

- 1. The file contains parts 1,2,3,4,5. Can you tell me what makes these files different? Is it the size of file? Is it the year groupings?**

The Form T3010, Registered Charity Information Return, evolves over time and, as a result, the information contained in the return, as well as the various line numbers within the return, may vary from year to year. Therefore, the data we provided was separated by the versions of the Form T3010 that were in use for the specified year. The line numbers for the current version can be found in Guide T4033, Completing the Registered Charity Information Return.

For the older versions of Form T3010, you may associate the line numbers in our dataset with the line numbers in the actual returns by consulting the copies of the archived returns we provided in our previous response, or by consulting archived versions of Guide T4033, here.

- 2. If it is simply the size of the file, are you able to provide the entire file by disc and send to the address below?**

N/A

- 3. The first column is designated by FPE. Can you tell me what that designation stands for?**

The column "FPE" represents the fiscal period end in which the charity filed its last return prior to its formal closure. It is important to note that the last T3010 filed is not always for the year immediately preceding the effective date of closure. For example, this can occur when an organization was revoked in 2019 but did not file an information return since 2016. Therefore, Column A would show the 2016 fiscal period as it was the last return filed by the organization prior to its closure.

- 4. If I remember correctly, the initial request asked whether the old classification code for denominations/faith traditions could be used. This appears to be entirely the new one. This new category does not differentiate between a lot of the smaller religious groups (something which would be helpful for us to do). Would it still be possible to do this?**

We apologize for the oversight, please find attached the complete list of Christian churches that were closed during the specified period, along with the detailed category codes from the previous classification system.

- 5. The last tab (BN with return never filed). Does this mean they opened up a charitable registration never filed and the charitable registration was closed as a result (based on reason codes)?**

The last tab shows the organizations that did not file a T3010 return for the entire period it was registered.

- 6. Our request to used the old designation codes as opposed to the new ones instituted in 2019 if possible. Can you confirm whether this is possible or not?**

Response provided at question 4, above.

- 7. In years 2014, 2018 and 2019 we have observed a disproportionate number of closures relative to other years – primarily in congregations with reason code 28 – terminated. Can you provide a further definition of “terminated”? We assume this action has been initiated by the charities directorate but we are unclear of what reasons might trigger “termination”.**

- The reason code 28 “terminated” is used in situations where organizations have amalgamated.
- An amalgamation takes place when two or more charities join together as one body, by bringing their memberships, assets, and liabilities into the entity that emerges.
- The original charities do not cease to exist or dissolve, they simply continue their existence within a single entity - the amalgamated charity.
- The newly amalgamated charity retains and uses the business number (BN) of one of the amalgamated organizations. The BNs belonging to the other amalgamated organizations are then “terminated.”
- The amalgamation process is initiated by the charities, who have decided to join together as one body, and processed by the Charities Directorate of the Canada Revenue Agency.
- Given that the amalgamation process is initiated by the charities, it is the charities’ responsibility to inform the Charities Directorate of the reorganization that is taking place.

- 8. Were there any special initiatives during these years to review charitable registrations of churches that would have revealed previously unidentified congregations in this closure category?**

No, there have not been any special initiatives or projects during these years to review charitable registrations of churches.

- 9. As well, the BN with no T3010 file only has the account name – is it possible to include the legal name or this file as well?**

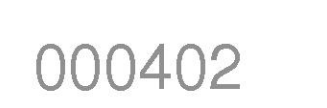

The legal name column was added to the attached “No T3010 Legal name” dataset.
