

Vehicle Forensics Presentation in Australia

By Berla Staff on March 4, 2015

Both presentations will be the same, just in two different locations.

The presentations are focused on the vast amount of user data that can be acquired from vehicles. Data such as recent destinations, favorite locations, call logs, contact lists, SMS messages, emails, pictures, videos, social media feeds, and the navigation history of everywhere the vehicle has been. Many vehicles systems record events such as when and where a vehicle's lights are turned on, which doors are opened and closed at specific locations, and even where the vehicle is when Bluetooth devices connect.

Sydney

Friday, March 6th, 1000-1200

Level 8,

60 Carrington Street,

SYDNEY CBD NSW 2000

Canberra

Thursday, March 12th, 1130 – 230 (Includes a presentation from CRU on the Ditto Forensic FieldStation)

Robson Environmental – 140 Gladstone

St, Fyshwick ACT 2609
