ADDRESS

DOB: 01/04/1983

SSN: XXX-XX-[Redacted]

FILED
JAN - 9 2024
NOBLE COUNTY COURT

Detective Sgt. Kelly McGilton
(Name)

Being first duly sworn according to law, says that he

is the complainant in the attached complaint, and further states the following in support thereof:

Your Honor,

On January 4, 2023, information was received from Shenandoah Elementary School regarding concerns of seven-year-old, A.R. ^{AAR} s mother, Pamela Reed, has told and even provided documentation to the school that A.R. was diagnosed with cancer. Pamela also informed the school that A.R. was blind in her right eye and would be having a port implanted in the near future for her cancer treatments. The school expressed concerns after they conducted an eye exam on ^{AR}, as they did with all students, . The school further stated that A.R. missed over 280 hours of school for this year already, which was another concern.

A Shenandoah School Administrator contacted ^{Provider} i and confirmed that A.R. did not have cancer or leukemia, and she never had cancer or leukemia. It was also confirmed that the document Pamela submitted saying that A.R. was diagnosed with cancer was fraudulent.

Redacted
AR

Pamela Reed reported to the [REDACTED], team that A.R. was having seizures.

Redacted
AR

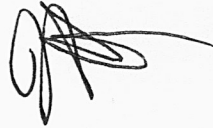

Pamela posted numerous statements on Facebook about A.R. having cancer. There have been fundraisers, and donations collected to assist the Reed's with **AR'S** "cancer" treatments. Zeps Against Cancer Organization reported they gave the Reed family around \$8,000 to help with the expenses of cancer treatments for **AR**.

On January 8, 2024, Pamela Reed was interviewed. Pamela first lied but then admitted that A.R. did not have cancer and she posted those statements because she liked the support given as a result. Pamela admitted that she had shaved **AR'S** hair, and it was never because of cancer treatment. Pamela also admitted that she obtained seizure medications because of what she reported to the doctors. Pamela acknowledged that A.R. did not likely need the medication and the seizures she reported were more of

“staring sessions.” Pamela showed the medications she had in the home that were prescribed to A.R. and some appeared to be full, while others were not.

Pamela further admitted that she altered documents from the PROVIDER to say that A.R. had leukemia. She stated she created the document while at her home in Noble County, Ohio, and used a tablet to do so. Pamela stated she had sent the altered document to the school to show that A.R. had cancer.

Pamela and D. have another daughter, 10-year-old A.R. (same initials), who also lived in the home. Both children were home during the interview with Pamela and believed that seven-year-old A.R. had cancer and was severely ill. Pamela stated that her husband, D. Reed was not home. As a result of the findings, both children were removed as there were concerns for their safety. I felt there was a substantial risk to the health and safety of both children.

Redacted 

Pamela was arrested for Theft and booked into the Noble County Jail.
