HEADQUARTERS, UNITED STATES ARMY SPECIAL OPERATIONS COMMAND 2929 DESERT STORM DRIVE FORT BRAGG, NORTH CAROLINA 28310-9110

March 9, 2022

Freedom of Information Act
Office

Mr. Jack Whitney

Tucson, AZ 85732

Dear Mr. Whitney:

This office is making an initial release of information from this investigation to you. Certain information which is exempt from the disclosure provisions of FOIA is being withheld. Specifically, a legal opinion is being withheld in accordance with the attorney-client privilege of FOIA Exemption 5 (5 U.S.C. § 552(b)(5)). The attorney-client privilege protects internal agency communications such as documents created by attorneys and legal advice from attorneys to clients. Additionally, the names, grades, and other personally identifying information of Department of Defense (DOD) personnel are withheld in accordance with FOIA Exemption 3 (10 U.S.C 130b); and 6 (5 U.S.C § 552(b)(6)). FOIA Exemptions 3 & 6 protects personnel and medical and similar files when the disclosure of such information would constitute a clearly unwarranted invasion of personal privacy.

I note that all redactions are made as an initial determination only. The final determination regarding the release of information from this investigation will be made by the Initial Denial Authority, the Office of The Judge Advocate General. A copy of this response has been sent to the Office of The Judge Advocate General, and that office will contact you about your FOIA request. You may contact the Office of The Judge Advocate General at the following address:

Office of The Judge Advocate General ATTN: DAJA-AL (FOIA) 2200 Army Pentagon, Room 3D548 Washington, DC 20310-2200

Some of the responsive documents included in the investigation were from the Pinal County Medical Examiner's office; and you may request a copy of those records directly from that agency at, medicalexaminers@pinalcountyaz.gov.

If you have any questions regarding this release, please contact Mr. Christopher Nesbitt, FOIA/PA Officer, christopher.nesbitt@socom.mil, (910) 432-9233.

Sincerely,

For David W. Treese

Paul Sparks Colonel, U.S. Army Deputy Chief of Staff, G-6

#### MEMORANDUM FOR RECORD

| SUBJECT: Investigat   | ion under AR 15-6 and AR 600-8- | 4, Military Freefall Death of SFC |
|-----------------------|---------------------------------|-----------------------------------|
| Ethan Carpenter,      | (b)(3) 10 USC 130b/(b)(6)       | Regimental Special Troops         |
| Battalion, 75th Range | r Regiment                      |                                   |

- 1. I conducted an initial review of the subject investigation into the military free-fall operation that led to Sergeant First Class (SFC) Ethan Carpenter's death on 15 March 2019.
- 2. I concur with the Investigating Officer's (IO) finding annotated in the DD Form 261 that SFC Carpenter was of sound mind and In The Line of Duty.
- 3. I direct further investigation as detailed in the corresponding appointment memo.

4. The point of contact for this memorandum is the USAS@C (b)(3) 10 USC 130b/(b)(6)

#### DEPARTMENT OF THE ARMY

HEADQUARTERS. 1ST SPECIAL FORCES COMMAND (AIRBORNE)
(b)(3) 10 USC 130b/(b)(6)

FORT BRAGG NORTH CAROLINA 28310-8500

AOSO-OSW 04 November 2019

MEMORANDUM FOR Commander, U.S. Army Special Operations Command, 2929 Desert Storm Drive, Fort Bragg, North Carolina 28310-9114

SUBJECT: Findings and Recommendations for Continuation of Army Regulation (AR) 15-6 Investigation into the Death of SFC Ethan Carpenter During Military Free Fall (MFF) Training

#### BACKGROUND.

- a. Appointment: On 02 August 2019, I was appointed as an investigating officer (IO) pursuant to AR 15-6 to conduct a continuation of the original administrative and line of duty investigation into the death of SFC Ethan Carpenter. Guidance from the Commanding General, USASOC, indicated that my review should include a thorough analysis of whether the circumstances alleged are accurate and merit correction. My initial suspense was 02 September 2019; two 30-day extensions were requested and granted to allow sufficient time for medical experts to review the evidence and provide expert opinion. The following specific questions were directed by the USASOC Commanding General as points of particular emphasis required of my investigation:
  - b. Provide a more specific timeline and greater fidelity on the following questions:
- (1) Who was the first Special Forces Medical Sergeant (MOS 18D) or qualified medic to arrive at the scene of the accident? How soon after the accident did they arrive? What did they observe on arrival? Did they provide medical treatment?
- (2) When did Emergency Medical Services (EMS) arrive at the scene of the accident? When did SFC Carpenter arrive at the hospital? Did treating physicians document medical observations and reach conclusions? If so, detail those observations and conclusions, and further elaborate on the impact and effectiveness of medical intervention.
- (3) Given the medical observations and conclusions, did the medical evacuation procedures have an impact in this case? Should they be altered or modified?

- (4) Any other matters deemed relevant and within the scope of either my appointment orders or those of the original investigating officer, dated 25 March 2019.
- c. Method of Investigation: I began my investigation by receiving a legal in-brief from on 06 August 2019, where I was briefed on the status of (b)(3) 10 USC130b/(b)(6) the investigation, notable findings, and the USASOC Commanding General's concerns that necessitated additional investigation. I was allowed to review the initial investigation, and was provided with a hard copy of the investigation and all associated materials for continued review and reference on 07 August 2019. From 08 August 2019 to 15 August 2019, I read the initial investigation, taking notes and establishing my investigative plan. On 26 August 2019 I conferred with (b)(3) 10 USC130b/(b) (at USASQ USC 130b/(b)(6) to brief him on my initial impressions, my investigative plan, and to receive guidance. I (b)(3) 10 USC 130b/(b)(6) contacted the on 27 August 2019 to obtain the USC 13 Willitary Free Fall (MFF) Standard Operating Procedure (SOP) and the Off-Post Training (OPT) Concept Brief mentioned but not provided in the initial investigation. I received these products on 04 September 2019 From 26 August 2019 to 06 September 2019 I attempted to contact the , to seek additional details and his medical opinion on a line of inquiry. I made contact with the Pinal County ME's Office on 06 September 2019 and received a sworn statement from (b)(6) on 12 September 2019. I sought additional medical opinion from the (b)(3) 10 USC 130b/(b)(6) Office on 25 September 2019, and was referred to the Joint Trauma System (JTS) for their trauma-related subject matter expertise. I made contact with medical experts at the JTS, including the on 01 October 2019, and explained the relevant details of the circumstances surrounding the training fatality to them. On 04 October 2019, I provided them with the relevant statements, the report, and additional details pertaining to the investigation for their review. On 30 October and 02 November 2019 I received their witness statements and reviewed their opinions. From 31 October to 03 November 2019 I drafted my findings and submitted my completed investigation for legal review on 04 November 2019.
- d. Summary: The medical opinions of the (b)(6) , experts at the Joint Trauma System (JTS), and the (b)(6) all allow that while the injuries SFC Carpenter suffered were ultimately fatal, it is possible that he survived for longer than the assertions in the initial investigation state anywhere from minutes to an hour. Given that ouscal personnel searched for SFC Carpenter for nearly two hours before locating him, it is possible that he expired as his teammates searched for him. Based upon the injuries SFC Carpenter sustained, and the uncertainty of which injuries were sustained upon his collision with 10 USC130b (and which, if any, injuries were sustained upon collision with the ground, it is impossible to

determine with any degree of certainty how long SFC Carpenter lived after receiving his injuries. Based upon the preponderance of medical evidence and the medical opinions of experts including Medical Examiners and Trauma Surgeons, it is possible, however unlikely, that medical intervention may have prolonged SFC Carpenter's life had it been delivered immediately. The extent of SFC Carpenter's injuries more than likely would have still led to death given the severity of his injuries. As SFC Carpenter would have and immediate surgical attention, neither of which could have occurred at the scene of the accident, evacuation to a hospital would have been necessary. As it is unlikely that any medical intervention would have saved SFC Carpenter's life, I do not find that medical evacuation procedures were a contributing factor to his death.

#### 2. FACTS:

a. Regarding Question(s) 1: "Who was the first Special Forces Medical Sergeant (MOS 18D) or qualified medic to arrive at the scene of the accident? How soon after the accident did they arrive? What did they observe on arrival? Did they provide medical treatment?"

(1())(3) 10 USC130b/(b)(a) Special Operations Combat Medic (SOCM) — qualified Ranger Medic, was the first qualified medic to reach SFC Carpenter (Exhibit(8))10 USC130b/(b)(6) (b)(3) 10 USC130 Idid(not reach SFC Carpenter until 0653 hrs, approximately one hour and fiftyone minutes after the first jumpers from SFC Carpenter's stick (Stick 1) began landing on Kodiak DZ (Exhibit B). Personnel from Stick 2, still on the aircraft, flew search patterns looking for SFC Carpenter from the ramp of the aircraft and were the first to spot SFC Carpenter's canopy near the end of the runway. The aircraft was given clearance to land and the jumpers of Stick 2 ran to the site of SFC Carpenter's body. making (3) 10 USC130b/(b) the first trained medic to reach SFC Carpenter (Exhibits B and L). As (3) 10 USC130b/(band the others had been rigged to jump as the second stick of jumpers on the aircraft, they did not have any medical equipment with them when they located SFC Carpenters (3) 10 USC130b/(bycas the first to assess SFC Carpenter's condition and determine necessary treatment, but it was not until one of the ground search teams, led arrived moments later with a medical kit, at (b)(3) 10 USC130b/(b)(6) approximately 0700 hours, that medical equipment arrived on scene (Exhibit H).

b. Regarding Question(s) 2: "When did Emergency Medical Services (EMS) arrive at the scene of the accident? When did SFC Carpenter arrive at the hospital? Did treating physicians document medical observations and reach conclusions? If so, detail those observations and conclusions, and further elaborate on the impact and effectiveness of medical intervention."

- (1) EMS was notified at approximately 0648 hours, about one hour and forty-six minutes after it was realized that SFC Carpenter was not accounted for (Exhibit B). EMS arrived on scene at approximately 0716 hours (Exhibit B), at which point it was relayed from the EMS flight medic to the attending physician the hospital in Tucson that SFC Carpenter had no respirations and no pulse (Exhibits H and L). At that time, the physician pronounced SFC Carpenter dead and advised cessation to all further interventions and treatments at approximately 0723 (Exhibits H and L). As a result of being pronounced dead at the scene of the accident, SFC Carpenter never actually reached a hospital for treatment, there were no treating physicians, and no documentation of observations or conclusions occurred save for the autopsy conducted by the Pinal County Medical Examiner's Office (Exhibit T).
- (2) Regarding the effectiveness of medical intervention, both (b)(6) of the Joint Trauma System (JTS) and (b)(6) of the JTS and the Armed Forces Medical Examiner's Office note that the medical interventions attempted were both appropriate and performed correctly (Exhibits D and E). Unfortunately, at the time the interventions were performed, SFC Carpenter already had no respiration and no pulse, making the chances of resuscitation and survival extremely low. It is possible, but highly unlikely, that had the interventions and resuscitation attempts been performed within minutes, SFC Carpenter may have survived long enough to reach a higher level of medical care (Exhibit D). The preponderance of evidence suggests that absent of immediate advanced resuscitative care, SFC Carpenter's injuries were likely non-survivable (Exhibit E).
- c. Regarding Question(s) 3: "Given the medical observations and conclusions, did the medical evacuation procedures have an impact in this case? Should they be altered or modified?"
- (1) Given the documented nature and severity of SFC Carpenter's injuries it seems unlikely that any medical intervention, unless performed almost immediately, would have saved SFC Carpenter's life. Even if located immediately, SFC Carpenter would have required a blood transfusion and surgery, treatments that would not have occurred at the point of injury and would have required evacuation to a hospital. The overwhelming medical opinion is that SFC Carpenter could have survived his injuries for a period of time as short as minutes to as long as one hour (Exhibits C, D and E). Civilian life flight personnel from Tucson did not arrive on scene until 28 minutes after they were notified (Exhibit B), meaning that a round trip flight to a higher level of care would have taken approximately 60 minutes, pushing the limits of even the most generous estimates of survivability for SFC Carpenter. Medical coverage and medical

evacuation procedures were adequate, were adhered to as planned and briefed, and were exercised appropriately. Based upon the preponderance of evidence, medical evacuation procedures likely did not have an impact on this case.

d. Regarding Question(s) 4: "Any other matters deemed relevant and within the scope of either my appointment orders or those of the original investigating officer, dated 25 March 2019."

# (1) Finding:

- a. In the initial investigation, the cause for the mid-air collision that occurred between SFC Carpenter and 10 USC130b while they were under canopy is described as "a dynamic turn caused by an uneven opening in 30 10 USC130b canopy." (Exhibit A, Page 15, Paragraph 3d). The initial investigation goes on to detail that "while not mentioned as a partial or total malfunction, this rare event occurs when one side of the canopy (the left in this instance) open while the other side (right side in this instance) is still filling up with air and causes the jumper to turn while not under his canopy."
- b. This explanation is factually incorrect and misleading) (3) 10 USC130b/ (DWN) sworn statement identifies that what he actually experienced was a premature brake line release (Exhibit P). This event is a known and identified partial malfunction and is mentioned as a part of every Emergency Procedures review during military free-fall prejump activities, with corrective action briefed should this malfunction occur. A premature brake line release also could cause a jumper to immediately enter into a violent turn in one direction, as it has the same effect as pulling a canopy's steering toggle (in fact the brake line) on one side, which is precisely how one steers a ram-air canopy like those found on the Military Javelin parachute(3) 10 USC130b performed corrective action exactly as briefed upon identifying the malfunction and is at no fault. By the time he corrected his malfunction and regained control of his canopy it was already too late, and he collided with SFC Carpenter (Exhibit P).
- c. It is worth noting that while some level of inquiry into who packed SFC Carpenter's parachute is apparent in the initial investigation, there is no follow-up as to who packed 3 10 USC130b/(parachute the one that experienced the partial malfunction and the ultimate cause of the collision. As such, there is no deeper investigation into the packing procedures and rigger checks associated with the packing of 3 10 USC130b/(parachute parachute. I was unable to collect additional information regarding 3 10 USC130b/(parachute packing after the fact. I also assessed that interviewing the packers at this juncture would not be helpful, as a significant amount of time has elapsed since the day in

question and the packers do not have an incentive to self-report known deficiencies. The objective evidence indicates the riggers and civilian contracted parachute packers present were all qualified to pack and inspect the Military Javelin parachute system. The training of the parachute riggers and civilian contract packers is well-documented and the sworn statements all state that all parachutes were packed in accordance with procedures and regulations, with rigger checks conducted as required.

# (2) Recommendation:

- a. While the training, qualifications, certification, and level of experience of the riggers and civilian packers involved in parachute packing for this training is well-documented in MFRs and sworn statements, based upon my experience it seems highly unlikely that a brake line would spontaneously come unstowed 10 USC130b/(b)(6) experienced had a parachute been packed and checked to standard.
- b. USASOC G3 and 75<sup>th</sup> Ranger Regiment riggers associated with military freefall training and operations should review internal procedures and processes to determine whether additional controls, procedures, or checks should be implemented when overseeing the parachute packing work of civilian contracted parachute packers.

# (3) Finding:

- a. No fewer than four personnel noticed a jumper (now known to be SFC Carpenter) flying his canopy in the wrong direction, contrary to what was planned, briefed, and expected, on his way to conduct an off-drop zone landing (b)(3) 10 USC130b/(b)(6) Exhibits O, U, and V). None of the personnel who noticed these events reacted to the information they observed. As military free-fall training is inherently high-risk, made more so by the conditions the Rangers were training in that morning combat equipped with oxygen mask, under NVGs, during period of darkness the fact that a jumper was flying in the wrong direction and acting in a manner other than what was planned, briefed, and expected should have been considered a potential emergency to all who witnessed it, and one that warranted a response.
- b. Typically, off-drop zone landings or "low jumper" procedures are mentioned during the pre-jump briefing before any military free-fall jump, ensuring that all jumpers understand actions to take should another jumper experience issues making it to the drop zone. Procedures typically state that if a jumper in the stick is seen to be heading off course toward an off-drop zone landing (off DZ landing), or if a jumper experiences some kind of equipment malfunction that precludes him from making it to

the drop zone (low jumper), another jumper will always follow that jumper and attempt to land with him. This is done because under canopy it can be difficult to know the circumstances causing the jumper to land off the intended drop zone, and the intent is to ensure that there is not an isolated or lost jumper incident, like the one experienced on 15 March 2019.

- C. The (b)(3) 10 USC 130b/(b)(6) Military Free-Fall (MFF) Standard Operating Procedure (SOP) has no detailed procedures for off-drop zone landings or "low jumper" procedures (Exhibit R). There are no search procedures outlined in the USC 13M/FF/(SOP though it is noted in the initial investigation that search procedures were discussed and rehearsed prior to the commencement of training in Arizona (Exhibit A).
- d. Although the jumpers of Stick 1 were conducting a Full Mission Profile (FMP) jump meant to simulate conditions found in a real-world scenario, the jumpers did not utilize communications systems on the jump as would have been required in combat or in a stand-off/High-Altitude High Opening (HAHO) jump profile.

# (4) Recommendation:

a. It is the overwhelming medical opinion of the experts who reviewed this case that SFC Carpenter likely would have expired from his injuries even if medical interventions had been performed immediately. However, had SFC Carpenter's injuries to locate him and begin treatment may have made the difference between life and death10 USC 1 leadership should codify in writing and adhere to an SOP for off-drop zone jumpers and low jumpers, particularly for jumps conducted during hours of limited visibility when determining the state of a jumper under canopy is made more difficult by darkness. Consider immediately activating a medical vehicle to follow a jumper conducting an off-drop zone landing from the moment his actions are noted until he lands, so as to be on site immediately in the event he is experiencing a medical emergency. Two jumpers in Stick 1 both noted SFC (b)(3) 10 USC130b/(b)(6) Carpenter flying away from the drop zone and yet did not respond or attempt to follow SFC Carpenter (Exhibits O and) (a) 10 USC 1 deadership should ensure off-drop zone landings and low jumper procedures are mentioned as a part of each pre-jump briefing and adhered to for all jumps. As any off-drop zone landing is a deviation from what is planned, briefed, and expected, and given the difficulty of determining the state of a jumper during period of darkness, any off-drop zone landing during period of darkness should be considered a potential emergency and responded to as such.

b. For all full mission profile (FMP) jumps and not just stand-off/HAHO jumps, (b)(3) 10 USC 1 deadership should ensure all parachutists jump with and utilize communications systems. Had all jumpers jumped with radios and utilized communications under canopy (as they would in combat), the jumpers in the stack and potentially those monitoring on the drop zone might have realized that SFC Carpenter was unresponsive when he did not check in over the radio upon deploying his canopy. Similarly, those monitoring the jump might have known sooner that a collision occurred had 10 USC 1300 km and a radio and been able to relay the details of his mid-air collision with SFC Carpenter. This might have allowed USC 1300 collisions to be better postured not just to deal with (b)(3) 10 USC 1300 /(b)(6) but to follow SFC Carpenter during his descent to his point of impact, allowing them to render aid more quickly.

# (5) Recommendation:

- a. USASOC G3 should establish a written policy directing all subordinate CSUs and CSCs to contact the Armed Forces Medical Examiner's (AFME) Office in the event of training-related or non-combat fatalities. Whereas civilian medical examiners typically only seek to establish a cause of death and determine whether it was the result of a homicide or some other cause, the AFME's personnel additionally seek to more thoroughly document injuries in greater detail in order to better informing line of duty and AR 15-6 investigations. In this particular instance, had the AFME been contacted to assist with the autopsy of SFC Carpenter, the severity of injuries and mechanisms of injuries would have been better documented and would have led to more definitive answers to the questions directed by the USASOC Commanding General.

| MEMORANDUM FOR            | (b)(3) 10 USC130b/(b)(6) | Office of Special Warfare (OSW), |
|---------------------------|--------------------------|----------------------------------|
| Fort Bragg, North Carolin | a 28310-9110             |                                  |

SUBJECT: Appointment as Investigating Officer – Administrative Investigation, Class A Training Incident, Military Free Fall (MFF), Marana, Arizona

#### 1. Appointment.

- a. You are hereby appointed as an Investigating Officer (IO) pursuant to Army Regulation (AR) 15-6, Procedures for Administrative Investigations and Boards of Officers, to expand on the investigation appointed on 25 March 2019 via orders directed to (b)(3) 10 USC130b/(b)(6) attached). Critically analyze the evidence gathered thus far and provide more fidelity regarding the death of SFC Ethan C. Carpenter as prescribed in Section 3 below. This is not an appointment of a new investigation. It is instead a continuation of the referenced investigation.
- b. Your IO responsibilities take precedence over all other military duties. You have 30 days from the date of this appointment to conduct this investigation. Coordinate any extension requests through your legal advisor IAW Section 7 herein. You may also request additional individuals or subject matter experts be appointed, in writing, to accompany and assist you in your investigation. The (b)(3) 10 USC 130b/(b)(6) is authorized to appoint assistant investigating officers and subject matter experts.
- 2. <u>General Instructions</u>. The purpose of an AR 15-6 investigation is to elicit facts. You are directed to conduct an investigation in to the matters set forth in paragraph 3, below. Your investigation should explore any issues or deficiencies with policy, procedures, resources, doctrine, training, and leadership that might have contributed to this incident. Upon completion of this investigation, you will complete a report of investigation that conforms to the requirements in paragraph 5 of this memorandum and AR 15-6. You will provide your report to your legal advisor, who will arrange for a legal review. Your report must be provided both in digital and hard copy.

SUBJECT: Appointment as Investigating Officer – Administrative and Line of Duty Investigations, Class A Training Incident, Military Free Fall (MFF), Marana, Arizona

# 3. Scope of Investigation/Specific Instructions.

- a. You are directed to continue investigating the facts and circumstances surrounding the 15 March 2019 incident resulting in the death of SFC Ethan C. Carpenter of the 75th Ranger Regiment (75th RR). This review should include a thorough analysis of whether the circumstances alleged are accurate and merit correction. You should also report whether any personnel should be held accountable for any shortcomings or failures, and whether any doctrine, policy, or procedures should be changed.
- b. I previously outlined specific matters for investigation in a memorandum dated 25 March 2019, directed to (b)(3) 10 USC130b/(b)(6) At a minimum, you will consider the specific matters detailed in Paragraph 4 of that memorandum, together with the following:
- (1) Subparagraphs 4b(1), 4b(5), and 4b(6) of the aforementioned memorandum call for a timeline of events leading up to the accident, details concerning the medical coverage plan, and details on initial care rendered by medics, respectively. Provide a more specific timeline and greater fidelity on the following:
- (a) Who was the first Special Forces Medical Sergeant (MOS 18D) or qualified medic to arrive at the scene of the accident? How soon after the accident did they arrive? What did they observe on arrival? Did they provide medical treatment?
- (b) When did Emergency Medical Services (EMS) arrive at the scene of the accident? When did SFC Carpenter arrive at the hospital? Did treating physicians document medical observations and reach conclusions? If so, detail those observations and conclusions, and further elaborate on the impact and effectiveness of medical intervention.
- (c) Given the medical observations and conclusions, did medical evacuation procedures have an impact in this case? Should they be altered or modified?
- (2) Any additional matters you deem relevant and within the scope of either this appointment or the previously noted 25 March 2019 order. Please consult with any necessary experts and the (b)(3) 10 USC 130b/(b)(6) in gathering the above information and drawing the required conclusions.

|         | (b)(3) 10 USC130b/(b)(6)                 | to schedule  | a legal bi | rief before making any   |
| efforts | on your investigation.                   |              |            |                          |

#### b. Evidence Collection.

- (1) Conduct this investigation using the guidance outlined in AR 15-6, chapter 5.
- (2) Witnesses.
- (a) To the extent possible, witness statements will be written and sworn on a DA Form 2823 (Sworn Statement). If it is impracticable to obtain a written and/or sworn statement from a particular witness, you will attest to the accuracy of any transcription or summary of such witness testimony in whatever form it appears within your report of investigation. In accordance with AR 340-21, provide a Privacy Act statement to a witness if you do not use a DA Form 2823 to record the statement of that witness, and your report will be filed in a system of records from which it can be retrieved by reference to the name or other personal identifier of that witness.
- (b) No U.S. military or civilian witness can be ordered to provide information that may incriminate him or herself. You may order a military or Federal Government civilian employee witness to provide a statement if you believe that they have relevant information that would not incriminate themselves. If, in the course of your investigation, you suspect a person may have engaged in criminal conduct, you will consult with your legal advisor. Under no circumstances should you attempt to elicit any information from a suspect without first advising that person of his rights under Article 31, UCMJ, or the Fifth Amendment of the U.S. Constitution, as appropriate. Document your rights advisement and witness waivers of their Article 31 or Fifth Amendment rights on a DA Form 3881 (Rights Warning Procedure/Waiver Certificate).
- (3) Where a civilian employee is a member of a bargaining unit and reasonably believes that the inquiry could lead to disciplinary actions against him or her, the employee may have a representative from the bargaining unit present during questioning. You will consult with your legal advisor if you have any questions regarding these procedures. You and your legal advisor will consult with the USASOC (b)(3) 10 USC 130b/(b)(6) at (b)(3) 10 USC 130b/(b)(6) (b)(6) (c)(7) (c)(7)

SUBJECT: Appointment as Investigating Officer – Administrative and Line of Duty Investigations, Class A Training Incident, Military Free Fall (MFF), Marana, Arizona

(4) Should you determine in the course of your investigation that a Soldier's status had changed from favorable to unfavorable, as defined in AR 600-8-2, Suspension of Favorable Personnel Actions, you must consult with your legal advisor immediately, to ensure that a flag is initiated against that Soldier.

# 6. Report of Investigation.

- a. General. Your report of investigation will be written, Use DA Form 1574-1, Report of Proceedings of Investigation Officer, and attach all required enclosures and exhibits.
  - b. Assembly. Your completed AR 15-6 investigation will include:
    - (1) This memorandum of appointment;
    - (2) A completed DA Form 1574-1, Report of Proceedings by Investigating Officer;
    - (3) An Executive Summary.
    - (4) A detailed chronology of the daily actions you took during the investigations;
    - (5) An index of all attached exhibits;
    - (6) All exhibits, labeled and numbered;
    - (7) A list of the witnesses you interviewed;
- (8) If applicable, proper classification marking for each paragraph, page, and exhibit included within your report of investigation; and
  - (9) A memorandum with your findings and recommendations:
- (a) Findings. You will reach your findings by a preponderance of the evidence that you gather. A finding is clear and concise statement of facts that can be readily deduced from evidence in the record. In your report, develop specific findings and cite the evidence that supports your findings. If evidence conflicts (e.g., conflicting witness statements), make a finding as to which evidence is more credible and why you believe it to be more credible.

SUBJECT: Appointment as Investigating Officer – Administrative and Line of Duty Investigations, Class A Training Incident, Military Free Fall (MFF), Marana, Arizona

- (b) Recommendations. Based on your findings, make recommendations as to what changes, in any, are needed in terms of policy, procedures, resources, doctrine, training and leadership to avoid incidents of this nature in the future, as well as recommendations consistent with your findings concerning other items your investigation revealed. Each recommendation will cite to the finding that supports it and should comport with the guidance in AR 15-6.
- (10) Submission. Submit your report of investigation in two hard copies and an electronic copy after you have obtained a legal review. You may not release information related to this investigation to anyone, other than your legal advisor, without my prior approval.

|          | 7. Extensions. The             | (b)(3) 10 USC130b/(b)(6) |                |                          |           | is authorized to   |  |  |

27 September, 2019

MEMORANDUM FOR (3) 10 USC 130b/(b) Idnited States Army Special Operations Command (Airborne), Fort Bragg, North Carolina 28310-8500

SUBJECT: Extension Request, Army Regulation (AR) 15-6 Investigation – MFF Fatality, SFC Carpenter

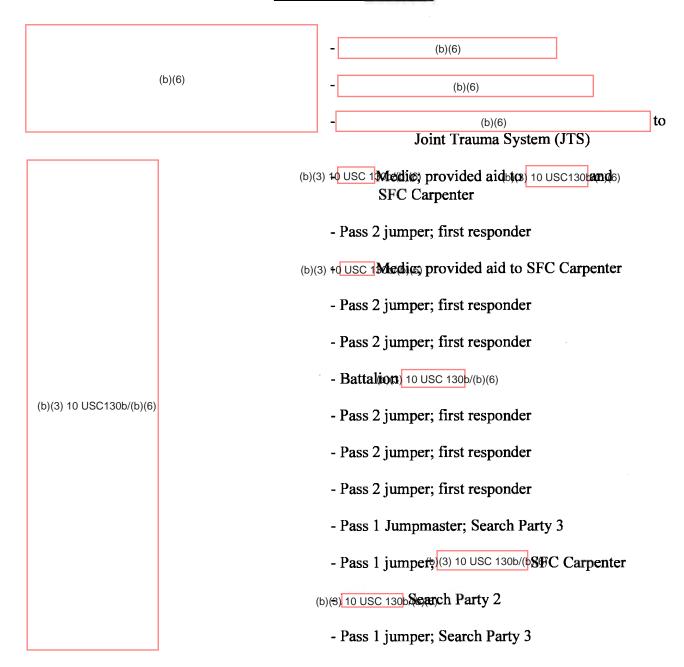

- 1. I request an extension for completing the subject AR 15-6 investigation. The original suspense date was 01 September 2019, with one extension granted by the USASOC SJA until 01 OCT 19. I request the suspense date be extended to 31 October 2019.
- 2. The investigation was appointed on 02 August 2019. I received a copy of the appointment memorandum on 02 August 2019 and received an initial legal brief on 06 August 2019. I received the original investigation materials on 07 August 2019. The reason for my request is because medical opinions I requested from the USASOC Surgeon's office fall outside the expertise and medical scope of the Surgeon's office.

  The (b)(3) 10 USC 130b/(b)(6) has advised that I should contact the (b)(6)

  (b)(6) to interview them as experts and obtain their expert medical opinion. These additional interviews are necessary to answer several of the Commanding General's directed questions regarding the investigation and medical treatment. Additional time is necessary to interview witnesses, complete my report, and obtain a legal review.

| 3. I am the point of contact at | (b)(3) 10 USC | 130b/(b)(6)              |

| (Q2) In your professional medical opinion, do you believe that SFC Carpenter expired from the injuries he received within a time span of ten minutes?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                |
| As above in Q1, it is difficult to determine the exact time of death. In my opinion, based on the totality of injuries sustained, there were multiple severe injuries that rendered SFC Carpenter unconscious and death most likely occurred in minutes and not hours.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                |
| (Q3) Within a reasonable degree of medical certainty, could any of the injuries sustained by SFC Carpenter have resulted from an uncontrolled parachute landing and subsequent impact with the ground at a high rate of speed?                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |                                                                                                                |
