MPS Organizational Chart

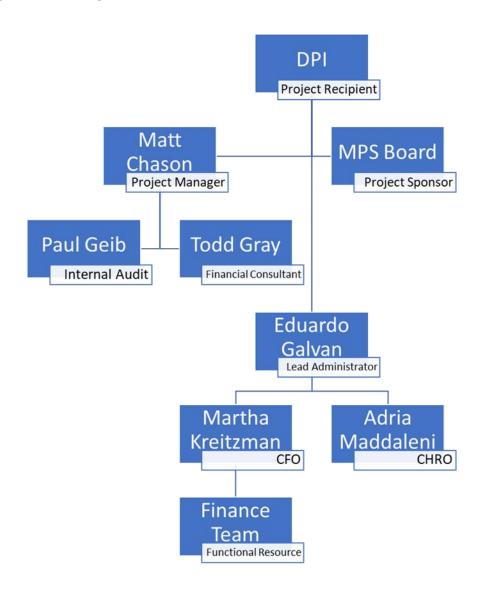

Office of Finance – Current Staffing

Note: The (c) after an employee name denotes a contracted employee and is considered currently vacant for the purposes of permanent staffing.

Project Management Organization Chart for Corrective Action Plan (as of June 11, 2024)

Project Management Team Roles, Functions, Responsibilities, and Risks

DPI (Department of Public Instruction): Overdue items will be submitted to the DPI team. DPI will receive updates on the progress of the Corrective Action Plan and provide direction to MPS on monitoring and reporting requirements.

Baker Tilly: External Auditor working to address outstanding items and complete the contracted work to issue FY23 audits. They are committed to completing FY23 activity and are exploring the possibility of continued contractual services as the district's external auditor for FY24 activity.

MPS Board of School Directors: To review and accept the results of the FY23 audits, approve the hires of Finance staff vacancies, appoint interim staff and consultants to address outstanding financial reports and select an external auditor for FY24 activity should the current external auditor not exercise the contract extension terms.

Office of Accountability and Efficiency: Senior Director Matt Chason reports directly to the Board. Senior Director serves as Project Manager for the development of the Corrective Action Plan. Senior Director directs the Consultant, Todd Gray's work plan and day-to-day activities. Senior Director has oversight of the MPS Internal Audit function and is the point of contact between Baker Tilly and DPI and the Board.

Internal Audit: Audit Manager Paul Geib supports the Senior Director in their role as Project Manager for the development of the Corrective Action Plan. Audit Manager assists the Consultant, Todd Gray as liaison with key Finance staff, Baker Tilly team, and technology systems support staff. Conducts operational and process improvements audits and reviews and supports the external audit team as the external auditor contract monitor.

Consultant: Todd Gray. Tasked with assisting and coordinating resources in completing the Corrective Action Plan. Assesses the current Finance deliverables, key Finance staff completing the deliverables, Finance staff needs, adherence to timelines, and identification of other external supports that can be brought in to assist MPS Finance operations.

Lead Administrator: Regional Superintendent Eduardo Galvan will be responsible for the Administration's follow up and follow through on outstanding deliverables and be a point of contact with the Project Management Team for the implementation of the Corrective Action Plans. The Lead Administrator will receive updates from the Finance staff on progress made and challenges faced and will communicate this information to the Project Management Team.

Project Management Team Roles, Functions, and Responsibilities Continued

Chief Financial Officer: The current Chief Financial Officer position is being evaluated with a likelihood of a change in leadership. A plan to identify an Interim replacement is underway and all available options will be examined, including an appointment of a limited term employee, the use of retired MPS Finance staff, City of Milwaukee Comptroller's office staff or outside accounting professionals. This position when filled will lead the Finance Team's various functional areas and ensure compliance with all DPI reporting requirements and timelines, the recruitment and hiring of Finance Team vacancies, with cooperation from Human Resources, and the completion of Standard Operating Processes for all Finance tasks.

Finance Team: There are currently key vacancies in the Financial Reporting service area. School Accounting, Grants Accounting, and Payroll areas have greater staffing stability and institutional knowledge. The Budget services area has experienced staffing turnover. The Financial Reporting service area is the key point of contact with the Baker Tilly audit team and the current staff have less than three years' experience in their role. As a result, the Baker Tilly team possess more institutional knowledge in some instances.

Human Resources: Will provide job description updates, assist in expediting recruiting and hiring efforts for Finance services vacancies, report to the Board of School Directors the progress in identifying new hires, and study and provide recommendations to the Board on the adequacy of compensation levels for Finance positions.

External Auditor Contract (Risk): Baker Tilly (current external auditor) may not continue as external auditor for FY24 activities. The risk trigger event will be notification by Baker Tilly of definite non-renewal. If trigger event occurs:

- Immediately notify DPI
- Immediately engage new external auditor from state approved contract list
- Develop and execute contract with new external auditor
- Develop new schedule of audit activities with external auditor and DPI

Project Monitoring and Controlling

Project monitoring and controlling activities will be managed by Matt Chason (Project Manager)

Overdue Financial Data

The corrective action plan steps for the overdue financial data are short-term, high priority and high urgency concerns. It is expected that DPI, Baker Tilly, the MPS Finance Department Team, the MPS Office of Accountability and Efficiency, and the MPS Internal Audit will collaborate to not only ensure the overdue financial data is completed and satisfactorily provided to DPI, but on a move forward basis, compliance and process improvements will assist in rebuilding and restructuring the Finance Department operations. This effort will include the recruitment and hiring of at least twelve vacant Finance Department positions, and identification of a realistic timeline to ensure the current MPS BusinessPlus financial system converts financial data to the DPI's Wisedata system.

Note: The work breakdown structure (WBS) numbering begins on 2 to reflect alignment to the WBS on the project plan.

Compliance and Process Updates

The corrective action plan steps for the compliance and process updates category are medium to long-term. They represent matters of compliance and process improvement that, upon implementation, ensure sustainability. It is expected that DPI, Baker Tilly, the MPS Finance Department Team, the MPS Office of Accountability and Efficiency, and the MPS Internal Audit will collaborate to not only ensure the overdue financial data is completed and satisfactorily provided to DPI, but on a move forward basis, compliance and process improvements will assist in rebuilding and restructuring the Finance Department operations.

MPS Finance Staffing Vacancies

Financial Accounting Manual

| WBS# | Issue | | | | |
|-------|--|------------------|------------|-------------------------|--|
| 3.6 | Financial Accounting Manual: Analysis: MPS Finance staff have relied almost exclusively on the institutional knowledge and experience of financial reporting staff who have completed this work for, in some instances, decades. Over the years, these staff have turned ove and this knowledge and experience has left with them. Additionally, little formal documentation related to internal accounting policies exists for reference or guidance. Outside consultants were brought in to document work tasks and standardize processes in 2023, and it is unknown what progress has been made in these efforts. A review should be completed to obtain their work product and any refinements and enhancements should be made to assist new Finance staff or consultants who will assist the district in the future. | | | | |

MPS Finance Employee Training

| WBS# | Issue | | | | |
|---------|--|---------------------------|-----------|-----------------------|--|
| 3.7 | MPS Finance Employee Training: Analysis: Finance staff do not have a clear training path that educates them on the functions and abilities of the MPS financial system. Additionally, it has been reported that staff do not understand how transactions and posting activity impact other areas in the department, leading to rework. Lastly, recent experience suggests that lack of knowledge of accounting and WUFAR standards has led to errors in reporting, untimely responses to audit inquiries, and requirements not being met. Challenges: With significant turnover in key Finance positions, and lack of institutional knowledge or comprehensive standard operating procedures, there are few "go to" internal Finance staff who can identify specific training needs and tasks that can be streamlined and the training needs that could be employed. | | | | |

| 3.7.3.3 | Implement continuing education proposal | MPS Finance | 8/22/2024 | | |

MPS Board Audit Committee

| WBS# | Issue | | | | | |
|-------|---|----------------------------------|-----------|-----------------|--|--|
| 3.8 | Issue: School internal audit functions in districts comparable to MPS are typically led by a Chief Audit Executive (CAE). MPS followed this model for over thirty years until July 1, 2010, when the position was eliminated through the budget amendment process. At that time, the current Audit Manager had been serving as the Interim Chief Auditor for 26 months (about 2 years), had participated in the recruitment and hiring process and was selected to be the Chief Auditor. The current Audit Manager has led Audit Services for the past 16 years, successfully undergoing five external peer reviews with the highest ratings of assurance received. The current Audit Manager has served as a member of the Association of Loca Government Auditors (ALGA) Peer Review Audit Committee for the past 15 years, and the ALGA School Auditors subcommittee, and as a member of the Council of Great City Schools, School Auditors subcommittee. Analysis: To enhance the independent nature of the MPS Internal Audit function, and to provide the Board with an objectiv independent, unbiased, and knowledgeable audit advisory body, it is imperative that the district establish an independent audit committee that the re-established Chief Auditor position reports to functionally. A five-member audit committee would be comprised of one MPS Board member and four external audit professionals with input from the City of Milwauke Mayor's office, with all committee members appointed by the MPS Board of School Directors. The Audit Committee would support Internal Audit operations and advise the Board on both external and internal audit matters. Challenges: Identifying qualified audit committee members who are willing to serve in this role may be difficult. | | | | | |
