About the Poll

The Iowa Poll, conducted October March 5-8, 2023, for *The Des Moines Register* and Mediacom by Selzer & Co. of Des Moines, is based on telephone interviews with 805 Iowans ages 18 or older. Interviewers with Quantel Research contacted households with randomly selected landline and cell phone numbers supplied by Dynata. Interviews were administered in English. Responses were adjusted by age, sex, and congressional district to reflect the general population based on recent American Community Survey estimates.

Questions based on the sample of 805 Iowa adults have a maximum margin of error of plus or minus 3.5 percentage points. This means that if this survey were repeated using the same questions and the same methodology, 19 times out of 20, the findings would not vary from the true population value by more than plus or minus 3.5 percentage points. Results based on smaller samples of respondents—such as by gender or age—have a larger margin of error.
