

## CNN New Hampshire Primary Poll Methodology

These findings are based on the latest CNN New Hampshire Primary Poll, conducted by the University of New Hampshire Survey Center. Two thousand, three hundred and forty-eight (2,348) Granite State Panel members completed the survey online between January 16 and January 19, 2024. The margin of sampling error for the survey is +/- 2.0 percent. Included in the sample were 1,242 likely 2024 Republican Primary voters (margin of sampling error +/- 2.8 percent). There were 1,210 unweighted likely Republican Primary voters. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. These MSE's have not been adjusted for design effect. The response rate for this CNN New Hampshire Primary Poll is 38%. The design effect for the survey is 2.1%.

The Granite State Panel is a probability-based web panel of New Hampshire residents. Approximately 7,500 New Hampshire adults have been recruited from phone, text-to-web, or mail-to-web surveys sent to randomly-selected phone numbers or addresses. Panelists are then asked to participate in online surveys sponsored by the UNH Survey Center.

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the NH Secretary of State and to 2020 election results in New Hampshire. Surveys were taken in English, all respondent data included passes Qualtrics data quality checks, and single-use survey links were used to prevent multiple submissions by respondents. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions. Due to rounding, percentages may not sum to 100%. All coding of open-ended responses is conducted by human coders.

For more information about the methodology used in this CNN New Hampshire Primary Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
