Melissa has brought up that these three might see a surge in threats, similar to how Celia saw threats after she left

Did Celia receive threats directly? Or did the threats come to our office about her? Apologies, I think this all happened a bit before I joined

Melissa is preparing some recommendations and we'll have a short conversation with them advising of risk

As I've not been able to speak with Celia directly, I'm not sure on everything she's seen - however people showed up at her house at 3AM banging on her door

she was named at a conspiracy event, she's mentioned in GP article, we've seen multiple tweets naming her

one post included her address
