let me know if there is anything else we need to do, or can do, to expedite this process. Thanks again for your assistance.

Best,  
Ethan

Google Doc of before and after changes: <https://docs.google.com/document/d/1HmBibQi8lrVXr19Y-LpBcJVAdz7-fXm3HFlzPFolyQ/edit>

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,  
Ashley

**Attachment(s):** "Math Nation-Appeals K-12 Mathematics.xlsx", "image001.png"

Good morning,

Thank you so much for your inquiry. Attached is our initial findings from the review process of both standards alignment (full evaluations for materials attached) and any special topics findings. Only materials and standards that were rated at a 3-Fair or below, are of interest for the purpose of non-adoption. All findings are attached to this email and we welcome further conversation regarding these findings and ensuring all your materials are appropriate for Florida classrooms.

Also, please advise if you believe you have proprietary materials of a nature that would prevent the department from disclosing them as public records. If so, please identify the grounds for that claim.

**Subject:** Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the state's recommended list for that course. As the "Not Recommended" PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standards and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nation's 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Florida's new 7th Accelerated course is made up of the following content benchmarks:

- 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)
- 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)
- There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.

In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score.

And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.

However, we were awarded a 3.4 in 7th Accelerated.

Also, weâ€™re very concerned that depending on how long the appeals process takes, Floridaâ€™s teachers and students will not have their materials in time for the start of school. Weâ€™re also concerned that due to this issue, some districts may switch to other providers â€” providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then weâ€™d like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has â€˜7th grade mathâ€™ listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

Iâ€™m wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,  
Ashley

Hi, just to clarify,

7th Accelerated we believe is a mistake and would like to meet as soon as possible.

Weâ€™d also like to meet about Geometry Regular and Alg2 Honors, where we have a â€™special topicsâ€™ âœYâ€ at the same time, but thatâ€™s not an alignment mistake.

Regards,  
Ethan

**From:** Ethan Fieldman <ethan@mathnation.com>  
**Subject:** Request for reconsideration/inquiry - Math Nation - 7th Grade Accelerated  
**Date:** April 18, 2022 at 5:33:22 PM EDT  
**To:** "Baumbach, Amber" <Amber.Baumbach@fldoe.org>  
**Cc:** Ashley Fieldman <ashley@mathnation.com>, "Hamilton, Lauren" <Lauren.Hamilton@fldoe.org>, "Seeds, Cathy" <Cathy.Seeds@fldoe.org>, "Rivers1, Angelia" <Angelia.Rivers1@fldoe.org>, Shawn Wigg <shawn@mathnation.com>

Amber, thank you very much for the prompt reply.

We understand that we were awarded a 3.4 out of 5.0 on 7th Accelerated, and thus did not make the stateâ€™s recommended list for that course. As the â€™Not Recommendedâ€™ PDF shows, the 3.4 score is the only reason we were not allowed onto the recommended list.

We ask that FLDOE please review this decision (because we believe it may have been an error in scoring, or a clerical error).

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment to these new standardsâ€™, and our alignment scores in other math courses demonstrate that. Since our 7th Accelerated course only uses content from 2 other approved courses (7th Grade-regular and 8th Grade), and there are no content benchmarks in the 7th Accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system. Again, we formally ask that you review this decision not to place Math Nationâ€™s 7th Accelerated curriculum on the recommended list.

Every course we submitted (other than 7th Accelerated) had an alignment score high enough to make the recommended list.

Floridaâ€™s new 7th Accelerated course is made up of the following content benchmarks:  
a) 100% of the 8th Grade benchmarks are in 7th Accelerated (all 40 of the 8th Grade-regular content benchmarks)  
b) 50% of the 7th Grade-regular benchmarks are in 7th Accelerated (17 of the 34 7th Grade-regular content benchmarks)

c) There are no other content benchmarks in 7th Accelerated.

In 8th Grade (regular), we received a perfect 5.0/5.0 and 100.0% percentage of alignment.  
In 7th Grade (regular), we received a 4.6/5.0 and 93.9% percentage of alignment.

This means that 70% of the 7th Accelerated content benchmarks are from 8th Grade, where we received a perfect 5.0 / 100.0% score. And the remaining 30% of the content benchmarks are from 7th Grade-regular, where we received a 4.6 score.  
However, we were awarded a 3.4 in 7th Accelerated.

Also, we're very concerned that depending on how long the appeals process takes, Florida's teachers and students will not have their materials in time for the start of school. We're also concerned that due to this issue, some districts may switch to other providers " providers that have much worse alignment scores from FLDOE (but do have a currently-recommended 7th Accelerated course).

Please let us know as soon as possible if there is anything else we need to do in order for an appeal to be initiated, or if this written request for reconsideration/appeal is satisfactory. If an appeal is not necessary but simply a reconsideration or inquiry into the matter, we ask that you do this at once. If an appeal is necessary, then we'd like this to serve as our formal request for an expedited appeal. Again, please let us know what else we need to do, if anything, to help rectify this situation.

Regards,  
Ethan

**Subject:** Re: 21-22 Instructional Materials Mathematics State Adopted List

Good afternoon,

We reviewed the not-recommended list that was posted on the instructional materials website, and for 7th accelerated, our middle school course that was rejected, it has "7th grade math" listed as the product that was reviewed and rejected for a 3.4 alignment.

Our 7th grade product would have received a low score if it was reviewed for accelerated since it does not cover the 8th grade benchmarks.

Our 8th grade course received a 5.0 and 100.0% on alignment and was approved, and the material in that course is used in the 7th accelerated product. Our 7th grade lessons were also approved for alignment.

Iâ€™m wondering if links were somehow crossed and the wrong product was reviewed or perhaps the wrong score was inadvertently posted.

Please see screenshot attached.

We poured over the B.E.S.T. Standards for Mathematics to create a curriculum (from scratch) that was truly aligned to the new standards, since they are so different from previous standards. As the only Florida-based option, we understand the importance and significance of alignment. And our alignment scores in other courses demonstrate that. Since our 7th accelerated course only uses content from 2 other approved courses (7th and 8th), and there are no benchmarks in the 7th accelerated course standards that are not in either of those two courses, it must be that there was a clerical error or glitch in the system.

Thank you,  
Ashley

Hi, thank you for the quick response, we appreciate it.

- 1) We are also on Grade 6 Accelerated list, correct?
- 2) How would it be possible for Math Nation to be on the Geometry Honors list with a score of 100% aligned, and approved for all the other reasons, but not on the (regular) Geometry list, when our regular Geometry course submitted is an exact subset of our Geometry Honors course submitted?
- 3) Is there somewhere we can review the reasons why werenâ€™t included for each course, so that we can update our material accordingly (if necessary)? We donâ€™t see it on the [FLIMadoption.org](http://FLIMadoption.org) site.

Thanks,  
Ethan

Thank you for scheduling our initial negotiations call for grade 2 in such a timely manner.

Will the DOE have legal representation on this call? We are currently determining which Savvas team members should attend and want to be certain we are prepared.

We will be submitting additional appeals after our teams have thoroughly vetted the feedback we received on other titles.

Will a negotiation call be scheduled for each grade/title we appeal?

We look forward to a productive conversation and resolution.

Regards,

Rachel

**Subject:** Re: Savvas - initial appeal call

Thank you for scheduling our initial negotiations call for grade 2 in such a timely manner.

Will the DOE have legal representation on this call? We are currently determining which Savvas team members should attend and want to be certain we are prepared.

We will be submitting additional appeals after our teams have thoroughly vetted the feedback we received on other titles. Will a negotiation call be scheduled for each grade/title we appeal?

We look forward to a productive conversation and resolution.

Regards,

Rachel

Hi Rachel,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Tuesday, April 26<sup>th</sup>, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Savvas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Tuesday.

**Attachment(s):** "image001.png"

Hi Rachel,

Yes, DOE will have legal representation on tomorrow's call for your appeal on grade 2, as listed below. If you wish to appeal the other course/grade levels at a later date we would then schedule an additional call for those courses. Please keep in mind that all appeals need to be initiated within 21 days of the adoption list posting, which occurred on 4/15.

Thank you,

Thank you for scheduling our initial negotiations call for grade 2 in such a timely manner. Will the DOE have legal representation on this call? We are currently determining which Savvas team members should attend and want to be certain we are prepared. We will be submitting additional appeals after our teams have thoroughly vetted the feedback we received on other titles. Will a negotiation call be scheduled for each grade/title we appeal?

We look forward to a productive conversation and resolution.  
Regards,  
Rachel

Hi Rachel,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Tuesday, April 26<sup>th</sup>, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Savvas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Tuesday.

Hi Lauren, Cathy, and James:

For the Florida Math 2021 Adoption, we have received and reviewed the Adopted and Non-Adopted Lists that FLDOE posted recently to its website. We intend to submit an appeal for the following Savvas Learning submissions that were not adopted.

At this time, we would like to request any information you can share as to the reasons for the decision not to adopt our submissions, including any evaluation reports from reviewers. For our submissions that were not approved due to the "inclusion of special topics," can you please provide a definition or description of these "special topics" and a list of any objectionable content found in the submissions.

Hi Courtney,

I believe that any individual score under a 4 warrants a second look from you. Cathy, please correct me if I'm wrong. However, if you find the alignment to be at the 4, or satisfactory, level, please mark it as "fine" or "aligned," as you have been doing so that you can focus their attention on the standards that really need the extra support.

Thank you for all your work on these. I know it's a lot and it isn't always easy. We appreciate you!

Thanks,

**Subject:** RE: Savvas Learning Company Grade 7 appeal

Hi Amber,

I just want to make sure that I am providing feedback where necessary. In some of these benchmarks (MA.7.AR.1.2), the reviews do meet the 4 threshold since two reviewers scored a 4 and two scored a 5. Savvas provided evidence on these, but do I need to provide feedback in these cases?

Hi Courtney,

Savvas has resent their spreadsheet with the links needed for grade 7. Please review and add your comments as necessary.

Thank you!

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,  
Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification? I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment. Let me know if you have questions.

Thank you!

**Subject:** Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,  
Rachel

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**

*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**

We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. All *enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |
|---------------------|------------------------------------------------------------------------|--------------------------------------------------------|

| <b>Clarification 1:</b> Instruction includes discounts, markups, simple interest, tax, tips, fees, percent increase, percent decrease and percent error. | Covers all percent examples defined in the clarifications. All presented in real world problems and are <b>relatable</b> to the audience. | Real world problems are given to practice percent (also relatable, such as percent of phone battery). | Very good alignment. I really like how the distinction is made between a ratio and a fraction, even though they are both written in the same format. | This standard is taught well |

9 (including the Accelerated reviews of the exact same benchmarks and instruction) raises significant questions.

**Part 2 - Benchmark-Specific Responses**

10 In specific cases, we believe the reviewers also missed content or made some judgments in their ratings that were pedagogical or related to preference of implementation, rather than focused strictly on the question of whether the standard was effectively addressed in the course. Specific examples are provided below.

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                                      |                                                                                                                              |                                                 |                              |

Selected examples are provided here, such as manipulatives, tables, and equations (pp. 78-79)                                                                                                                                                     | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as tables, graphs, and equations (pp. 98-99).                                                                                                                                                   | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as bar models, verbal descriptions, and equations (pp. 142-143).                                                                                                         |
| 25 | <u>Lesson 2-1 Example (see Thinking and Reasoning, Convince Me!, Do You Understand?, Do You Know How?)</u> |                                        | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Solve and Discuss It! opportunities with Thinking and Reasoning prompts are provided at the start of many lessons, such as Lesson 2-1 (p. 77), in which students explain their reasoning and make generalizations. | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Explain It! opportunities with Thinking and Reasoning prompts are provided at the start of many lessons, such as Lesson 1-5 (p. 39), in which students analyze the thinking of others and justify results. | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Do You Understand? questions are provided in every lesson, such as Lesson 4-5 (p. 216), in which students explain mathematical concepts (#1) and recognize and correct errors (#2). |
| 26 | <u>Examples of Check for Reasonableness (see pages 11, 15, and 16)</u>                                     |                                        | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 3-1 Example 3 (p. 131), in which students use estimating with compatible numbers to check the reasonableness of their solutions.                                                                                      | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 6-1 Example 1 (p. 300), in which students check calculations with alternate approaches.                                                                                                                       | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 8-2 Example 2 (p. 419), in which students check calculations when solving problems.                                                                                                    |

Hi Courtney,

I believe that any individual score under a 4 warrants a second look from you. Cathy, please correct me if I'm wrong. However, if you find the alignment to be at the 4, or satisfactory, level, please mark it as "fine" or "aligned," as you have been doing so that you can focus their attention on the standards that really need the extra support.

Thank you for all your work on these. I know it's a lot and it isn't always easy. We appreciate you!

Thanks,

Hi Amber,

I just want to make sure that I am providing feedback where necessary. In some of these benchmarks (MA.7.AR.1.2), the reviews do meet the 4 threshold since two reviewers scored a 4 and two scored a 5. Savvas provided evidence on these, but do I need to provide feedback in these cases?

Courtney Starling

Hi Courtney,

Savvas has resent their spreadsheet with the links needed for grade 7. Please review and add your comments as necessary.

Thank you!

**Subject:** Re: Savvas Learning Company Grade 7 appeal

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,  
Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification? I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment. Let me know if you have questions.

Thank you!

**Subject:** Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,  
Rachel

**Subject:** RE: Savvas Learning Company Grade 7 appeal

Hi Amber,

My apologies. I made notes on those left blank that a link to the lesson needs to be provided for review. It is difficult to determine a yes or no alignment just based on arguments from a reviewer and the publisher without the context.

Thanks, Courtney!

There are a few comment boxes that are missing comments. Would you mind putting in either a "fine" if you are good with what the publisher has said as far as proving their alignment for each standard in question, or some specific feedback to the publisher stating what is needed or missing with their alignment? We will use this spreadsheet when we meet with the publisher again and it'll be helpful to you to have specific talking points when addressing their standards alignment with them.

I've cleaned up the spreadsheet a little and highlighted comments that we need in blue. Anything in gray does not need a comment in that column. It may be helpful to print as it is hard to see the whole spreadsheet on the screen.

Let me know if you need anything.

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |

| Grade 6             | 93                                                                     | 85%                                                    |
| Grade 8 Pre-Algebra | 85                                                                     | 77%                                                    |
| Accelerated Grade 6 | 107                                                                    | 75%                                                    |
| Accelerated Grade 7 | 141                                                                    | 99%                                                    |

below. Procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those not warrant the discrepancy in ratings. Examples of these discrepancies are provided

As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.

-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).

at the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification?

I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment.

Let me know if you have questions.

Thank you!

Amber Baumbach

**Subject:** Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,  
Rachel

|   | A                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | B                                        |

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |

| <b>Grade 7</b>      | <b>3</b>                                                               | <b>3%</b>                                              |
| Grade 6             | 93                                                                     | 85%                                                    |
| Grade 8 Pre-Algebra | 85                                                                     | 77%                                                    |
| Accelerated Grade 6 | 107                                                                    | 75%                                                    |
| Accelerated Grade 7 | 141                                                                    | 99%                                                    |

below. Procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those not warrant the discrepancy in ratings. Examples of these discrepancies are provided

As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.

-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).

at the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

Thanks, Courtney!

There are a few comment boxes that are missing comments. Would you mind putting in either a "fine" if you are good with what the publisher has said as far as proving their alignment for each standard in question, or some specific feedback to the publisher stating what is needed or missing with their alignment? We will use this spreadsheet when we meet with the publisher again and it will be helpful to you to have specific talking points when addressing their standard alignment with them.

I've cleaned up the spreadsheet a little and highlighted comments that we need in blue. Anything in gray does not need a comment in that column. It may be helpful to print as it is hard to see the whole spreadsheet on the screen.

Let me know if you need anything.

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,  
Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification?

I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment.

Let me know if you have questions.

Thank you!

Hi Courtney,

I believe that any individual score under a 4 warrants a second look from you. Cathy, please correct me if I'm wrong. However, if you find the alignment to be at the 4, or satisfactory, level, please mark it as "aligned" or "aligned," as you have been doing so that you can focus their attention on the standards that really need the extra support.

Thank you for all your work on these. I know it's a lot and it isn't always easy. We appreciate you!

Thanks,

Hi Amber,

I just want to make sure that I am providing feedback where necessary. In some of these benchmarks (MA.7.AR.1.2), the reviews do meet the 4 threshold since two reviewers scored a 4 and two scored a 5. Savvas provided evidence on these, but do I need to provide feedback in these cases?

**Subject:** Re: Savvas Learning Company Grade 7 appeal

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,  
Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification? I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment. Let me know if you have questions.

Thank you!

Thank you so much Cathy.

Yes, Pearson is the publisher with content rights for all the other titles that were bid and currently on the non-adopted IM list. They will be filing any appeals independently of Savvas.

Thank you, Rachel. We will review and get back with you shortly.

Just wanted check with you on the appeal request for the other grade levels and bids. On our call it was indicated that the appeal would come directly from Pearson. Is that still the case? Have you all heard from them on their appeal filing?

Thank you,  
Cathy

Hi Amber,

I just want to make sure that I am providing feedback where necessary. In some of these benchmarks (MA.7.AR.1.2), the reviews do meet the 4 threshold since two reviewers scored a 4 and two scored a 5. Savvas provided evidence on these, but do I need to provide feedback in these cases?

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |
|---------------------|------------------------------------------------------------------------|--------------------------------------------------------|

They are represented algebraically and graphically. Required forms of inequalities are used.</p> | <p>Benchmark is covered, more examples of solving different types of inequalities (relating them back to equations) are needed.</p> | <p>The highlighted lessons align to the benchmark.</p> | <p>This standard is taught well</p> |

s are included. Lesson 5-3 Solve Inequalities Using Addition or Subtraction (pp. 271–276) with inequalities on either side of the inequality symbol. Similarly, Lesson 5-4 Solve Inequalities on Either Side of the Inequality Symbol (pp. 277–280) includes all four inequality symbols and problems with inequalities on either side of the inequality symbol. Additional instruction and practice opportunities can be found in the Topic Review (pp. 289–290).

| <p><b>11</b></p> <p>As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).</p>                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                               |                                                                                                                                    |                                                                                                                                                                                                                                            |                                                   |
| <p><b>MA.7.AR.3.2</b> Apply previous understanding of ratios to solve real-world problems involving proportions.</p> <p><b>Example:</b> Scott is mowing lawns to earn money to buy a new gaming system and knows he needs to mow 35 lawns to earn enough money. If he can mow 4 lawns in 3 hours and 45 minutes, how long will it take him to mow 35 lawns? Assume that he can mow each lawn in the same amount of time.</p> <p><b>Example:</b> Ashley normally runs 10-kilometer races which is about 6.2 miles. She wants to start training for a half-marathon which is 13.1 miles. How many kilometers will she run in the half-marathon? How does that compare to her normal 10K race distance?</p> | <p>4</p> <p>real world problems involving proportional relationships are used-time and money, and recipes</p> | <p>3</p> <p>Ratios are more tied to percent problems rather than proportion problems (although proportions are used to solve).</p> | <p>3</p> <p>The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.</p> | <p>5</p> <p>This standard is taught very well</p> |
| <p><b>12</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                               |                                                                                                                                    |                                                                                                                                                                                                                                            |                                                   |

-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).  
 The score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

several real-world problems” and “ample practice opportunities.” *(Links to examples*

“more real-world and reliable word problems” does not describe a deficiency of expectations of this Benchmark and we request that the score of 3 be

“strong evidence...throughout” and “many opportunities to engage;” with “daily authentic engagement of this MTR.” However, every student to analyze the problem in ways that make sense, ask questions, and a collective, whole-class discussion follows. On a daily basis, teachers are provided robust *D/E for linked examples)*

The mathematical thinking and reasoning and behaviors students are the Handbook is provided in the Teacher’s Edition and offers teaching suggestions and 1.1. Specific behaviors of students who are demonstrating proficiency with MTR.1.1 are also *(See Columns D/E for linked examples)*

on for students to engage in and teachers to encourage and help to develop the behaviors (Alignment) or 5 (Very Good Alignment).

or students to engage in and teachers to encourage and help to develop the behaviors every lesson as noted by Ms. Pitts. Reviewers also note that students can provide reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

or students to engage in and teachers to encourage and help to develop the behaviors and explain their understanding. Other reviewers note “strong evidence,” and are linked in Columns D/E, but similar opportunities exist in every lesson in the

al discussions in the classroom. Considering the evidence presented and the high scores 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good

s note “strong evidence...throughout,” “a lot of questions,” and “many entered more than 80 times in the student text, with additional opportunities provided to Columns D/E.

that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5

Pitts comments that the “majority of word problems presented should be reliable les and problems. A few linked examples are in Columns D/E.

that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5

3.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning adoption, the scores on many benchmarks are inexplicably low compared to those of rated 6 and Accelerated 7 reviewers. Those courses address the exact same benchmarks alignment) ratings issued by the Grade 7 reviewers did not include any negative comments ted evidence and additional reviewer support for raising these ratings. We respectfully *da B.E.S.T. Mathematics, Grade 7* to the list of adopted programs. Savvas Learning Company rida schools with the highest quality materials that are fully aligned with Florida’s B.E.S.T.

Selected examples are provided here, such as manipulatives, tables, and equations (pp. 78-79)                                                                                                                                                    | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as tables, graphs, and equations (pp. 98-99).                                                                                                                                                  | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as bar models, verbal descriptions, and equations (pp. 142-143).                                                                                                         |
| 25 | Lesson 2-1 Example (see Thinking and Reasoning, Convince Mel, Do You Understand?, Do You Know How?) |                                                               | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Solve and Discuss It! opportunities with Thining and Reasoning prompts are provided at the start of many lessons, such as Lesson 2-1 (p. 77), in which students explain their reasoning and make generalizations. | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Explain It! opportunities with Thining and Reasoning prompts are provided at the start of many lessons, such as Lesson 1-5 (p. 39), in which students analyze the thinking of others and justify results. | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Do You Understand? questions are provided in every lesson, such as Lesson 4-5 (p. 216), in which students explain mathematical concepts (#1) and recognize and correct errors (#2). |
| 26 | Examples of Check for Reasonableness (see pages 11, 15, and 16)                                     |                                                               | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 3-1 Example 3 (p. 131), in which students use estimating with compatible numbers to check the reasonableness of their solutions.                                                                                     | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 6-1 Example 1 (p. 300), in which students check calculations with alternate approaches.                                                                                                                      | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 8-2 Example 2 (p. 419), in which students check calculations when solving problems.                                                                                                    |
| 27 | Examples of Real World Contexts                                                                     | Examples of Real World Contexts                               | N/A                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                              |

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification? I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment.  
Let me know if you have questions.

Thank you!

**Subject:** Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,  
Rachel

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |
|---------------------|------------------------------------------------------------------------|--------------------------------------------------------|
| <b>Grade 7</b>      | <b>3</b>                                                               | <b>3%</b>                                              |
| Grade 6             | 93                                                                     | 85%                                                    |
| Grade 8 Pre-Algebra | 85                                                                     | 77%                                                    |
| Accelerated Grade 6 | 107                                                                    | 75%                                                    |
| Accelerated Grade 7 | 141                                                                    | 99%                                                    |

below. Procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those not warrant the discrepancy in ratings. Examples of these discrepancies are provided

| Benchmark                                                                  | Grade 7 Reviewer 1 (Champion) | Grade 7 Reviewer 2 (Pitts) | Grade 6 Accelerated Reviewer 1 | Grade 6 Accelerated Reviewer 2 |

| <p><b>11</b></p> <p>As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).</p>                                                                                                                                                                                                                                                                                                                                                                                 |                                                                                                               |                                                                                                                                    |                                                                                                                                                                                                                                            |                                                   |
| <p><b>MA.7.AR.3.2</b> Apply previous understanding of ratios to solve real-world problems involving proportions.</p> <p><b>Example:</b> Scott is mowing lawns to earn money to buy a new gaming system and knows he needs to mow 35 lawns to earn enough money. If he can mow 4 lawns in 3 hours and 45 minutes, how long will it take him to mow 35 lawns? Assume that he can mow each lawn in the same amount of time.</p> <p><b>Example:</b> Ashley normally runs 10-kilometer races which is about 6.2 miles. She wants to start training for a half-marathon which is 13.1 miles. How many kilometers will she run in the half-marathon? How does that compare to her normal 10K race distance?</p> | <p>4</p> <p>real world problems involving proportional relationships are used-time and money, and recipes</p> | <p>3</p> <p>Ratios are more tied to percent problems rather than proportion problems (although proportions are used to solve).</p> | <p>3</p> <p>The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.</p> | <p>5</p> <p>This standard is taught very well</p> |
| <p><b>12</b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |                                                                                                               |                                                                                                                                    |                                                                                                                                                                                                                                            |                                                   |

-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).  
 The score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

Hi all,

We are happy to inform you that Savvas' grade 7 is fully approved and has been added to the adopted list on our website. It was a pleasure to work with Savvas during the adoption cycle and appeal process.

Thank you,

Thank you so much Cathy.

Yes, Pearson is the publisher with content rights for all the other titles that were bid and currently on the non-adopted IM list. They will be filing any appeals independently of Savvas.

Thank you, Rachel. We will review and get back with you shortly.

Just wanted check with you on the appeal request for the other grade levels and bids. On our call it was indicated that the appeal would come directly from Pearson. Is that still the case? Have you all heard from them on their appeal filing?

Thank you,

Cathy

**Subject:** Re: Savvas Learning Company Grade 7 appeal

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,

Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification?

I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment.

Let me know if you have questions.

Thank you!

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**

We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |
|---------------------|------------------------------------------------------------------------|--------------------------------------------------------|
| <b>Grade 7</b>      | <b>3</b>                                                               | <b>3%</b>                                              |
| Grade 6             | 93                                                                     | 85%                                                    |
| Grade 8 Pre-Algebra | 85                                                                     | 77%                                                    |
| Accelerated Grade 6 | 107                                                                    | 75%                                                    |
| Accelerated Grade 7 | 141                                                                    | 99%                                                    |

below. Procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those not warrant the discrepancy in ratings. Examples of these discrepancies are provided

As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.

-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).

At the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

| 24 |                                                                                                     |                                                               | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as manipulatives, tables, and equations (pp. 78-79)                                                                                                                                                    | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as tables, graphs, and equations (pp. 98-99).                                                                                                                                                  | Multiple representations are presented and connected throughout the text. Selected examples are provided here, such as bar models, verbal descriptions, and equations (pp. 142-143).                                                                                                         |
| 25 | Lesson 2-1 Example (see Thinking and Reasoning, Convince Mel, Do You Understand?, Do You Know How?) |                                                               | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Solve and Discuss It! opportunities with Thining and Reasoning prompts are provided at the start of many lessons, such as Lesson 2-1 (p. 77), in which students explain their reasoning and make generalizations. | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Explain It! opportunities with Thining and Reasoning prompts are provided at the start of many lessons, such as Lesson 1-5 (p. 39), in which students analyze the thinking of others and justify results. | Opportunities to promote discussions and elicit mathematical thinking are presented throughout the text. Do You Understand? questions are provided in every lesson, such as Lesson 4-5 (p. 216), in which students explain mathematical concepts (#1) and recognize and correct errors (#2). |
| 26 | Examples of Check for Reasonableness (see pages 11, 15, and 16)                                     |                                                               | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 3-1 Example 3 (p. 131), in which students use estimating with compatible numbers to check the reasonableness of their solutions.                                                                                     | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 6-1 Example 1 (p. 300), in which students check calculations with alternate approaches.                                                                                                                      | Opportunities for students to assess reasonableness are presented throughout the text, such as Lesson 8-2 Example 2 (p. 419), in which students check calculations when solving problems.                                                                                                    |
| 27 | Examples of Real World Contexts                                                                     | Examples of Real World Contexts                               | N/A                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                              |

Thank you so much Cathy.

Yes, Pearson is the publisher with content rights for all the other titles that were bid and currently on the non-adopted IM list. They will be filing any appeals independently of Savvas.

Rachel

Thank you, Rachel. We will review and get back with you shortly.

Just wanted check with you on the appeal request for the other grade levels and bids. On our call it was indicated that the appeal would come directly from Pearson. Is that still the case? Have you all heard from them on their appeal filing?

Thank you,  
Cathy

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,  
Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification?

I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment.

Let me know if you have questions.

Thank you!

Hi Courtney,

I believe that any individual score under a 4 warrants a second look from you. Cathy, please correct me if Iâ€™m wrong. However, if you find the alignment to be at the 4, or satisfactory, level, please mark it as â€œfine,â€ or â€œaligned,â€ as you have been doing so that you can focus their attention on the standards that really need the extra support.

Thank you for all your work on these. I know itâ€™s a lot and it isnâ€™t always easy. We appreciate you!

Thanks,

Hi Amber,

I just want to make sure that I am providing feedback where necessary. In some of these benchmarks (MA.7.AR.1.2), the reviews do meet the 4 threshold since two reviewers scored a 4 and two scored a 5. Savvas provided evidence on these, but do I need to provide feedback in these cases?

Hi Courtney,

I believe that any individual score under a 4 warrants a second look from you. Cathy, please correct me if I'm wrong. However, if you find the alignment to be at the 4, or satisfactory, level, please mark it as "fine" or "aligned," as you have been doing so that you can focus their attention on the standards that really need the extra support.

Thank you for all your work on these. I know it's a lot and it isn't always easy. We appreciate you!

Thanks,

Hi Amber,

I just want to make sure that I am providing feedback where necessary. In some of these benchmarks (MA.7.AR.1.2), the reviews do meet the 4 threshold since two reviewers scored a 4 and two scored a 5. Savvas provided evidence on these, but do I need to provide feedback in these cases?

Good Morning Amber,

Attached you will find the updated spreadsheet from Savvas for grade 7 enVision B.E.S.T. Mathematics with the additional evidence of alignment that was requested.

We appreciate the time the math specialists are taking to review and validate our appeal.

Please let me know if any additional information is needed.

Regards,  
Rachel

Hi Rachel,

Our math specialists have been reviewing at your appeal spreadsheet and have a request. Can you please provide direct links to the materials, even if you aren't changing anything, so that they can view the alignment along with your justification?

I've attached the spreadsheet and have highlighted (in blue) the areas where links are needed. If it isn't highlighted, the evidence that you provided is sufficient to see the alignment.

Let me know if you have questions.

Thank you!

Thanks, Courtney!

There are a few comment boxes that are missing comments. Would you mind putting in either a "fine" if you are good with what the publisher has said as far as proving their alignment for each standard in question, or some specific feedback to the publisher stating what is needed or missing with their alignment? We will use this spreadsheet when we meet with the publisher again and it will be helpful to you to have specific talking points when addressing their standards alignment with them.

I've cleaned up the spreadsheet a little and highlighted comments that we need in blue. Anything in gray does not need a comment in that column. It may be helpful to print as it is hard to see the whole spreadsheet on the screen.

Let me know if you need anything.

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. All *enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |
|---------------------|------------------------------------------------------------------------|--------------------------------------------------------|
| <b>Grade 7</b>      | <b>3</b>                                                               | <b>3%</b>                                              |
| Grade 6             | 93                                                                     | 85%                                                    |
| Grade 8 Pre-Algebra | 85                                                                     | 77%                                                    |
| Accelerated Grade 6 | 107                                                                    | 75%                                                    |
| Accelerated Grade 7 | 141                                                                    | 99%                                                    |

The of Accelerated Grade 7 procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. This is Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those of the

| Benchmark                                                                  | Grade 7 Reviewer 1 (Champion) | Grade 7 Reviewer 2 (Pitts) | Grade 6 Accelerated Reviewer 1 | Grade 6 Accelerated Reviewer 2 |

| <p><b>MA.7.AR.2.1</b> Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.</p> <p><b>Benchmark Clarifications:</b><br/>                     Clarification 1: Instruction focuses on the properties of inequality. Refer to Properties of Operations, Equality and Inequality (Appendix D).<br/>                     Clarification 2: Instruction includes inequalities in the forms <math>px &gt; q</math>; <math>xp &gt; q</math>; <math>x + p &gt; q</math> and <math>px &gt; q</math>, where <math>p</math> and <math>q</math> are specific rational numbers and any inequality symbol can be represented.<br/>                     Clarification 3: Problems include inequalities where the variable may be on either side of the inequality symbol.</p> | <p>Presents one and two step inequalities. They are represented algebraically and graphically. Required forms of inequalities are used.</p> | <p>Benchmark is covered, more examples of solving different types of inequalities (relating them back to equations) are needed.</p> | <p>The highlighted lessons align to the benchmark.</p> | <p>This standard is taught well</p> |

Inequalities Using Multiplication or Division (pp. 277–282) includes forms  $px > q$  and  $xp > q$ , including all four inequality symbols and problems with inequalities on either side of the inequality symbol. Additional instruction and practice opportunities can be found in the Topic Review (pp. 289–290).

11 As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                      |                                                                                                                           |                                                                                                                                                                                                                                   |                                          |

A few pages address capacity which is not in the clarifications.</p>                                                                                                                                                          | <p>Benchmark is covered well and is connected to previously learned skill.</p> | <p>Metric conversions</p>  | <p>Really good discourse supports embedded in the TE.</p> |                            |

all comments are positive, including notes that this benchmark is “covered well” and notified in the clarification—area, volume, and money—are “left out;” however, all of these

13 Based on the evidence that items indicated as “left out” are, in fact, included in the course, as well as the very positive overall reviewer scores regarding alignment to the Benchmark, we request that the score of 2 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).

| Benchmark                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | Grade 7 Reviewer 1 (Champion) | Grade 7 Reviewer 2 (Pitts) | Grade 7 Accelerated Review | Grade 7 Accelerated Review |                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

Hi Amber,

My apologies. I made notes on those left blank that a link to the lesson needs to be provided for review. It is difficult to determine a yes or no alignment just based on arguments from a reviewer and the publisher without the context.

Courtney Starling

Thanks, Courtney!

There are a few comment boxes that are missing comments. Would you mind putting in either a "fine" if you are good with what the publisher has said as far as proving their alignment for each standard in question, or some specific feedback to the publisher stating what is needed or missing with their alignment? We will use this spreadsheet when we meet with the publisher again and it will be helpful to you to have specific talking points when addressing their standards alignment with them.

I've cleaned up the spreadsheet a little and highlighted comments that we need in blue. Anything in gray does not need a comment in that column. It may be helpful to print as it is hard to see the whole spreadsheet on the screen.

Let me know if you need anything.

Hi Lauren,

Where the publisher provided links for evidence, I have added comments. Please let me know if you need anything else.

**Subject:** Savvas Learning Company Grade 7 appeal

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our grade 7 FL enVision B.E.S.T. Mathematics on the state adopted instructional materials list.

Thank you,  
Rachel

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. All *enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

| Savvas Program      | Number of 5-Point Ratings for Standards Benchmarks (by both reviewers) | Percentage of 5-Point Ratings for Standards Benchmarks |
|---------------------|------------------------------------------------------------------------|--------------------------------------------------------|
| <b>Grade 7</b>      | <b>3</b>                                                               | <b>3%</b>                                              |
| Grade 6             | 93                                                                     | 85%                                                    |
| Grade 8 Pre-Algebra | 85                                                                     | 77%                                                    |
| Accelerated Grade 6 | 107                                                                    | 75%                                                    |
| Accelerated Grade 7 | 141                                                                    | 99%                                                    |

The of Accelerated Grade 7 procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. This is Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those of the

| Benchmark                                                                  | Grade 7 Reviewer 1 (Champion) | Grade 7 Reviewer 2 (Pitts) | Grade 6 Accelerated Reviewer 1 | Grade 6 Accelerated Reviewer 2 |

**Clarifications**  
*Clarification 1:* Instruction includes using properties of operations accurately and efficiently.  
*Clarification 2:* Instruction includes linear expressions in any form with rational coefficients.

Students combine like terms, expand, and use the properties of operations to create and

Benchmark clarifications are addressed

Lessons highlighted here cover the benchmark and provide ample opportunity for students to

This standard is taught well

Very Good Alignment) while both Grade 6 Accelerated reviewers rated alignment of the

| <p><b>MA.7.AR.2.1</b> Write and solve one-step inequalities in one variable within a mathematical context and represent solutions algebraically or graphically.</p> <p><b>Benchmark Clarifications:</b><br/>                     Clarification 1: Instruction focuses on the properties of inequality. Refer to Properties of Operations, Equality and Inequality (Appendix D).<br/>                     Clarification 2: Instruction includes inequalities in the forms <math>px &gt; q</math>; <math>xp &gt; q</math>; <math>x + p &gt; q</math> and <math>px &gt; q</math>, where <math>p</math> and <math>q</math> are specific rational numbers and any inequality symbol can be represented.<br/>                     Clarification 3: Problems include inequalities where the variable may be on either side of the inequality symbol.</p> | <p>Presents one and two step inequalities. They are represented algebraically and graphically. Required forms of inequalities are used.</p> | <p>Benchmark is covered, more examples of solving different types of inequalities (relating them back to equations) are needed.</p> | <p>The highlighted lessons align to the benchmark.</p> | <p>This standard is taught well</p> |

Inequalities Using Multiplication or Division (pp. 277–282) includes forms  $px > q$  and  $xp > q$ , including all four inequality symbols and problems with inequalities on either side of the inequality symbol. Additional instruction and practice opportunities can be found in the Topic Review (pp. 289–290).

| <p>11</p> <p>As Ms. Pitts commented, this benchmark is covered, and all examples of solving different types of inequalities required by the Benchmark Clarifications are included. Therefore, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good Alignment).</p>                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                    |                                                                                                                                                                                                                                            |                                                   |
| <p><b>MA.7.AR.3.2</b> Apply previous understanding of ratios to solve real-world problems involving proportions.</p> <p><b>Example:</b> Scott is mowing lawns to earn money to buy a new gaming system and knows he needs to mow 35 lawns to earn enough money. If he can mow 4 lawns in 3 hours and 45 minutes, how long will it take him to mow 35 lawns? Assume that he can mow each lawn in the same amount of time.</p> <p><b>Example:</b> Ashley normally runs 10-kilometer races which is about 6.2 miles. She wants to start training for a half-marathon which is 13.1 miles. How many kilometers will she run in the half-marathon? How does that compare to her normal 10K race distance?</p> | <p>4</p> <p>real world problems involving proportional relationships are used-time and money, and recipes</p>                                                                                                                                                                                                                          | <p>3</p> <p>Ratios are more tied to percent problems rather than proportion problems (although proportions are used to solve).</p> | <p>3</p> <p>The highlighted lessons only expose students to using proportions to solve real-world problems involving percentages. I would think there should be questionings involving proportions that do not pertain to percentages.</p> | <p>5</p> <p>This standard is taught very well</p> |
| <p>12</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | <p>-4, and 3-5. Two reviewers suggest that the course does not address non-percent problems (see link in Column D) in which students apply proportions to solve a wide variety of problems (see link in Column E).<br/>                     At the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good</p> |                                                                                                                                    |                                                                                                                                                                                                                                            |                                                   |

| <p><b>MA.7.AR.4.4</b> Given any representation of a proportional relationship, translate the representation to a written description, table or equation.</p> <p><b>Example:</b> The written description, there are 60 minutes in 1 hour, can be represented as the equation <math>m=60h</math>.</p> <p><b>Example:</b> Gina works as a babysitter and earns \$9 per hour. She would like to earn \$100 to buy a new tennis racket. Gina wants to know how many hours she needs to work. She can use the equation <math>h=19e</math>, where <math>e</math> is the amount of money earned, <math>h</math> is the number of hours worked and 19 is the constant of proportionality.</p> <p><b>Benchmark Clarifications:</b></p> <ul style="list-style-type: none"> <li>Clarification 1: Given representations are limited to a written description, graph, table or equation.</li> <li>Clarification 2: Instruction</li> </ul> | 4                             | 3                          | 5                          | 5                          | <p>Ample opportunities to explore and practice translating proportional representations into written descriptions, tables or equations. Converting units are embedded in this skill.</p> <p>Benchmark is covered: it is dispersed throughout ratio and proportion lessons and connected to other ratio and proportion benchmarks.</p> <p>Translate proportional relationships</p> <p>Good variety of examples matching B1G-M Instructional Strategies</p> |
| <p>reviewer comments, lack of any noted deficiencies, and the “ample opportunities to explore and request that the score of 3 be reconsidered and improved to a 4 (Good Alignment) or 5 (Very Good</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |                               |                            |                            |                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

**Attachment(s):** "image002.png", "image004.png", "image005.jpg", "image001.jpg", "image003.jpg"

Thank you Amber!

Danna – thank you for reaching out to both PJ and I and the IM team!

To answer your second question – the science standards will remain the same. However, all science courses (and other core subjects) will have the MAFS and LAFS replaced by the Mathematical Thinking and Reasoning Standards (MTRs) and ELA Expectations (EEs). You can find these new B.E.S.T. math and ELA standards embedded in all science courses on [cpalms.org](http://cpalms.org), under the course descriptions. Make sure to click on the '2022- and beyond' tab.

Please let me know if you have any additional questions regarding science standards.

Best,

**Subject:** RE: Science Adoption Updates

Hi Danna,

I've attached our Instructional Materials Adoption Cycle which can also be found on our website under General Information:

<https://www.fldoe.org/academics/standards/instructional-materials/>

Also, you can take a look at our current adoption, Mathematics, on this website to get a feel for the timelines. Each adoption year generally follows the same yearly cycle.

- #1 - Science is scheduled for 2023-2024.
- #3 – \* Call for bids typically occurs in April of the adoption year (2023)
- #4 - \*Bid details are typically due in June
- #5 - \*Sample materials are typically due in July.

\* The specific adoption timeline has not yet been published for Science, so these dates are subject to change.

I'm copying our science specialists, PJ and Nancy to answer your question #2.

Please let me know if you have any further questions.

Thank you,

**Subject:** Science Adoption Updates

Good afternoon,

Hope this email finds you well.

I am reaching out to you today about the upcoming science adoption for Florida. In an effort to not take up too much of your time, I was hoping you would be able to assist me by answering the following questions. If there is someone else who I should direct my questions to, please let me know and I will gladly do so.

1. Is the science adoption still scheduled for 2022-2023?
2. Are the standards changing? If so, when?
3. When can we anticipate the adoption announcement to occur?
4. When can we anticipate materials being submitted?
5. When would sample materials be due?

Your time and assistance is greatly appreciated.

Kind regards,

**Danna Jankowski**

**Attachment(s):** "image002.png", "image004.png", "image005.jpg", "image006.jpg", "image001.jpg", "image007.jpg"

Thank you Amber!

Danna – thank you for reaching out to both PJ and I and the IM team!

To answer your second question – the science standards will remain the same. However, all science courses (and other core subjects) will have the MAFS and LAFS replaced by the Mathematical Thinking and Reasoning Standards (MTRs) and ELA Expectations (EEs). You can find these new B.E.S.T. math and ELA standards embedded in all science courses on [cpalms.org](http://cpalms.org), under the course descriptions. Make sure to click on the '2022- and beyond' tab.

Please let me know if you have any additional questions regarding science standards.

Best,

**Subject:** RE: Science Adoption Updates

Hi Danna,

I've attached our Instructional Materials Adoption Cycle which can also be found on our website under General Information:

<https://www.fldoe.org/academics/standards/instructional-materials/>

Also, you can take a look at our current adoption, Mathematics, on this website to get a feel for the timelines. Each adoption year generally follows the same yearly cycle.

#1 - Science is scheduled for 2023-2024.

#3 – \* Call for bids typically occurs in April of the adoption year (2023)

#4 - \*Bid details are typically due in June

#5 - \*Sample materials are typically due in July.

\* The specific adoption timeline has not yet been published for Science, so these dates are subject to change.

I'm copying our science specialists, PJ and Nancy to answer your question #2.

Please let me know if you have any further questions.

Thank you,

Amber Baumbach

**Subject:** Science Adoption Updates

Good afternoon,

Hope this email finds you well.

I am reaching out to you today about the upcoming science adoption for Florida. In an effort to not take up too much of your time, I was hoping you would be able to assist me by answering the following questions. If there is someone else who I should direct my questions to, please let me know and I will gladly do so.

1. Is the science adoption still scheduled for 2022-2023?
2. Are the standards changing? If so, when?
3. When can we anticipate the adoption announcement to occur?
4. When can we anticipate materials being submitted?
5. When would sample materials be due?

Your time and assistance is greatly appreciated.

Kind regards,

**Danna Jankowski**

Good Morning Cathy,

Do you have an anticipated release date for the Social Studies adoption specifications?

Our teams have been working from the new CPalms course descriptions of course, but have been asking what the expectations are for including character ed.

Thanks so much.

Morning Cathy - checking on the specs for SS in case I missed them.  
My team has been checking the instructional materials website daily but have not seen the specs post. Can you confirm this is the correct location and they just haven't released yet?

Thank you,  
Rachel

**Subject:** Use of Adopted Florida Standards

Hi, Katrina.

My name is Matt Polen – I emailed you a few years ago inquiring about the copyright status (or lack thereof) of the FL DoE Math standards. I'm still at McGraw Hill, in charge of Social Studies now. We are working on several different programs at the moment for Florida.

I have in my department's records that the Social Studies standards are free to use with attribution, and I wanted to check and make sure this was still the case. I also wanted to make sure we had an appropriate/approved attribution. Last time we just did "©2014, Florida Department of Education." Will that suffice? What year should we update the attribution to?

I hope you are well.

Thanks!

Hello!

I don't think it's an urgent request. The standards will appear in the Teacher Editions, which aren't scheduled to finish production until Spring 2022. I don't work on our editorial team, but I understand they're waiting for clarification from the state on some of the standards, anyway. For my part (permissions), I just wanted to confirm whether or not the standards would still be free to use with attribution as they were previously.

Thanks for your help!

Matt

Hi, Katrina.

My name is Matt Polen – I emailed you a few years ago inquiring about the copyright status (or lack thereof) of the FL DoE Math standards. I'm still at McGraw Hill, in charge of Social Studies now. We are working on several different programs at the moment for Florida.

I have in my department's records that the Social Studies standards are free to use with attribution, and I wanted to check and make sure this was still the case. I also wanted to make sure we had an appropriate/approved attribution. Last time we just did "©2014, Florida Department of Education." Will that suffice? What year should we update the attribution to?

I hope you are well.

Thanks!

**Subject:** RE: Use of Adopted Florida Standards

Hello!

I don't think it's an urgent request. The standards will appear in the Teacher Editions, which aren't scheduled to finish production until Spring 2022. I don't work on our editorial team, but I understand they're waiting for clarification from the state on some of the standards, anyway. For my part (permissions), I just wanted to confirm whether or not the standards would still be free to use with attribution as they were previously.

Thanks for your help!  
Matt

[View in browser](#)

Hi Educator,

I'm writing to remind you to register for our [School of the Future Leadership Conference](#) being held at the Renaissance Concourse Atlanta Airport Hotel, on Thursday, February 24. We'll kick off the day with Dr. Shawn Joseph leading an interactive session as he describes the leadership mindset that is needed to effectively spearhead successful literacy initiatives. You will leave with a better understanding of what it takes to be a powerful and effective leader in today's educational environment.

I'm looking forward to seeing you at this special event. [Register today](#) to save your spot!

I hope you can join us!

Best,

Ken Brown, *Senior RVP Supplemental Sales, South Region*  
McGraw Hill | School  
8787 Orion Place, Columbus, Ohio 43240

## Achieve3000 School of the Future Leadership Summit

[REGISTER NOW](#)

Join our leadership team for a day of thought leadership and collaboration. We kick off our day with Dr. Shawn Joseph leading an interactive session as he describes the leadership mindset that is needed to effectively spearhead successful literacy initiatives. Drawing on the lessons of his most recent book, *Finding the Joseph Within*, this session will look at the state of literacy in America and provide proven strategies to promote growth and support student success.

Participants will leave with a better understanding of what it takes to be a powerful and effective leader in today's educational environment.

**Subject:** Request for Meeting - Big Ideas Learning & Florida Math Adoption  
**Attachment(s):** "image001.png", "image002.png"

Cathy,

I would like to request a meeting with you to better understand the FL DOE's concerns with our Math Adoption submissions for Grade K, Grade 1, Grade 4 and Algebra 2 so that we can work with you towards a positive outcome. Since the announcement on Friday, we have done some additional reviews of our materials and have made some changes that we hope will meet your needs related to Special Topics.

As a family-owned business with 40+ years solely focused on Math education, nothing is more important to us than the success of our partners at the State and Local levels in mathematics. Please let me know what your schedule permits and I am fully available today or tomorrow.

Sincerely,

Bob

**Attachment(s):** "image001.png"

Hi Rachel,

Thank you so much for your willingness to work with the Department regarding your appeal submission. We have scheduled the initial negotiation call for Tuesday, April 26<sup>th</sup>, at 10:00 AM (EST). Please feel free to forward this meeting invite to all necessary parties. At this time Savvas has received all necessary data, evaluations, and details related to the appeal process. If you do not have this information, please let me know as soon as possible.

We look forward to speaking with you on Tuesday.

Savvas - appeal  
Tue, Apr 26, 2022 10:00 AM - 10:30 AM (EDT)

**Subject:** Savvas IM Appeal Bid # 382 Grade 2

**Attachment(s):** "FL Appeal letter.pdf","Grade 2 - Savvas-Appeal K-12 Mathematics-1.xlsx"

Please accept this correspondence and subsequent attachments as a response to and formal appeal of the instructional materials adoption recommendation for Savvas Learning Company.

We request a quick review of our appeal and immediate placement of our K-5 FL B.E.S.T. enVision Mathematics on the state adopted instructional materials list.

Additional appeals are forthcoming.

Thank you,  
Rachel

Tallahassee, Florida 32399-0400

**RE: FL Bid 382 enVision Florida B.E.S.T. Mathematics Grade 2 (Copyright 2023, the “Product”) submitted for the 2021-2022 Adoption Year: K-12 Mathematics (the “Bid”)**

Dear Sir/Madam:

I am Senior Vice President and General Counsel of Savvas Learning Company LLC. In accordance with Rule 28-106.201 of the Florida Administrative Code, Savvas hereby formally requests an appeal of the results of the instructional materials adoption process for the above referenced Bid and the recent inclusion of the enVision Florida B.E.S.T. Mathematics Grade 2 Product on the 2021-2022 Not Recommended List on the FDOE instructional materials website page.

As requested, the attached materials contain a specific rebuttal of the findings from the FDOE that were sent to us on April 21st regarding the Grade 2 Product and its alleged non-conformity to Florida B.E.S.T. standards and/or the prohibition of special topics of concern. Savvas believes it has met all requirements of the Bid as per the attached rebuttal. Please note that we intend to appeal the FDOE decision with respect to Savvas’ other math instructional materials that were on the Non-Adopted List that we believe should be placed on the Adopted List, and additional evidence and materials will be forthcoming for those materials that are supportive of that position.

We specifically request that the Product be promptly placed on the approved Adoption List for the Bid based on the information we have provided. We would very much appreciate your expedited review of this appeal so that Savvas can serve Florida schools and students with these requested instructional materials. Please let us know any next steps to resolve this matter.

Sincerely,

Young J. Yoo (“Andy”)  
SVP, General Counsel  
Savvas Learning Company LLC

**Subject:** Savvas Learning - FL 2021 Math Adoption - Appeal Process

Hi Lauren, Cathy, and James:

For the Florida Math 2021 Adoption, we have received and reviewed the Adopted and Non-Adopted Lists that FLDOE posted recently to its website. We intend to submit an appeal for the following Savvas Learning submissions that were not adopted.

At this time, we would like to request any information you can share as to the reasons for the decision not to adopt our submissions, including any evaluation reports from reviewers. For our submissions that were not approved due to the "inclusion of special topics," can you please provide a definition or description of these "special topics" and a list of any objectionable content found in the submissions.

**RE: FL Bid 390 enVision Florida B.E.S.T. Mathematics Grade 7 (Copyright 2023, the “Product”) submitted for the 2021-2022 Adoption Year: K-12 Mathematics (the “Bid”)**

Dear Sir/Madam:

I am Senior Vice President and General Counsel of Savvas Learning Company LLC. In accordance with Rule 28-106.201 of the Florida Administrative Code, Savvas hereby formally requests an appeal of the results of the instructional materials adoption process for the above referenced Bid and the recent inclusion of the enVision Florida B.E.S.T. Mathematics Grade 7 Product on the 2021-2022 Not Recommended List on the FDOE instructional materials website page.

As requested, the attached materials contain a specific rebuttal of the findings from the FDOE that were sent to us on April 21st regarding the Grade 7 Product and its alleged non-conformity to Florida B.E.S.T. standards and/or the prohibition of special topics of concern. Savvas believes it has met all requirements of the Bid as per the attached rebuttal.

We specifically request that the Product be promptly placed on the approved Adoption List for the Bid based on the information we have provided. We would very much appreciate your expedited review of this appeal so that Savvas can serve Florida schools and students with these requested instructional materials. Please let us know any next steps to resolve this matter.

Sincerely,

Young J. Yoo (“Andy”)  
SVP, General Counsel  
Savvas Learning Company LLC

COURSE Grade Seven Mathematics

BID 390

Publisher (Savvas) Comments

**Publisher Summary:**  
*enVision Florida B.E.S.T. Mathematics, Grade 7* was written specifically to align with Florida’s B.E.S.T. Standards for Mathematics, including the Mathematical Thinking and Reasoning (MTR) Standards. We believe that these materials fully address the required standards and benchmarks and meet all required specifications for adoption. Both of the state’s reviewers agreed, and recommended this product for adoption. However, the state has not recommended the product for adoption citing a state-specific standards score that did not meet the numerical threshold for adoption. In this response, we intend to show that several of the scores should be raised and that *enVision Florida B.E.S.T. Mathematics, Grade 7* should be approved for adoption.

**Part 1 - Inconsistency of Reviews**  
 We believe that the reviews for Grade 7 were inconsistent both with the overall review process and with other reviews. While most reviewers worked on a 5-point scale, the Grade 7 reviewers issued only three 5-point ratings (Very Good Alignment) for the Mathematical Thinking and Reasoning Standards and the ELA Standards, and zero 5-point ratings for any Mathematics Benchmarks, even when their comments are entirely positive and/or include no noted deficiencies. When compared to the reviews of other Savvas mathematics courses for Grades 6-8, there is an obvious anomaly. *All enVision Mathematics Florida B.E.S.T.* courses were created by the same team of authors, editors, and consultants, and follow the same pedagogy and lesson format.

below. Procedures and creates an enormous discrepancy with other reviews. In addition, the lack of meeting the required threshold of an average rating of 4 nearly impossible. Accelerated Grades, and yet, the Grade 7 ratings are consistently lower than those not warrant the discrepancy in ratings. Examples of these discrepancies are provided

| <b>Benchmark</b>                                                                                                                                                       | <b>Reviewer 1 (Champion)</b>                                                                                | <b>Reviewer 2 (Pitts)</b>                                                                                                      | <b>Accelerated Review</b>                                                                                                                                 | <b>Accelerated Review</b>    |  |
| <b>MA.7.GR.1.2</b> Solve mathematical or real-world problems involving the area of polygons or composite figures by decomposing them into triangles or quadrilaterals. | 3                                                                                                           | 3                                                                                                                              | 4                                                                                                                                                         | 5                            |  |
| <b>Clarification 1:</b> Within this benchmark, the expectation is not to find areas of figures on the coordinate plane or to find missing dimensions.                  | Students are expected to find the area of composite figures; however, few real work problems are presented. | I feel that the lesson needs to start off with less complex figures, then move into more complex as students feel comfortable. | The large majority of problems included in this lesson are mathematical rather than real-world. I would have liked to see a more even balance of the two. | This standard is taught well |  |

17 or 5 (Very Good Alignment).

enchmark. Although Ms. Champion notes that few real-world problems are presented, they (E).  
 ies in the alignment or coverage of the Benchmark. The content of *enVision B.E.S.T.*, e, we request that the score of 3 be reconsidered and improved to a 4 (Good Alignment)

**Subject:** Science Adoption Updates

Good afternoon,

Hope this email finds you well.

I am reaching out to you today about the upcoming science adoption for Florida. In an effort to not take up too much of your time, I was hoping you would be able to assist me by answering the following questions. If there is someone else who I should direct my questions to, please let me know and I will gladly do so.

1. Is the science adoption still scheduled for 2022-2023?
2. Are the standards changing? If so, when?
3. When can we anticipate the adoption announcement to occur?
4. When can we anticipate materials being submitted?
5. When would sample materials be due?

Your time and assistance is greatly appreciated.

Kind regards,

---

**Danna Jankowski**

**Subject:** Social Studies Specifications

Good Morning Cathy,

Do you have an anticipated release date for the Social Studies adoption specifications?

Our teams have been working from the new CPalms course descriptions of course, but have been asking what the expectations are for including character ed.

Thanks so much.

Rachel

## Inspire Literacy Engagement and Bring Social Studies to Life!

Make every minute of every social studies lesson a literacy opportunity! **myWorld Interactive**, from Savvas learning Company, is a complete K-5 social studies program that fully supports your core literacy instruction. Students read text closely, build vocabulary and language skills, and use evidence to articulate their ideas in writing.

### A Literacy-Based Approach to Social Studies

- **Academic vocabulary** and content vocabulary are defined in context, helping students pause and understand the text.
- **Leveled Readers** develop language skills and content knowledge at three reading levels: Below-Level, On-Level, and Advanced.
- **Integrated Literacy Skills** instruction helps teach students important reading comprehension skills, such as summarizing or drawing conclusions.

## Real World Forensics: How to Identify 9/11 Victims Using STR Profile Analysis

The Bertinos' Headshot

**Anthony "Bud" Bertino**  
**Patricia Nolan Bertino**

Trainers, co-authors of *Forensic Science: Fundamentals and Investigations*

**Wednesday, March 2, 2022**  
**5:00pm ET / 2:00pm PT**

Use inexpensive DNA teaching models to help students understand the structure of DNA, chromosomes, genes, and STRs (Short Tandem Repeats). Engage students through phenomenon-based learning to solve the identity of a 9/11 victim using STR profile analyses of the victim, two young boys, and their mother. Observe how to present the STR profile analysis so that it is easily understood by all students. This activity uses the historical event of the 9/11 attack to integrate biology, history, technology, and math while focusing on a human-interest story.

**In this webinar, participants will:**

- Observe the use of inexpensive models to facilitate DNA instruction.
- Observe how to present and analyze STR profiles using familial genealogy.
- Review and receive multiple teaching resources including an activity worksheet, Teacher Notes, Student Learning Objectives, Outlines and Lesson Plans for immediate use with your students.

## A Tale of Two Beverages

Read the passage, and answer the questions that follow.

- A very, very long time ago in a land far, far away. . . . Actually, the time was 2737 BC in China. Emperor Shen Nung was waiting for water to boil to make it safe for drinking. Leaves from a plant floated down and landed in the pot. Shen Nung drank the liquid flavored by the leaves of the *Camellia sinensis* plant, and thereby invented tea. Tea became a traditional Chinese beverage through the Han and Tang dynasties. Buddhist monks introduced tea to Japan, where people performed beautiful tea ceremonies before drinking the beverage. Dutch and Portuguese explorers in Asia brought tea leaves back to Europe as gifts in the late 1500s.
- Once upon a time there was a lonely goatherd. . . . Actually, the time was centuries ago on the Ethiopian plateau. A goatherd named Kaldi noticed that his goats seemed super-energized and couldn't sleep after eating the red berries from a certain plant. Kaldi went to the local monastery and told the abbot about his goats. The abbot brewed a drink of the berries and remained awake during the long night's prayers. Word of the special drink spread. By the 1500s, people grew and traded coffee throughout the Arabian peninsula, Persia (now Iran), Egypt, Syria, and Turkey. Coffeehouses called *qahveh khaneh* served what some called the "wine of Araby." European travelers brought word of the dark beverage back home with them.
- This is where the two stories blend. By the 17th century, coffee had arrived in Europe, where it was becoming a popular drink. Some people saw coffee as the "bitter invention of Satan." Only when Pope Clement VIII sampled the brew and called it delicious did people's minds change. Coffee began to replace the standard breakfast beverages of beer and wine. Coffeehouses became popular meeting places for intellectual and social gatherings across Europe. By the mid-1600s, London had 300 coffeehouses.

## Math Story

4 London coffeehouses were responsible for introducing tea to the British public. At first, the English weren't open to trying the beverage that today is considered their national drink. Then, in 1662, King Charles II married Catherine of Braganza from Portugal. The new queen loved tea, and so it became fashionable in the British court. By 1700, more than 500 coffeehouses sold it. By 1750, tea had also become the favored drink of Britain's lower classes.

- 5 As the British colonized North America, tea was the nonalcoholic drink of choice. Great Britain placed heavy taxes on tea, both in England and in the British colonies. People started smuggling tea to avoid the taxes. By the late 1700s, tea smuggling was an organized crime. It's estimated that more tea was smuggled into England during these years than was brought in legally. In 1783, a new prime minister, William Pitt the Younger, was elected. Pitt reduced tea taxes, and smuggling stopped virtually overnight.
- 6 In the 1600s, many Dutch natives inhabited the city of New Amsterdam, today's New York City. They introduced *koffie* to the 13 colonies, launching its competition with tea. In 1714, the mayor of New Amsterdam presented a gift of a young coffee plant to King Louis XIV of France. The king placed the plant in the Royal Botanical Gardens in Paris. Cuttings and seeds from that plant were taken to start coffee plantations in French colonies in the Caribbean Islands and in Central and South America. Great Britain had tea plantations in their colonies in India, Africa, and South America. In 1773, before the start of the American Revolution, the high tea taxes imposed by Great Britain on North American colonists caused them to revolt. Their drinking preference became coffee. Thomas Jefferson called coffee "the favorite drink of the civilized world."

7. Compare tea and coffee by the numbers:

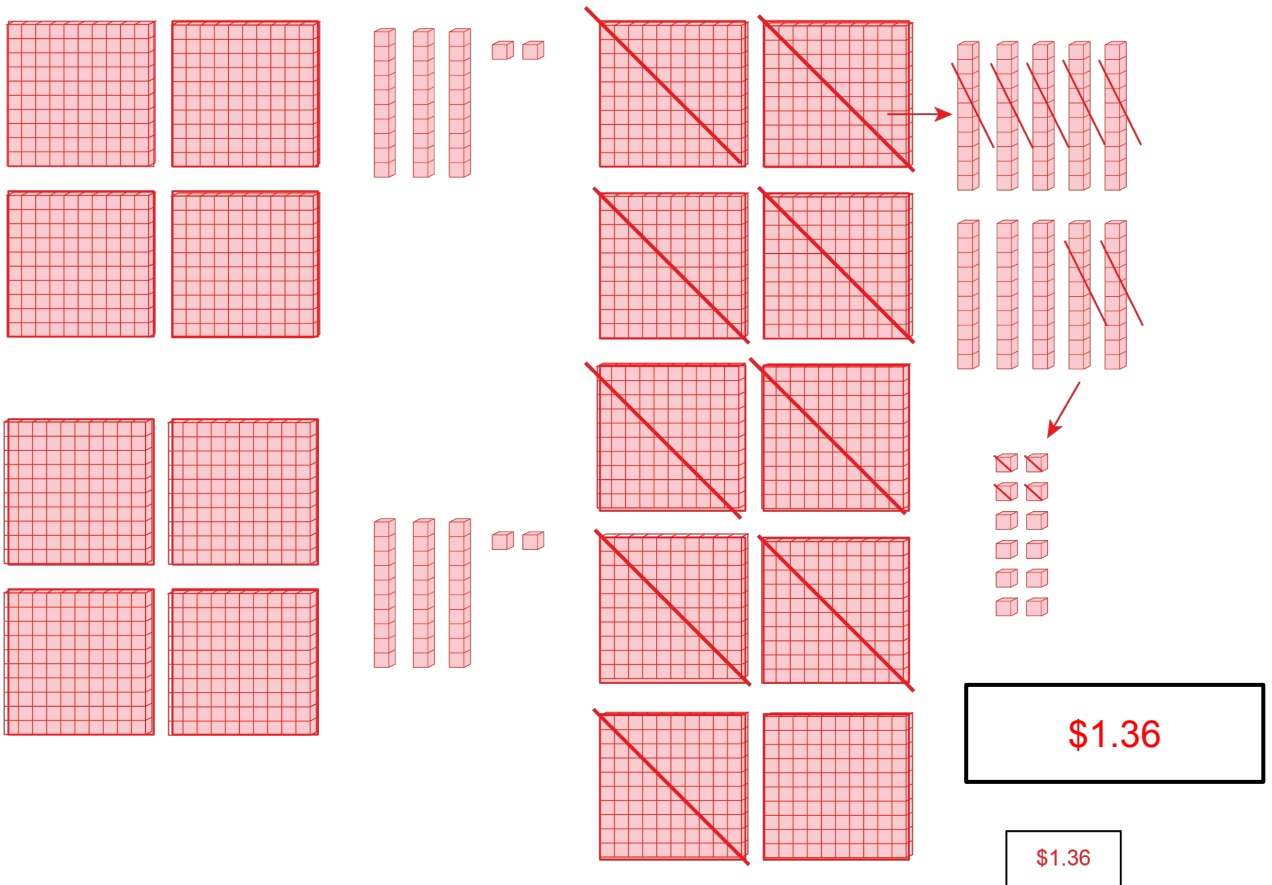

- One 8-ounce cup of black coffee has 1 calorie. The same amount of plain tea has 2 calories.
- A 6-ounce serving of tea contains 40 mg of caffeine. A 6-ounce serving of regular coffee contains 95 mg of caffeine.
- One pound of tea will make 200 6-ounce cups, while the same amount of roasted coffee makes 48 6-ounce cups.
- One teaspoon of tea can be brewed for one 6-ounce serving; 2 tablespoons of coffee can be brewed for one 8-ounce serving.
- A tea plant matures to **produce** leaves after 5 years and can live for more than 100 years. A coffee tree matures at 5 years as well, but it produces fruit for only 50 years.
- One pound of Earl Grey tea is \$24.80; 1 pound of Kona Hawaiian coffee is \$19.95.

8 Tea and coffee have inspired songs and books. Countries and regions have fought wars over them. Both tea and coffee can inspire strong emotions, such as undying love or absolute dislike. Many adults feel that they can't start their day without a cup of coffee. Some believe that the American South couldn't survive without sweet tea. And here ends the tale of two beverages.

Use information from the story to answer each question below.

- If a pound of tea costs \$10.00, and it has to be shared between two people, how much money does each person need to bring to cover the cost?
  - \$5.50
  - \$2.00
  - \$5.00**
  - \$0.50
- If you buy two pounds of coffee at \$4.32 each and you pay with a \$10.00 bill, how much money do you receive in return? Draw a model to determine the answer.

- Which choice best defines the word **produce** in paragraph 7?
  - Vegetables
  - To cause something to happen
  - To move forward in a situation
  - To grow, create, or manufacture**

4. Tommy wants to save enough money to buy his mother 2 pounds of Earl Grey, her favorite type of tea. If he saved \$22.55 the first week, how much would he need to save the second week to buy his mother the tea?

\$27.05

5. This question has two parts. First answer part A, and then answer part B.

**Part A:** What inference can you make about reducing tea taxes?

- A. *After tea taxes were reduced, smuggling basically stopped.*
- B. The act of reducing tea taxes was performed by all Europeans working together.
- C. Reducing tea taxes did not affect many people.
- D. A great deal of smuggling continued even though tea taxes were reduced.

**Part B:** Which of the following sentences from the passage best supports your answer to part A?

- A. *Great Britain placed heavy taxes on tea both in England and in the British colonies.*
- B. *It's estimated that more tea was smuggled into England during these years than was brought in legally.*
- C. *By 1750, tea had also become the favored drink of Britain's lower classes.*
- D. *William Pitt the Younger reduced tea taxes, and smuggling stopped virtually overnight.*

# Math Story

6. Arrange the events in the order they occurred by numbering them 1 to 8.

- 5 King Charles II married the tea-loving Portuguese princess Catherine of Braganza.
- 1 Emperor Shen Nung enjoyed an accidental cup of tea.
- 7 Colonists switched from drinking tea to drinking coffee because of taxes.
- 4 Pope Clement VIII found coffee quite tasty.
- 6 King Louis XIV was presented with a coffee plant by the mayor of New Amsterdam.
- 2 Kaldi was bewildered by his hyperactive goats.
- 8 William Pitt the Younger swiftly ended tea smuggling by reducing tea taxes.
- 3 Coffee was grown and traded throughout the Arabian peninsula, Persia (now Iran), Egypt, Syria, and Turkey.

7. John drinks four 6-ounce cups of coffee a day, and Macy drinks six 6-ounce cups of tea a day. John says that Macy takes in more caffeine a day than he does, but Macy claims that John takes in more caffeine each day than she does. Who is correct?

- A. John is correct, because he takes in 240 mg of caffeine and Macy takes in 380 mg of caffeine a day.
- B. Macy is correct, because she takes in 12 mg of caffeine and John takes in 24 mg of caffeine a day.
- C. John is correct, because he takes in 24 mg of caffeine a day and Macy takes in 36 mg of caffeine a day.
- D. Macy is correct, because she takes in 240 mg of caffeine a day and John takes in 380 mg of caffeine a day.

## Math Story

8. A coffee shop is trying to complete inventory for next month's order. Last month, they ordered 5 pounds of Earl Grey tea. This month, they plan to order 8 pounds. What will the difference in cost between the two orders?
- A. \$109.56  
 B. \$13.00  
 C. \$322.40  
**D. \$74.40**
9. A study was released comparing two coffee shops on the same street in London and their earnings over the same time period.

| Coffee Shop    | February   | March      | April      |
|----------------|------------|------------|------------|
| Common Grounds | \$1,078.53 | \$998.39   | \$1,189.24 |
| Warm Cuppa     | \$976.42   | \$1,000.98 | \$1,245.63 |

What were the total earnings for each coffee shop over the three-month period in the table above?

- A. **Common Grounds earned \$3,266.16; Warm Cuppa earned \$3,223.03.**  
 B. Common Grounds earned \$3,976.16; Warm Cuppa earned \$3,223.03.  
 C. Common Grounds earned \$3,266.16; Warm Cuppa earned \$3,222.04.  
 D. Common Grounds earned \$3,066.16; Warm Cuppa earned \$2,323.03.
10. Using the table above, which coffee shop earned more money during this three-month period, and how much more? Explain your reasoning.  
**Common Grounds earned more money than Warm Cuppa.**  
 $\underline{\$3266.16 - \$3223.03 = \$43.13}$

## A Saturday Well Spent

Read the passage, and answer the questions that follow.

- 1 April and Zach love working at their father's animal hospital on weekends. There are always many things to do because Saturday is the busiest day at the clinic. Clinic staff arrive early to get everything ready to open at 8:00 a.m. Even though their Dad doesn't schedule surgeries on weekends, there can still be emergencies.
- 2 The first thing April and Zach do is walk the dogs, whether the dogs are patients or boarders. Dogs that are boarded for the weekend get long walks outside. The dogs' cages are cleaned while the dogs are out, and breakfast is waiting for them when they get back.
- 3 Next on the list is cleaning out the cats' cages and feeding them. April and Zach take turns each Saturday cleaning the litter boxes. There can be other animals to take care of, too. Frequently there are rabbits, birds, and lizards to clean up after and feed. Sometimes patients include snakes, squirrels, and even skunks.
- 4 The cleaning continues with washing the towels and blankets in the laundry, as well as mopping the floors and cleaning all the surfaces in the patient rooms. Everything needs to be sparkling clean before the first patients arrive. Zach helps fill the shelves with cat and dog food while April puts new magazines in the waiting area and throws away the old ones.
- 5 April is always excited to see the animals as they arrive. She helps weigh them and shows the owners to a patient room. Her favorite days are when an owner comes in with a basket of kittens or a box of puppies for their first checkup. The toughest days are when an animal is badly hurt. April sometimes cries with the owners.

# Math Story

6 Zach helps with the examinations and treatments. He is going to college next year. He will need four years of college and then four years of veterinarian school to become an animal doctor.

Zach wants to become a large-animal vet, working with cows and horses. His father's clinic treats only small animals, but Zach thinks

working with animals of any size will help him become a good veterinarian.

7 April doesn't know if she wants to work at the clinic full-time. While she loves animals, she doesn't like to see them hurting. She also discovered she doesn't have a strong stomach. When the animals get sick or have their bandages changed, April gets very nauseous. She figures it is bad enough cleaning up an animal's mess, let alone cleaning up her own.

8 April spends much of her Saturdays in the section of the clinic where they keep the animals that are **boarded**. April knows they are lonely without their owners, so she likes to pet and hold the cats and play with the dogs in the yard. The animals always seem happier after a visit from April. It makes April happier, too.

9 This Saturday has been fun. The first patient of the day was Maximo, a Yorkie that was there to have his nails clipped. He weighed only 2.9 pounds and was full-grown. The next patient was a 6-week-old Saint Bernard puppy called Roscoe that already weighed 13.2 pounds. Roscoe was there for his shots. April's father told her that Roscoe would probably weigh 55 pounds by the time he was 4 months old. Saint Bernards can weigh well over 150 pounds by the time they are 2 years old.

10 The day was full of meowing cats, barking dogs, and an African gray parrot that mimicked every sound he heard. Everyone laughed when the parrot started making the sound of the ringing telephones. After the late-afternoon walks and the evening feedings, April, Zach, and their father went home tired but happy after a good day at the clinic.

Use the price tables below to answer questions 1–3.

| Services       | Prices   |
|----------------|----------|
| Wellness visit | \$30.00  |
| Nail clipping  | \$10.25  |
| Ear cleaning   | \$12.95  |
| Dental package | \$195.95 |
| Deworming      | \$12.95  |
| Rabies vaccine | \$15.00  |

| Boarding     | Prices  |
|--------------|---------|
| Cat          | \$14.75 |
| Dog          | \$24.95 |
| Small animal | \$18.00 |
| Day care     | \$11.50 |

- Roscoe was at the clinic for a wellness visit that also included deworming and a rabies vaccine. What was the cost to his owner?
  - \$40.25
  - \$27.95
  - \$57.95**
  - \$57.59
- Mrs. Watson brought in her cat to be boarded for a long weekend. How much will it cost Mrs. Watson to board her cat?
  - \$14.75
  - \$54.00
  - \$74.85
  - \$44.25**
- Mr. Kirkpatrick brings Laddie, his Labrador, for day care 5 days a week. What does it cost him per week?
 

**\$57.50**

---

Use information from the story to answer each question below.

4. In paragraph 8, what does the word **boarded** mean?
- A Made of wood
  - B Got on a plane, boat, or train
  - C Paid to sleep and eat meals at someone's house
  - D **Temporary arrangement to keep a pet**
5. How would you feel about working at an animal hospital?  
**Accept any reasonable response with support.**
- 
- 
- 
- 
6. What is the main idea of this selection?
- A How April feels about animals
  - B The services a veterinary clinic provides
  - C **What goes on at an animal hospital**
  - D How Zach will go to veterinary college in 5 years
7. Roscoe gained 3.5 pounds his fifth week, 4.1 pounds the sixth week, 3.7 pounds the seventh week, and 3.9 pounds the eighth week. How much does Roscoe weigh after 8 weeks?
- A 16.7 pounds
  - B 20.8 pounds
  - C 24.5 pounds
  - D **28.4 pounds**
8. How much more did Roscoe weigh than Maximo at the office on Saturday?  
 Write the equation and solve.  
 **$13.2 - 2.9 = 10.3$  pounds**
-

Name: \_\_\_\_\_ Date: \_\_\_\_\_

# Tropical Storm Pakhar

Tropical Storm Pakhar formed on August 24, 2017, and dissolved on August 28, 2017. The areas affected included the Philippines, South China, Vietnam, and Thailand. The human populations of these countries were all affected in some way, whether it was from high winds, rain, flooding, power outages, or damage to homes.

The following chart shows the populations of some of the cities within these affected countries in 2017. The population is given in word form, expanded form, or standard form.

**Use the provided form to complete the rest of the chart.**

|                      | Word Form                                               | Expanded Form                             | Standard Form |
|----------------------|---------------------------------------------------------|-------------------------------------------|---------------|
| Taishan, China       | Nine hundred ninety-seven thousand ninety               | $900,000 + 90,000 + 7,000 + 90$           | 997,090       |
| Benquet, Philippines | Four hundred forty-six thousand two hundred twenty-four | $400,000 + 40,000 + 6,000 + 200 + 20 + 4$ | 446,224       |
| Vung Tau, Vietnam    | Five hundred twenty-seven thousand twenty-five          | $500,000 + 20,000 + 7,000 + 20 + 5$       | 527,025       |
| Chiang Mai, Thailand | One hundred twenty-seven thousand two hundred forty     | $100,000 + 20,000 + 7,000 + 200 + 40$     | 127,240       |

Use the  $<$ ,  $>$ , or  $=$  symbols to complete the comparison statements.

1. The population of Benquet  $<$  The population of Taishan
2. The population of Vung Tau  $>$  The population of Chiang Mai
3. The population of Chiang Mai  $<$  The population of Taishan
4. The population of Vung Tau  $>$  The population of Benquet

Name: \_\_\_\_\_ Date: \_\_\_\_\_

# Invasive Species

Aquatic ecologists study the different species in water habitats. If one species is becoming invasive, they can work with the state to help keep habitats thriving. Ecologists often count how many of each organism is present in an area. In Chesapeake Bay, the blue catfish is considered an invasive species.

1. Ecologists counted how many blue catfish and how many native frogs were present in different areas of the Chesapeake Bay over 2 years.

Use the table below to find how many fish and frogs were found.

| Organism     | 2017                                                  | 2018                                                       |
|--------------|-------------------------------------------------------|------------------------------------------------------------|
| Blue catfish | $1,000 + 300 + 100 + 20 + 20 + 5 = \underline{1,445}$ | $20,000 + 7,000 + 500 + 200 + 60 + 1 = \underline{27,761}$ |
| Frogs        | $500 + 100 + 60 + 30 + 8 = \underline{698}$           | $100 + 40 + 10 + 5 + 2 = \underline{157}$                  |

**Add up the amount of catfish and frogs that the ecologists found.**

2. The number of blue catfish found in the bay in 2018 is about 30,000. If the population is not controlled, it could easily climb to 10 times that many. Write the number that is 10 times as many as 30,000. Explain how you found the number.

Ten times as many as 30,000 is 300,000. I know moving one place value to the left means the value is 10 times as many as the place value to the right. To find the number that is 10 times as many as 30,000, I had to move the 3 one place value to the left.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

# Sand Sculptures

The Burgas Sand Sculptures Festival brings in some of the best sand art masters in the world. Tourists come from all over to see Bulgaria's fascinating attraction, which began in 2008.

- The sand sculptures are made with a special rain-resistant sand, and the smaller sculptures start at 8 meters high. The line plot below shows the height of sandcastles in the competition. How tall are the sandcastles that are 8 and 9 meters tall when combined? **68 meters tall**

X = 1 sandcastle

2. What is the *mode* of the sand sculptures data in question 1?

12 meters

3. What is the *range* of the sand sculptures data in question 1?

$12 - 8 = 4$  meters

4. What is the *median* of the sand sculptures data in question 1?

11 meters

5. Write a question that uses the data from the line plot. Be sure that the question focuses on either adding or subtracting the measurements in the line plot.

Questions will vary.

Name: \_\_\_\_\_ Date: \_\_\_\_\_

# Paid to Play Video Games

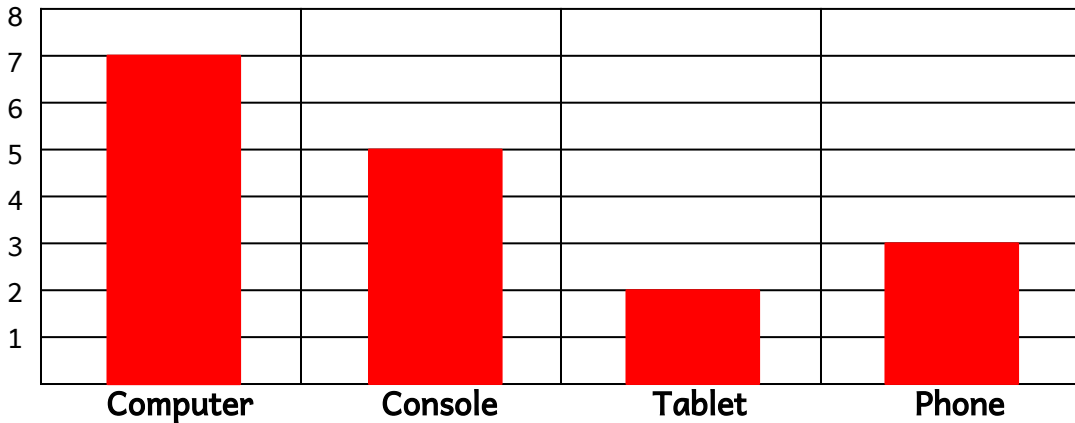

These students are playing the video game *League of Legends* with their collegiate teammates at Robert Morris University Illinois. The small, private university is providing scholarships for players of *League of Legends*, which has become one of the most popular games in organized team competitions nationwide. Robert Morris University Illinois is the first university to offer gaming scholarships for an online sport. Can you believe you can get paid to play video games?

The picture graph below shows the number of gamers on the collegiate team using different gaming devices.

| Device   | Number of Gamers                                                                   |
|----------|------------------------------------------------------------------------------------|
| Computer |  |
| Console  |   |
| Tablet   |   |
| Phone    |   |

1. Create a bar graph below to show the data.

Write a number sentence for questions 2 and 3 and solve the problem.

2. How many gamers play on a computer and a tablet?  $7 + 2 = 9$ .

3. How many more gamers used a console instead of a phone?  
 $5 - 3 = 2$

4. Write a question that could be answered using this data.  
Answers will vary. Examples may include the following: How many more gamers use a computer than a phone?

The tables below show the measurements of the devices that were used by gamers on the collegiate teams.

| The Solar Team |              |
|----------------|--------------|
| Device         | Length (in.) |
| Computer 1     | 13           |
| Console 1      | 11           |
| Tablet 1       | 10           |
| Phone 1        | 8            |

| The All-Stars Team |              |
|--------------------|--------------|
| Device             | Length (in.) |
| Computer 2         | 13           |
| Console 2          | 10           |
| Tablet 2           | 10           |
| Phone 2            | 7            |

5. Create a line plot to show the data from the table.

### Length of Devices

6. Which team had the shortest console? The All-Stars Team
