Navy TAGOS-25 Ocean Surveillance Shipbuilding Program: Background and Issues for Congress

Introduction
The Navy in FY2022 procured the first of a planned class of seven new TAGOS-25 class ocean surveillance ships. Under the Navy’s FY2025 budget submission, the Navy is proposing to defer procurement of the second TAGOS-25 class ship from FY2025 to FY2026. The Navy’s proposed FY2025 shipbuilding budget requests no FY2025 procurement funding for the TAGOS-25 program.

Meaning of TAGOS Designation
In the designation TAGOS (also written as T-AGOS), the T means the ships are operated by the Military Sealift Command (MSC); the A means they are auxiliary (i.e., support) ships; the G means they have a general or miscellaneous mission; and the OS means the mission is ocean surveillance.

TAGOS Ships in the Navy
TAGOS ships (Figure 1 and Figure 2) support Navy antisubmarine warfare (ASW) operations. As stated in the Navy’s FY2025 budget submission, TAGOS ships “gather underwater acoustical data to support the mission of the Integrated Undersea Surveillance System (IUSS) by providing a ship platform capable of theater anti-submarine acoustic passive and active surveillance… The two current classes of [TAGOS] surveillance ships use Surveillance Towed Array Sensor System (SURTASS) equipment to gather underwater acoustic data.” Figure 3 shows a simplified diagram of a TAGOS-25 ship with its SURTASS arrays.

Current TAGOS Ships
The Navy’s five aging TAGOS ships include four Victorious (TAGOS-19) class ships (TAGOS 19 through 22) that entered service in 1991-1993, and one Impeccable (TAGOS-23) class ship that entered service in 2000. As of the end of FY2023, all five were homeported at Yokohama, Japan. The ships use a Small Waterplane Area Twin Hull (SWATH) design, in which the ship’s upper part sits on two struts that extend down to a pair of submerged, submarine-like hulls (Figure 2). The struts have a narrow cross section at the waterline (i.e., they have a small waterplane area). The SWATH design has certain limitations, but it has features (including very good stability in high seas) that are useful for SURTASS operations.

TAGOS-25 Program

Quantity, Schedule, and Design

The Navy wants to procure seven TAGOS-25 class ships as replacements for its five in-service TAGOS ships. The first TAGOS-25 class ship was procured in FY2022. Under the Navy’s FY2025 budget submission, the Navy wants to procure the second through fifth ships in the class in FY2026-FY2029 at a rate of one ship per year. The Navy’s notional design for the TAGOS-25 class (Figure 4) employs a SWATH design that would be larger and faster than the in-service TAGOS ships (see Table 1).

The Navy’s desire to replace the five in-service TAGOS ships with seven larger and faster TAGOS-25s can be viewed as a response by the Navy to the submarine modernization efforts of countries such as China and Russia. For more on China’s submarine modernization effort, see CRS Report RL33153, China Naval Modernization: Implications for U.S. Navy Capabilities—Background and Issues for Congress, by Ronald O’Rourke.

Procurement Cost

The Navy estimates in its FY2024 and FY2025 budget submissions that the first ship in the class will cost $789.6 million to procure—an increase of $355.2 million, or 81.8%, from its previously estimated cost. The Navy’s FY2024 budget submission stated that this cost growth is “due to several factors affecting shipbuilding prices including direct material inflation, supply chain challenges, and increased non-recurring engineering costs.”

Contract Award

On May 18, 2023, the Navy announced that it had awarded Austal USA, a shipyard in Mobile, AL, a $113.9 million fixed-price incentive (firm target) and firm-fixed-price contract for detail design of the TAGOS-25 class. The contract includes options for the detail design and construction of up to seven TAGOS-25s plus associated work. Exercising the options would bring the cumulative value of the contract to about $3,195.4 million (i.e., about $3.2 billion). The Navy stated that it received two offers (i.e., Austal’s offer and one other offer).

On May 30, 2024, the Navy awarded Austal USA a $516 million contract modification, exercising an option for long-lead time material and detail design and construction (DD&C) of the first ship in the class.

Issues for Congress

Potential issues for Congress include the reasons for the 81.8% cost growth on the first ship in the class, the risk of further cost growth on the first ship, why the Navy wants to defer the procurement of the second ship from FY2025 to FY2026, and why the Navy in its FY2025 budget submission appears to have increased the estimated procurement costs of the sixth and seventh ships in the class (which are to be procured after the FY2026-FY2029 Future Years Defense Plan [FYDP])—but not those of the second through fifth ships in the class (which are to be during the FYDP)—to figures that appear consistent with the cost growth and resulting estimated $789.6 million procurement cost of the first ship in the class.

Procurement Funding

The Navy’s proposed FY2025 shipbuilding budget requests no FY2025 procurement funding for the TAGOS-25 program. The House Armed Services Committee, in its report (H.Rept. 118-529 of May 31, 2024) on the FY2025 National Defense Authorization Act (NDAA) (H.R. 8070); the Senate Armed Services Committee, in its report (S.Rept. 118-188 of July 8, 2024) on the FY2025 NDAA (S. 4638); and the House Appropriations Committee, in its report (H.Rept. 118-557 of June 17, 2024) on the FY2025 DOD Appropriations Act (H.R. 8774), recommended no FY2025 procurement funding for the TAGOS-25 program. Section 8094 of H.R. 8774 continues U.S. content requirements for all TAGOS-25 auxiliary equipment, including pumps and propulsion shafts.
