

# Next Steps

## CMS/ QAPI

- Plan of Correction Accepted
- 100% of action plans complete by 5/31
- Continued implementation of QAPI Plan
  - Monthly Meetings for each organ + living donor
  - Continually monitor SRTR real-time data
- Unannounced QAPI visit before November to validate compliance

## SRTR/ Outcomes

- Surgeons have identified 13 high-risk patients in current cohort and will closely follow
- Continue to work with payors to remain COE status
- Complete CMS Mitigating Factors Application in anticipation of January flag
- Anticipate termination letter from CMS saying we have 220 days to terminate program after January 2014 CSR release
- Submit Mitigating Factors application if necessary with strong evidence of sustained patient and graft survival rates
