Follow up questions by (6)(3) 10 USC130b/(b)(6) ginal sworn statement.

- (Q) Explain the medical concept used to support MFF operations on Kodiak DZ during the company's MFF OPT?

  (A) 10 USC 130b/tibil(6) would be located with the DZSO team at the DZSO shed. Once an injury is identified the DZSO would release one of us to that location to provide medical treatment. One medic will always stay with the DZSO in order to ensure operations can continue while providing adequate medical coverage. Once the medics assesses the patient, the decision is made on which platform and which facility to evacuate them. The options for the medical evacuation include Life Flight, ground ambulance or identified medical vehicle. The medical facility a casualty will go to is based on the best option for treating specific injury patterns. For Kodiak DZ, the primary medical facility is best for treating trauma injuries which are a threat to life, limb, or eyesight. The secondary medical facility is best for treating patients with non-life threatening injuries that are no threat to life, limb, or eyesight.
- (Q) What regulations do you follow when developing your medical plans?
- (A) Regimental Medical Directive RTC 350-29 Medical Standard Operating Procedures, which outlines Medical roles and responsibilities, medical support, and medical scope of practice. We also follow USASOC 350-2, the regimental directive is aligned with the requirements outlined in USASOC 350-2.
- (Q) When was the last rehearsal you conducted?
- (A) We do a rehearsal every trip in accordance with the Regimental Medical Directive. We confirm the medical plan on the ground prior to the execution of training. On this trip we conducted the rehearsal on 09 March 2019. The rehearsal consist of the entire DZSO party making sure routes are driven and the DZSO party knows how to notify the different medical platforms. There was nothing significant to report from the rehearsal on 09 March 2019.
