Re: **MSU Study ID:** STUDY00006960
IRB: Biomedical and Health Institutional Review Board
Principal Investigator: Mark Skidmore

Title: National Survey of Covid-19 Health Experiences

At the 7/24/2023 Michigan State University (MSU) Biomedical and Health Institutional Review Board (BIRB) meeting, committee members reviewed and discussed the study referenced above.

The Institutional Review Board (IRB) needed to determine whether there was noncompliance, and whether that noncompliance was serious and/or continuing. The IRB found that there was no noncompliance and no further action is needed.

On Thursday, February 2, 2023, the IRB received an allegation of noncompliance which required an investigation to determine whether the allegation had merit. After careful consideration, BIRB decided that there was enough flexibility in the HRPP manual regarding exempt protocols, that the changes made to the protocol did not require additional oversight and no modification was needed.

For More Information: See the HRPP Manual, including Section 9-2, Noncompliance (available at hrpp.msu.edu).

Contact Information: If we can be of further assistance or if you have questions, please contact us at 517-355-2180 or via email at IRB@msu.edu. Please use the MSU Study ID listed above on any correspondence which relate to this study. Please visit hrpp.msu.edu to access the HRPP Manual, templates, etc.
